#### Pauline Cowger Esther Eckblad Visit Kansas City

Employees of Farmers Union Job-Employees of Farmers Union Jobbing Association, Kansas City, were happy to have as their guests last Wednesday, the State Secretary and the State Junior Leader of the Kansas Farmers Union, Pauline Cowger of Salina, and Esther Eckblad of Leonardville.

After meeting each of the employees, they visited the trading floor, the protein laboratories and the inspection rooms in the Board of Trade Building, and then were taken to

Building, and then were taken to lunch at the Business and Profession-al Women's Club by the girls in the

During the afternoon, Mr. H. E. Witham, who is general manager of the company, took them to visit the Warehouse in Kansas City, Kansas, and then to call at the office of the

Farmers Union Live Stock Co.

Miss Eckblad made a very interesting talk at a meeting of employees in the late afternoon. She presented her work with the Juniors, and her hopes for the future of the Kansas Farmers Union Junior work very clearly and charmingly. Miss Cowger also talked to the group for a few minutes about her work with the Kansas Farmers Union. T. B. Dunn, manager of the Farmers Union Auditing Association, who was in the office on that day, commented on the need for more extensive Junior work n Kansas, as did Mr. Witham; T. C. Belden, manager of the Merchandise department of the Jobbing Association; Roy C. Crawford, floor salcoman; and Fred O. Stults, office

committees of a county constitute the board of directors of the county the board of directors of the county agricultural conservation association. This board chooses from its own members a county committee. All farmers actively taking part in the Agricultural Conservation \*Program, or who take steps to participate in next year's program are automatically members of their county association.

AAA officials here said that the farmers of each community, as they elect their committeemen for 1938, will study the objectives of the 1938 program. That program provides definite national goals for soil conservation work next year, including the acreage of soil-depleting crops consistent with good land use and bal-

# **Monopolies Blamed for High Meat**

HOUSEWIVES TOLD MEAT SUPPLY SHORT; FARM-ERS TOLD SUPPLY IS TOO GREAT

Farm Research is an independent research bureau operating a non-profit basis. It makes special studies on agricultural problems for farm or-ganizations, farm publicaions and ohers. Facts for Farmers, its monthly bulletin, presents factual material and analyzes the current issues affecting farmers.

MONOPOLIES, NOT FARMERS TO BLAME FOR HIGH MEAT

While admitting that retail meat prices are 40 percent highe for many cuts of meat than last year, Farm Research, publishers of Facts for Farmers, deny the much-pub-licized charge in the cities that farmars "are responsible for these exosbitant prices or have been the beneficiaries of them." Farm Research points out that, while housewives, resisting the high meat prices, are now being told that prices are high because supply is short, the farmers, unable to feed their stock owing to drouth and forced to sell their animals for anything they could get, were told that press were low because supply was too great

were told that press were low because supply was too great.

The large companies piled up huge inventories during the period of drouth liquidation and are now reaping the dividends," says Farm Research. It quotes from the Wall Street Journal which recently predicted that the net profits of the meat packers would top 1929 earnings and stated, "Armour & Co. appears justified in ambitions to shoot for a 1937 net profit half as much again or more than that turned in last fiscal year."

shown by the exhaustive study costing \$150,000 which the Federal Trade A School for Farmers Union Life Commission made but which the underwriters is to be held in connection with this year's State Farm- pressure was put on it by the corterfere in any way with the regular the final consumer for pork as com-Agriculture.

Tom White, president of the Farmers Union Life Company, and E. E. Trade Commission found that the Kinsinger, Secretary and Actuary, farmers are also receiving only 40 will be present to help conduct the cents on the dollar as compared with

concentrated of all industries dealing with food products. It found that three meat packers market 84 service to policyholders, and know per cent of all veal carcasses and which one of the nineteen different cuts sold in the United States, 56 per cent of all veal carcasses and per cent of all beef carcasses and cuts, 36 per cent of all cured and processed pork products, 23 per cent of all hides, 25 per cent of all pork car-casses and cuts, and 56 per cent of all hides.

In the meat packing industry, Swift and Armour are by far the two largest concerns, with the third election of comunity Agricultural ranking firm varying according to

to discussion of current farm pro-blems and discussion of objectives of th 1938 program.

In explaining the methods by which the large meat packers at-tained monopoly control, the Fedof th. 1938 program.

East Central Region States are Delaware, Maryland, Virginia, North in some cases the packers bought Carolina, West Virginia, Kentucky, and Tenessee.

Farmer committees which administer the program locally already portance has been their control of Farmer committees which administer the program locally already are in existence throughout the country. The local elections in November will determine the member-ember will determine the mem ance of pools, agreements and com-binations for the purpose of stifling competition and influencing legislation. Among other factors may be mentioned the extortion of railroad rebates, price cutting for the purpose of crushing independent operators, wiring ahead, shortweighting, and similar illegal practices."

Between the years 1914 and 1935, the total capitalization of the large packers has increased 242 per cent. Neither depression nor drouth, to say nothing of anti-trust laws, have stopped their march toward monoply. The FTC found that throughout the depression the ten largest packers averaged net profits amounting to 7:24 per cent on their investment.

SWEET POTATO

Which kind of sweet potato do will have the franking privilege so that if county committees so desire they can elect one of their own members as secretary and still send all official letters through the mails moist-fleshed variety have a choice free.

Which kind of sweet potato do you prefer, one that is dry or one that is juicy? If a dry, mealy flesh is preferred, ask for the Little Stem Jersey variety. Those who wish a moist-fleshed variety have a choice free.

SALINA, KANSAS, THURSDAY, OCTOBER 21, 1937

This week, Friday and Saturday, I will be in Topeka attending the Senate Subcommittee hearings on Farm Legislation. As far as I know, at this time, there will be about six or eight members of the Farmers Union, 17 members of the Farm Bureau and probably that many from the Grange who will want to be heard, besides many unattached or so-called independent farmers. The trouble with us farmers is that too often we think or pretend to think that we are independent when as a matter of fact we are being led, coerced, or cajoled into asserting our independence by fighting with our fellow farmers, over unimportant technicalities, by the very interests we should be fighting, instead of each other. I hope we will be able to give the Senate committee a true picture of the needs of Agriculture, one that will be of real help to them, when they work on the farm bills this winter. It is too bad that we cannot all agree on just the sort of a bill that we need, but after all we are all human and no two human beings look exactly alike and much less think exactly alike. If we can fluence of public sentiment and legisagree on the main principles I will be satisfied.

Next week is convention week. I would like to see as many as possible of our old members who have been in the Union for 25 years or longer in the convention hall for the afternoon session on Wednesday, October 27th. ty within the bounds of his own hold-We have secured nice medals which we are going to present to the old ings can be attained only by making members at that time as a mark of honor and appreciation for their long faithful service in the interest of Kansas Farmers and of Humanity. All members who have joined the Union in 1912 or before that time are eligible for membership in the Farmers Union Veterans Legion.

FARMERS COOPERA-

(From K. S. C. Industrialist.) Avis D. Carlson in Survey Graphic Anyone who has had contact with Community hospital (the Farmers Union Cooperative Hospital at Elk City, Okla.) is always asked two questions: what advantages and disadvantages does the plan have on its

cerned the first question is easily physician, even in a day of telephones answered. One of the charges and hard surfaced roads. And since brought against Doctor Shadid for most western farmers have the habit kicking horse and mule seem the unethical practice is "fleecing the of going to town on Saturday, it be- most dangerous of our farm ani-It is hard to see how anything but pure malice could prompt the charge. The members have, for the first time in their lives, a wellrounded medical service at a price outer they can afford to pay. It is, to be sure, not quite complete, for there are some operations with very delicate technique which cannot be done at the hospital and for which the plan offers no provision. But after all, such cases are rather rare, and the coverage provided by the association is so far superior to the medical service the members had formerbeen able to afford or could possibly get as individuals that it is nonsense to talk about fraud. When s family of five, or 15 for that matter, gets what these families are getting for \$24, it is certainly not being fleeced. Neither can a family of two complain about \$18 dues or a single person about \$12.

As for the original \$50, that represents an actual interest in a physical property and can be sold just as any property can be. If the membership becomes limited, this interest

wouldn't take \$1,000 for my share if TIVE HOSPITAL I couldn't buy another. It is worth that not to have to worry for fear or an expensive operation."

they are scattered over such a wide own scene, and how much signifi- miles of Elk City, but numbers of should carefully study the situation cance does it have for society at them are much farther out. After and mutually undertake to devise all it is inconvenient and occasionally methods for improvement. So far as the members are con- dangerous to be so far from one's comes such a heavy day at the hospital that the wait is often tedious, though perhaps no worse than many The hospital service would undoubtedly be more convenient if the members lived closer. But Community hospital belongs to Plains farmers and they simply do not live close to-To meet this difficulty, the gether. To meet this difficulty, the toard of directors recently installed a second service plan whereby the distant family which cannot conveniently or economically come for ordinary office calls is for \$12 a year entitled to hospitalization at the usual rates in case of any serious ill-

#### WHEAT SMUT

Cool nights are lowering the tem peratures of the soil, which will make ideal conditions for smut spores on the seed to sprout and grow into the young wheat seedlings. If there is any smut in the seed, treat it with copper carbonate or New Improved will be even more valuable than it is Ceresan. The dust kills the spores today. One member told me, "I on the seed.

On October 15, T. E. Hall took charge of the newly created Member-ship Department of Farmers Union Jobbing Association. Mr. Hall was County Agent in Seward County for three years, stationed at Liberal, and following that was at the Kansas State College at Manhattan where he took his Master Degree in Cooperative Organization and Marketing. During the past year and a half Mr. Hall has been doing extension marketing work with the College, running surveys and analyses, and studying management and membership problems among cooperative elevators. This training, plus the fact Mr. Hall was born and reared on a farm in Northeast Kansas, qualifies him to know the problems of cooperative

his qualifications for heading up this new Membership Department of were not included. Approximately new Membership Department of Farmers Union Jobbing Association which is to assist Kansas Farmers Union Cooperative Associations with their local membership problems. And it is readily agreed by most cooperative leaders that membership elations is one of the major prob-

ems of cooperative organizations. It must be remembered that such service department, no matter who might be put in charge of it, cannot btain results unless the local associations use it, so it is up to the locals to make a success of this new service lepartment.

NATIONAL SAFETY COUNCIL

Kansas City, Oct. 21.—Maybe modern machinery lightened the labor of those who till the earth, but it certainly added hazards that claim more lives and the company and the co lives each year, delegates to the new is slow growing under dry conditions, agricultural section of the National but makes a good tree when given Kansas Board of Agriculture.

Mohler, basing his statements on re- as and New Mexico. The Chinese elm, rate of .144 and a permanent disability rate of .271 per 1,000 of farm population last year.

Comparing his figures with those of the National Safety Council, the speaker said approximately the same proportions of accidents occur throughout the farm regions of the

"Machinery and livestock are the outstanding causes of agricultural accidents," declared Mr. Mohler, "the mately 60 per cent of all mishaps on the farm. Machinery is first by a pers for the purchase of family siztwo together accounting for approxiwide margin-more than 38 per cent of the total-and livestock is next with 26½ per cent. Falls are listed third with close to 15 per cent, and the simple chore of getting in the in each state and territory. Direct in each state and territory. winter's wood claims 7 per cent. Miscellaneous make up the remaining 13½ per cent.

"Converting these percentages to numbers on the basis of the latest data, it would appear that the total of farm accidents in the United States amounts to 109,000 annually, of which 4,580 result in death.

"If permanent cripples and lost are relatively higher in agriculture than in the other industries, as there is every reason to believe, then the farm accident problem is one of the most acute facing this country, and undeniably it is one of the most difficult to solve. 'The same human element is there

as elsewhere but, lacking is the inlative enforcement, and absent is the penalizing force of rules that govern safety practices in other industries. "With the farmer it is purely an individual problem, and greater safe-

him more accident-conscious. "That there is ample room for improvement in the rural situation is indicated by the consensus of surviving victims themselves that a majority of farm accidents can be avoided, because they are due to the principal cause of mishaps everywherecarelessness.

"In our survey in Kansas, a number of bitter complaints were ensome of us will have a long sick spell countered regarding lack of adequate safeguards on machinery. Fault was The only real disadvantage to the gears, chains and belts, lack of safemembers comes from the fact that ty clutches and disregard of the comfort of operators.

"In a serious matter such as this, area. Most of them live within 25 neither side should pass the buck, but

"But farm hazards other than machinery amount to 62 per cent of all. These must be reckoned with. The mals; falls on the farm are most frequent from loaded wagons; gasoline is the most potent explosive a city patient has to endure in the handled on the farm; sodium chlorate office of a popular physician. used as a spray to kill noxious weeds, when allowed to dry on clothes and materials, is highly flammable, and there are countless other things that must be guarded against to reduce

mishaps to the minimum "One of the most shocking and tragic revelations of the Kansas survey has been the accident mortality of farm children, which is charged almost wholly to carelessness, superinduced by the over-indulgence of

parents.
"What is needed is to get the facts about accidents into the hands and neads and hearts of every farm fam- and size. Western lambs are also ly—an educational campaign that will reach every home. The question which are infested with stomach is, how can the individual best be worms will not make good gains in educated and made accident-conscious the feed lot, and losses are likely to and what are the most effective means of accomplishing ways and

perfect the best possible safety or- lambs ganizations, for the tremendous annual toll of life, suffering, disability and economic loss taken by farm ac-

DROUGHT RESISTANT TREES ARE COUNTED IN DRY AREA

Liberal, Kan.,-Red cedar, Chinese elm, and Osage orange, known in some sections as the bois d'arc, are the trees best suited to the sem-arid conditions of southwest Kansas, a survey recently completed by M. T. Bunger, Jr., forester for the Soil Conservation Service project at Guy-mon, Okdahoma, reveals.

In making the survey, a count was made of tree platings of all common species, many of which are more than 30 years old, in southwest Kansas, the Panhandle of Oklahoma and Texas, and southeast Colorado.

Trees were counted only where it to know the problems of cooperative was definitely determined that they organizations and also to know this had been well established and had from the farmers' point of view.

Mr. Hall has a pleasing personality and has ability to cooperate and work with people. This also adds to on high flats. Low creek sites where on high flats. Low creek sites where 6,500 trees were counted including about the same number of each species.

The approximate percentage of survival, or those alive in 1937, was found to be as follows: Black locust, 67 percent; Osage orange, 85; red cedar, 93; Chinese elm (nine years old), 87; ash, 5; Mulberry, 42; thorny locust, 48; black walnut, 18; and

seedling apricot, 7.

This survey, Bunger points out, shows that the black walnut, seedling apricot and ash have not been able to withsand the drought. Mulberry and thorny locust have survived fairly well, although the first has suffered seriously from winterkilling, and the latter from the ravages of the tree borer. This leaves

PROGRAM---THIRTY SECOND ANNUAL CONVENTION Continued from page one)

Friday, October 29, 1937.

8:00 am Polls op-n for voting. 9:00 am Music—Osborne County Farmers Union Orchestra. 9:15 am Convention called to order by President John Vesecky. Invocation-Rev. Father Reidy, Catholic Church. Ladies Auxiliary-Mrs. M. L. Beckman. Farmers Union Cooperative Creamery—N. A. Ormsby, Manager. Farmers Union Mutual Insurance Co.—G. W. Bushby, President. Farmers Union Life Insurance Co.—Rex Lear, State Manager. Reports of Committees. Music-Vocal Solo-Donald Rixon. Final Report of Credentials Committee.

Report of Elections Committee. Installation of Officers. Junior Program. Introductions by State President John Vesecky.

Greetings-Esther Ekblad, State Leader. Junior Creed. Cornet Solo—James Small. Playlet-Stafford County.

Song-Men Of The Soil. What Locals and Counties are doing in Junior Work—Presenting Junior Leaders. Discussion of Junior Plans for 1938. Final Adjournment.

HOTEL RATES

The Leon Hotel is designated as the Headquarters Hotel. There are, in addition to the hotels listed below, several hotels nearby where comfortable accommodations may be had at reasonable rates. Registration will be at Convention hall, and a list of available rooms will be with the clerk there. We have been assured there will be plenty of rooms for all delegates and visitors, at reasonable prices.

Leon Hotel—Single \$2.00 and \$2.50; Double \$3.00 and \$4.00. Reno Hotel—Single \$1.00 and \$2.25; Double \$1.50 to \$3.25. Chalmers Hotel—Single \$1.25 and \$2.00; Double \$2.00 and \$2.50. Bisonte Hotel—Single \$1.50 and \$3.50; Double \$2.50 and \$5.50. Stamey Hotel-Double \$3.00 and \$5.00.

FARMING AND YOU.

...The social side of farming too often is left out of suggestions for improving agriculture. It is appropriate that the National Rural Forum being held in Manhattan this week under the sponsorship of the American Country Life Association should emphasize the fact that the super-fast driving gets him to his farm is more than a factory for food destination sooner.

and fiber. for a family.

So it is only natural hat the far-So it is only natural that tre farmer's first interest srould be to pro-vide a better home and more conveniences for that family if possible. kes a trip in a length of time that His interest in improved-production required him to risk a hundred livpractices, in new crops, in new methods of insect control is due to that he saved over a normal, safe passage, desire. His interest in home-talent boasting about it. None of us can af plays, in mothers' vacation camps, in radio, is due to the same desire to make farm life more satisfying.

In our pride at producing bumper rops, we may have temporarily overlooked this social side of farming. It is time that we gave it the same attention that we have given to the development of new machinery and new crops. We can build a rich rural culture, if we set ourselves to the task, There is no better time to begin that the present,

-By H. Umberger, Director Kansas State College Extension Service.

CONSUMERS COOPERATIVE MOVEMENT

A social interpretation and a fac tual survey by Harry W. Laidler and Wallace J. Campbell. 60 pages. 15c May be ordered from The Cooperative League, 167 West 12th Street, New York City.

It is refreshing indeed to read this pamphlet, which steers a middle and, I am convinced, a truthful course between the belittling criticism of consumers' cooperation indulged in by some socialists and other radical critics, and the over-optimistic and, it seems to me, unrealistic advocates of cooperatives who in their turn have discounted or ignored the necessary part which must be played by labor-farmer political parties and organized labor in bringing about a true cooperative commonwealth. The pamphlet cannot be too highly commended for Dr. Laidler's keen insight into the values as well as the limitations of cooperatives, and for Mr. Campbell's masterly and impressive presentations of the presentday facts about consumers' coopera-

Altogether, one of the very best of the fine array of literature which has been published in recent years on this subject. James Myers, Industrial Secretary. Federal Council of Churches.

SWEDISH CONSUMERS IN COOPERATION By Anders Hedberg, Cooperative Union of Sweden, beautifully illus-

Here is a booklet on the Swedish cooperatives which takes an important step beyond the description of the growth of the modern co-ops which have made Sweden a haven for socially minded tourists.

Mr. Hedberg, from his years of experience in the organization department of the great Kooperativa Forbundet, has drawn together important material on organizational me-thods, administrative policies and the fine points of the operation of a cooperative wihch distinguishes it from private business and which in many instances set the Swedish co-ops apart from heir less attractive or less effeicient brothers. The strategy and policy followed by K. F.'s trust busting campaigns are described by the man who helped create those campaigns, and who is now completing a lecture tour of the U. S.

THE PRICE OF SPEED

As everyone knows, speed is the great highway killer. The motorist who drives at an excessive rate endangers not only his own life, but those of everyone else on the public

The truth is, the minutes we save A home in the country is a romantic dream for some city people, a fond memory for others. But to the farmers who live in such homes, they are the reason for agriculture. The consoler setting the reason for agriculture. The truth is, the light of the risk involved. A short time ago a test was made in Chicago. A radio announcer was told to drive his car on an eight-mile ceaseless activity througout the seasons, the plowing and planting and cultivating and harvesting, those grueling jobs are not done simply because they are picturesque. They lowed the same route under instructions of the same route under instructions of the same route under instructions of the same route under instructions. are not done simply because city tions to take every risk and reach grocers' shelves must be filled with the destination in the shortest possfood. They are done because the lible time. Twenty-three minutes lacrops produced provide a home and the comforts and necessities of life the stopping point. The conforts are done because the lible time. Twenty-three minutes later the reckless driver pulled in at the next meeting, which will be held. ly slow driver pulled in at thea 50sdo ly slow driver, who had taken no risks at all, got there exactly two

minutes later. We have all met motorist who ma-

ford the "price of speed." "Save ten minutes-take a life." That should be the motto of the driver who "opens her up" on every possible occasion. Speed and speed alone is the dominating factor in the great bulk of the nation's serious traffic acidents. Look at it from your own point of view and from a purey selfish standpoint—is it worh it?

FISHY TURKEY

Mr. Turkey Producer, how would you feel if, after you had purchased, prepared, and roasted a turkey, and around the table to witness the carving act, you should suddenly discover that the festive bird was so thoroughly possessed of a fishy odor and flavor that it could not be served? Scores of consumers were humiliated last fall and winter because of this very condition. It is reported that one chain of stores in the East received 116 complaints from such turkeys, which originated in many different states. To prevent a reoccurence of this kind, remove all fish products from the turkey ration 8 weeks before they are to be sold for market purposes.

FARMERS UNION

The Farmers Union Zephyr local No. 1622, of Conway Springs, met at the Beacon Light School House Mon-

day evening, Oct. 4. Leo Halsey was elected delegate, John Sneed alternate to the State Convention to be held at Hutchinson, October 27, 28, and 29.

The Ladies Auxiliary had charge of the meeting, and put on a very interesting and clever program.
P. F. Wycoff and Sherman Guffy

Refreshments were served to 40 members.

Ladies Auxiliary The Ladies Auxiliary met at the ome of Mrs. Leo Halsey, Monday afternoon, Oct. 4. Roll call was answered by an "Autumn" verse. Four new members, Mesdames Cap. vin, and Sherman Guffy were added the membership. Dainty refreshments were served during social hour.

PARAGRAPHS BY J. D. SHEPHERD

Society, organized into governments can not very well starve and make poor, its great majority of dirt farmers—without starving and making destitute it's vast numbers in trades. commerce, and industries.

Even as a farmer can not skimpfeed his own milk cows; and, skimpfeed his work horses and mules as an economic policy and prosper. the cities and towns can not starve the great body of dirt farmers, by underpaying them for farm products without also starving the vast popuations in cities and towns.

Therefore, from the foregoing facts agriculture is vested with a public interest and necessity. It never was a local, or state affair; but is of vital concern to he millions in our nation, who have to eat and be cloth-

Therefore farmers should work, all pulling together for an equality profit and prices, with those prices and profits taken by all other industries.

Economic works this way, just as sure as 2 plus 2 equals four.

Le Smith stand for us dirt farmers; and Jones, stand for all other industries. Well if Jones skins Smith with higher prices and bigger profits on his products than he allows Smith for farmer's products; then, Jones has not been fair and honest in his dealings with Smith.

If somebody cheats you out of a hundred dollars, then, to even things up, you have got to cheat that same somebody out of a hundred dollars to be on an equality, or party with that somebody

All that dirt farmers can honestly ask, and justly demand is parity prices and profits on farmers products with industry; so that farmers can buy their needed farm implements and other necessities, with the money they get out of their farm products, equal to those charged by industry in prices and profits.

GAMBLING WITH YOUR FUTURE???

## Letter From Esther Ekblad

Dear Juniors:

Wednesday, October 15, was for me a very pleasant day, spent in Kansas City with the Farmers Union folks there, or should I say, the folks who are there working for us. On arriving in Kansas City I went to the offices of the Farmers Union Jobbing Association which are in the Board of Trade Building. There I was greeted by Mr. Witham who is secretary and manager of the Jobbing Ass'n and Miss Cowger who had also come down to spend the day.

also come down to spend the day. South Dakota state convention, where I present the Lundy plans for next year and speak at the banquet. Frances will attend this convention, also, Mr. Witham took me around and introduced me to the members of the office force, who were all so very

office force, who were all so very nice about laying aside their work—being done for us—to explain to me their various duties.

Before noon we looked in on the "Grain Pit," and the laboratories where samples of every carload of grain is tested and graded. One of the inspectors tested a sample of wheat while we were there and explained each step in the process.

plained each step in the process.

In the afternoon we visited the F.
U. Livestock Commission firm and the Jobbing Assn. warehouse. What is the difference between the F. U. Livestock Commission firm and any ether Commission firm? The secret lies in the fact that it is a cooperation that the fact that it is a cooperation. lies in the fact that it is a cooperative which the farmers themselves own through their membership, which is in the form of stock. It is not a private firm that has as its primary concern the making of a profit, but a cooperative which first aim is service to its farmer members.

The Jobbing Assn. warehouse would interest any farm boy or girl Wisconsin Convention, but it is al--perhaps mostly boys-with the large variety of stock feeds, fencing, roofing, twine, paint, greases, and many other things, all of high quality. And oh, yes, I saw one of the new "Tor" cream separators which have come all the way from Sweden. Be sure to tell your Dad and Mother that the new separator must be a "Tor."

Anytime you go to Kansas City, be sure to visit these places and see for yourself what is there. Seeing things firsthand has a way of tuning up our interests.

It is now just a few days until we turn our eyes toward Hutchinson. You won't want to miss the interesting things that you can see and hear there, so let's all say, "Next week we're off to Hutchinson for the Farmers Union convention."

Fraternally yours, Esther Ekblad.

## Help for Housewives

Let System and Soap Shoulder Bur-den of Work

"Make the head save the heels." With this homely proverb as a by-word, the intelligent modern woman wheels. She keeps home and children immaculate but has time left over for leisurely breathing spells, by observing two main principles. first is the systematic use of time. The second is the efficient use of soap and whatever other laborsavers she can afford.

Some housewives get good results with the room-a-day method of cleaning. Others prefer a thorough weekly going-over of the entire house. In either case the working plan is flexible enough to allow for those unexpected happenings that occur in ev-

All good housewives agree that keeping things clean is far easier than the inevitable payoff that is faced when hous -furnishings become seedy through neglect. More over, vear and tear that dirt is bound to induce, so cleanliness is actually a nonev-saver.

Every housewife must work out her wn cleaning schedule depending on such factors as her income, the size of her family, and whether her home is a model apartment or a run-down farmhouse. But whatever the circumstances, soap and system will shoulder the most burdensome duties.

BYE, BYE, LITTLE RED SCHOOL HOUSE

One-room school houses disappear it the rate of seven a day, and soon he "little red school house" will be only a memory. Leading officials and educators are pushing the campaign to abolish the one-room, one-teacher

school. The PWA program is largely the reason for the change, in school buildings as that activity has been building larger buildings to which school buses carry children from miles around.

One in every four persons in the entire country has been enrolled in class rooms this Fall, according to the United States Office of Educa-tion. Even so there has been a drop and yellow. Add hamburger, salt and

#### OF INTEREST TO WOMEN

APPLES BRING ...... HEALTH TO BABIES

Aples have always had a prominent place among healthful foods but until recently we did not think of them as important therapeutic agents. Now the baby specialists both in Europe and in this country are using scraped apple pulp in the treatment of infant diorrhea and dysentery and to alleviate disturbed conditions of the intestional tract following typhoid, colitis and similar diseases of adults.

In a study of 978 cases of diar-

In a study of 978 cases of diarrhea and dysentery in children, as reported in the medical literature, 963 or 98 per cent promptly made a sat-isfactory recovery. This is a most significant confirmation of the old adage "An apple a day keeps the Doctor away," and explains perhaps children's natural longings for ap-

Although summer diarrhea is far less injurious to infants today than less injurious to infants today than it was when milk supplies were contaminated and the pest of flies was unabated, summer diarrhea in infants still takes a heavy toll. More than 10,000 infants die every year from intestinal disorders which the clinical results which follow the use of scraped apple or apple prowder inscraped apple or apple powder in-dicate might have been saved.

#### FRESHEN UP OLD FURNISHINGS

Often household furnishings that seemed adequate enough in their accustomed setting look pathetically shabby and out of place after moving day. If upholstered pieces are too soiled to do justice to their new surroundings, send them away to be cleaned or freshen them up at home. Unless they have been too long neglected they can be made to look like new if mild soap is applied in the form of soap jelly or a thick tepid lather, then removed with a clean damp cloth and the surface mopped dry with more clean cloths before the majeture soaks through before the moisture soaks through. Wooden pieces that look down at the heels can often be rejuvenated by a thorough soapy scrubbing and a coat of washable paint.

#### CHILI CON CARNE

On pound ground beef Two tablespoons bacon fat One chopped onion One clove garlic
One can kidney beans
One teaspoon salt, pepper

One-fourth teaspoon chili powder One can tomato soup One cup grated cheese
Brown the meat in bacon fat, then
add the chopped onion and garlic.

Cook three minutes and remove gar lic. Add kidney beans, seasonings and tomato soup. Put in a greased casserole, sprinkle with cheese and bake Farhenheit) 15 to 20 minutes.

#### CARAMEL DUMPLINGS

Brown one-third cup sugar, then add one scant cup of sugar, three cups of boiling water, a large table-spoon of butter, a pinch of salt, one teaspoon of vanilla, and boil for ten

Make a batter of one-half cup of sugar, one tablespoon of butter, onehalf cup of sweet milk, one tablespoon of combination baking powder. Add enough flour to make a stiff batter. Drop in syrup by spoonfuls and bake for fifteen minutes. Chill and

#### serve with whipped cream. DUTCH CABBAGE

Dice 1 1-2 quarts tender young cabbage and cook uncovered for 10 minutes in 1 cupful boiling salted water. Drain the cabbage and add 1 cupful sour cream, 1-2 cupful bacon which has been chopped and fried crisp, 1 1-2 teaspoonfuls salt and 1-4 teaspoonful paprika. Bring to a boil and serve hot.

#### POT ROAST

Cook the chuck beef pot roast in 2 If cider is not available, use in its place 2 cups water to which 1-3 cup vinegar is added.

A total of 1,020,000 public and private school teachers are engaged it teaching the 'young idea"— and perhaps a good deal of the "old idea," the science of "how to shoot." The average pay of the science of "how to shoot." The science of "how to shoot." haps a good deal of the "old idea," top with the mashed potatoes, which the science of "how to shoot." The have been well seasoned, egg added average pay of city school teachers and beaten until light. Bake in a hot s \$1,735 a year, and \$787 a year for oven (425 degrees) until it is nice-

### ORANGE COCOANUT KRINKLES

Juice and rind of 2 Florida oranges 1-2 C. white karo 2 C. sugar 1-2 t. salt 4 C. shredded cocoanut

## BLACK RASPBERRY CHIFFON

Soak three tablespoons of gelatin in one-third cup of water and let it stand. Mix together one cup of juice and pulp of raspberries, one cup of sugar and three egg yolks (beaten). Let cool and add gelatin. Fold in three egg white beater its? three egg whites beaten stiff), pour in baked pie shell and serve with whipped cream.

#### SPONGE LEMON PUDDING

Soak one cup of dry bread crumbs in one and one-half cups of milk until bread is soft. Cream a tablespoon of butter with three-fourths cup of sugar and the lightly beaten yolks of two eggs, and juice and grated rind of a lemon and combine with the soaked crumbs and milk.

Pour into a buttered mold, then lace mold in a pan of hot water and bake in a moderate oven until pud-ding is set. Cover with a meringue made from the two egg whites, whip-ped, and four teaspoons of sugar. Re-turn to oven until light brown.

#### CHICKEN MARYLAND

2 3-pound chickens 1 1-2 cups crumbs 2 egg yolks 3 tablespoons milk 1 teaspoon milk teaspoon salt 1-4 teaspoon paprika 1-2 cup butter melted

4 strips bacon Thoroughly wash and clean chickens. Cut into serving pieces. Rinse in cold water and wipe dry. Dip in the crumbs, then in yolks mixed with milk and again in crumbs. Arrange in a shallow well-buttered baking pan. Add salt, paprika and butter Cover, and bake one hour in a moderate oven. Turn several times to allow even browning. Remove cover and top with bacon. Bake until the bacon is crisp. (About 15 minutes.) Carefully remove to serving platter. (Gravy may be made from the drip-pings left in the baking pan.)

#### SALMON SALAD

1 cup canned or cooked salmon 1-2 cup cooked peas 3 hard-boiled eggs, diced 1-2 cup diced celery 2 tablespoons chopped pimentoes 1-4 teaspoon salt 1-4 teaspoon paprika

tablespoons lemon juice 1-3 cup salad dressing
Mir and chill ingredients. Serve in
bowl lined with lettuce. Top with nore dressing.

## ATTRACTIVE MEXICAN DISHES

By Betty Barclay
The Senoras and Senoritas across our southern border, where it is take en for granted that every married and marriageable woman has been trained to be a good cook, have learned how to prepare some of the most appetizing foods imaginable. Here are two delicious dishes that should be

tried by women in the north: Chicken Sonora Cut a frying-size chicken in quarters and fry in olive oil with 1-2 cup finely chopped onion and raw white potatoes cut in dice. Cook until the meat of the chicken is white. Add 1-2 teaspoon sugar, 1-2 teaspoon chopped parsley, 1 tablespoon chop-ped green pepper and 1-4 cup hot water. Season with salt and pepper to taste and cook very gently unti the chicken and potatoes are thoroughly done.

#### CHEESE CAKE

12 graham crackers 2 tablespoons sugar teaspoon cinnamon tablespoons shortening 1 3-4 cups sugar cup cream or top milk

1 1-2 pounds dry cotage cheese Pinch of salt 1-4 teaspoon nutmeg 1-2 teaspoon vanilla

1 teaspoon lemon extract Roll the crackers into fine crumb and add to them the 2 tablespoons cups cider instead of water if you sugar, the cinnamon and the melted want a treat. Simmer slowly. A few shortening. Press this mixture prunes may be cooked with the meat. evenly on the botom of a tube pan, or a spring form mold, reserving a few tablespoons to sprinkle over the top of the cake. Bake 8 minutes in a hot oven and then remove and cool.

Meanwhile beat the egg yolks until thick and lemon colored. Add the sugar gradually, beating constantly. Add the cream. Beat in the cottage cheese which has been forced through a fine sieve. In another bowl mix together the flour, salt and nutmeg; then add this to the egg mixture. Finally fold in the stiffly beaten egg

> ture is thoroughly set. It will shrink slightly while cooling. DUCHESS CUP CAKES 1-2 cup shortening

1 1-2 cups broken sugar

whites, lemon and vanilla flavor-

ing. Pour this over the baked base,

sprinkle with the remaining cracker

nixture and bake in a slow oven

about 1 1-2 hours or until the mix-

2 eggs 1 cup thick sour milk and sour cream mixed 2 cups cake flour, measured after

sifting 1 teaspoon soda 1 teaspoon cinnamon 1-2 teaspoon nutmeg

1-2 teaspoon cloves 1-4 teaspoon salt 1 cup seeded raisins, cut in two 1-2 cup broken nut meats Cream the shortening and add the

But the wolf that shall break it must die.

As the creeper that girdles the tree trunk

As the creeper that girdles the tree trunk

The law runneth forward and back—For the strength of the pack is the wolf,

And the strength of the wolf is the pack.

—Rudyard Kipling.

As the creeper that girdles the tree trunk

The law runneth forward and back—For the strength of the wolf is the pack.

—Rudyard Kipling.

As the creeper that girdles the tree trunk

Cook the rind of the oranges in a large amount of water until tender, changing water twice; drain. Cut rind into thin shreds. Add sugar, salt syrup and orange juice and cook to 236 degrees F. (soft ball in cold water until tender, changing water twice; drain. Cut rind into thin shreds. Add sugar, salt syrup and orange juice and cook to 236 degrees F. (soft ball in cold water into well greased muffin tins, and bake in a moderate oven about 25 minutes or until done. When only small quantities of sour milk are available they may be used to make a cake of great delicacy.

DELIGHTFUL AND DIFFERENT

Probably the most common method of preparing sweet potatoes is to candy them. Here, however, are several excellent recipes that will enable you to prepare sweet potatoes in a delightfully different manner.

#### Mashed Sweet Potatoes

Take 3 cups of mashed sweet potatoes, mix with 1 egg yolk, 2 table-spoons of butter, ½ teaspoon salt, and teaspoon paprika. Beat well, then drop portions on a buttered baking dish and spread with the stifflybeaten egg white. Place in a moderate oven to brown. Remove carefully to a hot serving platter and garnish with small pieces of candied pineapple.

#### Sweet Potato Puff Balls

Mash 1 large can sweet potatoes well, add 4 tablespoons each brown sugar and flour, 1-2 teaspoon baking powder and I teaspoon salt and stir and beat until smooth. Add 2 well beaten eggs. Take up by spoonfuls insert a blackwalnut or other nut meat into center and drop into hot deep fat heated to 375 degrees. Fry until brown and drain on brown paper. Makes 24 to 30 balls, serving 8 to 10 persons.

#### Roast Pork Glorified

Select 6 Florida oranges; cut a slice off the top of each and scoop out pulp. Pare and boil 6 sweet potatoes and mash. Mix with the orange pulp, season with salt, pepper and butter. Fill orange cups with mixture and heat in oven; a few minutes before serving, top each crange with marshmallow and put back until marshmallow puffs and browns. Serve around roast pork.

#### CIDRACAPOT

1 tender summer squash 1 tablespoon butter 2 roasting ears of corn 1 teaspoon sugar

Salt and pepper Peel the squash and cut into cubes. Fry until tender in the butter, stirring frequently. Add the seasonings and the sweet corn cut from the cob. Have about a quarter as much corn as squash. Continue cooking until the corn is soft.

HOUSEHOLD USES FOR LEMONS To Replace Vinegar: Lemon juice may be substituted for vinegar in

any recipe that calls for the latter, except pickling.

To Sour Milk: Lemon juice added to sweet milk will sour it suitably for cooking.
For Stewing Dried Fruits: Add a small amount of lemon juice and grated lemon rind in stewing such

dried fruits as prunes, figs, peaches and so on.

In Cooking Meats: Tough meats.
will be made tender by adding a teaspoon of lemon juice to water in which they are boiled.

CARAMEL SAUCE (For Sherbets or Ice Creams) 2 cups sugar 2 cups boiling water 2 tablespoons flour

1-8 teaspoon salt

l teaspoon vanilla Sprinkle half the sugar over bottom frying pan (iron or aluminum preferred). Heat slowly and stir constantly until light brown syrup has formed. Wooden spoon is best as it will not become too hot to hold. Add one-half the water, lower fire and simmer until sugar has melted. Blend flour and salt with remaining sugar, add with rest of water to the cooking mixture. Cook slowly and stir constantly until creamy sauce forms, add vanilla,

Serve warm or cold. HOT FUDGE SAUCE 1 cup sugar (light brown) 2 tablespoons flour 1 1-2 squares chocolate 1-8 teaspoon salt

2 tablespoons butter 1 1-2 cups water 1 teaspoon vanilla Cut chocolate in small pieces and add to sugar flour and salt. Mix well, add water and cook slowly and ster constantly until creamy mixture forms. Add rest of ingredients and

#### serve warm. BUTTERSCOTCH SAUCE

(So Good With Pecans)
1 1-2 cups dark brown sugar 1-2 cup corn syrup 3 tablespoons butter 2-3 cup milk 1 teaspoon vanilla

1-3 cup pecans (optional) Mix sugar with syrup and butter. minutes, add milk and boil two minutes. Add rest of ingredients and serve hot or cold.

FLAVOR SOUR MILK DISHES WITH SPICE

Thrifty Women Utilize Large Quantities for Home-Made Cheese and Small Amounts for Many Appetizing Foods

Milk that goes sour is no calamity. It may be a blessing in disguise. It may not serve the purpose for which it was purchased, but it should never go down the sink. It can be the basis of delicious, tasty foods which are made even more delicate by the addition of spices. Cottage cheese, or pot cheese as it is known in some parts of the country, is the simplest use to make of sour milk. Let the milk get quite thick, then pour it into a cornucopia shaped cloth bag. One made of a double thickness of cheese cloth is good; failing that thin sheeting will do nicely. Hang the bag up and let the liquid drip for twenty-four hours. Season the remaining cheese with salt, pepper, ground or whole cara-way seeds and serve either with

(Editor's Note: This is the sixth of a series of articles on European Cooperatives based on the findings of the President's Cooperative Com-

VI. Scotland

Aye, an' we would expect the thrifty Scotch to take to the cooperative way of saving money. In Scotland cooperative societies on the whole have received a larger share of the patronage of their members than their English brethern, and a slightly larger percentage of the pop-ulation are included in the member-

While the Scottish cooperative movement is closely linked with the English movement through the Co-operative Union and the Cooperative Party, both of which extend over all land.

6f the United Kingdom, it has its own wholesale society, the Scottish Cooperative Wholesale Society, and its own productive plants. The S. C. was formed in 1868, largely because geographical conditions made it impossible for the infant English society to serve Scottish.

acres of tea plantations in Ceylon and India. In the four years between 1931 and 1935 the membership in Scot-tish societies increased from 759,-

962 to 836,230. In 1935 cooperative membership was held by 17.7 per cent of the population. In one county, Clockmannan, direct cooperative membership includes 42 per cent of the entire county population. About half of the professional classes in Edinburgh are cooperators. This is in contrast with England where only recently have professional people begun to manifest an interest in the

Retail socieities, of which there were 224 in 1935, have followed the policy of selling at market prices so patronage refunds would be high, reaching in some cases 20 per cent and averaging 12 1-2 per cent as compared to 9 per cent in England. The S. C. W. S., however tries to discourage this practice. In 1931 the average sales per member were about \$235, \$90 more than in Eng-

its own productive plants. The S. C. W. S. owns jointly with the English C. W. S. the Joint Cooperative Wholesale Society, set up in 1923 to handle the production and packing of imports, particularly Indian and Ceylonese tea, cocoa, and chocolate. This lonese tea, cocoa, and chocolate. This point wholesale farms over 30,000 chases until the loss was wiped out.

Last year cooperative sales topped one-hundred million dollars, an increase for the year of five million dollars. In the beginning of its current financial year S. C. W. S. budgeted for an estimated increase of \$7,500,000 over\* 1935, and has gone beyond the desired increase; so that beyond the desired increase; so that the wholesale trade done in the small country of Scotland touched a total for the year of \$68,000,000 in value.

Today the wholesale operates 50 factories, many of which are the largest of their kind in the country. They represent every type of production, food, furniture, clothing, boots, floor-coverings, tobaccos, drugs, cosmetics, candies, jute-products, etc. The value of its production in 1935 was \$27,107,200, or 29.08 per cent of the cooperative wholesale trade of the cooperative wholesale trade necessary to prepare for a crowd and 14.7 per cent of cooperative retail sales.

Bakery goods are supplied to most local societies through a separate or-Baking Society of Glasgow. This organization, formed for a specific task was organized a year after the whole sale by several Glasgow societies because the wholesale could not set numerous branches throughout Scotland. As early as 1880 it was able to prevent a rise in the price of bread. At the present time it grinds each week 80,000 bushels of Canadian wheat into flour, in addition to the wheat it buys in America, the Argentine, Australia and the home market. And when the wheat is test. He is planning to work out in ground into cooperative flour and is baked in cooperative ovens it goes to cooperative tables at 15c per four pound loaf-and with a 12 1-2 per

cent patronage dividend. One of the outstanding accomplishments of S. C. W. S. services is its funeral furnishing. This department, according to an official, succeeded in reducing the price of a funeral from an average of about \$250 to about \$50. 9.50

A number of retail stores, in sparsely settled areas, are directly operated by the Scottish Wholesale as branches. Patrons are invited to become purchasing members on the payment of one shilling and are encouraged to leave their patronage refund in the society toward the pur-chase of shares. In theory these local groups, once they are strong enough, may take over the management of the store. Independent local societies are required to take out one share, value \$10, per member in the wholesale. Employees of the S. C. W. S. are permitted to become share-holders as well as local societies and for every 150 employee shareholders one delegate may be sent to general meetings. Every employee must carry his or her trade union card and in every case trade union wages and conditions apply and in many instances are bettered.

#### HUNDRED THOUSAND FARMS IN CONSERVATION PROGRAM

10.40 Orators of from 100,000 to 110,-000 Kansas farms have carried out soil-improving practices under the 10.40 10.40 Agricultural Conservation Program that will qualify them for payments totaling from \$17,500,000 to \$18,500,000, according to a preliminary estimate of participation in 10.35 10.35 the program compiled by K. E. Logan, statistician for the state Agri-cultural Conservation Committee. The 10.30 estimate is based upon figures supplied by county agricultural agents. Checking of performance under the 10.30 10.25 10.25 program now is under way although the actual issuing of payments will 10.25 not start for some time.

Participation in the program has been heaviest in the western onethird of the state and lightest in the eastern one-third, Logan said. Western Kansas farmers, he explained, have made good use of the moistureconservation and wind-erosion con-9.00' trol practices encouraged by the pro-9.00 gram. These include strip cropping and fallow, controlled summer fallow, contour farming and in designated areas the seeding of cover crops to control soil drifting. The lighter 10.25 participation in eastern Kansas was 10.25 attributed to the fact that crop conditions have been good in this area for the first time in several years and farmers are interested in taking advantage of this fact to replenish depleted grain and feed supplies. Also, weather conditions have been unfavorable for fall seeding of legumes and grasses in much of the area

where these crops are grown. Indiations are that participating farmers have on the average diverted about 13 1-2 per cent of their soil-depleting base acreages to soil-conserving uses, Logan commented. The maximum diversion for which 7.00 4.50 payment could be earned under the

program is 15 per cent.

Because of weather conditions, total participation in the program will be smaller than had been anticipated earlier in the year. However, the final figure will be larger than that recorded for the 1936 AAA program, Logan stated. Approximately 95,000 farms qualified for payment in 1936.

PIG GAINS

Pigs at weaning time should be getting all the grain they will eat. The ration should include takage or skimmilk. With a good pasture to run on, pigs should be taking on weight. Pigs that are doing well should gain a pound a day. Self-feeders are convenient for feeding corn and takage; their use results in as good and often better gains than the hand-feeding method. Self-feeders should be in good working order. They should keep the feed dry, keep the feed before the pigs at all times, and prevent waste by leakage or too free running of feed.

ALLEN COUNTY GETS STATE HUSKING CONTEST

The 1937 Kansas state corn huskng contest will be staged near Humboldt, in Allen county, on October 28, according to Tudor Charles, as-sociate editor of Kansas Farmer, a Capper Publication, which sponsors the big, outdoor farm event.

The Canuate Chamber of Commerce is sponsoring the contest locally, and selected Humboldt as the site by Neosho River vallev.

Ten Thousand People Expected
The Humboldt Commercial Club
and dozens of local farmers will hannecessary to prepare for a crowd of 10,000 people. No efforts will be spared to show the big crowd a pleasant day of entertainment. Senator Arthur Capper will present the winners with checks amounting to \$200,

pull the contest wagons, and for a number of special events for farm up a bakery that could serve all its boys and girls. The local committee members. The U. C. B. S. now has at Humboldt is working on a series of events which will include calf roping and riding, and bareback horse racing.

Will Defend Title Lawrence House, 193? Kansas husk ng champion, who hails from Goodland, has announced his intention of defending his title at the 1937 con one of the Eastern Kansas counties since there is no corn in Sherman

county this year.

This is the first time the state usking contest has been located in Southeastern Kansas, and farmers in that section are showing a great deal of enthusiasm over the recognition hey are receiving for growing the best corn in Kansas.

The first and second place winner of the Kansas husking contest will enter the national husking contest at Marshall, Saline county, Missouri, on November 4. This even attracts 100,000 people or more and has fully earned the title of America's greatest farm sporting event.

#### HOW QUAIL ARE SECURED

This year the Kansas Game Farms at Calista and Pittsburg, Kansas will have around 10,000 Quail to send out over the state. Much care and a great deal of money is spent in the raising of these birds and for this reason the department goes to considerable trouble in investigating places where

the Quail are placed. Persons desiring Quail are forwarded an application which they fill out and return. This application is sent to the District Warden, who goes to the applicants property and inspects it for proper shelter, water, and feed. The owner also contracts that he will not allow the birds to be hunted for one year from the date they are placed on his property. If the Warden finds the place suit-

able, he then recommends to the department that quail be placed there | peril or by securing the family | Each District Warden will make | agreement to a set of safety rules several trips to the game take two hundred birds at a trip, placing a number of birds on each of the properties that were inspected

and approved. It costs the department between \$1.25 and \$1.50 to raise each of these birds and this statement in itself should be an inducement for those receiving Quail to do all they can to protect them to that the birds may have a chance to exist and reproduce. If we can have the co-operation of the sportsman and farmer in this matter, then we will have more real sport and greater number of these game birls to hunt.

#### LEASES

The stock share lease is increasng in importance in Kansas agriculture. Under such leases the tenant and the landlord own the livestock jointly. Both share equally in all receipts from the farm. The landlord furnishes the land and biuldings while the tenant furnishes the labor, farm machinery, and part, or all, of the farm power. Such a leas reducs the occasions when the interests of the landlord and tenant are in conflict.

#### POULTRY

The last cutting of alfalfa should be cut, cured quickly and stored in a cool place, later to be ground and added to the poultry mash feed. Some poultrymen prefer to feed the loose hay in racks. This practice is satisfactory but more wasteful than when ground and added to the mash mix-ture at the rate of 10 per cent of the total ingredients. This provides vita-mins A and G. Both are essential for good health of the flock, high hatchability, and normal growth.

CALVES

When does the calf need water? Since they ordinarily get milk for the first few months, we are likely to assume their water requirements are quite well supplied. However, are quite well supplied. studies show that we should supply water after the first two months.

STUDENTS SURVEY HOME HAZARDS

J. C. Baker It is somewhat unusual for children to be cautioning their parents regarding safety hazards, yet such warnings did occur, parents con-fessed with shame-faced pride, after Miss Roberts' pupils made a survey of home hazards. The individual projects, carried out by the school children after they had studied home virtue of the sixty-bushel field of corn grown by Warren Works in the and sometimes embarrassingly penehazards in general, were peculiarly trative, since the pupils viewed the home set-up with less bias than did

the grownups of the household. Though each home was surveyed separately, the children found it possible to organize most of the hazards brought to light under a few general headings, the specific dangers under each varying with the individual homes. Their lists ran something like this:

HOME HAZARDS

From fire, through 1. Direct flames (here the children listed concretely family malpractices in lighting and operating heating and cooking units, also, the danger of spontaneous combustion from oily clothes.)

2. Gases (included risk of asphyxiation from leaking joints, fur-naces improperly regulated, automobile engines running in closed garages.)
From electricity, through:

1. Improper wiring and improperly installed appliances (bathroom heaters too near tub, fans where clothing or hands might contacs them, etc.)

2. Worn equipment (frayed cords, heating pads whose thermostats are faulty, etc.)

House hazards due to:
1. Construction faults (insufficient lighting at strategic points, stairways too steep, without zanisters or with irregular risers, cracking flues, slippery floors.) Furnishings (sharp corners at heights to bump heads; treacherous rugs; towels, soap, and drinking cups too high for chil-dren to be able to help them-

selves easily.) Cleaning (soap in path of pedes-trian, careless use of fumigants and insecticides.) 4. Burglars

. Food (lack of watchfulness - at source, during preparation and during preservation; including refrigeration and canning.) Misuse of articles for sport, and pleasure (home workshop, toys, knives, sewing kits, firearms, the

family pets, etc.) These "accdients points," specificaly itemized by each child for his own home, made up his "Home Safety Sheet." With his parents' aid (the project having received the enthusiastic endorsement of the Parent-Teachers Association), he next attacked the problem of remedying home hazards. This was generally accomplished by the removal of the volved. As a result, not only the child himself, but every other member of the family felt that he, too, had a part in placing the home more nearly outside the range of peril and

#### POTATO SHOW

tragedy.

Sweet potatoes for exhibiting at the Kansas Potato Show, Lawrence, Kansas, November 4 and 5, 1937 should be selected now. Eleven tubers are required for an entry. Premium lists are available from the Kansas State College Extension Service.
