ACKNOWLEDGEMENTS

In writing this Report, I relied confidently on advice, constructive criticisms and suggestions from various experts especially the members of my Committee under the Chairmanship of Dr. C. V. Hess. While Dr. Hess enthusiastically and willingly guided me throughout the preparation of this Report, the other members of my Committee, Drs. Orlo Sorenson and Jan Flora, made valuable suggestions in the final editing of this report. The Committee members are neither responsible for any erroneous content nor for the views expressed.

My special thanks go to the Ayangba Project Executive Committee (APEC) and the Ayangba Project Management Unit (APMU) for sponsoring this Master's Course at the Kansas State University.

I also wish to register my appreciation for the understanding, encouragement and support given to me by my family--Rebecca (RN), Grace, and children--throughout the length of this course.

Finally, may I thank the staff of International Agricultural Programs, KSU, especially Luann Wassenberg for her untiring efforts and her more than official readiness to assist international students in time of need.
