## I. ACKNOWLEDGMENT

The author wishes to take this opportunity to express his deep appreciation to Prof. Amos I. T. Chang of the Department of Architecture, Prof. Ingolf Eugene Thorson and Prof. William R. Jahnke of the Department of Building Science, and Prof. Alton A. Barnes of the Department of Landscape Architecture at Kansas State University for their advice and encouragement contributing to the completion of this thesis project.

The author, of course, also would like to express the appreciation of the helps he has received from Boston Redevelopment Authority and various Chinese associations in Boston during his purposeful and casual inspection trips to the city contributing tremendously to the success of the project.
