VOL. XI.---NO. 4.

LAWRENCE, KANSAS, WEDNESDAY, JULY 20, 1881.

WHOLE NO. 494.

GRANDPA'S BARN.

Oh, a jolly old place is grandpa's barn, Where the doors stand open throughout the

And the cooing doves fly in and out,
And the air is sweet with the fragrant hay

Where grain lies over the slippery floor,
And the hens are busily looking around,
And the sunbeams flicker, now there,
And the breeze blows through with a merry

The swallows twitter and chirp all day, With fluttering wings, in the old brown eaves,
And the robins sing in the trees which lean
To brush the roof with their rustling leaves.

Oh. for the glad vacation time,
When grandpa's burn will echo the shout
Of merry children, who romp and play
In the new-born freedom of school let out.

Such scaring of doves from their cosy nests,
Such hunting for nests in the lofts so high
Till the frightened heps, with a cackle shrill, From their hidden treasures are fain to fly

Oh, the dear old barn, so cool, so wide!
Its doors will open again ere long,
To the summer sunshine, the new-mown hay,
And the merry ring of vacation song.

For grandpa's barn is the jolliest place
For trolic and fun on a summer's day;
And e'en old Time, as the years slip by,
Its memory never can slip away.

SELF-SACRIFICE.

BY ANNA SHEILDS.

"Then it is all true, Aunt Helen?"

"It is true, though I cannot guess who has learn all this, Natalie?"

know. Forgive me if you can, auntie! I am kine's pride, as well as wounded her heart. very wretched !"

"But you must not, you shall not be wretched !" As she spoke, Mrs. Erskine crossed the room

to the sofa where Natalie sat, erect, deadly pale, with her heart throbbing with suffocating her love. rapidity, but her beautiful face calm and resolute. It was a face of wonderful power for and and storn drown gentle, womanly sweetness, to love's softest smiles

Mrs. Erskine, a tender-hearted little blonde, who had filled a mother's place to Natalie for eighteen years, sat down and took a cold hand in her own, saying:

"Why should you grieve so now, Natalie, over a story that is utterly torgotten? It is nearly twenty years ago, when you were a mere baby, that your father got-became-

"Say it plainly, Aunt Ellen, that my father, after using trust funds for an unsuccessful and give him a companion in all his intellectual speculation, ran away with money not his own."

"And committed suicide a year later. That was what killed my poor Amy, your mother. She had lived on the hope that he would return and replace the money, but when it was proved, beyond all doubt, that he threw himself from a ferry-boat and was drowned, your mother wasted away. She died of sheer grief." "She must have loved him devotedly."

"She did! Everybody did who knew him. He was a man to love, gentle, tender, and yet strong and manly! It was a mystery to every one that he, of all men, could have defrauded those who had trusted him."

"And you, Aunt Ellen, knowing all this, let me engage myself to marry Charles Norton." "Natalie, dear, he knows. Under a promise

of secrecy, 1 told him all!" "And his father? Does he, too, know?" "I think not. It was not necessary to tell adopted you I gave you my name, so no one knows you by any other. Let the past die,

Natalie!" "I cannot!" and the girl's hands locked each other in a clasp of suppressed agony. "I cannot! I might bear it better if I were younger, and had not let my heart go out to Charles Norton? But to give him up now-"

"Natalie, you must be mad to think of such a thing! But he will never give you up I letters, to draw her income and send it to her, Tell me, who was cruel enough to tell you your and to bring me any letter she may write." father's story ?"

"Monsieur de La Vigne."

"Natalie! I disliked that man from the mo-

does not at all approve of the way in which he forces himself upon you. What do you find in him to like ?"

"He is good company, Aunt Ellen; and he them. He—he thinks my father yielded to a misery I have made; mine not the least." sudden temptation, and was overcome with remorse and despair, when he realized the extent of his-his-crime. He told me all, Aunt Ellen; but he found excuse for my father; and he was fond of my mother."

"Does he know you inherit your mother's fortune?" Mrs. Erskine asked, dryly.

"I do not know. He was very kind." "Kind 1 A foreign fortune-hunter, who has made of an old story a bond of sympathy between himself and you. I distrust him, Natalie."

"You may be right," Natalie said, rising, with a sigh; "but do not judge him too harshly."

She left the room as she spoke, stooping to give her aunt a warm caress as she left her; and the eyes that had been so cold and clear were filled with a blinding rush of tears as she kissed Mrs. Erskine warmly.

That lady, alone, indulged in some mental vituperation, fiercely energetic, and all out of harmony with her gentle blonde tace. She loved Natalie as fondly as it she had been her own child, instead of her sister's, and it had been her study for years to guard from her the knowledge of the disgrace upon her name. brother-in-law, and had suffered as much as his own family had done when he tell from honesty, and when he died. To have the old been brutal enough to tell you. Where did you story revived by a foreigner, a chance acquaintance who had been introduced to Nata-"I will tell you presently all you wish to lie at an evening reception, galled Mrs. Ers-She had thought it her duty when Dr. Norton asked permission to woo her niece, to tell him the truth, under promise of secrecy, and it had won her tender affection that he had still asked to make Natalie his wife, if he could win She was not a girl to whom a lover would go

with over-confidence of success, being one who, one so young and of the weaker sex, with to those who did not know her well, seemed to noble feetures, a broad, white forehead, and live more in her intellectual life than in her af. He told her of his being picked up after his large cyes, soft and brown. The hair, brown, fections. Mrs. Erskine knew how tender and attempted suicide by an outward bouund too, was abundant, and with a broad, rich true a heart the stately manner covered, how Liverpool steamer; of the charity of the passwave that suited the face well. Yet, though generous she was, how many hours she spared engers, giving him a small sum to start life from her books for charities of which the world it was a face that could soften to the most knew nothing. But there were but a few in Natalie's circle of friends who judged her quite tairly, and she had a reputation for pride and coldness she did not deserve.

It was not until she had frankly answered the question Dr. Norton asked with inward doubt, that even he knew how noble and womanly a heart he had drawn to his own. He had given her a warm admiration, appreciating mental qualities above the average range, had delighted to listen to her wonderful voice poured forth in song, had felt that to win her for his wife would gratify his pride enjoyments; but never had he loved her as deeply as he did when, once having let him read her heart, she unfolded to him alone its depths of tenderness, its power of loving devotion.

Then he gave her his heart's deepest treasures of love, and looked forward to his marriage with all the glad impatience of an ardent

Upon this love, upon this hope, came a sudden, crushing blow. A note from Mrs. Erskine summoned him to her side, to find her in an agony of grief and indignation.

"I scarcely know how to break my news to ton married a tiny, fairy-like creature, a comyou," she said, "and yet Natalie has left it to me to tell you that she has deserted us all." "Deserted us! What can you mean?"

"It will explain all to tell you that John Carlton, Natalie's father, is alive! He is doctor was hastily summoned to Mrs. abroad, I do not know where, but he has sent | Erskine's. Mons. de La Vigne to Natalie with letters and the world what it had forgotten. When I the story of his escape from this country. The man has done his errand well, and so worked upon Matalie's sympathy that she has gone to France, where John Carlton, poor, alone, and sick is waiting for her. Dr. Norton, from my heart I feel for you, and yet you must not judge Natalie too harshly. She never knew of her father's disgrace until Mons. de La Vigne told her, and she does not tell me even where she is. Mons. de La Vigne is to forward my

"Then he has not gone?" "No she sailed alone in the steamer that left ment he was introduced to me; and Charlie you is that she would never have promised to came to me. My poor Natalie!"

marry any one had she known of the stain unconsciously. It is all my fault! I thought moved by the approach of death. -he knew my father and mother. He talks of | to spare her by keeping the secret, and see the

> "Heaven guard and bless her," said her lover, after a long silence; "but she might have trusted me."

It was a long time before letters came, and then they brought little comfort. Natalie had found her father a confirmed invalid, a terrible sufferer, yet with no hope of release by death, though he longed for it. He was wretchedly poor, wanting the necessaries of life, but he had not sent for Natalie until there had seemed a near approach of death. Then he told Mons. de La Vigne, the friend of years, the story of his life, and implored him to let him see his only child once before he died.

The dangerous period had long passed before Natalie reached him, but having once entered upon what seemed her duty the girl would not look back.

But her letters told but little of the real hardships of her new life. She found her father in a small sea coast town, where the tiny cottage he occupied was as good a residence as most of those about him. Comforts such as Natalie were luxuries only to be attained at an expense her income would not warrant. She was not rich, but her money would have She had given a true sisterly affection to her amply covered all wants in a place where comforts were procurable, but in this wretched little place nothing could be bought, while the cost of transportation was very great. Servants were almost unknown, the men all fishermen, and keeping their wives and daughters to attend to their own households. One lady, but wearied seen of the exactions of the invalid and returned to their homes.

At first Mr. Carlton's gratitude was unbounded, and he expressed it in his affectionate care for the child who had so promptly obeyed his summons. But it was not long before Natalie's care became only what was his due, and he lost sight of that old story that had deprived him of home, wife and child. anew, and of his struggles with fortune.

"Only to make money enough to restore the money I lost," was the refrain of every which has engaged his attention while readtale he told of his ventures. He had craved no more than that, to return to his home and pay back what had been lost in his mad speculation. But he was unsuccessful in all he touched, while his health failed little by little, until he came to the seaport village seeking

relief, and finding only increase of suffering. "As well die here as anywhere," he would say, when Natalie urged an inland home, knowing the sea air was too bracing for him. Life is only prolonged suffering. Bear with me, Nrtalie; it will not be for long."

Weeks, months, years rolled by. Twice Dr. Norton crossed the ocean, resolved to find Natalie and bring her home, even if he brought her father also. Twice he returned with no clew to her place of exile and self-imposed martyrdom. Letters came but seldom. Mrs. Erskine new Natalie lived, because her lawyer sent her income regularly to Mons. de La Vigne, in Paris, and she received letters inclosed in envelopes bearing the Paris postmark.

A man's constancy may be taxed too far, and six years after he lost Natalie, Dr. Norplete contrast to his lost love, even in the fact of havingg very little brains in her pretty head. But they were happy enough, and Natalie had become a memory only, when the

In the long twelve years since Natalie left her, Mrs. Erskine had depended upon Dr. he forgot the hour and day he was to be mar-Norton for professional service, so he was not surprised at her note, although its urgency made him fear his old friend was dangerously

To his surprise she met him in the hall and drew him into the parlor.

"It is not for myself I have sent for you," she said, "but," and her tears tell fast, "my niece, my Natalie has come home to die."

"Natalie!" he cried, his face paling. "Not our Natalie," she said, sadly, would never know her. She looks older than I do, and she is far gone in consumption. But for Harvre to-day. The message she left for she longed for home after her father died, and

Wasted, pale, dying! so he found her, and upon her name, and she implores you to for- yet with a quiet cheerfulness, a deep serenity From the San Francisco Post. give her the wrong she would have done you untouched by the hardships of her life, un-

> "You must not pity me," she told him one day when he showed his sorrow in his eyes; "I did my duty. Your wife brings you an unstained name, and I was a comfort to one who repented deeply. What I have suffered was but what I expected after I knew my father's story."

> She died at night, her aunt with her, and Dr. Norton holding one wasted hand. Quietly, peacefully she passed away, giving no regret to lost happiness, content in the fulfillment of duty. Once only they heard her whisper, "The sins of the father shall be visited upon the children." and knew that was the keynote to her lite of self-sacrifice.

HEADLESS TRAVELER 3.

BY JAMES HANWAY.

We paid a visit recently to a friend in one of our large cities, who was conducting an extensive retail dry goods establishment, and was, of course, necessitated to employ several sub ordinates to assist him. While in conversation in his office, a young man of prepossessing appearance entered and reported the result of his trip through different parts of the city He had entirely forgotten to call on several had been accustomed to consider necessary little cases on his list. One, which was of more importance than the rest, he remarked, "I did not think of that till I had gone past it about a mile, and thought it could be attended to at some other time." "That will not do," said the merchant, "you must take the back track and make the journey over again, this perhaps will make you more attentive to your

business in the future." abashed. As he departed his employer reafter another came to wait upon the strange marked : "It is a curious thing that so many young men travel about the world without a head on their shoulders. He is a most agree- hards.

his mind is chiefly employed with the subjects

ing. He is only what is called 'absent minded. He will overcome it in time; bestow on him a From the Williamsport (Pa.) Sun and Banner. little patience and he will come out all right." Whenever I come across one of this class of

the type of the genus home. I always think of little four-year-old girl had strayed from the Adam Smith, the author of one of the most all that evening for her, but could find no trace learned works of the last century, "The of her whereabouts. We came back, but sleep informs us that he was one of the most absent minded men he was ever acquainted with; in and rattling. We jumped up and followed the conversation with a friend he would stop short, and for many minutes seemed to be absorbed in thought on some other subject, arousing himself up he would again renew the converkind temperament.

Think of a man in a summer's night reading too cool in his person, takes the poker and placing it between the bars of a grate, and gives it a motion as if there was fire in the grate, as if he expected to draw out a little corolic from a cold stove.

One of the most smusing incidents of torgetfulness is related of the Rev. John Brown, who compiled the Concordance. He did not marry till he was well up in years. We are told that ried. As he was not on hand, and the company had gathered together at the bride's residence, a friend who knew his absent mindedness, concluded it might be possible that he was engaged in his work in revising the sheets, so he hurried to the residence of his reverend friend and found him at his work. When his friend intimated to him that the wedding party was anxiously waiting for him, that the hour for the marriage ceremony was past, he manifested great surprise. He had forgotten that was the day.

This is rather an extreme case, a very pecu-

liar one, which I grant is not likely to occur even to a young man who travels about "with-LANE, Kans.

"Darn It."

They had a terrible time at a wedding up at Petaluma the other day, and which only goes to show how the smallest drawback will sometimes take the stiffness out of the swellest

occasion. It seems that the ceremony was a very grand affair, indeed. There were eight bridesmaids, and the church was crowded from pit to dome, as the dramatic critics would say. But when they got to the proper place in the ceremony, and the groom began teeling around for the ring, he discovered that it wasn't on hand. After the minister had scowled at the miserable wretch for awhile, the latter detected that the magic circlet had slipped through a hole in his pocket and worked into his boot. He communicated the terrible fact in a whisper to the bride, who turned deadly pale, and was only kept from fainting by the reflection that they would inevitably cut the strings of her satin corsage in case she did.

"Why don't you produce the ring?" whispered the bride's big brother, hoarsely, and feeling for his pistol, under the impression that the miserable man was about to back out. "I can't; it's in my boot," exclaimed the

groom under his breath, his very hair meanwhile turning red with mortification.
'Try and fish it out, somehow, hurry up!'
mumbled the minister, behind his book.

mumbled the minister, behind his book.

"I'll try," gasped the victim, who was very stout; and he put one foot on the chancel rail, pulled up his trousers leg, and began making spasmodic jabs for the ring with his fore-finger. The minister motioned to the organist to squeeze out a tew notes to fill in the time, while a rumor rapidly went through the congregation to the effect that a telegram had just arrived proving the groom had four other wives living in the East already.

"I—I can't reach it," groaned the half-married man, in agony. It won't come."

"Sit down and take your boot off, you fool," hissed the bride's mother, while the bride herself moaned piteously and wrung her halds.

head on their shoulders. He is a most agreeable and well behaved young man, but he is remarkably inattentive to some things; he even forgets the dinner hour."

"Is he not a studious young man?" I inquired, "given to reading and gathering upscraps of history and others of a literary character?"

"Yes, there is no young man in the city, perhaps, who spends more of his idle hours in reading books of history, travels and miscelaneous subjects," said our friend.

"Oh! that most likely explains the matter; his mind is chiefly employed with the subjects in content of the first part standing on one leg, trying to hide his well-ventilated foot under the teil of his coat, and appropriately muttering "Darn"

his coat, and appropriately muttering "Darn it!" at short intervals.

The Latest Smake Story.

While my wife and I were bustly engaged back of our log cabin clearing the ground, our that learned Scotch writer, the celebrated house into the deep dark forest. We looked Wealth of Nations," and when I do this, it was far from us; we sat and speculated all makes me feel that these absent minded young night. The next day several of the neighbors men should be kindly dealt with. Dugald joined in the search, but to no avail. We Stewart, an intimate friend of Adam Smith, camped out that night, and at midnight were aroused by many and loud sounds of hissing direction from which the sounds came, and had not gone far when we stopped suddenly as if we had been rooted to the ground, for before us we beheld our little girl surrounded by sation, sometimes, however, forgetting the three dozen rattlesnakes, varying in size from thread of the discourse altogether. It was not three inches to fifteen feet, the larger ones a lack of politeness in him, for he was a man of standing on their tails in a circle with erect bodies and necks curved down toward the head of the infant in the center. We looked on in in his room by candle light, and feeling a little horror, but could do nothing, as the girl was in too dangerous a position.

But soon after the snakes had, what we supposed, danced their war-dance and sung the war-song, the larger ones made each for the lowest branch on one of the trees in a direct line with our cabin; wrapping one end of their line with our cabin; wrapping one end of their bodies around the branch, they dropped the other end toward the ground. In the meantime, two large snakes had wrapped one of their bodies around the child, so that one of their heads was on one side and the other on the opposite side. One of these snakes then tied itself with the one hanging frem above; they then swung themselves, together with the child, till the other snake on the child could catch the snake hanging on the adjoining tree, when the former let go and the latter swung the child to the next. During this novel preceeding the other snakes kept up an incessant ceeding the other snakes kept up an incessant jubilee rattle till the child was landed in-side our cabin, safe and sound, when they once more repeated the scene in the woods by dancing around her, after which they left.

From the Dickinson County Chronicle.

"You can trust a man who loves a herse or a dog," says a recent writer. We don't know about dogs, but lots of men have gone to the penitentiary for loving other people's horses not wisely, but too well.

Standard Pub. House, St. Louis, Mo.

A FEW BOOKS AND STATIONERY ALSO ON HAND.

State News.

The wool market is opening at Abilene.

Atchison is troubled with confidence men. Atchison has an unusual amount of sick. ness.

Farmers alliances are multiplying all over the state.

Bismarck grove is engaged from now until October 15th. Caldwell is to have a ten thousand dollar

school house.

Hunnewell is shipping an average of a train load of cattle a day. New wheat sold last week at Marion Center,

Marion county, at 70 cents. The population of Wilson county is 13,776; Anderson, population 9,310.

School district No. 68, Linn county, is about to build a new school house.

Abiline is being vaccinated. Small-pox threatens to be prevalent in that section.

The increase of acres of farm land in the north part of Linn county amounts to 11,623. Gov. St. John spoke in Junction City last week on the enforcement of the temperance

Mr. J. M. Stewart, living near La Cygne. Linn county, had a horse stolen from him recently.

The Kirwin Chief has passed from the hands of A. G. McBride into the control of a stock

Cloud county veterans last week were made happy by receiving pensions amounting to

Amos M. Spencer, of Lyon county, was drowned on the 10th inst. while bathing in the Neosho river.

The charter of the La Cygne Coal and Mining company was filed at Topeka last week. Capital \$2,000. A witness in one of the whisky cases at Abi-

lene, refused to testify, and he was promptly caged by the judge. A McPherson county man has fallen heir to

about half a miltion dollars, and he has gone to Germany to look after it. A mad dog was killed in South Atchison last

week after having bitten several hogs. These cases are unusually common. Judge H. G. Webb, of Oswego, Labette

county, had a barn destroyed by fire last week. It is the supposed work of an incendiary. Great Bend expects her elevators to handle

a million and a half bushels of wheat this year. This speaks well for the crop in Barton county. Joe Miller a boy about stxteen years old was drowned near Westphalia last week. He was found at the bottom of the pond clinging to a shrub.

James Cofeman while attempting to board a train at Leavenworth last week while it was in motion was thrown back and his foot

Two buildings on Kansas avenue, North Topeka, fell last week, destroying stock consisting of hardware and implements to the extent of \$5,000.

Bountiful and much needed rains appear to have fallen in all parts of the state the latter part of last week. Now look out for an immense corn crop.

During a thunder storm at Whiting, Jackson county, the lightning destroyed wheat stacks, fences, and a good deal of stock. Fortunately no lives were lost.

Mrs. Woodward, of Newton, was thrown from a buggy and seriously injured, by the horse becoming frightened at a train which came in close proximity to it.

Riley county got so much glory and blue ribbon at the Western National fair last year that she will not exhibit this year, but will give poorer counties a chance.

A sugar factory is being erected at Sterling, Rice county. The sugar will be made from corn, and the factory is expected to be in operation in time for this year's crop.

Mr. A. Reddick, of Abilene, had a team of horses stolen about the 9th inst. The thief is supposed to be at Kansas City waiting for an opportunity to make another raid.

The State Agricultural college, located at Manhattan, has a thoroughbred Polled Angus bull. It is said that this strain make the best beef of any grade known.

Mr. Snark White, of Branch township, Marion county, was seriously injured last week by the falling of a stone on his head

while he was in the bottom of a well. The family of the mayor of Olathe was po'soned last week from eating "smearcase." The poison is supposed to have been absorbed from the walls of a newly cemented cellar.

During a rain storm in Atchison last week, a car which was loaded with lime became ignited by the lime becoming damp from the falling rain and slacking, and was partly burned.

The Coffeyville Journal states that nine farmers in that vicinity have been swindled out of over \$500 by lightning rod swindlers. These nine farmers could better afford to take an oc-

ber of blocks of buildings, but several other towns in Kansas are doing the same thing and don't have to blow about it either.

Crawford and Cherokee counties are competing for the great honor of having the biggest divorce mill. One lawyer in Crawford county already has eight divorce cases for the September term. What's the matter, anyhow?

A correspondent to the Troy Chief from Prairie Grove, Doniphan county, says "there are twelve self-binders at work in this neighborhood this week. Had the fall wheat crop been a success this year, there would have been at least twice that number.

Mr. A. Bichet, of Florence, thinks the Clauson the best variety of wheat for his section. His field, which was recently harvested, stood quite even at about five feet and eight inches high. He thinks the long, well-formed heads will yield over thirty bushels to the acre.

On account of the unpunished indignities heaped upon Sibley, the temperance detective, and the open violation of the prohibitory law, the merchants of Holton, Jackson county, have resolved to transact no business with the ungodly city of Leavenworth. Other towns also threaten to do their trading elsewhere.

A party gathered near Trading Post, Linn county, last Thursday night to charivari a newly married couple, and during the racket F. W. Noisch accidentally shot and killed John McWilliams, of Mulberry, Mo., who had come over the line to enjoy the fun. Noisch and McWilliams were entire strangers to each other. There will probably be no arrests made.

About twenty-five men from Germania stepped over to St. Marks, a neighboring village, and created quite a disturbance in their alleged endeavor to "take the town." The bulldozers hung around all day knocking residents down and helping themselves to what they wanted. Both towns are situated in the western part of Sedgwick county, and considerable rivalry which exists is the cause of the proceedings.

The wife of Mr. George Dawson, of Lancaster, Atchison county, was victimized by a slick-tongued bummer, who after failing to sell her some patent bed springs he had with him, persuaded her to allow him to store a number of them, she to receive one of the springs as remuneration, and to sign what she supposed to be a certificate that the goods were stored there. Of course the certificate turned out to be a note for a large amount, and the farmer promptly refused to pay, but was put to the expense of securing legal advice, we hope with good results.

The Jewell county farmers' alliance has been doing some good work at one of their meetings. After setting forth the wrongs which the people suffer in the way of unequal taxation and class legislation, and that redress is not to be found in either of the great political parties, they resolved "That we, as a body of armers, at once free ourselves entirely from the corrupt political machinery and select honest men from among our numbers to repre sent us and our interests in the halls of our Legislature, both state and national: that we send such men to those positions, pledged to carry out the interests and wishes of the peo ple who elect them, and then remembering that eternal vigilance is the price of liberty, we earnestly recommend that each and every man of our number see to it that he does his individual part in compelling, if need be, these public servants to do the wishes of the people. Good for the alliance in Jewell county. May their wishes soon be realized. We are with them heart and soul.

Fatal Frenk of Lightning. From the Atchison Champion

During the prevalence of the storm last Sunday in the Central Branch district, a farmer named David Cutler, living about five mile south of Logan, while returning in his wagon with his wife and child from a visit to a neighbor, was struck by lighting and instantly killed. His wife was so severely shocked that although she managed to get out of the wagon and make her way back to the nearest house, upon her arrival, she could only make known her distress by signs. Singular to add the

A Hard Citizen. From the Topeka Commonwealth.

Last evening we dropped onto a curious swindle that is being perpetrated on ignorant, unsuspecting men. One Louis N. Kirch, resident of Lawrence, a Frenchman, is visiting Popeka, Atchison, Leavenworth and other cities of the state, pretending that he is an agent of the United States and of the state of Kansas, for detective purposes. He says that he is empowered to appoint one thousand detectives and enroll them for service in the United States detective business. He charges each man whom he enrolls, \$5.50 claiming that he pays out of this \$2 to the United States government, \$2 to the state government, 50 cents to the magistrate for administering the oath of office, and \$1 for a star, which he gives to each one of his dupes. It is estimated that he has already enrolled between one and two hundred men in Topeka, and got out of each one \$5.50 cash. How many dupes he has got in the other cities we do not know. He gives casional newspaper.

W. D. Rippey, wife and daughter, of Severance, take an ocean voyage this summer. This of course is a fraud. A telegram has been received in this city from the chief of the United States detective force at Washington, saying that Mr. Kirch has nothing to do with the detective business for the United States. But this telegram was unnecessary, for the whole affair on its face shows fraud. We have before us a copy of what is called "rules and expect to get the remainder from the county commissioners.

Pleasanton, Linn county, thinks she has an unheard of boom as she is putting up a numto each of his dupes what he calls a commis-

authorized by Gen. Pope to select forty of his best men to go into New Mexico and other territories to catch those stealing timber from government land. We judge that he is liable to arrest and severe punishment for getting money under false pretences. He gets more dupes among the colored people than among the whites, but he has some of the latter.

Spread the Good News.

As a family medicine and tonic there is no remedy at present giving such universal satisfaction and effecting so many astonishing cures as Electric Bitters. Our druggists report a lively demand for them, at times being unable to supply the many calls. All bilious attacks, stomach, liver and kidney complaints, diabetes and gravel, readily yield to their curative quali-ties. Sold by Barber Bros., at fifty cents per

AS THE LARGEST SALE OF any Horse and Cattle Medicine in this country.
Composed principally of Herbs and roots. The best and
safest Horse and Cattle Medicine known. The superiority of this Powder over every other preparation of the
kind is known to all those who have seen its astonishing

effects.

Every Farmer a 1 Stock Raiser is convinced that an impure state of th blood originates the variety of diseases that afflict at imals, such as Founder, Distemper, Fistula, Poll-Evil, Hide-Bound, Inward Strains, Scratches, Mange, Nell-w Water, Heaves, Loss of Appetite, Inflammation of the Eyes, Swelled Legs, Fatigue from Hard Labor, and Rheumatism (by some called Stiff Complaint), proving fatal to so many valuable Horses. The blood is the foundain of life itself, and if you wish to restore health, you must first purify the blood; and to insure health, must keep it pure. In doing this you infuse into the debilitated, broken-down animal, action and spirit, also promoting digestion, &c. The farmer can see the marvelous effect of LEIS' CONDITION POWDER, by the loosening of the skin and smoothness of the hair.

Certificates from leading veterinary surgeons, stage ompanies, livery men and stock raisers, prove that companies, livery men and stock raisers, prove that LEIS' POWDER stands pre-eminently at the head of the list of Horse and Cattle Medicines.

In all new countries we hear of fatal diseases among Fowls, styled Chicken Cholera, Gapes, Blind tess, Glanders, Megrims or Giddiness, &c. LEIS POW DER will cradicate these diseases. In severe attacks, ml. a small quantity with corn meal, moistened, and feed twice a day, When these diseases prevail, use a little in their feed once or twice a week, and your poultry will be kept free from all disease. In severe attacks oftentimes they do not eat; it will then be necessary to administer the Powder by means of a QUIL, blowing the Powder down their throat, or mixing Powder with douch to form Pills.

make them fat, but to keep up a regular secretion of milk. Farmers and dairymen attest the fact that by; judicious use of Leis' Cosadition Powyder it if flow of milk is greatly increased, and quality vastly it, proved. All gress humons and impurities of the blood are at once removed. For Sore teats, apply Leis' Chemical Healing Salve—will heal in one or two applications. Your Calves also require an alterative aperient and stimulant. Using this Powder will expel all grub worms, with which young stock are infested in the spring of the year; promotes fattening, prevents scouring. &c.

Leis' Powder is an excellent remedy for Hogs.
The farmer will rejoice to know that a prompt and efficient remedy for the various diseases to which these
animals are subject, is found in Leis' Conditions
Powder. For Distemper, Inflammation of the Brain,
Coughs, Fevers, Sore Lungs, Measles, Sore Ears, Mange,
Hog Cholera, Sore Teats, Ridney Worms, &c., a fifty-centpaper added to a tub of swill and given freely, is a sertain
preventive. It promotes digestion, purifies the blood,
and is therefore the BEST ARTICLE for fattening Hogs.

LAWRENCE, WEDNESDAY, JULY 20, 1881.

THE prospects for a successful state

fair at Topeka, are said to be excellent. THE town of Wallace, Michigan, consisting of a saw mill and twenty-seven buildings, was completely destroyed

by fire on the 18th inst. A BUILDING in Jersey City that had been lately burned, fell last Monday, burying twenty children under it, who were gathering wood. Several have been taken out dead and others have

limbs broken. A BLOCK of buildings in Red Bank, New Jersey, was destroyed by fire the 18th inst., making a total loss of \$75,-000. At New York city the oil works of Brush and Denslow were burned with a loss of \$50,000.

LAST Thursday fifty-six burial permits were issued in Cincinnati, fortytwo of which were for deaths from sun stroke. The warmest day was on Wednesday, when there were between twenty and thirty cases.

A PORTION of the Ute tribe of Indians is to be removed to the junction of the Green and White rivers in Utah. This will bring the different divisions of the tribe to a more central location, and more easily accessible.

THE grand jury at Washington, D. C. on the 18th inst., found an indictment against George W. Ingalls, former Indian agent at Pinti agency, for presenting false vouchers. It is charged that he is a defaulter to the amount of \$100,000.

steamer Lady Lee plying between St. Louis and Kansas City, was shot through the brain and killed while asleep in a hammock, by a fellow work man, on account of a beating which Jones had given him some time before. The murderer escaped.

A DISPATCH from New York speaking of immigrants, says:

The arrivals of immigrants this week is 7,624; total thus far for the month, 19,340; arrivals reported for first half of July, 1880, was 12,016; the total number of immigrants landed in this port since the first of January, 261,143; for corresponding period last year, 187,418.

AT a row in a public house at Pittston, Penn., the 16th inst., between some circus men, Mollie Maguires, etc., every window in the house was broken, the surrounding ones damaged considerably, one man killed by a pistol shot and a young weman severely injured by another. The one who fired the fatal shot belonged to the circus, and officers have gone to arrest him.

THE universal sentiment of the country regardless of creeds or politics, as expressed through the press has thus far been one of the most intense horror and repugnance at the bloody attempt of the assassin Gitteau to deprive us of our noble president. The papers of the South have not been in the least behind in denouncing the horrible blow made against the president's life and through him at the whole country. This action on the part of the Southern press will do much to harmonize the antagonistic elements, hitherto so diametrically op- established at Hartford, Conn, has been

LAW OR LAWLESSNESS.

It behooves every true citizen of Kansas who desires the best prosperity for the state at large, to do all in his power to further the effectiveness of the law now upon the statute books prohibiting the sale of intoxicating liquors as a beverage. From the result of the vote for the constitutional amendment, it would appear that the people were pretty evenly devided upon the question of the advisability in the first place of adopting the amendment, and from this fact naturally arises the sentiment and often prejuhowever distasteful the law as it stands a brakeman makes the following statemay be to the many who oppose all such action on the subject, it is nevertheless a law decided unanimously by the supreme court of the state as entirely constitutional, and as such it is the duty of every man as a citizen, and every officer in the double capacity of a citizen and sworn servant of the law, to use every means to accomplish its full enforcement.

While professing to be greatly exercised over the imagined decrease in immigration to the state, the enemies of the law apparently forget that such a universal disregard of law as they are at present urging upon the people, would have a tenfold worse effect upon immigration than all the temperance

laws the Legislature could enact. The people who come to the state of Kansas, come to find a home, not a saloon or beer garden. They come with the expectation and desire that the laws should be executed and obeyed, otherwise they would be anything but desirable additions to our population, and if they discover the spirit of anarchy, the organized resistance of laws acknowledged to be constitutional, the chances are very greatly in favor of a decision to avoid the state and turn their footsteps toward states where law and order is respected, and where the voice of the majority is the power that rules.

Again, there is no provision in the statute book which says that officials may be lukewarm in the enforcement of the laws, but always "diligent." We are afraid that within the boundaries of our state many a solemn oath has been violated. "Faithful in the discharge of my duties" means something, but there are many who have failed to discover the meaning or purposely ignore it. To our mind this is nothing more nor less than an outrage upon those who elected them for the the most honest, upright and companexpress purpose of carrying into effect the expressed will of the majority.

In conclusion, the sum and substance of the whole thing: We have a law, a car, and stood facing the south side so his power goes, an ally of communism head and fired as he brought it down, and anarchy. By all means let us EMMETT JONES a roustabout on the have obedience of law if we desire prosperity.

THE WESTERN NATIONAL FAIR. The annual meeting of the Western National Fair association at Bismarck grove next September, gives excellent promise of being successful in every respect. The meeting last year at the same place was so universally regarded as productive of good to the state and of interest to every one who attended, that extra exertion is now being put forth by people everywhere to bring success in greater measure to the meeting this year. The large part of the good which emanates from these annual fairs, reverts immediately to the farmer and stock raiser, and this being the case, it seems reasonable that an extra exertion should be put forth on the part of these classes that the exhibits in the several departments of agriculture, horticulture, stock raising, etc., should be made as near perfect as possible. The beneficial effects will not be long in their appearance, showing perceptibly in better grades of stock, more profitable methods of farming, the cultivation of finer varieties, of more abundant yields, and so on ad infinitum.

recalled by the home government.

A BOLD ROBBERY.

Last Friday night as the Chicago Rock Island and Pacific passenger train was on its way to Kansas City and had just passed Winston, a small station east of Cameron, one of the boldest robberies on record was accomplished by six armed men. The notorious James brothers are supposed to be at the head of the daring and successful robbery, and efforts are now being made by large parties and officers of the law to capture the villians. The following is the account of the Dr. Cramer is the president. Second: affair as taken from a report in the Kansas City Journal. Harry Thomas

"All the shooting of which I had any knowledge occurred in the smoking car. I sat in the rear of the car as we left Winston. Several seats in front of me sat a tall, spare man with heavy black whiskers; he wore a black slouch hat and a long linen duster, and had boarded the train at Cameron. Between me and their party 'Billy' Westfall stood taking tickets from passengers. Suddenly the tall man sprang to his feet and shouted, 'Keep your seats; don't move.' I thought at the was creary and trying to come first he was crazy and trying to come the Younger brothers or Jesse James act, and felt inclined to laugh at him. When I saw the two revolvers and heard them go off I began to think he meant business. Westfall, at the time the stranger jumped to his feet, was sticking a check in a passenger's hat, and was leaning over. Before he could straighten up the revolver went off and saw the wadding rise out of Westfall's coat He staggered past me out on the platform, and that was the last I saw of him until I found his dead body by the side of the track. The shooting was kept up by the man who shot Westfall and by another man in the front end of the car. Where the last man came from I do not know. Another man who was standing on the platform was shot and fell from the ar. The trouble began within a few rods of Winston station, but the second man was killed about three-fourths of a mile further on. The train kept moving on at an increasing rate of speed for fully a mile. Then I shut off the automatic brakes and the train stopped. The point where we slowed up was the other side of Little Dog creek trestle work. Mr. Ewing and I then got off the train and walked back to see what had become of West-We found the body of the man fall. shot last lying by the side of the track near the Dog creek trestle work. It was nearly a mile from that place to where Westfall lay. His body had been taken into the section house, opposite where he was shot. Mr. Ewing

and I put the body on the train going east and took it to Cameron." In response to an inquiry as to Westfall's character, Thomas was visibly moved, and stated that he was one of ionable men he knew

"I don't think," said Thomas, "that the man shot Westfall intentionally. He was shooting recklessly around the so that I think it was accidental. The ball went in at Billy's right shoulder and came out on the left side of the chest having passed directly through his heart.

The other accounts given do not vary materially from the above, and all serve to confirm it. Frank McMillen, the other man who was killed, was a stonecutter. He was on the platform next to the baggage car when the robbers bitters on it, and I thought I would be a fool were riffling the chest, and as he raised to look in the window of the car, he received a shot in the head, and fell forward from the platform. The names of the James boys excites so much dread that the search for them is being pushed with but little energy. Without a reliable clew the officers hesitate before making any decided steps. It is to be hoped that these wretches, so long defiant, will be at last secured, and the country be rid of a long-standing terror.

ENEMIES OF GOOD GOVERNMENT. Upon a recent date a man was arrested on Pennsylvania avenue, armed with a revolver, who said he had come to Washington to kill Blaine. His actions led the police officials to believe him crazy, and when taken to the station house he could not give his name.

The spirit of assassination appears to pervade the very atmosphere, and in every age the bloody fallacy has its coterie of fanatical followers, who with misguided minds seek to right a fancied wrong or elevate to prominence ideas of government, creatures of fanciers

of a repetition.

Answers to Correspondents.

EDITOR SPIRIT OF KANSAS: As the columns of THE SPIRIT devote so kindly the space required to answer querries I avail myself of this opportunity of asking

First: Where is Vassar college situated and what the name of its president! Second: Who wrote "We'd Better Bide NANNETTE. Respectfully, Wee?"

RIVERDALE, Kans., July 15, 1881. First: Vassar college is situated about a mile from Poughkeepsie, N. Y.

Clara Bell is the author of the song you quote from.

General News.

A SPECIAL to the Little Rock, Ark., Gazette gives an account of an affair at Fort Smith which would lead us to the belief that the Indians are fast becoming proficient in American politics. It seems that last Saturday the Creeks and Cherokees were having a grand barbecue preparatory to the nomination of their candidates for the election next month, and that following out the example set by their white brethern a goodly quantity of bad whisky was present and flowed freely, so freely, indeed, that two full blooded Indians, Bill Lovett and Deer Track became fighting drunk. Crazed with the liquor they made an attack on some of the party, and in the general melee which followed seven men were killed or mortally wounded. Jim Saterwaite and his father after being shot had their heads completely severed from their bodies. The murderers are at large and no attempt is being made to arrest them.

In the United States circuit court at Little Rock, Arkansas, Judge McCleary recently rendered an important decision on the right of express companies, and through them having a wide influence. In conclusion the

iudge savs : A railroad company is bound to carry for an express company for a resonable compensation, and must not discriminate against it. A court of chancery has the power to decree a compliance with this wholesome regulation. The court cannot for a moment sauction a proposition of the railroad company which may be extortion or unjust discrimination which excludes an express company from the right to conduct its business upon a railroad. I am not prepared now to fix the maximum rates to be charged for the transportstion of express matter, but I have no doubt of the ability of the lower court after investigating, to do so.

THE convention at Albany has at last made some appreciable headway. Last Saturday enough of the opposition were persuaded in their own minds to yote Warner Miller in as the successer to ex-Senator Platt, but the constitutional law, and he who would raise his finger to place an obstacle in the way of its execution, is, so far as his power goes an ally of communism. week is out E. G. Lapham will have been elected. The last vote yesterday was as follows: Lapham 68, Potter 45, Conkling 28 Woodford 1. Necessary to choice 72.

A Fool Once More.

"For ten years my wife was confined to her bed with such a complication of ailments that no doctor could tell what was the matter or cure her, and I used up a small fortune in humbug stuff. Six months ago I saw a U.S. flag with hop once more. I tried it, but my folly proved to be wisdom. Two bottles cured her. She is now as well and strong as any man's wife, and it cost me only two dollars. Such folly pays. H. W. "DETROIT, Michigan."

MOODY & DAVIS, Lawrence, Kans.

LAWRENCE, WEDNESDAY, JULY 20, 1881.

City and Vicinity.

SEVERAL cows have been killed on the Santa Fe track in this city lately.

GRANT township was well represented at the recent Church Encampment at Bismarck

WHEAT at Willow Springs has yielded about half a crop, fruit is at an average, and flax abundant.

MR. A. S. RICKER, of Kanwaka, with his son and daughter, has gone to Massachusetts and Maine on a visit.

THE invalid finds in "Dr. Lindsey's Blood Searcher" nature's great restorer. It is wonderful. Sold by all druggists. THE city council of Lawrence have decided

that Marshal Prentice shall act as health officer in addition to his other duties. ABOUT a dozen new buildings have been erected in Belvoir the past year, and improve-

ment in other directions go bravely on. MR. JOHN WISE, of Grant township, has bought him a new eighty acre farm about two

miles from this city, paying \$40 per acre. DR. J. D. PATTERSON, of this city, has been elected as one of the instructors in the dental department of the Kansas City Medical college

THE telephone company have received the right of way in this city from the city conncil, and will proceed at once to construct their

It is simply marvelous how quickly constipation, biliousness, sick headache, fever and ague and malaria are cured by "Sellers' Liver Pills."

REPORTS from different parts of the county say that the recent copious rains were quite general, and everything is prospering in conse-

ABOUT the largest field of berries north of the Kaw is owned by Rev. J. C. Bardell, living two miles northeast of Bismarck, who has five acres in strawberries and three in raspberries.

SEVERAL cases of sun stroke have occurred in this city and vicinity during the past few days, and if this weather continues we are afraid there will be a fatal increase of such

belief that the presence of the comet and the prevalence of the heated term at the same time, are facts indicative of bloody murder, war, and general destruction.

LAST Thursday morning Mr. W. W. Bretherton, of Walla Walla, Washington Territory was united in marriage to Miss Gertrude Oliver of this city. The ceremony was performed by Dr. Jones of the M. E. church. We congratulate.

news, the learned local of the Journal perpetrated a joke so horrible in Thursday's issue of the paper, that he has not been able to be around since. Thus are both of Lawrence's terrible item snatchers held in chancery.

State University, residing at Holton, Jackson county, has received a notarial commission from Gov. St. John. Scott's many friends in this vicinity would rejoice to see him prosper, but expect better of him than to settle down as a notary.

THE report of the Douglas County Horticultural society meeting for July will be found in the "Horticultural Department," on another page, also an excellent address from Samuel Reynolds, of Lawrence, on the potato, delivered before the recent meeting of the State Horticultural society at Winfield.

THE fiend who collects items for the Law rence Tribune has been dodging corners for some days in expectation of a sound clubbing at the hands of an irate colored citizen, who

nervous and dyspeptic men and women and are just the medicine needed by all persons who, from any cause, do not sleep well or who fail to get proper strength from their food. Cases of weak stomach, indigestion, dyspepsia, nervous and sick headache, etc., readily yield to the use of the little nerve pills, particularly if combined with Carter's Little Liver Pills. In vials at 25 cents. Sold by Barber Bros., Lawrence, Kans. Little Nerve Pills. They are made specially for

Prosperous Farmers.

special Correspondence Spirit of Kansas Business calling me into the country Monday last, I found myself in the famous Kaw bottom between Lawrence and Eudora. The first thing that attracted my attention was a villiage of wheat ricks at the farm of J. J. McGee, there they stood about one dozen in number looking as though they had been built by Prof. Worrell, of Topeka, in the highest style of his art. Verily, there will be no want of bread at that farm.

About one half mile further on came the farm of W. J. Kennedy. Seeing a large new house I hitched my horse and called in. Mr. Kennedy gave me a hearty welcome at the door, and after a few common place remarks, the conversation was about as follows:

"Mr. Kennedy, when did you come to Kan-"In 1855."

"How much was you worth when you are rived?" Answer. "I was not worth a cent and remained in about the same worthles condi-

tion for two years, when I got married." "How much Kaw bottom land do you own now?"

Answer. "Three hundered and twinty acres all under cultivation."

Mr. Kennedy has just commpleted a large and very finely arranged dwelling house, containing eleven rooms and eight large closets and a bath room, also porticoes or porches on both sides of the house. The windows are beauties, having two very large French plate glass in each, one in the upper and one in the lower sash, all the windows are hung on weights. Every window has a sliding wire screen, also blinds on the outside. The house is painted white and the blinds are painted green. A large bay window in the front end adds very much to the beauty of the house. Under the whole is a very fine cellar, which is divided into three compartments. The outside buildings on this farm are a large barn, corn crib and wheat granery. All the buildings are painted white. In the corn crib I discovered about two thousand bushels of old

Mr. Kennedy, during the last twenty years, has by shrewd and careful management, accumulated this fine property, and now he and his family can live easily and comfortably dur-

ing the remainder of his days. I might go on and tell you something about the fine farms of L. J. Sperry, John Gilmore and several others along this road, but I stopped too long at the farm of Mr. Kennedy, and will have to in a future letter give you a further account of this fine farming district, fearing I have already wearied your patience. J. S.

The Church Encampment.

Continuation of Report from last issu On Tuesday morning at 8 o'clock the juve-SOME of the Belvoir people are firm in their nile institute was an interesting feature, followed soon after by the conduct of normal classes. At 9 a. m. Rev. Howard Crosby, D. D., gave his farwell lecture on "The Temple and Tabernacle." At 2 o'clock p. m. Miss L. J. Rider, A. M. delivered and address on 'Trees, Rivers, Water, Lava and Ice," followed at 4 p. m. by primary teachers normal classes, and at 5 o, clock by methods of conducting ministers and lay workers' institutes. At 8 p. m. Rev. R. A. Young D. D., delivered a telling address on "Our Lord's Reverence for the Old Testament."

In the agony of despair at the scarcity of news, the learned local of the Journal perperated a joke so horrible in Thursday's issue of the paper, that he has not been able to be around since. Thus are both of Lawrence's terrible item snatchers held in chancery.

The A.S. T. Co. ever since the introduction of the metal shoe tip by them have been search—

To the Öld Testament."

On Wednesday the programme was as follows: \$ a. m., juvenile institute; 8:30 a. m., normal classes; 11 a. m., Miss L.J. Rider, A. M., "The Relations of Science and Religion;" 2 p. m., Rev. R. A. Young, D. D., "The Literary Aspects of Our Institution;" 5 p. m., ministers and lay workers' institutes; 8 p. m., A. O. Van Lennep, exhibition of Oriental life, and company of Orientals.

At a business meeting held on the same day

THE A. S. T. Co. ever since the introduction of the metal shoe tip by them have been searching for some material that had its merits as to wear and not its objectionable appearance. This they now have in their tip known as the A. S. T. Co. black and parents should ask for them.

THE telephone company are making arrangements for the introduction of their system. Lawrence will be connected with Kansas City, Wyandotte, Fort Scott, Leavenworth and Topeka, at present, and probably at no distant day with all the principal towns of the state.

We desire to call the attention of our read ers to the cane mills and evaporators manufactured by Thomas Scantlin & Son, Evansville, Ind. This enterprising firm deserve credit for the superior quality of the goods they furnish at living prices. See their advertisement elsewhere.

A. O. Van Lennep, exhibition of Oriental life, and company of Orientals.

At a business meeting held on the same day the following officers were elected: President, Dr. Wm. Jones, Lawrence; vice president, Dr. Wm. Jones, Lawrence, in the following officers were elected: President, Dr. Wm. Jones, Lawrence; vice president, Dr. Wm. Page, Leavenworth; Dr. C. Milner, Ottawa; secretary. Porf. F. O. Marvin, Lawrence. Board of directors: Dr. E. W. Schauffler, Kansas City; Rev. M. Page, Leavenworth; Dr. C. Humble, Williamsburg; Rev. H. G. Jackson, D. D., Kansas City; J. G. Haskell, Lawrence.

The time for the next meeting of the encampment formally classed with the feeling that the meeting had been an entire success and grateful for the support given by the citizens of Lawrence and the surrounding country and cities. Everybody went to their homes feeling repaid for the time and money spent in their attendance upon the meeting and with the belief that the next meeting will be greatly increased in effectiveness.

Drowning at Eudora.

A sad and fatal affair happened last Saturday at the mouth of the Wakarusa, near Eudora, by which two men lost their lives. Mr. M. Mertz, agent and local correspondent of the Germania, of this city, and the Freie Press, of Leavenworth, in company with some friends, went bathing in the river where the Wakarusa empties itself, and being unaccustomed to the river, he got beyond his depth, and sank in water from ten to fifteen feet deep, and neither he nor his companions being able to swim, was soon drowned.

The men who were with him hurried to Eudora to procure help, and a colored man named Perry Harris, volunteered to dive for the body. After diving several times and swimming about in search for the body, he at at the hands of an irate colored citizen, who has been made the victim of said fiend's remarks upon said citizen's toilet. The intrepid courage of the itemizer and the gallantry with which he shouts defiance upon the startled and the two bodies found near together. It is night, has no parallel save in the annals of ancient Knighthood.

The proper persons should try Carter's leaves a large family to mourn his loss.

Lawrence Markets.

Mayor Beatty.

From the Blairstown (N. J.) Press.

In the subjoined paragraph will be found a compliment to Mayor Beatty, of Washington, New Jersey. Thursday evening last it -happened we were on the passenger train that reached Washington at about 7 o'clock, and while stopping to change engines a splendid span of horses was noticed upon the street some distance befow the track, drawing a carriage containing two gentlemen, neither of whom was recognized by us until a hum passed through the car, and the name of Daniel F. Beatty, the Organ King, was spoken with the familiarity of a household word, and in an instant many of the windows were hoisted, as the passengers seemed intent upon getting a better view of the elegant turnout of that well-known gentleman. The Mayor gracefully acknowledged the compliment, and removing his white silk hat bowed repeatedly to the occupants of the train. From the Blairstown (N. J.) Press From the Washington (N. J.) Star.

We heartly endorse the sentiments expressed. We have known Mayor Beatty from the commencement of his career, and have watched with pride the growth and expansion of his business, from its beginning to its present mammoth proportions.

The above extracts and others equally good which we have not space for, coming as they do from Mr. Beatty's own country will give our readers a correct idea of his standing there, and we can only add it is everywhere as good We endorse the above in every respect.

Programme at Bismarck Grove for the

Remainder of the Season.

The Second Annual Kansas State Camp Meeting, under the management of the Kansas and South Kansas conferences of the Methodist Episcopal church, commences July 21st and closes July 31st. For any information concerning this meeting address Rev. A. C. Embree, North Lawrence, Kansas.

The Household.

Letter from Bachelor No. 2.

pecial Correspondence to "The Household." Good morning, ladies, how are you to-day! Why do you sit there staring at me as though I were a lightning rod agent or a tombstone man? Did you never see an old bachelor before? Where is "Old Bach." No. 1? Well, why don't you take my hat and ask me to be seated? Thanks! I will take a seat by the side of Mrs. Roser. Bachelors are not afraid of married ladies, you know. Why there are several of you here, Mrs. Roser, Edith, Mattie, ity of union existing, no such devoted love Contributor and others with whom I am yet unacquainted. And I do declare! there sits A. V. over there in the corner, all to himself, looking as wise as an owl; studying np on "The Family Relation," I presume. And just look in the other corner, if there aint "Old Nick." Mrs. Roser, you have him well caged; yes, and chained beside. And there hangs the Towel." It looks as though it ought to be on the retired list and draw a pension. Well, now for business.

You see, ladies, I only dropped in for a few moments to see whether old bachelors were allowed in your "sanctum" or not. We bachelors are so used to being snubbed, that I hardy knew whether I would be welcome or not.

Mattie, was that you whispered "no wonder ne's an old bach., he's so homely?" I tell you, Mattie, if you would only see me when I'm shaved and fixed up you wouldn't think so. You look quite young, though we can't always judge from looks. I went to see a young lady once who claimed to be only twenty-five, but I knew she was at least forty, and told her so once when she hinted about marrying. I told her I wouldn't have a woman ten years older than myself. That settled her. That happened five years since, but she never bothered me again. Well, now, I've done it, went and told you my age! I do declare! I'm always making

Did you say dinner was ready, Mrs. Roser Nothing I enjoy better than a square meal. Old Nick, will you please to return thanks? Now, Edith, please to pass the pickles. I have had an unnatural fondness for them for several vears.

Well, I vum! Mrs. Roser, you are a good cook. I would like to have some more of your receipts, for you know it is unhandy for men to cook without receipts.

Well, ladies, I must be going. Come and see me some time, but be sure and send me word several days before hand, that I may be prepared. Good day.

OLD BACHELOR, No. 2. Musing Upon the Wonderful Works of God.

Special Correspondence to "The Household." As I sit here by my chamber window almost under the limbs of a beautiful forest tree, the tips of its branches touching my forehead as they sway to and fro in the breezes, my heart swells with rapture as I look out over the beauties of nature, and my soul speaks the John Brown to May J. McCullogh, lot 152 praises of the Almighty. "How marvelous are the works of God; how mysterious His ways; how wenderful His creative powers; how mighty in wisdom and goodness; how wise in all His designs; how powerful in all His undertakings."

He bids the tempest roar, He calms the troubled sea; Almighty is His power, Almighty is His name.

Sometimes we praise man for his greatness, for his deeds of bravery, for benevolence, wisworld's goods, and yet how feeble is he, how vain, how powerless and utterly helpless in the hands of God. When God speaks man trembles and quakes in his limbs and all his strength forsakes him and leaves him powerless of resistance. Like the smitten guard at the sepulcher of Jesus he falls to the earth and hides his face in the dust. Nor can he stay the hand of death or add one cubit to his stature. Nay, he can do nothing only as God giveth him strength. "Great and marvelous are Thy works, O, God! and mysterious are Thy ways," says the Psalmist, "let us laud and magnify thy name for blessed and holy art thou." As we meditate upon the marvelous creations of the Almighty the most wonderful of all is man. Man, a rational being, capable of discerning between good and evil and monarch of all creation, and yet we are told that all living creatures were created, "fowls of the air and beasts of the field and every living thing were create and last of all was man

created. "And God said, 'Let us make man in our own image, after our likeness, and let them have dominion over the fish of the sea and over the fowls of the air and over the cattle and over all the earth and over every creeping thing that creepeth upon the earth.' And the Lord formed man of the dust of the ground and breathed into his nostrils the breath of life and man became a living soul. And the Lord, God, planted a garden eastward in Eden and there he put the man whom he had formed. And the Lord brought of all the beasts of the field and of all the fowls of the air unto Adam for to name and he named every living thing, but for Adam there was not found an helpmeet. And the Lord said 'it is not good that man A. WHITCOMB, FLORIST, Lawrence, Kans. Cat-should be alone. I will make him an helpmeet.' alogue of Greenhouse and Bedding Plants sent free

So he caused a deep sleep to fall upon Adam and he took one of his ribs and formed it into a woman and brought her unto the man and Adam said This is now bone of my bone and flesh of my flesh. She shall be called woman, because she was taken out of man.'''

Now the Lord had a grand design in this particular and mysterious part of his creation. A special design to show to the coming generations that man and wife should be united as if one flesh, one body, and that they should love and cherish one another as if a part of their own body. But since Eve ate the forbidden apple, was banished from the garden of Eden and drew Adam with her, there is no such purbut that the tempter will sometimes rise and stand between them and raise up rebellious feelings and blame.

Though one cannot be happy without the other nor yet walk the earth alone, yet we can nevermore enter that beautiful garden, and if we could, Satan is there and wherever Satan is there will be contention and strife, but by the watchful care and guidance of the Holy Spirit the tempter may be kept so far at bay as to maintain a tolerable unity. Through the fall of Adam we have lost spiritual holliness, but not our love for the flesh, and as Eve beguiled Adam and caused him to sin, so doth the tempter assail and beguile us whenever he can, and cause discord whenever he can. But without this unity of the sexes what would the world be? Where the tie that binds the family relation? Who would care for the helpless? Who care for the children? Were it not for this natural affection which God hath instilled in our natures we would be as the brute; we would not know our own flesh and blood, and consequently there could be no family relation, no family tie, and we would live as the beasts of the forest. Man, who was created in the image of God, pure and holy as an angel, through sin has become the most degraded and desperate creature of all God's creation, and when his anger is aroused he is more hideous and more to be feared than the most ferocious of all beasts. No law, no fear of punishment is sufficient to abate his anger or to control his passion unless taught and guided by the divine law and renewed in spirit. Through the atonement of Christ we are enabled to conquer this sinful passion and become Christ-like. Amiable in disposition and courteous to all mankind. Should we not then strive to attain spiritual guidance and deliverance from all those evil passions which flesh is heir to, and through the atoning blood purge our souls from all iniquity that we may not be doors of evil, but heirs of eternal life through Christ. ORIGINAL.

A Card to the Public.

As I am determined to do the sewing machine business of this city and vicinity and being aware there are still a few who want Singer machines, I have secured the agency of the very best make of Singer sewing machines, and will sell them at the very low figure of \$35.00, two drawers, drop leaf and all extra attachments thrown in. My business manager, Mr. Hazzard, pronounces this the finest finished Singer in the market. We invite everybody to call and see the machines.

Respectfully, CHAS. ACHNING, Agent for the Royal St. John Sewing Machine "The Boss."

Notice.

Last December when I published my statement concerning F. M. Perkins, he, and those in combination with him, promised the public the matter should be investigated in court. It has been so investigated and they or goodness, even for his richness in this to the public in conventigated and they to the public in conventigated and they the case published in a neat volume of 130 pages now ready for delivery, free, to any one who may call for it in person, or through the mail. SAMUEL REYNOLDS, Sec'y. THE POTATO.

An address delivered by Samuel Reynolds, of Lawrence, Kans., before the semi-annual meeting of the Kansas State Horticultural Society, held at Winfield, Cowley county, June 28 and 30, 1881.

I am here as a friend of this healthful and almost indispensible vegetable and to advocate its culture, not that it in 1853 from the Rough Purple Chili, imported needs my friendship, for it deservedly takes the highest rank in the list of as also for the inestimable blessings it America for new varieties. From it was pro-

to present much that is interesting or made that shall encourage or stimulate I shall feel myself amply repaid for this humble effort.

ITS EARLY HISTORY.

The potato is a native of this continent, and was introduced into England was wretchedly poor. Soon after this

Parkinson, in his Theatrum Botani-

as the date of its general introduction somewhat resembles it in appearance. timer, who wrote the "Country- round. It is large and productive and man's Kalandar," says of the potato: well worth testing.

The writer in his boyhood days often conversed with old men who remembered when the potato was hardly known by the poorer classes, the pea is usually called in this country, is col-

"Peas porrige hot and peas porrige cold, Peas porrige in the pot nine days old"

were not only standard dishes for the king."

The potato crop of this country now reaches about 125,000,000 bushels an nually, valued at \$100,000,000, and every year notes an increase unequaled by any other crop. When we compare crop, and consider how many thousand persons are dependent on this vegetable as their main article of food, we begin to realize the great importance of its production.

.VARIETIES.

James Cleghorn, in his "System of Agriculture," published in Edinburgh root are so numerous that it would hardly be possible to give the names of all. They differ not only in quality, being more or less faranaceous, but in appearance of their leaves, haulm, "that the person that never failed never cooking. Estimate the amount you his circular condemned the trap, after trial, flowers and time of ripening, as well lived, and probably never will. All have cooking, and dissolve the acid in for the purposes claimed to be efficient in, and as in color of their roots. New varieties are obtained from the seed contained in the apple. The earlier varieties, however, seldom flower; but by removing the earth from the roots, and the small potatoes as they form, the plant can be made to blossom as readily as the late varieties."

It is claimed that planting tubers for seed tends to degeneracy. It is well known that few varieties retain all their good qualities more than from ten to twenty years, hence the importance of making new varieties from the seed ball. A writer in the Land and Home BAVS:

Hundreds of new seedlings are produced yearly, of which a few are sent out for trial, nearly all of them to be abandoned as failures after a brief career. They probably had a weak parentage, and soon revealed defects; and a single fault, save such as are developed by Jackson White, for example, a moderate yielder, and possessing the bad defect of deep-set eyes, was long a standard variety in the Boston market, chiefly by reason of its superb table quality. The same is true of the Jersey Peachblow in the New York market. Now these are seldom grown, because they have become more subject to disease, but especially as other varieties equally good for the table, better in form, and more prolific, have crowded them out. The Goodrich "Garnet Chili," derived from the South American mountains, and the only seedling saved out of 1,700 sorts, cost the originator \$300. But its worth may be estialas! that it is not always exactly edible-and the Rose. But the Rose is now twenty years

Among the new varieties possessing particular merit are the "Early Ohio." "Early Vermont," "Beauty of Hebron," and "Mammoth Pearl." The Beauty of Hebron will probably prove the to feed upon. If the grower can thus market his new to this society. If, however, any most valuable of all the early varieties. facts shall be stated or suggestions It has luxuriant foliage and is a vigorous grower. The tubers are shaped a better or more profitable mode of like the Rose, are smooth, slightly the newly cut sets with gypsum or ycilic acid. I have a can of strawber- I have been asked if grape juice and growing this tuber, thereby improving tinged with pink around the eyes, and the flesh attains a pure white color, with excellent flavor. It is considered to be ten days earlier than the Early stimulant. Guano is also a valuable Rose.

The Mammoth Pearl is a medium late potato, and is likely to supersede thoroughly with the soil before using the Peach Blow. It was originated in it. Ohio, and selected from over 2,000 the surface, its shape is oblong to round, apart. As the tuber is not the seed, it it is dry and mealy, and withal very is not necessary to select the largest

There are several other new varieties of which I can say but little from per- quality. Many of our most successful sonal knowledge. Among these are the potato growers prefer the medium

HOW PROPAGATED.

The potato apple or plum ball, as it water until the pulp is rotten. The seeds are then washed out and dried. They are sown in the spring in a frame, and pricked out into a sheltered bed later in the season. The first year the tubers are very small, not being larger than peas. The seedlings, however, present a very considerable series of varieties in the shape and color of the tubers, habit of growth, etc. The small tubers belonging to each plant are kept separate, and planted again the succeeding spring. At the end of the season the tubers are found to be about the size of pigeon's eggs. The third year the tubers grow to the usual size, and may then be sold for planting. It therefore takes three years to produce a new variety of potato, and as the quantity available for seed is very in 1831, says: "The varieties of this small, the price per pound is often very great for the first year or two, when it falls with the spread of the variety.

CHANGING SEED. Many careful and systematic experiments have been made in this country for determining the advantage of changing seed, as it is termed. Many observations and experiments lead me to believe that the farmers of Kansas can annually double the product of this crop by obtaining seed from the states of Iowa and Wisconsin, and this can be done without much extra expense. For instance, I have planted, say, two bushels of the Early Rose grown in Iowa, which cost me about \$2. From this patch I expect to dig from thirty to forty bushels, which will make my seed for next year's crop, and which will plant from three to five acres. By annually continuing this process, I change my seed every two years, incur but little extra expense, and double my vield of potatoes.

Some contend that the best seed is procured by digging before the potatoes are fully ripe and storing carefully

ITS CULTURE.

Having had twenty-five years experience in Kansas, including both failures and success, in growing this vegetable, I may be permitted to suggest what methods will be most likely to return the best results.

It is sometimes said by persons fond of indulging in figures of speech, that if you "tickle the soil of Kansas with a plow, it will laugh with a crop;"but I submit that in order to evoke the good nature of the soil of Kansas, in the production of the potato crop, it must be tickled with plenty of manure. A mellow, dry soil, enriched with an abundance of well rotted manure is necessary our Kansas soil, however, if it is well enriched with manure, will produce good returns. It is vain to expect a good crop of potatoes from other than rich land. To attempt it would be a waste of both seed and labor. The potato plant is a great feeder, and there is little danger of giving it too much

Prof. Johnson, of Yale college, tells us that one of the surest ways to secure a good crop of potatoes is to sprinkle plaster of Paris. If this be so it has the merit of being a very cheap and easy way of furnishing the necessary manure for the potato, but great care must be taken to mix this fertilizer

The land should be plowed deeply, well harrowed down, and laid off with for planting in order to improve or retain for production quantity or sized tubers for seed, as they are usualpion of America, and the White Rose. ly firmer, and less liable to rot than I must not forget, however, to men- larger enes. It is not advisable to plant whole ones, as they send up too many number than can grow to marketable size, cut your seed potatoes, therefore, leaving but two or three eyes in a set. Be careful and not pack the freshly cut sets in barrels nor pile them in large heaps as they would be likely to heat, which would destroy their vitality. Many a crop has failed from this cause.

Concluded on Eighth Page.

Farm and Stock.

Subscribers are earnestly requested to send for publication in this department any facts not generally know, but of interest to stock raisers and farmers. "Farmers, write for your paper."

Facts About Johnson County. From the Second Biennial report of the Kansas State Board of Agriculture.

Of winter wheat this county sowed last year 30,953 acres, from which was raised 464,295 bushels, valued at \$468,-937.95.

Of rye 473 acres were sown, yielding 7,095 bushels, valued at \$2,838. Of spring wheat only 60 acres were

sown which yielded 600 bushels, valued at \$546. Of corn 57,605 acres were planted,

yielding 1,900,965 bushels, valued at \$494,250.90

Of barley only 40 acres were sown, yielding 1,000 bushels, valued at \$500. Of oats 7,760 acres yielded 232,800 bushels, valued at \$65,184. Of buckwheat only 10 acres were

sown, which yielded 150 bushels, valued at \$135. Of Irish potatoes 1,907 acres were

planted, which yielded 74,596 bushels, valued at \$44,755.60 Of sweet potatoes 133 acres planted,

which yielded 13,294 bushels, valued at \$1 per bushel. Of sorgham 156 acres were planted,

which yielded 17,997 gallons, valued at \$8,098.88 Of flax 30,538 acres were sown, and a

yield of 305,385 bushels secured, valued at \$1 per bushel. Of tobacco only 11-4 acres were plant-

de, but a yield of 925 pounds were secured and valued at \$92.50. Of broom corn 165 acres were planted, yielding 165,000 pounds, valued at \$5,

From millet hungarian, timothy, clover and prairie meadow in all 25,543 acres yielded 35,962 tons valued at

\$159,070.30. The total valuation of the yield of the county is estimated at \$1,579,058.33. The live stock in the county for 1880

was as follows: Number of horses, 6,675; mules and assees, 1,209; milk cows, 6,050; other cattle, 12,523; sheep, 1,380; swine, 25,292.

This county now has 185,454 acres under cultivation from which the foregoing sources are obtained.

Blue Grass Pasture.

From the Iowa State Register.

There is a general objection to allowing grass to become over a few inches high in pastures, as it will become tough and not relished by stock. Such is not the case with blue grass, except in May and June, when it goes to seed. out of ten to the death of the chick spring of the year, when they begin to For fall and winter pasture the taller from the lack of heat), its contents be- shed each fellow will get his neck the grass the tenderer it is. lands, and it will pay, and pay richly.

Poultry Items. rom the New York Weekly Tribune.

An elaborate and expensive house is not a necessity but a disadvantage in poultry keeping. The two great obstacles in the way of success in this business are vermin and colds. The costly house affords no protection against either. Of the three kinds of insects which infest the common fowl, the mite is the worst and hardest to get rid of. The louse, body or feather, is rolled off in the dust bath, and may be husbandry on life and character. The killed or driven away by applying Per- Bible and history tell us that sheep sian insect powder to the fowl; and be- husbandry has been an occupation ever sides, they seldom breed in such num- since the peopling of this earth. Influences of Sheep Husbandry on Life and Character.

Lee McDaniels in Western Rural

It has been assigned my duty to write an essay on the influence of sheep its habits, in attacking its victims while stance that took place six thousand years ago between two brothers, and the insect which is so destructive to down the shepherd's office has been sitting hens; they have no chance to be honored by patriarchs, prophets, free from it in the daytime. A thorough | priests and kings. Abraham, Isaac and dusting with Persian insect powder Jacob, and almost all the prophets, once or twice a week, is a great help to priests and kings were shepherds; and the hen, but it does not destroy the God honored the occupation. And I myriads which dwell in every crack in am glad to-day that I am a shepherd. The glad news was told the shepherds by night of the advent and mission of the blessed Savior, and will continue to be told till the end of time by humble men. Our occupation will always be honored, and now stands forth in the United States. It is not only honorable, but its occupation has a good

Most of men feel well when making money easy and fast; you can always count on him being in good humor. There is nothing about sheep husbandry to cause a man to get out of fix once in a year. There is no rooting up of nice blue-grass pastures, nor for one to break back in driving, like hogs always do, and cause a swearing influence to come upon man, if there is any in him, or to eat two crops of corn and then smudgy, but a week or two will put die with the cholera, for when you have them fat, you must sell high or are hatched in infested nests; the hens low. Not so with sheep. I know can't sit closely enough to keep up the there is money in hogs when the tide requisite temperature. The constant runs smooth; but it is hard on men, twisting about of the head to pick the hard on ground and hard on teams. bitten spot lets a little cold air to the Cattle come next to sheep, but when eggs, and the embryo dies in conse- they are large and heavy they almost quence. The disease is rarely 000,000 that we import each year. Let if ever known where a eool shade, us work.

Let us ask our present Legislature to make one small change in our present dog law. Some of the townships in each county are behind as much as three years. Some are ahead and paying money into the school fund. Now, we ask that this fund be equalized and thrown into general county fund, which would pay for all the sheep killed, at a fair price, and leave a balance there to go into the school fund. The county superintendents and school men are willing for the sheep men to have pay for their sheep, as was the intent of law. We ask the change on the ground that dogs do not know a township line, and may go or come five miles to do their work. I have investigated this matter and know whereof I am speaking. This would leave the present tax on dogs just where it is, and give us plenty of money to-day for our sheep at just the price we buy and sell at for cash. This is the law, and when our township trustee understands this there will be no trouble in getting pay for our sheep according to what they are

Veterinary Department.

This department is designed especially for all subscribers having horses, cattle, sheep or hogs in any way injured or diseased. To benefit this class they are requested to send as plain a statement of each case as possible to this office and a diagnosis and mode of treatment will be given in onr next issue by the best veterinary surgeon in Lawrence. In all cases the advice will be given free of charge.

From the Western Rural.

I have a very valuable mare that has got a fistula on her shoulder. It has been coming since last February, one side is broke and running, the other side swollen, but not much fever now. I have been using carbolic acid, and sulphate of zinc. All the leathery substance has come out but it does not heal. The animal is in good flesh.

ANSWER.—Fistulas should be freely explored with the knife. When very deep seated insert setons through the various canals, pushing the seton needles through the same and out through bones of the spine exists, remove the decayed portions by scraping. No cure is possible so long as decay of bones is going on. Syringe out the cavities thoroughly with warm water twice daily, and then inject a portion of a solution of one ounce of carbolic acid to each quart of cold water. In cases of unhealthy granulations or sloughing, apply a solution of half a drachm of chloride of zinc to each six ounces of water. To facilitate cleansing of the surrounding parts, and prevent the hair from falling off, apply a coat of lard around and below the orifices after

Continued from Sixth Page.

My advice, therefore, is to spread them out in a cool, dry place, when the cut will soon dry over and the new sprouts that start will be strong and vigorous. After allowing them to remain a few days to dry, they should be planted about a foot apart in the row, already marked out. They should not be covered very deeply, as they grow

the crop. There is no danger of doing injury to the crop by the use of a light harrow. Frequent and deep stirring of the soil with a double shovel plow, or other suitable implement, while the crop is growing, is indispensible. Indeed, to insure the best results the surface should be stirred after every rain. When the new crop is well formed, the soil may be thrown upon each side of the row with a diamond plow, care being taken not to cover the vines. If weeds make their appearance after this, they can be removed with the hoe or by hand.

Although the late varieties are grown with more certainty in the more northern latitudes, the early sorts succeed as well in Kansas as in any part of the known world. Our summers are frequently too hot and dry for the late crop, especially the Peach Blow which does not begin to form tubers till about inch chisel, one half inch chisel and screw August; which fact accounts for the driver; or a silver plated butter-knife. frequent failures in that variety. On the other hand, our springs seldom or never fail to propuce a full crop of the early varieties when the foregoing directions are practiced. Art is sometimes invoked to assist nature in growing, even this tuber. It is done in this way: The potatoes are planted at the usual time, being covered very lightly with soil, and then mulched with long manure, hay, or straw sufficiently deep to retain moisture and prevent the growth of weeds. By this method a good crop can be grown in the dryest season. To the uninitiated, the large quanity of material, and great amount of labor required to mulch an acre are you do well at this, you may feel pretty sure quite incredible. If long manure is of your success in the future, but never give up used, allowing one load to cover 200 square feet, one acre would require 217 loads. If the mulching is done with dry hay or straw six inches thick, one acre would require forty-two tons, allowing 512 cubic feet to the ton. Almost anyone, however, can experiment on this method with a small ther profit by their valuable experience by patch.

The potato can be preserved for several years by converting its faranaceous matter into flour and then drying and closely packing it. In this form it is often used in place of arrow root in continental hospitals. An intoxicating drink can be made from this tuber, even after it is so injured by frost as to be useless for other purposes. not propose to tell how it is done.

achieved wonders in the improvement gentleman, who can talk something else than of this important vegetable, but perfection has not yet been attained. A is well up in the advertising department of potato may yet been attained. A modern amusement annals, and faithfully represents the interests of his employer.

"I suppose Mr. Goup has certainly many strong and vigorous "overties this season," ventured our response men. "potato beetle," a strong and vigorous "potato beetle," a strong and vigorous grower, an enormous producer, fine flavored, and possessing the best of keeping properties.

young man.
"Well, I should smile audibly," replied Mr. Pilling. "Mr. Coup, after his years of experience in the show business, has introduced and combined new attractions that never have keeping properties.

better and larger near the surface. A small shovel plow, in skillful hands, is a good implement for this purpose. I prefer rows to hills for two reasons; more potatoes can be grown to the acre, and in the event of a dry season, hills, having a greater amount of surface exposed dry out more quickly than rows. In latitudes from forty to fifty degrees the hilling system answers very well, but not so in Kansas, in my opinion.

After the crop has been planted long enough to make a good start, and before coming through the ground, run a light harrow over it both ways. This will destroy all the young weeds on the surface, leave the ground in nice order to cultivate, allow the potatoes to come through clean, and saye much labor in the future cultivation of the crop. There is no danger of doing and see that it is spent profitably, for it is prescious, and when once gone is gone forever. Take the advice of your fathers and mothers, and grow up to be good, honest men and women, and when they have passed away you will be prepared to take their places in the world, and make life a success.

UNCLE JOHN. VALLEY FALLS, Kans., July 18, 1881.

SPECIAL OFFER.

In order to give an opportunity to our young readers especially, though not exclusively, to make some pocket money, or to earn something useful or ornamental, we make the following offer of premiums for new subscribers to THE SPIRIT OF KANSAS.

For two new names we will give any of the following: One box of stationary containing a pen, pencil and eraser; or a solid silver thimble; or a game of authors.

For THREE new names we will give an autograph album; or a set of chessmen; or a pocket knife.

For Four new names we will give a set of tools containing a drawing knife, one quarter

For FIVE new names we will give a volume of Dickens, containing four stories, handsome ly bound in cloth and finely illustrated.

Each name sent in must be accompanied by the full subscription price, \$1.25, if for the premiums, or the name will not be counted. Now here is a chance to make something for your home or your pocket-book, without tak ing a great deal of your time. Let us see who can send us in the largest list of names. For every name over five you send us, we will allow you twenty-five cents, so if you get five, don't stop at that, but keep right on and make yourself some money. However, young friends don't be discouraged if you are not successful the first time you ask for a subscriber, but persevere in spite of defeat and it will be all right, remembering that all successful canvassers often meet with defeats, and if

If any wish to get up clubs of two or more we will allow twenty-five cents on each new subscriber, to the one who sends the club. EXTENSION OF TIME.

Inasmuch as quite a number of our young friends are just beginning to realize what perseverance will do in the way of soliciting subscriptions, we have decided to let them furextending the time for soliciting on the above terms one month longer or until August 6th. and we trust a number of others who have not yet made the attempt, will also avail them-selves of the opportunity.

COUP'S CONQUEST. Twenty Minutes with Frank Pilling. the Press Agent, in his Palace Car.

stop That Cough.

If you are suffering with a cough, cold, asthma, bronchitis, hay lever, consumption, loss of voice, tickling in the throat, or any affection of the throat or lungs, use Dr. King's New Discovery for consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of Dr. King's New Discovery have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only sure curs for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle fee of cost, or a regular size for \$1. For safe by Barber \$100.

Joung Folks' Department.

DEAR YOUNG FOLKS:—As I see your column has been empty for some time I thought I would write you a few lines about "Youth." You are now enjoying the spring time of your lives; your morning sun has risen, and is slowly, but surely, wending its way to life's noonday; and youth so pleasant, and so free from care will soon have passed away as a pleasant dream, and you will have to take part in the activities of life. You are now moulding your characters for manhood and

horses.
"What has become of the great and glorious Melville, the world's favorite rider?" asked

Melville, the world's favorite rider?" asked the reporter.

"Oh, he's with us, and also his son, George, and Willie Odell. Mr. Coup has \$10,000 that says there are no better and more fearless riders in the world than this clebrated trio. Among our lady riders will be found Miss Kate and Emma Stokes, the most noted female equestriennes in the country. Miss Emma is the oldest, and is known as the "Queen of the side saddle." She is of a retiring disposition, and an accomplished and beautifullady. Miss Katie is eighteen years old, and a most daring bare back rider. Upon the back of a horse she is the very poetry of motion. She is taller and fairer than her sister, with a beautiful Madonna like face, and is the lite of the company. The little Japs bow to her is reverence. Miss Emma is the owner of six horses. One of them, "Tom," Ifollows her around like a dog, and seems to care for no one but her, as he is vicious to every one else. "Tom' has injured several of his grooms. Some idea of their expenses may be gained from the fact that Miss Katie had 180 dresses made for her last season. The powdered rosin which is used easily soils her beautiful garments, and as she is a parti-Katie had 180 dresses made for her last season. The powdered rosin which is used easily solis her beautiful garments, and as she is a partitular neat little body, it won't do. There is nothing that will break a woman all up as soon as a spot on their dresses, you know." "Among other attractions," continued the gentleman agent, "are the Japanese attractions, the feats of the Indian tribe, the amusing tricks performed by the trained dogs, the

tions, the feats of the Indian tribe, the and as ing tricks performed by the trained dogs, the wonderful erial fights of Lulu across the vast hippodrome tent, the Aquarium with its aquatic marvels, the wonders and mysteries of the Scientific and Mechanical Departments and the large collections of wild animals are additional costly features."
