C.2

ACKNOWLEDGEMENTS

I wish to express my most grateful thanks to Dr. Orlo Sorenson, my major professor, for his guidance and advice during the pursuit of my masteral studies. My special thanks goes to Dr. Richard Phillips for taking over as an adviser to me during Dr. Sorenson's absence. His valuable advice, help and concern on the preparation of my master's report is very much appreciated. I am also thankful to Dr. Art Dayton for his constructive comments and criticisms especially on the statistical aspect of my report.

My deepest gratitude goes to the International Agricultural Production and Marketing Project for providing me the necessary financial assistance to pursue my graduate studies. I also extend my appreciation to the staff of the International Agricultural Programs for everything they have done to facilitate my stay at Kansas State University.

I am also deeply indebted to Dionisia Trigo, Lourdes Lopez, Nora Santos, Isabelita Pabuayon, Rosa Maria Lorenzo, Grace Pablo, Jasmin Sapin and friends for providing me the much needed help in the data collection, preparation and editing of this manuscript.

Finally, I would like to give my very special gratitude to my husband, parents, sisters and brothers for the love, moral support and encouragement they have provided me.

This piece of work is lovingly dedicated to my
husband, Renato and children, Rendell and Erik.

TABLE OF CONTENTS

	Page
I. INTRODUCTION	1
The Coconut Industry in Perspective	2
Research Objectives	4
Methodology	5
II. COCONUT AND COCONUT PRODUCTS - PRODUCTION, PRICES AND GOVERNMENT POLICIES	6
Coconut Products and Uses	6
Area, Yield and Production Trends	9
Trends in Coconut Products Production	18
Domestic and Export Price of Coconut Products	22
Pricing Procedures	22
Price Trends	24
Government Programs Affecting Domestic Production	32
Agricultural Research and Development	35
Industrial Research	36
Market Research and Development	37
III. REVIEW OF SUPPLY RESPONSE STUDIES FOR COCONUT AND OTHER TREE CROPS	41
IV. A THEORETICAL FRAMEWORK FOR ANALYSIS OF COCONUT SUPPLY RESPONSE	50
Bearing Tree Equation	53
Yield Function	55
Coefficient of Determination	58
T-statistic	60
Durbin-Watson Statistic	60

V.	EMPIRICAL ANALYSIS OF COCONUT SUPPLY RESPONSE	62
	Bearing Tree Equation	62
	Producers' expected deflated price of copra (FPC_t)	62
	Producers' expected deflated price of rice (FPR_t)	63
	Bearing trees in the previous year (BT_{t-1})	64
	Summary Statistics	64
	Yield per Bearing Tree Equation	68
	Fertilizer price and copra price ratio (FERCOP)	70
	Producers' expected deflated price of copra (FPC_t)	70
	Average deflated price of fertilizer (DPFERTA)	71
	Cross-product of deflated price of fertilizer and time (FERTIME)	71
	Time trend variable (TIME)	72
	Lagged rainfall ($RAIN_{t-1}$)	72
	Summary Statistics	72
	Actual Supply and Computed Supply of Coconuts	76
VI.	SUMMARY AND CONCLUSIONS	78
VII.	APPENDIX	82
VIII.	BIBLIOGRAPHY	89

LIST OF TABLES

Table		Page
1	Characteristics of coconut farms, Philippines, 1960 and 1971	12
2	Relative distribution of coconut area by region, Philippines, 1954, 1960, 1970 and 1980	13
3	Relative distribution of coconut production by region, Philippines, 1950, 1960, 1970 and 1980	14
4	Coconut products production growth rates, Philippines, 1950-1980	20
5	Coconut products price growth rates, Philippines, 1950-1981	26
6	Bearing tree regression for coconut, Philippines, 1957-1980	65
7	Coconut yield per bearing tree equations, Philippines, 1957-1980	69
8	Elasticity coefficients for Philippine coconut supply function, 1957-1980	73
