

MAIN ENTRANCE.

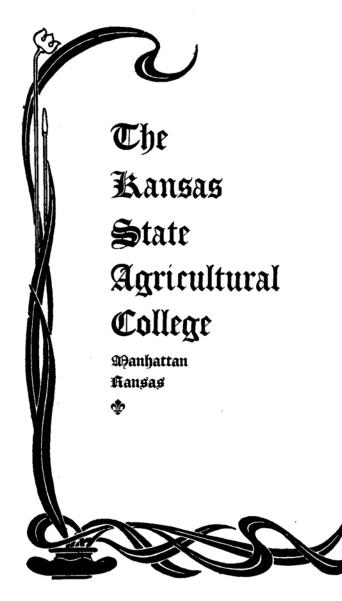

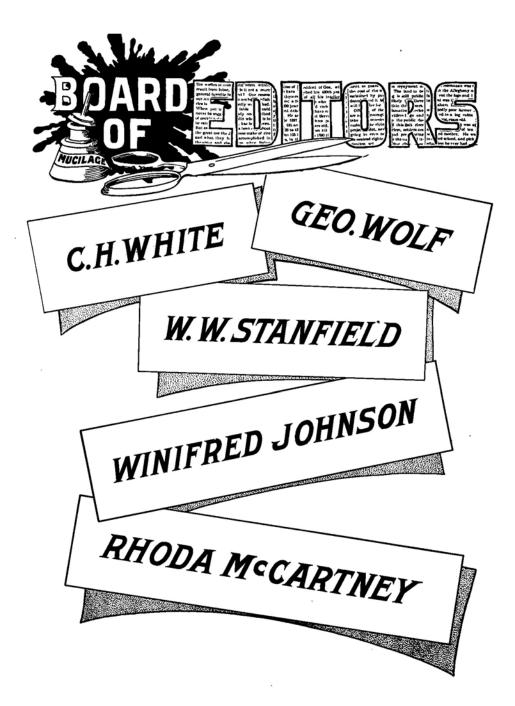

Dedicatory to the '05 Class Book

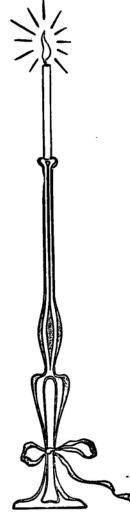

With a love and sincerity Born of friendship's true devotion; With a hope of futurity Bringing forth life's best promotion, We dedicate this book.

To the glories of Heaven and the glories of earth---To the good and the wise and the lowly of birth. To the homes and the shops and the throng-crowded marts, To our parents who claim us---the pride of their hearts, And to him who may find in its pages so fair The full proof of cewards to a wother's fond prayer.

GENERAL VIEW OF THE COLLEGE

All living things grow, and growth produces change. This change may manifest itself in an excressence of watery tissue that will not stand the glare of the noonday sun; or by a steady evolutionary process, which results in a symmetrical product, warranted not to warp, fade, or wither away.

It is almost unnecessary to say that the latter characterizes the development of this College during the last four years. For abundant evidence to substantiate this statement one needs only to take a stroll over the campus. The "crescent" has perceptibly lengthened. To the extreme left, as one comes up the main driveway, stands the Auditorium whose virgin walls have resounded again and again, during the past year, with lusty shouts and have sheltered for the first time (June 15, '05) a graduating class. The "crescent" tip to the right is, as yet, but a patch of blue in the horizon. But by reason of a recent legislative act a new Horticultural Hall will soon occupy the empty space beside the Agricultural Building. Just back of Agricultural Hall shines the red roof of the Dairy Building, where cheese and ice cream are dispensed to the hungry; and to the thirsty, "ambrosia" and buttermilk. Physics Hall, one of the largest and in some respects the handsomest building on the grounds, occupies a prominent place in the economy of applied science as taught in K. A. C.

Of course the observer's eye has long ago been directed toward a large, red tank stuck up a hundred odd feet above the rubbering freshy. This tank and the steel sub-structure is a part of the so-called water plant—perennial variety—which grew up during the hot summer days of 1904, maturing well before the heavy frosts of early winter checked its growth.

The carpenter shop and Fairchild Hall have been doing sums in mental arithmetic; the former has added unto itself a wing and the latter an extension. While the old walls of the once Chemical Building have taken a new lease of life and now with the second roof that covers them serve as a girls' gymnasium.

Two one-hundred-ton silos and miles of fence have been built; a hundred acres of land and much valuable live stock purchased. All these substantial outcroppings are but an outward manifestation of growth; adaptations made necessary by the increased attendance.

The less apparent changes are, nevertheless important. Twice ('03 and '04) the course of study has been revised, placing the College on a little higher plane each time. Two new courses, that of Architecture and Veterinary Science have been added, also the chair of German. Other changes and additions too numerous to mention have been brought about by the powers that be, until now this institution stands, of its kind, the most complete and best equipped in the world.

PRESIDENT E. R. NICHOLS.

Like so many eminent men of the present generation the subject of this sketch, E. R. Nichols, President of the Kansas State Agricultural College, was born and grew to manhood on a farm. Farmington, Conneticut, was the town of his nativity and northeastern Iowa the scene of his youth and young manhood. President Nichols' elementary education was received in the common schools of Iowa. Not content with the knowledge there acquired and feeling, perhaps, that the teaching profession offered the greatest opportunity for advancement, we next find him a student at the Iowa State Normal, from which institution he was graduated in 1882, receiving the degree of Bachelor of Didactics. For a few brief years he followed his chosen vocation, "Teaching the young idea how to shoot," in various Iowa schools. Still dissatisfied with his present stock of knowledge he entered Iowa State University, completed the prescribed course, and graduated therefrom in 1887, receiving the degree of Bachelor of Science. From 1887-90 he was Assistant Professor of Mathematics, Iowa State University. In 1890 the degree Master of Arts was conferred upon him by his alma mater. In 1888 he was married to Miss Marguerite Rae, of Chicago, a graduate of Iowa State Normal. In 1890 Professor Nichols was called to the Chair of Physics, K. S. A. C., a position which he ably occupied from that time until his elevation to the office of President of K. S. A. C. in 1899. From June, 1894, to September, 1895, under a leave of absence from K. S. A. C. he pursued graduate work in physics and mathematics at the University of Chicago.

For six long years—years of unceasing growth and progress, during which time the student enrollment of the College has nearly doubled and the equipment of the College has been quadrupled, President Nichols has guided and guarded the destiny of K. S. A. C. wisely and well. Little more need be said except that the class of "naughty-five," individually and collectively, cherish a deep regard for the man who has held the reins of power during their brief sojourn within the halls of their alma mater.

IN FULL COSTUME ON THE CAMPUS.

HISTORY OF THE '05 CLASS.

PART ONE.

Chapter I.

The fall of 1901 marked an epoch in the history of K. S. A. C., for it was then that the original class of 1905 entered College—the class that by its own testimony has been "original" ever since.

At the first few meetings there was produced that masterpiece of masterpieces, the '05 constitution, which stands to this day as a monument of the brilliance of the '05 class. At this time they also originated the custom of having enthusiastic and well attended class meetings, a custom which also extended throughout their career.

As nothing more pressing than Free-hand drawing and Alg.l, occupied their time at first, the desire to get acquainted asserted itself and resulted in class parties galore. The first one was given in the Ag. Hall on Nov. 18. Punch and wafers were served, and the special attractions of the evening were marching up and down stairs in pairs, and listening to music by Prof. McKeever. Admission was by 10-cent tickets.

Chapter II.

The class was so well pleased with the success of this effort that they tried it again during the winter term and the occasion is memorable chiefly because one prominent class member failed to receive any refreshments, and has talked of it ever since.

The time this term, not occupied by parties, was devoted to careful and concise character building.

Chapter III.

The next important occurrence was another class party, given in the D. S. Hall. Crokinole was the game of the evening, and the party was long enough to extend in a double line from the second story to the basement, where the happy Freshmen—now nearly Sophomores—regaled themselves upon ice cream and cake and made noble advances toward getting acquainted.

And with the exceptions of a few minor class scraps and a little cautious enthusiasm, these were the happenings of the '05 as First Years, so here endeth Part One.

PART TWO.

Chapter I.

To break the monotony of the previous year's entertainments, it was decided to give a class party "two weeks from next Monday night" after Oct. 27. The refreshments consisted of apples served in the barrel; punch and cookies. For the last named article Mary Anns were suggested but finally little round cakes glued together with jelly were decided on and eaten without noticeable harm resulting. A gum chewing contest during the evening provided amusement, but, it is feared, started the habit of exercising their jaws—a habit to which the '05's are still addicted.

Chapter II.

The Winter Term was spent in scrapping over class caps as an emblem, but finally, as so many of the girls declared caps very unbecoming, said caps were relegated to the tomb. But a class emblem was still longed for, so on March 11, '03, a committee was appointed to steal the bell clapper that it might furnish the class with mementos.

Chapter III.

The committee must have worked swiftly and well, for between the Winter and Spring Terms the clapper disappeared and soon after in class meeting the chairman of the committee reported that they had the clapper.

And now a realization of the duty of the class to the world suddenly appeared, and on April 24, '03, a committee was appointed to secure an elm tree "that it might be set on the Campus and be forever a fitting emblem of the strength and beauty of the '05's." So at 7 o'clock the loyal Sophs. met at the Main Gate and with the tree and the class president in the lead, marched to the ordained spot, where with impressive ceremonies the tree was planted and then left to war with the elements. But it didn't war for long, for with less ceremony, but quite as much enthusiasm, the '04's removed the sturdy elm and strewed its limbs far and wide.

However, the '05's had some recompense in collecting the orange and black monstrosities known as "'04 caps" and a friendly rivalry grew up in the class as to which member should get the largest collection.

Things were doing this term, and on May 25 a class picnic was held on Mt. Prospect. The old rose and white banner was stretched across a ravine, and then explorations began, which ended with supper and inspiring talks from the professors who attended. After this picnic came the deluge, but what matter? The Sophs. had had their picnic!

PART THREE.

Chapter I.

During the fall of the Junior year the class hibernated and gathered strength for future trouble.

Chapter II.

The winter term brought not the trouble; but the class awoke, appointed a class book committee and attended its first "Senior Junior" on February 22. Then as the Junior girls gave a practical demonstration to the Senior girls, on the subject: "Basket Ball and How She is Played," the Junior boys became patriotic and received the girls in the D. S. Hall on March 25. No chaperones were present and the evening was much enjoyed.

Chapter III.

But with the springtime came the trouble when the '04 stone became the '05 stone, and the '04's objected. The '05 boys soon made records in fighting and cross-country runs in a slight difficulty with the Seniors, and many and varied were the opinions passed on the proceedings. But, against some opposition, a reception was given the Seniors on May 9, and no blood was shed.

The annual Senior-Junior ball game also came off according to schedule and resulted in a score of 0 to 5 in favor of the '05's.

PART FOUR.

Chapter I.

The '05's, Seniors at last; and they proved it in the football game with the Juniors—score o to o in favor of the Seniors.

In the grain judging contest they also had a hand, when Andrew Colliver and Carl Wheeler helped place the Cook Trophy in the K. A. C. library.

The rest of the fall term was occupied by motions to rescind any action taken by the class as regarded class books, and discussions pro and con.

Chapter II.

The class-book subject proved so fascinating that it was continued into the winter term, and the class-book committee lived in daily dread of being discharged. Finally the wear and tear became too great, and one by one, four of the original committee resigned their positions, and were replaced by more hopeful people.

The fight was long and hard, but the class-book faction triumphed, and a class-book was once more decided upon as a desirable possession.

All parties united to give the Senior-Junior reception on St. Patrick's day, and more genuine good feeling existed between the two classes than has ever before been on record.

And with numerous class meetings and mass meetings, the term closed, and the '05's prepared for their last term in K. S. A. C.

Chapter III.

Spring term opened with a livelier interest than usual, and the Seniors began ransacking their brains for something unique. It was soon forthcoming, and a dress reform was instituted when the Ag. boys combined the picturesque and useful in their Jeans suits; soon the girls of the class blossomed forth in simple rural hats trimmed by themselves, while the General Science represented the aristocracy with their beautiful tall silk hats and dainty canes, tied with old rose and white bows. The Engineers still clung to their old standbys, but all sallied out in their quaint garb to have the '05 picture taken out in front of the Main Building.

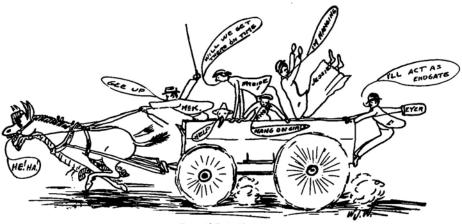

This term interest also began to be manifested in cross-country runs and as the Senior class won, the girls saw their duty plain before them, and received the Senior boys in honor of Mr. Courter—winner.

On May 6, when the joys of mid-term were past, the "Junior-Senior"—last of the series for the '05's—was given the class as a mark of the respect and esteem with which the Seniors had inspired the Juniors during their brief career.

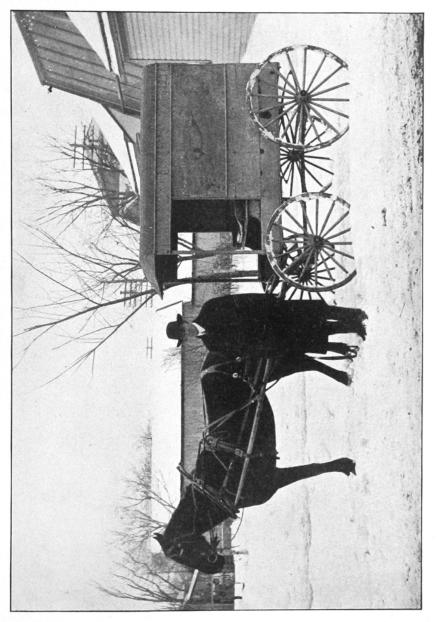

From this time on the members of the class spent happy moments in writing various kinds of Theses, and in such slight dissipations as usually fall to the lot of Seniors at such a time.

But through it all—through the verdancy of Freshmanhood through the brief spasm of wisdom when Sophs.—through the enthusiasm of Juniordom—and through the trials and tribulations of the Senior year, the '05 class has ever kept in mind and become thoroughly grounded in their motto:

> "It is not wealth, nor rank, nor state, But get up and get, that makes men great"

THE TALE OF THE CLAPPER

HIS is our own college campus. The Murmuring winds in the tree tops Tell us tales of the campus at midnight When all things were silent. This is a tale of the night birds who, Fluttering round at the belfry, Alone saw the deed that was done, Alone saw the prowling marauders. Ye who believe in Class spirit That hopes and endures and is patient: Ye who believe in the glory and

Strength of a Classman's devotion: List to the mournful tradition still Rung by the bell of the chapel, List to the tale of the clapper That hung in that K. A. C. belfry.

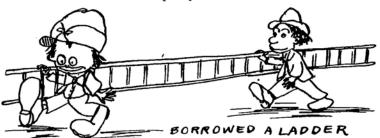

One day in Sophomore meeting, the Question of class pins arising, In jest a committee was chosen to See about getting the clapper Of the loud sounding bell that it might Be made into emblems.

For this the girls made a plan, as they Sewed in their dressmaking classroom. For as they sewed, they talked and The plot grew deeper and deeper. Then as the old bell rang, and they, Dismissed, were still talking: They sought out a daring young Man and to him imparted their scheming. Then for long days they waited, waited Yet never despairing For this came about in mid-winter And nothing was done until spring-time Came with new life for all nature and Also for "naughty five" classmen. Two expeditions were planned With no knowledge one of the other. It happened they met and combined, And then there were four in the party.

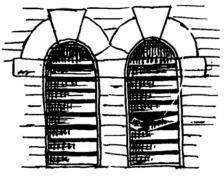

WENDED WATTO COLLEGE

After the moon was gone down, They wended their way to the College. Then at the back of the building To the roof they quickly ascended: When in the darkness was heard The sound of footsteps approaching; Which caused them to crouch there And tremble until the disturber Had vanished.

From a house just east of the College A ladder was carefully borrowed, Borrowed, used and returned, and No one was any the wiser, Armed with various tools for Working in wood and in metals,

ALOOJE SLAT

·om

Soon to their task they proceeded And finding a slat in the belfry That bearing the brunt of the weather, Had lost the strength of new timber, They quickly effected an entrance and Easily loosened their trophy; Dropped it then to the ground and After it quickly descended.

Taking their new found possession, They turned their steps to the northward; Talking all the while as to what they Should christen the capture.

Finally decided on "Long Tom" as a Name both convenient and fitting. With only the stars for companions They halted their hastening footsteps, In a wild and lonely ravine,

Which lay just north of "Old Bluemont."

RAVINE

Here with their trusty jack knives They dug "Tom" a grave and interred him. There he remained for some weeks, Securely and peacefully resting; After his arduous toil when He as the College bell-clapper, Worked on the janitor force by Calling the students to chapel.

11.0 TIN.G 9 C E

Then as Commencement approached And the students of home began thinking; A trip to the country was made to Bring back the "naughty five" treasure. In the darkness they searched, but not Finding, were forced to return empty-handed.

A second excursion was made and As daylight appeared o'er the hilltops, "Long Tom" rode in state to the City, though concealed in the folds of A feed sack.

IN DARKNESS THEY JEARCHED

Since then in the haunts of The 'o5's, from place to place He has wandered, Always true to the class and Never lamenting the fortune That brought him down from the Tower, to be the "Naughty Five" mascot. Yet still from the tower on high The bell rings loudly and clearly; Not so did it ring on the morn After "Long Tom's" disappearance.

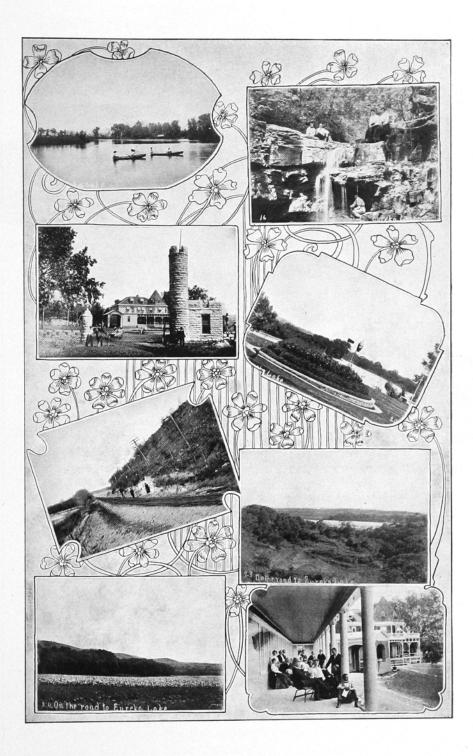

Place but gave forth no sound As a summons.

Later they hung in Tom's place a Bunch of old bolts as a clapper, Until in the foundry were run Two clappers instead of the lost one: So that never again may the Students, the old bell silence entirely.

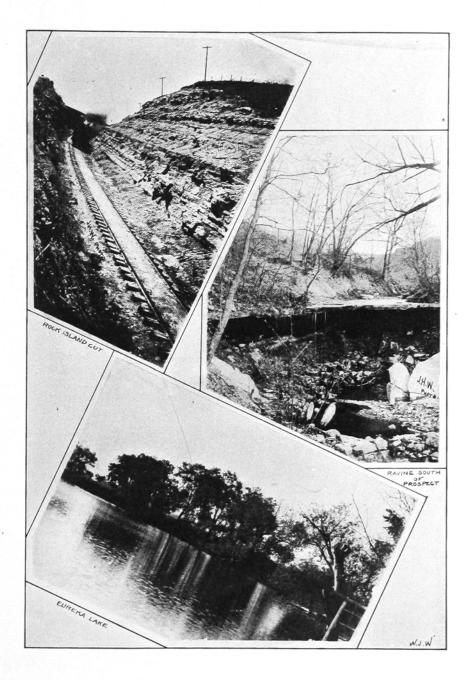

BOLTS

And the night winds that blow Through the tree tops And the birds that fly around the belfry Still tell of the days that have vanished, Still whisper the tale of the "Clapper."

•

ALPHA BETA.

Alpha Beta, implying that we are yet in the alphabet of forensic art, is the name of this society which was organized October 17, 1868. Of the societies now in existence it was the first to perfect its organization. At the beginning only young men were admitted to membership, but in 1874 young women were also admitted and the Alpha Betas have ever since stood, as does the College, for co-education. The society paper. "The Gleaner." was first given as a semi-monthly paper in 1875, having been preceeded by the "Literary Ensign," a paper given only on public occasions. The growth of the College, and with it the society has necessitated many changes, but we now occupy, with the Websters, a large and well-furnished room in the basement of Fairchild Hall. That our membership has included some of the best of the College talent is indicated by the fact that we hold an enviable record in the inter-society oratorical contests and debates. The object of our society work is the attainment of an all around development of its members. This is accomplished by regular appearance upon the program, and by training in extemporaneous speaking and parliamentary practice. The greatly felt need of social advantages in so large an institution is fully met in the Alpha Beta society, by the cordiality shown in the regular sessions, and by specially arranged receptions during the year. The Society has ever upheld a high moral standard and endeavors to advance the interests of the College, and the organizations connected with it, whose object is to elevate student life, and is forever opposed to those whose influence has proved detrimental.

SENIOR ALPHA BETAS

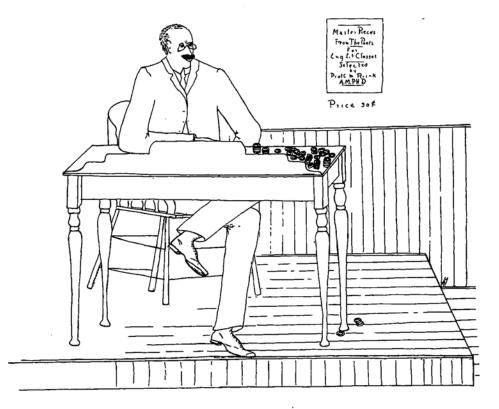

The faces on the opposite page are likenesses of those of the '05 class who are members of the Webster Literary Society, the oldest and one of the leading literary organizations of the K. S. A. C.

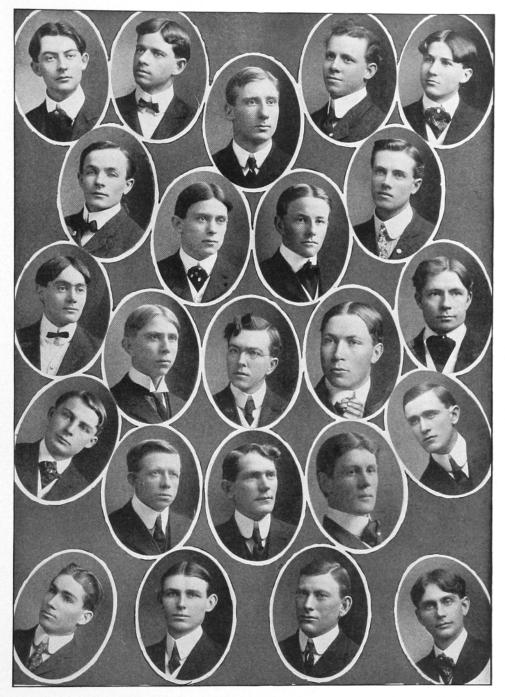

The home of the Webster society is a large and well-appointed room in the south-east corner of Fairchild Hall.

True to the spirit of this motto: "Labor conquers all things," the Websters believe in and require considerable work on the part of the individual members. And the efficiency of the society as a whole is shown by the success and popularity of their annual entertainment known as the "Webster Annual."

The Webster Literary Society admits to membership young men of good moral character who desire to develop their native talent for forensic art and to acquire knowledge and skill in parliamentary practice.

> Wah haw! Wah haw!! Wah haw wah!!! Websters! Websters!! Wah haw wah!!!

SENIOR WEBSTERS

"Truth conquers all things."

During the years of 1883-84 the crowded condition of the two literary societies then existing, due to the increased attendance at College, made the formation of a new society a necessity. About this time there was also a growing enthusiasm in literary work. A number of students, largely drawn from other societies, met in the north corridor of the Main Building Saturday evening, November 8, 1884, for the purpose of forming a new literary society.

A resolution was made favoring the organization of a society for gentlemen only. This resolution passed unanimously and a committee was appointed to draw up a constitution and by-laws. The committee consisted of B. Needman, E. H. Perry and H. F. Gourley. The report of the committee was accepted with some slight changes a week later. There were sixteen charter members. Thomas Bassler was elected president and B. Needman, secretary.

The society secured a state charter and became an authorized organization on the 29th of January, 1886. The object of this society is to improve all concerned in debating, social development and general literature. Opportunity is given for public reading and speaking, and special programs are often arranged for this purpose. Within society, however, the main purpose is to become proficient in general society work, debating and especially in parliamentary rules.

Since 1891 the Hamiltons, together with other societies, have furnished an annual public lecture as a part of the exercises of commencement week. The first lecture was delivered by James H. Canfield of the State University, in response to an invitation from the Hamilton society.

During the first five years after its organization the society had no society room. The society was more fortunate, however, in 1889, for a room on the third floor of the Main Building was completed and assigned to the Ionian and Hamilton societies. The room was furnished by the two societies and was occupied by them for five years. By this time the Science Hall had been completed and a room on the first floor was assigned to the two societies. It was furnished by the two societies and made into a comfortable and pleasant room, which they now occupy. During the winter of 1904-05 the room was rendered much more pleasing in appearance and comfort by the addition of opera chairs.

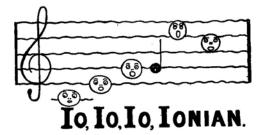

The Hamilton society started out with a vigorous career and earnest purpose and soon became a power in College life. It has become even more vigorous and flourishing within the past few years and regular meetings on Saturday nights are always full of life, and are always remembered by those who graduate as the most pleasant times during their College career.

> Role-bole-O! Role-bole-O! Hamilton! Hamilton! Role-bole-O!

SENIOR HAMILTONS

Ionian Literary Society

Organized Spring 1887

Motto:-"Diamond Cut Diamond."

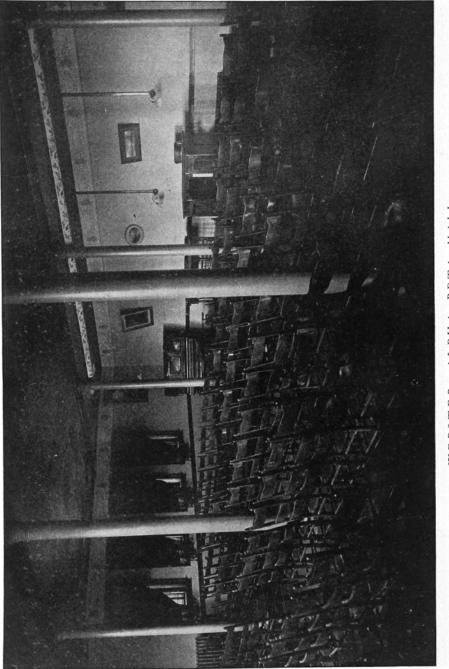

Qualifications:—"Any girl who is an undergraduate of the Kansas State Agricultural College may become a member of this society."

Membership:—"The membership of this society shall not exceed 100." There were thirty-one graduates in 1905.

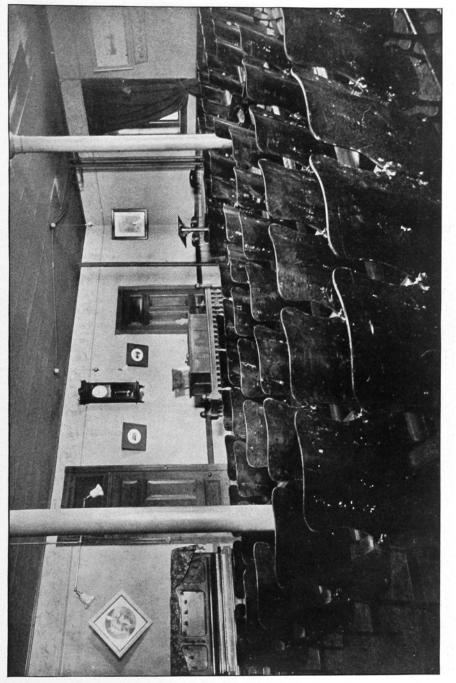

SENIOR IONIANS

WEBSTER-ALPHA BETA HALL

HAMILTON-IONIAN HALL

THE FRANKLIN SOCIETY.

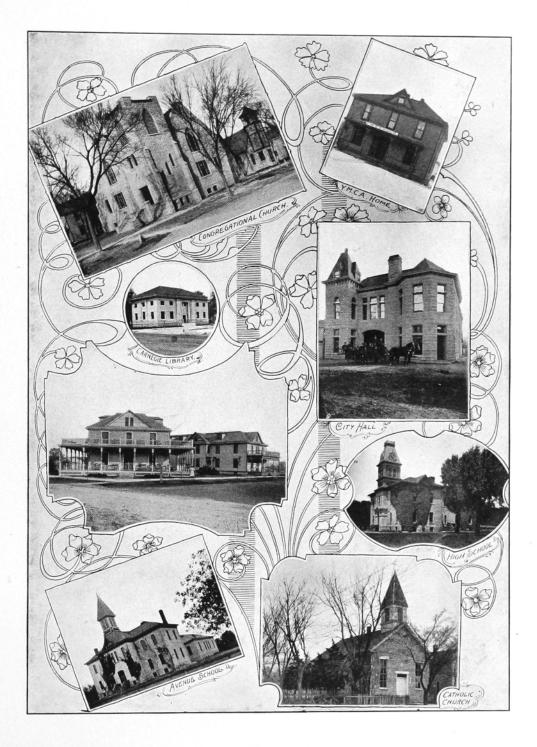

Late in the fall term of 1901, the idea of organizing a new society presented itself to some of the lower classmen of the College. The necessity of a new society was felt more by the under-classmen on account of the fact that the existing societies were filled to the limit by the older students.

The project grew in the minds of a few and from them spread, as a good thing will, to others. A meeting was held and definite steps were taken toward organizing a society. In subsequent meetings the necessary preliminaries were gone through with and the winter term, 1902, saw the new society fairly launched upon the College. Not quite fairly launched, perhaps, because of the difficulties which beset the first few months of its existence. The wise smiled, the superior smile, and prophesied a short life and a peaceful death. Others totally ignored the existence of the new society. Among the latter were the older societies who with very natural and commendable scorn looked down from the heights of Juniors and Seniors and refused to consider the organization of the "Preps" and Freshmen. Later, however, in the fall of 1903 the Franklin society was graciously recognized and given the right to be, by the other societies and also by the faculty. The first meetings had been held in various classrooms, and without equipment. Now we were given the southwest corner room in the basement of Fairchild Hall for a permanent meeting place. This was fitted up as rapidly as means would allow and although there is still much to be desired, we have now the finest society piano, good chairs, chairman's stand and other furniture.

The first Inter-society Oratorical contest in which the Franklins figured was in 1904. Here we succeeded in landing third place. This year we climbed a step higher and we are still in the climbing business.

A young tree does not produce as much mature fruit as an older tree, so the Franklins have not as yet had many members to graduate, three belong to the class of '04 and two to the class of '05, while our successors, the '06 class, will have in their number some eighteen Franklins.

In spite of various difficulties the standard of literary work done in the Franklin society has been second to none, but our aim is not only to equal, but to excel, and we intend, like every loyal Kansan, to go "To the stars through difficulties," if need be.

EURODELPHIAN SOCIETY.

Organized January 14, 1905. Motto: Dum vivemus vivamus. Colors: Brown and gold.

There being a need of another literary society for the girls of the K. S. A. C., the Eurodelphian Literary Society was organized at the beginning of the winter term of 1905, consisting of twenty-five charter members.

A constitution and by-laws were adopted, and the work for the remainder of the year was carried on along historical lines.

This Society is composed of good material for making one of the best and leading literary societies of the college, and the enthusiasm shown by the members for making it such, warrants its growth and progress. Although a new society, it is not one to be seen and not heard.

The charter members are:

Archie Edworthy	Marie Coons
Helen Huse	Lula Rannels
Lora Perry	Eleanor March
Grace Smith	Louise Fielding
Crete Spencer	Grace Enlow
Louise Fleming	Irma Davies
Winifred Hall	Jessie Marty
Ethel McKeen	Elva Akin
Boline Hanson	Ethel Clemons
Priscilla Lewis	Vera Holloway
Eleanor Ober	Winifred Dalton
Hallie Smith	Katherine Cooper

Leona Moore

EURODELPHIANS

THE YOUNG MEN'S CHRISTIAN ASSOCIATION.

The Young Men's Christian Association has made rapid progress in the amount of work done each year during the past few years. Three years ago the Y. M. C. A. headquarters was a small four-roomed house with little with which it could be made attractive and homelike to the lonesome new student.

During the last two years the Association has occupied the north dormitory at the Park Place and though not as spacious a building as the Y. M. C. A. could use at the present time, yet it has been the means of great advancement in the scope of work the Association has been capable of accomplishing among the students. A good selection of reading material and different games for amusement, with the homelike atmosphere of the surroundings, have kept many a student from getting discouraged and homesick, and made the time pass rapidly for many who were without a friend and whose first few days in College seemed like weary weeks and months.

During the past year the Association has been pushing a project for a new building, which is to cost \$25,000 and is to be located directly north of the City Park. It is to be modern in every way and serve as the headquarters and place for all the meetings of the Y. M. C. A. Nearly \$22,500 have already been subscribed for this building. One special feature of the building will be the gymnasium that is to be included in it.

The Y. M. C. A. stands for the three-fold development of spirit, mind and body. The very fact that during the past years, leaders in the principal college activities were men who believed in the great value of the work done by the Y. M. C. A., and were to be found among its number of efficient workers, shows that the Y. M. C. A. strives to secure, and does secure, in the student the full rounded development so much needed in after life. It is the four years in College that are the formative period of one's life, when habits formed are likely to be kept and herein lies the value of the Association work in bringing to the students as they come here, influences that shall be uplifting and helpful.

During the past year nearly 400 students have been enrolled in Bible study classes. These classes are taught by student leaders.

Special attention has also been given to looking after the needs of the sick; and at the beginning of each term new students are met at the trains and aided in securing their rooms and made to feel as much at home as possible.

The Y. M. C. A. is, and we hope shall continue to be, a great influence for good in the College.

Y. M. C. A. CABINET

YOUNG WOMEN'S CHRISTIAN ASSOCIATION.

The Young Women's Christian Association, of the Kansas State Agricultural College, is one of the most successful associations in the state. Each year, since its organization in 1886, has been one of progress. The school year of 1904-05 has been the crowning year of its success. This year began with a membership of eighty-nine energetic young women. It closes with two hundred and forty members; forty more than planned for this year by the policy of the **membership** committee.

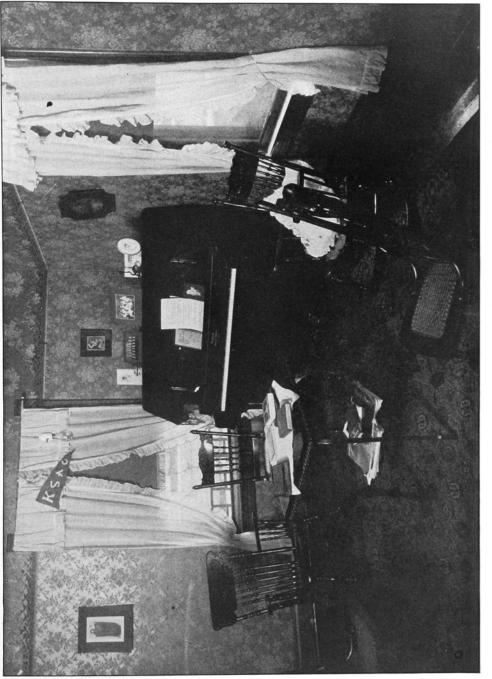

The Y. W. C. A. Home has been a greater success, and a truer home than it has ever been before in its history. This home has proved a source of comfort to many a homesick or discouraged girl. It has also sheltered many, upon their arrival in Manhattan, until suitable rooms and board could be secured.

The budget for the year 1904-05 is as follows:

blager for the jear igot of the net term
General Secretary\$400.00
Y. W. C. A. House 75.00
Summer Conference 50.00
State Convention 20.00
Literature 5.00
Committee Funds 35.00
Printing and Stationery 10.00
House Rent 180.00
State Pledge 20.00
Missions 10.00
American Pledge 5.00
World's Nickel 5.00
Total\$815.00

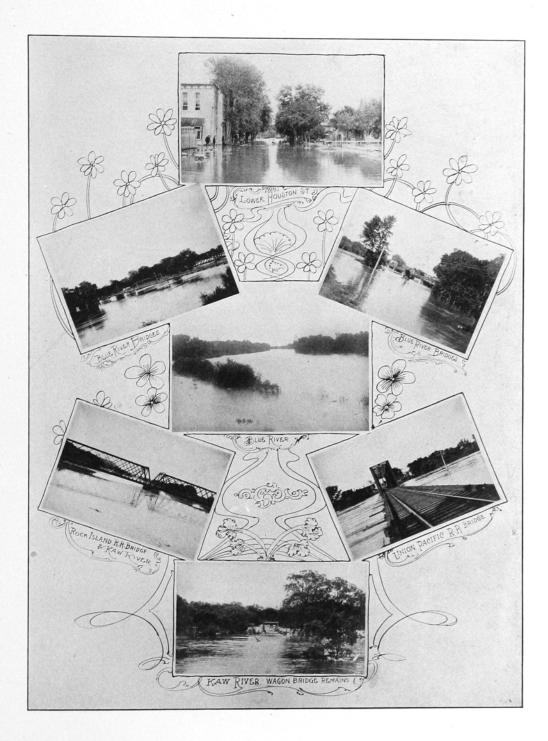

This amount has been entirely raised. The devices for securing the amount have been varied: Faculty pledges, Regents' subscriptions, students' dues and pledges, and subscriptions from Manhattan residents are the principal ones used. Special work has been done by groups set apart for this purpose. May-morning breakfasts, fudge-stands, ice-cream stands, and other similar projects, were successfully used by them.

Very much of the success of this year's work is due to the earnest work of Miss Jennie M. Thayer, the General Secretary of the Association. Her tactful and winning manner has led each girl to her natural duty. Miss Thayer has been backed in her work by a strong cabinet: President, Bertha Cowles; Vice-president, Cora McNutt; Secretary, Martha Pittman; Treasurer, Mary Colliver. Committee chairmen: Membership, Margaret Haggart; Bible study, Frances Fish; Devotional, May Harris; Missionary, Winifred Johnson; Finance, Josephine Edwards; Social, Minnie Ise; Look-out, Mary Strite; Music, Jessie Sweet; Intercollegiate, Almira Kerr. The class of '05 takes with it nine of these girls. Their places are ably filled, however, and the prospects for the work next year point to a more successful year for 1905-06 than has been the year just elosing.

Y. W. C. A. PARLOR

"THE AGRICULTURAL ASSOCIATION."

The Agricultural Association of the Kansas State Agricultural College was organized during the fall term of the year 1902 by a few earnest, enthusiastic students of agriculture. The first meeting was held in the old Horticultural class-room on the evening of Monday, November 20, 1902. The objects of the association as stated in its constitution are: "To promote agricultural education by scientific investigation and their practical application; to advance the interest of agricultural colleges; to assist experiment stations; and to encourage fraternal relations between agricultural students." With such worthy objects in view such an organization is bound to succeed, and the Association is surely if slowly growing into prominence. After many changes the Association seems at last to have found a permanent home in the West-society hall in the Library Building. By a faculty ruling membership in the Agricultural Association excuses students from attendance at p. m. Chapel on the same basis as the regular literary societies. The opportunity for acquiring knowledge and practice along literary and parliamentary lines in the Association is fully equal to that afforded by the regular literary societies.

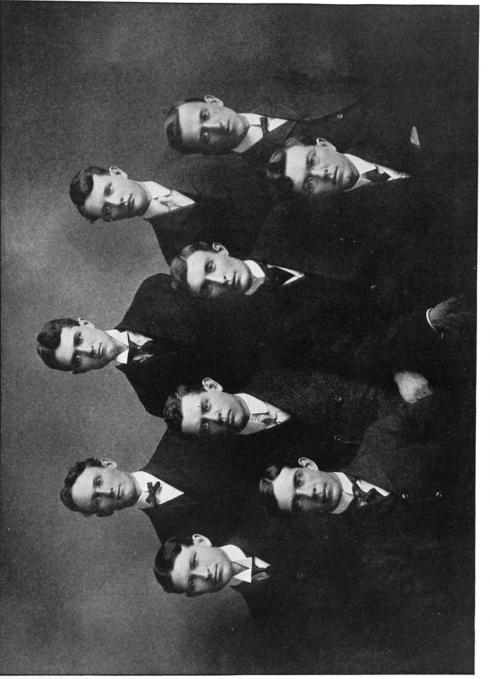

The Association has for a long time urged the desirability of intercollegiate debates with similar schools, but so far without avail.

The annual picnic given by the "Ag. boys" to invited guests is growing popular..

Under the auspices of the Association, three annual stock-judging contests have been held at K. S. A. C. This year 70 students contested for the prizes offered by the Association. The latest project of the Association is the establishment of the "Kansas Agricultural Review," a monthly journal devoted to agricultural and affiliated subjects.

Of the '05's, E. A. Logan, W. W. Stanfield and C. W. Fryhofer have in turn occupied the executive chair during the year 1904-05. In addition to those mentioned above the following '05's are members of the Association: A. D. Colliver, F. Van Dorp, L. J. Munger, Richard Meyers, Frederick W. Wilson, and A. F. Turner. Let us hope that in time **all** of the Senior Ag. boys will be members of the Association.

AGRICULRURAL ASSOCIATION-SENIORS

THE ENGINEERS.

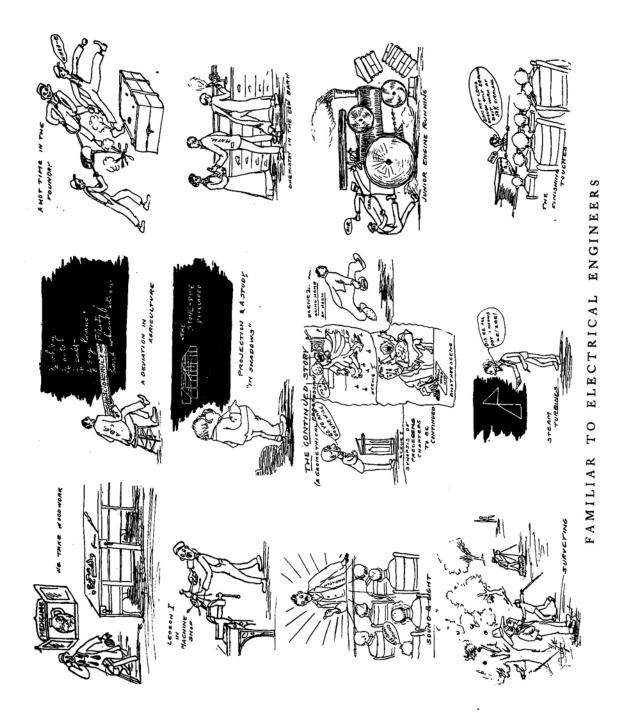

With the knowledge of engineering societies in other colleges and universities and the feeling of the need of an association of the engineers at our College as the moving spirits, the K. S. A. C. Engineers' Association was formed late in the spring of 1904. By the terms of the constitution, the electrical and mechanical engineering students meet in joint session at least once each month of the College year for the presentation and discussion of engineering subjects.

Membership is open to all engineers who are members of the Junior and Senior classes and to such others who may receive the vote of the association.

The organization was formed so near the end of the school year that the '04 engineers received little more than the opportunity to sign the constitution and enroll themselves as members for the sake of the prestige gained, but the work of the year '04 and '05, though entirely experimental, was of a more practical and satisfactory nature. The regular work of the year was carried on by members who have had practical experience in engineering work and by the College instructors. In addition, the '05 engineers had the privilege of listening to Judge Kimble of Manhattan, Mr. F. L. Williams of Clay Center, Mr. Leeds of Leeds & Northrup, Philadelphia, Mr. F. L. Rohrer, electrical superintendent of the General Electric Company, and Dr. F. W. Gunsaulus, President of Armour Institute.

The crowning event of the year was the lecture by Dr. Gunsaulus on "How to Fail as an Engineer." Those who heard it pronounced it the best that was delivered at the College this year. The ambitions, enthusiasm, and determinations aroused by that hour's talk formed a fitting climax to the first year in the history of the K. S. A. C. Engineers' Association.

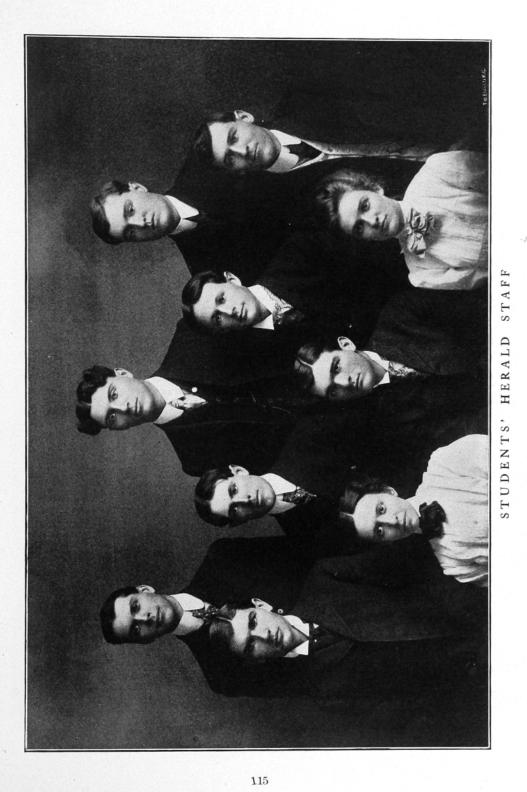

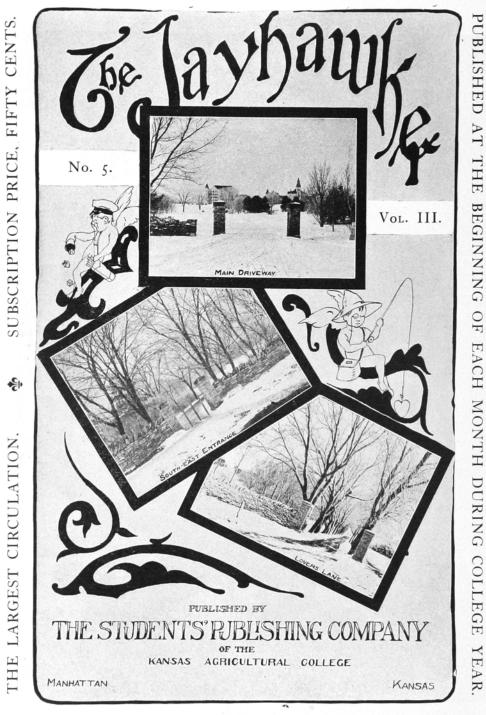

THE STUDENTS' HERALD.

The Student's Herald is exclusively a student enterprise and owes its birth and maintenance to a group of students calling themselves "The Students' Herald Publishing Company." The paper is a contemporary of the remarkable development of the College during the decade ending in 1905. It completed its tenth volume with the commencement of the '05 class and appears nearly forty times each year to the students and alumni of the Kansas State Agricultural College.

A GOOD PAPER FOR STUDENTS.

THE BEST PAPER FOR AN ALUMNUS.

KANSAS AGRICULTURAL REVIEW, MANHATTAN, KANSAS.

Editorial

For several years Announcement there has been a growing desire to establish an agricultural periodical at the Kansas State Agricultural College. This desire has been fos-

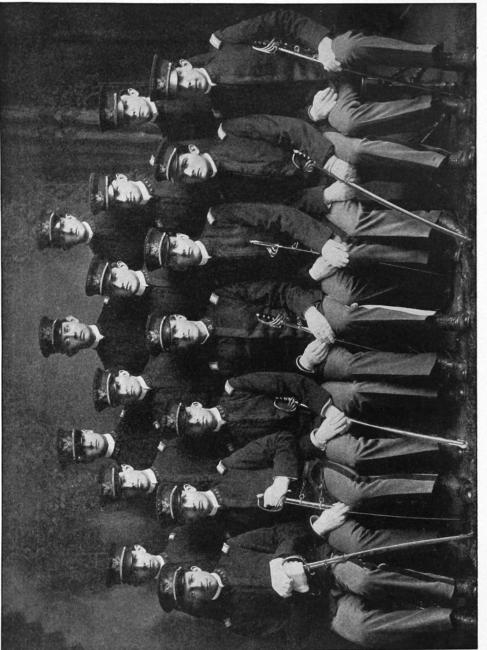

tered by the feeling that such a publication will advance the agricultural interests of Kansas by bringing the work of the College more prominently before the public, by drawing former students and graduates in closer touch with each other and with the College, and by stimulating greater interest and activity along agricultural lines in the College itself.

Situated as we are at the very center of agricultural education in Kansas and in touch with all that is new or valuable concerning agriculture we hope to voice the best in agricultural progress and teaching. This is the mission

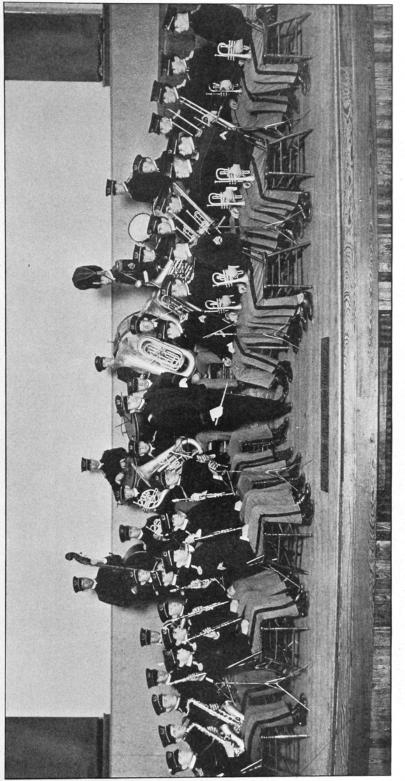

of the Kansas Agricultural Review. It is published by agricultural and domestic science students of the Kansas State Agricultural College. It meets the hearty approval and support of the College faculty, but the editors are responsible for the policy of the paper. The Kansas Agricultural Review will publish articles from the pens of the leading men and women in agricultural pursuits. Readers of the Review are asked to contribute freely to Special attention our columns. will be given to news of former students.

A pleasant home life Of Special being so essential to Interest to Housewives the highest development and enjoyment of mankind and questions of household management determining so largely

CHORAL UNION

MEMOIRS OF K. S. A. C.

(With profuse apologies to Tennyson.)

Comrades leave me here a little, while yet 'tis early morn. Leave me here, and when you want me, sound upon the dinner horn. 'Tis a place that is familiar-where of old I used to be-Where I got my education. 'Tis the same K. S. A. C. Many a time from yonder wild casement did I stand and gawk At the wise and mighty '05's going down the cinder walk. Many a time I looked upon them, and I wondered then if I Would grow tall like Friede Marty, and arise to honors high. Or ascend like stately Balmer, last to first place, high and grand, And arrive in one short evening to the top of the grand stand. Here the campus o'er I wandered, nourishing a youth sublime, Studying Domestic Science, working hard most all the time. In the Spring, the base ball season opens up with balls and bats; In the Spring, the pretty Frat boys all appear in brand new hats; In the Spring the Profs. are grumpy and you feel inclined to shirk: In the Spring the Farmer's Short Course, have to all go home and work.

Then the Senior girls were thinner than should be for ones so young, And their eyes on Mrs. Calvin with a meek observance hung; Saying: "I have hid my feelings, fearing they should do me wrong. Did I fail in Dietetics?" weeping, "I have studied long." Coldwell took the round baseball and turned it in his glowing hand, Every moment the spectators watched to see if Cassell fanned. Cassell took the baseball bat and smote at that same ball with might, Smote that round baseball, that whizzing, passed the high fence, out

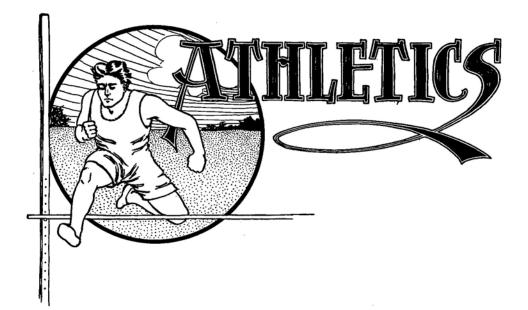

of sight. Many an evening at my window, did I hear discordant din— Sociable A. B.'s returning from a straw ride where they'd been. Many a morning down the long street, did I hear the rattling creak Of the laundry chaise familiar, drawn by Dobbin, old and weak. And within the chaise sat Chitty, who held the reins so firm and nice; But he's left these haunts forever, for his heart has turned to Ise Oh the 'o5's here no longer! Oh the 'o5's dear to me! Where is now poetic Gasser? What's become of A. B. C.? And I looked into the future far as microscope could see, Saw a vision of the '05's and the wonders that would be. I remember Lena Finley, sweetly did she sing and trill, When she used to be an Io at the College on the hill. Oh I see her old and bending o'er the washtub's foamy suds, Singing "Alma Mater" while she scrubs at soiled duds. J. B. Thompson, stony hearted, of the kind poets have sung, Is puppet to a good wife's threat, servile to a shrewish tongue. Little Clarence reaped the bitter harvest of his youthful joy When the Faculty did catch him when he hazed another boy. Knowledge comes, but Wisdom lingers, and I see young Clarence now President of this great College, at whose shrine all nations bow-And I doubt not, through the ages, his inevitable rule Is to talk in morning chapel of "Experiences at school." Tall Jay Worswick when he left us, rose to fame ere many moons; Now I see him the head man of the store once owned by Coons. He can talk of patent leathers, and the latest high French heels, And the jingling of the guineas heal whatever hurt he feels. Far away the gentle whisper of a cooing turtle dove, Brings a thought of sweet Blanche Stevens, whom to look at was to

love.

Though her gate was thronged with suitors (all the markets overflowed),

All of them she looked on coldly when with eloquence they glowed. Deep in yonder shining Orient, where the little heathen stand, Blanche is now a missionary, laboring to save the land. Hark! My hungry comrades call me, blowing on the dinner horn, So I'll take me to the Co-ops, though their fare is most forlorn. And I'll leave thoughts of the '05's, and these scenes I used to know, For the dinner horn is blowing—calling for me, and I go.

-

ATHLETICS.

To be successful in any work of life a man must be well developed physically as well as mentally. It should be the aim of every college to give to the world young men possessing a sound mind in a sound body. Unless a college does this it has failed in its most important function. In this institution we have an organization, known as the "K. S. A. C. Athletic Association," for the purpose of developing the physical side of the student and encouraging and promoting pure athletics.

This organization, though young in years and beset by adverse conditions, has done a deal toward the promotion of athletic sports. Our success in the past in all lines of athletic sports that have been participated in, has been excellent, considering the adverse conditions under which we have labored.

Among the reasons which make success difficult may be enumerated,

First: The sources from which our material is drawn. As a rule the majority of candidates for athletic positions are from the rural districts, and although the farm is one of the best places for the development of the physical man, it fails to develop him in that quickness and alertness of mind and body that are essential to modern athletics.

Second: The lack of a gymnasium. Without a gymnasium it is absolutely impossible to convert the raw material into the full-fledged athlete which we must cope with from the other institutions; and as every other institution of the state boasts a gymnasium of some sort, we are decidedly handicapped in this respect.

Third: Lack of funds. This is one of our prime reasons for occasional failures, and for which at present we see no remedy. But we hope that in the future some method may be devised by which our Athletic Association may be placed upon a firmer financial basis.

Fourth: Lack of support by the Faculty. Perhaps the most adverse factor in our athletics is the poor support of the Faculty. It is natural that the new student is influenced in this line by the powers that be; and it is a noticeable fact that the efforts of the Faculty in promoting athletics are mostly of a negative quality, with the exception of a devoted few who have done all in their power to raise our standard in athletics.

Last, but not least, in this calendar of woes is the "yellow peril," the awful mid-term exams., which put us at a disadvantage; for no other institution requires mid-term examinations.

Nevertheless we live in hope for better conditions and may the students who take our places have less to contend with, and more to look forward to than the class of '05.

SENIOR FOOTBALL TEAM

FOOTBALL.

A certain professor at this institution, when confronted with the statement that "football is war," replied, "Yes, but war makes men."

Had football been played in Grant's time he would undoubtedly have made the fastest quarter-back the world has ever known; and Sherman and Sheridan would have been the best line smashers that ever lived.

Although football has been played at this College less than ten years, it has become one of our most popular sports. Our teams have met with varying success, yet the results have been all that we could expect, considering the unfortunate conditions with which we have contended.

Football promotes the mental as well as the physical qualities of a man. He learns to keep his mind concentrated on the play, even in the most exciting moments; he learns to disregard bruises and bodily discomforts, and above all, he learns to keep his temper under the most trying conditions.

Each year shows a larger number of new men out to try for positions on the team, and a greater amount of enthusiasm among the students.

With the improved financial conditions that we expect in the near future, we will be enabled to employ a more competent and experienced coaching staff, and provide better training quarters for the men.

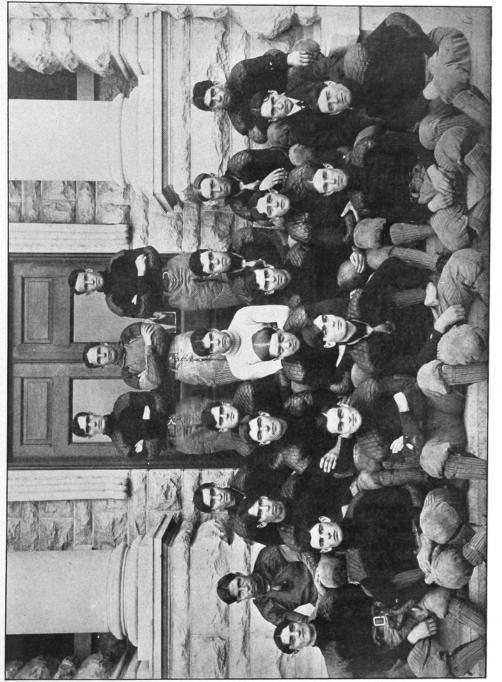

Each year sees a better schedule and our last year's schedule included the best teams in the state.

Here, as in no other department, is the need of a gymnasium felt; but the indications point to the fact that this may be remedied in the near future, and then our football team will stand second to none in the state.

The majority of this year's team will be back in their old positions next year, and lots of good material in sight, which, with the enthusiastic support of students and faculty, will undoubtedly give K. S. A. C. the best football team it has ever produced.

Our schedule for the fall of '05, under our efficient management, includes games with the best teams in the state.

With the passing of the '05 class, may the best of success attend the football teams of K. S. A. C.

BASE BALL.

Base ball in this institution is at present the most popular sport, and receives better financial support than any other kind of athletics. There are several reasons for this.

First: Anywhere in the United States where as many as two small boys can be gotten together, in conjunction with a yarn ball and a warm summer day, there you will find an embryo base ball game in progress. In fact, base ball is played everywhere, by the country lad or his playmate from the city. Hence we are on a par with other colleges in respect to the sources from which we draw our material.

Second: Base ball has been played more than any other game, hence is better understood and is more highly appreciated by all classes.

Third: The base ball season comes at that time of the year when everyone is eager to take the time to enjoy the sunshine and the ball game.

Ever since the minds of the '05's runneth not to the contrary, the base ball teams of K. S. A. C. have ranked second to none in the state. The season of '03 was the first year that our base ball team had been trained by a professional coach, and during this season but two inter-collegiate games were lost.

During the season of '04 we broke even, winning as many games as we lost.

Although the season of '05 is not more than half over, at the present writing we have won four out of seven college games. Among those who suffered defeat at the hands of our doughty stars of the diamond are included the University of Colorado and the University of Kansas.

Each game shows great improvement over the preceding one in batting, fielding, base running, team work, and individual headwork by every member of the team.

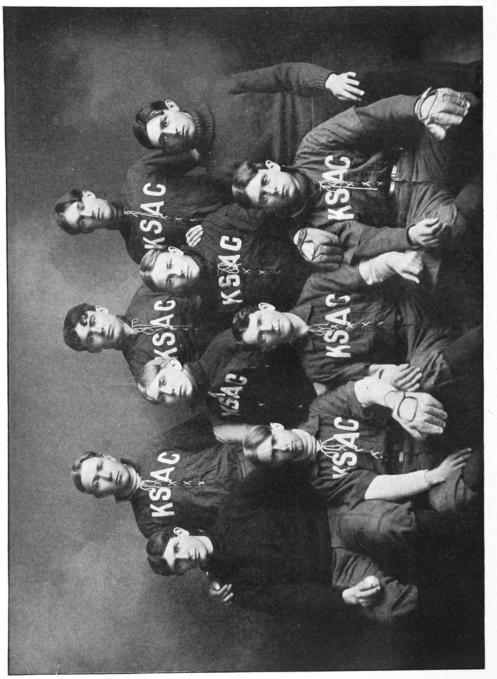

Under this year's efficient management our schedule is of the same high grade as formerly.

Our base ball future is very bright. All but two of this year's team will probably be back next year, and the management are at present carrying on a correspondence with the object in view of engaging one of the best coaches in the West for next year.

Here's to the base ball teams of the future. May they ever be victorious is the prayer of the class of '05.

SENIOR BASKET BALL TEAM

FINAL WORD.

For five months, seemingly so many years, we have been at work upon this modest effort. What was once an imaginary thing is now a reality and we are able to place before you the "Bell-Clapper," the only symbol of that notorious, nightly expedition which we can make public.

We frankly admit that we have never had any previous experience in this line and often battled against difficulties which it seemed almost impossible to overcome.

We have worked and we have worried, and long ago we became immune to that which we once knew—peaceful slumber.

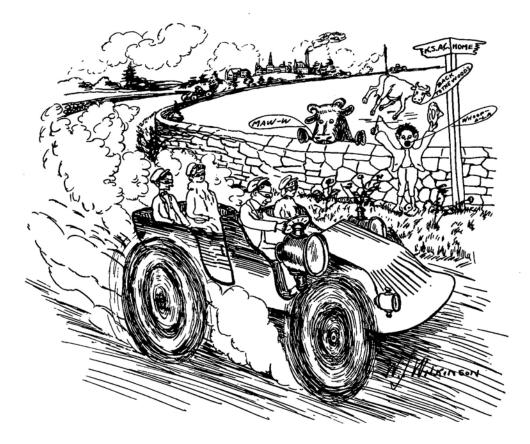

We expected to gather some knowledge outside the usual College curriculum—and we think we have; at least we have learned better than to try such a thing again. However, we have enjoyed it, and enjoyed it immensely, and you who have never had such experience will never know what delightfully exhilarating sensations you have missed. We feel sorry for you.

And now we travel along with just a parting word from "Little Billy Shakespeare" who seemed to express our feelings exactly:

> "Before an editor again we'd be We'd drown ourselves in the deep blue sea To some far off cannibal isle we'd flee And let the savages make hash of we."

> > THE EDITORS.

Introductory to Ads.

The Bell-Clapper Publishers give in the following pages a list of first-class business houses which are patronized by the College and the College students. And it is to these generous firms that we owe even more than our thanks, not only for the help in publishing the Bell-Clapper, but also for helping and taking an interest in other College enterprises.

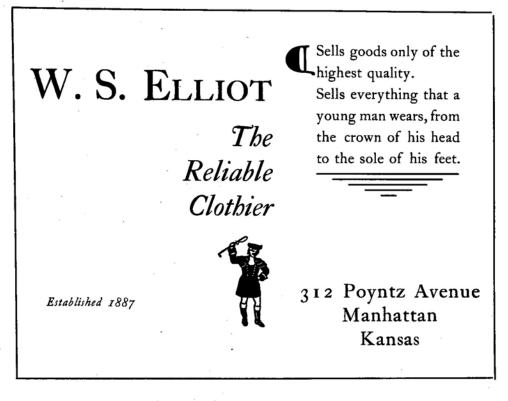

We, the Class Book Committee, therefore earnestly urge that this deserved patronage and recommendation be continued.

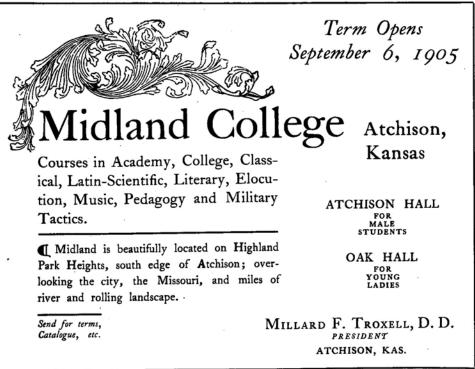

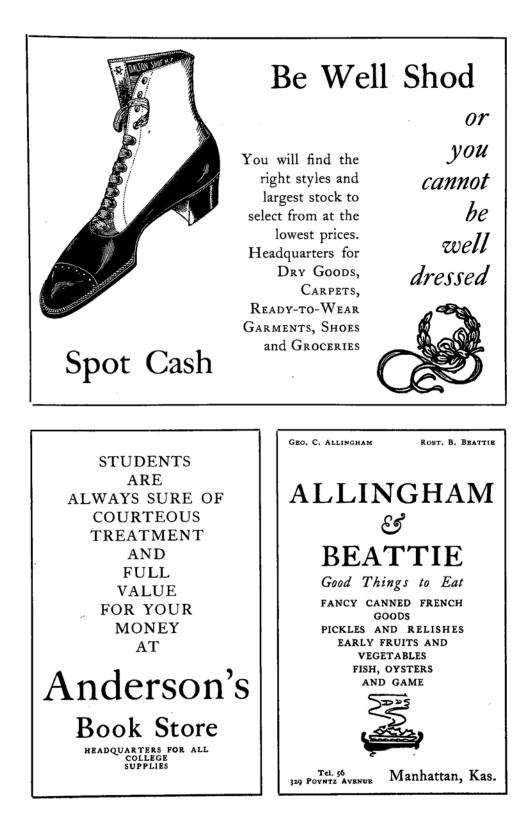

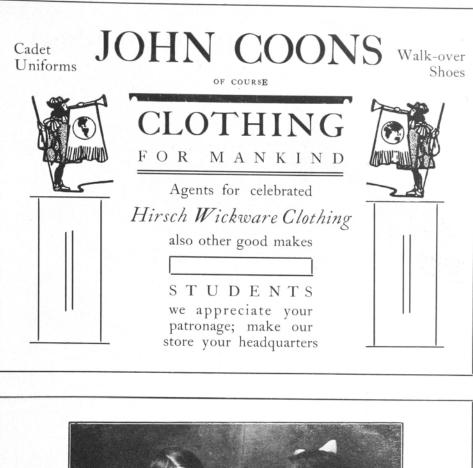

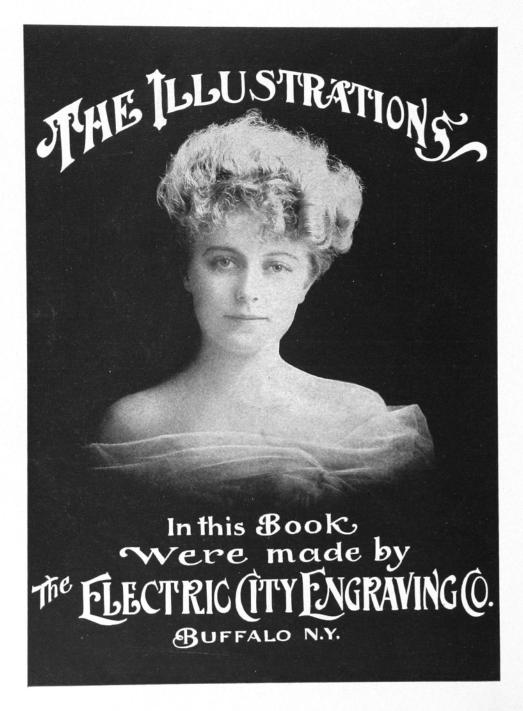

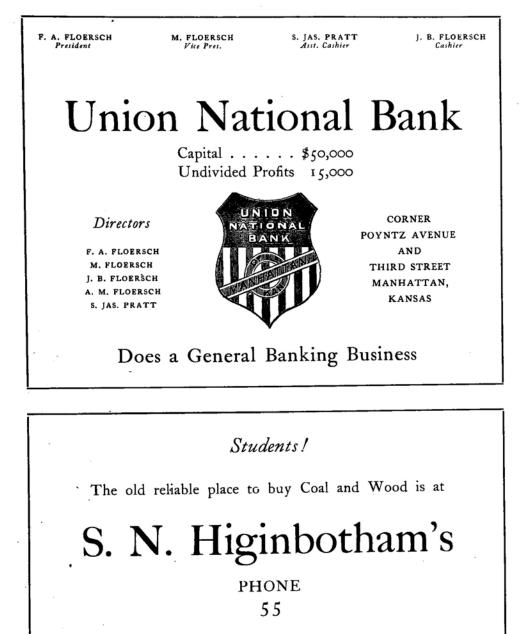

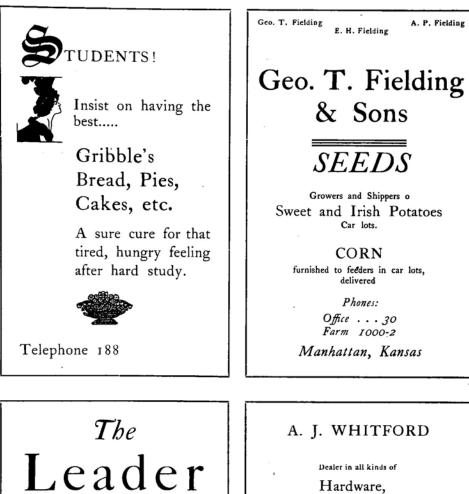

WILL WILL	Coal	He gives Full Weight. Stove, Heater, Cord Wood
-----------	------	--

The leading store for Dry Goods, Notions and Shoes. We buy and sell only for cash. Our motto is best goods, lowest prices. Special invitation to College Students.
