SALINA, KANSAS, THURSDAY, JANUARY 7, 1937

### **CONFERENCE CALLED** FOR DECEMBER 28 BY NAT'L PRESIDENT

Regional and Statewide Busiiness Associations and State Farmers Union Officials To Meet At Omaha, Nebraska

H. G. KEENEY CHAIRMAN

Committees Are Chosen and Cooperative Plans Were Discussed

Pursuant to a Resolution passed by the National Farmers Union Convention at Des Moines, Iowa, November 19. National President E. H. Everson called a conference of representatives of all regional and state wide farmers Union Business Associations and of State Farmers Union officials to meet in Omaha, Nebras-ka on December 28 and 29, 1936.

The meeting was called to order by National President Everson. Mayor hearty address of welcome which was responded to on behalf of the Farmers Union by Joe Plummer of Colorado member of the National Board. H. G. Keeney, President of the Ne-braska Farmers Union was elected chairman of the conference and Mr. Shoemaker of Nebraska and Mr. Patten of Colorado as Secretaries. The President appointed a credentials and rules committee, which was to decide who should be eligible to vote in the conference and how the voting was to be done. President Everson was made, Ex-officio member of this committee. The credential committee brought in a report seating all the Farmers Union members registered but decided that they vote as states. Each state to be entited to as many votes as it had in the last National Farmers Union convention.

A committee was appointed on Coordination and Cooperation, and other committees to report on each majbusiness activity of the Farmers Union. Kansas was represented as follows on the various committees: George Hobbs, committee on Livestock marketing.

J. C. Gregory, committee on handling Petroleum Products. T. C. Belden, committee on Farm

Supplies and Consumers Goods John Vesecky, committee on Coordination and Cooperation.

the conference at this time we will have to publish the reports of the committees in a later issue. After the appointment of the comprepared statement containing among other recommendations his definition of/a Farmers Union Cooperative This statement was discussed at some

length both by the conference as a whole and by the committee on Coordination and Cooperation. After it was seen that no agreement could be reached in the time alloted to the subject a sub committee of five was appointed to discuss further President Eversons report. The sub committee report provided for the submission of President Everson's report to the Executive boards and heads of the state wide cooperatives in the various Farmers Union States for their careful consideration. Final action on the recommendations to be deferred until a second meeting of the conference which is to be called some time in the first part of May, 1937 at some central point. The committee further recommended that H. G. Keeney continue to serve as chairman of the conference until the convening of the second conference in May. The report of the subcommittee was adopted as read by unanimous vote of those present, but later during the evening session a motion was made by Kenneth Hones of Wisconsin and passed that states which so desire may put into effect at once the recommendations contained in President Everson report, and need not send delegates to the May confer-

The last committee to report during the evening session was the committee on program for the second

day of the conference. Their report provided that after the rest of the committees had given their reports the conference resolve itself into a round table discussion group to discuss the problems confronting the cooperatives in the different fields of cooperative endeavor, with leaders in each line to open the discussions. This report was adopted and the meeting adjourned to meet at

Organization

8:30 the next morning.

The second day of the conference was one of the best and most instructive meetings of farm folks that it has ever been our pleasure to at-tend. Each of the discussion leaders and the others who took part in the discussions added much to the general understanding of some particular phase of cooperative endeavor. Tom Cheek, President of the Oklahoma Farmers Union discussed the Cooperative Hospital. He told of its organization and operation, and a part of what oppostion they have to fight aganst in order to keep on operat-ing. Mr. Green of Oklahoma discussed the cotton Gin. One would think that in a meeting where only one or two states represented raised any cotton a Cotton Gin Cooperative (Continued on Page Two)

### National President Everson. Mayor Dahlman of Omaha gave a short but hearty address of walves a short but PROGRAM AIM OF

Area Produces Oversupply---On Bad Years Shortage

CALLED CONFERENCE

Meeting Was Held December 2 and Definite Program Was Outlined

By W. J. Maddock, Jr. Bank of North Dakota, Bismarck,

North Dakota Some kind of Crop Insurance Program has been the aim of farm leaders and agricultural economists for

abe, this area produces a tremen dous surplus that usually drives the prices of the farm crops far below the cost of producton, and when lean As we do not have the minutes of | years come, prices are usualy high and find the farmers of this area with little or nothing to sell. The popular demand for Crop Insurance, induced financial promoters to undmittees President Everson read a ertake a Crop Insurance Program on a national scale nearly twenty years ago. A severe drought over a wide area caused the collapse of those companies, and resulted in numerous court battles when the farmers tried to collect the insurance for which they had paid their premiums. A few years later, Congressman J. H. Sinclair, of North Dakota, introduced a Crop Insurance Bill. At that time, there was not sufficient understanding and unified attitude on the part of farmers and businessmen to secure a confirmation of such

> had to surrender his efforts. The Federal Farm Board, during the Hoover administration, attempted something of a Crop Insurance feature through the Grain Stabilization Corporation. Although the Grain Stabilization Corporation could accomplish a real good, it should have been plain to any economist, that the accumulation of large surplusses under a speculative marketing system would eventuay bring a collapse of the program. Under our speculative marketive system, farmers are dependent upon scarcity for profitable prices. A great surplus means deflated prices and farm bankruptcy, as evidenced by the price collapse

of 1932. Secretary Wallace called a conference of farm leaders, at Washington, November 7th, for a discussion of a Crop Insurance Program. At this conference there was too great a variety of views among farm leaders (Continued on Page Two)

# LETTER FROM JOHN

He Says New York Papers Are Broadcasting In Wall Streets Corporation Atmosphere

WHO IS

Farming Pioneers Produced the Wealth that Advanced

City visiting with the family of one of our daughters. I am reading New York papers broadcasting in Wall Street's corporation atmosphere, and going into hydrophobia daily therefrom. I have before me The New York Herald Tribune of December 23. An editorial laments the subsidies to agriculture, relief worker, and organized labor as creating "an ever increasing army of leeches sucking the life blood of the Treasury.'

Well, there was no charge of subsidy when farmers pioneered this nation from the Atlantic to the Paci-FARM LEADERS fic, enduring privations and risking their lives from savage foes, while they converted the woodland wilds into habitable homes and transformed On Good Years Great Plains the vast prairies into the greatest granary on earth. Industry, commerce, and banking did not arrive on the dangerous firing line of advancing civilization until farmers had finished the pioneering, and were producing real wealth.

Today, industry, commerce, and banking are agriculture's middlemen, and for every dollar they collect from the sales of the farmers products, they pay the farmers 40 cents and keep 60 cents as thier subsidy. Fine critics are they of farmers as leech-

The railroads received subsidies of innumberable grants of cash from bond issues of municipalities through the past two decades. This is particularly true of the Great Plains area. In fact, a Crop Insurance Program is considered vital to the econgram is considered vital vita omic security of the farmers in this with hundreds of millions of the taxvast area, known as the Great Plains. payers money. Bankers have deposit-When cimatic conditions are favor- ed their bonds with the Federal Reanks and drawn interes thereon, and also received, on the Treasury and National Bank notes (money) issued to them in an amount equal to those bonds, a subsidy amounting to the interest received on that is, a double interest. Receiverships-lawyer and auditor subsidiesrank high in the kingdom of leeches. A corporation charter according to the code of Delaware et al, is a government authorized subsidy to print, trade, and sell watered stock-a license to steal—the unsurpassed subsidy that has pulled down billions of the people's money. However, holding companies, with their atrificially created false and exaggerated overhead, to secure higher utility rates, and their greedy subsidies camoflaged as furnishing needed services and supplies (at robber rates) are rapidly gaining rank towards becoming the greatest subsidy. a program, and Congressman Sinclair

Tax exemption ranks high in the history of subsidies. Shylock's subsidy has been tax exemption on his mortgages (totaling nearly 30 billions) and the just (???) statue that the property owner should not only the tax an Shylock's equity. Bondholders get a subsidy of tax exemption, amounting on the present 55 billions of public bonds, at an esimated saving of taxes of 3 percent of \$1,650,000,000 yearly, or 3 times the alleged subsidy to agriculture. The intangible wealth of the nationprivate bonds, stocks, notes, money, credits-estimated to equal the tangible wealth of the nation, is very largely tax exempt, or nearly sovast subsidy of tax exemption that practically doubles the tax burdens

of the owners of tangible property. However tax exemption is but a part of the subsidy poured into the lap of the bankers, the bitterest critics of the farmer leeches. The Internatonal Bankers Trust controls the money and the credit of the nation, and can alternately make money chep and credit plentiful, and then spring the debt trap, and make money dear and credit scarce, thus doubling and trebling their holding of money and credit compared to commodities, and foreclosing on the depressed and shrunken holdings of the common people. Thus the International Bankers Trust pulled down the Temple of Prosperity in the agricultural de-pression of 1920 and the stock market crash of 1929, and plunged our

people into bankruptcy. The first attempt at recovery was for the Reconstruction Finance Corporation to prime the pump by pour-ing money into the banks and cor-porations, hoping they would let some of it trickle down to the comnon people. But the subsidy money did not trickle down, and the pump efused to prime, Then a new and more sensible plan was tried. A good part of the subsidy money went out to the toiling masses of labor and agricul- through your publicity mediums and

BOOTLEGGERS ACTIVE IN CHICAGO MANDAN PIONEER GASOLINE BOOTLEGGERS

State gasoline taxes are being eva-ded on a big scale in the Chicago district, Col. Knowlton L. Ames, retiring director of the Illinois departnent of finance, charged after a 30day secret investigation of the oil inspection division of the department. He asserted that dozens of tank cars of gasoline are entering the Chicago district mislabeled as non-taxable SUBSIDIZES DOLE LEECHES kerosene, and that the state is being lefraunded of huge sums.

Many inspectors, said the retiring finance director, failed to inspect Wealth that Advanced shipments properly, while others fail to report promptly. He asserted that the staff of 25 inspectors could be reduced to 15 "of the proper type."

It is expected that indictments on

### CAL WARD WRITES **CONCERNING FARM** TENANCY MEETING

Meetings Will Formulate Plans to Check Ever-Growing **Tenancy Among Farm Population** 

NOT A SET PROGRAM

Organizations Wishing to Present Any Definite Plans Are Urged to Do So

Mr. John Vesecky, President Farmers Educational and Cooperative Union of America Kansas Division Salina, Kansas Dear Mr. Vesecky:

Through my long connection with the affairs of the Kansas Farmers Union I learned of the very great interest all farm organizations have in the problem of farm tenancy. Having served the Kansas Union for six ry, if a 1936 program was to be had. years as president, I know that a The principle thought at the time, great part of the membership of that was that state rights had to be oborganization was very vitally inter- served in compliance with the court ested.

As you know, the policy of President Roosevelt and the present administration is to do something to check the ever-growing march tenancy among our farm population. the loaning of such notes, or money, In that connection a public hearing will be held at the Student Activities Building on the College of Agriculture campus at Lincoln, Nebraska all day Saturday, January 9. Members of President Roosevelt's Special Committee on Farm Tenancy will be present and will conduct the hearing. Secretary of Agriculture Wallace has written and rushed through Conrequested that farmers, both tenant and owners; heads of farm organizations and representatives of all interested groups be present in large numhighly important question.

Suggestions made by the farmers and heads of farm organizations themselves wil lundoubtedly be carefully considered by the Committee in its recommendation to President Roosevelt, who, in turn, will suggest to Congress remedial legislation.

While the meeting is to be formal sent any definite plans are urged to do so in writing but the floor will be open to all individuals attending.

Included in suggested topics are the following: 1, What can States do to improve resent rental contracts?

Through legislation? Through education of landowners and tenants?

2. How should tenants be recom pensed for improvements made on the farm, or penalized for depletion 3. What are chief difficulties fac-

ing tenants who wish to become own-4. How can the Federal Government help tenants acquire farms? By loans for purchase of farms?

By public acquisition of farms,

and lease to individuals? 5. What are the possibilities of cooperative farming by tenants? 6. What interest rates and amortization plans should be applied to government loans to tenant farmers

of cooperatives? 7. What type of education is needed to help tenants become successful owner-operators?

8. Can the present policies of the government in regard to farm credit, AAA benefits ,etc., be shaped to favor farm ownership?

Will you please cooperate with us in seeing to it that as many members of your organization as possible attend this important meeting and attend this important meeting and farmers of the Nation, through their an increase of 26 per cent over the farmers of the Nation, through their by year average (1927-31.)

The condition of the winter wheat "Adjustments are usually brought about through debt reduction, interest rate reduction, extension of time, and other methods. Often it is accomplished by a combination of these methods.

appreciate your cooperation and in-closing wish you and yours the hap-piest of a New Year. Cordially, Cal A. Ward.

FOR STATE CONTROL CONSERVATION

State Legislature is Charged pletely. Pletely. Then what if this is broken down with the Duty to Work for Soil Conservation

SALVAGE PROGRAM

Farm Leaders Called In For Opinions; States' Rights Must Be Observed In Compliance with Court Decisions

As under the Soil Conservation and Domestic Allotment Act, our State Legislature is charged with the duty to work out a plan for state control and operation of soil conservation at this coming session, the same as are 47 other state legislatures, the following article written for the Mandan Pioneer should be of vital interest to all our readers. We commend it to their careful consid-

From Mandan Pioneer, December 26, 1936 Problems To Be Faced In The 1937 and 1938 Soil Conservation Pro-

By Walter J. Smith, President of Norton County Soil Conserva-Committee, Mandan, North Dakota

When the United States Supreme Court rendered it's famous decision January 6th, 1936, invalidating the AAA machinery, through which \$1,-300,000,000 was paid from the United States Treasury to the Farmers of the United States, was almost completely wrecked. The first reaction from the farmers of the nation was consternation and helplessness.

As they recovered from this blow, they thought it necessary to salvage what they could from the wrecked program

The Department of Agriculture called in farm leaders from throughout the nation for their opinions, as legislaiton had to be paseds in a hurdecisions. State rights has always The thought originated there, that slightly above last year's level. here was a chance to comply with the Supreme Court decision and even go the Supreme Court one better in were reported by the Bureau as folobserving the philosophy of state lows: Seeds 53 percent, hay 49, grains rights. Therefore, it was proposed 36, fruits 14, cotton and cottonseed that the states should handle the 11, and sugar 4 per cent. These up-AAA program after 1937, if the states would pass legislation to that the 44 principal crops to within 13 effect. This idea was grasped, per- percent of the 1929 level. Some prihaps grudgingly, by farm leaders and the Department of Agriculture. Time was so limited that this program was

gress. Now after diligent study, the farmers from nearly every state in the Union are alarmed at the possibility bers to express their views on this of the creation of 48 little AAA's. They see the danger of conflict between states as to production control, as well as control of all national resources. Even if no politics would enter into the administration the great variety of conditions would postively cause great conflict and a variety of agricultural laws that would make a uniform program for the Nation entirely impossible. Farm and no set proram has been out-lined there are number of topics state allotments from the United which are suggested as suitable for Treasury impounded while legal batdiscussion at such a meeting. Of tles are fought through the State course, organizations wishing to pre- courts and United States Courts, possibly waiting years for a decision, while the farmers clamor for their

money. What would be the condition of North Dakota today, with \$18,000,-000 in United States Treasury checks coming to the farmers at this time, and have this money all impounded until the Supreme Court might render a decision some three or four

years hence? ? What would be the attitude of the North Pacific soft wheat farmers, wheat farmers of North Dakota and Montana? The spring wheat farmers raise a commodity that is never a surplus, but yet the North Days and Agricultural Economics in its surplus, but yet the North Pacific monthly summary of the wheat sit- too early to offer any forecast of farmers would naturally want their uation. soft wheat substituted for our high

protein spring wheat.

If we want the entire farm program destroyed, supervision by the different states is surely the way to accomplish it. The big industrialists, who are almost unitedly opposed to our program of parity income and controlled production, could sit by and watch the farmers of the different states fight among themselves toward the destruction of our whole agreiultural program. In view of our experience, now it since 1928.

looks plainly ridiculous that this control should ever have been proselected farm leadership, wrote the present farm program together with The condition of the winter wheat present farm program together with has been accomplished in so short a space of time. The organized farm leaders have largely controlled the attitude of the Department of Agri-

culture, that Secretary Wallace became the target for the most vicious propaganda that highly paid propagand writers could fabricate. Other industry has reached a high degree of organization while Agriculture is less than 20 percent organized. Yet farm organizations have dominated the agricultural policy almost com-

into state control? Some states have practically no farm organizations
The agriculture of those states is dominated by the wealthy landlords It will take a long course of years for those down and out tenants to become educated and organized to control their destiny in any degree.

The very safety of the farm program, demands that Congress immediately amend the Soil Conservation law, eliminating the feature of state control. Farmers of the Nation should demand this. The time is close at hand and it is not too early that they start their demands upon Congress for the elimination of this destructive feature of the law. It is almost a certainty that all farm organizations will demand such an amendment. In view of all the conditions we must face, all North Dakota farmers should demand this change and fight for the continuation of the program that has brought some 60 millions dollars from the United States Treasury to the pockets of North Dakota farmers.

Prices received by farmers for their principal crops produced in 1936 averaged 26 percent higher than for the 1935 crops and came within 13 percent of the 1929 level, according to preliminary estimates released by the Bureau of Agricultural Economics today.

The sharp increase in 1936 crop prices reflects a generally improved problems in different parts of the lemand situation as well as smaller supplies, the Bureau stated. Some of the food and feed crops sharply reduced by the drought brought unusually high prices, and these increases helped to raise prices of rice, cot-tonseed and a number of other competing foods and feeds of which there a more nearly normal supply.

Although the total production of

feed grains is not nearly so short as in the other drought year of 1934, higher, refecting slightly smaller supplies of corn and the generally Committee on Farm Tenancy.
higher prices of livestock.

Hearings at Indianapolis, Lincoln, igher prices of livestock.

Improved demand has helped to prices over those of a year earlier turns raised the level of prices of ces were higher than in 1929.

IN DEFENSE OF DEFENSE

I have a neighbor with whom wish to be a friend. He also wants to be a friend of mine, and we both agree that we must get along peacefully together, doing everything possible to further mutual understand ing and friendship. In order to show him my good intentions I built a high barbed-wire fence with steel pickets on top between his house and mine. He, in turn, to convince me of his friendship put a ferocious dog in his back yard. I then put bulletproof glass in the window on his side and started to wear large pistols in my belt. The other day I saw him moving supplies of poison gas and hand grenades into his house. Now I have a machine gun mounted in the front yard, and for the life of me I can't understand why we don't get along better.

-From the New Mexico Lobo

### TENANCY COMMITTEE TO HOLD FIVE RE-GIONAL MEETINGS

Secretary Wallace Says All Interested Persons and Organizations Are Welcome to Attend

ORGANIZATION IS URGED

Regional Hearings At Dallas, Tex., Montgomery, Ala., Lincoln, Nebr., Indianapolis, Ind. and San Francis-co, California

Five regional hearings will be held arly in January by the President's Committee on Farm Tenancy, It was announced today by Secretary Wallace, Chairman of the Committee. Hearings will be held at Dallas, Texas, January 4;

Montgomery, Alabama, January 6; Indianapolis, Ind., January 7;

Lincoln, Nebraska, January 9; San Francisco, Calif., January 12; Secretary Wallace said that all persons and organizations interested would be welcome at these public hearings for a complete discussion of

1936 CROP PRICES AVERAGE tenancy problems.
WITHIN 13 PERCENT OF 1929 with the situation in the cotton belt, corn belt, and Great Plains area, where farm tenancy is said to have assumed "serious proportions." In most of the states in these regions there is higher than average perecntage of farms operated by tenants.

Secretary Wallace announced that the Committee desires to obtain a comprehensive picture of the tenancy

country.
"We hope especially," he said "that at each hearing we shall obtain the opinions of farmers, both tenants and owners, as well as of other interested groups which have given thought to this important problem."

The hearings at Dallas and Montgomery will be conducted by Will W. Alexander, Acting Administrator, Resettlement Administration, and L. C. Gray, Assistant Administrator of the the price of corn is about one-fifth Resettlement Administration and Executive Secretary of the President's

and San Francisco will be conducted maintain cotton prices at a figure by M. L. Wilson, Assistant Secretary of Agriculture, and A. G. Black, Chief Percentage increases in 1936 crop of the Bureau of Agricultural Economics, both members of the President's Committee.

Secretary Wallace urged organizations which expect to send representatives to the hearings to present their views in writing, so that all proposals may be considered carefully by the Committee in the preparation of its report to the Presi-

To Editors of Farm Publications: I wish that I might write each of you a personal letter on this impor-

tant matter. A release announcing the hearings has been issued by the Department of Agriculture, but because of your special interest in and knowledge of farm problems, I want to call this

to your particular attention. The hearings will be open to all who have suggestions to make concerning the methods of reducing tenancy and making its status more desirable. The Committee desires to obtain a representative cross section of public opinion as to the tenancy problems, particularly in those regions where the problem is most serious. It is hoped that each hearing will be attended by a representative number of farmers, both tenants and owners. Your cooperation in stimulating a

Trend Goes Upward

# World Wheat Production

The United States has sown the largest acreage of winter wheat on record—more than 57,000,000 acres. ed States production of a wheat crop Canadian fall wheat seedings total in excess of domestic needs next 702,000 acres compared with 585,000 icres in 1935, an increase of 20 per cent. At the same time increased plantings in the Danube countries the British Isles, India, and the Soviet Union are reported. The lower world supplies of wheat in the face of increased world demand have resulted in the highest world prices

The United States acreage sown this fall, estimated at 57,187,000 acposed. Even those who originated the idea, are now confident that it could The previous record acreage not work out. Let us visualize how the have secured this farm program the fall of 1918. The estimated acper cent over that of last year and have resulted in a relatively short

A world trend towards larger in Canada at the end of October com-wheat production in response to the prised 46 per cent of land intended

wheat production in 1937. It further pointed out, however, that there exists the definite possibility of Unitsummer. In that event, prices are likely to decline toward an export

It also was pointed out by the bureau that it is too early to forecast spring wheat production, but that with very dry conditions in the Pacific Northwest a greater proportion of the total acreage in that area may be spring wheat, particularly if the weather conditions are favorable in the spring. Moreover, if moisture is sufficient at planting time in the North Central spring wheat States there is little probability of a decrease in the large plantings of last year. The large plantings of last year crop because of the drought.

There is a serious moisture shortage in the spring wheat States at present, but the bureau pointed out ter area. It called attention to the

fact that if yields equal to the lowest (Continued on Page Two)

# Resettlement Administration

The debts of 45,263 farmers were reduced \$36,902,322 in the 15 months ending December 1 through the farm debt adjustment program of the Resettlement Administration, Dr. W. W. Alexander, deputy administrator announced today.

Through voluntary conciliation of creditors and these debtor-farmers, he added, debts of \$144,102,489 were scaled down to \$107,200167, a reduction of 25,6 per cent.

As a result of this adjustment \$2,-631,348 in back taxes was paid to lo-

cal governments. In making the figures public the deputy administrator, while praising the work already done in volume and effect; said that many farmers, who had not availed themselves of this debt adjustment service, were being forced to sell their property or see it

foreclosed. He urged the debt-burdened farmers to make wider use of the service to avoid possible foreclosure of their homes and farms.

"It seems to me that with our record of achievement farmers everywhere should know and take advantage of our debt adjustment activi-

"The policy of the farm debt adjustment program, which sponsors establishment of state and county committees throughout the United States, is to facilitate by impartial mediation the adjustment of excessive debts of farmers, without charge of

any kind.
"It is not the policy of the Resetor assist any person to avoid pay-

"This is not a program for beating

"We have widespread facilities for

tlement Administration to encourage ment of his bone fide obligations within his ability to pay. It is expected that each debtor shall meet his obligations to the full limit of his

down creditors. It is purely voluntary in any case. Creditors as well as debtors have found that readjustments have been mutually advanta-

adjusting farm debts throughout the Temple of Prosperity, destroyed by country. Much distress and financial loss could be obviated through a still wider use of these facilities."

### EDITORIAL

As this is the first issue of the Kansas Union Farmer in this year of our Lord 1937, I suppose I will be in style if I wish all our readers a Happy, Prosperous New Year. You know I am coming to believe more and more that perhaps in the long run we all get just about as much, if not more, happiness and prosperity as we earn. Happiness is more dependent on our state of mind than it is on our worldly possessions. I know that the Vesecky family, living in a sod house, when I was a small boy got more real pleasure and enjoyment out of the few red apples and striped stick candies mother had to divide among eight children, than our present brood of children and grand children got out of the toys and knickknacks and sweets piled under the Christmas tree last Christmas. The thing most necessary to happiness is the will to be happy, to enjoy whatever blessings may be Crop Insurance Program. But it will yours and, while striving honestly to better your lot, keeping your heart be necessary for the farmers of Mon- are making money. These last four free from envy. There are many things that we farmers are in justice entitled to have, but the way to get a square deal this coming year, or in fact any year, is to do like the other fellow does if he wants anything. Organize in your own class organization, the Farmers Union. Study your in congress will introduce make-beproblems together in your local meetings and then again together go after lieve Crop Insurance Bills in attempt your rights in an open unafraid way, serving notice on any and all inter- to get in the lime-light. But no proests which may oppose you that you do not envy them their prosperity but that you are determined to secure for the farming class its proportionate basis by the organized farmers share of the national prosperity and assure every honest industrious citi- themselves. After that is accompishzen, whether farmer or laborer, an equal chance to security, peace and con- ed, the futre stabilty of the Crop In tentment.

PAYROLLER is one of the hackneyed words left over from the last Presidential campaign which should be forgotten together with the many other bitter, foolish things written, said and done during the pre election months. At first payroller was only applied to those persons who were on the public payroll but gave no useful legitimate service to the general public for the salary they received. As time went on and the heat of battle became more intense, the name came to be applied by some thoughtless persons to any one on the public payroll, be his job legitimate or not. Government service is and should be honorable service, be it as President of the United States or as a constable in a western Kansas township. We highway system, \$25,000,000 for imneed and must have people to serve us in the various positions made necessary by our democratic form of government, and they in turn need and should be paid for the services they render organized society. We farmers instead of applying the term payroller to any farmer who either is elected or the fiscal year beginning July 1, 1937. appointed to some public office, should insist that more of our farm folks stand for election to the various positions of trust under our National, state and local governments and that those in authority appoint honest competent farmers to all offices and positions largely concerned with the welfare of Agriculture. It is more wise to have a law interpreted and enforced by a person or persons friendly to agriculture and understanding its needs, than it is to get good laws passed and trust their execution to those either without sympathy for or directly opposed to our needs and wishes.

Personally I have no desire for a public office. Once, when I was a younger man than I am now, I ran for a county office and got gloriously licked. Since then I have had no personal political ambitions, but I firmly believe that we farmers should and must have our proper proportion of representatives in our legislative bodies, both state and National. The governors of agricultural states should be farmers or at least those who grew up on a farm and have retained their understanding and sympathy for farmers. In order to get our just dues we will not only have to see that farmers are elected or appointed to office but we will have to let them know that we are back of them 100 percent as long as they discharge the duties of their office honestly and efficiently,

President Tom Cheek of the Oklahoma Farmers Union sent an invitation to all Kansas Farmers Union folk to attend their State Convention which will be held in Oklahoma City on January 19 and 20. All who can should go and break bread with our brothers across the state line on the south.

CONFERENCE CALLED FOR DECEMBER 28 BY NATIONAL PRESIDENT

(Continued from Page One) ould not be a very interesting subct but the reverse was the case as ridenced by the hundreds of questns asked Mr. Green.

The discussion on Farm Machin-ery purchasing, led by Mr. Iverson of the Farmers Union Central Ex-change of St. Paul, Minn. and that on handling of Petroleum Products led by C. C. Talbott of North Dakota and followed by Mr. McCarthy of Nebraska State Exchange both brought forward a lively discussion in which representatives of most the states participated. Mr. Eggley of the

St. Paul Farmers Union Livestock Commission Co., led the discussion on Livestock marketing which also brought out much valuable information as to the organization and operation of Cooperative ivestock marketing associations. Direct marketing of livestock came in for its rightful share of criticism. Efect of truck transportation on cooperative livestock marketing was also discussed. Other subjects up for discussion were, Farm supply or consumers goods purchasing, Cooperative auditing, Mutual Insurance companies including the new Nebraska Industrial Insurance Co.

As your reporter was busy listening to the discussions and working on committees and the official minutes of the conference are not yet available, we cannot give you as much of the details as we should. This much we can safely say. We are sure that the constructive work done at this meeting by the real cooperators gathered there is sure to r esult in much closer cooperation among the Farmers Union Cooperatives themselves, and also, which is equally, if not more mportant, much better understanding and cooperation between the National and State Farmers Union offices and the Farmers Union Cooperatives both local and state wide. Too bad we did not have more of these conferences in the past, how much more united a front could we have presented to those opposing a fair deal for our farmers and how much nearer 100 percent Farmers Union would have been the membership of our Farmers Union Cooperatives.

CROP INSURANCE PROGRAM AIM OF FARM LEADERS

(Continued from Page One) for any great accomplishment. This meeting, however, resulted in a call-for a further conference at Washington, December 2nd. All the states, of the Great Plains area, were represented by farm leaders at this second conference and a definite compre-hensive program was outlined.

This program was published in the December 10th issue of the Kansas Union Farmer.

The group established a permanent committee. representing wheat producing states and farm organizations, to advance further the program contemplaated under the resloutions. This group and out. No one but himself can help. was instructed to make a report by January 15th.

It must be understood that a large perecent of farmers are not particularly interested in Crop Insurance, but it must also be understood that the program is vital to the economic future of the Great Plains area. Ardent support of the program from farmers and businessmen of the Great Plains, will be necessary if we are to succeeed. The program must be worked out on sound economic principles and supported by an inteligent understanding on the part of the farmers. The Farm Bureau and the Grange, as well as the National Farmer's Union, are favorable to the Nebraska, Kansas and Oklahoma to carny the burden of the battle. In gram can have lasting benefits unless worked out on a sound economic surance Program will depend an intelligent and patriotic understanding which can only be accom plished by an intensive campaign by the farm organizations.

#### WALLACE APPORTIONS \$200,000,000 OF FEDERAL AID HIGHWAY FUNDS

The Secretary of Agriculture today apportioned to the various States \$125,000,000 of regular Federal aid for improvement of the Federal-aid provement of secondary or farm-tomarket roads, and \$50,000,000 for elmination of hazards at grade crossings. The new apportionments are for All of these funds will be expended used in previous Federal-aid highway

# **Neighborhood Notes**

WHAT DO YOU THINK?

Mr. John Vesecky, Salina, Kansas. Dear Sir and Brother:

I have just read Mr. Floyd Lynn's article on Farm Tenancy Problem. I see we are bound to have tenancy as the owners of farms get old. What do you want him to do. Stay on the farm till he dies and thereby keep some young man and his family off

the farm. I have a man on my farm, and have had for thirteen years. I spent forty-two years on the farm, farming for myself. I started with nothing in 1888. I spent 7 months on Pacific Coast. Came back to Kansas bought 80 acres of land on time.

Now if you think that I farmed 12 years with out running into some hard dry years. You have another guess coming. Every one of those years I made money. How in the s beyond me. He can't if he works program at the January meeting. the farm.

There is nothing you or anyone else can do for the farmer thats down He is his own salavation. Lets put him on a farm. Give it to him clear of all indebtedness and chances are nine to one, he will mortgage it and lose it through foreclosure.

Under the resettlement program these farmers will be over see-ed. I wonder how long and how many of them will like that. I hope that some plan can be and will be worked out as for signing up to pay for a farm. Me thinks there are many of them going to do that. There is no legislation that will help a person that won't help himself.

By creating all this government help you will not reduce tenancy. But an increase is sure to follow. (I must close) Now then I know farmers that mortgage. Another a young man bought his fathers farm, \$10,000.00. all probablity, ambitious politicians In six years he whittled its indebtedness down to \$4,800.00.

If a farmer don't keep some chickens and some cows he has no business Yours Truly, on a farm.

### FARMERS UNION BEST

Vesecky and Cowger:-Dear Triumvirate: Believing that the Farmers Union comes nearer representing the farmers interests than any other farm organization, I am enclosing my membership dues for 1937. Also a few remarks if they seem to you to be inharmony with Farmer Union principles, you may give them to the public. Fraternally, J. C. Glasgow.

Playing Pranks on the Farmer

Under our present economic sysem any plan of so-called farm re- paring for action at this time we lief that provides for increased production will lead the farmer to the shambles: for the reason the "Chamber of Commerce," 4-H clubs will ganization. Visitors from adjoining in accordance with the general plan aggravate rather than solve the farmer's problems.

The joke or big idea in our soil conservation system seems to be that t will increase production and knock ion, all subject to Federal approval. ket. The AAA by restricting production was the only protection that amounted to anything that the gover- WHEREAS nment has ever given agriculture. If that classes that were so sorely grieved over the slaughter of the litttle pigs when so many people were tem are now available for improving hungry had been as much interested for use in tractors and stationary \$172, 263,481, the federal tax on luin the farmer's welfare as they were in cheap food products they would Improvement of secondary roads have been willing to pay the farm and elimination of grade crossings ers a subsidy as their part in making the necessary sacrifice in keeping food prices within reach of the poor. -J. JUNIORS PRESENT PROGRAM AT LIBERTY LOCAL

Liberty Local 782 met in regular session Friday evening, December 20. The house was called to order by President John Tommer.

The minutes of the last meeting were read and approved. The questions prepared by Orville Dittmer were very good and I am

sure they help to make our meetings more interesting. Irvan Rahe, a new member of our local, gave a very interesting talk

on "Soil Conservation." A brief report was given of the county meeting held at Blue Rapids, Kansas on December 1.

We enjoyed a dandy Christmas program given by the juveniles of the local.

They did so splendid, Mr. Tommer -l a man can go broke on a farm ask them to have charge of the At the close of the meeting we all did justice to plenty of hot cof-

fee, sandwiches, cake and cookies. The next meeting will be January 5. Election of officers for 1937 will take place at this meeting. Miss O'Tilla Musil will prepare the

questionairre. Ed Dittmer, refreshment committee. I hope all of our new members will be present at the January meet-

ing to start the New Year right. Mrs. John Tommer. Reporter

### ANOTHER NEW MEMBER

Mr. Joe Meyer, secretary of the Lillis local 951 sends in the dues for another new member of that local. At their last meeting, the following officers were selected to serve

for the year 1937 President A C Bergman Vice-president ...... Joe Stallbaumer ... Joe Mever Secretary-treasurer ..... Doorkeeper . Ira B Silver Clarence Harron Conductor

The next meeting of this local will be on January 14, and they have planned an amateur contest, for the entertainment part of the program. A lunch will be served, after adjournment, of sandwiches, cake and cof-

only do they have the effect of in-troducing a graduated land tax but ducts. These businesses account for they make it possible to relieve the approximately seven per cent of all pressure on the family-sized farm the wholesale business transacted in without lessening the tax on farms the nation. They provide jobs for 9.2 operated by wealthy comporations, per cent of all workers enegaged in wholesale trade, paying them 9.4 per-

#### HOMEMAKERS' HELPFUL HINTS

Either ignorance or the willingness to take a chance is the cause of the dangerous practices that cause destructive fires. Kerosene lamps, neaters, stoves, incubators, brooders, and lanterns should be carefully handled. They should never be filled while burning. In extinguishing lighted lamps, lanterns, and heaters, turn down the wick a little and put out the flame by blowing over the top of the burner. It is dangerous to blow out the flame from underneath or to turn the wick down too low.

Wicks and burners should be kept clean. Boil the burners occasionally in soda, lye, or soap. An explosion may result from defective wicks which do not entirely fill the wick tube section of the burner. Such wicks permit free communication between the flame and the space above

the oil in the reservoir. Kerosene lamps should not be made of glass. They should be of metal, with broad metal bases. Lamp shades should be of material that will not burn. Never place lamps near the edge of a table or near cur-

W. Pearl Martin, home health and sanitation specialist, Kansas State College extension service, cautions nomemakers to carry on a campaign of safety for the home at all times.

WORLD WHEAT PRODUCTION TREND GOES UPWARD

(Continued from Page One) on record were realized the same ac reage of sprnig wheat as seeded last year would produce 110,000,000 bushels. If, on the other hand, the highest yield on record in this area were realized on the same acreage as was planted last year the spring wheat crop would be 475,000,000 bushels. TAX COLLECTING IS MAJOR

Tax collecting ranks as a major activity of bulk plants and other petroleum wholesale establishments, according to data compiled from the 1935 census of wholesale business and other official sources by the American Petroleum Industries Committee. A total of 27, 845 petroleum whole-salers in 1935 sold \$2,948,742 worth of salers in 1935 sold \$2,948,742,000 worth of petroleum products and collected \$830,934,070 in taxes. The tax figure is composed of state gasoline will entertain the proposal to taxes aggregating \$619,851,671, federal gasoline taxes in the amount of bricating oil which amounted to \$28,-Whereas, we feel that such action 818,918 and county and municipal ould work a severe hardship and an gasolin taxes estimated at \$10,000,

> Contrasting sales with taxes col lected, the committee points out that for each dollar of bulk plant business done, an additional 28 cents was taken in for the tax collector. The average wholesalers dealing in petroleum products did \$106,000 worth of business in 1935, and collected \$29,800 in

Taxes outweighed even payrolls importance as a financial item. Total wage disbursements to 117,434 salarl ied employes were given as \$192,890,-

## Junior and Juvenile Department

Juniors from 16 to 21

Juveniles from 6 to 16

### JUNIOR LETTER By Aunt Patience

Dear Juniors: I know you have all had a gloriously happy Christmas and a pleaant vacation, but are now back in school and you will work just as hard as you have been playing. Some places over the state you had some snow, but we didnt even have that here in Salina, so we had to miss the coasting down hill, and all the good times snow brings.

We have an item from Marshall county where the Juniors of Liberty local put on the program part of the meeting. Then, at Crooked Greek local, we have word of the fine meeting they had. This will give you an inkling of what the Juniors in every local can do, and I hope to have reports every week of some of the things you are doing along this line It would be fun to get up the whole program, and not let the adult members know what you have planned. I know I so much like surprises, and they will, too.

The national study topic for 1937 is "co-operation" and the cooperative movement. This week we are printing the first lesson. This has been mailed out several days ago to those who subscribed for the regular program service, together with

the full January program.

I shall be interested to know what you think about this first outline, and if you have any comments, don't forget to let me know what they are. Right now much attention is being

paid to the cooperative work, and cooperation among different groups. What could be more timely than for us to learn this background, and have a solid foundation to build on when we become active in the work after leaving school.

Mrs. Dobson has sent in an interesting article for the young prospective juniors. And, as she points out, the Indians were among the very early cooperators in our United States. We know that when two help with the dishes they get done so quickly, and that is the result of our cooperating with some one but if we have to do them alone, how we dislike the job. So does it go that same wal all through life. Alone, we are not so much a success, but in working together we can accomplish much. Mrs. Dobson mailed me one of the Indian tepee's and the tiny papoose, so if any of you want to know what they look like, before starting in to make them, let me know, and I'll be glad to mail you the sample.

A short way from Salina, some excavators have found where a tribe of Indians lived, and had buried many of their tribesmen. Historians have figured this tribe lived here not less than 800 years ago, and they have they? been going over this burial ground, the skeletons found to learn of they could know definitely to what tribe they belonged. Every skeleton, and I beleive they have now found close to 100, are all placed the same way. Around the necks of some are beads, and they have unearthed some stones, arrow heads, pottery, and other implements. This pottery, part of it is black, and part of a light color, have figures and characters on it, which no doubt tell a story all

their own. I have become quite interested, and will watch the developments there closely. People from all over the United States who have made this type of study their life work, have been look over this find, which they say is going to be one of the most interesting discovered in years.

As a suggestion, the leaders might select different tribes of Indians who have made their home in Kansas at one time or another, and have your juveniles build indian villages, and

Class Study (Early History)

1. Where were co-operatives first started in the United States? When? 2. Were they successful? Why? 3. Were they started by urban or rural peoples? 4. What were the causes of early failures?

Later History 1. What class of people gave the cooperative movement another start?

2. Where did they begin their or ganization work? 3. Were they successful? Why? 4. What principle has America added to the seven generally recognized

Rochdale principles? 5. When did the movement start its next forward movement?

6. What class of people took it up

at this time? 7. Why did the farmers organize both marketing and distributing or producer and consumer cooperatves? 8. Why should the farmer be interested in both types of cooperatives? 9. Is it necessary for him to market his products in the most economical way? By distributing his products with the east possible cost to the consumer he enbales the consumer to get his products at a lower cost and and also increase his own purchasing power, thereby enabling him to buy more of the products of the urban producer. Anything that brings the producer and the consumer together

with the least possible spread, benefits all mutually. 10. What state in the Union started first cooperative wholesale?

When? Nebraska in 1919. 11. What new type of cooperative started in America? 12. When was the first cooperative why? ivestock marketing assocation organized? Where and by whom?

13. How much has been paid back

to the farmers as savings in marketing by these associations? 14. What other group has done this The farmer has therefore done both his selling and buying cooperatively. 15. What kind of cooperatives have

4. Would warfare be possible in a world of brotherhood? 5. How would the cooperative spirit add to brotherly feeling? 6. Is cooperation compatible with Christianity? 7. Can a consistent Christian believe in and work for cooperation?

More than 400,000 telephone calls over the normal average were made during the five days of the American Legion Convention in Cleveland last September. For the first time in the city's history, operators were at attended pay stations twenty-four

TO THE RESERVES AND JUVE-NILES OF THE FIRST DISTRICT

New Year"s Greetings to all of you and the hope that our work will go over big in 1937.

We have had a lot of brain storms trying to make a real plan for those people under 16 years—too young to be Juniors and who are such an important part of the organization. But we have finally worked out a monthly lesson plan for us, based on Co-operation—the National Junior topic. We younger people can learn about cooperation just as well as people over 16 years old. The local leader or county leader can present the esson either at the adult meeting or at a separate meeting enlarging from the outline below.

Lesson for January

Cooperation means working tosale cooperative organization serving 1. Indians were the first American cooperators that we know about. No doubt the mound builders who preceded them cooperated but we do not with it and pooling all of your purknow much about them. (Perhaps chasing power, thus making it possiple to eliminate all distributing costs they didn't cooperate and so perishpossible and increasing bargaining

2. Indians had to cooperate to ex-21. In what way have we made more Because of wild animals. progress than Europe in pooling buy-2. Because of enemies in other tribes.

3. Because they could hunt better if a number of braves went together (a) Braves went on war path toessential task of education in your (b) Squaws cooperated in skin-

ing the buffalo and other game. (c) In curing the meat. (d) In drying berries plums, etc. (e) in planting and harvesting

corn, pumpkins, etc.

(f) Members of the tribe gathered flint-rock and arrow-makers made arrows.

Questions Did the braves do their share of he work? How did the squaws cure the meat

Of what were tepees made?

Those who are old enough should write essays (about 300 words on the lesson. Sign your name, age and address, give to your leader who will forward them to me. We hope to have a lot of these essays and give prizes for the best set of essays month by month at the next Junior Jamboee next summer.

We must also be busy with our projects on the lesson, to bring to the Jamboree. Even very small people can make "Indian Villages." Tepee-Take a piece of string 8 inches long, tie a tack on one end and a lead pencil on the other. Place a piece of brown paper 18 inches long on table. Put tack in middle and starting at edge of paper with pencil, draw a semi-circle, cut out-fold back a "flap" about four inches at bottom of opening and you have a dandy tepee, especially if you decorate it with Indian designs with col-6. Which plan adds to security, high ored crayons. Clothes pins dressed in brown wrapping paper blankets with er standards of living and culture of Indian designs on them, faces and

> outside the tepees if they are glued o a round piece of card board. And you remember how the papooses were carried on their m thers back?-well, if you take a piece of that wrapping paper, about three inches square, make a crease across it one-half inch from each edge and fold over so those two edges just meet and then over-cast the edges or lace them together with colored thread and then fold the corners back before you reach the edge. You can draw and cut out a cute little papoose to slip inside this little cradle you have very much the kind of slip about the mother's head. I think it will be fine if you make these

plack hair drawn with crayons stand

things at your meetings.
We will have something for you to do each month, and if you make them all we will have some splendid exhibits at our next Jamboree. February lesson will be cooperation among Pioneers

Sincerely, Leona S. Dobson, Secretary 1st District. P. S.—If these directions are not clear and leaders will write I will send patterns of tepee and cradle.

CANNING RECIPES

FISH-To draw out all blood before canning, place fish in brine made in the proporton of 2 level tablespoons salt to 1 quart water. Soak 10 minutes to 1 hour according to thickness of fish. Remove fish from brine, drain, cut into pieces for packing into jars. If fish are small, pack whole.

Precook (frying, baking, boiling, etc.) sufficiently to develop flavor, add 1 teaspoon salt to each quart, pack closely in clean jars to not more than 1 inch from top; do not add water. Put on cap, screwing band firmly tight, process according to time table.

ROAST-Select meat suited for a roast. Cut roast in convenient pieces to go into jar. Put meat in hot fat n roaster, set in oven, roast at a moderate temperature until one-third done. Add 1 teaspoon salt to each quart, pack in clean jars to within I inch of top, add 3 or 4 tablespoons
pan gravy. Put on cap, screwing
band firmly tight, process according to time table.

ROAST CHICKEN-Dress fowl allow to cool, tie legs down and place wings behind back. For each chicken place two slices of bacon in the roasting pan and lay the chicken on top of the bacon. Cover bottom of roaster with water. Place in med, ium oven for 1 to 11/2 hours, basting from time to time. Take chicken from pan and cut in pieces, as for serving. Add 1 teaspoon salt to each quart. Bones may or may not be removed. Pack in clean jars to within 1 inch of top and add 3 or 4 tablespoons of pan gravy. Put on cap, screwing band firmly tight, process according to time table.

FRIED CHICKEN-Dress and cut up fowl in usual manner. Chicken, like other meat, should not be canned until the body heat disappears. Sear chicken in hot fat until lightly browned. Add 1 teaspoon salt each quart. Pack hot, partly fried chicken into clean jars to within 1 inch of top. Add 3 or 4 tablespoons of fat in which chicken was fried. No. 9: There's only two poor farmers Put on cap, screwing band firmly left,

SAUSAGE-Shape sausage into cakes. Pan-fry or bake until cakes are browned. Pack into clean jars to within 1 inch of top. Add small amount hot water to fat, pour 3 or 4 tablespoons of this liquid over sausage. Put on cap, screwing band firmly tight, process according to time table.

STEAK OR CHOPS-Cut steaks about % inch thick. Wipe with damp cloth. Bones may or may not be removed. Broil in oven or sear in pan of hot fat until nicely browned Add 1 teaspoon salt to each quart Roll and pack steaks while hot into clean jars to within 1 inch of top. Add 3 or 4 tablespoons pan gravy put on cap, screwing band firmly tight, and process according to time

PRESERVE NUT MEATS
BY HOT-WATER PROCESS

A new home method for keeping nut meats fresh—using a water bath canner such as many housewives use to process fruits—is announced by the United States Department Agriculture.

Many farm families who make winter industry of preparing shelled nuts for sale or home use, often take al oss when warm weather causes the oil in the nuts to become rancid. Commercial concerns avoid this staleness or rancidity, caused light and heat in combination with air, by vacuum packing the nut meats.

The only equipment needed for vacuum packing nut meats at home, says R. C. Wright, of the Bureau of Plant Industry, who developed the method, is glass fruit jars to hold the nuts and the water bath canner to exhaust the air from the jars. He

says:
"Fill glass jars with nut meats begins to cool. Store the jars in a Put in a muttered baking dish and dark room or cover to keep them from bake for from one-half to one hour the light. Thus processed, nut meats will keep fresh even during hot weather."

OLD FASHIONED MEAT PIE (Usually a Family Favorite)

4 tablespoons salt pork cup potato balls or cubes cup cooked peas tablespoons chopped onions cup diced cooked carrots 1 cup diced cooked meat 1 cup water 3 tablespoons butter 1 tablespoon flour 1-2 cup boiling water

1-2 teaspoon salt 1-4 teaspoon pepper Brown pork in frying pan, add vegetables and cook five minutes. Add meat and water. Cover and cook ten minutes. Melt butter and add flour. When blended add boiling water, pour pepper. Pour into buttered shallow into cooking mixture and add salt and baking pan, cover with crust. Leftover gravy can replace the

Crust

1 1-2 cups flour 2 teaspoons baking powder 1-2 teaspoon salt 4 tablespoons fat

1-3 cup milk Mix dry ingredients, cut in fat and flour, 1 teaspoon salt, 1-2 teaspoon add milk. Pat out soft dough until soda, 4 teaspoons baking powder, 1 one-half inch thick. Cut out square

CORN CHOWDER

(Nearly a meal in itself) 1-4 pound salt pork 1-4 cup chopped onions 1-3 cup diced celery 1 cup diced raw potatoes 4 cups boiling water

2 cups corn 2 tablespoons chopped green pep-

per (optional) 3 tablespoons butter 3 tablespoons flour 2 cups milk

1-2 teaspoon salt Chop pork, melt in frying pan, add and brown onions and celery, add potatoes and water. Simmer 20 minutes or until potatoes are soft when tested with fork. Add corn and cook five minutes. Melt butter and add flour. When blended add rest of ingredients and pour into cooking mixture. Cook five minutes. Serve in bowls or deep soup plates.

APPLESAUCE SPICE CAKE

1-2 cup shortening 1 cup granulated sugar (beaten light) 1 cup hot strained sweetened ap-

plesuace 1 3-4 cups pastry flour 1 teaspoon soda 1-2 teaspoon cinnamon

1-4 teaspoon cloves 1-2 teaspoon vanilla 1 cup raisins, dates and nuts mix-Cream shortening, whip in sugar until the mixture is smooth. Whip in

egg. Add applesauce alternately with the well mixed dry ingradients. vor. Add fruit mixture. Bake in a 9 inch square shallow pan. Bake in a moderate oven 1-2 hour.

FIXED PANCAKES

2 cups flour, 1 teaspoonful salt, 2 tablespoons sugar. Add 1 beaten egg, 2 cups milk. Beat. Add 2 tablespoons melted butter, 2 teaspoons bakingpowder. Bake on hot griddle seven large thin cakes. Cover each with butter, scraped maple sugar; pile up. Cut in pie-shaped pieces.

SAVORY PORK CHOPS

4 loin chops 1-3 cup flour 1-2 teaspoon salt 1-4 teaspoon pepper 2 tablespoons chopped onions

1-2 cup water 1 cup tomatoes Roll chops in flour, fit into shallow, baking pan and add rest of ingredients. Cover and bake 1 1-4 nours in moderate oven. Turn several times to allow even cooking. Water can be used if tomatoes are not avail-

GRAHAM MUFFINS (8)

2-3 cup flour 1-2 cup Graham flour 2 teaspoons bakng powder 2 tablespoons sugar 1-4 teaspoon salt

1-2 cup milk 2 tablespoons fat, melted Mix ingredients and beat well. Half fill greased pans and bake 15 minutes in moderate oven. If the muffins are made the first part of breakfast preparation, they

will be ready to serve when the rest of the food is ready.

TONGUE PATTIES

2 cups ground tongue 1 egg beaten 1-2 cup milk 1-4 cup bread crumbs

1 teaspoon salt. Mix ingredients, handling very ightly to avoid packing. Shape into patties 1-2-inch thick. Brown in a small amount of fat, on top of the stove, or bake in a moderate oven (350 degrees F.) for 15 minutes. Serves four.

CHOCOLATE BREAD PUDDING

One square of bitter chocolate, and adjust the glass lids and rubbers but do not tighten them. Set the jars two cups of milk, one-third cup of in a water both canner—either a sugar, one egg, one-eighth teaspoon clothes boiler or a big kettle with a of salt, one-half teaspoon of vanilla. rack on the bottom. Use enough wa- Melt the chocolate, add the sugar and ter to reach almost to the top of the all of the milk except a small jars. Keep the water boiling for 15 amount which is used to moisten the or 20 minutes. Then seal the jars crumbs. Add the chocolate paste to and leave them in the water until it the crumbs; add vanilla, salt and egg in a slow oven.

PRUNE FROSTING

Chop 3-4 cup prune pulp very fine, add 3-4 cup sugar, 3 egg whites and 2 tablespoons lemon juice. Beat until light and fluffy with electric beater. When mixture holds its shape, spread on cake. Especially good on spice cake. Excellent also on nut cake.

THE FARM FIRE LOSS CAN BE CUT

Rural fires in recent years have taken annually an average toll of 3,-500 lives and piled up a property loss estimated at \$100,000,000, according to reports of the United States Department of Agriculture. However, noticeable reduction in losses have been brought about in communities where rural firemen have made a systematic study of fire hazards and canducted campaigns for their elimina-

BIOGRAPHICAL SKETCH OF M. L. WILSON

M. L. Wilson, whose appointment as Under Secretary of Agriculture the work when his father retires. was announced at the White House They receive no compensation for today, has had 30 years of experience such devotion other than copies of in the agricultural field. He has been the reports they help to make possia tenant farmer in Nebraska, a home ble. The following letter to the Busteader in Montana, and a professor reau from D. Y. Henry, crop reportterested in the development of a national agricultural policy.

Born on a farm in Cass County, southwestern Iowa, in 1885, Milburn Lincoln Wilson was educated at Iowa my great grandfather. Patrick Hen-State College and at the University of Wisconsin. After his experience farming in Nebraska and Montana, Wilson became one of the first two county agents hired in Montana. His territory was Custer County, 150 miles long and 150 miles wide. This

After a turn as county agent leain dry farming practices and then became head of the division of farm management and costs in the Department of Agriculture at Washington. Two years later, in 1926, he returned to Montana State College as head of the Department of Agricultural Economics. In 1929 he spent several months studying the ecnomics of of the Agricultural Department, and wheat production in Canada and in especially to you and your office. Europe and the wheat consumption possibilities in the Orient. As head of the agricultural economics department at Montana State College Mr. Wilson devoted much of his time to testing out various farm management methods in the field, and as a result developed several improved farm management practices. To cut costs on large wheat farms, he developed special methods of handling big-team hitches, but he also made extensive studies of tractor wheat farms. Because of his activity in helping

to develop farm relief proposals, beginning with the first McNary-Haugen bill in 1924 and including especially the domestic allotment features of the Agriculutral Arjustment Act of 1933, Mr. Wilson was asked to serve as wheat production administrator of the Agricultural Adjustment Administration. After getting the first wheat production control program under way, he accepted the job of establishing and administering the Subsistence Homesteads Division in the Department of the Interior. He returned to the Department of Agriculture on July 1, 1934 as Assistant Secretary, which office | furnish work to needy farmers and he has resigned effective January 1 to accept appointment as Under Se-

PREVENT FIRES AND SAVE

To burn to death is a horrible tragedy, accompanied by ecruciating pain. In Kansas during 1935, 92 persons lost their lives because of burns A pitiful phase of this record is that most of these accidental deaths were preventable—they were due to accidents that could have been avoided by the use of caution. Twenty-seven of the 61 deaths occuring from home accidents were due to burns received in the kitchen, many of them caused by starting fires with kerosene. The second important cause of home burns was "clothes catching fire from open gas flames," and third was "falls of children into op-en containers of scalding water." In short, carelessness was the leading

To prevent these deaths from burns and conflagrations: first of all, never start fires with kerosene. Inspect your home for fire hazards. Have your heating system examined for defects. Keep all combustible material such as oiled rags, sweeping compound and left over paint in tightly covered metal cans. Never store uncured hay or grass in a barn, cellar or garage. Be safe with electricity—never use a penny instead of a fuse plug, as the fuse is a safety valve which prevents the overload of electricity resulting in fires. It is gentement of the colony, secure with regular remittances coming from parents, were more interested in hunting jackrabbits than in raising livestock. They imported sleek greyhounds and one of the strang-sweetclover has been introduced success. sure that electrical appliances are disconnected when not in use. Have wiring inspected. It is never safe to

dry clean clothing in inflammable liq-uid, even in the open air. Never have trash in the cellar, attic or yard. Keep matches in a metal container, out of reach of children. Do not fill light. Have a heavy door to the cel-

when fire starts: when clothing is africe, drop to the floor and roll in Membership in poultry clube in a rug; when the alarm sounds, walk you smell smoke in the night don't open the door and let in hot air and fumes that may kill you—if the door the door and let in hot air and fumes that may kill you—if the door and let in hot air and fumes that may kill you are a let in hot air and the let in hot ai feels hot don't open it but look for another exit, and if it is not hot put your foot against the door, open it a little and if there is pressure from fire slam it shut and seek another way out.

Above all-don't get excited-use your head to save your life.

ARMY OF FARM VOLUNTEERS

More than 80,000 selected volunteer the Bureau of Agricultural Economics every month with the crop re-

The list swells to more than 300,-000 when those are included who report only on seasonal crops at specunsalaried reporters furnish informaas the drought of 1934 or this year,

These reporters, the Bureau says have shown a fine cooperative spirit and a loyalty to the service over a long period of years. it is not unusual for a crop reporter to serve 50 years or more. Often a son takes up the work when his father retires. many these men write:

"I am 68 years old, residing on the farm where I was born, being land handed down to my forefathers from the NBC-Blue network. ry, My father made these reports when I could first remember and for the past 30 years I have followed in his steps.

"Conditions have undergone many changes since then. The ox carts and area has since been divided into four wagons have gone, as well as most of the impassible roads, being replaced with cars and trucks moving swiftly der for Montana, during which he over smooth, beautiful roads lined became widely known to farmers and with many gorgeous pictures that to his fellow extension workers as Nature's hands have made immay have feed to sell and those who in dry farming practices and then Nature's hands have made immay have feed to sell and those who immay wish to buy feed. Information will be gathered also covering countries in the farms have improved in the farms ed x x x Rotation of crops and soil improvements are making many of our barren fields blossom and those having flocks of better grade cattle and purebred hogs are but the beginning of marked improvements store for us. CARLSON URGES NEU-TRALITY LEGISLATION

"Congress should consider an im nediate rewriting and strenthening of our neutrality legislation in order that our nation will not become involved in the European turmoil and conflict" stated Representative Frank Carlson as he left for Washington to be present at the convening of Congress on January 5th. Mr. Carlson. who is a World War veteran, stated further that events in Europe since the World War have convinced him that we should continue to follow the advice of George Washington, who said "Beware of foreign entanglements.

Farm legislation, social security and water conservation will receive much attention, he said, insisting that every effort be made to make these programs practical and workable. In speaking of relief, Mr. Carlson said that because of drouth and crop failures the Federal Government must citizens of this area until a cash crop is produced.

POTATO YIELDS BOOSTED

Field tests in several leading potao-producinig States prove definitely that proper placement of fertilizer often increases potato yields as much as 35 to 40 bushels per acre, say the United States Department of Agriculture scientists. Best results were obtained when the fertilizer was placed in a narrow band at each side of the row about 2 inches from and on the level with or slightly below the seed pieces. Potato planters with side feritlizer attachments are now available.

Nearly one person in every hundred in this country, on the average, either is employed in the telephone industry or has money invested in it.

Each of the four submarine telephone cables which lie beneath the waters of the Gulf Stream between Key West, Florida, and the Republic of Cuba, uniting the North American Continent with its island neighbor to the South, spans a distance of approximately 121 miles.

PERTINENT FARM NEWS IS BROADCAST DAILY

As Department of Agriculture officials and farm leaders continue their discussions and formulate plans, for the agricultural conservation program for 1937, the National Farm and Home Hour each Tuesday presents report on up-to-date developments. Officers of the AAA and field representatives analyze the problems peculiar to different types of farming and report on the progress being made in devising a suitable program

for the coming year.

In addition to the news of agricultural adjustments activities, the of agricultural economics long in- er at Brookneal, Va., is typical of Department of Agriculture presents timely economic, gardening, home-making and other farm news from day to day in the program at 11:30

BUREAU AGENCY SURVEYS WINTER FEED SUPPLY

A survey to find out the quantity quality and location of the winter feed supply available to prospective buyers is being made by the Bureau of Agricultural Economics through its Livestock Agency at Kansas City,

elevators which have grain to

The Livestock Feed Agency, which first operated following the drought of 1934, was set up by the Bureau again last summer to help bring together feed buyers and feed sellers. The Agency neither buys nor sells feed, but serves as a clearing house for information as to available sup-

The current survey is the which has been made by the Bureau this season; a fourth may be made next March. The information to be gathered is considered of especial vaue at this time as feeders are in the market for winter supplies. After the 1934 drought, the Agency found the greatest demand for feed supplies began about mid-January.

KNOW YOUR KANSAS

Oddites in the history of Kansas gleaned from the files of the American Guide, Federal Writers' Project, Works Progress Administration.

DUNLAP—Seven miles northwest of Dunlap are ruins of buildings which were built when the territory was a part of the Kaw Indian Reservation. A crumbling 2-story stone building was used by the U. S. Government for storing Indian supplies Across the road is a 2-story frame building which farmerly housed an Indian Misson. Several stone huts along the Big John River were built In one of these huts the late Vice-President Curtis once lived. It is said the Kaws stabled their horses in the huts and continued to sleep in their

DENTON-Six and one-half miles outheast of Denton, Doniphan county, is the Jim and Lou Aberdeen Angus Farm of 1,800 acres. The farm ing pool, bath house, reservoir which holds 50,000 gallons and is supplied by a spring on the ranch and a modern farm house. The buildings are painted a dove-gray color and trim-med in white. The farm is stocked with 200 head of Aberdeen Angus cows. The owner is Matt Eylar, son of Jim and Lou Eylar who homeste-aded the original 160 acres more than sixty years ago.

VICTORIA-Victoria in Ellis counwas named in honor of Queen ictoria. George Grant, a Scotchman from London, conceived the idea of forming a colony in America in 1871.

The first of the colony from Glasgow arrived in April, 1873; Grant brought what is believed to be the first Aberden April 2014.

They made another sortie about three weeks later to the vicinity of the Springs, reconnoitering the camp of the soldiers on the river. Uncle John Segar, one of the party who had protested themselves in the busy of the soldiers. brought what is believed to be the first Aberdeen Angus cattle to America, the Southdown sheep and thoroughbred horses. But the young British gentemen of the colony, secure with regular remittances coming the soldiers on the river. Uncle John Segar, one of the party who had protected themselves in the buttown of Cawker, not far away, which consisted of one house and a soldier.

hunt over the prairie. At the end of five years there was not one of the last ten years the women's farm club orgiginal colonist at Victoria. Today

Rohr, who had been reading in Chicago newspapers of a machine which would cut and bind wheat workers, most of them farmers, help en are beekeepers, attending 3,984 "faster than a jackrabbit can run," suggested that Low order one of the farmers within a year had a value of harvester was laid down in Atchis-The wool woven was \$82,962. Over 4,000 on at a cost of \$425. Farmers came of the farm club women took part in for miles to see the "infernal thing" work, and the mechanic who set up the machine returned to Chicago with a bunch of rush orders.

BELLEVILLE-When Seapo, Republic County, was in existence, seven towns could be seen from the highest of a group of hills west of Belleville. The hill was a look-out and signal post used by the Pawnee Idians. On its summit is a circular space outlined by stones which have been pounded edgewise into the earth. It is thought to have been an Indian

burial ground, but excavations have not revealed proof of the belief. JAMESTOWN—Two miles south and a half mile east of Jamestown on the bank of White Creek, is a granite marker which indicates the home stead of Benjamin White who came to Kansas in 1867 and was murdered by Indians the summer of 1868 while making hay near Yuma. White's horses were stolen and the Cheyennes captured his daughter, who is now Mrs. Sarah Brooks, of Jamestown. The stolen girl was rescued by General Custer the following winter. The marker was erected by another daughter, Mrs. E. M. French.

OUTWITTING THE INDIANS IN EARLY DAYS OF MITCHELL COUNTY

The western Indians committed many depredations in Mitchell coun-The Agency will list presons who ty after the coming of the first setdays of Mitchell county, as related by a research worker for the The American Giude, contains many in teresting incidents.

The Guide book will be a comprehensive travel book of the United States and is being prepared by the staff of the Federal Writers' Project WPA. The main purpose of the Guide will be to point out those interesting athough less exploited, sections of

the country. Following a series of these Indian raids in the late 60's, a stockade was built on Asher Creek, southeast of where Beloit now stands. Many of the country's settlers lived in that vicinity, and among those who had come was John Owen, then a trapper. Because of his frontier experience, Owen was unanimously elected commander of the stockade, contrary to his strong protest. During the night he packed his traps and fled from this forced civilization, going to the headwaters of the Cimarron in the Panhandle of northern Texas to hunt alone. The fact recalls Daniel Boone (or was it Davy Crockett?) who abandoned western Tenessee for the more primitive wilderness, when encountering another trapper 200 or 300 miles from nowhere, he decided the country was getting too crowded.

About 1870 an army post was established on the north bank of the Solomon river west of Great Spirit Springs (now known as Waconda). A battery of artillery was assigned to the post, later relieved by a troop of Custer's Seventh cavalry. It is by the Government for the Indians. interesting to know that Second Lieutenant McIntosh, a full blood Chippewa Indian, was second in command. Raids became less frequent. However, in May a party of Cheyennes

and Araphahoes swept down Oak creek, and near the county line came across a party of four men from the Cawker City settlement who were looking up valuable tracts for settle-ment. The Indians "rounded them up" gus Farm of 1,800 acres. The lain plant includes an elevator with scales and dumps which has a capacity of 18,000 bushels; hay and livestock of 18,000 bushels; hay and livestock redskins off by continual firing at redskins and procedule. The redskins aany who advanced. The redskins a-bandoned the effort, and proceeding east to Limestone creek, fell upon the little setlement at Glen Elder. There they slaughtered three men, whose bodies were found in the riv-er a few yards below where the mill stood later. The forehead of one was crushed by a tomahawk, another was shot with a revolver, and a third was stuck full of arrows. The settlers fled for protection to the nearest stockade. Troops came from Spirit Springs and the Indians disappeared over the plains.

They made another sortie about several miles down the valley, hauling lumber and a swamill from the railroad. Realizing that the Indians

stable, Uncle John dressed himself in different suits of clothes belonging to the men away at work and allowed the Indians to see him first in one suit, then another. By impersonating a number of different men he apparently convinced the beseigers that the sod stable was filled with brave whites waiting their attack. As a result, the 30 Indians abandoned their designs, but that night they stole 10 horses from a ranch two miles west of Cawker where nearly a dozen men were concealed in the house, silent but passive wit-

VACATION

nesses to the robberv.

'Twas the day before vacation, When all through recitation, Not a pupil could think-er not even the teacher.

Their minds all concealed this one

thing, In hopes that the bell would hurry and ring. The students were restless and think-

ing ahead. While visions of home and fun danced in each head.

The teacher said "study for a few minutes yet.' Some settled down, some took a nap, When out of the silence, the bell fi-

nally rang. We sprang to our feet and were off like a bang.

Away toward the halls we flew like a flash. Tore open the doors and threw on our wraps.

The sun, on the breast of the new Gave a luster of midday to objects by now.

We were gone in a moment, without a school book, More rapid than eagles our courses we took.

We whistled and shouted, and called out by name Good-bye old school house, till we meet again."

TENANCY COMMITTEE TO HOLD FIVE REGIONAL MEETINGS

(Continued from Page One) discussion of tenancy problems and in publicizing these hearings will be greatly appreciaaed. The committee will be especially happy to receive your own suggestions before it reports to the President on February 1. Further information concerning these hearings, including the exact address at which they will be held, will come to you later.

Sincerely Yours H. A. Wallace, Chairman Special Committee on Farm Tenancy.

## Farmers Union Jobbing Ass'n.

Central and Water Sts., Kansas City, Kans. Organized, Operated and Maintained by KFU organizations

is said to be the ratio in favor of saving Town property as compared to saving Farm property, after it has started to burn, according to a statement made by David J. Price, fire and explosion specialist of the Bureau of Chemistry and Soils.

Because there is practically no fire fighting apparatus available in our farming districts, very few farm buildings are saved after fire has once made some headway. Dr. Price recommends the organization of rural fire departments and the installation of convenient, requently inspected, fire extinguishers and whereever possible barrels filled with salt brine.

One of the most important precautions, to be kept in force at all times, for full coverage, is an insurance policy in the Farmers Union Mutual Insurance Co. of Salina, Kansas. Look over your policies right now before you forget, and if not fully covered go and see our local agent, or write to
