Dear Sirs:--

I forward today, as directed by you, to the Manhattan Distillery of Peoria, Ills., permit for the withdrawal of one barrel of alcohol, set aside for us November 13th. The description is as follows: "Serial number, 1; warehouse stamp 103,001; wine gallons, 47.14; degree of proof, 137; proof gallons, 33.65; taxable gallons, 33.6." I forward to our Treasurer for payment a voucher for the \$3.57, which will be sent you as soon as our reg tape will accomplish it.

Yours truly,

Lov. J. Fawcett.

Hon. F. H. Coburn,

Secretary of State Board of Agriculture,

Topeka, Kansas.

Dear Friend:-

Yours of yesterday, including resolution of thanks by the State Board of Agriculture, is gratefully received. I am glad if I could make my audience perceive in any degree the picture which memory recalls of the fields, flocks, herds, and estates seen last summer. Had I not been crowded with work, and oppressed with a severe cold, I should have tried before this time to put into your hands the copy promised you. I hope to have it in the near future.

My expenses in attendance upon the meeting amount to exactly one day's hotel bills, \$2.00.

Yours very truly,

Geo. T. French

Dear Sir: The license you sent me to do work
on your grounds on January 11th, with authority to expend \$100 in
tree-planting experiments, and enclosing blank vouchers, is re-
ceived. I will return to you the vouchers signed as requested,
as soon as I can decide what officer of the college should be our
representative in receiving such payments. I believe that I was
myself authorized to sign the contract for undertaking the work,
and if so, I suppose I should sign the vouchers. I presume you
will find the vouchers enclosed with this.

Dear Sirs:—Accept my sincere thanks for a complimentary copy of Trace's Psychology of Childhood, received some weeks since. I have read the little book with great interest, and admire the scrupulous care with which the author has compiled the comparatively few records of the phenomena of child life. In general his conclusions are satisfactory as any conclusions founded upon somewhat limited experiment can be. I could wish that the author had dealt more extensively with the further development of thinking in childhood, and am thankful for what he has given.

Dear Sir:—Yours in regard to the well was received with little delay, but I have been so crowded with work and down sick with a cold that I fear I have neglected it. The vouchers for expenditures will be sent you with checks by the Treasurer, but I think that too. P. Evans should be more explicitly worried. If possible, some idea of the amount of time in days works should appear upon the voucher. \$95 is too large an item to be explained by the simple word "work." Will you also please put your name upon the documents as in the place of Superintendent. I agree with you that we ought to put the wall in operation, to see what we can do.

Dear Sir:—Kellermann's Botany of Kansas has been out of print for several years. I do not know where you can find a copy of it. Prof. Kellermann's Botany for Common Schools is published by Wright & Co., of Philadelphia, I think. The Kansas Manual was printed here, for use especially in Prof. Kellermann's classes, and since he moved to Ohio, in 1891, he has not thought it wise to print a new edition.

Dear Sirs:-

In answer to yours of December 14th, I may say that we have considered to some extent the organization of a reading circle, but partly on account of lack of suitable books, we have never completed the organization. I have seen one or two of the series you mention, and believe them to be admirably suited for popular information. Should we ever organize our reading circle, I should be glad to confer with you in regard to this series.

Dear Sir:-

Your enquiry in regard to our dairy plant, I cannot answer by published matter, as we have no extensive dairy. We teach to our second year class of young ladies the art of butter making, by one hour's daily practice during the spring term. For this, we have a very small equipment, in the shape of a Cooley Creamer, a small refrigerator, and the usual equipment for shallow setting of an ordinary domestic dairy. We have several times asked our Legislature for an appropriation, but have so far failed to secure it.

Editor of Soil Culture,

Dear Sir:

I have read, with much interest, copies of "Western Soil Culture," sent me by yourself. I can see that much good may be accomplished by your efforts, through your publication. As to our co-operation with you in experimental work, I hardly feel it right to encourage you. We may be willing to undertake experiments in your laboratory, and to furnish equipment or specimens in line of your suggestion, and at your request, but the experiments ought to be wholly within the control of the Station, and the results should be used according to our discretion. You will find us in hearty sympathy with whatever work you do, but you can easily understand how complications might arise by our undertaking to carry on experiments for you, or even to make observations upon your experiments.

Excuse my long delay in answering your letter, which is due partly to the crowding of work, after a three months absence, and more recently to the fact that I had mislaid your publication, and only discovered it within a few days past.

Dear Madam.—I am sorry that we cannot see through your eyes in regard to your son. There is no reason to believe that he has not been fairly dealt with in every relation. The simple fact is that he has undertaken to do more this year than he is capable of doing. All his teachers are united in this judgment. The fact that he is physically unable to study very hard is a reason which you yourself should take into account, in your judgment of what he should do this year. I have no doubt that he would pass fairly well in his mathematical studies if he did not try to carry too much at the same time. The college is not here for the purpose of graduating students, but to help them to master their studies. If you son cannot afford to spend the next year here, as he is likely to do to complete the course well, he may possibly come back at some future time. His genuine scholarship is much more important than his completing the course in any given period. In the course of my life I have taught many and made myself to ... Yours truly,

Enclosed is a copy of my letter to the Board of Education.

It is really hard to find a place where you would be willing to work for nothing. I told him, however, that he had never done anything, but just to write and send on the report and I would pay him until he was born the mark. I have no idea what it will cost him.

The Board of Education has agreed to pay him \$1000.

I think the Board of Education is doing what is best for the city. It is now time to make up their minds to do something, unless it is gone to the issue. They are certainly worth making.

Mr. Johnson writes also that it is a good idea to get the Board of Education to accept his services. He thinks good, and wait for the papers to submit to us. We have now written to all the papers.

Dear Sir:—The Concordia refunding bonds arrived yesterday, and I found them in every way as represented, and properly registered at the Auditor's office. They are numbered 3 to 34 inclusive; \$500 each, and I have drawn the warrant to the American Trust and Savings Bank, Chicago, for the face value, \$13,500. The warrant is dated January 20th. The letter accompanying the bonds made Mr. Murphy think that the Bank wanted us to furnish New York expenses. I sent back in the mail, my friend will such a thing, but that he should send on the warrant and I would hold the bonds until he heard from the bank. I have no doubt they will accept it. Will notify you if they do not. I enclose a letter from W. D. McKinley, concerning refunding bonds of Mound City, Linn county. These ought to be a good investment, unless there is some flaw in the issue. They are certainly worth looking into. Mr. Benebrake writes me also that he has some Oklahoma bonds which he thinks good, and has sent for the papers to submit to us. We have now uninvested a balance of \$11,242.75

Supt. E. Stanley,

Topeka, Kansas.

Dear Sir, referring her nothing whatever to do with institutions, last summer, I have no opinion whatever as to the advisability of revising the course. On general principles, I think the revision should not be made so often as to destroy all opportunity for familiarity with the outline. The shortness of the time makes it impossible to give reviews, and the best work is usually done where reviews are frequent. If there is a demand for revision, from those who have been at work in the course, my judgment will fail him, however, that he can never give a revision in accordance with the demand.

Yours truly,

J. C. Nichols

Let me add, Mr. Stanley, that I am inclined to believe that the majority of our countrymen ought to be more intelligent, unless it is something with this issue. They are certainly worth looking after. Dear Sir:- In answer to yours of 17th inst., I have to say that I can find no evidence of service upon the Board of Regents through any of its officers. Of course service was made upon our agent, Prof. G. H. Faileyer, and F. W. Dunn, and made upon premises under the control of the Board of Regents.

Possibly that ought to be construed into a service to the Board. At least the Board would be bound to protect its agents in carrying out the instructions of the Board, or in any consequences of attempting to carry out such instructions. The only papers I have seen are those which I sent to you. Regent Street has written me, but has said nothing about any papers, but seemed to have all his information from me.

Dear Sir:- We have been taking school bonds from districts in old Oklahoma east of the Rock Island Railroad, where the real estate is well posted up, and everything shows a stable condition. At present we do not like to take bonds from the small towns, where there is some uncertainty as to the future. We prefer country districts, with a good school population and economical provision for the actual necessities of the schools. We also require the opinion of some competent attorney of our selection upon the legitimate character of the bonds. At present we are agreeing upon Judge George S. Green, Fort road country bonds we have been paying ninety-five cents on the dollar. All papers and correspondence concerning particular bonds should be sent to our Loan Commissioner, Hon. C. E. Dear Friends--To you all I wish to say however briefly that we will do by your son as well as we are able, should he enter here with full purpose on his part to do His will as a student. We have no right to take one with the purpose of reforming him, unless he is thoroughly set in his own mind upon such reformation. As to the arrangement for defraying his expenses, I may be able to find some member of the faculty who is willing to bear the responsibility. My own fares are too great to make such an addition proper. I am unable to think at present of any place such as you desire for your son to board. We have a very large number of students here, and the best of boarding places are filled. It would not, of course, be kind or just to put him in a boarding place or with a room mate without asking known the circumstances under which he comes.

As to his coming at present, I have to say that he will hardly be able to enter classes already in progress. If he is over eighteen years of age, he can enter special classes in arithmetic, grammar, geography or U. S. history, and possibly would be far enough advanced to take up the work of classes now in progress. In any other classes it would be useless to make the attempt.

I am sorry to have to trouble you again about the number of copies of the Experiment Station Record needed by our

library, if necessary, you may reduce the number to one. We
have been finding it difficult to get rid of them, as we
have been putting the extra copies to good use, but can get
rid of them if you desire. If our books are too great to make such
a large collection, you may give me the number of copies you
will need.

Yours truly,

As you desire for your book to be sent to me at my home
address of 424 Madison Avenue, New York, I will enclose the sum
of \$1.00. It would not, of course, be wise or just to put a
book in a library or with a government without asking the
consent of the author or publisher.

As to the number of copies, I have to say that as will
apply to books to which others already in process. If it is
over fifteen years old, it can be put in a small class. In
such case, however, it may be better to let the author know the
fact and have him to take up the matter with his local library
or other officials as it may be wished to make the document

Dear Sir:—Our catalogue sent you to-day, gives full particulars as to our course of study, training in shop, farm, etc and necessary expenses. Besides the classes named in the catalogue, we have special classes for such as you, who have had little opportunity in school. You can begin arithmetic, grammar, geography and U. S. history here. The best time to begin would be next September; and you ought to save up before that time about \$50, to meet such expenses as you cannot meet with your earnings here. We cannot promise you a definite amount of work, but there are some students here earning the most of their expenses. If you are ready to come now, saving a little money meanwhile, you will probably find classes which you can enter. I speak of September, because you are sure to have beginning classes then. You will find here twenty-five or thirty young men who have suffered the same lack of opportunity that you have.

Prof. John A. Myers,

Morgantown, W. Va.,

My dear Sir.—I received some time since a statement from you as to a proposed bill for experiment in mechanical engineering at West Virginia College. As far as I can learn, the bill was introduced by Mr. Edwards, of the House of Delegates, but in the busy opening of our winter term, with 330 students, I have been unable to give the attention it deserved. I have not yet received a copy of the bill referred to in yours of January 21st. Yours truly, John A. Myers.

I suppose you have a knowledge of the bill proposed Senate Bill No. 735, covering similar ground, and supported by special committee of the Association of Agricultural Colleges and Experiment Stations, consisting of Atherton of Pennsylvania, Smart of Indiana, and White of Georgia. Past Assistant Engineer John T. Edwards, of the Navy Department, Washington, D. C., is apparently driving the matter, and the Navy Department generally is interested. At least, so we are told, in its favor.

As far as we are concerned in this college, we should prefer the Experiment Station untrammeled.

On the 11th inst. we will have a new report for you.

Yours truly,

Dear Sir: - I write you this morning, 1/25, at 10^o A.M., to request
you will kindly forward to Senator Lucien Baker,

Washington, D. C.,
the copy of my letter to you of December 28th, hoping that I shall have further information in regard to the Fort Hays bill and its general relation to the interests of the State. I have, however, been so busy with the opening of our winter term, with its large attendance of 650 students, as to prevent my making any extensive inquiries.

Of course it would require a considerable expenditure on the part of the State for maintenance of the institutions provided for. Heretofore the State Agricultural College has had almost nothing for current expenses. With an enrollment of 650 students this year, and prospect of annual increase, the \$50,000 received from national endowments, already insufficient for doing the work as well as it deserves, will need very considerable addition from state appropriations. I have no doubt that the location of a department at Fort Hays, where the more elementary part of the work of the first two years of the course of study could be provided for in moderate expense, would bring the advantages of the college to multitudes who are now beyond its reach.

Our Board of Regents meet on Tuesday, Feb. 4th, when I shall lay the matter before them for fuller consideration.

If you think it desirable, I can perhaps do something, to forward this measure by personal correspondence with friends of our institution in other States. I have a considerable acquaintance with men who might have influence upon the judgment of individual State representatives, if such influence is needed.

The opposition all is progressing favorably thus far, I hope. We will be compelled to make a stand before the 1st of March.

Yours very truly, Yours very truly, to the State of the 1st of March
the 1st inst. We have been invited to meet the

I wrote on the 15th asking if you could aid in farmers' institutes by furnishing transportation to Peabody, January 29th and 31st for Prof. D. E. Lantz and H. C. Mayo; and to Hutchinson, for February 6th and 7th, to Profs. E. A. Popenc and S. C. Mahon. Under such circumstances I shall be under great obligations if you can favor us as in past years, for myself see no interest now existing as did not

exist, but I suppose McMurtry was looking into the subject, with

Dear Sir:—I enclose the letters of Green & Strong, and in

am satisfied to do as you think best in regard to the bonds of Logan Co. Of course as these are 7% bonds, if they are thoroughly paid off, I will call your attention to them today, as I think they are, they are worth to us the full par value. Although they may possibly interfere with our buying other Oklahoma home bonds as cheap as we have been doing, we certainly cannot do better with any other bonds, and the exceptional quality of these really does make a distinction in their favor. I have no doubt we shall be obliged to pay a larger price soon for other Oklahoma bonds, under any circumstances.

It will still be under these conditions if you can furnish me in 1 or 2 years.

I do not myself see how interest can accrue on bonds not issued, but I suppose McGinley was looking into the future, with a possible prospect of delaying our purchase.

I will hold the Logan county bonds until I hear from you again. I think we have already paid par for some 7% bonds purchased by Mr. Stratford.

Secretary of State,

Dear Sir:--The enclosed request from Mrs. Hazelrigg I refer to you without special recommendation. I have read a good part of the book, with interest because it had to do with Kansas affairs. I cannot commend it as a complete history of Kansas, or as a work of art. It certainly contains information which is worth the compiling. It is not my place to ask that any book be added to the list for the reading circle.

Secretary of State,

Dear Sir:--The enclosed request from Mr. W. L. Lampert
of Topeka, Kansas, I send you with special recommendation. I have read a good

part of the book, with interest because it has to do with Kansas

affairs. It is a history of the city of Concordia, No. 8 to 34 inclusive, \$13,500, to be deposited in the

permanent fund of the State Agricultural College, with the usual

receipts. The July coupons, 1893, were detached at purchase, in

Dear Madam:--

A letter written you December 31st has just returned to me, on account of misdirection to 117 instead of 717. I enclose herewith a statement of your son's standing in the fall term. You will see at once that his work is quite uncertain, though his teachers feel that he can do good work when he gives full attention to it. He was obliged to review first term algebra this term, and I recently had a talk with him in regard to his work. I see no reason why he should not be successful, except that he is easily turned aside by pleasant associations. The following are the grades:

Algebra, 1/2, 43.
Analysis, 75.
Botany, 1/2, 91.
Free-hand drawing, 76.
Printing, 80.
Drill, 73.
Rhetoricals, 52.

Dear Sirs:--To yours of January 11th I have to say that we have no short course in dairying for young men at this College. We have several times asked the Legislature to establish a dairy school but have so far failed to secure sufficient interest. For many years we have been teaching the art of butter making to our second-year class of young ladies. That class will begin this year about the first of April, and will contain some thirty-eight young women, mostly daughters of farmers. If you wish to extend your offer to this dairy class, I shall be glad to furnish you their names when the class is organized.

Dear Sir:

I have several times had the pleasure of communicating with you
in my efforts to improve our inst. I really do not know what to
do but have no time to go into details.

Please find enclosed an
inclosed I want to have
sent some of the best men at work in botany, agricultural
managing, charmed keeping, & the College
of Agriculture. In the former, I will send
you the "Agricultural Society" of
1866. The report of the Director of the Agricultural section is
as follows:

In the Department of Agriculture, Washington, D. C., for
the year 1866, see also agricultural bulletins,
which may help you if you have access to them. I think there is
a little work published by the Agricultural Bureau of
Ontario, which might give you some suggestions. You can probably
secure it at my express office, Guelph, Ontario.

Dear Sir:—We will enclose check for \$5.00, for which please return. In answer to yours of 24th inst., I hardly know what to suggest. Reading up on the subject, "Science as it relates to Agriculture," is quite different from reading up science as it relates to agriculture. If you are planning the last, I should suggest some of the most prominent works in botany, agricultural chemistry, and animal physiology, with technical works on agriculture and horticulture. For the former, I hardly know what to name. The report of the Director of the Experiment Station Office, in the Department of Agriculture, Washington, D. C., for the year 1894, has some excellent suggestions, and there are addresses in the reports of the various State Boards of Agriculture which may help you if you have access to them. I think there is a little work published by the Agricultural College of Guelph, Ontario, which might give you some suggestions. You can probably secure that by addressing President Mills, Guelph, Ontario.

Yours truly,

Enclosures. The most recent report made to the Secretary of Agriculture, on agricultural and horticultural work in the State of Massachusetts, and the reports of the Director of the Experiment Station, 1/23, for 6 for the year 1894, has some excellent suggestions, and here are some extracts in the reports of the various State Board of Agriculture which you will find, if you have access to them. I think you will be little likely to find the Agricultural College of Ontario, Ontario, while Louisville, Kentucky, recommends. You can generally secure it by addressing President Miles, Guelph, Ontario.

Dear Sir:-

At my first I am not familiar with the names of the professors in your department, but if you can secure for your program either Prof. F. W. Hood or Mrs. M. S. Keizie, I am sure they will serve you well. Prof. Hood is at the head of our Mechanical Department, and also Professor of Mechanics and Engineering. He has been with us for a definite number of years since 1886. Mrs. Keizie is at the head of our Department of the uses of Domestic Economy, which will include Domestic Science, and Professor of Household Economy and Hygiene, and has been with us since 1882. Both are well educated, and thoroughly well informed. Mrs. Keizie is one of the easiest speakers upon the platform among the women of our State.

I have not spoken to them, thinking that you had better make your own selection and write them particulars.

I hope to be present at the next meeting of the Association, though I have almost lost connection. Circumstances for the past three years have prevented my attending.

 Dear Sirs: Your letter of yesterday received. In response
 must say that I do not feel that the authority granted by the Board
 December meeting, to borrow money for the November payroll expense
 to the payroll of next month; namely, the Board meet. on Tuesday,
 January 1st, at 7 P.M., and as the Board meet. on Tuesday,
 next, I cannot assume any emergency that would authorize a loan
 without definite authority. We have still several thousand dol-
 lars due on January interest, which will probably come in this
 month.

Dear Dr. Hinsfeld,

Dear Sirs--In answer to your inquiry I can say this is
return to Fred Ullee. He is a graduate of the College, has a
good student, that is, faithful in his lab. lessons. He has been
on Tuesday evenings for experiments before, and for a longer
three years with us as a teacher, receiving \$400 a year. He is
in more than likely to be successful in the rest of next
year, especially
familiar with all our experimental work; but has had no responsibility except for details. He is thoroughly faithful to every
detail, and can be trusted indefinitely to follow directions and
to appreciate their importance. I do not think he has an origin-
ative mind, which would invent ways of applying tests, but he has
a fairly logical view of those which can be depended upon. He
would be an excellent assistant in carrying out definite lines of
experiment. He has, however, had no training in the dry work.
We have had the such experiments for several years.

Very truly yours,
John C. Steward,
Michigan.

Nothing has come from Michigan as yet, and I scarcely
expect anything.
Dear Sirs--I am very sorry to learn that it will be con-
venient for you to be with us on Friday, February 1st. Is there any
later date, up to February 15th, when you can be with
us? If so, notify me at once, and we will make an arrangement
convenient. We do not want to tire you than our program.

Dear Sir:--At your request I write for Mr. Fred Hulse a general statement as to his abilities and training. Mr. Hulse is a graduate of this college, with fair scholarship, and an excellent record for faithfulness as a student. He has been with us three years as a teamster, at \$400 a year; and has had familiarity with our experimental work, being trusted especially to carry out details of experiments accurately. He has had no responsibility for devising experiments, and while generally clear headed and logical, I should not expect him to be quick in devising experiments, or to have a suggestive mind with reference to needed experiments.

I am very sure that you could not find a better man so far as accuracy and faithfulness with general intelligence are concerned. We are very glad to keep him here, in our own work, but cannot afford to promote him. He is worthy of a better place than we have for him at present.

Dear Sir:--I do not know that my judgment is authoritative as to the use of government funds, but I have no hesitation in giving it.

1. If your students are regularly assigned to out of door work, as a part of their course, I should have no hesitation in paying the salary of the foreman in charge from the government fund.

2. If the assistant in horticulture has the same relation to such outdoor instruction, the same principle will apply.

3. I do not think that any executive duties or clerical work, or any expenses of administration ought to be met from the funds set apart for certain special teaching.

4. I see no reason for hesitating to provide the necessary machinery for creamery, provided instruction in that line is the reason for making the expenditure. This fund ought not to be used for an experimental creamery. The same reasoning will apply to purchase of greenhouse stock, seeds, etc. bought as facilities for instruction in horticulture.

In the above I have taken for granted that you mean by government funds the annual appropriation under the act of Congress of August, 1890.

Dear Sir:--

The students' pay-roll for January amounts \$380 $\frac{1}{2}$. I shall draw a warrant on the State Auditor for the balance in the State Treasury as soon as Mr. Street arrives today. I think it will be enough to nearly cover the students' pay-roll, if not quite. I suppose that Mr. Hoffman will bring a report from you this afternoon, showing the balance on hand.

Dear Sir:--After Mr. Hoffman left, the Board of Regents passed a resolution authorizing the Treasurer and Secretary to provide for the college pay-rolls prior to April 1st, upon the best possible rates of interest, not to exceed ten per cent. I hope that you can make the arrangement with Mr. Hoffman for the January pay-rolls at once.

I shall send an order to the Auditor of State today for between six and seven hundred dollars, which will help you out with the students' pay-roll, and Mr. Graham's vouchers, and leave a little for bills that cannot wait. Please do not overlook our postmaster here as one whose bills are hot. He runs a newspaper.

If you are not then ready to show us the bonds and papers, they should be sent to Mr. Goodyear, at Oatville, Kansas, as he alone is authorized to issue warrants for bonds. If he is satisfied, he will then send them to me for approval, and with that approval the warrant will be issued. We will call upon you on Tuesday afternoon or Wednesday morning, if convenient. Topeka, Kansas.

Dear Sir:--Mr. Goodyear and I will be in Topeka Tuesday afternoon, by the Rock Island train, on purpose to look over anything in the way of investment that you may have to offer. I am sorry we could not make the deal on the Leroy township and city bonds, but with the information at hand that this little territory of nineteen square miles, with less than 900 population, and less than \$200,000 valuation, had an indebtedness of \$30,000, and further that the people are feeling severely the burden of taxation for the interest, we did not feel authorized to purchase the bonds, knowing that a large part of this valuation was in village property liable at any time to suffer depreciation. Of course there may be circumstances which would give us a different view but Hon. Harrison Kelley, of Burlington, a member of our Board, advised the utmost caution. Hoping to see you Tuesday, I am

Yours truly,

Geo. S. Greenfield.

Dear Sir:--Our catalogue was sent you some days since, but I add a word of information to what you find in it. We have no course in civil engineering, such as you undoubtedly think of, but our general course would be very beneficial for one who wants to fit himself for thorough work, as an engineer or mechanic of any kind. With your experience in running engines, we could probably make use of you to some extent in our power house, so that you could meet a part of your expenses, at least, while taking a course of study. I cannot, however, say that I should advise you, at your age, to undertake the course. I should think your best plan would be to find employment in some good establishment, where under a competent engineer you could work up to the full requirements for such a place.

Yours truly,

W. S. Fairchild.

Dear Sir:--Your proposition in regard to west half of north-west quarter of 20-14-1 the Board did not think it wise to accept. The land will never be worth less than now, and is likely to be worth more. There is no immediate reason for selling.

You wrote me that you could probably rent the land for the same price as last, \$40. We shall be glad to have you do so, and will compensate you for the trouble. Please write me when you find a renter, and in sending me the lease, with contract, please state what you consider a fair compensation for your work. The Board will be willing to pay you when the money is received from the rent.

Yours truly,

Geo. T. Fairchild.

Dear Sir:--Your request for garden seeds , together with another in the same handwriting, in behalf of Martha Conner I am obliged to answer by saying that we have no seeds for distribution, and none of any kind except such as are purchased for the use of the college in its regular work. I am sorry that I cannot meet your wants, but you may be able to secure some by addressing your representative in Congress, now at Washington,

Dear Sir:--I am authorized to give you a five-inch advertisement, and will send you copy on Monday, at furthest, too hurried this morning to suit myself in the statement.

Yours truly,

Dear Sir:--I enclose school district bond certificate of No. 30, Canadian County, asking you to have the County Superintendent correct the description of the district. You will notice that the north line runs from Section 34-13-6, to Section 31-13-6, which is impossible. The last 6 undoubtedly should be 5. Again, Section 19-12-6, should be 18-12-5, since the south line runs from the center of this section to Section 15-12-6. Please return the corrected certificate to me at as early a day as possible.

Dear Sir:--The Board of Regents have appointed you foreman of the farm, from the 1st of March next, at a salary of \$500 per annum, and house rent. You are at liberty to take possession of the house as soon as you find it convenient, and we shall expect you to be ready for duty on the first day of March.

Dear Sir:--I have your letters of yesterday and enclose herewith two copies of the resolution referred to. I hope you can make the arrangement proposed, and think that we can probably arrange for the February roll from the payments coming in, thought there will not be enough to pay the March rolls. Hoping to hear from you favorably, I remain

Yours truly,

2/11,

Hon. C. E. Hoffman,

Dear Sir:—The Board authorized you and me to provide for the pay-rolls prior to April 1st, with a resolution, copies of which I have sent to Mr. Black today. I wrote him the action of the Board, in accordance with his request, made just before the Board meeting, thinking that you perhaps have not yet returned from your journey. There is still some money coming in, and I hope we may be able to pay the February roll without borrowing. We are almost exactly, financially, where we were a year ago.

Yours truly,

Dear Sir:—Your telegram was received yesterday noon, as I was starting for the train. I stopped until the later train on the Rock Island, and found Mr. McGinley, but did not have time to see the bonds. If the papers are all right when received today, I will run down again to Topeka, examine the bonds, and if satisfied, make the trade on the spot, and deposit them in the State Treasury.

While waiting for Mr. McGinley, I called again on Mr. Speer, and by using the telephone he succeeded in arranging for taking the Leroy township bonds. I therefore filled out warrant No. 373, for \$3,500, dated February 12th, 1896, payable to H. C. Speer. Kind of bonds, Township of Leroy, Nos. 17, 19, 20, 21, 22, 23, 24. Face, \$3,500. These bonds are dated July 1st, 1880, are due July 1st, 1910, and are marked approved February 12th, 1896.

I have also made out a voucher for H. C. Speer for interest on Leroy bonds, forty-two, six %, \$24.50. Expenses in purchase, \$17.30. Total, \$42.00. This last item is pro rata upon the \$50 which we agreed to give for \$10,000 worth of bonds. I have these bonds here, to be entered on our books, and will deposit them after deciding upon the Monna City bonds.

Dear Sir:--Yours of 12th inst. is received. It seems to me that the papers and bond of District 21, Kingfisher county, are satisfactory in every way, except that the description of the district does not name the township and range. These are given in the notice of election as 19 and 5. I think we should have the description completed by the County Superintendent.

The papers from Mound City seem right, except that they do not name the limits of time within which the election was to be held, and I can find no statement of the statute under which the refunding is made. The memorandum says general law, which I suppose means the law of 1879. The first omission cuts very little figure in connection with the fact that there is practically no opposition to the bonds. I see that this issue makes the indebtedness of the city just about ten per cent of the valuation. But this, if legal, is not very heavy. If you think best to send me a warrant for the bonds, I will go to Topeka and make a critical examination, as I suggested yesterday. I think they are good.

Yours truly,

Dear Sir:--Yours of yesterday at hand. The Abilene bonds you refer to we should hardly care to pay a premium for, since they mature in 1898. The Rocks county bonds we cannot afford to pay so large a price for. Indeed we do not care for them unless we can realize in the neighborhood of 6 %. If you can furnish them at a very slight advance upon par, we may be glad to purchase. Any information should be sent to our Loan Commissioners, Hon. C. E. Goodyear, Oatville, Kansas.

In crediting up receipts for
coupons we find no record of payment
of coupons due July 1st 1895, for List

payment for January 1895. We have
gone over our triplicates in vain for
evidence that we had failed to give
credit, and conclude that these pay-
ments must have gone astray. Will
you kindly look into the matter?

Hon. W. D. Street,
Oberlin, Kansas.

Dear Sir:—I have yours of Feb. 12th, I shall not forget it when the case of Mr. Wolfe comes before the State Board of Education. The only objection that I can see likely to arise is from the disposition of the Board to select all instructors from among those who are actually teaching. We have ruled out all former teachers turned lawyers, physicians, ministers, etc.

Mr. McKeen has given out so that the rumor is circulated among the students that he had preferred charges against Prof. Georgeson, some of which were sustained, and some not. I therefore told Prof. Georgeson the facts in the case. You will doubtless have a letter from him. I hope to see Mr. McKeen today, and have a serious talk with him, for he certainly is doing himself wrong as well as others. All the effort to sustain him

I have received a summons to the Board of Regents to appear in court at Carden City, on March 9th. I shall send it to Regent Daugh ters, and hope that he will make the proper answer.

Dear Sir:--The Sheriff of this county served upon me yesterday the enclosed summons, or rather, a summons of which this is a copy. Of course I accepted service as Secretary of the Board of Regents. Will you please take such steps as you think necessary to protect the Board, or advise me what steps shall be taken.

It is proper to tell you that upon finding reports current among the students, coming from Mr. McKeen that he had preferred charges against Prof. Georgeson, some of which were sustained, I told Prof. Georgeson the facts in the case. He has probably written you about it. I shall have a talk with Mr. McKeen today, I think, with the effort to show him how he injures himself and others by such talk.

I should like to present to you, as soon as I can get the opportunity to put it in shape, a tabulated statement of the work done by each officer of the college, and by all employees. You may be able to suggest places for improvement, at any rate you will understand the general work of the institution better for such a full statement. I had a talk with the Governor day before yesterday, but he was entirely reticent as to Regents. I urged

Mr. Thomson informs me that he does not feel that he could take
as full a course as would be needed to learn what he wants in our
course. He asks my advice in finding some good establishment
where he could work as fireman. I do not think I can help him in
that respect. Of course if he comes here we shall do our best
to satisfy him, but it will be very difficult for him, at his age,
to settle down to actual study.

I should have sought you out, when attending the Farmers

my address, so that I had but few hours in your city. I did

Dear Sir:--Our Board of Regents have had a consultation over the Fort Hays Reservation bill, and are unanimous in requesting that if possible the bill should be so amended as to make any surplus lands in the reservation not needed for the branch institutions contemplated, available to the State for construction of these institutions. They think that the maintenance of a public park is likely to interfere with the necessary appropriations for the maintenance of these branch institutions; and certainly the funds of the State Agricultural College and State Normal School cannot possibly provide for these extensions. I shall be glad to hear from you as to the possibility of such an amendment as shall give the State authority to use all lands for the benefit of the institutions proposed.

Dear Friend:-

I shall be glad to do anything I can for you in the way of encouraging your ambition to work for an agricultural college. You know that the conditions in all the agricultural colleges now require some experience in lines of investigation of experiments. Your experience in executive matters ought to be a great advantage to you, but you will have to come into competition with graduates who have spent two or three years as students and assistants in experiment stations. This makes the task of securing a place as instructor in agriculture a special one. You will remember that W. H. Olin spent several summers upon our farm and experiment station, and has taken the second degree for proficiency. I have several times recommended him for such a place as you desire, but others of more extensive experience in agricultural experiment have outranked him. Your experience in the management of an institution would count more than his management of public schools. But I fear the question would turn upon your special study. I will let you know should any application come for such instruction.

Dear Sir:--I was at Topeka yesterday, and made some effort to find you, but did not meet anybody who knew your office. It was too late for any extensive enquiry. Mr. Goodyear wrote me that he had asked me to send the bonds to Manhattan for examination and therefore I expected to hear from you this morning. Your telegram is just received. We would like the bonds, but think the price large. We are hampered in paying a premium by the fact that the law compels us to receive payment before the bonds are due. It would be possible for the county to refund these bonds, under the law, by securing a loan at a less rate of interest, and clearing us out of the premium entirely. See if you can't get us a better offer than five per cent premium. Please write me also where I can see you, if I should be in Topeka within a day or two.

Hon. C. E. Goodyear,

Gatville, Kansas.

Dear Sir:-- I went to Topeka yesterday, to examine the Mound City bonds, and found that they were issued under the refunding law of 1891, according to the face of the bond. But the law of 1891 provides only for refunding bonded indebtedness, by city councils, school boards, etc. Mound City was really funding a variety of debts, and had held an election in accordance with the requirements of Section 960 of the General Statutes of 1889. Their bonds were therefore illegal, upon the face. But they have full authority for issuing legal bonds, if they cite the proper law in the face of the bonds. They will have new bonds printed and registered, cancelling the illegal ones with a statement of the mistake made, and I told them that we would take care of them when they got them into the right shape and had the indebtedness ready for cancellation.

I did not find Mr. J. B. Chapman, but have a telegram from him today, asking a decision upon the Rooks county bonds. I wrote him that we would like the bonds, if good, but could not afford to pay so large a premium upon the uncertainty as to when they would seek to refund at a lower rate of interest, and cheat us out of our premium. I learned yesterday that he had spoken as if he might take less. I feel that the risk in such a case is con-
