

LIASION

1972

This Is Kansas Tech

As I look back on my two years at Kansas Tech, I realize there was a lot more to it than just going to classes and studying. I also found time to attend the dances sponsored by the SGA, to bowl, play in an occasional basketball or volleyball game, or to watch Varsity Soccer at its best. Of course, aside from the sporting activities there were clubs such as ASCET and Ham Radio Club, to name but a few. On top of all of this I found time to be the editor and also to graduate.

It is my hope that in the years ahead this book will serve as a memory of our good times at Kansas Tech.

Teresa Long

The Backbone Of

A Message From The President

I am sure that in 1982 when we look back to the 1971-72 school year, we will all see it as a transitional period for the Kansas Technical Institute. Transition in the sense that no longer was it still trying to be born as an institution of higher learning, but that it changed into a still new, but dynamic, force in technical education in Kansas.

During this year you participated in the events which saw Kansas Technical Institute leading the way in the development of innovative programs designed to increase mobility from vocational training to technical education, on the one hand, and from technical education to acceptance of our course work and graduates by four-year institutions as well as increased seeking out of our graduates by employers.

This year saw K. T. I. and Kansas Wesleyan form an educational partnership which will greatly benefit both schools in the future.

To the class of 1972--I wish you success and satisfaction in your career.

To the class of 1972--I look forward to welcoming you back to your senior year and the new K.T.I.

JAMES O. THOMPSON
President

DIXIE HENDERSON

Physical Plant Secretary

General Technology

PROFESSOR WILLIAM B. POWELL
Department Head

Although there are no students enrolled in the General Technology Department, this department has more faculty than any of the others because of its nature. All the students on campus take up on one half of their curriculum in the GT department. It provides service and support courses in math, physical and social science, and communications.

In addition, a new program for the General Technician has been adopted for the 1972-73 academic year, thus making GT a degree-granting department.

CONNIE RUNYAN
Secretary

Aeronautical Technology

PROFESSOR WILLIAM T. HOLBURN
Department Head

The Aeronautical Technology department at Kansas Tech is training aircraft maintenance personnel to work in Kansas and the nation. The graduates are qualified to take the FAA Airframe and Powerplant examination to become licensed aircraft mechanics.

With the addition in the spring of 1972 of the Aviation Maintenance Management curriculum we should see many of the graduates assuming leadership roles in the Kansas aviation scene.

**Civil
Engineering
Technology**

PROFESSOR CHARLES D. MAY
Department Head

In order that we may travel from place to place by land, water, or in the air, it is usually necessary that we change the physical features of old Mother Earth. The planning location, construction, and maintenance of the physical changes is what Civil Engineering is all about. By explaining this, the understanding of Civil Engineering Technology becomes easier. The Technician is the one who takes the planning concepts, the location ideas, and the construction possibilities and turns them into a completed project, may it be a set of design plans, a location survey, or a process of supervising the physical change.

**Computer
Science
Technology**

PROFESSOR KEARNEY H. HILL
Department Head

The electronic computer is said to be one of the most powerful tools ever devised by man. In fact, some experts rate the computer as more important than the wheel--the wheel helped minimize physical labor but the computer has helped minimize mental labor.

Companies are discovering that computers can help maintain tighter control over all operational areas. They can help reduce costs in accounting and related paperwork, save time, money and materials in design and manufacture., and develop current, meaningful information on which to base top-level decision. In short, computers help firms meet the specific challenges they face in their current, fierce competitive society.

One thing must be kept in mind, however: PEOPLE CONTROL COMPUTERS! A computer is no more intelligent than the PEOPLE who program it (not even our own IBM 1130, "Matylda"). And this is our goal; To help PEOPLE learn to work with computers so that together, humans and computers can work out their destiny.

PROFESSOR CHESTER L. RANKIN
Department Head

Electronic Technology is a relatively new form of education which came about with the discovery of such systems as radar, television, certain areas of X-ray, and bio-medical laboratory and patient surveillance equipment.

Originally, many of these topics were included under the broad term "electrical" and were considered options of the electrical power area.

As the use of electronics expanded in other areas, it became more evident to people within the field that more time should be allocated to the study of devices and systems applications as a major field of study rather than an option.

As the use of electronics expanded in other areas, it became more evident to people within the field that more time should be allocated to the study of devices and systems applications as a major field of study rather than an option.

Electronics at Kansas Technical Institute is probably best described as a basic curriculum that will allow the graduate the widest versatility so that he may be employed in industry and work with engineers and other technicians to develop special areas. The graduate might be employed as an aide to an engineer designing such things as television sets, two-way radios, or perhaps electronic test equipment. He would not be employed to repair such equipment.

**Mechanical
Engineering
Technology**

PROFESSOR DONALD L. BUCHWALD
Department Head

ANGIE VANDERBILT
Secretary

Have you (and I'm sure many have) ever watched a machine or device, no matter how simple or how complex, performing its "THING"? In watching the unique working parts as they move in coordination with each other, have the following questions come to mind? How does it ever work? Why did they build it that way? What materials did they use and why? How many drawings would it take to show all the details? How can it be changed?

Mechanical Technology is that part of an industrial activity which incorporates drafting and design,

Mechanical Technology is that part of an industrial activity which incorporates drafting and design, mechanisms, materials, and manufacturing methods to produce better products for the future. The instructional material centers around occupational elements that normally cannot or are not obtained through experience alone.

Each year many young men and women accept the challenges of designing, testing, and producing the "products of tomorrow" by applying the basic knowledge of Mechanical Engineering Technicians to their jobs throughout the industrial world.

Activities

Student Governing Association

SGA BOARD, Fall 1971; SITTING (L TO R), Ron Pierron, Treas.; Teresa Long, Sec.; Dennis Shreves, Pres.; Bob Kuhn, Student Coordinator. STANDING (L TO R), Bob Kass, Computer Rep.; Ric Koehn, Civil Rep.; Jack Applegate, Aeronautical Rep.; Not Pictured--Dave Young, Vice Pres.; Bruce Preston, Electronics Rep.; Les Mosier, Mechanical Rep.; Lyle D. Jones, Advisor.

The SGA (Student Governing Association) not only served to guide and unite the students, faculty, and staff; but also sponsored many clubs and activities.

They sponsored live band dances once a month, gave prizes to the 3 best costumes at the Halloween Dance, and arranged the Semi-Formal Banquet and dance in the spring.

They were responsible for the improvements made in the Student Activities Center and Student Union, as well as the First Annual K.T.I. Olympics.

The clubs they sponsored will be shown and described on the following pages.

The SGA even sponsors activities for the "little kids" on campus.

SGA BOARD, Spring, 1972; SITTING (L TO R), Mark Vogel, Vice Pres.; Billy Wenger, Student Coordinator; Deanna Herman, Sec.; Dennis Shreves, Pres.; Ron Pierron, Treas.; STANDING (L TO R), Gerard Giersch, Electronics Rep.; John Wakulich, Mechanical Rep.; Bob Kass, Computer Rep.; Doug Vogelsberg, Civil Rep.; Jack Applegate, Aeronautical Rep.; Lyle D. Jones, Advisor.

WINNERS: 1st, Budman; 2nd, Batman and Catwoman; 3rd, Raggedy Ann and Raggedy Andy.

First prize goes to Budman.

KTI Olympics

Preparation for the parade...

...that began after President Thompson lit the torch.

First Prize Float

The Broom Throw

Oops! Missed again!

"And into the last stretch is Giersch, followed by..."

For those who have forgotten, events included the chariot race, the tricycle race, the can kicking contest & the javelin throw.

ASCET

Our student chapter of the American Society for Certified Engineering Technicians is a service organization to both students and non-students. This year ASCET sold refreshments at the KTI Soccer games and helped with the Jaycees Peanut Butter sale for Cerebral Palsy. For the students they sponsored field trips to several industries and some social activities.

Tau Omicron Tau

SITTING: Mike Bukaty (Sec.-Treas.), Lewis Stephenson (Pres.), Howard Meier (Vice-Pres.).
STANDING: Art Reyes, Mark Vogel, Ron Pierron, Doug Vogelberg, Dennis Shreves, Bob Kuhn,
Not Pictured: Charles May, Advisor.

The purpose of Tau Omicron Tau Honor Fraternity is to provide recognition for outstanding academic achievement to KTI students. Activities of the fraternity include providing a scholastic scholarship, offering special tutoring and providing student services for special school events.

K Club

"K" CLUB MEMBERS (LEFT TO RIGHT): Coach David Hickerson (Advisor), Ric-Koehn (Sec. -Treas.), Steve Anderson, Fred Pack, Jack Applegate, Bruce Preston, Mike Rombeck, Greg Pettijohn (Pres.), Ernie Smith (Vice Pres.), Dave Weibe, Charles Joy, Dave Furse.

Roy Holden, wing-back for the Varsity Soccer Team, receives his letter award jacket from Coach Hickerson.

The Technicality

"THE TECHNICALITY" Staff
STANDING LEFT TO RIGHT:
Larry Robinson, Co-editor Art
Reyes, Co-editor; Fred Pack,
Printer; Lyle D. Jones, Advisor.
(SEATED) Liz McDonald, Typist.

Annual Staff

Due to my oversight and fact that the staff worked on their own instead of in group meetings, a picture of the Annual Staff is not available. The Staff consisted of:

Jim Barth
Teresa Long--Editor
Art Reyes
Larry Robinson--Photographer
Chris Schlesener
Lyle D. Jones--Advisor

I would like to take this opportunity to thank my staff for all their work, especially Larry, who was called upon many times to take pictures on very short notice. I would also like to thank those people not on the staff who helped.

To next year's staff I will say only good luck!

Graduation 1972

The Fifth Commencement Exercise was held Sunday, May 7, 1972 in the Schilling Community Center. Mr. George Elliot from the Sandie Corporation was the guest speaker. The 62 member class was the largest so far to graduate from Kansas Tech.

Gym Activities

"Cowboy" Bernard turns on the speed against Beechcraft in a practice City League game.

Randy Reed (21) puts up a shot while Howard Meier (13) and Art Reyes (2) watch in a City League game at South Junior High Gym.

The gym directors this year were Randy Reed during the fall and Dewayne Harris in the spring.

Basketball dominated most of the athletic year at the gym. A city league team was formed by Coach Ed O'Dowd. They played several city teams during the season.

Intramural basketball, on the other hand, was very successful. The defending champions Electronics were defeated 56-51 by Civil in the last game of the season.

Paddleball tournaments were also held in the gym. Dewayne Harris handled the tournaments and kept paddleball alive.

Volleyball intramural games finished off the spring.

George Chitwood and Dennis Shreves go up for the tip-off.

"Come on guys, it shouldn't take all of you to get that little ball over the net."

Dennis Shreves puts one up for Civil in a tough Civil vs. Electronics game.

De Wayne Harris is trying to operate the clock which did not work!
