THE SPIRIT OF KARSAS,

The Prohibition Printing Company. Topeka, - - - Kansas Sixty Cents a Year in Advance. Or Two copies One Dollar,

The Spirit of Kansasaims to be a first class amily Journal, devoted to farm and home artairs, and to all industrial, social and moral interests that go to make up the greater part of our Western Life. It will be found useful to those engaged in any of the departments of rural labor. Its miscellany, original and selected, will be such as will interest and instruct. Its editorial page will treat of matters relating to our social, industrial, and political life, wherever and whenever the interests of the great working masses appear involved, and always from a broad, comprehensive, and independent standpoint. We shall endeavor to make a paper representing the great west. great west.
Our regular subscription price, for single subscibers will be 60 cents, or two copies \$1.00. Clubs of five or more 50 cents each.

Kansas an Objective Point in Political History.

BY J. C. HEBBARD.

NO. 4.

The year of 1874 marked something of a reformatory period in Kansas. Ex-Governor James M. Harvey, a Republican Granger, was elected to the United States Senate to fill the unexpired term of Alexander Caldwell; the "Independent Reformers' put a state ticket in the field; the Temperance element of the state met through delegates in sundry state conventions, and on September 20, they put a state ticket before the peo-

THE TENOR OF THEIR RESOLUTIONS. Their platform favored a national prohibitory liquor-law; repudiated the | 129; Woodson, 135; Morris, 126. licensing of crime and all men and parties who ignored the fact that there was an irrepressible conflict between the liquor interest and the best and highest interests of human society; it believed in the civil and political equality of all men and women, and of the legal prohibition of the manufacture, importation and sale of of all intoxicating liquors for beverage

THIRD PARTY VOTE IN 1874 AND IN 1884. The Temperance vote in Kansas in 1874, reached nearly 2300. In Butler county, Governor Osborne's vote was 18 less than was that of the Temperance candidate for Governor. Comparing this with the St. John 1884, which strictly speaking, might have been called the "Fourth Party" vote, the following is presented:

THE SPIRIT OF KANSAS.

For the Week Ending July 25 1885.

G. F. KIMBALL. EDITOR.

Entered in the Post Office in Topeka, for

We appeal to the great mass of Prohibition Republicans in Kansas. There are tens of thousands of them as true as steel to the principle of Prohibition.

But they cannot fathom the ways of the party politicians, and no state in this nation has more of political corruption and demagogism than this state of Kansas.

No wonder they deceive the people where people can be deceived and blinded at all by party machinations.

But they ought now to be able to see the worthlessness of the party machine that is only run to benefit a few political gormandizers.

The party is broken in the nation. The vase is shattered and the only attempt to cement the parts is in a whiskey plank in the Ohio platform.

Kansas leaders approve it. Your own party guides, like the State Capital, approve it. No further attempt is made to close the saloons in the rebellious portions of the state, perhaps for the reason that it does not make much difference whether they are closed or not.

You want honest prohibition. Your leaders do not. They want to maintain the party and you should care little indeed, for this, unless it be to serve the principles you endorse.

How does it strike you to see the Prohibition State Capital, Albert Griffin, and this class of men in whom you trusted, joining with the most violent Resubmissionists like the Leavenworth Times, Troy Chief, Junction City Union &c., in support of the new light from Ohio, under the direction of taxation and regulation.

Do you not think it safe to at least call a halt?

The evils of the present drugstore law are daily becoming more apparent. The enforcement of the law no longer means anything. There are now drugstores in this city, but little if anything, superior to the old saloon. Like them, they are lounging places for loafers and the nightly resorts of the vile. While the old reputable druggists, on Kansas Avenue report their sales by the dozen, there are plenty of drugstores on side streets and in obscure corners where sale are reported by hundreds, and where there is every reason to believe that unreported sales are made by thousands. It makes very little difference whether or not there is nominal enforcement of the law. The present law was never intended to be prohibitory in fact, and was really a fin, Jetmore and others, allowed the wool to be pulled over their eyes uutil one would think that by this time they would feel like whipped dogs.

The Kansas State Temperance Union is said to be in a state of decided unrest. This is one of the nonpartisan organizations of this state that exclaims, "God bless you," whenever the Republican party sneezes. There is not the willingness, even among the politicians, to pay in money for big salaries that obtained before the people learned the real nature of the perverted organization. Phillip Krohn seems to have withdrawn altogether, and, it is said, the curtain has been so lifted as to reveal the inconsistency of his connection with it. We also learn that President Kelley is sorely grieved at the outlook. The primal trouble is that the Union has lost its soul. The next annual meeting has been called for October 13-14.

'Gen. Grant's book is sold at \$3.50 a volume, or \$7.00 for the two, and from that up. Neither volume will contain as much matter as many books selling for one dollar. The book has been widely noticed and will of course have a great sale. A very poor mouth has been made over it, for advertising purposes, because of the alleged large percentage that will go to Gen. Grant. The fact is, the book is enormously high in price, for the quantiby of reading in it, and the publishers get their proportionate profit, and the people, as usual, pay for it.

Probably a flea has dropped into the ear of the Capital. It has not for three days had an argument in favor of the Ohio Republican idea of regulation and taxation.

cyclone a brewing in Ohio. Kansas and the Topeka Capital has been won must wake up.

WONDERFUL UNANIMITY.

What Means It?

Ex-Senator Pomeroy, now of Washmissioners. Among other things he says he was last year nominated at by making the way clear for him, which made Cleveland's election pos-

It is true that Pomeroy was for St. John. He had been nominated by the Anti Secret Society party, which not as a prohibition candidate that he eroy did have something to do with St. John's nomination. He was at the Pittsburgh Convention, and there St. John was nominated, and he did

We certainly approve of all this, and we further trust that Mr. Pomeroy will receive the recognition of the President.

But the very remarkable feature of A. Martin, sJudge Horton and Johnson and other leading Republicans of flag of peace and union. this state endorsed the application of Pomeroy and sent on to Judge John Martin, in Washington, a paper to be resented to the President, which Judge Martin gives as follows:

"Mr. President: Having learned that you are about to appoint a com-missioner for the District of Columbia and ex-Senator Pomerov's name having been mentioned in that connection, we wish to express to you our high opinion of Mr. Pomeroy, and our sense of his fitness for such a position. Having known him well as the former senator from this state, we do not hesitate to represent him as a man of high intellectual and social qualifications, and exceptional executive ability. He is a resident of the district, and by reason of his business ability and political knowledge is a most fitting man for the appointment. Besides, such action on your part would be considered an honor to our state," etc.

In answer to a question, Judge Martin says:

"I presented this paper to the President at the same time making complimentary reference to the high personal standing and excellent exec-utive ability of Mr. Pomeroy, which my acquaintance with him enables me to do."

₩ Here is most wonderful progress. It is St. John's most complete triumph Here is the best representative of the Kansas Democracy, joining hands with the leading Republicans of the state, Gov. Martin, Judges of the Supreme Court and others whose names are not yet stated, all uniting in vinappointment to office of Pomeroy who was present at the Pittsburg convention, favoring the nomination of St.

We are certainly rejoised to see these leading Republicans stand by was for St. John.

But Legate told the editor of this paper, the Saturday before the Pittsburg Convention, that St. John declined to be a candidate, showing a clined to be a candidate, showing a Each county was asked to contri-despatch to that effect, and despon-dently added, that if "We can not for St. John last fall, as a campaign on our backs in Kansas."

Strange as it appears, Legate was bought off and turned against St. John by an obscure appointment, and led to oppose his election. Now the same Republicans would reward Pomeroy for remaining true to St.

I leave the purpose of the purpose

Kansas Republicanism is mighty hard to understand.

Osage county is organizing for business. It will come up this fall as one of th strongest prohibition counties in the state. At Lyndon, Scranties in the state. At Lyndon, Scranties in the state. ties in the state. At Lyndon, Soranton, Osage City, Burlingame, Quenemo, and other points, Third Party response on the part of all who mean to show their faith in Prohibition principles, by their works.

Horton and republicans like Jetmore and Griffin recommending Pomeroy for office, when he supported St. John. Do these men want to make peace with the prohibitionists?

The Toledo Blade thinks it can The Toledo Blade thinks it can Do you?

There is evidently a prohibition pulverize the Rum Power by taxation In behalf of the State Committee, over to that idea.

- Millians Mill Was No

It is a fact not generally known that a southern slaveholding state furnished the largest proportionate number of men to the Union Army, ington, wants President Cleveland to during the war of the Rebellion. Of its population liable to military ser-lowed. One was of a boy who was of the company of the com make him one of the District-Com- its population liable to military ser-Chicago as a prohibition candidate 273. Of the other states Indiana led for president and that he declined to the way with 74 percent; Kansas sent run, in the interest of St. John, there- 72 percent; Kentucky, 44; Maryland, 49; Missouri, 47, while Massachusetts and Vermont only sent 58, and Illinois and Ohio 69 percent. Lincoln had in all the southern states but 26,430 votes, but they sent 338,327 soldiers to the Union Army. Of the men who had endorsed prohibition, but it was fought against the Union, it may be said only a very small portion were in was nominated. Still, Senator Pom- favor of destroying the Union. Probably no instance is on record where an equally small number of desperate leaders ever dragooned such a announced his purpose to withdraw if force into a service at which it revolted whenever it was made to understand the true issues at stake. The greatest blessing that can now come to this nation will be a perfect understanding between the north and south, and this can never come under the domination of either the Republithis affair is the fact that Gov. John can or Democratic parties. The Prohibition party only carries the white

Whiskey is king in Dodge City. Griffin and Jetmore made a great spurige, and threatened to enforce the law, but Gov. Martin did not order out the militia, while the cowboys ordered those two worthies to get up ordered those two worthies to get up the toiling poor who had no redress, and dust and they did it. Nothing and who would submit to almost any further has been done in Leavenworth since the rummies of that town gave Dr. Krohn the same advice. Still, it is very doubful if the saloons of those towns are much worse than the drug stores of Topeka. Gov. Martin probably realizes this and hardly thinks it worth the powder to merely change the method of selling whiskey simply to conform to a law that was never intended to be prohibitory. On the other hand, the whiskey men of these rebellious towns are nothing more than contumacious. They do not want the name of yeilding although are aware that it would not be difficult to transform their groggeries into reputable drugstores.

"When you see a sham," said Carlyle, "smite it, smite it." The greatest sham of this day is Republican Prohibition. Drug store saloons in Kansas, and taxation and regulation

Who Will Help Us.

We want to organize Kansas on a Prohibition basis. We need not only a Prohibition Platform, but a thoroughly organized Party to stand dication of St. John and urging the on it, and work out its principles. We appointment to office of Pomerov who of a Party organization, but we have no adequate means for getting our principles before the people, and enlisting their active co-operation. We prohibitory in fact, and was really a weakening of the old statute. It was simply a policy law intended to bring prohibition into reproach. And Grifford prohibition into reproach prohi What does this mean? Have the Republican party leaders, who, not more than eight months ago, looked so complaently upon St. John's like the Republican party leaders, who, not would be complainted to the photographic energy of terror and have been organized and conventions and conventions and conventions are not the photographic energy of terror and the field to themselves ever since."

"the most successful stars I ever knew wrongs make no such lasting impression. They are much more easily form the photographic energy of terror and the field to themselves ever since."

"the most successful stars I ever knew wrongs make no such lasting impression. They are much more easily form the photographic energy of terror and the photographic energy of so complacently upon St. John's have been organized and conventions burning effigy in this city, have they held in several counties, and in three burning effigy in this city, have they or four Congregational districts. seen the errors of their ways, and are they now bringing forth meet for repentance?

We are certainly rejoised to see shall make a regular canvass for this

direction of the Executive Committee. We are having frequent calls for Prohibition Documents, our Platform of Principles, Plan of Organization &c,

Do not wait for the personal solisitation of an agent, or lecturer, but let it be a spontaneous, free-will offering. Your action will decide the question whether we shall push the work of organizing our State and carrying our principles to the polls. Let every one do something, give what you can, and do it now! We "mean business!"

CRUELTY IN SCHOOLS. Recompense That Follows Inhu Treatment in the Public 8 Three instances of cruelty in the schools have at separate times come to us, with the recompense which foltime went into the war, where after long and brave service he returned home to die, of a wound. His greatest struggle in preparing for death was to forgive the tyrant of the school. Years had gone by but the memory of that wrong, when it flashed into his mind, sent the blood again to his brow, and he prayed and struggled against it. The teacher and all around knew about the dying youth's sorest temptation, and what regret and remorse that the dying youth's sorest temptation, and what regret and remorse that teacher felt, knowing that the sting of his cruel whip had tortured a poor soul even to his grave. Another case was of a little girl, through whose tender shoulders the whip cut and stained her dress with blood. She grow up with the same hitter recolled. grew up with the same bitter recollec-tion; and finding no other way to over come and efface it, she became that man's benefactor through many a sore trait, though he seemed destitute of repentance or remorse. Another case was of a boy both of whose hands were bruised and lacerated, by a burly teacher, so severely the discreet mother deemed that prudent to conceal the wrong from the father, lest worse violence should come of it. More than a decade and a hali of years passed away and the teacher and the scholar met—happily surrounded by immediate social restraints.

The situation in the school-room was now reversed. The fear and trembling, the bowed head and quailing heart were transferred to the tyrant of long ago, as he heard his cruelties and character in the years past minutely set forth to him—how he had brutally cago Herald. beaten and oppressed the children of wrong for the purpose of securing a little education, and who were thus wholly at his mercy, or rather the reverse of mercy. In these and in other instances there is one consideration that should be remarked and deeply pondered. In the cases of the two boys referred to, they each said that the whole scene was more vividly im-pressed on their memories than anything in the experience of their lives. The cruel eye and brow, and the ferocious lips, as the blows fell, were branded in the memory, and were utterly ineffaceable. That countenance as it then was would be called up, vivid as life, by any associated memory, and its glare would set the blood on fire. It was not its that the blood on the state of the in either case a cherished revenge, but

a dreadful reminder, a recurrence of the old scene of cruelty, with every minute detail, to the mind. Doubtless many, possibly all, of our readers have some such pictures of terror or pain, from one or another cause, in their memories. There is a profound warnmemories. There is a protound warning in this fact, especially to parents, to beware of punishing their children in anger. If done in grief and love, the grief and love of the parent will never be forgotten, but be a perpetual influence for good to the corrected child. Much less if done in anger will the argent every be forgotten. It is "A LITTLE NONSENSE." the anger ever be forgotten. It is probable that the larger—perhaps nearly all—the element of revenge is -N. Y. Independent.

preserved by those mental photographs. blesse, sa. Saying which with many a bow and many a scrape, Tom would most probably take himself off in the direction of the "quarters."-Atlanta Con-

VENAL COACHMEN.

The Experience of a Farmer in Selling Carriage Horses

An honest, sturdy Scotch farmer, who lives in one of the upper counties of the State; was recently telling of the many annoyances he met with in selling carriage horses to wealthy people in this city. Said he: "I make a business of raising fine carriage horses, of as handsome form and color, and as closely mated as possible. Consequently my best trade is in New York among the rich classes. But the trouble is I have to deal generally with coachmen, either entirely or in part, and the latter always want to make a good sum for themselves. They generally ask outright for twenty-five or fifty dollars for their influence in making the trade. As their employer is often a lady or some gentleman not an expert in horses, the coachman not an expert in horses, the coachman has a great deal to say about the purchase. Now, I am not a mean fellow, and I am willing to give a coachman a decent tip on a sale. But only the other day I sold a team to a gentleman, dealing directly with him, and owing no ing directly with him, and owing no favors to the coachman. But this lat-ter worthy approached me after the sale was concluded and wanted to know if I was not going to 'do some-thing.' Well I gave him ten dollars, a thing.' Well I gave him ten dollars, a great deal more than I ought, but he looked rather blank and repeated:

'Ain't ye goin' to do suthin?'

I told him that if he didn't consider ten dollars worth taking he consider it back. But he walked off muttering that I was a blanked mean cuss, etc. Of course, he was an unusual hog, for there are very decent fellows among the coachmen. But there are others who, if you do not fee them well, will make a team sick, or drive nails in their feet to lame them, in order to create dissatisfaction with the sale. They will tell their employer to trust them to buy the horses next time."—
N. Y. Tribune.

BICYCLISTS.

Their Unsociability and the Expediency of

Certain Improvements.

The bicycle has doubtless become one of the greatest promoters of healthy out-door exercise among our young men, as well as some of the older ones-but there is necessarily nothing social in it, in fact it is the most selfish conception possible. Think of a family man buying a bicycle and starting off to ride while the wife and children are left at home on the verandal and administration of the control of the c dah to admire the grace and ease with which their lord and master wheels off to get exhibitating whiffs of fresh country air. The economical young man mounts his wheel on a fine after-She had but recently arrived from the "owld country," and being sent out in front of the house to water a large bed of crimson petunias, the following conversation took place between herself and the youngest son and heir: "I say, Bridget, what's the name of those flowers?" "Shure, now, I don't like to tell ye. 'Tisn't a noice name they have at all, dear; for 'twas up at the house I heard your own mother calling thim spitunias."—Harper's Bazar.

—A San Antonio darkey was on trial noon, and whirls off to the residence of his lady love, leans his steed against the front fence, and spends the summer evening on the piazza, while the young lady is no doubt thinking of her possibly old-fashioned but more fortunate companion who has gone out on the road behind a good trotter, to breathe the refreshing evening air. The one wheel is far more economical in every way and its enthusiastic if

The National Camp Meeting.

The National Prohibition Camp meeting will be held in Forest Park Ottawa instead of Bismarck Grove. Lawrence, as at first contemplated. It will be held from the 20th to the 30th of August, and the 25th will be given to the Prohibitionists of Kansas for a State Convention at which a more thorough state organization will be made, according to plans that may be presented and agreed upon.

The Camp Meeting will be under the auspices of the National Association and eminent speakers will be present during the whole ten days, among them the Rev. W. H. Boole, of New York City, and his wife, both very noted and eloquent camp-meet. ing speakers. Jesse Harper, the Illinois temperance orator will be present and also Dr. Adams of the Weslyan University at Bloomington Ill.

New York has a most complete Prohibition party organization, and will this year put tickets in the field in every county in the state. A mammoth state convention will be held in a hall seating 4,000 people and the demand for more room is already felt No such political enthusiasm has ever been known in an "off year" since the Lincoln and Douglass campaign in 1858, as is now developing in Ohio and New York. It presages another political revolution.

Dr. Leonard, the Prohibition candidate for Governor of Ohio, is drawng hosts to his support. Two weeks ago 50,000 was considered an over estimate of his vote. Now the National American—whiskey organ—conal American—whiskey organ—conal and the totall, and this the dealer defined to the clared to the clared to be occasioned by a cough. "There is no cure for that fish," he said. "I keep it here more as a warning the composed of old styles, made else. After telling them plainly just cedes to him that number.

FRANK LESLIE'S SUNDAY MAGAZINE for August is bright and sparkling. The leading article is "American Missionaries in Mexico." If the writer, Emily Pierce, is sure of her facts, it is creditable record. Another of Christ's Parables, and two sacred Musicians, appear in this number. "The First Missions in California," with illustrations, is a very interesting article; Dr. Talmage's sermon is on "Lefthanded Men." A readable article on Lowell with his portrait and copious extracts from his poems. Also an article on John Ruskin, with portrait. "Glances at Bible History" is devoted to King Solomon, and brings the subject to the end of his reign.
The eccentric Georgia evangelist, the Rev. Sam. Jones, is given a portrait and biographical sketch; and there are also portraits of Dean Smith, of Canterbury, and Bishop Ellicott both of the Bible Revision Companies. "Love's Harvest," by B. L. Farjeon, and." What She Made of Her Life," by Lydia Hoyt Farmer-are continued, and shorter articles are abundant Mrs. Frank Leslie, 53, 55 and 57 Park Place, New York City, at 25 cents

HIGH ART IN NECKTIES.

How They Are Made and Sold—Special Grades and Fabrics Designed for Neck-

"There are special grades and designs of silks and satins made excluwho do nothing else than study up come and see it right away." new things in neckties. The goods are of heavier quality than dress silks and of patterns which never find their way into any other branch of trade. For these reasons they are higher in price than ordinary goods. Samples are sent by the makers to New York for the inspection of buyers. I go to New York to look at new designs about once every two months. There are from fifty to seventy-five necktie factories in this country and ten or factories in twelve first-class makers. The latter usually secure exclusive right to use certain styles of goods from the makers by buying either the entire makers by buying either the entire stock offered to the American market or a large quantity of it. But the success of making up the goods is just like a lottery ticket. Perhaps one year I may make a hit on some particular design and it will become so popular that all the other makers will be forced to adopt it. But the next season some one in Boston or New York may make the hit and I will have to follow him. the hit and I will have to follow him.
There's never any telling how a necktie is going to take with the public until it is put on the market. Then its
success may depend altogether on who
adopts it first. If he happens to be a
howling swell, and on the right side of

popular favor, that particular necktie will sell like all possessed." "Are the styles of making up neck-"Are the styles of making up neckties originated abroad?"

"Not now. They were until less than three years ago, but our styles are so much superior to the European now that they are coming over here to get patterns. However, there is a tendency to English fashions for the fall. They are like this," he continued, taking a couple of ties from a box. "Dreadfully flat and square in shape, you see. They have a genuine 'Johnny Bull' appearance, and won't stay very long in favor on this side of the Atlantic. The four-in-hand' tie and scarf are the most fashionable neck-wear at present. The fashionable neck-wear at present. The four-in-hand' searf of plain white pegrie will be much worn during the warm weather. No scarf pins are worn with these two styles, and only the smallest and least conspicuous with

any kind. Scarfs of white pongee are very desirable for evening wear."

"Are men or women employed to make up neck-ties?" "Oh, women. There are eight hundred girls working at this business in

"They work by the piece and make more or less money, according to their expertness. A good finisher can make eight or nine dollars a week. She takes a necktie after it is put together and finishes every detail perfectly, so that it is ready to box. Three different colors of the same design, made in the same style, are boxed together to give a dealer an assortment in the one make. The finisher must see that all of this kind are exactly alike in point of finish and make-up. We have one of finish and make-up. We have one girl who does nothing but turn the bands of neck-ties and who makes fifteen dollars a week. She is capable of turning twenty-five or thirty dozen bands each day. Other girls who are

A VALUABLE DOG.

How a Sleek Young Man Played it on a Lot of Street Loafers.

Yesterday afternoon, about three o'clock, a dog with a tin kettle tied to when he is nominated to a lucrative position. He took it as a matter of course. There was a tall, sleek-looking young man standing near a crowd on the sidewalk. He looked intently at the dog for a moment, and then exclaimed:

Park Place, New York City, at 25 cents a number, or \$2.50 a year.

Ballou's Magazine for August is a capital number. There is an illustrated article on Germany and Chili and its glaciers. Then comes "Lewey and I." the scene in California during the Mexican war. The two boys serve in the Mexican cavalry for a short time, have wonderful adventures in California with Indians, mountain lions and ladrones; are arrested on a charge of horse stealing, acquitted after a hearing, and have some narrow escapes.

It is a fascinating story, and is historically correct. Ballou's is published by Thomes & Talbot, 23 Hawley St., Boston, at \$1.50 per year, or only 15 cents single copies. Ask your newdealer to order it for you. You won't regret it.

The Insane Dodge in murder cuses is becoming so very common it may be expected any minute that some bright lawyer will spring up and declare that they were losing color and appetite. The trouble was capital number. There was a tall, sleek-look ing young man standing near a crowd in the sidewalk. He looked intently at the dog for a moment, and then exclamed it the dog for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, and then exclamed it the day for a moment, an

SICK FISH.

The Ailments of the Aquarium's Golden Ornaments—How Most Owners Kill Them With Kindness

"Please sir, our gold-fish is sick," cried a little girl the other morning, sively for the necktie trade," said a as she hurried breathlessly into one of manufacturer. "These materials are the best known gold-fish emporiums in made from patterns designed by men the city, "and mother wants you to

The fish-dealer smiled at the girl's excitement.

"What seems to be the matter with it 211 he asked "It's sick. It won't eat anything,

and it is turning white, and won't swim around any more."
"All right; I will be there presently," and the little girl, apparently satisfied,

took her departure.

"Is doctoring fishes a part of your regular business?" asked the surprised

enquirer.
"Yes, indeed. In fact, I might say
that I have a gold-fish hospital here at my place of business just now. All of those tanks on the south side of the room contain sick fishes. The gold-fish is naturally a hardy animal—much more apt to live for years in aquaria than the common pond varieties, be-cause life in captivity has become sec-ond nature with the race. But people will not give their gold-fish half a chance. They feed them too much. Every case of disease in the tanks is directly traceable to overfeeding. But do not misunderstand me, please; the fish do not eat too much, they are merely given too much to eat."

"That seems to be a distinction without a difference."
"Not at all. Unlike a human being, a gold-fish will not eat more than is good for it, and when too much food is

ium which does not contain tadpoles or snails is sure, sooner or later, to need a visit from the fish-doctor. need a visit from the Now, let me show you a fish suffering

with consumption At the extreme right of the row of At the extende right of the town of hospital tanks was one mounted on an iron frame, and containing about two gallons of water. It contained a single fish, which was resting near the bottom of the tank, with its head held much lower than its tail. To an un-practiced eye it was evidently a very sick fish. Its body, instead of being plump and of an even contour, was as emaciated as a dried herring and the rich vermillion color of the average gold fish had faded into a sickly pink. Its fins were half drawn in toward the fish's body, and seemed to be glued inusu s body, and seemed to be glued into a fixed position by a gummy, slimy substance which covered them.
"Do you see it cough?" asked the fish dealer.
"No."

"Well, watch it closely for a minute or two, and you will see what I mean." The fish began moving about slowly and feebly, occasionally stopping to brush it's gills against the stalk of a plant growing in the water, as though endeavoring to brush away some obnot so expert may not make more than three or four dollars a week and from that up to nine dollars." struction. At these pauses a convul-

market is composed of old styles, made of poor goods, which the cheap trade in New York has succeeded in buying up and sending all over the country. A good, well-made necktie costs from fifty cents to one dollar and a half. As nice a one as any man needs can be bought for seventy-five cents. As a bought for seventy-five cents. As a disease of the gills is not always control of the property of the gills is not always control of the gills is not always given the gills is not always given the given in New York has succeeded in buying their fish, I bring them back here and let them see the effects of disregarding what I say. Impure water affects the given is the given in New York has succeeded in buying the fish, I bring them back here and let them see the effects of disregarding what I say. Impure water affects the given is the given in New York has succeeded in buying the fish, I bring them back here and let them see the effects of disregarding what I say. Impure water affects the given is the given in New York has a given in New York h

window, see a tie that takes their fancy, and then rush in to buy it, never stopping to ask the price. Thus, they are as apt to buy one of the cheap kind that will not look well a week as one of better quality. So there's lots of these low-priced goods being sold, and business is consequently dull just now. A good necktie is the result of art and study. It can't be turned out for a song."—Chicago News.

"In the next tank we have a couple of common gold-fish in the first stages of asphyxia, which is perhaps the most common form of disease, and one most easily treated if taken in time. But most people are so obtuse that they have no idea their fish is sick until the case is too far gone for cure; and even if they do discover the illness in time and call me in they fail to follow my directions to the letter, and in consequence the fish dies. It was on account quence the fish dies. It was on account of this last fact that I originated my gold-fish hospital. Now when I am called to a sick fish, instead of pre-scribing for it, if the case is curable, I immediately dip it out of the aquari-um, place it in my bucket and carry it his wagging machinery was observed on an Austin street. The dog did not what it needs, which is plenty of pure

FOUR NEW SUPREME JUDGES.

A Glance at the Men Who Are to Retire During this Presidential term four of the Judges of the Supreme Court will reach the age of seventy years," at which time the law entitles them to retire with salary. If they take advantage of brushes would fill a column in this this Cleveland will have the appointment of three new Supreme Judges and one Chief Justice. Justice Bradley's term expires first, and he is already old enough to entitle him to will be seventy years old in November, 1866, and Justice Miller will be seventy

on the 6th of April of that year.

Justice Bradley will retire with a fortune. He is worth over half a million and he has one of the finest libraries in Washington. He has been on the Supreme Bench since 1870, and had made a fortune as a railroad lawyer before that. Like many great lawyers his hobby is mathematics, and he works out geometric problems for recreation. Bradley, it was said, was intended for the ministry. His father was a farmer, but he was well enough off to send him to Rutgers College, where he graduated in the same class with the late Secretary Frelinghuysen. Though he is seventy years old, he looks younger, and will probaby be able to follow the present fashion and complete a book of reminiscences be-

fore he dies.

Justice Miller has been upon the He was an Iowa lawyer when Lincoln He was an lowa lawyer when Lincoln appointed him, twenty-three years ago, and he has maintained the reputation since then of being one of the most able Judges connected with the Supreme Court. He is well enough off to retire, too, and he ought to be, for his salary on the bench will at the time

his salary on the bench will at the time of his retirement amount to two hundred and forty thousand dollars. He has a good sound frame for his age, and he must weigh about three hundred pounds light. He has a semi-bald, smoothly shaped head, a baby face as to softness of outline and rosiness of complexion and he looks for all the complexion, and he looks for all the world like a mammoth reproduction of Dickens' fat boy thinking of some grave

Justice Field lives in what was the old Capitol prison, in the block which they talk of tearing down and erecting the new library building in its place. Justice Field has been on the bench Justice Field has been on the bench for nearly a generation, and it is twenty-eight years since he took his seat there as one of the Supreme Judges of California. Judge Field was a lively young fellow in those days, and I doubt not he was ready to defend his decisions with his pistol as he was in his career in the California Legislature shortly before this. Now he is older shortly before this. Now he is older and more sober. He is one of the broadest and most learned men in public life. He travels clear across the public life. He travels clear across the country every year in attendance to his judicial duties, and his salary barely pays his expenses. He is not poor, however, His brother Cyrus has had so many opportunities to make his friends wealthy by giving them good pointers that it is hardly probable that his brother Stephen would be left. Judge Field entertains well, and his Judge Field entertains well, and his house is always full of company. He will probably continue to live at Wash-He

ington after his retirement.
Chief Justice Waite will soon leave America for England. Mr. Waite is much better now than he was several months ago, and this trip will result probably in the entire recovery of his health. He is now sixty-nine years of age and has only one more year to serve before he has the right to go on the retired list. I saw him on the street yesterday. A very dark man with an iron-gray beard, which hangs down upon his chest. He has a kindly face, an intellectual brow and a thick growth of iron-gray hair. He is one of the examples of men who have risen to the highest honors of the United States by sticking closely to their profession and not bothering with politics.

—"Carp," in Cleveland Leader.

A SPLENDID OBSERVATORY.

The Present Condition of the Lick Telescope—When it Will be Completed.

On the summit of Mount Hamilton

in California will be found a splendid observatory, which is only awaiting a great telescope to be ready for use-This observatory was brought into existence by the will of an eccentric Califonia millionaire named Lick. This Heaven-observing institution would now be in practical operation were it not for the unfortunate failure of the glass makers to produce a piece of crown glass of the size and perfection required for the objective of the telescope. It is now reported that the new management of the firm of Feil, of Paris, has already overcome the diffi-culties incident to the making of the culties incident to the making of the great disc; and if no accident shall happen, it is to be expected that the Clarks of Cambridgeport will have begun their work of figuring it before the end of the coming summer. The length of time which this operation will consume is uncertain, but two years is a reasonable allowance. The dome meantime will be built sayenty. dome, meantime, will be built seventy six feet in exterior diameter, a size cer tainly large enough to cover the thirty-six-inch telescope. The excavations for this structure in the solid rock of the mountain are already under way, and the director of works expects to complete its main walls during the coming summer, while the season of 1886 will suffice for the addition of the superstructure or dome proper. Simultaneously with the optician's work upon the glass discs, the equally important problem of the most suitable mounting for the telescope will be attacked, and all the intricate mechanism required for its convenient use will be constructed and put in place underneath the dome, so as to receive underneath the dome, so as to receive the great glass and make its use possible as soon as the optician's work is complete. It may confidently be expected that this important event in the history of astronomy, marking the completion of the first mountain observatory, will not be delayed beyond the autumn of 1887.—Demorest's Monthly. BRUSHES.

How They Are Manufactured and of What They Are Composed. There is not a household convenience or a personal implement that is of more importance than the brush, and its name is many; a catalogue of different paper. Yet few know how a brush is made and of what it is composed. It has been supposed by some that split whalebone-which is only another form of hair or horn-was used as a retirement. Justices Field and Waite cheap substitute for bristles, and readers of forty or fifty years old will remember that black bristled brushes were avoided, and only white ones were salable. In fact, however, whale bone is much more costly than bristles, and is only used for special brushes.

And even the bristle supply is be-coming costly and scarce. Hereaway coming costly and scarce. Hereaway we raise no more bristled hogs; most of them have a coating of soft hairs sparsely distributed, and some of the finer sorts have a curly wool. Even the Southern hogs, which self-fared in the words are divined and a higher the woods, are dying out, and a higher type of the class Sus is taking their place. Nearly all the bristles that are used in this country come from Russia, and they cost the brush makes from one dollar and a quarter to three dollars a pound. They come tied up in neat rolls, and assorted as to

lengths and stiffness.

Horse hair is largely used for brushes; there is no material that will so finely preme Bench since 1862, and he is the oldest Justice in point of service there. horse hair brushes. Horse hair makes the soft brushes for plush, velvet, and for the silk hat makers.

The vegetable kingdom is largely drawn upon for brush material. To say nothing of brooms, there is a grass called Tampico, from the place of its exportation, that is used for hand scrubbing brushes. It is a round fiber of light straw color, quite tough and elastic, and possessing the unusual quality of retaining its rigidity and elasticity however much soaked it may be in wa-

ter.

Flattened steel wire, with the temper in, is used for fine cleaning brushes and for street and stable use. These are so coarse and rigid that they would be better designated as scrapers.

But there is a wire brush that is the

very opposite of these. It is made of steel or brass wire that is so very fine steel or brass wire that is so very line that it goes quite beyond the finest gauge made in this country. It goes to what is known to the trade as forty-four English gauge. Brushes made from this are employed in the production of a peculiar finish on silver. When silver is used in plate, whether it is solid or an external deposit, it is presented by particular or property of the production of the producti not often compressed, or hardened, by any mechanical means, except when it is burnished to make a polish. The "satin finish" of plate and silver ornaments, so much admired of late years, is produced by these brushes of fine steel and brass wire. The brushes are rotary, and are run at a high velocity. The effect of their action on the soft surface of silver is to raise the particles so that they will not reflect the light as a polished surface will, but give a soft, relvaty, refractive light to the eye. This elegant effect is produced by the soft wire brushes that feel under the hand almost like cylinders of down.

The common way of fastening bristles and hairs and Tampico grass in brushes is with common pitch, which is kept hot at a convenient bench, and is kept fluid by the admixture of a little tallow. The workman grasps from bunch or pile of bristles a few in his fingers, doubles them over at the middle, winds a bit of fine twine about the pitch, and presses the bunch in a hole in the wooden back of the brush to be. But a better process is wiring or twining; in either case the looped butt or bend, dips that end in the hot

brush being held by a wire or twine that passes through a small hole in the back of the larger hole that receives the bristles. But, as all these wires or strings are seen on the back of the brush, they must be concealed by a false back for nice work.

The writer has a specimen with a solid back that was made more than fifteen years ago. In this the bristles, doubled, were led by a wire staple into the holes, and the ends of the staple the notes, and the ends of the staple being crossed by a die, the wire was forced into the wood by a plunger, and really locked in the solid material. The brush has been in constant use during all these years and is "as good as new."—Scientific American.

Why She Applauded.

Seated to the right of me at a place of amusement was a lady whose interest was not aroused till a thin, disconsolate-looking girl made her appearance. Then she began to applaud furiously. As I could observe no pos-sible occasion for such manifestations, I felt surprised; but, as she kept up the manifestation all the evening, and seemed to have no assistance from any of the audience, I took a hand, as they

say, and also began applauding the thin, disconsolate-looking girl.

My good nature, however, bore, as good nature often does, bitter fruit.

The lady turned and said:

"What are you applauding for?"
I stammered an insufficient answer.
"You don't think she does well, do you?" she continued.

"She's awkward and she can't sing,

"She's awkward and she can't sing," said she, contemptuously.

I had time to recover myself.
"Might I ask," I said, with conscious dignity, "why, madam, if such is the case, you are so enthusiastic?"
"She owes me nine dollars and thirty-five cents," said my neighbor, with scorn and asperity; "and if this here show don't succeed, I'll be that much out."

Selfishness is indeed the occasion of much strange conduct in life, and often explains what seems inexplicable.—

Music and Drama.

Remains of gigantic birds lately discovered in the Thames Valley, show, according to Mr. G. E. T. Newton, of the London Zoological Society, that England was once inhabited by birds as large as the famous Moa, of New Zealand, or much larger than the ostriches now existing.

A RAILWAY REGIMENT.

Description of the Railway Corps of the German Empi

The Railway Corps of the German Empire consists of a Prussian regiment and a Bavarian company, the latter being precisely like a Prussian company in every respect. The Prussian Railway Regiment (das Eisenbahn Regiment) is organized in a regimental staff and two battalions of tour companies each. A company in peace time consists of four officers, eighteen non-commissioned officers and one hundred privates. The regiment is for excellent reasons, for all purposes of training, placed immediately under the general staff. It is only by being constantly in immediate contact with the best and most selected officers of the German Army that the officers of the Railway Corps can be expected to know and learn what is required of them. They are thus able to know the slightest are thus able to know the significant lateration taking place in German and foreign railway matters, as well as every change or innovation in foreign armies. They have, moreover, immediate access to men in high authority, and can thus at once make known their lides in quarters where they can take and can thus at once make known their ideas in quarters where they can take effect without delay. The materiel given to the Prussian Railway Regiment is very considerable, and is a striking contrast to the parsimony in the use and expenditure of stores generally practiced in the German service, thus showing the great importance at-tached to the efficient training of this new branch of the army. The or this new branch or the army. Increasing the regiment, in fact, actually possesses and works by itself a line from Berlin to the artillery practice ground near Lutterbach, some thirty English miles Lutterbach, some thirty English miles long. It has been given in addition a large practice ground, with every facility for training recruits. Here the latter are taught laying sleepers, rails and telegraph wires, destroying and repairing lines and engines, in fact, every kind of railroad work, and bridges have been built to train men in the received broken arches. in the repair of broken arches, &c., destroyed railroad works of every kind. The regiment has an ample supply of rolling stock of engines, passenger carriages, goods vans, trucks, &c. There is thus every facility for training men to act as por-ters or unskilled workmen in the loadters or unskilled workmen in the local irg and unloading of warlike and other stores, and teaching non-com-missioned officers and artificers engine driving, the care and repair of engines, the duties of firemen, pointsmen shunters, &c., and finally the duties of railway guards for the management of trains and regulation of trafic. The strength of the Railway Regiment, large as it is in peace, would be enor-mously increased were it mobilized for war. Before the second battalion was raised Paris and Helldorf put the strength of the German Railway strength of the German Railway Corps, when mobilized for war, at eight companies of artificers, four traffic companies, and two companies of unskilled workmen. (Bau-Betriebs und Arbeiter-Compagnien.) This has, of course, been very much added to by the creation of the second battalion in 1875, and we should not be much out if we reckoned on these numbers as now doubled, certainly as regards the traffic companies .- Army and Navy Quarterly.

HAD A "DAISY."

n Undertaker's Enthusiasm Over Some Improvements in His Wares.
"Come out through the back way and see my daisy!" he chuckled as he

ubbed his hands together. "What! gone into the funeral flower business on your own account? Yet, after all, why not? An undertaker might as well furnish the flowers as the

"Come on. There-how does that strike you?"

"That's a hearse—a new one." "But it's the daisy I was speaking of.

"But it's the daisy I was speaking of.
Isn't she spic-span and shiny?"
"Yery nice."
"I should smile. It lays over any
thing of the sort in this town, and don't
you forget it! Get in and lie down and
let me bob the springs to show you how
easy it rides."

easy it rides."
"No, thank you."
"You go on! There's points about a hearse the public ought to know. Get up on the driver's seat."

Excuse me, but I prefer a family

"Excuse me, but I prefer a family carriage."
"Oh, pshaw! but you are too thinskinned. Just notice those springs. I tell you it will be a positive pleasure to ride above 'em. The dish of those

wheels is absolutely perfect, and such a finish!" a finish!"
"Yes, very nice hearse."
"You bet! Say, it will be a proud hour in my life in which I hitch a span of white horses to that vehicle and prance around to the house of the late deceased. Lands! but won't the other

undertakers look blue! Say, feel of these curtains—pure silk." "I'll take your word for it."
"Go on, now! Hang it, but when an "Go on, now! Hang it, but when an undertaker puts up his cash for a regular daisy like this you newspaper fellows ought to encourage him. Just remember that the old-fashioned way of carrying a body around in a lumber wagon and then gaze on this! Just notice how these rear doors open to admit the coffin."

"Yery handy."

"Handy! Why, man, it's superb! Have you noticed the glass in the sides?"

"Seems to be very good."

"Seems to be very good."
"Good! Why, it's the finest in the world—the very finest! I wanted something to show off the coffin, and here it is. I tell you, the late deceased ought to feel proud to ride in such a vehicle! You can say in your paper that it knocks 'em all out. Say, how are you on styles?"

that it knocks 'em all out.' Say, how are you on styles?''

"What styles?''

"Coffins and shrouds, of course. Come in a minute. I've got a new thing in shrouds—something you are bound to appreciate, and I'm after a patent on a coffin with an air-receiver in it. Say! do me a favor. Let me inclose you in my new coffin and see how long the supply of air will last you. I'll bet a dol—.''

But the reporter had gone.—Detroit Free Press.

SWING-SKITTLES.

An Old English Game—Its Adoption in The good old English game of skittles, perhaps from its being constantly associated with the idea of beer, ranks somewhat low among popular amusements; its chief votaries will be found among the frequenters of suburban teagardens or of roadside public houses. It is useful in its way as providing opportunities for the display of a certain amount of address, combined with more or less physical exercise, according to the energy of the players; but ing to the energy of the players; but there is a general roughness and want of nicety about the game which will account for its not having made its way into favor as an adjunct to our country house gardens, especially as these defects render it ill adapted for the gentler sex. The American form of the game, the bowling or ten-pin alley, is a very great improvement. The necessity for physical strength is reduced, while that for skill is increased, thereby making it better adapted for both sexes; but it must be played indoors, or at all events in s creased, thereby making it better adapted for both sexes; but it must be played indoors, or at all events in a covered alley, in order to prevent the "table" from being damaged by exposure to the weather; and moreover, the weight of the balls and the length of the ground render the construction of this "table" somewhat construction of ble to play for any length of time without having a boy constantly at the end of the alley to pick up the pins and send back the balls to the players. Ir Southern Germany a different form of the game is very much in vogue; the ball, instead of being bowled, is sweet by a rone constant to call around and settle. I visited him at once, and explained that my time had not yet arrived, as I was not running the calendar. This was unfortunate for him, he said. It appeared so to me, and I politely said as much. He asked me when I would pay, and as I was unable to answer the payer.

[Pa.] Tribune. Southern Germany a different form of the game is very much in vogue; the ball, instead of being bowled, is swung by a rope suspended from a sort of gallows, and thus returns by its own sits of soup, fish, one kind of meat to momentum to the player's hand after every stroke. Nothing in the way of a "table" is required beyond a small square frame on which the pins stand, and this may be made of stone or of wood sufficiently strong to defy the weather. The pins and all the adjuncts of the game can be made by any ordinary village carpenter and may be left out of doors during the whole summer without taking any damage. A very small space is required, a plot of ground twenty-four feet long with a breadth of sixteen feet being amply sufficient; thus there is scarcely any garden in which a corner might not be found with room enough. This game is to be seen in the gardens of almost every "Wirthschaft," in the Black Forestgardens that differ very much from those of our public houses in that they are frequented and civilized by the presence of the wives and daughters of the men of the lower and middle out of doors during the whole summer the men of the lower and middle classes, who after working hours spend the long summer evenings in these re-sorts. Many of the hotels have one of these skittle grounds attached to them in some shady nook, adding much to the attractions of the lazy life of an enthe attractions of the lazy life of an enforced sojourn at a German Bad; and they are frequently also to be seen in the gardens of private residences, showing that the game is by no means practiced only by the lower classes. It has been long known in England on the toy and miniature scale, and has even in its fullness been sometimes imported here by some of these who have ported here by some of those who have ound it an agreeable pastime in Ger many; and wherever it has been intro-duced it has met with favor in the

neighborhood.-London Saturday Re-GENERAL BUTLER.

When I first went to Washington, the western approach to the Capitol, before the "pending improvements" were commenced, was through a fine old park, the heavy foliage of which in spring concealed much of the Capitol from view. The approach then led un advantage of these declivities for coasting. Instead of sleds, however, they used certain large paste-board envelope boxes, which they obtained from the folding-rooms.

One day, the terraces and park

grounds were covered with a thick, hard coat of sleet; so the envelopetobogganing began. In the midst of the sport, General Benjamin F. Butler, accompanied by other Representatives, came along, and stopped on the parapet to witness the fun. As he seemed to enjoy the sight, one of the pages asked him if he would take a ride. After a brief deliberation, the General remarked: "Well, I think I will."

In a moment, a box was placed at his disposal near the edge of the parapet, or upper terrace. In this, with pet, or upper terrace. In this, with considerable difficulty, the portly representative ensconced himself, and soon he stated that he was "ready." At the word, the pages gave him a vig-orous shove, and down he went with lightning swiftness, to the great delight of the assembled spectators. As with increased momentum he struck the

of the assembled spectators. As with increased momentum he struck the second terrace, the box parted, and, with terrific speed, he finished the trip, "all by himself," And he was still going when lost in the distance of the park!—Edmund Alton, in St. Nicholas.

The Charm of Flowers.

The Charm of Flowers.

When a whiff of fragrance floats up the story, dusty street, and we there upon meet a girl under a shady paragel, with a big bunch of violets at her throat, a sense of daintiness, of sweetness, of pleasure lingest, with us that is anothalways suggested by larmort costrol and story and station, and is not swin dependent upon meets, addised by the charlant. The lady thought that only a man of diabolical insight could have an of diabolical insight could have a marked by the charlant.

—It is a pity some of the poor people on either side of the Atlantic can not have the vast quantities of meat annually thrown overboard from ocean "Hore's not him go now, hain't you got something that the flies won't settle on, that's fur-lined and hair-topped? There's nothing too good for us, and we've got the dust to pay for it."

"Yes," again said Huntington. "Here's something that we don't often bring out." The trier went down into the third tub of the same lot, and the storekeeper's nose followed the line of butter for the third time.

"How much is she assessed af?"

ple on either side of the Atlantic can not have the vast quantities of meat annually thrown overboard from ocean vessels. From a report just issued by the British Agricultural Department, it appears that during 1884, of live animals imported from Canada, 658 cattle, 1,770 sheep and one pig were thrown overboard, and 81 cattle and 324 sheep landed dead. Of these im

A PLEA FOR DEBTORS. How the Virginian Resented His Tailor's

"It appears to be a common impression," observed Major Thomas Simpson, the other evening, "that the lot of a creditor is unhappier than that of the debtor. 'Let the other man walk the floor,' is said to be the fashion of the average debtor. The man who originated this plan knew nothing about the subject. I'll wager the check for my winter overcoat that he never had credit enough to get trusted from the cigar counter to the front door. The debts a man contracts are his saddest incumbrances.'

incumbrances."

"A creditor is certainly to be pitied,"
observed young Mr. Badger, whose
father shaves notes.

"Not at all," responded Mr. Simpson, warmly. "A man who trusts a
man for more than he can pay at the
time is either inebriated or a fool, and
deserves to pay for his folly. I have deserves to pay for his folly. I have no sympathy for him. Before the war I bought a suit of clothes from our col-lege tailor in Virginia. He not only trusted me willingly, but told me to take my time about paying for them. I always was obliging, and I did so. It was not my fault that my time did not come as quickly as he expected it would. That was his fault. I couldn't be responsible for the anticipations of an over-sanguine country tailor. Several months after the suit was delivered I received a note from him, asking me to call around and settle. I visited him initely, there was a coolness between us when we parted.

"From that time I began to be an-

noyed by him. He wrote me letters daily. At first I answered him equally often. Then, when this became bur-densome, I had some circulars printed, which I sent him from day to day. This prospers with an average profit of forty dollars per week.—N. Y. Herald. seemed to enrage the fellow, and he grew impertinent. This, however, did —A patriotic Philadelphian sent to the New York World's pedestal fund the other day the handsome sum of one confronted me at breakfast, dinner, and the other day the handsome sum of one hundred dollars, and with a modesty equaled only by his munificence declined to give his own name as the donor, but desired that the contribution should be credited to General Grant.—Philadelphia Times.

—Whale shooting is a growing business on the Maine coast. Several steamers are engaged in the business, another trying factory is to be built, and the success which has attended the operations thus far warrants the belief that whale hunting will eventually become one of the important industries of the State.—Boston Herald.

The Farmer's Record Account Book

THE ONLY COMPLETE WORK PUBLISHED.

Every Farmer can double his Profits!!!

This work must not be compared with anything else ever published for the purpose. It is large in size, 91-2 by 13 inches, very handsomely bound and made of the very heaviets extra double French folio cap paper, ruled in blue and red, and has printed headings for every item and transaction, so that by merely putting down a few figures each day, the farmer hows exactly what crops pay him best, and where he can make changes to advantage. It is worth at least \$3.000 por yozar to any average farmer. It does not require anything but a legible hand writing to keep it, no knowledge whatever of book-keeping being necessary. It has been endozed by all leading agricultural papers, and very highly recommended by the Grange and its officers. The condensed table of contents below will show how complete it it. There are a number of blank pages for contracts, receipts, etc., also 154 tables of ready reference and reckoning, many owhich give information worth ten times the cost of the book, and can only be obtained by purchasing expensive works on these refectal subjects. It tells all about fertilizers and their value, remedies for accidents, recipes for making solders and cements, paints, etc., how to lay out surfaces, computation of interest, business laws, weather tables, weights and measures, etc., etc., etc., this information alone being valuable beyond computation. The portion for keeping the accounts is very full, but for want of space we can only specify as follows:

Evil discenting for attachment and the property of the property of
