May 25 1897 San Diego Cal. 112 national are. Tres, G. J. Fairchild Dear Friend I have been wanting to write back my regreti ever suice I first read in the "Capital" the account of the criminal action of the present Bard of Regenta, but my time has been so full fichool duties that I kept putting it of from one time to another, we I. a. C graduates here in Sandlieg,

There are four of us, min Lillie Bridgman, min Clara Keyer, my nister himse and myself, have the denounced the Regents as a board of partisan demographes anxious to show their authority. It seemed to me when I read of their action, as if my own home had heen broken up and some of the family turned adrift. I felt enraged at the originators of the acheme and as is Il should not care ever to go back to the old college on a visit. It will not seem like home

with out the familiar Jacea who used to mark our vacant reate in chapel and poor recitations in class I wish I could be present at the alumni meeting this year and say good by at least, to the out going members of the faculty, but it mill be impossible for me to returne to Man. This year unless I could get a good position. I should prefer going back, I shed such. I have two more weeken of achool and then the Incation.

I do not doubt you mill easily find an ofening elsewhere, but I do directly regret that you are to leave our own alma mater. It will no seem like our old how and more when we go back. wishing you all a better place their you are leaving I am very succeedy, Louise Reed: 112 national aire. San Diego.

Big Valley, Toyas, June 3, 1891. Pres Hanchild All an hot and, Stan. Dear Sir: It is almost a your since I left the old college holls, and the new approach of commencement recalls the pleasant memories of that week with a longing to return, but I am sorry to say that it will be impossible for one to be there. I have spent the past year very pleasantly and feel that it has been a very profitable one, unless I should

consider it from a financial point of view. The first-six amonth I spent in assisting to construct and operate a plant of ma chinery from which I goined Much information as well as some business Adeas. Since Then I have been Troueling over Oklahoma and Indion Peritories and lexus gathering what proctical ideas I could from the business men that I come in contact with every Day. I enjoyed this from the fact that it gave me an especially good apportu suly for the study of human

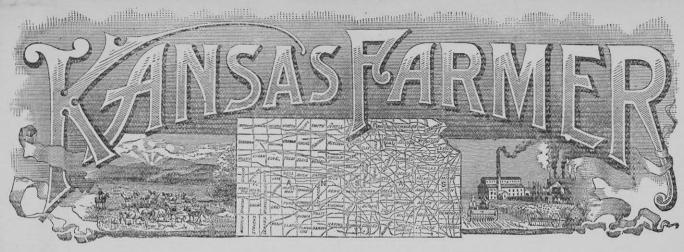

moture, I returned show gesterday from the last trip I expect to make and will remain with the home folks The coming season I will Take charge of some ma-Chinery New by, repair it and superinted The running of it during the fall. I regret that you as well as several of any other special friends will gut be connected with the college after the present year. I anyly wish that I could be These to join The alumin

in expressing to you aur appreciation of the many forms you hove shown in Respect acted Big Valley,

26

My dear President Fairchild-

I am sure you will not misunderstand this

letter or misconstrue my purposes. You asked me to inform you of honest

oriticisms of the College and Station. Those who criticise do not like

to be quoted, but prefer to move upon the Regents. I am not willing to

write to the Regents without first laying the matter frankly before you,

for I am sure that your interest in the College is greater than that of

enyone else, and you will be able and willing to give unselfish consideration to honest suggestions.

I send you below, copy of a dictation in which I assumed to be addressing a Regent. No such letter has been sent to any Regent, but it outlines what rather mature reflection leads me to believe correct conclusions:

"You are doubtless aware of the attacks that have been made on the College, but more especially on the Experiment Station during the last winter, in the public press, notably in the "Topeka Capital". The "Capital" writer was certainly very ignorant of the situation at Manhattan, and he attacked the work done there in a way to throw discredit upon some of the experiments which have received the warmest commendation from contemporaneous institutions, and which are of immense value to farmers and feeders. If the "Capital" writer had given his attention to what is not done at the Station, or at least not reported, he would have been more justifiable for his attack.

"But while we have an excellent institution, and one which holds

(2)

Topeka, Kansas,

1897.

an enviable place in many respects among institutions of like character, I shall be glad to see the College and the Station take an even prouder position than that heretofore occupied.

branch is necessarily meagre. It is therefore not surprising that while graduates of the College have been called to various positions in institutions in other states, almost none have been called to chairs of Agriculture. The only ones that I now recall as having received such training as to fit them for Agricultural positions are Prof. Mills, of Utah, and Prof. Payne, who is in charge of some experimental work in Colorado. I think you will agree with me that we should have made a better record, and that our course in Agriculture should be so amplified as to prepare our young men for the best Agricultural positions, especeally if they should take in addition some post-graduate work. Such training will be most valuable to those who become farmers.

but against the Experiment Station. I have given a good deal of study to this branch of the subject, and think some radical measures ought to be adopted. Two of the departments represented on the Station Council, and having assistants drawing pay from the Station fund, have no reports to their credit during the past two years. As a school, we are easily in the first rank; as an Experiment Station we are scarcely in the second. I hope that what I am about to say will not be misunderstood: I am on terms of friendship bordering on intimacy with every member of the Experiment Station Council, and my suggestions are intended to be in the interest of the farmers of Kansas, and not for or against the interests of any individual.

"I think I appreciate the efficiency and worth of the President of the College as highly as anyone does or can. I think that under no circumstances likely to arise, should the State be deprived of his services as the head of the College. As to the Experiment Station, however, the case is different. Logically, the Director of the Experiment Station should be the Professor of Agriculture, and in some of the institutions where the most successful experimental work is being done, this is the case. I believe that the characteristics which make the best school—man are somewhat out of harmony with the characteristics necessary for the best experiment station director. Further, I believe that the Director of the Experiment Station should be such more than in

Topeka, Kansas,

1897.

(3)

name, and that experiments to be conducted in any department should be controlled by the head of that department and the director without interference from other departments."

You know better than anyone how to bring about needed changes. I am sure that the demand to have more teaching in agriculture and to have a better showing from some departments of the Station is honestly made and is likely to be persisted in. I am sure, also, that you will agree with me that it will be better to head this demand before it assumes a peremptory character likely to result in sudden and violent changes with accompanying damage.

Yours very truly,

EB. Congill

Topeka, Kansas, April 3

April 1st, 1897.

Prof. Geo. T. Fairchild, Manhattan, Ks.

Dear Friend:

I take the first opportunity to answer your letter of March 26th. I am glad if the deficiency in the course in Agriculture

has been remedied.

Inpresumed that the departments which have drawn pay for the last two years and have made no report, have had some excuse for this condition. But in the world outside of institutions, in the world of competition, excuse does not long draw pay. The rest of us must produce results and I confess that in my estimation a handful of results is worth more than a car load of excuses.

It was with a good deal of hesitation that I suggested a change in the directorship of the Station. While I was connected with the College it had been settled that the Experiment Station would be established, and in considering the organization I was of the opinion that the president of the College should be the director, and for the reasons suggested in your letter. Conclusions since formed may not be better based than those then reached, but it now seems to me that the directorship is or ought to be, so large a matter as to command the full ability of a strong man. It is possible that the heads of the departments in the Station should not be the heads of departments in the College. I am not entirely certain but that a considerable separation of the two institumay be desirable. But it has long been a conviction with me that the inspiration of contact with experimental investigations should be of untold value to the students. Furthermore, a live professor in the College, who is properly inspired by his work, ought to be, and I believe is, inevitably an original investigator. If these two propositions are correct, then there should be found a way to combine the College work and the Station work without detriment to either, but with ppositive advantage to both. May it not be that the dificulty of working under two overseers is more imagined than real? The students generally have to work under three overseers, and it is thought to be a good arrangement, and especially advantageous to the students. I have not understood that there is friction in the Council, and indeed it is not on this account that my suggestions have been made, but to the end that more work might be shown for the money expended. I do not know anything about the facts in the case of the stations you refer to as using other

(2)

Topeka, Kansas,

1897.

money for Station work, and thereby being enabled to make larger showing, but I do know that the amount of money paid to the Chemical Department and Entymological Department in the last two years is such that we ought not to be obliged to go to Minnesota reports for the latest about grasshoppers, or to Indiana reports to get anything modern about wheat-and corn-bread, or to go anywhere outside of Kansas to get any information which one can get only from the investigation of such departments. I think you will do me the justice to concede that these last remarks are not inspired by any personal feeling, for I think you know that between myself and the workers in those departments, there are none but relations of friendship.

You ask me to suggest the special kinds of work I would like to see done by the Station this very season; this reminds me somewhat of a remark which Ex-Secretary Morton was reported to have made soon after taking charge of the Department of Agriculture, viz: That if he did his full duty, he believed he would have to recommend the abolition of the entire Department. He seemed to have no realization that there was a work for it to do. I am loth to think that such is the case with any of my friends who are drawing Experiment Station salaries. But as to the special kinds of work; This office has been overwhelmed with inquiries as to how to combat insect pests. I have looked in vain for a bulletin or bulletins from the stations from which I might quote something for the benefit of these inquirers. Again, it is a fairly well known fact that Kansas winter wheat is a special favorite in some of the best markets in the world, and that Kansas hard winter wheat flour has been awarded some most notable medals for excellence. Nobody knows what characteristics of this wheat and this flour gives the peculiar merit: So far as I know, our experiment Station has undertaken no investigation to determine this interesting and valuable information. It is no longer a matter of doubt that such can be accentuated and developed by careful seed selection and suitable cultivation, but this seed selection can be made only upon chemical analysis. No doubt Kansas hard winter wheat plants will be found to vary greatly as to the valuable properties of their grain. If suitable methods of analysis be devised wherewith a portion of a wheat head may be used for analysis, and the remainder reserved for seed, if the analysis proves satisfactory, I see no reason why as rapid improvement may not be made in the quality of wheat as has been made in the quality of sugar beets and of sorgum by similar methode.

(3)

Topeka, Kansas.

1897.

Possibly hybridization of seed may become desirable, But the Experiment station ought to be able to take care of all this work in the most efficient manner. It is a work that somebody is sure to take up soon, and earn great credit for doing it. Kansas is more favorably situated for it than any other state on account of the superior quality of its wheat as above suggested. But this improvement should not be confined to wheat alone, but should be extended to corn, indeed to every staple crop grown in Kansas. If Kansas farmers are enabled to grow superior value into their crops, that value will be duly compensated for in the markets. If you could realize how fully satisfied I am the opportunity here presenta the Kansas Station, and which seems to be receiving no attention, you will not be surprised that I have overridden my reluctance to enter upon the matter, and have written as in this and my former letter. But I grant that unless there shall be an enthusiasm for the work on the part of those who have it to do, it would be just as well that they go on drawing the money and reporting nothing, as to take it up in a half hearted way, which can mean only failure, with perhaps excuses for not succeding.

Yours truly.

Lawrence, 27 May, 1897.

/

My Dear President Fairchild:-

Yours of the 25th inst. is at hand.

1 have written to the Hon. George C. Sturgiss of Morgantown, West Virginia, giving my views of your qualifications for the presidency of the University of West Virginia. 1 sincerely hope that you may be successful in obtaining the position.

It is a daily sorrow to me that you should be obliged to suffer from the first outbreak of political folly in the management of our educational institutions. If Mr. Debbs selects Kansas as the state for the settlement of his one hundred thousand "weary wanderers" the Manhattan experience will be duplicated at Lawrence and Emporia in short order. Let us pray that this added calamity may not occur.

Ever with best wishes,

Yours sincerely,

Chancellor.

My Dear Doctor:-

The President of the Board of Regents and the Chairman of the Executive Committee of the State Agricultural College of Oregon have written me, asking me to suggest to them the name of a gentleman competent to take charge of their college and station work. In this matter I have consulted with Dr. Allen, of our Office of Experiment Stations, a gentleman in whose judgment I have much confidence. He corroborates my opinion regarding yourself, and I have written a strong letter to the Regents, recommending you as being the proper man to carry on their work. I hope you will find it convenient to go out and help those people, should they desire it.

Very cordially yours,

James Wilsur

Dr. Seo. J. Fairchild -

Kousas City Mo.

My dear friend - After the first shock of last April, some of us were wondering how we could best express to you how we felt. Any thing bought with money seemed so madequate, and any thing else suggested seemed so tame or to impossible that organized expression was dropped. I promised myself then that my part should be to write and write often and not let go the friend that once I had. The best evidence of friendship and love that I can give is to promise never to feel but if

you do not answer and to always

to believe you will be glad to hear from Mers Hood had an enjoyable letter from Hirs White and we have heard once from Hers Kedzie- The little folks are very well this fall - Kedzie started to school last Monday. The opening of the town School season reminds us of how near we had to give up all hopes for this little chap just a year ago. We, the boys and I, are building a shop for the boys on our back lot. Tools of their brandfathers were given to them, a lathe and scroll saw and they are very auxious to begin operations. College opened, but also not as usual. The students came in the same crowds and the boy with his sunday clothes, and diploma tied with a blue rebbon was in evidence as heretofore. For some reason when I stood in the hall I felt like a Prep. The matter of assignment had been

on Strikes and Injunctions was what any one would call common. It certainly wasn't had and just as surely was not excellent. He undoubtedly suffered from too great expectations on the part of his audience. Chapel was packed. All students had to take notes. It was very quiel. But none of the students yet know what they are to do with the notes taken. Thos Weida is a nervous man who promises to talk mere than (2). Mayo and I. I am trying hard to keep still and succeeding badly. Favelle Seems a hard worker, but one sees readely that the same study puritan character of Mason is not there. I don't quite know what to make of him yet. Metcalf is'I believe a true man. It stomes out all over

and I think I shall like him much. He is very quick and so far I find none of the mannerisms of the elocutionist. Metcalf, Weida and Faville have lead mi Chapel. It would do me good if I could, but I can not bring myself to it. There are lots of funny tales being told about the sewing but you won't want to to hear them. The teacher Muss high ladder m' german) speaks with a very decided german accent. The seems, a ruce lettle woman and every one pitties her but she hardly understands what she is to do. I find a number of the new ones overwhelmed with the prospect of work. Hers Campbell is a smooth talker, and is taking with the girls I hear. The finds nothing right nor as it should be. Oh dear A number think she is in her dotage. Ishall withhold judgement a while. Muss Winston has a good face and a good head. The talks good hard sence and I think is a good

My dear Sir:- We have all felt very much grieved at the treatment you have received from your State Board, and if there is any way in which this college can help you, or any of our other friends, please feel free to make your desires known.

I am just now looking for a lady to take charge of our sewing for next year, and it struck me that perhaps the woman who has charge of this work in your college might be induced to come here. Our Board has set the salary at \$500.00 per year and rooms. If you think Mrs Winchip would suit us, and will speak to her with reference to this matter, I will feel very grateful, indeed. I am anxious to have a good sensible, christian woman; one that will serve as a check on the young women of the teaching force.

I hope to see you at the Minneapolis meeting in July.

COLUMBIA UNIVERSITY NEW YORK FACULTY OF PHILOSOPHY

May 20, 1897.

President George T. Fairchild,

Manhattan, Kan.

Dear Dr. Fairchild:

I have yours of the 14th, and have read with interest your personal statements regarding Oberlin College. You may trust me to do what I can with Mr. Sturgiss, should he give me any opportunity.

Yours very truly,

Ticholas Turnay Buther Reell.

University of Joaho. Mascaw, Janha. Nov. 20, 1897.

Office of The President.

Hon. Geo. D. Fairchild, Manhattan, Kansas.

My dear Sir:-

I have just read with profound interest your calm and dignified article in the American Journal of Sociology.

You have placed every executive of state institutions in this country under obligations to you for this review of the debauching influence of irresponsible politicians in their efforts to make our state institutions minister to party avarice.

As a president of a new institution in a new state that has done all in his power to prevent the institution from passing into control of politicians, and who has been maligned for what he has done as well as for he has not done as best suited those who have been disappointed in their inability to control the institution and its patronage, I must express my hearty appreciation of this article.

Yours truly,

Fetters from Prof. J. S. Ostranden of Amburst Spi Calley to T. charge Pous G. with being a falitician.

5/14,

97

Dr. Nicholas Murray Butler, Columbia University, New York.

writing you before, I have received from Hon. George C. Sturgiss, resident Regent of West Virginia State University, at Morgantown, a request that my name may be used before the Board of Regents at its meeting on June 3d. I have agreed to give earnest consideration to any proposition the Board may make, and have referred Mr. Sturgiss to yourself, among others, for judgment as to my fitness for the work of a president.

which I know will be safe with you. Oberlin was the home of my early life, and is very dear to me. I could probably give more of my life to 0 erlin College than to any other institution. Its repute is in good measure the repute of my family, and all my personal energies would naturally be aroused for it. But the presidency of Oberlin College is the last place that I should seek by personal efforts, because my success there would depend largely, chiefly, I think, upon my actually being wanted. I was there as a boy and a student, under the shedew of two brothers, twenty-one and twenty-three years older than myself. My repute is shelly independent of my growth and service there, and in lines little known except in a general way, to the Oberlin people. Oberlin, you know, has had very little connection with the National Educational Association, and my work and development of agricultural colleges is entirety-poutside the line of their thoughts. They will naturally seek

the support of the evengelistic organizations of centers of realth.

Should the trustees select me, it would seem to be, and be haps would be, only by because of my relationship to my brother James, who was so long-president. That is, it would seem like a family affair. Neither my brother nor myself would enjoy anything of that nature, although I think he would be very glad if the mentleder his work should fall upon my shoulders. The Oberlin trustees, we hant the knowledge of either my brother or myself, conferred upon me the degree of Doctor of Law, so that I do not feel is any way unappreciative. But to call me to Oberlin would be to make necessary some explanation. The reason would not uppear upon its stabilizes in a time light. Possibly some of my friends may move a that direction, but it is without my sanction, for the reasons above siven, which I think you can appreciate.

Yours very pully,

his. I Fourtheld

Hon. George C. Sturgiss,

Morgantown, West Virginia,

Dear Sir:

I am requested by George T. Fairchild, LL.D., late President of the Agricultural College at Manhattan, Kansas, to write you a word regarding his fitness for the Presidency of your State University. I know nothing about any vacancy in your University, but I can say with some positiveness that Professor Fairchild is one of the ablest of agricultural college Presidents and I do not happen to know of any one that I think would be more desirable for the position of President of the Agricultural College of West Virginia if there is a vacancy.

Very respectfully yours,

V,

Commissioner.

OFFICE OF STATE SUPT. OF PUBLIC INSTRUCTION, ? TOPEKA, KANSAS, January 11, 1897.

To County Superintendents:

I have this day designated the WESTERN SCHOOL JOUR-NAL as the official organ of this department, through which medium, by agreement with the editor of the JOURNAL, I shall in each issue reach superintendents, teachers, and many school officers. This designation is complete evidence of my confidence that the JOURNAL can be safely indorsed by superintendents as a paper which should be in the hands of every teacher.

WILLIAM STRYKER, State Supt. Public Instruction.

That we renew our expressions of pride and confidence in the WESTERN SCHOOL JOURNAL, and bespeak for it the hearty support of the Kansas school-teachers, Kansas school boards, and of all who are interested in the work of our public schools and school-teachers .- [Kansas State Teachers' Association, December 29, 30, 31, 1896.

Pres. G. T. Fairchild,

Manhattan,

Kansas.

Dear George: -

One of our students, a Mr. Blodgett, is from Washington and his father is connected with the Bureau of Education. I asked our Mr. Blodgett to write to his father seeking information concerning the West Virginia University. From his letter it is learned that there are five schools in the University, including the preparatory department. The collegiate department is divided into the classical and the scientific courses. There is a military department, a law school and a school of civil and mining engineer ing . The following is a quotation from Mr. Blodgett's letter in which it is a quotation, namely; "It is governed by a Board of Regents consisting of one member from each senatorial district and is self-perpetuating". By the report of the Commissioner of Education for 1893-'94 page 794 it is determined that the mechanical arts used over fifteen thousand dollars of the sixteen thousand alloted by the National Government, and less than one thousand dollars were used for agriculture. Mr. Blodgett writes "so far as I can learn the agricultural interest has been little fostered". I have written a letter to a Professor in a New England College, who was for some years at the West Virginia University, and he may, if he wishes, give us some of his knowledge which should be quite to the point in connection with this Institution. I withhold his name, because I stated in my letter that all our correspondence would be subrosa.

As soon as I hear from the New England Professor and his letter seems to lend encouragement in working this field I will gladly address a letter to Hon. Geo. C. Sturgiss, of Morgantown; but until then will seek for information outside of West Virginia.

I do not know just why, but there is a sort of a lurking the feeling that West Virginia University is not just the place that you would like. One day, while I was away, there came a flood of visitors upon us here at Rutgers College from this Institution, headed, as nearly as I can remember, by Professor Myers. It was, if I remember the informant's expression, something like a breeze that they created as they went through our little quiet Institution, You know Professor Myers.

There is no question about the healthfulness and picture esqueness no doubt of Morgantown and its vicinity, and nothing would please me better than for my Kansas relatives to get as far eastward as West Virginia at least.

Yours very sincerely,

Byron D. Halslick

My dear Dr. Fairchild:

I have your letter, and shall be delighted to do everything in my power to help you to the West Virginia position, if you will tell me how to go to work. I do not know any of the West Virginia people.

They are looking also for a President of Oberlin College, Ohio. Why not try that? Dicholas Immay Buther fruit.

Yours very truly,

Kansas State Agricultural College. Manhattan, Kas., Aug. 3rd, 1897. Dear President, yours Just received we have heard rumons and this morning we, Prof. Georgeson and myself, asked secretary Fraham what they were doing regarding the making of the pay roll. He said an opinion had suist been received from the attorner general regard me the payment of Solaries principally whether the old rate on the new would hold during July and august, but Prof. Will did not understand it fully and was going to topela and would talk the subject over with allower gener al and be guided by him While we were talking, Profe Fouty, mayo, and Bresse cause along, The Fine there went to wills office and asked lum as secretary of the Board what they were going todo obout paying us for July and august. He reflected what Wir Holoman had said about haying and

essentially the same as Fraham had said about the attorney general's opinion. That he was going to Topeka Touronow on husiness and would see the attorney general. - I told him in substance the following. Hat we did not want too much time to elapse for if the Board did not pay we would bring suit and should bring suit him time for the Septem her term. If her. Hoffman as Treasurer thought he was not authorized to pay hut as a memberof the board was willing to wake the payment, speaking for myself only, I was willing to accept the statement of Mur. Hoffman, Mur. Limbocker, and lur. Hudson if he could be, reached, in writing, that they would work for and vote for the payment of these salaries at the September 12t meeting, and would not be gin suit now. That is a long complicated sentence but I guess you will understand it. While we were willing to porthone bring-ing suit if they gave us such signed state thent we must have it by the sthor 9th to give us time. He raid he could let us know on the 5th So, the matter rests. he will not Lake definite action before the 6th of the any way and to come up on the 9th may serve every hurrand?

Pres. Geo. T. Fairchild,

809 Elmwood Ave., Kahsas City, Mo.,

Dear Sir: - A letter written by Prof. Georgeson to Dr. Mayo, concerning the Kansas trouble, and a recent visit to you, and its object, Dr. took the liberty to forward to me, in which I was much interested. I may say that Dr. Mayo was elected to the position of veterinary surgeon last Tuesday, and our Board of Trustees elected him without a thought of the Kansas trouble; it did not weigh against him in the least, and if anything, was in his favor. It occurred to me that you and your co-laborers that have been the victims of this trouble, perhaps in your imagination, think the outsiders in the United States are entirely on the side of the opposition, but I suspe t that at this end of the United States, at least, the sentiment is much as it was in our own Board, - simply a reference made to Dr. Mayo as one of the fifteen dropped in Kansas, was all that was said about it in our Board meeting this week, but his case went through with the greatest unanimity, - the troubles there, as I said, have no weight whatever. It occurred to me that a word from an entire outsider might serve to ameliorate the condition in a small measure, in which you find yourselves at present.

So for as I know the saling associates, If go should come this way as I suggested in thinking that the very fast that you were des-placed in Kom, world help My Eng

From your letter & gulles that it is your ford hope to go to Oberlan ad I at over write Attu Seconday of two coeler for the names of the Committee for a new And the chairman, I will write some of them and if of any use call afour warmer of newfule, He came f ser me over uper a similar melter When States was looked after. I dis wh who to water to him with no address Dane nufule at who besides & learn the is Charmon of the commetter. I got a Cololyn of obertin this afternoon

A this charge had come some moth ago It would have been mee I have pulled for the asot. Dreg grane but that is gone. may there not be some foregre work that much a good hand at its heal? I do not blate theto of your going out side of the U.S. for a food place bat It might be a delightful Charp for a time for you.
It seems to me that oberline will
be the place. I should like to see your Then - Then is nothing here attluters for the point that you would blee! De see Kup whe and trust Joltu is not allogthe descouraged A the persuation of the populists, Inie the love of the My conlinging to his as & luna. I thite grow often and fal so on helplus in the malter, affectus By

Pres. G. T. Fairchild.

Manhattan, Kansas.

Dear Sir: ---- I see that various persons who ought to know better are continuing to intentionally misrepresent the actions of the board of regents and the motives that actuate them. The latest brilliant effort is that on the part of Senator Hessin.

You know my position on this question, and that I do not desire to in any manner injure or annoy any of the outgoing professors. I believe that if we are compelled to ventilate some of the occurences at the institution it will not be pleasant or profitable for some of the members of the present faculty.

The charge that you have at various times distributed on behalf of the Republican Central Committee transportation either in the shape of tickets, round trip or otherwise or passes to students who desired to go home to vote the Republican ticket, is repeatedly made. I wish that you would let me know by return mail whether you at any time in any one or more cases have given any student, Republican or otherwise, any pass ticket or transportation to go home to vote. I think you explained to me as to the foundation of the charge that you "electioneered", and I think there is nothing in that; but this other charge is so persistently and so directly made and with such details, that I am inclined to believe it to be true; but I would like to have your personal statement.

Presumably you have seen Senator Hessin's screed. I am surprised that a man who has the reputation for brains and solidity, thinks that

the board of regents and the faculty are so dimunitive as to act upon the personal feelings of one of the regents. As you personally know the trouble that the boys got into cut no figure at all. Prof. Mason has nobody to blame but himself that the record reads as it does. I plead with him in the committee room, but he insisted that he must have the cause stated, that he was an applicant, that he denied the right of the board to discharge him, and even threatened us with the courts.

Senator Hessin must be hard up for something to write about, and is evidently attempting to give the people whose governor he aspires to be an idea of his mental caliber. His action in this matter however is not any more contemptible than the deliberate falsehoods to which he stooped in the Senate Chamber when he told Senator Householder that the bill fixing the tenure of office of the regents, which he had agreed to support, contained an appropriation, and thereby tried to defeat it.

If not too much trouble to you you might convey to the Honorable Senator with my compliments, my opinion of him.

Yours very truly,

Dic.C.B.H.

DOANE COLLEGE

Rev. A. A. CRESSMAN, State Secretary

CRETE, NEBRASKA, May 3 = '97

Dran Auche Georgie I have just nad in the Industrialist a reference to the enverting action of your ngents, and your refusal to be ensidered as a caudidate for the pusiderey. In the last two weeks I have been in Orusha with Mrs. Fairchied who has undergone a surgical operation and This accounts for my not seeing the haper corner. Kausas has always had The seputation of going to extremes, but I have never heard of any thing in college offairs to expeal this. It has been uperted to me that the nguests were populists and were determined to get a faculty mon nearly in hannony with their political views. I do not know how much of treth There may be in this, but our satisfied that They must have acted very foolishly and without much negat for the welfare of the institution. This would be manifest from the act itself, for it is not nasmable to suppose that the good of the college nywired that half of the faculty should be discuissed, but aside from this I am sure that your work for The college has been exceedingly valuable, and to

25 000

NEBRASKA QUARTER CENTENNIAL ÉNDOWMENT FUND

\$25,000

HISTORICAL

Doane College was founded in 1872. It will celebrate its twenty-fifth anniversary in 1897. A brief historical pamphlet has been prepared by President Perry which will be sent gratuitously upon application.

This pamphlet will show substantial gains from year to year, made possible through the favor of God, and the continued and self-sacrificing efforts of many loyal friends. The rounding out of the first quarter century is a fitting occasion for gratitude, and also for entrance upon a still larger work.

N. Q. C. E. F.

The trustees at a special meeting called for the purpose, decided to proceed to raise \$25,000 as an addition to the endowment, to be known as The Nebraska Quarter Centennial Endowment Fund. To secure this result friends of the college must not only themselves give, but must also put forth special efforts to enlist many others. Why should not every Congregationalist in Nebraska give at least \$1 to this fund. The trustees recommend two methods of giving.

CASH PLAN

Treasurer of Doane College:

You may expect me to send you directly, or through our church treasurer, \$1 October 1, November 1, December 1, 1896, January 1, February 1, March 1, April 1, May 1, June 1, 1897, as my thank offering and contribution to the Nebraska Quarter Centennial Endowment Fund.

B. For each of eight months:

3125 @ \$1.....\$25,000

C. = 11,000 x \$2\frac{1}{4}.....\$25,000

 $D. $25,000 \div 190......$ \$130

NEEDS

The college has always been called the child of the churches, and as such it needs the cordial support of all the churches, and shou'l itself become more and more helpful to the churches. To raise \$25,000 is a great undertaking, but if everyone contributes as he is able and all do something it can be done.

ENCOURAGING

A good friend of the college who lives in Nebraska, without solicitation, has agreed to give \$1 for every \$100 paid by Nebraskans to the treasurer before May 31, 1897.

Also without solicitation two contributions have already been received, the first an eagle from an unknown giver; the second a half eagle from a former student.

SOUND ADVICE

- 1. Consider carefully what you can do to make a success of this movement and write to the treasurer about it.
- Plan to be present at the Quarter Centennial celebration in June, 1897.

Note—The Alumni have been giving for several years to the Alumni Fund, which now amounts to about \$1,100. At the request of some of the alumni, it will be understood that their contributions to increase the endowment will go into the Alumni Fund. Rev. D. B. PERRY, President Prof. A. B. my dear Sir, - I wish you to give me your opinion frankly in regard to Prof. Mayo, in the Veterinary Department. I assure you that it chould be strictly confidential. As you know, scholarship in this line is not the only requirement. It is often more important that the should be thoroughly honest and reliable, a man whom you can depend upon for homest work under any conditions whatsoever. Is he a good bacteriologist, and how does he stand with the stock men and farmers, so far as he has come in contact with them?

I am very sorry to see that partisan politics are demoralizing your institution and I hope the present trouble will not interfere with your future success. You have my sympathy under present conditions.

Yours sincerely,

James Reid

DAIRY DIVISION.

WASHINGTON, D. C.

April 30, 1897.

President, Geo. T. Fairchild, L.L.D.,

Assn. of American Agricultural Colleges & Experiment Stations,
Kansas State Agricultural College,

Manhattan, KANSAS.

Dear sir:

Please accept my thanks for your kind letter of the leth instant with its enclosure. It should have been acknowledged somer but I have been extremely busy. As yet I have been unable to present the letter of introduction which you courteously prepared.

The revolution at the Kansas State Agricultural College was generally commented upon here and was the occasion of very genuine regret. We feel that it is a very serious blow to the progress of a well-established institution doing excellent work, and an injury to the cause of higher education in your State, from which it will take years to recover.

Besides this, your many warm friends deplore the personal interests involved and regret that your work has thus been so rudely interrupted. You may rest assured that you will not be forgotten and that any information or suggestions which can be made to yourself or to others in your interest, will receive prompt attention.

With personal regards and best wishes,

Very truly yours,

Chief of Dairy Division.

MORE STORIES COME OUT

Kansas is About the Partisan Feeling Among the Manhattan Professors.

A well known Kansas farmer has written a long letter to Senator Peffer discussing the recent changes at the state agricultural college, saying:
"I'm not at all surprised; that is just what might be expected. I can probably interpret the animus of the movement and the reason at the bottom of it. The president and some of the pro-TOPEKA, KANSA: it. The president and some of the professors were intensely partisan, and as politics waxed warm they could hardly

restrain themselves from breaking forth in open flame. When I was there forth in open flame. When I was there and an election drew nigh, one of the professors sent for me one evening, and upon an interview said: 'Mr. J., you are a Republican, I take it?' 'Yes,' I answered, 'as much a Republican as anything. I take little interest in politics and know little about them.' Well,' said he,'we want you to go home to vote, and here's a ticket for that purpose.' I answered that my roommate and I had partially arranged that; as he was a Populist, it wouldn't affect

mate and I had partially arranged that; as he was a Populist, it wouldn't affect the result by our voting, and therefore we wouldn't trouble ourselves about it. 'But,' said he, 'the president wants you to vote, and probably your friend won't concern himself to go home for that.' So, half persuaded, I took the ticket and at once told my room-mate all about it, and he betook himself to the professor to get a ticket also, but returned very indignant and wrathy at the announcement that there were no tickets for Populists, and he declared the announcement that there were no tickets for Populists, and he declared that their scheme shouldn't succeed with him and that he would vote anyway. Therefore, the day before election he started out on foot, and having accomplished his end, returned and went on with his studies. But he always maintained that he and others of his political proclivities were not treated by the college authorities with the consideration awarded those of more satisfactory politics, though his imaginaisfactory politics, though his imagination and distrust engendered by the election episode probably had something to do with this conclusion."
