ULTRASONIC ABSORPTION BY METAL CHELATES

by

JEFFREY BARTNER

B. S. College of Emporia, 1973

---

A MASTER'S THESIS

submitted in partial fulfillment of the

requirements for the degree

MASTER OF SCIENCE

Department of Chemistry

KANSAS STATE UNIVERSITY  
Manhattan, Kansas

1976

Approved by:

  
Major Professor

Document

## ACKNOWLEDGMENTS

The author wishes to thank Don Rempel for his assistance in some of the instrument design. Much time was spent by Mr. Rempel which is indicative of his commitment to the field of electronics.

The author also wishes to acknowledge his major professor, Dr. Clifton E. Meloan who provided the encouragement and guidance while the author developed his own skills.

The author's research group is acknowledged for providing the wit and wisdom, both of which have become an integral part of this project.

This work would not have been possible without the love, understanding and sacrifice of the author's wife, Cathy, who has done more for its completion than she will ever know.

The National Science Foundation is gratefully acknowledged for its financial support in the form of research assistantships.

## TABLE OF CONTENTS

	Page
List of tables.....	v
List of figures.....	vi
Introduction.....	1
The Ultrasonic Method.....	2
General Description of the Ultrasonic Instrument.....	12
A Detailed Description of the Instrumentation.....	16
Double Pulse Generator:.....	16
Power Oscillator:.....	27
The Attenuator Network:.....	29
The Receiver:.....	29
Data Recording.....	33
Detailed Description of the Cell.....	33
Experimental Procedure.....	40
Chemical Description:.....	40
Instrument Operation:.....	44
Taking Data:.....	49
Results and Discussion.....	52
Conclusion and Summary.....	58
Bibliography.....	63

LIST OF TABLES

Table		Page
1.	Absorption data at 22.7°C.....	53
2.	Absorption data at 30.5°C.....	54
3.	Kinetic parameters of vanadium benzohydroxamic acid.....	57

## LIST OF FIGURES

Figure	Page
1. A plot of $\frac{\alpha}{f^2}$ versus log f showing the relaxation frequency $f_c$ .....	8
2. The schematic of the cell and crystal mount.....	10
3. A block diagram of the ultrasonic instrument.....	13
4. The block diagram of the double pulse generator....	17
5. The schematic of the 555 oscillator.....	19
6. Schematic of the signal selection network.....	20
7. Schematic of the Schmitt trigger.....	21
8. Schematic of the oscilloscope trigger.....	23
9. The schematic of the monostable multi-vibrator with the delay output at A and the first and the second output at B.....	24
10. A schematic of the data select network.....	25
11. The schematic of the power oscillator.....	28
12. The schematic of the fet R. F. switching network...	30
13. The schematic of the wide band receiver.....	31
14. The printed circuit board layout for the receivers.....	34
15. A view of the sample container.....	36
16. A. A view of the crystal transducer in its mounting B. A composite view of the crystal and its mounting C. A view of the crystal transducers mounted on the drop plate.....	37

Figure	Page
17. The schematic of the equivalent circuit of the quartz crystal.....	39
18. A view of the ultrasonic instrument.....	41
19. The profile of the data selector logic.....	42
20. The structure of vanadium benzohydroxamic acid chelate.....	43
21. A. A view of the double pulse oscillator B. A view of the electronic measurements power supply C. A view of the power oscillator.....	47
22. A. A view of the receiver B. A view of the R. F. attenuation network.....	50
23. Relaxation curve at 22.7°C.....	55
24. Relaxation curve at 30.5°C.....	56
25. A plot of $\ln k$ versus $\frac{1}{T^{\circ}\text{K}}$ .....	59
26. A proposed push-pull ultrasonic transducer.....	61
