

A LOCATIONAL ANALYSIS OF  
A PHILIPPINE FUEL ALCOHOL DISTILLERY

by

LOUIE A. DIVINAGRACIA

B. S., University of the Philippines at Los Banos, 1980

## ACKNOWLEDGEMENTS

The completion of this work has been made possible through the indispensable assistance of several people to whom I am sincerely grateful and indebted.

This report was reviewed in its entirety by my major professor Dr. Carroll Hess, and my committee members Dr. Michael Babcock and Dr. Richard Phillips.

Helpful comments and suggestions on certain parts of this work were provided by Chow Ming-Hong and Dr. Orlan Buller.

In obtaining the needed facts and publications, I relied on the advice and help of Virginia Aguas, Salvador Catelo, Manolo Valencia, Roland Bello, Dina Umali, Mariflor Cutillar, Andrew Fortuno, and Dr. Mark Newman.

The necessary financial support was handled by the Integrated Agricultural Production and Marketing Project, and the College of Development Economics and Management, University of the Philippines at Los Banos.

Through the efforts of Elvira Dumayas, Rosa Maria Lorenzo, Nancy Beems, Renee Hart, and Fadhilah Kushairi, the preparation and editing of the final draft was made possible.

Finally, and above all, this report would not have taken its final form without the encouragement and confidence given to me by my parents, and sisters Elizabeth and Pia.

## TABLE OF CONTENTS

CHAPTER	PAGE
I	INTRODUCTION . . . . . 1
	In Retrospect . . . . . 1
	Research Objective . . . . . 2
	Methodology . . . . . 2
II	AN OVERVIEW OF THE PHILIPPINE ALCOGAS PROGRAM . . . . . 3
	Introduction . . . . . 3
	Alcohol As An Energy Source . . . . . 4
	The Industrial Program . . . . . 6
	The Agricultural Program . . . . . 12
III	INFORMATIONAL HIGHLIGHTS ON THE FUEL ALCOHOL DISTILLERY . . . . 16
	Objective Area . . . . . 16
	Sugarcane Development Plan For the Area . . . . . 18
	Fuel Alcohol Distillery Site . . . . . 20
	Oil Depots . . . . . 20
IV	A THEORETICAL FRAMEWORK FOR LEAST COST LOCATION ANALYSIS . . . 22
	Transfer Cost . . . . . 22
	Assumptions . . . . . 23
	The Ideal Weight Concept . . . . . 24
	A Basic Least Cost Model . . . . . 25
	A Modified Least Cost Model . . . . . 28
	Variations In Distances . . . . . 30
	Isotims and Isodapanes . . . . . 30
	The Linear Programming Approach . . . . . 33

## TABLE OF CONTENTS (cont.)

CHAPTER		PAGE
V	EMPIRICAL ANALYSIS . . . . .	34
	Ideal Weights . . . . .	34
	The Three Candidate Sites . . . . .	34
	Other Possible Distillery Sites . . . . .	43
	Isotim and Isodapane Analysis . . . . .	46
	The Linear Programming Approach . . . . .	50
	Further Insights on Transport Cost . . . . .	50
VI	CONCLUSION . . . . .	58
	Bibliography . . . . .	59

## LIST OF TABLES

TABLE	PAGE
1	Projected Alcohol Mix in Gasoline . . . . . 9
2	Target Distillery Capacity And Alcohol Production . . . . . 10
3	Possible Distillery Sites and Respective Distillery Models . . 11
4	Projected Area Requirements . . . . . 14
5	Sugarcane Area And Yield For Each Raw Material Source . . . . . 19
6	Distances From Candidate Sites . . . . . 21
7	Ideal Weights For Raw Material Sources And Market . . . . . 38
8	Procurement And Distribution Cost . . . . . 40
9	Transport Cost Of Each Candidate Site . . . . . 41
10	Transport Cost Of Each Candidate Site Using Straight Line Distances . . . . . 41
11	Transport Cost Of Each Candidate Site Considering Equal Volume Of Raw Material Shipment . . . . . 42
12	Distances From Other Possible Distillery Sites . . . . . 44
13	Procurement, Distribution, and Transport Costs At Other Possible Distillery Sites . . . . . 45
14	Procurement Cost of Sugarcane Per Kilometer . . . . . 47
15	Distances And Isotim Values . . . . . 48
16	Results Of The Linear Programmin Approach . . . . . 51
17	General Comparison of Trucks and "Bullet Carts" . . . . . 56
