SHOWING THEM HOW

Dick Warren, horse specialist at the University of Nebraska, shows some G&G area youngsters how to show and care for horses. The meeting, at Hutchinson, was one of four in the state in July held in preparation for county and district fairs as well as the state fairs upcoming at Hutchinson and Topeka.

Discussion included the ways to train horses to stand properly and to perform so that judges may see their better qualities in the show ring both at halter and in the mounted classes for showmanship.

Rules for showing and management of the horses for entry in the 4H club contest at county, district, and state level contests were explained and discussed fully during the day.

Game Commission Wants DDT Ban

TOPEKA — The Legislative Council Agriculture and Livestock Committee has been told the use of DDT and other long-lasting pesticides should be banned in Kansas.

George Moore, director of Kansas Forestry, Fish and Game

Commission, said the persistent pesticides should be eliminated because of their extreme toxicity or long-lasting effect or both.

"It is my belief that we have put deadly poisons in the hands of too many people who are unable or too selfishly motivated to understand the potential harm that can be done to our environment, to himself or to his neighbor."

"It is my contention that we have allowed deadly poisons to be scattered throughout the world without sufficient advance investigation to know what effect they have on soil, water, wildlife, domestic animals or even man," Moore said.

Rep. John Bower, R-McLouth, committee chairman, said the hearings on pesticides were, in part, aimed at determining whether legislation banning some types of so-called hard pesticides is necessary.

Moore also made these recommendations:

- Encourage use of biological controls and development of new ones.

- Eliminate aerial spraying without consent of all adjacent landowners.

- Limit ground spraying to the crop and crop land to be treated. No field borders, fence rows and shelterbelts should be sprayed.

- Use more selective chemicals and less toxic materials.

- Eliminate ground or aerial spraying in streams or across streams.

- Require all used bags, waste, unused chemicals and washing and cleaning or equipment to be handled in a safe manner.

300 State Bldgs. Don't Meet Fire Safety Standards

Arthur Ramey, state fire marshal, has said that 300 of 800 state buildings do not meet fire safety standards.

Ramey said use of combustible ceiling materials, usually some form of fiberboard or tile, is the most widespread fire hazard.

Even the fire marshal's office itself — in a building not owned by the state — turned out to be suspect.

Ramey recently moved into quarters rented by the state from a private owner in downtown Topeka.

Ramey said he will submit a full report later to Gov. Robert Docking. Docking ordered the survey of state buildings for fire safety after a blaze at Osawatomie State Hospital last December claimed two lives. Officials determined that fire to be arson.

Among buildings found deficient from a fire safety standpoint, Ramey said, are the State Capitol and buildings at Topeka State Hospital, the Boys Industrial School and Kansas Neurological Institute.

Ramey said the only major institution which has not been checked is the state penitentiary at Lansing.

See No Abrupt Shift From Farm Supports

The Nixon administration ruled out any abrupt cut in the 3 billion dollar a year federal farm price support system.

Clifford M. Hardin, secretary of agriculture, said that "for the foreseeable future — and I don't know the number of years — we are going to need price support programs for several of our commodities."

He also said he would like to see the food stamp program to aid the poor handled separately from a general farm bill. But Rep. W. R. Poage (D-Tex.), chairman of the agriculture committee, insisted that the "production and distribution of food should be kept together and brought to the House floor at the same time."

Poage is seeking leverage to make certain that present farm programs are continued, without major change. Toward this end, he has put the food stamp program in the farm bill to attract support of urban members who would like to slash farm subsidies and use more money to feed the poor.

Nearly all of the 33 members of the House panel attended the

hearing before a standing-room-only audience that had expected to hear some verbal fireworks during Hardin's first formal appearance before the committee. Instead it was a quiet affair, ranging over a multitude of farm problems and food stamp problems.

Even the protection of consumers got some attention. Rep. Graham Purcell (D-Tex.) questioned the advisability of retiring from crop production large chunks of land and turning the land to cattle grazing.

Livestock producers, he said, would hold back breeding stock instead of sending them to market, and thus cause a rise in the consumers' price of meat. Of course, he said, the price would fall as cows produced more calves, but this would be over the long run.

Hardin, who is considering proposing some form of a land retirement program to hold down surplus production, agreed and said that any land withdrawal should be "gradual." Further, he said, the administration was not yet committed to any one land retirement idea.

- Place restrictions on sale and use of certain chemicals to keep them out of hands of untrained persons.

Wendell Bever, Norman, Okla., of the National Wildlife Federation, also appeared before the committee.

It plans to move slowly before making a final decision on pesticides, Bower said.

We're a bunch of farmers and we're not likely to go off the deep end. On the other hand, we're human beings," he added.

Missouri Resumes Hog Shipment Within State

Swine movement restrictions in Missouri have been relaxed.

Dexter D. Davis, commissioner of agriculture, said the incidence of hog cholera has dropped to a level that will permit near normal movement of swine within the state.

The disease was first spotted early in June when several herds in Southeast Missouri became infected.

All movement of swine was then halted, except for hogs sent to market for slaughter.

Davis said that feeder pigs and breeding stock will be allowed to move within the state, but out of state shipments will be restricted until further notice.

Dr. George Stiles, state veterinarian, said five adjacent states have agreed to start accepting swine from Missouri next week if the incident rate continues to drop.

FATALLY INJURED IN STABLE ACCIDENT

Vivian "Doc" Mayfield, Salina, was killed in an accident at a stable north of Salina. Mayfield suffered a skull fracture and other head injuries when he was struck by a horse while cleaning inside the stable.

PROLIFIC LIVESTOCK SHOWMEN

G&G area families will have a difficult time surpassing the prolific livestock showmanship records of the Kenneth Ebert family of St. George. Frequent participants at many fairs and livestock shows, the Ebert boys and girls have been successful bidders and contest winners at Red Circle auctions over recent years.

At the 18th annual Gooch Red Circle auction at Brookville, three Ebert boys came

back with Suffolk lambs "bought" with emblems from Gooch products. At left, Ken, 16, shows the lamb for which he paid 5900 Red Circle points. Eight-year old Jeffrey, center, paid 5800 points for his lamb, and Rick, 15, paid 5900 for his lamb.

All three boys also won cash awards for projects from purchases at the 1968 auction.

Ken won \$25 for a project with a Hampshire lamb, and Rick and Jeffrey won \$5 each, Rick for a Hereford heifer project, and Jeffrey for a lamb project.

Happiness For Small Banks Is Lending To Big Banks

Money market banks in cities such as Chicago and New York are faring worse than their country cousins in these times of the great credit squeeze.

But even with this squeeze, both types will continue to grow in earnings this year, say analysts.

While open-market rates on money have climbed sharply, the Federal Reserve, in an effort to dampen inflation, has maintained the ceilings on the permissible interest rates banks may pay on time and savings deposits. These rates range from 4 to 6½ per cent, according to the amount and time of deposits.

However, the prime rate which banks charge their best customers for loans has gone through five upward changes since December to its present 8½ per cent.

The Federal Reserve's interest-rate restriction has triggered a massive pullout of time-certificate deposits — about 7.6 billion dollars between December and June — mostly by corporations looking for a better investment return.

CIRCULATION 14,200

Since major moneymarket banks obtain a greater percentage of their funds through these certificates than small or regional banks, they have been forced to scramble more for loanable funds than the country banks which depend more on passbook savings.

With no great run on passbook savings accounts, one has this picture of the smaller banks: They are collecting higher interest on their loans now that the prime rate is 8½ per cent, while paying only about 4 to 6½ per cent on their deposits. They also are turning around and lending their money to larger banks at a strapping 9 per cent.

"The smaller banks are enjoying it," said an economist for Chase Manhattan bank.

While analysts say that escalating interest rates will mean a 10 per cent average increase in bank earnings this year, the high cost of obtaining money will cut the profit margins of many banks.

"Earnings in 1969 as projected will mark the seventh consecutive yearly increase," comments the Bank Stock Quarterly, a securities publication, "and an annual growth rate since 1962 of 9.3 per cent."

As the stock market continues to drop, analysts were asked, "How does bank stocks now compare with other types?"

Bank Stock Quarterly said that since the end of 1968 the decline in bank stocks had follow-

ed the general market trend. In the last 18 months, however, "stocks of banks and bank holding companies have outperformed leading stock averages," Bank Stock Quarterly reports. "Banks are making better money than industrial companies," commented H. England, Editor of Moody's Investor Service, Inc. "They have relatively consistent earnings, show very good results and represent a good investment."

Lutheran Women Get Church Vote

A major Lutheran denomination of 3 million members has decided to allow its women to vote on church matters, cautiously changing a males-only tradition dating from its founding 120 years ago.

The biennial convention of the Lutheran Church-Missouri Synod passed a resolution permitting women's suffrage but warned against ordained female ministers.

"Women ought not to hold pastoral office or exercise authority over men," it said in upholding part of its tradition on the subject.

The delegates urged "caution and deliberate action" in putting the vote permission into practice in local congregations around the United States. It will be up to each congregation whether to let women vote — and thereby eligible to serve on decision-making committees, commissions and boards.

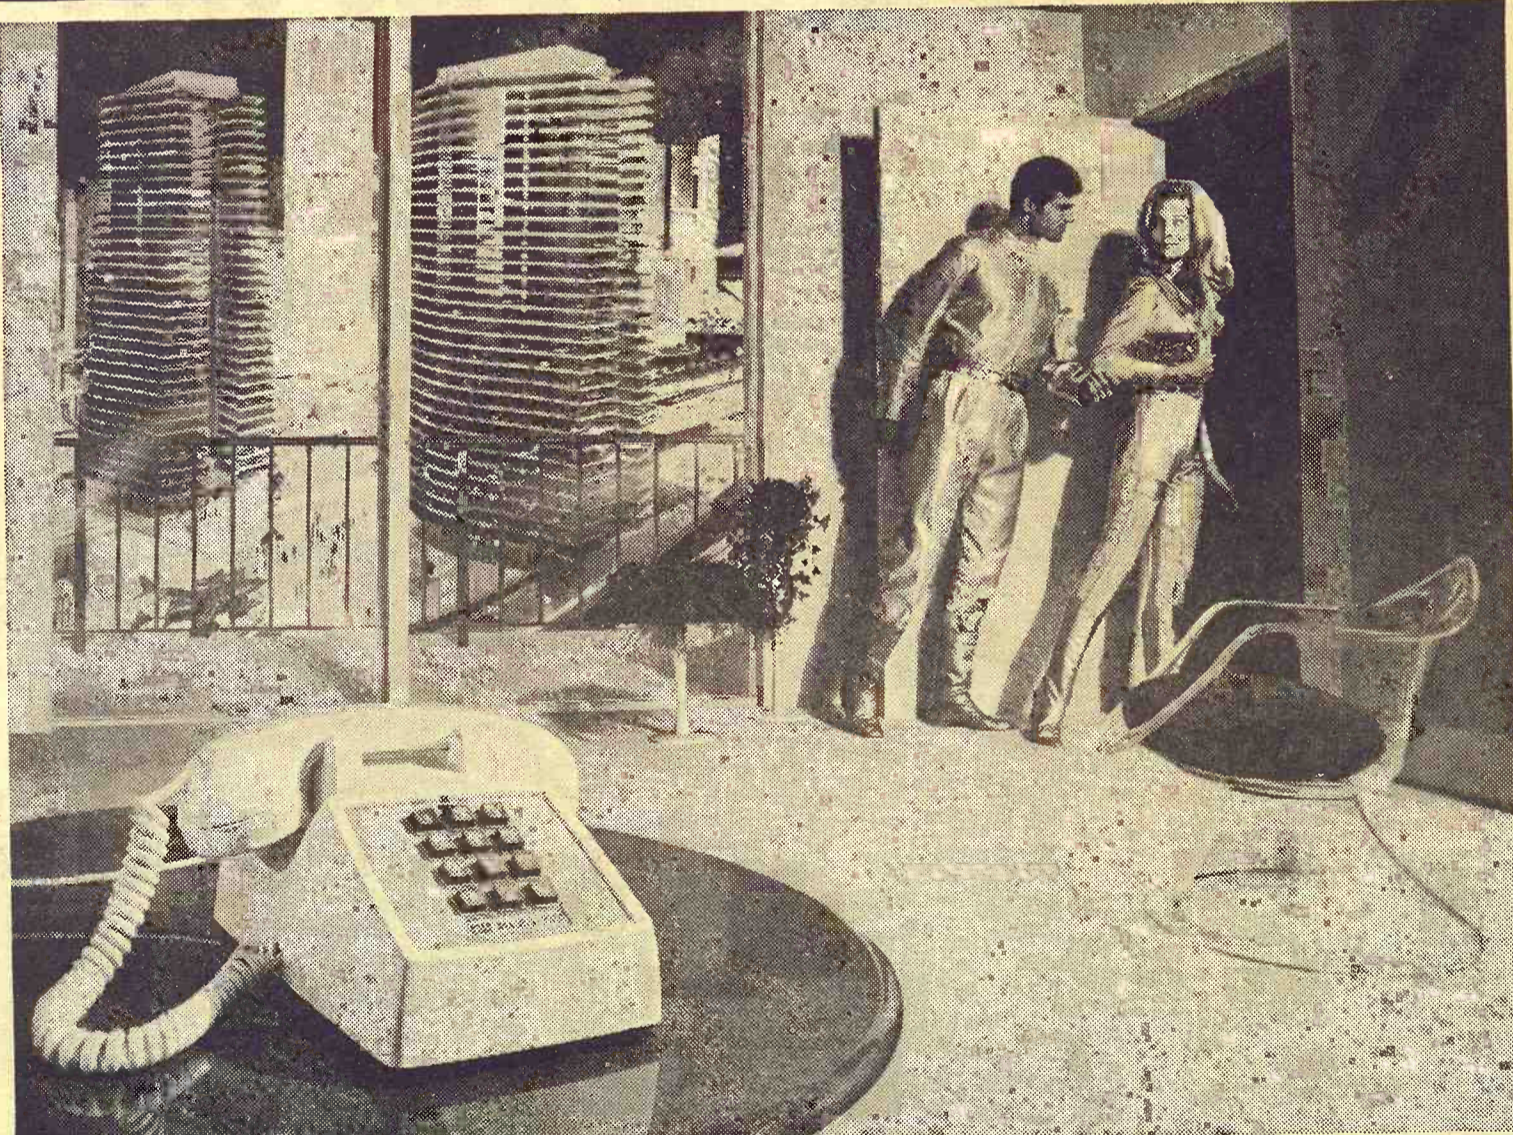

The Missouri Synod thus comes one of the last big denominations in Christianity to bring women up to equal, or almost equal, church status with men. A number of its local churches had begun to allow women to vote in the past two years but the liberalizing practice has been rare.

Younger and more liberal-minded members of the Lutheran Church-Missouri Synod have been pressing at the Denver convention for female equality in the church and help for minorities.

Injured In Plane Crash

Wayne Spangler, Concordia received injuries when his engine crop-dusting plane crashed in a cattle feed lot north of Belleville.

Spangler, who was pinned in the wreckage for nearly an hour, was reported by hospital officials to be in fair condition.

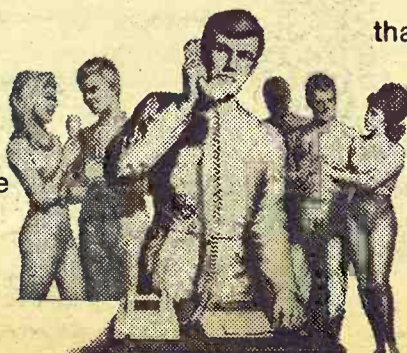

The Potters are expecting a very important phone call.

In the years ahead, you'll be able to preset your telephone to transfer calls to the number where you're visiting.

Electronic switching — using a sophisticated computer system — will make this and many other new services possible.

For example, your phone will have a memory. By dialing just two digits of a frequently called number, you'll activate

that memory, then the phone will dial the remaining digits automatically. Electronic switching is fact, not fiction. It's part of our program to plan today for tomorrow's communications needs.

We may be the only phone company in town, but we try not to act like it.

Wide Variance Seen In Corn Prospects

The first official forecast of 1969 corn production was about as we expected. Production was forecast at 4,286 million bushels — 2 per cent less than the estimated production last year. Most of the reduction is the result of reduced acreage planted. The acreage of corn planted for grain was listed at 54,758,000 acres — down 2 per cent from last year.

The average yield of corn per acre was forecast at 78.3 bushels. This projected yield is practically the same as the 78.5 bushels recorded for the 1968 crop.

Basis of forecasts. The forecasts are based on two principal kinds of information: (1) reports from regular farmer-crop reporters and (2) information provided by specially-trained fieldmen who watch, record, and report the progress of the corn in representative fields throughout the state.

The forecasts made in July reflect conditions on July 1, and are made with the assumption that weather conditions will be about normal during the remainder of the growing season. The crop-reporting people know that weather conditions seldom are normal, and they expect to revise their forecasts each month, taking new developments into account.

Accuracy. How accurate are the forecasts of corn yields made on the basis of July 1 prospects? This varies, of course, from year to year. Last year, the July report was probably the best one made all season. Later forecasts proved to be too high. The 1968 monthly forecasts and estimates of U.S. average yields were as follows: July, 79.7 bushels; August, 81.5 bushels; September, 83 bushels; October, 82.1 bushels; November, 79.4 bushels; and December, 78.5 bushels.

Two years ago, the forecast made from conditions on July 1 proved to be far too low. The monthly forecasts in 1967 were: July, 73.5 bushels; August, 75.9; September, 76.5; October, 76.9; November, 76.6; December, 78.2; and the final estimate, 78.6.

Crop conditions. Crop conditions are quite poor in some areas.

There was too much rain in some of the far-southern and far-northern Illinois counties; also in Ohio and some other places. There was too little rain in some southern states. But some farmers from other areas report that crops are excellent. Many farmers report that the crop is a few days later than usual.

Price pattern. The seasonal pattern may be quite different from term of prices for the 1969 corn that of the present year. Prices dipped well below the price-support loan level at harvest time last fall, then made an unusually large seasonal rise.

Prices for the 1969 crop probably will hold up much better during the harvest period. Less new corn may be locked up under loan, and the seasonal advance in prices may be quite small.

The COC may become a more active seller of corn. The Government will own much larger

AMA Reverses Loan Policy

The American Medical Association, citing high interest rates and a tight money supply, has reversed its policy and approved federal loans to medical students.

The AMA's governing body, the House of Delegates, approved without dissent a resolution calling for an increase in federal financial support of medical schools.

The purpose: "To permit a major increase in the enrollment of medical students and the production of physicians."

A study committee recommending approval at the AMA's annual convention said it believed a policy change was justified because of "current fiscal conditions which make it increasingly difficult for students to obtain loans from the private sector as a result of high interest rates and a restricted supply of money available for personal loans."

The AMA also approved a measure supporting in principle the inauguration by state boards of education or local school districts

of a voluntary family life and sex education program at "appropriate grade levels."

The AMA said that any education program must be properly defined, and emphasized that it was not talking about sexual technique or sexual deviation.

The House of Delegates also: Overwhelmingly rejected a proposal aimed at demonstrators

July 29, 1969

such as those who disrupted the AMA's opening session. The proposal would have required that security measures be invoked to prevent any repetition.

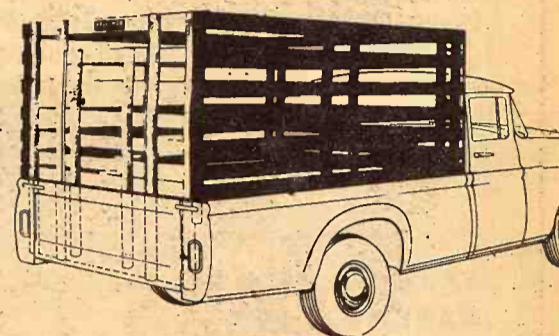

Gave tentative approval to proposed credit card systems for the payment of physicians' fees.

Pick-up racks

for any make or model pickup
Sturdy • Convenient • Practical

Mounted free on your truck at factory or shipped to you. Available in stock rack or fold-down combination.

Fits all trucks. No bolt projections to injure stock. Top grade select kiln-dried lumber. Choice red or white. Fits precisely so pick-up endgate closes behind it. Sturdy oak stakes. Lift-up gate slides easily in steel channels. Standard height 63". Special height on order.

OUR DAILY BREAD

— by G&G Area Cooks

Abilene Resident, Mrs. Ray Engle, Is Winner

Winner, Mrs. Ray Engle, R 3, Abilene: "This is a salad that's easy to make and everyone seems to like it. We are new subscribers to the Grass & Grain and really enjoy it very much."

APPLESAUCE SALAD

1 package lemon gelatin
1/2 cup red hots
1 1/2 cups sweetened applesauce
1 cup hot water
1 3-ounce package cream cheese
1/2 cup chopped celery
1/2 cup salad dressing
Pour hot water over gelatin and red hots. Stir until gelatin is dissolved. Add applesauce and pour half of mixture into mold. Allow to set. Blend cheese, chopped celery and salad dressing. Spread over the firm gelatin then add remaining gelatin mixture on top. Chill.

July 29, 1969

Mrs. Effie Frank, R 2, Wamego: "I enjoy the Grass & Grain and the recipes very much. I've tried many of them and clip the ones out that I think I may use sometime and paste them in a notebook as I love to collect recipes."

DIET BREAD

2 3/4 to 3 1/4 cups unsifted flour
1 tablespoon sugar
1 package (Fleischmann's) dry yeast
1 cup hot tap water
2 tablespoons Planters peanut oil

In a large bowl mix 1 cup flour, sugar and undissolved yeast. Gradually add the tap water and oil mix thoroughly; add 1/4 cup more flour or enough flour to make a thick batter. Beat with mixer at high speed two minutes, scraping bowl occasionally. Stir in enough more flour to make a soft dough. Turn out then onto a lightly floured board knead until smooth and elastic about 8 to 10 minutes. Place in a greased bowl and grease top of bread with oil or melted butter; cover with waxed paper and then a cloth. Let rise in a warm place, free from draft, until doubled in bulk (takes about 45 minutes, usually.) Then punch down and let rise again as before, then next rising shape in a 9x5x3-inch pan. Cover again. Let rise again until double in size. Bake in a hot (400-degree) oven about 45 minutes or until loaf sounds hollow when tapped with fingertip and leaves side of the pan. Remove from Pan and cool on a wire rack; grease top of loaf with milk or you can use oil. Double the recipe if you want to make two loaves.

Mrs. Nancy Zimmerman, 1513 Oxford Place, Manhattan, contributed the following recipe, which

not only is a moist chocolate cake, but provides a delicious surprise with the addition of maraschino cherries to the ingredients.

CHOCOLATE MARASCHINO CHERRY CAKE

Cream together:
1 cup butter
2 cups sugar
Add and beat well:
2 eggs

Sift together:
3 cups sifted flour
1/2 teaspoon salt
2 teaspoons soda
Add the dry ingredients alternately with:
2 cups buttermilk

Then add:
2 ounces melted baking chocolate
1 8-ounce bottle maraschino cherries (chopped, but not too fine) and juice
1 cup chopped walnuts
Bake at 350 degrees for 55 minutes or until toothpick inserted in center comes out dry.

FROSTING

2 cups sifted confectioners' sugar
2 tablespoons cocoa
Dash salt
Mix above ingredients. Pour 3 tablespoons hot coffee over 1/4 cup butter and 1/2 teaspoon vanilla. Add to dry mix and beat well.

The following recipe is from Velma Pape, 1215 Colorado, Manhattan:

ICE BOX DESSERT

32 marshmallows

1 cup raspberries, boysenberries or strawberries
3/4 cup juice
3/4 cup cream, whipped
Melt marshmallows in juice, cool, add fruit and whipped cream. Pour into chilled crust of 1 1/2 cups graham cracker crumbs. 1/2 cup powdered sugar, 1/2 cup butter.

Mrs. Lee Johnston, Tecumseh: "We like the Grass & Grain very much."

DEVIL'S FOOD CAKE

1 1/2 cups flour
1 cup sugar
3 tablespoons cocoa
1/2 cup oil
1/4 teaspoon salt
1 teaspoon soda
2 teaspoons vinegar
1 cup cold water
Mix all ingredients together. Bake in ungreased pan at 350 degrees. "Real good moist cake."

International 234 harvester—

it snaps...

it husks...

it shells...

it grinds...

and it fits 29 tractor models.

Not only will your new International 234 field process your corn any way you choose, but it will harvest every kind of corn. Rear processing units quickly mate to one universal frame. You can snap or husk or shell—or add either the new multi-purpose grinder or multi-purpose sheller. In minutes, you're ready to handle every type of corn.

Field corn. Harvest it husked or unhusked, shelled or shelled and cracked—or as ground ear corn feed. You can crack and also vary the cob going into the mix from 35 to 85%.

Seed corn. Handle even the small, single-

cross varieties without damage or loss—with the unique stalk-roll stripper-plate design. Sweet corn. Add a simple, inexpensive sweet corn attachment and you'll harvest clean and fast. No need to remove this attachment in field corn.

Will the 234 fit your tractor? Sure. It mounts on five makes, 29 different models. See your International man soon for the one corn harvester that can do it all! The one built to pick like a combine corn head to save up to 10 extra bushels per acre! Your dealer's convenient financing program is a big help. It's scaled to your income.

International 234 Corn Harvester mounted on an International 656 Hydrostatic Drive tractor—a fast, non-stop harvest team.

try New Purina GRASS stretcher

With rising land costs, grass is becoming more valuable. Cattlemen need extra beef per acre.

Purina has a high energy, 12 1/2% protein pellet to help cattlemen stretch their grass. New Purina Grass Stretcher gives weaned steers and heifers extra energy and nutrition on less grass. That means land can support more animals.

Backgrounding calves and yearlings on grass pays dividends. The faster they grow, the more money on the hoof. Purina Grass Stretcher helps build those frames and get 'em ready for starting rations.

Get the most from your land investment by supplement feeding new Purina Grass Stretcher. Stop in for your supply at our store with the Checkerboard sign.

Summer Party Cake Is Easy To Bake

The Latest 'Daily Bread' Prize

Cream 'N Sugar Set

THREE PIECE set includes a serving tray. These dairy farm accessories with their unusual shapes will be conversation pieces. Made of polished, triple-plated chrome steel to brighten your kitchen. A product of Aluminum Housewares, Inc., St. Louis, Mo.

The winner each week is drawn by lot from the recipes printed.

Win one by sending us your favorite recipe — this can be main dish, leftover, salad, side dish, dessert or what have you.

1. Check your recipe carefully to be sure all ingredients are accurate and accounted for.

2. Be sure your name and address are on the entry.

3. Only one recipe at a time, please.

4. Send it to Woman's Page Editor, Grass & Grain, Box 10069, Manhattan, Ks., 66502.

It's summertime, so keep your baking easy. This beautiful cake gets its glamor from a cloud of whipped topping and a generous measure of juicy fresh blueberries. It's made with lemon flake cake mix with an added whiff of spice.

LEMON FLAKE BLUEBERRY CAKE

1 package lemon flake cake mix

¼ teaspoon cinnamon

2 eggs

1½ cups water

Cinnamon Whipped Cream*

2 cups fresh blueberries

*Or use 2 cups prepared whip-

ped topping, flavored with cinnamon, if desired.

Prepare cake mix as directed on package, adding cinnamon with water and eggs before beating. Bake as directed for a 9-inch square pan. Cut cooled cake crosswise in half to form two layers. Spread 1 cup Cinnamon Whipped Cream over bottom layer and top with 1 cup blueberries. Place second layer on top and swirl remaining cream over cake. Sprinkle with remaining blueberries. Cut in 3-inch squares. Serves nine.

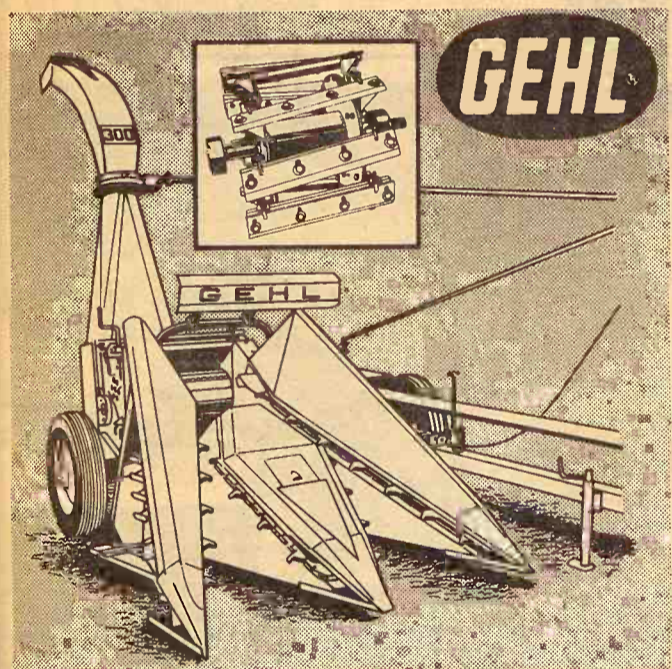

Cinnamon Whipped Cream.

Combine 1 cup (½ pint) heavy cream, 2 teaspoons sugar, a dash of cinnamon and ½ teaspoon vanilla in a chilled bowl. Whip just until soft peaks will form. (Do not overbeat.) Makes two cups.

By Beverly Macy
I was talking to a salesman about ordering an avocado coffee maker and he wanted to know if it had to be avocado because

they were rather hard to get. I told him I wanted it to match my avocado refrigerator and added that my laundry room appliances were avocado, too. He looked at me quizzically and asked, "Are you planning to make much coffee in your laundry room?"

My husband called our small son to watch the space ship land on the moon. "It's important that you watch," Daddy explained. "When you grow up, some-

one may talk about the moon landing and you can tell them, 'Oh, I remember seeing it on television.'" "Well, who's going to want to talk about the moon to a cowboy," replied the youngster.

Professional Laundry Methods May Aid Homemakers

Some laundry techniques used by the professionals can be of great help to the homemaker.

A professional launderer carefully inspects all draperies for damage before washing. For excessively soiled draperies, the professionals pre-rinse in warm water for a few minutes; drain; add enough warm water for the draperies to float freely, a low suds detergent and then wash. A homemaker should gently squeeze and dunk the draperies. Fiberglass should be washed alone, not with other fabrics.

Extremely soiled white draperies are treated by adding one half teaspoon sodium perborate or safety-type bleach per gallon of water with the detergent. For cigarette smoke, or similar type soil, soak draperies after washing in a solution of one teaspoon ammonia per gallon water for from five to 30 minutes. Do not use the ammonia soak if you have used bleach in the washing procedure and use only the amounts recommended.

To treat persistent stains, saturate the stained area with concentrated detergent, rub gently with soft sponge and rinse with clear water. Fiberglass draperies should be rinsed in warm water until water runs clear. Rinse tub or basin thoroughly after each

washing.

Commercial launderers, like homemakers, never machine wash or machine dry fiberglass draperies. While they are damp, draperies should be hung over a line to drip dry. The seams and hems are gently pulled to insure smoothness. Fiberglass never needs ironing and should not be dry cleaned.

Lost Keys Can Be More Than An Inconvenience

More than 45 million keys are lost annually. House keys labeled with the owner's name and address are the perfect invitation to the finder (who might be a burglar or prowler) to visit you.

Keys dangling on a ring, such as house keys on your car ignition ring, can be removed, duplicated and returned to the car quickly. Remember to remove other keys from the car ignition ring when you have your car serviced or parked by an attendant.

A separate key ring for office, house and/or car is well worth the trouble. You might find a snap-apart key chain convenient.

Pattern For Vinyl Fabric Should Be Simple

The pattern you choose for

your vinyl fabric should be simple with straight lines and a minimum of seams and darts. Avoid patterns that call for complicated seams and buttonholes, zippers, snap fasteners or other to fasten openings. Make sure your pattern is cut before you cut and sew. It cannot be ripped and sewed a second time. You may even your pattern on muslin or a sheet before you try it on.

To Thread Yarn Thru Needle Eye

To thread a needle with or elastic thread, push the end of mercerized cotton thread through the eye of the needle. Stick the end of the thread through the elastic thread through the thread loop, pull the thread and the other will come through.

Mexico Top Beef Cattle Importer

Mexico was the leading importer of U.S. beef cattle with nearly 6500 head there. U.S. beef exports were 17% in 1968 from the year, with the total at 20,000. Venezuela and Canada were 2-3 in receiving U.S. beef. Herefords were the most popular exports, with 7338 shipped. Brahmas ranked with 2930, Angus 3rd with 1900. There were 1900 head of lais exported and close to Santa Gertrudis.

Sees No Improvement In Wheat Prices

With the 1969 wheat crop — the second best ever in Kansas — in the bin, Kansas farmers can expect little improvement in wheat prices during the coming months, in the opinion of a Kansas State University Extension economist.

In fact, prospects are slim for any upturn in the price situation for the next three to five years, Don D. Pretzer says.

Spurred by another bumper crop and a drop in exports, total U.S. supply, including carryover, will be the largest in six years, Pretzer says.

The 1969 crop — 1.42 billion bushels — the fourth largest ever, follows last year's all-time high of 1.57 billion. The 1967 crop totaled 1.52 billion bushels.

The economist looks for world wheat trading to dip approximately 10 percent in 1968-69, with U.S. exports slumping to 535 million from 761 million a year earlier.

Supplies available for export or carryover in the four major wheat exporting nations — U.S., Canada, Australia and Argentina — were estimated at 2.4 billion bushels. That's up 580 million from a year ago and 720 million above 1966-67.

Brightening the export picture a bit is this factor: Countries in the northern hemisphere are expected to produce a smaller

wheat crop in 1968.

On the domestic side, use of wheat for food has been relatively stable. Increased use as feed has helped reduce supplies. Higher feed use can be expected to continue as wheat prices remain at or below the loan level.

Pretzer sees a further buildup in carryover by July 1, 1970. This will probably force another reduction in acreage allotments for seeding this fall, he says.

He looks for a continuation of the \$1.25 national loan rate in 1970.

With current cash prices 15 to 30 cents below the loan level, Pretzer believes at least short term storage and/or participation in the loan program would be profitable for most farmers.

Some Prospect For More Foreign Trade

The Bureau of International Commerce has predicted that U.S. trade with foreign countries will increase substantially during the remainder of 1969.

In the weekly Commerce department magazine the bureau said the outlook is for a signifi-

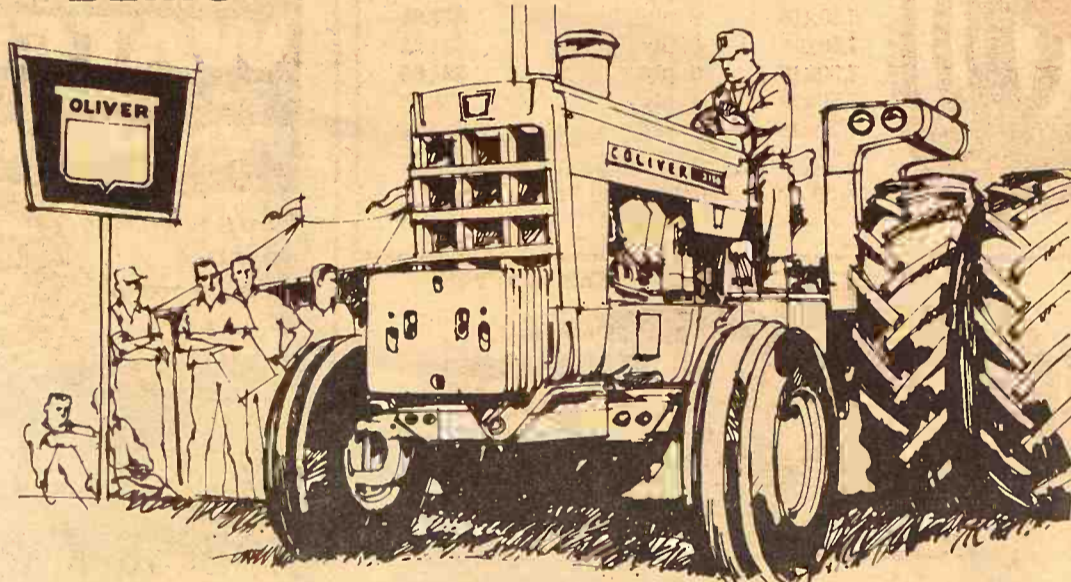

cant gain in exports and a sharp deceleration in the pace of imports.

It attributed the slowing growth of imports to "evidence of a softening of the economy in recent months and prospects for a further slowdown in the second half" and to the fact that there are no strikes or strike threats in the metals industries or on the waterfront as last year. The dock strike at Atlantic and Gulf Coast ports, which ended in February, strongly affected trade, the report said. But it added that its effect cannot be estimated yet.

The bureau noted that purchases of foreign products rose by 24 percent in 1968 under the stimulus of a booming economy and potential or actual strikes. Between January and May of this year, however, exports rose 4½ percent while imports rose 7 percent.

The report predicted increasing exports to European Common Market countries, Britain, Canada, Japan and Australia, but said prospects for shipping to the developing countries are less bright than last year. Strong domestic demand in some foreign countries is likely to have a favorable effect on the American trade balance, and the second of five Kennedy Round tariff cuts last January should stimulate trade in both directions.

Rebel Over Rising Juco Tuition Costs

Members of the education committee of the Kansas Legislative Council have expressed concern over the soaring operating costs of public community junior colleges in the state.

The increasing costs are reflected in estimates of the schools' out-district tuition charges for the 1969-70 school year.

Out-district tuition refers to

the amount one county pays for its students who attend a community junior college in another district.

The amount is equal to the average operation and maintenance costs of a full-time student, less tuition and state and federal aid.

The amount is subject to a limitation equal to the state-wide average operating cost for a full-time pupil in the preceding year.

Sen. Joseph Harder (R-Moundridge) noted that anticipated out-district tuition charges for Dodge City and Allen County junior colleges next year are nearly double the rate for the

year just ended.

The out-district rate for Dodge City last year was \$482.15 and the estimate for next school year is \$845.70.

Allen County had an out-district tuition of \$515.67 last year, but the estimate for next year is \$968.40 — an 87 percent hike.

"You can see why we are concerned," said Hagber, chairman of the committee.

He addressed his remark to Carl Heinrich, director of the State Department of Education's community junior college section, who was appearing before the committee.

Heinrich expressed concern also.

He said he wants to see the community junior college program succeed, but that he realizes finances are a problem.

He said one factor in the increase is that some community junior colleges are moving into brand new plants, with maintenance costs much higher than in the old plants. He said in some instances, junior colleges have been sharing maintenance costs with high schools.

Heinrich said other factors include expansion in the vocational-technical field; increased enrollments requiring additional

faculty members, and higher salaries.

Firm Strength In Beef Market

"Major market indicators show that there is not an over-supply of beef. The supply and demand situation should continue to be favorable and remain healthy to cattle producers and feeders if all cattlemen use sound marketing practices," observed Bill House, president of the American National Cattlemen's Association. House consulted with leading cattle feeders from all parts of the country and ANCA economists for two days.

The ANCA spokesman said that major factors which point out the market's strength and solid foundation are:

1) Commercial beef production is running at just about last year's levels. It has been a long time since beef production for a six-month period did not exceed beef production for the same period a year ago. It is beef tonnage that counts.

2) Effective consumer demand is running about five per cent above year-ago levels.

3) Beef is moving very well at the retail level. The overall economy is in good shape and unemployment is way down.

4) Beef imports, subject to present meat import law, will cut to about zero during the fourth quarter of 1969 because of a high rate of flow into the country since the beginning of the year.

5) Live imports of cattle from Canada and Mexico are tapered off substantially because of lack of animals.

6) Pork and poultry prices improving as a result of a downward adjustment in available supply.

House remarked that the cattlemen must remain alert to keep well informed of the marketing situation in order to hold and improve the market, and must not be unduly influenced by those who may attempt to force the market down by representing the true market situation.

The cattlemen's leader emphasized that "feedlots, above all, should not hold cattle and lots could be more current than they are. If all cattle were on feed for one more week, tonnage would increase about two per cent." He urged feedlots to make a special effort to move cattle immediately when ready.

FARMERS OUTLOOK

L.H. Simerl

5 Percent More Cattle On Feed

The caution flags are out for cattle feeders: Prospective market supplies of fed cattle are considerably larger than those of a year ago. And the growth of consumer demand is slackening. The USDA survey and report of cattle on feed July 1 shows the market for supplies. It showed that farmers were fattening 10,397,000 head of cattle and calves, 15 percent more than a year before. The report also disclosed that farmers expected to market 5,942,000 of these cattle during this quarter, 11 percent more than a year ago. This report covered 22 of the most important cattle feeding states. We do not expect the output of beef to be up 11 percent — for two reasons: (1) We think that the increase in marketings of fed cattle will fall short of 11 percent. (2) Marketings of non-fed cattle probably will continue to be less than in 1968. Even so, we expect beef output to exceed last year's levels by 5 to 8 percent.

Consumer demand may weaken. There are several indications of weakness in demand for beef. While consumers' incomes continue to increase, rising costs for many other items restrict the amount available for spending at the beef counter. The government is trying to check inflation by restricting consumer spending. Supplies of chicken will be very large — perhaps up 6 to 8 percent from 1968 levels. Supplies of pork will be increasing

seasonally, and may be slightly larger than last year. Finally, consumer spending in restaurants, where beef is the big favorite, has leveled off.

Little increase in heavy cattle. Cattle feeders seem to be holding the line on market weights. Recent slaughter weights were near those of a year earlier. The number of heavy cattle in feedlots was listed at only 674,000, just 3 percent more than a year before. This number included steers weighing over 1100 pounds and heifers over 900.

The next weight group numbered 3,668,000 head, up 8 percent from last year. It included steers weighing 900 to 1100 pounds, plus heifers 200 pounds lighter.

More light cattle. Cattle feeders are "buying them lighter and feeding them longer." This is indicated by an increase in the number of lighter cattle in feedlots on July 1.

Steers weighing 700 to 900 pounds and heifers 200 pounds lighter numbered 2,451,000, 26 percent more than last year. Steers weighing 500 to 700 pounds plus heifers under 500 pounds totaled 476,000 head, 7 percent more than a year before.

Placements up. Farmers put 5,171,000 cattle into their feedlots during the second quarter (April-May-June). This number was 17 percent more than they put on feed in the same period a year earlier.

This heavy movement of cattle into feedlots followed a light

movement during the first quarter, when placements were 1 percent less than in 1968. The large placements during the second quarter could lead to some bunching of marketings during the fall months. This possibility is supported by reported marketing intentions. Cattle feeders said that, of the cattle on feed July 1, they planned to market 4,455,000 head after October 1, 22 percent more than in 1968.

Total marketings, however, will not increase nearly so much. This is because the number of other cattle (meaning cattle not on feed July 1) to be marketed during the fourth quarter will almost surely be much less than in 1968.

Univ. of Illinois

Drop Herington Charges On Meter Fixing

Criminal charges against 10 Herington city power plant employees accused of alleged "meter fixing" to reduce their own electric bills were dismissed Friday by Judge Albert Fletcher in Dickinson County District Court.

The judge acted on the request of County Attorney Max Hinkle, who asked that the case be dropped because of a lack of evidence.

Hinkle said he had come to the conclusion that the evidence "does not allow me in good faith to go forward and in good faith to continue the trial."

The motion to dismiss was made near the end of the second

day of the jury trial which resulted from grand jury indictments of the 10 present or former city employees. A grand jury was called last winter to investigate a wide array of charges that had grown out of a smoldering civic squabble at Herington which became an issue in at least two city elections.

The grand jury returned identical indictments against the 10 men. The charges, however, specified only a nine-month period in 1967. Many questions arose at the trial over admission of evidence outside this period and nearly a full day was taken in settling these issues in court before a jury was empaneled. Thirty-eight prospective jurors were questioned to seat the required 12.

MILFORD LAKE ASSN. WON'T HIRE MANAGER

JUNCTION CITY — The Milford Lake Assn. has decided to do without a paid secretary and will divide the work among several directors. Jerry Patterson recently resigned the post of executive secretary to become manager of Flag Stop Camp-Inns at Beleville.

Private Enterprise Forum Set For August 26, 27

JUNCTION CITY — The fourth annual Kansas Private Enterprise Forum is scheduled for Aug. 26 and 27 at Rock

July 29, 1969

Springs Ranch, south of here.

Robert E. Schmidt, Hays, president of the Kansas State Chamber of Commerce, said the two-day event is designed to develop a better and closer working relationship among farmers, bankers and businessmen in maintaining, improving and promoting private enterprise.

Theme of the 1969 conference is "Kansas On The Move — Where To?"

Sen. James Pearson, R-Ks., is to discuss Rural Area Development, a program he is fostering in Congress.

Other major speakers include R. E. Frisbie, Kansas Farm Bureau president; L. M. (Duke) Weltmer, Mankato, and Jack Lacy, director, Kansas Department of Economic Development.

Two G&G Area Sites For Management Field Day

How to get there . . .

Herbert Niles feeds high moisture grain in his cattle feeding program. He grows soybeans, milo, corn, silage, alfalfa and wheat on some 2,800 acres of cropland.

David Hirt manages an extensive swine operation and farms about 300 acres of cropland. He also winters about 50 steers each year.

The Kansas Farm Management Field Day — fast becoming one of the most popular farm field days in the state — comes to eastern Kansas next week.

More than 700 persons are expected to visit the the Herbert Niles farm 20 miles north of Burlington and the David Hirt 13 miles west of Garnett during the August 5 event.

Sponsored by the Kansas Cooperative Extension Service in cooperation with the Chamber of Commerce of Greater Kansas City, the field day is open to the public.

Purpose of the event is to give visitors an opportunity to see firsthand how some of the top farmers in the state handle their operations.

The field day is one of two being planned in Kansas this year.

A similar event is set for August 8 on three farms and a commercial feedlot in Barton and Pawnee counties in west-central Kansas.

The August 5 field day gets underway at 9:30 a.m. with concurrent programs on each farm. Visitors may examine the facilities and hear each operator tell why his business has been successful.

Extension specialists from Kansas State University will be on hand to explain the management decisions involved in operating each farm.

Special programs for homemakers will be presented at each farm by several local women and Extension home economists from K-State.

Herbert Niles handles 2,824 acres and feeds high moisture grain in his cattle feeding program. He harvests milo at about 25 per cent moisture. The grain is rolled and water is added as the milo is blown into the silo, bringing the moisture up to around 30 per cent.

Alfalfa haylage, ensiled at about 50 per cent moisture, goes into one silo in the spring after the milo has been fed.

Niles feeds out about 525 high quality steers a year, marketing on a grade and yield basis. More than 80 per cent of his steers graded choice to prime the last time he sold.

Handling high moisture grain and the economics of a beef program will be discussed at the Niles farm.

"All About Wigs" and "Sex Education for Children" are the topics for the homemakers' program.

David Hirt has built an extensive swine operation in only five years. He farrows about 140 litters a year, carrying pigs all the way to finishing at about 220 to 230 pounds. He sells direct to a packer in Kansas City.

His farrowing house, nursery and part of the finishing house were converted from old farm buildings.

Hirt installed a modern feed-handling system in 1967. He feeds a mixture of $\frac{2}{3}$ corn, $\frac{1}{3}$ milo plus concentrate. Feed is augered directly from the processing unit to the feeders.

Subject matter presentations on feed handling, use of swine facilities and the economics of selecting machinery will be presented at the Hirt farm. A sonar demonstration will show back-fat and size of loin eye on live animals.

Topics for the homemakers program at the Hirt farm will

These two **KEY** Specials
will put a PLUS
in your pork profits

"PORK MAKER"

15% is the first step in KEY's complete growing and fattening feeding. Weaned pigs are ready for this solid protein ration and they will advance faster to finishing stage.

"FINISHING RATION"

12% is a true complete finishing ration. High in molasses, yeast, minerals and other finishing factors. This 12% will replace plenty of your grains that by now are in dwindling supply.

PORK MAKER \$60 ONE WEEK ONLY

FINISHER \$54 ONE WEEK ONLY

BEST IN HOT WEATHER

Hogs will do better on these two feeds during hot weather. Both are pelleted, easy to dish out, and highly palatable. Actually, using these two KEY rations is cheaper than mixing your own feeds and using your corn and maize. Especially at the low price we are quoting.

Crackdown On False Advertising Of Insect Traps

"Black Light" insect traps won't ensure insect-free living.

A crackdown on false advertising of light ray insect traps is underway by the Federal Trade Commission, according to Dr. H. Leroy Brooks, Extension entomologist at Kansas State University.

These insect traps are claimed to operate electronically by emitting ultraviolet blue, green and white light rays that attract flying insects. A wire grid located around the light bulb is charged with an electric current that electrocutes most of the insects coming in contact with it. Consumers say they have been misled by advertised claims that these insect traps have been approved by the U.S. Government and major universities and that they will clear large areas of all flying insects, Brooks says.

According to the FTC, al-

though these types of traps do attract and kill some flying insects, those which have been tested do not eliminate them all. And none of these has been approved by the U.S. Department of Agriculture or any major universities.

A number of advertisers of these insect traps have corrected their claims as a result of the FTC's investigation, Brooks says. "However, consumers should be alert to continuing advertising of insect traps that promise to eliminate all flying insects," he concluded.

Move Arson Trial From Manhattan

MANHATTAN — A change of venue has been granted for the trial of Dave Williams, 31, a former Kansas State University student who is charged with attempted arson.

Williams' trial had been set for Aug. 4 in Manhattan, but his attorney filed a petition for a change of venue on the grounds that his client could not get a fair trial here because of publicity given the case in this area.

District Judge Lewis McLaughlin granted the change of venue to Clay Center. Judge McLaughlin will preside at the trial there, also set for Aug. 4.

Williams was arrested April 13 outside a drive-in restaurant.

Co-op Trend Continues: Fewer Members, More Volume

The number of farm cooperatives and their total membership are decreasing, but over-all dollar volume of business continues to set records.

The Agriculture department says this has been the trend for the last 15 years and there is no reason to expect the pattern to change drastically through the current year.

A report by the Farmer Cooperative Service showed co-op business for the year ended July 30, 1968, totaled a record high 17.1 billion dollars, a gain of 3 percent from 1966-67.

"There has been nothing to indicate a change in this trend through the year just ended, either," a spokesman said. "We ex-

pect the pattern to continue, particularly as many cooperatives get into processing fields in addition to providing traditional services."

California led in co-op business volume with about 1.9 billion dollars reported for 1967-68, followed by Minnesota, 1.2 billion and Iowa 1.1 billion.

The report also showed the trend to fewer cooperatives slackened during 1967-68, showing a total of 7940 or a drop of 2 percent from the previous year. It was the smallest decline in four years, the report said.

Minnesota reported the most cooperatives — 971 — followed by Wisconsin 578, and Texas 508. Memberships nationally totaled

6,800,000, a decline of 1 percent from a year earlier. The report said the total included duplications since many farmers belong to more than one co-op. Minnesota reported 560,510 memberships, followed by Iowa 426,565, and Indiana 421,420.

The value of fall farm products marketed cooperatively totaled 13.3 billion dollars, a rise of 3 percent. Dairy, grain and livestock led in product value, in that order.

POPULATION LOSS IN SABETHA AND SENECA

The two largest towns in Nemaha County, Sabetha and Seneca, both show a drop in population, according to the 1969 figures. Sabetha now has a population of 2556, Seneca 2327. Figures for other towns are Bern, 228; Centralia, 557; Corning, 207; Goff, 241; Oneida, 109; and Wetmore, 401. County population is down slightly more than one percent.

JOHN M. LEWIS, LARNED, IS DEAD

LARNED — John M. Lewis, once president of the American Polled Hereford Association, has died at the age of 87. He and two sons, Walter and Joseph Lewis, have operated a large livestock business based at Larned. The ranch has been a frequent winner at national and international livestock shows.

HOME-MADE CATTLE OILER

This drawing illustrates a simple homemade backrubber to be used in controlling horn flies on cattle. Aside from the posts, the backrubber is made from an old chain covered with several thicknesses of burlap and tied every six inches with binder twine. The burlap is soaked with an insecticide. Cattle soon learn to walk under the backrubber, thereby getting a "treatment."

Farm Bureau Names Lecompton Man To Board

Wesley Wulfkühle, 45, of Lecompton, has been appointed today by the Kansas Farm Bureau Board of Directors to serve the unexpired term of Frank Boyd, Jr., Moran, a member of the board since January, 1963.

Boyd resigned in June when he was named a member of the USDA Agricultural Stabilization and Conservation State Committee. His term on the Kansas Farm Bureau Board of Directors would have expired in November, 1970.

Wulfkühle, who farms in Douglas County, will represent the Second Farm Bureau District consisting of Allen, Anderson, Bourbon, Douglas, Franklin, Johnson, Linn, Miami and Wyandotte County Farm Bureaus.

He is a past president of the Douglas County Farm Bureau, was a Kansas Farm Bureau leader of the Year in 1960, and served on the Kansas Farm Bureau Program of Work committee in 1962-63.

RILEY COUNTY NFO MEETING AUGUST 4

The monthly meeting of the Riley County NFO will be at Randolph Monday, August 4, at 8 p.m., reports Daisy White, secretary.

JUNCTION CITY GETS NEW SCS TECHNICIAN

George H. Warner, soil conservation technician, has been transferred to Junction City from Lincoln, Morrie A. Bolline, state conservationist with the USDA.

George H. Warner

Soil Conservation Service has announced. Warner, a native of Kalooka, will be in charge of the Junction City unit office of the Conservation Service, working with the Geary County Soil Conservation district.

BELLEVILLE POPULATION REACHES ALL-TIME HIGH

The current population of Belleville, 3,209, shows an increase of 67 and is an all-time high for the city. While Belleville and Narka showed population increases, all other towns in the Republic were down. Here are the population figures for other towns: Courtland, 427; Cuba, 309; Munden, 150; Narka, 141; Republic, 277; and Scandia, 51.

OHLDE HONORS AT NATIONAL BEEF SHOW

The Ohlde Charolais Farms Pa'rmer showed the reserve grand champion performance-tested progeny pen of five at the National Beef Show at Cedar Rapids in mid-July. Tim Ohlde took the pen of five to Cedar Rapids.

MANHATTAN HOSPITAL DROPS EXTENDED CARE

MANHATTAN — The St. Joseph Hospital at Manhattan will no longer participate in the extended care portion of the Medicare program after August 1, hospital administrators have decided. The hospital will continue to participate in the Health Insurance The Aged Program, excluding the extended care facilities.

FLBA LOANS IN STATE AVERAGE \$25,500

Loans averaged \$25,500 in Kansas this year, by the Federal Land Bank Associations. State FLBAs made 1910 loans totaling \$48.85 million during the first year ended in June.

She'll Wear Wig For Life — Loses Scalp In Farm Accident

Thirteen-year-old Sheryl Buchanan of Ensign will have to wear a wig for the rest of her life as a result of a bizarre accident in which her hair became entangled in an irrigation sprinkler and was pulled off by the scalp.

Her father, Dave Buchanan, said Sheryl's doctor in Dodge City predicted she will have to stay in the hospital about three

weeks.

The mishap which claimed Sheryl's long dark brown tresses occurred while she was helping her father and her brother David, 13, move the irrigation rig across the field on their farm north of Ensign.

Buchanan said an inch-thick driveshaft runs the length of the sprinkler system and is connected at various points by belts to wheels which move the sprinkler.

"She walked underneath it and apparently ducked her head and flipped her hair into the drive shaft," her father said.

He said David was nearby but by the time he ran over, there was nothing he could do but hold Sheryl's head away from the sprinkler. Buchanan ran over too.

"I tried to pull the drive shaft apart but I couldn't get it loose and I didn't have time anyway," he said.

Mrs. Buchanan also was nearby but was unaware of what was happening, her husband said. David ran toward the small gasoline engine that turned the drive shaft, yelling at his mother to turn it off. By the time she did, Sheryl had been scalped and was left standing free of the apparatus.

"We were very fortunate it was nothing worse than that," Buchanan said.

PCA Lending Up 22 Percent

Lending volume for the fourteen state Production Credit Associations was up 22 percent over the previous year. As of June 30, 1969, the PCAs had \$109 million in loans outstanding, up 20 percent from a year ago.

Award Six KFB Scholarships

Kansas Farm Bureau \$300 scholarships to attend Kansas State University have been awarded to six 1969 Kansas high school graduates. Those receiving the awards are: Marieta Faye Herbers, Rose Hill; Tom Jensen, Neodesha; Linda Peterson, Delavan; Sarah Poland, Junction City; Barbara Jeane Runnion, Phillipsburg; Sheryl Worrel, Manhattan.

AIMING FOR LONGER AND HIGHER

The University of Wisconsin's experimental farm projected a steer built on these lines as a desired feeder calf, representing Hereford authorities' ideas on what constitutes the kind of steer that will grow well, make a profit for its producer and provide the kind of meat the customer wants. A thousand cattlemen from 39 states attended the 1969 Hereford type conference which showed five distinct types of feeder calves which had been tested.

The one illustrated here is a "type 4," measuring 42 inches off the ground and 64 1/2 inches long at 10 1/2 months of age. The "type 1" was a short-bodied, short legged animal, 6 1/2 inches shorter in length and 4 1/2 inches shorter in height.

A "type 5" is even longer and higher than the 4 and is the one regarded by Wisconsin authorities as having the greatest potential. Most feeder calves are currently in the "type 3" class.

Cut Again In Farm Workers

The number of hired workers employed on farms dropped in 1968 for the sixth time since 1960, the USDA said in a special

report. The farm working force is now 2.9 million, it said. People working on farms less than 25 days numbered about 1.3 million in 1968, down about 40,000 from the previous year, and those working more than 25 days numbered around 1.6 million, down about 120,000.

AUCTION SALE

Wednesday

JULY 30

Starts 11:00 a.m.
Lunch Served

Having sold the farm and quitting farming we will sell at public auction on the farm located 10 north and 4 1/4 east of Clay Center or 4 1/2 north, 2 west, 1 north and 1/4 west of Green, Kans.

Doctors Must Check Their Own Cheaters

The new president of the American Medical Association says the medical profession must find and condemn physicians cheating on Medicaid.

"A national scandal is under way," he said, "because a few physicians are cheating the medicaid program."

Dr. Gerald D. Dorman of New York, in a speech to the final session of the A.M.A. annual convention, said these physicians cheat by giving poor service, overcharging, and charging for services not given.

"We have recommended," Dorman said, "that cheaters be prosecuted under the law whenever appropriate."

Some local and state medical societies have recommended dropping from Medicaid any physician who gives inadequate care or charges wrongfully, he said.

The Internal Revenue Service announced two weeks ago that it would audit income tax returns of physicians who made more than \$25,000 a year from Medicaid or Medicare.

In an apparent reference to this, Dorman said, "We must make it perfectly clear to the profession and to the public that earning even a substantial amount of money from government health programs is not, all by itself, evidence of chicanery."

But he added, "It is our responsibility to take the lead in rooting out and condemning the few who are cheating."

Implement Sales Are Down

Sales of farm tractors in the United States in February, March and April lagged behind those of a year ago in the same months. But for May, sales outpaced those of May 1968, according to the Farm Industrial Equipment Institute, Chicago.

Sales in February were off 24 percent from a year ago; in March they were down 20 percent and in April 12.8 percent. In May, the tractor sales exceeded those for the same month in

1968 by 17.9 percent. Industrial tractor sales also were higher, thus indicating, the institute observes, more optimism in the tractor business than manufacturers had expected some months earlier.

A rather mixed market is reported on other farm machinery for the first months of this year, but in general sales are down slightly. Biggest drop in sales has been in combines. Hay balers show an increase.

AUCTION SALE

Wednesday

AUGUST 6

Starts 5:00 p.m.

EVENING SALE

Having moved into the Medford Manor, I will sell at public auction at my home located 1 block north of stop lights in Morganville, Kans.

Household Goods

Feedlot Equipment & Farm Machinery

AUCTION SALE

Saturday

AUGUST 9

Starts 9:30 a.m.

Lunch Served

Public sale of feedlot equipment and farm machinery at the Miller feed lot, 1 mile east of Strong City, Kansas.

Trucks

1966 V8 Ford 2 ton with BJ mixer feeder box
1959 V8 Ford 1 1/2 ton with grain bed, stock racks and hoist
1955 V8 IHC 2 ton with Farm-hand manure spreader
1954 IHC 2 ton with Davis mixer feeder
1951 GMC 1 1/2 ton with grain bed and hoist

Fox single row field cutter
3 section spike tooth harrow
JD 4 row curler
Graham Hoeme chisel
Mtd. field sprayer with booms and drops
IHC 27V 7' tractor mower
Tumaco 2 wheel hydraulic scoop
IHC 3-16 plow, hyd. lift.
3 4-wheel trailer wagons
Irrigation pump
Mounted Continental post hole digger
3 point tractor blade

Tractors

1966 Allis Chalmers HD4 diesel crawler with torque converter, hydraulic front end loader & rear mtd. ripper
Ford Industrial 2000 with front loader & hydraulic bucket
Ford 880 tractor
Super M Farmall with torque amplifier
John Deere Model 40 with 3 pt. hitch
W-9 IHC
John Deere B with 2 row cultivator

3000 feet 2" used pipe
12 rolls new barbed wire
Several hundred railroad ties
Hedge posts
10 hedge corner posts
6 light poles
Some used 3" pipe

MISCELLANEOUS

20'x8", 20'x4" augers
3 HP electric motor
Lincoln portable electric welder & generator
Electric arc welder
Mighty Mist fogger, 3 pt. hitch
Chain saw; portable insecticide fogger

Machinery

Allis Chalmers SP-100 combine with Hume reel & pickup attachment
Pull type road grader
10' IHC pull type disk
JD 2 row mtd. cultivator
IHC 16 hole low wheel grain drill

Truck and tractor mud chains
2 9x28 tractor tires, new caps
Numerous truck tires
Platform scale & other items too numerous to mention

HORSES

3 good saddle horses, been worked in feed lot
Terms: CASH

Oil Companies Seek Income On Slow-Pay Credit Cards

If you use a gasoline credit card — and probably 35 million people do — you may soon discover if you haven't already, that one of the best bargains in credit cards is rapidly disappearing.

You can definitely look forward to paying 12 to 18 percent a year interest if you don't pay on time. Some companies have let a user get away with not paying interest up to now.

You may be able to get as much as a year to pay your bill from some companies, but you'll have to pay up to 18 percent for the privilege.

Most companies typically have had two basic plans, one for gasoline and oil and one for more expensive purchases, such as tires, batteries and accessories. Generally, a customer was told he had 30 days to pay for the gas and oil and up to six months for the rest, with no interest on either.

But, if he knew how to go about it, he could get at least 60 days — at no interest — on the gas and oil and often more because of easygoing policies. He could do much the same on extended terms.

Now, because of tight money, new thinking is being brought into the industry. Oil men are beginning to realize that credit cards could become a major new source of income.

Dr. Paul Nadler, professor of business administration at Rutgers, the state university, in Newark, N.J., said many companies were taking the view that "as long as you're going to be sluggish in paying anyway, let's get a return on it."

He said, "more and more companies recognize this could be a good source of profit, and more and more will encourage you to take extended terms."

Nadler saw one possible danger — one more area in which the consumer is tempted to go over his head.

One of the newest wrinkles in

gasoline credit cards, quietly being studied by many companies that do not already have it, is the revolving credit plan.

In a typical plan, the customer gets 12 months to pay. Each month he is billed one-twelfth of the total plus 1½ percent interest on the rest.

Companies that have the revolving plan include the Continental Oil Company, the Union Oil Company of California, the Humble Oil and Refining Company, and the American Oil Company.

Among those studying the plan are the Cities Service Oil company, the Skelly Oil Company, and possibly the Sun Oil Company and the Mobil Oil Corporation.

Texaco's new venture is a "time charge plan," 10 percent down and 18 percent interest on the balance (or less in a few states.)

The Ashland Oil and Refining Company has a "monthly payment budget plan," with 11 percent added to the purchase, to be paid in 12 installments.

All these companies, of course, continue to offer their traditional credit-card plan and, for the most part, charge no interest on 30-day plans if paid within 55 or 60 days. They also charge no interest on extended-credit plans — 90 days and 180 days — if paid on time.

New Angle On Cleanup Of Feedlot Runoff

An interdisciplinary research group at Kansas State University, Manhattan, is working on an innovative technique for reducing feedlot pollution of Kansas lakes, rivers and streams.

Researchers from the university's engineering and agricultural experiment stations will collaborate in this venture.

The six-member faculty investi-

gative team is employing a land disposal method of feedlot pollution control in a project they are conducting in cooperation with Pratt Feedlot, Inc., Pratt.

The K-State researchers, headed by principal investigator Harry L. Manges, assistant professor of agricultural engineering, are conducting this pilot study under a \$136,608, two-year contract from the U.S. Department of Interior.

Research will be carried on at the Pratt Feedlot where some \$20,000 head of cattle are now fed daily.

First step will be to characterize the stormwater runoff from the feedlot, "determining the amount of pollutants in that runoff," Manges explained.

Then investigators will characterize manure on the feedlot. This involves determining the amount of phosphorus, nitrogen, sodium, potassium and calcium in the solid waste materials.

Final step will be to dispose of the runoff and solid wastes from the feedlot onto a selected site of agricultural cropland. A cornfield will be utilized in this pilot project.

"We plan to determine the quantities of these solid and liquid wastes which can be disposed on the cornfield without polluting the groundwater below the surface or the stormwater runoff," Manges said.

If this land disposal method works out as well as the K-State team anticipates, it could mean that water resources in Kansas would be subjected to far less danger from pollution from the state's growing number of animal feedlots.

"Should this project be successful, it means there would not likely be a recurrence of the closing of a water sports facility because of feedlot pollution. This happened last year at John Redmond Reservoir below Cottonwood Falls," Manges pointed out.

Faculty investigators working with Manges on this project which began June 1: Carl E. Anderson, instructor, agricultural engineering; Ralph I. Lipper, as-

sociate professor, agricultural engineering; Dr. Larry S. Murphy, associate professor, agronomy; Dr. William L. Powers, assistant professor, agronomy; and Dr. Lawrence A. Schmid, assistant professor, civil engineering.

In addition to providing for faculty and university financial support, this Department of Interior research contract will support four graduate students during the next two academic years.

Polled Hereford Two-Day Tour This Week

Ottawa will be the base for 18 stops on the 2-day annual tour of the Kansas Polled Hereford Assn. August 1-2. Jim Rowland of Marysville is chairman of the tour committee.

- July 29, 1969
- The tour will headquarter at the Royal Manor motel at Ottawa and make the following stops on August 1:
1. Carl Funk, west on KS from Goff
 2. Jess Christie, Muscotah
 3. Ray Hottman, west of Muscotah
 4. Everett Vaughan, Atchison
 5. Noon Lunch, Atchison
 6. Melvern Deckard, Atchison
 7. Tom Swearingen, Lawrence
 8. Ervin Steele, Lawrence
 9. Donald Churchbaugh, Baldwin
 10. Night Stop, Ottawa
- Stops planned for Aug. 2 include:
11. Raymond Gillette, Ottawa
 12. Harold McDonald, Williamsburg
 13. Keith Lankard, Garnett
 14. Noon Stop, LaCygne
 15. Dale Avery, Pleasanton
 16. Lloyd Winslow, Moran
 17. Morton Polled Herefords, Altoona
 18. H. J. Davies, Benedict

REPUBLIC COUNTY LAND 200A Improved & Unimproved

AUCTION SALE

Monday Eve.
AUGUST 4

Starts 8:00 p.m.
In American Legion Hall
REPUBLIC, KANS.

TRACT NO. 1
Approximately 80 acres of improved Republic County farm land north of Republic, Kansas.

Legal Description: Located approximately 1 mile north of the northeast edge of Republic, Kansas. The East Half (E½) of the Southeast Quarter (SE¼) of Section Twenty-four (24), Township One (1) South, Range Five (5) West of the 6th P.M. in Republic County, Kansas.

General Description: This tract of land lies level to slightly wavy and has produced very well over the years. For the investor thinking of irrigation possibilities, don't overlook. There is a 2 story frame 8 room modern home.

Allotments: The approximate 1969 allotments are 20.1 wheat, 23.0 milo, 21.0 corn and 1.0 conserving acre. There is approximately 71.0 acres of cropland. The balance is lots.

TRACT NO. 2
Approximately 80 acres of unimproved Republic County farm land North of Republic, Kansas.

Legal Description: Located approximately 1 mile North of the Northeast edge of Republic, Kansas. The West Half (W½) of the Southwest Quarter (SW¼) of Section Nineteen (19), Township One (1) South, Range Four (4) West of the 6th P.M. in Republic County, Kansas.

General Description: This tract of land lies wavy to rolling. This farm has been producing good crops and has possibilities for the grain and livestock man.

Allotments: The approximate 1969 allotments are 8.2 wheat, 10.0 milo, 9.0 corn and 1.0 conserving acre. There is approximately 29.0 acres of cropland. The balance is grassland and lots.

TRACT NO. 3
Approximately 40 acres of unimproved Republic County farm land North of Republic, Kansas.

Legal Description: Located approximately ¾ mile North of the Northeast edge of Republic, Kansas. The Northeast Quarter (NE¼) of the Northeast Quarter (NE¼) of Section Twenty-five (25), Township One (1) South, Range Five (5) West of the 6th P.M. in Republic County, Kansas.

General Description: This tract of land lies wavy to rolling. The production has been good and would be a desirable tract to add to any operation.

Allotments: The approximate 1969 allotments are 9.6 wheat, 11.0 milo, 10.0 corn and 1.0 conserving acre. There is approximately 34.0 acres of cropland. The balance is grassland.

THE FOLLOWING APPLIES TO ALL 3 TRACTS
Taxes: The Seller will pay the first half of the 1969 real estate taxes on the basis of the 1968 real estate taxes.
Present Tenant: E'don Eitzmann, R.F.D., Republic, Kans.
Terms: 25% down the day of sale and the balance at 7½ interest payable to the Peoples National Bank at Belleville, Kansas, as escrow agent for the seller on not less than a 3 year contract with 25% due on August 1, 1970, 1971 and 1972. A good and marketable title will be furnished by the seller. Escrow charges will be shared by both buyer and seller.

Land will be shown by making an appointment with the auctioneer prior to day of sale.

L. A. WILLIAMS, Owner

RUSSELL — Part of the Kansas landscape is fading fast.

The familiar steel derricks which a generation ago served as sentinels for producing wells and riggings from which to hang block and tackle used in tubing and casing pulling are rapidly being torn down.

In fact, it is unusual to find an occasional oil well tower still standing.

The derricks — which were arranged as neatly and precisely as fence rows and pinpointed the location of oil fields so that they could be seen for miles — have given way to low, compact pumping units which are drab and unimpressive by comparison.

Counties such as Russell, Barton, Ellis, Ellsworth, Harvey, Marion, McPherson, Reno, Rice and Stafford, where the big production came in the 1930s and 1940s, were dotted by thousands

"I never consider crop failure when I plant wheat."

Derrick Reminders Nearly All Gone

of steel rigs.

In fact, a traveler experienced the sensation of being in a chute if he went between Chase and Ellinwood on the then US 50N, now US 56.

A canyon was virtually made of the 6-mile stretch of highway by pumping derricks that lined it. Scarcely 330 feet back of the right-of-way, a rig stood every 660 feet on both sides of the pavement.

At that time, 10-acre well spacing patterns were the rule in most Kansas fields. Nearly all the better leases in Chase-Silica had 16 wells to the quarter section, or eight wells to the mile on both sides of the section line.

Thirty years ago, the Trapp field along the Russell-Barton County line from Milberger to Beaver looked like a forest of miniature Eiffel Towers. All these are gone now.

The Burrton field directly east of Hutchinson had about 350 derricks before World War II put a premium on scarce metal. That resulted in development of truckmounted cable tool drilling and pulling units.

The townsites of Chase had pumping derricks behind stores, in alleys, adjacent to church property and around the cemetery.

The city of Russell had about 100 wells on the townsites — some a few feet from the business district — but never had the tall towers to call attention to the oilers.

But Russell has seen to it that there will always be a derrick to remind tourists of the city's petroleum heritage.

It put up one at the east edge of town, on the east edge of the route of old US 40. It is festooned with signs giving civic information.

Then it put up a lighted derrick on I-70 when it came through to lure traffic south of town.

Zenith, once a rip-snorting drilling center in eastern Stafford county, can claim half a dozen of the steel sentinels. Three of them are just off Stafford's north edge.

One of the last remaining orchards of neatly planted rows of rigs was in the old Richardson field near Hudson, until a few years ago.

Such historic tool pusher stomping grounds as the 46-year-old Fairport field northwest of Russell, the Bemis-Shutt ramparts along the Saline river canyons in Ellis County, and the Lost Springs district in Marion County still boast of a few pumping derricks.

But that is about all that remains of the tall steel towers.

320 A UNIMPROVED; REPUBLIC CO.

AUCTION SALE

Friday Eve.
AUGUST 8
REPUBLIC, KANS.

We will sell the following real estate and personal property at public auction in Republic, Kans. Personal property sells at the residence at 6:00 P.M. Real estate will be sold at the American Legion Hall in Republic, Kans. at 8:00 P.M. Seating will be available. Information given at sale time will take precedence.

TRACT NO. 1

Approximately 160 acres of unimproved Republic County farm land southeast of Republic, Kansas.

Legal Description: Located approximately 4 miles East of the Northeast edge of Republic, Kansas, on the Blacktop road and 2 miles South. The Northeast Quarter (NE 1/4) of Section Ten (10), Township Two (2) South, Range Four (4) West of the 6th P.M. in Republic County, Kansas.

General Description: This farm lies wavy to rolling and has been a good producer. For the livestock and grain operator, don't overlook. There is a good livestock pond in the pasture. Also, there is a 24x32 single story frame house and other buildings which have been vacant.

Allotments: The approximate 1969 allotments are 34.4 wheat, 12.0 Barley and no conserving acres. There is approximately 96.0 acres of cropland. The balance is grassland, hay meadow and lots.

TRACT NO. 2

Approximately 160 acres of unimproved Republic County farm land Southeast of Republic, Kansas.

Legal Description: Located approximately 4 miles East of the Northeast edge of Republic, Kansas, on the Blacktop road and 1 1/2 miles South. The North Half (N 1/2) of the Southeast Quarter (SE 1/4) and the South Half (S 1/2) of the Northeast Quarter (NE 1/4) of Section Three (3), Township Two (2) South, Range Four (4) West of the 6th P.M. in Republic County, Kansas.

General Description: This farm lies wavy to rolling and has produced well for many years. For the livestock and grain man desiring an all around farm, just take a drive by and you can see the answer.

Allotments: The approximate 1969 allotments are 28.9 Wheat, 37.0 milo, 18.0 corn and no conserving acres. There is approximately 82.0 acres of cropland and the balance is grassland and hay meadow.

THE FOLLOWING APPLIES FOR BOTH TRACTS

Taxes: The Seller will pay the first half of the 1969 real estate taxes on the basis of the 1968 real estate taxes.

Possession: Full possession of wheat stubble and idle ground will be given day of sale. Full possession of farmland, grassland and hay meadow will be given on March 1, 1970. Buyer will receive landlord's share of milo. Buyer will be required to pay landlord's share of fertilizer applied to the now growing milo.

RESIDENCE

Located 1 block North and 2 blocks West of the West Side Grocery Store in Republic, Kans. This is a 2 story frame 7 room home situated on a large lot.

ANTIQUES

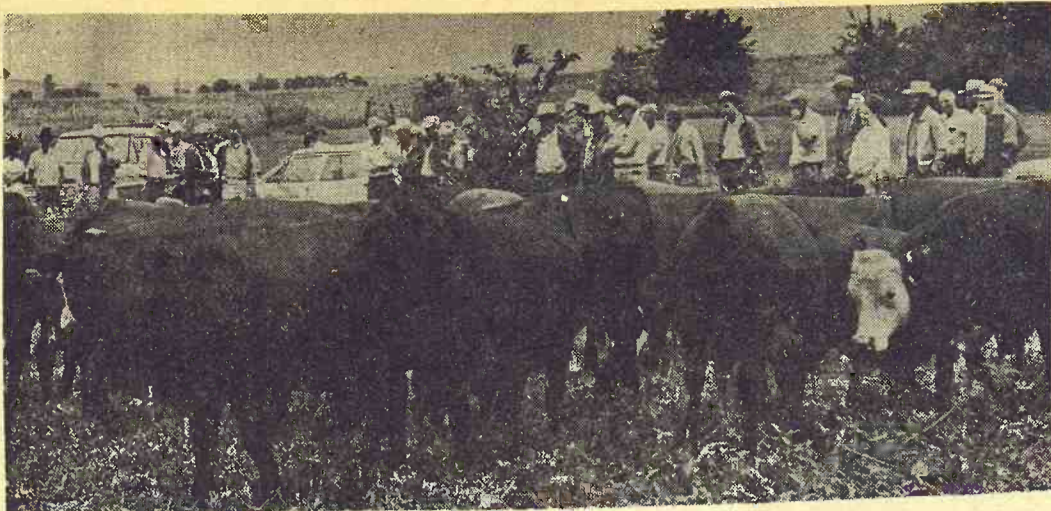

Round oak table with 3 extra leaves and chairs; combination book case and desk; 5 wood rockers; Williams pump organ; 4 kerosene lamps; ice cream stool, and other items.

Inspection of land is welcome prior to the sale by making an appointment with the auctioneer.

Owners: Heirs of John Daugherty And Stella S. Daugherty, Estates

Administrators: Elmer Daugherty and Arletha Scarlett. Auct. and Real Estate Broker: Eugene Waring, ph. 527-5141, 812 23rd Street, Belleville, Kansas.

Licensed in Kansas, Nebraska and Oklahoma. Attorneys: Spurney and Spurney, phone 527-2666, Belleville, Kans

PLAIN CALVES ON BROME-BLUESTEM

One of nine stops on the annual Greenwood County Beef Tour was at the Calvin Bewley ranch north of Eureka, shown here, where cattlemen viewed a lot full of plain calves pasturing on brome and bluestem with a range supplement.

A Start To Relocate Veterinary Facility

MANHATTAN — Start on the development of a new veterinary complex at Kansas State University here has been assured with the announcement of a \$672,675 grant from the United States Department of Health, Education and Welfare's Division of Health Manpower.

According to Dr. Charles E. Cornelius, dean of veterinary medicine at KSU, the grant provides matching funds to assist in construction of a \$2.4 million comparative medical sciences building.

The three-story structure is one of three major buildings planned for the new complex and marks the first step in a seven-step long range plan to relocate the K-State College of Veterinary Medicine on a satellite campus. The new site is an 80-acre tract which

lies just north of the main campus and just east of Jardine Terrace Apartments.

Vincent Cool, assistant vice president for planning, says final working drawings are now being prepared and bids can be called and construction begun as soon as the plans are completed and final approval received from Washington. Construction could get underway as early as late fall.

The new comparative medical sciences building will be a research and teaching facility housing diagnostic laboratories for the College of Veterinary Medicine and laboratories for teaching diagnostics and surgery to students. The remainder of the building will be devoted to faculty offices and research laboratories. Also included in the build-

ing plans are laboratory animal handling facilities. John Brink is the associate architect.

The K-State veterinary medicine grant was included in awards totaling more than \$9 million just announced by Robert H. Finch, Secretary of Health, Education and Welfare, for the construction of health professions educational facilities. The KSU grant is administered by the Division of Educational and Research Facilities, the component of the Bureau of Health Professions Education and Manpower Training responsible for funding and administering all National Institute of Health extramural construction grants programs.

The latest grants bring the total federal funds for construction of health professions educational facilities to approximately \$537 million. The program, authorized in 1963, has assisted 133 schools to increase their first year enrollment by 4791 students.

SELLING STARTS 12:30 NOON
Fat Hogs — Pigs — Cattle

We had a good sale last week with receipts of 314 cattle and 328 hogs. We had a \$26 fat hog top. With a lower cattle market, we thought we had a good active sale. Butcher cows were about steady with the week before. Below is a partial listing:

HOGS		CATTLE	
28 fat hogs	203 @ 26.00	3 bbf steers	680 @ 28.60

Bonded Livestock Dealers & Order Buyers

\$40,000 For Lave Charolais

Lester Lave of Hanover sold the second top bull at the 3rd World Charolais sale at Calgary, Canada, July 5. The animal, a June 1968 bull, owned by Lave and Dr. Mischeler of Tulsa, Okla., brought \$40,000 from George Deen of Fort Worth,

July 29, 1969

Texas.

The top seller at the Calgary sale brought \$90,000 from a buyer which paid that amount to Bieber Brothers, Rimby, for a June 1968 bull which weighed 1653 pounds as a yearling.

The 68 head at the sale averaged \$11,823 per head.

Start Counting Horses Again' USDA Asked

A move is a-hoof to get the Agriculture Department more involved with the nation's resurgent horse industry, which authorities say contributes around \$5 million annually to the economy. There are nearly seven million horses now, spokesmen say, and the total is expected to reach

eight million by 1972 and perhaps 10 million by 1977 — about what they numbered around the turn of the century.

The Agriculture Department, which keeps records for hogs, cattle, sheep and other farm animals, discontinued its annual horse and mule census in 1960.

A new organization, the American Horse Council, Inc., wants the government to pay more attention to the industry and recognize it as a major part of the national economy.

The council was organized last February in Palm Beach, Fla. Former Sen. Thruston B. Morton of Kentucky is president.

Henry Durham, executive director, says meetings have been held recently with top government officials, including a 40-minute session with President Nixon last month, in an effort to boost interest in the horse business.

"One of the problems is that there is a tremendous concentration of horses in and near urban area," Durham told a newsman. "And we simply don't know how many there are or how big this business really is — and I don't think anybody else does."

The council is scheduled to present findings of a preliminary survey on the economic importance of horses at a meeting at Lexington, Ky., on July 23, Durham said. Hopefully, he added, the report will show some of the industry's impact on the farm economy, employment and other factors.

Olathe Man Wins At Kaw Valley Show

MANHATTAN — Marvin Allen, Jr., Olathe, was the owner of the champion steer at the Kaw Valley Junior Hereford Show, July 12, Manhattan. Clint Rusk, Sun City, showed the second place steer in the heavyweight division, of which 17 steers were entered.

In the light weight steer class, Ken Ebert, St. George, had first place steer. Mona Rusk, Sun City, showed the second place steer in this class of 16 steers.

Allen also showed the champion heifer of the junior show. The champion was a junior yearling. Another junior yearling heifer shown by Mona Rusk was reserve champion.

Bill Kimmell, Kiowa, won the showmanship contest. Reserve in the contest went to Ken Ebert.

Prior to the steer and heifer show, the young men and women participated in a judging contest.

Mike Bohn, Alta Vista, was high individual in the judging contest. Other top individuals were Ken Ebert, St. George, second; Alan Falk, Alta Vista, third; Kyla McDiffett, Alta Vista, fourth; and Wally Olson, Olsburg, fifth.

Team placings were as follows: Blue Ridge 4H, Wabaunsee county, first; Bonfire 4H, Riley county, second; Pottawatomie county 4H's, third; Barber county 4H's, fourth; and College Hill 4H's, Riley county, fifth.

Across Board Valuation Cut Lowers Tax Base

Russell County's tax base a sharp 12 percent dip in 1969 and ended up only \$302,000 less than the 1967 pre-appraisal figure. The 1969 valuation figure was \$51,953,362 compared with the valuation of \$57,953,825.

Major cause of the decrease in valuation was action by the county commissioners ordering a 15 percent decrease in assessed value of urban property and a 20 to 30 percent decrease in rural assessed values and a decrease of \$1,000 for real estate in the eight cities.

Personal property assessed values also dropped \$1,658,496 in 1969. The drop in rural areas with a drop of \$491,985 in oil valuation. Personal property in cities increased \$46,314.

An increase of \$316,304 was shown in assessed valuation of utilities and state-assessed corporations in the county.

More Beef, But Prices To Remain High

Consumers can expect more beef on meat counters during the next few months, but economists say strong demand will tend to keep farm and retail prices near present high levels.

An Agriculture Department report said marketings of fed cattle are expected to be 11 percent greater during the July-September quarter than a year earlier.

This would be nearly four times the rise in the rate reported for April-June, which showed marketings of slaughter cattle only 3 percent ahead of the second quarter in 1968.

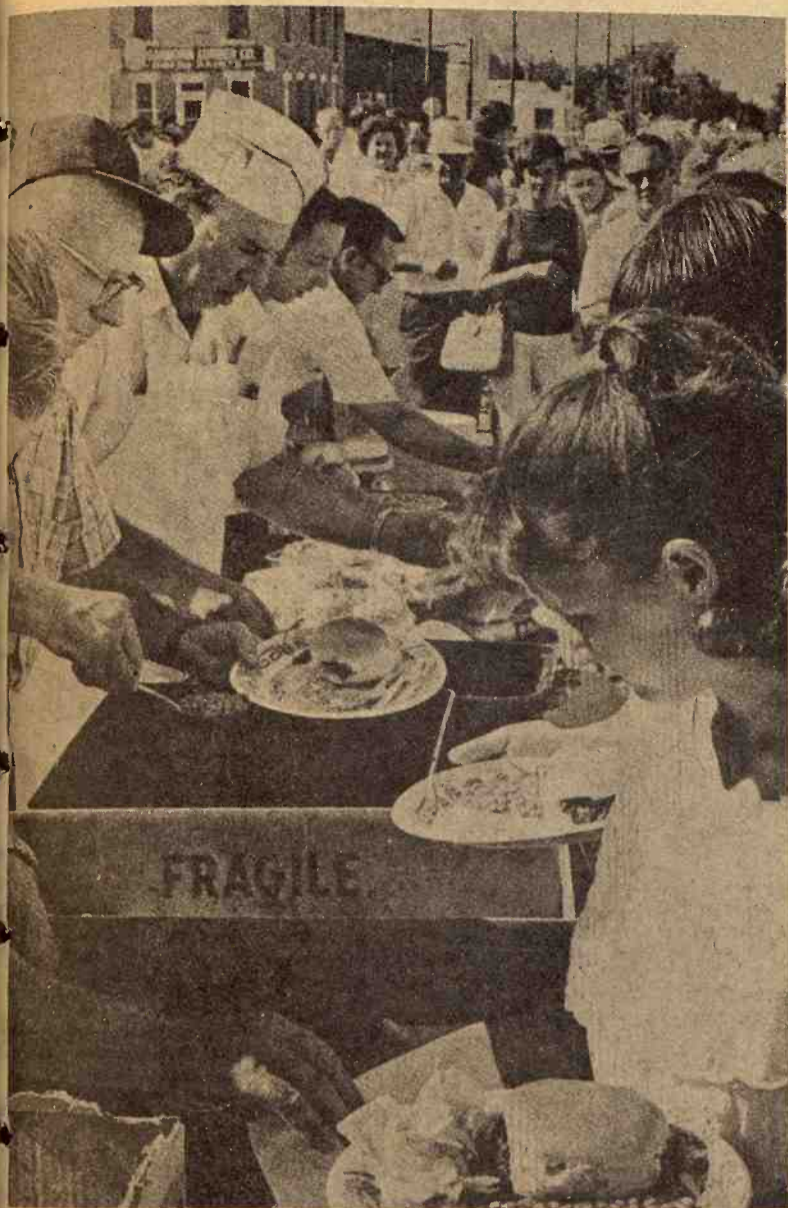

Department experts early this year had expected the April-June cattle marketings to be 6 percent larger than a year earlier, nearly twice the rate of gain actually reported.

The report is based on surveys in the 22 major cattle feeding states.

There were nearly 10.4 million cattle and calves being fed for slaughter on July 1, a gain of 15 percent from a year earlier, the report said.

The most recent department outlook report says prices paid for slaughter cattle are expected to continue "well above" a year earlier throughout the summer.

A revised report on the beef situation, showing the latest price estimates for next fall, is due early next month, officials said.

GOOD EATING AT CONCORDIA

Concordia's Town & Country Day free feed brought out 2800 people to eat barbeque sandwiches, beans and potato chips. That's county agent Joe Neill with cap on the serving line.

Reynolds Sale Barn

ABILENE, KANS.

FRIDAY NIGHT

STARTS 8:00 P.M.

A big crowd watched a good run of cattle move through the ring last Friday night. Although the cattle market is much lower, we had a very active sale with more buyers than we have had in several weeks.
