

EFFECTS OF DISPLAY LIGHT INTENSITY ON COLOR STABILITY OF
FROZEN BEEF CUTS IN TRANSPARENT FILM

ACKNOWLEDGEMENTS

It is a great pleasure to acknowledge my indebtedness to Dr. Donald H. Kropf, my major professor, whose advice, support, understanding and patience during my academic work have been invaluable to me, both professionally and personally.

I also wish to acknowledge my gratitude for the advice, criticism and technical assistance of my other professors, my fellow graduate students, and members of the staff.

And certainly I am most grateful to my parents for their sacrifices and financial support, and for their interest and encouragement in this undertaking.

TABLE OF CONTENTS

CHAPTER	PAGE
I. INTRODUCTION	1
II. REVIEW OF LITERATURE	3
Color and its Measurements	3
Meat Pigments	10
Factors Affecting the Stability of Meat Pigments	18
Literature Cited	35
III. EFFECT OF DISPLAY LIGHT INTENSITY ON COLOR STABILITY OF FROZEN BEEF CUTS IN TRANSPARENT FILM	42
Experimental Procedures	43
Sample Selection, Preparation and Display	43
Color Determinations	44
Statistical Procedures	46
Results and Discussion	46
Display Temperature	46
Light Source	49
Intensity	54
Percent Reflectance Changes with Display Time	59
Visual Score Correlations	63
Summary	70
Literature Cited	72
APPENDIX	74

LIST OF TABLES

TABLE		PAGE
1	Mean visual score values of frozen beef <u>longissimus dorsi</u> and <u>psaos major</u> muscles at all time periods .	50
2	The effect of display lighting type and intensity on percent reflectance at 630 nm of frozen beef <u>longissimus dorsi</u> muscle	52
3	The effect of display lighting type and intensity on percent reflectance at 630 nm of frozen beef <u>psaos major</u> muscle	53
4	Effect of display lighting on visual score of frozen beef <u>longissimus dorsi</u> muscle (mean value) .	56
5	Effect of display lighting on visual score of frozen beef <u>psaos major</u> muscle (mean value)	57
6	Effect of display time on beef <u>longissimus dorsi</u> muscle mean value for all variables	60
7	Effect of display time on beef <u>psaos major</u> muscle mean value for all variables	61
8	Correlation coefficients between visual score and objective color measurements of frozen beef <u>longissimus dorsi</u> muscle	64
9	Correlation coefficients between visual score and objective color measurements of frozen beef <u>psaos major</u> muscle	67

APPENDIX

APPENDIX	PAGE
A	Visual color score scale, time period identification, and treatment combinations 74
B	List of objective color measurements (<u>longissimus dorsi</u> and <u>psaos major</u>) 75
 TABLES	
C-1	Mean square values for treatment effects on visual score of frozen beef <u>longissimus dorsi</u> 76
C-2	Mean square values for treatment effects on visual score of frozen beef <u>psaos major</u> 77
D-1	Effect of display and evaluation lighting on visual score of frozen beef <u>longissimus dorsi</u> muscle (mean values) 78
D-2	Effect of display and evaluation lighting on visual score of frozen beef <u>psaos major</u> muscle (mean values). 79
E-1	Effect of display light type x intensity x evaluation lighting interactions on visual score of frozen beef <u>longissimus dorsi</u> muscle (mean values) 80
E-2	Effect of display light type x intensity x evaluation lighting interactions on visual score of frozen beef <u>psaos major</u> muscle (mean values) 82
F	Effect of display lighting source and intensity on mean square values of <u>longissimus dorsi</u> muscle 84
G	Effect of display lighting source and intensity on mean square values of <u>psaos major</u> muscle 87
H-1	The effect of display lighting type and intensity on percent reflectance at 474 nm of frozen beef <u>longissimus dorsi</u> muscle 90
