. .;

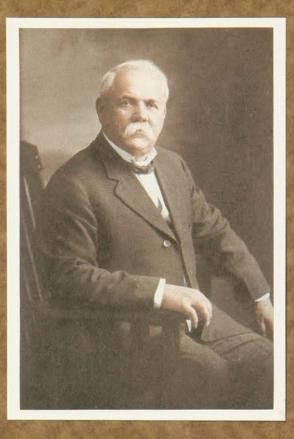

Copyrighted for The Class of 1914 By Thomas J. Harris, Allen P. Davidson, Russell B. Williamson

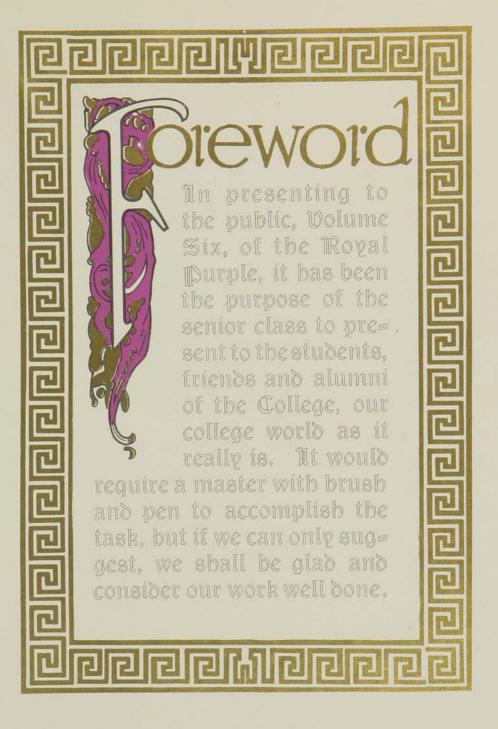

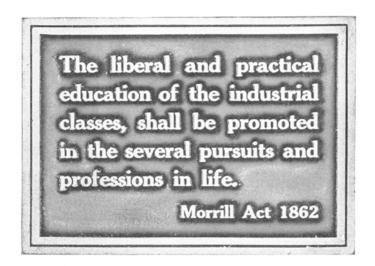

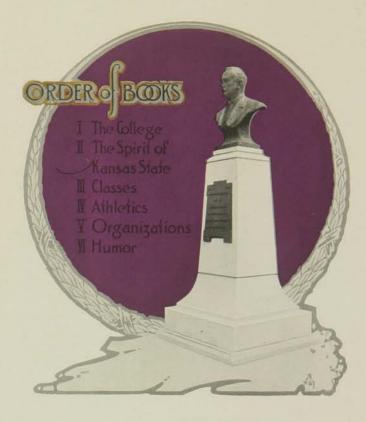

This book is dedicated

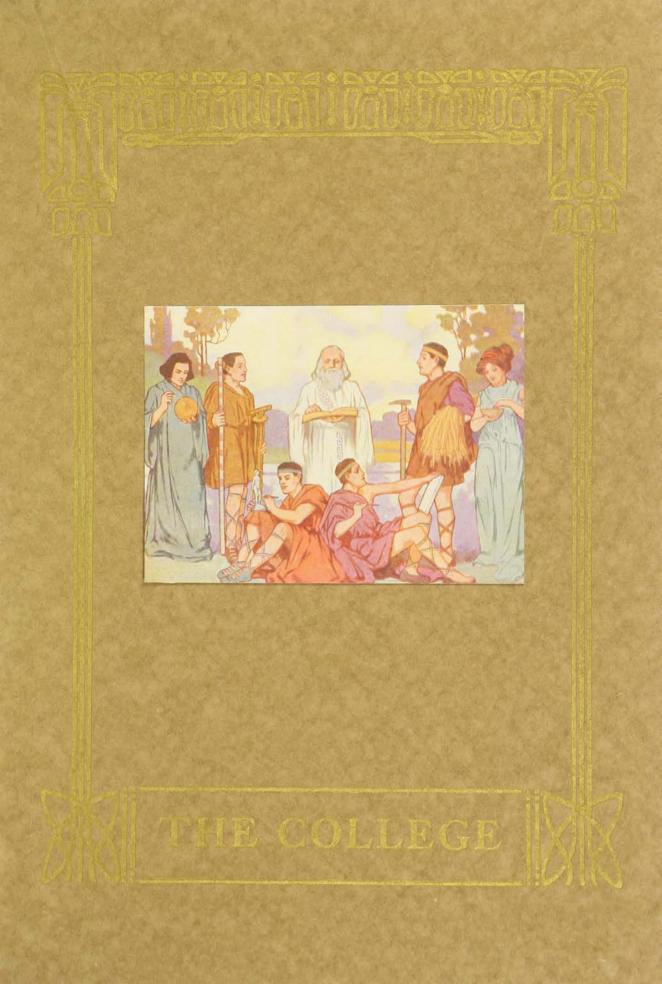

to Dr. John D. Walters

whose many years of service at the college has won the lasting admiration and friendship of the student body.

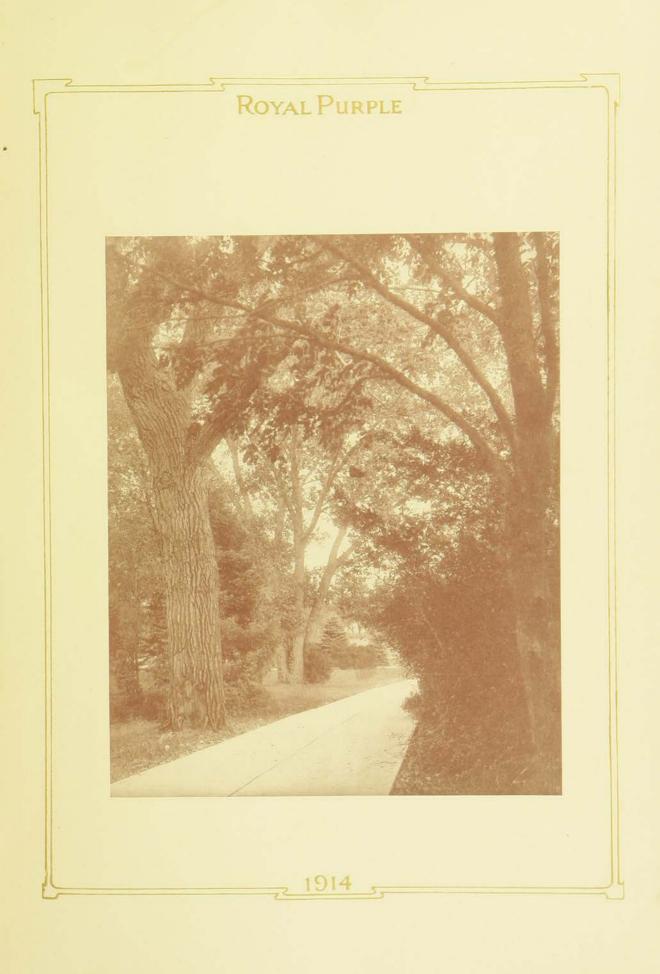

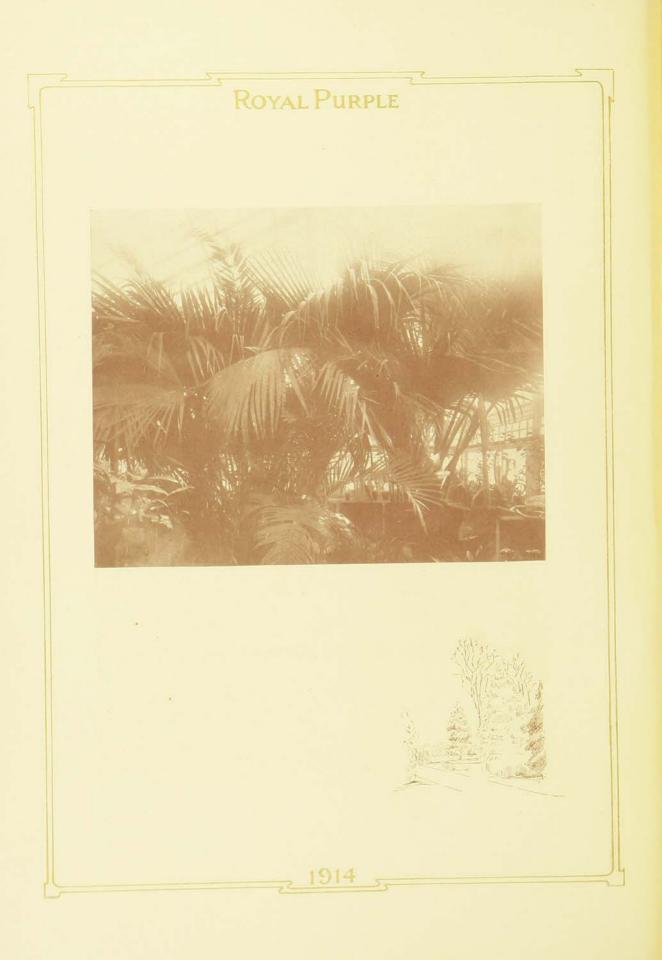

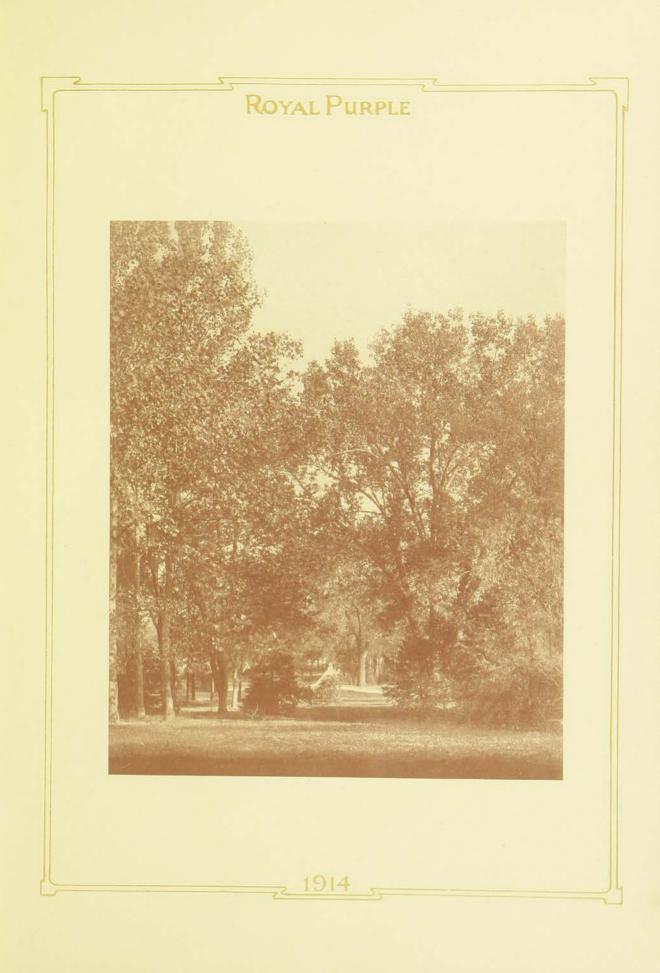

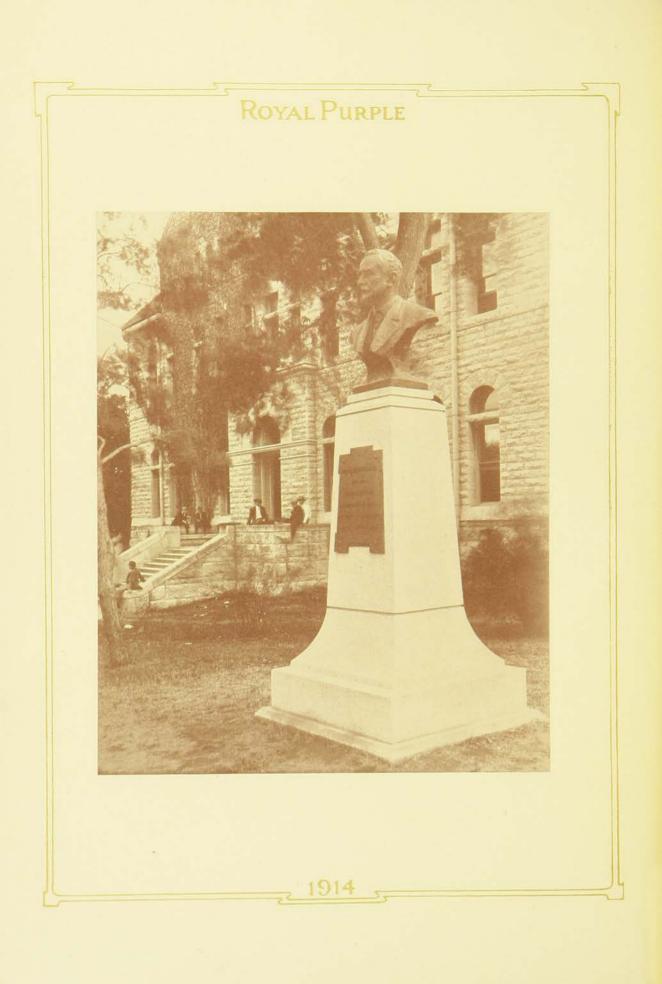

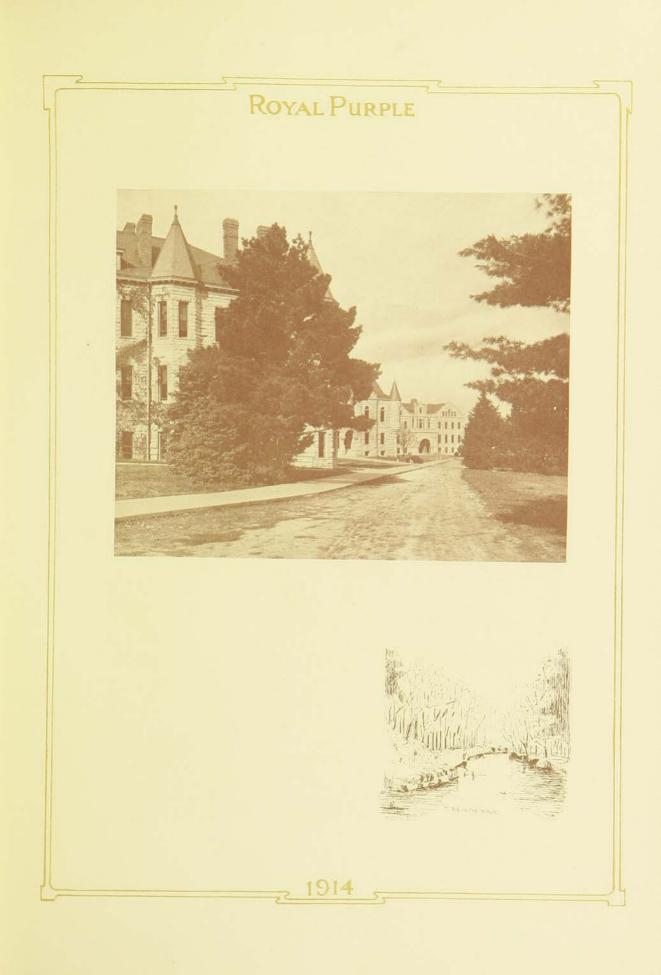

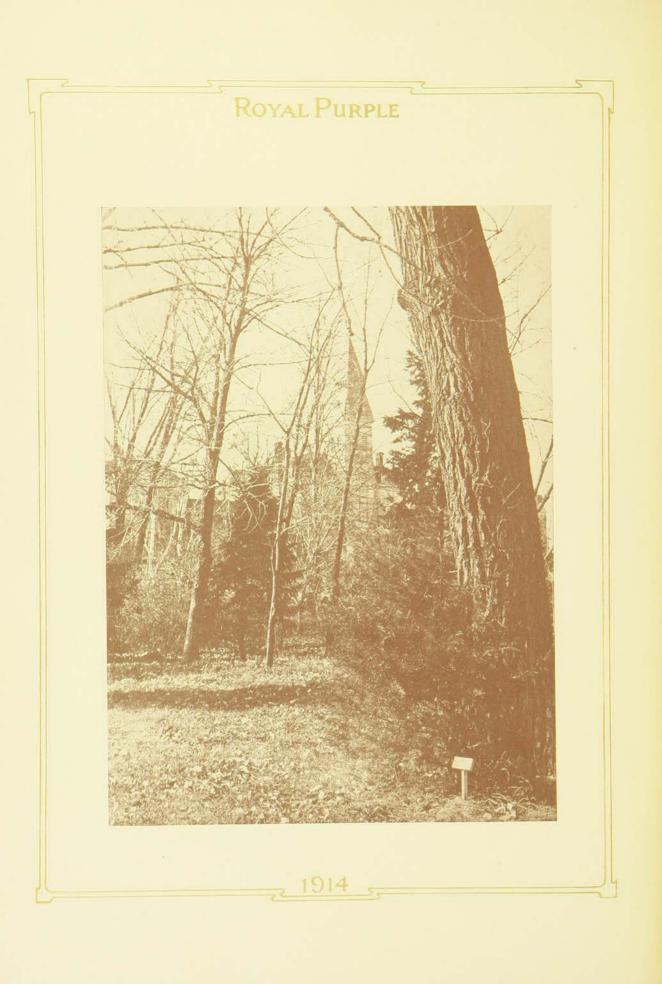

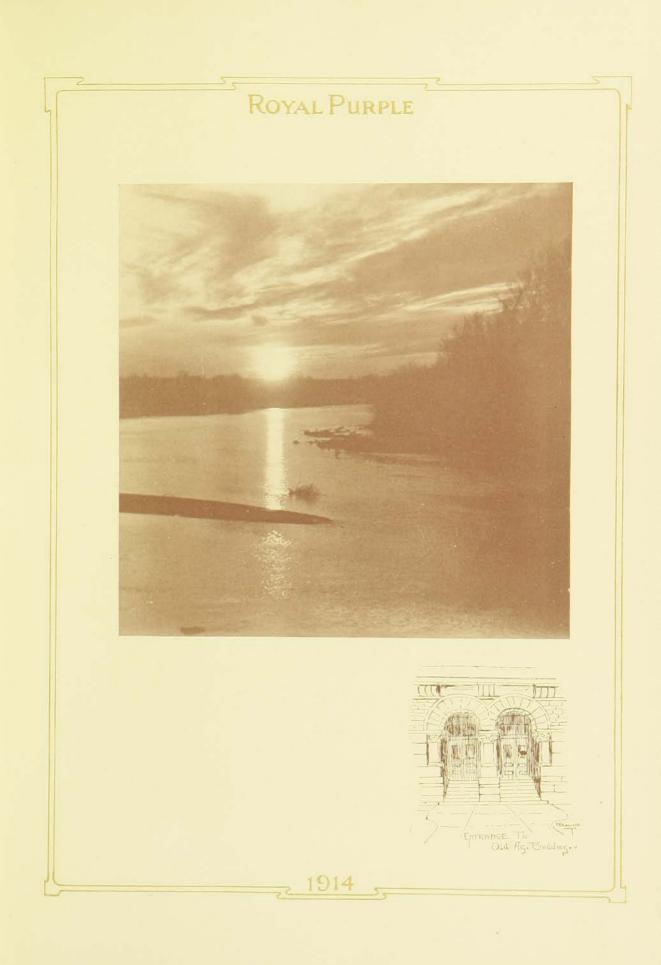

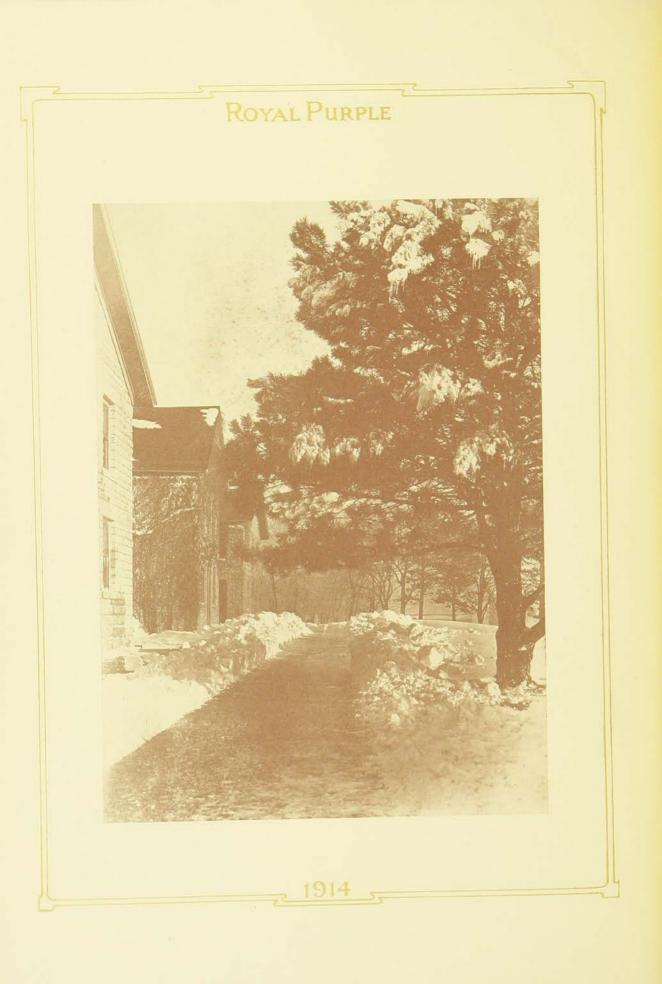

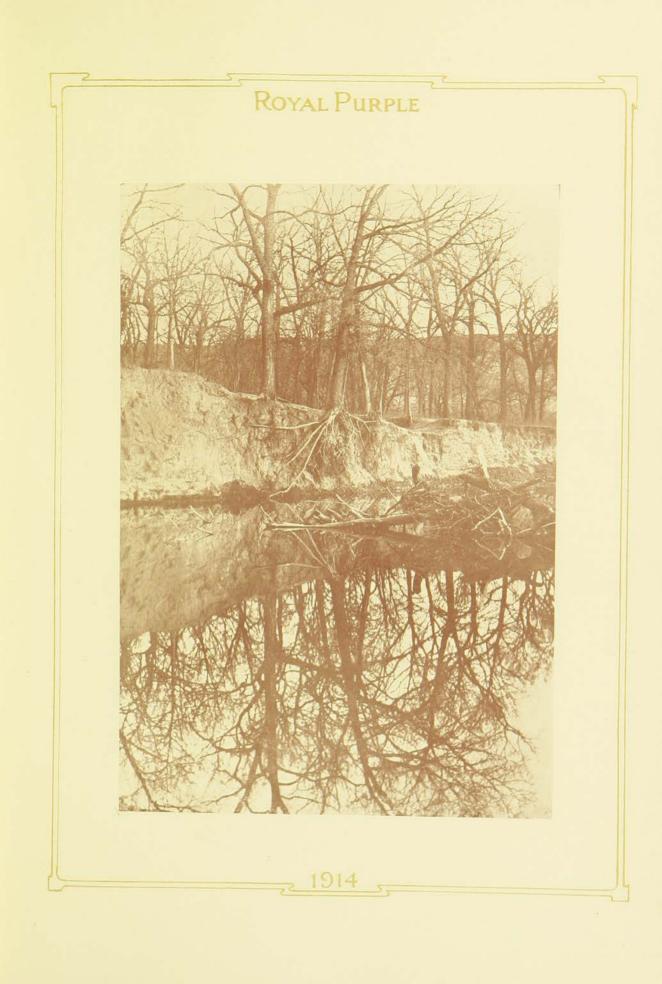

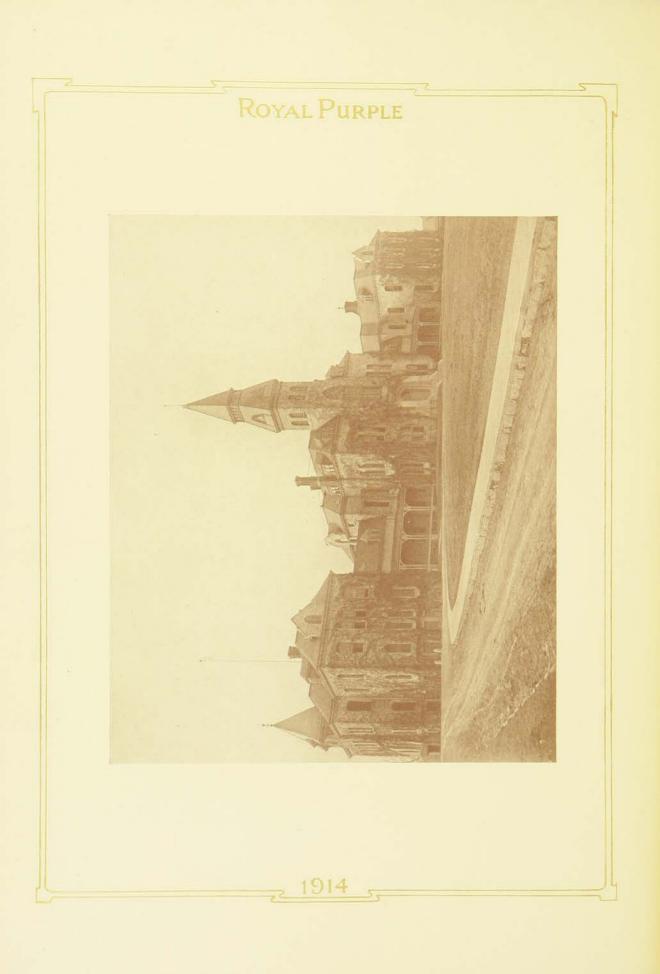

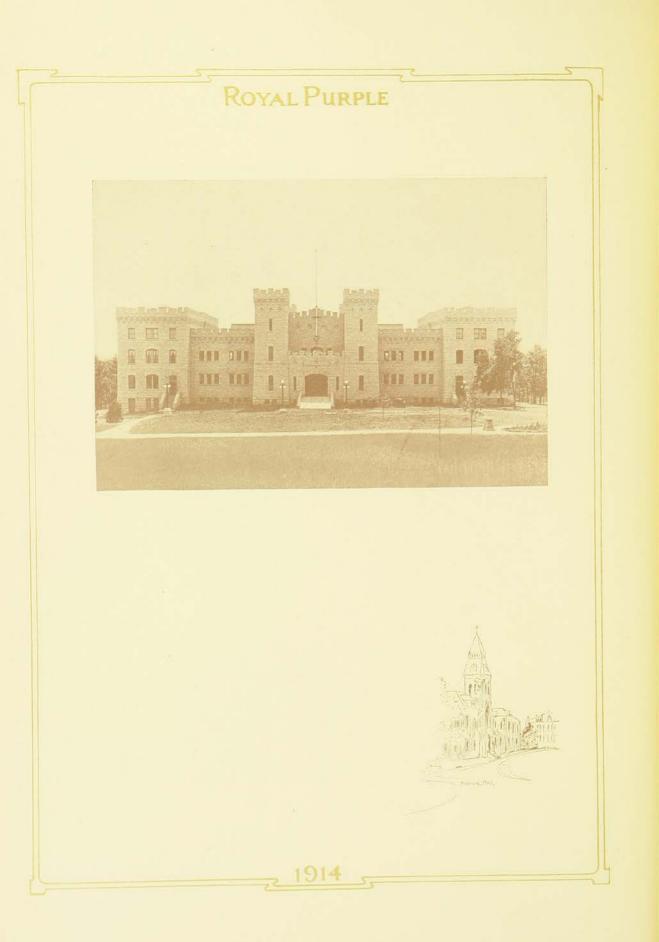

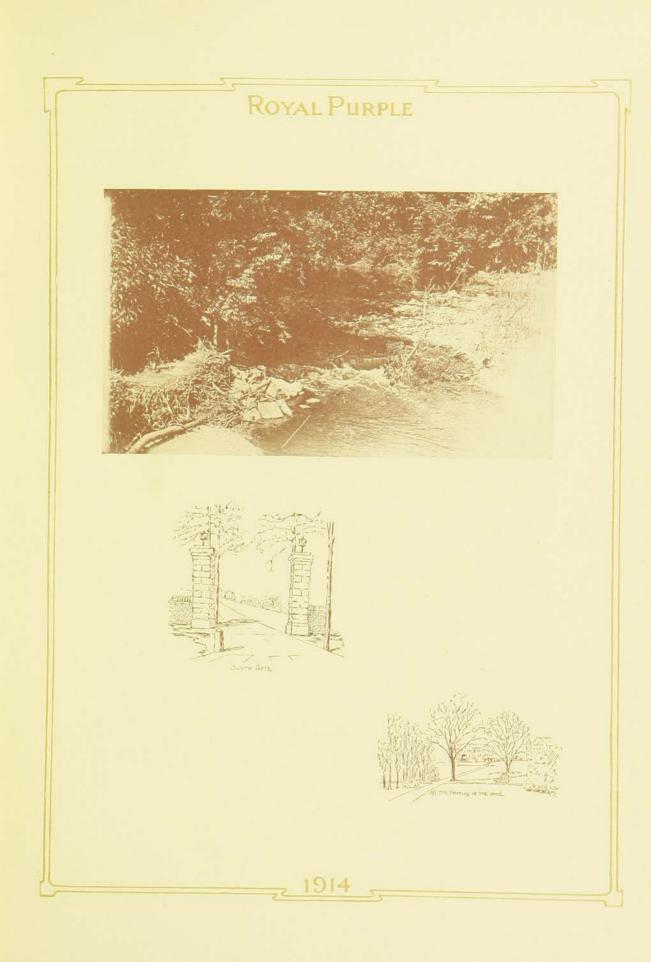

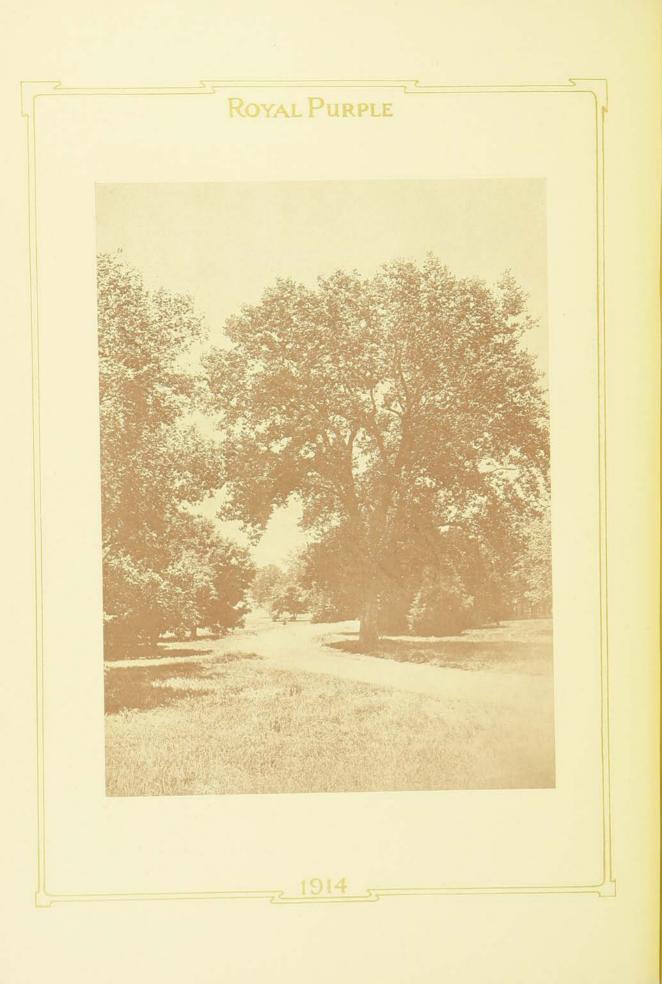

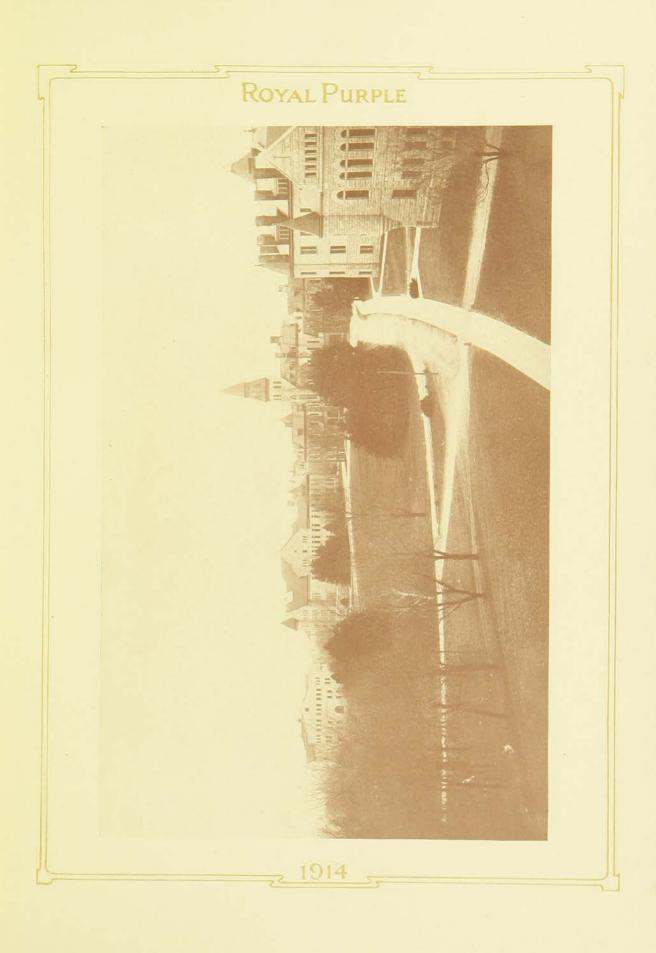

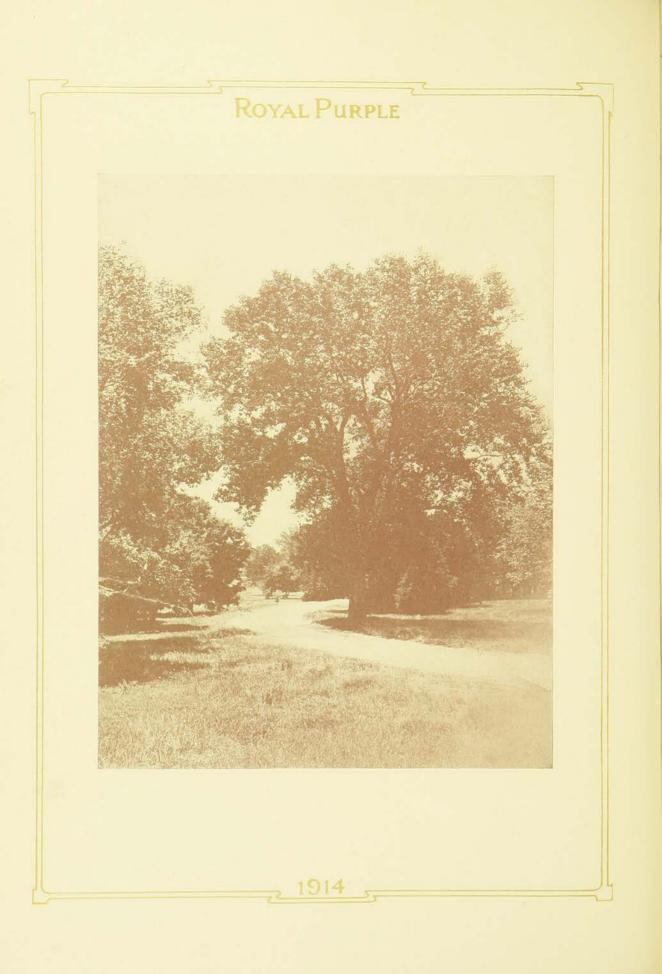

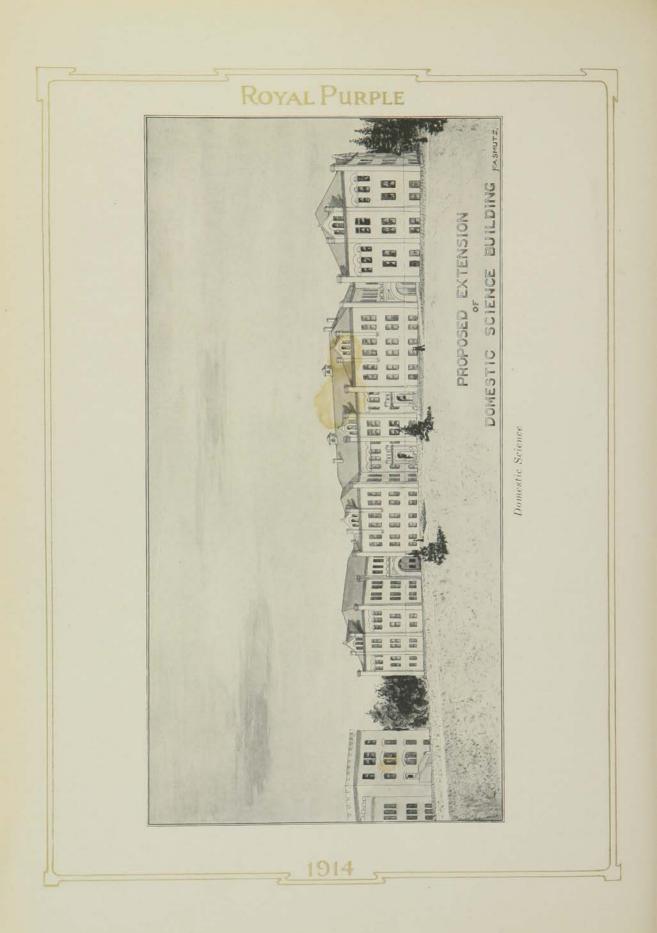

Agricultural Building Engineering Domestic Science The Stadium Edministration Building

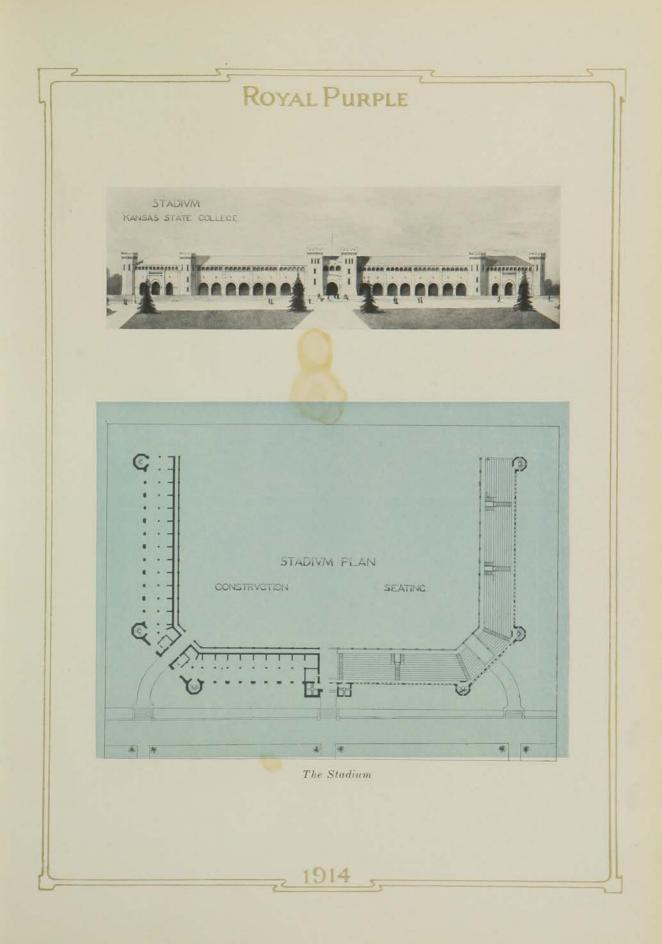

1914

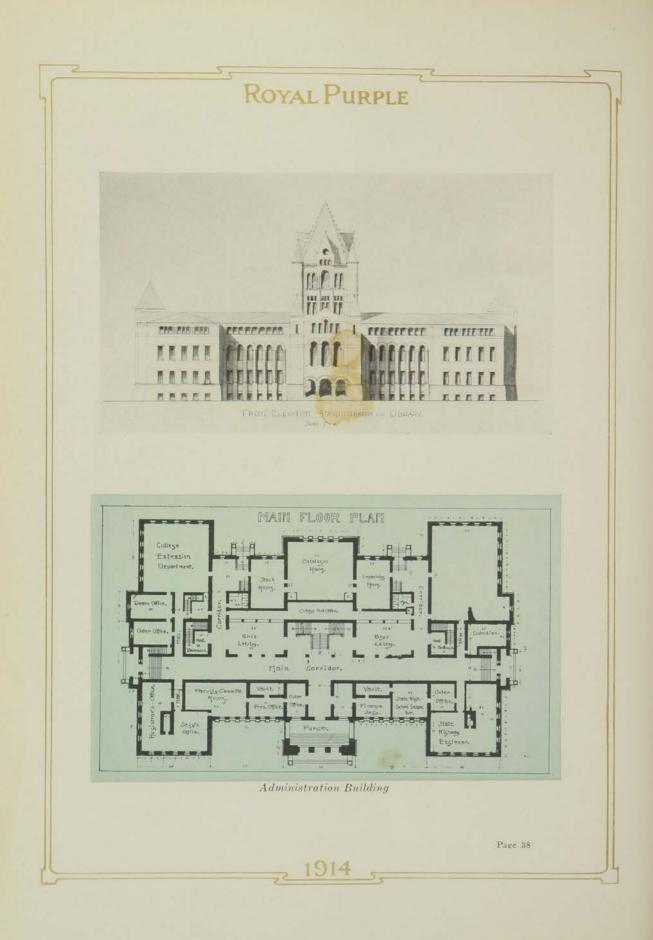

16

In the foregoing, the plans that had been drawn for the buildings have been used in part. Wings of the Engineering and Agricultural buildings are now completed. The other drawings are the work of students in the Architectural department and are conceptions of what may be done in the way of more commodicus buildings in years to come. It is merely a glance into the Future, and while one may be prone to overestimate, it has been the aim to be conservative in these drawings.

1914

THE FUTURE OF THE KANSAS STATE AGRICULTURAL COLLEGE

HE great vocations of Kansas must ever be farming 1 and stock raising, with no "out west" to go to. Its 200 by 400 miles of fertile territory must be made more and more productive and effective in feeding the ever increasing population of the world. To do this, the farmer must become the expert of experts. To make them so is the ever increasing problem of the College. It is the greatest problem of the age. We are bending every energy to the success of a policy that will make it meet its opportunities and fulfill its mission. It must be made the great laboratory, experiment and demonstration center of Kansas farm life. It must send ever increasing numbers of trained, expert agriculturists out into the actual farm life of the State. Its observations and discoveries must find their way in effective shape and attractive form into the home of every farmer and stock raiser. It must correlate its work with every other school in the State. It must popularize agricultural training and make it a part of the active curriculum of every school from the kindergarten up. The rural and grade schools and the high schools must feel that they are a part of it.

> ED. T. HACKNEY, President of Board.

1914 .

THE SERVICE OF THE COLLEGE TO THE STATE

HE United States Commissioner of Education interprets the Act of Congress under which the Kansas State Agricultural College was founded and is in part supported to provide for instruction in:

Agriculture, Horticulture, Forestry, Agronomy, Animal Husbandry, Dairying, Veterinary Science, Poultry Industry, Apiculture.

Mechanical Engineering, Civil Engineering, Electrical Engineering, Irrigation Engineering, Mining Engineering, Marine Engineering, Railway Engineering, Experimental Engineering, Textile Industry, Architecture, Machine Design, Mechanical Drawing, Ceramics, Stenography, Typewriting, Printing, Shop Work.

English Language, English Literature, Composition, Rhetoric, Oratory, Mathematics, Bookkeeping, Astronomy, Chemistry, Physics, Biology, Botany, Zoology, Geology, Mineralogy, Metallurgy, Entomology, Physiology, Bacteriology, Pharmacy, Physical Geography, Meteorology, Political Economy, Domestic Economy, Commercial Geography,

Subsequent acts of Congress and of the Legislature of the State impose upon the College the further duties of creating through the Experiment Stations and diffusing through the Extension Service useful information pertaining to agriculture, home economics, and manual arts, and of preparing instructors to teach the elements of agriculture, mechanical and household arts.

This, in a word, is the work assigned to the Kansas State Agricultural College.

Yours truly,

H. J. WATERS, President.

THE QUEEN AND ATTENDANTS

May Day is as much a part of the college activities as Commencement It fills its part in the spring that no other festivity can; it has a meaning that no other holiday in the year approaches. It is the welcome of spring, of the birds a n d the flowers.

The event is heralded weeks before the actual

time comes. The election of the May Queen, who is given the honor by a popular election of the student body; the planning of the stunts; the making of the booths; the games, and all that make the day what it is.

The day breaks fair. The sun comes up over the valley of the Kaw. The campus gradually takes on a g a l a appearance. Here and there groups of students a re working on their different stunts. The grandstand is being erected on the lower campus.

Under a group of trees, the "throne" is being placed.

The early day passes on. The crowd gathers on the campus. Excited knots of students speculate on the different events that will soon be under way. Presently, the voice of the director is heard forming the march of the Youths and Maidens. The Queen mounts the snowwhite steed. A trumpet sends out its call. Hidden somewhere on the lower campus, the band begins its march. The procession moves ahead. The May Pole is wound. The Queen is crowned with the wreath of spring. The games are on, and the crowd is moving towards the different attractions. The Annual May Day is in full action.

The County Fair

HE morning of December 6, Mr. and Mrs. Iky Ikenstein visited the Chapel. In all probability, the Seniors were not present on account of an unusual amount of studying which they always seemed to have on hand at Chapel time. The coming of the County Fair, which Ikey's visit was arranged to announce, occasioned his appearance in Chapel. The importance of the announce-

ment was responsible for the fact that he brought with him his wife and entire family, also Mammy and old Job, and they were all dressed in their best Sunday-go-to-meetin' clothes.

It was a real live old-fashioned County Fair. First, you paid to get into the place, and then found it necessary to pay again to visit any of the special attractions within the sideshows. The first thing you saw, after you were fairly inside the door, was an opportunity to spend money at a great, square table of candy, pop-corn, peanuts, etc. Of course, you could not pass by these things, because you could not get into the sideshows without something to eat.

Upon basis of the testimony of many of those who visited the Fair, it seems that the best way to see everything was to attack the problem systematically and begin upon the top floor.

The Hamp Burlesque and Shakespeare's "Merchant of Venice" in the Hamp Hall would put Ben Greet to shame, and he would, in event of being fully advised thereof, never have the nerve necessary to instance the presentation of any of his own Shakespearean productions at the Kansas State Agricultural College again.

The next attraction of significance was the Katzenyammer Castle, into which you went with your right mind, but on leaving, was unable to prove either to your own satisfaction or the satisfaction of your friends that you were still sane.

It was great fun, so conclusively so, that even Professor Price is reported as having positively stated that he enjoyed it.

The National Board of Censorship formally approved all of the "movies" which were exhibited. The inspection of the Board was of a critical character which resulted in the elimination of a number of attractions which might have been greatly enjoyed, had they been shown. However, the management considered it proper to have the attractions carefully passed upon, and eliminations made did not materially detract from the entertainment, as a whole, on account of the liberality of its original arrangement.

All of the pictures offered were fine, from "Mike's" baby picture to present college cases. Gadski's second appeared as a vaudeville artist and sang some exquisite songs.

Most of the feminine visitors spent much time about the fancy work booth, and were continuously observed in a wrangle over the bargains which were offered. The boys, particularly of athletic tendencies, fought over an opportunity to throw at the "Nigger Dodger," while others stood around either waiting to get a shot at the target, or to watch the result of the shooting. The management covered every detail of entertainment, even having a picture gallery where your picture was taken, developed and finished while you waited. You simply had to have your fortune told in the District School, bought an icecream cone and then sauntered on to the Olympic Games.

No one hurried home, even after having seen all or been a part of some of the attractions, but stood about watching the crowd of later visitors and the races which were the final important features. Every one went home tired, but firmly determined that they would never let any opportunity to witness a County Fair slip by.

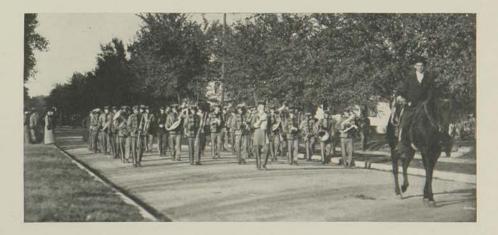

Semi=Centenial Celebration October 28, 29 and 30, 1913

Fifty years! A half century! Not so long a time in the history of an institution, but over a lifetime and a half in the life of an individual. So the fiftieth anniversary of the College was celebrated in October.

Invitations were issued for the friends and alumni to come back, and preparations were made to entertain and show them the advances that have been made and the still

1914 ,

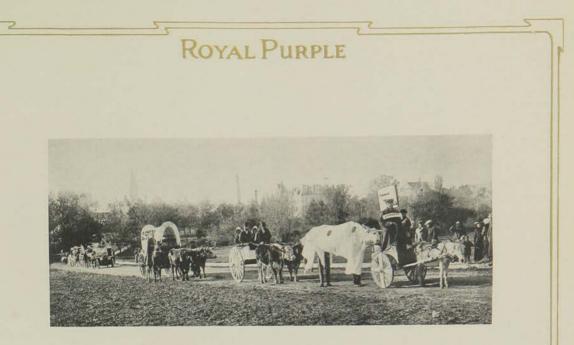

greater chances for improvement that may come in the future. A holiday was declared for three days and a hundred things might be said of the events, but rather let an onlooker tell the story, a man who stands by the College and is a sure enough farmer.

"Well, along in the fore part of the fall, we began to see announcements of the Celebration at the College. Being interested in the affairs up here and having sent three students through the school, we decided to come up and look the school over again.

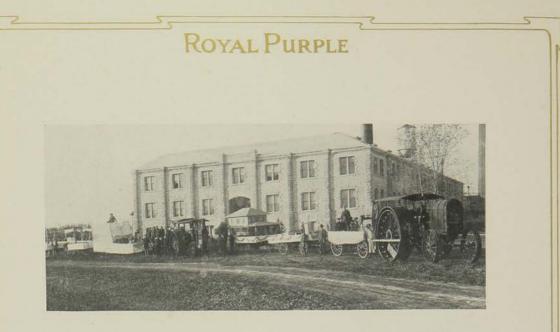

1914

Well, when we got here, the town was all decorated up in the college colors and everything had a holiday appearance. We looked at our program, and the first thing of importance was the parade by the students. That was scheduled for the first day, but an early cold snap made it impossible for it to be held on the day that was set for it and it had to be postponed for a day. The next day was as if it had been made for

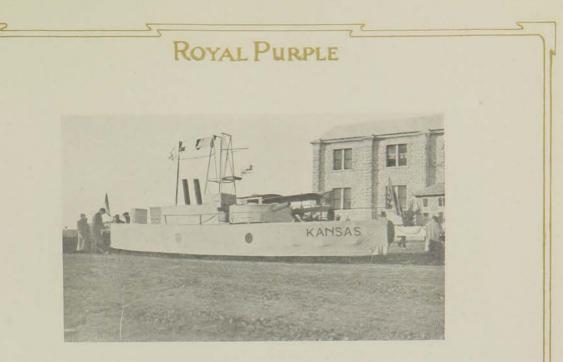

1914

the occasion. It was bright and sunny and everything started. Of course there was two days of speaking and receptions and entertaining and visiting, but the most fun and the biggest part of the whole show was that parade by the students. Every department was represented by its students in floats that had been made by them. The first thing in the procession was the buglers and the band. It was like a sure-enough circus

1914

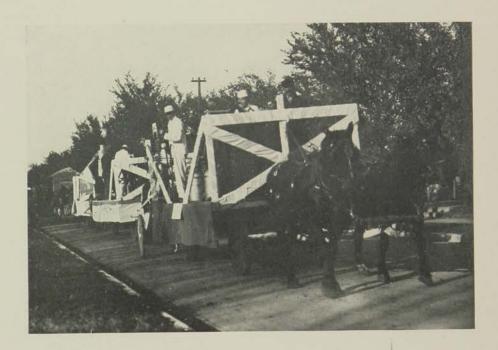

the way it was put on. The Animal Husbandry department furnished some cattle and horses that would have made circus horses and elephants look cheap. Then all of the other departments came in for their share of the fun. Most of them had some funny floats, but all of them had good sensible ones that explained just what the College was doing and what benefit it was to the farmers. I don't know as it would be worth while to go into particulars about the different floats. One of the boys had a camera along

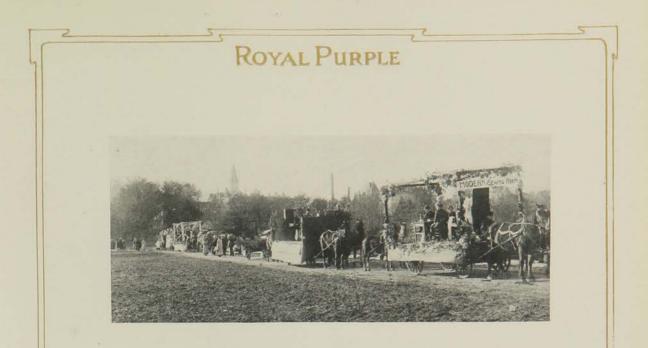

1914

and he took a bunch of pictures that I thought was right good. It was too bad that the engineers could not have had pictures of their display taken when they held their parade that night. It sure was good with all the engines and contraptions that they had. It was as good as you will ever see and it really surprised everybody when the engineers turned out to show what they had. They had more than enough apparatus

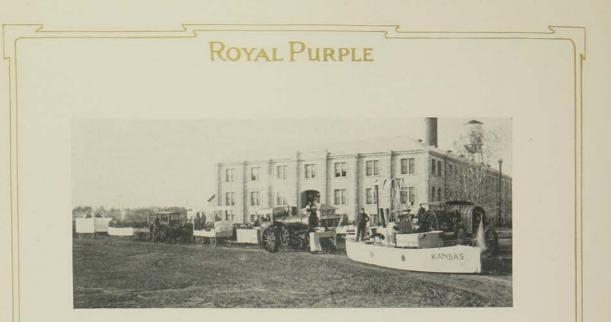

1914

on their engines and wagons to build a small sized Panama canal. Of course they were not alone. The Domestic Science department had some floats. The boys in Engineering had ideas that the whole department ought to go with their parade and the 'Ags' had ideas along the same line, but somewhat different from the conclusions that the Engineers had.

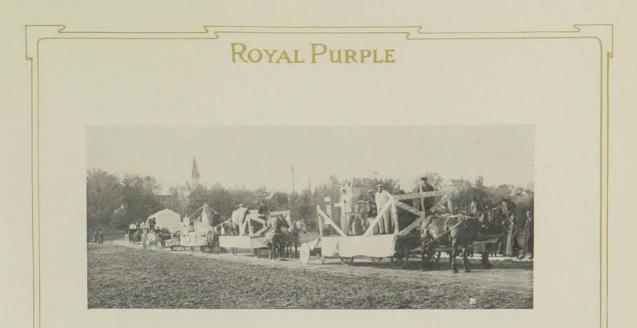

2 1914

"Well, a compromise was made, and both divisions had some Domestic Science floats. One of those with the Engineers was a modern home, electrically equipped, and the girls were cooking, washing, ironing, and doing almost all kinds of housework by electricity.

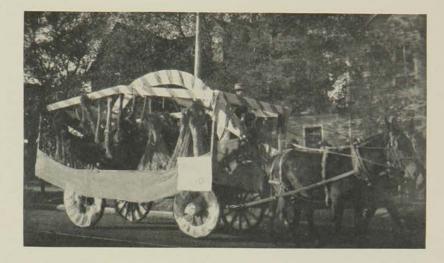

1914 5

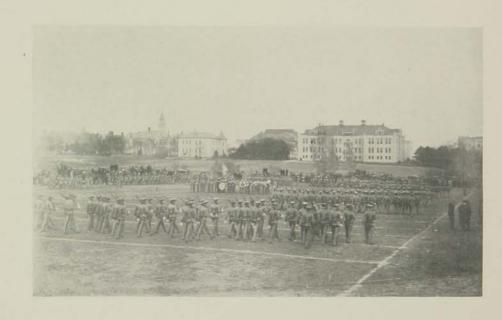

"The other two days, as I mentioned before, were given over to meetings and reunions. Prominent educators from all over the country spoke. It was interesting and the auditorium was crowded from morning until night.

1914

"There was not a person there that did not enjoy himself, and the last night a big reception was given in the gymnasium. The alumni were in predominance and after it was over, one could hardly help but think, 'What will the College be in fifty more years, if it keeps to the pace that it has set in the half-century that it has finished?""

Katisha, an elderly lady in love with Nanki Poo . NITA WELCH

ACT I.

School Girls, Nobles, Guards, and Coolies. Ko Ko's Garden.

Nanki Poo, disguised as a minstrel, returns to the town of Titipu in search of Yum Yum, and finds her about to be married to her guardian, Ko Ko, the Lord High Executioner. Nanki Poo, discouraged, determines to take his life. He is interrupted in the act by Ko Ko, who is disturbed by a letter from the Mikado threatening to remove him from office unless an execution take place in a month. An agreement is made. Nanki Poo is to marry Yum Yum and after a month will be beheaded. Katisha, an elderly lady from the imperial court, appears on the scene and claims Nanki Poo.

ACT II.

Nanki Poo and Yum Yum married. The Mikado and Katisha arrive in quest of Nanki Poo. Ko Ko informs the Mikado of the execution of Nanki. The Mikado reveals the fact that Nanki Poo was the heir to the throne of Japan, and plans a suitable punishment for such an offense. Nanki Poo appears with Yum Yum. All ends well when Ko Ko marries Katisha.

The Ikansas Industrialist

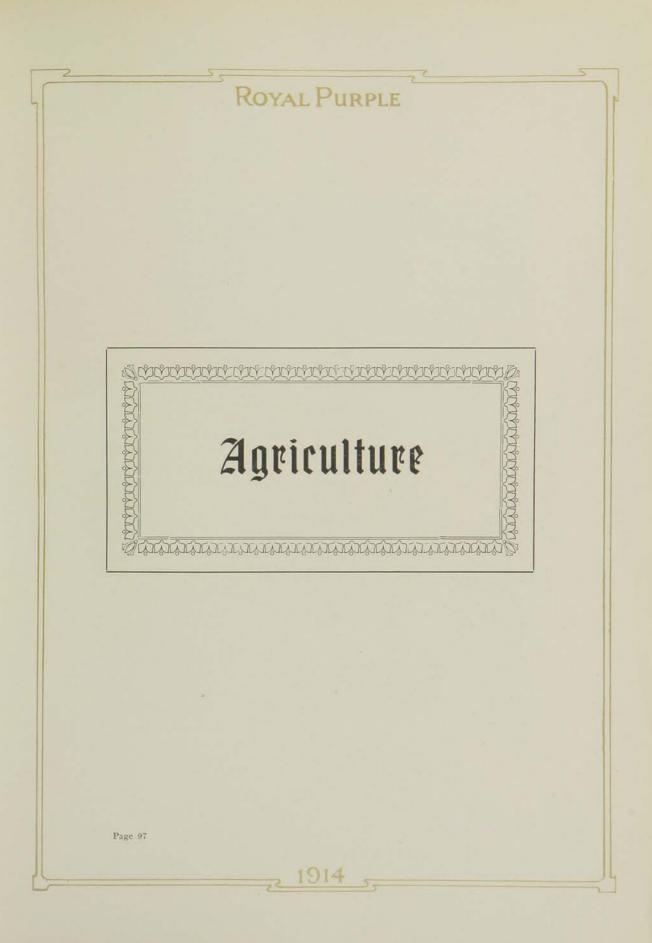

THE Kansas Industrialist is the official weekly publication of the Kansas State Agricultural College. Established in 1875, shortly after vocational courses were first introduced into the institution, the paper has been published continuously during the school years since that time and has become a potent force in the dissemination both of important college news and of valuable agricultural and industrial information throughout the state, and elsewhere.

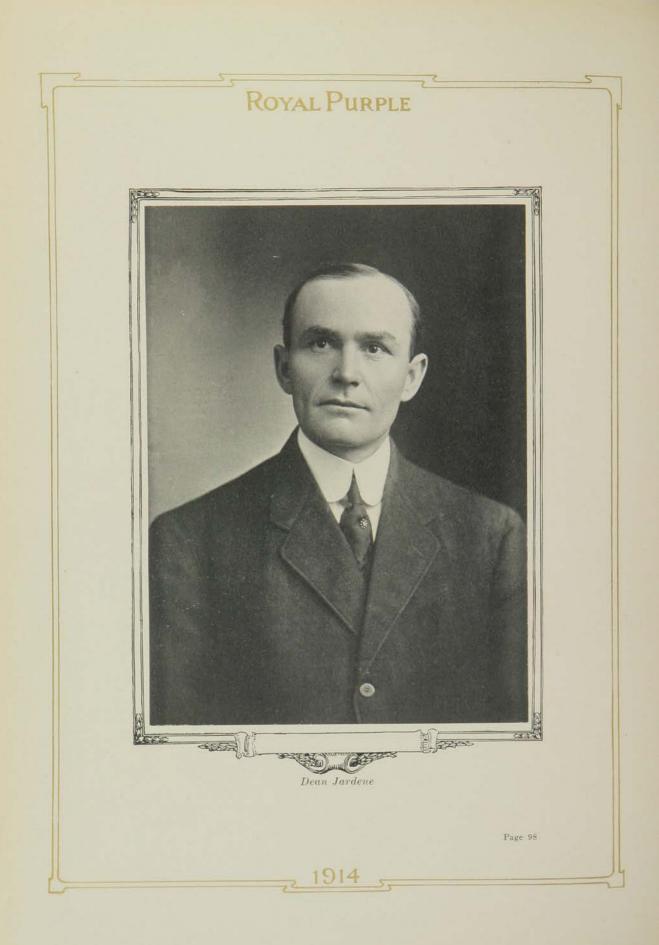

The President of the College, Henry Jackson Waters, LL. D., is editor-in-chief of *The Industrialist*. During the first two terms of the year, Harlan D. Smith, '11, was managing editor. Resigning because of ill health, he was succeeded temporarily by N. A. Crawford. Dr. J. D. Walters has for many years been local editor.

Anímal Husbandry

HIS queston Mr. T. Juicy Beefsteak has asked is a serious one. And the Chop Brothers, Mr. P. Chop, and Mr. M. Chop, are not to be ignored. All these gentlemen are cutting classes right along. Even the packers can't afford to can them. It would be too expensive. So the world lets these men drift along in their own sweet way. What else can the world do?

Growing meat that will make delicious roasts, juicy steaks, and tender chops for a hungry and rapidly increasing people of a great State is a big, worth-while work. Such workers will be welcomed with a brass band, and a special "movie" matinee in the most ordinary village. The larger the town,

in the most ordinary village. The larger the town, "Prof" Cochel the more royal the reception, as the aforesaid foodstuffs, and producers of such edibles are in the minority.

Performing this service for humanity, and more especially the populace for this great commonwealth, called Kansas, is a part of the labor the Kansas

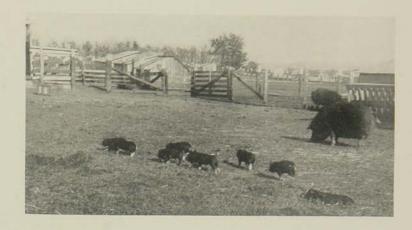

"A Black Beauty"

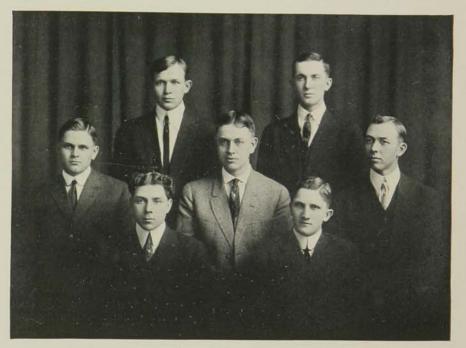

State Seniors of 1914 in animal husbandry desire to do.

All this worry about the world's meat supply will be unnecessary after June 18, 1914 Anno Domini. These young men of Kansas State will be running at large after the date given, and a juicy porterhouse can be picked off most any meatshop counter. It won't take a week's salary, either, to purchase steak enough for two.

But until June 18, Kansas will have to worry along the best it can. Don't think Kansas is alone in this trouble. There are fortyseven other states in this country that are keeping Kansas company.

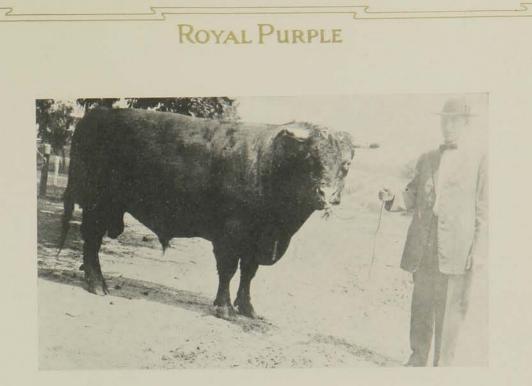

The rest of the world is doing a little thinking of this sort on its own account. These young Seniors in Animal Husbandry, the greater number of them native sons, have been "making" eight o'clock classes, and coming off the Hill at 5:30 p. m. nearly every

Stock Judging Team

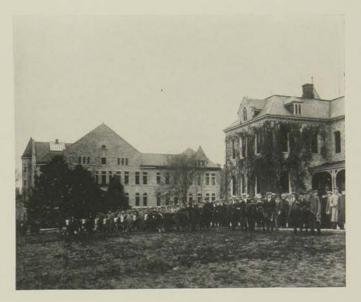

, 1914 ,

day for four long years. They have been enduring all these unpleasant things to help settle this question of steaks for Kansas. They will do more than their part.

1914

Before the Show

Mr. Argentine Meat Bugbear, villain, has completed plans for his departure the Third Thursday in June. There isn't going to be any such animal after that. The 1914 Saddle and Sirloiners simply won't tolerate his presence any longer than that time.

Senior Animal Husbandry Students

1914

Dairy Husbandry

S. A. C. has nothing to be ashamed of in its Dairy Department. This department owns one of the best herds supported by any school in the United States. The barns and equipment are up-to-date in every respect. The creamery is well supplied with testers, pasteurizers, churns, ice-cream freezers, etc.

The strength of the Dairy Course is indicated in part by the fact that students are changing each year from other courses to the Dairy, but never back. There is much truth in the phrase, "Once a dairyman, always a dairyman." Even the girls are becoming

"Prof" Reed

interested in dairy work. A large number of them took work in the special class in dairying the winter term. As a further proof of their interest, many of them may be seen any warm day strolling in the direction of the Dairy Building with some smiling youngster that they are decoying to the ice-cream counter.

The 1914 Dairy Class has an enrollment of 11. This is the largest class that has ever graduated from this course. The class feels it is duty bound to return part of its number in the fall to chaperone the on-coming dairymen a while longer. This burden is to fall on Allen and Cecil. The prospects for the other members are as follows: For Davis, it is back to the soil to rusticate; Goldy will write a treatise on Civics; Doryland has an ambition to teach English Literature; Stocky

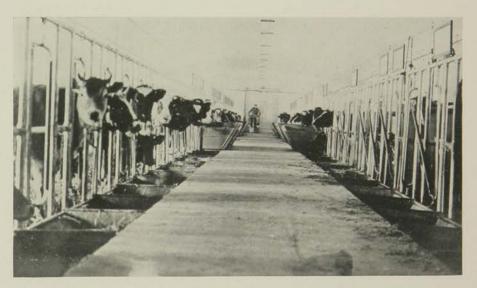

On a Trip

Page 107

Judging Calves

expects to become a diamond expert; Brigham plans to conduct a dancing school; "D" will coach football and kill mice; Clark will play hide-and-seek with the Mexicans; Kink dreams of going on the stage; and Phil will merely keep on fussing.

The Dairy Team

This is the third year that the College has been represented in the Dairy Judging Contest of the National Dairy Show at Chicago. The team consisted of the following Senior dairy students: Roy M. Phillips, Ralph H. Musser,

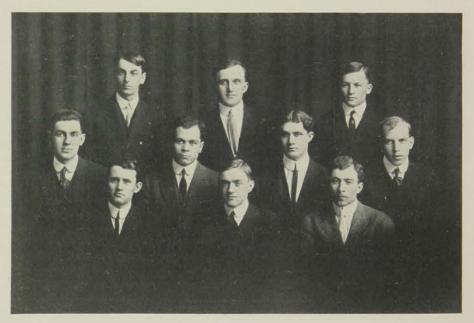

Dairy Judging Team

1914

C. S. Goldsmith, and H. C. Stockwell, alternate member. Prior to the contest, the team was ably coached by Prof. J. B. Fitch, who with the team visited most of the best dairies in the State. On the trip to Chicago the team attended the National Dairy Congress at Waterloo, Iowa, where they had an opportunity to study some of the best dairy cattle in the country. From Waterloo, the trip was continued through the southern part of Wisconsin and back to Chicago in time for the contest, where the team competed with fifteen other teams, representing as many states.

Senior Dairy Students

, 1914 ,

Hortícultural Department

ERHAPS no department in the College has experienced steady, substantial growth to so great a degree as has the Horticultural Department. Throughout the country there is a great and ever-increasing demand for Kansas products. The people of Kansas are awakening to the possibilities of fruit growing within the state. An astonishing amount of young trees is being set out. Old orchards are being renovated; orchards now bearing fair crops are being worked to produce heavier yields. In the Arkansas valley the wonderful possibilities for horticultural projects through the utilization of the well-nigh inexhaustible underflow for irrigation purposes, are just beginning to be realized.

For the man scientifically trained, of forceful personality, and possessed of a store of technical knowledge, together with a desire to accomplish a healthy amount of daily labor, the demand and opportunities are great.

Men of the above calibre are being produced by the Horticultural Department. Prominent among the men who are doing the things really worth while in college life are Horticulturalists. Among the Senior Horts are numbered three presidents of literary societies, two inter-collegiate debaters, and two inter-society orators. Of the five men awarded Junior honors from the whole agricultural division last year, two were "Dickens' men." Elsewhere positions of trust and leadership are being creditably filled by Horticulturalists.

In the Semi-Centennial Celebration last fall the Horticultural display was one of the features of the mammoth parade. Owing to the cold weather and to the fact that the Hort men were obliged to construct their floats out-of-doors, the men were greatly handicapped in their preparations. However, the work was finished by the appointed time, and the many compliments received amply repaid the hardships endured.

In January, the personnel of the Fruit Judging Team was chosen. Spring, McNall, Morgan, Jaccard, and Hood composed the team. Toward the latter part of the month the team journeyed to Lincoln, Neb., where a triangular contest was held between Nebraska University, the Iowa Aggies, and K. S. A. C. Notwithstanding the fact that two of the men were badly off form, the team missed first place by the narrow margin of thirty-four points. Jaccard proved to be the high man of the whole contest. On this trip we were kept out of all evil by the vigorous efforts of the sophisticated Mike Ahearn, Coach, ably assisted in times of stress by Fred Merrill.

Early in the year the need became apparent for an organization that should partake of the combined functions of a seminar and an experience meeting. Accordingly the Horticultural Society was formed, with W. L. Sweet at the helm. Students of the Horticultural Division, irrespective of their year in college, were admitted to membership. Several meetings were hld during th year at which men prominent in the horticultural world gave practical advice and related some of their experiences. The Society gives promise of developing next year into an even stronger and more efficient organization.

Rarely, indeed, in college life, has there been so close a bond of sympathy and understanding between faculty and students as has existed in the Horticultural Division. The career of the '14 Hort men has been marked by an utter absence of the misunderstandings and petty annoyances that so often arise during a four-year course, and which serve to mar the good fellowship of student and professor. In the Horticultural department never interrupted cordiality has existed at all times between professor

and student, and has been maintained by comraderie and sacrifice on the one hand, and by never failing respect and appreciation on the other.

At the head of the department is Professor Albert Dickens. To his ability and energy is due the lion's share of the credit for the splendid showing made by the division. Professor Dickens was allotted by Divine Providence a greater amount of managerial ability than is accorded the average man. "Dick," as he is known to the fruit interests of the state, has gained an enviable reputation, and his advice is regarded as the Alpha and Omega on matters horticultural.

Associated with Professor Dickens is one Michael Francis, surname Ahearn, who is deservedly the most popular idol of the campus. Mike's middle name should have been Versatility. From gracefully sipping tea and daintily nibbling lady-fingers at a function of the Ladies' Aid Society to making "Injun" Thorpe look like a novice on the athletic field, he is the dominant species of the genus homo. In repartee, clever; in wit, caustic; he is yet "full of the milk of human kindness" and will lend you a nickel on the slightest provocation.

When it comes to Sprays and Spraying, D. E. Lewis is the answer to all interrogations. "D. E." has acquired a national reputation from his original work on the control of apple blotch. "Prof" Lewis is the terror of the Sophomore "Ags" in Plant Propagation. Should one chance to pass the nocturnal haunts of the lowly Soph he may hear such terms as "Aesculus hippocastanum" and "Pseudotsuga mucronata" exuding therefrom in their dreams.

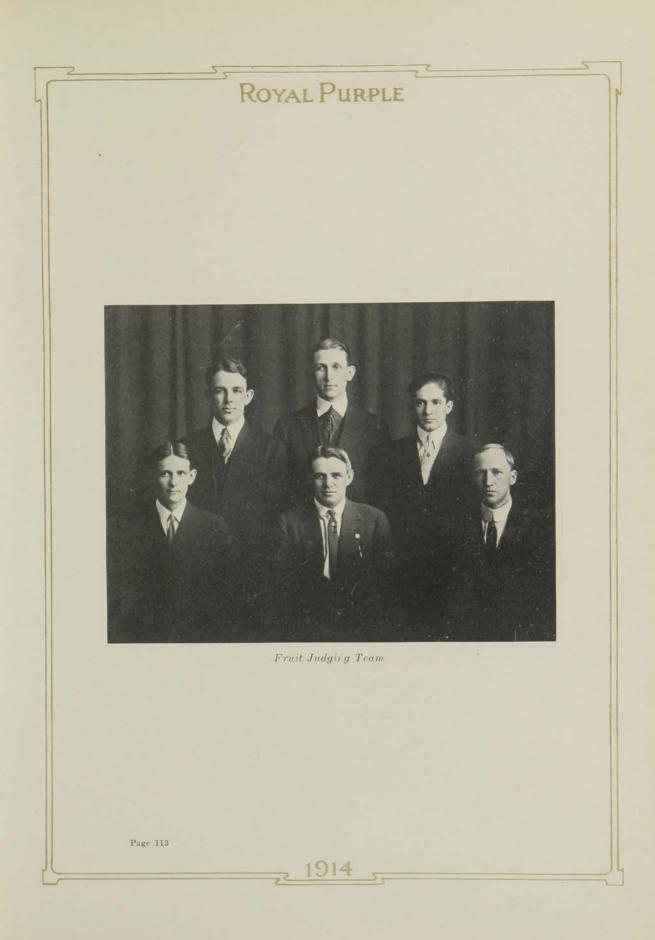

Fred Merrill, our newly acquired jewel from Massachusetts, is the one discordant element in our organization. Fred interferes greatly with the stenographic work of the department. He is, as our long-haired artist friends would say, of the "bent mechanical," and exhibits an inordinate and insatiable fondness for typewriters.

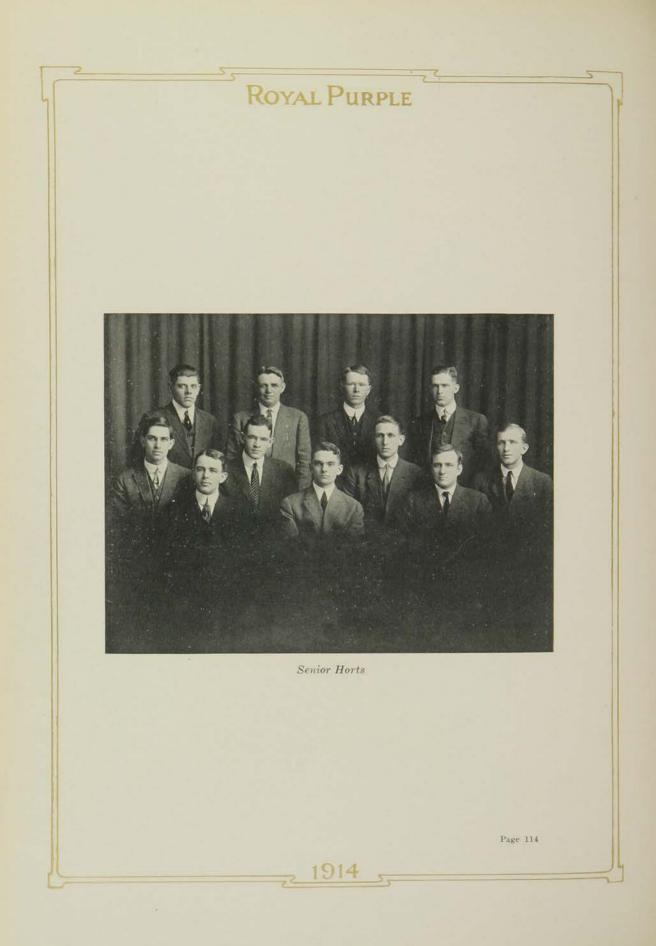

Among the Senior Horts are many gems of scintillating effulgence. Willie Curry has it on the rest of the bunch in being brilliant outside as well as inside. Willie is of a modest, retiring nature, and can best be likened unto a violet.

Early in life William Lovelorn Sweet started out to make a collection of society and frat pins. All through childhood he cherished these greatly, but shortly after reaching the period of adolesence he was met by a little Brown girl, who surreptitiously took all his pins away. Twisting the cast-iron proverb a little askew we get, "He who steals my bocket-book steals trash; but she who purloins my pins gets my good name."

Indecision is one of Jaccard's chief characteristics. "See Roy" is torn between hankerings to be a circuit rider and a polygamist. Constant worry over this, together with nightly applications of anti-fat, is reducing the cultured one to an alarming state of emaciation.

Lawrence Anderson is the lady-killer of our organization, and is held responsible for many casualties. His saccharine seductiveness would move a Venus de Milo to most unbecoming agility. Feminine charms appeal but slightly to Ray Ellis, who derives greater solace from chewing gum. Ernest Shaad has received a flattering offer from a carnival company to become a Blushing Beauty in their show. Grave fears are entertained for the longevity of Harold Gaden. For the past year Harold has been smitten with locomotor ataxia in its most virulent form. Horace Wilkie cherishes the ambition to become a prize fighter. Week-end visits to Topeka, ostensibly parental in nature, interfere greatly with his avowed vocation. Tommy Spring is a poet by nature and a dyspeptic by extraction. Don McCallum, ex-athlete, is torn between conflicting emotions. Said emotions reside in communistic domiciles on Poyntz and Leavenworth.

ETERINARY medicine has made remarkable progress within recent years, and is taking its place alongside human medicine as a science. In truth, medical science and veterinary science are but specialized branches of the same science, and must be developed together. The modern veter-

inarian takes his place in the community as a professional man of education and culture.

In the few years that the Department of Veterinary

Medicine has existed at the Kansas State Agricultural College as a separate and distinct division, it has grown to the extent that it now offers a course of study, which though largely technical, enough subjects of a general character are included to give a sound education and a broad outlook. The department is housed in the Veterinary Building, which was erected at the cost of over \$60,000 and is thoroughly equipped throughout. It contains modern class rooms, and its laboratories possess the necessary appliances for illustrating the various subjects that are taught.

"Aldie"

"Clinic"

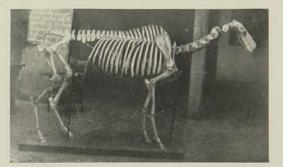

1914

The policy adhered to in all the departments is that the science of veterinary medicine is the foundation, and the art merely supplementary. A thorough drill is given in the foundation studies, and, later in the course, practical application of these is made in actual field work. This results in a thoroughly scientific veterinary education.

As for a personnel of the professors and instructors, that is hardly worth the while, as the Seniors for whom this is written will never forget.

In mentioning the members of the Senior graduating class, there are several who are worth a moment's notice. Jesse Fry has been the politician of the bunch

1914

since we have been subject to the evil influence of the other departments in classmeeting. There was scarcely a meeting for the first three years that Jesse did not give his opinion, and he has served on several committees. However, in the last few months, he has given more of his time to the profession. "Doc" Immenschuh has been a member of the class since it started and is the only "vet" who did not "chew" in the main hall. There are several assignable reasons, but suffice it to say that Aldie was always ace high with the Domestic Science students, and in a way this may have helped to form some of his habits.

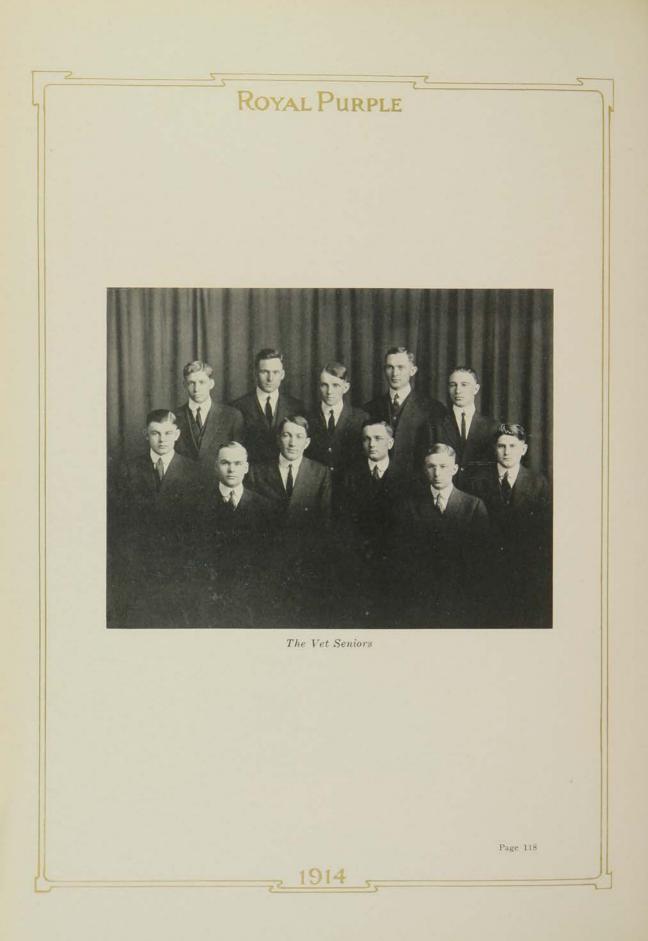

"Jake" Houser used to be tough. After trying to live up to his reputation for three years, he gave it up as a miserable failure. It simply was not in him to do it, and furthermore, he saw that there was a chance for him to become a good man in the profession. Roscoe Parrish, whose middle name is Damron, suggesting a certain well-known rose, is the only man in college who has a horse and buggy at his disposal. Not that the student all walk; no, indeed, for many of them use their parents' motor car, but there are certain things that can be said in favor of the older method of locomotion that are essential and lacking in the self-propelled vehicles. Parish is there in many ways in these unnamed essentials.

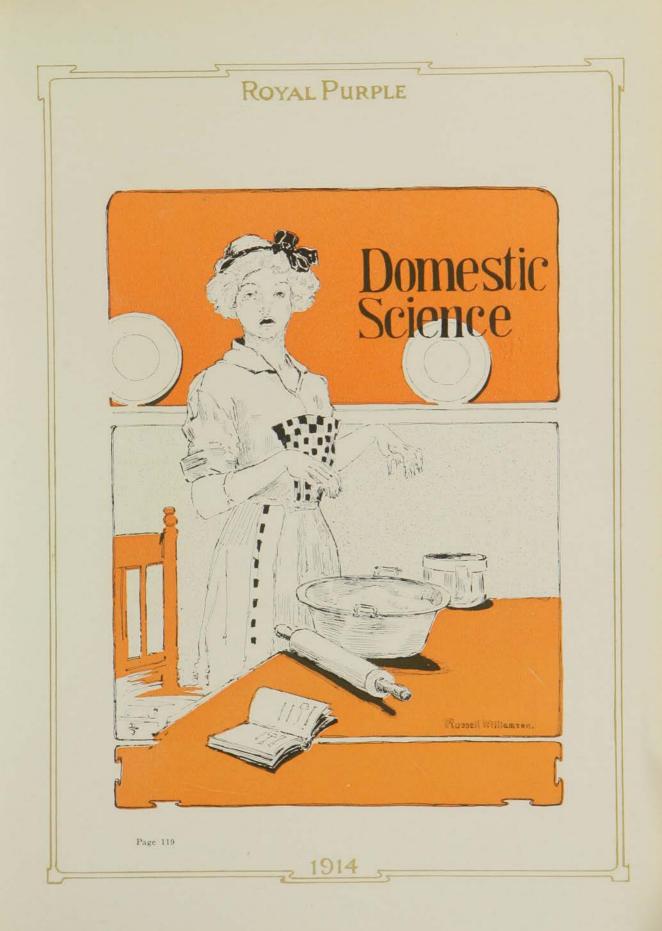

Lucian Hobbs is noted for his silence. With him it is more than golden. It is common gossip in the department that he passed through the course on account of not exposing his lack of study. He will be a good "doctor" without a doubt, and the wages is safe that when once his mistakes are buried, there will be little chance of Lucian opening the discussion anew.

There are a lot more things that might be said about the Seniors of this department. Some of us are not so well known as they might be, on account of spending a great deal of time in the dissecting room, and there are few who care to make our acquaintance. However, the bunch that goes out have worked hard, have been good fellows together, and in the time to come, the Doctors of Veterinary Science who have received their degree this year will be making good. There is no profession that is better able to give success, if the men in it are of the right sort.

1914

Home Economics

DUCATION is the adjustment of those elements of environment in modern life, which will tend to better conditions and make labor more effective. Men and women often mistake education to mean relief from labor. It is not that, but it is relief from the drudgery that is the result of ignorance, by teaching the more economic and intelligent use of human effort. The Kansas State Agricultural College offers its students a general education and at the same time specific training in some special line of work.

The modern girl is not satisfied with the development of her intellectual powers only, but she must give attention to her esthetic, social, domestic, economic, and spritual development. By careful training and attention to these powers, she is developed perfectly and completely. The girl who finishes the Home Economics Course is fitted for the social or business world and for the most responsible position which she can ever hold, that of wife and mother. The required English, mathematics, history, science, psychology, and economics, assume a new significance when they are

lighting of the home; economics, to manage her home properly; and psychology, to observe the development of the children and to use the best means to guide and train them.

In the Home Economics Course proper, the girl learns hand sewing, the various stitches and darning. The making of undergarments and tub dresses teaches the manipulating of the sewing-machine. Dressmaking gives practice on woolen and silk materials. Art needle work, millinery, and tailoring are offered as electives and are found to be very practical. Textiles is given for the study of the origin recognized as essential tools in the accomplishment of some definite purpose. The specific training includes the most economic way to spend time, energy, and money; a knowledge of the laws of health; and understanding of the sanitary requirements of the home; the proper care of children; the proper selection and preparation of foods: and the ability to secure sufficient service from others. Home Economics teaches cheerfulness, order. cleanliness, and the feeling of responsibility. Art teaches the girl to furnish her home with taste; chemistry and bacteriology, to provide for sanitary construction and the proper preparation of foods; physics teaches her to judge for herself concerning the heating and

Page 122

and manufacture of the various kinds of material used for clothing. Household chemistry teaches the action of various chemicals, so that in selecting material one may know exactly what she is getting. Laundering is given along with textile study in order that the girl may become familiar with the action of bleaching agents upon cloth.

1914

Domestic Science includes the study and preparation of various foods in regard to their physical and chemical composition. It also includes formal and informal service. Dietetics is the study of dietaries and balanced rations with respect to age, sex, race, and occupation. Therapeutics is the

1914

study and preparation of trays for the sick, in order that the food may be wholesome and at the same time attractive. Home Nursing gives a very brief course in caring for the sick in the home.

Before this year, boys have been excluded from the Home Economics department, but in recent years it has been found how essential to the boy are the principles of cooking. Acting upon this idea, the department has

1914

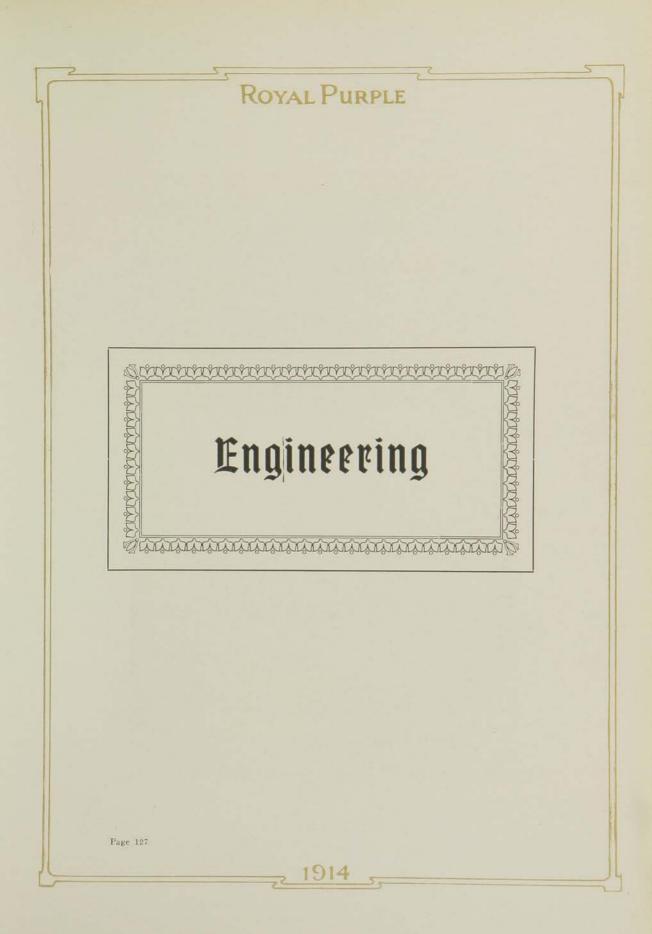

installed a cooking class for boys, which has proved to be very satisfactory. The boys are given little theory, but all the principles and practice that will be beneficial to them, both at home and in camp.

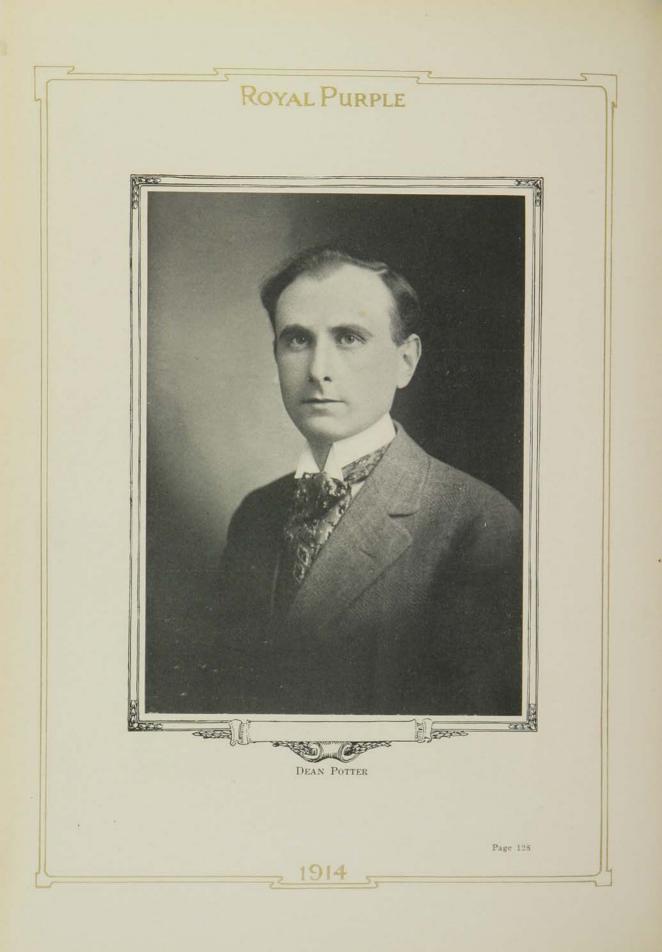

1914

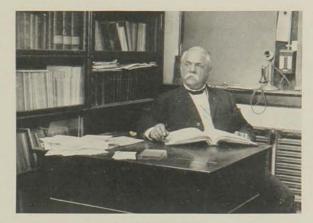

Page 126

5

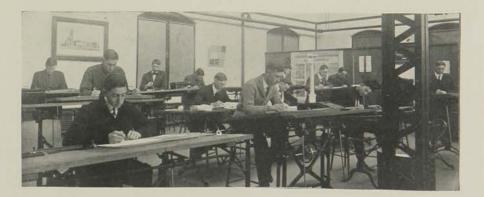

Architectural Department

DR. J. D. WALTERS

Great nations write their autobiography in three manuscripts; the book of their words, the book of their deeds, and the book of their art. Not one of these books can be understood unless you read the other two, but of the three, the only one quite trustworthy is the last. The acts of the nation may be triumphant by its good fortune, and its words might be the genius of a few of its children, but its art can be supreme only by the general gifts and common sympathies of the race.

-RUSKIN.

1914

N September, 1904, the campus woke up from its summer nap and found that a new course had been established at the Kansas State College. The purpose of this new course was to train the rising generation in the modern methods of construction and a knowledge of artistic forms that would be of credit to the present age of architecture. Until recent years the study of architecture was not appreciated, and it is but recently that the leading colleges of higher education in the United States have developed it to its proper proportions. With the rise of modern methods of steel, concrete and fireproof construction, the problems of the architect made it necessary that those engaging in active work should know definitely the properties and best methods of this new construction. The only solution of this question

was that of technically trained men who could adapt the new materials to the artistic forms. Thus there was installed at this College a Department of Architecture, with Dr. J. D. Walters at its head.

Although the department is still in its infancy, the success of its graduates reflects much credit upon the College and the work of the department. This is largely due to the environment in which they have been trained. Perhaps at no other institution in the West is so much emphasis laid upon the tendency of modern architectural education, which is to broaden the architect's artistic horizon to the greatest extent; and to unite once more in the architect something of all the arts. This harmonious union of all the arts, which has always characterized the great periods of architectural development is the hope of the architect of the future.

And the department is very fortunate to have at its head a man so capable of combining these parts.

The course offers great opportunities in technical and artistic training, but it is not in these alone that the students are benefited. The association of the students with each other and the broader view of life obtained about the "lecture table" is perhaps one of the

dearest memories and sources of greatest benefit in the mind of every graduate. This association and instruction has been the means of developing the fraternal spirit to a greater extent than is often enjoyed by the students of a department in a college of this size. As a result, a few years ago there was gathered together a number of congenial souls that were of one mind and purpose, who organized the Architectural Club. The success of this club and the fraternal spirit of the members has gradually been the means of establishing an Architectural Fraternity at this College.

Many things happen that are of interest to the students and "Daddy," for it can safely be said that all are not scholars that enter this department. It is said that John and Rude have one of the poorest batting averages when it comes to Applied Mathematics that was ever enjoyed by any student since Asberry has left us. The ability of English and Sam to obtain a working knowledge of the Theory of Electricity has been

the source of a great deal of admiration from McNair. Seeing the danger of mathematics ahead, Russ, John, and English have diligently avoided all chances of running ashore. Earl has long been noted for his ability as a construction engineer on committees as well as his love of tripping the fantastic step. Russ and Smutz can both claim honors, however, in this latter case. But where Smutz shines as a brilliant light above all the rest of the class is his ability as a politician and fusser.

1914

Civil Engineering

The fall term of 1908 first saw the course of Civil Engineering at this school. Assistant Professor L. E. Conrad was placed in charge. A year later he was made professor of the course and D. O. Stone was elected assistant. Mr. Stone resigned in June, 1911, to accept a position in the Philippines, and his place was taken by Professor Frazier, who still retains it.

In the relatively short time that the department has existed, it has sent out fifty men into the work, over ninety per cent now being engaged in some phase of the profession. Of the thirteen members of the graduating class of 1913, seven are employed by the same

company. Such is a brief history of the past, and the present class will soon be making another chapter of that record. Our college sends us out, not

Our college sends us out, not merely as engineers, but with those fundamental principles in mind that will enable the man with ability to rise in his chosen line. The University of Hard Knocks is the only school that turns out finished engineers, but a degree from this institution enables its students and graduates to enter that university without preliminary examinations, and in that great school, we enter on a sound footing.

There have always been remarks made about the "carriers of the line." There has always existed a time-worn joke that civil engineers are the most uncivilized members of the student body, but as yet, no one has taken it ser-

iously enough to cause the present Seniors to reconsider. Another false accusation is made that our very work makes the home an impossibility. Some of the Seniors are bending every effort to disprove this theory and if appearances count for much, it will be among the other exploded hypothesis that we have disproved in our short careers as college men.

It is true that our bunch did have some difficulty in being able to eat the meals served for Senior men at the Domestic Science building. However, Gilles was well acquainted with those who were denying us the right, and when the true condition was made known, we were given a very cordial welcome. One of the boys thought that a course should be given in camp fire etiquette, but it was discouraged.

1914

At a matter of going on record, at this point it would be well to protest the action of the college in letting Jimmy Moss taken Masonry and Concrete with the Civil bunch. It has done more than anything else to break up the unity that we had previously enjoyed. After he had completed the course, it took the combined efforts of Thackery and Hartzler, our diplomatic corps, to restore harmony.

Lack of space forbids that we should go far into detail in giving the personnel of the class. But it is not possible for us to overlook the great career of J. Fat McBride. In justice to the department, we must give a personal

history, in as condensed a form as we can. Born on a farm in an obscure section of the country, reared on Mellin's food, he has become one of the leading men in the college. Look where you will, you will find "Fat." He has risen successively through the ranks and in his last term of "coll," he elected himself "master yell leader." To oncoming classes, we point with pride to what a self-willed, masterful man can do.

Our course has been stiff. One of the questions that we were required to answer our first term in school will give an idea of the questions.

"How would you determine the processional nutation of the equinoxes, by an observation on Delta Chameltonis, at right ascension and lower elongation, making the necessary corrections for parrallax aberration, refraction and the equation of time, making the observation in such a manner that all error due to eccentricity and other maladjustments of the instrument will be eliminated, when measuring the vertical angle between the vernal equinoctial colure and the almucantar through the left limb of the ecliptic? Express the result in siderial time for the meridian at Greenwich."

Of course, since then, the quizzes have grown harder, but we, too, have grown and are showing the essentials of good engineers.

Electrical Engineering Department

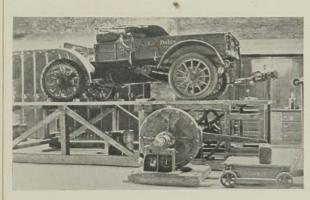

LTHOUGH J. O. Hamilton, Professor of Physics, is nominal head of the Electrical Engineering Department, W. C. Lane is in direct charge of the work. Professor Lane graduated from Kansas State in 1905 from the electrical engineering course. He spent two years with the Allis-Chalmers Company, returning to this College in 1907 as an assistant in Physics. Since 1908, he has been with the Electrical Engineering Department.

Professor Lane is one of the best professors on the Hill. He is good-natured and patient, and was never known to lose his temper in the class room or laboratory.

"Carl" Lane is assisted by G. B. McNair, a graduate of Purdue. He came here from the Wagner Electric Company of St. Louis.

Electrical engineering is a comparatively new profession, having been developed commercially during the last quarter of a century. Only a few years ago, the science of electricity and magnetism, upon

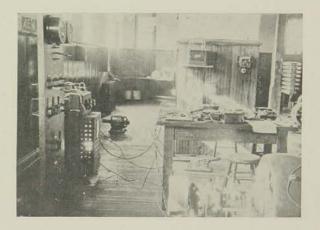

which the operation of all electrical apparatus is based, consisted only of a few isolated facts. The development of electrical engineering has consisted mainly in the development and application of the first few isolated facts combined with many more which are the result of experimentation. No industry has taken more rapid strides in development than has the electrical industry in

the past twenty-five years. The development of our natural resources will in the future make it possible to electrify thousands of miles of our railroads. The inventions of the wireless telegraph and telephone have opened up a new field. In fact, the growth of the electrical industry has made it necessary for the course of study to be revised a number of times. Four years ago, the entrance requirements were raised and the courses were enlarged. New subjects were added, making it much better than before. Thus a step forward was taken, which, however, was not without its faults. The change made is the direct cause of this year's class being small. Many were forced to drop back on account of the change. "Our loss is their gain," and therefore the class of 1915 will be large.

1914

The class this year has five members. What we lack in numbers is made up in quality. The remaining five completed the work of the Junior year and came back in the fall, strong for the work of the Senior year, and have distingushed themselves in more ways than one. Frank Sidorfsky, a football star, has played on the Varsity team three years. He is a real "city product." His four years at Kansas State prove to his classmates that he is an industrious young man,who does not neglect the good times of college life. As a method of protecting the tires of a large auto from punctures by running

over pieces of wire and nails, he suggests that these cars be designed with a large electro-magnet suspended just in front of each wheel. These would serve to collect the dangerous obstacles before they could damage the tires. The difficulty would be to prevent itcollecting Ford roadsters. William Ross Smith was raised on a farm and has had considerable experience with farming; perhaps that is why he took the electrical engineering course. He naturally sympathizes with the poor, down-trodden farmer, and entertains a deep desire to

be of assistance in keeping the Kansas boys on Kansas farms. With this idea in mind, "Smith" is working on a scheme to convert Kansas winds into electricity, so as to enable the Kansas farmer to enjoy the comforts of city life.

Harry Everett Butcher came from Solomon. Being strong for engineering practice, "Butch" has passed several of his summer vacations harvesting and threshing the golden grain. During his Senior year, he has specialized in Thermodynamics ("Thermo-D-Nonsense"), and steam appliances, covering a choice part of the Mechanical Engineering course in addition to his electrical work.

Laurence O'Brien hails from Luray, Kansas, a place noted for its obscurity. He is the tallest, youngest, and most freckled member of the class and is the only member of the class that took the sub-freshman course at the College.

The oldest member of the class is Peter Charles John Klauman. "P. C. John" is an old school teacher, who came to Kansas State from Belleville. He decided teaching was too hard work for him, so he has prepared himself to enter the electrical field,—a sad mistake. Charles has "peeled" his way through College.

1914

Seniors M. E.

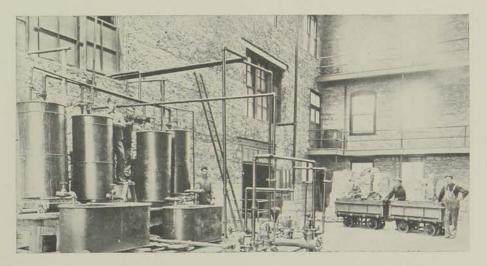

THE Mechanicals that were to finish have dropped out and dropped back, till there are only eight left. Two of these are only part Mechanical, as the major part of their work is in Chemical Engineering.

It is a wonder that as many are left as are after what we have been through. Trials began in earnest in the Junior year when Rastus began assailing us with "free bodies" until we began to "get the idea." Next came our honored dean, whom we affectionately call "Andy," or "A square." He began telling us that

"pdv = c, (p-d-we to the koppi equals a coonstant)," and other such things in "Terms of damn nonsense" (Thermodynamics).

And then we did work, days, nights and all the rest of the time. Things got so warm finally that we called a meeting out in the cool shadows of a building during chapel hour and organized the O Club. O is the symbol representing entropy, one of

heat. Only Andy and the devil really know what it means, and Andy's forgotten now.

Since we have attained the honor of being called Seniors, we have not needed the O Club so much, so are trying to organize a Students' branch of the A. S. M. E. in the College, The faculty have always been afraid that we will

not get enough exercise. Two instances of this thoughtfulness have been especially noticeable. During Christmas vacation of our Junior year we carried on a boiler test, testing the results of treating coal in different ways. Then again this year we were assigned to shifts in the boiler room and engine room. Most of the boys took naturally to coal shoveling, and some are thinking of applying for permanent jobs in the boiler room.

Getting down to personalities, Knapp is an acquisition to our number this year, so we cannot be held responsible for his behavior, unless he is talking to a

1914

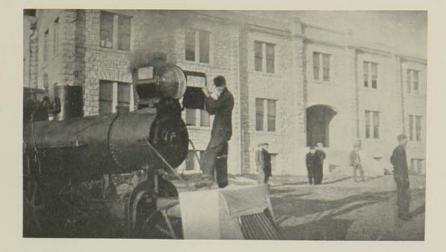

gas engine. We are indebted to him for our signal which we are always willing to demonstrate on request.

Hutchinson has been keeping extra busy this year, so much to do that he has to do his sleeping in class (and he is only carrying sixteen hours, too). "Hutch" says that it was hard to get her to let him off even two nights to shovel coal in the boiler room.

Moss is the athletic engineer. He wears a K sweater for good work in the football field. He is good-natured, but has worried so much about the rest of us that his hair is turning gray. Moss is planning on being the dean of Engineering next year.

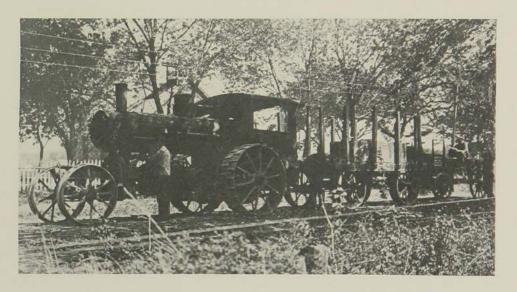

Baird, or Mr. Baird, as "Andy" calls him, is the one that has to stand

the jokes of the rest of the class, so he thinks that he ought to be left out here. Enough for him, to say that he expects to be a good engineer some day if he can have his sister copy data and reports for him.

Taylor is sometimes known as the songster. With his voice he charms Olaf, and scares some poor Freshman by yelling "Hey Mister." The only fault with Bob's engineering is that he spends too much time—not at the shops, but at the conservatory.

914

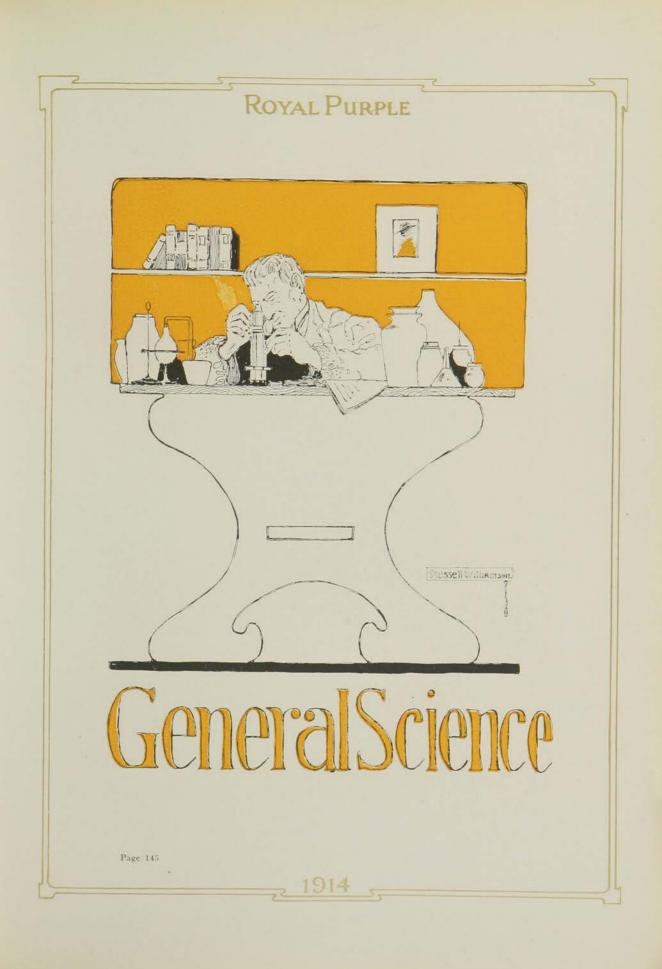

The two Youngs are the chemists. They, in living up to their trade, make such an odor that we could not get near enough to write them up.

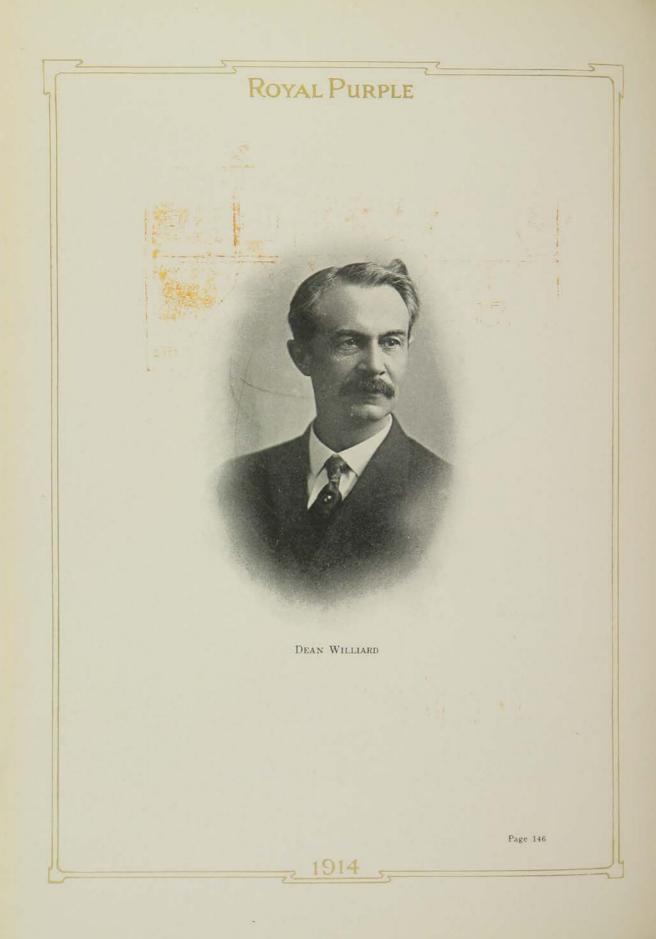

Nearly all of the crowd are carrying on experiments on the theory advanced by "Andy" in regard to the use of induced draft on the combustion of tobacco. So this is the role of honor, or the rogues' gallery, as you please:

George, Hutch, Jimmie, Bob, Knapp, Vic, and the Youngs.

1914

General Science

THE division of General Science is, in a way, different from every other division in the entire college. It is a course that is designed for those who do not care to specialize in some particular kind of work, although there are offered in General Science, several courses that make one an expert in a chosen line, if he applies himself assiduously to his course. But as a rule, the students are choosing for their vocational subjects, electives that are offered in this department. In this way, it bears much the same relation as a liberal college education, but the degree of Bachelor of Science is given, in the place of Bachelor of Arts.

It is impossible to give a review of all the professors that one meets here, because they are more numerous than in the technical lines. However, there are a few whose names we shall always remember, and whose faces we shall never forget. There is the history department that is full of memory, and with it, that marvelous collection of facts and traditions that is called Civics. It is impossible to forget the memories of such a course, long after the classified knowledge has become a part of our being, and we cannot say where we acquired it. There is the department of laws that are said to be given in a condensed and simplified form, and never yet has a dispute arisen about the statement that they were condensed, yet a great deal of time has been spent in discussing what an unsimplified law would be like. Skipping some minor details and coming to the head of the depart-

1914

ment, we pause to remark if you are in "Prof" Price's class, you are bound to take away some knowledge of history with you.

The English department is one of the really big departments of College and the credit is due very largely to the head of the department, Professor Searson. He has received marked attention from leading educators the country over, and indeed, he is ranked with the foremost in his profession. It was he who started out to make the English language an interesting study, and he succeeded where others only attempted. In accordance with the vocational spirit of the school he has developed practical English to a point where it is not so reliant on rules of rhetoric, but more on the rule of common sense, which after all is far above commonplace. This will probably come to him as a surprise, but a great many of the older students familiarly call him "Jimmy," but of course, not when the professor is listening. He is foster-father of debate.

In Economics and its allied group, the large portion of students of all the divisions come in contact with Professor Kammeyer, sometime during their college career. The fact that any student in school is unwilling to cut a class under him, is a high compliment to his interesting manner of conducting classes and his personality.

The head of the department of English Literature is Dean Brink. He has a characteristic slowness of speech that causes the lukewarm admirers of Literature to slumber one hour each day, but as an antidote for this, he has prepared a series of quizzes on Browning that is guaranteed to cure the most pronounced case of insomnia. A complete reading of Vanity Fair completes the course.

The departments of Zoology and Entomology are familiar to not only the college, but perhaps, even more well known to the State. Last summer, when the grasshoppers were ruining the crops and pastures in the western part of the state, it was Professor George A. Dean, of the Entomology department, that went to the rescue of the stricken fields of Kansas. With his corps of assistants, he devised a famous poison for the crop destroyers and demonstrated its use. It was effective and saved much money to the country. For the past years, a great deal of the department's efforts have been directed against the chinch bug and the San Jose scale. This course of entomology is elected by many General Science students and they are making good.

The department of Journalism has as its aim, the teaching of its students to write in an interesting and entertaining manner. For the greater

part of the year, Harlan D. Smith was instructor in charge. However, he was forced to resign late in the year on account of failing health, and Professor N. A. Crawford assumed charge. The Industrialist, a weekly paper published by the department, furnishes the students an opportunity for writing farm stories. The Industrialist is one of the best farm papers in the state and always contains much first-hand information. Students completing the course are granted the degrees of a Bachelor of Science in Journalism.

It is impossible to go into detail concerning all the departments and the men that the students in General Science meet, and it is quite impossible to not mention the department of Chemistry. Dean Williard, dean of the division of General Science, is the head of the department. A large corps of assistants prevents giving some interesting detail. The same is true of the Physics department, where Professor Hamilton presides. The professor is actively connected with student affairs, especially the social end of it. He has first-hand data on the dance problem, and without doubt thinks more about "dates" than any other man on the hill, that being his business to regulate the same.

Passing from the faculty to the students, there is a great deal to say about the students who work under the faculty that has just been mentioned. Alphabetically speaking, J. Gordon Auld is at the beginning of the list. He is the original founder of the "Beak and Sail Club," having been unanimously chosen by the eligibles to the highest honors. He spends a great deal of his time learning to be a credit to the Milling Industry, which might seem strange to one unfamiliar with the institution, when it was stated at the outset that this division of General Science is something like a liberal arts education, but to those conversant with the facts, it will be seen that he merely chose to be a miller in the place of something else. Take, for instance, William Marshall, a man of this division and graduating this year, will go into the ministry, while Nellie Reed goes into foreign missionary work.

Over on the other side of the list, William Sumner receives a degree in Industrial Journalism. He already has interests in a paper out west. If he keeps up his college reputation, William will dispense with graft in all form. He hates it. It keeps him awake all night to think of it, and he keeps the rest of us awake for a week, telling about it. Fay Buck has the distinction of being the shortest Senior in General Science. He has taken the Economic group throughout the four years and keeps to himself, what he intends to do.

John L. Hutchinson, whose smile appears in the Album, chose to be a chemist. For the past two years, the main part of the present Senior class

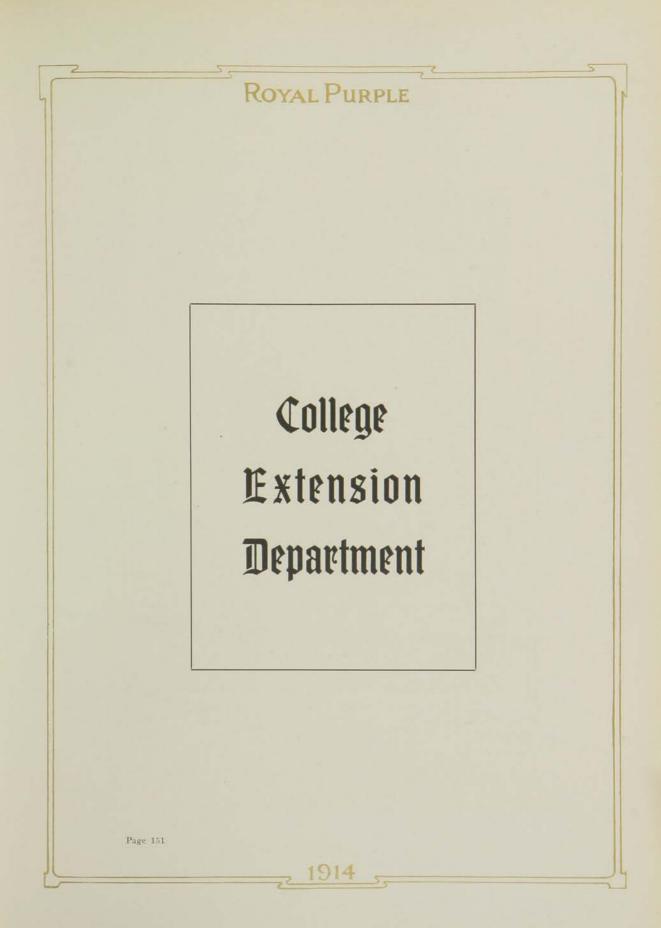

have seen but little of is activities. In presenting Harry Baird, the General Science bunch puts forth the best of its efforts to produce a Beau Brummel and exponent of society. While the Seniors have never been held together as have some of the other classes, the pride is of a genuine nature in seeing Harry keep up the reputation. Further comment would weaken our pride.

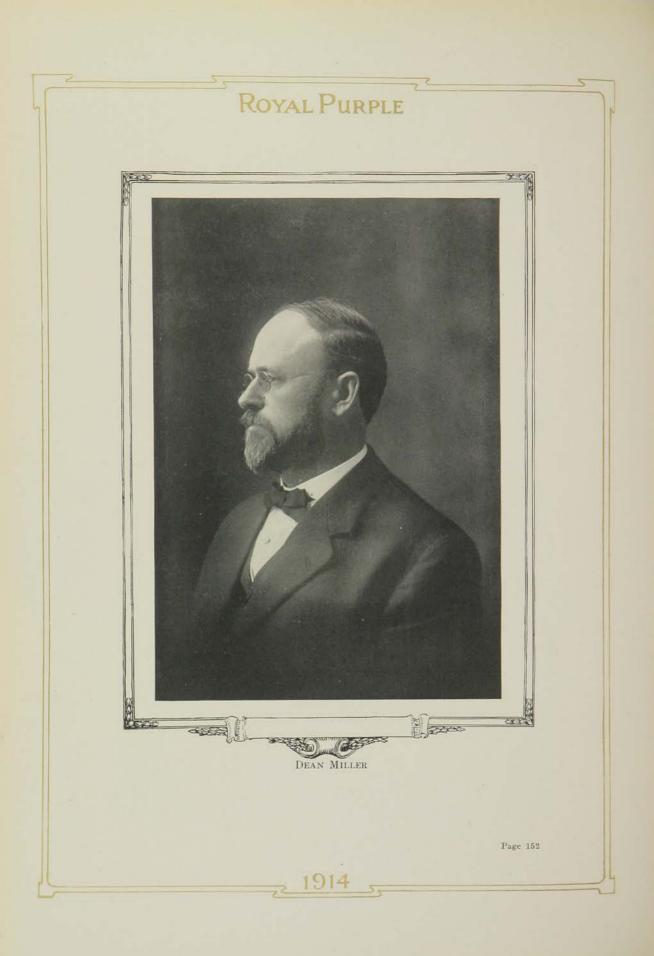

Speaking of pride in accomplishments, other than taking honors, Henry Dresser leaps into the limelight. Henry has more ability in choosing a snap course than any man on the hill. He spent the greater part of his time in athletics, and was the star man on the baseball team. Leslie Collins donned a track suit in his Sophomore year and made his letter the first race he ever ran in intercollegiate competition. No one ever knew him to recite or flunk, although it is quite possible that he may have done both.

In closing, the General Science Seniors of the Class of 1914 do not brag of the things that they have accomplished. They view them with a pardonable pride. The widespread range of classes have kept them separated, but there is one great leveler that has made them all friends. Any person who has been called before the Dean to give reason why he cut so many classes feels the same for the others who have suffered in like manner.

914

Division of College Extension

O the farmers of Kansas, the College Extension Division is better known by far than to the regular students enrolled at the College. The work of the students does not often come in range with the regularly enrolled students, although in some cases there are exceptions to the rule.

The Extension Department is the means of bringing many a good student to study the science of Agriculture, Engineering or Domestic Science and Art. The movable schools that go out over the state, the trains showing the better methods of stock raising, of tilling the soil and the uncountable things that they do teach interest the farmer boys and girls. There is nothing superficial about such an interest, and when they are enrolled in regular courses they are students who go to the bottom of every problem of how to make the farm a better place on which to live.

Over twenty persons work with the department, teaching, lecturing and directing. The following excerpt from the College catalogue cannot be improved on in telling the Extension story:

"The many developments of the extension work made it necessary, in the judgment of the Board of Regents, to create in December, 1912, the Division of College Extension, consisting of four distinct sections—the Department of Farmers' Institutes and Demonstrations, the Department of Highway Engineering and Irrigation, the Department of Home Economics, and the Department of Correspondence-Study—each with its own head and staff; the Board of Regents made the Director of Extension, Dean of the Division of College Extension.

"The principal value of the Agricultural College, as a teaching factor, must be in the training it is able to give to the young people who enter upon and continue through its courses of study, in residence. The Agricultural Experiment Station, as a neutral adjunct to the College, has its great field in the discovery of new truths relating to agriculture. So long, however, as the institution limits its efforts to these lines, it is evident that only a small proportion of the people of a state can derive direct and practical benefit from the work of the College. The progress of agricultural education would be slow indeed if the Agricultural College did not offer other forms of instruction to

the people of the State. The same economic principle that justified the expenditure of public funds for educating young people who are able to attend the College justifies a similar expenditure for the purpose of taking the College to those who are not able to come to it. State education is not philanthropy, but self-protection—foresight. An educated citizenship is a prosperous citizenship. The Kansas State Agricultural College, through its several lines of extension, conducted meetings during the year ending June 30, 1912, with an aggregate attendance of 349,967 people—more than one-fifth of the population of the State.

"While this work is directed by the Division of College Extension, the scope would be very limited were it not for the co-operation of the other divisions and departments of the College in supplying speakers for institutes, assistants in various lines of demonstration work, teachers for movable schools, and wise counsel in the various lines of public effort."

The Summer School

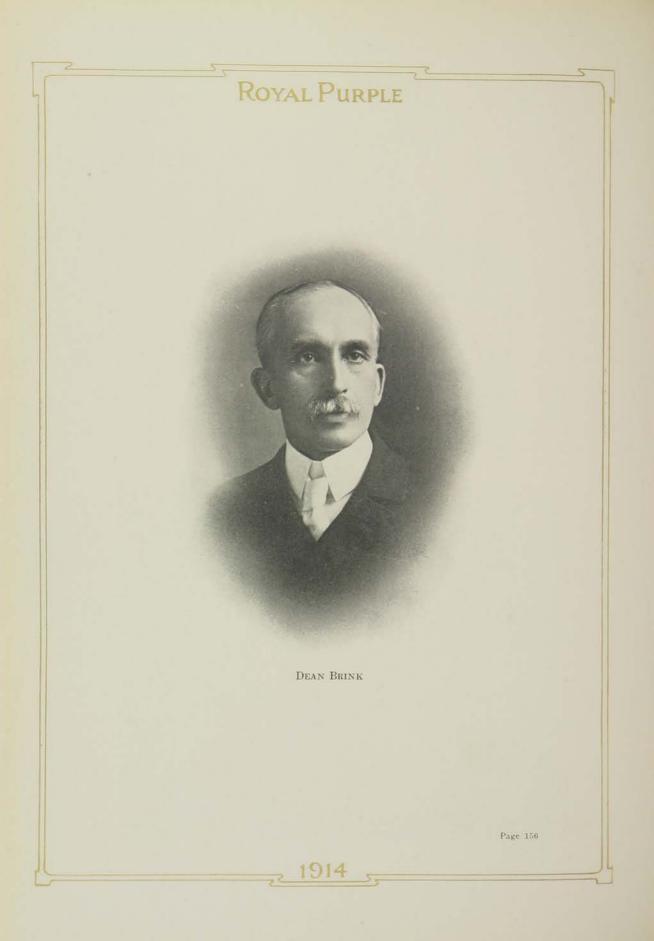

RDINARILY, the summer months are unpleasant times, if one is forced to prepare lessons for a next day's class. That was the report that many of those who remained in Manhattan during the last summer session made, but nevertheless, the summer school continues to operate with many students enrolling in spite of the heat.

The summer school is particularly well adapted for teachers who wish to take vocational work during the summer months, but as college credits may be obtained, it is also well adapted for those unfortunate students who are not up with their courses, and it is very popular with them.

The work covers a large portion of the courses that are taught during the regular session, such as Domestic Science, Agriculture and Mechanic Arts. This makes it possible for teachers to select such work as will aid them in their teaching and allows regular students to supplement their courses in many instances.

The swimming pool is a favorite spot during this session for both instructors and students. According to those who were in attendance in 1913, the pool was the one oasis that made studying possible when the heat started the thermometer on its upward climb.

The Graduate Class of R. S. A. C.

Organized 1914.

This is an organization of the graduate students at Kansas State Agricultural College, for the purpose of promoting interest in graduate work, to further fellowship among graduate students, and to bring them into a closer relationship with the faculty.

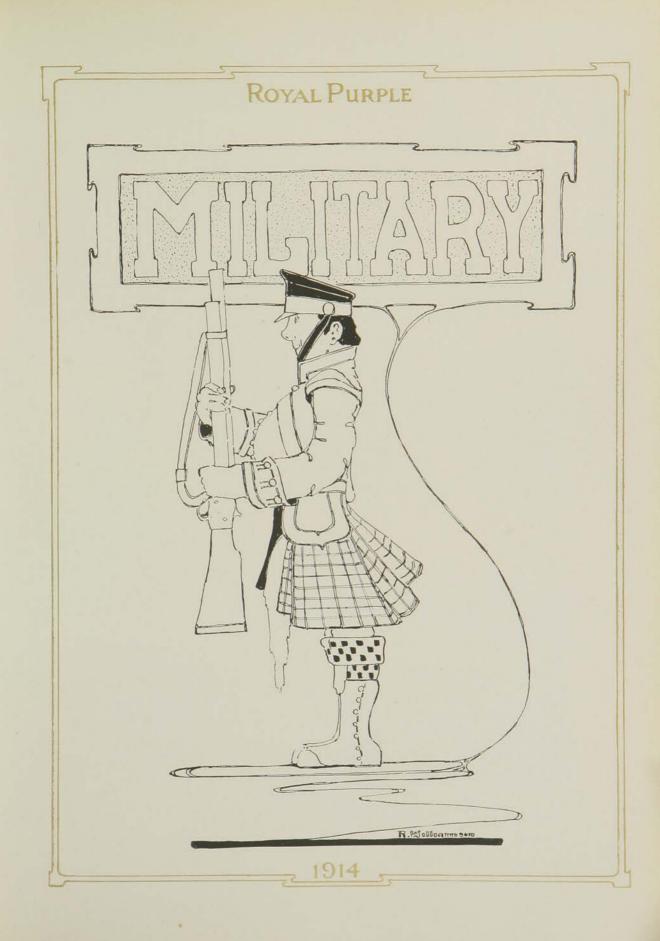

We believe the graduate students should be recognized, as such, and that more prominence be attached to the graduate school in this institution.

It is our aim to assist graduate students in planning their courses, and in obtaining the same.

The Graduate Students are

The Mifle Club

The renewed interest in the military department since the coming of Lieutenant Hill last spring showed itself this fall when a petition was sent out to the members of the cadet corps to see if they wished a rifle team to represent the College and a rifle club, and the returned petition showed that a large majority of the cadets wished to join such a club and to have the indoor range opened. The first meeting was a great success, and on the sixth of November the club was founded, the members of the club to have all the privileges of the range with all of the ammunition that they wished and regulation army rifles. The first elimination trials were shot during November, and the club was admitted to the National Rifle Association during the same month. This meant that the Kansas State rifle team would have the privilege of shooting against teams of their class all over the United States from Pennsylvania to Oregon. The Kansas State team finished fourth out of a field of ten contestants, which was doing exceedingly well for a team that had never shot against another team before this year.

The club has been very fortunate in procuring three fine cups to be contested for by members of the club. One of these, a large silver cup, was presented by Governor Hodges; another silver loving-cup with gold lining and large horn handles was presented by the Henderson-Ames Uniform Company, and the third cup was presented by Brigadier General Metcalf of the United States Army. These cups will be inscribed each year with the name of the winner, the score that he makes and the year that he makes the score.

The men in the corps are taking quite an interest in the rifle work, as was shown when the club organized with something over 140 members. The members of the team will try for qualification in the National Rifle Association this spring, and it is thought that quite a few of the men will make these qualifications as this is one of the high honors of the Association.

ELMA BRUBAKER, Edwardsville, Kansas Home Economics Ionian, Dramatic Club, Y. W. C. A. "From little sparks may burst a mighty flame."

1914

1914

DORTHY JO BUSCHOW, Colby, Kansas Home Economics Phi Kappa Phi, Ionian, Y. W. C. A. "On one she smiled, and he was blessed."

LOIS BLANCHE BURT, Wabaunsee, Kansas General Science Eurodelphian, Forum, Debating Council. "I live only to debate."

HARRY EVERETT BUTCHER, Solomon, Kansas Electrical Engineering Franklin, Engineers Association, A.I.E.E., A. S. M. E. "Still waters run deep." Page 187

MARY A. CANFIELD, Belleville, Kansas Home Economics Y. W. C. A., Eurodelphian, Oratorical Board. "Who can cease to admire her gentle kindness?"

1914

SENIORS

FRANCES MILDRED CATON, Concordia, Kansas Home Economics Phi Kappa Phi, Y. W. C. A. "Repose is the cradle of power."

ALFRED L. CLAPP, Yates Center, Kansas Agronomy Webster, Chairman Lyceum Course, Dramatic Club. No more "Noyes".

Agronomy H. G. CHITTENDEN, Hays, Kansas Acacia, Agricultural Association. A genuine fusser and heart breaker.

1914

ELLA R. CHITTY, Frankfort, Kansas Home Economics Eurodelphian, Y. W. C. A. "It is impossible to please all the world and one's father-in-law."

SENIORS

ERNEST H. CLARK, La Feria, Texas Dairy Husbandry Athenian, Y. M. C. A., Dairy Association. Happy, even though he doesn't look it.

IDA FRA CLARK, LeCompton, Kansas Home Economics Ionian, Y. W. C. A. "Tell me thy company and I will tell you what thou art."

MAE CLARK, Eskridge, Kansas Home Economics Browning. Her heart is in Maple Hill. Page 189

GILBERT LYNN CLELAND, Manhattan, Kansas Animal Husbandry Aztex, Alpha Zeta, Varsity Baseball '11, '12, '13, Varsity Football '13. Any little girl will do."

1914

SENIORS

FRANKLIN A. COFFMAN, Manhattan, Kansas Agronomy Hamilton, Y. M. C. A. "All the women in the world would not make me loss an hour."

Edna Florence Coith, Manhattan, Kansas Home Economics Dramatic Club. -She would rather talk to a man than to an angel any day.

LESLIE IRL COLLINS, Manhattan, Kansas General Science Varsity Track, K. Club. The ladies call him "Less."

W. E. COMFORT, Manhattan, Kansas Civil Engineering Hamilton, Engineers Association, C. E. Society. "Comfort all, trust a few, be false to none."

SENIORS

ANNA LAURA CORNICK, Anthony, Kansas Home Economics Y. W. C. A. The only way to have a friend is to be one.

ELIZABETH ANNA Cox, Goodrich, Kansas Home Economics Eurodelphian, Y. W. C. A. A mother's pride and a father's joy.

GRACE L. CRAVEN, Erie, Kansas Home Economics Eurodelphian, Forum, Y. W. C. A. "Her ways are ways of quietness." Page 191

PEARL ARTENA CROSS, Wichita, Kansas Home Economics Eurodelphian. She is a pearl of priceless worth.

SENIORS

SAMUEL HIRAM CROTINGER, Bison, Kansas Architecture Athenian, Architectural Club, Engineers Association. "A clean mouth and an honest hand Will take a man through any land."

WILLIAM D. CUSIC, Tecumseh, Kansas Dairy Husbandry Athenian, Alpha Zeta, Varsity Football. "Just one girl."

1914

WILLIAM RENWICK CURRY, Dunavant, Kansas Horticulture Athenian, Debating Squad '12, 13, Fruit Judging Team '13. "I would not give a 'Pence' for all the girls in college."

MARY DAHL, Montrose, Kansas Home Economics Browning, Y. W. C. A. "Beauty of expression is the proof of wisdom."

SENIORS

NORA S. DAHL, Montrose, Kansas Home Economics Browning, Y. W. C. A. Talks little, says much.

A. P. DAVIDSON, Hampstead, Maryland Agronomy Sigma Nu, Royal Purple, Scarab. "He was so generally civil that no one thanked him for it."

FLOSSIE EDITH DAVIS, Plevna, Kansas Home Economics Eurodelphian, Royal Purple She says she is just learning to dance, but we don't believe her. Page 193

JUNIATA DAVIS, Colorado Springs, Colorado Home Economics "Say, girls, did you hear the latest?"

1914

SENIORS

WILLIAM GLENNE DAVIS, Clay Center, Kansas Dairy Husbandry Dairy Association. Takes Dairying for economic purposes.

JOSEPHINE WOODWARD DORAN, Topeka, Kansas Home Economics "Actions speak louder than words."

CLARA AFFADILLA DEAVER, Sabetha, Kansas General Science Y. W. C. A., Ionian, Forum. Her purpose is to do right.

A. DORYLAND, Manhattan, Kansas Dairy Husbandry "Life's a jest, and all things show it; I thought so once, and now I know it."

SENIORS

ERNEST D. DORYLAND, Junction City, Kansas Agronomy Hamilton, Agrocultural Association. Produced some wonderful thoughts for the benefit of the class.

HENRY OWEN DRESSER, Manhattan, Kansas General Science Varsity Football, Varsity Baseball Captain-elect 1914. "I like nothing better than something to study all night."

FRED R. DUNLAP, Eureka, Kansas Animal Husbandry Athenian, Saddle and Sirloin, Stock Judging Team. "Slow, but thoughtful are his actions." Page 195

2 1914

MINA LOUISA DYER, Riley, Kansas General Science Browning, Y. W. C. A. "And some that smile, have in their hearts, I fear, millions of mischief."

SENIORS

BENJAMINE RAY ELLIS, Pleasonton, Kansas Horticulture Sigma Alpha Epsilon. "Great hopes make great men."

HAROLD T. ENGLISH, Hutchinson, Kansas Architecture Hamilton, Architectural Club, Engineering Association. "Lemon is my favorite fruit."

NELLIE FERRIN ELY, Coldwater, Kansas Home Economics Y. W. C. A., Franklin. "Wondrous is the strength of cheerfulness."

MINA GRACE ERICKSON, Manhattan, Kansas Home Economics Browning, Y. W. C. A. A wee little lass with a big heart.

, 1914 5

SENIORS

Elsie M. Ester, Peck, Kansas Home Economics Y. W. C. A., Browning, Forum. "The more we study, the more we discover our ignorance."

VERNE O. FARNSWORTH, Topeka, Kansas Animal Husbandry Webster, Saddle and Sirloin, Architectural Association. "I must go over to the library and do some outside reading on Keats."

HELEN MARY EVANS, Decatur, Indiana Home Economics Eurodelphian, Y. W. C. A. "When love and duty clash, Let duty go to smash."

FRANK LEROY FLEMING, Reading, Kansas Agronomy Hamilton, Y. M. C. A. "I'm sporty, but no one knows it."

1914 5,

SENIORS

V. H. FLORELL, Jamestown, Kansas Agronomy Franklin, Y. M. C. A. "I am Victor—where is the vic-tum?"

JESSE J. FREY, Manhattan, Kansas Veterinary Athenian, Veterinary Association, Y. M. C. A. "I'll try prohibition first, then socialism."

1914

EDITH ELIZABETH FOLZ, Marysville, Kansas Home Economics Franklin, Y. W. C. A. "I am constant, constant as can be."

EARL FRIEDLINE, Alden Kansas Architecture Sigma Tau, Architectural Club, Franklin. "Architecture is the work of nations."

SENIORS

HAROLD C. GADEN, Riley, Kansas Horticulture Pi Kappa Alpha. "Everything in this world depends on women."

ETHEL GARVIE, Abilene, Kansas Home Economics Ionian. "It is the mind that maketh the body rich." Page 199

OLIVE RUTH GAGE, LaCygne, Kansas Home Economics Y. W. C. A., Browning. "I'll never love if I can help it."

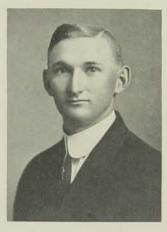

W. STANLEY GATES, Asherville, Kansas Animal Husbandry Pi Kappa Alpha, Varsity Track Captain 1914, Saddle and Sirloin. They say he once had a girl.

SENIORS

LLOYD W. GEARHART, Clearfield, Pennsylvania Animal Husbandry Y. M. C. A., Grange. A truer gentleman one seldom sees.

ARTHUR I. GILKINSON, Hutchinson, Kansas Agronomy Hamilton, Y. M. C. A., Agricultural Association. One of the few good things which have blown in from Hutchinson.

1914

RUTH ELIZABETH GILBERT, Wichita, Kansas Home Economics Y. W. C. A., Ionian, Eta Beta Pi. "She hath a heart as sound as a bell, and her tongue is the clapper."

 ARTHUR H. GILLES, Kansas City, Kansas Civil Engineering
 Webster, Y. M. C. A., Engineering Association.
 "Greater men than I may have lived, but I doubt it."

SENIORS

HIR/M STANLEY GISH, Manhattan, Kansas Agronomy Hamilton, Agricultural Association, Dramatic Club. Jokes of all kinds ready, cut and dried.

JOHN C. GIST, Hutchinson, Kansas Civil Engineering Sigma Tau, Engineering Association, C. E. Society. He capers, he dances, and is a good sport.

EDITH SARA GLASSCOCK, Kansas City, Kansas *Home Economics* Lambda Lambda Theta, Ionian. Y. W. C. A. *Lucky is the man who wins her*. Page 201

1914

MABEL LUCILE GLENN, Minneapolis, Kansas Home Economics Phi Kappa Phi. "Mankind from Adam has been woman's fool."

SENIORS

Roy E. Gwin, Morrowville, Kansas Animal Husbandry Alpha Beta, Forum, Debating Team, Dramatic Club. B. S. in Agriculture; M. S. in Fussing.

1914

WILLIAM I. GRAY, Jamestown, Kansas Agronomy "Men of few words are the best men."

LAWRENCE G. GROSS, Junction City, Kansas Electrical Engineering Sigma Nu, A. I. E. E. "Nobody loves a fat man."

SENIORS

GEORGE F. HAAS, Baldwin, Kansas Veterinary Alpha Psi, Veterinary Association. "An honest man is a noble work.

CECIL W. HAINES, Manhattan, Kansas Dairy Husbandry Athenian, Dairy Association, Y. M. C. A. "Mr. President, where will we get the money for the class memorial?" Page 203

S. FLOYD HACKER, Atwood, Kansas Agronomy "Better a witty fool than a foolish wit."

ALMA GRACE HALBOWER, Anthony, Kansas Home Economics Lambda Lambda Theta, Ionian, Dramatic Club, Forum, Lyceum Course. Actresses will happen in the best regulated families.

1914

1914 ,

ALTA MARIE HANDLIN, Manhattan, Kansas Home Economics Fond of cold weather—"Blizzards."

BESSIE LOURENE HARDMAN, Commerce, Georgia Home Economics Ionian, Y. W. C. A. From the Sunny South there comes a student of H. E.

THOMAS J. HARRIS, Howard, Kansas General Science Manager Royal Purple, Quill Club, Scarab. A soldier is a mighty man.

VIDA HARRIS, Manhattan, Kansas Home Economics Alpha Beta, Inter-Society Council, Y. W. C. A. "Silence is golden."

Page 204

SENIORS

LOLA GARNETT HARTWELL, Frankfort, Kansas Home Economics Y. W. C. A. "A wise person changes his mind, but fools never."

MELVIN E. HARTZLER, Goodland, Kansas Civil Engineering C. E. Society, Enginering Association, Y. M. C. A. "Chase me girls; I've got the nickels."

RALPH S. HAWKINS, Marysville, Kansas Agronomy Hamilton, Orchestra, Y. M. C. A. "Honesty is the best policy." Page 205

NOLA M. HAWTHORNE, Gypsum City, Kansas Home Economics You can manufacture blondes, but red hair comes just natural.

1914

SENIORS

VICTOR GUY HENDRICKSON. Manhattan, Kansas Civil Engineering C. E. Society. A victor is a good guy, and good for something.

MAE VIRGIE HILDEBRAND, Manhattan, Kansas Home Economics Franklin, Forum, Royal Purple. She doeth all things well.

1914

WALTER A. HEPLER, Manhattan, Kansas Animal Husbandry Stock Judging Team, Athenian, Saddle and Sirloin. "Never turn back."

HERBERT LYNN HILDWEIN, Hiawatha, Kansas Agronomy Scarab, Senior-Junior Dancing Club. He is the mildest mannered man.

SENIORS

LUCIAN E. HOBBS, Manhattan, Kansas Veterinary Sigma Nu, Alpha Phi, Veterinary Medical Association. "All great men are dying, and I feel badly myself."

ARCHIE L. HODSON, Harveyville, Kansas Agronomy Franklin, Forum. "I'm a dead game sport." Page 207

HELEN HOCKERSMITH, Manhattan, Kansas Home Economics Ionian, Orchestra. A girl of many talents.

BESS U. HOFFMAN, Enterprise, Kansas Home Economics Lambda Lambda Theta, Ionian, Dramatic Club, Royal Purple. If there's mischief brewing, she is at the bottom of it.

SENIORS

ROBERT B. HOOD, Hutchinson, Kansas Horticulture Dramatic Club, Royal Purple, Scarab, Alpha Zeta. "Honors come by diligence."

MARY HOOVER, Canton, Kansas Home Economics Y. W. C. A., Browning. "The worst evil we have to contend with in the world is insincerity."

EARL H. HOSTETLER, Manhattan, Kansas Animal Husbandry Sigma Alpha Epsilon, Saddle and Sirloin. A rag sets him going, even "Love Me and the World Is Mine."

1914

ETHEL M. HOTTE, Manhattan, Kansas Home Economics Y. W. C. A. "It matters not how long we live, but how."

NORA M. HOTT, Hiawatha, Kansas Home Economics Eurodelphian, Y. M. C. A. "She doth indeed show some sparks that are like wit."

RAYMOND R. HOUSER, Grainfield, Kansas Veterinary "They call me 'Jake'."

JOHN L. HUTCHINSON, Lincoln, Kansas General Science "A man can smile, and smile, and be a villain still."

FRANK ROBERT HOWE, Wymore, Nebraska Agronomy Pi Kappa Alpha, Senior-Junior Dancing Club. Chief Inspector of Mackinaws. Page 209

- 1914

SENIORS

C. ROY JACCARD, Webb City, Missouri Horticulture Hamilton, Y. M. C. A., Forum, Fruit Judging Team. "When you know you're not forgotten by the girl you can't forget."

N. M. HUTCHINSON, Coalinga, California Mechanical Engineering Sigma Tau, Royal Purple, Scarab. "'Tis only noble to be good."

1914

ALDIE P. IMMENSCHUH, Manhattan, Kansas Veterinary Sigma Nu, Alpha Psi, Cadet Major, Scarab. "I like the girls, really I do."

JEANETTA JAMES, Joplin, Missouri Home Economics Y. W. C. A. "Beware, I may yet do something sensational."

SENIORS

J. W. JOHANSEN, Hays, Kansas General Science Acacia. "A late arrival."

GADYS MAY JOHNSON, Manhattan, Kansas Home Economics Eta Beta Pi. "There is no life on earth but being in love." Page 211

CARL O. JOHNSON, Frankfort, Kansas Architecture Architectural Club. "Here's a man with manners, and a heart pure gold."

G. D. M. JONES, Kansas City, Kansas Animal Husbandry Sigma Alpha Epsilon, Varsity Track '12, '13, Saddle and Sirloin. "Where'er he is, he'll not appear a saint."

SENIORS

ROBERT EARL KARPER, Chambersburg, Pennsylvania Agronomy Sigma Nu, Grain Judging Team, Scarab. "Say, Davy, how much did fussing cost you this year?"

EDWARD KERNOHAN, Nashville, Kansas Veterinary Veterinary Medical Association. "It's miserable nonsense, if not a crime To hang around a woman all the time."

1914

ELLIS W. KERN, Kirwin, Kansas Veterinary Veterinary Medical Association. Another quack given to the world.

GLADYS ELSIE KIRCHNER, Home Economics Phi Kappa Phi, Ionian, Royal Purple, Y. W. C. A. "She builds her rosy castle in the air And its corner-stone is a solitaire."

SENIORS

ALICE I. KISER, Manhattan, Kansas Home Economics Browning, Y. W. C. A. She flirts with no one but his brother.

ARCHIE FRANKLIN KISER, Manhattan, Kansas Animal Husbandry Athenian, Stock Judging Team, Saddle and Sirloin.

"When I said I would die a bachelor, I did not think I should live till I were married."

Roy W. KISER, Manhattan, Kansas Animal Husbandry Stock Judging Team, Lyceum Course, Saddle and Sirloin, Athenian. "He minds his P's (Pease) and Q's."

VERA B. KIZER, Manhattan, Kansas Home Economics Eurodelphian.

1914

1914

SENIORS

CHARLES J. KLAUMANN, Belleville, Kansas Electrical Engineering A. I. E. E., Engineering Association. "The sweetest noise on earth is a woman's tongue."

FRANK KRAMER, Zendale, Kansas Animal Husbandry Stock Judging Team, Saddle and Sirloin. "Well, that's the way they do it down home."

, 1914

KARL KNAUS, Benedict, Kansas Animal Husbandry Alpha Zeta, Aztex, Varsity Baseball. Teams may come and teams may go, but he'll play first forever.

DAVID F. LAUBMANN, Russell, Kansas Animal Husbandry Saddle and Sirloin. Society is his glittering hope.

SENIORS

MARY E. LEMON, Plainville, Kansas Home Economics Ionian, Y. W. C. A. Mary had a little English.

C. O. LEVINE, Marysville, Kansas Animal Husbandry Athenian, President Y. M. C. A., Forum, Dairy Association. "There is manhood in his look."

CHARLES PARK LILLARD, Bloomington, Illinois Agronomy Webster, Y. M. C. A. "Speak of me as I am."

1914

LILLIE EDNA LUNDBERG, Manhattan, Kansas Home Economics "Anything but D. A. electives."

SENIORS

MILTON C. LYTLE, Wellsville, Kansas Agronomy Acacia, Scarab, Junior-Senior Dancing Club. A Grain Products man pure and simple.

ETHEL MARSHALL, Manhattan, Kansas General Science Franklin, Y. W. C. A., Oratorical Board. "She had the weight of intellect on her brow."

1914

SOPHIA E. MAELZER, Centralia, Kansas Home Economics Browning, Y. W. C. A. "Methinks I love all common things."

MAUDE MARSHALL, Manhattan, Kansas Home Economics Franklin, Y. W. C. A. "And her name was Maude."

WILLIAM J. MARSHALL, Manhattan, Kansas General Science Y. M. C. A., Debating Squad, Forum, Franklin. "A Shepherd of the Hill."

GOLDA E. MASTERS, Manhattan, Kansas Home Economics Phi Kappa Phi. A little co-ed is a dangerous thing.

JOHN SELWYN MCBRIDE, Mankato, Kansas Civil Engineering Webster, C. E. Society, Engineering Association. "Come on; get some pep into that!"

EDITH MAUDE MAXWELL, Topeka, Kansas Home Economics Ionian, Y. W. C. A. A cheerful giver of smiles. Page 217

SENIORS

HELEN MCCLANAHAN, Homestead, Florida Home Economics Eurodelphian, Y. W. C. A. "We sleep, but the loom of life never stops."

J. DONALD MCCALLUM, Kansas City, Kansas Horticulture Aztex, Captain Basketball '13, Varsity Baseball. "I look upon the library as a kind of sociology laboratory."

MAYME MCCLUSKEY, Junction City, Kansas Home Economics Eurodelphian, Y. W. C. A. "See my Sigma Tau pin?"

1914

CLAYTON ALEXANDER MCINTOSH, Washington, Kansas Agronomy "Professor, will you kindly explain the difference between profit and gain?"

SENIORS

ELVIRA MCKEE, Manhattan, Kansas Home Economics Browning, Y. W. C. A. A lover of truth.

HOMER MCNAMARA, Manhattan, Kansas Agronomy President Rooters Club, Scarab, Royal Purple. Ears that would make an elephant jealous.

MARY MCNAMARA, Manhattan, Kansas Home Economics Y. W. C. A. "Not much talk, a great sweet silence." Page 219

2 1914 ,

WILLIAM CLIFFORD MELDRUM, Cedarvale, Kansas Animal Husbandry Saddle and Sirloin, Y. M. C. A. "I am very fond of the ladies."

SENIORS

GEORGE DENTON MILLER, Horton, Kansas Agronomy "I room just three blocks from Woodman Hall.

DWIGHT MILLER, Manhattan, Kansas Industrial Journalism Cub Club, Quill Club. He is a silent, efficient man.

EMILIE JUNE MILNER, Hartford, Kansas Home Economics Ionian, Y. W. C. A. Virginic reel specialist.

GERTRUDE HELEN MILLER, Langdon, Kansas Home Economics Eurodelphian. "Nobody talks much that does not say unwise things."

1914

1914

SENIORS

PAUL LEROY MIZE, Wilder, Kansas Agronomy "My heart is ten times bigger than my looks."

MARGARET E. MOORE, Manhattan, Kansas Home Economics Y. W. C. A., Franklin. "The greatest fool of all is one who attempts to explain everything." Page 221

FLORA S. MONROE, Ottawa, Kansas Home Economics Browning. "To win a man's heart, be cheerful."

JAMES F. Moss, Eureka, Kansas Mechanical Engineering Sigma Tau, Engineering Association, A. S. M. E., Varsity Football, Scarab. An athlete who plays his Prof's well

SENIORS

J. B. MUDGE, Manhattan, Kansas General Science "No, not 'Miss,'-'Mr.'"

KATHERINA MUNGER, Manhattan, Kansas General Science Eurodelphian, Y. W. C. A. "My Glory,—I try to be true to them all."

Gustav Herman MypLand, Manhattan, Kansas

Veterinary Veterinary Medical Association, Alpha Psi. Willing to fuss, but bashful.

RALPH H. MUSSER, Filer, Idaho Dairy Husbandry Aztex, Scarab, Dairy Stock Judging Team. Kansas Agg. '14, Dramatic Club. "Gee, fellows, I'm busy,—lots of irons in the fire."

SENIORS

CLAUDE F. NEERMAN, Cummings, Kansas Animal Husbandry
Pi Kappa Alpha, Saddle and Sirloin, Senior-Junior Dancing Club.
"Oh, a most dainty, dandy man."

MARY ELEANOR NEIMAN, Whitewater, Kansas Home Economics Eta Beta Pi, Y. W. C. A. One who says little, but takes in everything. Page 223

1914

JESSIE ELIZABETH NEIMAN, Whitewater, Kansas Home Economics Eta Beta Pi, Y. W. C. A., Royal Purple. "I can't; I'm a model for my sister."

PRUDENCE EILEEN NEISWENDER, North Topeka, Kansas Home Economics Ionian, Y. W. C. A. A smile for everyone.

SENIORS

WINIFRED LOUISE NEUSBAUM, Manhattan, Kansas Home Economics Y. W. C. A., Ionian, Debating Council. "A pretty woman is a welcome guest."

MARY NIXON, Manhattan, Kansas Home Economics Ionian, Y. W. C. A. "Love is like a creeping vine,—withers and dies if it has nothing to embrace."

MARY ELEANOR NICHOLS, Fort Morgan, Colorado General Science Ionian, Y. W. C. A. "As usual, I'm right" (Wright).

GENEVIEVE NOWLIN, Kansas City, Missouri Home Economics Y. W. C. A. She talks much but says little.

1914

1914

SENIORS

M. LOIS NOYES, Wichita, Kansas Home Economics Eurodelphian, Dramatic Club. "Woman needs no eulogy; she speaks for herself."

LAWRENCE A. O'BRIEN, LURAY, KANSAS Electrical Engineering Webster, A. I. E. E., Engineering Association. We can't put down what we think about you; There'll be a lady with you when you read this.

NELLE OLSON, Harveyville, Kansas Home Economics Ionian. "Happy and from care I'm free, Why aren't they all contented like me?" Page 225

1914

LOIS FAE PADDOCK, Manhattan, Kansas Home Economics Phi Pappa Phi, Ionian. A woman, with all woman's ideals, ambition and sympathies.

SENIORS

MINNIE BERYL PENCE, Dunavant, Kansas General Science Browning, Forum, Y. W. C. A. Capability written all over her.

Roy M. PHILLIPS, Manhattan, Kansas Dairy Husbandry Pi Kappa Alpha, Dairy Stock Judging Team, Dairy Association. He thinks he is a ladies' man.

STEPHEN LEE POTTER, Marshall, Missouri Agronomy Pi Kappa Alpha, Junior-Senior Dancing Club. A man of miscellaneous reputation.

1914

IZIL ISOBEL POLSON, Fredonia, Kansas Home Economics Collegian Staff. "Well, kids, I've got to go and fix up that dope for the Collegian."

SENIORS

Roscoe DAMRON PARRISH, Manhattan, Kansas Veterinary "When I get married......."

CHARLES ARTHU: PATTERSON, Ford, Kansas Agronomy Y. M. C. A., Athenian. A bungalow for two is high enough for any man's ideal.

AARON E. PEARSON, Simpson, Kansas Agronomy Athenian, Alpha Zeta, Y. M. C. A. "I never fuss, get fussed, or am fussed." Page 227

MARY ESTHER PEAK, Pratt, Kansas Home Economics Y. W. C. A, "O, for a thousand tongues."

ANNA BERNICE PRATT, Burlingame, Kansas Home Economics Eta Beta Pi. "The streets of Vanity Fair are always crowded."

MABEL GRACE POWELL, Randolph, Kansas Home Economics Eurodelphian, Y. W. C. A., Inter-Society Council. "I have immortal longings in me."

George Hemrod Railsback, Manhattan, Kansas General Science Works twenty-four hours a day and carves dogs and cats for recreation.

914

NELLIE EVELYN REED, Havenville, Kansas General Science Y. W. C. A., Zoo Seminar. "I detest flirting."

SENIORS

JOHN L. ROBINSON, Hays, Kansas General Science Acacia. "Life, what art thou without love?"

ALTA COY ROBERTS, Morrill, Kansas Home Economics Ionian, Y. W. C. A. "A friend to everybody, and evrybody's friend."

F. P. Root, Iola, Kansas Animal Husbandry Aztex, Varsity Football, Captain Varsity Basketball '14. A prince among athletes is he.

RALPH D. RHODES, Manhattan, Kansas Civil Engineering "My book and instruments shall be my company, on them to look and practice by myself." Page 229

1914

1914 .

SENIORS

ETHEL ROSEBERRY, Arkansas City, Kansas Home Economics Y. W. C. A., Ionian. "Ask me if you want to know anything about the farm."

MARY SUSAN ROWAN, Arkansas City, Kansas Home Economics Eta Beta Pi, Y. W. C. A., Ionian. Queen rose, of the rosebud garden of girls.

WARREN A. RUDE, Hoisington, Kansas Architecture Engineers Association, Architects Club. "Enjoy the present whatsoever it be, and be not solicitous about the future."

1914

CLARA LOUISE SACHAU, Manhattan, Kansas Home Economics Browning, Y. W. C. A., Oratorical Board "Fine manners are the mantles of fair minds."

SENIORS

ANNA E. SANDERS, Manhattan, Kansas Home Economics Ionian, Y. W. C. A. "My mind is my kingdom."

BENJAMIN SCALAPINO, Everest, Kansas Civil Engineering Truthfulness is his watchword. Page 231

1914

AMY INEZ SAVAGE, Miltonvale, Kansas Home Economics Browning, Y. W. C. A. Savage in name but cheerful in thought.

RAYMOND W. SCHAFER, Jewell, Kansas Agronomy Sigma Nu, Varsity Football, Hamilton. "The world is good and the people are good, and we're all good fellows together."

SENIORS

CHARLES H. SCHOLER, Milo, Kansas Civil Engineering Sigma Tau, C. E. Society, Engineering Association. "He whistles his cares away."

HAZEL SHELLENBERGER, Westboro, Missouri Home Economics "A handful of common sense is worth a bushel of learning." Page 282

BESSIE LAURA SHEAFF, Kansas City, Kansas Home Economics Lambda Lambda Theta, Y. W. C. A. "So innocent and so cunningly simple."

HERMAN HENRY SHERRARD, Winfield, Kansas Agronomy Y. M. C. A., Hamilton, Rifle Club. "Keep good company and you'll be of them."

1914

1914

SENIORS

MARTIN IVIN SHIELDS, Lost Springs, Kansas Agronomy Hamilton, Agricultural Association, Y. M. C. A. A good student and a darn nice boy.

ERNEST GROVER SHAAD, Lawrence, Kansas Horticulture Webster, Grange Woman is his only failing. Page 233

EDA SCHOWALTER, Halstead, Kansas Home Economics Ionian, Y. W. C. A. To know her is to love her.

EVA LEONE SHARPE, Chase, Kansas Home Economics Ionian, Y. W. C. A. "Men may come and men may go, But I go on forever."

SENIORS

FRANK SIDORFSKY, LeRoy, Kansas Electrical Engineering Tau Omega Sigma, Varsity Football, Scarab. It beats the band how he can play football.

ANNA MAUDE SMITH, Lyons, Kansas Home Economics Lambda Lambda Theta, Y. W. C. A. This is Anna Maude and the whole school knows it.

WILLIAM ROSS SMITH, Peabody, Kansas Electrical Engineering Hamilton, Engineering Association, A. I. E. E. "The more we love, the nearer are we to hatred."

1914

U. J. SMITH, Portis, Kansas Civil Engineering C. E. Society, Engineering Association. "His air and manners, all who saw admired."

SENIORS

FLOYD A. SMUTZ, Bird City, Kansas Architecture Sigma Tau, Athenian, Royal Purple, Scarab, "In love, he who is earliest cured is best cured."

HARRY C. STOCKWELL, Havensville, Kansas Dairy Husbandry Dairy Association, Dairy Judging Team, Scarab. A diamond in the rough.

1914

Page 235

THOMAS G. SPRING, Greensburg, Kansas Horticulture Hamilton, Y. M. C. A., Fruit Judging Team, Debating Council. He thinks, speaks and acts just as he ought.

MARY DOW STODDARD, Manhattan, Kansas Home Economics "If you cannot have what you wish, wish for what you can have."

LOLA DOW STODDARD, Manhattan, Kansas Home Economics A companion that is cheerful is worth gold.

 WILLIAM A. SUMNER, Manhattan, Kansas Industrial Journalism
 Athenian, Forum, Forum Debating Scholarship Winner.
 Importance is one thing and learning is another, but a debate's a debate.

W. L. SWEET, Manhattan, Kansas Horticulture Alpha Zeta, Aztex, Athenian, Forum. "Three years have I wasted as an anti-fusser."

MURREL M. SWEET, Manhattan, Kansas Home Economics Ionian, Y. W. C. A. "So sweet and fair is she."

HERMAN F. TAGGE, New Holstein, Wisconsin Animal Husbandry Athenian, Alpha Zeta, Royal Purple. He hails from Wisconsin. We do not know whether they let him out or whether he escaped.

LEON W. TAYLOR, Chapman, Kansas Animal Husbandry Sigma Alpha Epsilon, Saddle and Sirloin. "A sleepy, dapper little man." Page 237

GAIL TATMAN, Manhattan, Kansas Home Economics Eurodelphian, Dramatic Club. "All the world loves a lover."

OLIVER S. TAYLOR, Jefferson, Kansas Animal Husbandry A big noise done up in a small package.

SENIORS

CORA TEMPERO, Clay Center, Kansas Home Economics "A perfect woman, nobly planned, To warm, to comfort and command."

DELOIS G. TEPFER, Wichita, Kansas Veterinary Science Sigma Alpha Epsilon, Alpha Psi Veterinary Medical Association, "Hurry up, fellows; Fve got a date."

HAROLD A. THACKREY, Kansas City, Kansas Civil Engineering
C. E. Society, Engineers Association, Alpha Beta, Kansas State Collegian. "Any news today?"

1914

Емма Atwood Tomlinson, Topeka, Kansas Home Economics Ionian, Y. W. C. A. "Need another girl?"

SENIORS

JOE VALE, Webber, Kansas General Science Acacia, Varsity Football. To all that live within the compass and square.

Roy H. VANSCOIK, Aulne, Kansas Agronomy Athenian, Y. M. C. A., Grange. He's from the Normal; can't tell him "nothing."

1914

VERNA VANDERLIP, Woodston, Kansas Home Economics Browning, Y. W. C. A. "Be not simply good, but good for something."

MARGARET ESTHER WALBRIDGE, Russell, Kansas Home Economics Ionian, Dramatic Club, Debating Council, Inter-Society Council. An "Io" and a rooter, too, Whatever she starts she makes go through.

SENIORS

BESS BLANCHE WALSH, Clay Center, Kansas Home Economics Y. W. C. A., Eurodelphian. "What's the use of fussing when there are so many other things to do?"

LILLIAN CAROLYNE WEEKS, Vermillion, Kansas Home Economics Y. W. C. A. "Do not live by the week only, but live every moment of the day."

1914

LAWRENCE PAUL WEHRLE, Scranton, Kansas Home Economics Y. W. C. A., Franklin. "A brilliant mind, a manner kind."

LAWRENCE PAUL WEHRLE, Scranton, Kansas Agronomy Alpha Zeta, Aztex, Varsity Football, Hamilton. He is built on geometrical lines.

SENIORS

Last Will of The '14s

EING fully conscious of an existence which is about to terminate, and the dissemination of this body as a physical entity, we deem it necessary to make preparations accordingly.

Realizing that the disposal of numerous gifts and offices lies within our power, and realizing that such disposition should be made, we, THE SENIOR CLASS OF NINETEEN HUNDRED AND FOUR-TEEN, being of sane and unprejudiced minds, do make this, our Last Will and Testament, wish and choice of all things named hereinafter.

(1) After long and mature deliberation, we give and bequeath the office of "Best Student" to that peerless class favorite and quizz eater, "Bill" Sweet. In making this decision, it has been after a long and careful investigation of records, and action taken on a number of individuals who might have had rights to be so named, but the ability of a man to make honor grades and look after a "case" at the same time, compels us to reach our decision. Fully appreciating the rights of Alpha Zeta to a claim to said honors, we concede their demand as of some consequence, but owing to the fact that the majority of their members are from the under classes, they must not precede Alma Halbower, who was never asked to join, purely on account of "spite work" as it would seem. And in case the above named should not be able to receive said honors, the same are to descend to "Swede" Pearson and Bob Hood, in order named.

(2) We give and bequeath to that exponent of manly beauty, A. Doryland, the office of "Handsomest Man," who, by all fair-minded persons, is best adjudged to fill that position with all the honor and trust that may go with same; and we also bequeath to the person named, the right to defend his title by any means that he may choose from any attack or litigation that may be brought by "Stub" Stockwell. The irregular attendance of Frank Sidorfsky at class has prevented his name from having the fullest consideration that it might have had. In case of default of any kind, the above office shall be declared vacant, we designate that the following shall succeed to same in the order named: Harry Baird, "Pinky" Gwin, Jack Gist and Don McCallum.

(3) For the office of "Shrewdest Politician" there is a large field from which to choose. But owing to the handicap under which he has worked and owing to the many reforms that he has accomplished, the same shall go to Harry M. Zeigler. And furthermore, on account of his estimable work in raising the entrance requirements of this institution and changing the name of the same, not to mention the fact of running the college "sheet" with honor and credit, and also owing to the splendid deeds he has done to keep Tau Omega Sigma

1914

intact, in case the above named shall not be in school at the time of graduation on account of the Council of Deans, the President and the Board of Administration, the office shall be declared vacant and the interior of Anderson Hall shall be painted jet black and so remain for a period of thirty days. Cecil Haines and Jack Tagge have been eliminated for the vacillating position that they took with reference to the Senior Swing, and forfeit their rights to William Curry, who has shown marked political tendencies to get on the winning side after he has lost an election.

(4) The honorary medal of "Best Bluffer" is hereby bestowed upon "Stony" Lee Potter, whose efforts to succeed in his chosen line have been unparalleled in the history of Kansas State. Honorable Mention must be given to "Tom" Boice on account of the success that he has made along these lines. While outstripping "Stony" in attempts, his efforts were not rewarded with the same uniform results as have been those of the first named, and for this reason, Boice must be given the secondary honors of polishing said medal.

(5) On account of his natural ability and fitness for the same, the office of the "Most Persistent Fusser" is hereby given to J. B. Adams. His work along research lines is of a thoroughly scientific nature and shows many scholarly hours spent in determining the methods and effects of this popular divertisement. We have not overlooked the capabilities of "Nob" Hutchinson, and hereby appoint him as first assistant to the first named.

(6) Any other offices of profit and trust are to be given to members in the Junior class who shall have shown ability to so handle such offices.

(Signed) CLASS OF 1914.

Royal Purple An Old Story

ONG ago a Junior boy hid behind a pile of boxes in the basement of Anderson Hall, late one afternoon in the spring of 1909. That was in the days before the College had a night watchman, and this Junior boy was planning a little innocent recreation. After dark he came from his hiding-place and climbed out through a window at the southwest corner of the building.

Later in the night he and six other Junior boys climbed through this open window, into what was then Miss Rice's classroom. Yes, this was the bunch that took the College Clock. The picture is what was left of the clock when the boys got through with it. They did not leave such a great deal.

Two boys were stationed at the south door, to guard against a surprise. The assistant janitor usually slept in a room at the north end of this building, so two more of this bold party stood out-

side his door ready to fall on his neck if he should come out. It happened, however, that the assistant janitor was not in his room that night. This lessened the excitement, but increased the safety of everyone concerned. The clock hung on the wall above

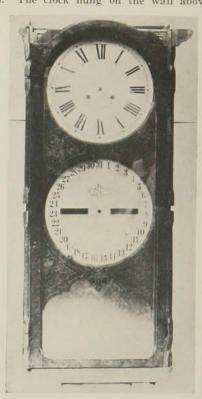

1914

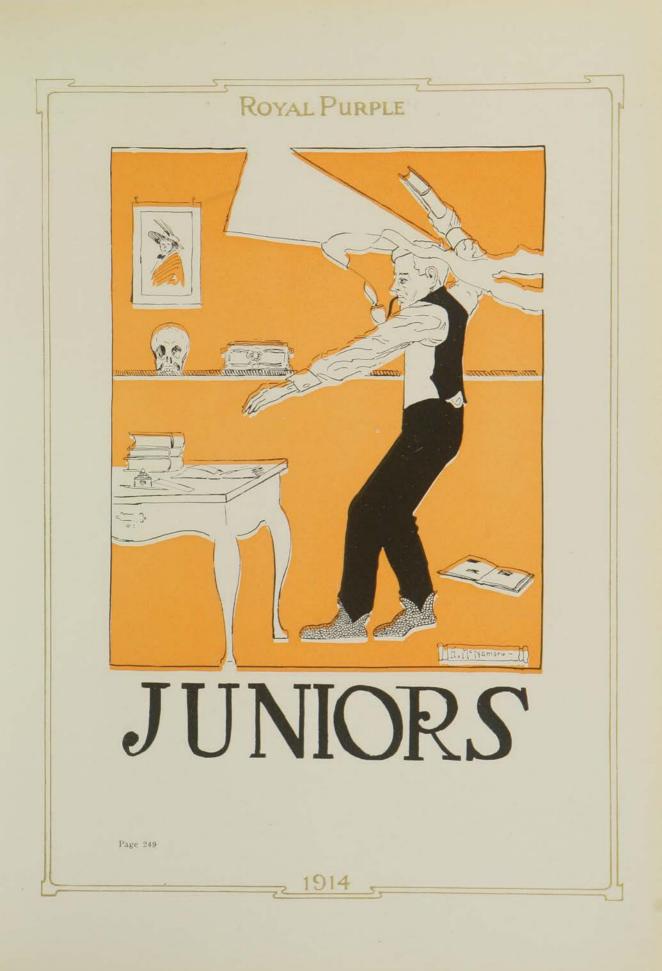

where the drinking fountain now stands, in Anderson. One boy climbed up and pried the old clock loose. The other two stood below and tried to catch it when it fell.

There wasn't very much light, and the old clock was big and heavy and up in the air about twelve feet, so there was no catching it. When it finally came down it hit the floor with a crash that broke its face and knocked off its top.

The heroes of this party did not linger for long after this. They carried the clock out through the south door. They hurried it down to the City Park. They brought it through Professor Dickens' back yard and up alley to the Co-Op corner. Here they rested and decided what they should do with it, now that they had it. They distributed the works among themselves, and hung the empty case on the light wires at the Co-Op corner. Early in the morning two other boys discovered it there and took it away. They put it in a cellar, not far from the corner where they found it, and it has been collecting cobwebs there ever since. It has been out of the cellar only once since the morning it dangled from the light wires; that was the afternoon of May 21, 1913, when it had its picture taken.

No, it would not do to give the names of the naughty members of the '10 class who did all this, because some of them have become quite respectable, and are trying to lead lives that are full of dignity.

Officers Spring Term of '13

ONTRARY to all custom, the Sophomores will dispense with introductions and proceed to tell you about the class of 1916. We will not brag, yet there are a few things that we should tell you.

"That Freshman Hat"

Officers for Fall Term

Freshmen caps had been discussed and agitated by the upper-class for several years, but it remained for the Class of 1916 to make the caps a reality. One spring morning the Freshmen, led by Professor King, marched dutifully to chapel, each adorned with a lettuce leaf creation of millinery. The Class of 1916 is not one to take dictation from anyone, but when it comes to showing spirit voluntarily and spontaneously, we are "right there."

The class is active in oratory and debate, placing one member in the first division of the oratorical contest of last year, and two representatives in this year's contest. In the preliminary debates this year the Sophomores placed five members.

Our prophesy in last year's ROYAL PURPLE that we would take the championships in baseball and track has been fulfilled. We will furnish

914

Officers for Winter Term

most of the Varsity track material for this year. In last year's baseball we furnished a Varsity pitcher and several of our class-mates made the squad.

In the interclass football this term our men showed up well. One Sophomore made a reputation as one of the best fullbacks in the Valley. We have furnished several of this year's Varsity basketball men.

The class is well represented in the military department, especially among the officers. Almost half of the college rifle team is composed of Sophomores, and the success that the team attained this year is due largely to them.

Socially, we are a jolly bunch. At the Freshman hike last spring some difficulty was experienced in finding a chaperone, but after kidnaping Professor Hughes, the hike was a great success.

1914

The Write-Up Committee

1914

The Sophomore class dance that was given on March 20th was considered one of the most brilliant and successful social events of the winter term.

We have had very spirited class meetings, and cordially invite all members of the Class of 1916 to them, as they will continue to increase in class spirit and enthusiasm all of next year.

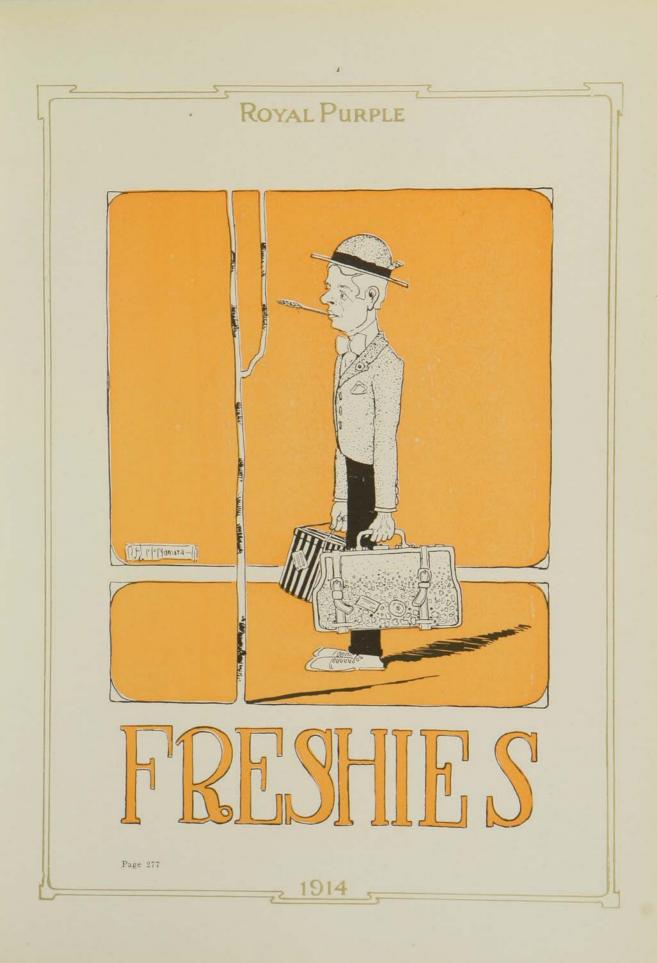

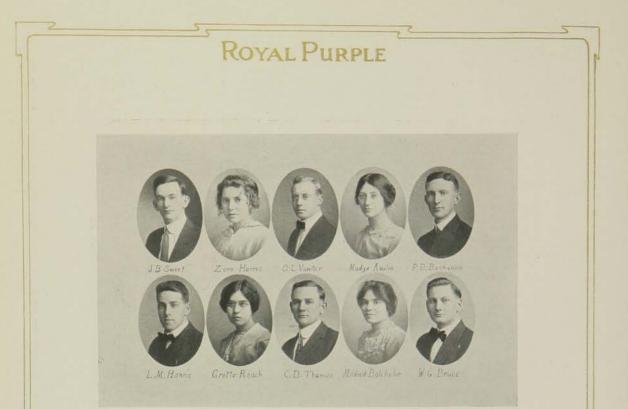

Mary and Wilma

> > 1914

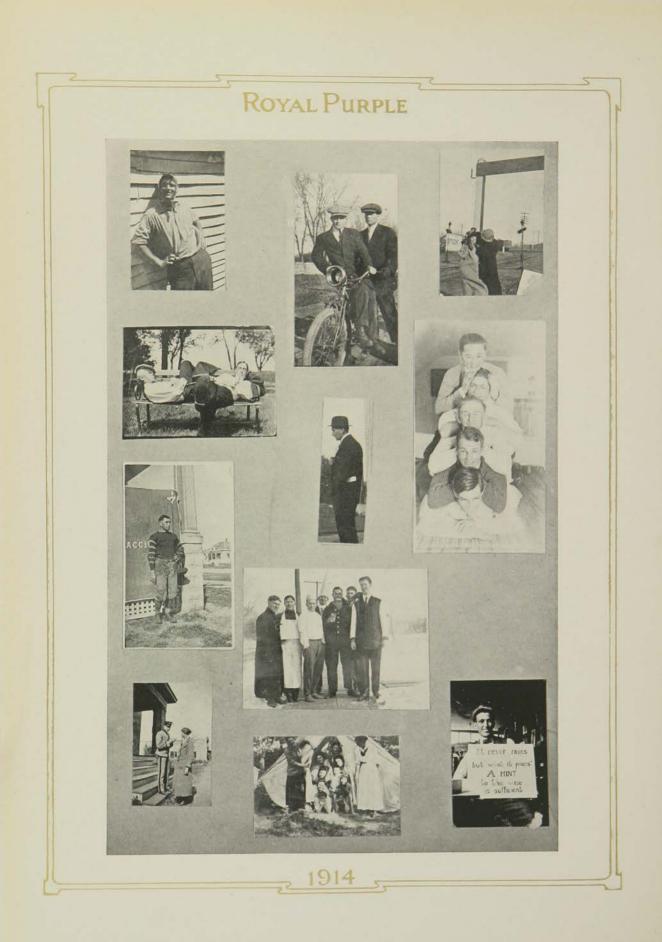

HE Class of Nineteen Seventeen is the first class to be entered under the new ruling which requires that all Freshmen shall be high school graduates. This requirement places the standscholarship on an equality with other colleges and universities of Kansas. The Freshmen have school spirit, and are great supporters of athletics. The improvement in rooting at the athletic contests can be explained only by the fact that the high school graduates have had experience in united cheering. Our football team was weak because of misunderstandings as to who was eligible. In basketball there were more than fifty candidates for positions. From these a squad of eighteen was chosen for the Freshman Varsity. The team is exceptionally strong, having outscored the Varsity in several practice games. Several of our men, when in high schools, made enviable track records. which they are expecting to duplicate here in College.

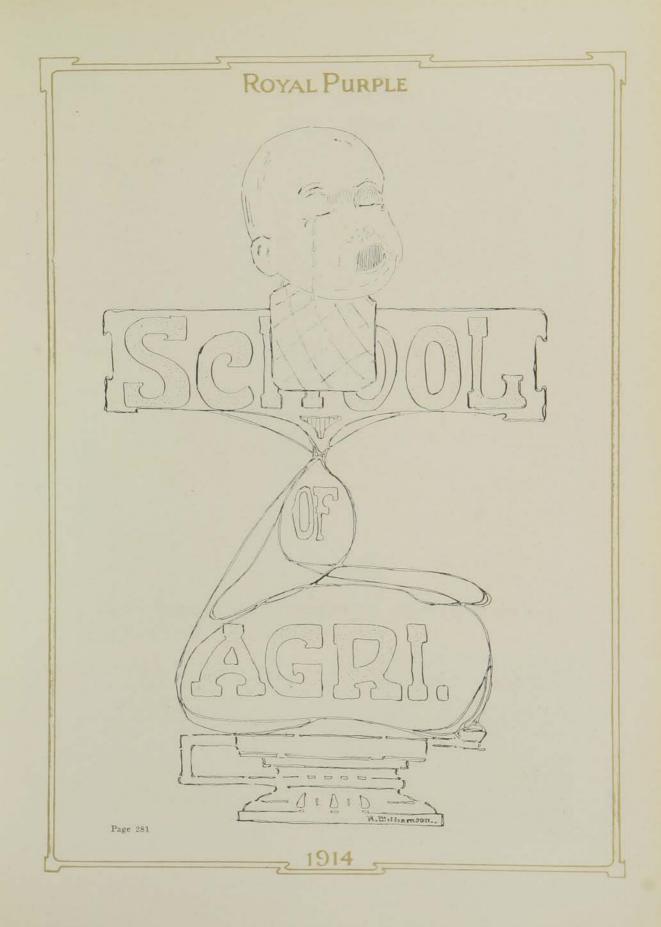

The Freshmen are taking an active part in the literary activities of the College. Sixty-eight have joined literary societes.

There are one hundred seventy-six girls enrolled in the Home Economics Course. Many take an active part in literary societies and athletics. The girls have organized a basketball team, and promise some good work.

During the fall term a steak roast was held at Wildcat, and even the "stags" enjoyed themselves.

1914

The School of Agriculture

With this volume of the Royal Purple the School of Agriculture makes its debut as a department of the College. It was organized during the summer of 1913, with Professor H. L. Kent of the department of Education as Principal, and Miss Ada Rice of the department of English as Assistant Principal in charge of the girls of the school. The first session opened September nineteenth with an enrollment of five hundred and sixtyfive students.

The School fills a unique place in the educational world, inasmuch as it is not intended as a substitute for a high school, nor is it intended as a preparatory school for the College; but it is a vocational school for young men and women who do not wish to spend four years in college, and yet who wish to take work beyond the eighth grade that will make them more efficient workers and producers. For such students courses are offered in those branches of the arts and sciences that are close to the work of the farms, the homes, and the work-shops of Kansas

and the work-shops of Kansas. The School has at its disposal the use of the one-and-a-halfmillion-dollar equipment of the Agricultural College, and its courses are under the supervision of the

1914

heads of departments of the College. Thus the students have the rare privilege of gaining a practical education, and at the same time of coming in touch with an institution of higher learning.

During the fall term, the work of organization began in earnest. Classes were formed, a football team was trained by a special coach, and three literary societies were organized.

The following brief facts will indicate what has been done to establish the School of Agriculture as a separate institution.

The Lincoln Literary Society

On October 27, 1913, twenty-seven young men met at the Y. M. C. A. building and organized the Lincoln Literary Society. A constitution was soon drawn up and adopted, and the Society started to work in earnest. The girls in the School of Agriculture organized the Philomathian Society, and the Lincoln and Philo-mathien Society is a seven build be an earnest. mathian Societies became brother and sister societies.

The Lincoln Society has progressed very rapidly since its organization, and there is no doubt but that more will be heard of it in the future.

The Representative Literary Society

Although the youngest society in point of organization, we bid fair to become the most practical of any in the School of Agriculture. We are representative in fact as well as in name. One of our favorite pursuits is the discussion of questions of public interest, for true to our name, we are most interested in those questions. It is our aim to develop ourselves into strong men, fitted to contend with and overcome the difficulties that may confront us. We look forward to the future with bright hopes.

Football

The School was especially fortunate in securing the services of a good coach, Hoover, a Baker star, who in a short time developed a very good team out of our untrained material. All were satisfied with the progress made, and we are not ashamed to place our record beside that of the 'Varsity. In the first two of the three games played, the team was at its best, but in the last game it was at a great disadvantage owing to the crippled condition of some of the best players. Our line-up for the first two games:

Captain N. A. SMITH	Coach LAMAR HOOVER
Left End A. L. MORTON Left Tackle G. A. FRANZ Left Guard C. O. RODA Left Half M. H. ROACH Full Back N. A. SMITH Center	Quarter Back F. L. BAYER
SCORE

Basketball

The basketball season of 1914 was quite successful. About three weeks after Christmas the Athletic Association voted for a team to represent the School of Agriculture, and "Pete" McNall was appointed coach.

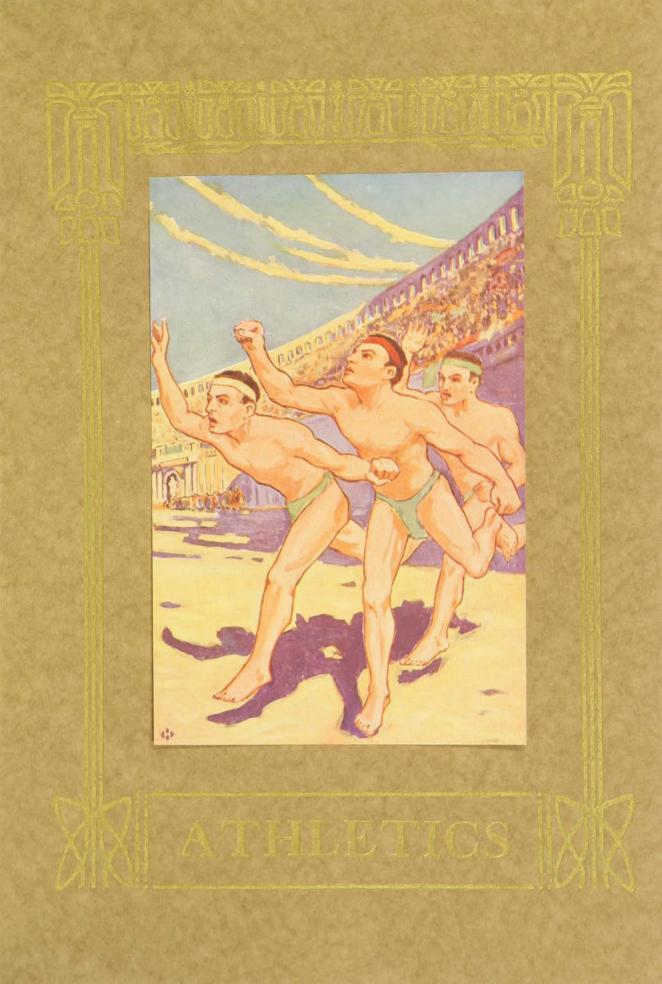

About fifty candidates were out for the team, but this number was soon reduced, under the supervision of Coach McNall, to the present squad. The schedule was light, as games were arranged late in the season. The first game was played with Quigley's team of St. Mary's College. Other games on the schedule were with Clay Center, Salina Wesleyan, Wamego, and Dickenson County High School.

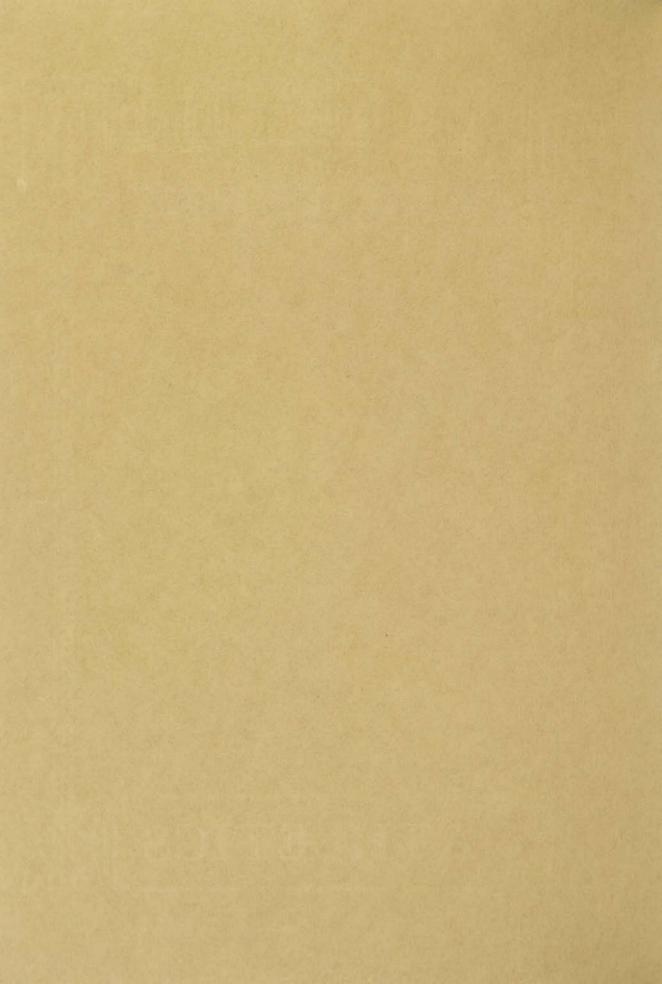

The squad was under the leadership of "Dutch" Scheufler.

Athletics

THE school year 1913-14 marks the entrance of the Kansas State Agricultural College into the Missouri Valley Conference. Many times our teams have competed with schools of that Conference, but never before this year have we been given consideration in the championship contests. This is a great step—this entrance into the higher conference and athletics at K. S. A. C. is on the boom. True we have not eclipsed the older conference schools with the brilliancy of our athletic stars, but we have been able to hold our own and have shown ourselves to be a force to be reckoned with. With our ever increasing enrollment, the placing of the entrance requirements at 15 credits, and the holding of the Annual State High School Track and Field meet at Alumni Field, the outlook for the future athletics at K. S. A. C. is very bright.

Athletics at this school are under the direct control of the Athletic Board. This board consists of one member chosen from each of the three upper classes; three members of the faculty, including the director of athletics; and President Waters, exofficio chairman. The members for the current year are Guy S. Lowman, director of athletics, Prof. J. O. Hamilton and Harry E. Porter of the faculty; W. D. Cusic, senior; A. L. Marble, junior; and George Bailey, sophomore.

This board is the court of last resort in all athletic matters at this school. Their most sacred duty is to see that no man who has participated in athletics in the middle ages be permitted to wear an Aggie uniform. They also award the official K to each man deserving the letter at the end of the seasons. These, and such minor questions as come up for settlement during the year form the principal duties of the Athletic Board.

GUY S. LOWMAN

Coaching Staff

Guy S. Lowman has had charge of Athletics at Kansas State for the past three years. During this time, besides being Professor of Physical Training and Director of Athletics, he has, until this last year, coached football, basketball and baseball. During these two years he has turned out some great athletic teams. Mr. Lowman has practi-

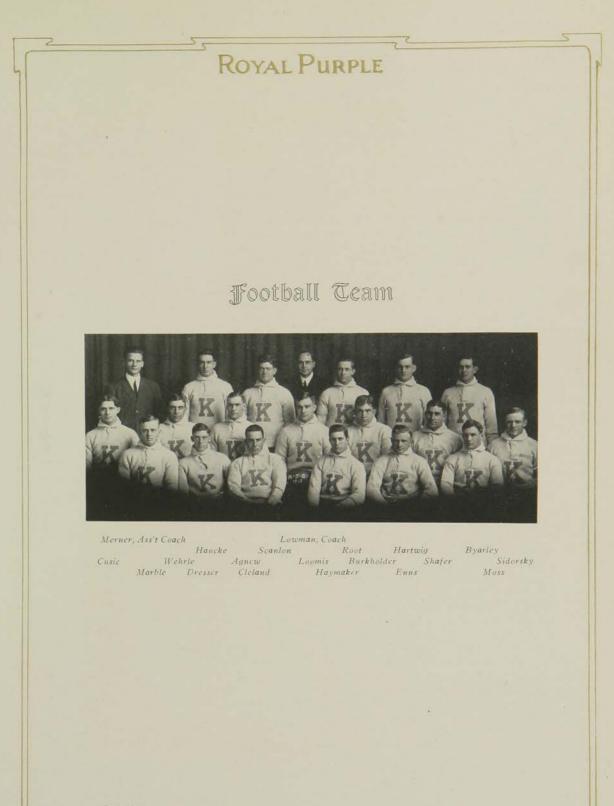

2 1914

cally organized the Athletic Department at this school and given it the firm foundation on which it now stands. Mr. Lowman came to us the year we first occupied the new gymnasium, and since that time athletics have steadily gained stronger support until this last basketball season, when we ended the season second of the Missouri Valley teams. Before coming to Kansas, Mr. Lowman coached the athletic teams of Alabama University, Missouri University, and Warrensburg Normal School.

This past year Mr. Lowman has been assisted by Carl J. Merner. Merner assisted with the 1913 football team, having charge of the back field. He was given complete charge of the basketball and track teams, Lowman retaining charge of football and baseball, and he has turned out one of the most successful basketball teams we have ever had here. The track team promises equal success.

CARL J. MERNER

Page 293

1914

Review of Season

O diagnose the 1913 football season to the satisfaction of everybody would prove an impossible feat. On September 15, at the call of Coach Guy S. Lowman, fifty stalwart candidates reported for the long, gruelling grind that is the lot of every gridiron man. These men served to introduce two additions to Kansas State, our new Assistant Coach Carl J. Merner, and our first Missouri Valley Conference team. The quantity of coaches was totally inadequate to handle the great number of men who reported for the Varsity and Freshman teams, but the quality of our instructors could not be beaten.

Prospects for a good team were promising in some spots and very gloomy in others. The line was heavy and composed of veterans, but the backfield, with two or three exceptions, was an unknown quantity. The two most glaring weaknesses were in the kicking and quarterback departments.

The season opened October 3 with the usual game with Southwestern. The first half was all in favor of the Aggies, ending with a score of 10 to 0. However, in the last period, injuries and costly penalties, together with the disappointing work of the line, which proved unable to stop the fast charging Moundbuilders, cost us the game, the Winfield school winning 13 to 10.

At 2 A. M. on the next Saturday morning the team left via the Rock Island for Lincoln to meet Jumbo Sthiem's proteges. In the first part of the game, the Cornhuskers' star backfield was thrown for losses and their line ripped to pieces, the first touchdown of the game being scored by the Aggies in the early part of the second quarter. In the third quarter Sthiem sent in a fresh backfield, a quartette every bit the equal of the first, and then the long, hard trip told on Kansas State. Nebraska circled the ends with great regularity, winning with a final score of 24 to 6.

As is the usual case, after the Nebraska defeat the team got together and played one of its best games during the next contest with the Kansas State Normals. In a monotonous and uninteresting game from the spectators viewpoint, the Teachers were trampled into the mud to the tune of 33 to 0.

During the following week, most of the team blossomed out as prophets and orators at the pep meeting held in preparation for that game of all games, the battle with our greatest rival, Kansas University. The game was the repetition of the same old story, K. U. playing the best game of her season, with the Aggies floundering around in bewilderment until the game is lost. K. U. outplayed us in every way and went home with the long end of the heartbreaking score of 26 to 0.

This defeat seemed to have taken all of the pep out of Kansas State and the following contest with Fairmount was a farce. The Wheatshockers, with the exception of one end who starred at hooking forward passes out of the air, were completely out-

classed but, owing to the listlessness of the Aggies, held the final count against them to 30 to 6, a score which should easily have been doubled.

To every action there is a reaction. The team came back on November 8 against Texas A. and M. and played a great game. For the first time during the season they had the final punch, advancing 80 yards on straight football and scoring on a forward pass in the last few minutes of play, making the score 12 to 0 against the Southerners.

One week later we left for Austin to clash with the Texas Longhorns. Arriving there, we were greeted with a big rain and a temperature of 102 degrees in the shade. The program consisted of a workout on Monday afternoon which resolved into a contest of determining who had the highest melting point. The game was played Tuesday in a downpour of rain before a large crowd. Texas University came up to her advance notices in fine shape and smothered us with a lop-sided score of 46 to 0. They had a wonderful team and staged several circus stunts for our enjoyment. The Aggies, though outclassed, put up a game fight which brought admiration from the Texas team and its supporters. We were a sorry looking bunch after the game, and about the only ray of light was Coach Lowman's quotation, "Well, it cost them sixteen hundred dollars to do it anyway." We received a generous portion of that famed Southern hospitality in the form of a fine banquet for the two teams, given that evening by the Athletic Association.

What will probably be the last Turkey Day contest for Kansas State for years to come, was fought at Topeka with Washburn College. The day was ideal and the teams were evenly matched. Heavy penalties in the early part of the game kept the Aggies from scoring, and the first half ended 0 to 0. Neither side had the advantage in the third period, but in the early part of the last quarter a Washburn substitute slipped through for a touchdown and his team-mate missed an easy goal. The Aggies came back with a vengeance and by a series of wonderful charges punched across the Ichabods' goal line. The punt-out was poor, with a result that goal was missed and the game ended in a few minutes a tie, 6 to 6.

The success of the season depends upon the viewpoint from which it is judged. If judged from the team standing it was a failure, for the number of defeats overbalanced the list of victories. But, if judged from the standpoint of development of good men for next year, scarcity of injuries, and general benefits to those interested, it was a success. The team was slow in getting together and did not show its real form until near the end of the season. The main strength in attack was bucking the line, with mediocre success in the use of the forward pass. The team defense did not measure up to that of former years.

Six veterans of this year's squad, with one exception all line men, have finished their football career. Their places will be hard to fill, but there is some great material at hand, and under the able captaincy of "Red" Agnew, the Aggies should have a winning team in 1914.

R

CAPTAIN FREDERICK HERBERT LOOMIS is a product of Alton, Kansas. "Cap," as he is generally known to the Aggie following, closed his football career at K. S. A. C. when the final whistle was blown at Topeka last Turkey Day. Prof. H. H. King started the husky 1913 leader on his football career when "Cap" played right tackle on the 1910 scrubs. With the coming of Coach Lowman, "Cap" was placed opposite "Big Jake" Holmes, where he played for three seasons. Always a hard fighter and a mountain on defence, Loomis will be greatly missed when the 1914 team lines up for the start of the season.

ARTHUR BURKHOLDER played his third and last year on the Aggie Varsity last season. With his massive, yet well carried weight, and unsurpassed knowledge of how the game ought to be played, "Burk" earned and received the honorary guard position on the All-Missouri Valley team for 1913. Trouble with weak ankles hindered "Lil Arthur" from making the trip to Texas, but his classy work against the Washburn eleven earned a tie score for the Aggies.

LAWRENCE PAUL WEHRLE, alias "Big Bill," team-mated with Burkholder during the 1911, 1912, and 1913 seasons. Wehrle played his first football on Mike Ahearn's scrub eleven in 1910 and appeared first as a regular lineman during the first season of the Lowman regime. "Big Bill" will be missed greatly by the 1914 team, owing to the steady hard fighting brand of football that marked every contest in which he participated.

1914

RAYMOND SCHAFER drew a suit in 1911 and went out to practice with the football squad for the exercise that might be derived. He had not played football in high school, but picked up the fine points of the gridiron game in a hurry and was awarded his letter at the end of the season on his showing at right end. Schafer's long suit was smashing interference and showed at his best in the 1913 contest with the Cornhuskers. He served his time out at the end of last season.

FRANK SIDERFSKY played his farewell game on the Kansas Aggie Varsity against the Washburnites. The "Russian" eclipsed all on the 1913 squad as a speed merchant. Around the ends for a few chalk lines was this player's best stunt. "Sid" played great football for the Aggies during his three years of service, although at all times his lack of weight proved a severe handicap.

"JIMMIE" Moss ranked second to Dresser in weight on the 1913 varsity squad but second to none as a fighter. "Jim" started his career with Prather and was the hardest hitting end on the varsity during his three years of service. Injuries forced his removal from the Washburn battle on Turkey Day, but his playing while in that game will be remembered by all who witnessed the fray.

MERRILL ELSWOTRH AGNEW, Captain-elect of the 1914 Varsity, earned that position by consistent team play throughout the 1913 season. A clever kicker and forward passer and a speedy man to skirt the ends, and best of all a fighter all the way, "Red" should aid the coaching staff materially in putting one of the best football teams in the field in 1914 that the Aggies have had for years. His punting ability was unearthed in the game against the Texas Longhorns, and in the Washburn game was well above par.

1914

Handicapped many times throughout the season by injuries, "BILL CUSIC proved himself a capable lineman for a second letter on the varsity last season. Cusic was adaptable to either of the guard positions and was recognized and remembered as a hard fighter by every opposing team that he faced.

ARCHIE MARBLE started his football career at Salina Westleyan and later played on the Mankato High School team. He played his first year on the Kansas Aggie Varsity, alternating with Holmes at left guard, during the 1912 season, and playing as a regular in 1913. Marble was the heftiest man on the squad and during the final few minutes of play of the Fairmount game showed up well in the fullback position.

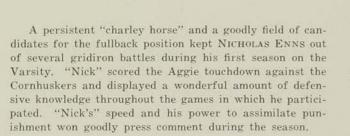

When the 1913 football letter men were announced, the Kansas Aggie following was more than pleased to note that ALFRED BYARLEY had drawn one of the coveted letters. Byarley tried out for the varsity eleven four consecutive seasons and by clever work in a number of the 1913 contests earned his "K." Byarley was seen at his best in getting down under punts and at smashing interference.

"LEFTY" CLELAND won his letter in football last fall, through his ability to raise the stands with thrilling runs through broken fields and around the ends. Cleland played his time out in baseball and loses another chance at the gridiron game next fall. In the Washburn game his speed aided the Aggie eleven materially in shoving over the fourth quarter touchdown that tied up the score.

"HANK" DRESSER played his first and last year on the Varsity during the 1913 season. Dresser alternated with Haymaker at quarter and staged a clever exhibition of the gridiron game at Topeka in his farewell appearance. He started the Texas U. fray, but was not sure whether he was playing football or a quiet game of seven-up after a husky Southerner had crashed into him, and Haymaker was sent to the rescue.

1914

FRED HARTWIG, following in the footsteps of the family, tried out for the 1913 varsity and made good. He alternated with Enns at the fullback position until laid out at mid-season, and although not as hefty as many of the opposing fullbacks, he proved a mighty line-smasher and plunging through the massive Burkholder scored the Aggie touchdown, at Topeka, by several inches. Hartwig has two more years of varsity service.

WILLIAM HAUCKE was introduced to the Aggie football followers after the first half of the varsity schedule had been played. With the injuries of Hartwig and Enns keeping these two fullbacks on the sidelines, Haucke entered the field and played great football. His line plunging was of the Prather order, and although green at the game his improvement was rapid and the 1914 varsity is insured of a capable player.

Playing end on the Fairmount College team in 1911 and quartering the 1914 class team to the class championship in the 1912 series

fitted HAYMAKER out as pilot for the 1913 Varsity, where he alternated with Dresser through the season. His drop kicking and forward passing showed up well in the class games, but the oportunities for kicks from the field were few during the 1913 season.

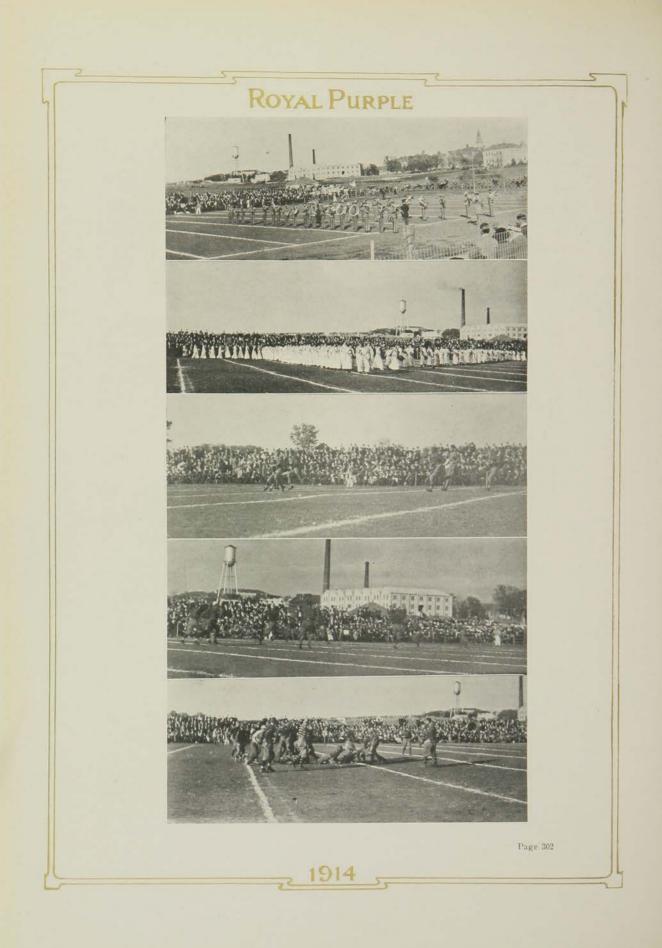

SCANLON was known among the football players as the most desperate fighter on the squad. He played center during the last half of the season and it was owing only to this fact perhaps that he did not make the All-

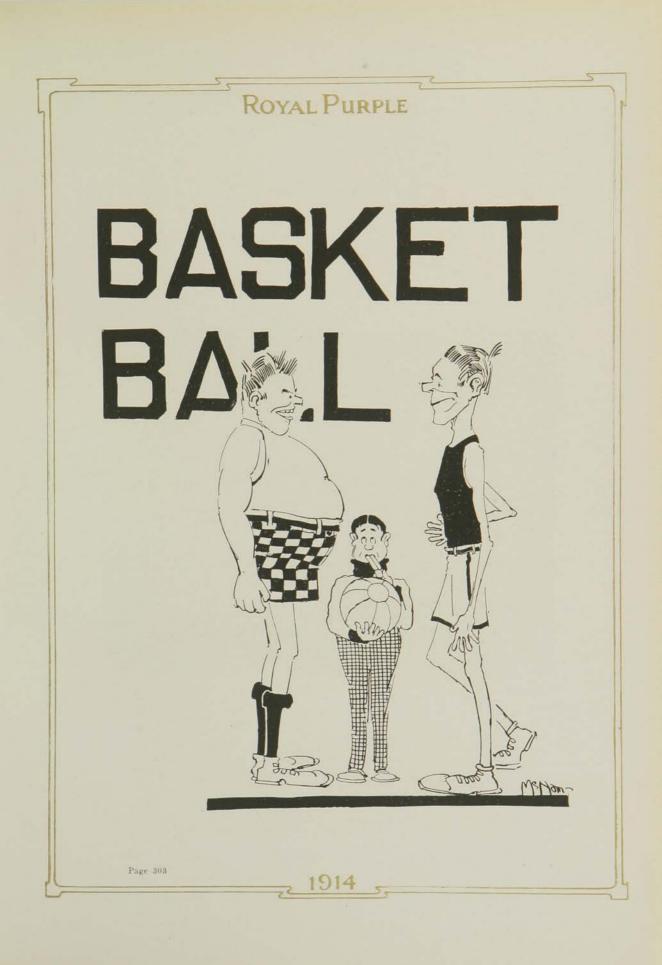

1914

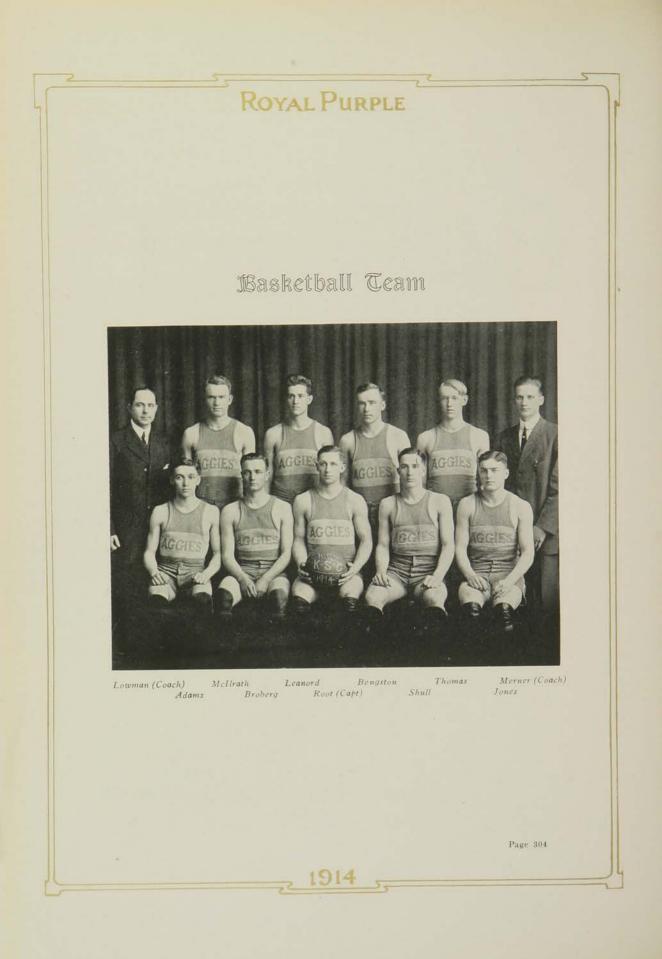

Kansas team. His first big exhibition came at Houston, Texas, against the University of Texas team, and by consistent playing he earned a steady job at the pivot position.

FRANK ROOT alternated with Moss on the end of the line during the 1913 season and played particularly well. When Root replaced the crippled "Jeems" at Topeka last Thanksgiving Day, the Washburn backs refused to carry the ball around his end. In 1912 Root smashed a shoulder early in the year and was out of the game throughout the entire season. He came back in basketball and track and won the title of "best all-around athlete" and two letters during the remainder of the year. Frank captained the 1914 basketball squad and starred in every game.

Basketball Review

F. P. Root, Captain

THE basketball squad was called out for practice about the middle of November by Captain Souders, and there was considerable good material showed up in the way of goal shooters. The pre-season workout was efficient, and things looked pretty fair for a good fast team, although the average weight was, as has been the rule with the basketball team, pretty light. There were six letter men out for practice, and all went well until Captain Souders was declared ineligible by the Missouri Valley Conference Rules Committee and Spin Young had to quit because of his heavy school work. The loss of these two took the captain (center) and a likely goal shooting guard from the field of activity. Souders' team-work and goal shooting the year before were conceded by many of the game followers to be of the top-notch quality, and his loss both as player and captain was a very keenly felt disappointment to

the team and its supporters, but it was only one of the many things that have happened to our athletics due to the changing from an inferior conference to a faster and better one, i. e., from the Kansas Conference to the Missouri Valley Conference.

The squad had competent and efficient coaching on the fundamentals of the game for a time, then they began to have try-out scrimmages, and the day before the first game of the season F. P. Root was elected captain to take Captain Souders' place, due to the ineligibility of the latter. And on January 9th the season was opened with Ames.

CLIPPINGS FROM THE KANSAS AGGIE

"The Kansas Aggies inaugurated their entrance into Missouri Valley basketball by defeating the Ames Aggies 19 to 7. The game was marred by rough work on the part of both teams."

"Iowa State quintet nosed out an 18 to 14 victory."

"The Kansas State basketball five defeated the Southwestern aggregation on the Nichols court Thursday night, 46 to 38."

"The Kansas State five lost the first game of the Kansas University series to the Kansas team on the Nichols court Thursday night, 44 to 26. The Kansas team proved too fast for the Merner troupe and ran away from the locals in the final period.

"The Kansas State basketball five took the first fall of the 1914 season out of the Kansas University five on Nichols court last night, 29 to 25. This is the first defeat for Bill Hamilton's five and puts the Kansas State five in the Missouri Valley rating with a percentage of .500. The contest was by far the best that has been staged on the Nichols court this season and was marked by the old fight throughout."

"The Merner quintet lost to the Washburn basketball five, 27 to 19, on Nichols court last night. Washburn was outplayed on the floor, but excelled in the goal shooting department. A bleacher Hawkshaw unearthed the difficulty with the Kansas Staters by explaining to his neighbors all about the trouble the locals were having in locating the basket, although in reality there was no visible need of a magnifying glass to discern the weakness."

1914

"The University of Kansas basketball team defeated the Kansas State five on the Robinson court tonight by a final score of 28 to 24. The game was sluggish throughout and marked by roughness."

"In the last game of the series with Kansas University, the Kansas Staters lost three men and were unable to stave off defeat. The score was 41 to 16."

"The Kansas State basketball team defeated the Emporia Normals on the Nichols court last night, 40 to 15. The contest was the cleanest that has been played on the local floor this season, and was characterized throughout by the efficient work of Referee Quigley.

"The Kansas State basketball five lost to Washburn on the Topeka team's court last Saturday night by a final score of 24 to 28. At the end of the allotted forty minutes of play the score was tied at 24 all, and in the extra five minutes of play the Ichabods tossed in two baskets which won the game."

"The Kansas State basketball team played well against the Haskell Indians last Wednesday night and scalped the Braves by a final count of 49 to 30. The game was as fine an exhibition of the indoor sport as has been staged in Nichols this season."

"Five minutes of over-time were required last night to decide the basketball game between the Missouri Tigers and the Kansas State teams. The Kansans made three points in this period and won by a score of 35 to 32."

"It must be said that the Kansans were playing pretty good basketball to come back as they did from under a 21 to 12 lead in favor of Missouri, in the last part of the second game, and win by a score of 22 to 21."

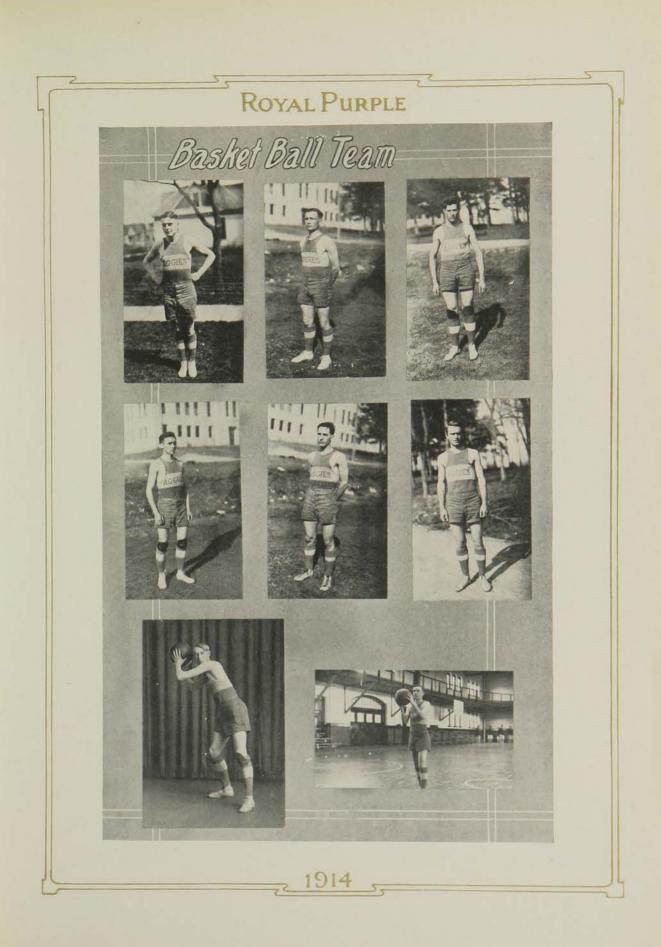

"After winning two straight games from the Missouri University basketball squad, capturing each contest by a sensational finish, the Kansas State team met its master at the Washington University gymnasium Friday night, the Myrtle and Maroon five taking an exciting contest by the close score of 20 to 17."

"The second Washington game: Although Washington University basketeers made a sensational finish to regain the lead in a game apparently lost, they were unable to push ahead and the Kansas State five won the second game of the two-game series by the close score of 22 to 21."

"The Kansas State basketball team cinched second place in the Missouri Valley basketball championship by defeating the Missouri Tigers, 32 to 20, on the Nichols court last night."

"The Kansas State basketball team shoved the University of Missouri five one notch further into the mire of the Missouri Valley standing last Saturday night, when they defeated the Tigers, 34 to 23."

Baseball Season, 1913

RACTICE was started in the Nichols Gymnasium about the first of February, when Coach Lowman issued the call for battery men to report. This was followed two weeks later by the call for all outfielders and infielders to report for practice. The snow held late and the opportunity for outdoor work was not forthcoming until just one week before the first game. Time was improved, however, by bunting practice, infield workouts, and lectures in the gymnasium. Prospects were very bright, for with both pitchers, a catcher, three infielders, and three outfielders of the 1912 team working out, it seemed that we were due for a winning team.

The season opened April 4th with only three days' outdoor practice, but the College of Emporia was swamped under a 19-3 score. The coach made use of the game to try out many newplayers.

April 7th, the only extra-inning game of the season was played on a very muddy field. This time the Warrensburg Normals were the victims, by a score of 8-7, the Aggies winning in the tenth inning.

Missouri University came for two games, April 10-11, but neither game could be played, because of frequent showers. One inning of the first game was played, in which nine Aggies batted, only one of whom lowered his batting average. Three runs were scored, but at this stage of the game, rain interfered.

Four games were played the following week. We took K. S. N. on, 10-8, but lost the game the next day to the fast Chinese University team of Honolulu, by the score of 7-3.

Nebraska divided two games with us on April 18-19, winning the first 5-4 and losing the second 6-4.

The following week we took the first trip of the season, leaving at noon, April 27th, for Columbia, Mo., to play two games with the Tigers. We were humiliated in both games by close scores, due to some spectacular plays by the Missouri gardeners. The scores were 2-1 and 5-2.

We returned home to play St. Mary's May 2nd. Quigley's men had their usual pep and lost a hard-fought game, 5-2.

On Wednesday and Thursday, May 7th and 8th, came the two most looked forward to games of the year, with K. U. They were plainly a case of

too much Bishop. K. U. won the first game, 3-o. In the last of the ninth inning of the second game the score was 6-3 against the Aggies. It was at this point that the Aggies found themselves and commenced to do some real batting. The pace was too much for Busick, and again Bishop was called to come to the rescue. He did come, and the game ended with a score of 6-5 in favor of K. U.

May 15th we invaded Lawrence, hoping to redeem the two defeats we had received from K. U. on the Alumni field. We were only partially successful, however. A batting rally was started in the ninth inning of the first game, but the K. U. infield tightened up and we lost the game, 5-3. The Aggies won the second game easily, 6-3, and for another season K. U. triumphed over us.

May 21st we again defeated St. Mary's, this time on their own field, by the score of 6-1.

We returned home after this game to close the season May 23rd against the Haskell Indians. The redskins were defeated in a one-sided game, 7-0.

On the night of June 2nd, the Coach entertaned the men who composed the squad. K letters were awarded to the following men: Agnew, Briney, Scanlon, Enns, Cleland, Forsburg, Pollem, Beaman, McCallom, Bailey, Dresser, Knaus, and Dryden. The evening was successfully brought to a close by electing Hank Dresser as the 1914 captain.

Missouri Valley rules made Dresser ineligible, however, and on February 12th the baseball K men that were in school elected Nick Enns as the pilot of the 1914 baseball team. Six old men and many Freshman stars of the 1913 team are out for the Varsity team this year, and the prospects for a winning team are very good.

K Men Eligible for Season 1914

Track Team, 1913

Root Marl Smith Gates L. Collins Collins 1 Bryan, Coach Hutto, Capt. Welch Hancock

Jon

THE '13 track season marked the advent of the Aggie cinder men into Missouri Valley company, and they left a creditable record behind them. True, Kansas University beat us twice, but they also beat Missouri indoors and walked on Nebraska outdoors. True also, Missouri hogged the large end of the dual meet score, but they mistreated Minnesota even more.

So far as the State Meet in the Kansas Conference was doped, the Aggies were due for a trouncing, but easily led a good field on a poor track, though Horn managed to keep the 880 record at Baker. But the Aggies became better fixed in Missouri Valley track athletics by winning a good bunch of points at the K. C. A. C. meet in Kansas City, and winning a first place in the Conference meet at St. Louis, where they met some fast company.

The tennis season of 1913 proved an unusually successful one, not so much in games won as in the advancement of the sport at Kansas State. More contests were scheduled than heretofore and the number of tryouts for the team evidenced the rapidly growing interest taken in the sport. Heretofore, tennis has been the real "one horse" sport at Kansas State, but the general advancement in athletics demands that a tennis team be produced which can maintain an equal standing to that of the other athletic teams.

New tennis courts are to be built, and henceforth the sport will assume its rightful position and place Kansas State on the map.

Although two of the Varsity graduated with the 1913 class, pros-

pects for a 1914 team are exceedingly good. Young, of last year's team, will be back, and with other promising material, a winning team is assured.

The Aggies were represented at the State meet at Winfield by Wolcott and Rexroad, Young being unable to attend. The Aggies lost to Baker in the doubles in the first round, but both players traveled to the semi-finals in the singles, Rexroad losing to Vaughn, state champion, 6-3, 6-4, and Wolcott losing to Lowry, of Baker, 6-2, 2-6, 6-3.

 6.4, 6.4, 6.4, 6.4

1914

Interclass Athletics

NTERCLASS contests are of great interest to the several classes, for there is keen rivalry at all times. Beside this, the contests are watched closely by the coaches, for there is always a possibility of overlooked 'Varsity material. Inter-class schedules in all the major sports are played off in their proper season.

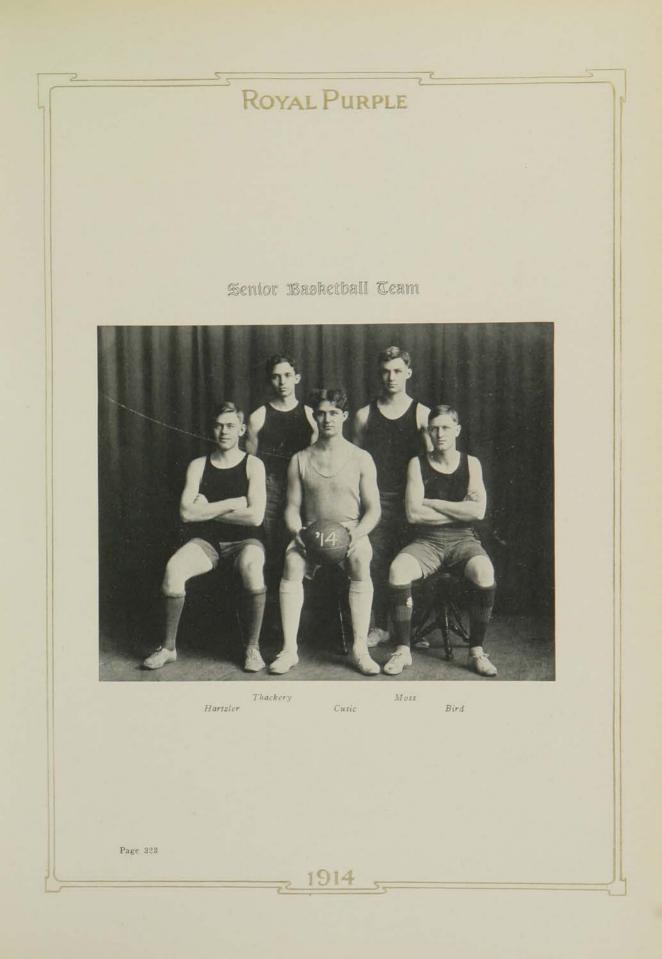

The track meet last spring was an easy victory for the Freshmen. The entrance of an unusually good bunch of high school track men last year made this almost a certainty. Many of that Freshmen team are now Varsity stars. The Freshmen team are always at an advantage, however, as the other classes are picked for the Varsity teams, while the Freshmen are ineligible.

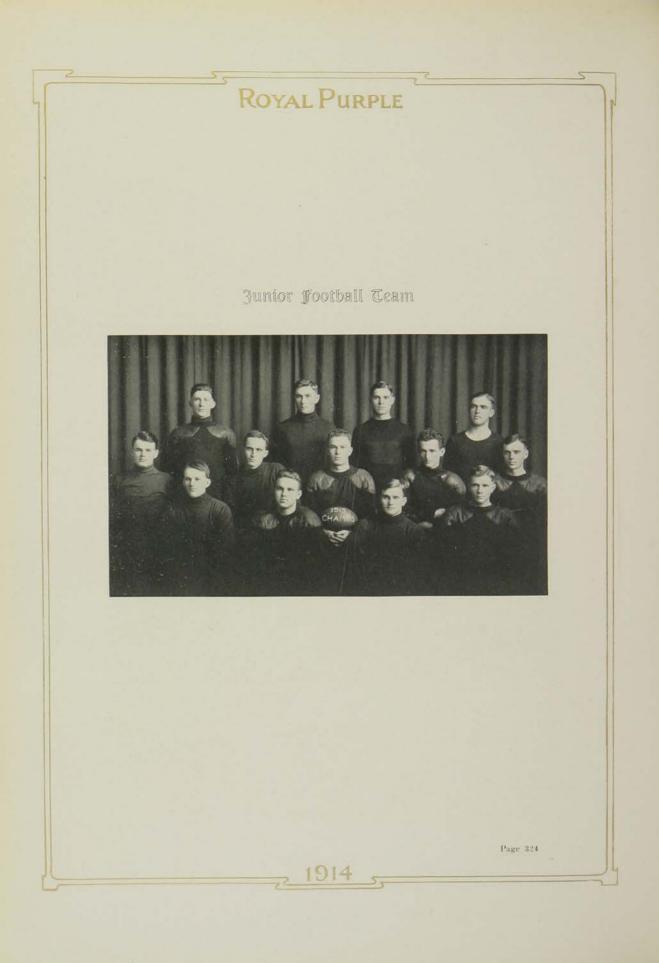

Baseball dope was upset in the baseball series by the present Senior class. They came to life with an exceptionally good bunch of baseball men and tied the series with the Freshmen. One Freshman pitcher was declared ineligible to play and the Seniors were declared champions.

Football this last fall was another surprise. The 14's had won the two previous years and needed another victory this year to win the coaches' cup, but the machine of the year before had lost too many of its stars to the varsity. The Freshmen were also doped to rank high, but the surprise came from another quarter. The Freshmen shut out the Seniors in the first game, while the Juniors were doing like things to the Sophomores. In the final games the Juniors won from the Freshmen, thus winning the championship without a defeat.

A series of games was played to decide the basketball championship this last winter. Each team was required to play every other team two games, the championship going to the team with the highest percentage of games won. The Freshmen were victorious in this series, winning all of their games.

Besides the class rivalry to stimulate interest in inter-class contests, the coach offers a cup to the class that wins the football championship three times in succession. The present Seniors won the cup twice, which has been the nearest to winning it any class has approached as yet. Also each year a cup is given to the class winning the greatest number of championships that year. Such contests are to be encouraged, and may be as interesting in years to come as they are now.

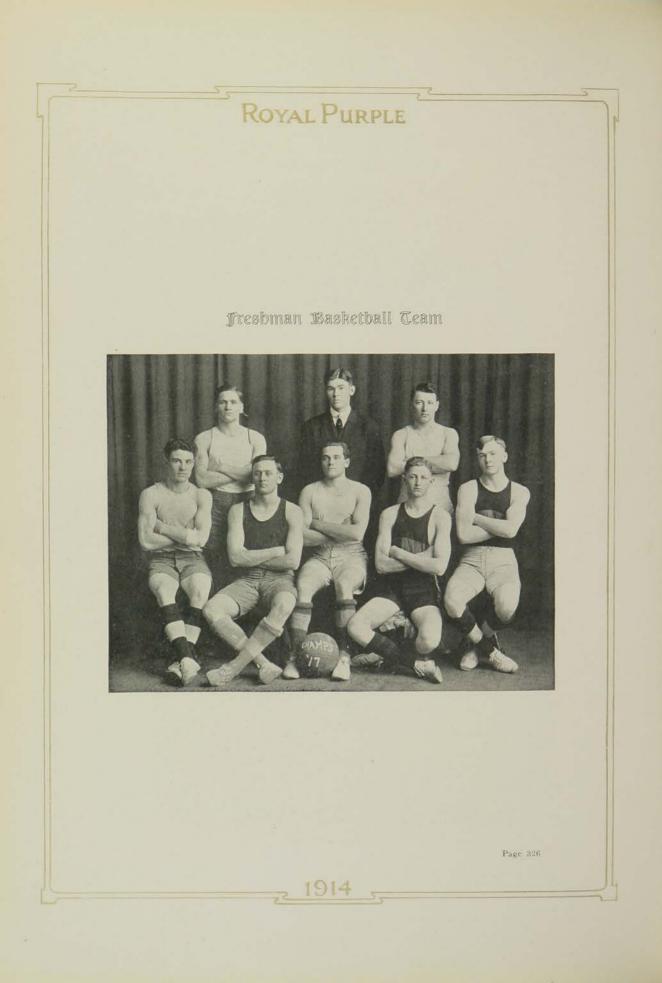

Sopbomore Football Team

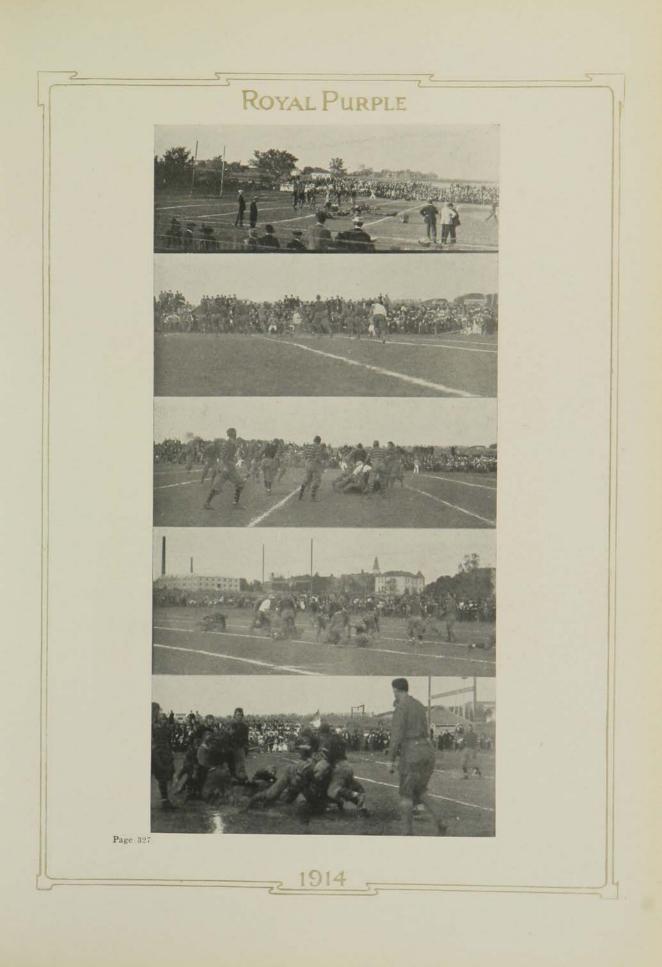

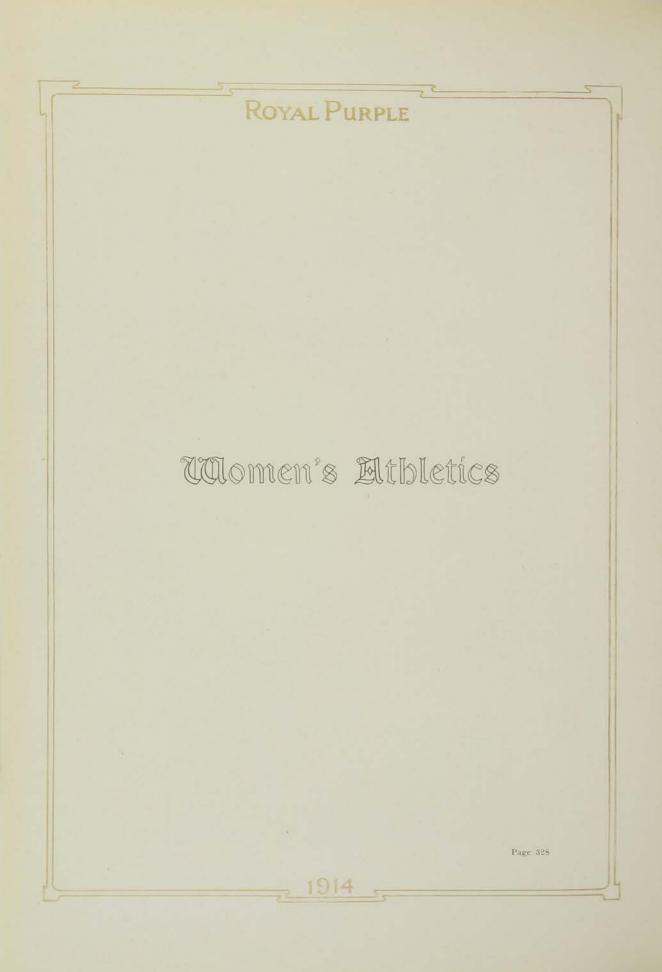

Sopbomore Basketball Team

1914

HILE the girls at K. S. A. C. enter no inter-collegiate athletic contests, they sometimes play an important part in the winning of such contests. What wearer of an Aggie athletic uniform has not been inspired to greater efforts by the encouragement from the grandstand? One of the football players said after the demonstration of the girls which took place between halves of the K. U. football game : "We ought to be hanged if we can't win after the girls put on a fine stunt like that!"

If the girls do not enter into inter-collegiate contests, they do have contests of their own. The girls' basketball championship series is a feature of the winter term. Teams are entered representing each of the classes in College. The series is played on the main floor of the gymnasium. The results of the games were unusually close this year, the Freshmen and the Juniors winning from the Sophomores and the Seniors, each having a score of 14-13. In the finals, which were played a few days later, the Freshmen won the championship and the cup by the goal shooting of their forwards.

Another feature of the women's division of the athletic departallowed to invite their friends to witness the exhibition which takes allowed to invite their frends to witness the exhibition which takes place on the main floor of the gymnasium. The program consists of the various dances in which the different classes take part. Also they go through several of their marching drills and give an exhibition of the games as they are played in the class work. The interest in this department is increasing from year to year, as is shown by the increased enrollment in classes.

The Quill is an honorary organization for the encouragement of good writing. Juniors and Seniors of colleges and universities who show their interest in writing by producing, are eligible to membership, and also such Freshmen and Sophomores as have had articles, poems or stories published in any reputable magazine. Quill num-bers among its members many of the most prominent writers of the day, contributing to practically all of the larger magazines. Members of the Beta Chapter have had articles published in The Country Gentleman, The Technical World Magazine, Good Housekeeping Magazine, American Magazine.

Engineering Association

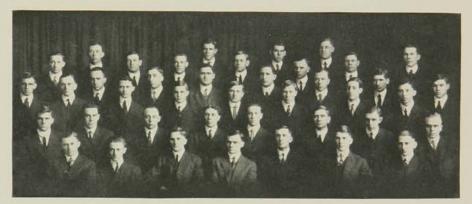

Officers					Fall Term	Winter Term		
President .				 			George H. Baird	W. W. HAGGARD
							PAUL E. JACKSON	M. P. GOUDY
							R. J. TAYLOR	J. C. Gist

R EALIZING the importance of co-operation among the students and faculty of the Engineering Division, and a lack of definite knowledge of the current developments in the engineering practice, the Engineering students of the Kansas State College organized this Association in 1912. Since that time the Association has grown in numbers and importance until at the present time it includes nearly all the students and faculty of the Engineering Division, and its influences are felt throughout the College. Perhaps its greatest achievement, however, has been in the association and co-operation of its members.

Through the Association the members have the opportunity of hearing technical lectures of practicing engineers at the bi-monthly meetings. By such opportunities the students are brought in touch with the engineering world and meet each other in social gatherings. That these influences have resulted in the co-ordination of the Engineering School is evidenced in their annual "Engineers' Day." On this day the Engineers take charge of the chapel exercises, edit the college paper, and co-operate in demonstrations on the college campus and in the city of Manhattan. With such influences at work and with the Engineering Division organized in such a manner, the future of the Association is assured.

Dairy Association

HE Dairy Association may be said to be in its infancy, but judging from the interest taken by the founders so far, it will soon become one of the important associations of the school.

The membership of the Association is not limited, and any student interested in dairying may belong. The instructors of the Dairy Department are given honorary membership.

The object of the Association is to awaken interest in the Dairy Course and general subjects pertaining to dairying. The meetings are held every two weeks, and every-day problems in Dairying are discussed, as well as new records of production of the different breeds and inventions which will influence dairying at large.

We plan on holding judging contests from time to time and by this means create more competition and interest among candidates for the Dairy Stock Judging Team.

Rooters' Club

"FAT" McBRIDE

President, Homer	MCNAMARA	Yell Leader, J.	C. McBride
Senior	Junior	Sophomore	Freshman
"KINK" MUSSER	H. S. Coith	H. B. DUDLEY	R. L. Mosier

HE Rooters' Club has taken over the work of the older organizations known here as the Athletic Association. This last year a new scheme was tried out in its organization. A yell leader was elected by the Rooters' Club. Assistants were elected by each class at the fall term elections to hold office the entire year. This system has worked out your your.

system has worked out very well. The past year saw the best systematic rooting that has ever existed at athletic games at this school. The encouragement and support given the teams, whether winning or losing, was of the very highest order and knockers were unknown.

games at this school. The encouragement and support given the teams, whether whining or losing, was of the very highest order and knockers were unknown. Two years ago the Rooters' Club inaugurated a "Tag Day." Tags with an appropriate motto were sold to students by the girls of the Y. W. C. A. and of the Girls' Rooters' Club. A feature of the sale was that no change was given and only silver coins were accepted. The proceeds of Tag Day go to buy sweaters for the men winning the athletic "K" the preceding year.

Tag Day has come to stay. October 23 was the eventful day this year, and tags were sold similarly to the previous year and the sweaters were ordered early enough to be worn home Christmas vacation by those earning them.

"Pep" meetings were held on the campus before most of the big games. These were especially loud just before the K. U. game. At the "pep" meeting just before the Thanksgiving Day game with Washburn, money was raised by voluntary subscription to send the Band to Topeka. This and similar activities are the functions of the Rooters' Club, and college life would be droll indeed were it not for the college spirit and "pep" which finds its outlet through an organization such as the Rooters' Club.

Delta Omícron

Founded 1913

ELTA OMICRON is an honorary forensic fraternity. Students participating in college forensics are eligible to membership when they have shown desirable qualities of leadership, and have reached certain high standards of scholarship. The purpose of the fraternity is to create bonds of friendship among the members and to give proper recognition to those interested in the promoting of oratory and debate. As a means of arousing interest in forensics, the organization from time to time entertains visiting debating teams. The first annual banquet was held on the evening of the victory over Colorado in the inter-state contest. This function, at which thirty plates were laid, was the social event of the debating year. Such occasions have been an effective means of creating a widening interest in college argumentative contests and of forming closer bonds between this and sister institutions.

Wilson County Club

The Wilson County Club was organized in the winter of 1913 with a membership of thirty-four. It's mission is to advertise the College in the home county, and to promote social relations among the students from that county. Each term we endeavor to hold some social affair, a party, picnic, or hike.

HE Alumni Association of the College is organized for the promotion of the best interests of the College and to aid the members of the different classes in becoming acquainted. It adopted its present constitution June 15, 1910.

The Alumni Association has been a potent factor in looking out for the good of the school. It has issued recently a book containing over 300 pages, containing the graduates and as full a history of their activities as the information obtainable and space would permit. A history of the administrations and pictures of the buildings and presidents make the book of wider interest. Professor Albert Dickens was instrumental in making the book a success.

1914

The Topeka Alumní

ORE than 150 graduates and former students of the Kansas State Agricultural College now are members of the Topeka branch of the Alumni Association. Meetings are held at least once a month, and two banquets a year are given, one in March and the other in November.

A picnic is a feature of the summer meetings.

The banquet given in March is perhaps the most enjoyable affair of the year for the Topeka Association, according to the older members. This year the banquet was held the evening of March 6, in the First Methodist Church. The decorations for the evening were in the College color, royal purple, and ferns and bouquets of purple hyacinths were used on the tables.

After the banquet, this after-dinner program was given:

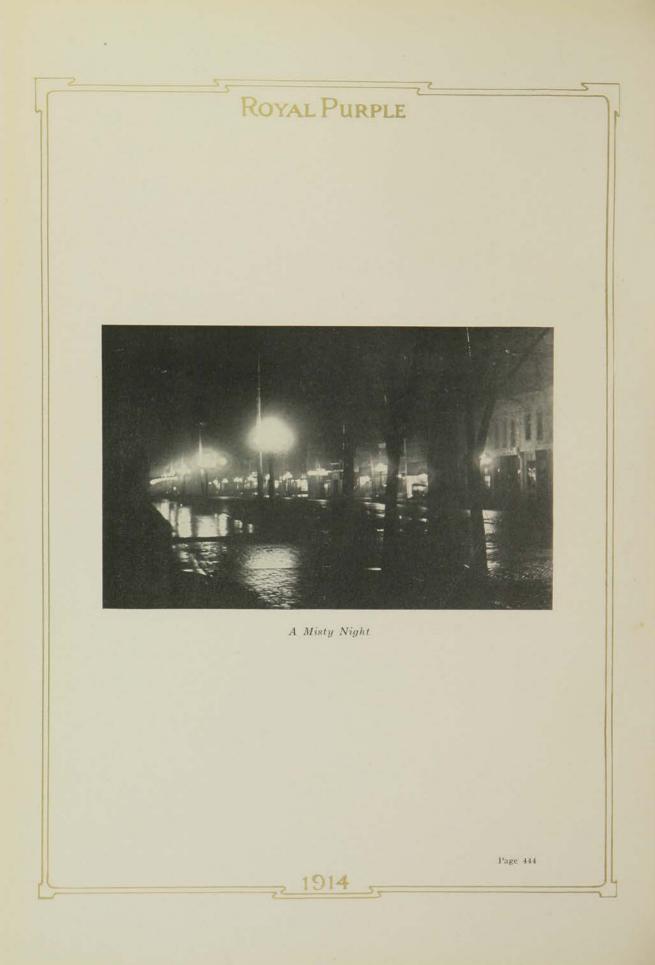

FLOYD B. NICHOLS, '12 Toastmaster
President's Address ARTHUR HUNGERFORD, '13
Address G. C. WHEELER, '95

After the banquet, the annual election of officers was held. The officers elected were: President, C. C. Wheeler, '95; Vice-President, Mrs. H. N. Rhodes, '04; Secretary-Treasurer, Floyd B. Nichols, '12.

Page 443

1914

To those of you who by your actions have merited these roasts: To those of you against whom the editors hold grudges: To those of you who would do the same, even unto us: And to the whole world, for fear some fool will be sore because he's left out:

THIS BOOK IS DEDICATED

THE EDITORS.

MOTTO

If the College did it, we're agin it

WARNING

It will do you no good to get sore. Counsel has been retained, and any refutation of statements made here will be taken by the Faculty and Student Body to constitute proof of same.

And besides, the responsible parties are out of school.

1914

Oh, the man behind, the man behind, He's the slowest man you'll ever find. When the Prof has called the roll, In comes J. Spin, brave and bold, Oh, how would you like to be the man behind?

"Booker," said Kick Bergier, angrily, "you haven't shaved this morning," "Ain't I shaved?" asked Booker, in apparent surprise. "No, you're not, and I want to know why?"

"Well, you see there was twenty-two out of our thirty-eight pledges shaving in there at once, and I must have shaved some other fellow."

1914

What Every Aggie Ought to Know

All dates should be made at the radiator in the south end of Anderson Hall.

That the ten-thirty rule does not mean a person shall be up by that hour Sunday morning.

That the Aztex do not own the Shepherd's Crook; they just keep it in storage.

That the Forum does not give the athletes their letters.

- That Professor Price is on to the fact that his mother-in-law joke is stale; he merely tells it from custom.
- That all subjects under Dr. Brink should be taken the second hour, in order that the college bell will insure against sleeping through another hour.
- That there is no use to call again, when "Prexy" takes your plan under advisement.
- That the reason Percy Burkholder does not "fuss" is because he has a girl back home.

A Suffrage Parade

LADIES AND GENTLEMEN: While we are aware that it is not funny, and while this section is bound by no precedent, yet for the edification of a few who have requested it and in behalf of the School of Agriculture, we present to you in Volume Six a revised list of popular songs, fresh from the press of the publisher.

Sung by the STUDENT BODY in "The Almighty Dollar" There's a Girl in the Heart of Maryland......MARGUERITE ELLIOT

Then Ule'll All 16e Dead

When the last red tape is broken And wound in a neat little ball, And a quiz in Soils can be slaughtered By feeding "hot air" to Prof Call, We shall rest, and faith we shall need it,— Lay down and Sleep for a spell, Till Organic Chem and Ag Physics Shall wake us, give us —____.

And only the bluff shall be happy— The grinds they will work night and day, The professors will take all the quizzes, And the students will draw all their pay! And the Profs will all make explanation To the Dean when their classes are cut,— And the Dean will humbly "beg pardon," And treat if the Prof is a mutt.

The army will be for offenders, But nay! nevermore shall they drill! The split-tails will go through the manual, While the privates drink "cokes" to their fill. And the chapel shall always be funny; On the hill, a prom nightly at eight! When we do we will have every pleasure, And likewise, every "stude" in the state.

Lage 449

THE beautiful picture shown above caused the inspiration that produced the "Rose Maid." A large sized picture, suitable for the den, will be furnished for the sum of 25 cents to cover mailing expenses. The first hundred girls sending in orders will be presented with a cook book and tickets to the jitney.

These Pictures are run as a Protest

Why Not Give

2 1914

The Young men of the faculty a chance? Arbuthnot and Gilles brains? Bess Hoffman a date? Martling a shave? Professor Remick a haircut? Fat McBride a sweater that looks better when he yells? Dave Gray a passing grade in Civics? The athletes more support?

PINKEY'S ANSWER

Said Lippincott, in oral quizz, "Can'st tell how old a turkey is?" And, looking o'er his record book, Glanced at Miss Boyce with knowing look. "Oh, yes, a turkey's age," said she, May be determined easily. There's one sure guide, by far the best— The teeth should be the perfect test." "Why, turkey have no teeth," he cried. "No, Prof, but I have," she replied.

1914

Learning the Step

Now if you speak of fussing, You'll excuse me, quite, I'm sure, For whereof I speak, I'm right, you will agree, I can Hesitate and Tango, Also do the light Fandango, Likewise teach it, as you readily will see.

This space reserved for mention of WILLIAM ALLISON SUMNER

As ROYAL PURPLE goes to press, Steven Potter is looking for a position. Don't fret, Steven! Your impediment in your silence will take you through, and you will not be lonesome, even if you starve. Besides that, the wheat crop was never better.

This picture shown above is proof that Karper does things besides "fussing."

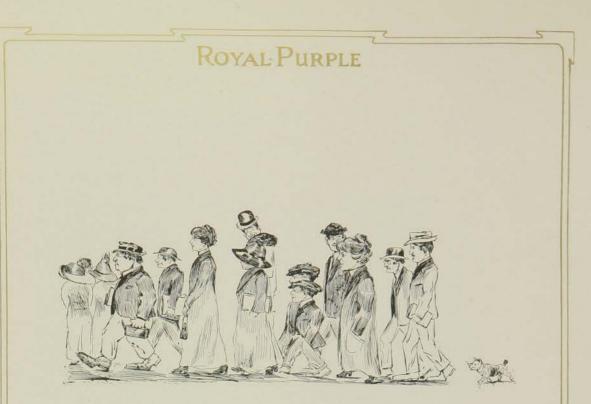

Wanted Column

(Do not all speak at once)

Will the young man who removed the picture from the cloak room of the Eta Beta house, entitled "Dodo Diving," please return the same? It was a favorite, and a reasonable reward will be given for same and no questions asked.

ETA BETA PI.

Would some kind person please return my slipper, that so mysteriously disappeared? AGNES MCCORKLE,

Who's Who, and Why Not

Gilles is not a politician because he can't keep "mum." Hildewein is not an honor man because he "chews." Valley isn't a singer, because it would not be natural. Ethel Brown is unfussed, on account of the solitaire. The Students' Council isn't boss because it's asleep. Doctor Harmon isn't easy, on account of her grading. Chapel isn't popular, on account of the "Sweet Shop."

Things We are Paid to Tell

Charley Holliday has sold the gymnasium.The Y. M. C. A. is not a private institution.Noble Hutchinson is engaged.Chapel is often held in the auditorium."Prexy's" pet name is "darling."One of the Acacia men is NOT from the farm.Prof. Iles was noted as a child, for his tender verse.

1914

Famous Interviews with Famous Men

WILLIAM CURRY	a	"Good morning, Bill."
BILL CURRY .		"Good morning, Curry,-how's business?"
WILLIAM CURRY		"O, good enough. By the way, William, I have changed my mind about a certain proposition. I have always been against the dance, you know,-well, I am for it now."
BILL C	5 3	"Bully for you. But what will the public think?"
W. C	• •	"O, hang the public. I have made up my mind to learn to dance."
BILL	4 54	"But, William!" (Business of fainting.)
W. C		"O, I know what they will think. Half of them will think that I am too old and stiff to learn, and the other half will think I have fallen from grace. But I will show them all up. I have some friends (women) who are regular attendants at the Woodman Hall who are to teach me. I am for it stronger than I was against it. There's only one thing that beats the tango for me—"
B. C		"And that's-"
W. C	4 4	"Government money."
BILL C	• •	"Well, we always were progressive, William. Shake on it. You are a dead game sport."
WILLIAM C.	8 8	"Certainly. But I must tell you goodbye. I must put some Denver mud on my rheumatic knee."
BILL		"So long. See you at Woodman Hall tonight."
WILLIAM C		"Yep. So long."

Hank: "Well, er er, of course if you insist, Dean, [I will take one."

1914

2 1914

You know they tell us, Nellie, You're going cross the sea, To civilize the heathens Of China and Fiji. So mayhap in the future, Nellie, As time shall onward roll, We'll read that you've dissected The pagan Fiji's soul.

A QUERY

O, Nellie, gentle Nellie, Tell me, O tell me true, Why will you carve the kitties Up in the horrid zoo? When other maidens, Nellie, Are with their chapel date, Why wilt thou do it, Nellie? I prithee, wilt thou state?

But Not From These

From the Prof that grubs at his words,

From the girl that is inexpressibly pleased with everything that we do,

From the man behind us at the "movies" who reads aloud,

From the gink that persists in telling of a girl back home,

From the chapel speaker who preaches,

From the fellow that won't subscribe for publications and insists on reading ours,

From the girls on tag day,

From the fellow who wants to give us a nice job for the summer,

From Roy Jaccard's speeches,

From prunes for dessert,

From the class highbrow,

From the frat man who can't see anything but his own pin,

From the engaged man,

From the boob that always wishes he had his car here,

1914

From the room next door with musical inclinations,-

May the Good Lord deliver us.

ADVICE

When the verdant young Freshman comes in from the West,

With a seersucker suit and belligerent vest, He sometimes wonders why he's not like the

rest

Of the students in this institution.

Now come all you Freshies who have entered today,

Ditch your High School diploma and list to my lay,

And I'll sing you a student, as far as I may, A student of this institution.

First get you a room that is roomy and nice, Ditch your telescope there and hand out the price;

Though it's warm enough now, it will soon be like ice,

In spite of the landlady's story.

And mind you steer clear of the guy with the spiels, They'd sell epicac as a relish for meals, They don't care at all how the poor Freshie feels When he's purchased a term's chapel tickets.

So get you a book for your guidance and rules, And you'll see what must happen, when Freshies are fools. There's the Credit Committee, you must kick like a mule, To give some entrance requirements.

When your assignment is made and you heave a long sigh, Don't think that the end of your troubles is nigh; Your Dean's on the job, so don't make a reply; He'll do all that's needed for both of you.

Page 463

100

There's no use to yell when they send you to drill, Ther's no way around it, try as you will; A uniform's needed to fill out the bill Of the struggling young Aggie student.

Settle down to the grind, keep your nose to the stone, Answer all questions, before quizzes bone, Spend your nights in your study, all quiet—alone, And carefully shun all the jitneys.

Beware, my young friend, that you start not a case; 'Twill make memories that only long time can erase, On your E's, that good lower bar 'twill erase, And leave you a flunk for your troubles.

And if in due time you should miserably fail, Write home to your folks with a long, woeful tale, Get nervous prostration, it's good though it's stale, And go home and appear as a hero.

Nobody loves a fat man.

1914

Page 464

Rules For Taking Examinations

- First: Enter the examination room nonchalantly.
- Second: If a member of the Student Council is in the room it might be well to slip him a cigar.
- Third: Go up and kid the Prof.
- Fourth: Whatever you do, appear at ease. Get a bunch of fellows together in the back of the room and tell them a story.

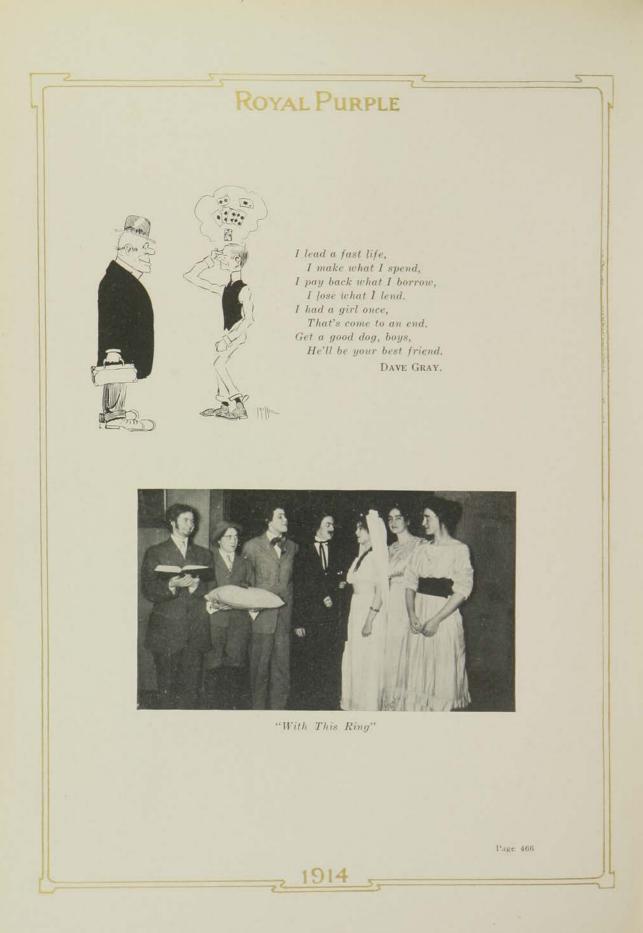

Fifth: Be sure and get plenty of paper. Any extra will come in handy.

- Sixth: When the Prof tells the class to separate, get a seat well to the front and left. This will throw him off guard.
- Seventh: Roll up your sleeves to show that you have nothing concealed. If this is done with dexterity, the pony on the cuff will not show.
- *Eighth:* When you get through, be sure and separate all paper out of the loose sheets that might prejudice the Prof against you.
- Ninth: Look carefully around the seat before you leave.
- Tenth: Tiptoe from the room and slam the door after you.

To your right appears two famous characters, Pinkey Gwin and E. J. Bird. They were, in their day, famous politicians on the hill. Since, they have taken up high diving stunts and motorcycle racing, believing it to be less dangerous.

A True Story

It was evening. Prof. Roberts noticed that the rear light was out on Lou Hobb's auto.

"Sir," said the scientist, "your beacon has ceased its function."

"I didn't understand," said Lucian, stopping the car.

"Your illuminator," said the professor, "is shrouded in unmitigated oblivion." "But really," stammered Luscious, I-----"

"The effulgence of your irridiator has evanced. The transversal ether oscillations have been eliminated."

Just then Mike happened to be passing and shouled, "He means your glim's on the blink."

1914

And Lou lit his light and went on.

Interesting Interviews With Interesting Persons

ZEIGLER, H. M.	"Good morning, Harry. How are you?"
Zeigler, Harry	"Quite well, thank you. How are we doing with the paper?"
Zeigler, H. M.	"Fine. My editorials are taking good, and in time the Industrialist will be calling the dear old College, Kan- sas State. You will notice in the Aggie, I have used it six times in one paragraph."
Zeigler, Harry	. "Quite right, my boy, quite right. By the way, in the advertising proposition, I believe I am the success of the Middle West."
Zeigler, H. M.	"Indeed you are, Harry. I often think of the future that is before you. You know if Beta comes to Kansas State, it will be largely through your efforts."
Zeigler, Harry	"Yes, the honor is due us. Do you know that I think that it was for the most part due to the appearance that we made in the east in the summer. Those easterners didn't think it was in us."
Zeigler, H. M.	. , "True enough. And I guess we showed up those Bos- tonians with our long cigarette-holders, didn't we? Well, I must run along and meet Nick Enns. We are having company for dinner and I must show Nick how to act. So long, Harry."
ZEIGLER, HARRY	"Good-bye, Zeig."

Phi Kappa Phi SORORITY MINUTES

CHAPTER HOUSE, May 1.

President Caton called the meeting to order, after quiet had been restored, but the effort was lost, as three more Freshmen arrived from the Annex. Updegraff and Irene Held had to be called in from the porch swing. To facilitate the work of geta chapter house large enough to accommodate the chapter next year, three houseseeking committees were appointed. One from every class, except the Senior. A tencent assessment was passed to buy a "Wegee" board to replace the one worn out. The minority thought the money should be used to purchase a new porch swing, and to exchange the light chains on the old swing for heavier ones. This would make the porch much more pleasant on rainy nights. It was decided to not repair the old summer-house in the city park. The dining stewardess reports breakfast will not be served at the house any more during the spring term, as nearly all the girls have chapel dates, anyway. The sorority will pay for the breakfast of the girls who haven't dates. The petition assessment was increased from \$5.00 to \$7.00, as it was found necessary to buy more halftones for the book than was planned. Churchward reports she has three Pi Phi friends who will spend the week-end here. Kingan, Glenn, and Wilson are appointed on a committee to notify the Sigma Nus. "Silly" Mills, Robinson, and Jones make a report on the "dope" they have on the Tau Omega German. It was decided to withhold the bids to the farewell until more was learned of the German. Meeting adjourns in time for the second show at the Marshall, as the vaudeville is a tango act.

THE STORY OF OSCAR

Oscar Levine, from his classes returning, Beat it for home, and with infinite yearning, Thought of the time when from work he'd be free And could take up the life of a Reverend D. D.

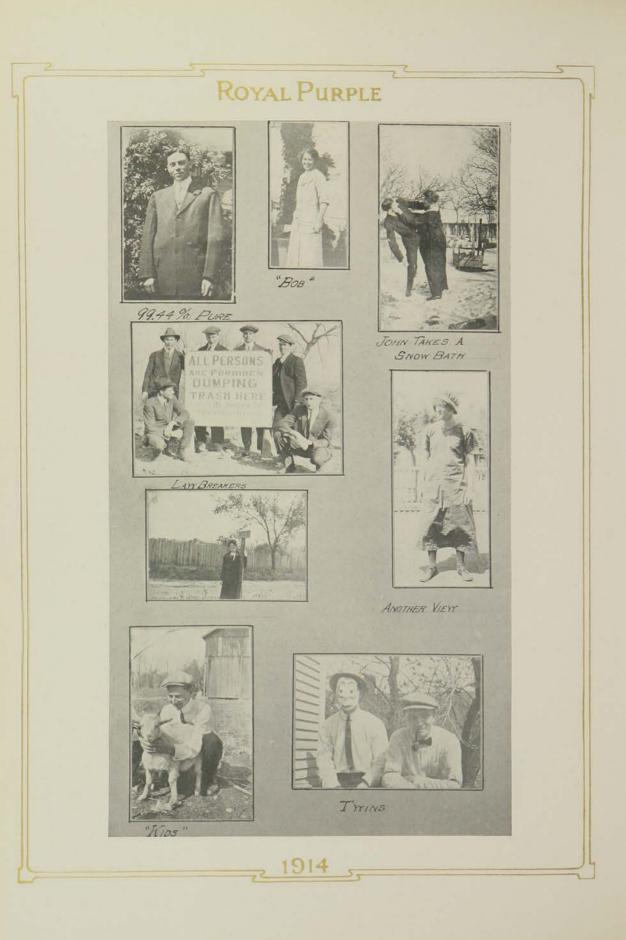

> Thinking the thoughts Of a prayer, embryonic, It raptured his soul, Like a slow gin fizz tonic. Entranced, He advanced Towards his place of abode, Preoccupied mind, heart bearing a load.

There's a place in the city of knowledge and mirth, Where Eleventh and Moro meet once on this earth. Two houses are there, that are like as two pins, In color and structure, remarkable twins.

> In one of the structures Dwelt Oscar, the youth, And roomed at the other Two sisters, forsooth. Mr. Levine, Youthful Divine, In deep theological slumber, Stopped at the place which wasn't his number.

He entered the room, that was like to his own, Unconscious, unknowing, as though he were stone, And throwing his books on the table therein, Sank into a chair, calmly musing on sin.

> Ere the hand of the clock Measured half of an hour The girls had returned, Making poor Oscar cower, The retreat, Indiscreet, Took him over next door, But, the spectators say, he broke training—and laughed.

ORIGINAL STORY

ELL, it happened in June. It might have happened in any other month as well as June, were it not for the setting. June is always the choicest as far as setting is concerned, especially setting on the campus. Field and lawn were at their best. It was yet too early for the mid-summer sun to leave the lawns bare and destitute, stripped of all their verdure and wilted in the fierce heat of a tropic sun. It was too late for the frost to creep from out its hiding place and with an insidious grasp, seize and thrust upon unsuspecting admirers of springtime, the henious and loathsome affection of influenza. It is for that reason that

June is the month of brides, influenza is passed and hay fever has not yet arrived. Indeed, it is a common thing, that two souls should vibrate in a harmonious unison for one of the poets tells us that all nature is in tune at this time; but add to the daintiest girl alive, an incurable case of hay fever, and love takes wings and flies. To a son of fortune, complete to the minutest detail, as clothes that look as though they had been made for his little brother and cigarettes whose smell is so rank that they cry to heaven,—add to this accourtement, so dear to the modern girl, a case of influenza, and she would desert him for a plumber who rolls his own pills and wears high-heeled shoes the color of a new saddle, and pink hosiery with polkadots worked in them. But all this is beside the mark. It was June, about knee-deep in June. The roses shed their sweet fragrance on the morning winds, a message it seemed to the birds that flitted from tree to tree and sang the songs that nature taught them, songs too sweet for words to express, too dear to have their wild and care-free strains marred by staff or bar or symbol.

The Maid and the Fusser sat beneath a tree, remote from all the world. An aged man went slowly by. It was the chapel speaker, and following him at a respectful distance was the chapel attendant, a Freshman with his first chapel date.

The Maid sat moodily chewing a blade of grass, a far-away look in her eyes. She was dimly conscious that she was attractive in a simple gown of white, clasped at the throat with dainty bar and holding in place a tiny scrap of green. The glint of the sun played in her rebellious hair as though it had come on its trillion-mile trip for the purpose of touching her cheek. This rebellious hair business is a queer thing. It is a matter of social injustice. It is becoming in moderation with maids, but as for man, it brings disgrace to his character and heaps calumny on his fair name, unless perchance, he is a football hero or owns a yacht,—then, of course, it is quite proper. The Fusser lay at full length on the grass. With a stick he made imaginary pictures before him.

"Won't it be dreadfully lonesome after college is out?" he ventured,

"Yes," she murmured, "dreadfully so."

The Fusser turned half over. As he did so he forced a yawn and shoved a coatless arm high in the air, letting it drop like a weight. "It sure will," he repeated over, "it sure will."

Over on the other corner of the campus, a group of two or three couples were rending the air with shouts as they pulled grass and tried to put it down some one's neck. Nearby a loud laugh arose. Some bright youth had pulled a joke that he had heard at Wareham's the night before. A bluejay uttered a shrill cry for its mate, way down the Lane some place. A chemistry professor came out of Dennison Hall, which is the same as the "chem" building. He carried a stack of yellow envelopes over to the main hall.

The Maid picked up a notebook.

"Do you know, I believe I will flunk in Human Nute," she said.

"O, I reckon not," said the Fusser, who all the time was trying to get up nerve to ask her permission to go to Sunday School with her. June was working on him. Sunday morning dates are the last stage of a case, before the announcement party.

Chapel was out, and as he carried her books over to the very entrance of the D. S., he promised that he would ask her that night; he would settle it once for all. He even paused a moment on the entrance of the building before he turned away to take a quizz in soils for which he was unprepared. That is the true test of devotion, it is said, when a man will willingly face a soils quizz unprepared or lounge on the steps of the Women's building. As they lingered there a while, the Fusser talked idly. The Maid was no better.

"Are you going to be at home all summer?" asked the Fusser.

"Yes, probably, except for the hot months, when we will probably go to the lakes." Secretly she knew that the hot months would find her helping mother with the peaches.

"What will you do?" asked the Maid as though it would break her heart if it would cost more than a dime to reach Prince Charming by telephone.

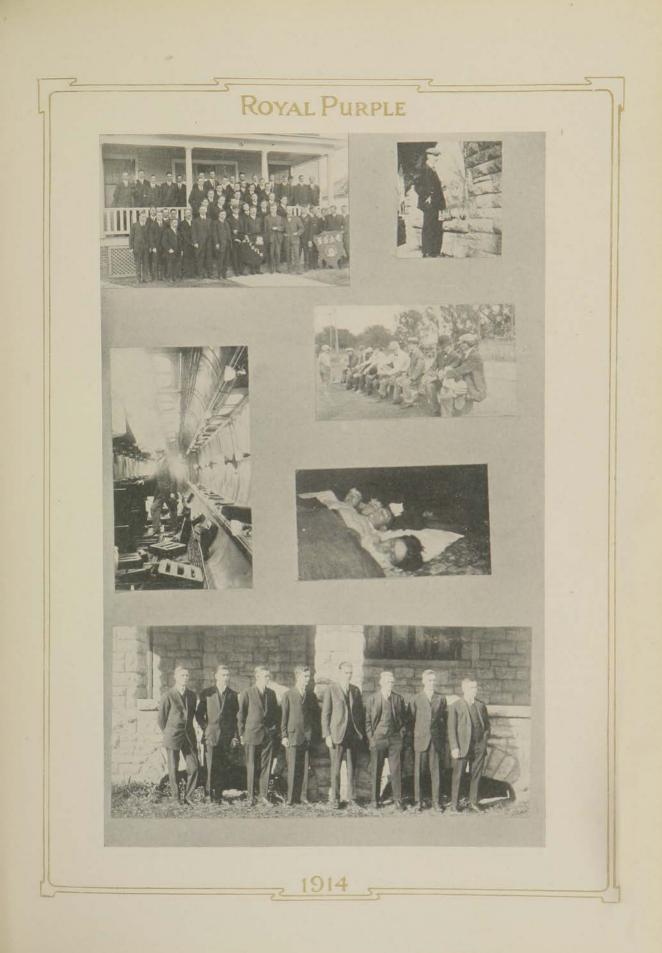

"Probably run the boat for the governor," he returned as though he were telling the whole truth. His father was a stone mason and sometimes required Reginald to run a stone-boat.

The Fusser left, and vowed he would plead his suit that night under the silvery light of the moon. He even dreamed of serenading her, wearing fancy velvet clothes and carrying a guitar.

After supper that night, the boarding-house lady asked the hasher if there was anything wrong with the apricots, remarking that Reginald did not eat them. The hasher only smiled; he roomed with the Fusser and knew the symptoms. The next morning, Reginald, the Fusser, bribed the hasher to bring him up some crackers, on the plea that his head ached. All was silent as Reggie munched away. Finally he murmured, "To think of her being tied up to a clerk, at \$50 per." A bluejay chirped outside, the same as it had done yesterday on the campus. "George," said the Fusser, addressing the hasher, "throw something at that cussed bird." But George grabbed a Trig, and hurried on to College.

Stock Speeches on the Dance

PRO

LADIES AND GENTLEMEN: You, who have known me for the past years, will bear with me, when I say that I am an upright man. I say this without fear of successful contradiction, based upon what I think other persons are saying about me. Now then, the proposition is simply this: If it is right for a person as good as myself to dance, why can not some of the others dance? I appeal to your sense of justice! Could anything be more logical?

Now I have a few other things that I would like to say if you will bear with me. I think a dance is the only place where a person can really enjoy himself. I know I find it so, and so do many others that have the same educated feeling that I have. I thank you.

CON

LADIES AND GENTLEMEN: I am fully conscious of the importance of the speech that I am about to make. I realize that it has been a long time since anything of so great a consequence was done or said. With this brief introduction, I will begin.

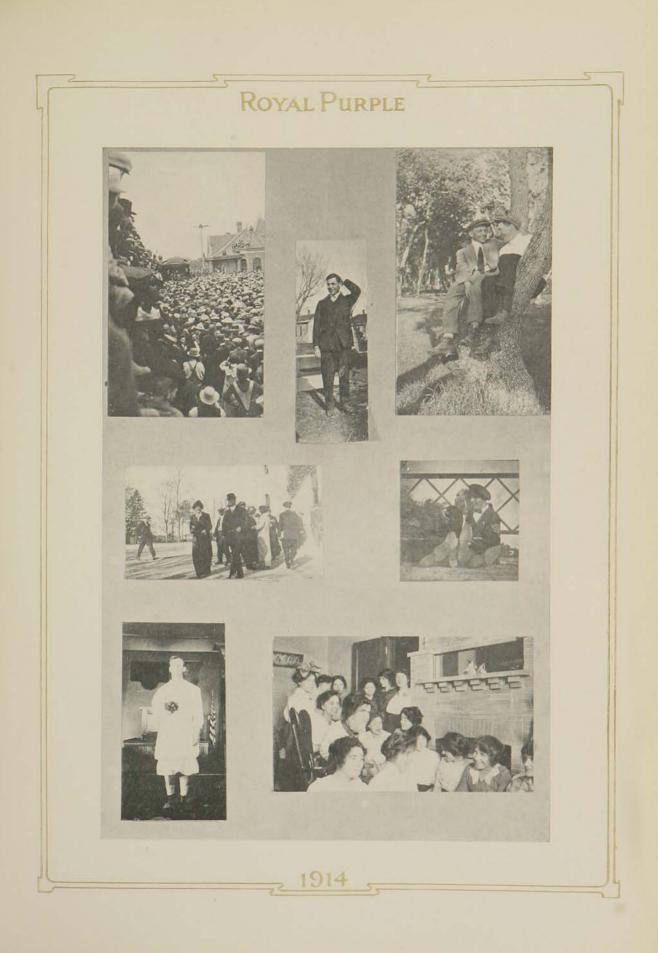

I do not believe in the dance for several reasons. The first eight are personal, and the other one is of the same origin. That, ladies and gentlemen, is enough to discredit the whole proposition that has been laid before the class.

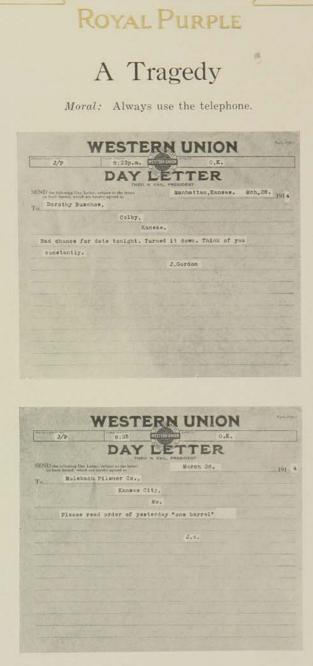

I have uttered these sentiments in public for several years and during that time it has won to my standards those whom I now have about me. I repeat that I am against the dance. Often in my career have I had the intention of learning to dance for the art of gracefulness, but each time I have put the idea behind me as a sinful thing.

I would not mention any names, but some persons have deserted our ranks. I feel that the omen is good. The unfaithful are leaving us, and gradually they will leave none but myself, and then I shall carry the banner alone.

And so, my friends and classmates, when I gaze for the last time upon the portals of the gym, may I not see them through the glare of an illuminated ballroom. May I not hear as I pass into the silent night, the strains of "Too Much Mustard" accompanied by the nervous tattoo of Van Scoick bostoning. May I never hear the sounds of revelry by night, and may the sad words never reach my ears that a dance was held on the campus. But rather let the words so dear to my heart blaze forth in the headlines of the Aggie, "Tiddlewinks and the Seniors, now and forever, one and inseparable!"

1914

We hated to do it, Gordon, and we don't blame you if you never speak. But really, you need a lesson. A barrel is entirely too much.

2 1914

Aztex

Meeting of the Aztex was called to order by David Shull. The first on the program was a vocal solo, "O, Perfect Day." This was sung by Shorty Fowler. After a few preliminary remarks, Karl Knause brought some business before the house, but as it did not amount to much, the fellows soon got to talking about other things.

Fred Layton, steward, complained about some of our men not paying their bills as promptly as they ought, but of course the fellows are all so busy on the hill that they sometimes never think of those little things.

Kink really made a good speech. His speech was largely concerned with the future of the frat and the chances of getting Delta Tau. Frank Root asked several questions pertinent throughout the speech, but Kinky was equal to the emergency and answered some of them.

Shorty tried to say a few words, but the Freshmen threatened to "tub" him if he did not keep still. Shorty has about outlived his day of usefulness, but he is still actively interested in everything. One of the boys reported a date. Our younger set is taking hold of society in great shape, and we will soon be A No. 1. As nothing more of interest was brought up, the meeting was dismissed.

1914

DON WHEELAN.

Page 487

1914

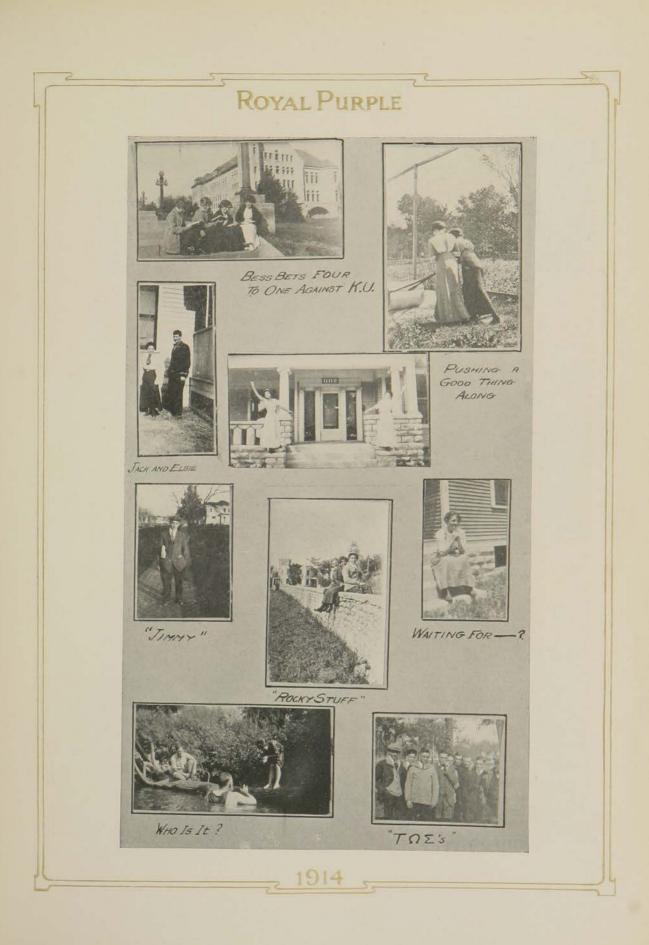

Sigma Alpha Epsilon

We held our meeting last night, in the usual fashion. Gordon gave the opening address and made several pertinent remarks concerning the good of Sigma Alpha Epsilon. Nearly all of the men were there. Cap Loomis and Dave Grey left early, because they had spoken for Woodman Hall. where Dave is teaching Cap to two-step, Gordon said something about taking Bertillion measurements of our Freshmen, so we could tell them, we have so many, but some of the other fellows would rather have a roll call once in a while. B. V. D. Jones talked some about fellowship. He said that we had so many new men this year that we ought to take special means to get acquainted with them. He also told the younger fellows to make a name on the hill for themselves. About the only one of our men who is really well known is Dave Grey. Red Plumb promised to try for something and will report at the next meeting. Briney thinks that he will star enough on the ball team to bring some honor. Nothing more being brought up, the session was adjourned and Gordon commenced putting the Freshmen to bed.

"KICK" BERGIER, Recording Secretary.

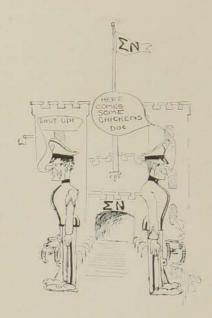

Page 488

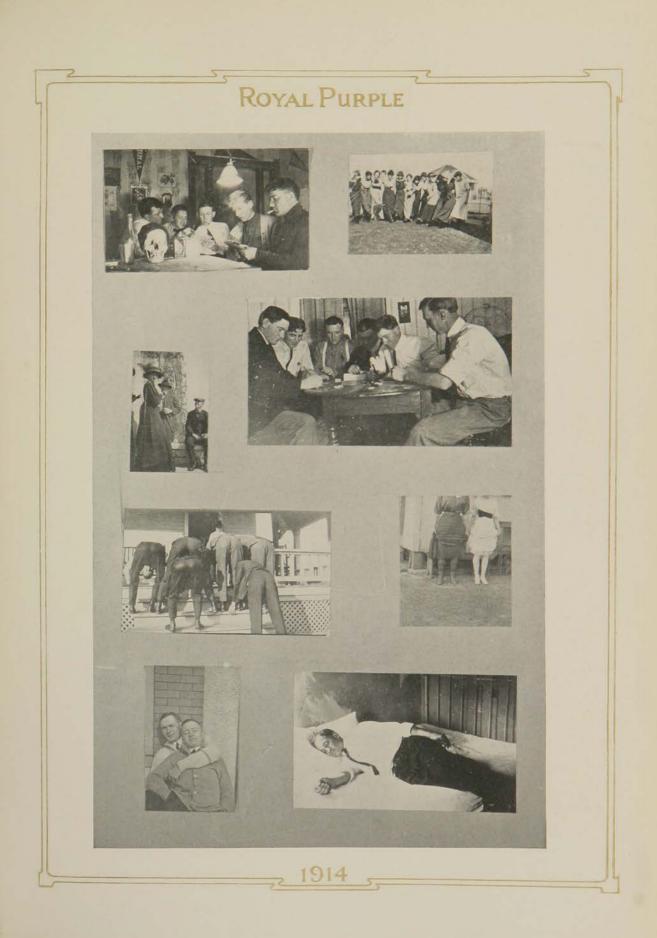

Sigma Nu

Meeting called to order by Hanna. Every member answered to roll call, with exception of Karper, who was writing a letter. Davidson reported on committee for securing a permanent cook. He advised a plan of having the Freshmen keep on intimate terms with Yuma street, in order to insure a uniform meal ticket. "Red" Maury objected. Dudley reported that he had made another office, and elected himself to honorary vice-president. Lank reported that a new officer was needed in the military department, and asked for the approval of the frat in appointing "Andy" Harold. Schafer, the only member taking journalism, read the following poem:

The Charge of the Sigma Nus.

1914

Tau Omega Sigma

CHAPTER HOUSE, May 1, 1914.

After the umsteenth attempt, President Sidorfsky called the meeting to order at 8:37 p. m. Opening ceremonies were begun, when it was discovered Sergeant Boller Stevenson wasn't present. Short recess taken while the Freshmen search the house for the sergeant. He is found in the bath room reading the latest edition of the *Salina Evening Breeze*, his home paper. Sergeant arrives and the meeting proceeds. Roll call was postponed, as many of the brothers haven't appeared. Call from Western Union for Boise. Girl friend going through on the 9:08 flyer. Boise is excused, and meeting proceeds.

Motion carried that if Ziegler says anything more about Boston or New York, the freshmen will tub him three times a day until further notice. McGinnis is appointed as chairman of library committee. Tries to influence other members of the committee with sample cans of smoking tobacco. Shelly refuses to be bribed. Says he doesn't smoke Velvet. Ziegler remarks one would hardly call a can of Velvet a bribe. Broberg and Jenkins return from a dance at Eureka Lake. Report too many soldiers. Historian reads an account of recent events of the fraternity. History is in permanent form. It is written on an Enns Milling Company flour sack with an indelible pencil. Just beneath a large skull and cross-bones done in red paint at the top of the sack on both sides, appears the following:

To Pune O'Connell and Other Foraging Brothers:

This isn't a towel. This is a history.

(Signed) NICHOLAS FREDERICK PRICE ENNS, Historian.

Committee is appointed to see the Episcopal Guild and create a favorable impression as to how well the house has been taken care of the last year. Another committee was appointed to put out the proper dope about how elaborate the farewell party is going to be, so the fraternity will draw well to the sorority parties.

Noise on the porch. Rushees want to know if meeting is about over. The women in the musical vaudeville at the Marshall are eating a luncheon in the Candy Kitchen, and incidentally causing more or less excitement, viz, to-wit, sh-h-h, slit skirts. Meeting adjourned. Everyone hastens to the Kitchen.

Page 492

Pi Kappa Alpha

Pi Kappa Alpha met and talked things over last night. There has been a story started around the campus that we are not a regular fraternity, but simply a bunch of "piefaces" that had got together. Stony Potter condemned the rumor in the most unmistakable language. He blamed it largely onto the action of "Andy" Anderson and Whitehead, but even if they are not just what they ought to be, they are our brothers and we are going to stand up for them. They are often received at the sorority houses, and Stony says they do every bit as well at the Phi Phi house as Tau Omegas do.

We also decided on giving our parties regular: Some of the boys objected to the amount of money we were spending, but we will cut down on the table. Harry Baird heard a bunch of the Sigma Nu Freshmen making fun of our collars. He asked Stephen what they should do about it and Steve said, "Ignore the highbrows." Jacobson of Topeka has offered us \$20 for our entire lot of Mackinaws. They may not be worn next season, and as soon as we find out we are to let him know. Murph Gates gave the boys a great deal of encouragement and said it was hard for every new organization to get going well, but to not give up. Stony promised to talk to "Andy" this morning.

HARRY ALLEN, Recorder.

Page 493

1914

Lambda Lambda Theta

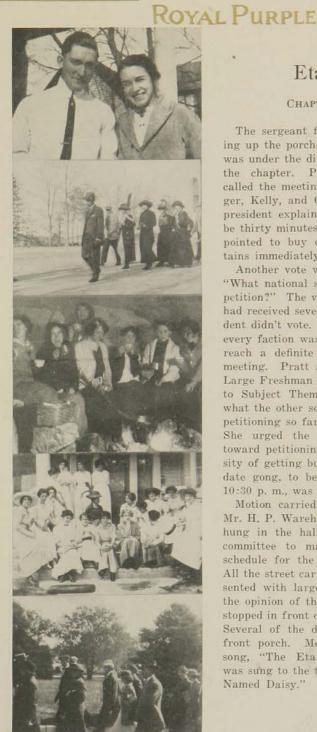

CHAPTER HOUSE, LAMBDA FARM,

May 1.

The meeting was called to order by President Smith. Roll call showed Howell, McGill, Harshbarger, Fielding absent, but as they are generally late, this isn't unusual. Hoffman brings up the names of two young women who should be rushed. One has an aunt at Nebraska, and the other has a third cousin at Missouri, who are Thetas. It was decided to postpone any action until it was learned they really had such relatives, and that they were Thetas. The abseentees at roll call appeared. Committee on fraternity entertainment reports that all of the fraternities have been entertained with "500" parties, and that after the decks of cards given as prizes had been paid for there remained \$1.47 from the twobit assessment for these parties. Hildreth got another twenty-five-cent assessment through to be used as a fund for the porch and lawn parties as soon as the weather permits. Halbower reports she is still running the Senior class, but hasn't as large a following of "barb" boys as she had last winter. The naming of the Lambda May queen candidate was laid on the table for another week. The Freshmen wanted to give the Pi Kappa Alphas a steak roast. Was voted down by the upperclassmen. Hill read an interesting paper on "The Mexican Trouble." The house stewardess reports she bought another gross of scrapers and one dozen door-mats. She believes this supply will last until the close of the college year. Meeting adjourned, as all the Freshmen have dates, and there isn't a quorum without them.

Page 495

Eta Beta Pi

CHAPTER HOUSE, May 1, 1914.

The sergeant finally succeeded in rounding up the porch-swing gang. "Round up" was under the direction of the president of the chapter. President "Jack" Johnson called the meeting to order. Baird, Zeininger, Kelly, and Gurnea were absent. The president explains they have permission to be thirty minutes late. Committee was appointed to buy eighteen new opaque curtains immediately for the sleeping porches.

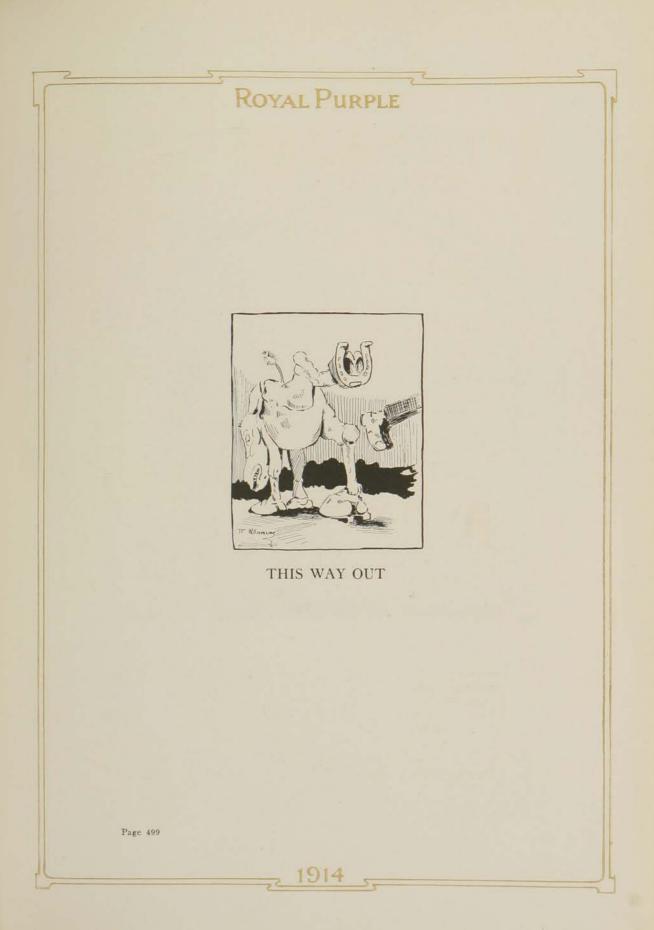

Another vote was taken on the question, "What national sorority Eta Beta Pi shall petition?" The vote showed three nationals had received seven votes apiece. The president didn't vote. A committee of one from every faction was appointed in an effort to reach a definite decision before the next meeting. Pratt spoke on "The Need of a Large Freshman Class Next Fall, and How to Subject Them." Hoffman reported on what the other sororities were doing toward petitioning so far as she was able to learn. She urged the sisters to do something toward petitioning; and showed the necessity of getting busy. Motion to buy a new date gong, to be rung at the usual time, 10:30 p. m., was lost 11 to 10.

Motion carried to accept the picture of Mr. H. P. Wareham, said photograph to be hung in the hall. President appointed a committee to make out the porch-swing schedule for the rest of the spring term. All the street car conductors have been presented with large angel-food cakes. It is the opinion of the chapter the cars will be stopped in front of the house on rainy days. Several of the dates have arrived on the front porch. Meeting was closed with a song, "The Eta Beta Doxology," which was sung to the tune, "Always Take a Girl Named Daisy,"

\$14,000.00 IN CASH

One thousand dollars per year for past fourteen years

HAS BEEN GIVEN OUTRIGHT BY

CLAY, ROBINSON & CO.

FOR THE BENEFIT OF THE LIVE STOCK PRODUCERS OF THIS COUNTRY, IN THE FOLLOWING MANNER

Years ago the firm of Clay, Robinson & Co. recognized the very important bearing which the Agricultural Colleges have upon the live stock industry. They saw that out of these colleges would come the men who would farm, breed and feed scientifically--whose work would be an example to others, and it was with a view of forwarding and furthering the great work of the colleges that our Mr. John Clay guaranteed an annual appropriation of \$1,000.00 in special prizes for cattle, hogs and sheep exhibited at the INTERNATIONAL LIVE STOCK EXPOSITION each year by the various Agricultural Colleges. This year, 1914, brings the total expenditure for this purpose to \$14,000.00.

ANNUAL DIVIDENDS

MASSACHUSETTS MUTUAL LIFE INSURANCE COMPANY

SPRINGFIELD, MASSACHUSETTS Incorporated 1851

You Should Have Our Perfect Policy

Containing every desirable feature that an experience of over sixty years can prove.

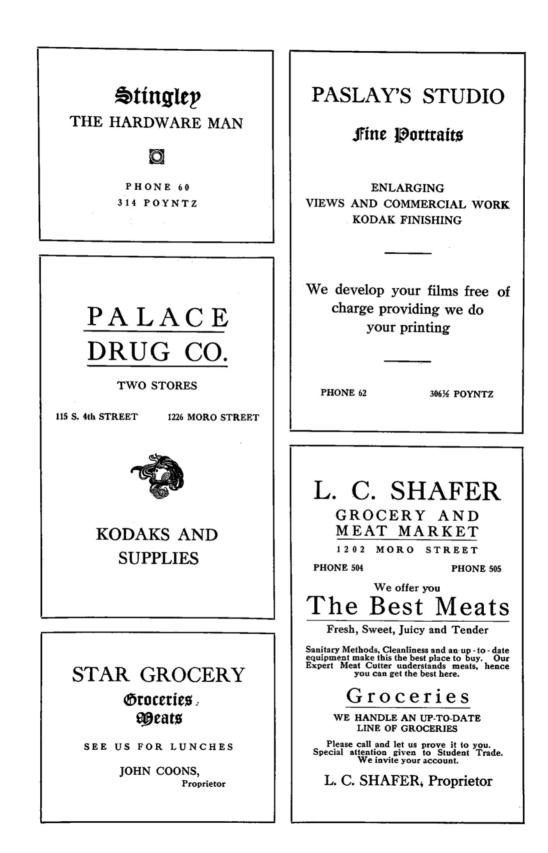

We challenge anyone to point out an objectional feature in our policies. Our premium rates are very low.

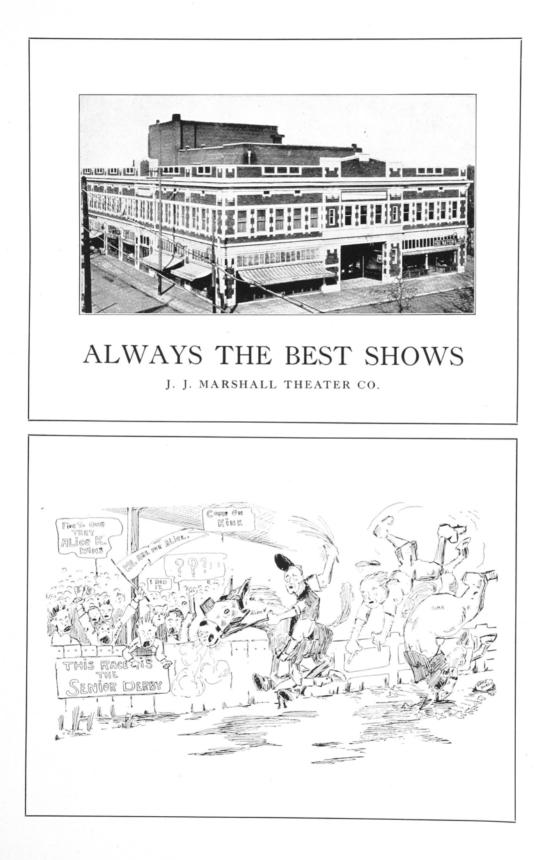

Our reserve values are very large.

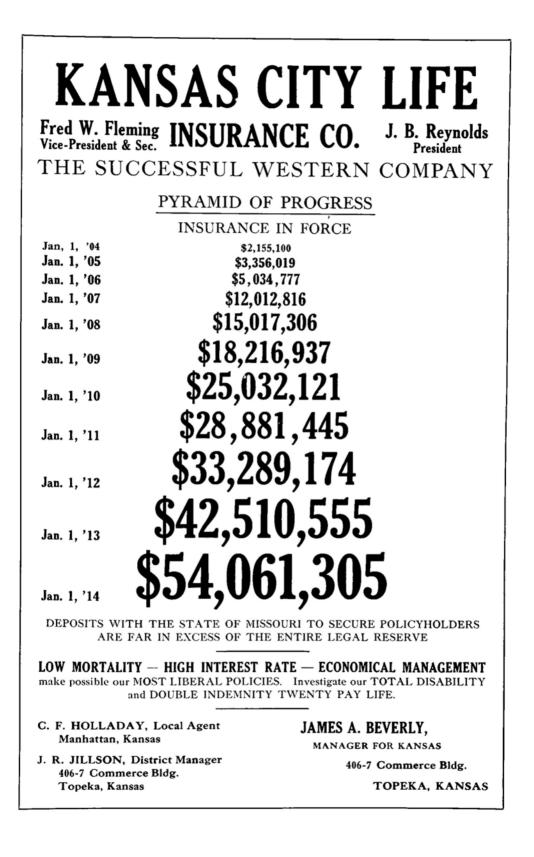

Our Annual Dividends which were already liberal have recently been raised.

The fact that over 30 per cent of the new business written each year is increased insurance on lives already insured in the Company is proof that there is nothing better on the market.

REPRESENTED BY L. S. HARROLD, MANHATTAN, KAN.

Suits That Talk

¶ Our suits talk the wearers prosperity.

• Give vourself a boost young man-going forth into the world, by wearing our Good Clothes. **The** young man who is correctly attired is usually "adhering" where the other fellow fails. ¶ High grade but not High Priced.

¶ Our suits this year at \$20, \$25, and \$30 are certainly the best suits for the price we have ever seen in all our years of experience in the clothing business.

AN UP-TO-TO-THE-MINUTE REPORT OF WHAT'S BEING DONE IN THE GREAT LABORATORY

Do you want a week-by-week report of the really important results secured by the thousands of other experimenters? This is what Farmers' Mail and Breeze gives you, sorted out and full of human interest. It does not give wholesale advice. Advice is offered only when it's wanted and asked for. We gladly supply it then, and from the most expert sources, upon any subject of livestock or crops. Yuo will go with our editros on trips of inspection to the most successful farms. You will see scientific truths in action—tried out in the test tube of profit and loss, under widely differing conditions. You'll view with your own eyes the things that are actually being done, and listen to the men who are doing them. Also, sometimes, yuo will get the benefit of the failures. And you will find it wonderfully interesting reading, and not at al officious or tedious.

THE CAPPER PUBLICATION

Farmers Mail and Breeze Topeka Daily Capital Capper's Weekly Missouri Valley Farmer The Household Poultry Culture, Topeka, Kansas Nebraska Farm Journal, Omaha, Neb. Missouri Ruralist Oklahoma Farmer, Oklahoma City

YOU KNOW THESE MEN

The managing editor of Farmers Mail and Breeze and other Capper Farm Papers is Charles Dillon, who was three years head of the Depart-ment of Journalism of K. S. A. C.—the man chosen by the National Press Association to suc-ceed Dean Walter Williams as president of the journalism section, and known the country over journalism section, and known the country over as one of the really great agricultural writers of the United States. Tom McNeal, editor of Mail and Breeze, is the best known and best liked of Kansas editors. No writer in the Middle West is more forceful or more fair. His two pages of "Current Comment" are as much a feature of the paper as its name. They give the Kansas view of the various high jinks capers of modern life. A. L. Nichols, associate editor, is a master genius in getting at and drawing out worth-while exper-iences, and giving them the right setting. And there are the various special editors for livestock, field crops, dairying, poultry, and veterinary, household, etc.—the men who are going out week after week to farms in all parts of the State, gath-ering money-making methods for your benefit.

AMERICAN FARMERS NOT SO FAR BEHIND IN CO-OPERATIVE ENTERPRISE

There are more successful marketing and business organizations run by western farmers than you would suppose. The facts will surprise you. For more than a dozen years Ohio farmers have been conducting a farm loan plan, probably better suited to our conditions than any of the land bank schemes of Europe. To get rock-bottom information of this kind Mail and Breeze has begun a first-hand investigation of the methods followed by all the successful farm organizations of the Middle West and Southwest. These will be written up one at a time. You will want to read about these successful pioneers in co-operation.

FOR THE WIFE AND THE CHILDREN

FOR THE WIFE AND THE CHILDREN Balanced rations for folks is an interesting subject. Efficiency of the human animal as well as the health of your livestock depends a lot on right feeding. There will be a special series of short, common sense, useful articles on this mat-ter in the Mail and Breeze that no woman on the farm or in town can afford to miss. In fact, a varied and attractive program has been prepared for the women's pages of this year. And we have things in store for the children. Every other week the Mail and Breeze will con-tain a page for the boys and girls. This does not mean the customary drop-the-handkerchief sort of entertainment. It means short stories by the best writers; stories telling how to make things; and about woodwork, manual training, trapping, travel, interesting things in agriculture, particularly gar-dening, and also club work and contests of one kind and another.

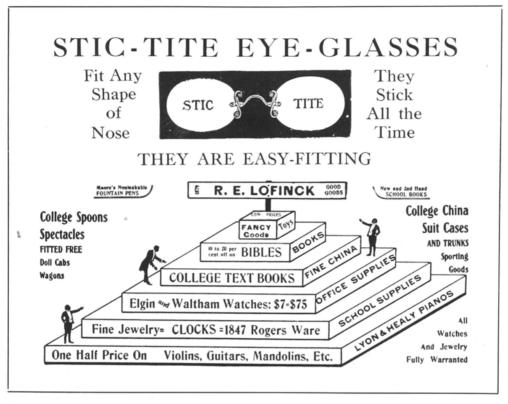

"While the best editorial ability obtainable is employed upon it, in preeminent degree the Farmers Mail and Breeze is edited by its readers.'

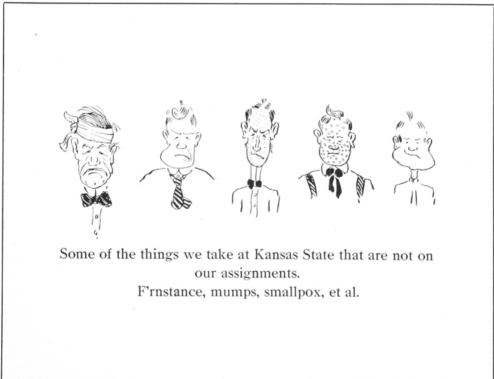

Become one of our reader editors. Get into this helpful give-and-take of experiences. Contribute yours to others and get theirs in return. And Farmers Mail and Breeze will be in your mail box fifty-two times a year, regardless of weather, with suggestions times to your needs just then.

Nothing contributes more to the finished book than a well-printed picture

The College Annual touches closer the activities of the student body and teachers than does any other publication of the school. It is a reflector of the school life and all that it implies. To send forth such a representative so that it will be a credit to the school and a good advertisement, it must be dressed in a manner befitting its mission. It should never look common. It should mirror in its make-up the best in quality of stock and binding, with pages printed in such a manner as will emphasize the best achievement of the printing art. Remember it is your printer who gives effect to the labor of photographer, engraver and paper maker.

Therefore the selection of your printer is all important.
