Add Barley To 1969 Feed Grain Program

Agriculture Secretary Orville Freeman has unveiled a 1969 rice support and acreage conol program for feed grains at is virtually unchanged orm this year's model.

The program will include orn, sorghum grain and barley, he latter not in the 1968 proram. Farmers will be asked to ake from production about 37 eed grain crops, compared with 2.4 million diverted from prouction in 1968.

Barley Increases

Barley acreage will account or most of the expected inrease in total land retirement, fficials said. This year's feed rains program involved a fedral cash outlay of nearly \$1.4 pillion to farmers who cooperted in controlling production. Government price support

and payment rates for corn and orghum grain will be unchang-

ed from this year. The sign-up period for farmers in the 1969 program will be Feb. 3 through March 21. Producer of cotton and wheat also will be able to sign up in programs covering these crops during the same per-

Record Output

A near-record production of livestock feed grain this year raised speculation on whether the department might tighten controls on next year's crops.

But officials said a total diversion of 37 million acres would produce a total output next year of less than estimated require-

Officials said use of feed grains is rising because of increased livestock production and prospects for greater corn ex-

168 Million Tons Freeman said that 1968 feed grains production will be about 168 million tons and that total use for the current marketing year will be about 169 million tons by next Octover.

He said this would mean a slight reduction of surplus grain at that time, to about 47 million

If farmers cooperate fully in the 1969 program, Freeman said, a further reduction of 3 million to 5 million tons can be expected by the end of the 1969-70 marketing year.

Freeman said that despite high corn yields the past two years the feed grains program "kept carryover stocks near needed reserve levels."

Market Help

He also said that if 1969 participation goes well it "will substantially firm up market prices" and help maintain orderly marketing of the crops.

Price support loan levels for next year will be the same as for 1968, including corn \$1.05 a bushel; sorghum grain \$1.61 a hundredweight; oats 63 cents a bushel and rye \$1.02 a bushel. Barley loan rates will average 83 cents a bushel, the department said.

In addition, cooperating farmers can collect price support payments for up to 50 per cent of their normal production. These rates include corn 30 cents a bushel; sorghum grain

53 cents a hundredweight, and

barley 20 cents. Participating farmers will be required to take from production a minimum of 20 per cent of their base acreage of the feed grains crops. Producers who are eligible to retire additional land-up to 50 per cent - will be eligible for payments to compensate them for taking it from pro-

The diversion payments will be based on 45 per cent of the local price support loan and payment rates multiplied by normal yields.

Rail Snowplow **Smashes Cows**

BELLEVILLE - Arden Ost lost half of his cowherd and 15 fat hogs to the recent snow-

A snowplow smashed into the cowherd, killing 21 cows, 17 calves and a Shorthorn bull.

"They were plowing snow and couldn't see the herd for the snow flying off the track," said Mrs. Ost. "It was just one of those things."

The Osts don't know how the cattle got out of the fences. Most of the animals killed were Angus, with one Texas longhorn and two Highlanders. The rest of the herd scattered, and it took three days to corral them.

The Osts had already suffered bad news of finding 15 of their fat hogs piled up and smothered to death during the snowstorm.

The pigs were in a long, narrow shed, which may have encouraged them to pile up.

The number of hogs and pigs of Kansas farms continued to emain well above last year with December 1 numbers totaling 1,767,000 head, 12 per cent above year earlier, according to the Kansas Crop and Livestock Reat 11:00 Im The

The total Kansas pig crop for order they are 968 is estimated at 2,661,000 lead, an increase of 8 per cent rom 1967 and the largest since

Sows farrowed during the 2194 eptember-November quarter 213? ptaled 95,000 head compared 222 vith 86,000 head a year earlier. 238 igs per litter averaged 7.63 5056 bmpared with 7.56 last year 95% nd the 1962-66 average of 7.49 130% or this quarter. The pig crop 158% br this quarter was 725,000 455 ead, 12 per cent above last 349 aar.

535 Spring farrowings of sows e forecast at 198,000 head mpared with 178,000 head durg the same period a year earr. The December-February rrowings are forecast at 84,000 ad, 14 per cent above 1968. ery one of us at the or the March-May quarter, s Livestock Comm.

114,000 sows are expected to farrow, 10 per cent above 1968. The indicated Kansas 1969 spring pig crop (December-May), at 1,505,000 head, if realized, will be 12 per cent above the previcus year.

Of the 1,767,000 hogs and pigs on Kansas farms on December 1. there were 265,000 head for breeding compared with 252,000 a year earlier. Some 1,502,000 head were being kept for market purposes, with all weight groups showing an increase over a year earlier.

United States

The Nation's pig crop, including both spring and fall litters, is estimated at 94,496,000 head, some 2,751,000 head more than in 1967. The spring crop of 49,-226,000 was up 2 per cent from a year ago and the fall crop of 45,270,000 is up 4 per cent from a year ago.

Farrowing intentions indicate a December-May farrowing of 6,981,000 sows and a 1969 spring pig crop of 51,700,000 head, 5 per cent above last year.

Keep Tax Records Five Years

It's tempting to clear your files of some of those old farm bills. But you'd better keep records of ordinary receipts and expenditures for at least 5 years.

An Internal Revenue Service assessment against a taxpayer for additional tax due must ordinarily be made within 3 years after the filing date, says John H. Coolidge, Extension economist at Kansas State University.

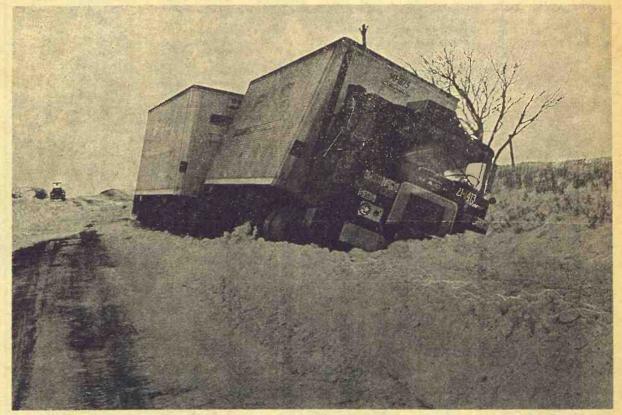

The Kansas statute of limitations is 4 years. It's usually best to keep the records an extra year, just to play it safe.

Thus, it will pay you to save records, other than those regarding depreciation and capital

assets, for at least 5 years.

Keep records of land purchases, building costs and other capital assets for as long as you own the item. Usually this information is also recorded in your depreciation schedule.

In case of fraud, intent to evade tax or failure to file, however, the statute of limitations does not apply, and a deficiency assessment may be made for more than 5 years back.

Week's Story: Snow

This picture illustrates the principal news in the G&G area the last week: snow. A freight truck with pup trailer slid off Nebraska highway 136 near Deshler, Nebr., but didn't overturn because a snow drift supported it from the other side. Most of the G&G area except around Manhattan-Topeka had heavy snow cover.

Farmland **Needing New** Credit Sources

Farmland Industries - the Kansas City-based supplier of many co-ops in the G&G area - has gotten so big that not all of its credit needs can be handled thru the Farm Credit sys-

Farmland has been talking with several large banks and financial houses, with the "blessing" of the Farm Credit System, officials say, in analyzing the past fiscal year.

Farmland had about \$98 mil-

Capital spending in the current year is expected to be limited to \$20 million, down from \$35 million a year earlier and \$43 million two years earlier.

Farmland's sales rose to \$390.6 million in the past year, up about 6.4%, but a slowdown from sales gains in recent years. About 70% of the volume in the latest period was produced in coop plants.

A breakdown of volume showed 36% in petroleum products, 24% in fertilizer, 17% in feed, and 23% in supplies.

Officials said the sales slowdown and the decrease in earnings was a direct result of a severe drop in fertiliezr prices.

Net savings before income taxes, patronage refunds and special adjustments amounted to \$16.1 million, down from

\$29.2 million.

The refund policy provides that at least 50% is paid in cash, and the unpaid balance will be reinvested in common

\$1 Million Angus Deal

VICTORIA, Tex. - A livestock transaction in excess of \$1 million has been announced by W. M. Murphy Jr., owner of M6

The entire breeding herd of registered Angus at the local ranch was sold to Ankony Angus of Rhinebeck, N.Y., and Highmore, S.D.

The transaction included 1,300 head, plus a third interest in Canadian Colossal, a 2,500-pound herd sire referred to as the largest bull of the Angus breed.

The sale also included a longterm lease on the Murphy ranch. It was established in 1960 about six miles north of Victoria at Nursery, Tex.

We put 'em together

Now you don't have to wait for twisted noses and stunted growth to do something about atrophic rhinitis. At least half the hog herds have one or more organisms which cause atrophic rhinitis. And the most common is the bordetella organism.

There's a new drug in CO-OP Pig Feeds which cuts the occurrence of bordetella. Sulfamethazine! It's now available in combination with Tvlan for increased weight gains and better feed utilization in the presence of atrophic rhinitis. This drug combination also prevents dysentery.

We can't promise that it will eliminate crooked noses in your herd completely. But you can expect to see them less often. Plus maintain weight gains and feed efficiency in the presence of rhinitus.

Look into the double-duty combination of Tylan and sulfamethazine soon. Give us a call

... Consumers are expected to have plentiful supplies of pork next year, but farmers who raise hogs for market may be in for a siege of lower prices, according to an Agricultural Department production outlook.

Hog raisers are gearing up for increased output during the next six months, the department reported. Producers say they intend to farrow 6.9 million sows during the period ending next May 30, a gain of five per cent from the previous year.

If these sows produce average litters, the report said, the Dec.-May pig crop will be 51.7 million head, five per cent more than in

Some department observers say, however, that a five per cent rise in pig production would be slightly less than estimates made by some private

The Joint Committee on Met- wholly in favor of efficient and forceful law enforcement. However, the proposal before this committee, in our view, is not practical and is undemocratic.

"It will remove from the electorate one of its basic rights, to choose its chief law enforcement officer. It would substitute an untried plan for the consolidated experiences of a thousand years or more and will discard the gains made by the individual in his struggle for freedom and independence from his sovreign," Hornbaker said.

Also appearing were a number of representatives of Johnson County cities who bombarded the committee with opposition to the tentative plan.

Bennett said only Shawnee and Wyandotte counties had indicated an active interest in consolidation. He suggested either of the two counties might want to draft bills applicable only to them as pilot projects.

Under the consolidation concept, as seen by the committee, all law enforcement activities in the county would be handled by an appointive board through a hired superintendent. The plan would have to be adopted by a vote of the people.

Bennett said there are three major areas of disagreement with the committee's effort the method of selection of the board, retirement program difficulties for present lawmen and authority which would be left to the cities.

Lasso 40% **Hog Supplement** tips the scales in your favor.

That's a fact. Lasso 40% Hog Supplement has been thoroughly tested and profitproven at market. It's the one carefully-balanced feed that you can bank on for faster growth and more efficient gains. That's because, in

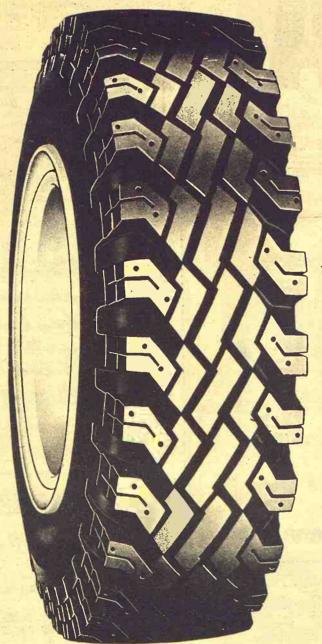

making Lasso 40% Hog Supplement, nothing is left to chance. You know you're getting exactly the right proportions of Vitamins A, D and E to pack on the pounds and to make the best use of your corn and milo. You know it contains eight highpowered growth factors. You know it's formulated from nature's richest source of protein: highly digestible and palatable Sunflower Brand Soybean

Meal. You can see it scientifically mixed in quantites that guarantee freshness. You can watch as it's weighed on government-inspected scales. That way, you can be sure you're getting the right ingredients in the right amounts.

No more. No less. To protect the health of your herd through periods of common swine diseases, you can have the correct antibiotics added to Lasso 40% Hog Supplement. Get the impressive gains that come from feeding this superior supplement. Follow the directions furnished with each sack of Lasso 40% Hog Supplement and you'll get to market 15 to 20 days ahead of the herd.

And with healthier, heavier hogs. That's a fact.

3 tablespoons molasses

¼ cup shortening 2½ teaspoons salt

2 packages or cakes yeast, active dry or compressed

41/2 to 5 cups California seedless raisins

Combine oats, sugar, molasses, shortening and salt. Add 2 cups boiling water, stir and let stand until lukewarm. Dissolve yeast in ½ cup warm water (105 to 115 degrees F.) in warm bowl; add to cooled oat mixture. Add half of flour beating well. Add remaining flour and raisin to make moderately stiff dough. Knead lightly. Place in greased bowl. Cover and let rise again, about 34 hour until doubled. Form into two loaves and place in lightly greased 81/2 x41/2 x2inch loaf pans. Let rise 30-45 minutes until light and wellrounded above edge of pan. Bake in hot oven (425 degrees) 10 minutes. Reduce heat to 375 degrees and continue baking 35-40 minutes. Cool on rack. Makes two loaves.

By Beverly Macy

After using my new blender for the first time I realized that when the instructions say run for two seconds, I'd better believe it. I took three seconds more to glance down at the recipe to see if I'd read it right and literally pulverized half a head of cabbage.

Don't ask me why but everytime I see it, it breaks me up a little Model A with a sign on the back proclaiming, "THIS IS FORD COUNTRY."

I'd like to extend to our readers my best wishes for a joyful New Year. May it bring peace and happiness to all.

Homemaker Saves 48 Minutes Per Day With Dishwasher

Making a wife happy doesn't eryday necessities. Not only can with a full-length mink. There are other ways.

Like presenting her with an appliance that will give her twelve more days in a year -292 extra hours for the family, the community, shopping or just plain relaxing.

A dishwasher.

Experts say that conservatively a woman saves 48 minutes a day with an automatic dish-

Dishwashers today have stepped out of the luxury category and moved right in with the ev-

necessarily mean presenting her they shower kitchenwares with water much hotter than hands can stand, but they can do it faster and better than handwashing methods. Hand-rinsing is a thing of the past and drying, too, is eliminated.

Dishwasher lines include convertible, portable and undercounter models. Top-of-the-line models accommodate up to 17 table settings and come in a wide range of colors to match every kitchen decor.

Give yourself a 377-day year - with an automatic dishwash-

ings may well be changed as often as every two or three years. According to builders and architects, this frequency of change rarely involves either kitchen or bathroom.

In the past few years, however, there is a definite trend to add both individuality and premium resale value to the home by remodeling both the kitchen and bathroom of older houses and adding color fixtures and modern motifs. Today, owners want more individual expression and personal enjoyment from their kitchen and their bath. To do this, manufacturers of plumbing fixtures are offering a wide variety of designs and color co-ordinated fixtures equally adaptable to both the new and older houses.

Aerosols Boon

To Drivers Winter brings special problems to the driver but the aerosol industry has solutions to many of them. Do you have trouble starting your engine in cold weather? Spray some starting fluid into the carburetor and listen to it turn over. Defogging and de-icing agents are a must and the latest aerosol item on the automotive shelves is a traction spray for the tires to drive yourself out of that snowbank.

Remember these tips when using aerosol products: Read the label; store away from heat, and keep out of reach of children.

Feeding Tips

Overfeed rather than underfeed a growing puppy. To make sure your pet is getting the nourishment he needs, feed him a high quality puppy food containing all the required protein, minerals and vitamins.

For tempting, colorful Appe-Chill until serve.

in a normal feeding time.

Snacks in The Holiday Mood

tizer Balls, use canned meat spread alone or mix one 3-ounce can with 1 tablespoon dry onion soup mix and 3 ounces cream cheese. Roll into tiny balls and chill. Then spear on toothpicks, frost with chopped nuts, parsley, paprika or parmesan cheese.

PROPOSE CHANGE FOR FEEDER PIG GRADES

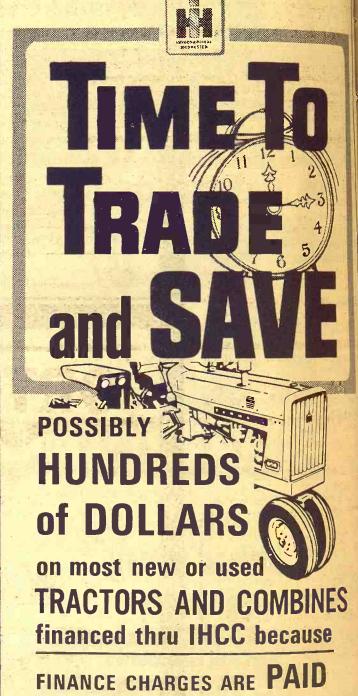

USDA has proposed making the standards for grading feeder pigs the same as for slaughter carcasses. The present grades 1, 2 and 3 would be downgraded to 2, 3 and 4 and a new number 1 grade would be used for superior feeder pigs. Two lower grades — utility and cull -- would be used for pigs that could not reach market weight

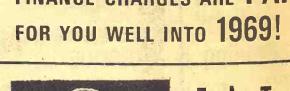

The nicest thing FARM FEED FACTORY about a Mix-Mill® feed processing system... when you need it. it doesn't need you! Your Mix-Mill® feed processing system stores, measures, mixes and grinds your concentrate, grains and other ingredients, and delivers fresh feed to the feeders automatically It will deliver feed for two hours out of 24, 10 hours out of 24, or 24 hours out of 24 . . regardless of where you are or what you're doing. There are dozens of other advantages which add up to this. A Mix-Mill* system will feed all of the hogs, beef cattle, dairy animals, or poultry you have on your farm . . . or plan to have . . . at less cost and with less labor involved than any other method available. The nicest thing you could do would be to make us prove it. We'll be glad to. Just fill in the coupon, and get it in the mail today. A Plywood Primer

1968

Reid

With so many kinds of plyone know what kind to use for woods on the market, how does a certain purpose? The answer is made clear by Dale Schindler, Extension architect at Kansas State University.

Plywood, an important and useful building material, can be used to build a house, a boat, a box, children's toys, or any one of a thousand things. For greatest economy in building, consider the use, then buy plywood for the job to be done, Schind-

Grades of veneer cover on plywood vary from fine decorative woods marked N - for natural finish - to standard fir plywood marked A through D. Grade A veneers are smooth and paintable; B may have repairs and small knots; C has knots up to 1 inch in diameter and small splits in the surface. Grade D shows knots as large as 21/2 inches in diameter.

Plywood is graded by its two surfaces: for example, AA is good on both sides, and AD is good only on one side. In addition, it will be marked interior (INT) or exterior (EXT) depending on the kind of glue used in manufacture. Interoir grades use a water-resistant glue, but continual weathering or wetting will cause failure.

Exterior grades of plywood use a completely waterproof glue which will take even continuous immersion in water. Marine plywood is an exterior grade with higher quality core plys for greater strength.

Plywood sheets are available in sheets larger than the usual 4 feet wide by 8 feet long dimensions. For instance, 5- by 9. foot sheets are available for table tennis tops.

Thickness of plywood usually is 1-4, 3-8, 1-2, 5-8, or 3-4 inch. Special materials are available 1-8 or 3-16 inch thick, such as plywood paneling for specific uses. And heavy pieces are available in 1 inch and 11% inch thick-

Plywoods are available in a wide variety of decorative textures for building siding and paneling. Rough and grooved surfaces are used in decorating because of their rustic effects. Paneling is also available in prefinished pieces.

With this great variety of ma-

terials on the market, a person should shop around to find the best material for the purpose, Schindler adds:

Set District Sheep Schools

Twelve district sheep and wool schools are planned for January and February by Extension specialists at Kansas State University. Program topics include nutrition, health, wool marketing, and predator control.

Management of the ewe flock is at the heart of a successful sheep enterprise, according to V. E. McAdams, Extension animal science specialist at KSU. He will team with F. Robert Henderson, Extension wildlife damage control specialist, and Herman Popp, fieldman for Midwest Wool Marketing Association of Kansas City.

Representatives of Kansas' sheep producer organizations

will report at each of the meetings. And the traditional lamb dinner is scheduled for each school, sponsored by Midwest Wool and the host county.

County locations for the 1-day programs are:

McPherson, January 21 Dickinson, January 22 Jackson, January 23 Miami, January 24 Mitchell, January 28 Gove, January 29 Pawnee, January 30 Meade, January 31 Reno, February 4 Sumner, February 5 Neosho, February 6 Coffey, February 7

Sheepmen will hear comments on the wool outlook from Popp, and McAdams plans to lead discussion on parasite control. A question period is scheduled prior to the mid-afternoon adjourn-

Abilene Would Tap Wilson Lake For Irrigation

ABILENE - The Abilene area won't have to build a dam, construct a reservoir or tap an underground water supply to set up a proposed project that would irrigate 16,000 to 18,000

The proposal calls for tapping the Wilson Reservoir northeast

Reservoir water will flow down the Saline and Smoky Hill rivers to reach the irrigation system, according to the plan.

The project, proposed by the Federal Bureau of Reclamation, will come up for discussion at a public meeting here Jan. 16. A \$15 million to \$18 million price tag has been put on the project.

Most of the 16,000 to 18,000 acres proposed as the project area is in Dickinson County. It includes land originally set aside for the Kipp irrigation un-

Grain Bins &

Grain Storage Curvet

A study indicated there was not enough irrigable land to

make development of the Kipp unit feasible, said Tom Orwig, Dickinson County agricultural extension agent.

Actual work on the project is regarded as several years away. The reclamation bureau first must obtain a federal appropriation to make a full-fledged study

Full Use Of Mail To Cut Census Cost

The government figures its plans for a do-it-yourself, census by-mail in the nation's largest cities in 1970 will trim its force of census takers by 50,000.

The 1960 technique of mailing census questionnaires to the whole country and sending out census takes to collect them would require about 200,000 temporary workers in 1970, the Census Bureau said.

But by having heads of house. holds in the major cities - with about 60 per cent of the population - fill out the forms and return them by mail, only about 150,000 census takers will be needed, the bureau said.

Census takers will again collect the questionnaires in rural areas and smaller towns and cities. And they'll follow up by telephone or personal visits in major cities when householders don't mail back the forms or don't answer all the questions.

In test runs since 1961, the bureau said, 65 to 91 per cent of the householders have mailed back the forms

Extend Food Stamp Plan

The government's food stamp program will begin operating soon in four more Kansas counties - Franklin, Johnson, Leavenworth and Neosho — Marvin Larson, director of the State Department of Social Welfare, has announced.

Atchison, Bourbon, Cherokee, Crawford, Greenwood, Labette and Wilson counties already are using the program, with about 2,685 persons participating.

In the four added counties about 4,231 persons are expected to be eligible.

The food stamp program is a

Last Year Hogmen Started Over 9 Million Pigs on Purina...

Results . . . that's the best answer we know. Folks everywhere, and folks especially around here are finding out that pigs start, grow and finish fast on Purina. Hogmen know they can depend on Purina Research to keep new and approved formulas coming. And from feeding experience they know that Purina's Hog Program pays off in the feedlot with fast growth and low-cost gains.

Join the trend to Purina. We'll be glad to help you keep records so you can see for yourself why hogmen in the U.S.A. started over 9 million pigs on Purina last year. Pigs love Purina Baby Pig Chow, Early Weaning Chow and Purina Pig Startena. Feed out your next bunch of pigs the Purina way.

SALE EVERY WEDNESDAY

Beverly Stockyards Co.

Salina, Kansas

Phone 7A 7-4479

Due to Christmas week and our sale being held on Tuesday, our livestock run was much smaller than usual. Even so, we had a good number of consignors that brought in cattle and hogs and a good crowd on hand at our sale. Good and choice steer calves sold in a range from \$29.50 to \$33.00 with heifers the same weight and quality selling from \$25.50 to \$28.00. We sold 3 loads of fleshy 1024 lb. steers and at \$26.65 a ticket. The cow market was active with butcher cows selling from \$15.50 to \$18.00, with young cows on the hieifer order selling as high as \$23.00. This coming Wednesday being New Years Day, we will hold our sale on Friday, January 3rd. Many large listings of cattle are already consigned for this sale and any one wanting to sell cattle at this week's auction will find a good market as we will have this sale widely advertised through the corn belt. Whether buying or selling livestock, plan to be with us each Wednesday. For highest prices for your livestock and one of the most widely advertised sales in Kansas bill your next consignment to the BEVERLY STOCKYARDS CO. at Salina. For more information about prices and selling times on your livestock, get in touch with us and we will come and look at them.

SPECIAL NOTICE. DUE TO NEW YEARS DAY WE WILL HOLD OUR SALE OF FRIDAY, JANUARY 3, THIS WEEK ONLY.

PAUL DIEHL, Brookville 225-3503

to avoid them," the article states. "Several makes and models offer safety features not yet required by federal standards - a welcome change."

While the organization was encouraged by the signs of more safety, it was less than impressed by evidence of a continued lack of quality controls.

"It's just that the auto makers appear unable or unwilling to turn out a reasonably defectfree product. We found the same misaligned front ends, improperly fitted doors and windows, oil leaks, mis-aimed headlights, incorrect tire pressures and bodywork dents, pimples and scratches as we did last year. The total number of deficiencies was no greater, but we hardly see how it could be," the article states.

Automotive News was quoted to the effect that announced, or sticker, prices are up about \$60 a car for the industry as a whole.

"But that's only part of the story," the organization stated. "All four U.S. manufacturers have cut the term of their wholecar warranty from 24 months or 24,000 miles to 12 months or 12,000 miles, and the warranties are no longer transferable to second owners. The 5 year, 50,-000 mile warranties on powertrain components remain in effect, but they cover fewer critical components."

Also noted in the article was an estimate made last fall by the Federal Trade Commission that the whole-car warranty cut will save the manufacturers about \$40 a car on the average.

"This is a subtle but effective way of raising prices," the consumer organization stated.

California Has Feedlot Problem Too: Manure

DAVIS, Calif. - Raising more beef for a growing California population has given cattle feedlot operators one of their biggest problems: What to do with all the manure?

The California Livestock Ad-

visory Committee of the University of California, which has been urging more research in the disposal of solid wastes, is asking that emphasis now be placed on a study of the feedlot problem.

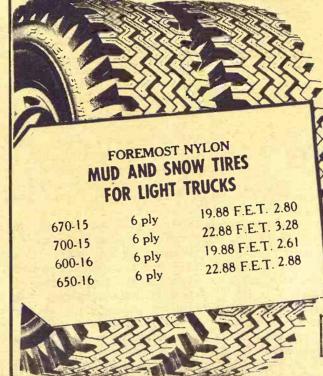

This group of industry advisors, meeting here, supported the California Cattle Feeders Association in asking that farmers use more feedlot manure on crop lands. The association suggests that using manure with

chemical fertilizers may produce better crops than chemical fertilizers alone, while helping to solve the disposal problem.

To back this stand the two groups are asking that the University conduct research on the amounts and availability of plant nutrients in manure, the value of trace minerals it contains, and benefits to the soil benefits they believe could help offset the cost of disposal.

AUCTIONEER: JOE RAINE

Cattle On Farms

The number of cattle on farms traditionally has moved in cycles ranging from 10 to 17 years in length. Following the end of the last full cycle in 1958, cattle numbers rose in eight years to a record 109 million head in January, 1965. Since then, however, the inventory has remained relatively stable and no significant change is expected in 1969.

FARMERS OUTLOOK

L.H. Simerl

Cattle Prices May Vary More

Cattle prices have been quite good in 1968 — the best since 1962, at least. As usual, there are differing views about the price trends to be expected during the year ahead.

The 1968 average price for Choice steers at Chicago will be close to \$27.50. The averages for each of the three previous years, 1965-67, were around \$26. For the two years before that (1963-64) the average prices were down below \$24. The 1962 average was \$27.67.

Record supply of beef. The good prices for cattle in the past year were not brought about by short supplies, but by strong consumer demand. Beef supplies have been record-high in 1968.

Cobbies Selby

Tempos

Fanfares

Mr. Easton

There has been enough beef to provide 109 pounds per person. This amount is 3 pounds more than was available in 1967. It is 20 pounds (23 percent) more than in 1962 — the most recent year when Choice steer prices topped the \$27 level.

Prices for cattle were unusually steady during 1968. Monthly average prices for Choice steers at Chicago were around \$27 during the first six months, and have been around \$28 since midyear. The usual range of prices during a year is \$3 to \$5.

Caution lights show. Looking phead to 1969, we would plan on a larger variation of prices than in 1968, and an average for the year of around \$27.

McCall's

GIANT SEMI-ANNUAL STORE-WIDE

DOWNTOWN

MANHATTAN

There are several reasons for being cautious about cattle prices during the year ahead. First, the number of cattle on feed is larger than it was a year ago. Second, the production of both pork and poultry is believed to be increasing. Third, there are some signs that the economic boom may be cooled in 1969.

More cattle. As of the first of October, the number of cattle on feed was estimated at 9.5 million - 11 percent more than one year before. But feedlot operators planned to sell only 7 percent more cattle before January 1 than in 1967. This situation suggests that marketings may be quite large during the winter quarter.

Cattle on feed in the six reporting states as of November 1 were estimated at 6.1 million -- 9 percent more than last year.

More pork and poultry. The September pig report showed 5 percent more pigs under 60 pounds in ten states on September 1 than one year before. Judging from recent receipts, market supplies may exceed year-before levels by more than 5 percent during the next 3 or 4

Broiler producers made some money in recent months, and they are expected to produce at least 5 percent more broilers for sale during the first half of 1969 than during the similar period in 1968.

During most recent years, the prices of finished cattle were steady to slightly higher from December to January. February often brought the beginning of substantial price changes — up or down. These changes generally continued through March.

In years when the prices of Choice cattle rose during the first quarter, they usually went down during the second quarter.

The biggest differences in cattle prices have been in March, April, and May. By contrast, the most consistent prices have been in the August to November per-

The lowest prices for Choice

steers during the past ten years were in 1964, when prices went below \$22 for 5 months - from February through June. The highest prices have been around \$30, which was reached in 1958, 1959, and 1962.

1 2/3 Million License Tags Delivered

LANSING — A record 1.65 million license tags produced at Kansas State Penitentiary here have been delivered to the state's county treasurers.

The new reflectorized tags, 50,000 more than were made last year, have white letters and numerals on a black background but the design remains the same, according to George Clark, superintendent of the tag factory.

Sedgwick County received more license plates than any other county, 225,500. Johnson and Wyandotte counties received the next largest consignments, 124,600 and 106,000 respectively. The smallest order went to Wallace County, 2310 plates.

About 85 inmates used up 500,000 pounds of steel in producing the 1969 plates, including about 36,500 special licenses such as those issued to amateur radio operators, dealers, disabled motorists and antique car

There will also be reorders from the various county treasurers after January, Clark said, and these reorders generally total about 100,000 additional plates.

Clark has tags in his office dating from 1915, but said he doesn't know if any were manufactured at Lansing prior to that year. Production exceeded 1 million for the first time in 1954, he noted.

Clark said that despite the record output of the tag factory, the inmate work force was smaller than usual. The crew averaged 85 prisoners, but formerly more than 100 were assigned to the tag shop.

WAREHOUSE FACILITY SELECTED AT GLASCO

GLASCO - LESCO (Livestock Equipment and Supply) of Glasco has been selected as a warehouse facility for Hawkeye Steel Products Inc., Waterloo, The Iowa firm manufactures livestock feeding and watering equipment.

The Glasco warehouse is one of 20 throughout the nation to serve Hawkeye dealers.

Receiving and shipping will begin Jan. 1.

FROM AULD'S

Happy New Year AND A HAPPY BARGAIN ROUNDUP

Because of the holiday seess we are going to extend the great Bargain Roundup Sale it machine. new and used machinery the this week . . . until Jan 4

We make this offer brains of the unusual activity stimulated by this sale. Lookers at buyers have visited us him miles around.

We have sold a lot of new and used machinery, but because of our large inventory many new ed pieces are still available. If you are looking for a light 30 Grain-O-Vator, come in all

inspect this one. Remember . . . waiver of terest into 1969 on much m and used machinery.

Listed below are the new items that we are selling at cleaning prices. We have more than one

of a kind on some of these; F856D Pemonstrator 201 Fast Hitch Carrier 45 Vibra Shank Cultivator 45 Vibra Snank Cultivat 12½-ft. 370 12-ft. Wheel Disc 370 14-ft. Wheel Disc 309A 3x14 plow IH No. 51 Feed Wagon

Hours: 8:00 a.m. -6:00 pm Emergency Parts Ph. H0 150 or HO 1-5811.

AULD CHEVROLET HO 1-5414 WAKEFIELD

Holiday Greetings

We invite you to stop in ou store for a snack all this week thru January 4.

We have some real buys in used saws along with our new McCulloch saws. We recently got a 1961 460 IHC with plot. This tractor is ready to go, with front end, real good tires.

Income tax is right close. Save some money on the purchase of some new equipment.

Happy New Year

Blue Cross Short On Payments To Hospitals

Kansas Blue Cross says payouts for hospital expenses have been so high that it will short payments to hospitals in the first three months of 1969 by about 4% until higher premiums start to build up reserves.

The proration of payments is in accordance with contracts hospitals have with Blue Cross. The hospitals will be repaid for the short payments when Blue Cross reserves go up with higher premiums received from subscribers.

Blue Cross last made pro rata payments to hospitals in 1946. Blue Cross officials said hospital costs went up 16% in 1968 and hospital use increased by 21/2 %

Tuesday Sale

Due to the inclement weather, receipts were somewhat lighter at the local auction this week. Prices on all classes of livestock were good Cattle prices for the most past showed strength. Heavy cattle brought a very good price tag. Hog prices were higher.

EXCELLENT Condition at 92% of optimum or better FAIR Condition at 80% to 86% of optimum

BELOW AVERAGE Condition at 73% to 79% of optimum

Wheat Condition

The map shows the condition of wheat as of December 1, according to estimate of the Kansas Crop Reporting Service. The condition of the state as a whole is rated at 87% of "normal." By normal, the Service means optimum, for seldom is a crop rated at 100%, altho one of the state's major wheat-produc-ing counties, Harper, is given a 100% condi-tion in this December 1 report.

Wheat condition was figured as closest to optimum in the north central area and in another area farther west, in a several-county area northwest of Hays. Scattered counties near the major wheat acreage counties around Wellington and Medicine Lodge also show on the map in black, as areas in which the wheat was rated at 92% or better.

Only the far western border counties showed poor wheat prospects. These counties, in white on the map, were rated at 72% of optimum or below.

Acres sown this fall were figured at 10.88 million, down from 11.96 million in the fall of 1967. The Crop Reporting Service figured that every county in the state planted less

acres to wheat than it did a year ago.

This is a 9% decline, but still less than the 13% reduction of the national wheat allotment

December is too early to predict exactly what the harvested acreage in Kansas will

be. In the first place, some Kansas farmers traditionally overplant their allotments. In late spring, normally, they'll plow up the poorest part of their fields so that they will be within the program requirements. Few of them will harvest over their allotments and thereby miss out on the government payments and price support loan.

Moreover, there is still another factor that can affect the wheat acreage. Farmers who sign up for both the wheat and the feed grain programs have the option of substituting acreage.

This means they can use their alloted acreages either for the feed grains or wheat. An example of how this might work out would be a farmer who had overseeded his wheat allotment but who realized, late in the spring, that he had an unusually good crop in the making. He could leave his excess wheat acres for harvest while subtracting this total from his allotment for milo.

Conversely, supposing next spring the wheat looks bad. A farmer could plow up a portion of his wheat and substitute feed grains.

Prices also can be a factor in determining whether a farmer uses his alloted acres for. feed grains or wheat.

Thus both weather and prices will have some influence on the total wheat acreage left for harvest next summer.

DEATH TAKES REGINALD PAINTER, ENTOMOLOGIST

Death has taken Dr. Reginald H. Painter, 67, a longtime authority on insect resistance in crop plants at Kansas State University. Painter died in Mexico City. He had been in Mexico on assignment of the Rockefeller Foundation. Painter had been instrumental in the establishment of Atlas sorgo, Cody alfalfa, and Pawnee, Ponca and Ottawa wheat, as varieties resistant to various insect threats.

Attention To Sunflowers As Cash Crop

The federal government will be paying more attention to sunflowers as a cash crop in the Southwest and West, according to a new research grant announced by the Agriculture depart-

The department has signed a \$42,930 agreement for a 21/2 year study of methods to control the sunflower moth, a major pest of sunflower seeds.

Officials said commercial production of sunflowers for seed or oil has "excellent potential ir. southwestern areas where cotton and grain sorghums are the principal crops.

Weapon Amnesty Didn't **Produce Much From Area**

Federal officials say that a have allowed unusual weapons to be registered without penalty for failure to have registered them before produced only fair results from rural points.

Presumably, either G&G area folks don't have the weapons, didn't hear about the registration drive, or still weren't worried about the possible 10 years imprisonment or \$10,000 fine for violating the registration laws.

Federal officials said that requests for registration forms from cities were larger than from rural points.

The amnesty thru the month of November enabled owners of machine guns, sawed-off shotguns, and rifles, silencers and deactivated war trophies as well as other destructive devices, to get them registered according to law without penalty or fee.

A 1968 federal law extended a 1938 law, including such items as cannons, anti-tank guns, bazookas or other projectile weapons with a bore of half an inch or more, except shotguns.

Also covered are mines, rockets, incendiaries, grenades and similar devices, or missiles carrying a charge of more than a quarter ounce.

Functioning full-automatic weapons, cut-down rifles and shotguns, silencers and certain European pistols when used with an attached stock were covered by earlier registration

Under these laws, possession by private citizens is allowed, but purchasers must register the weapons and pay a "transfer tax" of from \$200 for an automatic weapon to \$5 for a 410 pistol of the type manufactured in the 20's.

The payment on these weapons was waived until December

The .410 pistols were the most common weapons being registered in the amnesty period.

Said a tax agent at Topeka, "Sawed-off shotguns and pistols" made from rifles, as well as deactivated war trophies are fairly common too, but the latter are mostly not in operative condition.'

one-month amnesty which would in the late 1950's, machine guns and other military ordnance could be rendered unserviceable under agency supervision and possessed without registration or payment of the tax. A subsequent "unserviceable weapons" program in the early 1960's saw registration but no tax on the same type of weapon.

"We had a lot of people call in and say they had a grenade but it usually turned out that it was a training grenade, and they are not required to be registered."

Pasture In Area Tax Sale

CONCORDIA - Cloud county's sale of 64 tax-delinquent properties brought \$8212.50 into county coffers.

Leading buyer was Gail Garton, Concordia sale barn operator, who acquired 25 pieces of real estate. Most of the proceeds came in sale of an 80-acre pasture for \$6800.

Unpaid taxes on the properties amounted to \$15,520.73. Interest, penalties and other charges brought the total to

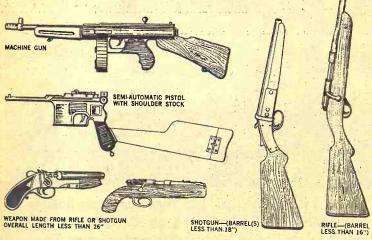

Area PCAs Now Sole Owners Of Credit Bank

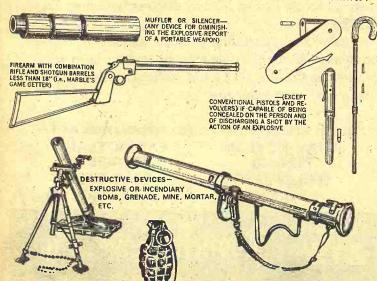

Farmers and ranchers of 41 Production Credit Associations will purchase additional capital stock this week in the Federal Intermediate Credit Bank of Wichita, retiring the bank's remaining \$10.4 million in government capital.

By this move, the PCAs of the 9th Farm Credit District will become sole owners of the bank. The 9th district encompasses Kansas, Oklahoma, Colorado and New Mexico.

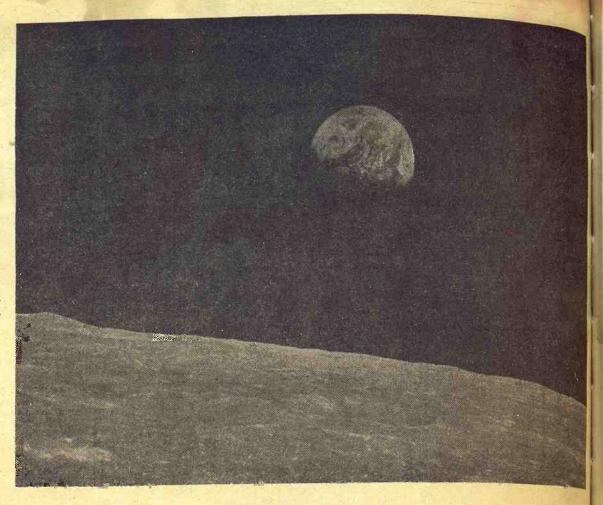

Congressional action in 1956 made it possible for farmers and ranchers, through their PCAs, to invest in the bank's capital stock, eventually retiring all government capital in the bank. Their initial investment was in

State Ag Convention Next Week

TOPEKA — The Kansas State Board of Agriculture will have its annual meeting Jan. 8-10 in Municipal Auditorium here.

Speakers at the three-day event will include:

Kansas Gov. Robert Docking; Debra Barnes, Miss America 1968; Kent Frizzell, Kansas attorney general elect; and Dr. Robert A. Bohannon, director of Kansas State University's Cooperative Extension Service.

Other speakers include Robert L. Huddleson, executive vice president of the Kansas Livestock Association and members of the State Board of Agriculture, along with other Kansas agriculture officials.

The meeting will open with a dinner at 6:30 p.m. Jan. 8 in Municipal Auditorium. The dinner will honor Kansas youths who have been active in 4-H activities. Recognition will be accorded the 11 4-H club national winners, the livestock and meat judging champions and the American Farmer Degree winners.

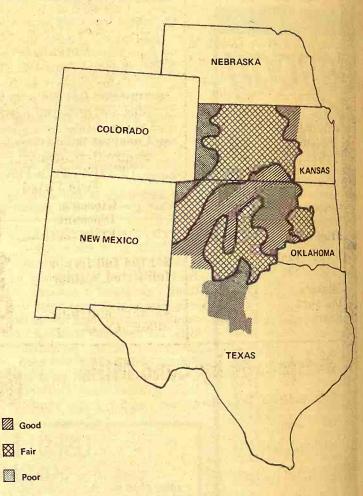

Dinner speaker will be Rev. Dr. W. E. Thorne, pastor of Metropolitan Baptist Church, Wichita. His topic will be "I Am A Millionaire."

Miss Barnes will present music and comments.

Thursday sessions will be devoted to phases of Kansas agriculture and the Friday session will include a business meeting.

On Thursday, district dinner meetings and caucuses are scheduled for Topeka rsetaur-

Dr. Kuller also said at a news conference that it might be possible to reduce the chance of dying of stroke by moving from high-risk to low-risk areas.

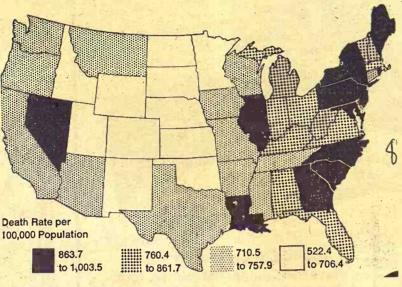

The study, financed by the National Institutes of Health, examined the causes of death of 6314 white men and women between the ages of 45 and 69 living in nine areas of the United States: Buffalo, Miami, Denver, Seattle, Oakland, the Flint Hills of Kansas, and parts of North Carolina, South Carolina and Georgia.

From studying death certificates, medical records and interviews it was found that about one-sixth of the deaths were due to stroke, a term applied to the impeding of the blood supply of the brain due to blood clots, rupture of the blood vessels, or the pinching of a blood vessel.

Yet the rate at which fatal strokes occurred varied widely between geographical areas.

The Carolinas and Georgia areas, for example, had stroke death rates, expressed in terms of deaths per 100,000 people, of about 200. The Pee Dee area of South Carolina was the highest

Buffalo, Seattle, and Oakland were found to have intermediate rates of deaths due to strokes of about 120 for each 100,000 persons per year, while the rates in Miami, Denver and Flint Hills were in the 80's.

Healthy Living In Kansas

Map of continental United States shows, in four groupings, by states, the extent to which death rates (males, aged 45-65) from heart and blood vessel diseases fluctuate from area to area.

Note that all lowest-ranking states lie west of the Missis-sippi river. Age, sex, hereditary background, dietary habits and degree of urbanization are among possible causes for a

The Kansas area had the lowest death rate, 82. The rates given were for men, but the results for women were, while lower over-all, comparable by geographical area.

Dr. Kuller, in noting that the stroke death rate for the Pee Dee area was almost three times as high as that in the Flint Hills, said: "The best hypothesis is the dietary differences between the groups living in the different areas."

USDA Sees More Net For Farmers

USDA says that farmers had a record amount to spend in

Latest estimates, the department said, show that farm people in 1968 had about double the \$1100 per person of disposable income they had in 1960. The reason: Estimated gains not only in farm income but also in off-farm earnings.

The department said that farm production expenses this year are expected to reach a level of about 36 billion dollars, up 1.25 billion from 1967. But gross farm income will probably show a higher rise than expenses, leaving a realized net income of about 15 billion compared with 14.2 billion last year.

three months old by size of flock.

The definition of a farm will be the same as in the two previous censuses. Places of fewer than 10 acres will be counted on ly if sales of agricultural products would normally amount to at least \$250. Those of 10 acres or more will be counted only if sales would normally be at least

Church Attendance On Decline

Church-going in the the U.S. is on the decline, but it is still higher than in 10 nations of Europe.

In a typical week, 43% of all U.S. adults attend church, according to a recent Gallup poll, down from a peak of 49% in 1958 but still considerably higher than polls indicated before World War II.

The decline in church-going is more pronounced among Catholics than Protestants, but the rate for Catholics is 65% compared to 38% for Protestants.

There were no major attendance variations among larger Protestant denominations, and few marked differences among white and non-white, college educated and less educated, young and old, easterner, midwesterner or southerner, large or small income, large and small towns.

Some variations from the average were recorded among the young, aged 21-29 years, whose church attendance is somewhat lower than older people; college educated perly more often than those less

less; and families with income

sons who attend church slightly more regularly than those with high school education or over \$7000 who attend slight-

affluent.

Social Security Deduction Up

A new schedule of Social Security contributions will become effective January 1.

Under Social Security the contribution rate for both the worker and the employer will be increased by .4 of one per cent.

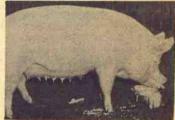

That means two cents on each \$5 of earnings on the first \$7. 800 of annual wages.

Translated another way, a person who earned \$100 per week in 1968 contributed \$4.40. At the same salary, the bite next year will be \$4.80 per week from his or her pay check.

In a higher bracket an employe drawing \$150 per week — \$7,800 annually — this year paid \$6.60 per week but next year it will amount to \$7.20 per week.

During 1969, deductions again will cease when an individual's earnings reach or exceed \$7,800

Veterinary School Regaining Status

Kansas State University's College of Veterinary Medicine has spent the past two years clawing its way out from under bad reports from the American Veteninary Medical Association committee on accreditation.

In October, 1966, K-State learned the inspection team had recommended the Kansas school to be put on probation until teaching and training facilities were renewed, expanded and up-

There has been progress, according to Dr. Charles Cornelius, dean of the school, who was appointed just four months prior to the beginning of the probationary period.

If federal matching funds are appropriated this spring, the first new building for the veterinary school's 80-acre development may be completed sometime in the fall of 1971.

Meanwhile the AVMA continues probationary inspections on a regular basis and innovations, plans and progress in the school must be sufficient to warrant a continuance of accreditation, Cornelius said.

Solid backing came from the legislature in 1967 when it appropriated \$110,000 architect's fees on a building plan for \$2.4 million. Cornelius got \$8000

from K-State funds to order a master plan on the \$14 million rebuilding job for the College of Veterinary Medicine.

The state's remaining \$1.09 million of the \$1.2 million to be matched by federal funds, was appropriated for July, 1968.

The congress authorized \$1.2 million in matching money during 1968, but the appropriation of actual funds which will kickoff the new building program is expected this coming spring.

Construction of the facility probably will take two years from the appropriation by the federal government.

Cornelius continues to worry however, about the progress in the future.

"If they ever cut this program at the state level, we're really

He pointed out that the accreditation, the continued federal support with both matching money and research grants is dependent upon the complete cooperation and support at the state level.

The educator praised the attitude of state legislators in regard to financing the muchneeded building program and toward funding the expanded needs of the school itself in the interim period.

The first building to be constructed will be a comparative medical science building to house a pre-clinical teaching facility, anatomy and physiology teaching units, the state animal disease and diagnostic laboratories and offices for faculty.

A second half to the first building will require another \$2.4 million. Half of this amount is being sought from the state legislature this year and a similar amount is being recommended at the federal level through Congress, he said.

The school also is seeking from the legislature this year \$75,000 for planning the new veterinary hospital facility and \$75,000 for building roads and landscaping the 80 acres which lies directly north of the center of the existing campus complex of buildings at K-State.

Two federal agencies have approved the school for education and research. The Board of Regents last month approved changes in the departmental structure of the veterinary school,

The changes were made to strengthen the study of infectious livestock diseases; lessen duplication of teaching and research equipment; and to provide for development of a strong

pathology department as recommended by the Council on Education of the AVMA in 1966.

The new departments are the Department of Infectious Diseases headed by Dr. Embert Coles and the Department of Pathology headed by Dr. Stanley Dennis. These two replace the single department of pathology, parasitology and public health.

A new department of Physiological Sciences with Dr. Donald M. Trotter as head consolidates the former departments of anatomy and physiology.

The Department of surgery and medicine under Dr. Jacob E. Mosier is unchanged.

Cornelius' efforts to bring in new faculty members and present stronger research efforts and facilities have resulted in additional federal grants in aid for research. The level now is near \$500,000 annually, about 10 times the amount of research funds available when AVMA said accreditation could not be renewed without additions to faculty and facilities.

So, as the third year of probation for the school begins, Cornelius said the past week. "I think we are going to get the job done,"

Farmer Has Little Liability Risk In Allowing Hunters On Land

By Thayne Smith

There is no other single thing that hampers landowner-hunter relations like trespassing.

Other items certainly don't help — like shooting across property lines, road hunting from vehicles, leaving trash or cleaning birds along public roads — but trespassing stirs the ire of landowners more than anything else.

I don't blame them. Most farmers allow hunting on their property, at least to a certain degree. Some will allow only a few friends and relatives. Others will welcome anyone who asks permission. Still others will let a few hunt, but not everyone who calls, because he wants to control the pressure on the wildlife of his land.

Landowners and farmers have every right to haul a man into count who abuses the trespass laws. In fact, the landowner or farmer must make a complaint before a trespasser can be formally charged, and I'd like to see more of them do so.

Some farmers do not know,

register of merit.

however, that a law passed by the Kansas Legislature three liability for injuries hunters might sustain while on their

The act was passed in an effort to free the farmer of liability, and to encourage him to allow more hunting on his lands.

no duty of care to keep their premises safe for entry or use by others for recreational purposes."

Once the landowner or farmer gives a person permission to be on his property, his (the farmer's) liability is virtually ended, according to the new

The only exception cited is "for willful or malicious failure to guard or warn against a dangerous condition, use, structure or activity." In other words, 1967. if the property contains an open well, a barn ready to fall down, or a mad bull, and the farmer fails to tell the person such dangers are present, then he is liable if something happens.

Kansas Births Down A Third In Five Years

In five years, the number of years ago frees them of most births in Kansas has declined by close to one-third. The exact figures, of course, are not complete for 1968, but they presumably will show another decline from the 34,901 births in the state in 1967.

That compares with 45,991 in The act says landowners "owe 1963. From that figure, the number of births has dropped steadily to 43,333 in 1964, 39,178 in 1965, 36,190 in 1966, and the 34,901 in 1967.

Nearly all hospitals in the G&G area report fewer births this year than last, and the figure might get down to 32,000 or less this year.

In the same period, deaths have remained rather constant, varying only about 500 from the 22,187 in 1963. There were 21,705 deaths recorded in the state in

Kansas' birth rate has declined for 11 years, as has the national birth rate.

How long the declining birth rate will continue is subject to much speculation. Federal statisticians, however, are predicting the trend will reverse, possibly within 10 years.

The reason, they say, is that the number of women in the prime child-bearing age bracket, 20 to 29, is steadily increasCITE GYPSUM HOLSTEIN OUTPUT

The service said the output of the state's farms was surpassed only by the record in 1960 and by the second-greatest production ever in 1958.

The total value of crops was \$769 million, an increase of \$15 million over 1967.

The index of crop production was 145 per cent of the 1947-49 average compared with 133 per cent in 1967 and the 1962-66 average of 123 per cent.

Soybean and sorghum crop's set records. There also were record yields per acre for corn, soybeans and barley.

But there was a trend toward fewer acres planted. The harvest acreage of all crops was about one million acres fewer than in 1967, caused primarily by a 12 per cent decline in wheat acre-

On the other hand, there were sizeable gains in acreage by several crops including soybeans and corn and moderate gains in oats, barley and rye.

Sugar beet acreage jumped sharply with opening of a new sugar beet factory in Goodland. The Crop and Livestock Re-

porting Service gave the following breakdown on production:

Wheat - Production in 1968 totaled 243.77 million bushels, an increase of 10 per cent over last year and 17 per cent above average. It was the largest crop since 1961. Wheat was seeded on 11.96 million acres, 9 per cent less than in 1967. Acreage harvested totaled 9.75 million acres, a decrease of 12 per cent from 1967 but 3 per cent above the five-year average. The yield per acre averaged 25 bushels, the fourth highest yield of record.

Sorghums — Production of 163.32 million bushels was the second largest crop on record, surpassed only by the 1960 crop. Production was 9 per cent greater than 1967 and 25 per cent above the five-year average. The yield per acre averaged 47 bushels, one bushel above last year, five bushels better than average and only two bushels below the record in 1966. Acreage planted for all purposes totaled 4.46 million, exceeding the 1967 figure by 3 per cent and the average by 5 per cent. There were 3.47 million acres

harvested for grain, an increase of 7 per cent over last year and the largest number of acres since 1963.

Sorghum silage was harvested from 354,000 acres and yielded 10.5 tons an acre for a total of 3.71 million tons, the smallest production since 1956. Production of sorghum forage totaled 1.18 million tons with 516,000 acres harvested and a yield of 2.3 tons an acre.

Corn - Production of corn grain totaled 85.05 million bushels, the largest crop since 1950. It surpassed the 1967 crop by 18 per cent and average by 43 per cent. The record yield per acre of 75 bushels was seven bushels above the figure for last year and 23 bushels above average. The record yield reflects an increased acreage of high-yielding irrigated corn in western areas and above average yields in other sections of Kansas. The number of acres harvested for grain was 1.13 million, 7 per cent above a year earlier and the largest since 1963. Corn silage was harvested from 271,000 acres, 13 per cent greater than last year.

Soybeans - The crop of 23.92 million bushels exceeded 1967 production by 29 per cent and the five-year average by 52 per cent. Acreage harvested totaled 957,000 acres, an increase of 16 per cent over 1967 and 4 per cent higher than the record in 1966. The yield of 25 bushels an acre also was a record, exceeding the previous record set in 1967 by 2.5 bushels an acre.

Barley — The crop totaled 3.70 million bushels, up 71 per cent over 1967 but still only about half the five-year average. Yield per acre was a record 37 bushels, surpassing the 1967 yield by 10 bushels and the record yield in 1961 by six bushels.

Oats - Production was 6.84 million bushels, up 18 per cent from 1967 but down 14 per cent from average. The yield was 38 bushels an acre, two bushels over 1967 and the highest since 1.883.

Rye - There were 512,000 bushels produced. That was an increase of 26 per cent over the light crop of 1967 but otherwise was the smallest crop since 1953. The yield of 15.5 bushels an acre was two bushels higher than a year ago. Rye was planted on 94,000 acres, of which only 33,000 acres were harvested for grain.

Hay -- Production totaled 4.74 million tons, a decrease of 10 per cent from 1967 but 6 per cent above average. It was the third-largest crop since 1915. Hay was cut from 2.41 million acres and vielded an average of 1.96 tons an acre.

Sugar beets - Production totaled a record 585,000 tons, nearly 40 per cent above the 1967 record. Beets were harvested from 38,500 acres, surpassing last year by 67 per cent and

nearly double the average. Dry edible beans - Production totaled 170;000 bags harvested from 17,000 acres.

Popcorn — Production totaled 12.50 million pounds, an increase of 8 per cent over 1967.

Irish potatoes — The total was 124,000 hundredweight, 3 per cent below 1967 and the lowest since 1956.

Sweet potatoes - Production totaled 86,000 hundredweight, a

slight increase over 1967 but 23 per cent less than average.

Alfalfa seed - Production was 3.52 million pounds, an increase of 66 per cent over 1967 but 61 per cent less than average.

Lespedeza — Production was up slightly.

Clover seed - Production of red clover seed showed a small reduction, while sweet clover seed was down 20 per cent from 1967 and the smallest crop on

Apples - Production totaled 14.4 million pounds, the largest crop in 17 years.

Peaches — Production was 6.2 million pounds, a sharp increase over 1967 and the average.

Farmland Value Up

The value of U.S. farmland and buildings increased 70 per cent between 1958 and 1968, the Agriculture department report-

The average increase in value in the various states ranged from 41 per cent to 132 per cent the last decade. Strongest advances were in the South, where farm real estate values more than doubled in several states.

Smaller increases occurred in the mountain states, lake states and in the corn belt.

Based on new estimates, commercial farms had an average value of about \$100,000 a farm on March 1, 1968. Other farms those with annual gross sales per farm of less than \$2500 had an average value of \$24,000.

The size of commercial farms averaged 550 acres, compared with 120 acres for other farms.

The rate of voluntary transfers of farm real estate during the year ended March 1, 1968, was about 30.4 per 1000 farms, about 2 percent below a year

The department said farmland values in the last two decades have climbed steadily due to active farmer and non-farmer demand. Farmers, who ac-

count for nearly two of three buyers, have bought land primarily for enlargement.

Nonfarmers have been in the market for investment and other reasons. Regardless of the many motives, the department said, values still correlate with expected total returns. Annual returns to land since 1950 have averaged 3.5 per cent, the same as the average dividend yield on common stocks.

LOOK FOR SLIMMER HERSHEY BAR

Look for a 5-cent Hershey bar to be reduced an eighth of an ounce from its usual % ounce, Cocoa prices of 50 cents a pound are at their highest level in 10 years. Candy companies will likely respond by cutting the size of bars and perhaps increasing the cost.

Many taxpayers in the G&G area found their federal income tax forms in the mail the past week, and here is the mountain of mail from which many of the forms started. An Internal Revenue service center at Kansas City had 12 million forms ready for mailing into an 8-state area. There were 28,000 bags of tax forms — enough to fill 48 tractor trailer trucks. For the first time the tax forms have lost their plain black-and-white appearance and have been printed in red, blue and black. They're better looking, perhaps, and the use of color makes them easier to follow. But the questions haven't gotten any easier.

Glamour Off Soybean

Clifford Hardin, the new Secretary of Agriculture, will inherit one problem that none of his predecessors faced when taking office — a growing soybean surplus.

On Sept. 1, the beginning of the current soybean crop year, the carryover stood at a record 167 million bushels, and by next September the Government estimates that the surfeit will swell to more than 300 million bush-

A recent study by the National Soybean Processors Association claims the surplus could reach 900 million bushels by 1971, which would be a year's supply at current domestic consumption rates and export needs.

By contrast, demand for the "wonder crop" until 1967 was seemingly insatiable. Since World War II, U.S. and world markets year after year had gebbled up practically all the soybeans U.S. farmers produced.

Soybeans enjoyed a spectacular growth of more than 400% to 1.01 billion bushels this fall from 193 million bushels harvested in 1945, with no sizable stock buildup until recently.

To halt the rise in the surplus, grain-trade experts say the \$2.50 a bushel soybean support level of the past three years may be lowered by 25 cents a bushel for the 1969 crop.

Outgoing Secretary Freeman will likely leave the final decision to Mr. Hardin, they add, because farmers won't be making their planting decisions for the 1969 crop until early March.

Soybeans are valued for their two products, which are obtained by crushing - soybean meal, a superior high-protein feed suitable for all kinds of livestock, and soybean oil, a

vegetable oil used in margarine, shortening, salad and cooking oils, and in mayonnaise.

Much of the current oversupply resulted from record U.S. soybean crops in 1967 and 1968. Also, soybean products' supremacy in world markets has been challenged by the emergence in the past five years of competitively priced alternate products such as sunflowerseed oil, fishmeal and urea (a nitrogenous by-product of fertilizer manufacture.)

In future years, it may be even tougher to hold down soybean surpluses, farm experts say. The European Common Market, America's largest soybean export market, is considering putting stiff import duties on soybean products. The proposed levies would raise current prices for soybean products by roughly a third. If the duty is imposed, U.S. soybean exports to Europe could fall by a third, a Government official figures.

Moreover, soybean yields, which have increased only modestly in the past decade (8% compared with corn's 60%) could rise rapidly in the next three years, says Continental Illinois National Bank & Trust farm economist William Sayre. Finally, grain analysts point to the recently developed high lisene corn (an excellent swine feed), synthetic amino acids. and proteins made from cellulose and petroleum materials, as products that will challenge soybean meal in coming years.

During periods of burdensome supply, the support price acts as a price prop for soybeans. Market prices never drop markedly below the support level because the Government stands ready to grant farmers

loans, or make outright purchases of the crop at the support

A lower support price might materially boost soybean usage at the expense of at least two competitors, some economists believe. The Russians, who produce sunflowerseed oil, soybean oil's biggest rival for world markets, and the Peruvians, who export fishmeal, a competitor of soybean meal, would be hard-pressed to price their products competitively, they add.

The National Soybean Processors Association wants the support level dropped 45 cents to \$2.05 a bushel. The processors predict that soybean consumption could grow 4% to 6% a year at that level.

The American Soyeban Association, a trade group for soybean growers, contends that lowering the current support level would hurt farm income.

Best Apple Crop In 17 Years

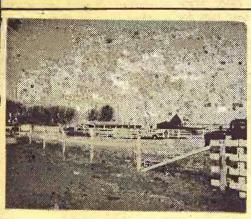

Kansas had good fruit crops in 1968 but vegetable crops were quite variable, according to the Kansas Crop and Livestock Reporting Service.

Apple production was the largest crop in 17 years. The peach crop was up considerably from last year and average.

Production of dry edible beans, though down from early season expectations, was still the state's second best.

Sweet corn was an average crop and moderately larger than

Irish potato and sweetpotato crops were only about threefourths of the 5-year average and cantaloup production was the smallest in 17 years.

The REYNOLDS SALE BARN will hold a special Stocker and Feeder sale in conjunction with their regular auction on Friday,
