

Both International Harvester and Case say their first-quarter business had rough going. IH said its first quarter business showed \$551 million in sales and profits of \$8.2 million compared to \$554 million in sales

Beef heifers, numbered at 9,312,000 at the start of this year, also showed a small gain over

and \$18.7 million profit in the same quarter last year. Case showed a loss of \$1.2 million compared to a \$287,500 profit last year for the first quarter. Sales were about the same, at \$68.9 million. The first quarter is seasonally the slowest for implement companies.

More pronounced differences appeared in analysis of the total beef cattle category. There Texas led the increases with 237,000 head, followed by Kentucky, 187,000; Montana, 118,000; Nebraska, 116,000; Mis-

The Kansas Swine Improvement Association — the pork producers — voted to complete

Fred Delano, former county agent of Neosho County, now a farm management field man for K-State, received the KSIA award for outstanding aid to the pork industry in 1967.

New board members are Wayne Gattshall, Goodland; James Dunsford, Dodge City; James Henry, Longford; Dick Strohl, Cunningham; Shannon Nickolson, Sabetha; Roy Stroup, Fontana Van Horn, and Sailors

New York City's anti-poverty program has gone over budget more than \$5 million, its director says. He said cutback in federal funds and a campaign last summer to employ poor teenagers were principal causes of the deficit.

Beef heifers, numbered at 9,312,000 at the start of this year, also showed a small gain over

More pronounced differences appeared in analysis of the total beef cattle category. There Texas led the increases with 237,000 head, followed by Kentucky, 187,000; Montana, 118,000; Nebraska, 116,000; Mis-

Attempting to relate steer numbers to those "on feed" is similarly futile. The seven states showing major reductions in steer numbers all are important steer feeding states: Iowa, down 149,000; Kansas, down 74,000; Illinois, 69,000; Missouri,

Although total beef calf figures read higher, the pattern of increases and decreases showed only that there are a few more on the Central and Southern Great Plains. Increases came in Texas, 60,000; California, 59,000; Nebraska, 57,000; Missouri, 46,000; Montana, 44,000;

The estimate of the 1967 calf crop, due Feb. 21, may show further adjustment in calf numbers due to the upward revision of 90,000 head for beef and dairy cows tabulated on Jan. 1, 1968.

Outside of 13,000 extra bulls in Texas, state-by-state changes in this category during 1967 were relatively insignificant.

Tops At Serrien Sale

Harold Junker of Fairbury, Nebr. (left) and Max Creason of Poland, Missouri paid top prices for the Polled Hereford heifers at their side. The heifers were sold at Serrien's Double S Dispersal sale west of Lincoln Feb. 16. The one at left sold for \$1050 and the other for \$1300. Both heifers are from HCJ Beau Rollo 61st. This sale drew a large crowd. Over \$56,000 worth of cattle were sold averaging \$463 per head.

Wild Turkeys Stocked In Flint Hills Area

COUNCIL GROVE — Thirteen wild turkeys have been released in the Flint Hills of Chase County by the Kansas Forestry, Fish and Game Commission to determine if they will survive and reproduce in this area.

Included are five toms and eight hens. They were captured in South-Central Kansas and

transported here.

Steve Capel, turkey project leader for the commission, said Kansas now had more than 1000 wild turkeys as the result of a stocking program started several years ago.

Name Dresden Man Outstanding Young Farmer

BELOIT — Ken Krizek, Dresden, was selected Kansas' outstanding Young Farmer by the Kansas Jaycees meeting.

Second place winner in the field of 38 contestants representing Jaycee chapters across Kansas, was Roger Pine, Lawrence, Kans., with Richard Prather, Garnett, Kans., runner-up.

Krizek and his wife, will represent Kansas at the U.S. Jaycees National Outstanding Young Farmer Awards contest in Des Moines, Ia., April 7 through 9.

Krizek, sponsored by Oberlin, Kans., Jaycees, operates a 1,278-acre farm, has an Angus cow herd, and feeds stocker calves.

He is a Methodist, serves as an Agricultural Stabilization Conservation Service committee-man, and is affiliated with the Decatur County Young Farmers Association.

Pine, an International Farm Youth Exchange Student to India in 1962, is a past president

of the Lawrence Young Farmers group. His farming operations include small grain, alfalfa and feeder pigs.

Prather concentrates on small grain production, has a 40-head Grade A dairy herd, and feeds beef cattle.

Chairman of the two-day event which closed Sunday afternoon was Ron Sweat, Beloit. His co-chairman was Gerald Blazek, also of Beloit.

No Bonanza In Lotteries

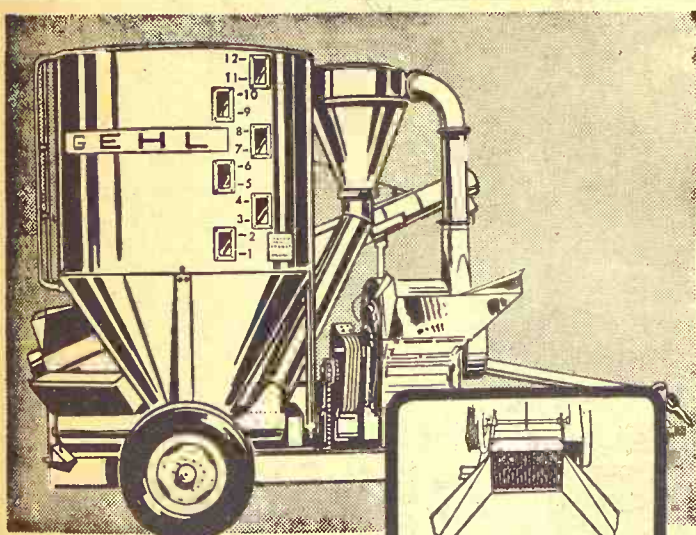

New York, accustomed to financial busts after the 1964-65 Worlds Fair, is having another one in its statewide lottery.

Passed by the legislature last year to raise more money for education, the lottery was expected to have taken in \$30

million by now. The take has been less than \$10 million.

There is talk already of abandoning the lottery, altho most of the present talk is aimed at making it more productive.

First move appears to be to make the \$1 tickets more available. Presently they can be bought only in hotels, motels, government offices and banks, and the banks won't be able to sell them after April 1, follow-

GEHL MIX-ALL

- PLAIN FEEDER
- CRUSHER HEAD

Grinds! Mixes! Delivers!

The Gehl Mix-All, with economy plain feeder and exclusive crusher-feeder attachment, grinds, mixes and delivers the most uniform on-the-farm feed.

Here's proof: Samples of feed grains, ground by Gehl and competitive mills, were compared in a "sieve-shaker" analysis (a grinding uniformity test used also by commercial feed manufacturers). In test after test, Gehl samples were the most uniformly ground. And, the more uniform the grind, the better the mix!

In the Mix-All hammermill, 66 thin, alloy-steel hammers cut . . . not pound ingredients on a big grinding surface for faster feed flow with reduced "fines." Come on in for a close-up look at all the Mix-All features, including the swinging auger-feeder.

Make us Prove it with a Demonstration!

ing a ban from the U. S. Congress. There is a proposal to make the tickets available in supermarkets, newstands, shopping centers, and railroad and bus terminals.

There wasn't a single legal lottery in the U. S. for 70 years, until New Hampshire launched one in 1964. It has been no bonanza to the state treasury there. It was hoped to raise \$7 million but thus far it has produced only a little more than \$2 million a year.

There has been some sniping by critics who claim the New Hampshire lottery has failed to yield sufficient revenue to justify itself. But the voters have continued to approve it at local option elections, the legislative leaders and the governor like it, and there are presently no moves afoot to abandon it.

FARMERS OUTLOOK

L.H. Simerl

Some Stability In Hog Prices

After increasing rapidly for about two years, the production of pork seems to have stabilized. Hog prices, which dropped sharply during the two years while supplies increased, have

worked upward during this winter. We expect only normal seasonal changes in market supplies and the price of hogs during the remainder of 1968.

The turning point, or stabili-

zation date, in the hog market seems to have been about December 1. Before that date, market receipts regularly exceeded year-before figures. During the 11 months (January to November), pork output was 13 percent more than a year earlier. But since November, pork output has been 1 or 2 percent less than it was 12 months before.

The stabilization of market receipts allowed the price of hogs to make small gains almost every week. Price gains during December and January totaled about \$1.50 a hundred pounds. A year earlier, prices had trended downward.

What's Ahead? Our best guides as to what is ahead are the Pig Crop Reports of the USDA and a study of trends in prices, profits, and production.

The latest government Pig Crop Report was issued in December, based on responses from farmers on December 1. It has proven to be unusually accurate — so far.

It showed that the 1967 summer pig crop was practically the same as that of 1966. Market receipts of hogs in December and January were just 1 percent less than one year before.

The fall pig crop (farrowed in August, September & October)

was reported to be slightly larger (1 or 2 percent) than that of the previous year.

From these figures, we would expect the market receipts of hogs to be about the same (or maybe slightly larger) during March, April, and May as they were last year.

We would expect prices to be more nearly steady than they were last spring, because production has stabilized. A year ago, pork output was increasing rapidly, and new price levels were needed to get consumers to buy more of the product.

It seems reasonable to believe that farmers have stabilized hog production — for the present. Prices and profits apparently have been good enough to keep most hog men in the business, but not high enough to encourage a lot of producers to expand their hog enterprise.

There is another favorable factor in the outlook for hog prices: Supplies of competitive meats (beef and chicken) are not increasing as much as usual this year.

Market receipts of hogs usually hold at high levels through March and April, then drop off in May and June. If other conditions are favorable at that time, prices should rise — probably into the \$20 to \$22 range.

Iowa Packers To Open Emporia Plant By Fall

EMPORIA — Iowa Beef Packers Inc. hopes to have its Emporia plant in operation by fall, a company executive has announced.

Arven Walker said the facility formerly owned and operated by Armour & Co. is being remodeled and expanded in a schedule aimed at a fall opening.

He said the plant hopes to handle 8000 carcasses a week, in contrast to 2500 handled by Armour when it operated the plant.

Walker said 10 per cent of the work force at the start must be skilled men brought in from elsewhere but the company's aim is to build its work force from the Emporia area.

Walker also implied bad labor relations was the important factor in Armour's sudden decision to close the Emporia plant which, he said, had lost money from the day it opened.

Armour & Co. announced last fall that it would close the plant after it had been in operation only three years. Affected were 120 employees with a weekly payroll of approximately \$15,000.

Iowa Beef Packers Inc., with Headquarters in Dakota City, Nebr., purchased the plant a month later.

OUR DAILY BREAD

— by G&G Area Cooks

Mrs. William Junker, Fairbury, Neb., Is Winner Of Prize

Prize winner, Mrs. William G. J. Junker, R 3, Fairbury, Nebr.: "This makes good use of Sunday's leftover chicken or turkey dressed up for company."

HOT CHICKEN SALAD

4 tablespoons butter
4 tablespoons onion, minced
2/3 cup chopped green pepper
3 cups cooked chicken, cut into chunks
2 tablespoons lemon juice
2 teaspoons salt
1 cup mayonnaise
1/2 to 1 cup toasted almonds, slivered
Sauté onions, green pepper and celery in butter until tender; stir in chicken, lemon juice and salt. Cover skillet and place over low heat until ingredients are hot. Just before serving, remove skillet from heat, lightly stir in mayonnaise and almonds. For a crispy crust, top with 1 1/2 cups crushed potato chips and 1/2 cup grated Swiss cheese. Toast under broiler until golden brown. Makes 10 servings.

Mrs. W. J. Kerwitz, R 1, Albia, Iowa: "Thanks for the fine gifts I have received in the past and for all the fine recipes that are in the paper each week. Keep up the good work. This is a very simple salad, yet it is very refreshing. The apple and celery give the salad a nice crunchiness."

SUNNY SALAD

1 package lemon gelatin
2 cups boiling water
1 small can mandarin oranges, drained
1 small red apple, unpeeled and diced
1 cup celery, thinly sliced
Dissolve the gelatin in the hot water and let chill until it begins to congeal. Add the fruits and return to chill until completely congealed.

The following is a corrected version of a recipe that originally appeared in the February 13 issue of G&G.

Wanda Wedel, Langdon, Mo., submitted the recipe and she writes, "Hi, G&G'ers. My oh my! One of us sure goofed! We didn't get all the ingredients in this recipe. As I am shut-in

now, due to two heart attacks, I enjoy the G&G even more." (The goof came from G&G's end of the board, Mrs. Wedel, as we remember the luncheon meat being included in your original list of ingredients. — ed.)

MACARONI LUNCHEON MEAT LOAF

1 cup macaroni, cooked
1 cup top milk
1 cup bread crumbs
3 eggs, beaten
1/2 stick oleo, melted
1/2 cup cheese, cut into cubes
1 can luncheon meat, cut into cubes
1/2 teaspoon salt
1/2 onion
1 can cream of mushroom soup
1/2 cup milk
Scald milk and pour over bread crumbs. Set aside. Mix eggs, meat, oleo, cheese, salt, onion and add to crumb mixture. Stir in macaroni. Pour into flat pan. Pour soup and milk mixed over top. Bake 30-40 minutes at 350 degrees.

The following recipe is from Mrs. Fred Broxterman, R 2, Vermillion:

2 (10-ounce) packages frozen raspberries
1 cup water
1/2 cup sugar
2 teaspoons lemon juice
4 tablespoons cornstarch
50 marshmallows
1 cup milk
2 cups dessert topping or heavy cream

Heat raspberries with water, sugar, lemon juice. Dissolve cornstarch in 1/4 cup cold water. Stir into raspberries; cook till thick and clear, then cool. Melt marshmallows in milk over boiling water; cool thoroughly. Whip cream and fold into marshmallow mixture. 1/4 cups graham cracker crumbs
1/4 cup chopped nuts
1/2 cup butter or margarine
Mix graham cracker crumbs, nuts and butter. Press firmly in 13x9 inch pan. Spread marshmallow and cream mixture over crumbs. Spread raspberry mixture over top. Refrigerate until firm. Serves 15-18.

Children Need Goodly Amount Of Protein Daily

Growing children usually need about three times as much protein daily, for each pound of body weight, as adults do. That's why you encourage your youngster to eat plenty of meat.

Top quality protein in meat provides the kind that works so well in building sturdy bodies. Meat also goes a long way toward meeting the body's daily requirements of vitamins and minerals.

Helps To Open Stubborn Jars

Keep a pad of foam rubber half an inch thick and six inches square in a handy kitchen drawer. Use it to open stubborn jars and bottles. It will enable you to grip the cap firmly, but protect your fingers.

Insurance Terms Defined For Easier Understanding

Women often have an "in the dark" feeling when their husbands try to talk to them about insurance.

To make understanding easier, here in simple language are definitions of insurance terms you'll hear.

Endowment: A life insurance policy which provides for the payment of the face value of the policy (that is, the amount appearing on the face or front of the policy) at the end of a fixed period. If the policy-holder dies before the policy matures, the face amount is paid to the beneficiary.

Loan Value: This is the same as "cash value." It is an amount specified in the policy which the company will lend on that policy.

Premium: One of the regular periodic payments the policy holder must make to keep his policy in force.

Straight Life: This is also called "whole life." It is a permanent form of insurance to cover you your whole life. If you decide that you'd prefer the policy's cash value when you retire, it's yours for the asking. Or you may convert this policy into an annuity and receive a monthly income.

Term Insurance: Term insurance is a form of temporary protection. For relatively small premiums you are protected for a specified length of time — usually for five, ten or twenty years.

Your premiums go up each year and you build no cash value with this "rented" protection.

The Latest 'Daily Bread' Prize

PATTY MOLDS

FOR TEMPTING, delicious desserts, salads and snacks you will be able to make your own crisp, tasty patty shells and individual waffles. Included with the molds is a recipe for shells to be used with creamed chicken, veal or vegetables and also there are directions for making a sweet patty for dessert dishes.

The winner each week is drawn by lot from the recipes printed.

Win one by sending us your favorite recipe — this can be main dish, leftover, salad, side dish, dessert or what have you.

1. Check your recipe carefully to be sure all ingredients are accurate and accounted for.

2. Be sure your name and address are on the entry.

3. Only one recipe at a time, please.

4. Send it to Woman's Page Editor, Grass & Grain, Box 1009, Manhattan, Kansas.

WAYNE DUNAFON, the Westmoreland, Kans., farmer as pictured this month in Gulf National Advertising.

Do you have these problems in corn production?

1. Does adverse weather conditions sometimes keep you from planting corn or other feed crops as early in the season as you'd like?
2. Does applying fertilizer in the spring slow you down at planting time?
3. Do you lose valuable time in the spring waiting for fertilizer, applicators or custom service?

If your answer to only one of the above questions is "Yes," here's how fertilizer application NOW can help solve your problem:

1. You get a headstart at planting time.
2. You eliminate rush season pre-planting fertilizing. You've already done it.
3. Equipment, supplies and other services are available NOW... no need to "wait in line."

These are just a few of the many benefits you get when you have CK provide you with genuine GULF fertilizers now. Come now or call us for the full story on "now fertilizing." We'll work with you in tailoring a fertilizer program to your SPECIFIC needs.

BULK OR SACKED — We'll apply Gulf or rent you an applicator — Just call us.

"Don't just fertilize...be Gulf wise!"

Beef 'n' Rice Stew Is Tasty One-Dish Meal

Beef 'n' Rice Stew is a tasty one-dish meal. To prepare 4 servings, sprinkle 1 pound lean beef stew cubes with salt and pepper seasoned flour. Brown cubes of meat in hot shortening in a heavy dutch oven.

Add 1 sliced medium onion to the meat and saute. Add 4 cups hot water, reduce heat, cover pan and simmer meat for about an hour. Add 1 cup uncooked rice and 6 small carrots, cut in-

to cubes. Simmer another half hour, or until meat, rice and carrots are tender. Add water as needed.

Denim Fine For Ironing Board Cover

Striped denim is perfect as an

ironing board cover. Stripes will serve to line up the edges of jackets, skirt pleats, curtains and the like.

Night Class

Mrs. Marvin Mastin of Beloit and Virgil Siemers of Luray look over a painting of milo done for a night class at Beloit.

You say you fell out of a tree and it'll be eight weeks before you're back in school?

Cheer up. Even Tarzan mis-times a leap now and then.

And don't give up on your school work. We've made it possible for many shut-in students to attend classes even though they're confined to bed. Our school-to-home service is the answer. It's a two-way communications system that lets the student speak and listen to anyone in the classroom.

It's helped many a bright youngster through some pretty gloomy confinements.

After all, we've had years and years of practice in developing phone arrangements for special problems. We offer phones for hard-of-hearing people, blind people, people who can't use their hands—phones so kids in bed can be in school.

We'll be glad to tackle your problem, too. Just call the telephone business office.

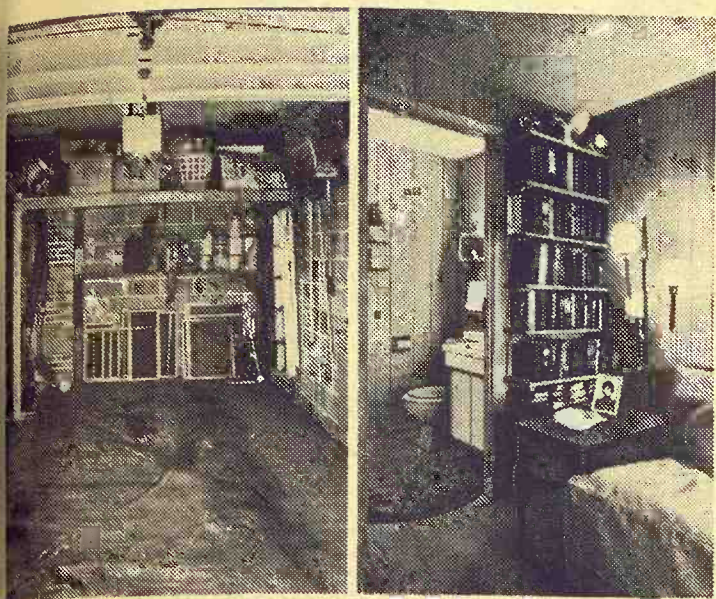

Maybe we can help.

Garage Easily Converted Into Cozy Apartment

Remodeling a cluttered garage into a comfortable apartment sounds like a major project. But, with a little handyman know-how and the right materials, one homeowner did the job in his spare time, with minimal expense and professional-looking results.

A one-car garage, used primarily for odds-and-ends storage, was the only place to house a relative who was coming to stay permanently. The problem was to transform a garage with cinder block walls and a cement floor into a pleasant bedroom and bath apartment.

After a thorough clean-up,

the first step was to partition off a small area at the back of the garage for a bathroom. The remaining space became a sizable sitting-sleeping room.

For a warm, attractive atmosphere, the walls were covered with hardboard panels in a rich woodgrain finish.

Good looks and convenience were also the requirements for floor and ceiling materials. Acoustical tile was used for the ceiling and resilient floor tile — which takes hard wear and is easily cleaned — was laid over a base of hardboard underlayment.

The apartment features dou-

ble-duty furniture, such as a couch that opens into a bed, a lavatory with countertop space and a built-in cabinet and end tables with drawer space.

When completed, the garage becomes a comfortable separate apartment that kept the relative close to the family while maintaining her privacy and independence.

Paint Radiators To Match Walls

Don't paint radiators to contrast with the background as this will only emphasize them.

To Strain Paint

Use an old nylon stocking to strain the lumps out of paint.

Cart Handy For Washing Windows

Keep all window washing supplies on a movable cart so you can suds, rinse and dry a group of panes without repeated trips for more equipment.

Use Non-Glare Glass

Use non-glare glass on pictures to retain their effectiveness when framed.

Safe Storage For Woolens

A safe place for wool blankets and seasonal clothing is furnished by lining a dresser drawer or two with aromatic red-cedar closet lining.

Creamy Giblet Gravy Goes Well With Roast Chicken Dinner

If roast chicken is on the Sunday dinner menu make some Creamy Giblet Gravy to serve on the mashed potatoes.

To make 2 cups of gravy, you will need 4 ounces of chicken giblets, chopped and cooked; ½ cup chopped celery; 2 tablespoons butter or margarine; 1 can (10½ ounces) condensed cream of chicken soup and ½ cup of water.

Brown the giblets and cook celery in butter until tender. Blend in other ingredients.

Keeps Sponges Fresh
Keep sponges fresh after washing by soaking them in cold salt water.

CAN MORE MONEY HELP YOU FARM BETTER?

Don't say
Yes too
quickly!

Almost everybody thinks that more money is the solution to every problem. But this is not necessarily true... especially in farming, and especially if you are borrowing the money.

When you borrow money for your farming enterprise, you should work with a lender who understands your special problems... who can point out pitfalls you may have overlooked... who can help you plan maximum profit from the money you borrow.

And that's where PCA comes in. PCA managers and fieldmen have farm backgrounds, plus a thorough training in farm credit. They can help you put your plans on paper so that you can tell exactly where you're going... and your chances of getting there.

You'll find PCA's special understanding takes a lot of the gamble out of farming.

Where
MONEY TALKS...

Study Relates Age of Farm Operators To Potential of Rural Youth

Only 17,000 Kansas farms will be available to the 47,000 rural youth who will choose an occupation during the next 13 years.

This conclusion was reached by Charles Kellogg, Jamestown, a graduate student in agricultural economics at Kansas State University, in a study of the impact of retirement and death of older farmers in the state.

Kellogg bases his findings on age census data and projections of farm consolidation by 1980.

Kansas farm operators numbered 92,440 in 1964. About half these farmers will have died or retired by 1980. If the rate of farm consolidation continues as

in the past, 29,000 of these farm units will be absorbed by existing farms.

This will leave only 17,000 farms available for beginning farmers.

Kellogg estimates that roughly 47,000 farm youth will enter the work force during this period. Most of these youngsters will leave the farm either voluntarily or involuntarily due to lack of farming opportunities, he concludes.

Kellogg's study also shows that Kansas farm operators averaged 51.3 years of age in 1964, and that almost 18 percent were 65 or older.

Scott County had the young-

est farmers, averaging 46.8 years. At the other extreme, Elk County farmers were the oldest, averaging 54.2 years.

Farmers in eastern Kansas were older, on the average, than those in the western part of the state, he says.

The K-State graduate student believes that irrigation will help reduce some pressure for farm consolidation by allowing some farmers to continue operation on smaller units.

He predicts that Kansas will have approximately 2.5 million acres under irrigation in 1980, assuming ground water reserves are not depleted. This compares with about 1.5 million irrigated acres in 1967.

SALES RECORD UP AT LAWRENCE CO-OP

LAWRENCE — The Farmers Association here grossed \$3.8 million and had a saving of \$143,652 in 1967, both figures

Grass & Grain

Free Checking Account?

Now, anyone 65 or over is entitled to a free checking account at *The 1st*. Why free? We know that people 65 and over are more conscientious about the dollar. They pay promptly; they write fewer checks; and nine out of ten can tell you, without looking, exactly how much is in their account. All this adds up to one thing — less wear and tear on us. So, if you're 65 or over, don't you think you're entitled to a free checking account? *The 1st* thinks so. And the Carefree 65 Account is just our way of showing it.

Interested? Drop by *The 1st National Bank* in Manhattan and ask about the Carefree 65 Account.

BUYING FAT HOGS

We buy fat hogs daily at the Manhattan Commission Co., Inc., sale barn. We buy direct with no commission to the seller.

BUYING HOURS

Mondays thru Fridays
8 a.m. to 1:00 p.m.
Saturdays 8 a.m. - 1 p.m.
Manhattan PR 6-4815

WE ARE ALSO BUYING

FAT HOGS AT

ALTA VISTA

SATURDAYS

8 a.m. to 1 p.m.

Phone Alta Vista 229-6430
or Manhattan PR 6-4815

AT ALMA & ESKRIDGE
EVERY WEDNESDAY

From 8 a.m. to 1 p.m.

Please do not bring hogs in for sale on Thursday afternoon, as we will be having large runs of cattle and you might not be able to unload, and they will get hot on you. For information call the barn in Manhattan, PR 6-4815. In Alta Vista, W. E. Dugan, 229-6303. Or you may call Joe Raine at Maple Hill MI 3-2226 or Eskridge Yard 449-2347; or Alma Yard 765-3841.

Loading Cattle

Charles Case of Salina helped move eight loads of cattle to sales in G&G area on a busy working day last week. He works for Claude Henry Truck Line of Salina.

Glen Elder Dam 85% Finished

BELOIT — Officials of the Bureau of Reclamation reported to the members of the Solomon Valley Flood Control and Water Conservation Association meeting here Tuesday night that the Glen Elder dam is now 85% complete.

"Work will continue on the project until well into 1970," said Gail Achterberg, Bureau official, "but the conservation depth of water could be in the reservoir by that time," he continued.

Tentative plans were then announced by the association to hold the dam dedication by June 1970 so that it will coincide with the plans now underway in Mitchell County for a centennial celebration. All communities in the valley have been asked to cooperate.

Other business taken care of by the association was the election of officers. Re-elected to

serve the association for this year are Orren Campbell, president, Glasco; Floyd Funston, vice-president, Solomon; Dean Haddock, executive-secretary,

Beloit; Mrs. Dale Brown, publicity director, Delphos; Paul Mears, representative for Mo-Ark, Beloit.

Directors are C. F. Bingessor to represent the Downs area; Gene Thull, Cawker City; Jer-

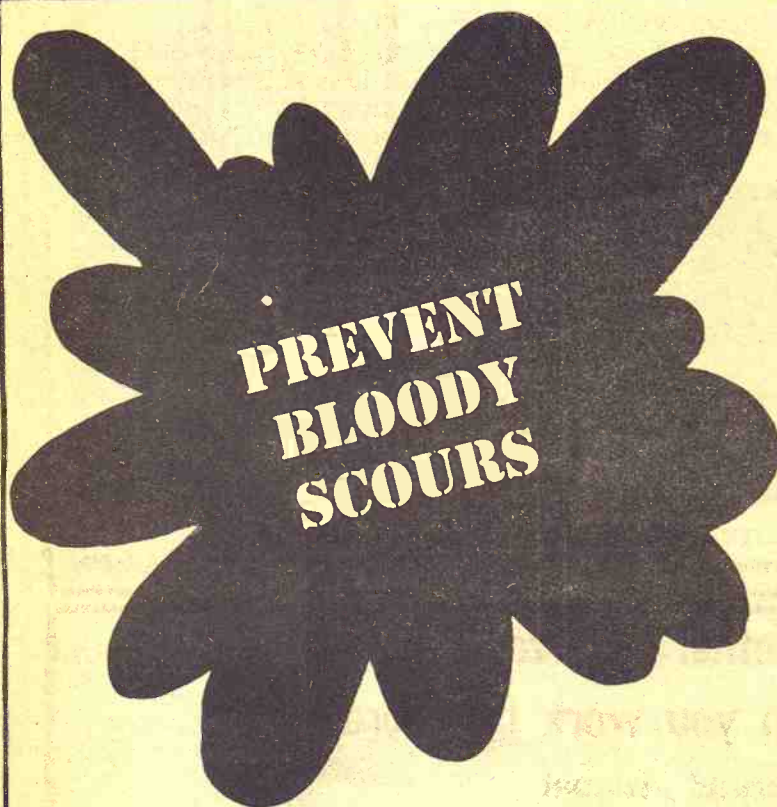

ry Van Pelt and Joe M. Heldrick, Beloit; Jerome Shaffer and Harlan Berndt, Simpson; Henry Horn, Glasco; George Paul, Delphos; Dale Gans, New Cambria; Cliff Nelson, Niles; Ed Jacobs, Jr., Solomon.

SOME FOLKS SAY charcoal can't be made in the open air. The way we do it at Jack Daniel's is start by lighting the rick in the center.

Then after the rick is burning good, it has to be piled high with logs to hold the fire inside. And water has to be sprayed on at just the right times. We don't know which step it is that makes it come out charcoal. But we do know that the charcoal does help to keep our whiskey sippin' smooth. And that doesn't take any long explanation. Just a sip, we think, and everybody will understand that.

Auction Frequenter

A frequent attender of cattle auctions in the G&G area is Oral Hansen of Jamestown.

Watch 'em go for...PURINA!

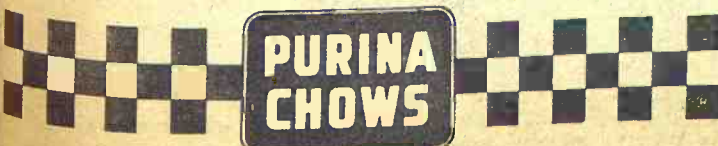

Horses really go for Purina. Now you can choose from two great Purina horse feeds—new Purina Horse Chow Checkers with built-in hay or Purina Omolene, a favorite of horsemen for almost 50 years.

Purina Horse Chow Checkers are a revolutionary idea in feeding horses. The hay is built in, eliminating the fuss and muss of hay. For those who prefer to feed hay there's the horsemen's standby—Purina Omolene.

We offer both of these research-developed Purina horse feeds in handy 50-lb. bags at our store with the Checkerboard Sign.

Reset Area Rustling Trial

ABILENE — The preliminary hearing for three alleged cattle rustlers was postponed last week because the Sedgwick County sheriff's office hadn't yet served subpoenas sent there for witnesses.

The new date is Feb. 29 at 1:30

p.m. in the Dickinson County court. The charge is grand larceny.

Meanwhile, Lyle Weber, formerly of Herington, and Paul Atherton and Robert McGee, both of Wichita, are in the Dickinson County jail in lieu of \$2000 bond each.

They are accused of trying to sell four of six cattle taken from the Marvin Poland farm north of Woodbine.

Case-o-matic gives you up to
DOUBLE PULL-POWER
WITHOUT SHIFTING...

WATCH THE WORK FLY
when you switch to
TORQUE CONVERTER

If you've never plowed with a Case-o-matic 5-plow 730 or 5-6 plow 830 tractor . . . now's the time to try it. Head for the heavy going that will test any tractor's pull-power . . . and plow in *direct drive*. Comes the tough spot — you flip the fingertip lever to torque converter *on-the-go* — and Case-o-matic carries you through *non-stop*. No clutching! No shifting! No stalling!

Unlike mechanical, fixed-ratio torque boosters, field-proved Case-o-matic saves both time and fuel in heavy going by using *just enough and no more* power than necessary. And it cushions shock loads on engine, clutch and transmission.

Veterinary Lead In Dental Care

NEW YORK — Tooth decay can be prevented in animals by putting a harmless chemical in their food and water, dental researchers reported yesterday.

The discovery "may well be a major breakthrough in the control of dental caries (decay)," an editorial in the Journal of the American Dental Association declares.

The chemical is an enzyme, dextranase, that breaks down dextran. And dextran is a main ingredient in sticky "plaques," containing bacteria, that form on teeth to initiate the process of decay.

The plaques in turn can harden into calculus or tartar, setting the stage for destructive gum disease that causes enormous loss of teeth and gums and bone.

The new findings therefore hold promise of combatting

both tooth decay and periodontal or gum disease. Human tests of the new approach are planned, the research team said, to try to find whether dextranase can be a useful and safe agent to fight tooth decay and gum disease.

K-State Honor To Milling Prof

MANHATTAN — An annual recognition of an outstanding

faculty member at Kansas State University called a Faculty Lectureship Award has been accorded Dr. John A. Johnson of the department of grain science and industry.

He'll be principal speaker at a Faculty Lectureship Dinner and winner of a \$1000 award from Standard Oil.

ANOTHER CUT IN CHICK HATCHING

The January hatch of chicks in Kansas by commercial hatcheries was 290,000 chicks, the

February 27, 1968

second smallest for the month in records dating back to 1950. The January hatch was about an eighth bigger than the December hatch but only 58 percent of the January 1967 hatch. All were for egg-type chicks.

SE Nebraska Hereford Sale Tops At \$700

SYRACUSE, Nebr. — The Southeast Nebraska Hereford Assn. sale here grossed \$15,965, averaging \$371. The 37 bulls averaged \$415 and 11 females \$243. The sale top was \$700, paid by Sedlacek Hereford Farm, Ster-

Grass & Grain **13**
February 27, 1968

ling, Nebr., for a consignment of Munn Brothers, Waverly. Another \$700 sale was made by Ervin Maahs, Lincoln, to Munn Brothers.

The female top was \$320, paid by M. M. Nevine of Adams for a consignment of Warners Hereford Farm, Waverly.

Gene Watson was auctioneer.

Sorghum Topper

Hal Keeler of Deming, New Mexico, stands in a mountain of grain sorghum with which he won a national contest sponsored by a seed company. In a one-acre test, Keeler "broke the 11,000-pound barrier," say publicists for DeKalb Agricultural Association. The 11,489-pound yield on one acre figures out to about 205 bushels. In a 60-acre field, Keeler averaged 10,414 pounds, and on a 300-acre planting, he averaged 7311 pounds.

Keeler planted in narrow rows, 25 1/4 inch spacing, and seeded at a 12-pound rate. The land was pre-watered and then irrigated four times after the crop was up.

Bank's Cowman's Roundup March 4

CLAY CENTER — The second annual cattlemen's roundup sponsored by Union State Bank will be held March 4.

The activities will begin at 10 a.m. with a live animal evaluation at the Hackney & Mahan Feedlot a mile southwest of Clay Center.

A carcass evaluation will be at 11 a.m. in the National Guard Armory in Clay Center followed by a noon luncheon and a panel discussion at 1 p.m. with specialists from Kansas State University and Fort Hays Experiment Station.

New Feed Mill In Ellinwood

ELLINWOOD — Operation of the S and H Feeders new feed preparation mill is promising a boost to the local business community.

The mill and feedlot, with a present capacity for 4500 head of cattle with planned expansion to a capacity of 6000, now employs eight men on a full time basis and six others part time.

The reason GRASS & GRAIN has

More Readers

of its classified advertising and sales section than any newsweekly in the state is that Grass & Grain has

More Classified

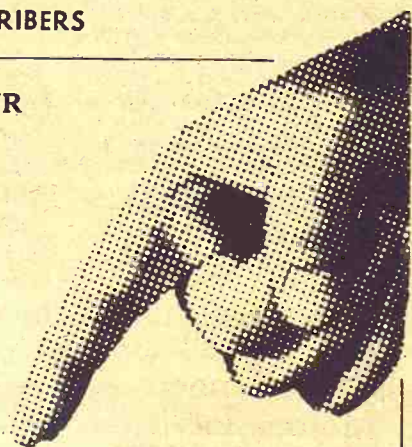

advertising for readers to read. Last year Grass & Grain ran 25,084 inches (314 pages) of classified ads and sales. This year volume is running 24% over last year.

Sell Land, Livestock, Implements, Cars & Trucks, Furniture, Feed & Seed, Antiques, Services. Find a Good Buy. The Way to Tell the Most — for the least cost — is thru G&G Classified.

We specialize in the sale of large FARMS - RANCHES ESTATES AT AUCTION or private treaty Anywhere in Kansas

GENE WATSON REAL ESTATE

AUCTIONEER - REALTOR 14 Hillcrest 316 MO 3-3174

DOUG WILDIN 316 MO 2-7543 Rt. 1, Hutchinson, Kans.

IF YOU are interested in planting part or all of your corn acreage in narrow rows, 24, 30 or 32 inch but need a way to harvest it, I am contracting now for custom picker shelling this fall, also have 38, 40 or 42 inch row head. Phone Leo Holthaus, Baileyville, Kans., TW 5-2221. SB5

Services

ATTENTION! ATTENTION! (Correction from ad Feb. 20) Mister Farmer or Business Person: Are you wanting to go narrow rows, on your 1968 milo, corn or soybeans, but dread the investment of new machinery to do the job? Then let me ask you to give this ad some serious consideration.

Morgans Custom Farming is now taking applications until further notice of this paper for your 1968 row crop program. Share of crop or credit on part, until Feb. 1, 1969.

New 20 or 30-in. AC 600 Series planter, fully equipped to handle liquid and dry fertilizer, insecticides, & herbicides, no til conventional method available. Among the best no til, mulch operations for dry land farming available ever offered in the Mid West.

Also chiseling and most any kind of seed bed preparation. For more information, write:

Morgan's Custom Farming Route 3 WASHINGTON, KANS. 66968

A Cutback In Car Guarantee

Auto makers are considering reducing guarantees on new cars.

The Wall Street Journal has reported that executives are heeding complaints from dealers and may cut back warranties at the start of the 1969 model year.

Likely the guarantee would be cut back to 24,000 miles or two years, whichever comes first.

Consideration of the warranty cutbacks comes at a time when auto profits are under growing pressure because of mounting costs, and the fact that the industry faces possible Federal legislation that would require it to spell out terms of warranties more clearly; in addition, the industry would have to submit to Federal warranty standards and even to arbitration of some unhappy customers' warranty claims.

Current warranties cover practically the whole car against defects in materials or workmanship for two years or 24,000 miles, whichever comes first, and they cover the car's power train parts for five years, or 50,000 miles.

This 5/50 coverage on the power train parts appears most threatened, according to highly placed industry executives.

Last fall all of the auto makers sharply cut back their warranty coverage. Ford Motor Co. and General Motors Corp. did this by initiating fees of up to \$25 for second and subsequent owners who want the original warranty coverage continued.

Ford also requires second owners to pay the first \$25 of

warranty repair bills. Chrysler Corp. and American Motors Corp. didn't require additional fees but limited warranty coverage to two owners.

To curb warranty costs, auto makers have been bearing down on their quality control problems.

The costs of warranties have exceeded auto makers' expectations. They have also been under pressure from dealers and car buyers to improve their warranty programs.

A "credibility gap" has developed with many car buyers

over warranty coverage, one auto executive conceded. He attributed this to the gap between the coverage the car buyer actually gets and what he thinks he will get.

Dealers are unhappy because of the complaints from customers and the red tape involved in collecting from the auto companies for service work they perform under the warranties.

The service policy, paid by the auto buyer, might be a compromise that would cut auto makers' costs and still keep car buyers happy.

AUCTION SALE

**SATURDAY
MARCH 9**

**Starts 1:00 p.m.
Lunch Served**

As I am quitting farming, I will sell at public auction at farm located 3 miles north of Wamego on Highway 99 to Louisville, then 2 miles east, 1 1/2 miles north, 1/2 mile east and 1/2 mile north.

33 Head Livestock

10 Hereford cows, 2-6 yr. old calves by side
6 Hereford cows, springers
7 Hereford heifers, 1 yr. old

MACHINERY

1963 John Deere 3010 gas tractor, row crop, P.S., Roll-Matic
1949 JD A tractor, new tires
JD 2-row cultivator for JD A
JD 2-row mtd. lister for JD A
John Deere 2-row curler
1963 John Deere tractor plow, 3-point hitch
John Deere Model R, 90 bu. manure spreader, with 10 ply truck tires, used very little
May-Rath 32-ft. elevator with power takeoff & motor drive

MH self-propelled 14' swather
Bale loader, 2-wheeled trailer, 18 ft.
Bale elevator, 22' electric portable
IHC side delivery rake
2 hay trailers, 4 wheel
Jayhawk hydraulic tractor scoop
JD 11 ft. 6" hyd. wheel disc
JD 12 6" hyd. wheel disc
JD 16 ft. springtooth hyd. wheel carrier
IHC 16' springtooth hitch
JD 3-14 plow on rubber
IHC 4x14 plow, hyd. and on rubber
IHC No. 10 Hammermill
Grain rolling mill
Farm Hand hydraulic pump, PTO, like new
Propane water tank heater
Other miscellaneous items

Clerk: First National Bank, Glasco

Output In Slight Gain

Milk production in Kansas during 1967 was slightly above 1966 but about 5 percent below the 1961-65 average, according to the Kansas Crop and Livestock Reporting Service.

Milk production totaled 1,746 million pounds compared with the 1966 production of 1,738 million pounds.

Numbers of milk cows on farms continued the downward trend of the past two decades and averaged 221,000 head in 1967 compared with 232,000 in 1966.

The annual production per

cow continued to increase and set a record high of 7,900 pounds for 1967, 5 per cent above the previous year.

The number of cows and heifers two years old and over kept for milk (including some heifers not yet fresh) on January 1, 1968, was 240,000 compared with 250,000 head a year earlier.

The number of dairy replacement yearling heifers on Kansas farms on January 1, 1968, was 52,000 head compared with 57,000 head on January 1, 1967, a decrease of 9 per cent.

Heifer calves under 1 year old kept for milk cows totaled 54,000 head, down from 57,000 head a year earlier and the 5-year average of 76,000 head.

Manufactured Dairy Products

The preliminary estimates for 1967 indicate an increase in the production of creamery butter and ice cream in Kansas but a decrease in American cheese production from the previous year.

Manufactured dairy products normally absorb somewhat less than half of the State's milk production.

Creamery butter production was estimated at 20.6 million pounds in 1967, 24 percent above 1966. American cheese production totaled 19.6 million pounds, a decrease of 11 percent from 1966. **Ice Cream** production in 1967 increased slightly to 5.7 million gallons compared to 5.4 million gallons in 1966.

Annual production per cow set a new record high of 8,821 pounds in 1967, up 4 per cent from the 1966 record of 8,507 pounds. Rate per cow increased in all regions — ranging from a 1 per cent increase in the North Atlantic to a 7 per cent increase in the South Central California had an annual rate per cow of 11,170 pounds, continuing to lead the nation. Arizona was second at 10,570 pounds and Hawaii, third at 10,200 pounds. New Jersey, Connecticut and Washington each had annual rates of more than 10,000 pounds.

The Nation's milk cow herd averaged 13,524,000 head in 1967 — the smallest number record-

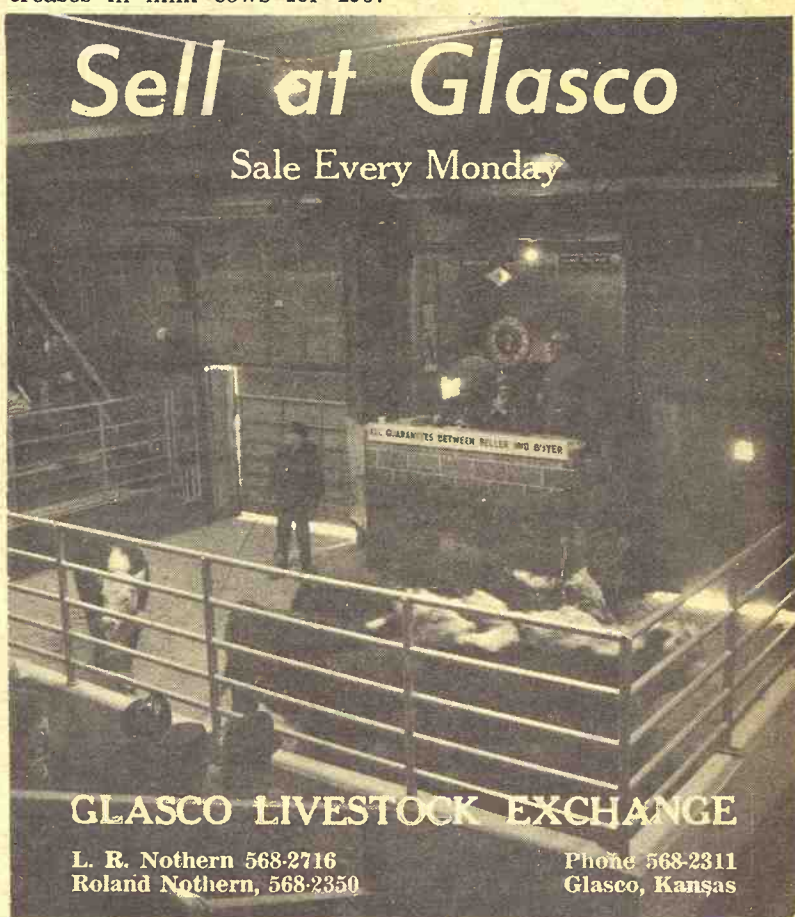

ed since the series began in 1924. Milk cow numbers have declined steadily since 1953. The number of milk cows on farms during 1967 was down 4 per cent from 1966 and 16 per cent below the 1961-65 average. Decreases in milk cows for 1967

February 27, 1968

were recorded in all regions — ranging from one per cent in the West to five per cent each in the West North Central and South Central.

It's Annual Meeting Time

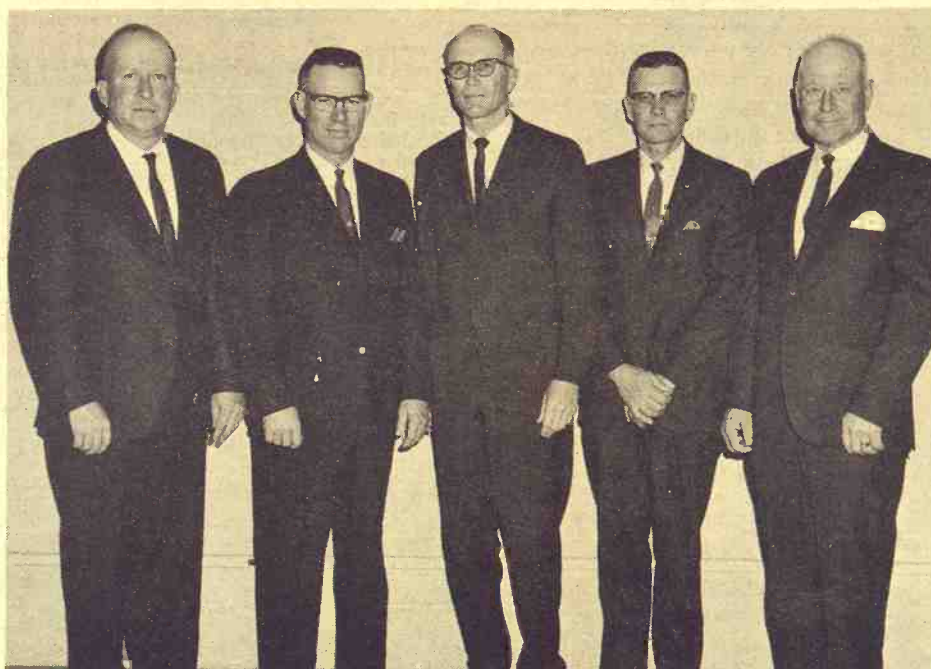

Most farmers generally have several opportunities in the late winter or early spring to get a meal, hear a speaker, and listen to a business report of one organization or another they belong to.

These pictures were taken by K. R. Greene of Tescott at the annual meeting of the Production Credit Association at Salina.

Laughing Til It Hurts

The speaker at the Salina meeting made Mr. and Mrs. James McAllister of Lyons laugh until they cried. The speaker was billed as Dr. Wilbur Schaeffer, really Joseph Adelman of Kansas City. Adelman calls himself "the world's worst after-dinner speaker."

Directors

Directors of the Salina Production Credit Association are Darrel Carlson of Falun, Ted Hardwick of Sterling, Dale Galle of Moundridge, Dean White of Culver and Bud Turner of Kanopolis. Hardwick and Carlson were reelected to the board at this 34th annual meeting.

PCA Veterans

In line at the Salina dinner were PCA veterans Roy Rice, manager of the Salina association for many years and now retired, and Otis Nelson of Tescott, a retired fieldman.

Another Line On Farm-Use Computers

A farm magazine editor has buried some of the myths blocking the way to real benefits for agriculture from electronic data processing (EDP).

Speaking at the Kansas Bankers Agricultural School at Kansas State University, Jerry Carlson, farm management editor for Farm Journal, said that "computer" is no longer a magic word.

"But there are still misunderstandings about computers which are delaying our progress in developing this exciting farm

management tool," Carlson said. Myth No. 1 is that computers don't make mistakes, he said. "Mistakes are made, but almost always a human is responsible, not the computer."

"Any of a dozen things can go wrong. Errors may be made in coding mail-in farm records, filling out the forms, or the key-punch operator may mistake a 4 for a 9."

Another myth is that farmers want a complete EDP management accounting program, the speaker said. "So far, more of these complex programs have flopped, by commercial standards, than have caught on."

"The fastest-growing services are the least sophisticated ones."

Carlson dispelled the myth that farmers will buy computer services as fast as they are available, noting that farmers are rather careful buyers of EDP services.

"We often hear the complaint that computers reduce you to a number," Carlson said. "But quite the reverse is true. In the future, data systems will force you to become more of an individual thinker and less of a mechanical man."

"Computers will take over the dull, repetitive work, such as replacing bookkeepers, but not the skilled accountants who apply human judgment."

Another speaker, Dr. Norman Whitehair, state leader for extension economics at K-State, outlined the university's role in EDP.

Whitehair said that K-State has hired a staff member, Dr. Larry Langemeier, to develop an electronic data processing system for the university and commercial interests.

K-State is starting a development project designed to wed the vast volume of computer science knowledge to that of a practical educational program in farm management, Whitehair said.

He explained that the program would have four purposes:

— Enhancing K-State's research program.

— Developing ways to apply computer services to farm management record keeping.

— Providing more graduates with knowledge of computer operations to prepare them for eventual employment with firms and agencies.

— Developing an extension program to promote electronic data processing in Kansas.

AUCTION SALE

Having decided to quit farming we will sell at Public Auction on the farm located 4 1/2 south of Longford, Kans., or 1/2 west & 1 north of Manchester. Watch for sale sign.

Dairy Cattle

5 Brown Swiss heifers, 2 yrs., milking good, been fresh 30 days to 5 months
2 Brown Swiss cows 4 & 7 yrs., just fresh
8 Brown Swiss cows, 3 to 7 yrs., milking, been fresh 2 to 4 months
Brown Swiss 2 yr. old heifer, springer
4 Brown Swiss heifers, 16 mo. to 2 yrs., pasture bred
7 Angus Swiss cross bucket calves, 3 months
2 Angus Swiss cross baby calves
NOTE: This is a good herd of Swiss cattle. Bang tested, most Bangs vacc., giving 7 gal. a day, good loading facilities. Your inspection invited prior to sale day.
40 Duroc weaning pigs 8 weeks old

Horses

Matched team of sorrel mares, 6 yrs., black white mane & tail, in foal to reg. Belgium horse, service pd., broke to work, 1600 lbs.
Matched team of sorrel mares, 4 & 6 yrs., black, broke to work, 1600 lbs., one in foal to reg. Belgium horse
Belgium filly, 5 months, white points, good one
Choc. dapple quarter type stud, 9 yrs., gentle, well broke, good breeder
Sorrell quarter type mare, 6 yrs., light mane & tail, black, bred to above horse, well broke
These are outstanding horses.

Farm Machinery

1948 IHC W-9 tractor, new rubber, PTO, good shape
1944 John Deere model A tractor, new rubber
1951 Allis 5-ft. combine, with top, good shape
John Deere tandem disc, 10-ft., good
Case tandem disc, 10-ft., fair
IHC 10-ft. dump rake
IHC 2-row stalk cutter with tractor hitch
IHC steel threshing machine, 22 in., works
IHC single row corn binder, high cut, PTO, good
IHC single row corn binder, low cut
IHC 6-ft. horse mower, old
IHC 3x14 plow on rubber, good shape
Case 3x14 plow on rubber, fair
Oliver 2x16 plow on rubber, fair
New Holland 7-ft., PTO, semi-

mount mower
Graham Hoeme 10-ft. chisel on rubber, good shape
Case side rake on rubber, 4 bar, good
MM 16-8 grain drill on steel
Wetmore hammer mill, good
Easy PTO post hole digger, good
John Deere 12-ft. spring tooth with evenner
John Deere No. 200 2-row mounted cultivator, good
John Deere No. 730 2-row lister on rubber, good
John Deere model K 4 wheel on rubber manure spreader, good
John Deere 4-section drag harrow & steel evenner, good
John Deere single row lister
Combine bin
2 2-row weeders, with tractor hitches
2-row cultivator, Fresno, road slip
Single row cultivator, team sled
David Bradley 4-wheel trailer with hay rack, good
Buzz saw frame & blade, tractor mounted
2-wheel trailer with pickup bed
2-wheel covered horse trailer
4-wheel trailer with wagon box
Other old machinery & junk iron; 2 lumber wagons & boxes.

DAIRY EQUIPMENT, SADDLE, HARNESS, POSTS & MISCELLANEOUS

Zero 6 can milk cooler, wash vat, small electric hot water heater; buckets;
14 steel feed bins made out tractor wheels; 250 bu. round steel bin; David Bradley chain saw; 50-ft. endless drive belt; weed chopper; fencer; 50 steel posts; 50 electric steel posts; 18 telephone poles, near new; 3 miles telephone wire on spools; water hauling tank; Good stock saddle; halters; bridles; 2 sets of cord fly nets; 3 sets work harness; collars; harness oil vat & oil; Sunbeam electric clippers; hoof trimmers;
A lot of panels & gates, 12, 14, & 16 ft.; hog troughs; 2 hog waterers on 50 g. barrels; 300 gal. gas barrel on stand; air compressors, good; grease guns; log chains; shovels; forks; some hand tools & other misc. items.

HOUSEHOLD GOODS

Antique dresser with marble top
Square tub Maytag washing machine
Dressers; wall phone; desk phone; other misc. household goods.

May Quit Sales of Live Buffalo

Until brucellosis has been officially cleared from all herds, the sale of live buffalo in the state may be halted. Biologists with the Kansas Fish & Game Commission say the state is cooperating with a federal program to eliminate brucellosis. Federal regulations require that any herd of animals containing the disease be quarantined until all traces of it are gone.

The Game Commission sold about 175 head of buffalo in 1967. About 90 percent of them were slaughtered and sold to service organizations. Selling slaughtered animals is acceptable, but live sales will likely be non-existent for several years.

Cut Protein Requirements On Loan Grain

The grade and protein requirement for grain pledged on loan has been lifted by the United States Department of Agriculture, bringing praise from James H. Dean, general manager of the Farmers Cooperative Commission Co., Hutchinson.

"The recent announcement by USDA stating storage payment rates for the 1968-69 crop year would be unchanged from the previous year and also stating a modification in the requirements for eligible grain would

bring praise from James H. Dean, general manager of the Farmers Cooperative Commission Co., Hutchinson. Asks Tax Exemption On Cattle, Implements

A bill exempting cattle and machinery from personal property taxes was introduced last week in the house by its livestock committee.

Vehicles, trailer houses, homes and buildings would remain on the tax rolls.

Rep. W. R. (Bob) Brown, Republican, committee chairman, said 10 states already had taken

cattle off the tax rolls.

"The farmers and cattlemen are in such desperate trouble they are going to have to have a tax break somewhere along the line," Brown said.

The bill also exempts working and royalty interests on oil and gas holdings, but the bill's sponsors said this exemption was not intended.

In 1967, personal property relating to farming totaled \$313.3 million in assessed tangible valuation. Total assessed tangible valuation for all classes of property was \$5.3 billion for the same year.

GUERNSEY ASSN. NOTES AREA MILK PRODUCTION

OLATHE — Three dairy cows owned by Fred Hyer of Olathe have recently been cited for production records by the American Guernsey Cattle Club.

Here's K-State Field Day Spring Schedule

What is Kansas State University doing to support agriculture, the No. 1 industry in the state?

Come to the spring and fall field day events at the K-State agricultural research sites and see for yourself, suggests Dr. Floyd W. Smith, director of the Agricultural Experiment Station.

Because of the state's size, K-State has developed an extensive network of agronomy research locations to check local growing conditions. This allows University researchers to test and make recommendations on new crop varieties, date and rate of planting, fertilizer application, tillage practices, and cultivation methods.

A great variety of research projects with crops and livestock are carried out at the Experiment Station, Manhattan, and at the five branch experiment stations at Colby, Garden City, Hays, Mound Valley (with fields at Columbus and Parsons), and Tribune.

Agronomy experiment fields, operated by the K-State agronomy department under the direction of Dr. R. V. Olson, are located at Belleville, Hutchinson, Mankato, Minneola, Newton, Ottawa, Powhattan, Scandia, and St. John (both dryland and irrigation).

The K-State horticulture department, under the guidance of Dr. R. W. Campbell, conducts fruit and vegetable research at Manhattan and the Wathena Experiment Field, and nut crop research at the Southeast Experiment Field, Chetopa.

"For more than 50 years, Kansas people have visited our research facilities to get a first-hand look at what we are doing," Dr. Smith notes. "And our annual field days give them an opportunity to get acquainted with our K-State research faculty, Extension specialists, and field personnel."

This year's spring calendar for planned field days at K-State research sites is as follows:

GREAT USED CAR BUYS

1962 Chevrolet Bel Air 4-door sedan, 6, standard \$785

1965 Chev. Imp., V-8, 4-door HT, aut. trans., power strg., new WW tires \$1775

1965 Oldsmobile Delta 88, 4-dr. sedan, air conditioned, power steering and brakes \$2195

1964 Chevrolet Impala, super sport convertible, power steering, floor mounted, automatic trans., extra nice \$1595

1961 Pontiac Catalina 4 dr. sedan \$395

1961 Ford Galaxie 4 dr. sedan \$325

1959 Chevrolet 4 dr. hardtop

1958 Chevrolet 4 dr. sedan \$250

AUTOMATIC IRRIGATION AT LOWEST COST

With the Big Squirt Automatic Irrigator, the initial cost is one-half of the circular type. Yet, volume output is 10% greater, and only 5 ac. are lost in ditches on 160 ac., whereas up to 36 ac. are lost with circular type. This compact, powerful Big Squirt unit will irrigate up to 100 ac. per day. Spray is gentle and saturating. Machines are in operation on all crops from corn to delicate vegetables — and on all soil types. One man can handle up to ten machines, or 3200 ac., all by himself!

Clerk: Pilsen State Bank

ACP Payments May Be In Real Danger This Time

One of the oldest and most widely used federal farm programs — financial aid to farmers for conservation efforts — faces in Congress this year perhaps the toughest battle of its life.

It is known as the Agricultural Conservation Program — ACP — to Agriculture Department administrators and farmers. Under it, the government shares with farmers the cost of projects for conservation of soil, water and wildlife resources.

Several million farmers par-

ticipate in this program annually — far more than take part in any other single farm-aid program.

The program faces tough going because President Johnson has recommended to a Congress insistent on budget-cutting that funds for it be limited to \$100 million for the 1969 crop year. For many years Congress has provided upward of \$250 million for annual payments.

Ever since its enactment in 1936, after the Supreme Court knocked out the precedent-making Agricultural Adjustment Act crop controls, the ACP program has enjoyed a high degree of support in Congress. In the beginning and for many years, \$500 million annually was voted for the program.

Three presidents have sought unsuccessfully to reduce the ACP fund — Dwight D. Eisenhower, John F. Kennedy and Johnson.

One of the most powerful lobbyists for the program is the National Limestone Institute Inc., an organization of lime processors. A considerable portion of the ACP funds spent over the years has been for putting lime on acid soils.

The rate of government cost-sharing averages about 50 per cent.

Some critics contend that practices farmers are assisted in carrying out under this program are things any prudent farmer should do without compensation from the government. But supporters argue that because of low farm income many worthwhile projects would not have been carried out without federal payments.

Projects under the program between 1936 and 1966 include the construction of 1,958,000 cover crops on 465,679,000 acres of land to protect them from erosion by wind and water. An-

other was the establishment of contour stripcropping on 112,835,000 acres of land, also to protect the soil from erosion. Planting of trees and shrubs on more than 4 million acres have provided protection from erosion. Construction of 239,895 wells for livestock water and for protection of vegetative cover on surrounding soil was an ponds and water pits on farms for conservation of moisture and for providing water for livestock.

Another major effort was the establishment of temporary

other part of the program. Payments were made for improvement of forest stands on 3,542,000 acres of land.

Livestock Trading Under Tighter Exchange Laws

President Johnson last week signed into law a bill that is designed to provide additional safeguards against fraud and manipulations on the nation's commodity exchanges.

The new legislation adds livestock and livestock products to the commodities regulated under the exchange act, and increases the criminal penalties for trading abuses such as market manipulation and embezzlement.

Johnson pointed out that although regulatory responsibility for commodity trading will remain primarily with the ex-

changes themselves, the new amendments will substantially bolster the enforcement authority of the secretary of agriculture.

At the White House, Secretary Freeman told reporters that the new act "will strengthen the bargaining power of farmers."

"Freeman added that farmers 'who are subject to the vagaries of drought, insects and inflation should not be left to the tender mercy of speculators.'"

Asked what effect the new act would have on livestock producers and consumers, Freeman said that the provisions to prevent cornering and the increased enforcement measures would "reflect a more honest price, have a balancing effect on the market, and help both the consumer and producer."

John A. Schnittker of Kansas, undersecretary of agriculture who helped guide the bill thru Congress, said the principal new commodities brought in under the new act are pork bellies, live cattle, slaughtered cattle and hides.

Another provision, Schnittker said, is that manipulation, which under the old statute was a misdemeanor, has been raised to a felony.

The President pointed out that the commodity exchanges are national markets where agricultural products are bought and sold and that last year these markets handled approximately 75 billion dollars in agricultural transactions.

After explaining that commodities are big business and that honesty and soundness of the exchanges are important to all Americans, the President said, "since 1922 the commodity exchange act and other federal legislation have encouraged cooperation between the federal government and the exchanges in preventing fraud and market manipulations. Under the act, commodity market conditions have improved greatly, nevertheless, additional safeguards have been needed for some time."

Green Bug Signs in Southwest

A warning to wheat farmers in southern and southwestern Kansas to be on the lookout for green bug damage has been

voiced by Dr. R. H. Painter, entomologist at Kansas State University, Manhattan. He said farmers should investigate spots in their fields where plants are yellowing or appear to be dying.

"We continue to receive re-

ports of green bugs from many points in Kansas," Painter said. "As of now there does not appear to be a serious green bug threat, but this pest is widespread, at least in the southwestern part of the state. There could be a rapid buildup if the weather warms up."

Painter said the extent of any buildup would depend upon the temperature and the food available.

Green bugs are tiny aphids, somewhat smaller than the head of an ordinary straight pin, and completely green, except for the tips of appendages.

eggs at Norton reservoir March 18.

This will be the second pike egg harvest in Kansas, Thayne Smith, chief of information and education for the commission, said.

"We don't know what our results will be since we have no way of knowing the result of pike fishing pressures at Norton," he said.

"And, where Northern pike will be stocked next spring depends on how much roe we strip from Norton pike."

Smith said new lakes in the state would be on the priority list. This includes a second stocking at Milford reservoir and possibly Glen Elder — if there is enough water behind the dam by then.

Figure About Same Seasonal Marketing Of Feeders

On January 1, 1968, the number of Kansas cattle and calves on grain feed for the slaughter market was 610,000, up 4 percent from a year earlier and a new high for the State, according to the Kansas Crop and Livestock Reporting Service.

This was up seasonally from the 468,000 on feed on October 1, 1967 and was about one-third greater than average for January 1 in the 1962-66 period.

The cattle and calves on feed in Kansas included 338,000 on feed in commercial sized lots with 1000 head or more capacity. The 338,000 was a new high for commercial lots.

Farm type feeding operations accounted for 272,000 of the cattle and calves on feed, about 1 percent less than a year earlier.

Marketings of grain fed cattle for slaughter during the October-December quarter totaled 285,000, up 10 percent from a year earlier. Cattle and calves placed on feed during the October-December quarter totaled 427,000 compared with 370,000 a year earlier.

Of the cattle on feed January 1, 1968, 447,000 were steers and

steer calves and 163,000 heifers and heifer calves compared with 437,000 and 149,000, respectively, a year earlier.

Classification of cattle on feed by weight groups included 12,000 of less than 500 pounds in weight, 120,000 in the 500-699 pound group, 273,000 in the 700-899 pound group, 177,000 in the 900-1099 pound group and 28,000 weighing 1100 pounds or more.

By length of time on feed 69 percent of the total on feed, or 421,000, had been on feed less than 3 months compared with 61 percent a year earlier. Some 181,000 had been on feed 3 to 6 months and only 8000 on feed more than 6 months.

Kansas feeders intentions to market indicated that about 372,000 grain fed cattle would be marketed in the January-March quarter, not greatly different from the 370,000 marketed in the same quarter of 1967.

Major Feeding States

In the 32 major feeding states there were 11,297,000 cattle and calves on grain feed for the slaughter market on January 1, 1968, up 2 percent from the number a year earlier. Iowa, Illinois and California all had

less cattle on feed than a year earlier but most other major states showed moderate to substantial increases.

Weight, Kind and Time On Feed

In the 32 major feeding states, 70 percent of the cattle and calves on feed were steers or steer calves and 30 percent heifers and heifer calves.

By weight groups, 16 percent were under 500 pounds; 27 percent, 500-699 pounds; 32 percent, 700-899 pounds; 22 percent, 900-1099 pounds and 3 percent, 1100 pounds and over. Some 68 percent of the cattle had been on feed less than 3 months, 27 percent from 3 to 6 months and 5 percent more than 6 months.

Marketings and Placements

In the 32 major feeding states, 7,943,00 head of cattle were placed on feed during the fourth quarter of 1967, 3 percent more than a year earlier.

Marketings of grain fed cattle for slaughter during the

Reset Kennedy Speech To March 5

A new date for Sen. Robert Kennedy, D-N.Y., to deliver the fifth in a series of Landon Lectures at Kansas State University has been set for Mar. 5.

The senator was originally scheduled to speak Feb. 20 but that was postponed to the following day and finally canceled when the press of congressional activity kept Kennedy in Washington.

"Change and Conflict in the Community" will be Kennedy's topic for his 10 a.m. appearance in the field house.

Officials at the University of Kansas in Lawrence announced that Kennedy also verified he would speak in the Allen Field House at KU the afternoon of March 5.

India Leads Crop Surge

An Agriculture department survey indicates world agricultural production set a new record last year, with India, long plagued by bad weather, leading the underdeveloped nations.

The survey said world production last year was 127 percent of the 1957-59 average, compared with 122 per cent in 1966.

Production in developed countries rose from 123 percent of the base average in 1966 to 126 percent last year, which production in the less developed countries increased from 120 percent to 130 percent the study said.

In India, production rose about one-fifth.

On a per capita supply basis, world production was 107 percent of the 1957-59 average in 1967, compared with 104 percent the year before. Per capita supply in the developed countries increased from 112 to 113 percent, but in the less developed countries, per capita production increased from 98 per cent of the 1957-59 average to 104 percent.

India's per capita supply went up from 89 percent in 1966 to 104 percent last year.

The department said it is too early to estimate 1968 food production.

REPUBLIC COUNTY HIRES AGENT JIM GUNTER

BELLEVILLE — Jim Gunter, Jewell County agent, has been hired for the same position in Republic County. He is an Oklahoma State graduate and has

Jim Gunter

been at Mankato for four years. Republic county has been without a county agent for a year. Jack Stroade was the last county agent of Republic County.

FIRE TAKES WATERVILLE AREA FARM HOME

WATERVILLE — The farm home of Mr. and Mrs. Robert Jacobson southwest of here has been destroyed by fire.

Area School For Auctioneers

ATCHISON — The Northeast Kansas Area Vocational-Technical School has announced it will conduct a complete course in auctioneering.

Instruction will include registered Hereford cattle, auction laws and contracts, advertising and publicity, accounting and income tax, livestock judging, farm and sale pavilion sales, Charolais cattle, household furniture auctions and livestock ages, diseases and interstate shipment.

The Growing Hog Market Is At

HOGS START AT 11:00 A.M.
CATTLE AT 1:00 P.M.

Snow and some ice on the roads last Saturday kept some of our consignments from getting in, but we had a fair run of both cattle and hogs which were sold on a fast, steady to higher market all the way.

Heavy feeders were in demand and they sold on a strong market. We have buyers for heavy feeders, so if you have some in that class you want to market at this time, let us know and we will appraise them for you.

Despite the weather, more than 600 butcher hogs moved through the ring on a very good market, the top being \$19.90, and not just on one hog. Look over these prices below, and you'll be convinced Junction City is the place to market swine. We have four regular packer buyers for hogs, and we are charging you only 50¢ a head to sell them for you.

We are expecting a good sale this coming Saturday, so whether you are a seller or a buyer, we'd like to hear from you.

Following is a sampling of the sale last Saturday:

*****	4 black hfrs	925 @	24.40

Sundays 1 to 5 p.m.

District Feeder Assn Formed

LAWRENCE — A Sunflower Feeder Livestock Association has been organized with plans to operate in 19 northeast counties and hold spring and fall sales of graded feeder calves.

Richard Casteel, Tonganoxie, president. Don Palmateer of Lawrence is vice president, and Duane Putnam, Topeka, is secretary-treasurer.

Other board members are Raymond Donham, Olathe; Andy Duffle, Pomona; Marlin Ehlers, McLouth; and Marvin Jones, Piper.

The group plans to have its first sale this fall in October. Several sale locations are being considered.

Lawrence is vice president, and Duane Putnam, Topeka, is secretary-treasurer.

Other board members are Raymond Donham, Olathe; Andy Duffle, Pomona; Marlin Ehlers, McLouth; and Marvin Jones, Piper.

The group plans to have its

first sale this fall in October. Several sale locations are being considered.

Twice As Much Wheat Under Loan

The Agriculture Department says that the cumulative total of wheat from the 1967 crop stored under government price support loans through January 31 was nearly double that of a year ago. Corn stored under loan was up two-thirds from last year's figures.

Orville L. Freeman, secretary of Agriculture, has been urging farmers to place more grain from last year's record large crop under loans to help bolster market prices.

Wheat from last year's crop placed under loan to January 31 totaled 238 million bushels compared with 122 million a year

earlier.

A total of 347 million bushels of corn were put under loan through January 31 compared with 193 million a year earlier.

The department also reported that 183 million bushels of soybeans from last year's crop had been stored under support loans through January 31 compared with 136 million a year earlier.

In the storage of wheat under loan, North Dakota led with 45 million bushels followed by Kansas with 43 million, Montana with 24 million, South Dakota and Washington with 23 million each and Nebraska with

18 million.

In the storage of corn under loans, Iowa led with 121 million bushels followed by Nebraska with 65 million, Minnesota with 54 million and Illinois with 40 million.

SALINA — Winners of conservation awards in the Saline County Soil Conservation District were Carl Ericson, Asaria; Robert Flory, Salina; Glea Kogler, Gypsum; Vernon Nelson, Falun; and Jorn Pierce, Salina.

LAND AUCTION

PARTITION SALE OF REAL ESTATE

Monday, March 18, 1968, 10:00 a.m.

In order to effect a division of the real estate hereinafter described, it has been partitioned through the District Court, and I will sell at public auction to the highest bidder for cash the following tracts:

TRACT ONE:

East Half of Southwest Quarter (E½ SW¼) of Section 31, Township 12 South, Range 3 East of 6th P.M., Dickinson County, Kansas.

APPRAISED AT \$ 9500.00

TRACT TWO:

West Half of Northwest Quarter (W½ NW¼) of Section 6, Township 13 South, Range 3 East of the 6th P.M., Dickinson County, Kansas.

APPRAISED AT \$10,000.00

TRACT ONE has 64A of crop land on which there is presently growing approximately 45A of wheat. One-third of wheat will go to purchaser at time of harvest in summer of 1968. Purchaser gets possession of all other ground at time of sale. Balance of land in hay meadow.

TRACT TWO has 69.4A of crop land on which there is presently growing approximately 45A of wheat. Same terms for wheat and possession as for Tract One.

Land lies 3 miles east and 1 mile north of Abilene on good gravel roads. Known as G. W. Wilsey farm.

This property will be sold for cash to the highest bidder in separate tracts. A modern abstract showing merchantable title will be furnished. Twenty-five per cent of cash payable day of sale and the balance when sale is confirmed by Court and title approved.

M. A. ANDERSON,
Sheriff of Dickinson County

LIVESTOCK COMMISSION COMPANY

St. Marys, Kansas

CERTIFIED

We sold 2330 cattle, 738 hogs last week. The hogs were up \$1.00. \$20.45 was the top. The cattle market looked steady on feeder steers, 800 lbs and up. Feeder heifers were steady, but the steers under 800 lbs. were steady to 50¢ lower. Steer and heifer calves were steady. We could have sold a lot more cattle as the demand was very good. If you have any to sell, contact us. Here are some sales made last week:
