ACKNOWLEDGMENT

I extend my sincere appreciation and gratitude to Dr. Janice Sanner Merriman, Head of the Biomechanics Lab at Kansas State University, for her efforts in guiding me, not only through the preliminary and subsequent work and writing of this thesis, but also for her leadership and encouragement as an instructor during my graduate studies.

Special thanks is also extended to Dr. Charles B. Corbin, Chairman of the Department of Physical Education at Kansas State University. His influence has and will reach far beyond the writing of this paper.

Dr. Larry Noble and Dr. Mike Holen also deserve my sincere gratitude for their understanding and encouragement during my education at Kansas State University.

A special appreciation is extended to Mr. Kirk Rose, Instructor at Eastern New Mexico University, for his encouragement and aid in helping me to further my education.

My thanks also to each of the subjects for their participation and to the Graduate Assistants of 1973-74 who helped in various aspects of this study.
