SALINA, KANSAS, THURSDAY, NOVEMBER 21, 1940

### Pres. Dean Will Soon Swing Into **Heavy Schedule**

Will Attend Pottawatomie and Ellsworth County Meetings December 5-6

and the Ellsworth county meet-

Also Mr. Dean will attend the row. Marshall County Farmers Union meeting at Beattie, Tuesday, Dec-

Organization work will demand more effort than attendance at scheduled meetings, however. Mr. Dean expects to make acquaintances and to plan for membership campaigns as rapidly as possible. Good wishes and congratulations have come to the new president from near and far. Senator Capper was among the first to send expression of greetings.

.H. E. Witham, general manager of the Farmers Union Jobbing Association, Kansas City, worded a message that gives the viewpoint

"My congratulations to you on your election to the office of Kansas Farmers Union state president," he wrote. "We need en-thusiastic young men in our or-ganizations, and I know from our many years close association that you are especially well fitted for this type of work. I am sure that vill be able to do much towards building the Kansas Farmers Union back to at least part of its former glory—both in acti-vities and in number of members. "Every one of our employees, as myself and the directors of our Association, stand ready to help you in any way possible. us, for you will find us willing and anxious to work with you in the task you have before expect you to do big things!
"Kindest personal regards to

Mr. Pe- the local, we will be careful not cha spoke to his organization's national convention at Holdrege, Nebraska October 31.

"We have seen the expansion of the program will appeal to every wheat production in the other member of the family. "We have seen the expansion of wheat areas of the world; we have seen the gradual encroachment of our surplus wheat markets by these countries; we have seen the inauguration of the Federal Farm Board: we have seen the curtailment of acreage, the subsidization of our surplus wheat production, and also the adoption of a loan program on the part of our federal government," he said. Has Been Useful

"There is no question in my mind that each of these programs, whether successful or in failure, have served some usefulness to producers of wheat. The intent and purpose of these programs have been carried out to increase the income of the wheat farmer on a parity with the cost of the articles which he uses in his farm operations.

The loan program in which dence on any subject that is beproducers are taking a part today has been effective in upholdduction, but I believe it is only fair to make the statement that with one or two good crop years in the western wheat area, we can expect a wholesale movement of default loans made to producers and our federal government will be the owner of all surplus wheat in the United States.

With the limited export outlet, it is very difficult to even dation of such enormous stocks This problem as well as the other programs mentioned should be studied by every wheat producer in the West, as he will be the one called upon to formulate a program which is workable and acceptable by our people, if our present loan program fails to do

Agriculture must stand upon its own feet, he warned, but it was his opinion that "the problems of the agricultural and manufactur ing industries are becoming more unified than at any time in the these programs? The women may 1939 history of our nation.

mers Union women can help, was told members and guests of the chairmen. It is the job of chair-Farmers Union Managerial Association by Mrs. Merle Tribbey, Winfield, at the banquet following the afternoon meeting in Parsons, Oct. 29. She spoke as follows:
First what is the value of programs? Why do we have Farmers grams? Why do we have Farmers and why do we have farmers will not be timid in present-

Ernest K. Dean, president of the Kansas Farmers Union, will keep a busy schedule, immediately after assuming his presidential duties December 1. On his schedule for the first week are two county-wide Farmers Union meetings: Pottawatomic county meeting at Olsburg, Thursday, December 5; and the Ellsworth county meet-ing the programs and why do we want them to be good programs? We must create new interest in the program. It is up to her to set the good example that all others can follow. It is her job to help her local by presenting the program the best she can—and the local will be better for her help.

We must advertise. Let every-one know there is to be a local to the local will be a local will be better for her help. Union programs and why do we man will not be timid in presentteresting the young as well as the ing at Ellsworth, Friday, December 6. old. Remember, the youth of to-day will be the Union of tomor-

want to come they will, but let's Also, we must inspire enthusibe surprised how it will help. asm among the young and old alike. A local that is enthusiastic shall live on and on.

What to Plan Again, the value of a good program is to promote education. Our programs should always contain educational features. Many valuable educational points can be brought out in our programs. Too much stress cannot be placed on the value of education along Farmers Union lines because it is in the field of Cooperative Education that lies the greatest power of the local and the whole Farmers Un-

Interesting and educational programs help build membership. If we present a program that gives new interest and new pep that will inspire enthusiasm. Some neighbor farmer will hear about the interesting and educational things that are going on in his local and he will become interested. Thus our Union grows.

What makes a good Farmers Union program?

How to Build It Sometimes we may lose sight of the fact that our programs should

contain life, spice, sparkle, and humor. Our programs must not be overburdened with too many heavy numbers. We must always remember the "entertaining pro-gram" of a local is the drawing you. It's a big job, we know, but then you're a big fellow, and we in mind that it is a Farmers Union program and we should have you, Ernest, and much success in your work."

something that even strangers could recognize as a Farmers Union program.

It should contain some of the deas and ideals of our organization. We find many readings, lit-Union Creed that tell about Farmers Union ideals that are always interesting and educational.

Then, a good Farmers Union program has numbers, such as singing, that everyone can take part in. Good lively singing is just the thing to make everyone loosen up and feel that they are a part of the program.

How to Get Balance A good Farmers Union program is well balanced. A well balanced meal brings forth health so With one or two good crop also a well balanced program will of all surplus wheat niles, Junior Reserves, Juniors, part in. If we are striving to keep the whole family together, which means the entire membership of to make our programs too dull and dry. Remember there should be enough variety numbers so that

> Also, a good Farmers Union program will be one that uses several people. People like to feel they are needed and when they are in the programs they feel more interested. If there are several people used—and vary it by not using the same ones every time—it will help people to become better ac quainted. Get as many as possible to work in the programs. By using several they take a personal interest in the program because they have a responsibility. By being in programs and getting up in front of people we find it helps them to get over stage fright and in a few times they have more confidence in themselves and it won't be long before they will be ment of the Farmers' Wheat Proable to get up before an audience gram in the United States." and be able to express themselve with much more ease and confi-

ing discussed. made most interesting and enjoya-ble by carrying out a certain against today. We have seen our Again, a good program can be theme. Nearly every month in the world markets drop off one by year has something special on one. We have all seen how the which we can carry out a certain spread of dictatorship had chokidea and through carrying out ed off much of the free wheat something like that we can have trade that was left. The dictators many varied programs throughout the year. Also, there are many ideas for which the Farmers Union stand that we can carry out a guess as to what effect the liqui- certain theme thus making a very interesting and educational pro-

gram. To me one of the most important things to remeber in pre-senting a good Farmers Union program is to have it move smoothly and quickly. We should never drag out our local meetings. If we will be careful and not drag out games, contests, and discussions but will stop when people are most anxious to contain, they

Women Have Place Now, how can women help in these programs? The women may 1939 crop. We had a wheat protake part in panel discussions and gram in 1934 and 1935, but the debates and we need many more Supreme Court decision of 1936 in it is what we learned about the of these today. ganization and another copy sent atmospheric conditions. A wet dust mixing with the oil and these ucts which may pass through the the Pottawatomie County Farmers are the ingredients in the development and accumulation of

It is doubtful if the sludge has been more pronounced recently than heretofore but the combination of many conditions has probably made it more noticeable. In most cases, the operators have admitted that they did notice the trouble as much during the previous year and in such cases it was found to be the second year for the operation of the tractor. From this combination of circum-

stances, the following analysis seems logical! Condition Is Explained The first year the engine was new, perfectly clean inside and more than likely much pride was taken in the care of the machine At the end of the busy season there is a tendency to neglect the draining of the crankcase, since the tractor may be set aside for the winter, or if not set aside, is probably used longer than the recommended 60 hours, thus it will contain a larger amount of sludgy material. As this oil remains in Be Sure to Have the Tractor Outthe crankcase through the colder weather it is subjected to the gradual rise and fall of the daily temperature with the result that thick heavy sludge becomes thoroughly packed into every nook

and corner of the crankcase and throughout the inside of the enstarts the tractor the next time or that good lubrication is low priced It may be another person who in the spring, or even if it is the same person, he may not recall ance costs." in the crankcase—a heavy deposit of it—all of which acts like so much yeast to contaminate the fresh charge of oil, making the

formation of sludge much easier year. and more rapid. The accumulations of sludge AAA CHIEF REVIEWS which cause these complaints appear on the surface of the filters and are discovered when the operator removes the filter element for cleaning. Upon seeing the collection of pasty material the op-erator is surprised, becomes diserator is surprised, becomes dis-turbed and thinks the oil is at storage loans, crop insurance, exfault, when, as a matter of fact, port assistance, marketing quotas, it must be emphasized that the and soil-building practices. filter was installed for just this purpose: to remove the oil the ma- day our experience with these terials which would interfere with measures during the last 2 years. the proper lubrication of all the First, the acreage allotment. Interior away for the winter, following instructions will prove whether or not they planned it that it is even less work than the from the 62-million acre allotment of 1940. Early reports from the dusing this method on a variety of commodities. However, as I said sufficient that the cleaning should winter wheat areas indicate that a large majority of our farmers be done while the engine and oil at Winnipeg 2 years ago, it has a large majority of our farmers be of countries have used or are from the 62-million acre allotment of 1940. Early reports from the usual practice. First, it is very important that the cleaning should at Winnipeg 2 years ago, it has a large majority of our farmers union Jobbing Associates will contain that the cleaning should at Winnipeg 2 years ago, it has a large majority of our farmers while the engine and oil at Winnipeg 2 years ago, it has a large majority of our farmers been the hope of our people that Governmental financing of exports is a temporary measure. We exist that it is even less work than the distance with the cleaning should at Winnipeg 2 years ago, it has a large majority of our farmers been the hope of our people that a large majority of our farmers been the form the 62-million acre allotment of 1940. Early reports from the distance with the cleaning should at Winnipeg 2 years ago, it has a large majority of our farmers been the form the 62-million acre allotment of 1940. Early reports from the

has been standing all night and surplus of wheat-more than we the oil is cold. On the cold filter element every little slot, necessarily very small in order to do good filtering, is filled with cold oil and the outer surface of the filter provisions of the programs. First, element is covered with a heavy, ors are worked the hardest many pasty mass of sludge. The oil referendum. If they approve the sludging complaints may be repassages immediately back of the quota by a two-thirds majority, slotted filter face are also filled they impose a quota on all wheat endorse the good features of the Soil Conservation Plan, until parity prices are received for farm tractor owners and operators, largely on those machines equipped with metal edgety prices are received for farm tractor owners and soluted litter race are also fined they impose a quota on an wheat with cold oil. Using distillate or chines equipped with metal edgety prices are received for farm tractor owners and soluted litter race are also fined they impose a quota on an wheat operators, largely on those machines even gasolne it is difficult to return the cold sludgy material and wheat requirements, and gives products.

Be it resolved that the members of tractor, where that type of fills organization give a vote of the complaints are the state of the complaints are due to this improper and instances of tractor, where that type of fills organization give a vote of the complaints are due to this improper and instances of the complaints are d thanks and appreciation to our Board of Directors and Business Managers, for their services renManagers, f dered to the organization for the past year.

Seven infinites as compared with the hour or more required to do an sludging trouble, found the same incomplete and unsatisfactory job off the market. The farmer's quota when it is cold. If compressed air for wheat would be the actual

case. Water is also one of the properly just as they now clean a penalty of 15 cents a bushel on products of combustion. Thus there the parts of the cream separator will always be some moisture and to avoid spoiling any of the prodseparator later.

Clean the Oil Filter at the end of Each Day's Work While the engine and the Oil are Hot How can some of this trouble

be avoided next year? Urge as emphatically as possible that the tractor engine be drained and thoroughly flushed before the cold weather operation begins or before it is put up for the winter! Even if it is to be used occasionally through the winter the engine will be better protected and will give better performance if, now that the season of heavy and dirty work is over the crankcase be drained and well flushed with an ample amount of light flushing oil, of the same kind as will be used for lubrication. After the flushing oil has been placed in the crankcase, let the engine idle for fifteen minutes or half an hour, allowing it to get quite warm so that the hot oil will be thrown into all parts used only occasionally. The last of the engine and crankcase. A crankcaseful of lubricating oil is better flushing or washing job will be done if a quart or so more than the regular crankcase capacity is put in for this operation.

> of-Doors While Idling and not in a Closed Building The slight cost of this flushing oil will be saved many times over in the increased length of life and satisfactory operation of the engine. Que manufacturer's instruction man-

ual,-"It should be kept in mind

insurance against high mainten-Let the flushing oil drain out crankcase is drained before starting, more than likely it will be a few revolutions and allow it to done while the engine is cold, drain more. When it is all drained leaving the sludge accumulation out the engine is ready for a fresh charge of good lubricating oil and there will be a much chance for any seeds to be sown for unsatisfactory operation next

decision.

Troubles," which is timely at this date just before winter.

"As you of course know," Mr. Belden writes, "when a machine is to be stored it should be properly prepared aband of time are a prepared aband and a prepared to be a prepared aband of time are a prepared aband and a prepared to be a prepared aband and a prepared to be a prepared aband and a prepared to be a prepared to is to be stored it should be properly prepared ahead of time. If the tractor operator will give attofore, as cleaning has almost al- denly shrink below average. In ways been done before starting out in the morning, when the engine lotments, we could end up with a lother surplus when the engine surplus of wheat more than the surplus with a lother surplus wheat countries. could sell and more than we could

store efficiently. Under such conditions we would the farmers have their say in a To some extent, excessive sludge is available it will assist greatly production or normal production in cleaning out the oil passages. Tractor operators should not allotment. For example, if quotas season would cause large amounts worry so much about the sludge were in effect, a farmer who had of moisture to accumulate in the on the filter but should realize an allottment of 200 acres and procrankcase; in a very dry season, working in dry dusty fields might cause excessive amounts of dust to find their way into the course of the cause excessive amounts of dust if it should be installed. It hold back the production of 20 to find their way into the crank- is their important task to clean it acres or would be required to pay

each excess bushel marketed. The quota hasn't been necessary yet for wheat, but cotton and topacco farmers are using the measure very successfully as an income protection. As you know, farmers who com-

ply with the acreage allotment earn payments. These payments are made in two parts-a conservation payment and a parity pay ment. The conservation paymen is made to help the farmer shift unnecessary wheat acreage from wasteful overproduction, to soil conserving crops. The parity pay-ment is made specifically for the purpose of bringing the farmer's income nearer prewar parity of 1910-14.

1939 wheat payments amounted to 28 cents a bushel on

from the 55 million to 62 million acres for 1940. Once more a high percentage of our wheat farmers land in two ways. I have always helped lighten our surplus and percentage of our wheat farmers land in two ways. I have always helped lighten our surplus and cooperated with the program, and told about the adjustment of such lifted our price above the world eeded 64 million acres.

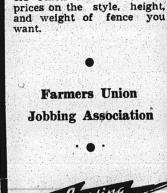

You and I will agree that such farmers and our Government be-

to their fellow farmers, who then had opportunity to study the world wheat situation and its relationship to the war. Wheat farmers decided to stick with their produced with their produced to stick with the stick wit

The 1941 Allotment Assistance in moving export ed. But year in and year out, we one appropriately wheat is not new with us. A numbeen announced, with no change ber of countries have used or are quiring far-reaching changes in

ports will no longer be necessary either by the United States or by (Continued On Page Three) Our most active year for the export program was 1938-39 .That was at the time when the acreage allotment, the wheat loan, and the

# Junior and Juvenile Department

ESTHER EKBLAD, Director

Junior Motto: "He Loves His Country Best Who Strives to Make It Best"

> THANKSGIVING We have no fitting words, dear Lord, For all the good of our receiving. Despite the dark bewilderment Of these strange days, beyond believing. You have bestowed upon us more Than any heart can thank You for.

Accept our simple earnest prayer And take it for our heart's full meaning; Upon Your bounty we depend—\*
Upon Your strength our strength is leaning.
Our fathers thanked You, and we bow Even as they, to thank You now.
—Grace Noll Crowell.

### Grateful for Farmers Union

The season of turkey and of giving thanks for all the lovely things of life is again at hand. In our gratitude I wonder if we couldn't well remember the Farmers Union of our state and nation. In Kansas and in the nation it has for thirty-five years and more been a servant of American farmers in securing their bounty. Through cooperative business and legislative action, farmers have managed to add at least small additional bits to their table of blessings. Through the program of information, farmers, and today also farm boys and girls, are receiving a taste of folk education. The kind of learning which helps people to really live a democracy. For isn't that the name for the sort of things we receive as members of Junior discussion classes in which we learn and talk of everyday problems related to farm living? And isn't a democratic fellowship that which becomes a part of us as we learn to love the folk songs and folk dances, so rich in beauty and tradition? Yes, we are thankful for the Farmers Educational and Cooperative

Union of America which carries on its banner: "The Greatest Good for the Greatest Number." Contest Report

Many splendid posters and scrapbooks made by Juniors, Junior Reserves and Juveniles were on display at the State Convention. Since that time the work has been judged for neatness, attractiveness, originality, continuity of theme, value for reference and study, and relation-ship to economic and social problems. Awards have been given in all divisions and are listed on this page. We are happy for so much fine work done during 1940 and we hope that all who entered this contest, whether a prize was received or not, have profited by the time and effort given toward completing a poster or scrapbook which would carry a message of the Farmers Union.

Awards To Be Presented
In this issue of the KUF are the names of those who will receive Service Awards for 1940. These awards are given by the State Farmers Union to all Juniors, Junior Reserves and Juveniles who earn during the year the required number of achievement points. Most of those who receive their awards this year have earned many more than the needed number of points, which testifies that much has been accomplished.

Will Hear From Torch Bearers As we write the National Convention is still ahead, but as you read we will have been to Denver and have come back home again. We'll look forward to the accounts of the trip which the Torch Bearers, Bernard Schafer and Orville Rawson are sure to give us.

Visit To the Windy City

A trip to a city like Chicago is in itself a thrill, but to be there when a 60 mile-an-hour wind blows is something to remember a long time. Yes, Chicago had some of the sudden weather change that Kansas experienced. There was very little snow, but the freakish storm did its

utmost to express its fury in wind.

Casting weather aside, the most interesting thing about my trip to Chicago was the hours spent in preparation for the panel discussion in which I participated at the Land Grant College Association meeting. Tuesday evening, November 12. We, the nine members of the panel, came to Chicago not knowing each other at all, but with common interests and a common purpose it didn't take us a minute to become well acquainted. We spent most of Tuesday just talking among ourselves and informally discussing the topic of the evening—"Which Way For Rural Youth." As we expressed to each other our opinions and observations on opportunities for youth in farming and job opportunities in other fields, and as we talked of the accomplishments and of the limitations of organizations giving community services to older youth, our thinking was clarified and we begin to feel as one big family with a particular job to do. A job to get done that surely required cooperation, and which was in this particular instance to present a panel discussion which would tell interested people more about the problems of farm

It is hard to share these experiences on paper. All I can hope is that as we grow in our own Junior work, our opportunities to meet and talk with young people representing other organizations and other sections of the country will increase in number. Our two Torch Bearers will experience some of that in Denver as they meet and become acquainted with Farmers Union Juniors whose homes are widely scattered over the

To forestall them, the U.

war did not mean the defeat of airport to see that none of the Great Britain, the cost of rehabilipests come into New York on pastation would be so great as to make probable a continuation of present British restrictions on imports of many commodities, and of efforts to obtain needed supplies from Empire sources. Indications are that the acre-

age seeded to wheat for harvest in 1941 will be about the same as in 1940. Wheat prices in the United States are expected to continue, above levels in competing exporting countries. If we should harvest another large crop, or Gov-ernment loan and export subsidy programs are abandoned, domestic prices might adjust more in line with prices in competing coun-

To Seed 62 Million Acres The acreage allotted for seeding the 1941 crop under the Agricultural Adjustment Act in 62 million acres. This is the same as the allotmen tfor the 1941 crop, when actual seedings totaled 64.4 million acres. If the total wheat seedings for harvest in 1941 are about the same as this year, and average yields are obtained, production will total 750 million bushels. This would leave about 50 million bush-

would be little different from that at the beginning, when it is expect-ed to be 325 million bushels or

The annual average yields per seeded acre in the United States usually vary between about 10 and large carryover. While average yields usually vary only between 10 and 14 bushels per seeded acre,

Wheat prices in the United States, on the other hand, are expected to remain independent, to a considerable extent, of prices in other countries. A large crop, or ant secretary, directed a two and a half hour picture slide talk through the afternoons. port subsidy programs, however, would probably cause domestic prices to be more dependent upon the factors which affect prices in other countries. The large quantities of wheat held under loan in 1938-39 and 39-40 operated to support domestic prices.

The M. F. A's New Leader

Upon the death of William Hirth on October 24, F. V. Heinkel became president of the Missouri Farmers' Association, with headquarters at Columbia. He has served as vice-president of the Association since 1936.

Mr. Heinkel joined the M. F. A. at the age of 18. He owns and op-erates a farm in Franklin County, Mo., where he grew to manhood. He has had a wide experience in the cooperative field, having served as Farm Club secretary, Club president, local Exchange director, county president, State director, member of the State Execu-tive Committee, and State vicepresident. Forty-three years of age, Mr. Teinkel is a successful Export demand, for United farmer, a devout cooperator, an
