### THE KANSAS FARMER.

The Kausas Farmer Company, Proprietors. Topeka, Kansas.

#### Improved Machinery-Wind Engines.

The reports of the signal officers in different parts of the country, attached to the weather bureau of the United States Army, give the velocity of the wind at their respective stations several times each day. From these it is easy is a good many weighed 300 at one year. He there is nothing more certain than a paying to comprehend that there is an immense force crossed with a big boned China, and then with figure will be realized. The vast immigration

or power flowing over the face of the earth, which if but a tithe of it were properly utliized would prove sufficient to propel a great deal of machinery. A ship sailing the ocean, with its canvass spread to favoring gales, is an exemplification of the power of the wind and the ability of man to force its compliance to his wishes and compel it to perform his service. Wind engines, or wind mills, as they are more familiarly called, are but another method of utilizing the power of winds, the use of which dates back hundreds of years. Almost from time immemorial wind mills have been made use of for pumping water, grinding grain, and for similar purposes, and to-day finds their ase more widespread than ever before. Particularly is this a fact both upon the seashore, where unobstructed breezes are wafted from the ocean, and on the broad prairies of our western country. where no obstructions are met with as currents of air sweep back and forth over their faces. The ingenuity of man, however, has made great improvements in the manufacture of wind engines, and the unsightly objects which but recently stood as monuments of clumsiness and inefficiency, and but most unsatisfactorily performing the work required of them, have given place to the light, airy, graceful machines which ornament almost every farm in the west, and which supplies water for stock and general domestic purposes everywhere.

In view of the fact that wind engines have come into such general use, their presence being no longer considered a luxury, but an absolute necessity, to those who anticipate the use of such the first the question that suggests itself is as to which particular machine will best perform the duty required and the cost thereof. The greatest objections to wind engines heretofore have been

their liability to prostration in violent storms,

the short term of their usefulness and the insufficient quantity of water pumped by them (when used for that purpose) during seasons of comparative calms. We herewith give an illustration of what is known as the Iron Turbine Wind Engine, manufactured by Mast, Foos & Co., of Sprinfield, O. Its superior points are readily comprehended. The entire machine is made of iron, well bound and braced, and of such workmanlike construction and so well put together that it is impossible for the wind to tear it to pieces or injure it. The wheel, or sails, being constructed on the turbine principle, affords the maximum of power, and there is no wood about it to swell, shrink, rattle and be torn to pieces. Special attention is paid to the construction of the machinery,or engine proper. Polished shafting and babbit-lined boxes, with a peculiar arrangement for holding and supplying the lubricating oil, pre-vents the necessity of very frequent oiling. The turbine-shaped sails, or buckets, are solid and smooth; losing nothing by friction, as is the case with rough wheels, and, curved as they are, do not lose the resistance as soon as receiving the current of wind. The cut shows how arrangements may be made for supplying water for dwellings, forcing it up to tanks in the upper parts of them, and distributing therefrom to all parts of houses and grounds.

LENORA, Norton Co., 252 miles northwest of Topeka, May 31.-Corn is about all planted and up. A large amount has been plowed once

and is an uncommon good stand. Wheat stands about thus: one half fair, one half poor, the last freeze damaged it badly. Spring wheat looks well. We are having today and last night a heavy rain, which soaks the ground up in good shape. Farmers are in high glee with the present prospects for corn.

Potatoes look well. No bugs as yet. Grass never was so good here at this season

of the year.

Stock all look well and healthy. The railroad company are locating the rail-

road. We look for the completion of the rail-

road to this point this summer.

Can any one tell me where I can get alfalfa seed, the cost per bushel and how much should be sown per acre.

Second, the clip of the western states is fully it out.

one fourth less than last year, and the clip of Third, if very great care is not used, the

#### More Hog History.

EDITOR KANSAS FARMER .- I see there is a controversy going on about hogs and their his-

One Thomas Britton got a pair of white pigs near Terra Haute, Ind., and raised stock which by the anxiety of the speculators. My advice grew to enormous size, weighing from 300 to 700 at twelve months to three years old,—that ket, and if the wool is held back until the fall

the eastern states will fall much short of former years, and there is by no means an over supply on the market; the wool interest is well protected by our tariff.

Third, money is plenty in the east and capital is looking for investments, wood is looking up in the eastern markets as well as in California where the trade has already commenced and quite an advance has taken place already would be to hold your wool for a late fall mar-

are ruined by being filled with the very worst kind of thorns. Another objection is that from one to three rods of land are rendered barren. No kind of a crop does well near a large or old hedge. Thistles and some kinds of noxious weeds seem to do well in hedge rows and thus scatter their seeds into the adjoining fields requiring much additional labor to till the fields surround-

hedge brush that is cut off will be scattered al

over the farm and in the highways by the wind

or by catching in the mane, tail or wool of the

farm animals, and sometimes the stock is seri

A fourth objection is when the bushes get

old and the roots (which run out a rod or

more) are cut they will sprout and your crops

ously injured by the thorns on the hedge.

And lastly, working in hedge is just about the hardest and most disagreeable work any fellow ever engaged in; besides if great care is not exercised you may get a thorn thrust into your eye, knee or other joint and thus get maimed for life. So to take any way you will it is hard labor, takes much time, an inexhaustible fund of patience, considerable money, incurs many risks; and then you have not an efficient fence, only an unmoveable, unsightly, unsatisfactory excuse for a fence.

Much of our wheat is killed by the bugs. The wet weather of the past three weeks has done much to prevent their ravages. Some fields will nake a fair crop. Our spring crops are very weedy owing to the amount of rain which prevents farmers from getting into their fields.

We have some growing fruit of all kinds but not a full crop of apples or peaches.

Fat hogs sell for \$4.75 to \$5.10.

F. M. ABBOTT.

Urbana, May 31.

#### Who Will Answer?

EDITOR KANSAS FARMER.—Are you aware of any test having been made of the crushing weight of the magnesian limestone found in middle and western Kansas? If so, will you please inform your western readers through the columns of your valuable paper how much weight the stone will bear? I would also like to ascertain the weight per cubic foot of such stone. This is a very important matter which I think ought to be generally known as it will lead to the avoidance of erecting defective and dangerous buildings in this section of the state. In Rooks county we are erecting a large substantial court house of the above material and we particularly desire to ascertain if the stone is able to stand the pressure. Perhaps some of your readers will be able to satisfactorily answer the question. Would be pleased to hear from them on the subject.

DAVID LEWIS.

Can some of our readers answer the above important queries of Mr. Lewis?-[EDITOR FARMER.

#### Karm Betters.

WILSON, Russell Co., 150 miles west of To peka, May 26th.—It has rained nearly every day for two weeks.

Wheat is looking fine, fields that looked like an entire failure six weeks ago are now coming out grand.

Most of the corn has come up and is look ing well except that it is getting a little too much dampness. Bad seed corn is giving some trouble and making more work for the already busy farmer.

Immigration is filling up our county som but the the temperance law is so binding that it has turned the tide of European immigrants to other states.

The grass was never looking so well as now and stock of all kinds shows their feed.

Fruit trees that are old enough has plenty of signs of fruit. T. W. HEY.

OFFERLE, Edwards Co., 260 miles southwest of Topeka, May 22.—Providence is doing all

that could be desired for us this season and if we have any suffering or destitution next year it will certainly be our own fault. Wheat is heading out nicely and promises

well. Some pieces will be short in the straw and the late sown is generally thin on the ground.

Spring crops are generally doing well and farmers are taking advantage of the favorable outlook and are planting largely. Some of the early planted corn rotted and will have to be calling.

replanted. Farmers seem to think more of Rice corn than Indian corn and will mostly plant largely of the former.

Immigration is commencing again and we predict a considerable accession to our numbers in the next few months.

Stock is generally healthy and doing well. Sheep shearing is the order of the day, and there is a great scarcity of men to do the shear-

We have the most and best grass now that I have ever seen here at this time of the year. Verily the stockman may rejoice as well as the

Had a heavy rain last night, rained most of the night, is cloudy and cool to-day with a strong wind from the north.

J. W. EDWARDS.

CARMI, Pratt Co., May 30 .- Pratt county is naking a glorious record this season, and those who have always said that she was as good as any other county in the state feel proud. We know of course that she has a bad name abroad. Got it by misrepresentation of the worst kind. But then she has the climate and soil to out-live all calumny and prove herself to be a banner county. Hurrah for

Wheat, corn, oats, potatoes and garden vegetables, in fact, every thing planted in this section is doing as well as could be asked by the most exacting.

Bye the bye, the FARMER has changed hands since I wrote last. Before the change the FARMER was chuck full of good things; since the change it is even trying to out do its former self by giving the people a paper of which every farmer should be proud. The article in the FARMER headed "The cultivation of more brains," should be printed in large type, framed and hung in every farm house until those who live by their smartness do not get the lions share and leave the farmer the pittance.

I wonder if people have found out that hard dry freezing in winter does not kill fruit buds, or will they write hundreds of letters to the FARMER the next cold winter stating that the fruit is dead. This year fruit is in abundance. every shrub, bush and tree being loaded down. D. J. BENTON.

OGALLAH, Trego Co., 245 miles west of Topeka, May 30 .- Wheat in this section of the country is doing splendid, the late sown 25 per cent. winter killed. None died for lack of rain. A heavy rain fell in this portion of the west the 14th of April and have had a great

Oats are doing well, not a great deal sown on account of hard times and the high price

Rye is doing fine, a small acreage sown on

The farmers as a general rule are behind with their work because of the late rains. Corn about halt planted and coming up

Grass has been plenty since the first of May, I never saw it plentier at this time of the

year. Stock of all sorts are doing well. Some scab among sheep. Most all farmers are trying to get a start in some kind of stock.

ENOS GLICK, Jr.

LONGTON, Elk Co., 120 miles southwest of Topeka, May 31.-To-day we have had a heavy rain which has thoroughly saturated the

ground. The chinch bug has been found in places

but has done less damage than we expected. Vegetation of every kind is growing finely, ome of the corn being knee high. But little oats was sowed but looks well.

A large acreage of corn has been put in but it is too early to more than say it looks well.

Potatoes promise a large yi-ld. Garden stuff of all kinds extra.

Wheat was injured by the cold winter but will I think make a large crop.

Stock of all kinds look well and command

good prices,

Hogs, fat, \$4.25 to \$4.75; beef none, but would find ready purchasers.

Peaches will be at least one half crop. With me the early varieties are very full.

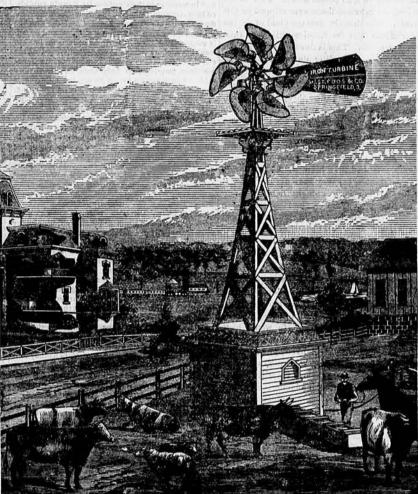

Apples seem to be falling off, also the cherries. Strawberries promise well.

No disease of any kind among stock so far as

No disease of any kind among stock so far as I km w. All seem to be in good spirits and hopeful for the future.

The sheep interest seems to be looming up in this country. Several thousand have been brought in within the past year. I will soon give statistics of the wool yield as most of it is sheared.

sheared. May you still continue to do your good work and awaken interest among the farmers in their calling. J. P. W.

THE IRON TURBINE WIND ENGINE.

to 1835 there was brought to notice by the gov- clothes or mutton. ernor of the state of Indiana the Berkshire, which was bred by Andrew Jackson and presented to Governor Noble who distributed them to the agricultural societies of the state. One Tichenor got the care of the Berks and they were marked with white feet and tip. They were curiosities to all. Tichenor bought an English sow, so called in Pennsylvania and he got some of the Britton sows of the cross last named and used Berk males which generally left the product nicely spotted, with tips of ears when young a little limber. Then a cross from the big English sow and Berk boar made with the half Britton and half Berk which produced as a good a Poland-China as I have ever seen since. I have raised both breeds and have no preference to this day to state. Many of these hogs attain the weight of 600 to 800 pounds at twenty months and two

While the pure Berk was all life and ambition and the half bloods fine and the best drivers,(as we drove to market in those days,)none ever giving out, while they carried more weight than other breeds, they lost less in driving and there is no doubt but they are the hardiest hog that lives and they will always get up for strangers to look at when called upon. J. C. H. SWANN.

Newton, Kas., May 30.

### Several Reasons Why Wool Must Rise.

First, because it is very low and cannot get any lower. Wool has never to my knowledge been any lower than it is at the present and has been for over one year. There must be a reaction and an improvement soon.

Second, the clip of the western states is fully

a little white China, a very fat class of hogs. pouring into the United States, besides the in-Then he crossed with a Russian hog, so called, crease of our own home population must cerwhich was black, excepting a few spots; ears tainly increase the deman! for manufactured large and hung over eyes, while the little white goods, and we never will at the present rates China had short erect ears; this last class made produce our own supply of wool. Sheep and a desirable hog. But as the Brittons were tak-ing the lead rapidly and satisfactorily in 1832 we all get so rich that we will want no more W. J. COLVIN. Larned, May 23. Against Hedges.

EDITOR KANSAS FARMER:-I have for some time wanted to give my ideas on hedges. I have several miles on my farm, and have done my best, in the way of careful preparation of my rows and scrupulous care in filling in dead and missing plants and thorough cultivation, to have a good stand and consequently a good

Now, Mr. Editor, after six or seven years of experience and some observation of other people's efforts with Osage Orange, I have come to the conclusion that it is a humbur, a

fraud, and unmitigated nuisance. First it is the most costly fence a man can put out. Count the breaking of your hedge rows and cultivation of them for two years to prepare them for your plants, the cost of the plants and the setting and re-setting of them, the cultivation of the row for four years, the trimming, pruning, slashing or bending of the hedge, and cutting off the tops and laterals twice a year forever afterward and it will amount to an astonishing sum.

Second, when you have done all this you have, generally a poor, unsatisfactory excuse for a fence.

Hedge has so many enemies. Moles, ground squirrels and especially gophers kill here and there plants or whole rods together making gaps and holes or weak places in your fence. Then again if it happens to be around a pasture or though the praire sod, great care must be exercised each fall or fire will, in a few moments, destroy the labor of years. If sheep range around young hedge they are sure to kill

### The Larm and Stock.

#### Flax Seed.

Up to within a few years the great bulk of the linseed oil consumed in the United States was made from imported seed, the largest per cent. coming from Calcutta. But the rapid development of our agricultural resources, and the cheapening of transportation, has enabled western farmers to grow seed and deliver it to the crusher at prices that have almost entirely driven foreign seed from the market, the falling off in importations at New York since the first of the current year, being over 56 per cent., as compared with the same time in 1880, and the indications are that a few years hence foreign flax seed will be unknown to American crushers. The increase in the number of oil mills in the west has also kept pace with the production of seed, and instead of sending the latter to eastern crushers, where the oil was extracted and returned to western consumers, the seed is crushed by mills near where it is grown, and the product shipped to all parts of the country. The shipments from the Consolidated Oil Company's agency in this city to eastern markets during 1880, aggregated 40,000 to 45.000 bbs. The 54 mills constituting that combination, report an annual consumption of 4,000 000 bushels of seed and a production of 8,000,000 gallons of oil. The cake or refuse is all exported to Europe. The average price here being about \$25.00 per ton, and such is the demand that the mills are frequently unable to fill their orders promptly. For the purpose of showing the increase in the production of flax seed during the past few years, we give for four years, the first month marking the period when the new crop first begins to move to market. The statement is as follows:

	Receipts bus.	Shipments bus.
1880-81	3,399,833	2,790,715
1879-80	2,150,994	1,558,434
1878-79	1,307,950	851,445
1877-78	1,220,110	1,000,539

PRICE IN CHICAGO FOR TEN YEARS. The following shows the highest and lowest prices of flax seed in Chicago for the years named and from January 1 to May 21, 1881:

Year.	Highest.	Lowest.
1881	\$1 271/2	\$1.09
1880	1 15	1 05
1879	1 58	1 14
1878	1 45	1 16
1877	1 75	I 13
1876	1 55	1 15
1875	2 00	1 15
1874	2 25	1 50
1873	2 25	1 40
1872	2 25	1.25
1871	2 40	1 25

The outside prices generally represented choice sowing grades which frequently sell at 10@20c over crushing seed.

#### THE CROP OUTLOOK.

From the most reliable information we have been able to collect, we think it safe to say that the acreage put in the current year may be estimated at 20@25 per cent. less than that of 1880, and some very well informed authorities place it at 30 to 33 per cent. from the planting in time, besides being injurious to the wool. of 1880. The decrease was chiefly due to the lateness of the season, which prevented many farmers from sowing sufficiently early to insure a good crop. The proprietors of a large mill in Ohio, write as follows: "Out of 20,000 bushels of seed loaned to farmers for sowing, only 5,000 bushels was sown up to May 16, and there is little prospect that much more will be planted, as the season is too far advanced to hope for even a fair crop from such planting. ficient to chill ewes bringing lambs, and have There are no means of estimating the supply, still in the hands of farmers and country dealers but the liberality of current receipts justify that some of my neighbors have lost as high as the conclusion that it is larger than at this date one-fourth of their flock, and none that I have ounces; and the third, 19 pounds and 12 ounces. last year. It is stated, however, that the sup- heard from, that have sheared but what have ply held by the mills is less than a year ago. | lost more or less. Sheds are more necessary and we hope our farmers will try and work up Farmer's Review

#### Short-Horn Sales of 1880.

A late number of the Country Gentleman contains the usual annual statement of Short-horn sales of the previous year. In the list before us, the sales are classified by states, and the list seems to be complete. The tables showing the summary and record of previous years we copy below:

#### GENERAL SUMMARY FOR 1880.

	No.	Average.	Total.
Kentucky	738	\$173,47	\$128,01
Missouri	984	103.03	101,38
Illinois	500	144,06	72,02
Ohio,	265	107.95	28,60
Iowa	314	105.20	33,03
Wisconsin	98	162.70	15,94
Connecticut	37	104.60	3,87
Minnesota	60	153.00	9,18
Pennsylvania	. 11	146,64	1,61

do 1877... . 3,237 230.09 4,004 4,347 do 1876. 422,00 1,832,383 do 1874.... 2,676 385,00 do 1873... do 1872..... 1,014 313,00 317,625 do 1871... 290.00

do 1870,... 343,00 169,557 During the eleven years included above, the recorded sales of Short-horns have reached an aggregate of 26,151 head, which have realized in the ring a total sum of \$7,682,439,—being equal to a general average of a fraction short of \$294 per head.

#### Sheep Notes.

EDITOR KANSAS FARMER:-I have been sked frequently by sheep men to explain the reason why their ewes would not own their lambs and why the lambs were so weak when they were dropped. I sometimes asked them what they were feeding, and commonly the answer was "I am not feeding anything, the ewes seem to be getting pretty plenty of grass now." I asked how long since he quit feeding, c.mmonly the answer would be. 'Oh about a month or since the grass commenced to start, he got out of feed and thought they could come through without." Now, common sense should have taught these men that the lack of feed when the ewes most needed it was the cause of the lambs being weak and the mothers having no milk for them. He had quit feeding just when he should have increased the feed to keep up the strength of the mothers when they are coming on the new grass which has so little nourishment and causes the herd to travel more than at any other season of the year. Another fatal mistake that most new beginners make and especialty those who are unacquainted with stock raising in this climate, is in making their own selections instead of employing a competent and experienced man to make the purchase for them. Nearly every instance where losses have occurred the past winter, is where bad selections have been made. Either too late in the season and the sheep in poor condition or a large per cent. of old sheep that have been driven to market because their former owners had kept them long enough. It knowledge of sheep and especially the western the receipts at Chicago from August to May 15, of a herd without handling them and nineteen to do. Better to pay a good fair commission loose 25 to 40 per cent. during the winter and | years.—Eureka Herald. all the care and feed you have given. Buy earlier instead of waiting for a decline in prices which seldom comes.

> Sheep on the halves is another loosing game, especially for a poor man and where the sheep are old, poor and late in from the drive, as ter. The practice of buying cheap, low grade rams is another fatal mistake that many make, because (they say) they are not able to buy better. It is far better to get good ones and less of them, or sell a portion of the ewes and provide better rams for the rest of the herd. Do not put all your money in a herd of ewes and have nothing left to provide them with more than \$5 worth of wool to the head.—Parproper rams, shelter or feed.

Those who are using Ladd's Tobacco or any other tobaccodip should not boil it, it injures the dip and evaporates the valuable portion. Steaming and simmering thirty-six hours before using, with the steam vat well covered, saves twenty-five per cent. more than boiling. A steamer will soon pay for itself in fuel and the benefits derived from the saving in the tobacco. We have tried it to our entire satisfaction. Do not use any poisonous drugs or a acids as it is sure to tell severely on the sheep

Early shearing has been attended with great loss as usual. People will never learn except from experience, and that often proves a dear school. It will answer to shear rams early if they have been well kept during the winter, and are fat, have good sheds and wind breaks also good dry bedding. But ewes should never be sheared earlier than the first of June. I have seldom seen a May without a storm sufseen them perish with cold when newly sheared as late as the 10th of June. I understand for the ewe herd from March to June than from December to March. Straw or broom corn or hay sheds are as good as boards in the men on the subject.—Independence Tribune. spring time and better for winter. A section of corn is a good substitute for shelter, when the shelter cannot be had but both is still bet-W. J. COLVIN.

Larned, May 27th.

#### Clover and Rye for Hogs.

In my experience, says a writer, I have found nothing so profitable for hog pasture as clover and rye, and I think rye preferable, and the reason they are better than timothy, bluegrass, and all similar grasses is, they remain more tender for a longer period than other grasses, which so soon become wiry and hard, partaking of the nature of hay, and I have never known hogs to thrive on it, although other stock does. To use rye profitably for pasture, fall rye should be sown for spring pasture, and spring rye for later pasture, and by not pasturing too long and too close there will be considerable head out, which, when ripe will, with the weeds that naturally grow among grain, make good pasture until time to commence feeding corn, at least such is my This has been demonstrated in the past three experience. As to using any of the grasses for hog pasture, I should prefer a good weed pasture, and I will here say that I am of opinion if some of the weeds so eagerly eaten by hogs were domesticated and procerly culti-

All good articles are imitated and Higgin's of so-called sifted salt are now offered, but the salt is not the Higgins Process by a great deal.

#### Sheep and Wool Topics.

Mr. D. M. Frey sheared two hundred and twenty-six pounds of wool from twenty-six head of sheep, all ewes but one. His sheep are a mixture of Southdown, Merino and Cots wold .- McPherson Freeman.

At the sheep shearing festival held at Brittsville, Mitchell county last week, one two year old buck had a thirty three pound fleece taken from him. His owner was awarded the blue ribbon .- Concordia Empire.

Mr. B. F. Allen, of Walnut township, is the happy possessor of 1,500 lambs, this beautiful sight to see them gamboling o'er the green prairies .- Augusta Gazette.

At the sheep shearing festival at Asherville, on the 25th, inst, M. B. Tilden, of this place, took the first premium with a two year old Merino buck weighing 152 pounds and shearing an even thirty pounds .- Cawker City Times.

We were shown this week a sample of wool from one of J. M. Collett & Son's Cotswold lambs under six months old that measured fiften inches in length, and was of fine quality. Messrs. Collett's undoubtedly have as fine the columns of this paper a short time since. In the sheep as can be found anywhere in the west .-

Mr. White informs us that he has commenced shearing his sheep. Two of his rams gave a fleece of 271 pounds each, and all the rams averaged 23 pounds and 6 ounces each. Mr. Loy will doutless lead the county on a single is very difficult for a person having a limited fleece, he having sheared one ram last week that turned off a 29 pound fleece. This is we sheep to judge either of the age or condition | believe the heaviest fleece ever clipped in this county. It is thought average yield of all the cases out of twenty that is out of the question older flocks will be heavier this year than ever heretofore. This is due to better care and than to buy some man's old scalawags and more judicious breeding during the past few

Messrs. P. R. Pitts & Co., and Bray have just finished shearing their sheep at Henry Baker's barn. Their flock consists of three hundred and twenty-five head, of what is known as the American Merino. The largest fleece weighed twenty-five and one-half pounds. many have learned to their cost the past win- They would have averaged more than twenty pounds each had they been well kept during the past winter, but they have not been housed at all, having been brought here from New York last fall. This is the largest wool clip we have yet seen recorded in this country, and it seems as though wool growing ought to pay here when so large a flock of sheep average ons Eclipse.

> Thursday of last week, and on Friday night, during the cold rain, 17 head of sheep and 20 lambs were chilled to death. He would have lost many more if he had not gathered up the weak ones and put old blankets, pieces of carpet, canvass, or, in fact, anything that would keep them warm over them. He still has over one hundred per cent of his lambs left.

> Mr. John Hurst, is having splendid success in sheep raising. His flock has increased this spring just 110 per cent by lambs. No one can doubt for a moment that this is not a sheep raising country when they have talked with our present sheep raisers .- Caldwell Post.

> Mr. Henry Cowgill, of Rutland, sheared from 304 head of sheep, 1,479 pounds of wool; 196 Missouri sheep sheared an average of four pounds and one ounce; 105 yearlings, a cross between the Merinos and Missouri, averaged five pounds and  $12\frac{1}{2}$  ounces, or 610 pounds from 105 head. He sheared from three bucks, the first 12 pounds; the second 14 pounds and 15 This shows what sheep will do in this county,

> Mr. Weeden, of Wellington, we understand is about to purchase 1,500 sheep to put on Barbour county range.

> H. H. Hardy informs us that the number of lambs living in his flock outnumber the ewes that have lambed so far.

> Dr. Stout lost twenty-five head of sheep last week caused by the cold rain coming on just as he had finished shearing.

L. M. Sullivan was among the unfortunates who had just sheared their sheep before last week's rain storm and lost about twenty-five head in consequence.

F. Landis and son began shearing their sheep day before yesterday. The crop will be comparatively light, so Mr. Landis informs us. He is of the opinion that sheep raisers will find it profitable to grain their sheep heavily during the winter. - Medicine Lodge Cresset.

There is no doubt but that Barbour is a splendid sheep county, but sheep are very tender and require constant attention and care. With the changes our climate is constantly undergoing, it is a dangerous practice to leave sheep without shelter even in mid-summer weeks. The cold rains came on just as the shearing had been completed, and the result was that a great many were chilled to death. The heaviest loss we have yet heard of, is the Validon boys, who lost four hundred last vated, they would prove more satisfactory for hog pasture than anything used of grass-kind.

All good articles are imitated, and Higgin's All good articles are imitated and Higgin's to the boys, as they were just starting and English Salt is no exception. Several brands of so-called sifted salt are now offered, but not been for some house lumber he had on the grinding up panscale and then sifting it with consisting of about thirteen hundred .-- Medicin Lodge Index.

#### THE TRUE TEST.

The Merit of Religion, Government, Persons and Things Must Rest Upon a Basis of Worth.

Some Truths Illustrating this, and Testimony of Value to all Readers.

[Christian at Work.]

The true test of any religion is the effect it produ ces upon the lives of those who profess it. And, in. deed, the test of real merit everywhere must be the power it possesses of accomplishing desirable results.

Allen's (R. L. & L. F.) New Am. Farm Book,
Allen's (L. F.) American Cattle,
Allen's (R. L.) American Farm Book,
Allen's (R. L.) American Farm Book. spring's increase of his flock of sheep. It is a they claim to be able to do, but by what they can do not by what they are reputed to be, but by what the arc. Here is where the religion of our own country rises superior to the faith of Mohammedan or Hindo lands; for while there is much hypocrisy in the Chu, ch, and far too much worldliness, there is yet a absence of those sensual and brutal elements which characterize the religious of Arabia and the Gar

parts of the land as a prominent and efficient leade in the Methodist denomination. In speaking upo this same subject as shown in his own experience h said: "Some few months since I found myself suffe ing from a kidney difficulty which I knew to be th first stages of Bright's disease. By the use of a reli Mr. A. B. Winn living on upper Bluff ble test I found that my system was giving off alb Creek, finished shearing his flock of sheep on men, and in some instances in a coagulated state, also suffered severely from dropsy, particularly about the ankles, together with pains about the kidneys,d rangement of digestion and great dryness of the ski I had at all times much thirst, and of course this w followed by a gradual failing of strength. That we about the state of things when I commenced usin the preparation known as Warner's Safe Kidney an Liver Cure. I took about six tablespoonsful ever day for a week, and found all my symptoms decide

of these cases, which seemed to be the last stages and had been given up by practitioners of both schools, the speedy cures which were wrought by this remedy seemed to be little less than miraculous. I am convinced that for Bright's disease in all its stages, including those first symptoms of kidney troubles which are so easily overlooked, but are fraught with danger, no remedy heretofore discovered can be held for one moment in comparison with this, and I hope that Warner's safe Kidney and Liver Cure may become as widely known as is the existence of the maladies which it will cure."

Rev. A. C. Kendrick, D. D., LL. D., who is Professor of Hebrew and Greek languages in the University of Rochester, N. Y., and who is one of the American revisors of the New Testament, in speaking of the leffect which Warner's Safe Kidney and Liver Cure had upon himself start-d most emphatically that he had received marked benefit from it, and he cordially recommeded it to the use of others.

Rev. A. Bramley, pastor of the Arsenal street M. E. church, Watertown, N. Y., testified in a recent interview that the first few bittles of Warner's Safe Kidney and Liver Cure had entirely removed the distinctive features of a severe kidney difficulty, and that while he had not been able to lie upon his back without great pain for more than five years, he was now not only able to do so, but slept soundly, at heartily and calls himself a well man.

Rev. A. P. Hill, of Shocheel, N. C., having been troubled with severe kidney and liver disease for a number of years, said; "I have been praying for relief for four years, and I believe I got it in snswer to prayer. May God bless the firm who manufactures Warner's -afe Kidney and Liver Cure. Many of my friends have also used it with marked benefit, and I hope my testimony in its benaff may save the lives and relieve many who are now severely suffering from kidney or liver troubles in some of their many and dangerous forms."

Rev. P. F. Marklee, in writing from Montgomery, Ala., said: "I have been to

#### Railroad Monopolies.

EDITOR KANSAS FARMER:-I saw by a recent issue of a Kansas City paper that some one thought that by the combination of the management of the different railroads that it cheaper freight rates for their patrons, and his reasons were, that it would save transferring from one company to another, and thus the additional rate. That was theory, now let us look at the practice.

Before the Kansas Pacific railroad b came a part of the Union Pacific, the rate on a car load of stock from Junction City to Kansas City was twenty-five dollars, and the shipper could pass to Kansas City and return by paying half fare each way. On two loads of stock he was entitled to a free pass each way.

Immediately upon the consolidation the rate advanced to thirty dollars per car, and no return passes issued at all.

Thus we see that theory and practice are two different things. While I am on the subject of railroads, I wish to ask, Has the management of this same U.P. road got any heart or soul? if so, it must be deeply covered and not to be reached-that they are tyrants, I think most of your readers will agree, if not, perhaps they will after they have read the following,

I recently had a package, weight 100 lbs. come from Iola to Junction City, Fron Iola to Lawrence the distance is about 20 miles shorter than from Lawrence to Junction City, but the freight from Iola to Lawrence was 90c, but from Lawrence to Junction City it was \$3 30. Is this as it should be? Is there any reason in it? Why will the farmers of Kansas stand idly by and allow this to be done? Perhaps some of them will say "What are you going to do about it?" I would say let us follow in the footsteps of the Misso ri Legislature and make the rates for them. If they have no conscience and it is very evident they have none it is time some one should make them feel that there is a point where "forbearance ceases to be a virtue;" and that point they have about reached. A very little firmness on the part of the farmers, and a careful selection of farmers for our legislature, will work wonders, and soon bring them to their senses.

A. N. MILLER. Junction City, May 31.

#### The State Lecturer in McPherson County.

EDITOR KANSAS FARMER:-We were favored with a visit from the lecturer of the state grange to this county, and although he came The Duty of a Good Patron to his Fami in a busy and wet time of the year, still there was a fair attendance at his meetings. We need more of such work from him and others. He met Cornucopia grange in secret session name home is such only where kindness and and passed a candidate through the initiatory forebearance are known as common virtues. ceremonies. We hope to welcome Bro. Bar- Exact equality of mental force rarely exists nard back again this fall or winter. We went between husband and wife, and the superiority is to Hutchinson with him and met some very frequently found on the female side of the solive Patrons south west of there where there is cial circle. However unevenly matched in all a live grange, the Patrons being alive to the the forces of life there must be harmony of acactive workers.

and Hendry and others who are very active true test of manhood, is the kind and affectionworkers in the cause, and alive to the needs of ate husband and father at home. The tyrant the farming community at large. Although at home is always a coward abroad, we are not so strong in numbers, still we are just as strong to-day and more active work is being done for the liberation of the farmer gotten or forgiven, but remains smarting in from the iron grasp of the monopolist.

GEO. OLIVANT. King City, McPherson Co., Kas.

### Hints on Politeness.

As we attack monopolies, and justly criticise the selfish feeling which impels them to grasp so much and give so little sometimes in return let us not forget that we have similar faults which sometimes crop out into sadly disagreeaan enemy's eye, let us remember the beam in shortcomings as well as those of its disagreea-

ble neighbor. years we should not neglect our own houses, and we may often find in our mental machinery, or up in the attic, a spot that might be port to aged and infirm parents. much better for a little patch or or a little polish. The brother who struts pompously into his country and his government is more or less the grange, berating all who venture to differ

grasping corporation in the land; and had he and our parents. To ascertain our duty to our the power would use it with as little care for country at any time in life we have only to others. He that is selfish in little things would balance the cash value of benefits received be more so in great ones; and the spirit of no- against what we pay in revenue and taxes and ble generosity and true manliness will declare the exact truth will be ascertained. Governitself at all times and under all circumstances. ment means force and direction, and therefore All men can be just, generous, kind, true gen-

show as little deference and respect to all whe dare differ with them in opinion as do the mothe letter I, and from that perch look down labor to rid the world of the drones, the paraupon all about them. "Big I and little u" is sites and the sharks that prey like vermin to see others writhe under its stinging blows; hands. would make, or have a tendency to make, who fly into a rage or relapse into sulkiness if you wound them with their own weapons, and who are as un amiliar with the retort cour- to follow the deductions of his own reasoning teous as they are with the mysteries of spectrum analysis.

Such men may be honest, but they are exreedingly disagreeable, and like porcupines places faith in God. A wise provision in our make prickly neighbors for friends as well as foes, To pick them up without being punctured by some barbed point is a moral impossibility, while love itself cannot embrace them God our Father in a manner as broad as the without danger of a sudden and disagreeable visible universe and untrameled by church and death. Of all monopolists, these are the most sectarian creeds. Our faith in God should be uncomfortable and dangerous; and the man as boundless as His eternal years. A God who perches himself in the letter I, and from without beginning and without end, Too wise his throne flings bundles of personal pronouns to err or to repent-too good to cherish wrath at all within reach, is a sort of a complicated or jealousy, and who orders all things after the boomerang who endangers friends as well as council of His own will-one true and living foes, and, like a dynamite cartridge, has to be God. Our whole duty is embraced in living handled gingerly and always kept "this side up in harmony with God's law. Every mathewith care."

Whenever you meet such a man give him a lesson in politeness and let it be administered heads that suffer when in conflict with His according to circumstances.

#### Reno County Alliance.

We have received from W. H. Hillyard, secretary, and Harvey Benedick, president, the following preamble and resolutions adopted by the Reno County Alliance, May 28th.

WHEREAS, The people of these United States have long suffered great injustice at the hands of our leading politicians and legislato s, by class legislati n, unequal taxation and favoritism of every description in public affairs, and

WHEREAS, After repeated trials and much long suffering and patience on the part of the people it has become manifest that they cannot have redress from their wrongs through either of the great political parties that have had charge, for many years, of the government, therefore, be it

Resolved, That we as a body of farmers at once cut ourselves entirely from this corrupt political machinery, and select honest, true men from our numbers to represent us and our interests in the halls of our leg teleture both state and national. That we send such men to those positions pledged to carry out the interests and wishes of the people who elect them, And then remembering that "eternal vigilance is the price of liberty." we earnestly recommend that each and every man of our number see to it that he does his individual part in compelling, if need be, these public servants to do the wishes of the people

Resolved. That a copy of these resolutions be furnished the secretary of each alliance in the county with the request that he bring them up for co ation before the alliance he represents

#### Somewhat Woolly.

We think few of our readers will wish us to present an apology for the large space devoted in this weeks FARMER to the sheep and wool industry. As we have long hoped they might the people of this state and elsewhere, are beginning to realize the advantages presented by our climate, soil, water and grasses for growing the finest, healthiest sheep in the world at a minimum cost. The assessors returns of this year will show a marvelous increase in the number and size of Kansas flocks, and the wool product from these is now ready to be converted into ready cash to make glad the hearts and procure comforts for those whose flocks have been carefully watched and tended.

Perhaps the fleeces will not just now bring as much per pound as their owners would like, but there will nevertheless be a profit aside from the increase, in the number of the flock and bring money at a season of the year when farmers need it, and can get it, especially in a new country-out of little else.

The men of flocks and herds are to be congratulated; their enterprises deserves to flourish and the FARMER extends to them its cordial good will. So long as Americans annually send abroad from fifty to sixty millions of dollars for foreign wools and woollens the business is in no danger of being overdone here, and the prospect is encouraging.

#### Walter Brown & Co.'s Monthly Wool Circular.

Under date of June 2d Messrs. Brown say: "The month of May opened with a continuance of the quiet that had pervaded the trade since the beginning of the year, and for the first of the year was devoid of any particular interest to those connected with the staple. Manufacturers still held to their previous policy, of buying only what they actually needed, and they required very strong inducements, in the way of low prices, to lead them to purchase in advance of their requirements. On the other hand, holders of wool seemed to have come to the conclusion that there was no use in making a further break in values, as each drop since January had created only a very temporary activity, to be followed by a more oppressive dullness, and failed to settle the market upon any firm foundation. The result was, for the first half of the month, a comparitively small business in wool and an occasional slight concession in price, where the owner was desirous of closing out some particularly lot.

Tie backwardness of the spring during March and April, had a depressing effect upon the woolen goods trade, but the warmer weather which has prevailed during the past thirty days, together with the increased facilities for distribution, has brought quite an improvement in this branch of industry. But few heavy weight goods have been carried over from last year, and the production of spring fabrics have been closely sold up, hence the new season opens in good shape for the offering of fresh styles of fall woolens. The trade among clothiers and jobbers appears to be much more satisfactory than for a year past, and manufacturers can feel that it is not all up-hill work, to put wool into goods and get their money back.

The improvement in woolens probably as much as anything else, is the cause of the steadier tone that has prevailed in the wool market since the middle of May, and which has become particularly evident within the past tew days. The late spring has also kept the new clip back much longer than was anticipated, and in addition, the latest advices from England report a stronger feeling on fine wools, with a tendency toward higher prices.

FINE FLEECES-Which were rather sluggish at the beginning of the month, have during the past week been in good demand, although manufacturers are slow to pay any advance over previous rates; and holders, with the desire to close up old accounts before opening the new season, have generally been dis-

posed to meet buyers at present quotations, The transaction have led to a considerable reduction of the stock of desirable lots on the market, and at the close, a slight improvement is noticeable in the value of X and above

MEDIUM FLEECES.—The supply of good medium or half blood grade is now scarce, the inquiry for this class having been quite active for the past ten days. Low medium or quarter blood, as well as course wools, continue to be neglected, and do not seem to enter into the present production of goods to any great extent. For this latter quality we anticipate but little demand during the coming season, and operators in the new clip should avoid them as much as possible, except at very low prices.

Pulled Wools.—Low Western Super Pulled Wool is probably the slowest article now on the market. During past the few months there has been a large accumulation of these, and being of a grade but little sought after, they have been very difficult to sell. Eor even grade of Eastern Supers the demand has been better and they meet with more ready sale a quoated rates.

TEXAS WOOLS.—These wools promise to be in better general condition than last year, and will undoubtedly meet with much favor from manufacturers. As but little of the new clip has arrived in eastern markets, and lots are closely cleaned up, the transactions for the month have been merely nominal. The course of the market last year, with its steady decline, could give but little satisfaction to shippers; this season, however, opens on the opposite basis; with low prices as a starting point, and general improvement in prospect for both wool and woolens, as an encouragement to make consigments to the seaboard mar-

MISSOURI AND KANSAS WOOLS.-The decided improvement in the fine unwashed wools from these states is a matter of much congratulation to both the growers and consumers. The frequent rains of the past two months has done much to relieve the wool of the dirt that penetrates the staple during a dry and windy season, and from reports and samples received, we have every reason to hope that the odium attached to the wools of the latter state will this year be removed.

The month closes with a fair demand for all grades, except Low Medium and Coarse wools, accompanied with a firm feeling at present quotations, and the conviction that for some time to come, prices have actually settled upon a solid basis. The prospects of any material advance in the near future are uncertain, but the indications would point to the probability of an active and healthy trade through the summer and fall, with a fair margin in values between growing districts and the markets of consumption."

#### The Wool Growers' Convention.

27 to 29

... 20 to 23

Report of the semi-annual convention of the Wool Growers' and Sheep Breeders' Associaion held at Emporia June 1st.

The convention was called to order by the President, J. S. Codding and the roll of cficers called by the secretary. The President, ecretary and treasurer answered to the call of their names.

A motion by Mr. Booth prevailed, that the

eading of the minutes be dispensed with. The president then delivered a brief address in his usual happy style (notwithstanding his suffering from a slight indisposition brought on by overwork and exposure) reviewing the work of the previous year, referring to the obstacles which it had been necessary to over come, and pointing to the advantages of the present year, claimed a bright outlook for the wool growers of Kansas. The dust storms of last summer and fall and the severe winter had been disastrous, but there has been no dust this year, and the wool growers of Kansas can now proudly point to their wool, which will compare favorably with any to be found in the markets.

Proceeding to other subjects, he suggested that some steps be taken by the Association to secure recognition in the National Wool Growers' Association; and urged that auxiliary associations be formed in one or more counties. He also urged that these auxiliaries send their premium fleeces to the semi-annual meeting of the Association and receive an award of merit from this Association.

He then stated that the president and secretary of the Association had accepted from the State Fair Association an offer to the Wool

Growers' Association to take charge of the department of sheep at the State Fair to be held in Topeka, and to turn over to the Association to distribute as premiums \$1,000. He added that those officers now desired the sanction of the Association for their action.

A motion by Senator Wilkie and seconded by Mr. Wadsworth prevailed, endorsing the action of the president and secretary in completing the arrangement with the State Fair Association to hold a "State Sheep Show" in conjunction with the State Fair in September in Topeka.

On motion of Mr. Booth, the president (and superintendent of the Sheep Show at the State Fair) was authorized to make all appointments of judges of awards in all classes and departments of the Sheep Show at the coming State

A motion carried for a recess of 10 minutes to allow all who wished to join the Association, which was responded to by a large num-

ber, making 53 new members. The membership present representing over 100,000 sheep.

Upon the convention coming to order after ecess, Mr. Shelton offered the following resolution which was adopted.

Resolved, That we heartly commend the Western National Fair Association for the success accomnlished by them at Rismarck grove on the occasion we recommend the wool growers of Kansas to avail themselves by their exhibits and attendance of the opportunity its future exhibitions may give for exnding the wool growing interests of Kansas,

On the adoption of a motion by Mr. Mathews that the chair call on members to give their experience in the sheep business the last winter. The chair called on Mr. Mathews who responded; as also did Messrs. Senator Wilkie, Wadsworth, Potter, Winfield, Colvin and

To the effect that "Amber Cane" or Sorghum produces the best feed of any yet developed. By sowing broadcast during the months of May and June, about one half to a bushel of seed to the acre, and cutting or gathering when the seed is ripe and before it is frosted.

Mr. Wadsworth has planted about 200 acres to winter 6,000 sheep. Mr. W. also recom-

mends millet if fed with care. Mr. Codding has fed millet with suc-

Mr. Mathews was enthusiastic in his recom nendations of Sorghum.

Mr. Potter's experience with millet was not atisfactory.

Senator Wilkie feeds three bushels of corn per day to the hundred, and recommends full rácks of hay, millet, etc., and with this is confident of success.

Mr. Colvin thinks with good wheat straw and plenty of corn that sheep will come through even as hard a winter as the last in good condition.

On motion of Mr. Snediker, Mr. H. T. Brown, of Messrs, Walter Brown & Co., of Bos ton, was called on to state the condition of the wool market and their mode of selling, which was to the effect that to get the most for their consignors was to assort the lots of wool shipped them, into two, three or more lots of as many grades as contained therein and sell each grade separately to manufacturers who use such grades. In order to realize the most that is possible for their customers.

Mr. Bogman, of Messrs. Bigelow & Co., o Boston, corroborated Mr. Brown's statement of their mode of handling wools. As also did Mr. Clark of another Boston wool house, and Mr. B. W. Sayers, of Chicago.

Mr. Booth, of Leavenworth offered the following resolution:

Resolved. That we exonerate Walter Brown & Co. from any intent to injure the growers of this state by their statement which appeared in their circular of November, 1880.

President Codding calling Mr. Wadsworth to the chair, took the floor; said the matter had been talked over before the meeting by himself and Mr. Brown, and he (Mr. Brown) had produced proof to the satisfaction of Mr. Codding that certain pa ties had sent dirty wool to market.

Mr. Codding therefore made the statement and said he hoped no member of our Association would be guilty of such an action, as it would not pay Kansas wool growers to send dirt in their wool to market. Mr. Codding removed all ill feeling in regard to the circular.

Mr. Brown responded that he had made explanations to the president and others of the society and they were all satisfied with them and asked Mr. Booth to withdraw his resolution which he did.

On motion of Mr. Codding the chair appointed a committee of five to complete plans for organizing auxiliary associations in every county in the state.

The committee was composed of the following gentlemen: G. H. Wadsworth, A. B. Mathews A. H. Thompson, F. Winfield and H. Mathies, and requested to report at the evening session.

Mr. Booth moved to adjourn until 7:30 p. m. Adopted.

#### EVENING SESSION.

The convention was called to order by President Codding. The committee on the formation of auxili-

ficient time to complete plans, etc. On motion prevailing of Mr. Shelton the

ommittee was continued to perfect plans and eport at the next annual meeting. By general consent he president and secre ary were added to said committee.

On motion of J. E. White the following reso lution was adopted:

Resolved, That we, the members of of the Kansa Wool Growers and Sheep Breeders Association ex-

tend a vote of thanks to the A., T. & S. F. and K. P. R. Roads for their liberal reduction of rates to the nembers attending the convention

A communication from the ladies of the Presbyterian church was received. Accepted,

and placed on file. Mr. E. C. Diehl offered the following reso-

lution which was adopted. Resolved, That inasmuch as this association has accepted the management of the sheep department at the state fair to be held in Topeka; and as the Fair Association has offered us such liberal premiums, we s members of this association, will take such interst as to make this show a complete success.

On motion of Mr. Shelton a vote of thanks was tendered the county officers for tendering the use of the court house and to the public press of Emporia for courtesies received.

Mr. Mathews offered the following resolution which was adopted: Resolved. That this association will sustain any

member who may prosecute any violator of the law for driving, moving, selling or handling diseased sheep east of a line drawn north and south through

The president offered and moved the adopion of the following resolution:

Resolved, That in the opinion of this society, there is no need of any man having scab in his flock more

On motion adopted that the Association recommend the following receipe for curing

Fifty pounds of tobacco and 10 pounds of sulphur to the 100 gallons of water. After steeping the tobacco sufficiently add the sulphur and heat the liquor when used to 120 de-

The following resolution was unanimously adopting.

Resolved, That all dogs found away from home hould be dealt with according to the feelings of

After a unique valedictory by the president motion to adjourn prevailed.

> J. B. BARTHOLOMEW. Secretary.

#### The Public Shearing in Butler Co.

The public shearing, and sheep show was neld at the farm of A. J. Uhl, at Douglass, May 25th which was well attended.

The information below we glean from a report furnished by a correspondent to the Capi-

The following is the accurate weight of fleece, weight of carcass and total weight as recorded and reported by the committee consisting of B. T. Blackburn, Wm. Stapleton and John Stalter.

There being no prize offered the committee devoted their whole time to a careful super vision of all the details and without doubt secured figures that no one can question.

In this report will be found the record of a large number of wethers shorn on that day, and the reason of this is not that they were billed for this show, but they had been contracted to Mesers. Wimple & Hodge, of Winfield, Kansas, at three dollars and fifty cents per hundred for mutton and had to be shorn so as to be ready for shipment. These men purchased of this flock 250 head at the above price, and they averaged 1113 lbs a head, and they shipped them to the St. Louis market. Mr. Uhl has sold this year 100 head of ewes from his flock, the culls at \$13 per head, and the next fifty culls at \$15 per head, and he takes off the fleece before delivering them and also the lambs at weaning times. He has taken about eighteen lbs of wool off from each of the sheep, which makes them bring a round ary societies reported that they had not suf- pricewhen all is told. He has been breeding this flock fort we ntyyears and his object during that time has been to make sheep that would bring him money, and he has succeeded, as the amount of both wool and mutton will show to

E. Copeland, who had sheep on exhibition here, has 800 old sheep, 200 swee and 191 lambs this year. Original flock were from Ohio and has been bred by him 4 years and exclusively to Uhl's stock and the average of

the original flock's fleece was 51 pounds, and the average of the present flock's fleece is 141 pounds.

Average weight of yearling's fleeces this year 13 pounds.

200 wethers sold from this flock, 2 and 3 years old, averaged 135 pounds before shearing and brought \$3.50 per hundred, shorn.

Neil Wilkie has 520 old sheep, 180 lambs; 260 Cotswold, 240 half-breeds. Original flock Cotswold from Kentucky.

Average fleece of original flock 101 pounds. Bred to Uhl's stock 2 years. Average fleece of half-breeds, 1 year old, 12 pounds.

J. C. Taylor, J. W. Snodgrass, and many others, have been breeding with the same results, both in carcass and fleece, Taylor's flock having increased in weight of fleece 5 lbs., and Snodgras's about 61 lbs., increase on fleece by crossing on Wisconoin sheep.

The facts set forth in the above report are simply what men are actually doing here with sheep. There are a large number of men here doing equally as well whose figures we failed to

There are about 70,000 sheep in the county.

#### Annual Meeting of the Solomon Valley Wool Growers.

The annual festival of the Solomon Valley Wool Growers Association was held at J. H. Vernon's on the line of Mitchell and Cloud counties, east of Asherville, last Wednesday. There were probably 1,000 people, old and young, in attendance.

We append below a list of the sheep sheared, giving weight of fleece. In the first column we give weight before shearing, and in the last the weight of fleece:

and worders or mocco.

#### The Flocks and their Fleeces.

From the Commonwealth's report of the state meeting at Emporia we obtain a partial list of the flocks represented there, together with the weights of the wool already clipped and the estimate of that yet to be sheared.

J. S. Codding, Pottawatomie county, 1,400 head, which sheared between 6,000 and 7,000

H. C. Reeder, Hutchinson, 1,300 head, which sheared 6,000 pounds.

C. T. C. White, Eureka, 675 head, which sheared 3,800 pounds. Chas. C. Evans, Matfield Green, 600 head,

which sheared 1,500 pounds. P. J. Trostle, Nickerson, 225 head, which sheared 1,000 pounds. L. V. Harkness, Eureka, 1,500 head, not yet

sheared. Estimated yield, 10,000 pounds. Robert Loy, Eureka, 800 head, not yet sheared. Estimated yield, 9,000 pounds.

James Dexter, Newton, 2,450 ewe lambs, not fit for shearing. Wm. Craig, Neosho county, 13 head, yield,

156 pounds. John M. L. Gore, Raymond, 1,400 head, not vet sheared. All well wooled. W. J. Huggins, Emporia, 260 head. Esti-

mated yield, 8 pounds per head. Chas. Blakeslee, Pawnee Rock, 100 head,not sheared.

Clement Bothamly, Sedgwick, 2,300 head. Estimated yield four pounds per head. Frank Jarvis, Ivanpah, Greenwood county,

750 head. Not yet sheared. Yield last year pounds and 11 ounces per head. N. F. Ames, Emporia, 400 head. Estimated

vield, 4 pounds per head. James Townsend, Iola, 245 head. Estimated yield, 8 pounds per head. Chas. W. Townsend, Emporia, 180 head, not

sheared. Estimated vield 8 pounds. John Mullholland, Emporia, 1,000 head: now being sheared; will average 8 pounds per

head. C. L. Reed, Spearville, 2,000 head; not sheared; will average 3 pounds per head.

A. G. Richardson, Newton, 1,500 head; not sheared; will average 4 pounds per head. G. W. Potter, Spearville, 150 head of thoroughbreds; average yield, 101 pounds.

E. P. Cowling, Emporia, 1,000 head; yield grades, 9½ pounds; from thoroughbreds, 17

pounds. J. R. Weston, Dodge City, 3,000 head aver-

age yield per head 7 pounds. C. L. Knight, Council Grove, 1,700 head; not sheared; estimated yield, 9 pounds per head.

L. A. Loomis, Matfield Green, 200 head; estimated yield, 4½ pounus per head. J. G. Pettingill, Emporia, 1,300; sheared 9.100 pounds.

D. J. Whitton, Cottonwood Falls, 300 head; sheared 1,500 pounds, 133130 squary and salared 3,500 head; sheared 4,000 pounds

W. J. Colvin, Larned, 1,000 head, 74 rams

have b. en sheared, and yielded 23 1-16 pounds

C. E. Westbrook, Peabody,1,200 head; sheared 12,000 pounds.

J. E. White, Hutchinson, 500 head; sheared 2,500 pounds.

J. B. Bartholomew, Topeka, 1,800 head; not sheared; will average 7½ pounds of clean washed wool per head.

J. J. Davis, Everett, Woodson county, 1,200 head; estimated yield 5 or 6 pounds per

Harrison Kelley, Ottumwa, Coffey county, 500 head; estimated yield 6 pounds per

A. H. Thompson, Ivanpah, 1,600 head; not sheared; estimated yield, 8 pounds. H. Mathies, Newton, 900 head; not sheared;

estimated yield, 6 pounds.

J. W. Sutton, 1,700 head; sheared; 6 pounds. Coarse and fine wool.

Snediker Brothers, Hartford, 1,400 head; average yield, 10 pounds; 50 of them, 13 pounds.

Smith & Farnsworth, Eureka, 5,200 head; not sheared; estimated yield, 4 pounds. McGregor & Dodge, Neosho Rapids, 550

head; average yield, 6 pounds. E. T. White, Neosho Rapids, 1,060 head; no

sheared; estimated yield, 7 pounds. J. K. Miller, Nickerson, 650 head; average

yield, 5 pounds and 10 ounces per head. Henry Stevens, Peabody, 264 head; average yield, 5 pounds per head.

W. R. Doty, Newton, 1,200 head; estimated yie'd, 6 pounds per head.

Alexander Fletcher, Fox Creek, Chase county, 300 head; estimated yield, 5½ pounds. shippers. W. D. Miner, Burlingame, 1,100 head; estimated yield, 6 pounds of wool.

J. A. Randall, Newton, 1,200 head; yield, 5 pounds per head.

Porterfield & Son, Emporia, 600 head; average yield, 4 pounds per head.

Neal Wilkie, Douglass, 500 head; average

yield, 10 pounds per head. Mr. Wadsworth, Pawnee county, 7,500 head;

average yield, 6 pounds per head. C. E. Diehl, Grantville, 700 head; average

yield, 6 pounds per head. P. M. Gilbert, Grantville, 800 head; average

9 pounds per head. D. Shelton, Kansas City, 300 head; yield, 6

pounds per head. T. W. and E. E. Rathbone. Parkerville, 275

head; yield, 5 pounds per head. R. J. Wyatt, Westmoreland, 480 head; yield,

6 pounds per head. John Wright, Louisville, 440 head; yield, 7

pounds per head. Adam Scott, Westmoreland, 1,600 head; yield,

5½ pounds per head. C. F. Hardick, Louisville, 500 head; yield,

8½ pounds per head.

L. D. Proper, Wamege, 600 head, yield, 8 pounds per head.

Otis A, Swan, Emporia, 1,100 head; average yield, 10 pounds per head.

George Plumb, Emporia, 2,000 head; aver-

age yield, 6 pounds per head.

#### The Sale at St. Mary's.

At the sale of Mr. J. W. Fitzgerald's short horns at St. Mary's, Pottawatomie county, May 31st, ten bulls brought an average of \$69.95 and 16 females an average of \$106.09, the general average being \$91.48. Most of the animals were bid off by farmers living near except about eight head bought by a gentleman from Lincoln, Nebraska.

Through an oversight we failed to mention last week the receipt of invitation to attend the commencement exercises that have been in progress for several days at the agricultural college at Manhattan. If it had been possible we would have gladly attended.

Read the advertisement of "Home bred bulls." We have seen them and know they are bargains at the prices asked.

#### Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of Mrs. Winslow's Soothing Syrup. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere. 25 cents a bottle.

#### How to Secure Health.

It seems strange that any one will suffer from the many derangements brought on by impure blood, when Scoville's Sarsaparilla and Stillingia, or Blood and Liver Syrup, will restore health to the physical organization. It has proven itself the best blood purifler ever discovered, effectually curing scrofula weakness of the kidneys, erysipelas, malaria, debili-ty, bilious complaints, and all diseases of the blood, liver, kidneys, stomach, etc. A single bottle will prove its merits as a health restorer, for it acts like a charm.

#### If You Are Sick, Read

that Kidney Wort advertisement in another column, and it will explain to you the rational method of getting well. Kidney Wort will save you more doctor's bills than any other medicine known. Acting with specific energy on the kidneys and liver, it cures the worst diseases caused by their derangement. Use it at once, in dry and liquid form. Either is equally efficient, the liquid is the easiest, but the dry is the most economical.—Interior.

#### A Cough, Cold, or Sore Throat

should be stopped. Neglect frequently results in an Incurable Lung Disease or Consumption. BROWN'S BRONCHIAL TROCHES are certain to give relief in Asthma, Bronchitis, Coughs, Catarrh, Consumption and Threat Diseases. For thirty Consumption and Threat Diseases. For thirty years the Troches have been recommended by physicians, and always give perfect satisfaction. They are not new or untried, but having been tested by wide and constant use for nearly an entering generation, they have attained well merited rank among the few staple remedies of the age, Public speakers and Singers use them to strengthen the Voice. Sold at twenty-five cents a box aperywhere. everywhere.

#### Another Candidate.

By a large majority the people of the United States have declared their faith in Kidney Wort as a remedy for all the diseases of the kidneys and liver, some wever, have disliked the trouble of preparing it from the dry form. For such a new candidate ap pears in the shape of Kidney Wort in Liquid Form It is very concentrated, is easily taken and is equally efficient as the dry. Try it .- Louisville Post.

An old lady writes us: "I am 65 years old and was feeble and nervous all the time, when I bought a bot tle of Parkers Ginger Tonic. I have used a little more than one bottle and feel as well as at 30, and am sure that hundreds need just such a medicine." See advertisement.

#### Wool Growers.

Ship your Wool to W. M. Price & Co., St. Louis. Mo. They do an exclusive commission business and receive more wool than any Commission House in St. Louis. Write to them before disposing of your wool. Commissions liberal. Advances made. Wool Sacks free to

#### To Sheep Men.

OFFICE OF THE KANSAS WOOL GROWERS AND SHEEP BREEDERS ASSOCIATION. TOPEKA, May 5, 1881.

Our association having completed an arranger vith the State Fair Association to hold a Sheep Show in conjunction with the State Fair Association at To peka, Sept. 12 to 17, 1881. The premium list will aggregate \$1,000, to be promptly paid by the State Fair Association as soon as awarded by the award-ing committee. J. S. Codding, Esq., president of our association will be superintendent of this sheep show. It is hoped that all those interested in the matter of sheep husbandry will contribute their nearty co-operation. J. B. BARTHOLOMEW, Sec'y. Papers friendly please copy.

#### Enamel Blackboard.

The Marble Stated Enamel Blackboard has proven perfect success. School Districts which are using it are more than pleased. There is no question as to its durability or economy. Samples and circulars sent free to any school officer on application. Ad dress Western School Supply Agency, Topeka, Kan

#### Wilbor's Compound of Pure Cod-Liver Oil and Lime.

The advantage of this compound over the plain Oil is, that the nauseating taste of the Oil is entirely removed, and the whole rendered entirely palata-ble. The offensive taste of the oil has long acted as a great objection to its use; but in this form the trouble is entirely obviated. A host of certificates might be given here to testify to the excellence and success of "Wilbor's Cod-Liver Oil and Lime;" but the fact that it is regularly prescribed by the medical faculty is sufficient. For sale by A. B. Wilbor, Chemist, Boson, and by all druggists

Canvassers make from \$25 to \$50 per week selling goods for E. G. Rideout & Co., 10 Bar-clay street. New York. Send for catalogue and terms.

Eight and nine per cent. interest on farm loans in Shawnee county.

Ten per cent. on city property.
All good bonds bought at sight.

Per Annum. CHEAPEST AND BEST IN THE MARKET. Kills Lice, Ticks and all Parasites that CARBOLIC infest Sheep.

Vastly Superior to Tobacco, Sul-phur, etc. SHEEP DIP.

phur, etc.

The Dip prevents scratching and greatly improves the qualtwo gallons of the Dip properly diluted with water will be
sufficient to dip one hundred sheep, so that the cost of dipping is a mere trific, and
sheep owners will find that they are amply repaid by the
Circulars sent, post-paid, upon application, giving full directions for its use; also certificates of prominent sheepgrowers who have used large quantities of the Dip, and
pronounce it the most effective and reliable externinator of
seab and other kindred devangements. G. MALLINGERODT & CO., St. Louis, Mo. Can be had through all Commission Houses and Druggista

This rake gathers the hay perfectly clean from the swath; is 13 feet wide, and has teeth 8 feet long; will gather from 500 to 700 pounds at one load and carry it to the stack. The Rake is guided by the feet of the driver by turning the wheels to the right or left. When the Rake is loaded it is then pushed to the stack and backed from under the hay, which is left in nice shape to be gitched. With this Rake one man and team can rake and haul to the stack from 10 to 15 acres per day, thus saving winrowing, shocking, &c.

#### A Summer Picture.

From saffron to purple, from saffron to gray, Slow fades on the mountain the beautiful day; I sit where the roses are heavy with bloom, And wait for the moonlight to whiten the gloom.

Far down the green valley I see through the night The lamps of the village shine steady and bright; But on my sweet silence there creeps not a tone Of labor or sorrow, of pleading or moan.

Low sings the glad river along its dark way. An echo by night of its chiming by day, And tremulous branches lean down to the tide do Timple the waters that under them glide.

The night-moths are flitting about in the gloom Their wings from the blossoms shake dainty per-

I know where the cups of the lilies are fair By the breath of their sweetness that floats on the air.

I sit in the shadow, but lo! in the west, The mountains in garments of glory are drest!

And slowly the sheen of their brightness droops

To rest on the hills in luminous crown.

The dew glitters clear where the meadows are green In ranks of white splendor the lilies are seen, And the roses above me sway slightly to greet Their shadowy sisters, afloat at my feet.

Low sings the glad river, its waters a-light. A pathway of silver, lead on through the night; And fair as the glorified isles of the blest Lies all the sweet valley, the valley of rest.

#### How Mr. Smith Missed the Train, and What Came of it.

Mr. Smith missed the train just one half minute and he was in a furious temper over the matter. He lived in the suburbs and went into the city every day to his place of business. Not once in three months did such a thing happen as his being late for the train, but on this occasion he felt like declaring that half breath to reach it or miss it. He was in that breakfast at all." exasperated state of mind when he wanted to blame somebody, abuse somebody; a state of little nearer the savage, would impel to acts of am so tired." cruelty towards anything or any person on flashing eyes, he saw the train disappear in the before the next train." distance.

It was a full hour and a half till the next perate deed; his face was flushed with anger and his eyes gleamed fiercely.

But as he hastened along somehow or other forth their tenderest green; so was the grass. happy He noticed the fragrance of the apple and plum blessoms; he distinguished the peculiar strain had listened to that bird when he had walked in the meadows with the pretty, shy young maiden whom his heart was then bent on winning for his wife. She was his wife now. She they were his and hers. She was not so pretty as she once was. She was thin and careworn. The plump rosiness and merry smile were for the most part gone. But what a good true little wife she had been to him! And on this bright sunshiny beautiful morn he had been thinking hard thoughts of her; and had been her, and all for the trival little loss of an hour from business. Mr. Smith's pace slackened; his countenance relaxed, his heart melted. On such a morning he could not, would not mar the harmony and beauty of the sunshine and

As Mr. Smith neared his house he felt a cer tain shrinking from meeting his wife directly. had given way to my temper this morning I He almost felt that he might betray on his countenance some of the harsh thoughts he had been thinking. So he went around to the side of the house and entered a kitchen door. Bridget standing with a perplexed and distressed air over the open stove in which

birds and the green things growing. No; if he

could not speak kindly words he would hold

mouldered a dying fire. "What's the matter, Bridget?"

"Faith, Sur, and its the stove that breaks my heart entirely. The grate is broken and the stove pipe smokes and when I strive to make a quick fire, here's the way it serves me."

"Well, Bridget, I believe that's all my fault. Your mistress has asked me many times to bring a new grate from the city and also to a have man come and clean out the stove

pipe and chimney. I will put this down in my note book and bring the new grate this evening, and Pat McFlum shall come this very day and fix the pipe."

"Oh thank you, sir," said Bridget, with a brightening countenance, "and could you have the cistern fixed too? The pump has been on the table, said: broken a long time and it takes so much time and keeps back the work so to be drawing water with a rope."

Again Mr. Smith's conscience smote him. How often had the wife asked him to have the cistern fixed.

"Yes, Bridget, I will have the cistern fixed them corn every day." this very day."

"Well, sir, then I think I'll stay. I was just tellin' the mistress that I wouldn't work any longer with such inconveniences, but if the stove and cistern are fixed a poor girl can get along."

Mr. Smith made another memorandum in his note book and passed on through the dining room to his wife's room. He noticed that her plate indicated an untasted breakfast. Softly he opened the door of her room. His wife started up hastily with an expression of alarmed inquiry. Her eyes were wet with tears, The baby still in his night clothes was fretting in the craddle, while a little two year old, only partly dressed, tugged at her skirts.

"And so you missed the train,-breakfast was late,-well, I can't help it-Bridget is going to leave, too," and the poor woman covered her face with her hands and burst into sobs and tears. She fully expected angry complaints from her husband, and in some vague way she felt that she was to blame. She could not compass everything and the babies were so troublesome. Oh, did every young woman have as hard a time as she did?

"Why, darling, what's the matter ?" said Mr. Smith, putting his arms around his wife. "Now come, this will never do. I did miss the train, but I think it mostly mv fault. I have come through the kitchen and I find Bridget has so much trouble with the stove being broken and you see," the time he had to rush himself clear out of the chimney so bad that I wonder she can get

"I ought to get up and see that you have breakfast early," sobbed the poor little woman. mind which, in a condition of development a "But Bridget is so cross this morning and I-I

"And no wonder, darling, that you are tired, whom anger could be wreaked. Of course the with the care of these big babies wearing on person on whom he could most quickly and you all the time. You have no business to with the most impunity cast blame was his have any care of the breakfast at all, and you wife. It was all her fault. Why couldn't she shall not have after this. You need your get his breakfast earlier! He worked like a good morning nap and you shall have it. I'm slave at his business ten hours a day, he gave going to have that broken stove fixed and the her money to run it; she had a servant and it cistern, and then if Bridget can't get the breakwas pure and utter shiftlessness in her that fast in time without you we'll find some other way breakfast could not be ready in proper time. to do. Come, now, cheer up and I'll help you Thus soliloquised Mr. Smith, as with anger- to dress these rogues. I have plenty of time

How wonderful is the effect upon the physical nature of a spiritual impulse! How quicktrain. It was nearly a half mile to Mr. ly can an uplifted and strengthened spirit en-Smith's house. He nervously paced back and ergize and strengthen the body! Everything forth for a few moments before the depot de- seemed instantly changed for the poor, dejecbating in his mind whether he should wait ted little Mrs. Smith. She laid her cheek there for the next train or go back home. As against her husband's, then rested her head he mused his anger grew. He would go back upon his shoulder. How precious and dear home; he would give his wife such a "blowing was his love and strength. Her eyes brightup" as she would remember for months. She ened and her checks glowed. Her weariness and should feel that it was no light matter to have depression which had been utter misery gave breakfast five minutes late. He turned his way to a delightful feeling of repose and lovface homeward and stamped heavily along ing happiness. In the midst of the most prowith the air of a man determined to do a des- saic surroundings her heart was full of the finest and most inspiring emotion.

"Dear, love dear, how good you are!" she said "How you have changed the aspect of everyhis absorbed attention was diverted by the thing for me, this morning. Had you resong of a bird in the trees that lined his path. proached me as many husbands would have He looked up involuntarily. How bright the done I would have sunk in deepest anguish. sun was shining! The trees were putting Your sympathies make me strong and, oh, so

Releasing his wife with a tender kiss, Mr. Smith took the baby from the cradle and merof a bird that he used to hear in boyhood. He rily drew its little stockings and shoes on its plump, kicking, restless feet. Then he brushed out the other little fellow's curls and buttoned his shoes. Willie, the oldest, had sliped out or the house and Mr. Smith went to look was the mother of three rosy, active children; for him, finding that he had taken advantage of an insecure lock on the gate to run up the street. Bringing him back, Mr. Smith got the hatchet and soon fixed the gate so that Master Willie couldn't open it. His wife smilingly opened the front door and seeing what he had pone exclaimed, "Oh, I'm am so relieved to find that Willie cannot get out of the yard. It meditating the sharp words he would say to has been a source of annoyance that I could not keep him in."

And now it was time to start for the next train if he stopped to order the stove pipe man the pump man to do the promised work. So, gailv kissing wife and children once more, Mr. Smith started for the depot. As he walked along with a light and joyful heart he mused:

"How cheap a thing is happiness, after all, and yet how easy to turn it into misery! If I could have gratified a momentary impulse of unreasonable anger and left behind me saddened and discouraged hearts. If I had not learned of and remedied the discomfort and inconvenience caused by my own negligence weeks and months of domestic chaos might have fol-Thank heaven for the influence of song of bird and the scent of flower, and thank heaven, too, for all the gentle influences and sweet affections that can make the most uneventful life a blessing. Dear, good wife! and dear little children! Thank God, I have left them happy this morning if I did miss the train.-Margaret Benson, in Western Magazine.

The KANSAS FARMER, Weekly Capital, and

Can a Working Woman be a Lady.

BY MAY W., COOPER CO., MO.

One of my neighbors called on me a few days ago, and upon seeing a basket of eggs up-

"Your hens laying this cold weather! have not had an egg since this cold snap." "Yes," I answered, "I am getting eggs every day.'

"I should like to know the reason," said my friend: "I am sure we feed o.:r hens we:l, feed

'I feed my chickens," I replied, "a nice warm feed every morning. I cook all my po- lids as well as for strong people. tato and apple parings; with these put the scraps from the table, and mix with warm dish water; thicken all, with wheat bran or shorts, or chopped feed, using cayenne pepper every day or two, and feed grain of an evening. Wheat is much better than corn."

We then walked out to the hen house; and upon looking in: "Oh," said she, 'I see the reason now; you have a good, warm hen house; and pointed with lime. I do declare, no wonder your hens lay. I have been trying for years to have Mr. K. fix our hen house, but he always is too busy. I don't see how you get Mr. W. to fix up everything always as you want it."

"I pointed that hen house myself," said I. "Two years ago we had a black man living with us, and our house being small Mr. W. built a little log cabin for the regro and they pointed it with lime. Oh! said I, to Mr. W., do let Dan (the negro) point the hen house now while you have the trowel and the mortar mixed. Well said he, if we get time we will we are awful busy now. In a day or two it commenced to turn cold, and seeing no better way I nabbed the trowel and a bucket of mortar, and at it I went. I am no plasterer but I have stopped some of the cold out of the house. Mr. W. scolded me (a little) of course, but I had my own way (for once) and finished it as

"Well, I declare," said she, "you do all kinds of work, and yet to see you, one would think you a perfect lady."

Now, is a woman any less a lady, because she does all kinds of work? I want the opinion of others, for if this is so, pity poor me. I am so constituted that I cannot bear to give up having anything I particularly wish, if I can obtain it by working for it, and if I see anything to be done, an ! no one else to do it at the right time, I tackle almost any kind of work. I have husked corn and hauled it in. I have nailed pickets on the fence, dug potatoes, made garden, helped bury the cabbage and potatoes; harnessed and unharnessed the horses, drove teams, and all manner of work and been caught at all kinds of labor, and if it is unladylike, I'am sorry. Mind you all, every one of you-"Sorry it is unladylike." Not a bit sorry for anything I ever did of the work kind. Nary bit. Does a woman degrade herself, or lower herself in the estimation of wise, honest people, by honest labor? If so, I guess some of us are irrevocably lost; for a farmer's wife sees so many things to do, that, if she has the strength and the will, she is pretty sure to

Bridge, Saline Co., Kas. Recipes for the Sick-Room.

MISS CORSON

BOILED RICE.

A cupful of rice will make a small dish for the table when it is done. The rice must be carefully picked over, and then washed in cold water until it is free from all the loose starch which may adhere to it. It can be put in a flour sieve for that purpose. In placing it over the fire, use three pints of water to two cups of rice and one and a half teaspoonsful of salt. The water must be boiling before the rice is added. boil precisely 12 minutes, and then pour off the water. Then place the sauce-pan with the rice, on the back part of the stove, where it will be kept warm without burning, for ten minutes longer. In this way it is not soggy or too soft, and every grain is separate by itself. After being cooked, if left covered, it will soften and the grains will burst open. It can be added to beef tea, when the patient is in condition to take so much nourishment.

EGGS ON TOAST.

Many a dish that should be delicious is spoiled for lack of care or skill in preparing it, and none more frequently than eggs on toast. Cut the bread evenly, about half an inch thick; American Young Folks, sent one year for \$2.50. warm it through thoroughly on both sides be

fore beginning to toast it, then brown evenly. Have some melted butter ready in a deep dish, and laying the neatly-trimmed and toasted bread in a covered dish, spread some of the melted butter over each slice as fast as toasted. Cover the dish closely, and set in the oven to keep warm. Then put about a half a pint of boiling water into a shallow pan, set it over a fire, and break iu, one at a time, as many eggs as will be needed. As soon as the whites are stiff or set, take out one piece of toast at a time, and lay on a hot platter, and with a spoon lay one egg on each slice of the toast. When done, send to the table hot. This makes a delicate dish for breakfast, and digestible for invi-

CRACKER AND JELLY.

To prepare a light nourishment of cracker and jelly for the convalescent, soak two crackers in boiling water for half a minute, or till saturated with the water. Then take out in a saucer, and on one of them spread a little jelly and a very little butter. Put the other jelly and a very little butter. Put the other cracker on the top of the first, with a little

egg in a goblet for a minute, then adding six tablespoonsful of wine, and mix thoroughly. It may be sweetened if the patient desires. Then pour in six tablespoonsful of boiling water at once, and it is ready for immediate use. MILK PUNCH.

This is a very valuable aid to physicians. To three parts of milk, which can be used either hot or cold, should be added one part of whisky, rum, or brandy. To one goblet of the punch, add a tablespoonful of sugar.

#### A Cheerful Wife.

Better than gold to a man is a cheerful wife. But he must do his part toward making her cheerful. It is easy enough for a man to marry a happy woman. But the bride expectant when she thought how happy she would be, never contemplated the picture of a husband coming home cross as a bear and going to bed without speaking to her; she had never thought of the long evenings when he wouldn't come home to dinner without warning or preparation; of his awful profanity over so trifling a matter as the gas bill. She had no idea, in fact, that there could be anything but happiness in married life, and she had determined to be happy and to distribute her happiness to those about her. It is not often her fault if she doesn't succeed. Men, as a rule, do not exert themselves to secure their wives' happiness. They know that it requires a constant and a great effort to possess property and be secure in its value in the midst of constant commercial changes. The cheerfulness, the happy, hopeful character which every woman displays at ness to understand its value in daily life. Such a man would take the first opportunity to grind a man would take the first opportunity to grind the cheerfulness out of his home, to frighten a sunbeam into a shadow, and then wonder what is the matter. Such is no better than no husband at all; and when you want a husband go find somebody else—somebody who will give you at least some chance to be happy far into the life beyond the honeymoon.

Two men, who were recently bitten by a mad dog, near Great Bend, have died. It is another instance of the impotency of the Santa Fe mad-stone. - Hays City Sentinel.

Mr. James Kirby, of Salem township, in a few weeks past has lost nearly two hundred dollars worth of stock by hydrophobia, not counting three dogs that were killed because of the disease - Wichita Eagle.

The mad dog mania has struck Hutchinson. A large dog belonging to Joe Grayson died of hydrophobia, Friday, but not until paying his last tribute to about twenty other dogs. The next day Marshal Shafer gathered them all in. -Hutchinson News.

About the first of January a rabid dog got among the stock of Chas. H. Slawson, near Edwin, Since then he has lost about \$150 worth of cattle and hogs from hydrophobia. He thinks the whole race of dogs should be exterminated.-Girard Press.

Two men who were a short time ago bitten by a mad dog near Great Bend, have nied. It will take an occurrence similar to the one we mention to convince our people that fully onehalf of the dogs in this town should be killed, and that we could spare without any inconvenience the whole tribe of worthless curs .- Dodge City Times.

From a reliable source we have the information that a shepherd's dog has gone mad on a farm a few miles east of here, in Labette county; that before it was known what ailed him, except that he was very cross, he bit at the heels of the flock of cattle his owner was herding, and a great many of them have since gone mad, some dying. A general slaughter of dogs is now in order in our section .- Coffeyville

Early this morning two men came into the city, from their farms twenty-three miles southwest, in search of a physician and a "madstone." Last Saturday, one of the brothers, D. A. Jones, was bitten on the arm by a dog, but thought nothing more of it until Monday, when the animal showed unmistakable signs of having the rabics,-snapping at other animals, etc.; and a cow which it previously bit is showing pe uliar signs of teeth poison.- Wichita Republican

Mr. A. W. Loy, living half a mile north of town, killed a genuine mad dog last Monday, at his residence. The dog had come to his house several days before, as a stray, and Mr. Loy not liking his symptoms proposed to kill him, but yielded to the entreaties of his wife to let him live. On Monday morning he took a fit, which was quickly followed by a second, in which he was killed. It is thought he bit nothing but a cat, which was also killed. Beware of strange dogs .- Paola Republican.

We learn from Mr. Jacob Axely, a respectable colored man who lives four miles north of the city, that about four weeks ago the little Mexican dog which our readers will remember was killed on Wall street, bit three large hogs belonging to him. At the time the porkers were being fattened and weighed about 250 pounds each. He observed no effect, however, until last Wednesday, when all three were attacted with hydrophobia. Their symptoms were very violent at times, when they would rush here and there, pawing the earth and crushing anything which they could get in their mouths. Mr. Axely ended their suffering by knocking them in the head .- Ft. Scott

Dogs! dogs! dogs! They have become a nuisance throughout the whole country. In ail large cities it has become necessary to impose some restrictions on them, and to destroy dogs allowed to roam at large. In the country they are a constant source of annoyance, and in the case of sheep are seriously detrimental to what should be one of our leading agricultural industries, No one can deny that hydrophobia has become more common of late years, and now comes a pitiful tale from Arkansas, where a little boy, seven years old, running an errand for his mother between two farm houses, was set upon, killed and partially devoured by two dogs. The best remedy would be a law empowering any one to shoot any dog found roaming at large without a collar and badge giving the name of the owner and showing the animat to have been licensed by the county. The county to be responsible for all damage inflicted by animals so licensed, with a right of recovery from the owner of the dog .- Farmers'

Three mad dogs were killed near the Home for the Friendless, Sunday. One, which belonged to Mr. B. Frank, was supposed to have been poisoned.

Yesterday afternoon, about 3 o'clock, while police officers Samuel Morehead and M. Wolheater, were riding in a spring wagon owned by John King, a dog sprang at the mare which was attached to the wagon, and bit her severely on a leg, causing her to start to run, the location being on North Second street, near Brandon & Kirmeyer's brewery. When the horse started to run, Morehead, who was standing up in the wagon behind King & Wolheater, reached over and caught one of the lines, which turned the animal suddenly and cramped the wagon so that all three were thrown out. Wolheater and King were slightly bruised; Morehead fell foremost, striking a rock. His skull is fractured, and Dr. Jones thinks the chances are very much against his recovery. The scalp on the left side of the head was torn off for four inches. The sufferer was insensible at a late hour last night .- Leavenworth Times, 31st.

### THE STRAY LIST

HOW TO POST A STRAY.

BY AN ACT of the Legislature, approved Feb 27, 1866, section 1, when the appraised value of a stray or strays exceeds ten dollars, the County Clerk is required, within ten days after receiving a certified description and appraisement, to orward by mail, notice containing a complete description of said strays, the day on which they were taken up, their appraised value, and the name and residence of the taker up, to the Kansas Framker, together with the sum of fifty cents for each animal contained in said notice."

#### Athy Ate Baugh.

Kisses sweeten a farewell. They are the cream of ta-ta, as it were.

We quote spring poetry at 10c. per package of 50 lbs., for choice lots.

The average age of a hog is only fifteen years. This always consoles us, when we see a man spreading himself out over four seats in a railway car.

A Michigan journal says: In this state etiquette permits the bride to be married without gloves, because that's the way she handles the groom after marriage,"

There are undoubtedly a great many things which are better than riches; but riches are good enough for those of us who feel humble and wish to leave something for other people.

On the 1st of April St. Louis boys had cards printed bearing the word's "kick me." These were adroitly pinned to the coat tails of rising politicians and created merriment in the town.

A fashionable young lady accidentally dropped one of her false eyebrows in the opera box, and greatly frightened her beau, who, on seeing it, thought it was his mous-

"Do you pay for poetry?" said a young lady in Ohio. We do. If written on white paper, it is worth a cent a pound. Most papers do not pay for poetry, but we want to encourage genius in a substantial manner

A German was in a room with a dozen other lodgers, trying to sleep, but was kept awake by their terrific snoring. At last one of the snorers, who had been shaking the building for half an hour, gave a snort and stopped short. "Tank Gott, von ish tead?" said the dutchman.

The author of the new song, "My Home is on the Tossing Sea," has lived ever since he was born at Fort Riley, Kansas, 1800 miles from salt water, and he confessed in a moment of rash confidence to a newspaper reporter that it makes him seasick to sit in a rocking-

"Ah! my darling wife," said George, the week after his marriage, "if your husband were to die, what would you do?" "I den't know, I am sure, George," said the wife reflectively. "I pever thought of that. I must look in my book of Etiquette and read the rules for young widows!"

An Illinois youth invested a dollar and a half in a New York firm to discover "How to appear well in society." The receipt which he received by return mail was short, simple and easily understood;-"Always keep your nose clean, and don't suck more than one finger at a time."

"Mother," remarked a Duluth girl, "I think Harry must be going to propose to me." Why so, my daughter?" queried the old lady, laying down her spectacles, while her face beamed like the moon in its fourteenth night. "Well, he asked me this evening if I wan't tired of living with such a menagerie as you and dad."

Down in Arkansaw they call an ordinary man, who drinks but little, "captain." A colonel is one who can "stand the rackett" pretty well, and "general" is the title given given to a man who must have "suthin" once in so often or perish; but the pickled old topers are called "Jedge."

The motto of some office holders appears to be, if you earn \$5 a day, save \$50 of it." This will explain why some of them leave a \$3,000 office at the expiration of two years with \$100,000 saved. Some persons suppose they accumulate their wealth in a dishonest manner, whereas they merely adopt a metto

"Deacon," said a widow as she heaved a long drawn sigh and softly raised two tear-be jeweled eyes to his, "don't you have a yearning for the sweet companionship of a kindred soul to share the joys and sorrows that walk, twinlike, with us through all the varied scenes of life?" "Well, widow," sighed the old Deacon, in reply, "I've kinder had a yearning all the evening, but I thought maybe it was them cold beans I eat for supper."

Peck's San says that a young Portage (Wis) route agent had a mean trick played on him by a friend the other day. He got a leave of absence and went to Cambria to visit a young lady that he was acquainted with. A friend went to the telegraph office and sent a message to the village marshal of Cambria that a young man was on the way to that place who had been boarding in a house where there were three cases of small-pox, and that he had better be looked after. His dress and appearance were described minutely, and when the train arrived the visitor was fastened to by the marshal, who would not let him enter a house while he was in town, but kept him walking until the train went back to Portage, when he was allowed to depart, as hungry and tired a young fellow as ever was seen. He says he will probably submit to that joke without trying to pay it back with 11 per cent. interest, though he dont believe he will.

In packages 50c. Sent on remittance or C. O. D. to any part of the United States. Orders will receive prompt attention. Try them.

W. D. SCOTT, 366 Wabash Ave., Chicago, III.

To those who are desirous of raising horses of the greatest utility, and ot selling them to buyers that pay big prices, I wish to say a few words:

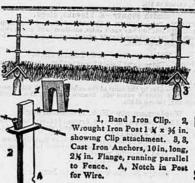

The first thing to do is to look about and find who pays big prices, for horses and what they want. Not as some persons do, to blindly continue to breed what suits them individually.

Now the result of an investigation made by any careful thinking man proves that the most useful and salable horse to raise is the one that when developed comes nearest to being a general purpose horse. Now what constitutes a horse of this sort? First of all, he must have size, not simply height, but a proportionate body. He must have range of neck with an intelligent, expressive face and head. He must have a good bone and a powerful action. Speed is good, but it does not pay to forget everything else to obtain this.

Color is a great point, bay, black and brown being the three desirable ones. Blood on both sides is good, but blood only on one side is sure to be seen in the foal. If you can raise a horse that is sixteen hands high, bay, black, or brown, that weighs from twelve to fifteen hundred, with good knee action and even a moderate amount of speed, you will have a horse that will draw forty to sixty bushels of wheat, with mate pull a sixteen inch plow, do your riding and take you to church a good three-minute "clip" on Sunday and not be stiff in the morning. This is the pleasure part—the profit is in selling him. You can suit your neighbor a farmer; you can suit a truckman, you can sell a gentleman a fine road horse, and last and best, you have raised a coach horse for the eastern market.

Gentlemen, as soon as you raise this class of horses, buyers for eastern markets will come to you with from two to four hundred dollars for each horse, at your doors. I want these horses myself, to ship, to New York City; and others will want them also as soon as it is known you are raising them. I have thirty mares raising this class of horses and do not think I have made a mistake in the selection of a stallion, as I selected him after having seen hundreds of his get on Long Island. Cyclone is the horse and the sooner you commence the better. I refer you to J. W. Powell or H. C. Woodnut of Mineola, Long Island, for the character of this horse. His pedigree is seen above, and the horse and his get may be seen at my farm at Maple Hill, Wabaunsee Co., Kansas. It is not the direct returns for services that I am after so much, as I am the privilege of buying his get for shipment to New York and Liv-Very truly yours,

EDWARD D. WARNER.

## THE KANSAS Fence Company.

(Patent Right Secured.)

Neatness, Cheapness and Durability. 1, Band Iron Clip. 2, No Burning or Rotting of
