Save your money.

Go to college.

Study hard.

Graduate.

Get a good job.

And become

a productive member
of society.

These are the superfluous rationale of the American education ethic. A college education is all too often measured in potential dollars and cents with only passing thought given to its adjustive functions.

If you were not in college would you:
 smoke dope
 go braless
 voice political protest
 wear baggies
 have long hair
 go tgifing
 be on The Pill?

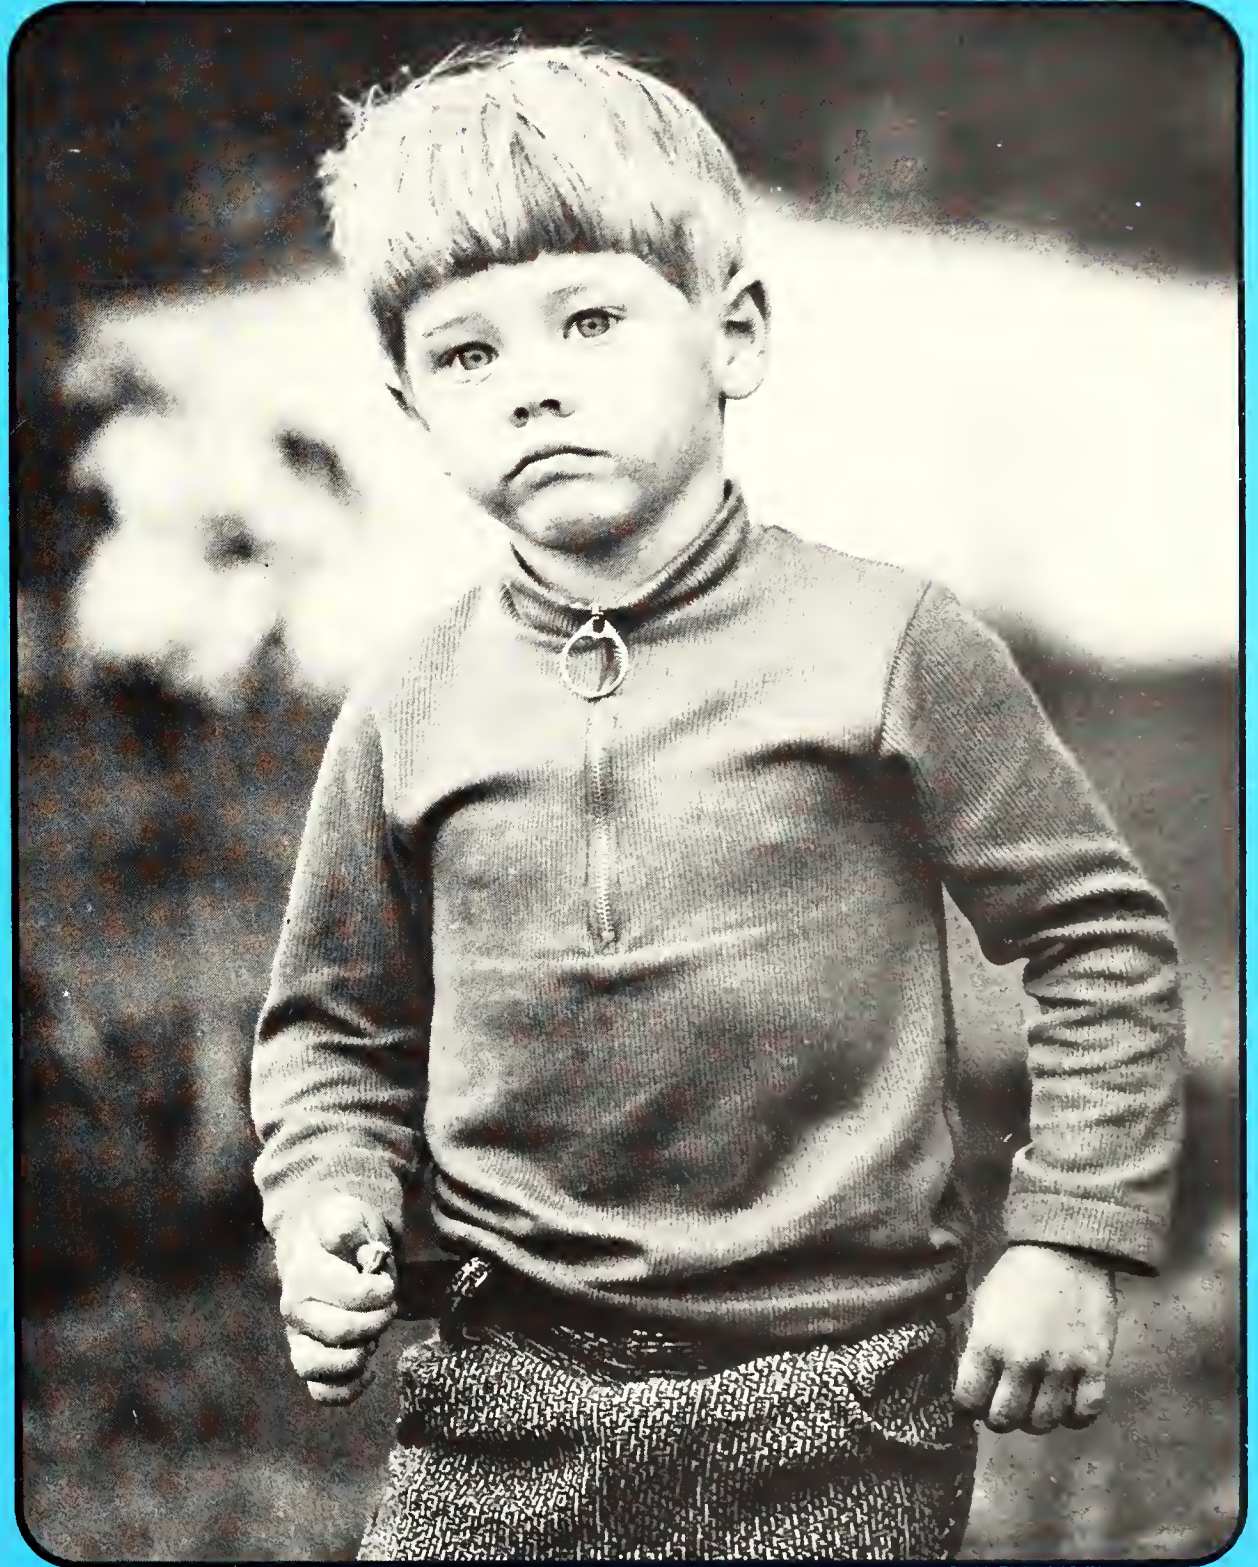

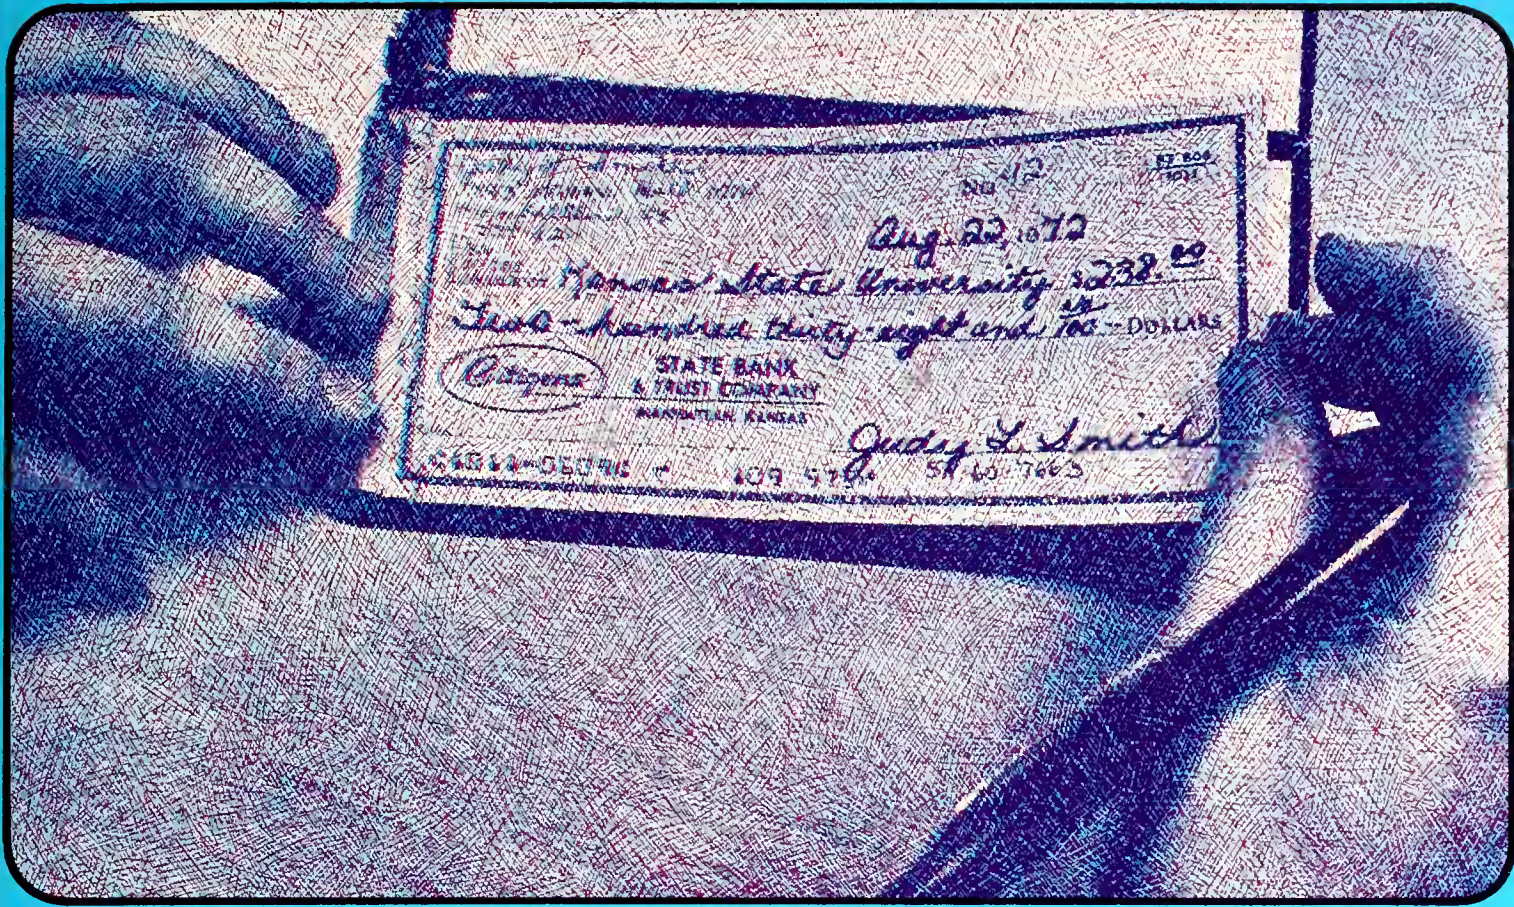

Think about it. College is more than training and career placement. It is an education in life. Consider for a minute the socialization that an individual undergoes during his/her college career.

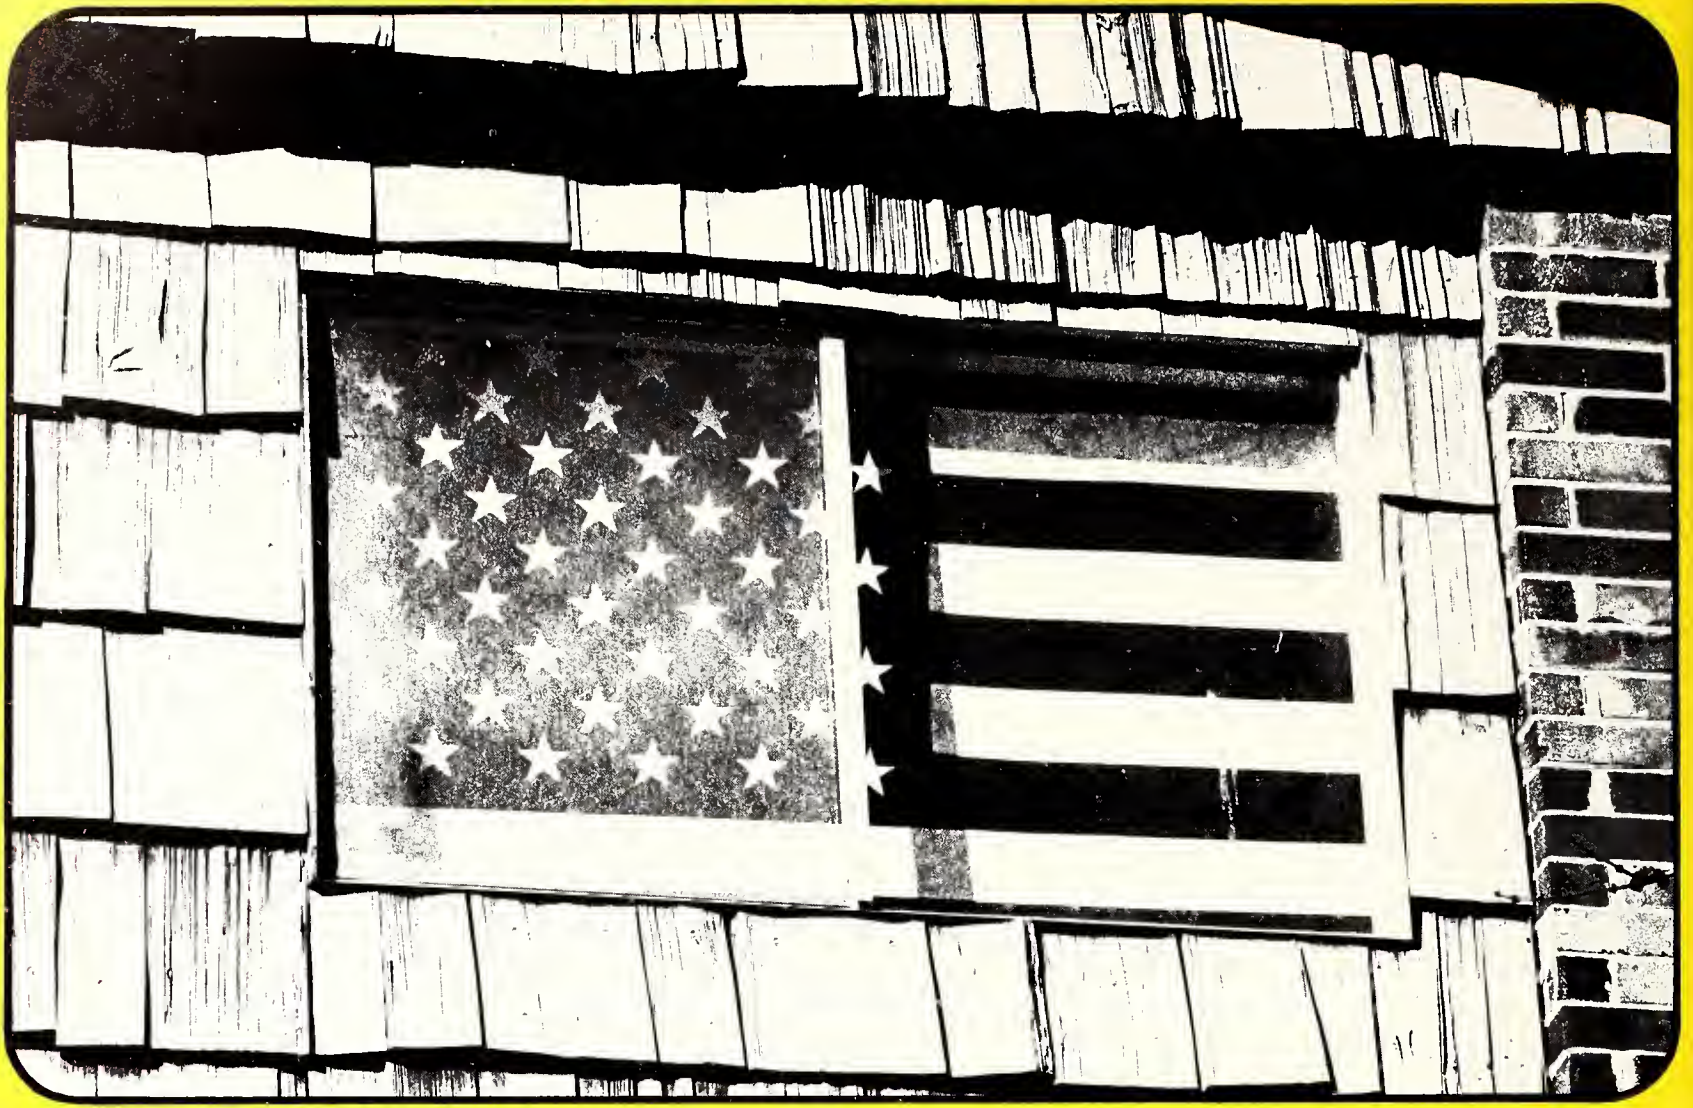

- - - Ice cream dates, telephone calls, formals, snowball fights, hikes at Tuttle, afternoon functions, drinking in Aggieville — the list of activities is endless — all provide the personal interaction which is thought to be necessary for social acceptance and assimilation into the “real world” of our parents.
- - - Greek and dorm living take you out of the relative security of a private bedroom at home and thrust a stranger upon you as a roommate. Can you adjust, or better yet, will you adjust to make a success of the situation? It may be only a prelude of cohabitation patterns to come, (ie. marriage).
- - - Membership in campus organizations may win friends and influence people, but better yet exposes you to the hierarchy of command and the bureaucracy of decision-making you will encounter as a member of the PTA or ZPG circa 1983.
- - - Coed dorms, 24-hour visitation, beer on campus — dependency is a thing of the past. No longer do you keep the rigid three meals a day, eight hours sleep a night schedule you’ve known since grade school. You become flexible to the pressures of life and work around you; meeting your own responsibilities to your own satisfaction as they come due. Or you suffer the consequences, just like the person who signs your allowance check.
- - - Classroom learning provides more than dates, statistics and axioms. Among the theories, techniques and trends are the trivia and non-trivia which allow for a greater understanding of our own and other cultures. You don’t have to be a psych major to understand a reference to television

as a “labotomy box,” or in poli sci to know that “an ambassador is an honest man sent abroad to lie for his country.” What does count is the exposure to the cognitive processes that raise questions in your mind and then press you to seek out the answer. Who knows when you might be stopped in your tracks with the query, “Why does it rain?”

- - - \$238 per semester x 2 semesters x 4 years, rent, utilities, meals, books, parking tickets, personal expenses and the miscellaneous are just a few of the expenses which introduce you to a condition of financial over-extension, commonly referred to as being “in debt.” For four years you scrimp, save, adjust, and make-do only to discover that for 40 more years you continue to do without, so that your children won’t have to.

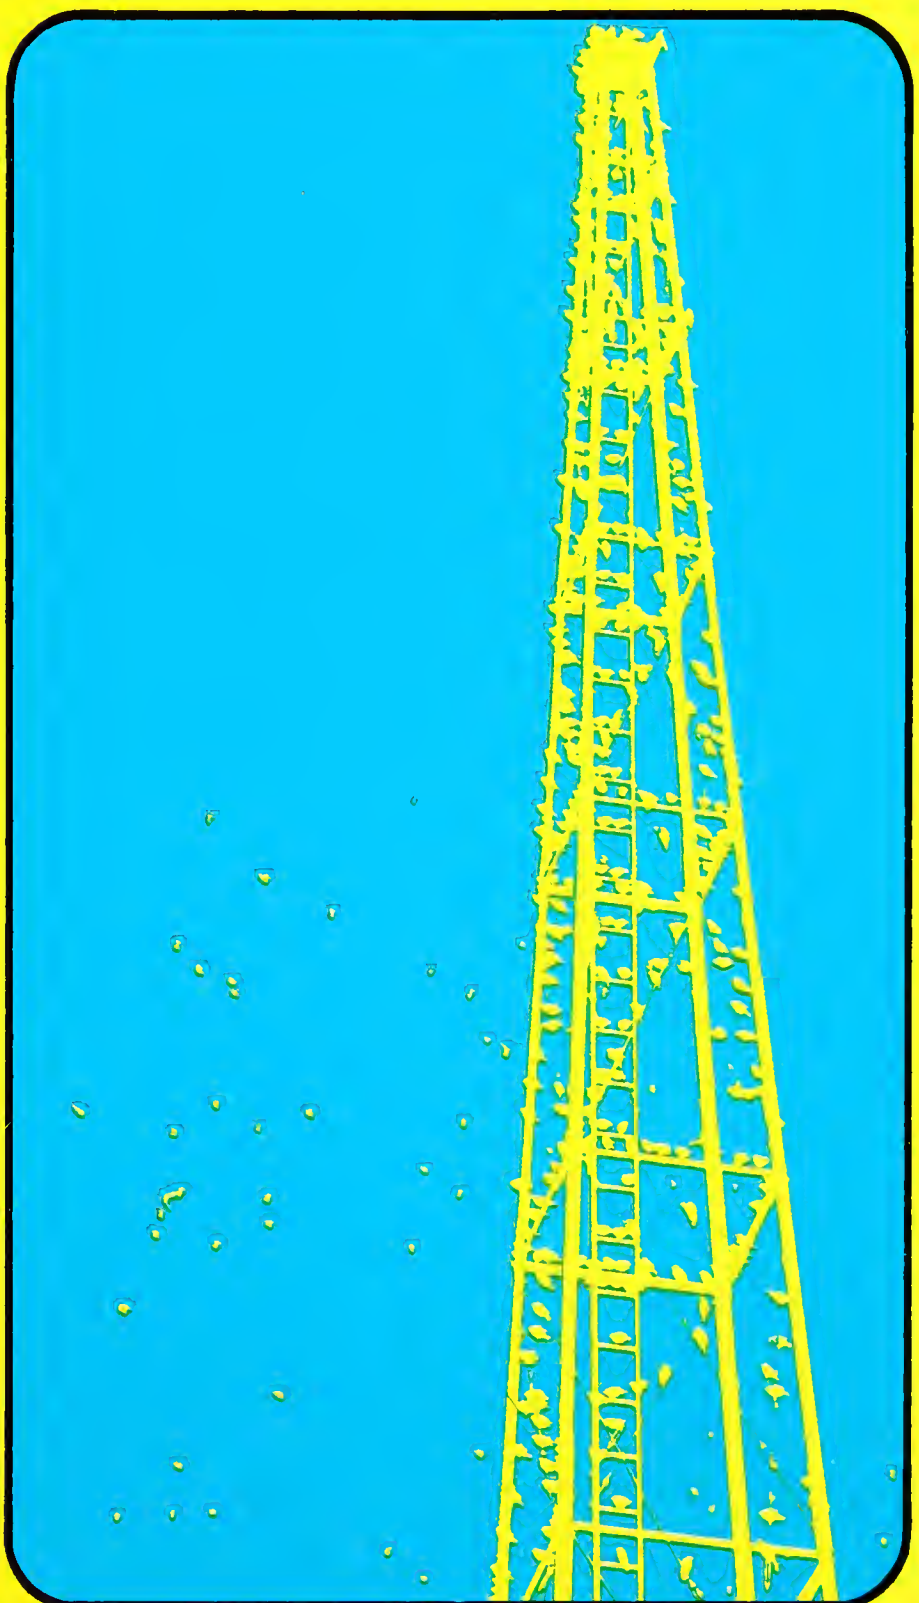

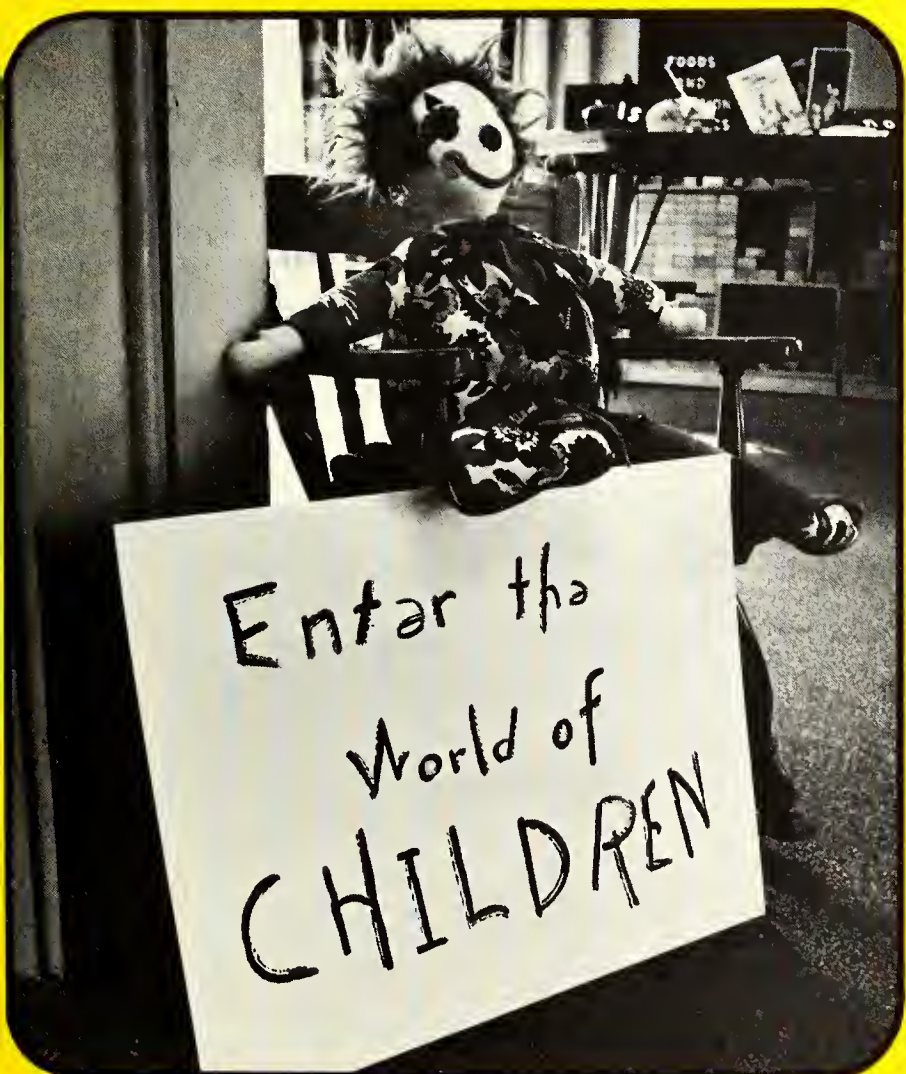

Friendship, responsibility, compatibility, understanding, independence, social acceptance and realism are but a few of the qualities that are developed by the individually unique, yet universally common, experiences of college life. They make you aware of yourself and your environment while preparing you for the gradual transition from "exploited minority" to "silent majority."

View the next 471 pages as part of this metamorphosis, for we are 14,223 warm bodies all seeking the same objective, in 14,223 different ways, for 14,223 different reasons and with 14,223 different results — this is education at K-State.

E.C.

(for example)

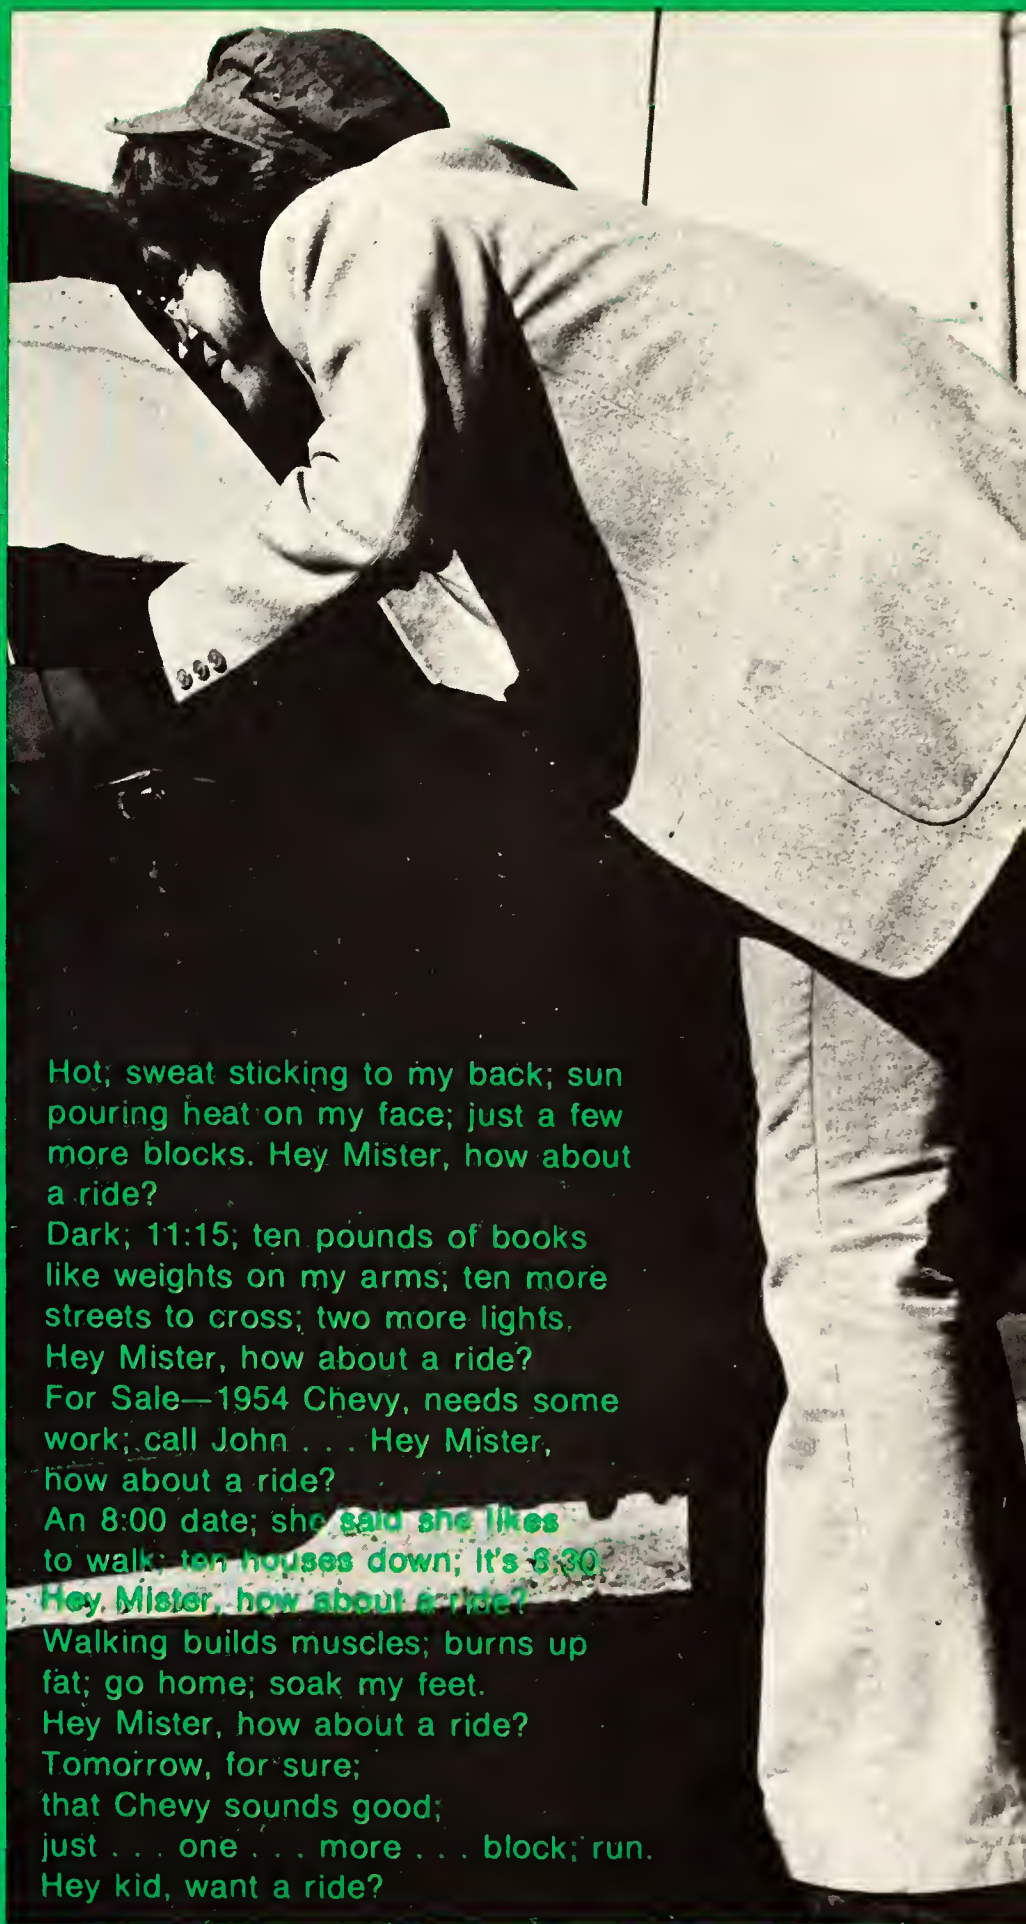

By JoAnn Corson

"If you can't say anything good,
don't say anything at all."
No, no, no . . .
that's not right!
Griping about
this, that and the other
keeps the system
alive and kicking.
Experience may be
our best teacher,
but reform will bring the reward.
Challenge—Change!
Today's topic
deals with the Square Deal:
better known as
the vicious circle of
Course Requirements for Majors.
(You fill in the blank.)
Today's gripe
deals with the "no-credit"
requirements
E. G. (for example):
Music majors **MUST** attend
recitals.
Beaucoup hours each semester.
Which is all fine and well
and of course, as it should be—
but many hours with zero credit?
E. G. (for example):
Freshmen **MUST**
take physical education
two semesters.
Which is all fine and well
and of course, as it should be—
but why just freshmen?
After these two semesters,
are we physically fit for
what's left of four years?
Cherri-O!
And again . . . beaucoup hours
with zero credit.

Today's complaint
deals with "necessary" (?)
field trips and/or paper projects.
E. G. (for example):
student teaching
for education majors.
Perhaps experience
IS our best teacher.
Will this practice come closer
to home
in the near future?
Or will our future-teachers
still go traipsing across country
to each and every school
to practice?
E. G. (for example):
Theses for master's candidates.
How is it later applied?
Constructive and logical thinking
can be applied through
other various and assorted channels.
The same is true
of comprehensives
for English majors.
New methods? New procedures?
Explore on . . . change it all.
Even if we come back
to the old ways . . . **EXPERIENCE**
is our best guide.
Thus, we learn
about this, that and the other.
Today's gripes and complaints
have been brought to you by
one who objects to the theory:
"the old way is good enough;"
to teachers palming off guesses
as demonstrated truths.
Challenge—Change!
You can't be that set
in your ways.

Thumbs up; no wheels; but two
legs for walking. Hey Mister,
how about a ride?
November rain; a sudden chill;
Third Street's a long way to that
8:05. Hey Mister, how about a ride?
Got to buy mom a birthday gift;
belated five days; hoof it. Hey
Mister, how about a ride?
House after house slowly passes by;
gravel wedged in my toes; keep on
until . . . Hey Mister, how about a ride?
I'm going to be late, take flight,
feet; just six more blocks.
Hey Mister, how about a ride?

Hot; sweat sticking to my back; sun pouring heat on my face; just a few more blocks. Hey Mister, how about a ride?

Dark; 11:15; ten pounds of books like weights on my arms; ten more streets to cross; two more lights. Hey Mister, how about a ride?

For Sale—1954 Chevy, needs some work; call John . . . Hey Mister, how about a ride?

An 8:00 date; she said she likes to walk; ten houses down; it's 8:30

Hey Mister, how about a ride?

Walking builds muscles; burns up fat; go home; soak my feet.

Hey Mister, how about a ride?

Tomorrow, for sure; that Chevy sounds good; just . . . one . . . more . . . block; run. Hey kid, want a ride?

Campus textures, moods vary

By Sandi Linville

Textures change, as moods do.

Soothing, cool grass changes to a green spongy mat when mown. After rain, the coarse concrete sidewalks become a refreshing pathway for bare feet.

Finely-veined leaves are coated with a new brilliance that reflects the sunlight after a summer rain. Then as the weather turns the air cooler and crisper, they fall to the ground. Again, their textures change as they lose their softness and create a brittle, crackling carpet.

Man-made buildings, not to be outdone by nature, are different in their textures and moods, also. The beige, corrugated walls of a Kedzie Hall stairway contrast with the serene, shiny blue walls of Calvin Hall. Leaves branch up Kedzie walls, but they aren't there for shelter. Bright yellow walls of the **Collegian's** newsroom relay a sense of urgency and excitement that Calvin lacks. Creaky, brown tweed wooden floors show the relaxed atmosphere of Calvin. Both are different; both are needed.

Vining leaves crawl up the ruins of Nichols Gym as if protecting the remains. It stands alone, shut off from functional buildings in its world of the past. Several steps away, the new KSU Auditorium stands.

Its cool and clean modern design contrasts with the blackened bulky stones of Nichols. While trees surround the gym, the auditorium stands clearly and precisely against the sky. Inside the auditorium, the marble floors create a hushed, tranquil atmosphere charged with anticipating excitement. Chandeliers sparkle with yellow light shafts en-

cased by smooth, clear glass.

Story book qualities of Holton Hall contrast sharply with chrome-plated, clean Justin Hall. Peach, yellow, red, blue-green and baby blue doors line one Holton Hall corridor. Disciplined, straight-backed chairs greet visitors, while Justin offers soft, cushiony couches. A wall of windows creates openness, and doorbells announce start and end of classes.

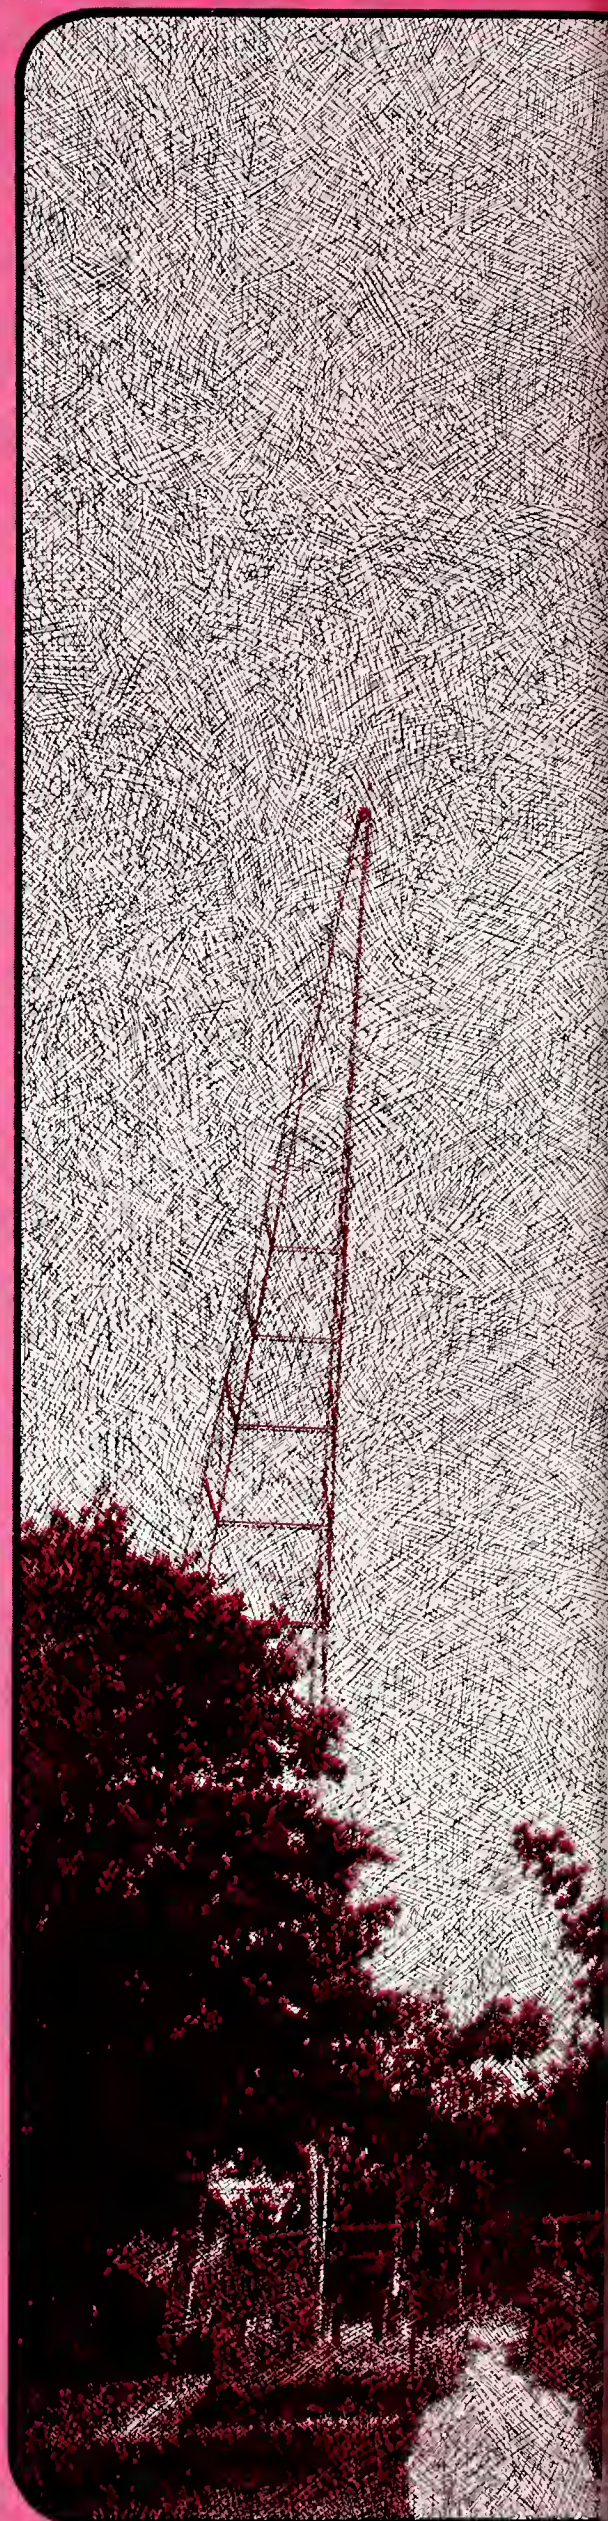

Two chapels, two different moods and many different textures. Both chapels effectively close off the outside world.

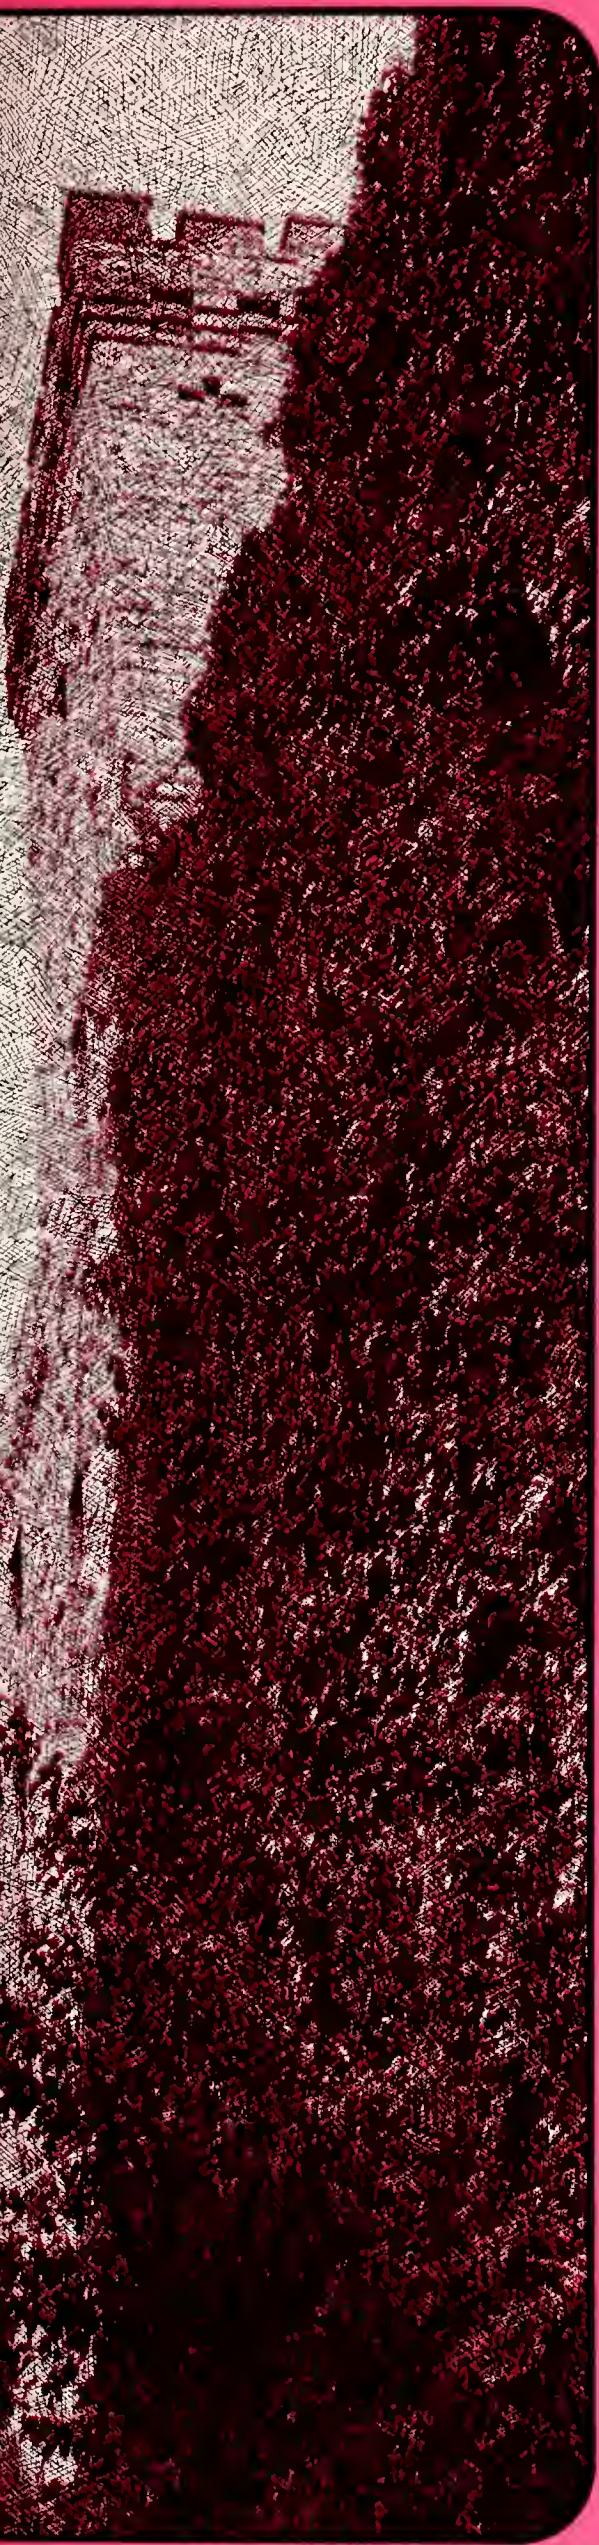

Memorial Chapel offers freshness and space. Upper tree branches swaying in the wind can be seen through the large windows. Reddish-brown stained beams support the high ceiling, and suspended globes give off diffused light. Simple designs create beauty and strength. There are rows and rows of empty red plush seats in Memorial Chapel. Peace and calm fill the air. Straight steel pipes stand tall. They provide shelter against the busy world, but do not deny its presence.

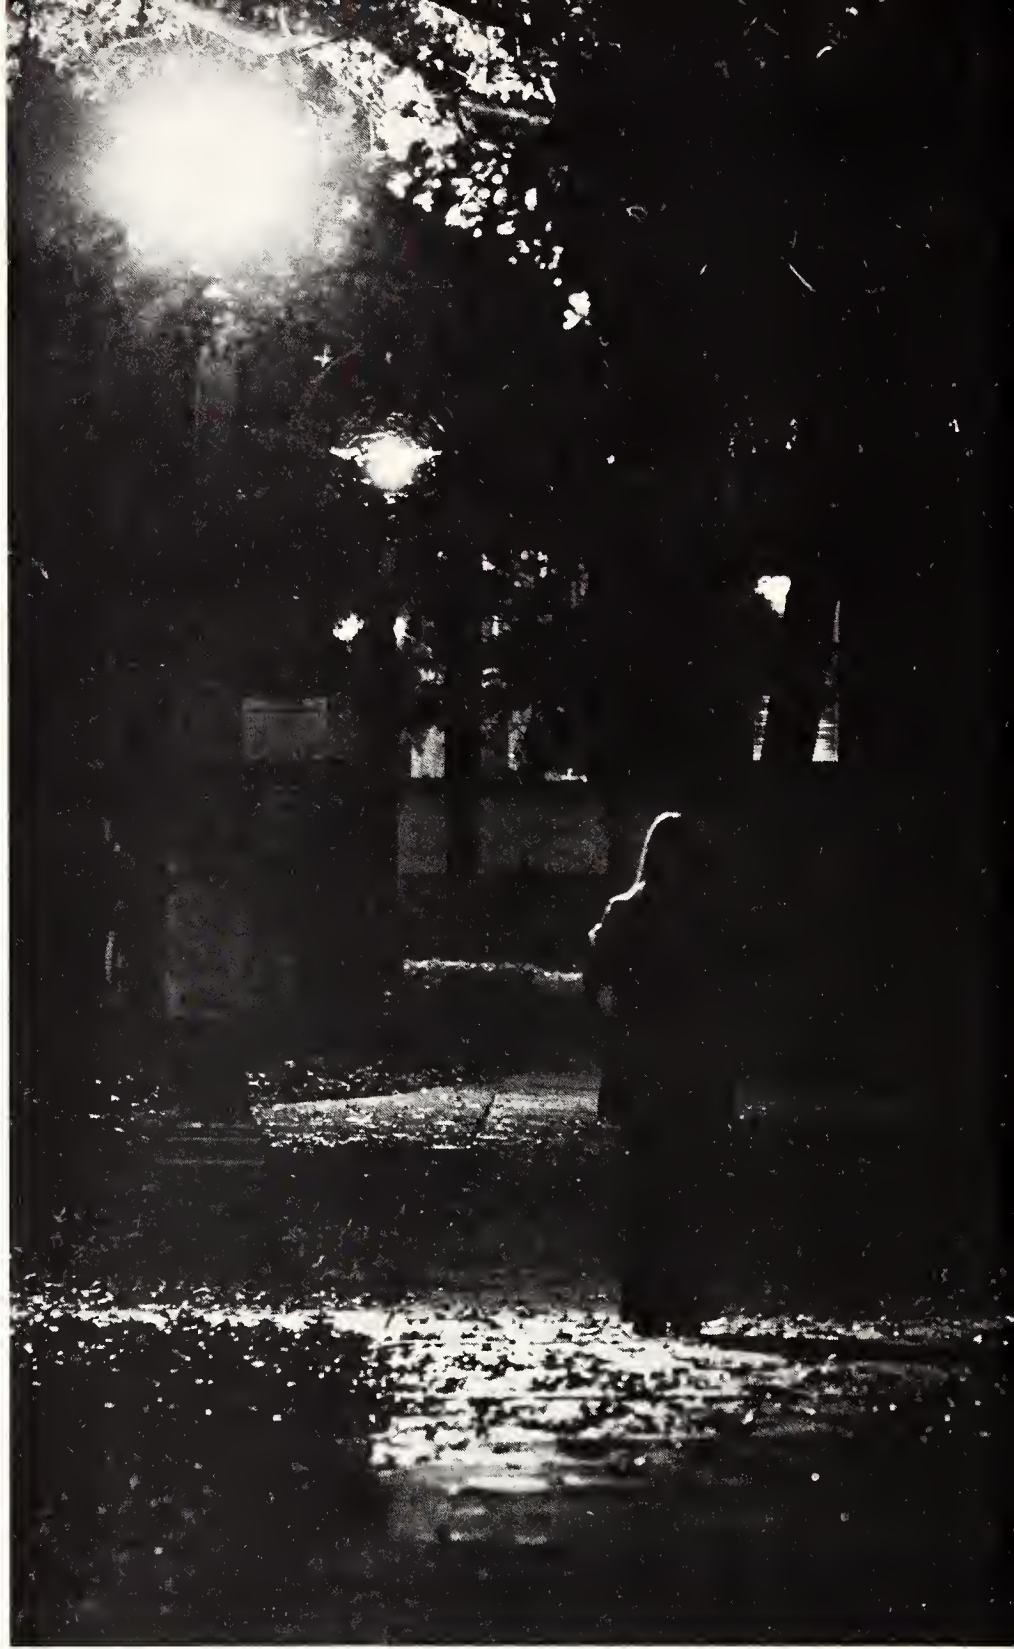

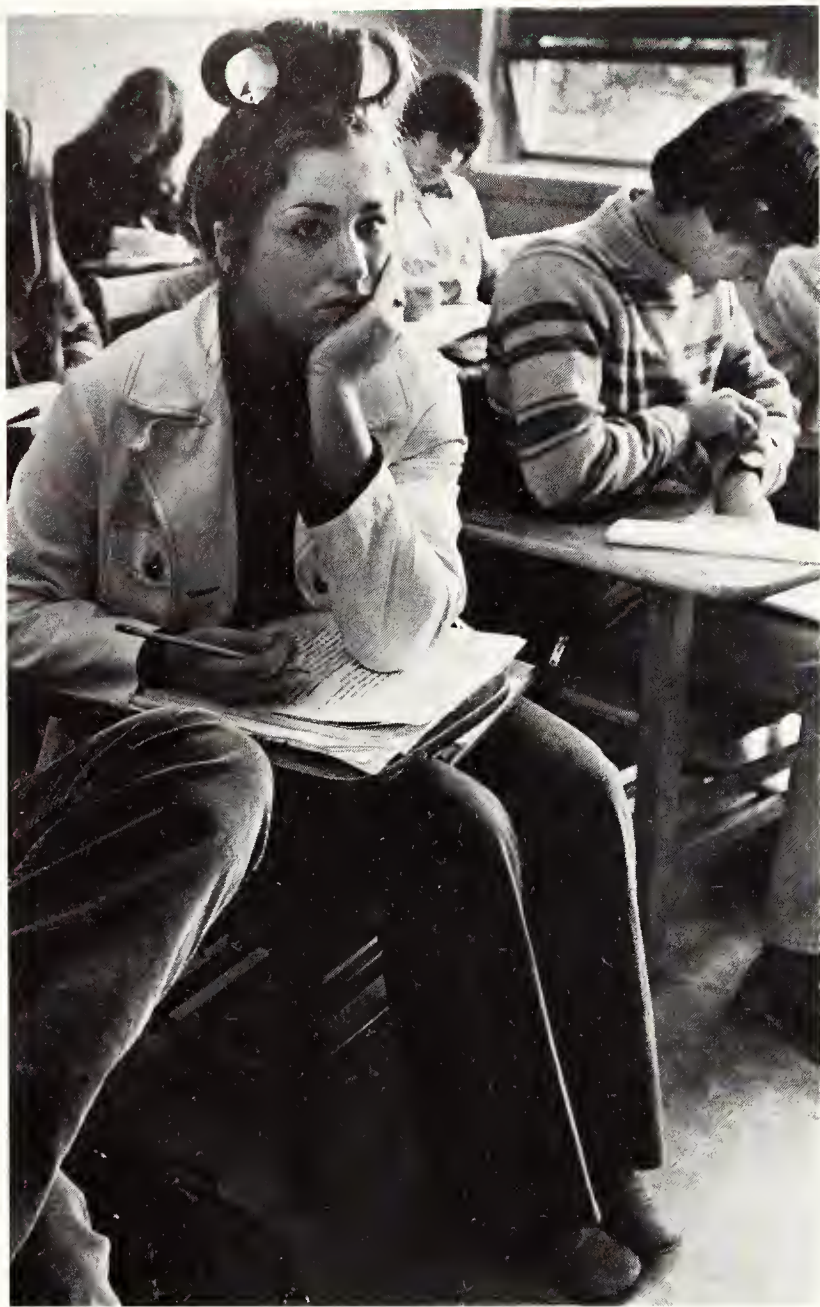

Danforth Chapel sits quietly amid the trees. Smaller and closer in atmosphere than Memorial, only shadows of tree branches can be seen through the stained-glass windows. Streams of red, blue, yellow, green and purple light filter through the windows onto the smooth stone sill. Green corduroy cushions the pews. Complete protection is given and the outside world is very distant.

As texture and atmosphere change, so do moods. Moods change with the night, with the seasons and with the years.

Moods are the textures of life.

Bummer victim fights injustices of 7:30 classes

By Dave Chartrand

In the battle for survival some species emerge victorious because they are born to god-like roles. They are the epic figures of the Neanderthal Man, the emperors of Rome, the American Indian, the Australian koala bear, and the ball point pen.

Other forms have bitten the evolutionary dust in a death dance with the elements. Distinctive of the extinct are the sabertooth tiger, panty raids, the Mouseketeers, Brylcream, and "I Love Lucy."

But one more species must not be slighted. This breed is forced to play those loathesome roles which nevertheless must be cast, and is the victim of tyranny, poverty, injustice and the most infamous of all fates. He is the "bummer" victim.

Yes, the bummer. The bummer is any class scheduled at a crummy time. The bummer transcends patience and stamina. Let us present a typical victim for scrutiny.

The most dreaded of the bummer classes is the 7:30 a.m. This particular gem ranks with such atrocities as the Spanish Inquisition and the Black Hole of Calcutta.

It is dark outside. The moon and

stars are still bright. Somewhere an alarm clock rings. Our victim is in the midst of his favorite dream, but the alarm is unrelenting. "Jeez, I just fell asleep!"

Dancing across an ice cold floor is bad enough. But dressing by the light of a fluorescent watch dial is degrading. Ever try to "feel" the difference between a brown sock and a black one?

Dorm breakfasts are like shooting craps. Sure, one might be pleasantly surprised to find his favorite breakfast. But one may also find something that looks like it has been sitting on the radiator since World War II. The odds are frightening.

At 7:15 the campus is peaceful, but not still. Dozens of other bummer victims are making the pre-dawn pilgrimage. They move slowly, but not aimlessly. Their gazes are down, but not blank. Their minds are anywhere but the present.

The inactivity outside is contrasted by the comic relief inside the classroom. You get to see things like girls with their hair rolled in empty Hi-C cans. And some guys still have on their pajama tops or bottoms — or both.

Now, if the instructor shows up on time the students merely hate him. But if he sprints in wearing gym shorts and a red bow tie, singing, "Hey, it's not so early!" the class becomes hostile.

And the 7:30 is just one type of bummer. Computers are swell things when they're on your side. But they have no hearts in scheduling classes. Don't forget the bummer of having an 8:30, a 10:30 and a 12:30 all in Seaton EL 93. If the afflicted soul happens to live on 9th floor Moore, he rots for five hours in the same desk. Immeasurable joy.

Finally we have the 4:30 Friday afternoon bummer. Intolerable to any self-respecting student, it means never getting to Kite's in time to save a booth. It means never getting to the Forum for the 7:00 movie before the line is backed up to Seaton Hall. And it means being the last one to leave for home on a holiday weekend. Greater injustices hath no man to endure.

We feel that the bummer victim will be around forever. Anticipating that event, our hats are off in appreciation of his unfailing efforts to make it in a winners' world.

Spring: rebirth releases riot of colorful sensations

By Ann Bales

Long silky hair flying free
with the wind,
Bright green grass and
clean blue sky,
a colorful kite stretching
and straining
to reach greater heights—
all of these things are
Spring.
Bare feet — tender feet—
beware
of coarse, warm gravel.
Bare feet — grateful feet—
accept the deep, cool mud
oozing up between happy toes,
reveling in a murky baptism.
Arms and legs bared
to receive and worship
a bright, warm sun—
feeling alive and free
after a dark, drab winter.
Rain splashing on young bodies,
accepting a prophecy
of warmer days and nights ahead.
Eyes glowing with laughter
and promises as the days
once again grow longer.
Bright clothes,
colorful clothes,
adorn bodies celebrating
a new season.
Running and jumping
in clover-filled meadows;
feeling free, alive and hopeful
about life.
Spending days at the lake,
feeling the water
holding up your body,
lightly, gently;
soaking up a warm and soothing sun,
its rays banishing winter's
cold dampness.
Unshackled by old man winter,
feeling happy to be alive,
worshipping the sun and rain.
Feeling every emotion intensely
is the blessing that is
Spring.

Spring audiences enjoy potpourri of productions

Something to suit every taste — that's what K-State theater productions offered student and community audiences during the spring of '72.

Opera, musical comedy, original one-acts, Broadway comedy farce, and experimental theater presentations emerged from the University's theatrical bag as the season progressed.

"La Boheme," a tragi-comic opera by Giacomo Puccini, opened the season March 7-11 in the KSU Auditorium.

Approximately 150 K-State faculty members and students participated in the joint production by the Departments of Speech and Music.

Irreverent musical comedy took the stage the following week with "Monks," a premiere production of an original play by K-State faculty members Michael McCarthy and Norman Fedder. Mark Ollington, K-State auditorium manager, wrote the original score for the play.

Directed by co-playwright Fedder, "Monks" poked fun at "cultsy devils, chastity nuts, women's lib" and other assorted fools.

Arthur Kopit's popular comedy farce, "Oh Dad, Poor Dad, Mama's Hung You In The Closet And I'm

Feeling So Sad," was presented in the Purple Masque Theatre March 20-23.

Intended by Kopit to be a satiric take-off on Tennessee Williams' heavy dramatic style, "Oh Dad" unravelled the adventures of a woman who travels around the world with her dead and stuffed husband, a Venus flytrap, and her son — whom she never lets out of her sight.

"Summer and Smoke," "Rumpelstiltskin," "See How They Run," and "Adaptation — Next" began Continental Theatre Company's week-long "Repertory in Residence Program" April 5-9 in the KSU Auditorium.

Also performed by CTC that week were "The Fantasticks," "The Emperor's New Clothes" and an experimental production of "The Merchant of Venice."

"Carpenter," a two-character play presented April 12-15, was written and directed by Stephen Harrington as his thesis production.

Three original one-acts showcased student talent April 26-29 in the Purple Masque Theatre. Written by three undergraduates, these plays also were directed, acted, and technically produced by students.

"Someone Died in Ibiza," by

Michael Donohue, was a character study of an ex-patriate artist and why he decides to go home.

Kim Riley's "Clifford" was a portrait of a poolshark and his methods of using people.

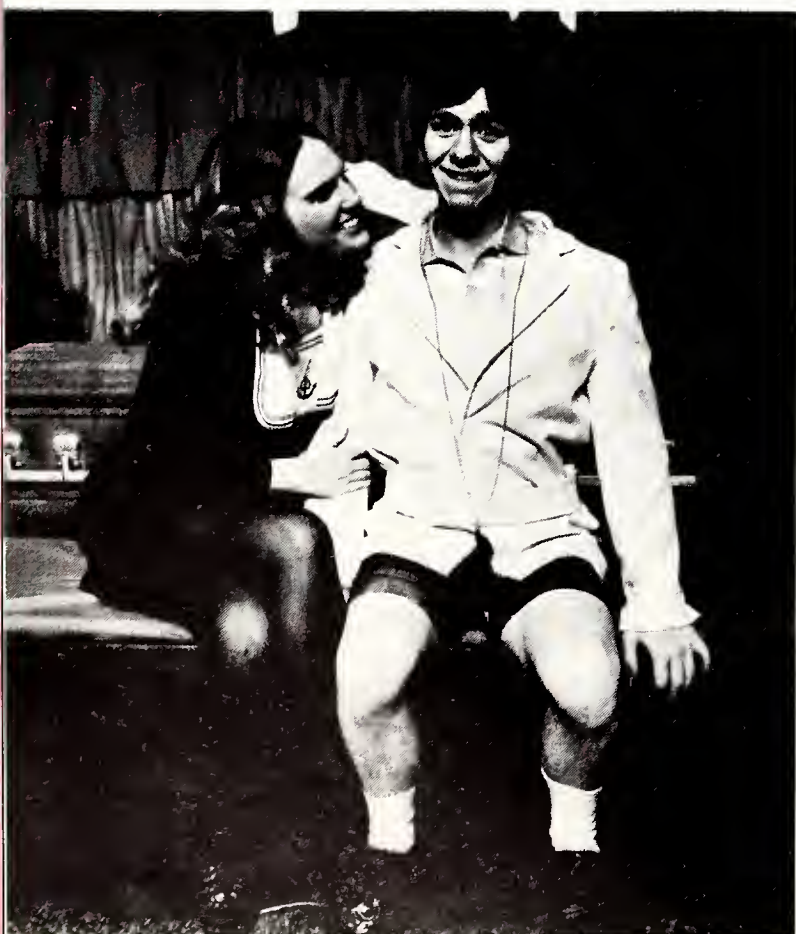

"The Guest," by Lana Castle, used black humor to contrast the behavior of an ex-mental institution patient with the craziness of the outside world.

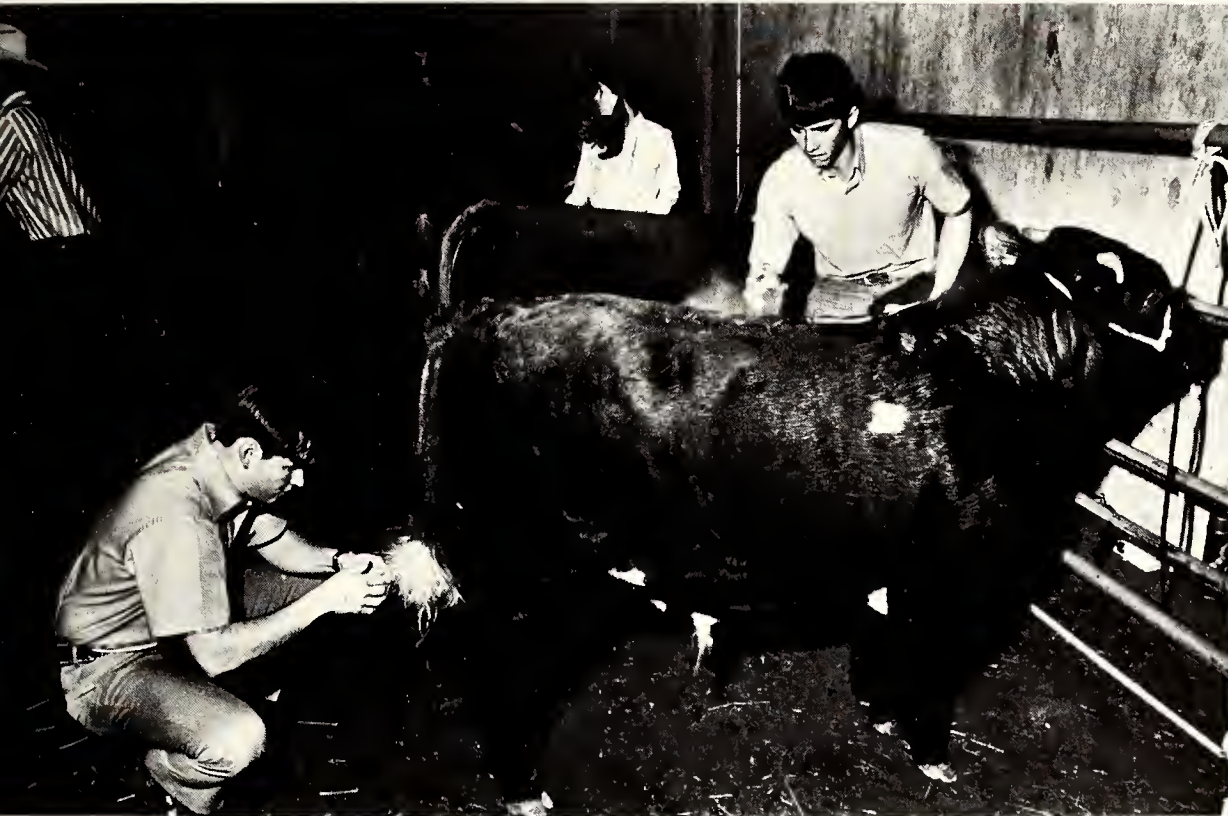

Spring Experimental Theater Presentations gave fully-rehearsed readings, followed by discussions of four new plays. One of these plays, "The Theobald Springtime," was written by Joel Climenhaga, K-State director of theater.

"The Investigation," a Readers' Theater presentation directed by Elizabeth Harris, helped close the season May 1.

Thinking back over the months of preparation, curtain calls, occasional disappointments and the inevitable chore of striking sets, it becomes difficult to distinguish one season from another.

Yet there is a special quality about any theater season that is individual, but fleeting. That difference lies within each participant and what he experienced — regardless of his position in relation to the footlights.

K-State students display skills at LAR, Rodeo

Cows, pigs, sheep, horses and humans congregated at Weber Arena late in the spring of 1972 for both the Little American Royal and the Inter-Collegiate Rodeo.

The LAR, sponsored by the Little American Royal Association, is presented in conjunction with the All-University Open House each spring. It is a chance for students to test their showmanship by training and showing University-owned animals.

The approximately 200 students who participated in the program were not judged on their animals, but primarily on their own showmanship.

Top showmen had an opportunity to win one of three \$200 scholarships.

The K-State Inter-Collegiate Rodeo, sponsored by Chaparrajos, drew college rodeo teams from the University of Kansas, North Dakota State, South Dakota State and the University of Nebraska.

To participate in the rodeo, a student had to be a member of a college team and own or borrow a horse.

The rodeo, which ran for two nights attracted nearly 6,000 people — many of whom wore traditional rodeo and western garb.

Dirt Band returns to K-State; records live album

The mystique of a rock band can impart an awe and reverence in its fans which makes them want to see the group again and again.

This was the case with Nitty Gritty Dirt Band's return visit to the K-State campus. Many students saw them on their first visit and enjoyed their music so much they attended the second concert.

Others, having missed the first concert, received another chance to view the musical antics of the Dirt Band.

Many people were lured by the Earl Scruggs Revue and by the announcement of a live recording for a Nitty Gritty Dirt Band album.

Both shows were sell-outs, proving to the Dirt Band that they are welcome at K-State.

Each show featured an hour of the Scruggs Revue's rock-bluegrass sound, followed by the Nitty Gritty Dirt Band's entertaining show. NGDB played many songs and performed their Fifties routine, complete with slicked-down hair, three-inch cuffs, and switchblades.

The second show was climaxed by a jam session combining Nitty Gritty Dirt Band and the Scruggs Revue. The songs were old spirituals sparked with new life by the combined efforts of the two groups.

The audience responded ex-

uberantly; they were on their feet and clapping much of the time.

The Dirt Band's jokes and gags drew endless laughter, creating a mood of involvement and enjoyment.

Some students criticized that Nitty Gritty Dirt Band's second "whole new show" was an exact replica of the fall performance — evidenced by the repetition of the Fifties skit performed during their first visit. However, there can be no mistake that the response was indeed the same: "Can't wait 'till they come back."

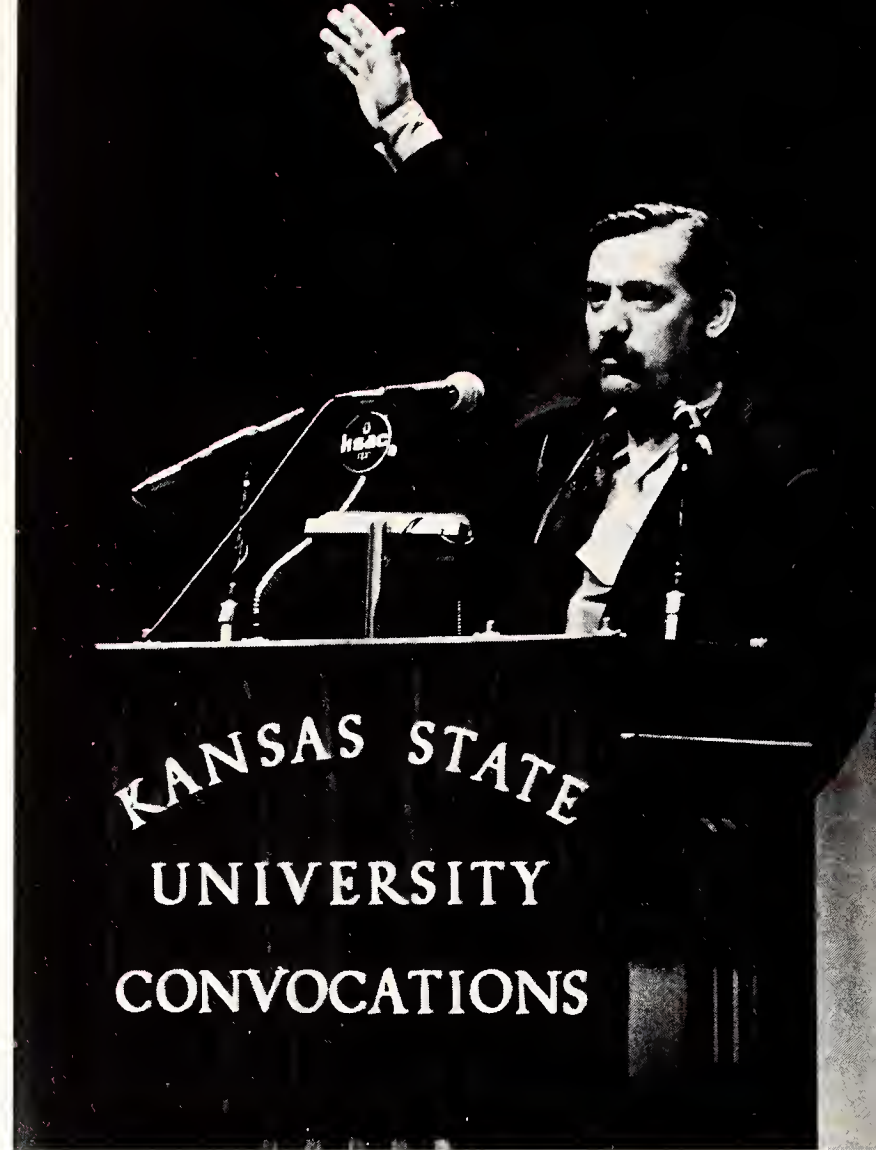

A new populist movement and a return of political power to the people were the ideals expounded by Sen. Fred Harris in an All-University Convocation March 16.

Harris, Oklahoma Democrat, was first to announce his bid for the Democratic Presidential nomination.

Harris called for a redistribution of the country's wealth from the corporate interests back to the common man.

"Most people don't feel that the political process will deliver on their legitimate complaints," Harris said. Consequently, there exists in America today a "kind of hopelessness."

Harris said he feels such matters as health care and the right to good housing should be basic to all people.

Troy Perry is not an average minister. And his congregation is not too typical either. Perry and his flock are professed homosexuals.

The subject of Perry's March 2 speech was the gay community. It was sponsored by UFM, Union News and Views, and the Manhattan Gay Consciousness Group as part of the Alternatives

Conference.

Perry is minister of the Metropolitan Community Church in Los Angeles.

The gay community is like any other minority group, Perry explained.

"Homosexuals have no 'H' stamped on their foreheads; homosexual men don't all wear dresses," Perry said.

Perry lamented the preconceived notions most people have about homosexuals. These are evident in "archaic laws" that permit punishment for homosexual behavior.

"Jesus never said, 'Come to me all you heterosexuals,'" Perry stated. "He said, 'Come unto me all you who are heavy laden and I will give you rest.'"

Spring speakers discuss politics, gay life

"Man does not live by income alone; he must have a sense of purpose," Sen. Frank Church said April 18.

Church, Idaho Democrat, addressed an All-University Convocation on subjects including the elderly, welfare, the Social Security system and stepped-up bombing in the war in Indochina.

After proposing a change in the welfare system in which the elderly would be removed from welfare rolls, Church added: "A person's lifetime should not be limited to one career."

Church touched on the Vietnam War, saying, the United States needs a President who will tell the American people this country has done everything it can for Vietnam.

"Our failures in the past need not be repeated in the future. Maybe we are commencing to take the blinders off," he said.

Today's markets are so confusing that consumers are much like **Alice in Wonderland**, Betty Furness, former President Lyndon Johnson's assistant on consumer affairs, said.

Ms. Furness spoke May 3 at an All-University Convocation as part of the First National Conference on Student Consumer Action.

The consumers are at a definite disadvantage in the consumer game; they generally feel the manufacturers are looking out for them — which isn't necessarily true, she said.

"The consumers should complain and become more suspicious of large corporations. They should not only be aware of price, but also of harm to the environment," Ms. Furness said.

Consumers can be influential in getting existing laws changed if they will write directly to the people involved.

Speakers call for more leaders, equality, success

"Never before have people bought their food so cheaply," Earl Butz, secretary of agriculture, told a near-capacity audience at KSU Auditorium May 4.

Using statistics to show food costs had gone down over the past year, Butz said by the year 2000, the capacity to feed another three billion people must be developed.

The Landon lecturer also stressed the need for capable leaders.

"Education is the most

profitable investment we can make," Butz said, explaining that it produces two areas of leadership: in professions and in government.

"It is the 'I can' spirit that has made us what we are and gives us unlimited power for the future," he said. "This is the intellectual world where challenges are—we live in a world of ideas."

Butz received a standing ovation at both the introduction and the closing of his speech.

Most of what people have heard about women's liberation is inaccurate, a spokeswoman said April 14.

Jo Freeman, an organizer of the women's liberation movement discussed the theory of women's lib in a speech during Women's Awareness Week.

"There is no comprehensive set of beliefs which can accurately be labeled women's liberationist or feminist. At best one can say there is a general agreement on two theoretical concerns: the first being the feminist critique of society, and the second, the idea of oppression," she said.

Many laws of the land are oppressing women, Ms. Freeman said. But she said she feels confident the Equal Rights Amendment will change them.

Cleaner air and water will become a reality in the near future as a result of work done by the Environmental Protection Agency, according to William Ruckelshaus, Environmental Agency administrator. Ruckelshaus spoke to the K-State community April 12 as part of the Landon Lecture series.

"What our society badly needs are some successes," Ruckelshaus said. "I believe that with the environment we have a chance for such successes. The progress will not be overnight but will be seen in cleaner air, purer water and earth beautification."

"Environmentalism teaches us a new ethic and a new reverence for life, helps to unify the American people and will inspire new confidence in man's power to control his own destiny," he said.

"We must build a world," Ruckelshaus said in conclusion, "where human beings count more than machines."

Women's liberation: a road to human liberation?

By Karla Brockman

What do you do when you're dissatisfied with life? What do you do when the boss pays Sam twice as much to do the same job you do even better? What do you do when it's not enough to clean house, cook dinner and wash dishes?

Increasing on both the national and local levels are groups of women, unhappy with their status in life and willing to work to change it. Even as conservative a campus as K-State has sympathetic and active workers in women's awareness movements.

"It is really growing here," one soft-voiced advocate observed. "The time is ripe."

Under the free university system, a series of women's groups have been established to discuss various aspects of the status of women.

Ranging from high school age to 62, women from Manhattan gather to fulfill different needs — political, emotional, and spiritual. Most of the women are older college students who are married or have been married.

Growing from two of these groups is the Women's Political Caucus which was in the planning stage last fall. A NOW (National Organization for Women) chapter is also being established as a result of one of the consciousness-raising groups.

The words "women's liberation" evoke a wide spectrum of responses at K-State.

"I don't agree with the ideology that fosters hate," a student organizer of the consciousness-raising groups explained.

"I agree with the rest of the philosophy for those who want it. I think society places too much emphasis on the patriarchal situation. We need to look at the struc-

ture and change it," she said.

She said she has found K-State students to be, in general, apathetic and confused about the groups and women's lib as a whole.

"The media has played up the bad aspects of women's lib," she continued.

The majority of coeds who agree with the basic goals of women's lib are not active in an organization as such.

"I believe the abilities of males and females are equal but not identical," one girl commented. "I think they should get the same pay for the same job, but I don't agree with the radical lib movement."

A coed who is one of five girls in the sophomore class of 85 veterinary school students said her situation has changed since her freshman year.

"Last year I felt self-conscious," she explained. "I tend to be shy, and I was scared of making a bad impression. I thought some of the guys felt I was taking their buddies' place. Now, I think I probably had a chip on my shoulder then. We're like a family. Now, if someone doesn't like me I know it's because of who I am and not because I'm female."

A coed who is in the predominantly female curriculum of home economics said women's lib is something to which everyone should relate.

"I'm not really radical," she explained. "I'm mainly concerned with getting everybody to realize there is something to it."

Although she is not active in an organized movement, she said she felt some of the radical women's groups were necessary in order to gain attention.

"I don't feel like I've really had any problems with discrimination," she said, "but sometimes I really get mad. Whenever someone brings up women's lib, most of the guys laugh and treat it like a big joke."

Some girls said they feel the university system is fair to both sexes, but after graduation the situation changes.

"I have a semi-skilled job and am being paid less than half of what a guy doing the same job at the same place is getting," a senior coed said. "This is the kind of thing that makes me pro-women's lib."

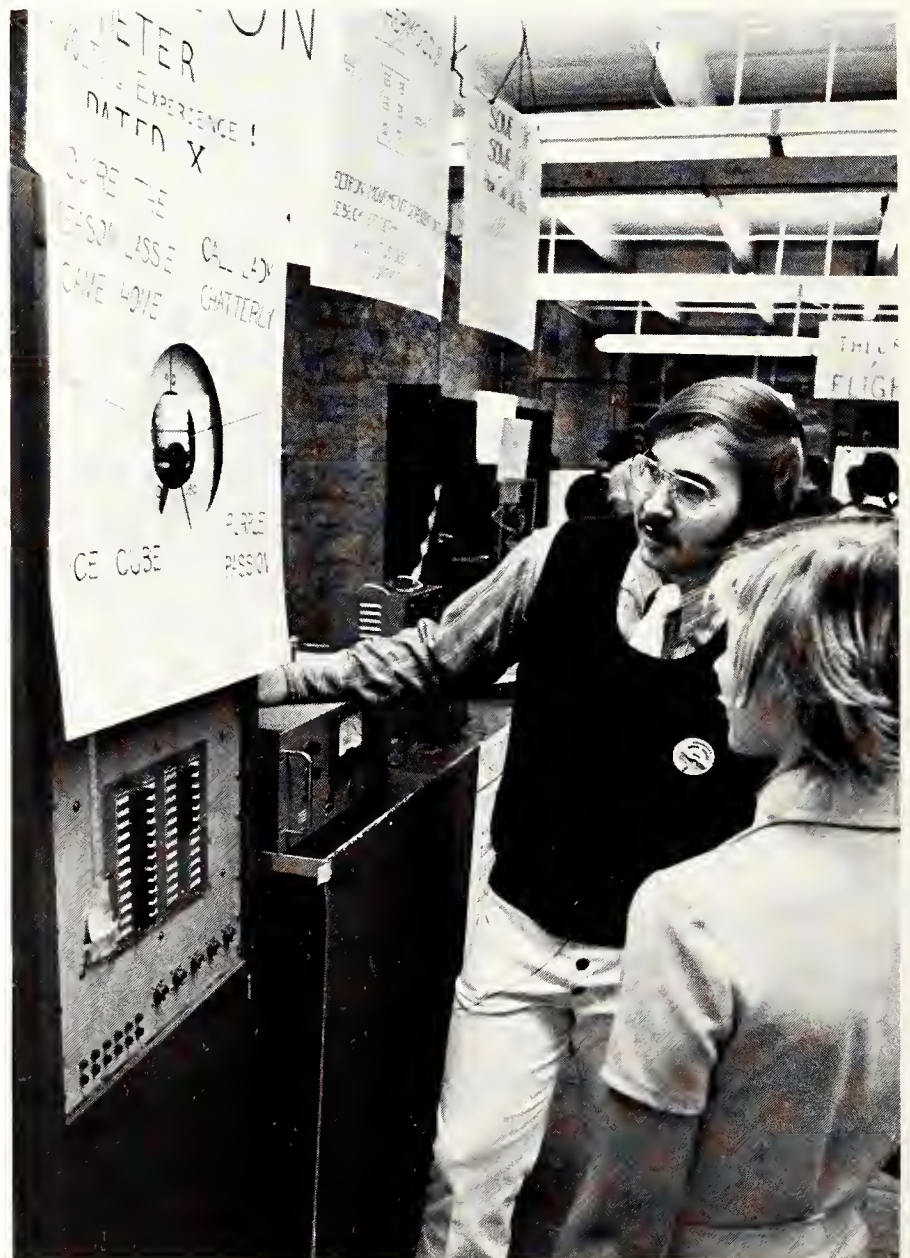

A married student who is close to earning her degree said she feels relatives are expecting her to finish school so she can start a family.

"They don't consider it important for me to have a career," she explained.

Some definite results of the women's awareness movement have been seen at K-State. Several classes, including Sociology of Women and Sex and Politics, are now being offered. A newly-established women's center in Fairchild Hall offers a reading area and resource material.

Last year, a week was devoted to women's awareness which included speakers and panels on subjects ranging from zero population growth to women in politics.

"Things are still slow here," a women's liberation organizer observed. "There are still people who are happy with traditional sex roles. There are many students who haven't gotten into the working world yet, so they don't feel it involves them — although it should. I feel the whole goal of women's liberation is human liberation."

Talent, facilities showcased during open house

How do we, as experienced college students, explain K-State life to our forever-inquiring parents?

The All-University Open House on March 18 was a simple solution.

During the open house, parents were free to observe exhibits and demonstrations prepared by the different colleges, have a Coke in the Union and take a look at the campus as a whole.

"Follow the Lollipops" was the theme for educational exhibits in Holton Hall. Tours were also conducted through the audio-visual center and reading lab.

"Seaton Street," presented by the College of Architecture, included proposals for a physical recreation building, interior architectural designs and projects on landscape architecture.

"Engineering: Minds and Magic"

was the theme for the College of Engineering's open house. Displays included an Apollo 12 lunar sample.

Physics students and their parents toured the planetarium while those interested in journalism and mass communications toured the **Collegian** and **Royal Purple** offices. To conclude the College of Arts and Sciences' open house, the K-State Players performed the original musical "Monks" in the Union Forum Hall.

The College of Veterinary Medicine sponsored tours through Dykstra Veterinary Hospital.

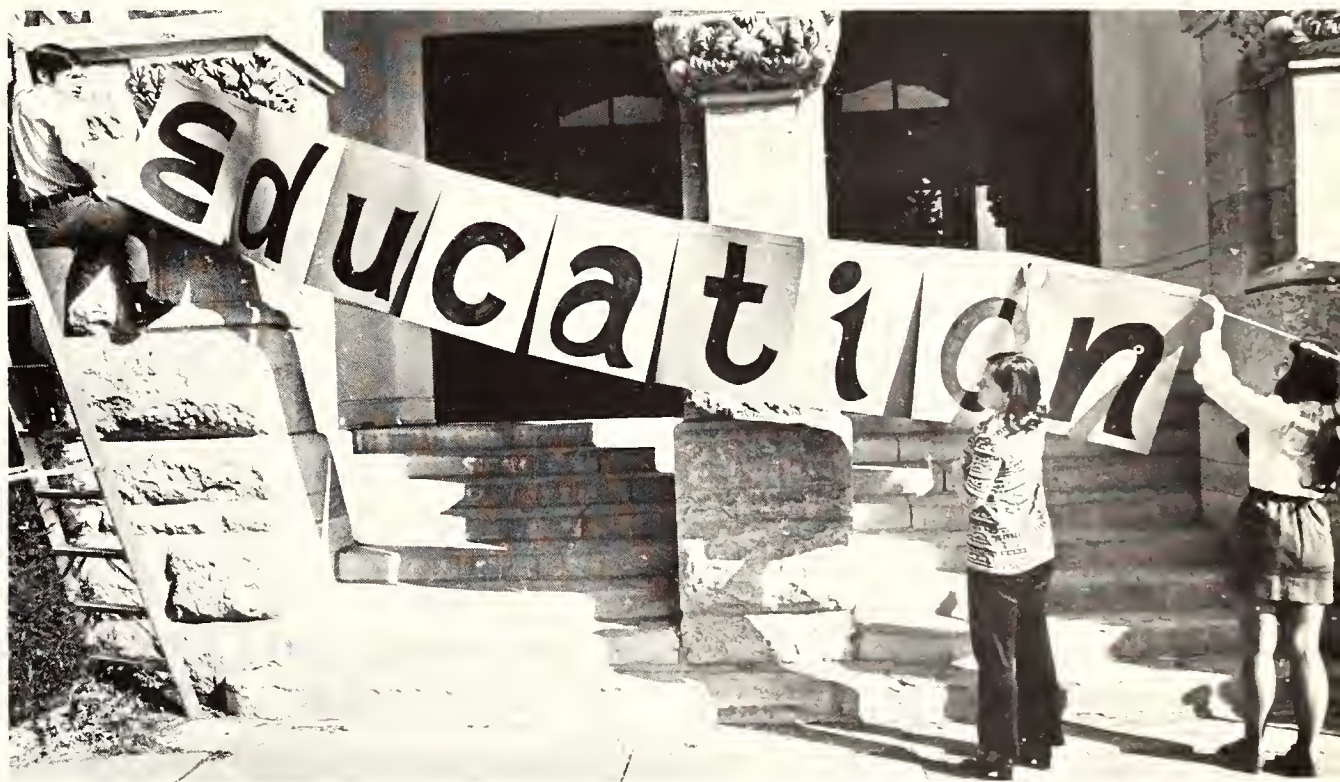

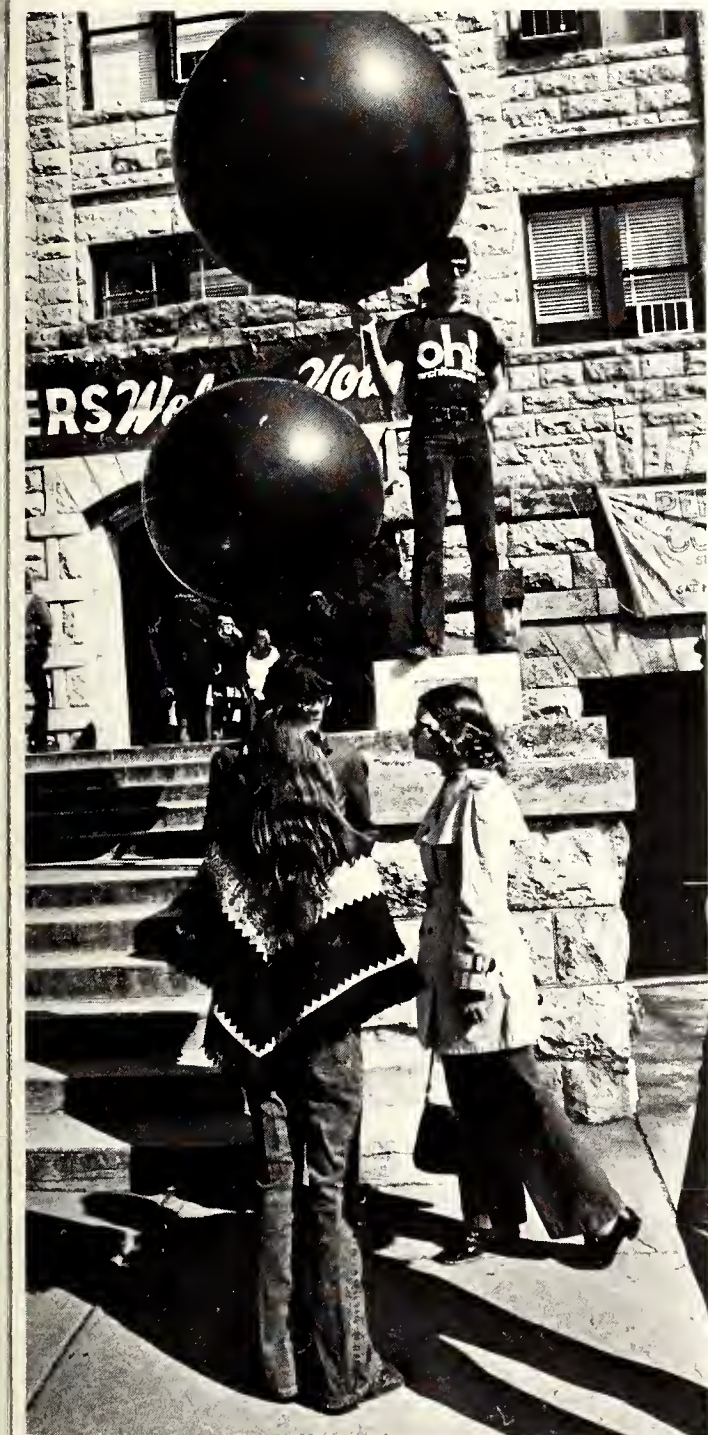

"Where do you Fit?" was the theme of the annual Home Economics Hospitality Day. There were programs on career opportunities every half hour in Forum Hall. Justin Hall was the scene for "action rooms" exhibiting "You in the

Future" and "Business, Industry and Military."

"Environment: Ag's Responsibility" served as the College of Agriculture's open house theme. The Department of Horticulture projected pollution control for the future, concerning livestock and crop productions. "Agronomy Sustains the Liveable Environment" pointed out ways of controlling marijuana.

The Little American Royal, featuring a professional roper and various classes of dairy and livestock, concluded the day's activities.

The All-University Open House was the first step in answering the endless questions of our concerned parents. And we experienced college students learned a few things about K-State, too.

Break loose, play games, relax with Spring Fling

By Terry Jackson

Guys with greased-back hair, girls wearing Ruby Bagonia lipstick, beds being pushed down the middle of the street, and 32 people taking baths at the same time — in the same tub.

These are just a few things that happened during the week-long residence hall carnival known as Spring Fling.

The festival, sponsored by the K-State Association of Residence Halls, is a week of free, inter-hall activities designed to give hall residents a chance to break loose before beginning hard-core studying for spring finals.

There you were, remember? You and a couple of friends, standing on the porch of that white house. The little old lady answered the door, and you asked her if she had a 1945 K-State football ticket or a pig squeal. Remember — it was the scavenger hunt.

Then there was the casino party. All the money you lost, you and everyone else . . . losing your shirts. But you kept on playing. Well, why not? The money was free. You got it as you walked in the door. That was Sunday.

And on Monday, your whole dorm along with the dorm assigned to be your partner, went over to Weber Arena and tried to stuff as many bodies as possible into a bathtub.

You remember. Maybe you were one of the guys sitting on the bottom when West Hall loaded the tub, only to have the entire pile fall over on you. Or maybe you were one of those in the middle of the pile getting squashed and gasping for breath. But it was fun.

And that night, as you dragged your aching body around the dorm, the smell of popcorn was everywhere. You and your date grabbed a blanket, tripped down to the lawn in front of Van Zile Hall, watched the movie and passed around those big bags of popcorn.

On Wednesday, there was the leadership banquet. Maybe you were one of those honored at the banquet. Remember? For the first time, the candles really were lit . . .

and you received a certificate for being a student leader.

On Wednesday you went to a second movie in front of Van Zile. Or maybe you were one of those studious persons chosen for honors at the scholarship banquet.

And on Thursday you had a day off; there were no activities scheduled. But there were always the beds to decorate. Remember? You hid the bed in the basement of your dorm. The bed decoration contest was scheduled for Saturday, and your hall wanted to win.

On Friday, if you had a talent you wanted to share, or maybe if you didn't but wanted to hear others perform, you went to the Catskeller in the Union where there was an open mike.

And then Saturday came, and with it the culmination of the week's activities. You helped move your dorm's bed outside for the contest. Remember all the people leaning out the windows of the dorm, throwing water balloons?

Then the judges voted on the beds. Maybe yours was the one with Willy Wildcat lying sick . . . or the turtle . . . or the sports. Or maybe yours was the bed that won . . . the one with the picket fence, a Swiss clock and a couple who leaned out of the clock, kissed and disappeared again. After the contest was over, you ripped the decorations off the bed and prepared for the race. The bed was reassembled, four girls took their places on the mattress and four guys prepared to push.

It all started in front of the Union, remember? And it ended — or was supposed to — down by the Chapel. It was a hard race . . . one bed didn't even make it out of the driveway.

Whether your bed made it or not, you met down at the Chapel for a picnic. And then the games started. How could you forget those? The ice cream-eating contest in which the ice cream was like rock . . . the bod race where four guys carried a girl . . . the grapefruit pass where the girls would have clobbered the guys if they could have stopped laughing

long enough . . . and the tug-of-war which ended up as a mud bath.

And Saturday night . . . the final touch on a week of fantastic fun: the Fifties Dance. The band was Lonny Fame and the Beltones.

If you are a guy, your hair was probably greased back, and you came complete with pocket comb. If you are a girl, you probably were wearing white bobby socks and a class ring on a chain around your neck. Everyone was chewing bubble gum, oohs and ahhs were heard everywhere, and there was even a kissing contest.

Then, Sunday, things began to return to normal, but it was fun to laugh about the silly times you had.

For many, 1972's Spring Fling was their first, for some it was their last, and for others it was their only. But whatever it was, it was fun.

Allocations battle resembles Colosseum scene

By Terry Jackson

In the spring of 1972, Student Senate once again reverted to its ancient Roman heritage — back to the times of emperors and gladiators.

As in past years, they met in their own miniature Colosseum — more commonly known as the Big Eight room of the Union — on Thursday nights to hear requests for money.

One by one, the gladiators (organizations requesting money) were led in and required to prove themselves to the spectators.

Debate raged over which gladiators were the best. Supposedly the better they were, the more money they would be allocated. Some spectators became actively involved in the fights; some didn't say anything; others spoke for or against certain gladiators while saying nothing about many others. And when the fights were over, they all voted.

And, as in Rome, the audience had its favorites. There were a few gladiators who had been found or raised to fight in the contests — and win. They were lumped under the title "service organizations."

And, of course, the audience had certain gladiators whom they hated. There were those who had been trained too extensively and had, in previous years, won the games too consistently. In previous years, most had fallen into the category "athletics." But this year there was another gladiator named to this group: **Royal Purple**.

The modern-day Romans even had a group to decide which gladiators were the best. They called it Finance Committee. And when the board had previewed the fights, and had recommended how each should be rated, the gladiators were thrown into the arena for the real fights.

The fights were marked with confusion. Spectators kept leaving the arena for refreshments. The Colosseum echoed with cries of "point of order," and the crowd began to get hot and emotional over the performances of the gladiators.

When the time came to vote, the levels of debate and dissention mounted even higher. But, finally, a decision was reached. The ratings were quite different than those proposed by the previewing group, but no one had expected them to be the same.

And then the twentieth-century Romans went home, preparing to return the next Thursday as twentieth-century student senators.

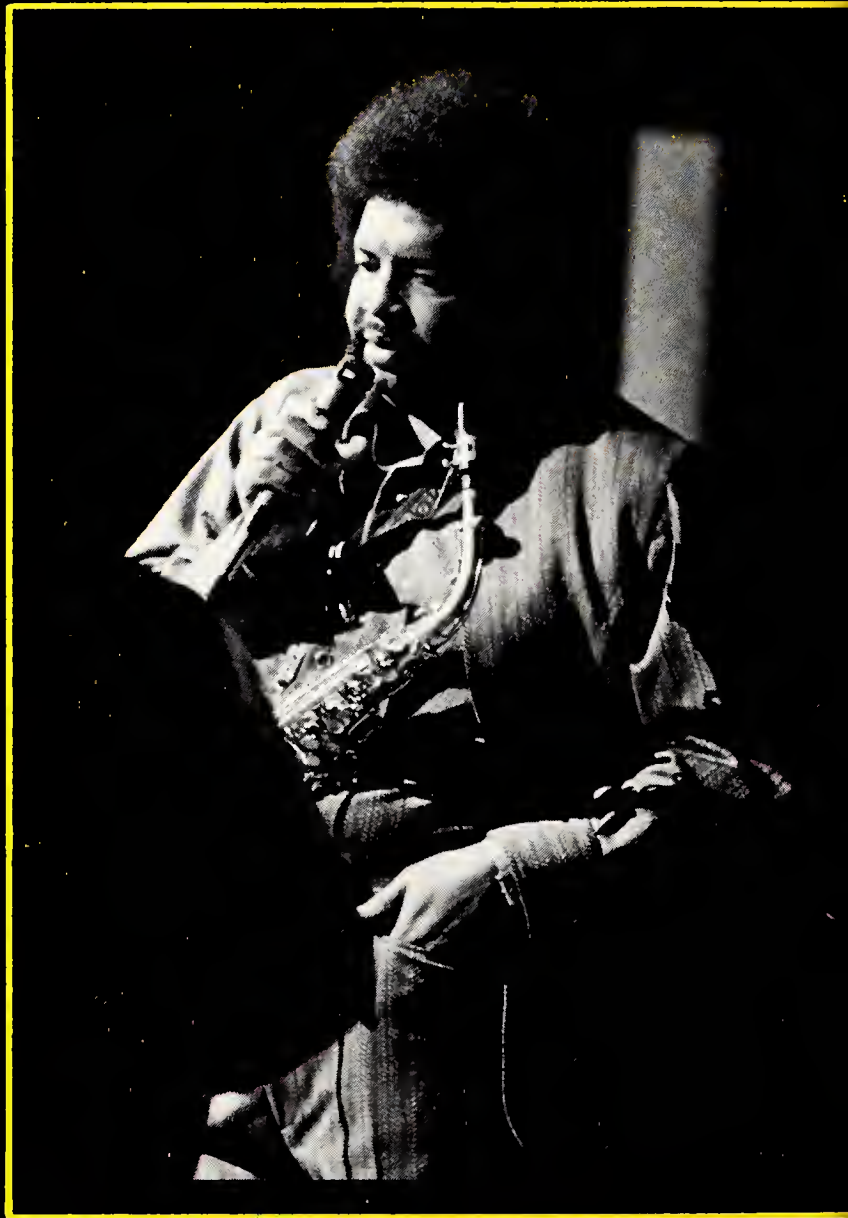

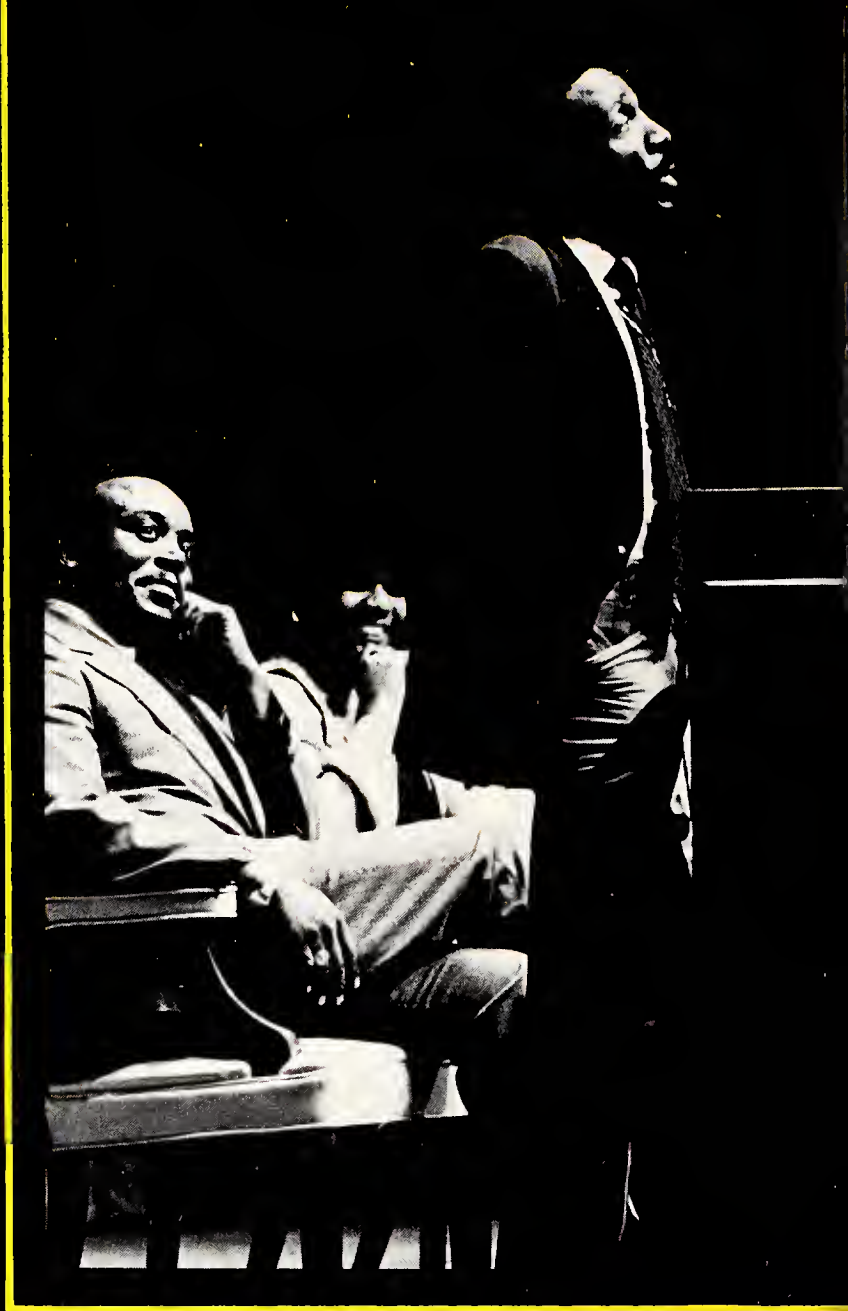

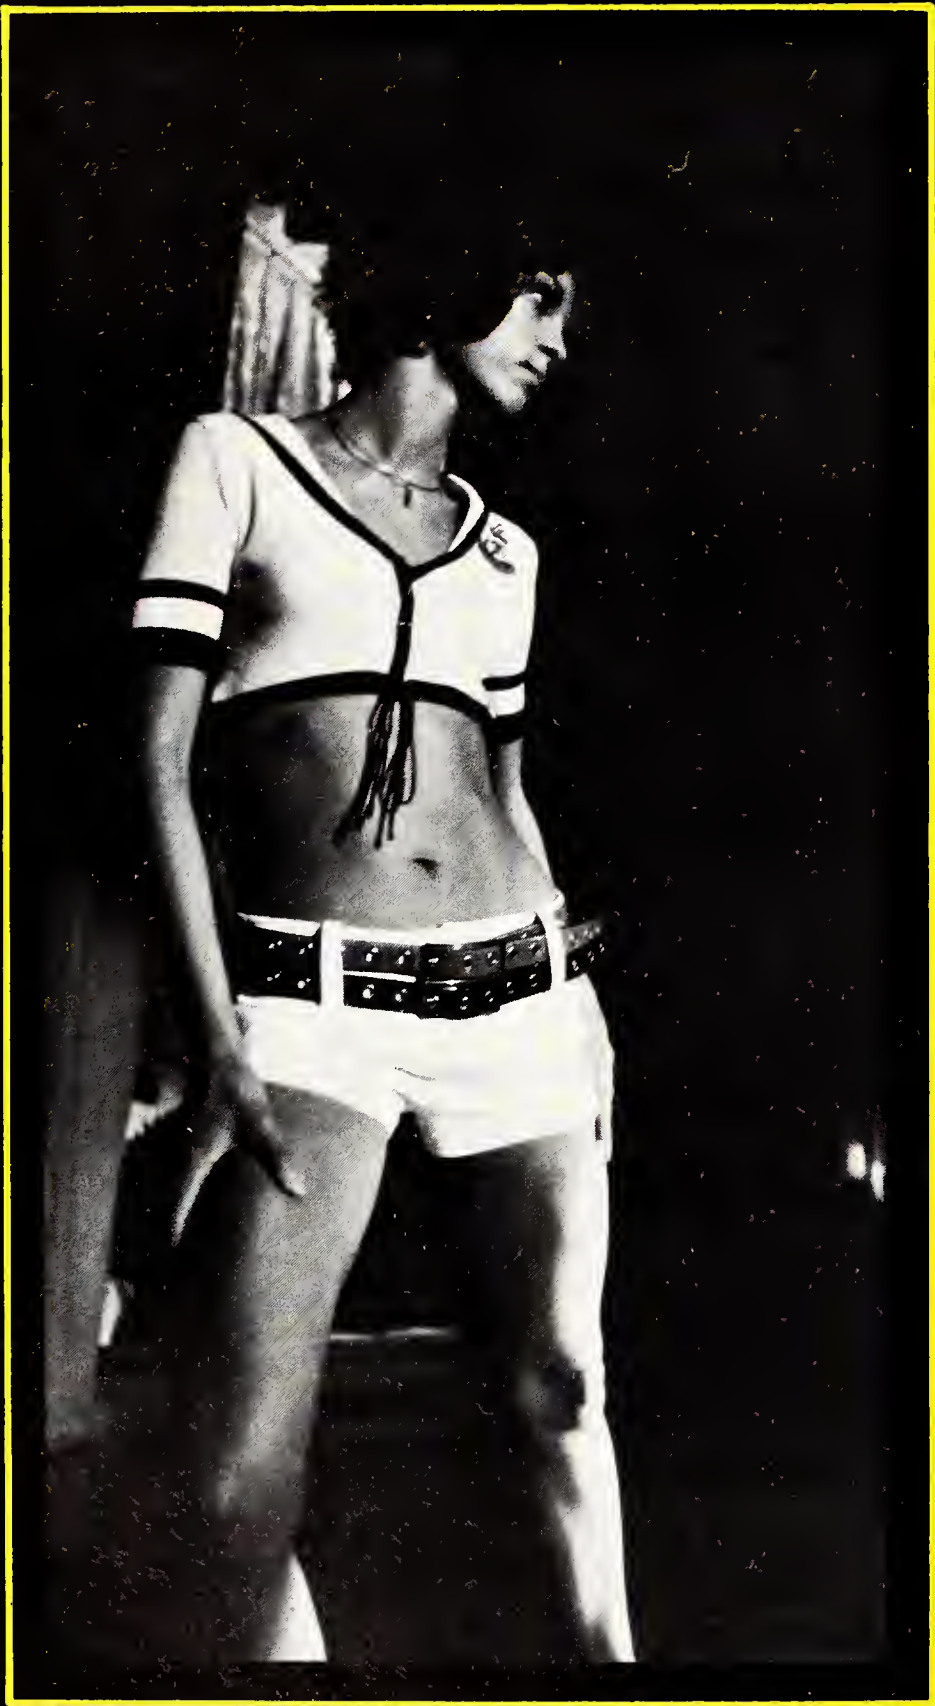

The senators' Romanesque decisions were not final, however. The organizations still had a chance to return and appeal the allocations — in the fall of 1972.

Allocations list

The following organizations have requested funds through SGA for the 1972-73 school year. Listed are the organization's name, the amount it received this year, the amount it requested for next year, the Finance Committee's recommendation and the tentative allocation for next year (if the organization's allocation has been tentatively approved).

Organization	Amount Received last year	Amount Requested this year	Finance Committee's Recommendation	Tentative Allocation
K-State Union	\$5.00 line item *	\$5.00 line item	\$5.00 line item	\$5.00 line item
Student Publications	\$2.33 line item *	\$4.33 line item	\$2.33 line item (excluding Royal Purple)	\$2.33 line item

Manhattan Cycle Club		\$2,355	0	
Collegiate 4-H		\$290	0	

line item refers to the amount received from each student's activity fee each semester.

Aspects of Black culture accented during BSU's "Longest Weekend"

April 28-30, 1972, was termed "The Longest Weekend Ever" by its sponsor, the Black Student Union.

The purpose of the weekend was to acquaint students with varied aspects of Black American culture.

Unfortunately, the weekend suffered from some low turnouts which took their toll on the over-all effect of the weekend.

"The Longest Weekend" began with Dick Gregory's lengthy speech Friday afternoon in the KSU Auditorium before a near-capacity audience. Gregory combined humor with wisdom, trying to force the audience out of its apathy and "ignorance." He spoke of the hunger, strife, and cruelty in the world, begging his listeners to rise up against them.

Gregory's humor was warmly received, but his "revolutionary" ideas caused some grumbling and much silence in the crowd.

Friday night the auditorium hosted the Cannonball Adderley Quintet, but this time the audience consisted of less than five hundred people. Still, Cannonball and Co. played as if the house were full.

The Quintet's music consisted of intricately structured, funky jazz. The horns provided beautiful lyric melodies, backed up by excellent drum, bass and piano work.

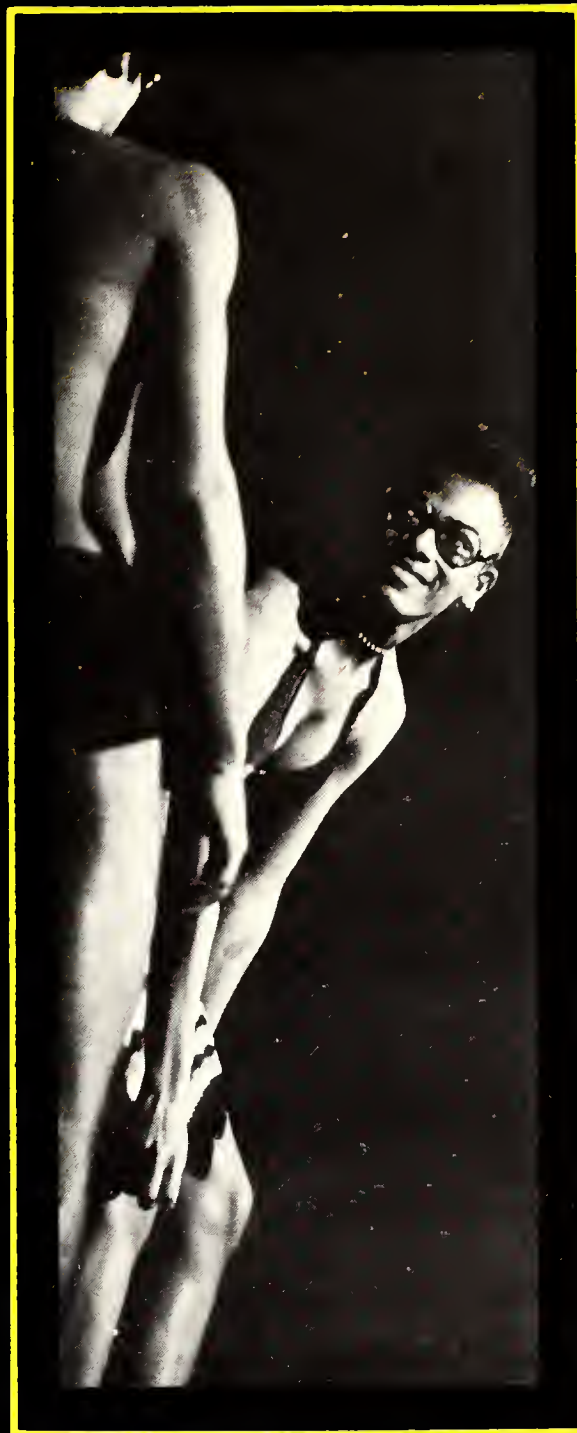

The small audience thoroughly enjoyed Cannonball's unique blend of jazz. But many were disappointed that more K-State students and faculty did not attend.

Saturday featured a "Soulful Black Breakfast" in the Union with a menu including grits, fried yams, biscuits, muffins, sausage and ham.

That afternoon there was a football game in the stadium and Kappa Alpha Psi presented its annual "Kappa Ball" Saturday night.

"The Longest Weekend Ever" closed Sunday morning with "Fantasy in Fashions" presented in Forum Hall, sponsored by local merchants.

The impact of the weekend may not have been colossal; and the K-State community may have been to blame for their lack of attention. But "The Longest Weekend Ever" was a valiant, ambitious idea on the part of the K-State Black community.

Awareness—

"We want to stop you from patting us on the back and saying, 'Hi, Chief!'," a spokesman for the American Indian Movement (AIM) told K-Staters.

Appearing during The American Indian in an American Society Conference March 17-22, he spoke of his organization's efforts to wipe out the stereotypes white men have perpetuated about Indian people.

The conference, sponsored by Union Program Council, promoted understanding of Indian Pride.

Women from the Topeka Indian Center demonstrated the art of

preparing foods, and Indian craftsmen displayed silverwork and costume beading techniques.

Panel discussions and seminars dealt with such topics as land restoration and Indian civil rights.

The White Roots of Peace, a Mohawk nation performing group, invited the public to share Indian customs and philosophy through singing, dancing, and poetry.

A film series — including "Soldier Blue" and "A Man Called Horse" — and special art exhibits helped to coordinate the conference's week-long focus on the Indian experience.

Spring news—

In the Spring of 1972:

—At a student strike in March, 250 K-Staters protested the University system of tenure which does not allow student voice in the hiring and firing of instructors.

—A new health craze saw many Americans taking large doses of vitamin E, which supposedly cures everything from failing sex lives to ulcers.

—Clifford and Edith Irving were indicted on charges of fabricating taped interviews in a plot to obtain \$750,000 for a bogus autobiography of billionaire Howard Hughes.

—Gov. George Wallace ran well ahead of 10 opponents to win 75 of the 81 Democratic delegate votes in Florida's Presidential primary.

—A fire caused approximately \$6,000 damage to a K-State dairy barn.

—J. Edgar Hoover, FBI head for 48 years, died at age 77. Hoover had built a unique anti-crime force noted for its pinpoint discipline.

—And finally, work began on a new synthetic floor in Ahearn Fieldhouse and was to be completed before the 1973 basketball season.

Pageantry—

Far from the glitter and glamour of Miami Beach, home of the Miss America pageant, in Manhattan's Municipal Auditorium, a K-State coed was crowned Miss Manhattan-K-State.

On that spring Saturday evening the contestants sang and danced in front of cardboard scenery and walked onto a temporary runway for viewers — seated in folding chairs on the basketball floor.

Despite the pageant's faults, at one time all the girls must have dreamed that the Manhattan auditorium would be only a stepping stone to the real pageantry in Miami.

Between acts Master of Ceremonies Larry Weigel struggled to fill time with jokes and harmonica tunes. Occasionally he'd stop to introduce prominent Manhattan citizens, but much to Weigel's embarrassment, several of the prominents had preferred to stay home.

Their indifference reflected many others' questions about the pageant's importance.

On campus the Collegian ran an editorial denouncing the pageant. Many students agreed with the editorial comments which stated that pageant girls were not "American girls," but phonies. The editorial ended with the authors saying they could think of better things to do with their time — including traveling to the local dump for a rat hunt.

Minus a few Manhattan businessmen and Collegian reporters the pageant was well-attended. Members of living groups representing the girls, parents and relatives filled the auditorium.

Those present saw Riva Stevens, representing Pi Beta Phi sorority, crowned Miss Manhattan-K-State.

The time, pride, hours of work and tension of awaiting the judges' decision make it possible to draw an analogy between the pageant and a cattle judging contest.

Both provide an opportunity for

interested persons to achieve their special goals, and for others in the audience to admire the excellent qualities of the competitors.

Rod McKuen—

Propped up on a stool and clad in track tennies and faded blue-jeans, Rod McKuen charmed the sell-out audience in the KSU Auditorium on April 18 and 19.

The poet, lyricist, composer, lecturer and lover recited his poetry, beginning with his poems about man by ages and ending with his poems on "Sloopy," a cat which led to McKuen's comments on the preservation of animals.

When no one in the audience had any questions to ask him during a question and answer period, McKuen humbly stated, "That's kind of neat in a way."

The mood was soon broken when a hand shot into the air. He commented briefly on his personal philosophy (thinking of and living in the past), and on the current state of affairs (attacking Martha Mitchell, Melvin Laird and "killing" in general).

Moment to Moment, a book of McKuen's poetry which is sold only at his concerts, was offered to the crowd before and after the program.

Danzi Quintet—

The Danzi Woodwind Quintet closed the Chamber Music Series' 1971-72 season in the KSU Auditorium.

The group from Amsterdam, Holland played early 18th, 19th, and 20th century music.

K-State contracts these small vocal and instrumental ensembles

through a block-buying agreement with other Kansas schools. The groups play at Hays, Topeka, Kansas University, the University of Arkansas and others as they tour the area.

The Danzi Quintet was the fourth and final concert in a series which included the Poge String Quartet, the Warsaw Piano Quintet, and the Spanish Harpists.

Patrolman—

Patrolman Captain. The words arouse certain images immediately — conditioned responses prompted by past experiences or hearsay. Some are bad — some good.

Paul Nelson is K-State Patrolman Captain. He has been chief of traffic and security since July, 1958.

Before then Nelson spent 16 years running a small shop in Aggieville which sold popcorn, orange juice, and hot dogs.

"This job has fewer hassles than a city job," Nelson said. "The city police have to deal with 'family problems' but there are very few disturbances at Jardine Terrace."

Nelson is a pleasant man who is nevertheless firm in his convictions. He is helpful but unyielding when it comes to complaints of traffic violators. If you are in the wrong, there is no use arguing. Chief Nelson is fair, but forceful.

"One of the main jobs of the campus police is to clear up traffic congestion before and after football games," Nelson said. "This is sometimes difficult with only two

patrol cars."

Other functions include investigating thefts.

"I can remember when the dormitory rooms didn't have locks," Nelson said. "The most thefts occur just before vacations such as Thanksgiving, Christmas and spring break."

"A ruling made July 1 makes things difficult for police," Nelson said. "It states that no person can be arrested on a drunk charge if he is on foot. So if there is a possibility of your being arrested for drunken driving, just get out of the car and start walking. You won't be arrested then."

"Campus police work closely with mental health, and we refer to them anyone who seems to need assistance," Nelson said. "I feel that they can offer more help than we could give."

Does he break big robbery cases? Maybe not, but to many people, a \$5 theft warrants an investigation. And it's reassuring to know that someone can bring organization to what could be chaos in the parking situation.

Spring events: fun, fund, consciousness raising

Semester's end finds K-Staters under pressure

By Robin Rouse

Dead week:

Mixed thoughts for the approaching end.

No homework? No meetings?

Last minute tests and early finals and food.

Studying? — a semester's worth in one week.

You sold the book you needed for your hardest final?

Study breaks every five minutes; one pitcher in Aggie?

Checking account scraping bottom.

My best friend **lost** my notes?

The girl next door has **one** final?

Approaching graduation,

dead week ends,

finals ahead

Summer is a week away.

Last minute cramming

for the 7:30 multiple guess final.

Two-hour Union "sit-in" line

and those out-of-date books.

Essays: a lesson in bullshitting.

Survival kits from home,

A 2 a.m. coffee break,

the **last** final,

overdosed.

Celebration.

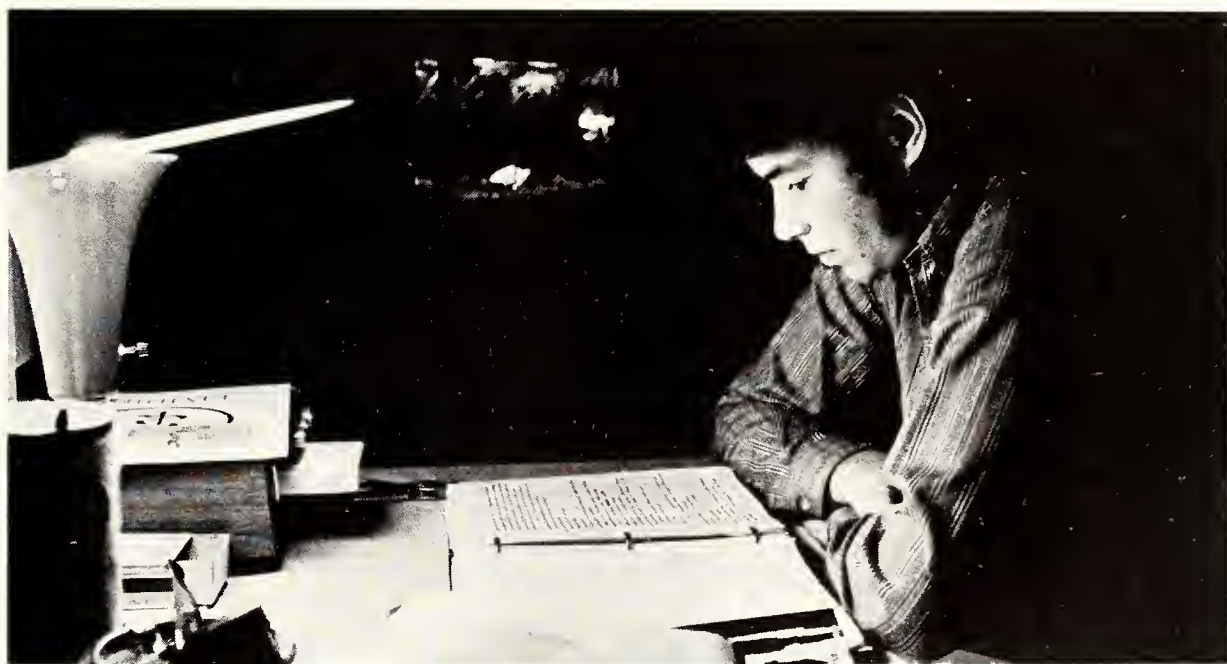

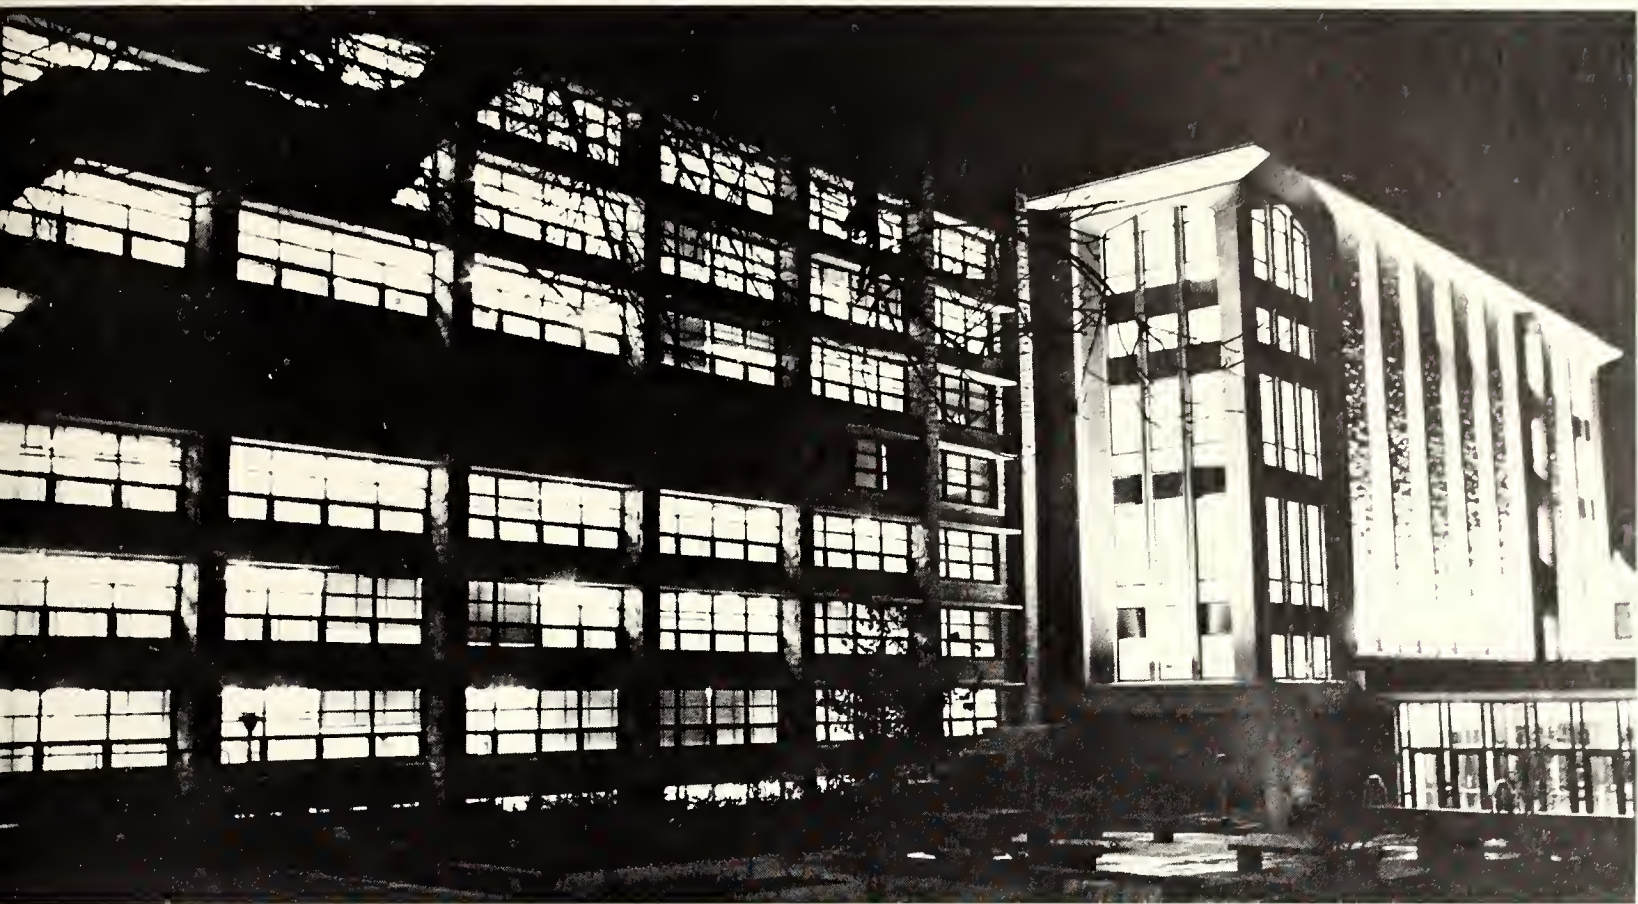

Hurried packing and last-minute

goodbyes—

Homeward bound

Summer.

Graduation is finally in sight, but are you prepared to face it?

By Karla Brockman

"When I finally get out of this place, I will be so happy!"

You often thought this during all-night cram sessions for finals, or that time you had two papers and three projects due in the same week.

But when you finally reach the cap and gown scene, thoughts are somewhat kinder toward this limestone school.

Mom, Dad, Aunt Sarah and Uncle Bob come down with all the gang and see you march across the football field to finish those long years of work. They aren't sure if you're the one in the middle right hand file, or the one whose cap keeps falling off, but they know you're there just the same. They take lots of pictures and you open gifts and then, if you haven't already thought about it, it

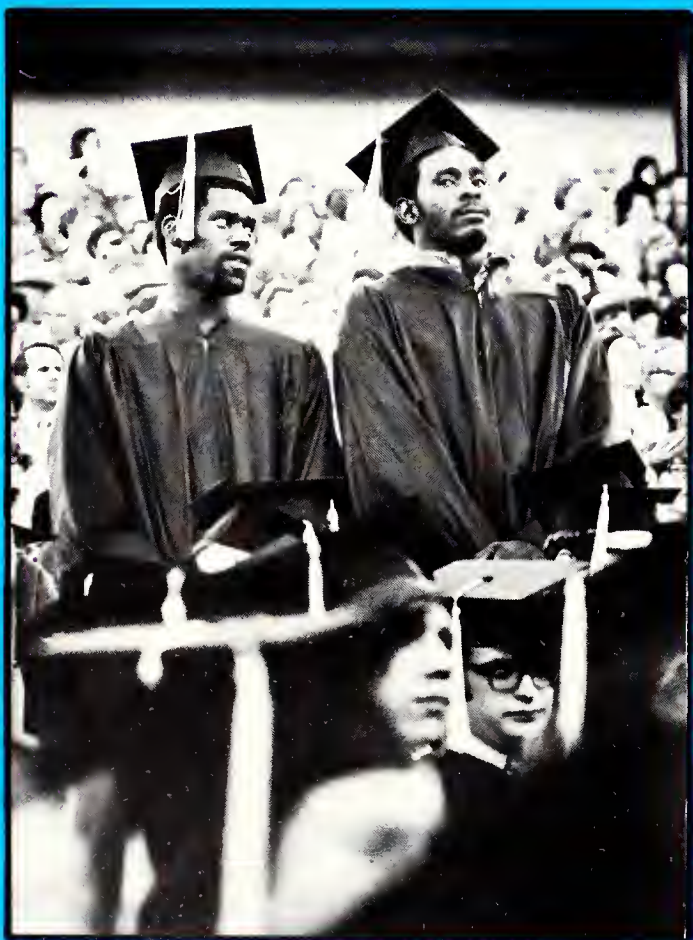

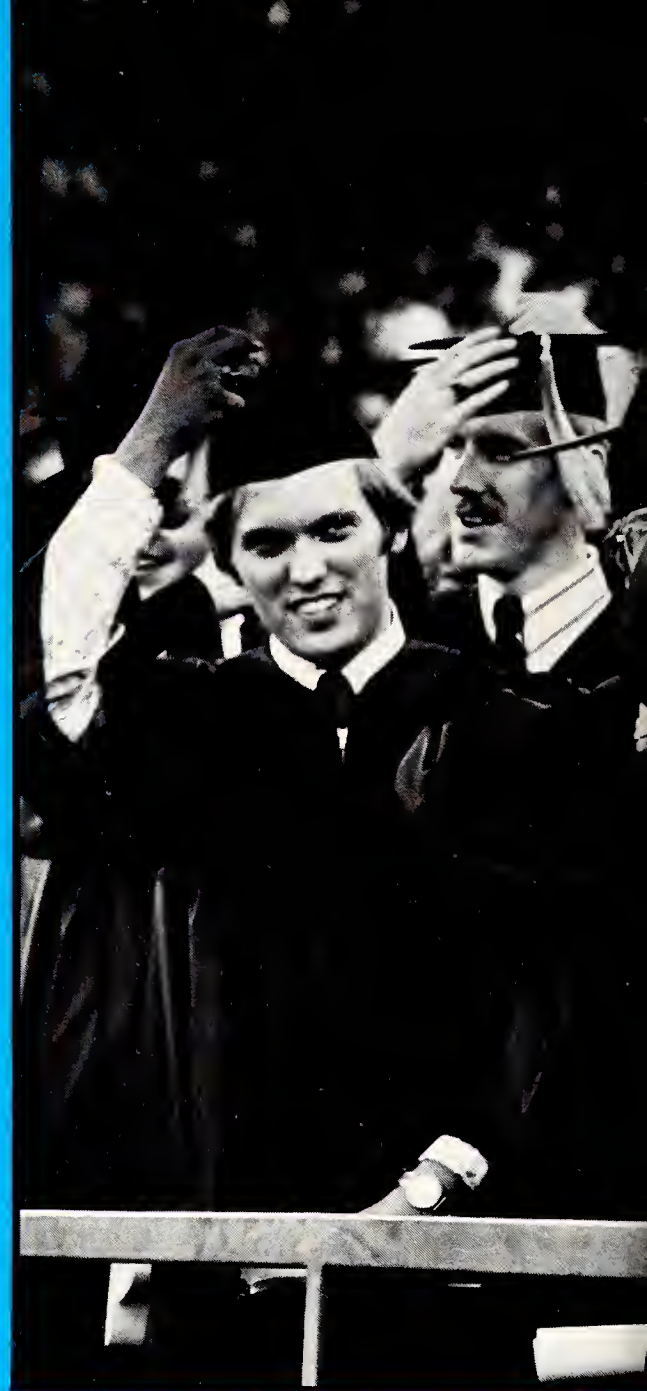

hits you hard.

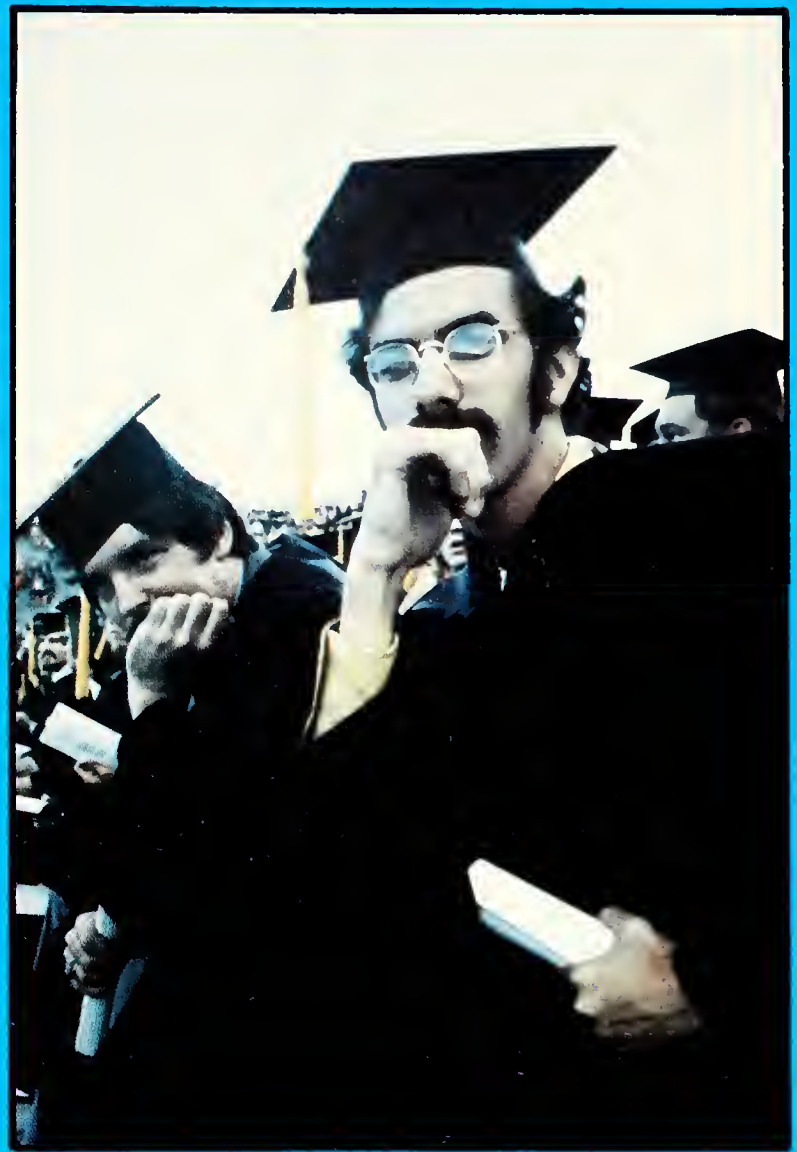

"What will I do? I can do anything I want, but what will I do?"

Lucky grads find jobs in those final weeks of classes, but for many, employment-seeking is a futile task. Even with a job, panic can strike. You are leaving classes and regulated semesters and best friends and . . . everything you've known. Now you must go somewhere strange with people you don't know and start to prove yourself.

"Am I really good enough to make it outside of the protective school atmosphere as an artist, writer, teacher, chemist?"

Indecision, worry, panic, tears, happiness, wedding plans and excitement — they are what make up graduating seniors.

K-State's nine toss opponents too few curves

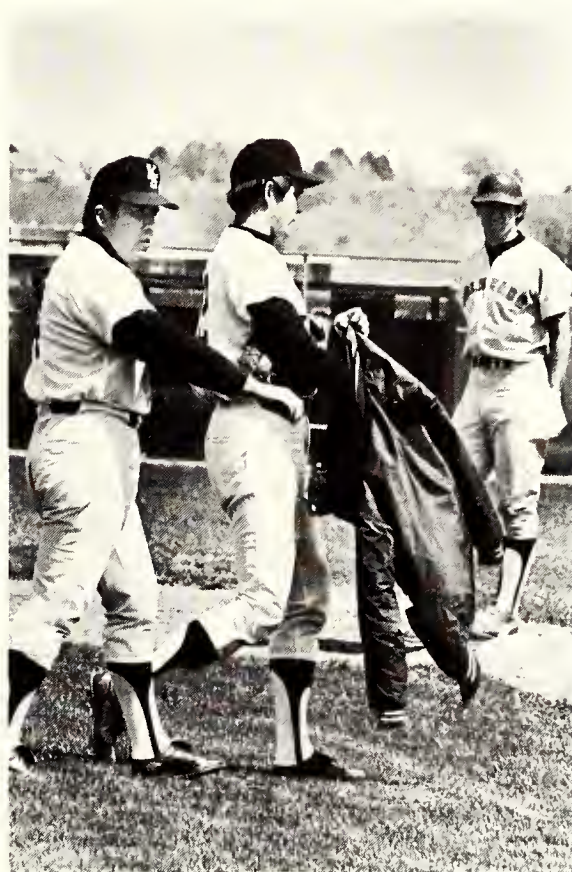

Early season predictions, like most sports speculation, were far from reality for the 1972 Wildcat baseball team. The team, which many felt was a title contender, never seemed to develop the consistency necessary to survive the exceptionally long and rough season.

A spring warm-up tour of the South failed to prepare the 'Cats for the tough Big Eight competition, which is held in as much esteem nationally as is the football rivalry.

The K-State nine sputtered through the early season and then suffered a devastating mid-season sweep by eventual champion, the University of Oklahoma.

The team struggled back in the remainder of the season to post a 17-17 overall record. In the league the 'Cats were 9-9 and finished in a tie with Oklahoma State for fourth place in head coach Bob Brasher's last year at K-State.

LEFT: Mark Arnold's sudden lapse in pitching control forces Coach Brasher to go to his bullpen. **MIDDLE LEFT:** Coach Brasher, pitcher Mark Arnold, and first baseman Mike Austerman discuss pitching strategy. **FAR LEFT:** Pitcher Bruce Bennett attempts to throw a base runner out. **TOP LEFT:** Mike Austerman waits for the pitch as Bill Droege heads down the third-base line. **TOP RIGHT:** Diamond Darlings cheer the team and act as official batgirls during all home games.

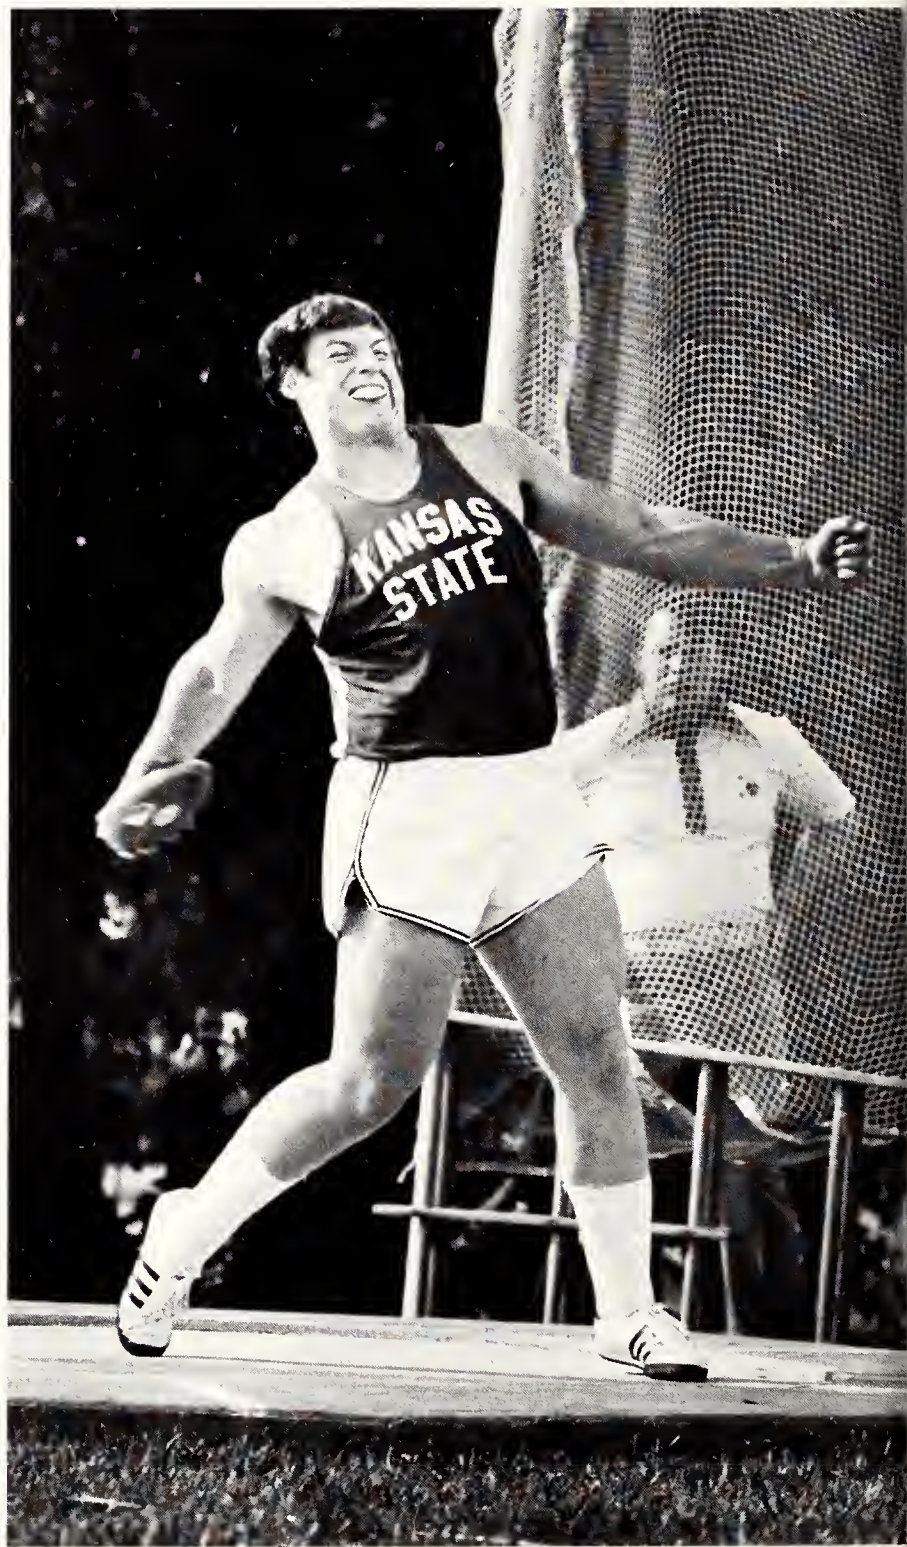

Coach Bob Brasher—

With three years of pro baseball as a player and a scout under his belt, Bob Brasher came to K-State experienced in many phases of the game. His K-State ball teams have reflected his professional guidance.

In seven years under Brasher, Wildcat baseball teams have finished below the .500 mark only once. Another area which has improved due to Brasher is the

baseball stadium, which he has refined in the manner of a professional ballpark.

Brasher resigned as head coach after the 1972 season, planning to work more as a professional scout and instructor.

1972 Cindermen set new records

The 1972 edition of the Wildcat track squad recorded a second place finish at the Big Eight track meet in Boulder, Colorado.

Led by Olympic hopeful Jerome Howe in the track events and Ed Morland in the field, the 'Cats piled up 87 points, five more than their nearest challenger, Oklahoma State.

The season was one of notable performances, as the distance medley team of Clardy Vinson, Mike

Lee, Rick Hitchcock and Jerome Howe placed its name in the record books at the Drake Relays. K-State, with Howe running a 3:59.1 anchor mile, won the event in 9:31.8, eclipsing both the Drake Relays and the world marks.

Coach Dodds described the 1972 squad as being the best team, and having the most potential NCAA champions of any previous Wildcat outdoor track squad.

Coach DeLoss Dodds—

The credit for K-State's rapid climb to success in track and field can be attributed to one man, DeLoss Dodds. Dodds was a star quarter-miler at K-State during his collegiate years. He was a 1959 graduate of K-State and was the Big Eight 440-yard dash champion in 1958, running 47.4. Coach Dodds has been coaching for nine years, all at K-State, and is only the second track coach in K-State history. He took over the head job in 1963 following the retirement of Ward Haylett.

LEFT: Tom Brosius gives it all he has in the discus event at the KU Relays. **FAR LEFT:** Dean Williams breaks the tape for another K-State victory. **MIDDLE LEFT:** Jerome Howe begins his final kick to the finish line. **TOP LEFT:** Clardy Vinson and Mike Lee show how world record holders pass the baton. **TOP RIGHT:** Bob Obee strains to get every inch of distance he can in the javelin throw. **ABOVE:** TRACK TEAM—Top Row: Rich Johnson, Ray McGill, Tabor Medill, Larry Linenberger. Second Row: Ted Settle, Fred Merrill, John

Gilaspie, Tim Porter, Jim Hinchliffe, Don Akin, Bill Kehmeier. Third Row: John Hardwick, Wendell Johnson, Phil Bealby, Dale Miller, Bill Sorenson, Ed Morland, Danny Fields. Fourth Row: Chuck Copp, John Feltner, Jerome Howe, Don Marrs, Jim Williams, Rick Slifer, Coach Floyd. Fifth Row: Frank Rodriguez, Rick Hitchcock, Clardy Vinson, Dean Williams, Jim Heggie, Sid Mead, Coach Favrow. Bottom Row: Tom Brosius, Al Kolarik, John Corman, Steve Schneider, Bob Obee, Mike Lee, Coach Dodds.

BELOW: GOLF TEAM—Top Row: Coach Fogler, Doug Meier, John Hensley, Gordon Lewis. Bottom Row: Bob Philbrick, Butch Thames, Terry Brennan, Ron Schmedemann. **RIGHT:** Using the pendulum method of lining up the ball, Gordon Lewis prepares to attempt an important putt across a tricky green.

Linksters' high hopes dashed

K-State's 1972 Wildcat golf team combined a mixture of experience and youth as it began the season on a note of optimism. The team's greater depth provided hopes that the 'Cats might better their previous year's last place finish in the Big Eight tournament.

"We have a lot of golfers," commented Coach Ron Fogler. "We're deeper — the fellows will have to fight more for positions than they ever have."

The hopes of a conference crown were placed heavily on the shoulders of four returning

lettermen: Bob Philbrick, Paul Anderson, John Hensley and Doug Meier. The youth of the team was represented by freshmen Terry Brennan, Mark Lindbloom, Brent Olney and Guy Reynoldson.

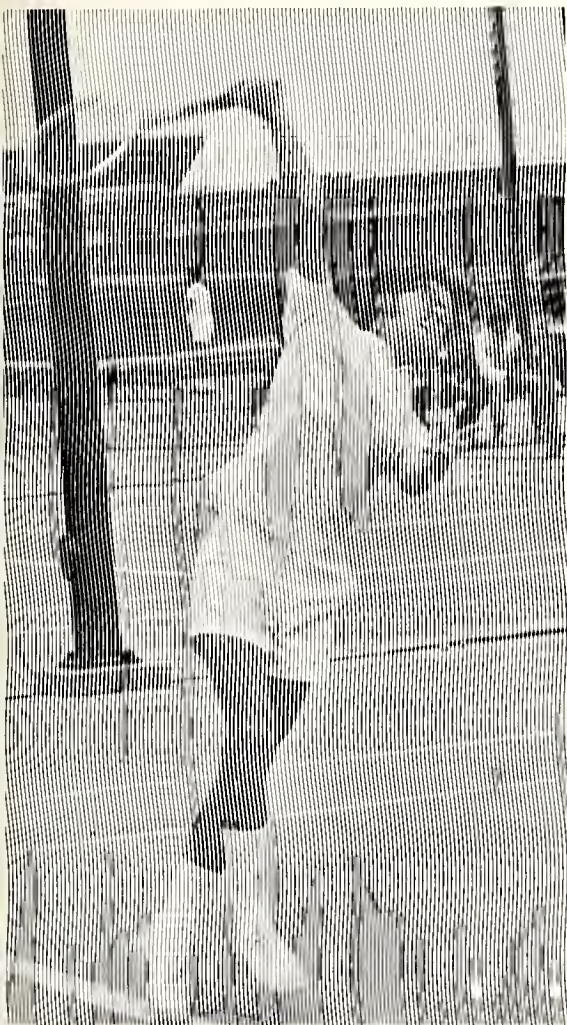

But, as so often is the case in sports, the slim hopes of a Big Eight golf championship were dashed at Boulder, Colo. where the Wildcats managed only a fifth place berth in the Big Eight tournament. Optimism had turned to pessimism somewhere between the first tee and the clubhouse.

Coach Ron Fogler—

Ron Fogler is considered by many to be one of the outstanding instructional golf professionals in the Midwest. Fogler, in his seventh season as head coach for the Wildcats, has 20-plus years experience as a golf pro making him a valuable instructor for the K-State golfers.

Fogler is also the golf pro at the Manhattan Country Club and served as president of the Midwest PGA on four separate occasions.

RIGHT: TENNIS TEAM—Top Row: Fred Esch, Randy Fletchall, Larry Loomis, Mick Lynch. Bottom Row: Ron Dreher, Mark Hauber. **ABOVE:** Mick Lynch shows his form in this sequence delivering a powerful second serve to his opponent. In dual competition Lynch posted a 9-9 record while playing the number five position.

Inexperience conquers netmen

When a coach summarizes the season by saying, "the team did as well as could be expected," a number of rationale come to mind.

A lack of depth, inexperience, stiff competition and plain old bad luck are the usual team characteristics contributing to a losing season.

K-State's 1972 tennis team fell into such a category.

With a squad composed of no

seniors, and dominated by freshmen and sophomores, team experience was minimal. Colorado, Oklahoma and Missouri, perennial tennis powerhouses, again fielded unbeatable teams as the 'Cat squad managed only a mediocre fifth place finish at the Big Eight meet and a 2-5 league mark.

And as for bad luck, well, what is bad luck anyway?

Coach Karl Finney—

Karl Finney has been coaching tennis at K-State for 19 years, after beginning the job as an extra-curricular activity in 1955.

He spent the majority of his undergraduate years at Kansas Wesleyan University before transferring to K-State where he

received his degree in 1936.

Tennis is still an extra-curricular activity for Finney. His major position at K-State is as director of the hard winter wheat quality laboratory which is a regional laboratory for the U.S. Department of Agriculture. He also serves on the graduate faculty for the Grain Science Department.

Rowers overcome fund deficit on way to nationals

ABOVE: Rowers put in many hours of hard work practicing for upcoming competition. **MIDDLE:** ROWING TEAM—Top Row: Steve Cary, K. O. Decker, John Plummer, Rex Tjaden, Warren Rose, Doug Osa, Nick Giacobbe. Second Row: Bruce Remsberg, Warren Janke, Kent McKinny, Stan Davenport, Phil Dietrich, Charles Lehman, Pat Kennedy, Hank Sweers. Bottom Row: Ben, Rory Turner, Jack Byers, Terry Bargman, Dean Stramel, John Epley, Al Cook, Dave Chamberlain, John James, Kevin Jannison. **LOWER:** The expressions on the faces of these rowers show the desire which brought national prominence to the K-State rowing program. **RIGHT:** Coach Don Rose watches closely as his team prepares for another meet.

Coach Don Rose—

A graduate of the University of Wisconsin, Don Rose was also the coxswain of the varsity crew there. Originally coming to K-State in 1962 to work for the K-State Union, Rose has since become head of the Intramurals Department.

With the opening of Tuttle Creek in 1963, he and a group of students and administrators became interested in developing the potential of the new dam in relation to the University.

One of the results of this interest was the formation of the K-State rowing team in 1963-64. Rose has since been active in the capacity of head coach and chief fund raiser for the K-State crew for the past decade.

Imagine returning to school in the fall as a competitor in the oldest collegiate sport in the nation. You're coming off the best season ever for your college in that sport. You had one of the better finishes nationally of any sport at your college the year before, and there are good signs that the next year could be just as successful, if not more. And then, you find out that nobody on campus wants to give you the appropriate funds to continue existing much less competing? How would you feel? Perplexed? Unwanted? You would probably feel exactly like the K-State rowing crew did at the beginning of their 1971-72 season. Yet with the albatross of debt around its neck for most of the year, the crew performed well against all comers, and yes, did at last make it to the national championships.

In an abbreviated season the rowers defeated crews from Washburn, St. Thomas, Purdue, Minnesota, and Nebraska. Missing out on a good deal of competition, the rowers nevertheless kept working hard throughout the season in hopes of a chance to prove themselves. Representing K-State in the nationals at Syracuse, N.Y., a pleasure for which each man shelled out approximately \$100, the team placed tenth in varsity pairs and tenth in four-man. The freshman fours placed seventh nationally and showed promise for the near, although uncertain, future of rowing at K-State.

Soccer enjoys winning season

Soccer is a rapidly developing sport at many colleges and universities across the nation, and soccer at K-State is no exception. The soccer program, originally nothing more than a club of former high school players, has expanded to include foreign students who participated in the sport at home, a full time coach, and membership as an

inter-collegiate sport in the Big Eight Conference.

Unlike many K-State sports, the soccer team has been a consistent title contender. In the last two seasons soccer has been the winningest sport on campus in terms of dual competition, while placing first and third at the Big Eight soccer tournaments during those years.

Coach Ahmed Kadoum—

Ahmed Kadoum, professor of entomology, is looked upon as the driving force in the establishment of a soccer program at K-State. As the first official coach of the team, Kadoum used previous coaching and playing techniques developed in his native United Arab Republic, to establish a Wildcat winning tradition. With the closing of the spring 1972 season, entomology research activities forced Kadoum to assume an advisory role to the team, and Nabil Bokhari was appointed as the soccer team's 1972-73 field coach.

TOP: Ron Cook puts his foot into the ball as he demonstrates the tremendous effort which brought consistent victory to the K-State soccer team. **MIDDLE:** Nabil Bokhari, Ron Cook, Dean Zagortz, Jose Jimenez, and an unidentified K-State player rejoice after a K-State score. **BOTTOM:** Ron Cook puts the pressure on a worried O-State goalie.

SUMMER

Spring Intercession stresses intensive study in special area

The sun is blazing, the temperature is soaring and you've just finished your last final. You've sold all of your books, your dorm room is stripped of every personal possession, and it's time to go home for the summer — right?

Wrong. It's time to buy new books at the Union, move three weeks worth on clothes into an almost-empty Moore Hall, and get ready for class Monday morning.

It's time to spend three, four, five, maybe even eight hours in a day in just one class and wonder where you'll eat dinner tonight — Rusty's or the Mar Cafe?

It's time to dig into a subject you've been interested in — stage make-up, photography or Black American history. But it's also time to learn and party with the people in your department you never had time to know before.

It's time to see K-State at its greenest and freshest and quietest — during Intercession.

Spring Intercession is the three

weeks at the end of the spring semester during which you can earn up to three credits by taking one of nearly fifty courses offered.

Classes are smaller than they are during the regular semesters and you can learn in a relaxed atmosphere with people who are honestly interested in the course material — whether it is History of Kansas or Primitive Pottery Making.

Intercession is perfect if you need to make up the three hours you lost when you dropped Man's Physical World I, or if you need just two more hours to graduate in seven semesters.

It's also perfect for field trips and special projects that would interrupt other classes during a normal semester.

After the flurry of five finals and what seems like seventeen room condition cards, Spring Intercession is a peaceful time to learn and grow — away from the people and activities that complicate a regular semester.

CTC revives Waterville through repertory theater

By Nancy Dalsing

As you enter the limestone building the ancient, time-worn interior seems to summon visions of Vaudeville and its magic.

Rows of worn, wooden seats slope gradually down to the small orchestra pit, behind which rises the stage.

The Waterville Opera House, circa 1904, has thus far escaped renovation, so it has retained the original lighting, dressing rooms and nostalgic atmosphere of yesteryear.

The aura of intimacy afforded by the close audience-actor contact added to the impact of the Continental Theatre Company's performances in Waterville this past summer.

The CTC is a professional repertory touring company which until this year was based at K-State. Composed of 24 members and directed by Wesley Van Tassel, the company performs selections ranging from melodramas such as "From Rags to Riches" to more serious dramas including "Summer and Smoke," and even to children's plays such as "The Emperor's New Clothes."

CTC as a professional troupe was born in 1970; until this year it was sponsored by the University's Department of Speech and the Division of Continuing Education.

Waterville, a town of 750 people 42 miles north of Manhattan, hosted the CTC this past summer as part of a move to revive the small town's spirit and to provide a cultural program for the citizens.

CTC was a resounding success. Attracting scores of people from many parts of Kansas, the attendance was so high that the mayor, Ray Lindquist, commented, "the last two or three weeks you could hardly get in; we had to turn people away."

A wonderful rapport seemed to develop between the company and the Waterville residents. Business flourished in the Weaver Hotel before each performance as did sales in a nearby art boutique.

According to one resident, "If it hadn't been for CTC, Waterville would never have come to life."

The members of the CTC reacted favorably in turn to the small town's warmth.

"We loved the people; the audiences were great," Bill Bales, one of the actors, said.

Although somewhat encumbered by the lack of conveniences such as air-conditioning and modern lighting in the old opera house, the company managed to draw more consistent crowds than they had had for most performances at K-State.

"We couldn't draw in our own hometown. I don't think the University supported us, audience-wise," he said.

K-State has not renewed its agreement to serve as the base for CTC's operations because of financial problems of the theatre group.

Consequently, the CTC has set up a temporary base in Wichita's Century II arts center. The company is tentatively planning tours for many states in the country; yet there must always be someplace to call home.

And Waterville is ready to offer such a place for the CTC. As Ina Roeth, a citizen of Waterville, put it, "They are highly talented actors; I just wish they'd come here — we'd give them a home."

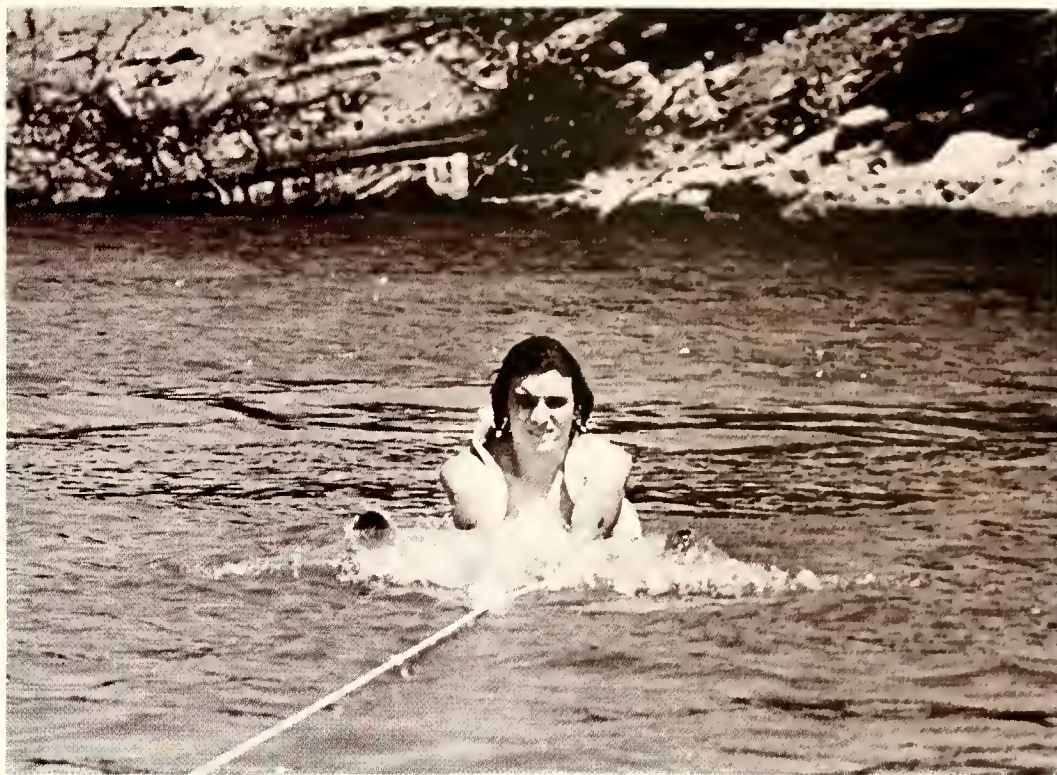

Summer attacks body's senses with noisy heat

By JoAnn Corson

Dense green, heavenly heat,
Blessed sun and heat—
Warm over the chill of winter.
Untied, unleashed, unrestricted
Freedom.
From everyone, everything.
As a liquid would mold itself
around a solid,
the body conforms,
actually becoming part
of the natural environment.
The crash of music — radios — bugs
thrashing wings and legs together.
People screaming, shouting,
frolicking.
The crash of music engulfs
every cell of your body.
It carries you away,
away from the crowds.
Soak it all up.
Millions, millions of
silvery, shiny, slick, shimmery
beads of water.
Splash in it.
Thrash in it.
Crash in it.
A spiral of water above your head
carries you away.
Float in it—
Soak it all up.
The heat, coming on,
the splintering heat,
the frazzling heat.
Blades of grass wilt in the humidity.
Breezes, come on—
Breezy, breezy, breezes
come on inside.
Fall up the stairs.

Paradoxical rules render "decisions" impotent

By JoAnn Corson

ONE WAY — Do Not Get On This Merry-Go-Round.

We are warned and advised by parents, teachers and friends that "college" will require much adjustment; it is indeed a place where temptation reigns, corruption inhibits, and procrastination kills.

In short, we "college students" will need to make all decisions for ourselves; we must decide just what is right and what is wrong. So, off we go, expecting a kind of utopia free from parental hassle and the regulations set up by the higher reich.

What a disappointment: the "college world" is just that of the "outer world," set up in part to prepare the budding youth — and what an assimilation it is!

Here, in a self-contained atmosphere, are all the fundamentals of the bitter regions beyond, where life has become dejected, inspected and infected with the warnings of "do not" and "prohibited."

Here, on this campus, we are presented with previews of various

and numerous paradoxes. Scores of "No Parking" signs fill up the parking lots; yet bikes are chained to these poles — these statements of public law. "No Beer in Public Dorm Areas;" yet to get to the privacy of one's room, the beer must somehow be smuggled through the public areas. "No Plastic ID? No Credit;" yet for some reason, a state driver's license is not acceptable identification for a \$5 check.

Here we are: being taught knowledgeable information with which to continue for the better part of our lives, and at the same time, we're also taught about the great bureaucracy. The ideal bureaucracy — established in part to discourage us.

For instance there is the endless hassle created by drop/add, for which a student needs permission from his teacher added, then needs to secure a 10-second appointment slip for who-knows-when in the next week or two, then needs to pull said card, but also needs to attend class in the allotted time period, but is torn between the class dropped and the class to be added.

Of, if the vending machine, the picture of twentieth century efficiency, breaks down and devours money without giving the desired product in return, the process for getting the unrewarded money back is ridiculous. Hours are swallowed before the endless chain of referrals is completed and the dime is collected in some distant boiler room of the Union.

The big world outside this smaller one is not new; it does not puzzle us. We're not afraid to make our own decisions — it would be much easier if we could.

But, there have been basic, although paradoxical, living standards already devised. "You must adjust . . . This is the legend imprinted in every schoolbook, the invisible message on every blackboard."*

The ultimate predicament — to get along, we've got to go along.

YIELD — if you must.

*Robert M. Lindner:

MUST YOU CONFORM? Rinehart, 1956
taken in this form from:

THE GREAT QUOTATIONS, compiled by
George Seldes (May 1971).

Sculpture—

An overgrown pitchfork? A huge cafeteria sign? Or maybe, a giant phallic symbol?

Whatever your approach to art is, you may have caught yourself making similar explanations for the existence of the tall tri-pronged sculpture beside King Hall. Like other sculpture pieces on campus, its provocative form has provided a focus for curiosity and speculation.

"Most of these things aren't for anything — they just are! What are pots of geraniums for?" Alden Crider, associate professor of architecture, said.

The white fiberglass "fork," the wooden form near Willard Hall and the three-piece concrete structure near Holtz Hall were not done to represent other objects, according to John Vogt, associate professor of art. These works, as well as the "KSU" letters marking the corner of 17th and Anderson and the children's playground behind Justin Hall, were designed and produced by K-State art and architecture students during summer "Art in Situation" workshops from 1969-71 sponsored by the Educational Facilities Laboratory of the Ford Foundation and K-State.

How then, should you appreciate their efforts? Vogt advises, "Good food — you eat. Good music — you listen to. Sculpture — you consume with your eyes."

Orientation—

Getting to the right place at the right time, pulling cards, making new friends, wondering how you will fit in at K-State . . . Ask any freshman or new student who will admit his status, and he'll tell you these thoughts passed through his mind at least once as the first day of summer orientation began.

Following registration at Derby Food Center, freshmen met with orientation group leaders and divided into small discussion groups.

Next came the old familiar getting-to-know-you game, a guided tour of the campus, and the opportunity to ask questions about everything from enrollment procedures to social life.

The individual colleges sponsored large orientation sessions during the afternoon, with speakers explaining prerequisites and major

requirements, the Honors Program, credit/no-credit, and other facets of academic life.

Cram sessions on how to read line schedules and IBM print-outs briefed freshmen on what to expect during enrollment the next day. Between meetings representatives from ROTC, residence halls and the Greek system spoke about the choices of lifestyles open to K-Staters.

Meanwhile, back with their small groups, freshmen began to air those nagging worries about grades, being socially accepted by others, and how to avoid looking like "dumb freshmen."

The small group concept was introduced to K-State's new student orientation program three years ago, and has been continued, because:

"As everything gets larger, trying to retain the image of K-State as a friendly university is easier in small

School—

It's July 2 and all of your buddies are back in the old home town waiting tables and sorting mail, but what are you doing? Sitting in a steamy classroom trying to write a Comp. II theme.

In the evening they're free from all obligations — relaxing at the swimming pool or drinking at a local tavern, but where are you? Sweating out an abnormal psych paper at Farrell Library.

At the end of the summer, all your

friends each have \$1,000 and a suntan to show for their efforts, but what do you have? Six hours of "C" and an allergy to term papers.

Is summer school really worth it? K-State students have conflicting opinions on the subject.

One junior in chemistry said she enjoyed summer school.

"It was a wonderful time to be in school. The campus was virtually empty, and I never had to wait in line to cash checks or see movies.

"Also, the classes weren't as large as they usually are and I got to know

groups," according to Marilyn Trotter, coordinator of new student programs.

What did the freshmen themselves think of the orientation program?

The majority liked the informal atmosphere and the chance to meet people through the small groups, although some criticized the larger sessions for being repetitious — "they told us the same things over and over."

The 18 group leaders, all upperclassmen, received a semester of academic training during the spring and an additional two weeks of workshop preparation before the summer session began.

Hours of hard work resulted in six-weeks of serving the University and earning \$450.

"The good you can do, the people you meet, the experiences you have — it's great," one group leader responded when asked if all the effort had been worthwhile.

Parents who accompanied their off-spring to orientation could partake in rap sessions with University and community officials during special orientation sessions held for parents.

Coffeehouse entertainment, a night in the dorm, and before the prospective freshmen realized it, the second day of orientation was over. They talked to advisors, pulled course request cards, had pictures snapped for student ID's — the end of the line.

Until August 28, that is. Welcome to K-State!

the instructor as well as the subject. Sure, it gets pretty hot, but most of the buildings are air-conditioned," she said.

A senior in business strongly disagreed with her.

"The campus is empty, true, but it's so quiet that it's unnatural — not to mention boring," he said. "There was just nothing to do except sweat."

"Also, part of my own problem was that I took a heavy load. I hadn't recovered from the spring semester yet, and suddenly summer school came along, and I was totally un-

Summer—

Summer may be intended for slowing down and enjoying life, but it's a transitional time — people tie-up the unfinished; unwrap, then wrap-up smaller projects; and untie the upcoming. In the news across the nation and at K-State during the summer of 1972:

—The Summer Olympics kept mass communicators busy reporting events and their results in Munich, Germany. Mark Spitz, United States swimmer, broke Olympic records by winning seven gold medals.

—American Bobby Fischer took the world's chess championship from Russian Boris Spasky during the tournament in Reykjavik, Iceland.

—Rapid City, S.D. and the eastern seaboard were hit by floods which left thousands of people homeless.

—Both Republican and Democratic parties met in Miami Beach and chose their presidential candidates for the November election.

—George McGovern won the Democratic nomination for President, and Richard Nixon again won the Republican nod.

—McGovern chose Thomas

Eagleton as his vice-presidential candidate. But because of past hospitalization for mental problems, Eagleton was forced to step down during the campaign. Sargent Shriver was then chosen as McGovern's running mate.

—The ancient Chinese art of acupuncture was banned in Kansas. Its opponents successfully argued that no one knew how to do it properly.

—Less important than the Olympics, but just as interesting to local residents, was K-State's second annual egg-eating contest.

—Informal summer rush parties took the place of formal fall rushing for all K-State fraternities. Sororities, though, continued formal fall rush.

—The only people who didn't hear about the floods were the cadets at ROTC summer camp. They had no news, with the exception of delayed mail, for six long weeks.

—By KSUARH ruling, beer was allowed in the dorms for the first time.

—And finally, students outnumbered parents four to one during summer orientation for new and transfer students.

prepared for all the work. Consequently, the fall semester after summer school was shot, too," he added.

One sophomore in animal science had a different attitude toward summer school.

"I came here for summer school right after I graduated from high school, and in two months, learned the ways of the world," he said.

"I had never gone out drinking or raising hell before, and I haven't done it since that summer," he said.

"But I had a wonderful time," he added. "Unfortunately, I was too tired to get up for my 8:30 every day, so my grades suffered."

Are those eight summer weeks spent sweating it out at K-State worth the six hours of "C"? It's debatable.

Second egg-eating contest proves "Lousy Luck" champ

By Nancy Dalsing

A smoke-filled room — flashing lights — circulating beer mugs; this could be the scene in almost any bar in Aggieville on a summer evening.

But one difference immediately strikes you: the eyes of the crowd, instead of being glued on sexy girls or the beer in hand, are focused on two men seated at a small table, on which are placed two partially-filled beer pitchers.

Just a regular chugging contest? No, instead of beer there are 50 hard-boiled eggs in each of those pitchers.

So many eggs — what kind of freaky contest can this be? It is Manhattan's second annual egg-eating contest. The date was set for July 18 at 8 p.m. at the Pub. The defending champion, 190 pound "Lousy Luck" (alias for Mark Steuve), met his formidable opponent "Big Mike McGurk" (otherwise known as Mike Davis) in a match from which "Lousy" again emerged triumphant.

In the 58 minutes, which were periodically interrupted by several nerve-wracking moments as "Lousy" fought to regain the stamina needed to win the contest, he managed to eat 45 eggs. Big Mike admitted defeat 10 minutes before the end of the contest after eating only 25 eggs.

Steuve appeared apprehensive prior to this year's contest, especially when he saw the size of his opponent. Also, he complained about the short time he had to train for this year's contest; last year he had trained two weeks and gained 15 pounds. Still, he credited much of his stamina to the rigorous training he received as a Marine before entering K-State.

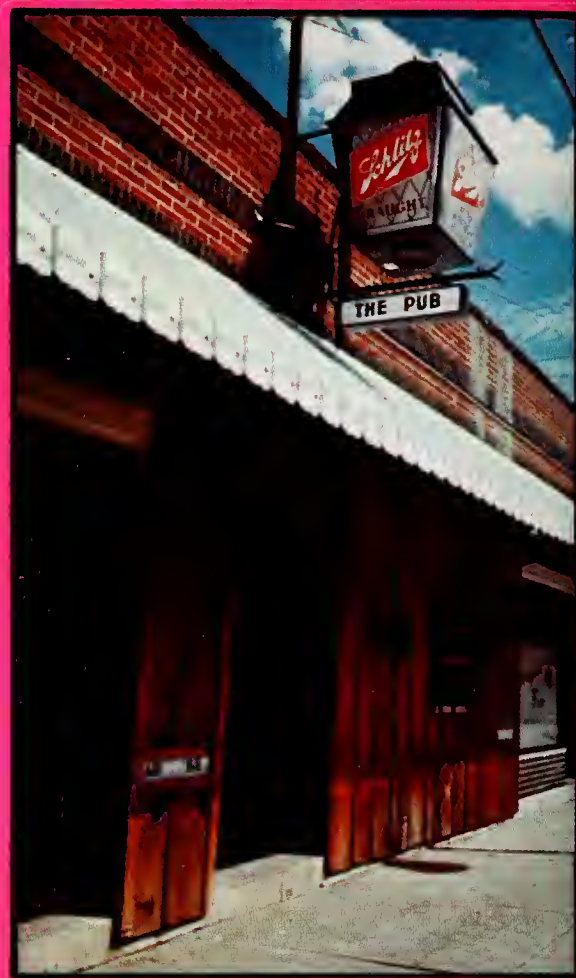

During the contest "Lousy Luck" resorted to mustard and beer to make his eggs slide down more easily, while "Big Mike" chose Coke at first but later asked for less-filling water.

At the end of almost 50 minutes, Mike settled for a spectator's role, and watched Steuve attempt to break the record set in the movie "Cool Hand Luke." (Paul Newman, as Luke, ate 50 hard-boiled eggs in one hour in the film.)

"I can't do it," "Lousy" cried mournfully with only five eggs and four minutes to go.

Having eaten 45 eggs, "Lousy Luck" has beaten his own record of 42 eggs set in the original contest, and brought himself even closer to the goal of 50 eggs.

Following the contest a challenge was issued to the other Big Eight schools, urging them to enter the competition. This coming year may very well see an even higher mark set, as new contenders try to dethrone the great "Lousy Luck."

Soldiers victims of stereotype perpetuated by Manhattanites

By Melinda Hodgson

He is a 19-year-old from Orange, N.J. He is in Kansas through no choice of his own. He is a Fort Riley soldier.

What does he think of Manhattan? "People here aren't friendly at all. They won't say hi or anything. But store owners are more friendly because they want your money," John, one Riley Soldier, said.

"It's the few Army guys that are s.o.b.s that make the college kids stay away from us. Hell, one girl told me her freshmen orientation leader told them to stay away from G.I.s," Bill, another soldier, added.

"I can't say students don't have the right to look down on G.I.s, but they should judge everyone as an individual. It's like the prejudice against Blacks," John said.

Bill also emphasized the fact that Army guys aren't judged on their own merits.

"Sure, there are G.I.s who try to get a girl to shack up with them but that's no different from college guys," he said.

"People here feel 'we didn't invite you here so stay away from us'," Bill said. "Army guys feel the same way — they are being forced to be here and no one likes being forced to do something."

"A lot of it has to do with the uproar over the military establishment in the last few years. Students think

that we're in the Army, which is killing innocent people; therefore, we must support the war; and we must like living off the war-time economy," Bill added.

"Everyone thinks we like the Army — they don't even bother to ask," John agreed.

The way students treat G.I.s "is as much our fault as it is yours," Bill said.

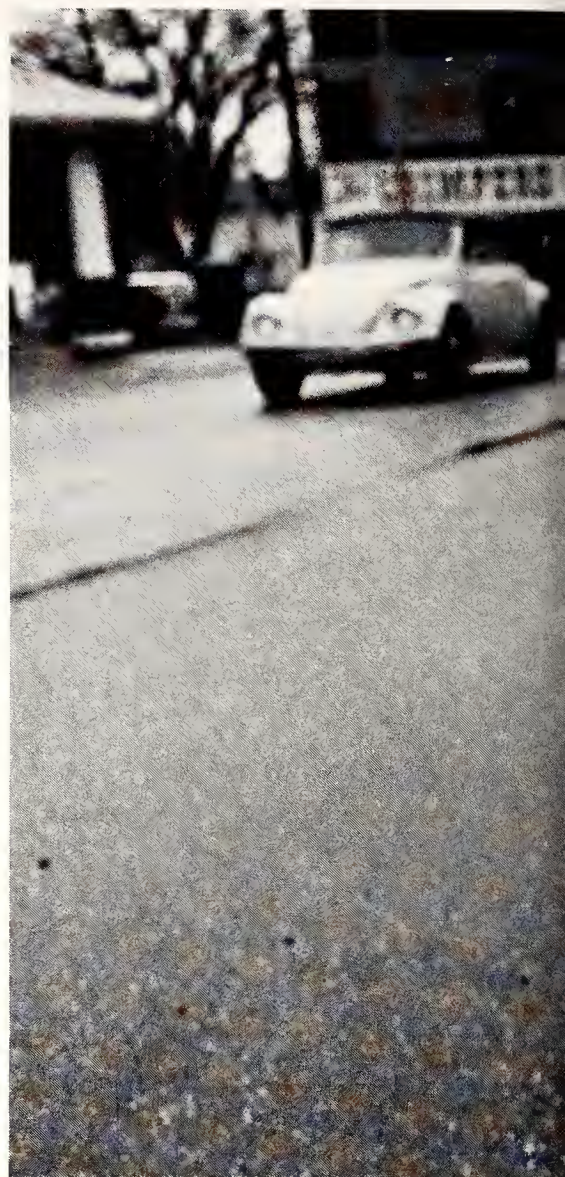

"It's the minority of guys who are just out to take a chick to bed or are stupid and rowdy when they get drunk. They mess it up for the majority," he said.

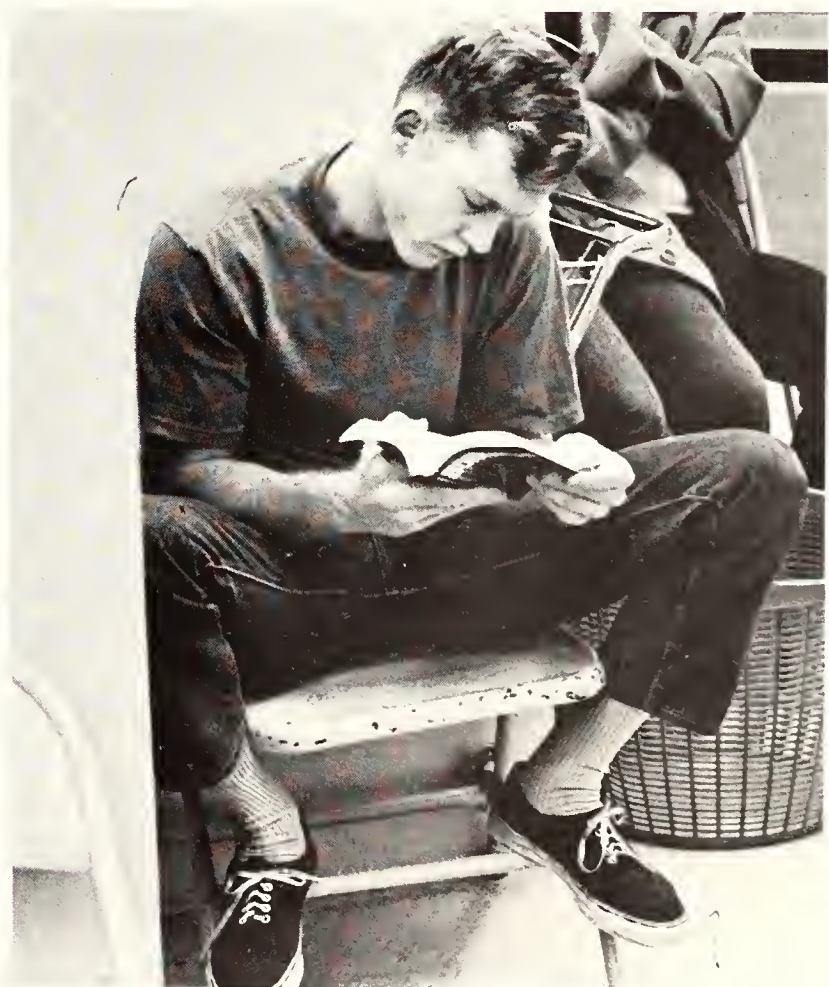

"The Army is like high school — you don't have any choice whether to be there or not. Of course, some guys go in the Army to see if they can find something they like, just like you go to college," Bill said.

Being stationed near a big city is different because the Army guys don't stand out so much, but all towns have the same difficulties, he added.

"It's really funny to see a town that is against the G.I. when it depends on him. Manhattan would be about half the size it is now if it weren't for the fort, or at least it wouldn't be the prosperous town that it is," Bill said.

He is young, vulnerable and human — and the label "doggie" probably wouldn't fit if you took the time to know him.

Summer: K-State empties; city activities go on

GOP's Miami Beach convention wines, dines, ignores dissenters

By Mark Schirkofsky

On August 22, the Grand Old Party began preparing in earnest for another "four more years."

On that date, the Republican National Committee and state delegates met to nominate a candidate for the most powerful office in the world. Richard Nixon was crowned winner and still champ.

As we are often reminded, there are two sides to every story, the Republican National Convention being no exception. And the side one was on depended on how he felt about The Man.

Nixon supporters stayed in plush Miami Beach hotels; they dined, swam, partied, caucused, electioneered and belittled detractors.

Nixon detractors camped in dusty Flamingo Park; they ate, caroused, disrupted, conspired, protested and chastised supporters.

When the supporters weren't enjoying their luxurious surroundings, they were inside the convention hall. Activity there started slowly and built to an emotional peak, finally reaching an orgasmic emotional and verbal release with the re-nomination of Richard Nixon. The crowds inside the hall screamed their approval with the fervor of hell-fire and brimstone evangelists.

Outside, anti-Nixon factions rallied slowly during the first two days of the convention while emotions built upon dissatisfactions. Their peak came as Nixon supporters entered the hall for their last session.

The demonstrators were barred from hall gates by old busses, and after becoming unruly, were dispersed with tear gas.

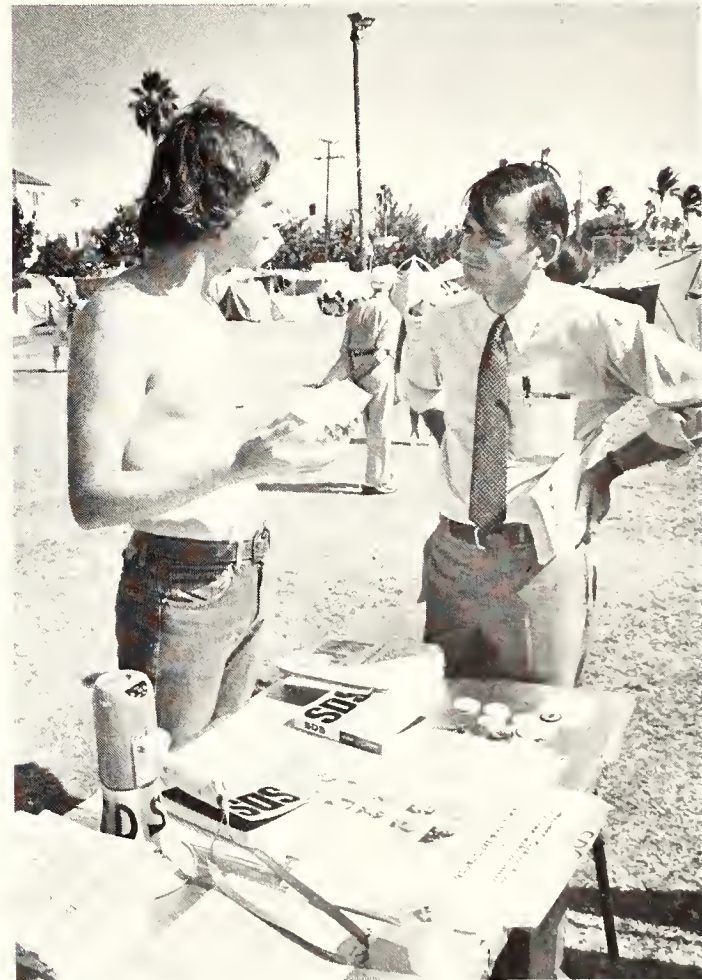

Unfortunately, the convention was an example of closed-mindedness on both sides.

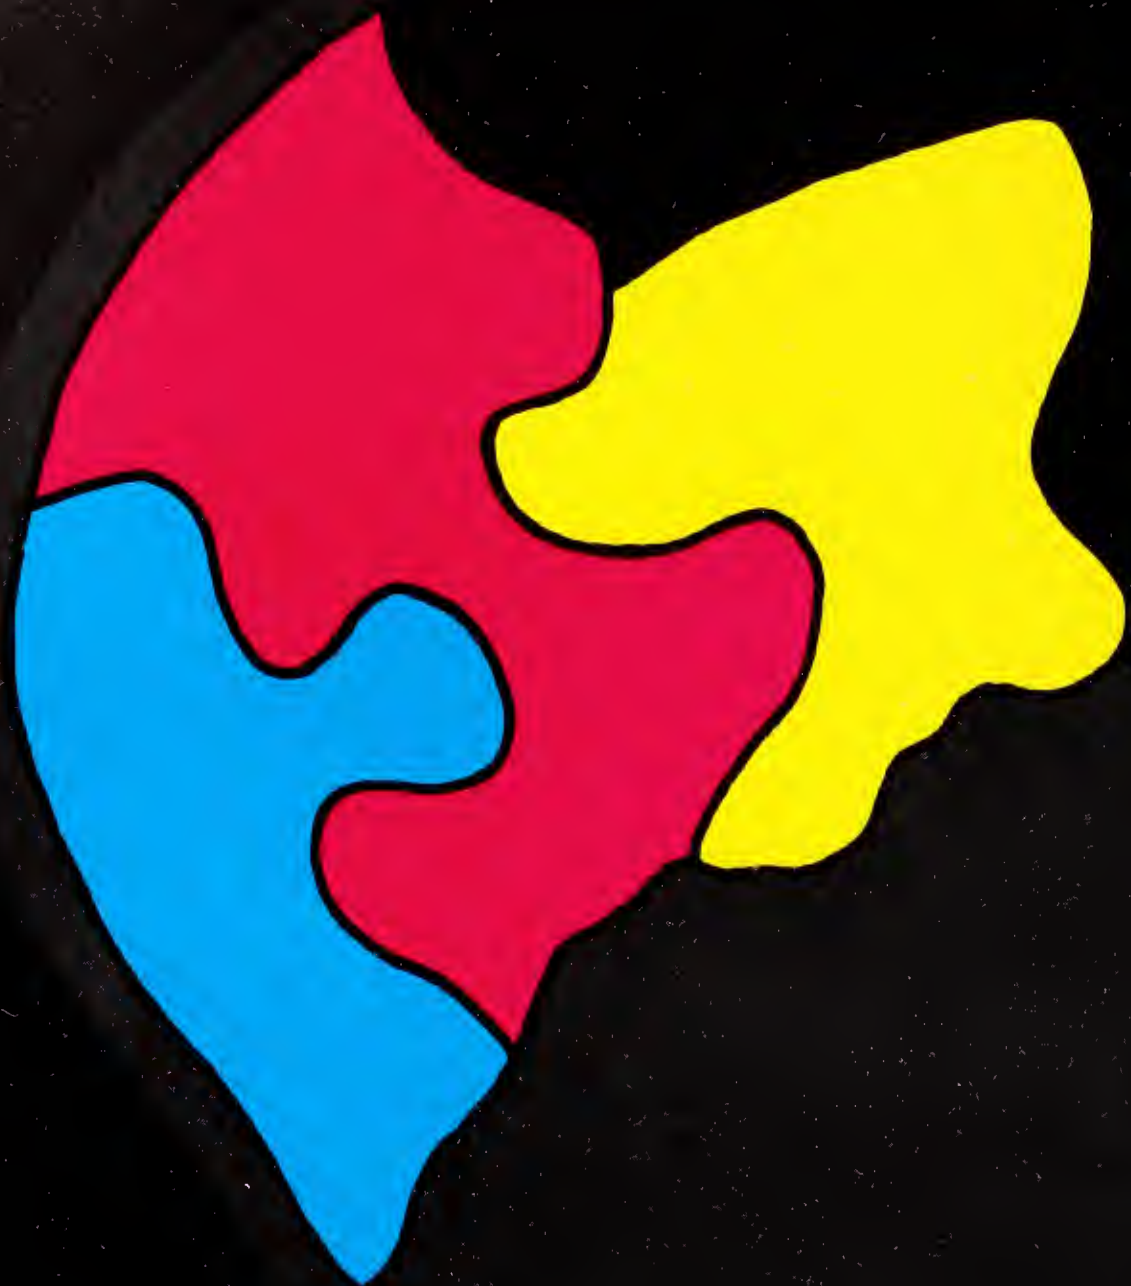

The supporters were basically unaware of the needs, requests and ideas of the dissenters. Pro-Nixon groups were chauffeured along police-barricaded routes by chartered busses. They could not, or would not, touch the reality of the dissenters' world.

The anti-Nixon groups were also largely unaware of the ideas of the supporters. They were blindly led by rally leaders along the far side of police barriers. When they did have an opportunity to reach the supporters, they did so in a destructive, offensive fashion.

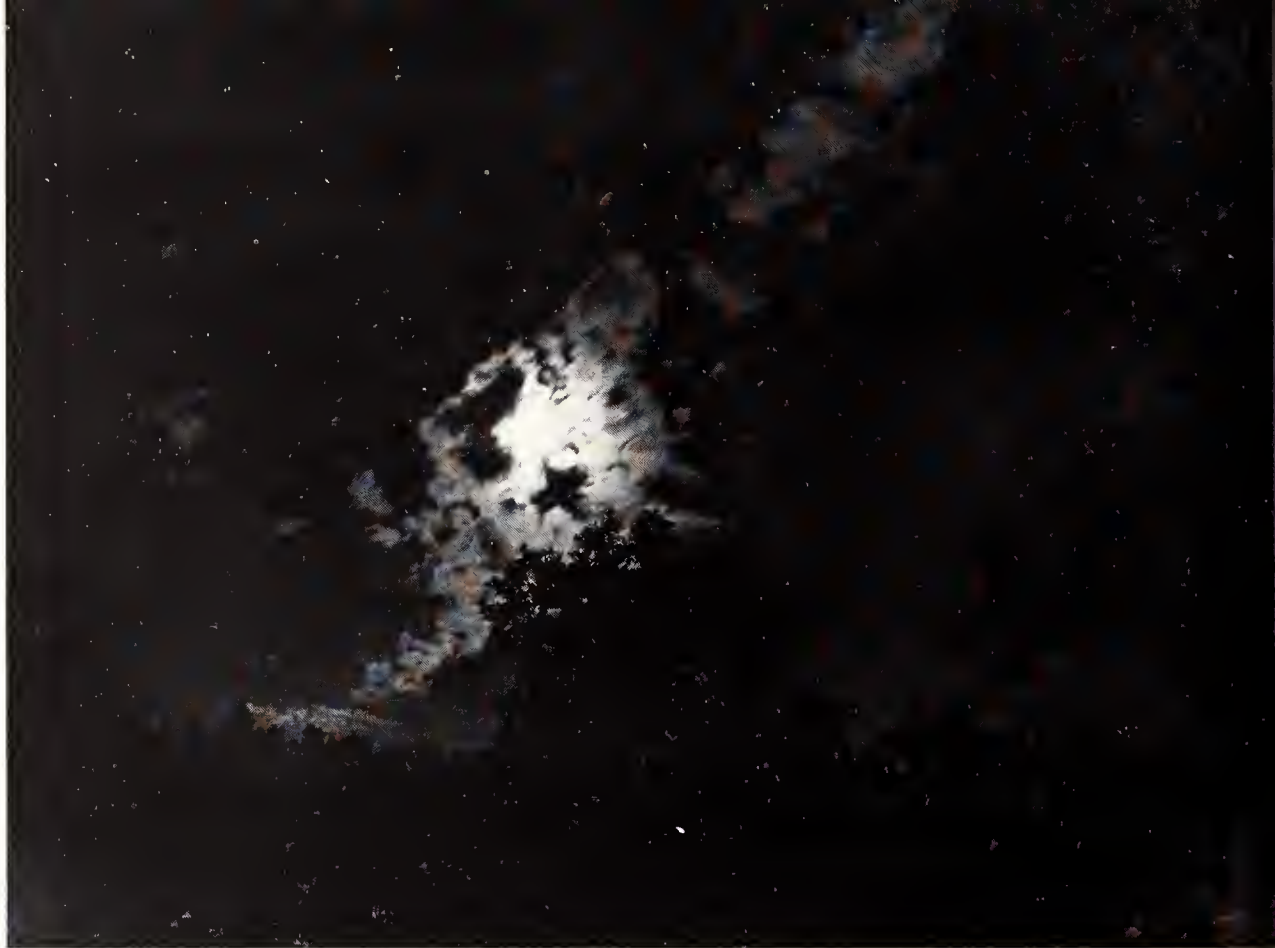

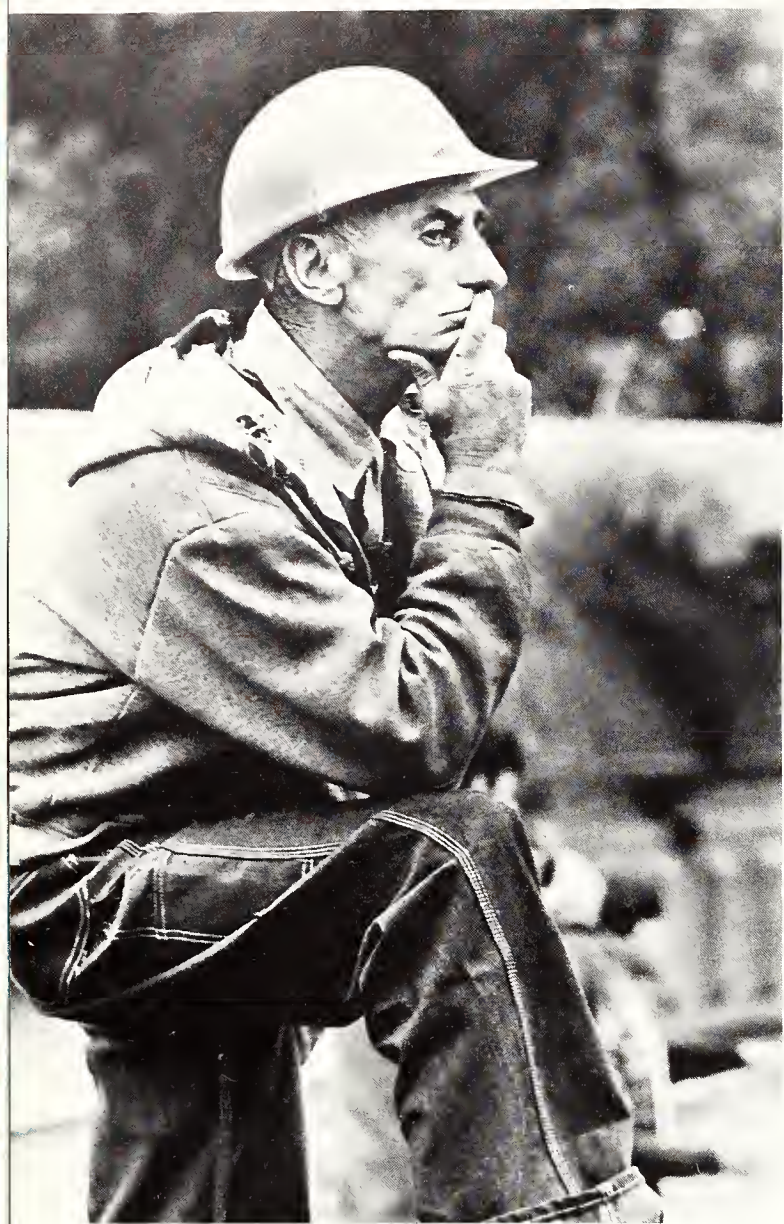

And after the convention was over, both groups went home — frustrated, narrow-minded people, trapped within their ideologies.

See, hear, smell, taste, touch, live —appreciate fall

By JoAnn Corson

Overnight, without notice,
metamorphosis occurs.
The heat is gone — you can relax.
Overnight, when all is black,
the colors change.
The chameleon green
turns over a new leaf.
A violent display of color
adheres to the countryside.
Crisp air stimulates
the heat-drained system.
Four-legged creatures
run everywhere.
People able to enjoy the coolness,
run everywhere.
Summer's insects
die everywhere.
Life stimulates new life.
Overnight, when all is plainly
aromatic, the smell changes.
Smoke, dense smoke.
Overnight, when all is as a cloud,
the touch changes.
Brittle, crunch —
Twigs, leaves break wide open.
Leaves helicopter down.
Squirrels hide.
People add shells of protection.
Another set of rings
is added to the trunk.

Once more through the line— registration: a world without end

Only five more times through good old Ahearn, if I'm lucky. At least it isn't as hot as it was last year. The line seems longer, though; it must be the increase in enrollment.

ID already? It's here someplace, I think.

Now, where is my line?

I have only six seven-thirties this semester. That explains the 20 hours on my schedule print-out. My friend the computer is determined to push me through in three years.

Drop and add again? I might as well make it every semester. Now I'm on first-name basis with the drop/add staff.

Now where do I go?

No, I do not have a car.

Yes, I want a yearbook.

My ID again? That makes it the sixth time and I'm only half-way through.

Checkbook time, glorious checkbook time. They love my money. I guess Aggieville won't be seeing much of me this semester. At least the fees didn't go up; Mom will like that.

No, I don't want insurance.

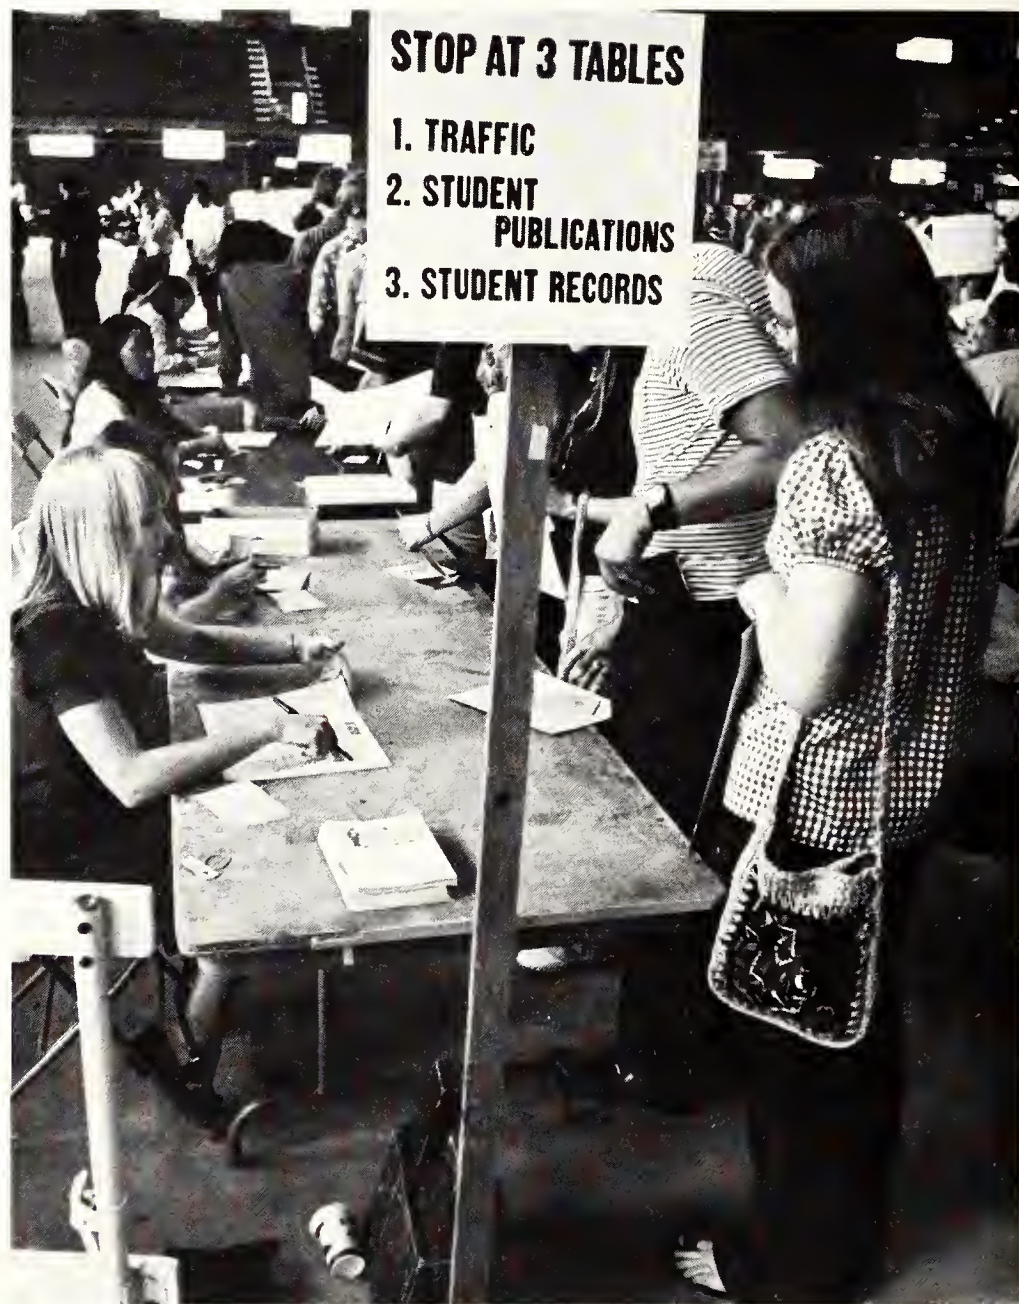

Of course I'll buy a football ticket.

K-Block? — what's another dollar?

A free calendar? Thanks a lot.

And a free bowling pass? You guys are out-doing yourselves this year.

I feel poor anyway. Guess I'd better start looking for a job. Wonder where I put yesterday's paper?

Two-wheelers start students rolling again

By Robin Rouse

Is bicycling kid stuff, or has it become a way of college life?

Bikes are temporary transportation for youngsters still too young to drive; but many college students, disenchanted with the expense and trouble of owning a car, have become reacquainted with their rejected bikes.

Bicycling is a fast way to get to class. Of course, riding is more exciting with a little competition. A student can get his best buddies together and race to class. The winner gets the last parking space while the loser either leaves his bike chained to itself or pays the penalty for being late.

Weekend bicycle-riding is a healthy and relaxing sport. It's fun to ride with a favorite friend or even alone to release the tension of marathon studying.

Still, bike-riding does have its disadvantages. It can be embarrassing to get a floppy pant leg caught in the chain. And a student has only two choices: to clumsily free himself or sit on a curb attached to his bicycle for the rest of his life. It can be difficult to forget the embarrassment because a greased and tattered pant leg is always there as a reminder.

Bicycles are lightweight, easy to park, fun to ride and require no gas. However, they are not yet waterproof. Therefore, on ugly, rainy days when a student wants to reach his destination as quickly as possible, he has to abandon his two-wheeler for a two-footer.

Students at K-State are finding many uses for bicycles. Whether it be riding to class, leisure activity, or just owning one with which to show off, K-State students are not letting the bicycle era die.

Bicycles — kid stuff? Not anymore.

Sell-out crowds entertained by name vocalists

It was one of those concerts that you wish didn't have to end.

John Denver sang, joked and juggled — yes, juggled — for a Homecoming crowd of 3,000 in Ahearn Field House, Nov. 10.

Denver, backed up by the husband-wife team, Fat City, treated the audience to an array of his well-known songs.

The mood was, at times, care-free as Denver conversed about his life and memories which he shared in such songs as "Starwood in Aspen" and "Poems, Prayers and Promises."

But Denver skillfully caused the audience to become serious and emotional with his recital of "The Box" followed by the haunting "Jimmy Newman."

The singer-writer also revealed a keen finesse for comedy with his clowning antics and even a brief juggling performance.

Then Denver accomplished what he enjoys most by closing the show with the audience on its feet, swaying and singing out loud with him.

Both John Denver and his concert proved to be different and memorable.

There wasn't much glitter to the Parents Day concert in the KSU Auditorium, Oct. 7.

Kama-Sutra recording stars, Brewer and Shipley, could hardly be called electric or exciting — they perform in a subdued, nonchalant manner. But the full-house crowd seemed to enjoy their music anyway and responded warmly to the duo.

The clear, McCartney-like voice of Mike Brewer blended with Tom Shipley's soft baritone, produced well-rehearsed harmony that sounded almost recording perfect.

However, Brewer and Shipley are better heard than seen. They never seemed to know what to say in the gaps between songs, and their attempts at humor fell flat.

Most of Tom Shipley's blurbs were either boringly stale ("Anybody here stoned? Wish I was.") or in poor taste ("We wanted to call our new

album "I Dropped Acid With Jesus'.")

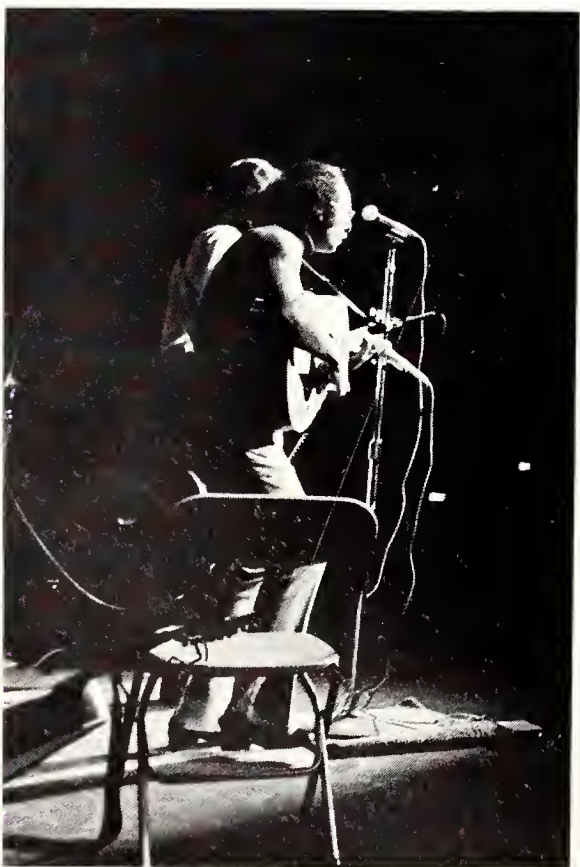

But the audience, especially old B&S fans, seemed to enjoy listening to the duo perform a string of hits which included "One Toke Over the Line," "Tarkio Road" and "I Don't Want To Die In Georgia."

Not surprisingly, very many felt the highlight of the evening was the pre-B&S show by Chet Nichols.

One finds it difficult to be anything but mesmerized by Nichols' talent. He showed himself to be an incredible musician as he moved from guitar to piano to harmonica.

Nichols' enthusiasm had its impact on the audience which was more than pleased to see him come out and join Brewer and Shipley for the night's finale numbers.

Maybe Nichols' finesse even had an impact on Brewer and Shipley. It couldn't have hurt them.

Peter Yarrow replaced the voices of Paul Stookey and Mary Travers with the sounds of the audience during his Sept. 9 concert.

Backed up only by his own guitar and his bass player, Bob Boucher, Yarrow, dressed simply in boots, slacks and a purple turtleneck sweater, entranced his audience.

He used both six-string and twelve-string guitars, amplified only by a skeleton of microphones.

After his first song, he settled back, saying, "I really don't know where it's at anymore." Expounding on the statement for several minutes, he said "it" refers to the focus of attention and action in his life.

Then, as the listeners sat on the edge of their seats, taken in by his great dilemma, he said, "What is this guy talking about?"

His set included such songs as "Bobby Dylan's Dream," "The Great Mandella," and "Puff the Magic Dragon." Most had been made popular by the famous Peter, Paul and Mary trio.

Obviously missing the chance to harmonize, Yarrow asked the audience to sing the melody on several songs while he harmonized.

The audience appeared enchanted by Yarrow's mellow tenor voice and his musical message. But another side of Yarrow came across during an informal discussion after the concert.

Surrounded by students, he made

his way outside the building, and with the transition from the stage to the sidewalk came a transition from performer to individual.

Yarrow said he was in the process of re-evaluating his life.

"I thought at one time that music was where it was at for me. Now I'm not sure. As I give certain answers to questions that I've asked myself in songs tonight, I'll be asking other questions. I sing and share because I can," he said.

Yarrow said he is concerned about a lack of purpose among young people across the country. The cause, he said, is the current administration.

"The movement of change which I felt so much a part of is no longer with us. A feeling of fear has spread across the nation. It is the result of such incidents as the Kent State massacre and the Chicago Seven trial," he said.

Yarrow said he thinks people came to hear "Peter, Paul and Mary" simply because it was a big-name group, not to get meaning from the songs.

"I feel that people come to my concerts to hear what I am trying to say," he said.

No doubt, some people went to see a famous entertainer, others to hear his music and lyrics and still others for both reasons.

But whatever reason they had for going to hear him, they will not soon forget Peter Yarrow.

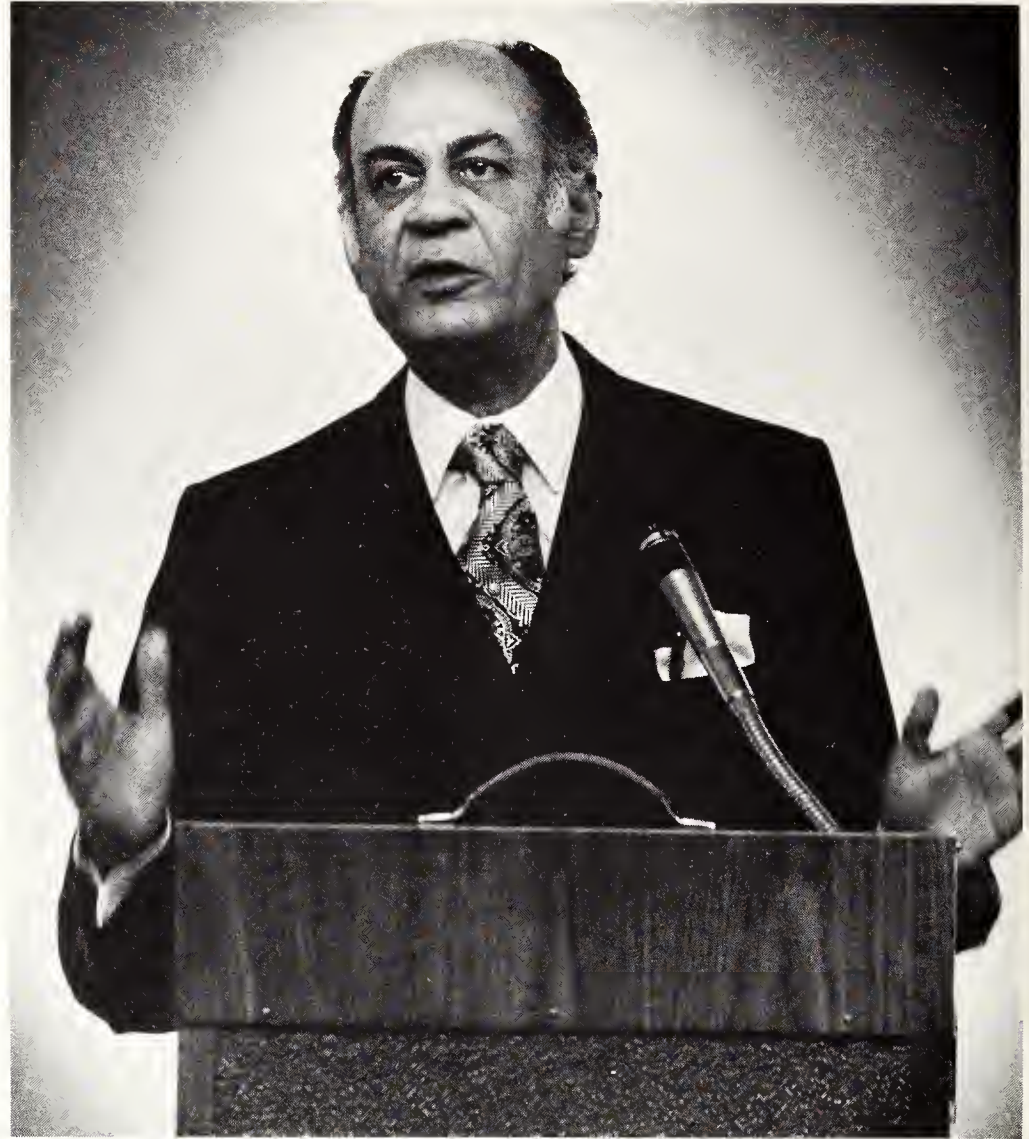

Sultan Muhammad Khan, Pakistan's ambassador to the United States, spoke to a Union Forum Hall audience Nov. 30 on subjects ranging from relations between Pakistan and India to Pakistan's economic situation.

Khan's address was sponsored by K-States Union Speakers Committee.

"For India and Pakistan there is no alternative to peace," Khan said. "Great economic set-backs have taken place. We hope and pray that the last conflict is now behind us."

Khan said he hoped India would remain a dominant country, but not a dominating one. He also said he had no doubt that the new Pakistan could be made a far better place, but that picking up the pieces after the war had been a painful and dramatic experience.

Dan Rather, CBS reporter, spoke about the journalist's ethics and role in political news coverage at a Landon Lecture Nov. 16.

White House correspondent for CBS since 1964, Rather accompanied President Richard Nixon on his trips to Russia and China.

"The tradition for American journalism has been and is now for reporters to be as fair and objective as humanly possible," Rather said.

Paid political propagandists in the county courthouses, statehouses and in the White House often attack reporters' motives for their own narrow, partisan purposes, according to Rather.

That is why reporters must continue probing for more than what the leaders in power want to make known, Rather said.

"An adversary relationship between reporters and political leaders is, in my judgement, essential. Narrow-mindedness and rancor are not," he said.

Rather appealed to K-Staters to refrain from using emotions or partisanship to make judgments upon the work of reporters and politicians.

Speaking to an overflow crowd in the auditorium, Rather apologized for not talking about

the election, as his speech had been advertised.

Following his speech, he answered students' questions about news coverage of the Watergate affair and reporters' rationale in publishing government secrets.

Speakers cover political events here and abroad

Dolf Droge, of the National Security Council in Washington, D.C., discussed the cultural gap between American soldiers in Vietnam and the Vietnamese people during All-University Convocation Sept. 18.

A former reporter and currently a member of Henry Kissinger's staff, Droge has spent most of the past 20 years in Indochina.

"Americans are coming home from Vietnam without ever knowing what the people of Vietnam are all about," Droge said, explaining that American GIs usually aren't in Vietnam long enough to become accustomed to Vietnamese people and customs.

Sympathizing with the

Presidents who have made decisions concerning the Vietnam conflict, Droge said, "It's easy for people to criticize when they have the perspective of the past on which to base an opinion."

He called Nixon's peace offer of an internationally-supervised cease fire and withdrawal of American troops in four months for the return of American POW's "the biggest carrot ever landed by the North Vietnamese."

Speculating about upcoming developments in the Paris peace talks, Droge said he thought the North Vietnamese were trying to decide whether to negotiate before or after the U.S. Presidential election.

Julian Bond, prominent Georgia legislator, attacked the Nixon administration and called for an increase of interest in politics during an All-University Convocation Oct. 26.

Charging Congress with creating most of the country's problems, he said, "Congress should have said 'no' to the war, they should have said 'no' to the wage freeze and increasing big business profits."

"The next President will have a tremendous effect on all our lives," Bond told K-Staters. "He will decide the war's outcome, the size of paychecks — or even if we get checks — and control the crime in the streets."

The general goals of today's society include full employment, equal participation in government, and acquiring the basic necessities of life, he said.

To realize these goals, Bond said people must confront the enemies who have infiltrated the ranks of government — those who belong to the "I've got mine" or the "take-the-

money-and-run" party.

Students' disinterest in the upcoming election was very disturbing to him, Bond said.

"If a person doesn't vote in some countries, he is fined. In America, if one doesn't vote, he's just a fool," he said.

During a question-answer period following his speech, Bond indicated he was in favor of increased educational funding and stronger campaign fund disclosure laws.

Forums aid in informing voters

To give student voters a chance to hear and talk with candidates for office, the Union Program Council presented three candidate forums in October.

Highlighting the local, state and national scenes, the forums were conducted in panel form with each candidate speaking for ten minutes. An hour of questions followed.

Approximately 80 students heard the political rhetoric of the final forum dealing with national candidates for Senate and House of Representatives. Questions were abundant. At several pro-McGovern statements, the predominantly Democratic audience broke into applause. Most of those who clapped held only Democratic campaign folders and pamphlets on their laps.

The majority of the audience seemed to have decided previously for whom they would vote.

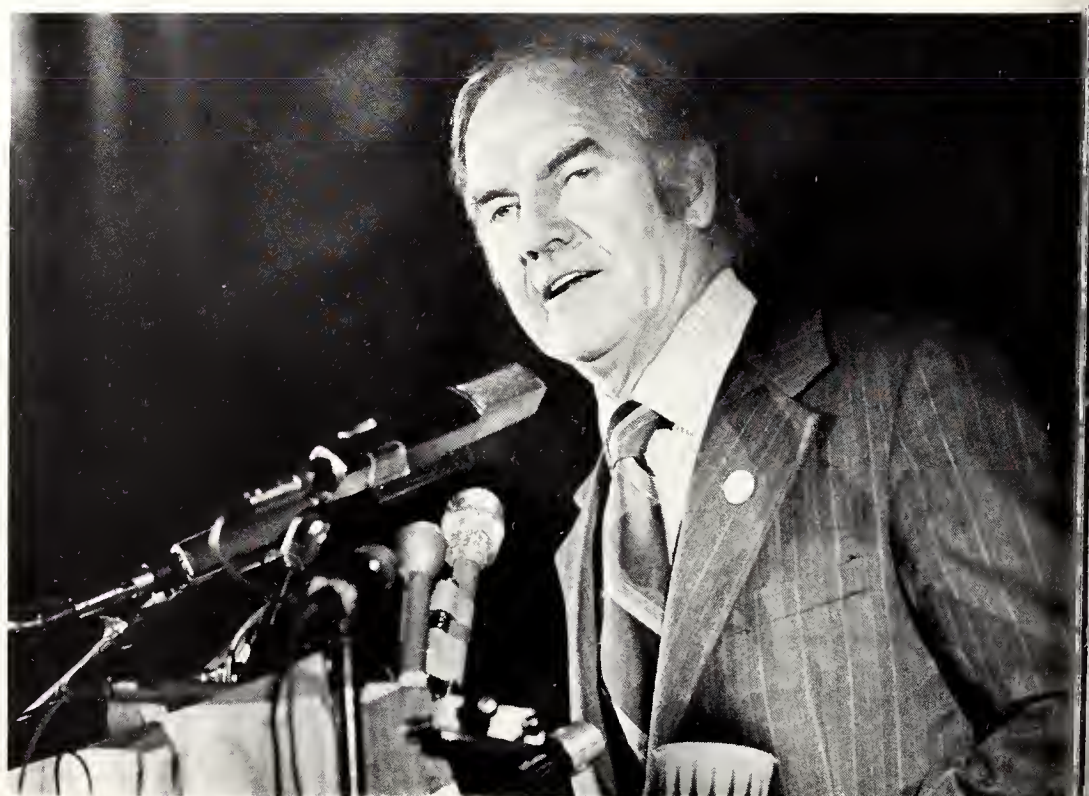

Photographers stood on both

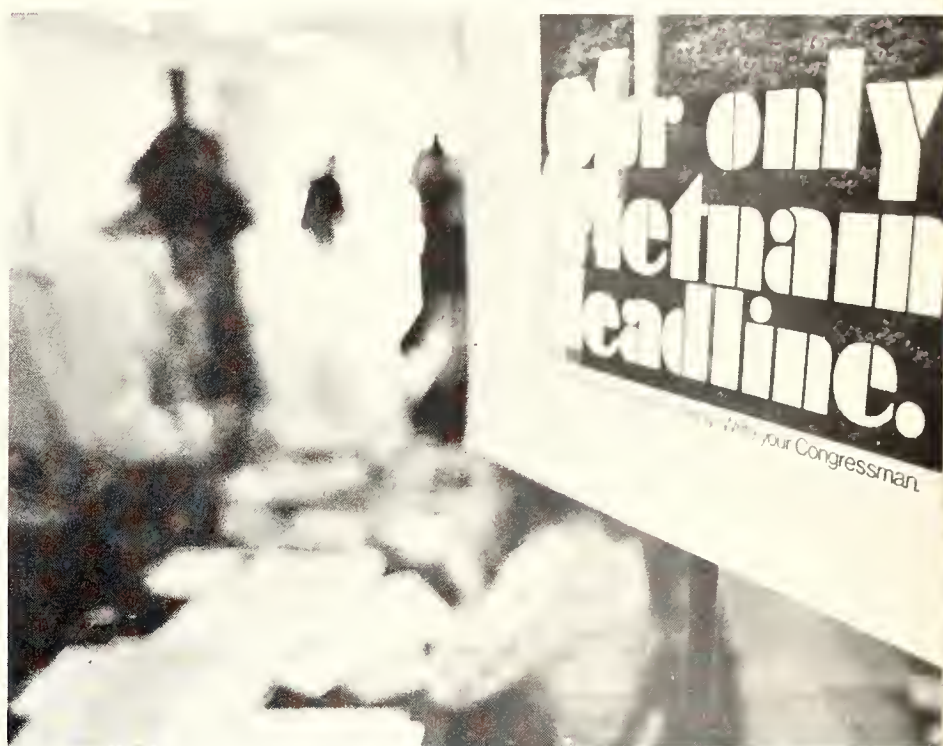

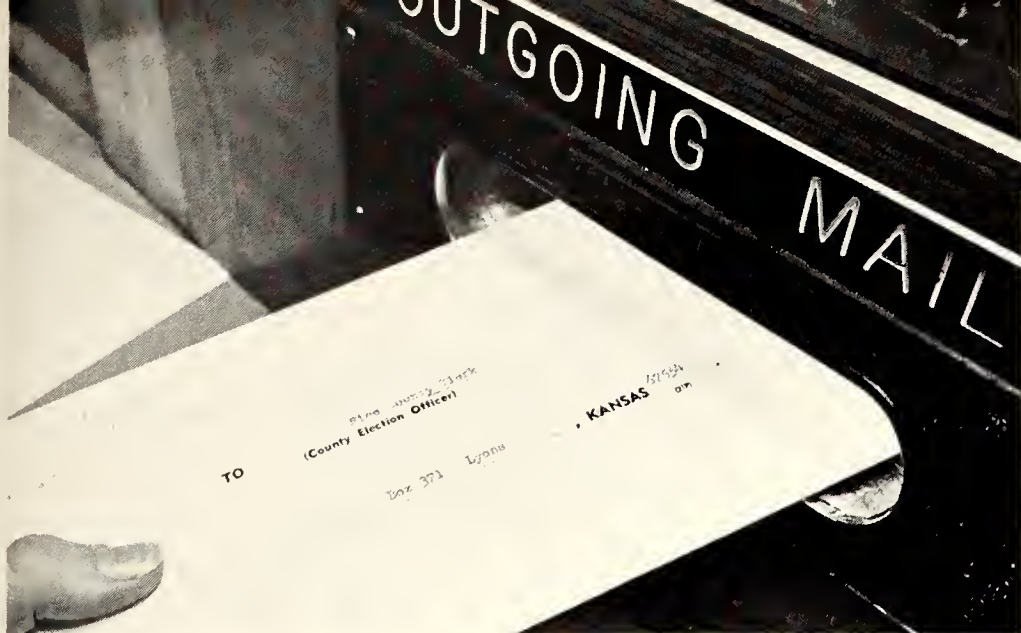

sides of the stage snapping pictures during the forum, and several reporters presented questions during the discussion, but the listeners were generally K-State Students.

Appearing at the final forum were Dr. Bill Roy and Charles McAtee, candidates for U.S. House of Representatives and Arch Tetzlaff, candidate for U.S. Senate.

State candidates who appeared at the second forum included Morris Kay, candidate for governor, George Hart and Dave Owen candidates for lieutenant governor and Mike Manning, candidate for secretary of state.

The first forum dealt with local office-seekers including Nancy Perkins and Byron Brooks, candidates for Kansas House of Representatives, Cletus Grace and John Watters, candidates for Riley County Commissioner and Larry McGrath and James Morrison, candidates for county attorney.

Election mood uneasy for first-timers, old-timers

By Dave Chartrand

Growing up is one challenge after another.

Every changing moment is a new challenge — a new decision. And that makes us uneasy.

College seems to be the place and time for people to decide on a career, on religion, on morals — and especially on politics.

Election 1972 made everyone uneasy. Uneasiness is a hard mood to describe. It's always hard to put in words the feeling of being impelled to think about something for the first time.

Why did the election make that many that uneasy? Because for many it was the first time. The first time for voting in a Presidential election. The first time for having a direct say in the country's future. And consequently, the first time for having to know — and know well — the issues and the facts.

Campus was engulfed by the first-timers. The only ones who had voted for a President before were over 25. The rest were just trying on their voting shoes.

And the first-timers showed their age. They wore buttons as big as their fists and as glaring as their eyes. They wrote letters to the paper that sneered and cheered. They instigated verbal duels in dorm rooms and houses when others were trying to study or sleep. They sat at tables in the Union, hour upon hour — making people uneasy.

Those who had thought the issues through made others angry: angry that the opponent could argue better and longer; angry that they, themselves, were not so informed and sharp; angry at having been made to feel uneasy.

It made people uneasy realizing that they had not read the paper, had

not watched the news, had not gone or listened to the local debates, had not yet stood in line to get an absentee ballot notarized. And so they did.

But Nov. 7 purged people of their uneasiness. Election day was quiet. The pre-election fervor had taken its toll on everyone's energies. Emotion and excitement had succumbed to the unavoidable reality of walking into the voting booth, pulling the curtain and marking the ballot for the candidate of one's choice.

The outcome was clear quite early. And the first-timers went to bed — glad that it was over.

Yes, glad that it was over. Except for a few I-told-you-so's and a few I-hope-you're-happy's things got back to normal.

The first-timers were suddenly old-timers. And it was time to take it easy.

Blue Key attempts relevant Homecoming format

By John Lonergan

It has been said that college students today put more emphasis on those things directly concerning themselves and their educations. Call it what you may, this heightened awareness, this concern over concern, is popularly known as relevancy.

At one time, when Homecoming rolled around, students declared a temporary truce with relevancy and proceeded to try to have a good time at the expense of more pertinent endeavors.

Gradually, however, they began regarding more critically their time and their money — Homecoming's two biggest requirements of students. As a result of the change in student trends and values, Homecoming has suffered lately from disinterest and non-participation.

Into the Homecoming picture each year steps Blue Key. In their perpetual quest for the something-for-everyone, ideal Homecoming, this service organization has tried and retried to keep the dying tradition off the black list of student

priorities. They have tried to do this by changing the goals and format of Homecoming through the years and by keeping an ear tuned to the criticism and acceptance of their peers.

This year's New Improved Homecoming with Added Attractions featured many of the traditional Homecoming elements with a few new twists.

There was the usual concert, starring anti-controversial John Denver, who performed, happily, above and beyond expectations.

The feature movie at the Union was "Hello Dolly," suitable though bland, and the student production of "Guys and Dolls" was entertaining.

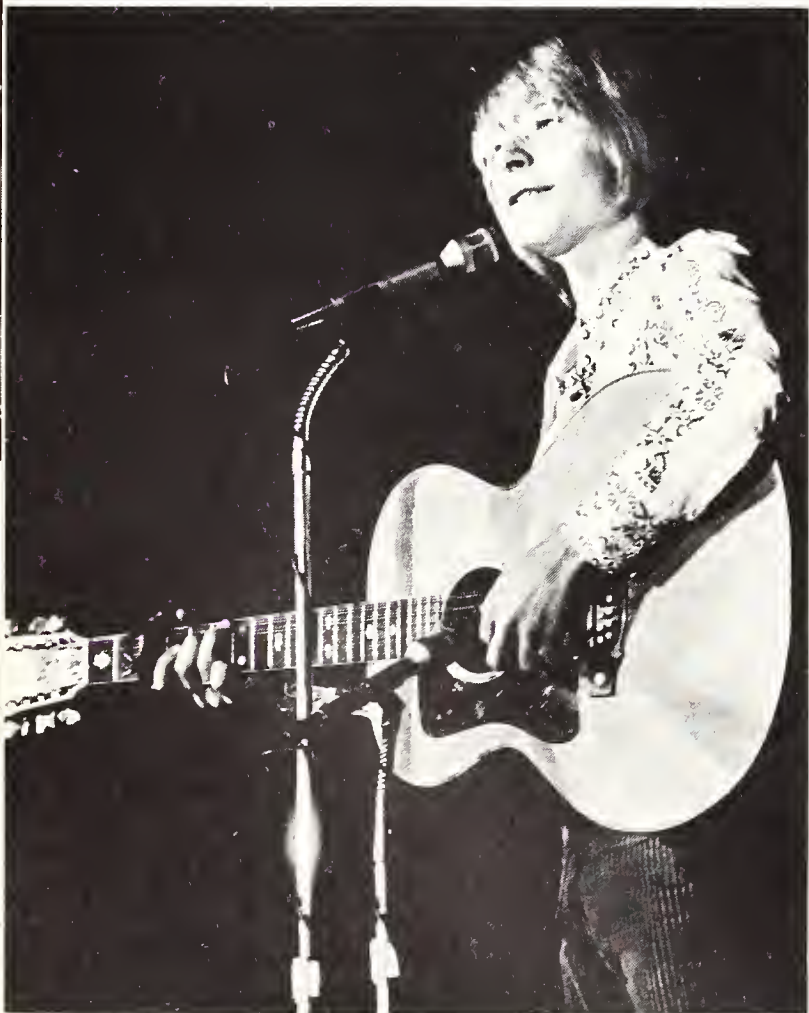

The football game against pre-season underdog Oklahoma State was lost even more embarrassingly than the contest last year, as the Wildcats treated the alumni to a nostalgic memento of Homecomings past.

The queen contest featured K-State's first male candidate, a tiresome fad which has made the rounds of most of the major colleges

and now has found its way to K-State. However, it turned out to be an interest-provoking sidelight to the otherwise lukewarm campaign. In the end, Wilma Moore of Van Zile was caped and crowned into queenhood.

A feature of this year's Homecoming was an exposition in the Union, an activity to revive student interest and to fill the gap left by the cancellation of Homecoming decorations. Although the displays of K-State life were a unique idea, the exposition's success was as debatable as that of the cancelled decorations had been in the past.

In fairness, one must give Blue Key some credit for trying the impossible — organizing an activity in which all students could be interested. This year's version of Homecoming was just another attempt on the road to that ideal. However, whether the student body will stay interested long enough to see this project through is questionable, and presently the answer is riding the waves of relevancy.

Senate finalizes tentative budget in fall session

In a comparatively calm fall session, Student Senate finalized all allocations.

All tentative spring allocations were approved with four exceptions: —Non-Big Eight sports were given \$6,500, matching their allocation from Athletic Council.

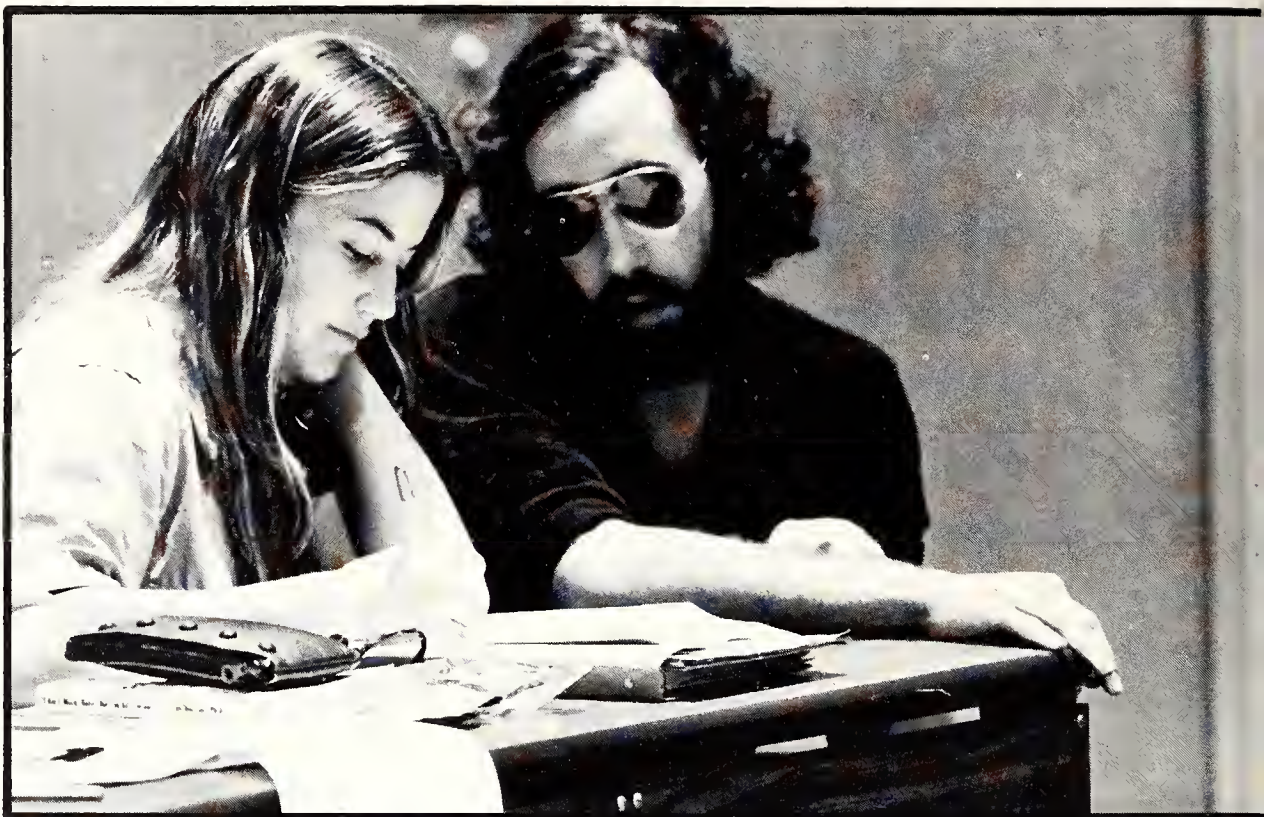

—University for Man was given an extra \$1,500 to cover rent costs. The money had previously been placed in reserve and ear-marked for UFM. —Teacher-Course Evaluation was given an additional \$3,000. The total allocation was then placed in reserve.

—The Associated Women Students had its entire allocation of \$394 cut to nothing. They had more money in their account than they had been allocated the previous year.

Two new requests were denied. The Society for the Advancement of Management was denied a request of \$1,755. Graduate Council was denied \$2,500.

After a controversy concerning roll-call votes, Steve Doering, senate chairman, called for senators to "show a little more respect for your fellow senators."

Still, even though emotions flared at times, the fall session was cool compared to the spring debates.

Senate criticized for “do-good determination”

OPINION By Terry Jackson

At K-State — where the farmers complain when the words “bull-shit” appear in the University newspaper, where Homecoming queen still reigns and where “football is still the roughest thing on campus” — 48 Thursday night liberators have taken it upon themselves to free the University from the chains of tradition.

How are they going to do it? . . . ahh . . . they don't know.

What are their objectives? . . . ahh . . . they don't know.

How are they going to achieve those objectives they don't know about? . . . ahh . . . they don't know that either.

Well, one might ask, what do they know? As student senators they have \$440,000 to do it with.

So, with a do-good determination, a powerful desire to liberate and liberalize a conservative campus and 44 million pennies, the group sets about the only task it knows how to attempt — the allocation of money.

Working on the federal government's premise that the common populus is too ignorant to distinguish between a desire and a

need, the group began by categorizing every organization as one of two types: necessity item or luxury item.

One by one, many groups which had previously considered themselves as providing a public service were informed that they had been operating under an extreme misconception.

Even after fall allocations were completed, senate discovered there were still groups which had not yet been enlightened as to their correct classification. These organizations met with senate during the fall to continue to explain their needs.

With many senators apparently operating under the premise: “If the student body takes no interest in senate, why should I?” a quorum became increasingly difficult to muster.

But never let it be said that senate can be stopped — at least not by the fact that almost one-half of its members fail to show up.

After almost a full semester of sparse attendance, one bright, young senator devised an ingenious plan to rid the group of those

senators who chronically missed meetings: impeach them.

Ironically, the night of the impeachment proceedings was also marked by a severe shortage of senators. In fact, there were not even enough senators present to impeach the others.

Nevertheless, senate charged on to stage a comedy surpassed only by the final allocations meeting.

The governing body nearly set a record by attempting to do something more than allocate activity fees.

As if there weren't enough trouble getting a quorum at the meetings, the group decided to turn its attention to an area which requires a vote of three-fourths of all senators — constitutional revision.

As many of the programs tried by senate, the revisions never got off the ground. They will no doubt be considered during the next senate session.

In all fairness, the fall term could not be labeled a success for senate. But then, has senate ever had a successful term?

Tuttle beckons to those who love nature, privacy

Tuttle Creek Reservoir is not just noisy swimming beaches and keggers and rumors of catfish 15-feet long.

It's not just grope-in-the-dark house functions, and slimy, baby-oiled bodies and boisterous volleyball games.

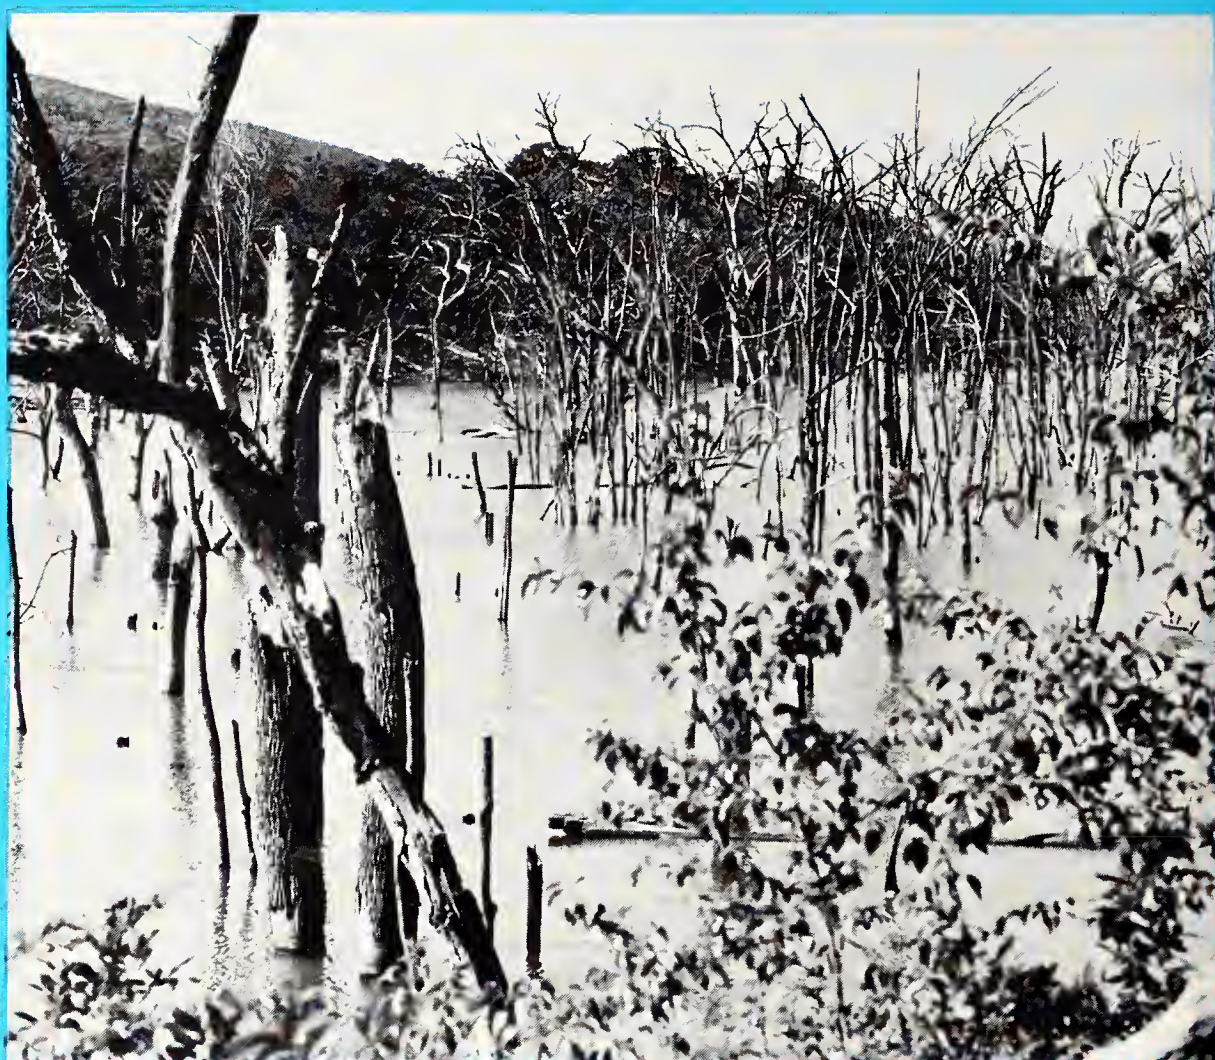

It's not even waterskiing and parking at the lookout and "you must have a permit to enter this part of the recreation area."

Sometimes, for special people, Tuttle is a place to go alone on a rainy afternoon.

It's a place to fish in a secluded inlet, or to commune with the birds and bugs and trees:

Tuttle can even be a place to camp for a weekend, away from classes and dorms and checkbooks — alone with nature.

For some, Tuttle Creek is Kansas' version of Malibu Beach. But for special people at special times, Tuttle is a man-made Walden Pond.

Construction's magic transforms K-State campus

By Nancy Dalsing

Some of the biggest developments on campus are often the most ignored.

People may not even notice the unobtrusive progress of construction here at K-State until suddenly the buildings are completed, and students find themselves actually using that long-promised gym or lab.

Presently there are three main projects underway or near completion at K-State.

The College of Veterinary Medicine will soon be located on its new 80-acre campus. Long-range plans for the development include four units, one of which, the Veterinary Research Unit, is already completed. This structure will house a research center as well as a diagnostic laboratory.

By the summer of 1973, the Veterinary Teaching Unit, comprising the second part of the new campus, will be completed. Teaching and laboratory facilities

will be housed there, along with faculty and administrative offices.

At a cost of \$14 million dollars, the third unit of the veterinary campus will consist of a veterinary clinic and teaching hospital.

The fourth section will consist of veterinary support units: animal holding pens, feed mixing and storage facilities.

Other campus construction is necessary because of the gutting of Nichols Gym in December, 1968.

The Women's Physical Education Facility and Natorium, to be completed by July, 1973, is to replace the facilities lost in that extensive fire.

The physical education addition will consist of locker space and a gymnasium as well as an area for instruction and research.

Use of the indoor swimming pools of Nichols will be discontinued as the new natorium will contain two 25-yard swimming pools and a diving pool.

The old dirt floor of Ahearn Fieldhouse is no more. Instead, a new synthetic floor has been added, as well as three basketball courts, an indoor track and court areas. Both women's and men's physical education classes will make use of these facilities.

K-State track fans will benefit from the third construction move, which is a new track south of the KSU Stadium. This project is financed totally through gifts received by the University.

What are the future construction plans at K-State? According to Paul Young, vice-president for University development, plans encompassing the next 10 years include an extensive KSU Auditorium addition. This will tentatively house the music department, radio-TV and a section of mass communications including the campus radio station KSDB and KSAC, the Extension Radio Division.

Fire-fighters—

Fire and smoke in the middle of the night awakened the occupants of a Jardine Terrace apartment. The girl grabbed her wedding book and ran outside while her husband called the fire department from a neighboring apartment. Within minutes an ancient red truck manned by eight K-State students pulled up to fight the blaze.

The students are hired to put out fires on University property. They are paid approximately \$60 per month and receive free rent for their rooms in the campus power plant.

"Mostly, we cover small things," Mike Campbell, student fire chief explained. "There are between one and six alarms each month and probably 40 to 50 false alarms. Lots of these are just people who dialed the wrong number, but we all pile out of bed and run for the truck before we find out it is a false alarm."

Every week-end there is a practice session for checking equipment and fire-fighting techniques. Most of the firemen have been working there for three years and according to Campbell, the only real problem each year is training the summer crew.

By Karla Brockman

Fall news—

Fall comes, school starts and the campus comes alive again. With a few exceptions, emphasis was on campus activities:

—On the national scene, President Nixon ran for his second term in office. He was re-elected in a landslide victory over George McGovern, South Dakota Democrat.

—Nobel Prizes were awarded to Dr. Gerald Edelman, Rockefeller University, and Dr. Rodney Porter, Oxford University, for their research in the

field of medicine. Heinrich Boll, a German novelist, won the award for his contribution to literature.

—Higher enrollment at K-State might have explained the tremendous crowds at the Activities Carnival this year. All campus organizations vied for the student's time, talent and in some cases, his money.

—The Continental Theatre Company struck out on their own this year after K-State decided to discontinue its support.

—Band Day drew Large crowds for the Tampa game. Marching bands from large and small high schools provided half-time entertainment for the spectators.

—K-State beat KU. Aggieville was chaos after the game as students lit bonfires and threw beer cans in the streets celebrating the victory.

—Veterinary students held their annual open house. Gov. Robert Docking officiated at the opening ceremonies.

—The Lower Tuttle Tour Race challenged the endurance of K-State's bicycle enthusiasts.

—Kappa Kappa Gamma and Delta Upsilon won University Sing's overall trophies for the best group and for the best mixed group. Putnam Hall walked away with the trophy for their division.

—Students responded in high numbers to the Red Cross Bloodmobile's request for blood donations.

—Finally, Homecoming had a different look this year. Blue Key decided to do away with Homecoming decorations but continued the queen contest.

Speak-out—

Black Student Union's "Struggle For Survival" blended entertainment and commentary in a benefit show presented Sept. 27 before a near-capacity crowd at Forum Hall.

The show raised money for use in fighting sickle-cell anemia.

The all-student cast combined music, drama, dancing and poetry in a comment on the struggle Blacks face as a result of both sickle-cell anemia and racial prejudice.

A large and lively crowd of Whites and Blacks responded enthusiastically to the collage of acts, despite the show's many mechanical difficulties.

The United Black Voices opened the program with powerful and well-rehearsed arrangements of well-known spirituals.

The Diamondettes, a dance ensemble, added eerie visual effects to a reading entitled "My People."

Jean Madlock proved strong vocal talent in "Somebody Bigger Than You and I" and "Walk On By." And Belinda Green had the audience singing with her in the show's finale, "Little Ghetto Boy."

For emcees Wilma Moore and Joey Ezell, however, the going was rough. Long set changes, missed cues and unmemorized lines left them in more than a few awkward spots.

But the weak points were far outweighed by the more stirring moments. Bernard Franklin and Ruby Kendricks gave perhaps the most graphic articulations of the Blacks' plight with their original drama-poetry expressions.

"Struggle For Survival" was a cultural as well as financial success. Through positive, constructive efforts such as these, Blacks and the Manhattan community take big steps forward, and the money raised may save Black lives.

Fall Fallies—

A lot of people are still asking, "What was Fall Fallies?"

And that seems to be the story of the fun and games weekend sponsored by the K-State Association of Residence Halls Oct. 27-28.

The weekend, an attempt to stage a fall analogue to Spring Fling, suffered a little from poor publicity, a little from disorganization and a lot from confusion and indifference among students.

A Friday night showing of "Cat Ballou" was followed by a trip to Tut-

tle Creek in the drizzle and cold for a bonfire-kegger. The turnout was small.

The whole thing was supposed to have been capped off with an open-mike "coffeehouse" but no one showed up to play.

At least things came to life Saturday with an afternoon of volleyball, pyramid-building, pumpkin-rolling and a considerable amount of disarray.

Van Zile grabbed first honors in volleyball and Haymaker-Ford won the pyramid-building with a 19-body structure.

A Great Pumpkin Contest at the dance Saturday night was also won by Haymaker-Ford. While the band, Pagan Ballet, raised the roof, prizes went to the best-dressed goblins.

For some the highlight of the evening was the brief tour through the Smith-Ford Haunted House at Derby Food Center.

Admirable performances were turned in by the hunchback and the head-chopper who beat themselves to death trying to scare people.

Fall Fallies had its share of trouble spots. But then it's always hard to sell a new idea.

If experience teaches, Fall Fallies will return and fare considerably better next year.

School resumes; campus explodes with activity

Catskeller audiences enjoy entertainment, informal setting

Every college likes to think it offers unique opportunities to its students in terms of social activities.

But in the field of musical entertainment, K-State feels it has something special.

When students go looking for a nice, informal place to spend an evening, one that is heavy on atmosphere but light on cost, K-State has it — at the Catskeller.

On weekdays the Catskeller has its doors open to those who may want to study, talk with a friend, listen to music or to sleep.

But on weekends the Catskeller becomes a candle-lit night spot which offers professional entertainment and a relaxing place to be with a date or friend.

Russ Kirkpatrick opened the fall Catskeller series on a high note with two shows on enrollment weekend. Kirkpatrick, a favorite with Catskeller patrons, combined humor and serious drama with his excellent guitar playing and singing.

The Ewing St. Times also returned to Manhattan for the second show of the series. The Times never fails to please the Catskeller crowd with its heavy, foot-stomping blend of rock and country sounds.

The next act, Red, White and Blue, brought the crowd to its feet, stomping and clapping its appreciation of the quartet's banjo-picking bluegrass — a type of music that seems to be coming back into favor

on this campus.

And that trend prompted a very different idea for the next Catskeller show.

John Hartford, author of the hit, "Gentle On My Mind," became the first big-name performer to play the coffeehouse.

Hartford, an expert on the banjo, guitar and fiddle, played entirely self-written pieces that reflected his individuality as a writer and a stage performer.

Pamela Polland, pianist and song writer, followed Hartford in a two-night stand at the coffeehouse. Like Hartford, Ms. Polland brought a unique sound to the Catskeller. She shared her thoughts and experiences by means of her original songs and informal banter with the audience.

The coffeehouse closed out its regular fall program with a weekend performance by Tom Thorton, guitarist and songwriter from Texas.

The Catskeller also hosted a post-regular season benefit concert for the Walk-in Crisis Center. Three local acts, Neal-Waters, Canning Creek and Marty Parsons comprised the special show.

Ten out of twelve sell-out shows. That's the evidence for the success of K-State's Catskeller.

An intimate atmosphere between performer and audience. That's the evidence for a unique opportunity in musical entertainment.

"Guys and Dolls" climaxes autumn productions

By Jan Paschal

Sharp contrasts in performance quality and competition from other on-campus attractions created a rugged, unpredictable fall season for K-State Players and audiences alike.

"Jeremiah of Anathoth," the season's first full-length production, was performed Oct. 11-14 in the Purple Masque Theatre. A graduate thesis work by Norman Bert of the Department of Speech, the play dealt with the Biblical prophet

Jeremiah's reactions to the ridicule and hatred he received from his own people.

The usage of contemporary slang and obscenities in the script's dialogue disrupted the play's credibility, as did the uncertainty of many of the cast members. But Jim Wilkinson, as the beleaguered, sensitive Jeremiah, triumphed with a sympathetic, convincing characterization.

"Robinson Crusoe," K-State's

Children's Theater fall production, toured Junction City and Manhattan elementary schools Oct. 26-28. Based on the familiar tale of Robinson Crusoe (Wayne Henson) shipwrecked on a tropical island, the play dramatized his encounter with some "ferocious" cannibals.

"Guys and Dolls," the popular Broadway musical based on the stories of Damon Runyon, climaxed the fall season with a polished, authentic production. Presented Nov. 8-11 in the KSU Auditorium, the joint-production by the Departments of Speech and Music and K-State Players involved approximately 150 students in the cast, orchestra and crews.

Written about Broadway of the 1950s, "Guys and Dolls" is a light-hearted tale of two romances — a 14-year engagement between marriage-shy gambler, Nathan Detroit (Frank Siegle) and his Adelaide (Julie Goerhing), the Hot Box dancer, and a chance relationship between suave gambler Sky Masterson (Harry Burgess) and the innocent Salvation Army girl, Sarah Brown (Mary Jo Weber).

Readers' Theatre presented "Larger than Life" by Mark Edwards Sept. 13 and "Lullabye for a Madman" by Kirk Lovell Sept. 27. Other fall Readers' Theatre productions were "The Believers" by Carol Williams, "Annotated Hecuba and Trojan Woman" by Charles Fischer, "Big Boy" by Tom Lix, and "The Foster Father" by David Benedikt.

Performed only once, Readers' Theatre scripts were written by currently-enrolled or former K-State students in the advanced playwriting classes.

Through experimenting with different types of theater genre — from original works to the Broadway classics, from on-tour productions to Reader's Theatre — K-State's resident actors and audiences acquired real-life glimpses into what made theater work during the fall 1972 season.

"Walk for Mankind" attracts people of all ages

By Nancy Dalsing

The young girl prodded her small group of friends onward from checkpoint to checkpoint, leaving them little time to worry about their sore feet.

A 74-year-old still managed a spritely strut and a steady pace, all the while recounting memories of Manhattan as it was in his boyhood days.

Both are glimpses of humanity as it can interact, of the strength that can be drawn from a common, altruistic goal.

In Manhattan's "Walk for Mankind" on October 21, people of all classes, races, ages and interests became one under Project Concern.

In an effort to help otherwise neglected persons in areas such as South Vietnam and Appalachia, Project Concern was founded by Dr. Jim Turpin in 1961.

A non-profit program which supports medical, dental and educational services, Project Concern treats a total of 500,000 people in five countries.

The popularity of the "Walk for Mankind" has been gaining momentum since it was first tried in September of 1969.

Although the actual walking distance is usually somewhere between 20 and 30 miles, the amount of money pledged by firms, groups and individuals can reach any sum.

Of the money raised, 80 percent will go to Project Concern, with 10 percent of the remaining funds going to volunteer working funds in Manhattan. The remaining 10 percent of the proceeds go to various benefits and social agencies within the city.

Participants numbering 600 took the long route outlined by the red "Snoopy" signs, pointing the way past such points as Cico Park and the K-State Football Stadium.

This was the third time Clifford Dale, 74, had walked.

"It's a good cause, and I also test my stamina year after year," he said.

He did just that, and managed to drag himself to the starting point in mid-afternoon, slowly, but

triumphantly.

Another Manhattan resident, Russell Reitz, walked for another reason.

"My son Leland was one of the doctors in Project Concern in Vietnam and his wife was a nurse there. I feel an obligation to carry on a family tradition."

University students, who constituted approximately one-third of the total walk crew, included Greeks, members on the K-State Track Team, long-distance runners and members of the K-State Marching Band.

Smiling, tired people attested to the success of the "Walk for Mankind," which is estimated to have earned \$10,000 from Manhattan participants alone.

An excerpt from a Project Concern pamphlet speaks for the walkers:

"I'm walking because I'm healthy . . . I'm walking because the children of poverty are calling my name. And this is my way of answering."

Non-drinkers use imagination to find weekend entertainment

By Karla Brockman

Bar-hopping in Aggieville is a major form of entertainment for many K-Staters, but there are those around who prefer to TGIF in different ways.

For non-drinking students, ingenuity sparks ideas for relaxing weekends.

For instance, how many serious drinkers are there who are in any shape to enjoy the late, late, late movie on Saturday night? The non-drinking student can be entertained by such goodies as "Charlie Chan and the Fortune Cookie Caper," or John Wayne's all-time best, "The Flying Tigers."

Besides watching old movies, a common form of relaxation among non-drinkers is playing cards. The more avid card players are not particular about the game — anything will do. Pitch, bridge and pinochle are popular among K-Staters.

"We play cards once a week with another couple," one student said. "It's a nice, cheap way to have fun."

Outdoor sports sometimes provide non-drinkers with alternatives to the Aggieville scene. Activities such as picnics, cycling and hiking are familiar to many students on budgets.

"My favorite form of entertainment is walking," a junior coed said. "We take walks around old farm houses and find bottles and metal objects."

One K-State couple prefers spending their weekends at auctions to spending them in bars.

"We try to go to at least one auction each week. It's a fascinating thing to get into," the coed explained.

While keggers at Tuttle are popular for many, one student said she enjoys ice skating in the winter on the lake's coves. Bonfires and picnics are also involved in these outings.

Although it is difficult to convince staunch Aggie patrons, many students have found that there are other ways to spend weekends and still have fun.

Disabilities—

You gripe about walking from Fairchild to Weber or trying to find that magazine you need in Farrell. But how would you approach these mundane facts of college life from a wheelchair or if you were blind?

"I have to cut back on my activities. It takes as much energy for me to go to class as it used to take to play football for half an hour," said a K-Stater who was injured before his senior year. He now travels between Denison and Weber in 10 minutes in his wheelchair.

While the abundance of stairs and lack of ramps pose a real problem for wheelchair students and those with braces, mobility is less of an obstacle for blind students at K-State.

"Getting around the K-State campus is not a problem. This place is really compact," one blind student noted.

Neither is studying a particular mind-boggler to blind students. If an individual buys books six weeks before the semester begins, he can have the texts recorded on tape. One student takes notes in braille and trades them verbally with his non-blind friends.

In fact, blind students may have one definite advantage, another stu-

dent pointed out.

"A blind person is apt to pay more attention in the classroom because he has to listen," he said.

"I have to prove to myself I can do things — no matter how much it hurts, no matter how many times I fall," a wheelchair student said.

What is social life like for these students?

"Anyone with a handicap tends to think he's being accepted superficially," a student commented.

"People are afraid of offending — of using the term blind, for instance," another student explained.

He said he believes the adjustment to college is more difficult for a blind student who comes here after going to a state institution for the blind for 12 years.

"He's used to being in a blind world," he said. "He comes here, and ZAP! He's in the normal world."

"How he handles these things depends on his view of himself," the student continued. "Total dependence on other people hinders the appearance of a handicapped person."

"Me, at a party, I try and drink as much as the next guy, or if I meet a girl in one of my classes, I try to take her out," he said.

By Jan Paschal

Pumpkin—

Every year on the Eve of All Saints, commonly called Halloween, the great pumpkin rises out of the most sincere pumpkin patch and gives toys and candy to all the good children.

The most sincere pumpkin at K-State this year, if size is any measure of sincerity, had to be the one that sat in Waters Hall in October.

Weighing 141 pounds with a circumference of 81 inches, the great pumpkin was actually a Big Max fall squash grown by a Kansan, Bill Caldwell.

The well-traveled orange squash was exhibited at the Mid-America Fair in Topeka and the Kansas State Fair in Hutchinson before it was given to K-State for display.

Although this particular squash was larger than average, it was not the largest grown in Caldwell's patch. Another fruit reached 184 pounds, but was of a different variety and had a gray color.

Near Halloween, the smaller summer squash is sold for jack-o-lanterns, but the larger varieties are the best ingredients for pumpkin pie.

Some of the larger fruits Caldwell grows are sold by the pound for pie. Most of them, however, are sold as novelty items to set in front yards to await the arrival of the Great Orange Visitor.

Vocal music—

Deller Consort, renowned English vocal ensemble, brought the sounds of the Renaissance and Baroque eras to K-State for the opening performance of the 1972-73 Chamber Music Series.

Rich yet subdued in tone, the consort entertained a capacity audience with a repertoire featuring English madrigals, 16th century sacred music, French chansons and rounds.

Jean Knibbs, soprano, provided strong upper harmony for the five counter-tenor, tenor and baritone voices in the group.

"When the Cock Begins to Crow," a 17th century round in three parts for men, provided a touch of whimsy to the otherwise restrained program.

Alfred Deller, counter-tenor and Deller Consort originator, sang two sacred pieces by Claudio Monteverdi; Desmond Dupre, consort luteist and guitarist, played Bach's "Suite for Lute."

Fall one-acts—

Nonconformity and society's reaction to it provided the unifying theme for the first bill of student one-acts, presented Sept. 20-23 in the Purple Masque Theatre.

"I Was Working On It, But It Fell Apart . . ." by Lorua Tucker, junior in theater, told the story of a boy who makes wooden objects all day long, refusing to speak to anyone.

"Best Friends," by Jim Lewallen, sophomore in general, played

youthful naivete against stark reality in a character study of three close buddies saying farewell because one of them is leaving for Vietnam.

Politics, the courts and the Great American Way took jabs in "Copyright 1972," another Lewallen play.

Norman Fedder and Joel Climanhaga, directors of the original one-acts program, moderated discussions following the performances.

Powderpuff—

Competition was tough this year as ten sororities blocked and guarded in an attempt to capture first place in the annual powderpuff football tournament.

Tau Kappa Epsilon fraternity started the program three years ago as a means of furthering friendly relations with sororities and teaching girls the fundamentals of football.

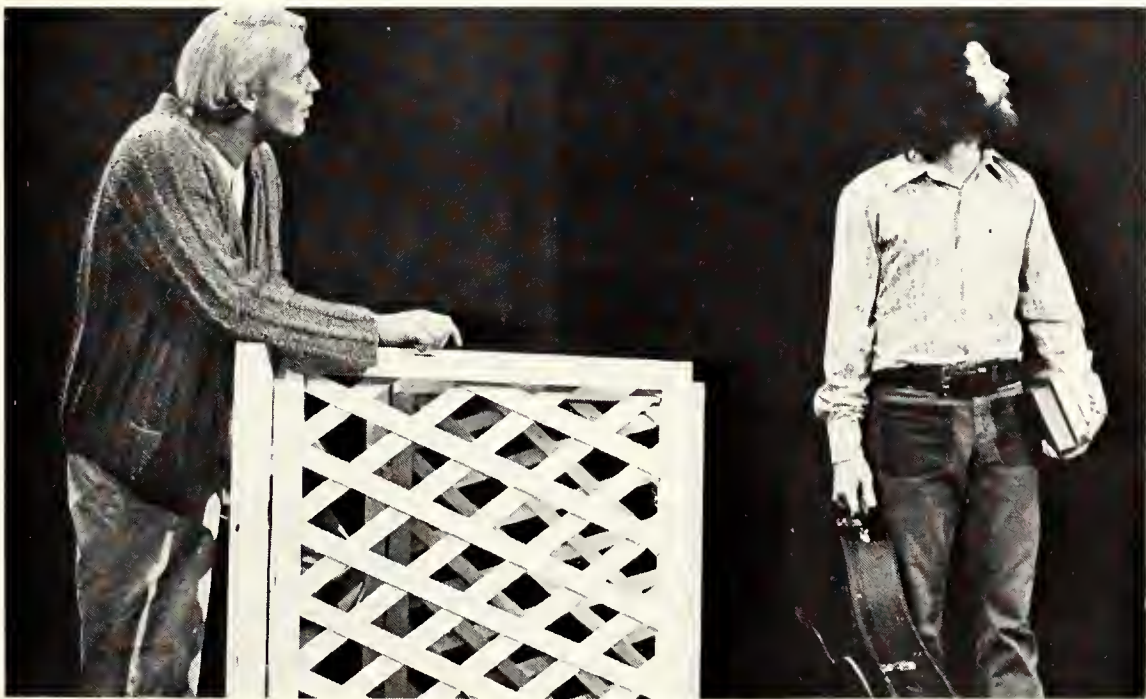

The games were played in the city park from Oct. 3-15.

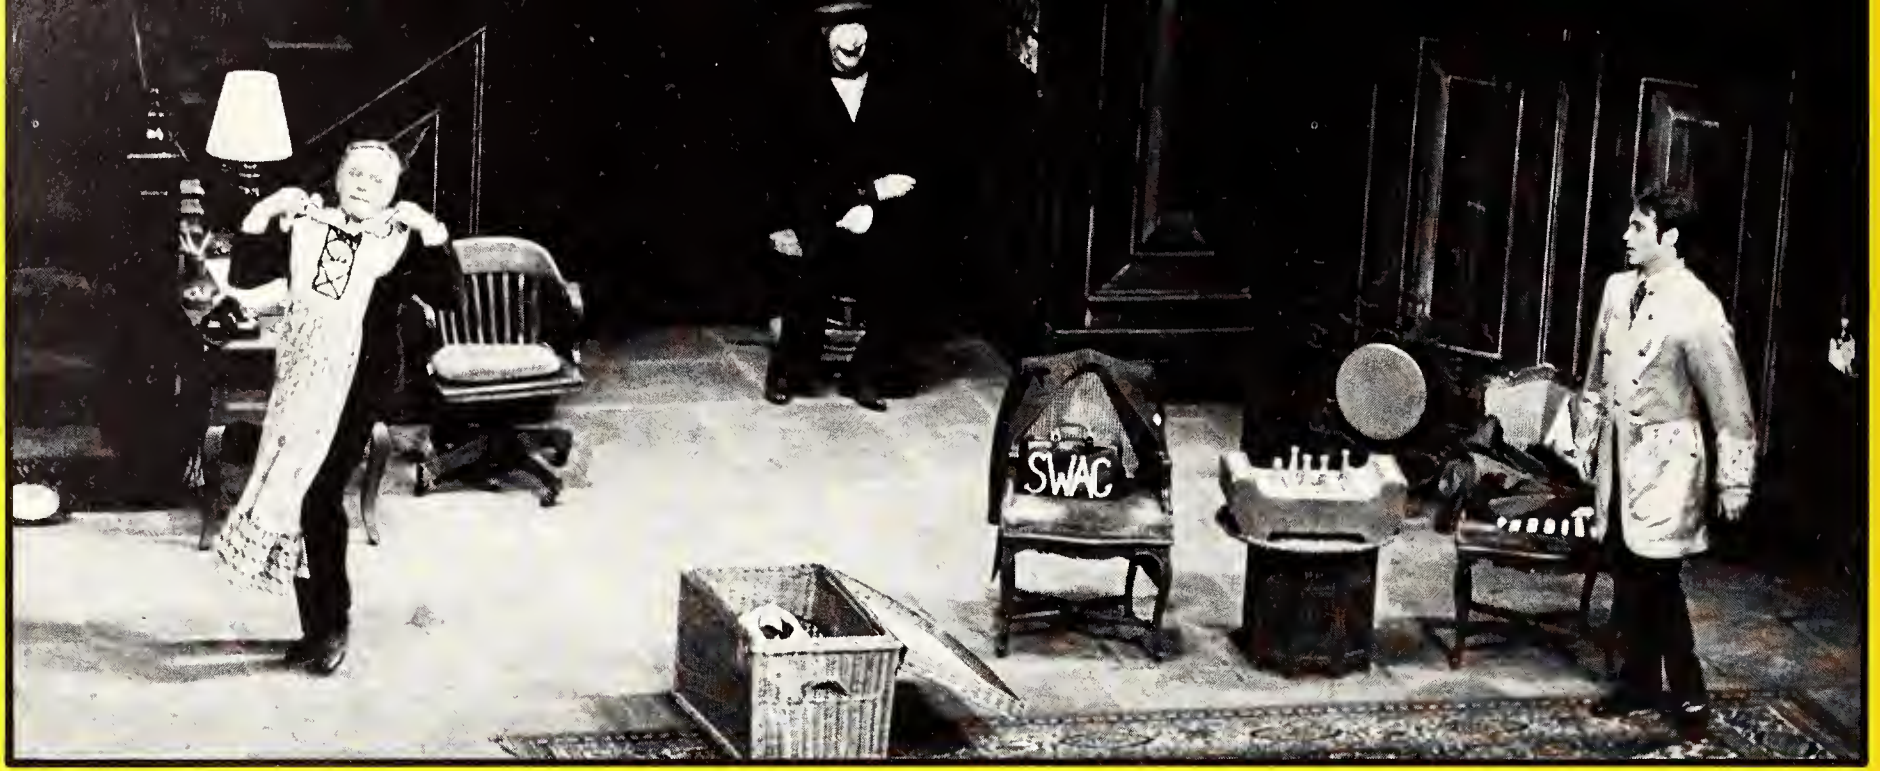

First place went to the Gamma Phis for the third year in a row. The Alpha Chis, defeated last year in their first game, took second place. The Delta Zetas won the consolation game against the Chi Os.

Chris Sargent, chairman, says he hopes to be able to use the KSU Stadium for the championship game.

Each sorority pays a \$5 entrance fee that goes toward trophies, publicity and equipment.

Coaches and referees are chosen three weeks before the first game, and each house scrimmages with another house to warm up for the contest.

Auditorium series offers music, comedy, mystery

Fall Auditorium Series attractions garnered capacity audiences in exchange for sophisticated entertainment.

"P.D.Q. Bach: An Evening of Musical Madness" opened the series' third season Sept. 30 with Peter Schickele presiding as performer and "intellectual guide." Appearing in disheveled tuxedo and combat boots, Schickele preceded his performance of the fictitious Bach works with mock lectures about the composer's life, which, he contended was lived backwards from 1807-1742.

The crowd reacted with titters and guffaws, especially when Schickele pulled out an Oscar Meyer wiener whistle, a left-handed sewer flute and an ocarina to play P.D.Q. Bach's "Gross Concerto." Paul Roby and

selected members of the K-State orchestra accompanied him.

The Proposition, a young improvisational acting team from Boston, appeared Oct. 14. Utilizing suggestions from the audience, the team of actors produced spontaneous sketches of situations ranging from a college panel discussing the draft to an opera involving Howdy Doody, Mae West, and a gorilla.

"Sunday Excursion," a one-act opera by Alec Wilder, and Act II of Mozart's "The Marriage of Figaro," were presented by K-State students Oct. 19, under the direction of Jerry Langenkamp, associate professor of music.

"Yeomen of the Guard," a Gilbert and Sullivan opera, was performed by Kansas City Lyric Theater Oct. 21

as an extra attraction sponsored by Manhattan Cultural Arts Council.

Peter Nero, top concert jazz pianist, played a medley of hits and some of his own compositions to a near sellout crowd Nov. 2. "Jesus Christ Superstar," Gershwin's "Porgy and Bess," and "Theme from Love Story" were among the songs Nero chose for his two-hour performance. After receiving a standing ovation, he played his latest hit, "Summer of '42."

"Sleuth," a British mystery play, closed the Fall Auditorium Series' season Nov. 15. Winner of a 1971 Tony Award in New York, the play revolved around a cat-and-mouse game between a successful English mystery writer and a shabby young man who rooms on his estate.

Union Gallery renovated into quiet showcase

What used to be the Open Circle — a lounge area with sheer rock walls covered by peg board, burlap and an occasional work of art — was transformed over the summer.

The K-State Union Gallery, as it is now called, looks much more like a gallery for art. The walls are carpeted with oyster-colored shag which serves a dual purpose: not only does it look nice, but it also helps to absorb the noise from the rest of the Union, keeping the gallery semi-quiet. The rest of the room is black, including the studio lights hung from the ceiling.

Nancy Perry, advisor to the Arts Committee of Union Program Council, said the remodeling has been planned since the Union was built; it wasn't until this summer, however, that the money was made available through Union funds. The gallery opened the second week of the fall semester.

Artists whose work was to be displayed included Peter Busa, an internationally-known artist, the faculty of the art department and students in the architecture department.

ABOVE: Defensive back Ron Solt up-ends a Tampa pass receiver. **ABOVE CENTER:** Don Calhoun fights through heavy traffic for a few hard earned yards. **TOP LEFT:** Isaac Jackson blocks for Ron Coppenbarger as he returns a punt against Tulsa. **TOP RIGHT:** K-State players express their disagreement with a call by the officials. **MIDDLE RIGHT:** Senior quarterback Dennis Morrison hands off to Isaac Jackson up the middle. **FAR RIGHT:** Offensive lineman Del Acker has the job of moving the defense out. **RIGHT:** Vince Gibson and the Wildcats are greeted by the K-State Band for another home game.

Wildcats begin gridiron season with high hopes

The month of September means many things to a college student. The end of the summer, the beginning of classes, and, for weekend entertainment, the thrill and spectacle of Saturday afternoon football. The game, too, means different things to different people. For the spectator it means a few hours of vicarious sadistic pleasure or a chance for his school to achieve national ranking. For the player it means sprained ankles, broken bones, bloody noses, and above all the opportunity for competition.

The 'Cats opened the 1972 season against the University of Tulsa Hurricanes. After a sluggish first half in which the Wildcat offense was held scoreless, the 'Cat defense, in the second half, forced two key turnovers to carry K-State to a 21-13 season-opening victory.

K-State's perfect 1-0 record did not remain unblemished past the second week of competition as Brigham Young University handed the 'Cats a 32-9 loss. The BYU Cougars established a balanced running and passing attack which was envied by the K-State offense and dreaded by the 'Cat defense.

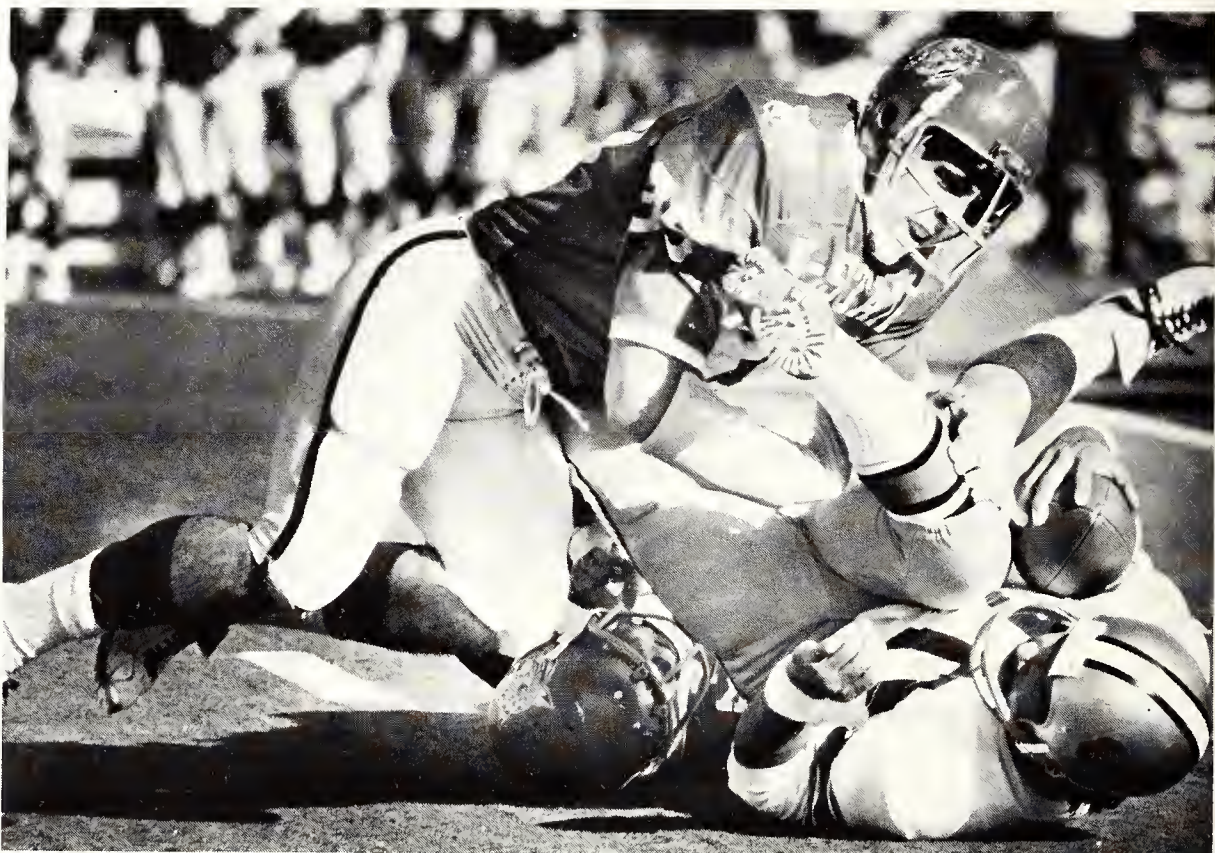

Continuing on the road, the 'Cats also continued their losing ways, falling to Arizona State, 56-14. The Sun Devils, ranked nationally in the top 10, put on an offensive display that netted them four touchdowns within the first two quarters, and 560 yards of total offense for the night. K-State, meanwhile, allowed turnovers to stifle any hopes for an upset.

K-State football fortunes were on the line following the ASU loss, as the Wildcats faced the University of Tampa at home. And the home crowd was not dissatisfied as the 'Cat defense recovered four of nine Spartan fumbles, while the offense, behind the passing of Dennis Morrison, gained 313 yards of total offense and a 31-7 victory.

K-State falls to Buffs 55-22, trips KU 20-19

K-State football fans found little inspiration when the Wildcats hit the gridiron to face the University of Colorado at Boulder. The disappointment and disgust of previous weeks was enhanced as the Buffaloes proved to be too much for K-State. The 'Cats were overpowered by Colorado as the Buffs marched to a 55-22 victory. K-State was headed for one of the worst overall and Big Eight season records since Vince Gibson took over as the Wildcat head coach. There seemed to be little hope of salvaging a successful season out of the rubble.

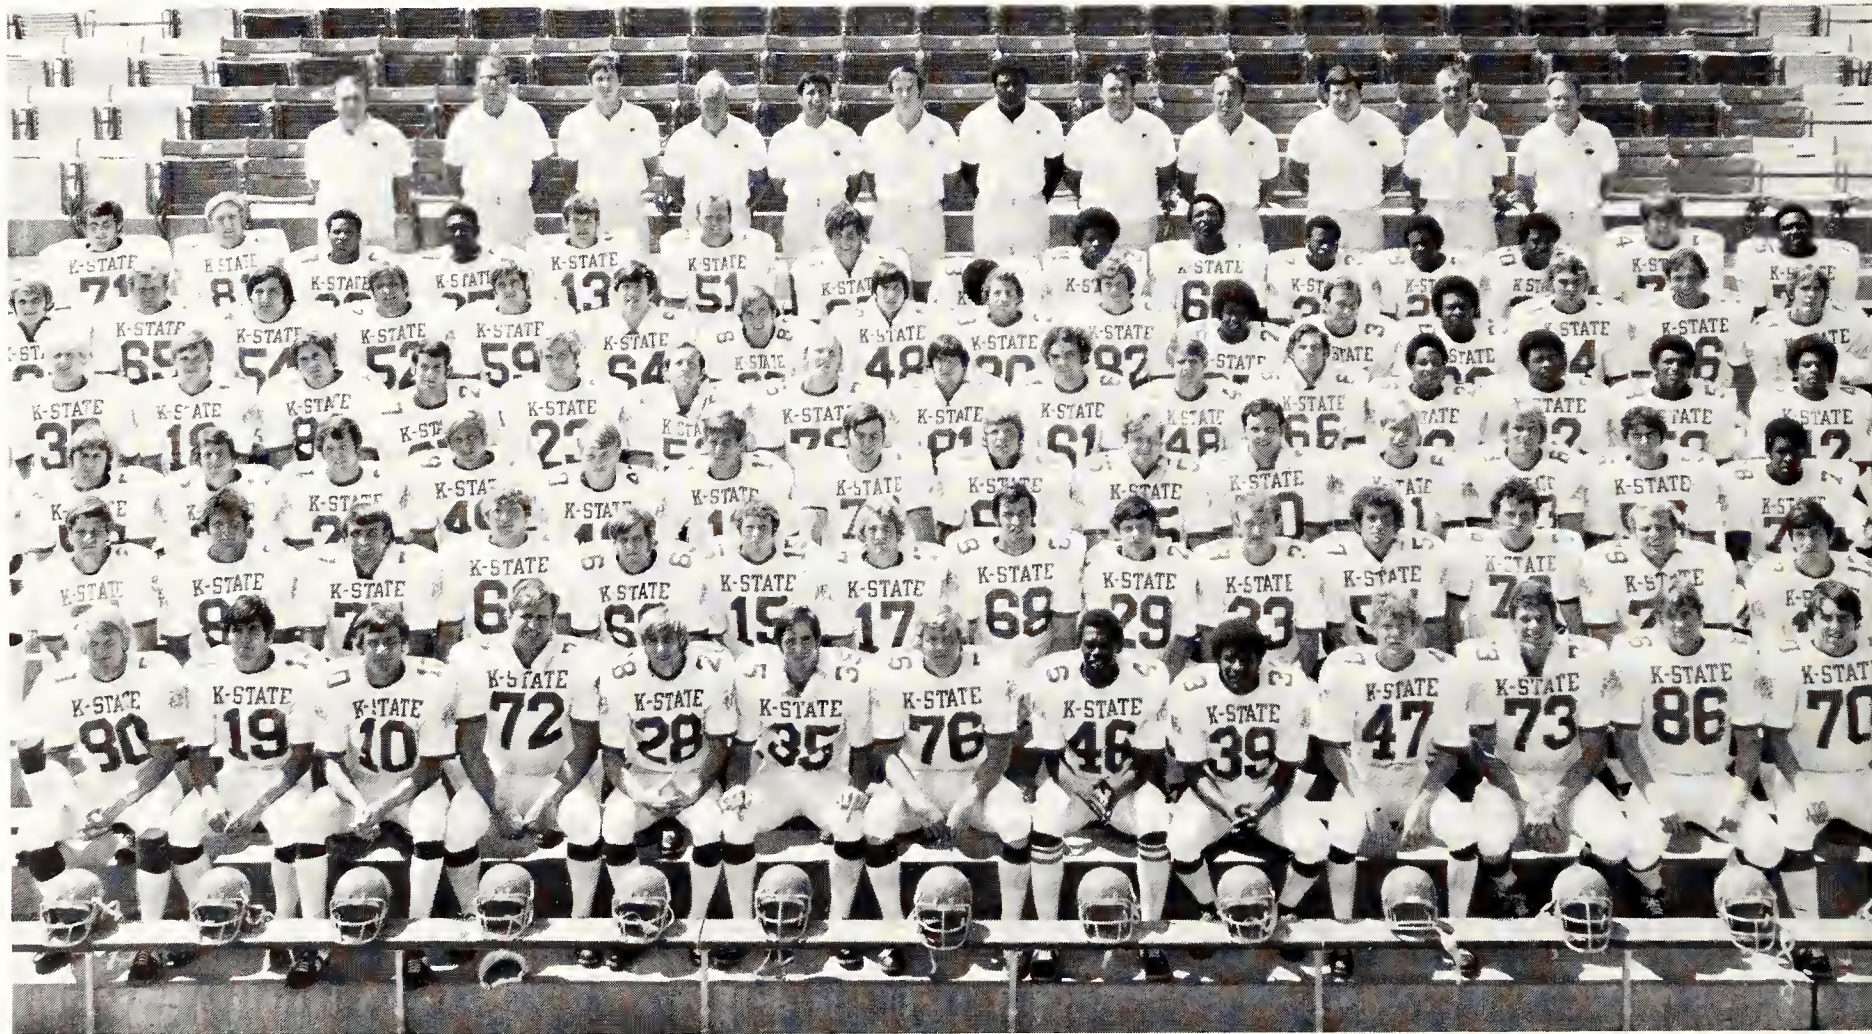

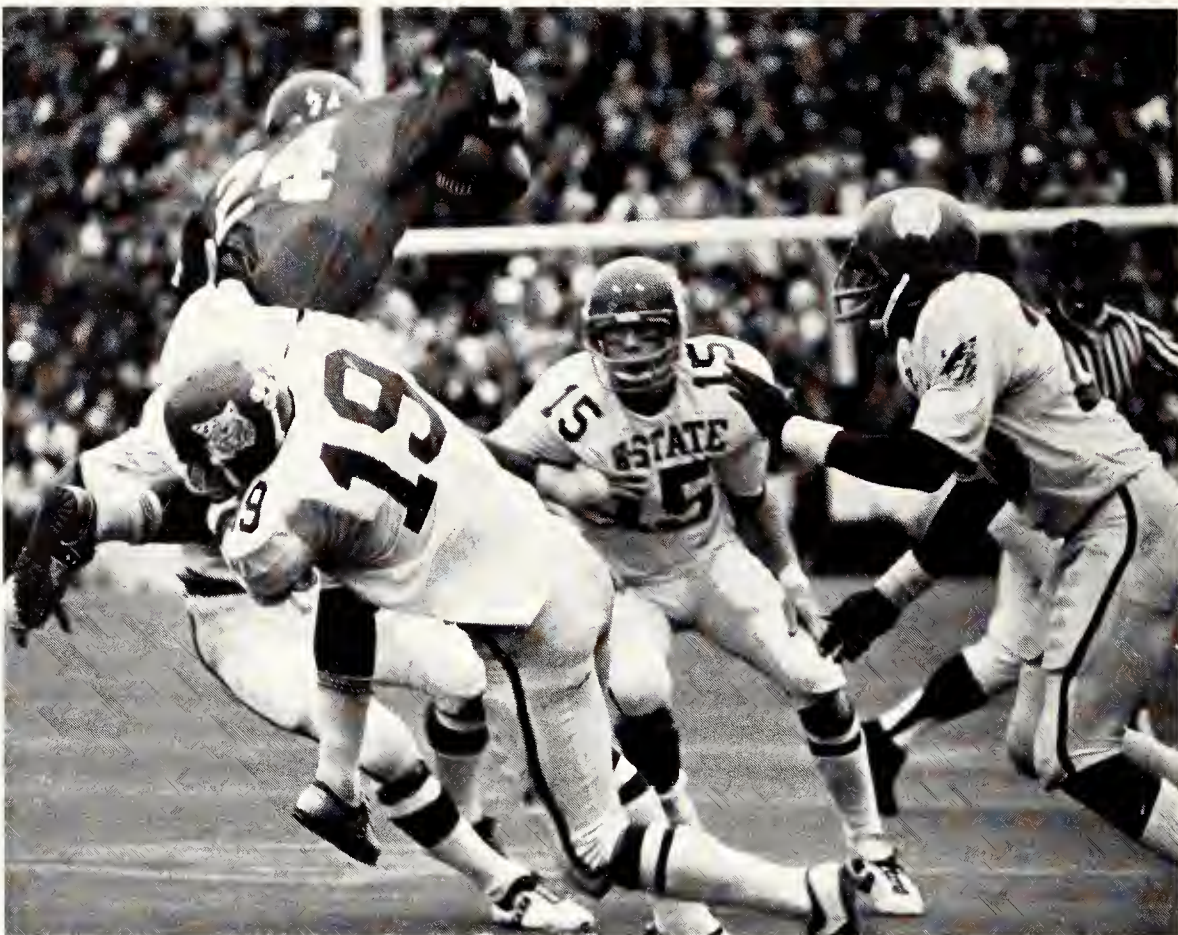

A windy day with gusts up to 30 MPH greeted the fans as they turned out for the annual meeting between Silo Tech and Snob Hill. The University of Kansas came to Manhattan boasting a potent aerial attack and strong ground game, but it was not enough. K-State fought off all the odds and squeaked by with a narrow 20-19 victory. The KU game was the only high point of the season for K-State, and the future did not look promising. The wind which the 'Cats faced against KU was nothing compared to the cyclone which awaited them at Ames.

LEFT: Bill Holman streaks down the sidelines for a big K-State gain. **CENTER LEFT:** The rains came and the umbrellas opened, but the K-State fans stayed to support their team. **FAR LEFT:** Kansas's replacement for injured quarterback David Jaynes is physically introduced to K-State linebacker Wes Jacobs. **MIDDLE LEFT:** Rover Gary Melcher brings down a CU runner. **TOP LEFT:** K-State students celebrate the Wildcat's first touchdown against KU by releasing balloons. **TOP RIGHT:** Steve Grogan fakes and carries the ball around left end, but the junior quarterback loses the ball as he is hit hard by the CU defense. **FAR RIGHT:** Savoring his victory over KU, Coach Vince Gibson expresses the joy of winning.

VARSITY FOOTBALL TEAM—Top Row: Vince Gibson, Dick Peters, Robert Frazier, Bobby Jackson, Jerry Sullivan, Gib Romaine, Frank Falks, Dewey Wade, Gean McDowell, Ted Heath, Don Powell, Joe Madden. Second Row: Bob Brandt, Steve Johnson, Henry Childs, Willie Cuiers, Tim Paulus, Chuck Price, Bert Ottemier, Mike Thompson, Jim Cunningham, Larry Hopkins, Don Calhoun, Josh Washington, Terry Brown, John Wells, Charles Ciarrington. Third Row: Bruce Lester, Paul Steininger, David Hernandez, Steve

Koch, Fred Rothwell, Jeff Wyatt, Mark Gaul, Tom Winchell, Phil Dyke, Monty Sanner, Isaac Jackson, Gust Kulis, Frank Davis, Chris Peterson, Larry Roth. Fourth Row: Don Parham, David Specht, Charles Dietz, Keith Brumley, Bill Holman, Bob Rauscher, Axel Hedberg, Mike Gabel, Wayne Boberg, Bob Kimball, Steve Jadiot, Lindbergh White, Clayton Ferguson, Willone Eubanks, Omar Rahim. Fifth Row: Dave Miller, Ted Stealy, Kevin Vohoska, Mike Sanders, Regan Stelner, Steve Grogan, David Diile, Roger Stucky, Wes

Jacobs, Greg Jones, Chuck Davis, Ron George, Don Lareau, Rickey Gray. Sixth Row: Bus Peterson, Kevin Jones, Bill Brittain, Gary Freeman, Roger Hilton, Gordon Chambliss, Jim Lembright, Jim Hanson, Ron Solt, David Brown, Bob Scott, John O'Leary, Ernie Olson, Lou Agoston. Bottom Row: Joe Brandt, Ron Coppenbarger, Dennis Morrison, Gary Glatz, Ron Kimball, Gary Melcher, Del Acker, Rick Ferguson, Leroy Thomas, John Goerger, Dennis Weinhold, John O'Neill, Steve Eaton.

Coach Vince Gibson—

The 1972 season marked Vince Gibson's sixth year as head football coach at K-State. Since coming to K-State, Gibson has produced eleven all-Big Eight performers, has been chosen as head coach of the 1971 North-South game, and has served as defensive coach for the Blue team in the 1971 Blue-Gray classic. His rebuilding program at K-State won his selection as Coach-of-the-Year in 1969 by the **New York Daily News**.

Gibson has both a bachelor's and master's degree from Florida State University. He has served as head football, basketball and track coach at South Georgia Junior College from 1956-58. From 1959-63 he served as defensive coach at Florida State and then moved to the University of Tennessee where he served as defensive coach until he took over the head coaching job at K-State in 1967.

In Gibson's tenure at K-State he has won 21 games, the most for any K-State coach since A. N. McMillin won 29 games from 1928-33.

Flip of the coin proves an area of 'Cat strength

A fired-up Iowa State football team took the field against the Wildcats in Ames. The Cyclones, behind the running and passing of All-American candidate George Amundson scored on their first two possessions indicating early, for Wildcat fans, the direction the game would take. It appeared as though Iowa State came to play football while K-State was there only to observe as the Cyclones stormed to a 55-22 conference win.

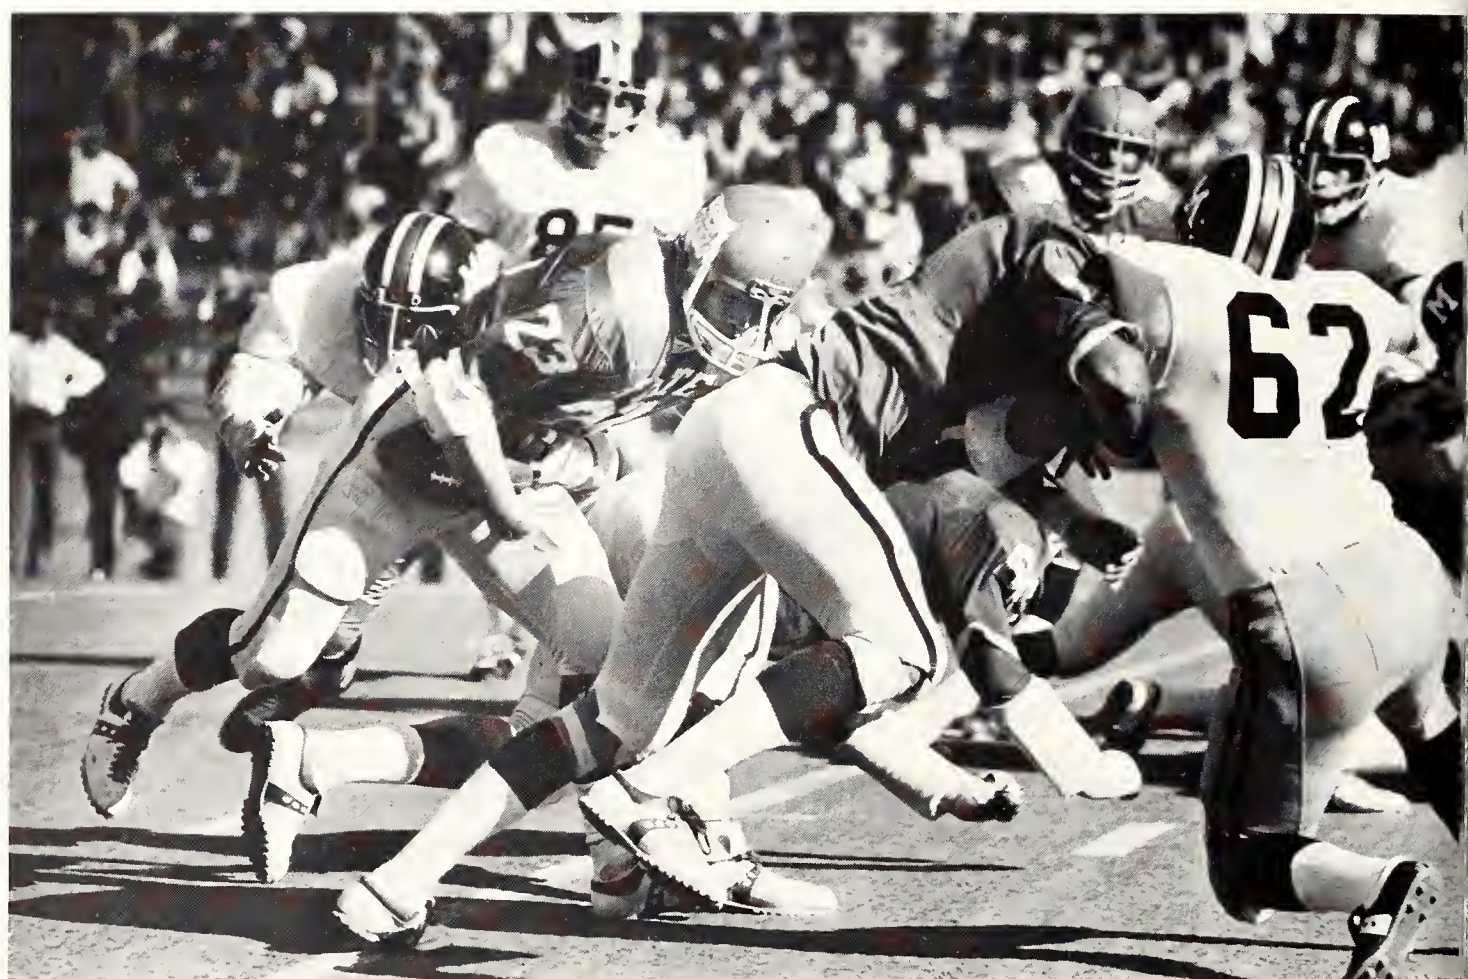

Wildcat football, badly in need of a reprieve, was shown no mercy the following weekend as OU took up where ISU left off, blanking the 'Cats 52-0. Greg Pruitt and company rolled up 677 yards compared to 213 for K-State in dealing the 'Cats their fifth loss in eight starts.

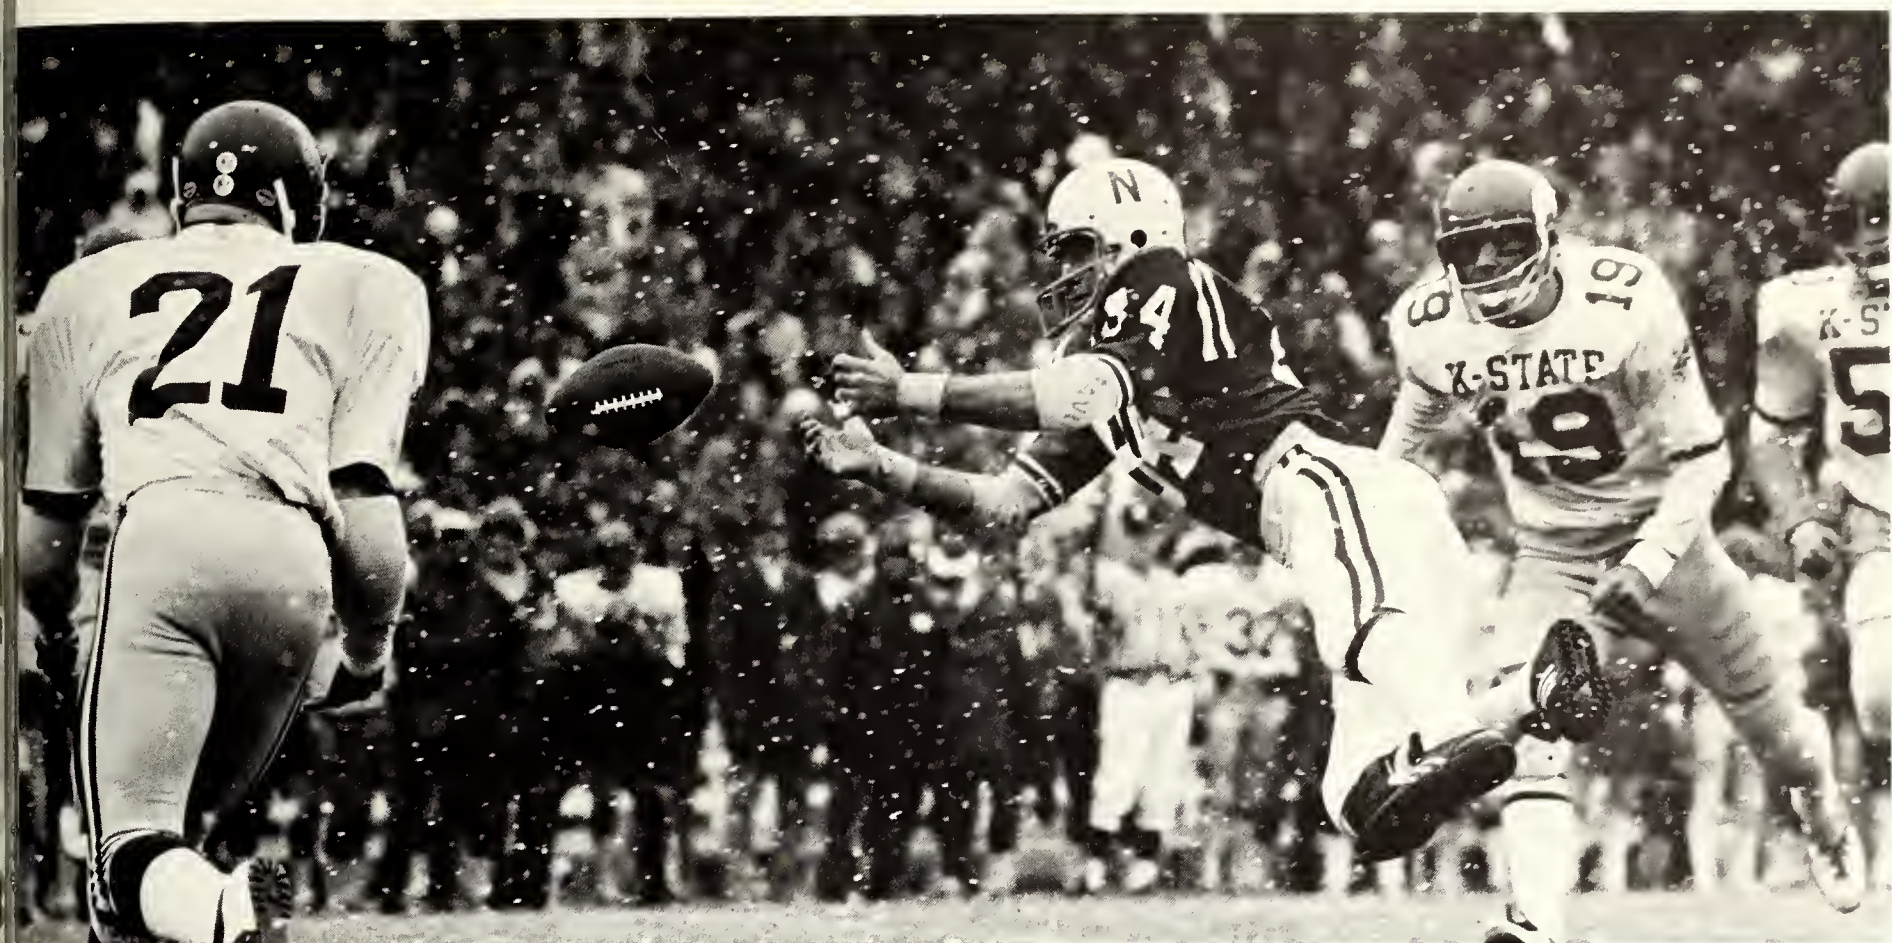

With K-State's record on the losing side, and MU and Nebraska yet to play, wistful talk of "wait until next year" had already begun to circulate among disgruntled fans.

TOP: Coach Gibson expresses the anxiety of the season. **ABOVE LEFT:** Safetyman Ron Coppenbarger makes a crucial tackle against I-State. **ABOVE RIGHT:** Dennis Morrison is hit hard just as he releases a pass. **LEFT:** Don Calhoun follows up front blocking for extra yardage.

RIGHT: Fullback Don Calhoun shows exceptional balance as he dances through Missouri's defensive line. **FAR RIGHT:** Wildcat defensive backs Ron Coppenbarger and Bruce Lester move in to break up a Cornhusker reception. **BOTTOM RIGHT:** The elusive Isaac Jackson finds running room against Nebraska hard to come by. **BOTTOM LEFT:** Behind the blocking of K-State's front line Bill Holman struggles to hold on to the football as well as gain yardage. **BELOW:** A K-State receiver is pulled down from behind after catching an aerial for a short gain.

Football squad's potential fails

K-State continued its quest for the Big Eight cellar as it competed against the University of Missouri. The Tigers were making a habit of upsetting top-ranked teams, but they were unwilling to let the 'Cats do the same thing to them.

K-State was in the game most of the way until a wave of mistakes hit in the fourth quarter. At that point, MU went on the rampage and posted a 31-14 victory over a disheartened Wildcat team.

Oklahoma State University paid a short visit to the K-State campus the following weekend, but the Cowboys stayed just long enough to hand the Wildcats a sound 45-14 thrashing, spoiling the Homecoming day festivities. The game's turn of events brought back memories from past seasons for the alumni present at the game, as the team seemed to lose spirit and desire against OSU. The season was getting longer every week, and the players just wanted to see it end.

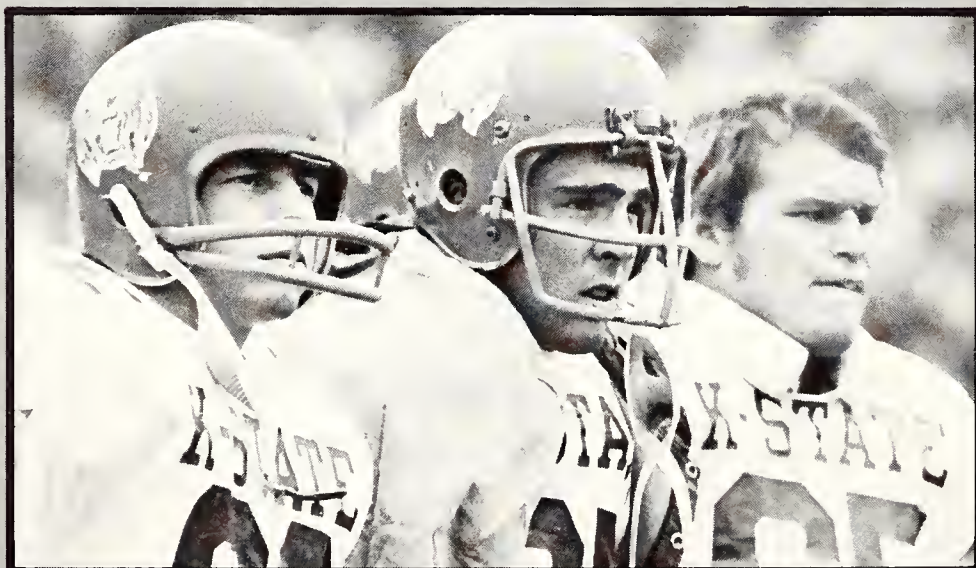

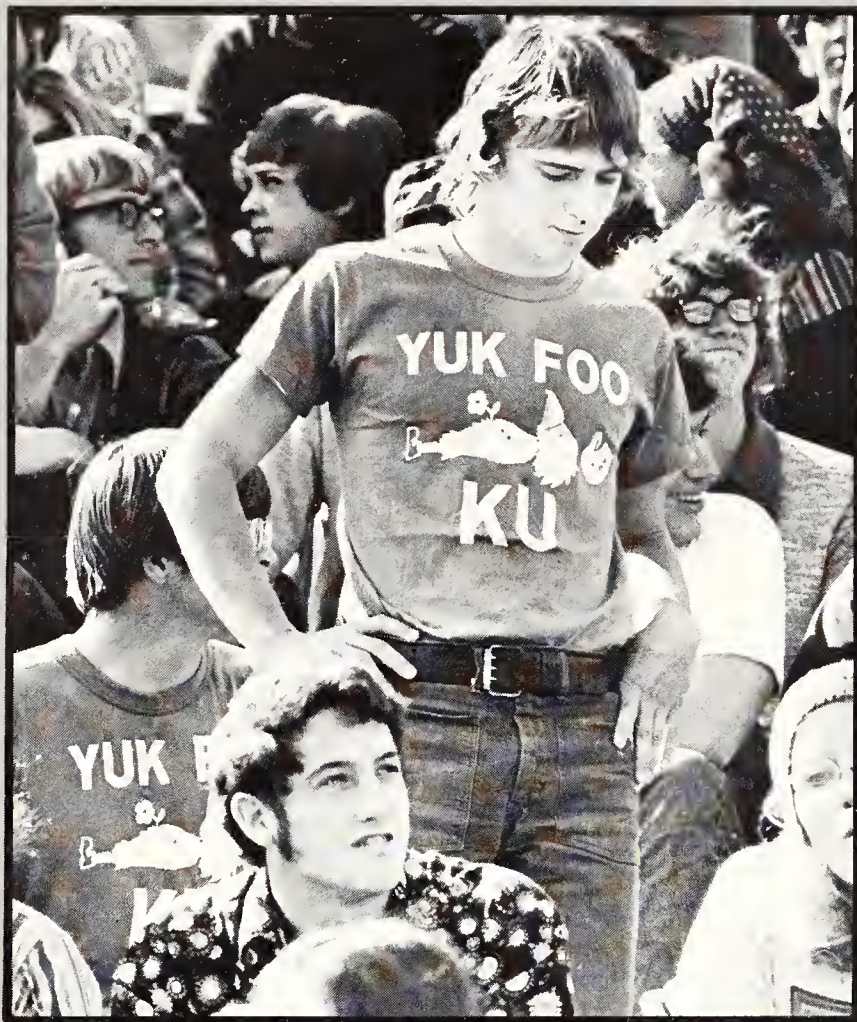

K-State finished out the season in Big Red Country against the Univer-

sity of Nebraska. The 'Cats brought to close a long, hard, and unhappy schedule in their patented losing manner by absorbing a 59-7 defeat at the hands of the Orange Bowl-bound Cornhuskers.

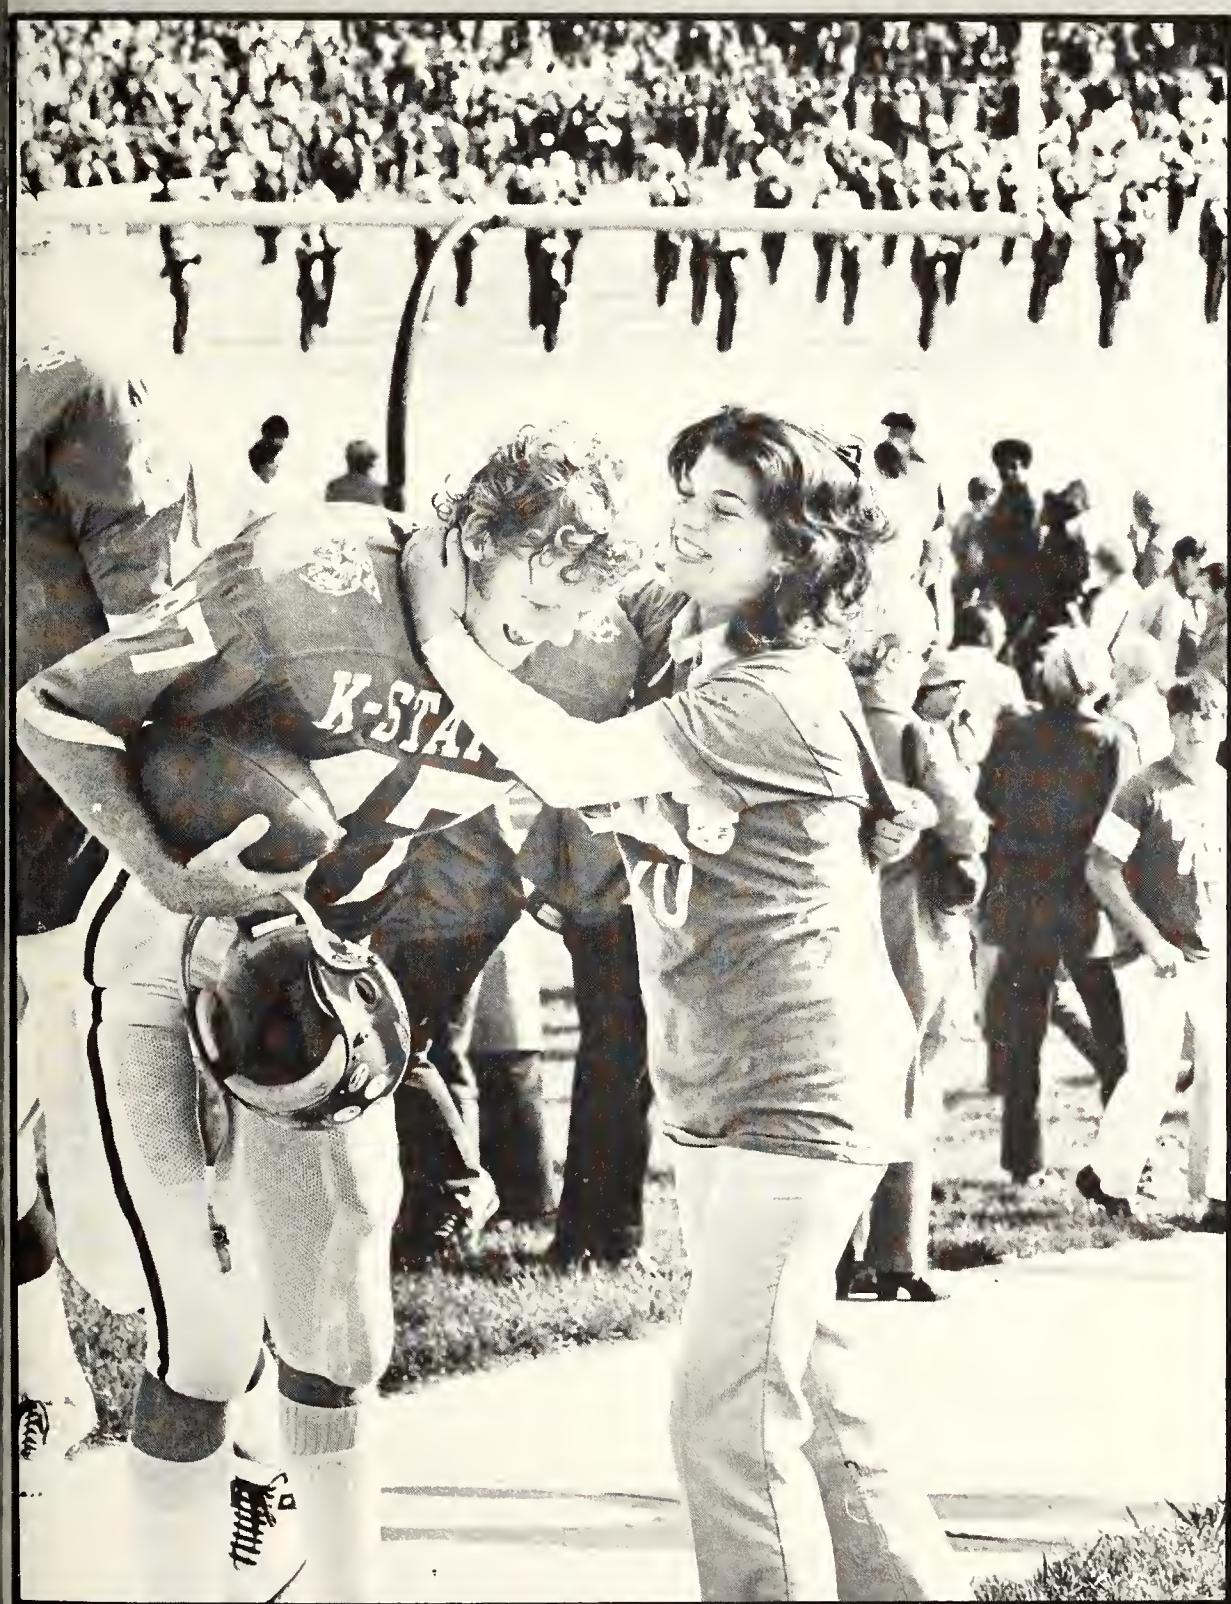

No one can say that K-State was an inconsistent football team in 1972. On the contrary, they were the most consistent losers in the Big Eight. Some consideration must be given to the extremely tough schedule which the team had, but their playing was unusually ragged and lacking in determination throughout the season.

The squad had the potential to be a good football team, but potential does not win games. The season is over and most people are glad that it is. After all, no one, including alums, really believed that Vince Gibson could walk on water.

If looks could tell a season's story . . .

Freshman efforts go unnoticed through season

While K-State's varsity football team struggled to meet the University's expectations, the freshman squad labored, nearly unnoticed, to a repeat of last year's 2-2 season.

Freshman football received almost zero percent of the attention that was given to its older, more sophisticated counterpart. This was largely because the games were held on Friday afternoons in relative obscurity, which was unfortunate. For although many people might have said that the freshmen were no better a team than the varsity, few would have said that they were any worse.

The season got off to a bad start, as the Nebraska freshmen rolled to a 33-10 win in the first game of the year. This loss, although unpleasant,

was nonetheless understandable, for Nebraska is to football as K-State is to pride; they played, and we swallowed.

In the mini-bowl against Kansas, the team survived their erratic, turnover-prone offense to come up with a final touchdown and a victory in a 24-21 contest.

In their next game, the 'Cats completed a sweep of state competition by knocking off Wichita State 21-6 for their second, and last, win.

The short season ended with a narrow defeat at the hands of the Missouri Tigers as the young 'Cats were declawed to the tune of 18-14.

If the freshman records are any indication of the future, one may wonder what's in store for K-State football in years to come. The 2-2

record is as good as any freshman squad has done, and the team was not without some good talent, if yet undeveloped. Still, the season is very easily, and uncomfortably, compared to the varsity's: a close win over the University of Kansas, a big win over a Missouri Valley Conference team, a big loss from the best of the Big Eight, and a close loss from the rest of the Big Eight.

In short, this year's freshman team looked good in some games, bad in others, depending quite naturally, upon the quality of opposition. They have shown that there is room to improve, and they should improve in the years to come. Hopefully, Nebraska and the rest are already as good as they can be.

Coach Ted Heath—

Ted Heath was appointed head freshman coach in January of 1972 after serving as varsity defensive scout in 1971. A native of Beaver Falls, Pennsylvania, Heath attended Western State College in Gunnison, Colo. where he started at tackle for three seasons and graduated in 1964 with a degree in mathematics. He also holds a master's degree in secondary school administration from that institution. Heath spent one season as a line coach at Western State College before moving to Boise, Idaho, to take over coaching duties at Capital High School. After two seasons at Capital High, he spent two seasons at Centerville Community College in Iowa where, in 1969, he coached his team to an 8-2 record and a berth in the El Toro Bowl.

FRESHMAN FOOTBALL TEAM—Top Row: Steve Rankin, Steve Long, Steve Pharr, Coach Gil Cloud, Coach Leroy Dreier, Coach John Stucky, Coach Leo Brouhard, Coach Richard Heath, Coach Cornelius Davis, Coach Pat Fegan, Coach Roy Johansen, Coach Terry Draper, Head Coach Ted Heath. Second Row: Tom King, John Rhoades, Jim Weeden, David Cooper, David Livingston, Greg Whelan, Tom

Mahaffey, Dick Smith, Stan Ross, Mike Taylor, Adolphus Warren, Denny Gragg, Alton Carson. Third Row: Bill Sinovic, Ken Langston, Tim Strathman, James Gorman, Norvel McElroy, Robert Abell, Bill McClintock, Mike Wecker, Kelth Wright, David Lawyer, Mike Collier, Robert Baker, Verdell Jones. Fourth Row: Jim Cleveland, Rocky Osborn, Danny Foushee, Tom Merrifield, Ricky Hoskins, Louis

Wegerer, Kevin Gray, Chuck Hogan, Mark Zier, Matt Birzer, Curtis Hightower, Ike Hayes. Bottom Row: Chuck Wasker, Harold Batdorf, Geoff Naymick, Charles Kilgore, Rick Thompson, Randy Daniel, Gary Petry, Kent Brown, Dennis Hemphill, Tim Wasemiller, Terry Von Elling.

Harriers surpass expectations

Mid morning dawned. Cutting, sub-freezing winds wailed across desolate plains. Looking across Stagg Hill, which was covered with scrubby grass and patches of snow, one could see few trees, few houses and little wildlife.

The only things visible were a few pickup trucks, some colored flags marking portions of a five-mile cross-country course and nervous athletes who were jogging around, preparing to run those five miles.

A comfortable voice from inside one heated truck called out over a loud-speaker: "Three minutes until start. Take off your warmup clothes."

The competitors stripped off wind-breakers and other bulky clothing and moved toward the starting line.

In their motley assortment of bright caps and earmuffs and long underwear beneath their team uniforms, the athletes looked strange, ghostlike, almost comical — like willing victims of a vast practical joke.

The participants had endured months of rigorous training and hard competition. They had run miles and miles every week, pushing and punishing themselves for the private

satisfaction of beating someone else dedicated to the same goals, realizing all the while that the rest of K-State watched the football team.

These runners formed a team which was often apart from other varsity glamour — marching bands, floating Charmin rolls, cheerleaders' yells and shrill crowds.

Now they had reached another summit of running prestige, they toed the line.

Lost in the starting gun's canonade, vanishing footsteps echoed into the grassy knoll . . . just "one more run" had begun.

The "one more run" of Wildcat harriers became a surprisingly successful season far beyond pre-season expectations.

Led by impressive Jeff Schemmel, the young team captured three first place dual-meet finishes along with a second place mark at the Wichita State Triangular Meet.

Disappointment accompanied a fifth place finish at the Big Eight Meet but the harriers rebounded for third place at the NCAA District Meet.

The NCAA championships finished the Wildcats' season when they failed to place in team standings.

Coach William Favrow—

Bill Favrow, assistant cross country coach, is in his seventh season at K-State. A native of Kansas City, Favrow was a track standout at Emporia State Teachers College where he set a record in the 1962 conference meet. He also lettered four years in football and one year in basketball at Emporia.

Favrow came to K-State in 1965. Prior to that time he was a high school coach at Argentine High School in the Kansas City area, and later at Concordia High School.

In addition to his coaching duties Coach Favrow serves as the director of the K-State athletic dormitory.

LEFT: CROSS COUNTRY TEAM — Top Row: Jerome Howe, Ted Settle, John Gilasple, Don Akin, Rick Tyler, Jeff Schemmel, Coach Dodds. Bottom Row: Keith Palmer, Craig McVey, Stuart Collier, Richard Lozano, Chris Perez, John Feltner. **FAR LEFT:** Keith Palmer leads his teammates to victory. **TOP LEFT:** K-State runners are closely grouped far ahead of the rest of the field. **TOP RIGHT:** It's a long five miles to the finish line. **CENTER RIGHT:** Just one more hill and it will all be over. **ABOVE:** Victory makes all the pain worthwhile.

Intramural program transforms sports-shy students into jocks

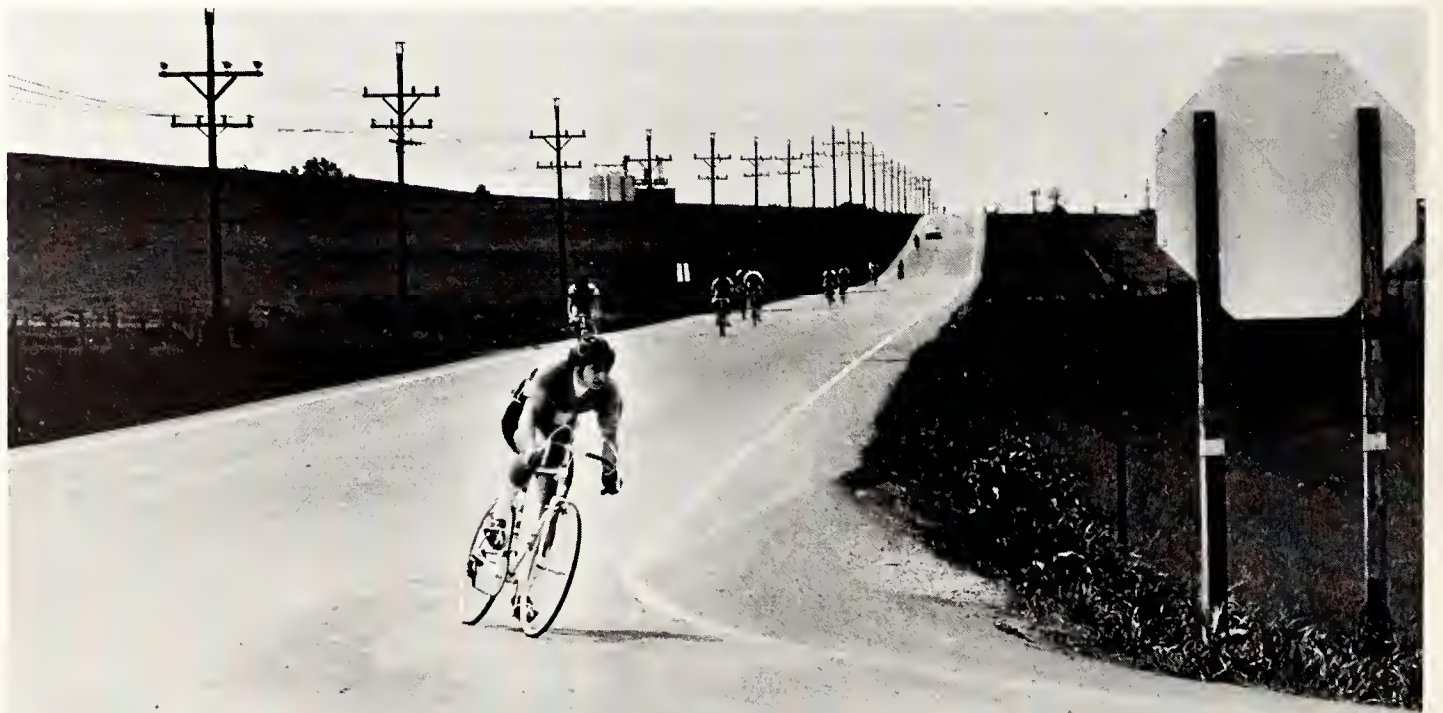

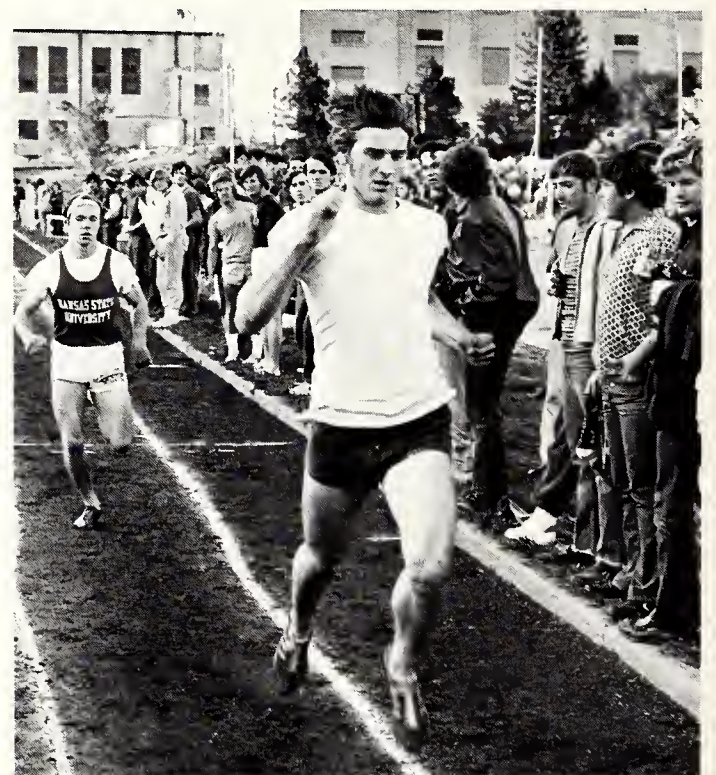

And finally — after all the frustrations of rote learning, quiz-outs, quiz-ins, drop-adds, break-ups, break-outs, dateless nights, rainy afternoons and 7:30 classes — finally at K-State there are intramurals.

When there seems to be time for little else, there is time for intramural sports: time to take a two-mile jog on a cold Saturday morning, time to try one's luck at sports never or long-since played, time to try out the old physique before plunging into an all-nighter, time to force once-limber muscles into positions long-since forgotten and time to seek release from being a mere spectator.

From every intellectual cubbyhole students descend upon the in-

tramural playing fields in a flurry of physical ambition and good intention. People pursue championships the year long with as much determination, reckless abandon and pain as they might pursue a 4.00 GPA.

One talks of Purple Pride. Where is the pride in intramurals? In winning? Possibly the pride lies in making one's body perform in the capacity to which it was once conditioned. Often, that can hurt — switching one's roles from spectator to participant at a moments notice for seemingly no good reason but . . . personal pride? Somewhere there is pride in intramurals, but its only colors are black and blue.

Coed athletic programs expand in participation and support

The stereotype of the female athlete has done little in the past to endear the campus to K-State's women's athletic program. Through the years, however, people have attempted to tear down these prejudices and the prospect of girl "jocks" has become more accepted at long last. This growth has been matched by the increasing support of, and participation in, women's sports at K-State.

The Women's Athletic Department, under the direction of Judy Akers, seeks to offer coeds on cam-

pus a type of inter-collegiate competition that is more advanced than that found in the intramural program. Women compete in seven sports in a state-wide league composed of approximately 14 teams. K-State is usually well represented, particularly in the sports of basketball and field hockey.

With an expanding program and now increasing student acceptance and interest, women's athletics are finally out of the woods and onto the inter-collegiate playing fields of the K-State campus.

ABOVE LEFT: Marvis Fairbanks, Dee Duffy, and Judy Keith of the women's field hockey team take the field for a match with KU. **TOP:** Women's sports coordinator Judy Akers has a conference with the women's basketball team. **ABOVE RIGHT:** K-State's Kay Galle controls the ball against KU. **RIGHT:** K-State's women basketball team sets up a tight zone defense.

Wildcat soccer scores perfect season record

The 1972 fall soccer team continued the winning tradition which has become a trademark of K-State soccer in the past. The team posted a season record of nine wins and no defeats and maintained its position as the winningest sport at K-State. Sweeping through the season with apparent ease, the team displayed the perfection of a Southern Cal football team or a UCLA basketball squad.

The team was led by player-coach Nabil Bokhari along with other stand-out performers Miro Gordon and Luis Rodriguez. The season was highlighted by victories over such perennial soccer powerhouses as Ottawa University 2-0 and Benedictine College 3-2. The team also scored victories over state rivals Fort Hayes State College 8-0 and the University of Kansas 5-3.

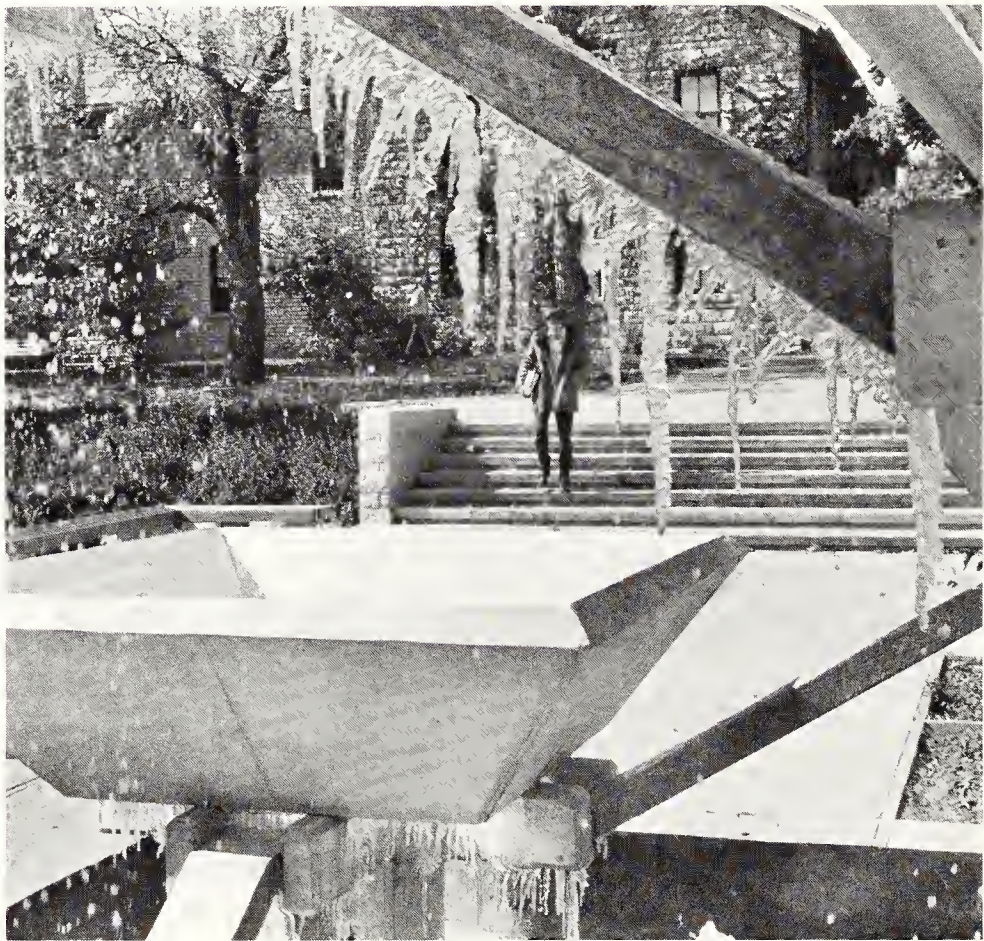

K-State's undefeated season served notice to the rest of the Big Eight that the 'Cats will be definite contenders to regain the Big Eight championship in the spring 1973 season, a position not unfamiliar to K-State soccer teams.

TOP: SOCCER TEAM — Top Row: Nabil Bokhari, Ahmed Kadoum, Jerry Schnack, Mark Noberga, Dennis Cook, Dean Zargortz, Frank Sarouwein, Doug Albers, Earl Parson, Blair Jones, Lester Urban, Ron Cook, Miro Gordan. Bottom Row: Jose Jimenez, Pat

Cassody, Mike Campbell, John Dischman, Scott Bussey, Kanayo Nevanze, Mike Graviano, Fernando Camachio. **ABOVE:** Cutting in front of an opponent to intercept a stray pass, Mark Noberga attempts to move the ball down field for a K-State goal.

WINNER

Frigid winds punish body

By Gail Stajduhar

Your ears ache, your nose is numb,
and your teeth chatter
from the tiny gusts of wind
that push up your sleeves and
sneak through your woollen socks.
You wrap your muffler
around your mouth
in the vain hope
that if you warm the air
before you breathe it,
it won't bite your throat.
Your body heavy
with sweater and boots,
you trudge home.
Home to warmth,
home to light,
home to coffee in the kitchen.
You warm your hands
over an electric range burner,
pretending it's the olden days.
Maybe home
is the best part of winter.

But then there are days—
Days of first snowfalls,
when the sun reflected off the snow
blinds you,
and the smell of winter
stings your nose.
Crystal, glistening days—
When each branch
is a chandelier in the sun,
When each step
is a crunching symphony,
When the world is too beautiful
for frostbite.
Maybe first snowfalls
are the best part of winter.

But in winter you can play—
Winter doesn't have
"for ages 6 to 12"
stamped on the front.
Who cares if there's more of you
off the sled than on?
Zipping down the hill never changes.
So what if your snowman
looks like Moshe Dayan,
or Betty Friedan—
or just a plain snowman.
It's worth it.
The snow feels good in your hands,
and even better in your mouth
when you taste it—
thumbing your nose at radioactivity.
Maybe playing
is the best part of winter.

But then there are nights—
Nights so clear and black
the sky looks
like the inside of your eyelid.
Nights so sharp and starry
your imagination
takes you to distant planets.
Nights so frigid and howling
you shiver in your bed
under five blankets.
Nights so crisp and freezing
it's too cold to be outside,
but the stale air inside
would hurt your lungs more.
Maybe nights
are the best part of winter.

What is the best part of winter—
The coziness of coming home?
The miracle of the first snowfall?
The release in child-like playing?
The mystery of a January night?
Maybe feeling
is the best part of winter.

Scruggs show entrances fans for 10 hours

By Dave Chartrand

On Saturday night, January 20, 8,000 people in Manhattan never went to bed.

The thought never even occurred to them.

Earl Scruggs, his family and all his friends dropped into Ahearn Fieldhouse for a "little get together" and rattled the walls, the audience and the power circuits.

The biggest thing to happen to country and rock music since Doc Watson met Jack Elliott, "Earl Scruggs: His Family and Friends" was a booking agent's dream.

The 10-hour marathon brought the big names as well as the so-called (but nevermore) not-so-big names to K-State.

Joan Baez, the Nitty Gritty Dirt Band, the Byrds and Earl Scruggs were the key ticket-drawers. And rightly so. From "Blowin' in the Wind" to "Foggy Mountain Breakdown," Manhattan saw and heard the classics of rock and country music.

But in music, as in many fields, there are the influential figures who never make the big lights — but just keep making good music.

Doc Watson and Son, David Bromberg, Tracy Nelson and Mother Earth and Ramblin' Jack Elliott were worth standing in line for.

True, set changes and sound mix-ups plagued the entire show; it was almost inevitable.

But the technical foul-ups are scarcely remembered now. What lingers is having been part of an historic evening.

Sleeping would have been such a waste of time. One couldn't have dreamed a better night.

It was that feeling, that weakening feeling, that got to me first.

It's hard to describe, but it was that feeling of despair when I thought I had used my head for a change and gone to the concert two hours early. To beat the crowd.

There'd be no waiting or pushing when the doors opened; the first in line is spared all that. How nice it would be.

And then I saw it. No more than a hundred yards away, it stood there in the street waiting for me.

A snarling, snagged beast stretching from Ahearn Fieldhouse across the street to the Union lawn like a hungry dinosaur trying to chew its way through the doors.

Some 300 people had had the same idea. They all wanted to be first in line. And it was raining! Oh, that sick feeling. It was enough to make me sit down and cry.

But I'm sure it was the SHOW that drove me on. The SHOW.

It was the weeks of anticipation. Like Magellan before he set off around the world, it was the expectation of something historic about to happen.

I kept thinking of the SHOW — of Earl and Doc and Joan and Nitty Gritty.

It was the SHOW.

5:30 p.m. Surely they'll open the doors by 6:30. Surely.

I was alone, which can be a real drag at these things. So I decided I'd watch the people in line. I said to myself, "Why not watch the people in line?"

A guy and a girl were sitting on the sidewalk huddled under a damp blanket. Shaking from the cold, they

just sat there and stared at the wet cement.

A short, skinny guy with waist-length curly hair evidently had misplaced his date, and he walked by crying, "Maria! Maria!"

"What's he doing?" someone queried.

"He must be looking for Maria," came the answer from somewhere behind me.

Then it happened. God, of all times, too. I usually get it only on long bus rides or sitting through triple feature drive-in movies. My back started aching.

I prayed I was imagining things. But the little gem started working its way up my spine like a hot needle.

It was 6:15 p.m.

My toes were frozen numb, and I had lost all contact with my feet. The tops of my boots had collected puddles of cold rain water.

"Open the goddamn door!" one impatient soul bellowed.

Just then a big, bearded fellow stuck a short, stubby cigarette in my hand. Or at least it looked like a cigarette. But I wasn't sure. It smelled terrible.

"Go on, take a drag. No one's looking," he said.

"Sorry, I'm a pipe man, myself," I replied.

The crowd was getting edgy. I was getting starved. I remembered I had a pack of Juicy Fruit and some Life Savers in my pocket. It wasn't much, but I went berserk with joy.

You stand in line for two hours and see if you don't act a little mazzo.

My backache was taking its toll. I was just about to pass out when a girl next to me decided to raise

her umbrella and poked me in the neck.

"Maria! Maria!"

He was **still** looking for Maria.

A black two-door drove up on the grass, and Doc Watson stepped out.

Scattered applause and cheering went up as Doc and his son plodded through the mud and out of sight.

By now my Life Savers had spilled out inside my pocket. That depressed me terribly.

I began to amuse myself by reaching down for a Life Saver and trying to guess what flavor it was.

Then it happened. A flash of light as the doors swung open.

Everyone panicked and rushed the doors at once. The whole line sucked together like one mashed meatball.

Somehow I got turned around. My hands were still in my pockets clutching my Life Savers.

Wedged between about five pairs of shoulders, I was being carried backwards toward the doors. My feet weren't even touching ground.

I just closed my eyes and let the crowd carry me. For a moment I even thought of the curly-haired guy who had lost his date.

But I made it. I finally passed through the doors. I handed my ticket to someone — I think.

It was such a good feeling to get inside. A warm feeling. And an even better feeling as I grabbed a seat, because sitting right next to me was the curly-haired guy.

And there she was, soaked and shaking, her head on his shoulder.

"Maria," he scolded, "I thought I'd never find you."

Winter news—

Political activity dominated both national and local news during the winter of 1973:

— President Richard Nixon announced the end of the Vietnam conflict on Jan. 23. However, Manhattan didn't receive the news via television because WIBW-TV continued to broadcast the K-State/KU basket-

ball game during Nixon's speech.

— "Earl Scruggs: His Family and Friends" sponsored by Union Program Council captivated 8,000 fans during a 10-hour concert in Ahearn Fieldhouse Jan. 20.

— Near the first of the year, two former Presidents, Harry Truman and Lyndon Johnson, died within one month of each other.

— Crippling winter snow and ice storms froze Kansas highways and student spirits during December and January.

— K-State's Wildcats defeated KU and Iowa State, a record three times during the season and captured a second consecutive Big Eight title.

— A new NCAA eligibility rule went into effect which stated that a player need only a 1.6 GPA to compete in varsity sports.

— The U.S. Supreme Court ruled that abortion before the third month of pregnancy is legal.

— Students turned out in unusually large numbers to vote for two referendums on the SGA ballot. They voted two to one against a proposed recreational complex and overwhelmingly in favor of the **Royal Purple** receiving student activity funds.

— John Ronnau, student body president, resigned before his term was officially over; Senate Chairman Steve Doering took his place until Joe Knopp was elected president.

Anniversary—

Pershing Rifles, a campus military drill and service organization open to army and air force ROTC men, was to celebrate its 25th anniversary in April.

General John Pershing founded company "A" of the National Society of Pershing Rifles in 1892 at the University of Nebraska at Lincoln.

K-State's company, G-7, was founded in April 1948.

G-7's exhibition team took first place in regimental competition from 1969-71, while its standard team took second place in 1970 and first place in 1971.

The coed affiliates of Pershing Rifles (Caper) was founded national-

ly in 1967. K-State's company, Wild Kattettes, supports itself through money-making projects so that the group may participate in drill competitions. This year it was to go to Myrtle Beach, S.C. in March for the national drill competition.

Women—

A committee to "review the roles, needs and opportunities" of women at K-State was appointed by President James A. McCain in November 1971.

This Commission on the Status of Women is composed of about 20 faculty members, classified employees and students and meets

once a week. It is divided into subcommittees on women faculty, part-time faculty, classified employees and students plus a legal and executive committee.

Out of the commission came the Affirmative Action Office, directed by Dorothy Thompson.

The office developed a university-wide Affirmative Action Plan required by the Department of Health, Education and Welfare. HEW's guidelines called for an examination of the University personnel structure to see if there were "patterns of discrimination and to take affirmative action to see that these inequalities be abolished."

The commission's subcommittees assisted in the development of the final plan by continuing research and submitting proposals and recommendations.

Guitarist—

Narciso Yepes, Spanish guitarist, introduced Chamber Music Series patrons to the amazing versatility of the ten-string guitar in a two-hour performance Dec. 8 in the KSU Auditorium.

Yepes, noted for his researching of forgotten manuscripts of the 16th and 17th centuries, designed his instrument for performing Renaissance and Baroque music written originally for the lute.

The Bartok Quartet from Hungary performed Jan. 22.

Named after the late composer of Hungary's national classical idiom, the quartet played pieces by Beethoven, Mozart and Bartok impeccably.

The ensemble, consisting of two violins, a viola and a cello, achieved a harpsichord effect by plucking and rolling each chord separately during Bartok's "Quartet No. 5 (1934)."

The Alma Trio, a piano, violin and cello ensemble from the United States performed March 5 in the final concert of the 1972-73 Chamber Music Series. The group performed Beethoven's "Ghost Trio," Ravel's "Trio in A Minor" and Schubert's "Trio in E Flat Minor," for a small but appreciative audience in closing out the 13th season of the Chamber Music Series.

One-act plays—

Conventional themes and experimental formats characterized the winter season of K-State's Original One-Act Play Program. The three plays, presented Nov. 30-Dec. 2 in the Purple Masque Theatre, dealt with the familiar topics of youth, absurdity and loneliness.

P.E. concepts—

Physical education is changing at K-State by shifting the emphasis from team sports to lifetime sports. Most of this is due to the efforts of Charles Corbin, head of the physical education department. He is the senior author of "Concepts in Physical Education," a handbook that has been adopted by more than 100 schools in the last two years.

This fall 800 freshmen enrolled in Concepts of Physical Education. They attended seven lectures and 14 lab sessions. The lectures covered the theories of heart disease, how exercise affects the heart and blood vessels, obesity and different types of diets, body mechanics and how the body handles stress.

The lab sessions explained what the different exercise programs involved and how to do them properly.

Next semester, freshmen are to choose a sport they can enjoy all their lives. These include such things as scuba diving, synchronized swimming, water skiing, hiking, camping, angling, cycling and folk dancing.

"In a recent study by B. C. Bruner, it was noted that 63 percent of the people interviewed felt that the exercises they had learned as children and young adults were not applicable for them as adults," Corbin said.

His program offers a wide choice of lifetime activities that will allow students to get and keep physically fit. Most people want to keep in shape but just don't know how to go about it, Corbin said.

K-State's program doesn't impose a regimen on anyone. Instead, it challenges each student to make his or her own decision as to what type of exercise or activity he pursues as a lifetime sport.

"The Death of Cato," by Mark Edwards, graduate in speech, poked fun at egotistic intellectualism. Rick Brown, senior in speech, stole the show with his portrayal of the comically deranged Cato.

Other works featured on this bill were "Dandelion Seeds," by David Retter, former K-State student and "Terminal Cases," by Frank Rizzo, a University of Arizona student.

"Looking Glass," a bill of one-act plays presented Feb. 14-17, was designed as "a collection, not a catalogue," according to Joel Climenhaga, a director of the student playwrighting program.

The title symbolized the students' desire to create a reflection of three contrasting views of reality within the evening's presentation. Another in-

novation adopted by the students working on this production was the idea of performing as a company — with playwrights, directors and actors intermingling their traditional roles to create a feeling of unity within the group.

"The Play — Played Forever," by Mary Siegle, senior in speech, used a musical revue format to explore relationships between men and women throughout history.

"Where Charity and Love Prevail," by Charles Euston, junior in speech, probed a communication problem between a high school student and his parochial school teacher.

"Let Me Entertain You," by Kathy Showalter, senior in speech, raised questions about people's reasons for hiding behind false self-images.

Awareness—

"The purpose of Black Awareness is to make the University aware of Black life by means of educational and entertaining activities," Becky Chinn, chairwoman of Black Awareness programs, said.

Awareness activities included a gospel choir from Chicago and a Black business exposition day featuring as guest speaker James Woodson, lawyer and president of the Corrugated Box Company.

A Black student Speak-Out in the Union and a panel discussion con-

cerning business fields open to Blacks were also featured.

Ms. Chinn added that programs were to be scheduled for the entire semester rather than including them all in one week's time as had been done in previous years. This should allow for greater flexibility in programming and should give students a chance to attend more activities concerning Black Awareness during the semester, she said.

SGA elections satisfy drama-starved voters

By Dave Chartrand

For those feisty types who get excited about the fit and fever of the debates and campaign speeches that accompany public elections, it was a very good year.

For if November did not satiate one's hunger for political melodrama, February's SGA elections surely did.

A proposed \$4.5 million dollar recreation complex, the fate of the Royal Purple and the image of Student Senate caused fireworks from the word "vote."

And the record total of 4,660 voters was quite a contrast to the apathy and indifference that has characterized past SGA elections.

Only a deaf and blind person would not have known about all the commotion surrounding Rec '73, the proposed mammoth recreation complex which came to a referendum vote on February 7. But the matter was clearly settled, for the

time being at least, when the nays doubled the yeas.

The K-State yearbook, the **Royal Purple**, was also on the referendum chopping block with its staff members pleading for an addition of 67 cents to the Student Publications line item which would pump a little life back into the already pallid pocketbook of the RP.

The voter decision was a resounding "yes."

The two referenda may have been the main attraction, but the Student Senate elections didn't play second fiddle.

A record 73 candidates vying for some 50 positions jammed the ballots, not to mention the campus trees and bulletin boards with political posters.

But the image of senate in general seemed to be the issue at stake, and that image rapidly became the battleground for the four candidates

for student body president.

Dana Brewer, David (Levi) Strauss, Joe Knopp and write-in candidate Rick Ellis offered four, if not distinct, at least curiously varying, options for a "new look" in senate.

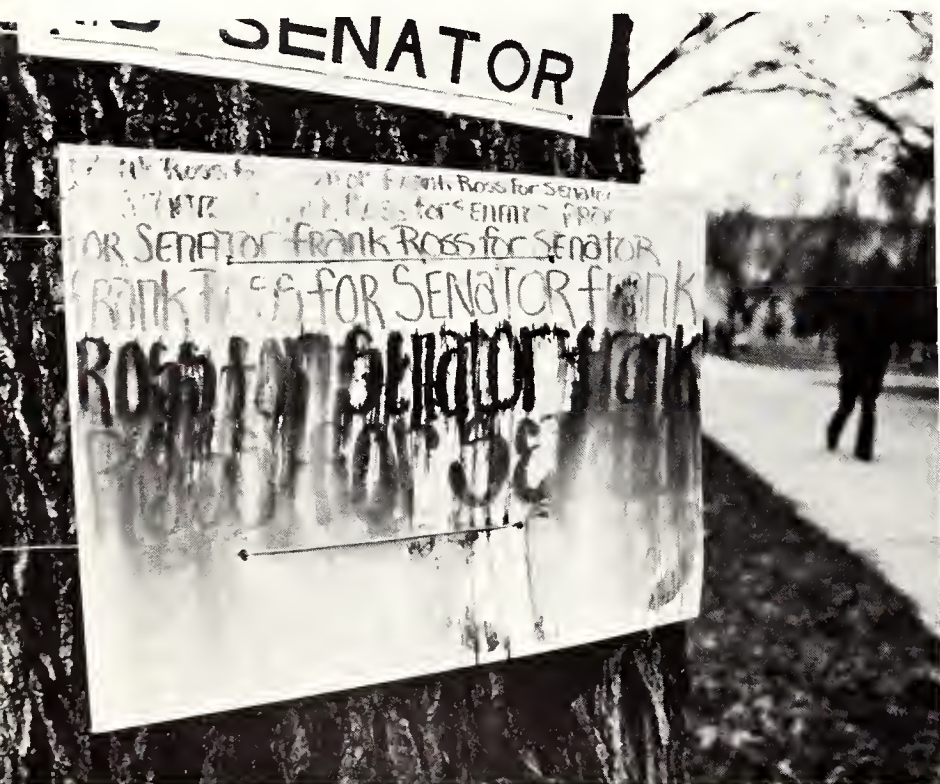

The choices proved a little too confusing as the four contenders each drew enough votes to force a run-off bout between Knopp and Brewer.

And two days later, Brewer, citing Knopp's winning of 46 percent of the original votes, conceded the race.

Seldom are voters asked to decide as much as were K-Staters on February 7.

But then seldom is a body subjected to as much criticism and scorn as was Student Senate during the campaign weeks of 1973.

The candidates were pointing to a change — the students were praying for it.

International talent spotlighted

By Jan Paschal

International talent from both sides of the Atlantic was featured throughout the winter segment of K-State's Auditorium Series.

The Eleo Pomare Dance Company, a predominantly Black American dance troupe, dazzled a large audience with its stark, unconventional choreography and dramatic stage production Dec. 1.

Combining contemporary Black jazz movements with traditional ballet and African dance forms, the troupe portrayed the sadness of a slave auction, the joy of a Congolese Roman Catholic Mass and the depression of man-woman blues. Swirling white robes, turbans and strobe lighting dramatized "Radiance in the Dark" and "Narcissus Rising."

The Romeros, a family of Spanish guitarists, presented a virtuoso performance Jan. 21. Founded by Celedonio Romero, father of the three other Romeros, the quartet demonstrated the intricacies of 18th and 19th century classical guitar music.

The Czechoslovakian State Orchestra literally warmed up the audience and brought it to its feet with performances of Mozart's "Prague" Symphony and Dvorak's

"New World" Symphony Feb. 14. Vaclav Hudecek, 20-year-old violin soloist, received an individual standing ovation after playing Tchaikovsky's "Violin Concerto in D Major."

Two one-act operas, "Trouble in Tahiti," and "Cavalleria Rusticana," were presented Feb. 20, 21, 23 and 24 as a joint production by K-State's Departments of Music and Speech.

Nancy Higbee and Jeff Williams, both seniors in music, played a young suburban couple experiencing marital problems in Leonard Bernstein's "Trouble in Tahiti."

Jerry Langenkamp, director of Opera Theatre, Jean Sloop, assistant professor of music, and Stephanie Kinney, graduate student in music, sang the roles of the love triangle in "Cavalleria Rusticana," a 19th century Sicilian melodrama by Pietro Mascagni.

The Vienna Boy's Choir performed before a sell-out audience March 4 in the concluding concert of the 1972-73 Auditorium Series. The choir delighted K-State audiences by singing selections from the 15th and 16th centuries and romantic era in addition to presenting a one-act comedy opera, "Tales From Old Vienna," by Johann Strauss.

Some forty days. Think of it. Between the time students went home for Christmas break and the time the drop-add lines for second semester had begun to thin out, the world had changed faces.

Two former Presidents had died, the current chief had begun a second term, half the Midwest had gone to its knees under a crippling ice storm, Earl Scruggs had put Manhattan on the map . . . and, oh yeah, the war ended.

Remember?

Well, someone forgot. Someone didn't even notice. Surely somebody forgot to turn on the radio one day and never heard the news.

Even the newspaper people goofed.

They forgot to run the stories and pictures of parades and ticker-tape flying. The President forgot to declare a national day of rejoicing.

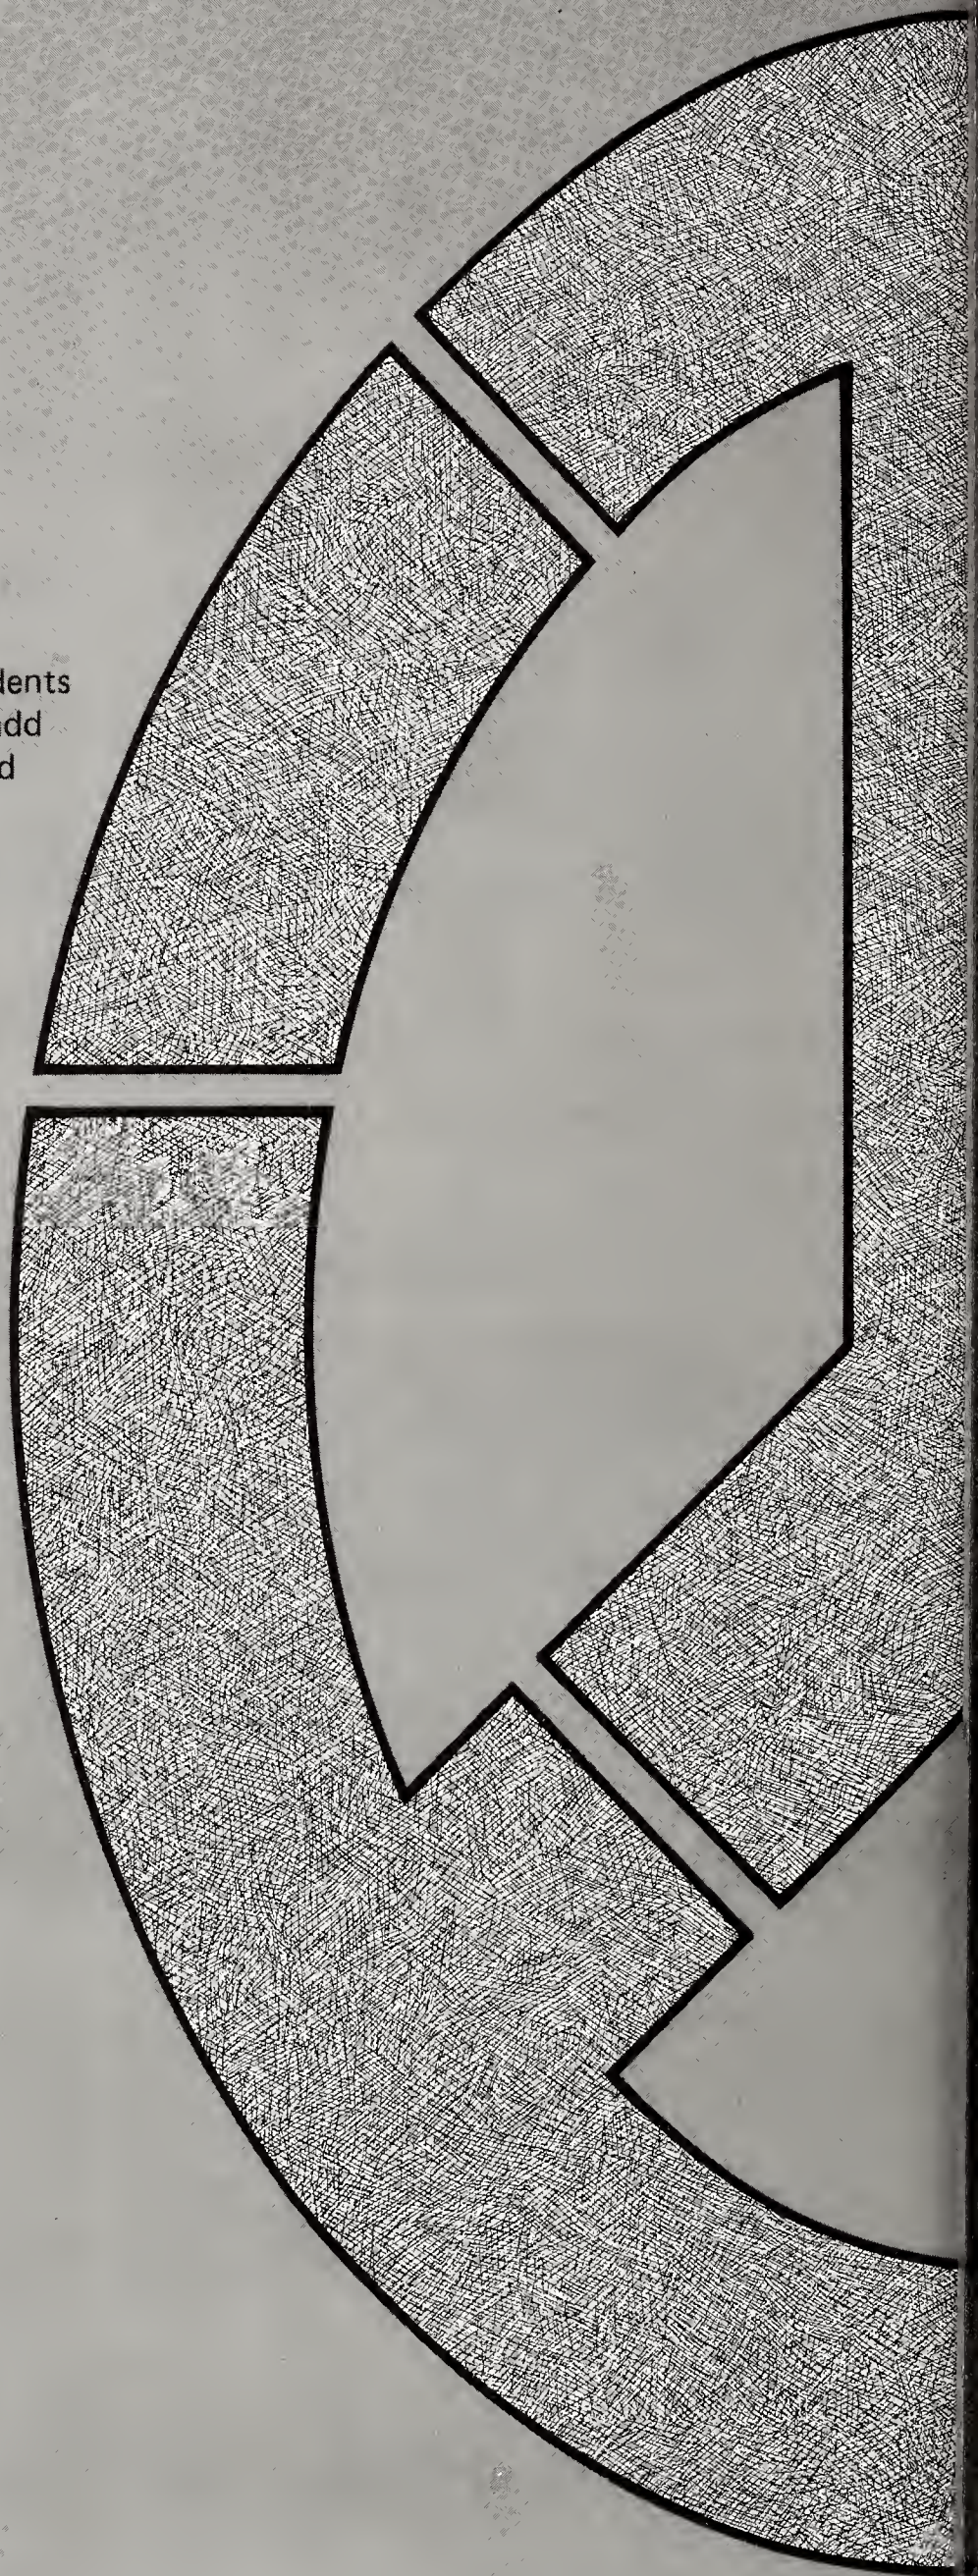

Children forgot to dance on rooftops and cheer from street corners.

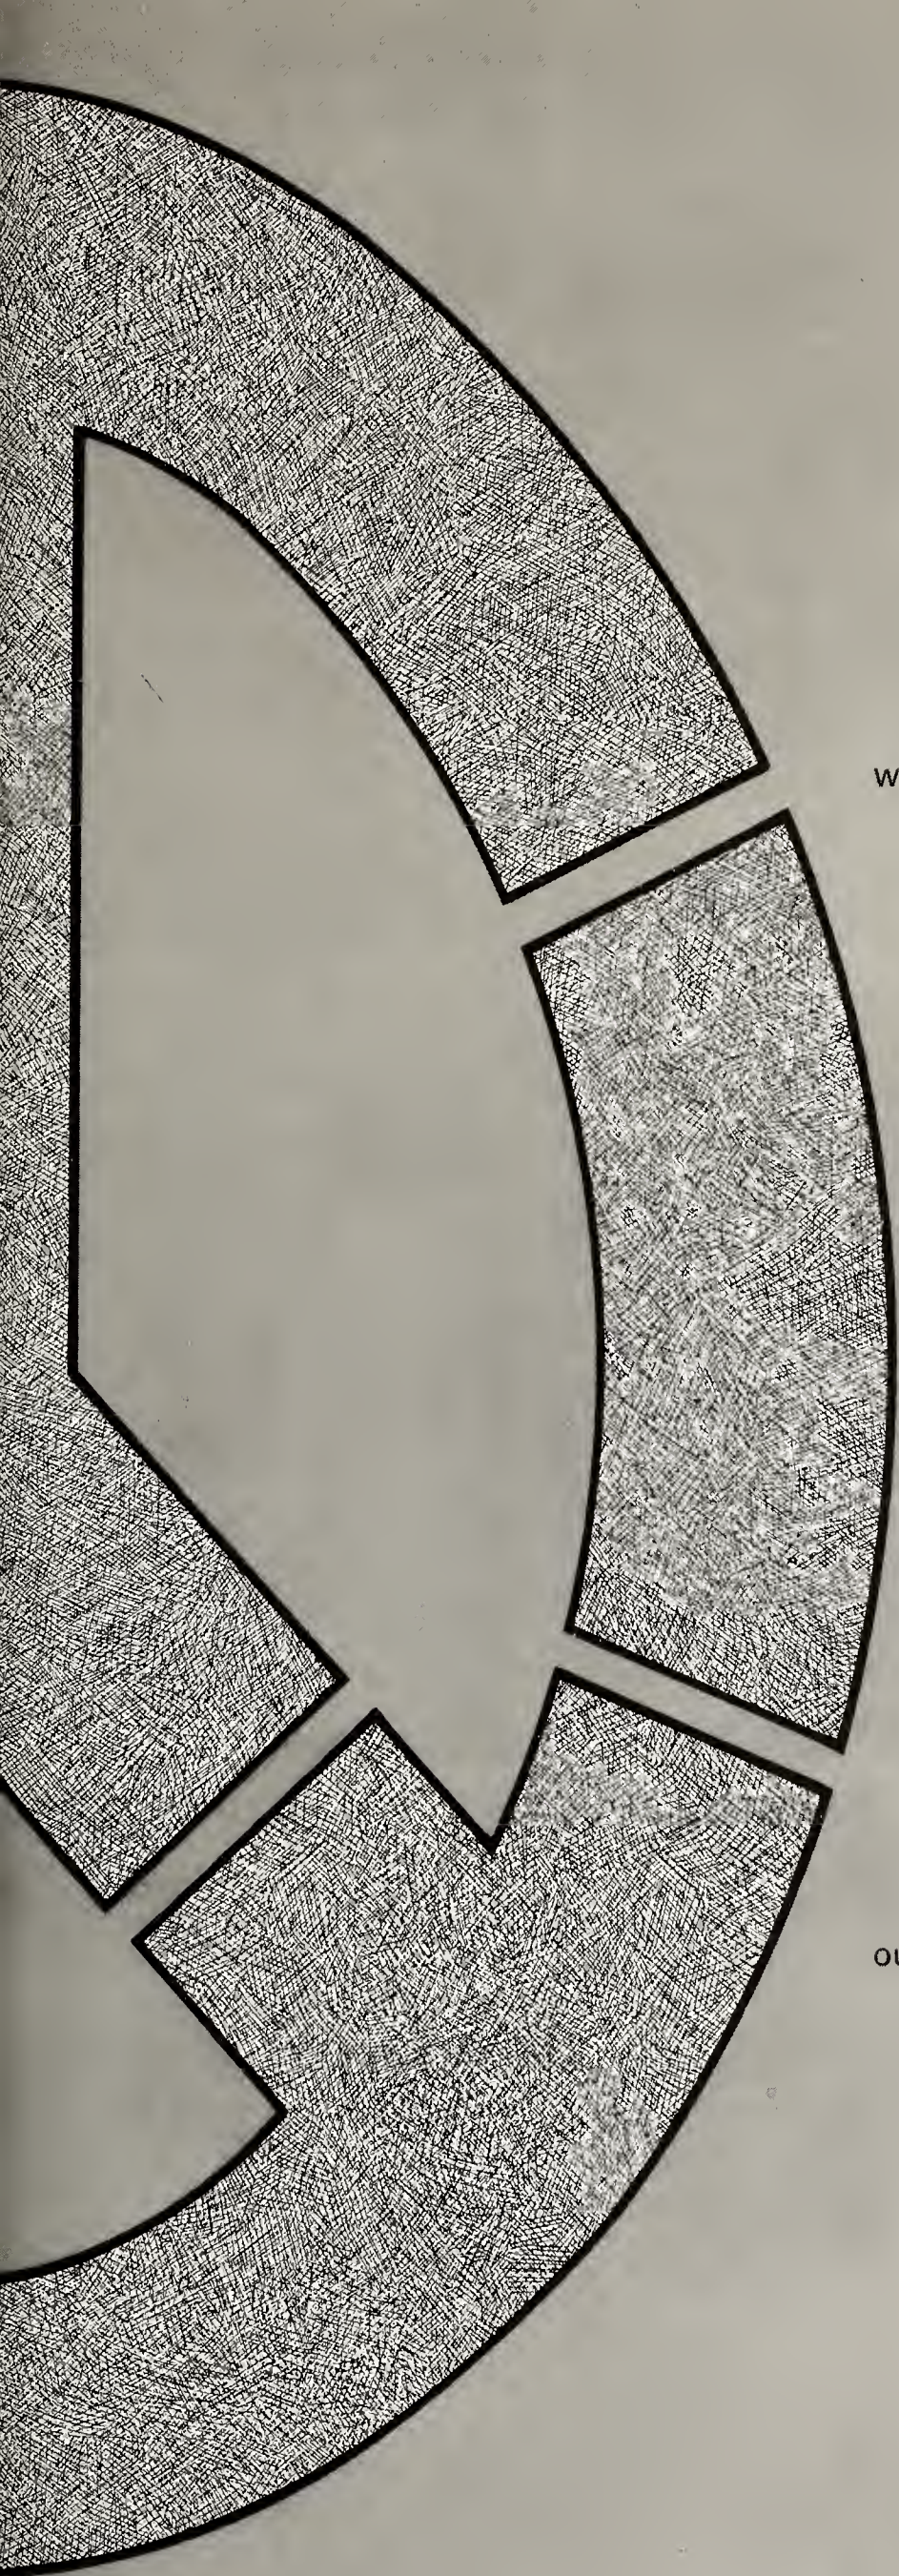

The end must have come too late for the pomp and pageantry.

Two years ago the cease-fire announcement would have rocked the world. Instead it just rippled the water.

A war that engulfed college campuses in turmoil, sprayed bitterness and distrust throughout our government and our people and snuffed out thousands of young lives—and it bowed out with about as much ebullience as the World Series. Really hard to believe.

But not so hard to explain.

Weariness. That's what it was. A weary ending to a weary war.

Like an over-written play, Vietnam dragged out so long that people were too tired to jump up and down and hug each other when the curtain finally closed.

The bickering and the bombs had taken their toll. The American public was emotionally drained and fatigued by the puzzle of Vietnam.

And from weariness came mistrust.

People had heard the word "peace" too many times. Like the boy who cried "wolf," Kissinger had falsely raised the public's hopes once too often. The only thing "at hand" was despair.

And even when peace came, it didn't really come.

They said the guns had stopped, but soldiers kept dying. They said an "agreement" had been reached, but presidents and premiers still argued. And they promised the prisoners were coming home, but fatherless children waited in vain.

Yes, that's why Vietnam went out as tacitly as it came in. No one knew what was happening. Most of all, no one believed anything could be happening.

But it finally did. Really.

Somewhere out there is a parade waiting to march. There are banners to be waved and tears of joy that need to be shed. There are hurrahs and whoopees that have lost their ways.

And until they are found, Vietnam—in our hearts and our history books—will stay an unfinished sentence.

“Eat ‘em up” squad excites fans, finds release in cheerleading

By Jim Hastings

When you see eight girls on the Ahearn basketball court, gyrating to the tune of Wabash Cannonball, you can tell they aren't just a group of weird fans.

When eight guys begin to do back flips in front of the fans, you know they didn't come to the stadium just to see the game.

These are the K-State cheerleaders.

Cheerleaders are special. If you've ever talked to one, you know; if you haven't, you just might have missed something.

First, they are friendly. Sure, a lot of people are friendly, but somehow these people are easier to get close to — easier to know.

Second, they love what they do and put a spirit into it that many activities can't boast. Cheerleading provides more than just prestige and a chance to yell; it's an outlet for the cheerleaders, too.

In fact, according to Karen Schumacher, “Cheering isn't always done for the crowd. We get involved and don't hear them.” Cheering is a release of tension after the pre-game build-up.

The consensus was that each cheerleader wanted to do more than sit in the stands.

“You just can't sit still when you're trapped up there in the stands,” Patty McDonnell said.

Pertaining to the crowd, the cheerleaders say they feel fans don't notice them much.

“They look at the guys tumbling as a kind of entertainment,” Steve White said.

“They'd probably miss us if we weren't there,” Sandi Bell added.

Cheerleading isn't easy, nor is it safe. This year's injury list includes: a broken arm, a broken foot, two sprained ankles, one person with neck trouble and three with back problems.

Most accidents occur during practice in the Union's main ballroom. But at games people throw things — oranges, cans, rocks, bottles and

rolls and rolls of toilet paper.

What happens on trips when the group isn't cheering at a game? A hundred different things were mentioned, but most of the group recalled the football trip to Arizona as the most interesting.

Included in that trip were a side-trip to Mexico and “tubing” down the river.

During the trip to Utah, the cheerleaders found themselves in Mormon country. Mormons don't smoke or wear their hair long, so KSU's pride got some long, not-so-friendly stares.

At home, the 50's Pep Rally, for which everyone dressed up in old, faded uniforms, was also a favorite.

When the Jayhawks came to Manhattan, one of their pom pon girls stayed with one of ours. Somehow a wildcat was sewn on one of the KU players' uniforms and wasn't found until game time.

Did anything embarrassing ever happen while the cheerleading squad was on the road? Still another jumble of voices, most of them talking about Gary Buser. As Willie the Wildcat, he wrecked his bicycle on the sidelines at the Colorado football game.

K-State's cheerleaders were chosen by judges from the National Cheerleaders' Organization; 56 women and 13 men tried out.

The only requirement for cheerleading is the maintenance of a 2.0 GPA. Also, being considered members of the band, cheerleaders receive one hour of class credit for their efforts.

Cheerleading experience for the girls ranges from zero to seven years. Sandi Bell just started this year, while the head cheerleader, Carla Hunter, has been cheering for a third of her life.

All will quickly admit that when they graduate, they will feel they have lost something. Being the best of friends — and the best of cheerleaders — is something they'll hate to give it up.

Basketball squad brings hope to football-weary Wildcat fans

Willie the Wildcat smiled more during basketball season than in football months.

The basketball team, a mixture of seasoned players and new talent, combined their efforts to provide early Christmas presents for the K-State fans by winning all non-conference home games, and posting a 7-1 overall record.

Big Eight fans, players and coaches saw three new rules put into effect in conference play this season. Three officials, rather than the two used last year, were to referee at all games, and on the first six team fouls the offending team was to receive the ball out-of-bounds rather than shoot a free-throw. A 30-second clock was to be used in all Big Eight conference games, while non-conference opponents were to have the option of using it.

As defending Big Eight champions the 'Cats began the season with a home opening win, defeating San Diego State 79-67. K-State overpowered the Aztecs in rebounds and

field-goal percentages to the delight of 11,000 partisan fans.

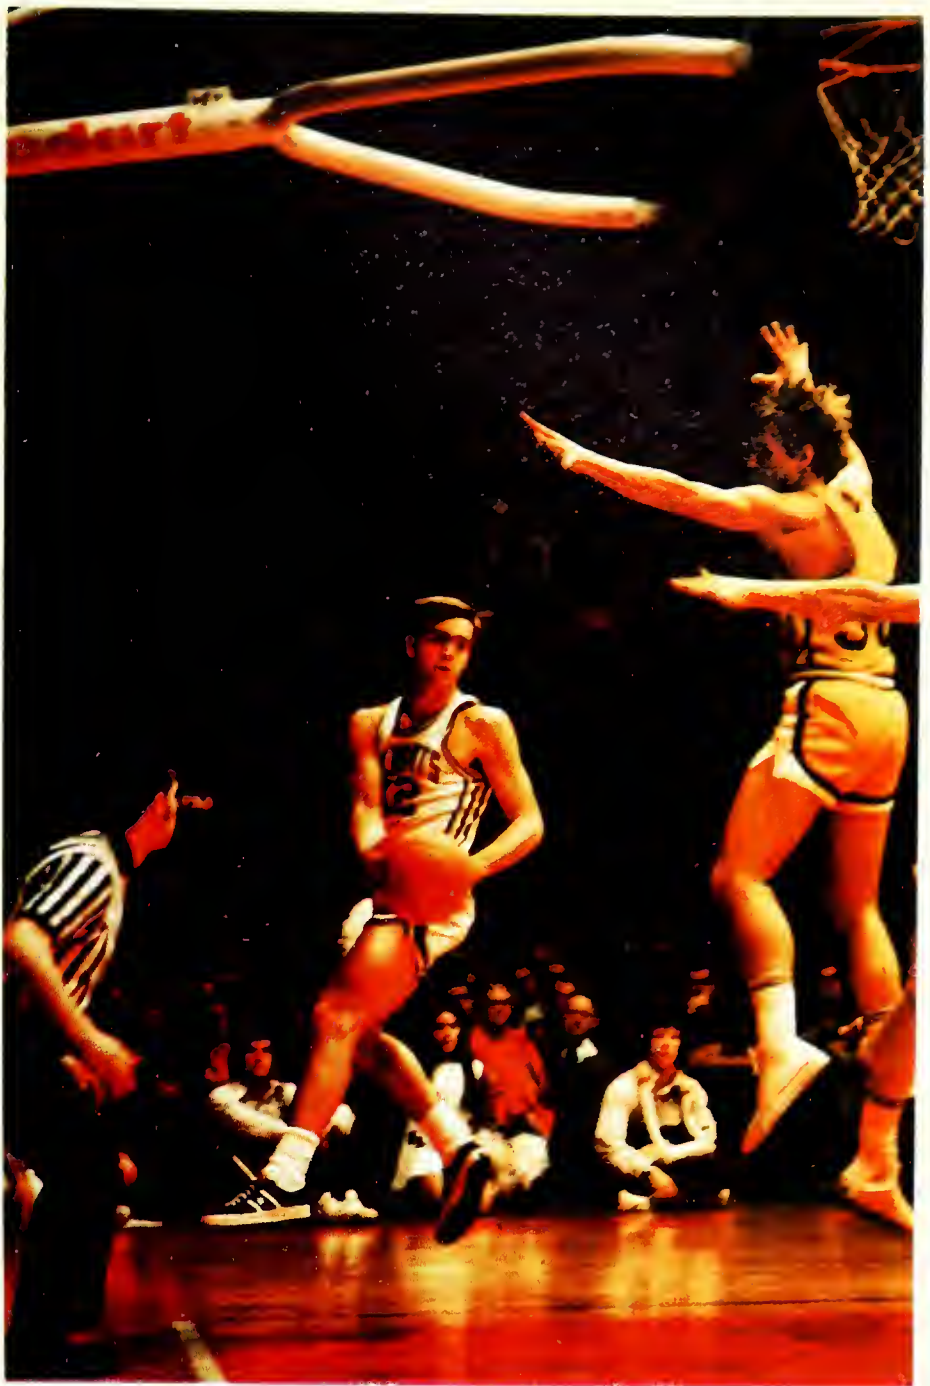

The Wildcats continued their early winning streak by defeating Eastern Kentucky 87-59 and the University of Utah 65-59.

K-State's only loss during non-conference play came when the 'Cats traveled to meet the University of Tulsa and lost to the hot-shooting Hurricanes 89-69.

Resuming its momentum, the team pushed past the rest of its opponents: North Texas State 76-62, the University of Iowa 68-62, the University of Washington 71-64 and the University of Arizona 85-69; contending with the Missouri Tigers for the highest ranking in UPI and AP basketball polls for a Big Eight team in pre-season play.

Coach Hartman and the squad were then to have a short four-day Christmas rest before resuming roundball action in the Big Eight Pre-season Tournament, where Missouri and K-State were picked as co-favorites.

'Cats, MU in tournament finals

Common sense would tell a person that you can't place an untamed buffalo, jayhawk, cyclone, sooner, tiger, cowboy, cornhusker and wildcat in the same building, let alone on the same basketball court. Yet this is precisely what happened for the 27th consecutive year at the Big Eight Tournament in Kansas City.

Missouri, last year's champion, and K-State, the 1972 runner-up, were picked as co-favorites by local sports writers to meet in the tournament finale, barring unforeseen upsets.

K-State faced an inter-state contest with KU in the opening round. The 'Cats and Jayhawks battled on the court and in the bleachers to a first half standoff. But in the second half K-State's aggressive rebounding and outside shooting propelled the 'Cats to a 91-70 victory.

A fired-up Iowa State team nearly

provided the unforeseen upset for K-State during second round play. In a see-saw affair clutch free-throw shooting in the game's final moments by Ernie Kusyner gave the Wildcats a narrow 68-65 win.

As was predicted, Missouri and K-State met in a repeat of last year's tournament finale, and the outcome, like the participants, was no different. Behind the shooting of their "big-men" MU jumped out to an early lead which was not overcome until K-State forged a second half tie at 62-62 with nine minutes remaining. But by that time the intangible factor of momentum had swung back to Missouri and the Tigers cruised to an 82-72 victory and tournament title.

And as for K-State, it was on to conference play and hopes for a repeat as champion in Big Eight basketball competition.

K-State upends unbeaten MU in loop opener

Wounding the University of Kansas' Jayhawks in KU territory provided gloating material in the spring semester.

Before the KU victory however, the Wildcats faced three tough opponents in roundball play and emerged with mixed results.

Southern Methodist University fought K-State during the entire Dallas game, and only in the last seconds let K-State slip by with a 57-55 victory.

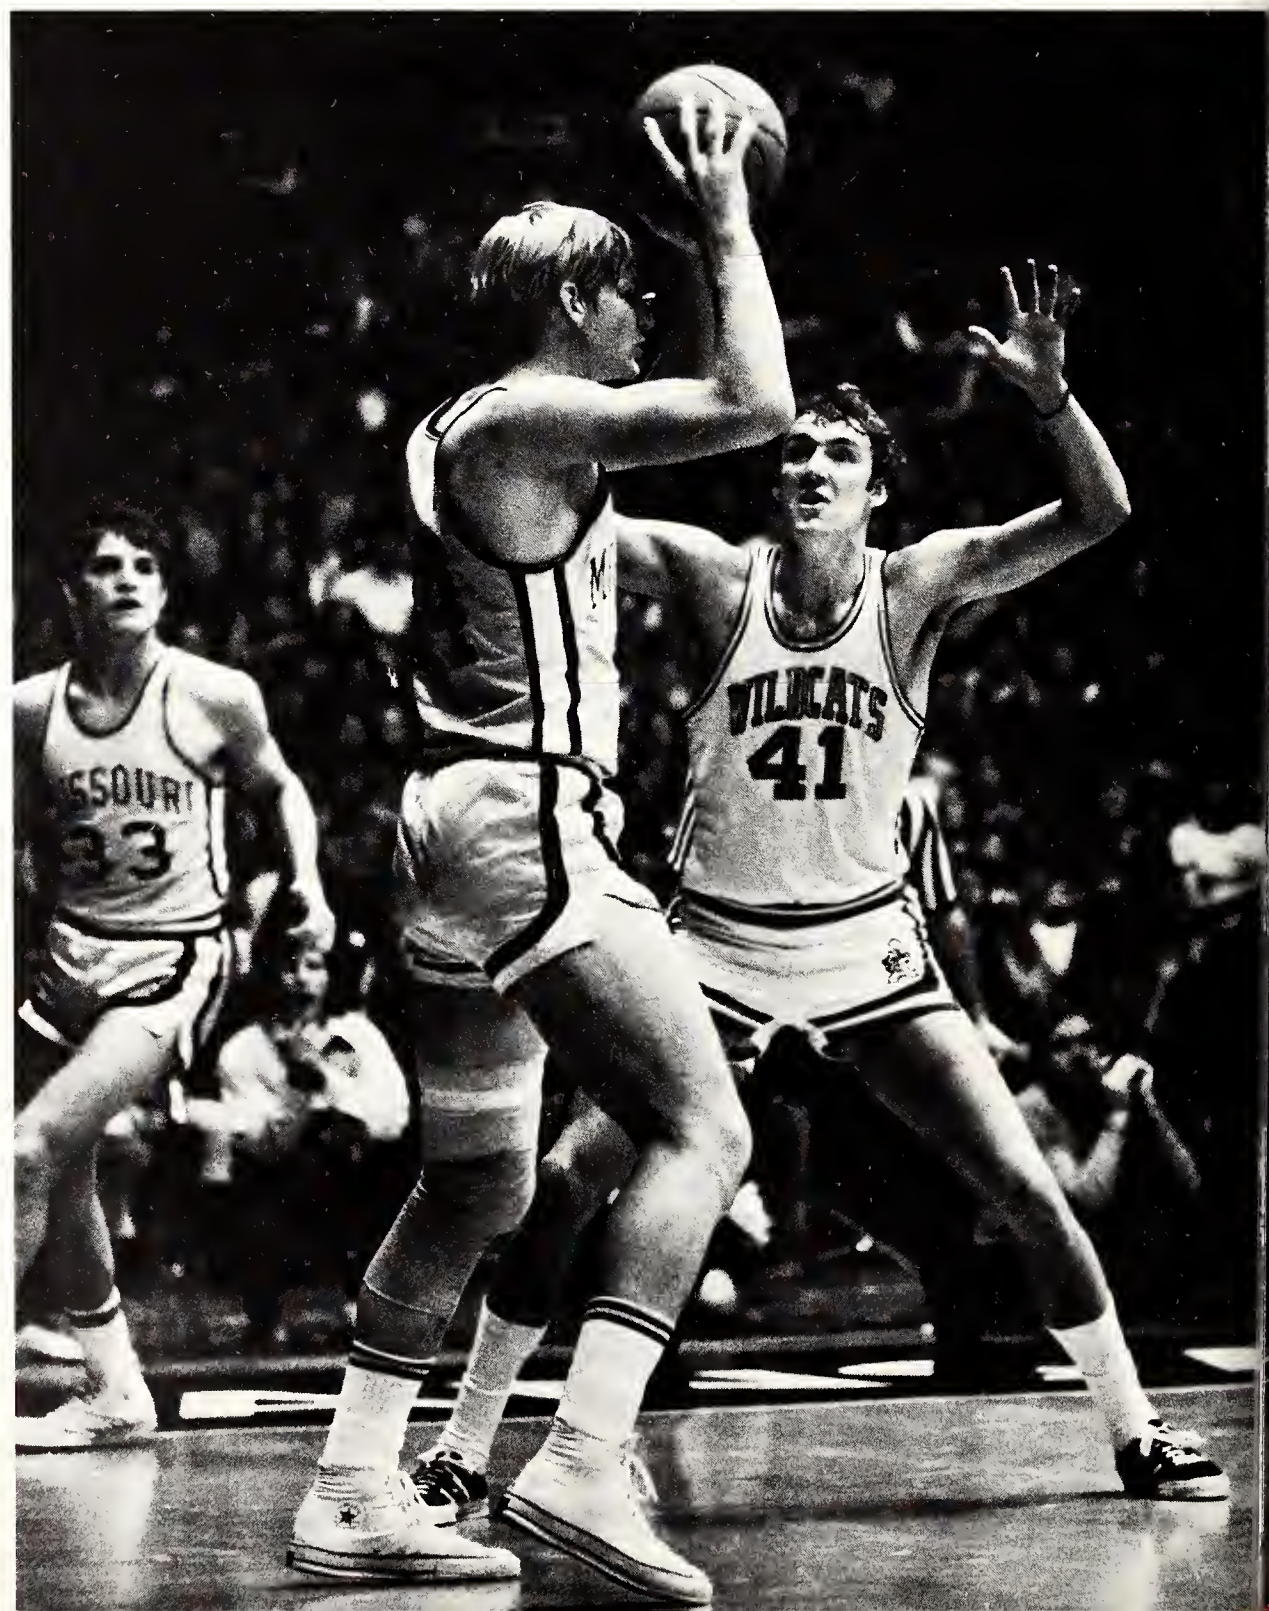

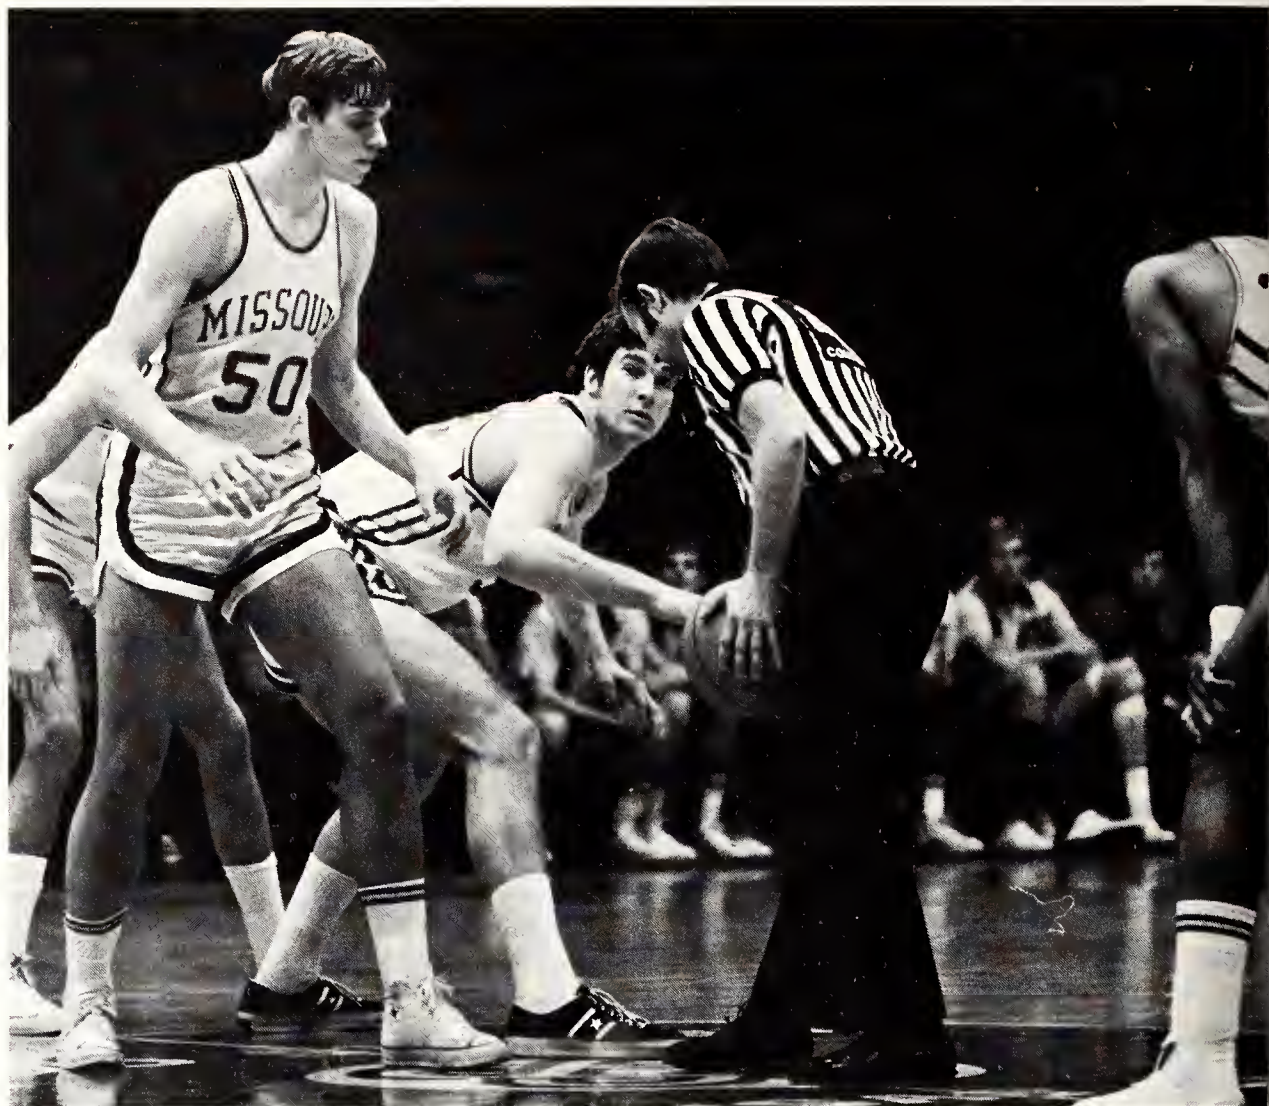

The University of Missouri was K-State's first Big Eight opponent of the conference campaign. Prior to league play, MU had defeated K-State at Kansas City; but when the Tigers visited Manhattan, the 'Cats returned the loss by spoiling MU's perfect record with a 70-55 triumph.

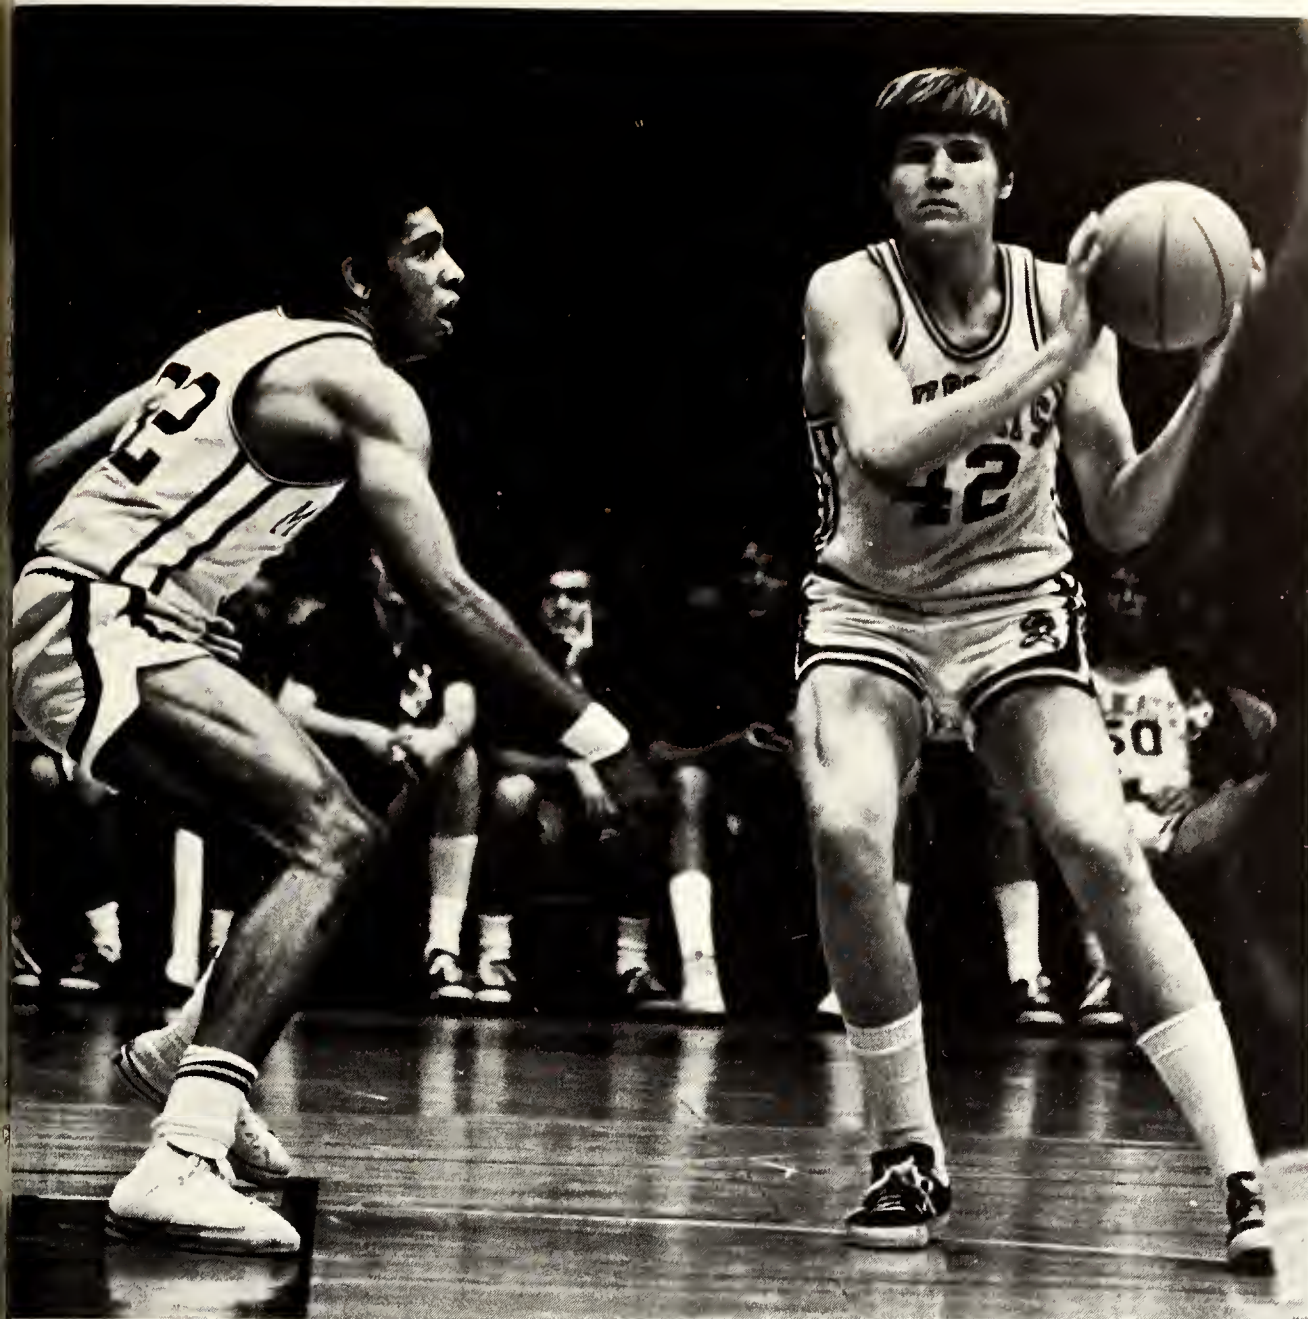

K-State received a rude reception from the University of Oklahoma during a regionally televised game, as freshman sensation Alvin Adams led the Sooners past the Wildcats 81-69 in Norman.

The 'Cats regained the roundball momentum when they handed KU a 77-68 loss at Allen Fieldhouse. Despite the psychological tactics of playing former prep star Nino Samuel, K-State overcame a first half deficit and posted an "on the road" victory during which President Nixon announced a Vietnam peace.

The Wildcat's third conference victory in their continuing streak of home wins was over Oklahoma State University, 74-64. This win brought the 'Cat's season record to 13 victories against 3 defeats.

ABOVE RIGHT: Steve Mitchell and John Brown prepare for a second-half tip-off. **CENTER RIGHT:** Senior forward Ernie Kusnyer passes off from the top of the key. **FAR RIGHT:** Guard Bob Chipman leads the 'Cat fast break upcourt. **RIGHT:** Larry Williams applies a tight zone defense on Al Eberhardt and the MU offense.

VARSITY BASKETBALL TEAM — Top Row: Chuck Garrett, David Lawrence, Gene McVey, Carl Gerlach, Steve Mitchell, Larry Williams,

Jerry Thruston, Jack Hartman. Bottom Row: Lon Kruger, Danny Beard, Bob Chipman,

Bobby Noland, Doug Snider, Bernard Robinson, Ernie Kusnyer.

Wildcats remain Big Eight conference champs

K-State's basketball team continued its surge for the Big Eight conference crown when it travelled to the University of Nebraska at Lincoln. The Cornhusker basketball team failed to possess the poise, agility and strength of their football counterparts as they fell to the Wildcats by the score of 82-55.

Iowa State was seeking revenge for a narrow defeat K-State handed them in the Big Eight Tournament when the Cyclones came to Ahearn Fieldhouse. Iowa State fought for their cause, but the 'Cats disappointed them with a narrow 78-74 victory.

One of the more crucial games for K-State came when the 'Cats travelled to the University of Colorado to play for the conference lead. The two teams had been co-leaders throughout the season, but the 'Cats proved the Buffs the weaker of the two by defeating them 81-62.

In a Jayhawk-Wildcat rematch KU brought its team, friends and fans to Manhattan to do unto K-State as K-

State had done unto them. KU almost accomplished its mission as the Wildcats trailed throughout the game, and didn't take the lead until the last moment, literally — when there were only 22 seconds left on the clock. Lon Kruger landed a pair of clutch free throws and put K-State ahead for the first time, 67-66. The Jayhawks were not about to fold as they put up two final shots, which, to the delight of K-State fans, missed their mark.

K-State advanced its conference victory tally to eight by coming home with its third victory over Iowa State. The Cyclones succumbed to the 'Cats 89-76 in Ames, as the Wildcats continued their climb up the national ranking ladder.

Wildcat title hopes were temporarily dimmed when Missouri overpowered K-State 80-66 at Columbia. This was the third time the 'Cats and Tigers tangled during the season, each claiming one previous victory.

Following the MU contest the 'Cats

regained their winning momentum and proved it by handing OU a narrow 82-78 loss. It was K-State's ninth conference win, moving them one game closer to the Big Eight championship.

Oklahoma State guaranteed the Purple and White at least a share of the conference crown by losing to the 'Cats 91-67. K-State established an early lead in the game, and the Cowboys of Sam Aubrey were never able to catch up.

Although it was a dreary, rainy Saturday afternoon on the outside, inside Ahearn Fieldhouse the atmosphere was just the opposite as ecstatic cheers of "we're number one" emerged from the K-State fans. In the second meeting against the NU Cornhuskers, K-State clinched the Big Eight conference championship for the second straight year by defeating the Huskers 97-70, thereby earning a berth in the NCAA regionals in Houston and a shot at college basketball's national championship.

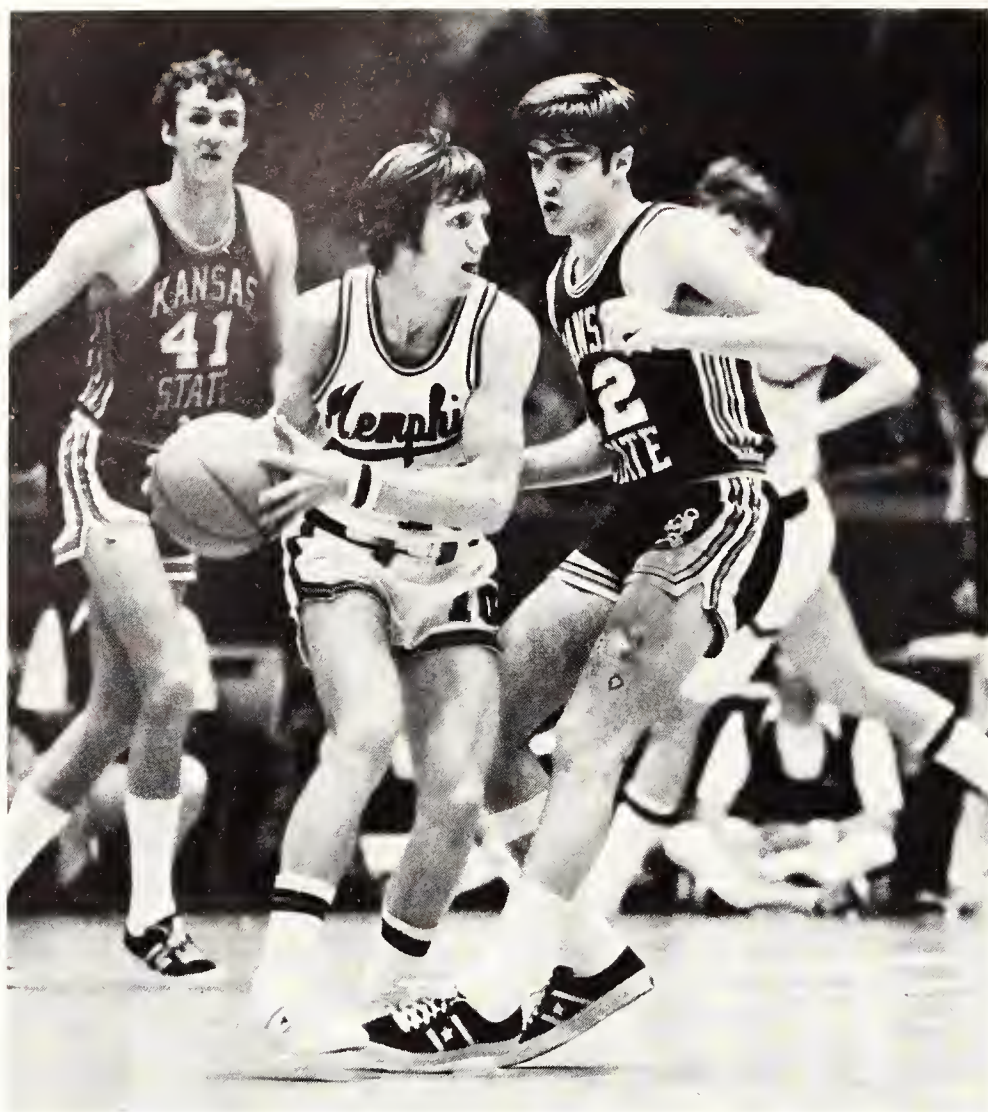

Coach Jack Hartman—

Jack Hartman is in his third season as head coach of the Wildcat basketball squad. Prior to coming to K-State, Hartman was mentor at Coffeyville Juco and Southern Illinois University. In seven seasons at Coffeyville his teams posted a 147-39 record, winning trips to four national Juco tournaments, while his 1961-62 team went undefeated.

During an eight year stay at Southern Illinois Hartman's teams earned four NCAA college division tournament berths and won the NIT championship in 1966-67. His overall record for the Salukis was 144 wins against 64 losses.

In his first season at K-State, Hartman coached the Wildcats to an 11-15 season, which he bettered to a 19-9 mark and a league championship in the 1971-72 campaign.

Wildcats close basketball season with second place Regional finish

The K-State basketball team closed out regular season play in championship manner by handing the University of Colorado a 76-66 loss. It was the second win for the 'Cats in as many meetings with the Buffs and allowed K-State to close out an undefeated home court season.

By winning the Big Eight Conference crown with a 22-4 record, K-State was entitled a trip to the NCAA Midwest Regionals in Houston. In K-State's first game of the tournament the Wildcats knocked off the top-seeded Ragin Cajuns from the University of Southwestern Louisiana 66-63. The 'Cats jumped out to an early lead and forced the high scoring USL squad to play the deliberate K-State style of basketball.

Advancing to the finals of the Midwest Regionals against Missouri Valley Champion, Memphis State, K-State's sub-par shooting performance and defensive lapses allowed the Tigers to walk away with a 92-72 victory.

The Midwest Regionals told the story of the season for K-State basketball fortunes. The Wildcats played great basketball at times, and on other occasions played far below their ability. First half inconsistency hampered the 'Cats throughout the year, while second half comebacks became a seasonal trademark. The most impressive point in the Wildcats favor during the season was their refusal to panic under pressure. They fell far behind in several conference games before coming back to claim victory.

The 1972-73 Wildcat basketball squad can be proud of their performance. Their 23-5 overall record was the best since Tex Winter's 1961-62 squad compiled a 23-4 record, as K-State captured its second straight Big Eight Conference crown under the direction of head coach Jack Hartman.

LEFT: Guard Danny Beard sets up a play against Southwestern Louisiana in the first round of the Midwest Regional. **FAR LEFT:** Gene McVey takes the rebound for the 'Cats during the championship game in Houston. **TOP LEFT:** Memphis State's Dave Laurie starts a drive around K-State's Lon Kruger. **CENTER:** Ernie Kusnyer sets up the Wildcat fast break. **ABOVE:** Gene McVey pulls down a rebound in the 'Cats losing effort against MSU.

Junior Varsity streaks to five early victories

Spirited effort, hustling dedication, and large quantities of teamwork and determination; these were some of the traits the K-State Junior Varsity basketball team displayed during the 1972-73 season.

Unlike their varsity counterpart, the JV squad had few changes in their style of play as the 30-second clock was absent and only two officials refereed each contest.

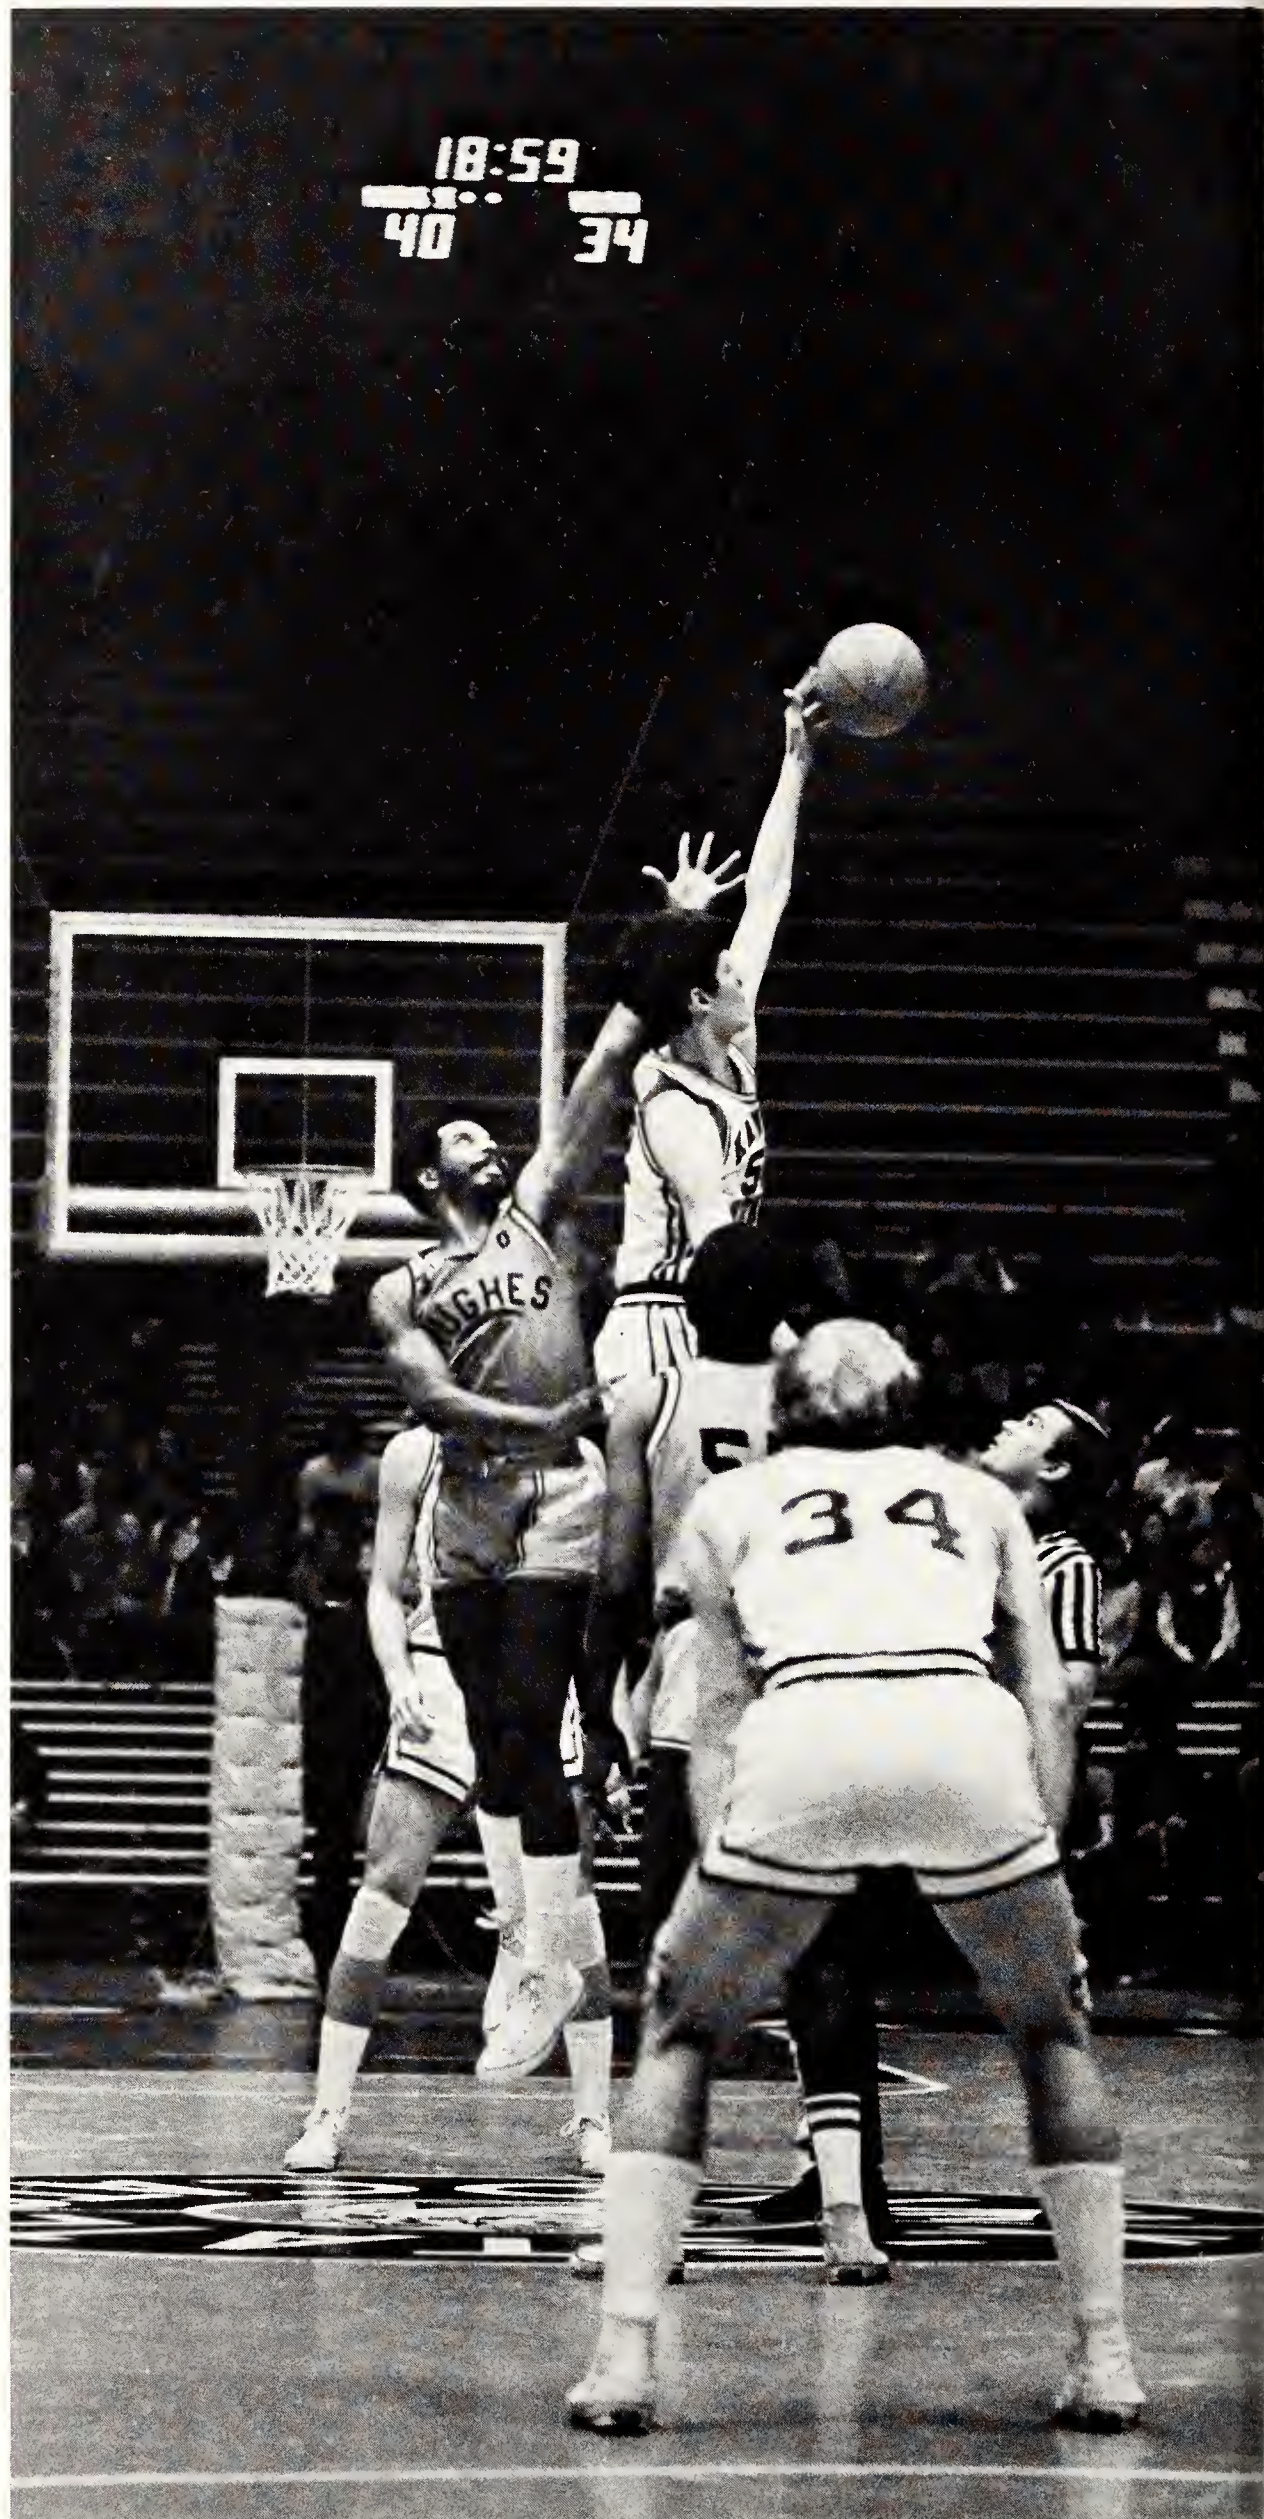

Playing in the late afternoon, prior to the varsity match-up, the JV posted five straight wins over Pratt, Highland, Dodge City, Coffeyville and Colby junior colleges before having their record blemished by cross-state rival, KU.

Rebounding from their first loss the JV sank two more opponents, Topeka Hughes-Conoco and Nebraska, before receiving a second and final defeat of the season at the hands of Barton County Junior College.

In a rematch with the junior Jayhawks the K-State JV resumed winning form by downing the 'Hawks by a 36 point margin. Emporia State and Nebraska were mere stepping stones late in the season as the Junior Varsity, behind the playmaking of guards Chuckie Williams, and Andy Kusnyer, and the rebounding strength of Gary Ely and Tony Pauzauskie, coasted to a 10-2 record.

Coach Chuck Garrett—

As Jack Hartman's first appointment after coming to K-State, Chuck Garrett became the Wildcat's Junior Varsity basketball coach. Garrett, now in his third year, served for two seasons as a high school coach in Illinois, and studied under Hartman as a graduate assistant at Southern Illinois University before going to North Texas State University as an assistant for the 1969-70 season. During his tenure as J.V. coach Garrett has compiled a 22-12 won-loss record.

Top Row: David Lawrence, Allen Joy, Tony

Pauzauskie, Gary Ely, Chris Stone, Steve Wensel, Chuck Garrett. Bottom Row: Mike

Simon, Steve Anson, Andy Kusnyer, Steve Ingram, Duane Barrett, Tyron Thompson.

Coach Terry Holbrook—

Terry Holbrook is in his first season as assistant track coach at K-State after serving one year in a similar capacity at North Texas State. A native of Belle Plaine, Holbrook is a former K-State quartermiler and Big Eight champion. During his collegiate days, Holbrook set school records in the 300-yard dash and as a member of the 440-yard, 880-yard and sprint medley teams. He placed third in the Big Eight outdoor meet as a sophomore and won the outdoor championship as a junior. Holbrook was an all-American in 1967 and 1969, and ran on the distance medley NCAA championship team in 1967.

K-State track captures sixth at indoor meet

For the exercise buff jogging is the all-weather sport which can build endurance, improve one's health, and cause one to shed those unwanted pounds. But for those serious runners of a competitive nature, jogging becomes outdoor track in the spring, cross-country in the fall and indoor track in the winter.

This past winter the indoor track squad of coach Deloss Dodds proved just how serious and competitive K-State's runners are. The Indoor track team, with only 11 lettermen and three seniors returning from the 1972 squad, posted dual meet wins over Wichita State, Oklahoma, North Texas State, and Missouri for an unblemished 4-0 record.

Led by Mike Lee, Dean Williams, Dale Alexander and John Feltner on the track, and Tom Brosius, Don Marrs and Rick Slifer in the field events the Wildcats placed first in the Oklahoma City Invitational, but dropped to a disappointing sixth place finish against the rest of the Big Eight at the Big Eight Indoor Championships in Kansas City. K-State's only first place finish came in the shot-put where Tom Brosius put the shot over 64 feet to take the event for the Wildcats.

LEFT: INDOOR TRACK TEAM — Top Row: Bill Favrow, Don Akin, Tim Porter, Ted Settle, John Gillaspie, Don Marrs, Jim Hinchliffe, Jerome Howe. Second Row: Rich Johnson, Ray McGill, Al Kolarik, Leon Hobson, Steve Dodd, Rick Tyler, Rich Hitchcock. Third Row: Terry Holbrook, Dean Williams, Bob Fingland, Lawrence Combs, Josh Washington, Keith Peterson, Keith Palmer, DeLoss Dodds. Bottom Row: Bill Kehmeier, Rick Slifer, John Hardwick, Mike Lee, Dan Fields, Fred Merrill, Phil Bealby, Tom Brosius. **FAR LEFT:** John Hardwick gets all the bend he can out of his fiberglass pole on his ascent to the crossbar. **ABOVE LEFT:** Rick Slifer strains to clear the bar in the high jump. **ABOVE RIGHT:** K-State's Danny Fields pursues a Wichita State runner in the mile relay.

Coach Dale Samuelson—

Dale Samuelson, coaching his first season with the Wildcat wrestling squad, is a 1972 physical education graduate of K-State. After a successful two year career at Colby Community Junior College, where he twice finished fourth in the nation in his weight class, Samuelson transferred to K-State and posted impressive 17-8 and 20-8 single season records.

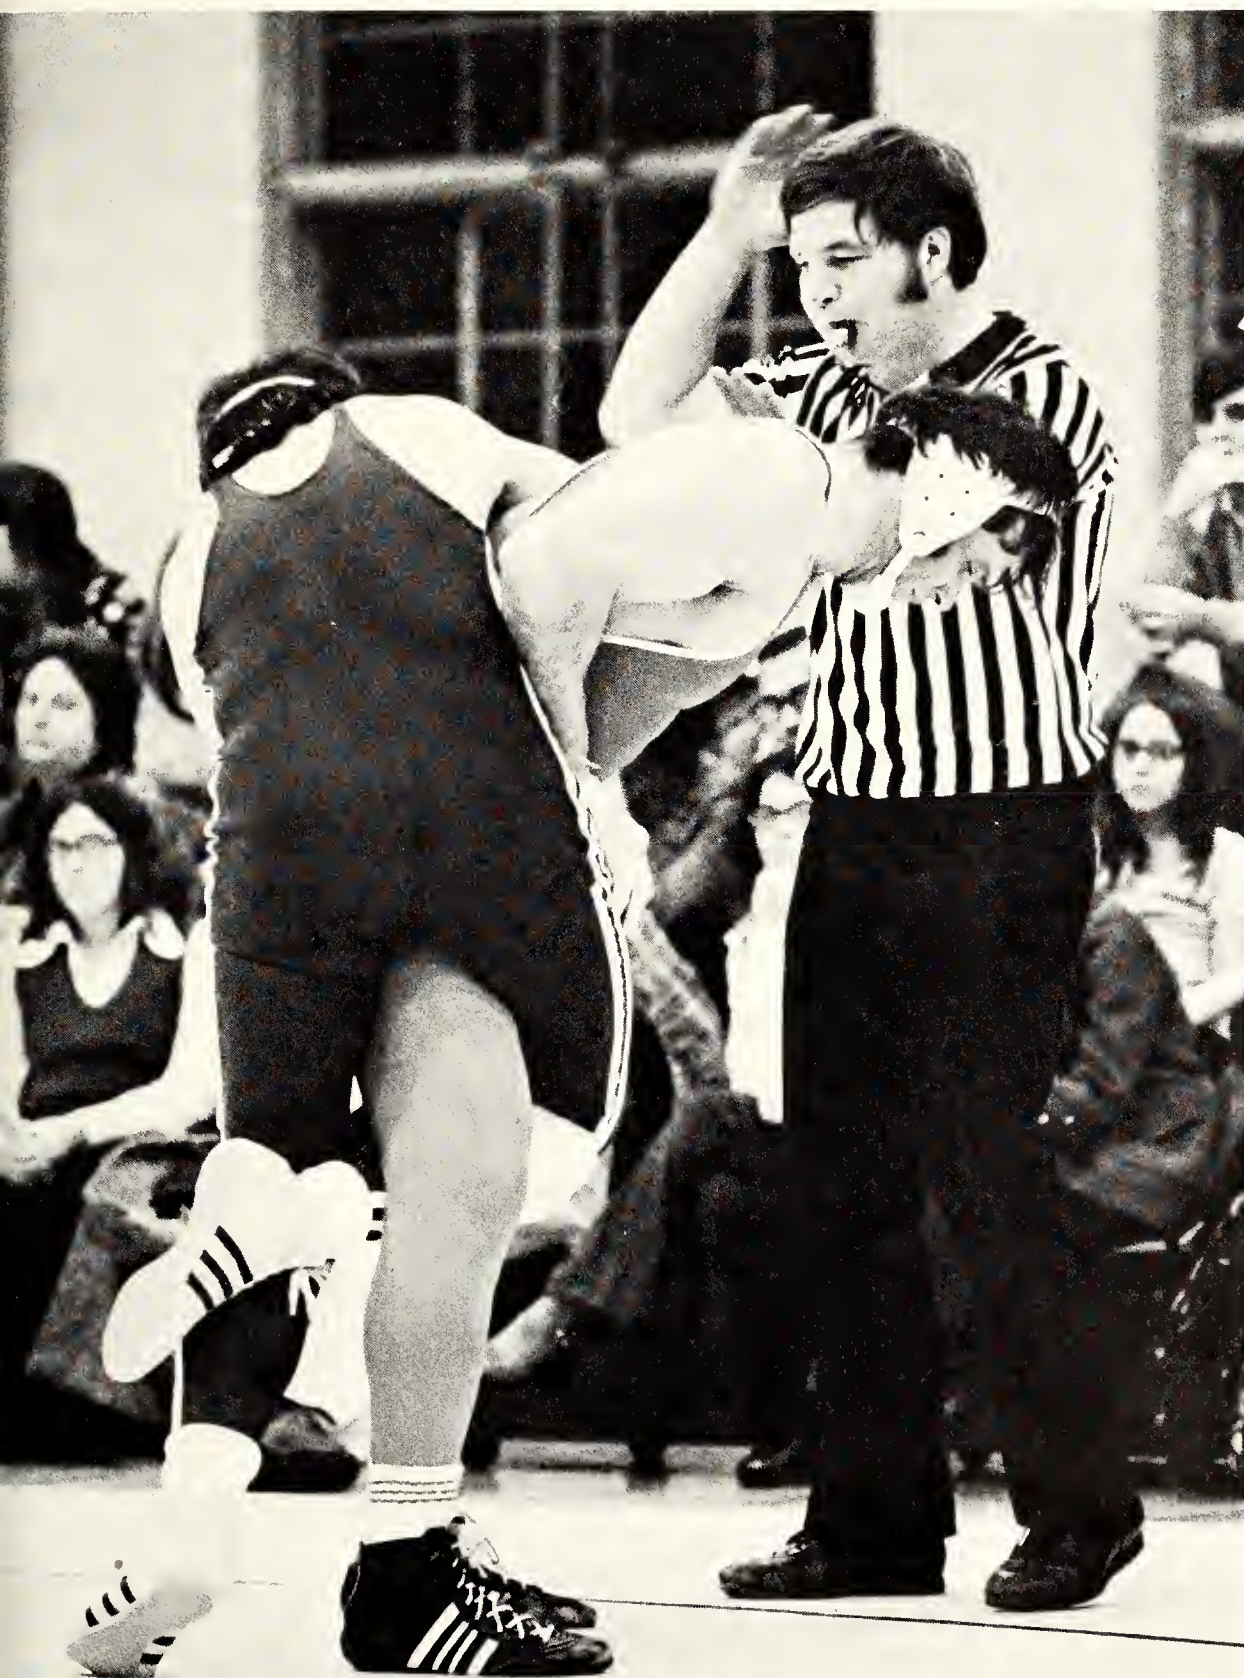

WRESTLING TEAM — Top Row: Roger Fisher, David Spear, Joe Creedon, Wayne Jackson, Mark Jackson, Gregg Barnes, Steve Hale, Jeff Stafford. Second Row: Phil Martin,

Pat Debold, Mike Brungardt, Roger Washburn, Dan Ruda, Jim Lundberg, Sig White. Third Row: Eric Hilding, Fred Foos, Gary Walter, Phil Donley, Dan Keller, Paul

Nelson. Bottom Row: Dale Samuelson, Steve Scannell, Chuck Merritt, Tony Harris, Dan Rogers, Dick Keller, Rick Taylor.

Inexperience slows matmen

Very few competitive Big Eight sports recruit athletes under six feet tall or weighing less than 118 pounds, but after viewing the K-State wrestling team you can easily see that height and weight is not always an advantage.

K-State's grapplers, ranging from Roger Fisher at 118 pounds to Tim Tuerk at 245 pounds, compiled a 5-6 overall record and a sixth place finish in the Big Eight Wrestling Meet during 1972-73 competition.

Under the coaching direction of a former K-State wrestling standout, Dale Samuelson, the Wildcats posted impressive victories over non-conference opponents, but failed to defeat a Big Eight foe.

According to Samuelson the 'Cats wrestling weaknesses centered around team youth and inexperience, while Iowa State and Oklahoma State, perennial wrestling strongholds, were not so unlucky. In any case, K-State wrestling provides Big Eight athletic competition for the lightweight, heavyweight and anyone in between.

LEFT: Phil Donley uses his weight to take down an OU rival. **CENTER LEFT:** Mark Jackson avoids an opponent's take-down, **(FAR LEFT)** and later finds himself in position to score some points. **TOP LEFT:** A K-State wrestler and his Colorado opponent square off in early action. **TOP RIGHT:** K-State's Gary Walter struggles to escape a near pin.

GYMNASTICS TEAM — Top Row: Tom Yother, Mike Thomas, Ken Snow, Jerry Simmons, Wayne Oatman, Jeffrey McDade,

Malcolm Copeland. Bottom Row: Keith Thompson, Bill Kennedy, Tim Schaid, Larry Estes, Rick Pappas. **BELOW:** Rick Pappas

competes on the steel rings for an audience of partisan K-State fans.

Gymnasts overcome late start

There was more than one time, at the beginning of the school year, when the future of K-State's gymnastics team looked bleak. First year coach, Ken Snow, was having more than his share of beginner's bad luck. Due to a late start in recruiting last year, and a few untimely injuries, the team was suffering from a case of malnutrition in the proven talent department. Add to that the lack of funds which has become a painful fact of life to all the minor team sports at K-State, and there just wasn't much to look forward to, or so it seemed.

Hopes did not brighten when snow cancelled the majority of the pre-Christmas tournament schedule to allow the squad time to thicken its ranks. And when the dual season began in January there was still an air of uncertainty as to whether the team would be able to compete against its opponents. But the extra practice sessions seemed to pay off as the gymnasts beat Northern

Colorado at home in the first meet of the new year.

As the season progressed there was a steady improvement in overall performance and confidence of the squad. All-around expert Mike Thomas was superb; specialists Jerry Simmons on the steel rings, Larry Estes on the side horse, and Tom Yother on the high bar performed consistently well, as the team went on to pick up wins against the University of Northern Iowa and the University of Colorado, the latter coached by former K-State gymnastics mentor Dave Wardell, in posting a dual meet record of three wins and four losses.

In the end, despite all the prophets of doom, the Wildcats proved themselves to be determined competitors to the surprise of many people and to the certain delight of their fans. And without a doubt, watching a K-State gymnastics' victory is still one of the more pleasant ways to spend a Manhattan evening.

Consistency describes riflery, bowling squads

If you were offered a free game of bowling in the Union or an afternoon of target practice in the basement of Military Science for naming the two coeducational intercollegiate sports on campus, could you name them without calling ULN for the answer? A surprising number of K-State students would have no idea where to begin guessing. That is, unless they were members of the riflery or bowling teams.

The K-State riflery team, led by Gary Smith, Joe Noble, Don Jordon and team captain Lark Parsons, was a first division contender for the entire 1972-73 season. 'Cat sharpshooters scored first place victories at Creighton University and the Fort Riley Invitational, while taking second and third spots in several other small-bore matches. Members of the squad used .22 caliber Anschutz competition rifles in their matches, firing at targets in standing, sitting and prone positions from a distance of 50-yards.

Wildcat bowlers also finished high in competition this past year, as the men's squad captured first in the Kansas-Oklahoma Traveling League, while the women's team garnered a third place finish. Individual bowling team standouts were Ron Chester and Tena Winkler, who rolled averages of 182 and 173, respectively in leading the Wildcat pin charge.

RIFLE TEAM — Top Row: Bob Roberts, Don Jordon, Lark Parsons. Second Row: Sfc. John Nesler, Joe Noble, Kary McCaig, Gary Smith.

Bottom Row: Steve Hicks, Steve Brooks, Marlene Oswald, Ruth Jansen.

BOWLING TEAM — Top Row: Pete Menzies, Bill Garrett, Mike Snyder, Doug Stark, Dave Montgomery, Mark Higgins, Ron Chester,

Dennis White, Keven Fry, Leon Schartz. Bottom Row: Sue Despard, Tena Winkler, Sharyl Klema, Betsy Krause, Barb Dressen, Mary

Call, Sue Savage, Kathy Murphy.

ADMINISTRATORS

ADMINISTRATORS

ADMINISTRATORS

ADMINISTRATORS

ADMINISTRATORS

ADMINISTRATORS

ADMINISTRATORS

ADMINISTRATORS

Everyone, in his professional life, has a boss. The construction worker kow-tows to his foreman; the doctor answers to the AMA; and even the President is forced to bow to the electorate.

College students, who are preparing for their future professional lives, have bosses, too. Here they are called administrators and are largely responsible for the planning and decision-making that involve all of us.

On the following pages you will see K-State's administrators exercising their powers of decision-making.

We have asked each of these men and women a "What would you do if . . ." question to determine how he would handle a specific situation.

Some of these hypothetical situations are very serious — some are quite fanciful.

At any rate, we hope their answers will give you some clues to the person inside the administrator.

After all, as college prepares us to work with the superiors we will encounter later in life, it also tries to show us that bosses are human, too.

McCain expects fewer underclass enrollments

What would you do if the popularity of Kansas' community colleges caused a marked decline in K-State's freshman and sophomore enrollment?

Actually, we fully expect enrollment in community colleges to grow at a faster rate than in the lower division of our state's four-year colleges and universities. This will reflect not so much the popularity of community colleges as changes in the college student population. For example, job market pressures will require more and more youth to continue their education beyond high school and increasing numbers of these youth will enroll in terminal vocational

courses available only at community colleges. At the same time, a larger proportion of each age group will enroll in a program leading to a baccalaureate degree. Since most of these will come from low-income families, a majority of them will begin their four-year program in a community college within commuting distance of their homes in order to save the cost of room and board.

What should a University such as K-State do about this?

We are already doing something about it by working cooperatively with the state's community colleges in all areas where we have a common interest. Partly as a result of such efforts, the quality of freshman

and sophomore courses offered in our community colleges compares favorably with that here at K-State. We have long since developed arrangements under which a student can transfer from the community college to K-State without loss of credits. In the case of students enrolling in terminal courses, K-State has been assisting community colleges with the development of vocational curricula in a variety of areas including agriculture, business and technology.

JAMES A. MCCAIN
President

What would you do if you were barricaded in your office by 1,000 angry students demanding a change in tenure policies?

Although the rules and regulations of the Board of Regents require that people have free access to my office in order to transact business and thus I could not legally be barricaded, this is not, I take it, the point of your query.

Students join "confrontation" crowds for a variety of reasons but it is safe to assume that a fair number would have real concerns regarding student input into decisions on faculty tenure. Obviously reason and intellect are the tools by which attitudes can be addressed and changes considered on such a subject — not through the exercise of force or intimidation. So I would first try to arrange for an environment where an exchange of views could profitably take place and have all involved University groups be represented — students, faculty, department heads and deans.

Students now have substantial, if informal, input into tenure decisions. Should a change to formalize their input be indicated, this would call for new procedures to be approved by the Faculty Senate. A review of these procedures has been underway for the past several months by the

Council of Academic Deans, by the faculty Nonreappointment Review Committee, by a joint faculty-student committee under the chairmanship of Associate Dean Paige Mulhollan of the College of Arts and Sciences and by others. Perhaps far more than changes in formal procedures, we need much more thinking and sharing of thoughts on what the intellectual life requires — what qualities are identifiable in the great teacher as opposed to the mediocre one. Jacques Barzun has said,

"All kinds of people make good teachers . . . more or less happily ordered souls, more or less passionate in their desires to emulate the quality of life which their work gives them glimpses of, but ready at any rate to interpret it to the young and thus insure its continuance . . . making up the true university, each institution a planet within the university of mind, creating and shedding light upon a darker world which looks for it there, and would look for it elsewhere in vain."

Lofty, and imprecise, perhaps; but the kind of goals to be considered in judging who shall teach at our University.

JOHN CHALMERS
Vice-President for Academic Affairs

What would you do if you were given complete freedom to plan the renovation of Nichols Gym under the assumption that the required financing would be made available?

The first step to be taken in the renovation of Nichols Gym is a determination of the structural feasibility of the use of the standing walls. Studies of the walls and foundations as well as the surrounding soil would be made. Will these foundations and walls support a new structure? Or must the walls be torn down and completely rebuilt? If cost is not a factor, then the latter course of action may be feasible.

Renovation can only be planned if there is a recognized need to provide space for a specific program. The programs to be housed in a renovated Nichols would be determined and plans developed to meet this need. The need for space at K-State is so great and involves so many programs in the University that it is not possible to suggest those which might be considered for inclusion in a renovated Nichols.

In fact, the need for additional space is so acute that we would conduct a study of such renovation to determine whether the needs of the University can best be met by renovation of Nichols or by the expenditure of that same amount of money on entirely new space.

PAUL YOUNG
Vice-President for Development

GLENN BECK
Vice-President for Agriculture

What would you do to improve the image of K-State if a student demonstration caused its popularity to decline? What aspects of the University would you highlight to offset the unfavorable publicity it might receive?

Image comes about by living a lifetime in the right way. K-State's image is a reflection of our policies, our procedures and our attitudes toward all who have an interest and concern in what we do.

If an institution's policies and procedures which created and sustained a situation are wrong, then these policies and procedures should be changed immediately in total fairness and in the best interest of all.

On the other hand, if a student demonstration should be unreasonable and unwarranted on the basis of facts, then the institution

should not allow itself to be intimidated. At the same time, every effort must be made to arrive at correct and fair decisions between and among all parties concerned.

I have faith that the majority of students and the public would react positively to this approach of reasonableness and complete honesty in meeting such a situation as well as any other administrative question, whether or not there is any element of confrontation.

I would continue to highlight the aspect of the University's integrity — a precious thing — by emphasizing the institution's respect in facing up to the facts and reality of the hypothetical situation which you propose.

If unfavorable publicity would then follow, so be it.

MAX MILBOURN
Assistant to the President

What would you do if the trend for Arts and Sciences enrollments to surpass those of the College of Agriculture accelerated? What would you do to make the College of Agriculture more appealing to incoming freshmen who were undecided about their majors?

I am not concerned about the differences in enrollment between Agriculture and Arts and Sciences. My goal has been to increase agricultural enrollment to a level that will supply current demands for our graduates. I believe we have been reasonably successful in doing that. When I assumed this position in the fall semester of 1960, the agricultural enrollment was low — only 673. This fall it is 1,579, an increase of 234 percent in 12 years.

This increase has been achieved by making our courses and curriculums more relevant to the needs of modern agriculture, by improving our student counseling system and by informing high school and junior college students about professional opportunities in agriculture. There is still some room for expansion. We are not providing enough graduates in some fields, especially in the food sciences, to meet the demands. However, I do not visualize a need to expand agricultural enrollment beyond about 2,000 students unless there is a major unforeseen change in the agricultural industry.

What would you do if a sudden epidemic on campus caused an overload on Student Health facilities? Have contingency plans been made for this?

This has occurred in the past, and there are contingency plans.

The physician coverage would be adequate, if not ideal, if such an epidemic occurred. The nursing coverage would not be adequate, but we do have a small pool of reserve nurses who desire part-time work who can be employed in such a situation. Paramedical help is widely available in the Manhattan area, i.e. students and student wives.

Our medical supplies and drugs on hand are adequate and more can be ordered on an emergency basis if necessary. The medical equipment and building are of sufficient level to cope with this type of emergency.

We have 40 extra beds stored in the basement which could be set up in approximately four hours. The space utilized for these beds would be the halls on the hospital floor and some office space which would allow us to handle 80 to 90 in-patients at any one time. If patient requirements indicate, we could utilize sections of dormitories and send the medical staff into them.

Working relations with the two private hospitals in town and physicians are such that they would help us with any overload requirements.

We presently offer many preventative medical measures which we hope will prevent many kinds of problems from developing.

DR. ROBERT SINCLAIR
Director, Lafene Student Health
Center

What would you do if fire destroyed all the essential University business records? Have plans already been made for emergencies such as this?

Yes, plans have been made for emergencies such as this to the extent that it is possible to plan for such an eventuality and continue to provide necessary services, within the resources available, on a day-to-day basis. To protect the most vital business records of the University against loss by fire, we have provided fireproof vault storage space and fire-resistant filing cabinets for the essential University business records to protect them from fire. Important accounting, payroll, inventory, student loan, and grants and contracts records are either maintained in these areas constantly or moved into these areas for protection at the close of each business day. In addition, these records are periodically microfilmed or placed on automatic data processing tapes, and the films and tapes are stored in other campus buildings.

A water sprinkler system is currently being installed in Anderson Hall to provide additional fire protection for vital University records.

While every reasonable effort is being made to protect the essential business records in Anderson Hall, as well as to store duplicate records in other buildings, it would be a very

costly and lengthy process to reconstruct these business records if they were destroyed by fire. However, we believe that from the duplicate records stored in other buildings on either microfilm or data processing tapes and the duplicate copies that are maintained in the files of other University departments and in state offices in Topeka, essential records needed to continue the business operations of the University could be reassembled and reconstructed.

DANIEL BEATTY
Vice-President for Business Affairs

What would you do if people with advanced degrees began to have even more trouble finding jobs? Would you discourage students from entering graduate school right after college graduation?

Past experience shows that we come to regret abrupt attempts to correct mismatches between the supply of and demand for graduates, for our society inevitably requires more, rather than fewer, people educated at the highest level. Even now there are normal market processes which are likely to keep the number of advanced graduates from expanding beyond reasonable needs. Last year, 32,000 doctorates were awarded, but in engineering for example, we may find a shortage developing several years ahead because of recent reductions in enrollment.

If advice were in order it would be in the direction of providing greater flexibility for graduate schools. Although we must maintain what Eric Ashby refers to as the "thin stream" of scholars and researchers at the margins of knowledge, graduate

education should be adjusting its style to the preparation of more practitioners and problem-solvers as well. K-State has an outstanding record of success in such efforts, especially in the professions and in applied science.

Whether graduate studies are pursued immediately after the baccalaureate is a matter of individual desire and decision, and I would not discourage this. Some students find their graduate experience to be much more beneficial, however, after a period of employment or other experience which gives them a broader perspective. What must be emphasized is that, especially at advanced levels, education must be a continuous process, and this must be recognized by graduate schools to an increasing extent so that barriers to beginning or returning to graduate work can be minimized. My basic view is an optimistic one, for I believe that the future will have many more career opportunities based on a wider diversity of education.

ROBERT KRUIH
Dean, Graduate School

What would you do to satisfy students who requested a testing system that would enable them to receive University credit for knowledge acquired in travel and work experiences?

For a number of years, K-State has had a policy approving credit by examination in any subject with approval of the Dean of the College in which the subject is offered. The University is currently expanding this program through the College-Level Examination Program (CLEP) which will offer credit by examination in 30 or more semester hours in specified courses.

Knowledge can be gained from many sources. If that knowledge is equivalent to the knowledge gained through an organized class on campus, the University provides an op-

portunity to demonstrate that fact and acknowledges that classroom activity is only one form of gaining information. Travel or work experiences, related to your program of study are another form of gaining information and knowledge (learning).

Credit presupposes a need for the information gained. In other words, courses are developed and credit given for experiences the professors, departments and authorities in the field deem necessary for performance in an occupation and an indication of competency in a particular area. Travel, work experience, library reading, etc. receive credit as they pertain to a program of study.

GENE KASPER
Dean of Students

What would you do if the day before enrollment you discovered that a computer malfunction had caused all student schedules to be incorrect?

I'd consider taking the next flight to Australia or Ceylon. Seriously, such a situation should not occur, but unfortunately it came very close to occurring the first fall semester in which we assigned students to class sections by computer. That was in September of 1966. We completed the work Sunday morning for Monday morning delivery to students. We had other serious problems, too, but carried on.

An electric power failure over a prolonged period of time could cause us untold difficulty. But such would be the case throughout the University and the community. We would just have to wait it out. Nothing, eating, sleeping, reading, working, would be close to normal until power was restored.

There are safeguards which we take to avoid a last minute failure. Actually all enrollments are placed on magnetic tape and carefully checked and rechecked long before preparing assignments. Trial runs of assignments are also made well in advance to be certain that all is functioning properly. Finally the actual assignments to classes are prepared three or four days in advance of

registration to give us a little lee-way for corrections or adjustment should such be necessary.

Having exceedingly good and competent people responsible for this work is the key to success. The attention they give to detailed checking and rechecking is the best insurance we have for avoiding the problem cited.

ELLSWORTH GERRITZ
Dean, Admissions and Records

What would you do if next September there were 1,000 students who could not find a place to live in Manhattan? Their only solution seemed to be camping out on the green in front of Anderson Hall.

In the period that I have been privileged to serve the University, we have had increases in enrollment of over 1,000 students in a particular year, but have been able to program housing in such a way that the problem did not materialize. I would be chagrined if this situation did develop. The possibility always exists that 200 or 300 students might not find housing to suit their specific wishes or needs; but the problems are solved.

My first approach to this problem would be to ascertain the needs of the individuals to discover their resources, type of housing desired, and efforts already made to find housing. Once the total problem has been assessed, we would utilize our housing staff (particularly the off-campus housing officer), the SGA housing assistant, and the housing office at Fort Riley, to determine immediate solutions that could be developed.

In the past we have been able to accommodate 200 students in the basements of several of our residence halls. Also some roommates would volunteer to take an extra student until the crisis was over. There are facilities within community housing units which are not as desirable as one would want, but which could be utilized on an interim basis. The possibility of using mobile home facilities is another interim

solution. An appeal to city householders who have housed students in the past would help relieve the pressure until more suitable accommodations could be developed.

While finding suitable housing, efforts would be made to strengthen communications and promote clear understanding by all individuals involved because tension breeds rumors and both are destructive.

When people's basic needs are not reasonably met, serious problems can result, and every effort would be made to make certain these problems did not develop in the first place. It seems rather clear that sanitary and comfort problems and the tension that would develop from inadequate housing conditions would not be conducive to an encampment on the east lawn of Anderson Hall.

Immediately after the basic housing needs were taken care of, a thorough study of the factors causing the problem would be initiated. Efforts to prevent this problem in the future would be made. A cooperative effort from the community and from all elements of the University involving students, faculty and administration would result in a satisfactory solution.

CHESTER PETERS
Vice-President for Student Affairs

What would you do if a campus minority group requested that vet med standards be lowered so that the percentage of minority students in vet school would equal the percentage enrolled at K-State?

There would be no need to lower the standards. Our experience has shown that, if they desire an education in this field, individuals of minority groups can achieve at the same level as their classmates.

DONALD TROTTER
Dean, College of Veterinary
Medicine

What would you do if the decrease in number of farms in the Midwest had an adverse effect on the College of Agriculture?

An important problem for the College of Agriculture is the often mistaken notion that the number of farms means a similar decline in the demand for College of Agriculture graduates. It is closely related to so many people also equating farming with agriculture. Agriculture includes not only farming (production agriculture), but also off-farm agribusiness (feed, seed, fertilizer, machinery equipment, food processing, distribution, marketing, finance, communications, insurance, exporting and importing) plus agricultural research, education, and service agencies. Colleges of Agriculture have adjusted their instructional programs to those realities. Changes in curriculums have been as great as the changes in agriculture.

Today's larger farm units, with their accompanying higher investments in machinery and equipment, and rising farm expenditures, call for a significantly higher quality management and technical knowhow by farm operators, so the need for farm operators with college training has increased rapidly. Likewise, the phenomenal growth in off-farm agribusinesses since World War II calls for more agricultural graduates with the unique combination of technical knowledge of food processing, transportation and marketing, as well as business management principles. Agricultural

curricula now include more management principles. Also, expanded agricultural research, education, and public service functions call for more persons with advanced degrees in agriculture.

In response to the above changes undergraduate enrollment in the 70 land-grant colleges of agriculture in the U.S. has risen significantly these past 10 years, from 34,000 in 1963 to over 56,000 in 1972. The rise in undergraduate enrollment in the K-State College of Agriculture has been even more phenomenal: the 1,579 enrollment in 1972 is 219 percent of the 720 in 1963, far above the growth rate of the total University for the decade.

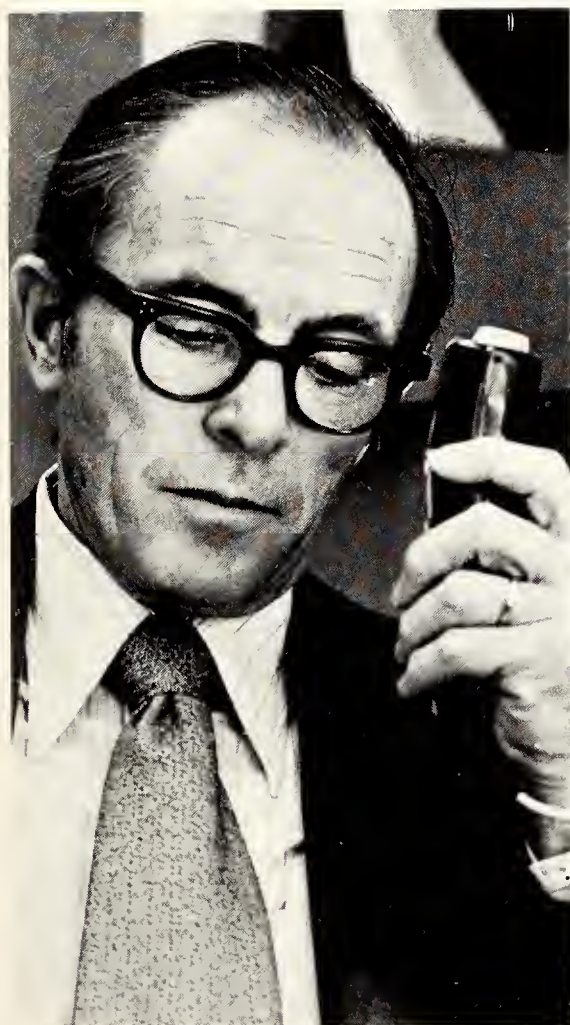

Demand for agricultural graduates has more than kept pace with enrollment increases. Agricultural sciences have the lowest level of unemployment (0.9 of 1 percent) in 15 fields of science, as reported in a recent National Science Foundation survey on unemployment rates. To reflect the increased concern for quality of life (environmental and consumer concerns), the College of Agriculture offers new curriculums in Natural Resource Management, Crop Protection, Food Science, Urban Horticulture, and Horticultural Therapy. Perhaps the best evidence that the College of Agriculture has kept abreast of the changing times is its enrollment in 1972 of 191 young women compared with 22 only 10 years ago.

CARROLL HESS
Dean, College of Agriculture

What would you do if you were given a large increase in resources to set up work or personal experience programs that would directly benefit students?

I would make the availability of these resources known to faculty and students in the College and encourage their suggestions of ways for students to participate in the most challenging kinds of professional and/or academic activities under the leadership of the best qualified and most dedicated instructors. In general the kinds of activities that I would hope to see established would include, but not be limited to, seminars and laboratory experiences with sufficient structure to promote self-discipline, but with adequate freedom to encourage exploration and creativity. My notion of laboratory includes the studio of the creative artist, the places of activity of other professional people, and may even be at locations far from the campus. In short, I would expand the opportunities for dedicated faculty to help individual students expand their abilities to think and act intelligently and creatively.

WILLIAM STAMEY
Dean, Arts and Sciences

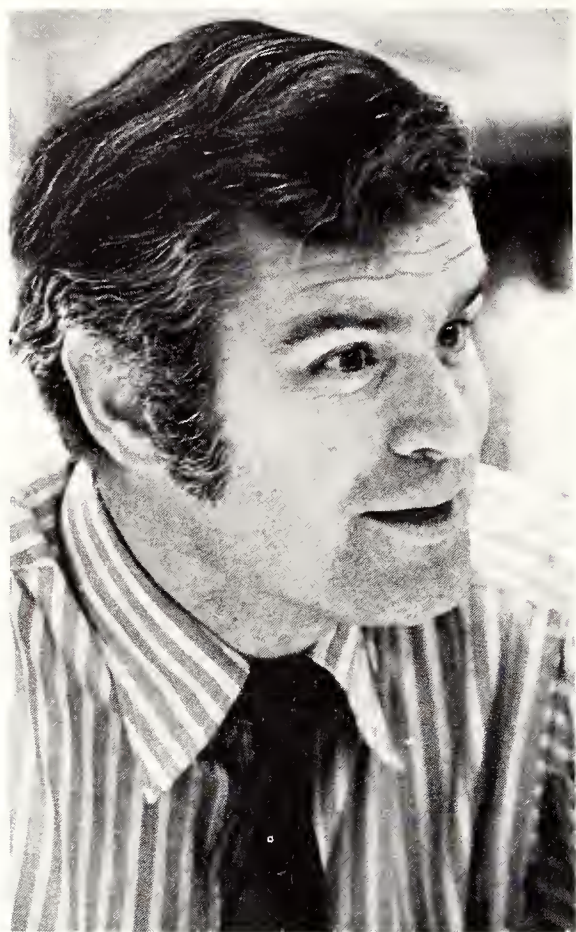

What would you do if the idea that either K-State or KU should specialize in engineering became more popular? Would you argue for or against the concept that only one school should have a College of Engineering?

As the "Land Grant" Institution of Higher Learning in Kansas, K-State has developed engineering programs in both research and teaching which have long been recognized as high quality, professional programs. As the leading engineering school in this region, the college has provided state and national leadership in the development of new areas through curricular innovations, faculty research and student participation.

K-State engineering graduates have been successful and have achieved positions of responsibility and trust which reflect favorably on our programs and the educational environment of the University.

With this historical background, precedence and mission, coupled with the need for educated engineers to solve many of society's problems, today and in the future, K-State will continue its leadership position through continued development of its programs, at all levels of engineering education, meeting the needs of the profession, the student, the state and the society.

RALPH NEVINS
Dean, College of Engineering

What would you do if current trends seemed to indicate a greater need at K-State for training women for their new participation in business?

Since I believe that evidence points toward the conclusion that women are moving into fuller participation in business administration, I can answer this as more than a hypothetical question. These steps would seem appropriate:

1. I would encourage female prospective college students to consider careers in business management and accounting.
2. I would support women student organizations in business as they work toward helping women prepare in all ways for professional work in business.
3. I would encourage the discussion in appropriate classes of the facts, issues, and implications of women's fuller participation in business.
4. I would be responsive to suggestions to improve the ways in which we serve any special educational needs that women students may have.

ROBERT LYNN
Dean, College of Business Administration

What would you do to support or refute the notion that teacher surpluses are actually due to a lack of educational innovation?

Teacher surpluses today are due to a large number of causes:

1. Economic conditions within the nation as a whole which keep school districts from spending money as they would like.
2. Disenchanted taxpayers who refuse to vote increases in their own taxes.
3. The level of training necessary for what we consider to be "a professional teacher."
4. Lack of mobility within the teaching profession.

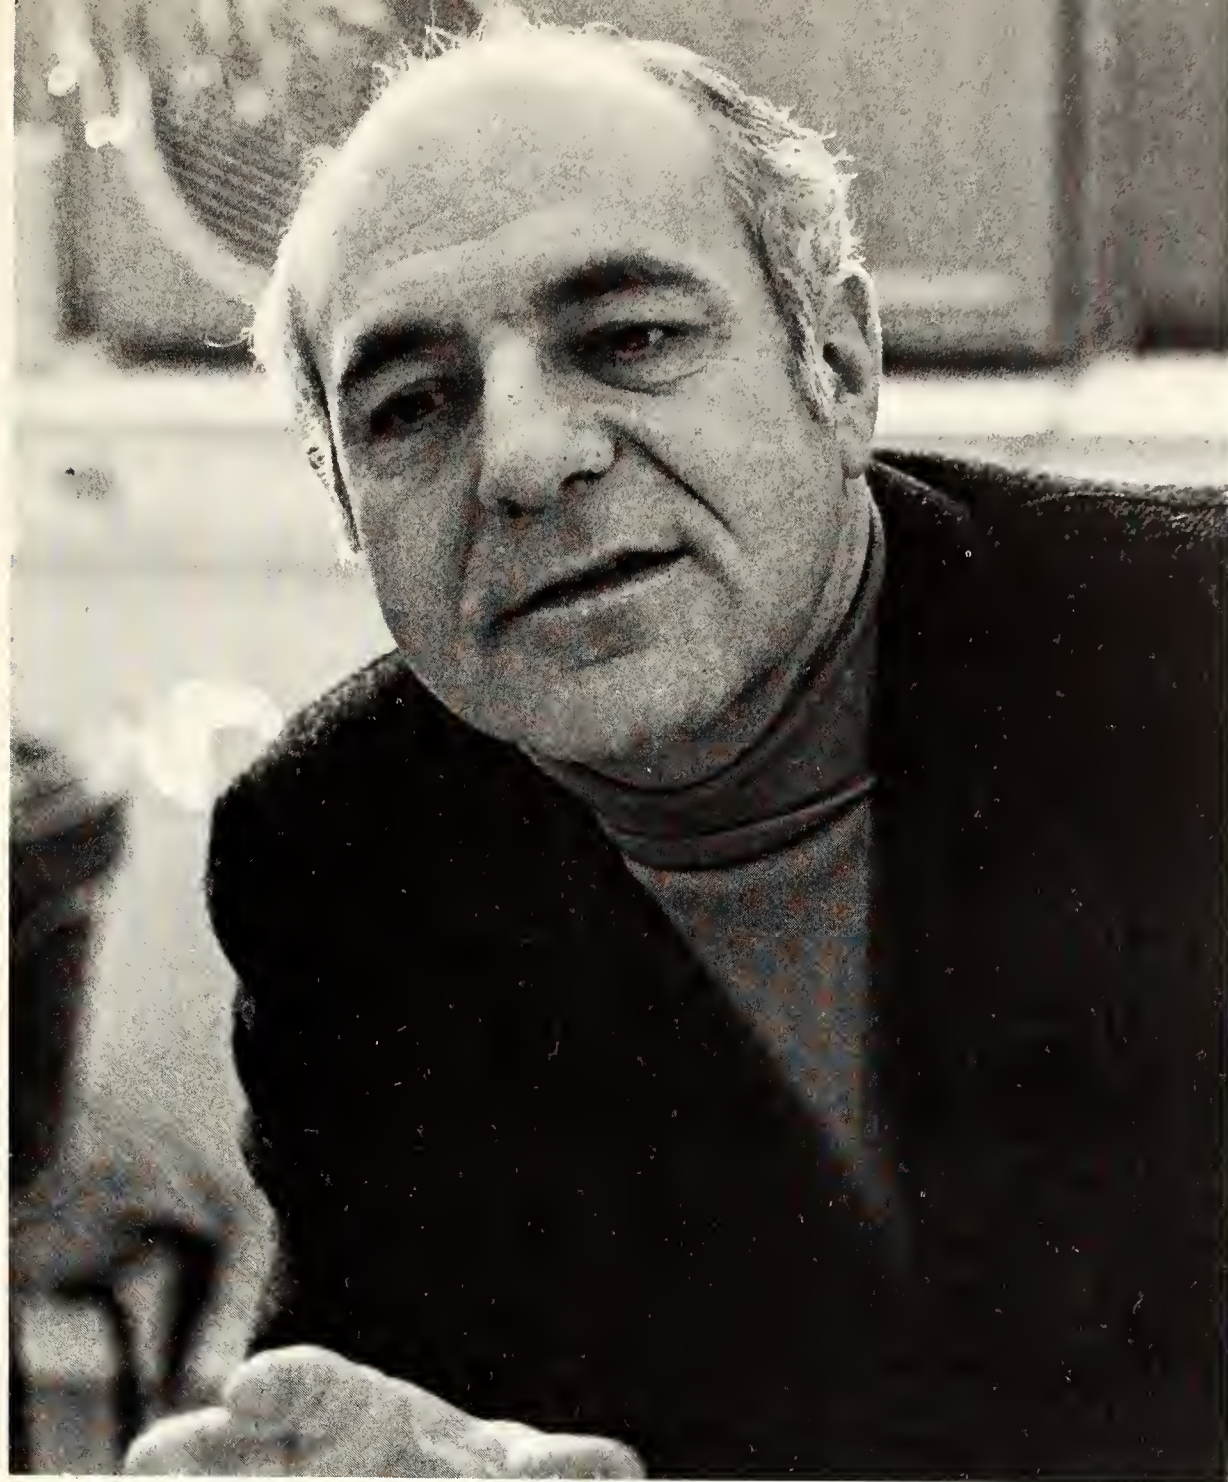

Educational innovation cannot take place when financial resources are not made available. The massive kinds of innovation that need to take place in public schools today demand a large supply of money to enable planning to take place and retraining as well. Differentiated staffing programs have been supported and suggested as one educational

innovation that shows great promise for public schools. This has not been universally adopted because of the change necessary within school districts and the reorientation of teachers and administrators. Any changes that occur in teachers and administrators would have to come over a lengthy period of time. If differentiated staffing is utilized as a means to improve quality of education, then a number of teacher surpluses will be significantly diminished.

There are still areas where there are vacancies in teaching, both in subject matter fields and geographical areas. These are oftentimes not attractive locales in which to live but do have educational requirements. Some of the fields of study in special education, science, women's physical education, etc., still have great demands for additional personnel.

SAMUEL KEYS
Dean, College of Education

What would you do if you had free rein to design one classroom building? Where on campus would you construct it, and what sort of building would it be? You would have unlimited resources.

The question should not be answered as it is posed. To design a building to meet one's own wishes, and without seeking information from users, would seem to me to be an act of folly. Free rein is a very undesirable, and fortunately an unrealistic premise. A good building could result only if needs and conditions were known.

Maybe we shouldn't even build a "classroom building." Because of the way in which learning appears to take place, single purpose buildings may not be a desirable approach. A structure in which there is a mixture of activities that stimulate contact between students and faculty may be more helpful.

Building location should depend

on many factors unknown in the hypothetical situation. Site selection should be based on a campus master plan. I can only suggest that I would try to make the building part of the pedestrian campus. I would do all I could to avoid the loss of valuable existing landscape or building.

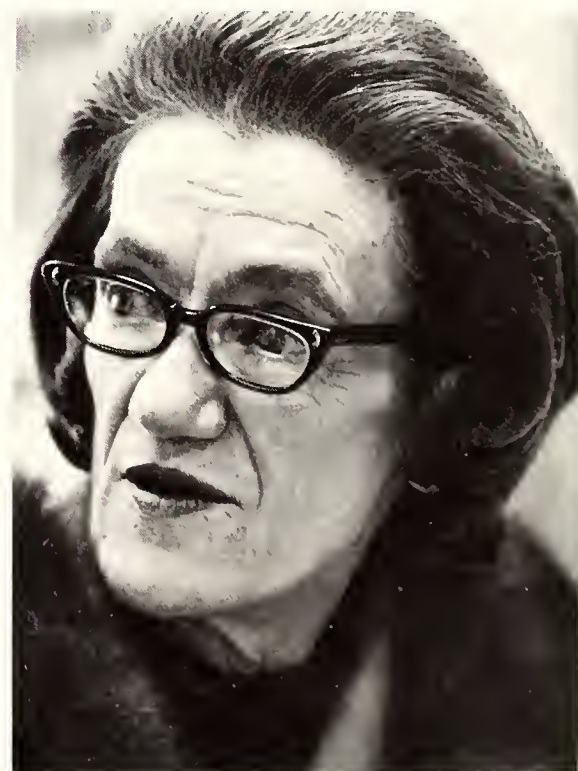

Since many future uses are not known yet, the building would probably provide a framework within which change could occur. The building would respect, and attempt to relate well to surrounding spaces and structures. It would be a modest building that would not overwhelm its users with its monumentality or novelty. Except for very special structures, good buildings are first of all a background for living.

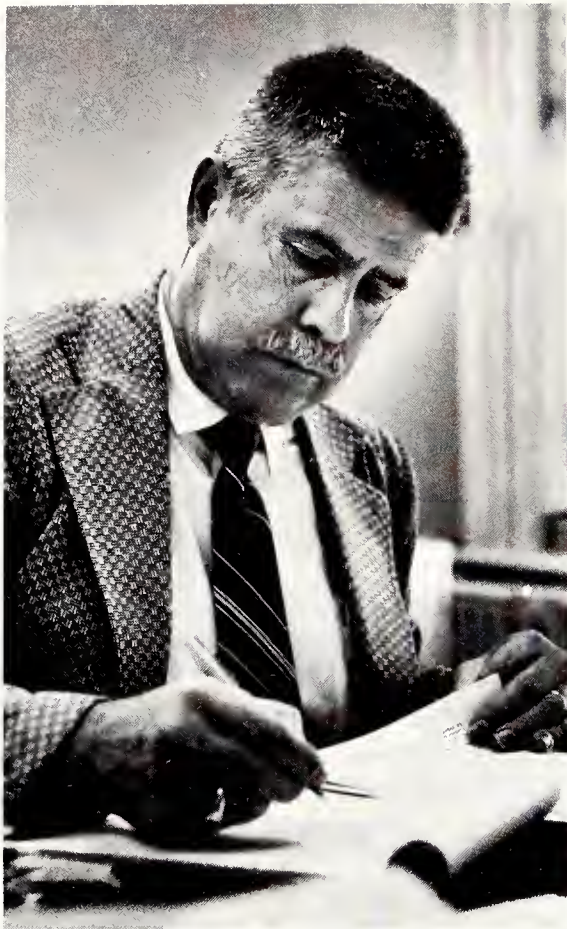

BERND FOERSTER
Dean, College of Architecture and Design

What would you do if the male enrollment in the College of Home Economics tripled in the next three years? How would you adjust the present program to meet new needs?

We'd be pleased because we welcome men students as well as women students. At the present time, we do not have a single course where a male cannot enroll. This policy will continue in the future. Our men graduates have found excellent positions. In our College, we have an on-going program of updating courses and curriculums to meet the current needs.

DORETTA HOFFMAN
Dean, College of Home Economics

What would you do if K-State maintenance men formed a union to bargain for higher pay and better working conditions?

No reply received.

CASE BONEBRAKE
Physical Plant Director

What would you do if a K-State football player and a cheerleader asked you to perform their marriage ceremony on the football field at the new stadium? Would you grant their request, or would you try to convince them to be married at Danforth Chapel?

As a campus pastor, I could respond positively to a couple requesting a marriage ceremony in the K-State football stadium if it meant for them a celebration with family and friends of a commitment to an honest, trusting, respectful give-and-take, responsible relationship. Many students look honestly at the quality and meaning of their relationship and choose to be involved with the pastor in shaping a meaningful ceremony and finding a place such as the beauty of the hills, a home or chapel in which to affirm their individuality and their life together with the support of family, friends and the community of faith. I

would respond negatively to such a request if I sensed the choice of the place and ceremony was a "novelty," indicative of an unhealthy, superficial relationship.

As KSU Coordinator of Religious Activities, I would be sensitive to the University policy and implications of holding a private religious worship ceremony (such as a wedding celebration) on state-owned public property and facilities. Such a ceremony at the stadium would call for coordination with the Athletic Department.

Our University chapels, Danforth and All Faiths, were provided through private funds and designated for student worship services and religious ceremonies such as weddings. Student Union facilities are also available to students for religious group meetings and wedding receptions.

DON FALLON
Coordinator, Religious Activities

What would you do if students living in the three small dorms refused to request those dorms again if fees weren't lowered? They would argue that because they have fewer and less modern facilities (i.e. no air conditioning, fewer social areas) they should not have to pay the same rates as students living in newer dorms.

I would try to help the students to understand that a university is a developing organization and cannot all be new at one time. There is more social and recreational space per person, larger closets, larger windows, higher ceilings, better acoustics, a dining hall and a library in the building and an individual charm superior to the newer ones. The lack of air conditioning is about their only shortcoming. They are never used in the summer. The number of days when cooling is needed in the fall and spring semesters is a small proportion of the total number of operating days.

Many of our students must already understand this, as in accordance with our bond agreement we have charged the same rate for all halls ever since the establishment of our residence hall system in 1965, because based upon student requests our older halls are usually the first to be filled.

THORNTON EDWARDS
Director, Housing and Food Service

What would you do if student use of the Union increased to such an extent that expansion was necessary? Is the concept of two Unions — one on either end of the campus — feasible?

Implicit in the name "Union" is the concept of bringing together all segments of the University community into one common meeting ground. Our philosophy has been that this is the way to get the maximum interaction among otherwise insular segments of the campus population — that in coming to the K-State Union, for one activity or service, students will be exposed to, and perhaps inspired by, other people and other activities. This has been a key factor in the success of the K-State Union as our major focal center of campus life and activity outside the classroom.

By developing more than one Union on a campus, this strength is diluted, while raising other problems of administration, programming, financing and communication. Unless the K-State campus became much larger, expansion and/or renovation of the existing Union building seems preferable to constructing a second Union in another location.

Branch units of certain Union service facilities, e.g., snack bar, school supplies store, vended food locations, have possible merit as a matter of improved student convenience in certain campus areas. A series of service outposts in scattered campus locations is not, however, what a Union is.

RICHARD BLACKBURN
Director of K-State Union

Instructors leave K-State for higher salaries

By Melinda Hodgson

One former associate professor who taught at K-State for 13 years left for another university because of a "\$1500 increase in salary and a little more indication of appreciation for services rendered. A person needs to have the satisfaction of feeling he is appreciated by his department and University."

Another 15-year veteran of K-State left because of a salary increase of "\$1000 to \$1500, facilities and time for research, and attendance of two or three professional meetings per year."

Other reasons for professors leaving K-State were listed in a report "Why Faculty Leave KSU" by Donald Hoyt and Thomas Rawson. Inadequate facilities for present-day research, too-heavy teaching loads, the pressure to research, lack of recognition for tenured staff and family considerations were given as reasons for leaving by recently-resigned faculty.

K-State competes unfavorably on

financial matters, especially salary and future salary prospects, the report stated.

Salaries for K-State's full professors, associate and assistant professors are the lowest among the Big Eight schools; and instructors' salaries rank fourth, according to John Chalmers, vice-president for academic affairs.

K-State lost 47 teachers last year (1971), at least 25 of them among the most talented and distinguished at the school, President James A. McCain said.

"The professors left for salary increases ranging from \$4000 to \$9,000 at other institutions," he said.

"Never have we lost so many of the cream. We have lost many professors in one year before, but they weren't from the top," he added.

"It's not that the faculty members are starving because they're not. It's a matter of competition," Chalmers said.

"More talented people can go elsewhere and get more money," Robert Clack, professor in the Department of Nuclear Engineering, noted. "Money isn't the only reward, but it is a significant one."

Has the money shortage caused the quality of K-State's faculty to decline?

Chalmers was optimistic.

"We're able to get better people than we have ever before," he said. His explanation was that right now there is a surplus of college graduates and teachers.

Even if teachers are relatively cheap to come by right now, Clack pointed out, "a society which rewards its scholars and teachers at a lower rate than it rewards its craftsmen has limited perspectives for progress in the future."

Teacher.

That one word has been interfering with your life for a long time. A progression of these people has passed by you from kindergarten to high school to college.

A teacher seems to spend the better part of his life agonizing students with an endless onslaught of lectures, term papers and exams.

At times he seems almost devoid of emotion. You can't get the homework done, you don't have time to study for the test — and he just doesn't care.

It's easy to be hard when all you do is teach.

But if the student feels that life has demands for him outside of class, maybe — just maybe — the teacher feels the same.

A GTA (Graduate Teaching Assistant). An instructor. A professor. Each one teaches. And to each one, teaching is a part of his or her life-style.

The pages that follow present three people, three life-styles.

Former minister committed to teaching speech

It was 8 p.m. on a still October Wednesday. Slowly, methodically, people filed into the small dark room past a sign which read "Purple Masque Theatre."

For most it was just a time to relax. No one seemed excited or nervous about anything.

Almost no one.

Sitting quietly, impatiently in the crowd was a short, curly-bearded fellow. His eyes darted uneasily. And he bit his mouth a little as the lights dimmed and the play began.

His lips quivered up and down as he recited the dialogue under his breath with the actors. He knew every line perfectly. He should have. He wrote them.

It's quite possible that while he watched his creation, "Jeremiah," come to life in the hands of the K-State Players, Norman Bert wondered more than once where he would be had he kept his job as a Mennonite minister.

But it didn't matter. He said he enjoys the life-style he has chosen.

Bert is a graduate teaching assistant for K-State's speech department. He teaches Oral Communication.

If any of Bert's students are undecided about their futures, they can be sure he understands only too well.

Having grown up in a religious setting in California and attended a church college there, Bert decided to become a minister. In fact, he did pastor a congregation for a year. But fate had other plans.

"There are great responsibilities involved in being a pastor," Bert said. "And many restrictions. Plus, he's got to set an example. There were just too many things that the seminary didn't prepare me for."

Bert and his wife, Barb, sponsored by the church, then traveled to Africa

where he taught secondary school for several years.

The Bert apartment in Jardine Terrace enables the couple to refresh their memories of Africa at will. African artifacts — native drums, carved elephants, hatchets, baskets, dishes, dolls, native artwork — can be seen at every glance.

But religion and the ministry have left a seemingly permanent impact on Norman Bert.

"Jeremiah" is a tragi-comedy using a Biblical character and story to portray a contemporary theme. Primarily, Bert wrote the play as a step toward receiving his master's degree. But he would like to, and plans to, write more plays of this kind.

"Theater is a way for Christians to speak to each other," Bert explained. He sat relaxed, leaning back, very much at ease.

"Religious drama can throw light on religious problems. Drama makes people work and think. It involves them," he added.

Bert said he'd like to try a rock musical.

"Plays should have music. Songs make you stop and look for the writer's message. And I like today's pop music," he said.

Is teaching, then, an interim for bigger things in playwriting?

"No," Bert said with some certainty.

"Playwrights starve. It's very difficult to make money at it. No, I want to teach," he said.

How does he view his role as a teacher?

"My first commitment is to teaching: to help kids, through speech, make themselves clearer, to express their ideas better. This is getting more and more crucial," Bert noted.

Does he ever feel compelled to ex-

press his own feelings on issues by means of the lectern?

"Well, I'm still a citizen. I do have personal prejudices on many current issues that come up here on campus," Bert explained.

"But the lecture podium is not a political platform. If someone asks my view on something, I don't hesitate to give it. I don't feel I need to hide my feelings.

"Now, if a student gives a speech in class and takes a stand with which I strongly disagree, and does it poorly, or antagonizes me with his belligerence, I will criticize him. I'll tell him that if he is going to take this position he'd better do this or develop that a little better. I must let him know the type of effect he had on his audience," he said.

Barbara Bert works with a local group, "Volunteers for the Aged." But her main concerns are for their 2-year-old daughter, Tabitha, and 8-month-old son, Jeremy.

"Norman's work doesn't give us a lot of time for socializing," she said, "—especially with his play going on. Plus, we're pretty new to the community. But we have some nice friends; and they're not just faculty people, either."

Bert remarked about being a teacher and a husband.

"I guess I feel guilty about being busy so much and leaving Barb here with no chance to do much else but be a mother and housekeeper. I mean, I really don't support Women's Lib, but I think she needs to pursue other things," he said.

Norman Bert has a past that has equipped him to cope with the present — a present in which he plays a key role in the futures of many young people.

And that role makes his life-style very important, very unique.

Art instructor's life revolves around her work

The "nine-to-five" life is a pillar of the industrialized society.

The "punch clock" worker leaves home as a father, a bachelor or a student. And for the whole work day he is something quite alienated from that role.

Many a student dreams of the career in which he would be able to weave his work into every thread of his life.

"My life is art," explained Karol Winegardner, design instructor and K-State's only commercial art teacher. Her voice rang with surety.

Confidence about her life's work, however, was some time in coming. After majoring in commercial art and receiving her B.F.A. degree from the Kansas City Art Institute, Ms. Winegardner moved rather quickly into professional work.

She was employed first by a Houston airline doing various types of graphics work. After that she worked for a printing firm in Kansas City.

But freedom gradually became a deciding element in Ms. Winegardner's career.

"In professional work there was no chance to be aesthetic if you were at the bottom. No artistic freedom. I had to do specific, mechanical tasks. And in the lower echelon where I was, it just wasn't very satisfying," she explained.

Her voice is not strong. But she speaks with firmness. Her slight, delicate stature is highlighted by stern, piercing eyes that seem to examine and absorb. Her expressions are unfailingly warm.

One can easily picture her in a field that depends heavily on public relations.

But Ms. Winegardner said she did not possess a vital feature among business professionals.

"To get to the top you have to be aggressive. I'm just not," she said.

"And the top, or near it, is where one has to be to be free. Free to create and operate in a way that is gratifying," she added.

The desire for artistic gratification found Ms. Winegardner going back to school and emerging with an M.F.A. in painting from the University of Oklahoma. A trip to Europe followed. And on return to the United States, K-State gave her a call.

So how does she feel about teaching? And how does her life now satisfy her as an artist and an individual?

"I enjoy it. I work in a situation that allows me to expand and be free to create what I want. I'm not in the vanguard of art. My works don't win prizes; they give me satisfaction," she said.

Ms. Winegardner's Coachlamp apartment reflects her leanings in art. The decor is colorful and slightly bold. A large, handsome piece of work dominates the main room. Her own paintings are placed throughout the apartment. Plants, a current fascination of hers, sit along a large window sill.

"My own style is organic. Like the plants. Strong, intense colors. Much emphasis on form. I've been working on the same style for years, really," she said.

What about her role as a teacher? How does she see herself in regard to guiding students in the field of art?

"I feel I can be most effective as a teacher in commercial art. This is where I've had the real experience," she answered.

Ms. Winegardner said as a teacher she can be "ideal." That is, she can teach the ideals of commercial art.

"In class we discuss planes of space, line quality, positive and negative forms, arrangement, dimensions," she said.

Her classes are small, studio arrangements. This allows her to move around among the students, talk with them individually about their work and critique it. Ms. Winegardner knows them by name.

This, she said, aids her in a key area — motivating students.

"I try to find out what their in-

terests are and develop them," she said.

Can she, as a teacher, predict which students will continue on in art?

"I couldn't begin to predict that," she said. She explained she seldom finds out where her students end up after they leave the University.

"But usually I can tell they are serious when it becomes apparent that the grade is no longer the big thing, but they are working for self-improvement. Then they have matured to a real seriousness in art," Ms. Winegardner said.

"Art is such a personal thing. It takes time. At first you don't understand everything you are doing, so you start putting things together. You try to get reactions. Then you work on it some more," she explained.

Do personal preferences pose a problem for an art teacher?

"It would be extremely hard to separate personal leanings from teaching," she said.

"But it won't be a problem for the student as long as he or she studies under enough people," she added.

The department, she said, tries to give both the students and the teacher a free hand. This is important, she explained, "So new ideas are not lost."

Karol Winegardner is not like some teachers. She may not even be like some of her students.

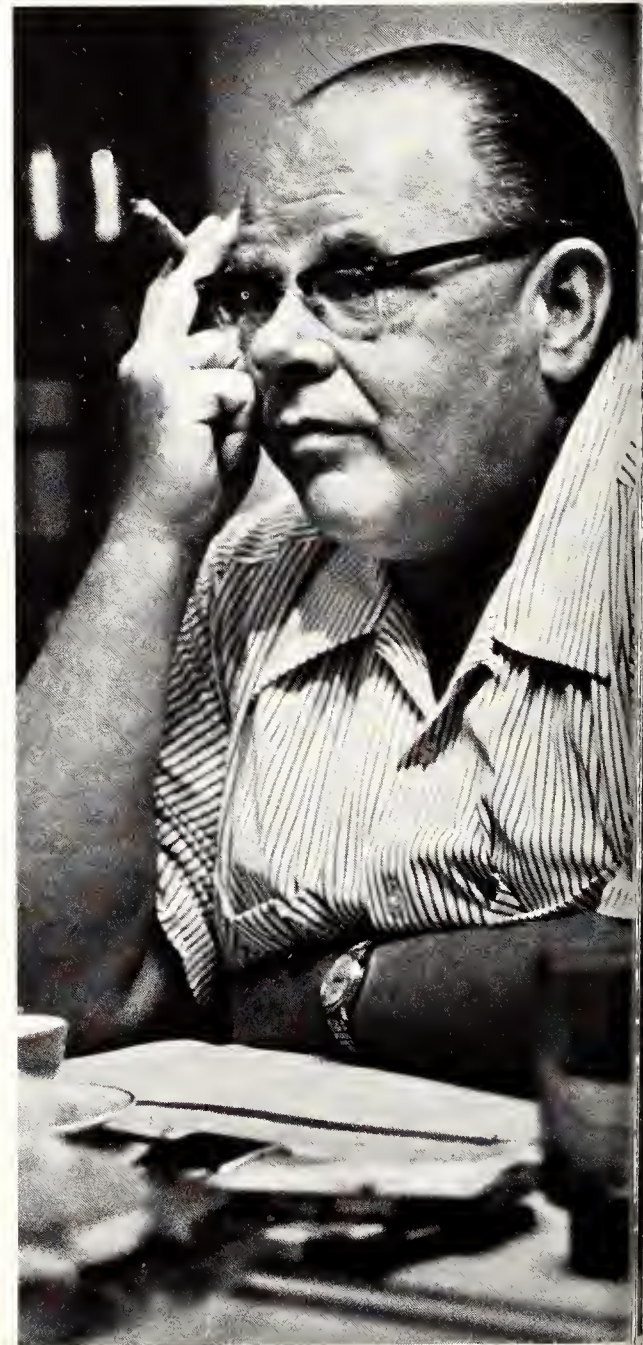

"I'm not very active in the community. Maybe I'm not a good citizen," she admitted.

But chances are her students do not come to her for reasons of citizenry. Most likely they come because they share with her a desire to know art a little better.

Karol Winegardner lives a lifestyle that makes her sensitive to the student in art.

Art and teaching is not "nine to five" for Ms. Winegardner. It's sunup to sundown.

Schnur combines enthusiasm with experience

Some profs are blah. They're dull and wishy-washy.

Other profs are semi-blah. They're interesting but they don't dig into anything that's got "meat" to it. They aren't working with current developments in their fields and have no practical experience to bring to the students.

Then once in a while there's a prof who's got both personal enthusiasm and current, practical experience. He knows what he's talking about. And it's dynamite.

Many have placed Alfred Schnur among the "dynamite" profs. Schnur is the head of the Corrections Option Program under the sociology department at K-State.

The man presents a striking figure — one that suggests a determination and a forceful will.

Yet a smile often breaks his heavy features, and a gentleness in his manner belies your first feeling of awe at his massive build.

The rare combination of practical skill and an artful conveyance of it characterizes Schnur.

In his efforts to inform his students, Schnur presents a well-rounded educational program in that he invigorates his teaching with his own practical background.

Born in Erie, Pa., Schnur received his B.A. from the University of Pittsburgh and his M.A. and Ph.D. degrees from the University of Wisconsin.

Teaching offers perhaps the best avenue for affecting a positive change in the field of criminology and corrections, according to Schnur.

"So much is being done wrong in criminal correction that I want to reach as many people as possible with the truth and the best method of dealing with crime," he said.

And if called upon to express his own views in class, Schnur is not hesitant.

"Yes, I often come on strong with my feelings. But let's be realistic — the kids will take it or leave it. And I want different opinions and ideas," he said.

Once students are made aware of "what is essential and inevitable in prison reform, some of their regressive attitudes toward convicts are destroyed," he said.

Schnur said he feels they can "use what was learned in class along with their own creativity and imagination to do something positive in the field."

"Journalists, architects, even musical therapists have given their efforts to correctional endeavors," he said.

In an article entitled "Pre-Service Training," he presents his conception of an ideal correctional curriculum: ". . . as an ideal we want to develop students who know what is being done in corrections today, and the pros and cons of these operations; who know what has been tried in corrections and found wanting, or effective, as the case may be We want our students to develop into persistent, dedicated, sincere men who see the picture and are not merely narrow specialists learning more and more about less and less."

Schnur himself is exceptional in that he can use his personal experiences to validate the theoretical information he presents.

Besides his teaching experiences, he has field experience as an associate warden at the Minnesota State Prison, and has served as a consultant and researcher.

He lounged comfortably on his living room sofa, and with a voice strong with conviction, launched into an endless stream of ideas, facts, and personal philosophy on the correctional system as it now exists in the United States.

His enthusiasm was evident in his direct, intense gaze, in his gestures

and his constant swapping of pipe for cigar and back again.

Schnur has dedicated himself to the life-long task of instituting an effective and realistic program of corrections.

Presently Schnur is involved in much of the actual groundwork toward changing the correctional system in Kansas through penal reform groups and by fighting impending legislation that threatens to hamper his proposed reforms.

"Some correctional institutions are seriously evaluating and reforming their effectiveness and their personnel," he said.

"That's good. But it's only 'patchwork.' We need — we must have — the young people and the new ideas to fill these jobs," he added.

Schnur's son, Alfred, Jr., seems one of the most likely candidates for spreading the philosophies of his father. So does his wife Jacqueline, who also is involved in the community through the League of Women Voters.

Whereas most graduates and many instructors are still looking for a place in the socio-educational structure, Alfred Schnur has found his niche.

He knows what he wants to see accomplished, and he can make people believe what he says.

Schnur brings to his students a tight, personal grasp of the field of criminology and corrections. And he comes through with fervor, finesse and commitment.

But ultimately, Alfred Schnur would like — through teaching — to instigate change. He says he knows what the situation is like and where it should be heading.

He should. He's been there.

GTA. Instructor. Professor.

A simple Jardine Terrace residence. A colorfully-furnished Coachlamp apartment. A spacious Manhattan duplex.

An office shared with several others. A semi-private office. A private office.

A GTA who is still building, growing and experimenting. An instructor whose interactions are largely with her field and her students. A professor whose credentials, connections and commitments thrust him into extra-University concerns.

All have life-styles indicative of each one's stage in the echelon of education. All have unique worlds apart from those that meet the student's eye.

Yes, students feel they have roles that stretch beyond class. So do teachers.

Regents raise tuition, cut graduate programs

By Neil Woerman

"The next item on the agenda is number four — the COCAO report . . . I move we approve item four. I second. All in favor . . ."

"I move approval of item six — tuition increase."

With this speed, this business-like efficiency, this lack of discussion, the Kansas Board of Regents, the nine-man board governing the six state-supported schools, cast their approval for two items which will affect Kansas college students financially and academically.

In November the regents accepted the report of the Council of Chief Academic Officers (COCAO), a committee of vice-presidents from the six state-supported schools. The COCAO report recommended to the board that six graduate programs at K-State be discontinued, and 17 programs be placed on provisional status to be reviewed after three years.

According to Jess Stewart, regent chairman and a Wamego funeral director, the report is "the most important study and document to come out of the regents' meetings in the last several years, and its effect will be felt for many years to come."

Upon approving the report, the regents commented that it is unique in being the only self-evaluation by a state of its academic system.

In the summer of 1972, the

regents also found it in their hearts to raise tuition at the six state schools. In an attempt to keep fees at 20 to 25 percent, in-state tuition was raised \$25, and out-of-state tuition \$125 to be effective in the fall 1973 semester.

And in early December, Prudence Hutton, the first woman to serve on the board since 1942, was appointed by Gov. Robert Docking to fill the unexpired term of Tom Griffith, Manhattan regent who died in November.

Ms. Hutton not only filled a void by putting a woman on the board, but she also gave the board the point of view of a Republican, a K-State graduate and an educator. She is a part-time English instructor at Bethel College in Newton.

Regent action not only affected K-State this year; other state schools, particularly KU, were influenced, too.

When the fall semester began, KU found itself without a chancellor. E. Laurence Chalmers had resigned as chancellor citing his divorce from his wife as his reason. Raymond Nichols, KU executive secretary, was appointed to fill the position temporarily, and search committees were formed to find a permanent replacement.

One ironic note to Chalmers' resignation was that in 1970, the regents almost had expelled him by a 4 to 3 vote following a series of arson on the KU campus. This time

Chalmers made the decision with no apparent force from the board.

These actions by the regents, along with their minor administrative duties are passed over with the same speed and lack of debate in their monthly meetings. The regents have been criticized lately for this lack of public discussion of topics which have such great effect on so many students.

Stewart explained that the agenda is passed over quickly in their meetings to keep the sessions from becoming overly-long and boring. The November meeting lasted less than an hour.

Instead of discussion occurring in the regents' monthly meetings, Stewart said, the discussion occurs in committee meetings, which according to Stewart, are open to the press.

The board has eight standing committees, plus ad hoc committees when circumstances call for their formation. Each of the regents sits on three or four committees.

When the board meets in full to take action on the measures, Stewart said, they usually act according to the committee's recommendations without further discussion from the board.

"We had to do it this way, or we'd be meeting 30 days a month," Stewart said.

FALL SEMESTER BOARD OF REGENTS

— Top Row: Max Bickford, Jess Stewart, Carl L. Courter, Robert Helman, Elmer C. Jackson, Jr., James J. Basham. Bottom Row: William F. Danenbarger, Paul R. Wunsch, Henry A. Bubb, T. J. Griffith.

STUDENTS

Even before college begins to teach you to be a chemist or a teacher or an accountant, it teaches you to be something else: a student.

But students and studying are not necessarily synonymous. Going to college is not only reading, taking tests and writing papers — students do lots of other things.

For instance, students become depressed; but they also have to find ways to work off excess energy. Students like to drink; but if they don't, they find other ways to amuse themselves. Students are counseled through the Center for Student Development; but they help each other through University for Man.

And students often ask themselves what college is worth.

On the following pages, we'll try to show you what the student does when he's not studying. We'll try to show you how college students are learning to live.

Aggieville comes alive nightly

By Ann Bales

Three schizophrenic blocks — an area with a split personality. Sometimes quiet and empty — at other times, noisy and crowded.

Where is this place? It's not far from campus. Everyone goes there at one time or other. It's Aggieville — K-State's own shopping and entertainment center.

But Aggieville has changed with the times. In the thirties, it sported a ballroom where the Cavalier Club and Brother's Tavern are now located. Because Kansas was a dry state then, there were no bars. Instead, students congregated at drug stores, pool halls and the one movie theater.

Today, Aggieville is a mixture of grocery stores, drug stores, expensive shops, and numerous bars and eating establishments.

During the day, a subdued at-

mosphere prevails. It's as though Aggieville were waiting . . . waiting for . . .

NIGHT TIME . . . and Aggieville bursts into life. The bars, open but nearly empty since afternoon, suddenly fill as weary students swarm in . . . to forget a test, or celebrate a victorious football game.

Tame, quiet Aggieville is forgotten for six hours as exuberant bar-hoppers and more sedate moviegoers mill on the sidewalks, window-shopping and greeting friends.

Then all becomes silent after the "last call for beer" is heard. Students find their ways back to dorms or houses for sleep, or another night of cramming.

And Aggieville, breathing a deep sigh of relief, basks in the late night air, waiting for tomorrow.

This crazy materialistic society. They want a price tag on everything. For crying out loud, there are some things that just can't be run through a cash register.

But indulge in a little make-believe, if you will, and think money.

If you had to — if you really **had** to — put a monetary value on four years of college, what would it be? Think of the studying, the people, the triumphant gains, the shattering losses.

What's your bid? That's what we asked K-Staters:
—"\$8,000."

—"I refuse to think of something so irreplaceable in terms of money."

—"30,000."

—"25,000-30,000."

—"No limit. If I had to buy it back I'd pay as much as I could get my hands on."

—"50,000."

—"It has no monetary value."

—"What price is life?"

—"10,000."

—"Well, it's been the most important experience in my life. Worth a lot more than I spent on it."

—"12,000, but I feel guilty about saying that."

We feel guilty about asking it.

Handwritten scribbles and marks on the right edge of the page.

Girl-watchers beware: your turn may be next

By Melinda Hodgson

K-State has a group of eager, aggressive, dedicated, enthusiastic men devoted to a cause. How noble! But when their goal is to watch girls' legs, chests, and rear ends, is it so impressive?

These men are everywhere — sitting on the wall in front of the Union, in the library, on benches, in Aggieville bars, in front of the vet buildings and in food centers.

They don't act rationally. They can be obnoxious, crude, cruel and bastardly for no reason at all.

Girl-watchers. They certainly wouldn't win any BMOC nominations by the girls being surveyed. Most women enjoy a little honest admiration, but to be ogled at, stared at and yelled at by strange men is degrading.

Reasons for the pastime aren't clear. Various explanations could be:

- Maybe it is just a game — something to do between classes.
- It could be the guys want to meet

some girls. But does being yelled at make girls feel like striking up an acquaintance?

- Possibly they are trying to impress the other guys with how much nerve they have. But that sounds like a junior high trick.

- Perhaps consciously or sub-consciously they want to put women down. By humiliating other people their own egos are boosted.

Besides the obvious sit-on-the-wall-and-watch-the-girls trick there are other devious methods that men have for exploiting women. For instance, beware of the usually non-chalant guy who is suddenly terribly polite: opening car doors, letting you walk up stairs ahead of him and picking up pencils you drop. He could have ulterior motives.

Men may protest, "But girls watch us, too. They look at us when we walk by."

Sure they do — curiosity is human. But on the whole, women aren't as aggressive about their

watching as men are. And most women don't yell rude remarks at men they don't know, either. (In all fairness, the majority of girl-watchers probably mean no harm.)

How should women react to harassment? Everyone resolves it in her own way. Ann simply ignores the guys and walks right on by. Linda turns and openly confronts them by asking why they are treating her that way. Sue walks beside a guy she knows but admits this could be an escape rather than a solution. Janet just avoids the Union, the library, benches, Aggieville, vet buildings and food centers.

As women become more aware of their own potentials, they begin to resent being treated like sex objects.

So beware, all obnoxious girl-watchers, someday you may be walking up the sidewalk to the Union when a woman yells at you, "Hey babe! Wanna date?"

Bells, flashing lights mesmerize pinball wizards

By Bruce Voigt

"Hey Hort, get me another beer!" Lights flash. Bells ring. Colors explode on a kaleidoscopic background. Beer flows, spills, runs, drips onto the floor. "Damn it!"

The lights, the bells, the colors: the pinball machine.

"I'm gonna beat this machine if it kills me." Three more games — 25 cents.

"Through the gate . . . through the gate . . . the gate's open, brother!"

"Over here, over here! Five thousand big ones if you make it!"

"You're killing it. Man, you're killing it."

"Don't let it down there. Watch it. **Watch It! Bro-o-ther!**"

The first ones to the bars? The ones who wait for the bartenders to arrive? Take a look sometime. The pinball wizards. They're the ones.

The ones that make the noise. The ones that drop the quarters. The ones that have a fanatic's gleam in their eyes.

"I don't know why I like to play so much. It's fun. But sometimes I think I do it because I have to. I get a real kick out of beating the machine. It makes me a winner, I guess."

Drip, drip. The glass over the red and white bumpers is smeared.

"There she goes. Just two thousand more and we've got it. Just . . . Look out! Damn!"

The profanity is an integral part of it. It's serious business. Getting beat by a machine. A machine that's out to screw you.

"It's one of those things where you pay for the satisfaction of beating a machine. But if you think about it, the machine always wins. You have to pay to lose, and you have to pay to

win. The machine comes out ahead, always."

Drip, drip, drip. The legs and the flipper buttons are smeared.

"Another pitch. Hey, one more pitcher, over here! And a dollar's worth of change, okay?"

"All right. We did it. We did it! What a game! She-e-it!"

"Punch three more games."

Drip, drip, drip, drip. The floor is wet. The beer is smeared into the dirt. The lights flash. The bells stop ringing. Everything is finally quiet.

"We did it!"

The machine knows — its coffers are full of quarters and dimes. It smiles a pinball victory smile. The fruits of victory — the dripping beer, the tossed ashes, the off-kilter tilter of the bumpers, the gates, the playing board.

The machine knows who won.

Union bridges gap between home and classroom

By Karla Brockman

Just getting inside the K-State Union is a fascinating experience because parking is nearly impossible.

At last you win a place and the long walk, weaving between cars, begins. Before you reach the door, you encounter another maze, this being the unorganized mass of bicycles growing from every permanent post in the area.

You push open the heavy mirrored glass doors and all at once . . . people! Crowding, moving bodies coming and going in all directions at all speeds. They are friendly or cold depending on your mood, as is the modern building. It is changeable. A place to study, to relax, have fun or worry.

Walking downstairs you find the recreation center alive with the dull roll of bowling balls and the constant hard click of billiard balls hitting each other. It is in this area that students practice style and accuracy in a number of sports and games. A few small tables are covered with dirty clear plastic cups, chess boards, candy wrappers and crumpled **Collegians**. You can hear a bouncing ping pong ball in the background.

Wide stairs lead to the Catskeller coffeehouse filled with students trying to study and then on to the indoor courtyard where that fantastic, futuristic purple cat face dangles.

Elderly ladies are clustered around the Forum Theatre entrance waiting for a convention session to begin.

"When I was in school . . . my goodness . . . Mabel, what is that? A pony tail on a boy?! As I said, when I was in school . . ."

And here on the right we have the central attraction: the two-story, double-decker, blue-carpeted wonder known as the bookstore. Here you may purchase books to enrich your education, broaden your horizons and empty your wallet.

"Why, yes, we have a list of course requirements. You need only three texts for that class. Here they are, volumes one, two and three at only \$10.75 each, a very good price."

Up and up and up and onward to the second floor of the store. Here are gifts, candles, jewelry, sweatshirts and toothpaste.

Everywhere there are faces dodging and meeting other faces to the accompaniment of a faint hum in the background. The hum is coming from the food service area, where students collect around tables with Cokes, sandwiches and potato chips for arguments, discussions, hands of bridge and study sessions. A lonely figure dozes, his head propped up on a stack of books on one of the tables which is covered with coffee stains and cigarette ashes.

If you have the energy to climb yet another flight of stairs to the banquet rooms and meeting rooms you can get still another view of the cat-face in the courtyard — from the top. Meeting rooms are half-empty as committees and clubs decide and reject and decide again. They start late and never end and "It's 6:00 and I want to go home . . . I want to go home . . . I want to go home."

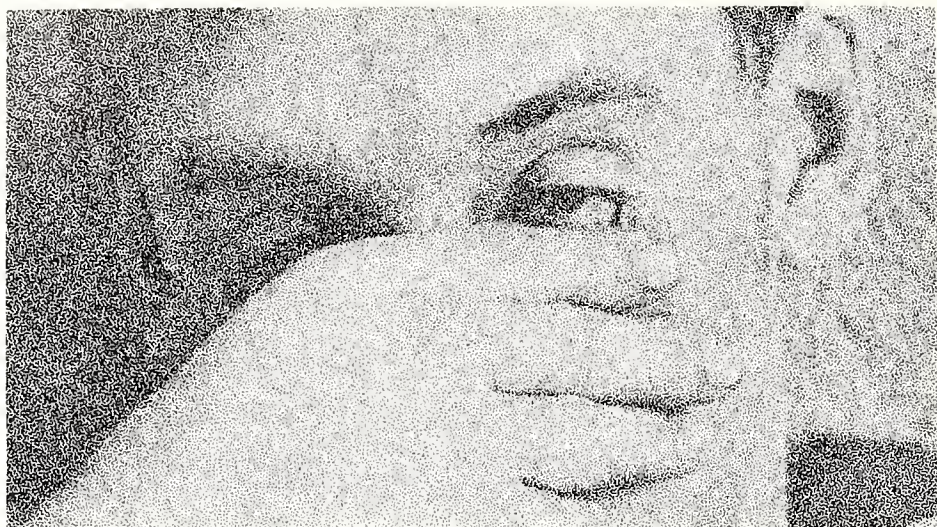

After the meetings end there may still be work for the few members who volunteer. Taking an elevator (by now you are too tired to walk up to the fourth and last floor) to the activities center, you can make stencils to print posters publicizing an event or type invitations and address envelopes.

Leaving the Union you see a deserted lobby. The doors are even heavier than when you entered, hours before, and when opened they reveal a darkened campus. The car now sits alone in the large parking lot which has turned from grey-white in the sun to stark yellow from the telephone pole light in the center.

You may be accused of living in the Union by a student friend who doesn't see beyond the vending machines and bowling lanes. There are many, however, who realize that the K-State Union is not only for fun and relaxation, but it is also made up of thinking, working, cram sessions and service projects.

Students fight periodic slumps

By Melinda Hodgson

When the downs are really down and the ups are non-existent, don't feel alone. Students have been having downs, slumps or depressions for a long time.

The term "sophomore slump" is misleading because sophomores certainly don't have a monopoly on depression. The slump can come at any time during a college career. Students said slumps came anywhere from the first semester of their freshman year to the last semester of their senior year. And more than one slump is not uncommon. (One student reported his slump has lasted for the past 20 years.)

What causes these slumps? The college years are a time of upheavals and uncertainties, E. Robert Sinnett, director of Mental Health Services, said. Deciding what kind of person he wants to be, boy-girl problems, parental problems and uncertainty about the future can complicate a student's life.

A freshman's slump could be caused by adjustment problems, being away from home or the realization that he is no longer in high school and the competition is tougher.

Sophomore slumps often come because the newness of college has worn off.

"I got cocky and took 18 hours. I thought it would be a breeze, but I just don't feel like doing any work," one sophomore said.

"I was fed up. I had one bad class I hated, and it ruined the whole semester," a junior said.

"I changed my major five times in

one semester," another added.

"A student goes along doing whatever comes. Then he comes to a point where he realizes he has to take his life under control, decide what he wants and fight to get it," Christine Hunt, counselor in the Center for Student Development, said.

A senior can become depressed when he realizes that after 16 years of being a student, he will have to go out in the world and make his own way, she said.

Classes may be so easy that the senior gets bored. He may come to think of college life as artificial. Or his values may have changed, and he now wants a different life style than the one he spent four years training for, she added.

How does a student get over his slump? New classes, teachers, roommates or friends may help. Taking a semester's or year's vacation from school may be what is needed to overcome a depression.

"Growth is what helps people out of slumps," Ms. Hunt said. Sometimes all they need is a little impetus, a little outside help. Taking a lighter class load until his other problems are worked out may help.

"Sometimes a person needs to stop and take stock of himself and make changes," Sinnett said.

"Perhaps if we didn't have some difficulties, life would be dull, like a factory job," he concluded.

So when the sophomore (or freshman or junior or senior) slump hits, just remember that well-known physics principle: what goes down must come up.

Students strive to release tension, expend energy

By Dave Chartrand

Physicists tell us there is an energy crisis. The earth is expending energy faster than it is absorbing it. Photosynthesis, fossil fuels and our other big energy sources are limited — even mother sun is growing old.

Men of science are working nights to develop more powerful nuclear reactors capable of squeezing greater amounts of energy out of our friend uranium.

However, these people are searching in the wrong places. They are over-looking the obvious solution to the problem — the student.

Students sit in wretched desks all day, hunched over books, cooped up in dreary dorms — slaves to routine. Tension builds. Energy stockpiles.

So we asked students what they do to get rid of this excess energy, or what outlets they have for tension.

We submit our findings:

—I walk around the dorm, go into somebody else's room and bother him.

—At the house here we bought some boxing gloves. When the guys feel they want to get rid of some excess energy, they go downstairs in the dining room and beat the hell out of each other. They enjoy it.

—I call somebody and talk.

—The girls on my floor make Kool-Aid and jump on their beds. It's silly, but we like it.

—I play "The Stripper" on my trumpet. It goes over big.

—When I get tense I gag my roommate, get a migraine headache and cry.

—I play my guitar and sing loudly. I also write letters.

—I go camping. Handball is good, too. That really takes out the tension.

—I sleep. I also get up at 6 a.m. and run about three miles.

—I eat.

—I walk my dog.

—I go bicycling.

—My roommate and I have bunks. I get on the bottom bunk, lie on my back and kick her in the back through the mattress. It shakes her up. I love it.

—I let go with a blood-curdling scream and kick the nearest thing. Once I kicked the closet door, and it bounced back and hit me in the face.

—When I'm really hacked off, I get in the car and drive like hell. It's not very safe but I can't help it.

—I laugh.

There you have it. A limitless stockpile of energy — student energy — sufficient to sustain the earth *ad infinitum*. All going to waste.

Come on, science freaks. Here is your big moment. The Nobel Prize is waiting.

Student Health offers outpatient, hospital services

By Jan Paschal

"It's not bad compared to the real world. I'm used to a military hospital where you have to wait all day," commented a young man who was waiting to see the doctor.

Other students sat patiently, doing homework, reading magazines or staring off into space. Some had been waiting for almost an hour; perhaps others would make it in and out in twenty minutes — if they had appointments.

The scene is an average day at Lafene Student Health Center, an on-campus medical clinic and accredited hospital funded totally by student fees.

While many students bitch and refer to Lafene as "Student Death," most of them don't realize that on an average day approximately 250 to 300 patients will have passed through the clinic's doors — to be treated by a staff of six full-time and three part-time physicians.

To relieve this staff shortage and perhaps reduce the waiting stigma, Lafene introduced an appointment policy this fall. Those students desiring consultations with a physician prior to treatment were asked to come in to the health center and

make appointments.

"I was disappointed that I couldn't get an appointment for a sore throat," one student said, when she learned that Student Health physicians prefer to treat colds and sore throats on the walk-in basis.

"I'd never go in without an appointment," another student said, stating that she had never waited longer than 10 or 15 minutes.

Also, for the first time in K-State's history, students can obtain contraceptives at Lafene after attending a required educational session on birth control and undergoing a physical examination.

Known as the Family Planning Clinic, this service was established by Lafene personnel during July, 1972, after Riley County health authorities said they would no longer dispense birth control pills or other contraceptive devices to K-State students.

Students attending one of the weekly sessions in Lafene's basement sat silently as they waited for the slide and tape presentation to begin. Many had reacted with mild shock when asked to present their ID cards at the door a few moments

before. Of the usual group of 35, perhaps two or three male students are present at each session.

Mike Bradshaw, health educator, handed out pieces of scrap paper to the students after the lecture — "for those questions you might not otherwise ask."

"I didn't learn anything I didn't know before," one girl said, as she left the session.

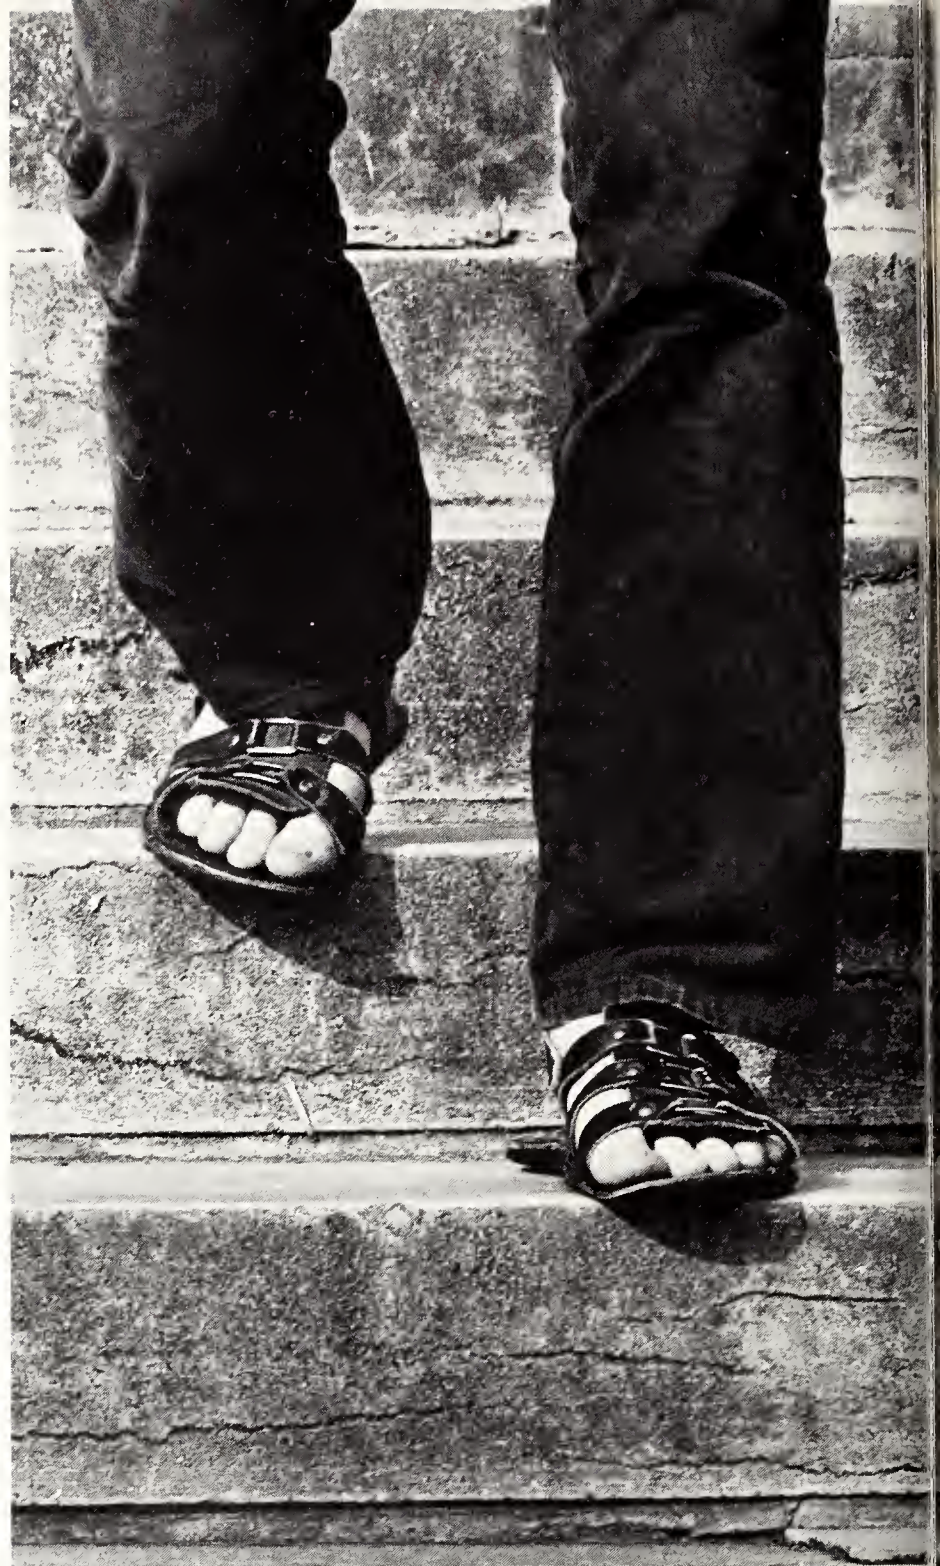

Another girl said she would have preferred a private consultation with a physician to the "self-conscious" atmosphere prevailing at the clinic.

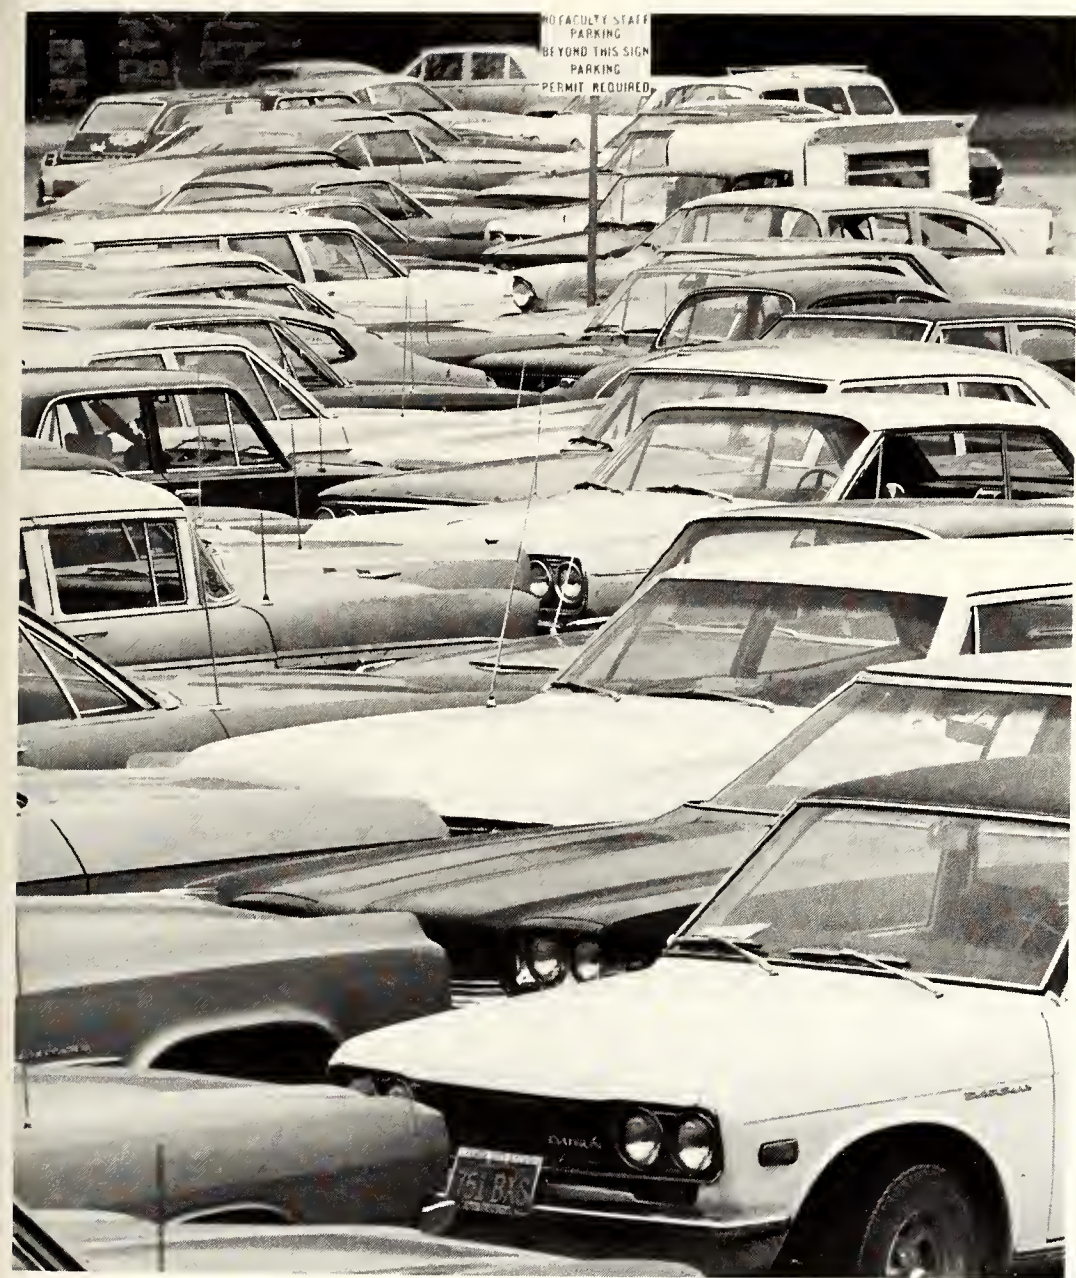

Among other special services offered to students by Lafene are mental health care, preparation of special diets and campus sanitation.

A 40-bed student hospital, fully accredited by the Joint Commission on Accreditation of Hospitals, is maintained on Lafene's second floor.

One student, citing a major improvement in Lafene's medical staff during the past three years she has attended K-State, summed up student opinion about the clinic by saying, "There's a lot to be desired about Student Health, but it has improved, and it could be a lot worse."

Walking aids transportation woes

The shortest distance between two given points is a straight line.

In speaking of transportation, walking would logically be the quickest, easiest, and most conventional means of getting between any two points. (This is assuming, of course, that roads curve and that for convenience sake, the given points aren't much more than campus distance from each other.)

At approximately quarter past the hour, doors of campus buildings fly open, and hundreds of K-State students flock to cars and bicycles. With some 3,500 faculty cars, in addition to 9,000 student cars, over 800 bicycles and considerably less parking space, there exists a definite parking/transportation problem on campus.

In speaking of transportation, walking between two points a little farther than campus-distance apart (e.g. downtown Manhattan) would not be detrimental to the average student's health; rather, it would be

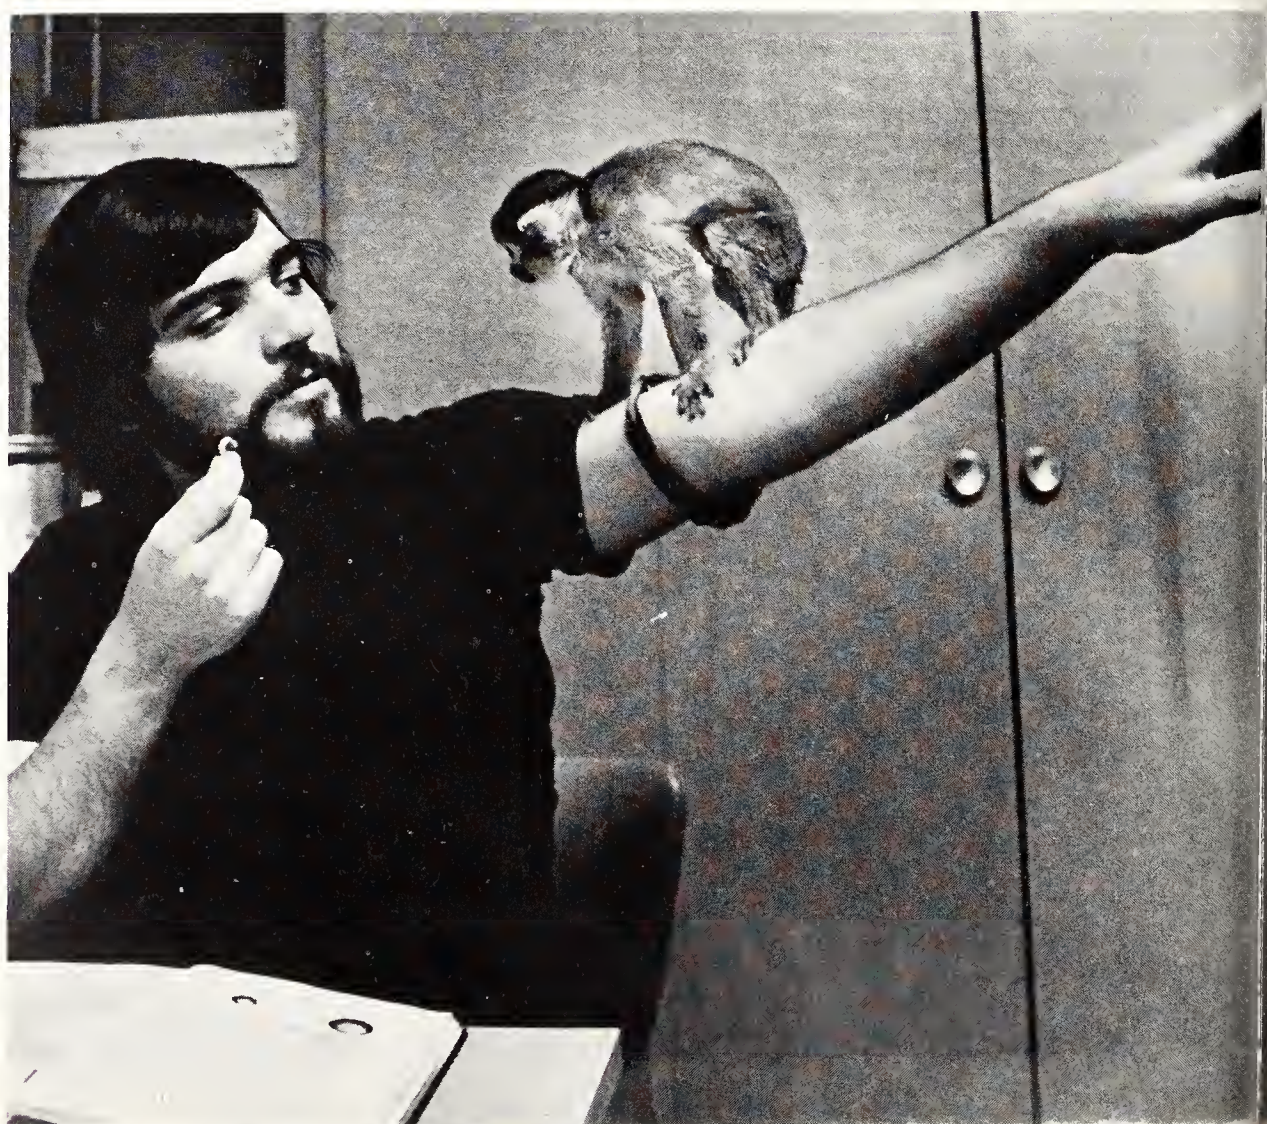

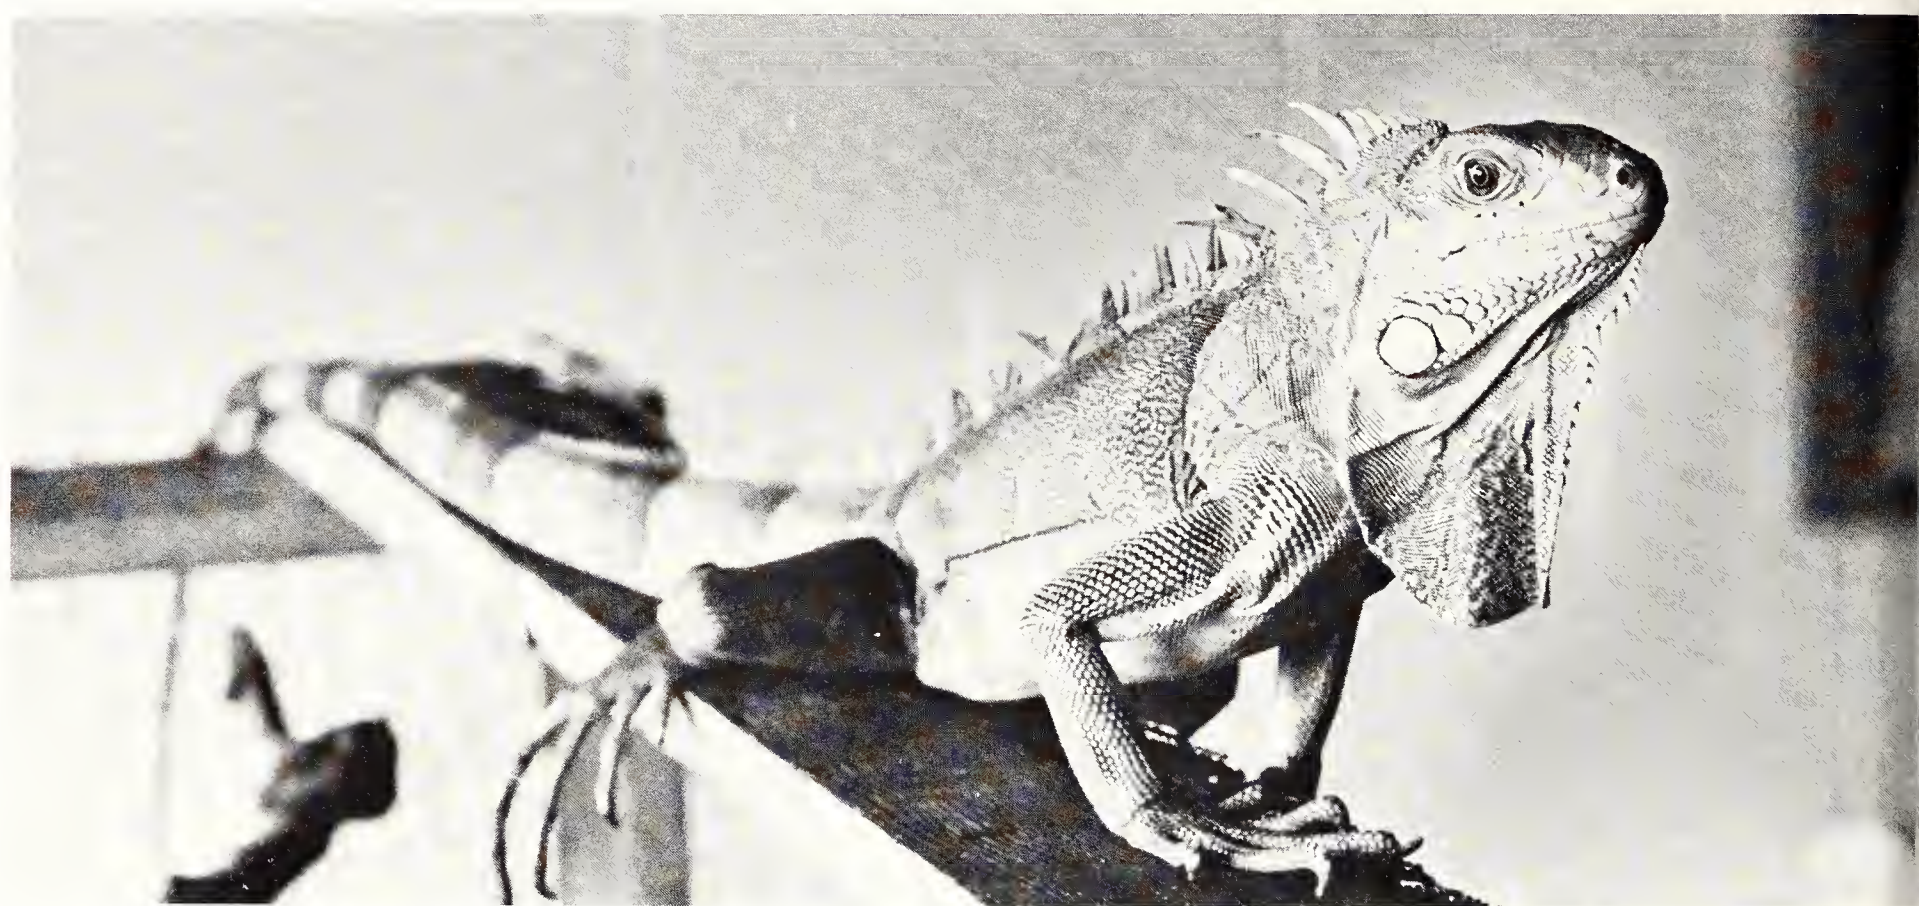

good exercise.

Yet, because of time, we take the shortest distance between several variable points, even if that means getting ripped off in Aggie stores. We have saved time, if not money.

In speaking of transportation between cities and states, there are various and assorted means for getting to the end. It can be quite a hassle hitchhiking or paying exorbitant rates for bus, train and airplane fares, but when home is where the heart is, the shortest, fastest and most economical distance is computed, arranged and then set out for—one doesn't have much choice.

Getting down to earth, on campus we suggest walking whenever possible. It permits the K-State hot-house student to get some needed exercise and cleaner air to breathe.

In an attempt to buck the "Mr./Ms. Average Motorist" syndrome, put on your super, wide-oval, polyglas 100's and walk around campus and town.

Odd pets provide companionship, entertainment

By Debbie Eisenberg

A boa constrictor curled under a bed — an iguana climbing the walls — a squirrel monkey screeching her protest at receiving a sour grape for a treat.

A dog doesn't have to be a student's best friend, particularly if he lives in a residence hall, and the only animals allowed are small, caged ones.

Although the more common dorm pets are turtles, goldfish, hamsters and gerbils, there are a few students who keep more unusual pets such as pythons, doves, lizards and even falcons and hawks.

Students feel the initial expense and trouble of keeping an unusual pet is well worth it. Pets provide their owners with interesting experiences once the owner gets over his fear of

the animal and learns to respect it.

Becoming accustomed to a falcon or hawk staring at him while he is studying, feeding live mice to boa constrictors, and listening to the squeaking of a hamster's wheel during the night are just a few of the adjustments a student must make when he adopts a pet.

Some students, particularly those with unusual pets, are satisfying childhood dreams by owning a snake or lizard, but a student's most common reason for keeping a pet is for companionship.

Pets provide a friendly face to the sometimes lonely and depressed college student. They're the best listeners because they don't offer advice and keep their criticism to themselves.

To keep a pet in his dorm room a student must have the written permission of his roommate and the hall director. The animal must be non-noisy and odorless and must be kept in a cage or some other contained surroundings.

Sometimes a discontented python will bite, a boa constrictor will get out of his cage and curl up under an unsuspecting student's bed or a hamster's activities will keep its owner up half the night. But the enjoyment, companionship and interest the animal provides compensate for these disadvantages.

After all, if the noise gets to be too bad, the hamster can always be locked in the closet.

Weekly visit to laundromat torture for impatient student

By Karla Brockman

Watching dirty clothes slosh around in soapy water at the laundromat is not my idea of an entertaining evening, but this is where I find myself one night every week.

Maybe it wouldn't be bad if I didn't spend the time thinking about what I could be doing if I didn't have to sit here watching dirty clothes slosh around in soapy water.

I could be watching "Hawaii Five-0," or reading a magazine or playing with my trained white rabbit. But instead, I sit here waiting for the little yellow and red lights to flash off and the noisy machine to stop.

Of course, I could spend the time in the laundromat studying, but it is difficult to concentrate with two babies crying and a little girl with sticky fingers yelling at her mother. There are also twenty loud, sloshy washing machines and fifteen humming dryers all filling the hot, steamy building to its noise capacity.

Instead of doing anything, I simply sit and think about how much I hate laundromats. Maybe if I just didn't have to load the car with two baskets of dirty clothes, an armful of hangers and a box of soap, I wouldn't hate it as much. But then I have to make three trips carrying it all into the laundry, and I hate that too.

Loading the machine is not bad, but waiting for it to finish is dull and agonizing, and if possible, I hate that even more than the other steps involved in washing clothes.

When the lights blink out, I begin the search for an empty wire basket to transport the dripping mass to a dryer. I finally persuade the sticky-fingered little girl to get out of the only empty basket in the place on the condition that I return it to her immediately after I've finished with it.

When all of my clothes are out of the machines (half of which I have retrieved from the floor), I dump all of them into a dryer and hunt for a dime.

As usual there is only a quarter, and the change machine is out of order, so I interrogate each fellow laundromat inmate to find change. At last I find a dime, and my dryer begins spinning.

I spend the next twenty minutes trying to decide whether I hate the wait for the dryer more than the wait for the washer and finally decide I want to go home.

At long last I can fold the towels, hang up shirts and dresses and make three trips carrying it all to the car.

For another week I am free.

Band's hours of practice pay off

"And now, the Pride of Wildcat Land — the K-State Marching Band!"

This phrase is familiar to football fans as the beginning of the half time show. But what is it like to be down there on the field marching?

"It's a lot of work but it's worth it," seems to be the consensus of the members.

And it is a lot of work. The band usually spends six hours in rehearsal the week before a home game, and game day itself takes six hours. In non-game weeks, the band spends four hours in practice, Phil Hewett, band director, said.

"We spend almost as much time on physical coordination as the football team does. It's physically demanding to run on the field all in step and in line," Hewett said.

The week before classes started in the fall, the band had intensive practice nine hours a day for five days. But Hewett said he had "not one complaint."

One member even thought the band didn't practice enough, but he admitted a lot of people don't have much time to spend.

What is there about band that makes all the effort worth it?

Some band members explained why they like it:

—"It's fun just to do the shows."

—"We get good seats at the game for free."

—"The kids are really friendly."

—"I feel more a part of the game — we sit in the soul of the rooting section and work with Dixon to get students excited."

—"It's worth one hour credit."

—"You make new friends."

The trips the band makes are the high points, members said. In the fall of 1972 the band put on shows at Oklahoma University, Kansas City Arrowhead Stadium and Nebraska University.

A band benefit, Band Day for high school bands, a Band Blast concert and Band Banquet (semi-formal) kept the group busy in addition to pep rallies and shows for each home game.

The 230 band members are chosen from more than 400 who audition and are a fairly close-knit group, Hewett said.

They would have to be to work together to make the band the "Pride of Wildcat Land" and the best in the Big Eight.

Slumber: college students' "Impossible Dream"

By Dave Chartrand

Those crazy brochures the University sends out to incoming freshman are a waste of time.

They spend pages trying to "show the ropes" to new-comers. How to pull cards, how to buy books, how to have fun — and yet they leave out the most important item: how to go to college and sleep at the same time.

One school of thought contends it is impossible to attend college and get any sleep at all. And this philosophy has many adherents, most of them students in architecture, engineering and vet medicine.

Many students, nonetheless, feel the system can be beat. But it takes some rehabilitation and lots of practice.

First, if you've been socialized into believing you need eight or nine hours of sleep every night — forget it. That childhood custom had better stay at home with making your bed every morning, coming home early on Friday nights and never skipping school.

When God decided on 24 hours for the length of the day, he simply did not take into consideration classes, labs, long textbook chapters, papers, meetings and jobs.

That means that certain luxuries such as eating and sleeping must go. And since food centers trick everybody into buying meal tickets, most students have decided to give up sleep.

How is it done? The end justifies any means. But experts do concur on some basics.

Beginners must get used to

periodic "quickie" snoozes. These soon replace the once sacrosanct all-night slumbers. The rule of thumb is two or three hours at most.

Go to class for a few hours. Take a snooze. Study for a few hours. Take a snooze. Eat. Take a snooze. Study another few hours. Go to work. Take a snooze.

The body will soon adapt to this somnolent pitter-patter. But caution is advised. Once the art of the quick snooze is polished, an overdose of sleep can be fatal.

Many a reckless student has kicked the bucket by greeding for that additional bit of shut-eye. The body couldn't stand the shock.

How long you sleep is tantamount to where you sleep. If you are so foolish to actually sleep in a bed — with sheets and pillows, no less — then failure is deserved.

Lectures afford the best opportunities for catching up on sleep. The length of such classes — and the quality of the lecture — are ideally suited to the quick snooze.

This means, of course, that you must learn to sleep sitting up, but if you're tired enough, you can sleep standing on your head. It's even a good idea to feign note-taking by taping a pencil to your hand while you sleep. However, this does possess a drawback in that the chances of puncturing your eardrum inadvertently while reaching up to scratch your ear are rather high.

Books are also good places to catch a wink or two. You're sitting at your desk reading late at night or at a table in the Union or in sociology recitation and all of a sudden your

eyelids weigh a ton.

So just aim your nose for that little crack in the book where the pages meet and bury your head.

The thick biology books lend themselves easily to this while spiral notebooks have been known to maim a few noses here and there.

Some students have even reported some success at sleeping while walking between classes. This has possibilities, but would require some inter-student cooperation.

The important thing is to sleep where you will be least comfortable.

You should try table-tops, hard, cold floors, toilet seats, stairways — whatever is handy. That way someone is sure to step on you, or trip over you and wake you up.

You can also get some interesting designs on your face depending on what kind of rug or book-cover you sleep on.

You might try buying a few shares in Folgers corporation or Maxwell House. You'll be drinking a lot of their products.

We're breeding a generation of insomniacs. It's not that as a college student you don't want to sleep. You simply cannot afford to.

Students no longer boast haughtily about pulling "all-nighters." That's kid stuff. Our parents did that.

Today's college student sits in the Union clutching a pitcher of coffee, an alarm clock strung around his neck and eyes that couldn't be painted any redder, and says nonchalantly, "Well, I just pulled my third all-weeker this semester."

The word is "shhh!"

Student sleeping.

Cross-campus 10-minute dash frustrates exhausted students

By Melinda Hodgson

So, you have two classes back to back, one at Ackert Hall and the other at Thompson. Or you have one at Calvin and the other at Weber.

After wailing "how could they do this to me?" seven or eight times, you settle down, try to be calm and run through the list of possible solutions.

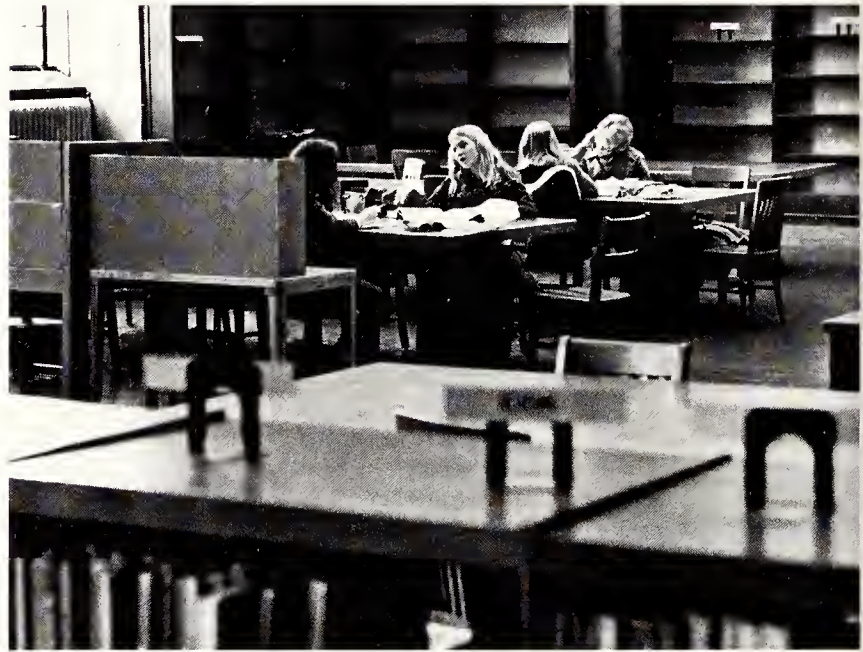

You could get a bike (if it's not

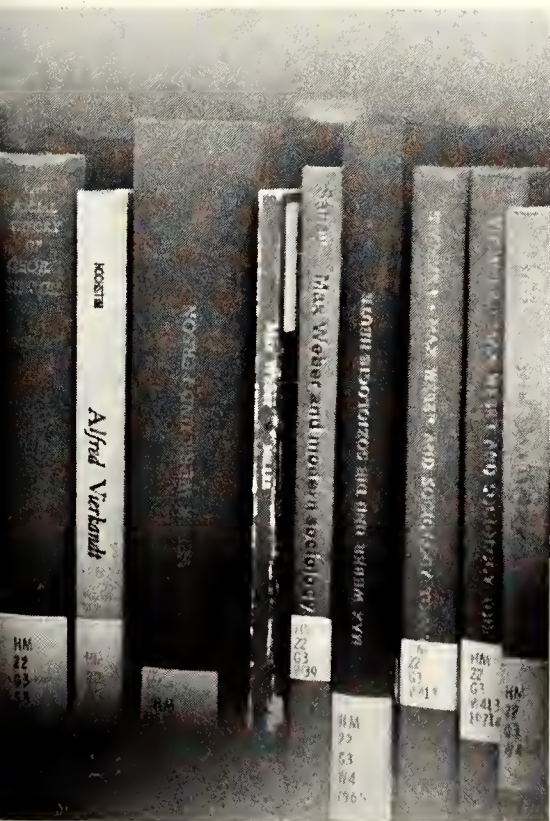

winter, and if you can afford one) or drive (which is not practical because it will take ten minutes just to find a parking space). Or you could drop one of the classes and add another so that they're both in the same building — so what if you're an art major and it's an organic chem class? You could find a telephone booth to change in and take to the skies as Super-Student or even skip the classes on an alternating basis.

If all else fails, you may decide to take up jogging in preparation for the cross-campus sprint. Furthermore, you will learn all the shortcuts: through buildings, across lawns, over fences, between cars and past all the amazed people.

And you've done it in 10 minutes! At the end of your dash you expect maybe a medal and a handshake, but instead you get an hour's lecture for which you're too tired to take notes.

Library criticized by students: patience, cooperation needed

Farrell Library may seem to be an ogre at times. It invariably loses the needed book somewhere in its cavernous depths, and worse, it reminds a student that he did come here to learn — not to practice out-chugging his neighbor.

But libraries, too, have hearts.

Farrell does try hard to please, although students often fail to notice. Constant rip-offs of books and magazines by the very students who will "have to have" some other book the next day seem a bit incongruous.

Possibly some attempt should be made to show the other side of the picture, from the librarians' point of view.

Imagine trying to keep 630,000 books and 13,000 periodicals in precise order, good repair and available for students and faculty. With a staff of 69 persons, of whom only 33 are actual librarians, the task seems rather formidable.

Ever since August 1970, when the new addition to Farrell was opened, the need for cooperation from students and faculty has been growing along with the increased space and higher numbers of new books (approximately 30 to 40 thousand) added each year.

Because of the open-shelf policy at Farrell, students are free to enter the stacks of books and serve themselves.

The main stacks aren't hard to find, but wait until the student is told to go to East Stack 4B or until he must "follow the red arrow on the South Stack 4th floor," which leads him to a flight of stairs and a strange little stack of books crammed into the upper level of the library.

Then the problem begins. "I can't find it" is one of the most common laments heard.

But if the student could take the time to learn the physical layout of the library, much of the problem could be eliminated.

Tours are readily available for those who desire a more extensive view of the library; these can be arranged through the circulation department of Farrell.

Beyond the physical layout of the library, another problem lies in locating those often-elusive books and magazines. Once the person gets the call number and the floor memorized, the disappointment in not finding the item often leads him to blast the library staff for its inefficiency.

As one librarian commented, "the only time they seem to approach us is when they are angry; we'll try to put out as much effort as they will."

A student disgruntled by his failure to locate a book or magazine may not recall his own thoughtless page-ripping when the Xerox machine was 10 feet away or the time when he decided to steal "just for fun."

In addition to knowing the physical layout and being considerate of others by not stealing books, students find it helpful to get to know some of the librarians as people, not old, stodgy bookmongers.

Most of these are not stereotyped librarians in the sense that they don't maintain a quota on silence and don't keep their heads in books constantly.

Even they go jiffing on Friday afternoons. You might see them in Aggieville, letting off steam, just like everyone else.

A library isn't a cold, heartless place; librarians, too, have feelings.

Even Farrell Library has a heart.

ORGANIZATIONS

ORGANIZATIONS

ORGANIZATIONS

ORGANIZATIONS

Pretend you're a lowly freshman on the Feature Films Committee of Union Program Council. Your job is to sell tickets for the Friday night movie every other weekend.

You answer to the chairman of the weekend movie series, who answers to the coordinator of Union films, who answers to the council coordinator. He, in turn, answers to the Union program director, who answers to the head of the Union, who answers to the vice-president for student affairs. And he answers to — guess who? — the president of the University himself.

So, peon that you are, you're part of an organization. And the training you receive working with — and up through — a college organization helps you to understand the way professional organizations work.

So besides teaching you enough math and psych and music appreciation to keep you informed for a while, college helps you through extra-curricular activities to contend with the organizations — or bureaucracies, if you will — you'll be connected with throughout your life.

Agriculture

AGRICULTURE COUNCIL — Top Row: Wayne J. Busch, Douglas E. Deets, Leon G. DeDonder, Gary L. Smith, Leon J. Patton, Curt A. Frasier, Michael D. Ouart, Dean A. Whitehill, Terry L. Lawrence. **Second Row:** Ron R. Roth, Steve M. Strickler, Ted E. Odle,

Block and Bridle

Top Row: Noralee J. Nagel, Donna S. Clark, Jan K. McCurry, Cindy A. Arbuthnot, Debbie S. Jostes, Daye Sims, Linda K. Scheuerman, Linda D. Pattinson, Kathleen M. Hangen. **Second Row:** Paul W. Merklein, Jerome R. Settles, Leon G. DeDonder, Michael A. Mann, Roger W. Fowles, Nancy A. Venneberg, Kathleen A. Klein, Beverly F. Droge. **Third Row:** Jim C. Buchanan, David D. Nelson, Allan B. Chestnut, Brian F. Price, Pat Drees, Robert L. Barrett, David Carnahan, Chuck Walsten. **Bottom Row:** Dan D. Murphy, Loyd Schoen, Virgil K. Miller, Gregg Cranston, Tom Herbers, Loren Berger.

Top Row: Richard Dill, Linda L. Ulrich, Michele Y. Taylor, Debra D. Shive, Kathryn A. Gatz, Constance L. Story, Carol A. DeVore, Teresa A. Wingert, JoEllen Arnold, Cheryl Heller, John C. Steeples. **Second Row:** Gaylard C. Anderson, Jim G. Greer, Doug G. Ott, Bill M. Poovey, Kenton L. Weltmer, John J. Crow, Mark W. Carlson, Steven R. Aeschliman, Jeanne L. Reichenberger, Carol L. Urish. **Third Row:** Jay G. George, Darrell R. Monfort, Doyle D. Dingman, James A. Meetz, Dan W. Olsen, Gary P. Crosslin, Bruce L. Peverley, Bill Matney. **Bottom Row:** Bill V. Able, Brad D. Ott, Jack W. Janssen, Carl L. Miller, Kris G. Kimple, Larry L. Berger, Ron Boggs, Jack G. Riley.

Top Row: Daryl L. Seth, Douglas E. Deets, Max R. Travis, John T. Blanscet, Kent L. Searcy, Curt A. Frasier, Ron R. Roth, Jared L. Wilson, Donald J. Voth. **Second Row:** Jack E. Wilson, Renee Wassenberg, Leon D. Houghton, David E. McClaskey, Bill McNeill, Gary Kohake, Richard Cott, Robert Roth. **Third Row:** Drew E. Demshki, Edward L. Gough, Doug R. Johnson, Jackie Miller, Dennis R. Roemer, Gordon D. Gough, Gary Burkholder. **Bottom Row:** Wayne E. Searcy, Merlin Chestnut, Richard Gratny, Richard Jennison, Frank Hlaus, Merle Hadachek.

Blue Key

Standing: George D. Wilcoxon, sponsor; Doug Sebelius, Steve D. Carr, Lyle Pishny, Curt Frasier, Gary Sieverin, Dave Kuckelman. **Seated:** Donald C. Gray, Ted E. Odle, Michael D. Ouart, Jerry Meng, Steve Doering, Bill Ossmann, John Kirkbride.

Becoming more involved with service to the campus and community is the continuing objective of K-State's honorary organizations.

Members of Mortar Board, senior women's honorary, participated in Walk for Mankind this fall and served as Landon Lecture patrons.

Blue Key, senior men's honorary, continued its traditional coordination of Homecoming activities for the University.

Chimes, junior women's honorary, sponsored Parents' Day, gave a party for the children of foreign students and raised money for the Kidney Foundation.

Spurs, a women's organization for sophomores with a grade point average of 2.5 or above, helped with publicity for the campus blood-mobile and conducted a city-wide cancer drive this fall.

Alpha Lambda Delta, freshman women's honorary, invited speakers to discuss current issues at their meetings and held a banquet in the spring.

Business Council

Top Row: Paul A. Grisham, Sally Rourk, Shirley Moyer, Jeanne A. Hale, Kendall L. Elliott. **Second Row:** Phil Neel, Marshall G. Adams, Marilyn K. Creson, Courtney Jones. **Thlrd Row:** Don R. Linville, Cheryl L. Davis, William J. Ball, Don D. Buckland. **Bottom Row:** Norman F. Spielman, Kurt D. Lindahl, David H. Walter, Mark G. Dudley.

Chimes

Top Row: Kristy E. Clark, Mari M. Baird, Kerry A. McCaig, Judy M. Stanley, Shelley A. Hoyle, Donnetta Heitschmidt, Patricia Lorson, Wilma Moore. **Second Row:** Marilyn A. Taylor,

Beverly J. Kiehl, Kathleen Henry, JoAnn Luehring, Jeri L. Dickerson, Christine M. Glotzbach, Dhera Ann Taylor. **Bottom Row:** Janet R. Woodward, sponsor; Roxanne

Reinhardt, Sheila Schrepel, Carole A. Bolin, Nancy S. McEwen, Roberta D. Hewson, Carol A. Johnson.

Circle-K

Top Row: Tom McCoy, David Hubin, DiAnn Shuler, Orval Ebberts, sponsor. **Second Row:** Danny O. Lundberg, David Heiman, Ted Easter, Vika Baker, Deborah J. Makovec. **Bottom Row:** Glenn R. Piwowar, Francis Griebel, Johann Teten, Earle Parsons, Tracy Makovec.

Collegiate 4-H

Top Row: Deanna Kay Underhill, Marian Marie Wagaman, Jullana J. Hair, Terri Tucker, Trudy Macy, Carol Carswell, Cathy Carswell, Melody Compaan. **Second Row:** Leigh Ann White, Susan Pickler, Kathy Lindholm, Donita Whitney, Sandra L. Shaw, Sarah J.

Calderwood, Nora M. Paulsen, Teresa A. Wingert, Karen Honig. **Thlrd Row:** Linda S. Clare, Lois J. VanCleave, Evelyn S. Bergkamp, Charyl D. Larson, Andrea A. Polansky, Cathy A. Butts, Mary Ann Channel, Leon J. Patton. **Bottom Row:** David H. Car-

nahan, Vernon L. Waldren, Randy L. Kloefkorn, Norman L. Cooper, Richard W. Wagner, Johann Teten, Richard C. Blocksome.

Top Row: Ruth G. Dobbins, Valeria Marrs, Cynthia S. Busset, Mary Vaughan, Mary B. Marr, Mary Gardner, Debra D. Shive, Donna M. Schletzbaum. **Second Row:** Yvonne M. O'Connor, Janet L. Blomquist, Glenda L. Kyle,

Carla D. Nelson, Martha J. Cornwell, Joanne F. Schley, Jeff R. Luthi, Kathy L. Armstrong, Carolyn K. Wittorff. **Thlrd Row:** Jan A. Mills, Lila M. Gatton, Cynthia D. Hoffman, Sara M. Reed, Myrna E. Pember, Brent G. Larson, Bil-

ly G. McDaniel, Doug R. Johnson. **Bottom Row:** Kenneth K. Kellogg, Calvin L. Hair, Linda L. Carnahan, John M. Reynolds, Andrew J. Schuler.

Collegiate FFA

Top Row: Wayne J. Busch, Max R. Travis, Leon G. DeDonder, Alan Depenbusch, James S. Womeldorff, Bruce Van Leeuwen, Steve Lefever, Terry Henry. **Second Row:** Charles D. Schettler, Ben J. Smith, Brad Nemechek, Phillip Shipman, Charles Brandt, William P. Hunter, Glenn Overgaard. **Bottom Row:** Paul N. Stevenson, sponsor; Mark S. Russell, David D. Stucky, Robin L. Rouse, Vickie A. Doud, Jane S. Hentzler, Roger A. Jarmer, David E. McClaskey.

Conservation Club

Top Row: Guy E. Ellis, Lee K. Ankenman, Harold E. Kline, Roger A. Braden, Tom D. Grimwood, William A. Malouche. **Second Row:** Don K. Parker, Michael S. Zimmerman, Larry J. Reichenberger, Michael R. Shanley, Richard A. Canterbury. **Third Row:** Jerry E. Mott, Gary A. Schuler, William T. Gaines, Jon D. Epperson. **Bottom Row:** Orville W. Bidwell, Bradley R. Myers, Craig A. Larsen, Dwight E. Baldwin, Ben D. Mahaffey.

Consumer Relations Board

Consumer Relations Board is composed of 25 students interested in furthering their education in the area of Consumer Education.

These students, either seniors or graduates in Family Economics, may sign up for one hour credit or work with the group for their own interests.

The CRB, which meets once a week, is composed of a grievance committee, an arbitration board and a research committee.

"Students as citizens" is their aim. They try to make students aware of their rights as citizens, not just as people who go to college.

Top Row: Linda Denholm, Wilma J. Moore, Kathleen E. Richardson, Jennifer J. Jones, Susan J. Medill. **Second Row:** Bruce E. Voigt, Linda A. Duhan, Cheryl A. Clayton,

Cathy A. Butts. **Third Row:** Don Weiner, Dick Retrum, Dan McCaig, Steve Frederick. **Bottom Row:** Mike H. Beckham, Bernard Franklin, Stephen E. Seltzer, Paul N. Blick.

Daughters of Diana

Top Row: Ginny A. Campbell, Julie K. Hurse, Shirley Holden, Brenda G. Baker, Joyce Swaggart, Diane Wright, Suzanne Barnard. **Second Row:** Kathy J. Andrews, Carol Camp, Ann Bales, Carol Moorman, Sally Matthew, Linda Brindel. **Third Row:** Vicki L. Gregory, Cydney J. Prothe, Carolyn S. Kincaid, Ellie B. Kennedy, Carla R. Ellas. **Bottom Row:** Mary Fran Anstine, JoAnn Wells, Mary Hirning, Shelley McBee.

Delta Phi Kappa

Top Row: Kristi Potter, Kerry McCaig, Patty M. Bell, Cheryl Holder. **Second Row:** Mavis I. Fairbanks, Donna M. Smerchek, Gail H. Yenser, Barbara A. Kirby. **Third Row:** Cynthia S. Siebert, Jeri Dickerson, Cathy Webb, Kathleen M. Bowers. **Bottom Row:** Kathryn McKinney, sponsor; Kerma H. Crotts, Kathy A. Gardner, Miriam Poole, sponsor.

Diamondettes

Top Row: Wanda J. Fletcher, Deborah A. Fletcher, Sharon K. Johnson, Carol E. Smith, Vikki L. Shaw. **Second Row:** Angela P. Lassiter, Carla D. Eubanks, Becky Chinn, Terri L. Terrell, Earlena Poston. **Third Row:** Joyt M. Givens, Janielle H. Adair, Sharon D. Johnson, Lorraine E. Breckenridge, Winnona D. Dancy. **Bottom Row:** Rozi M. White, Cheryl A. Hill, Rhonda D. Rush, Valerie A. Bardwell, Lori J. Givens.

Engineering

AMERICAN INSTITUTE OF INDUSTRIAL ENGINEERS — Top Row: Steven C. Johnson, William J. Demint, Robert A. Bascom, Kuang H. Teng, Masoud S. Ahmadi, Gary L. Law, Lawrence E. Frazee. **Second Row:** Terry T. Beets, Glenn R. Schuette, Richard B. Grapengater, Gary A. Pepperdine, Edward J. Hickey, Daniel L. Saucerman. **Third Row:** James G. Loyd, Warren E. Seyfert, Duane E. Carlson, Dayle K. Lewis, Robert E. Stonehocker. **Bottom Row:** Frederic A. Bartlett, William E. Baker, Jackie L. Bolden, Robert W. Forrester, Robert W. Stone, Rex C. Vernon.

CHI EPSILON: civil engineers — Top Row: Jerome J. Zovne, sponsor; Randy W. Fiorucci, Dennis L. Anderson, Jerry E. Petty, Steven J. Metro. **Second Row:** Richard A. Fornelli, John F. Donnelly, John D. Wilson, Kim E. Myers, Richard L. Kussman. **Bottom Row:** Clyde J. Wilkens, Donato P. D'Amore, Milton D. Larsen, Brent E. Remsberg.

ENGINEDEARS — Top Row: Ginny A. Campbell, Karen L. Shelley, Jan R. Townsend, Cindy S. Broadie, Sally E. Patton, Melanie J. Matthews, Joy Torrence, Pat A. Reeder, Cathy L. Parr, Donnie Barnes. **Second Row:** Kay Jenkinson, Gretchen J. Gruver, Diane M. Brooks. **Bottom Row:** Penny R. Raile, Susie J. Heeb, Ann Gray, Karen Schumacher, Debbie A. Henderson, Terri J. Gammeter, Dhera A. Taylor, Sally J. Hartwell.

ENGINEERING COUNCIL — Top Row: Ron Wilson, Robert Matousek, Steven Bartsch, Jim Roth, Byron Steward, Doug Hoopes, Terry Hubbs. **Second Row:** Gary A. McNaughton, Alan W. Johnson, Jerry L. Ostermann, Sally J. Hartwell, Gary A. Sieverin, Dorothy L. Demuth, Mike S. Johnston, James T. Schmidt, Dana M. Smerchek. **Bottom Row:** David L. Gerdes, Edward J. Hickey, Randall K. White, Robert E. Crank, sponsor; Donald J. Glaser, Michael K. Ramsey.

PI TAU SIGMA: mechanical engineering honorary — Top Row: Donald C. Gray, Larry F. Beil, Gary L. Freeman, Richard K. Engel, Herbert D. Ball, sponsor. **Second Row:** Alan D. Jackson, Dana M. Smerchek, Mike S. Johnston, Leroy A. Wetzel, Bill E. Kleinsorge. **Thlrd Row:** Jeff W. Bremyer, Craig A. Sydney, Mike J. Poland, Don J. Glaser. **Bottom Row:** Bradley F. Maurer, Doyle E. Clark, William B. Lile, Neal W. Johnson, John F. Corman.

SOCIETY OF AMERICAN MILITARY ENGINEERS — **Top Row:** Eugene Kirkpatrick, David G. Wood, Joseph M. McAtee, Bruce A. Walton. **Second Row:** Mathias A. Scherer, Kim E. Meyers, Thomas L. Hopkins, Bim Rowley. **Bottom Row:** Darrell E. Herrmann, Wendell D. Wagner, Marvin B. DeForest.

STEEL RING — **Top Row:** Donald C. Gray, Edward J. Hickey, Dana M. Smercheck, Norman L. Graves, Mark O. Sanford. **Second Row:** Douglas S. Hoopes, Suzanne E. Seyfert, Kim E. Meyers, James T. Schmidt. **Bottom Row:** Ronald D. Wilson, Robert A. Matousek, Bruce D. Remsberg, Neal W. Johnson.

Faculty Senate

Faculty Senate is a governing body composed of three senators from the extension division, library, general administration and each of the colleges. The chairman of Student Senate, the president of the student body and one other student senator represent students.

Academic, faculty and student affairs are the concerns of Faculty Senate. They establish policies governing academic affairs, improve student-faculty relationships and stimulate improvement in professional standards.

Top Row: J. L. Copeland, Dan W. Upson, John Strickler, Paige E. Mulhollan, Herbert Moser, R. E. Vaden, Bill Clark, John R. Graham, Paul DeWeese, Fredric Appl, John Steffen, Robert Snell, Ruth Hoeflin, Margaret Dobbryn, Dean Eckhoff. **Second Row:** Draytford Richardson, L. V. Withee, Sam Brown, Ross Mickelsen, John Pence, Robert Linder, Lucy Wilde, Carol Miller, Warren Walker, Kenneth Burkhard.

Thlrd Row: Keith Christensen, Mike Martin, Charles Bissey, L. D. Bark, Peter Cooper, Nancy Riemann, Lucille Wakefield, Lowell Brandner, Ray Kurtz, Bob Scott, Wayne Laughery. **Fourth Row:** Homer Socolofsky, L. E. Fuller, John Ronnau, Donald Hoyt, Steve Doering, Joe Knopp, Robert Gorton, Wayne Rohrer. **Bottom Row:** W. J. Conover, James Greig, David Mugler, Veryl Switzer.

Fine Arts Council

Fine Arts Council serves as a coordinator of cultural activities on campus. Mainly concerned with preventing scheduling and space conflicts, the council also represents such groups as K-State Players, the choral series, the architecture lecture series and the art department in requesting funds from the Student Senate Finance Committee.

The dozen council members included an even representation of students and faculty.

Standing: Mark Ollington, Dan F. Howard, Jane Peterson, Bernard Franklin, Magdalen Vargas, Richard Caldwell. **Seated:** Norma Bunton, Robert Steinbauer, Nancy Perry, John Chalmers, Eugene McGraw.

Forestry Club

Top Row: Wendy L. Benefiel, Cathy I. Wright, Aline L. Gunby, Robert W. Funsch, sponsor; Michele Y. Taylor, Linda J. Funkhouser. **Second Row:** Eric A. Kohn, Brock A. Martin, Paul L. Weixelman, Jerry R. Belton, Royce L. Harms. **Bottom Row:** Dean A. Graber, Gary E. Boutz, Bob H. Myers, Douglas A. Yuska, James E. Slover, Brad L. Plumb.

Grain Science Club

Top Row: Harry R. Wulfschle, Steven A. Skoch, Peter E. Letch, Chintam S. Reddy, David L. Roney. **Second Row:** Gerald E. Klocke, Roger H. Bane, Leslie E. Heffner, Bruce D. Young. **Bottom Row:** Thomas S. Campbell, Charles A. Ziegler, Terry Wagner.

Grid Getters

Top Row: H. C. Smith, Malcolm Copeland, Wesley D. Hastings, Allen Sneath, Monte R. Miller, Robert A. Pickens. **Second Row:** John F. Graff, Bryan Hatcher, Jim Beatson, Stephen M. Bell, Scott Herschell. **Third Row:** Brian Praeger, Bob Thomas, Jim Stepanich, Bruce Bachman, Ron Madd. **Bottom Row:** Patric L. Joyce, Thomas J. Hrones, Michael D. Bohn, Dan Carter.

Home Economics

HOME ECONOMICS COUNCIL — Top Row: Rebecca C. Reheis, Connie L. Regehr, Sharon K. Vering, Jean E. Emmerson, Sharon K. Heng, Kathy M. Ramsey, Deanna K. Underhill. **Second Row:** Mary Ann Russo, Beverly J. Kiehl, Susan K. Small, Trudy M. Macy, Ellen R. Sheard, Angela M. Shinkle. **Bottom Row:** Diane K. Hein, Judy M. Barnett, Francine Stuckey, Judith A. Pallister, Paula A. Felder.

HOME ECONOMICS INTEREST GROUP —
Top Row: Deana M. Brant, Marion M. Wagaman, Teresa J. Kurtenbach, Cynthia S. Busset, Carol J. Schultz, Pamela S. Goins, Pat A. Koster, Glenda L. Colton. **Second Row:** Deanna K. Underhill, June E. McKeever, Dee A. Lewis, Ellen R. Sheard, Angela M. Shinkle, Trudy M. Macy, Lila M. Gatton. **Thlrd Row:** Vicki L. Porter, Sharon K. Blender, Virginia L. Haines, Sandra L. Shaw, Vickie S. Baehler, Teresa A. Wingert, Beverly A. Wiles, Patsy J. Plett. **Bottom Row:** Paula A. Felder, Francine Stuckey, Janice L. Fink, Yvonne K. Schmidt, Diane Chrisman, Judith A. Redger.

HOME ECONOMICS INTEREST GROUP —
Top Row: Carolyn A. Rock, Marsee L. Bean, Nancy J. Cockrum, Connie L. Regehr, Teresa J. Kurtenbach, Rebecca C. Reheis, Wanda L. Sterbenz, Mary D. Shobe, Barbara J. Hitt, Sharon K. Vering. **Second Row:** Cheryl J. Wiley, Jean E. Emmerson, Carla M. Sullivan, Marieta F. Herbers, Belinda A. Pfeifer, Mary Ann Russo, Nancy E. Gera, Rebecca A. Koster, Charlene S. Kendall. **Thlrd Row:** Sherilyn S. Epp, Jennifer G. Clark, Linda L. McCord, Gail M. Messner, Deanna L. Baldwin, Susan K. Small, Marilyn J. McReynolds, Sharon D. Johnson, Marilyn Dammier, Sara E. Adams. **Bottom Row:** Dinah M. Haskins, Janet E. Frick, Martha J. Mason, Beth E. Funk, Jeanice A. McReynolds, Lois J. VanCleave, Jean A. Baker, Judy M. Barnett, Elizabeth A. Roberts.

Horticulture Club

Top Row: Barbara J. Voigt, Shelley A. McClain, Terry L. Scheller, Trula J. Myers, Joyce E. Holcom. **Second Row:** Jeanene G. Gwin, Leslie W. Cary, Pamela T. Pelton, Lea Lamb. **Thlrd Row:** Robert M. Wagner, Cynthia S. Powell, Dean A. Whitehill, Barry W. Mueller, Dennis R. Motes. **Bottom Row:** Robert J. Dameron, Ted L. Williams, Mike L. Brookshire, Richard H. Mattson, sponsor.

Interfraternity Council

Top Row: Courtney L. Canfield, Leonard H. Le Blanc, Jeff Burner, Craig A. Brockmeier, Gary D. Ripple, John H. Kirkbride, Stan R. Ahlerich, Robert K. Stilwell. **Second Row:** Jerry A. Lilly,

David J. Streeter, Larry Bowman, Rodney D. Carsten, Steven M. Theede, Donald K. Carrel, Bill West, Kent Kimball. **Bottom Row:** David J. McFadyen, Bruce McIntyre, Mike J. Jaax,

Bruce H. Robinson, Bill Ossmann, Dennis Lehmann, Paul M. Warren, Bruce D. Remsberg.

International Coordinating Council

Working to promote international understanding on a local level, International Coordinating Council (ICC) has the task of organizing all student international activities at K-State.

ICC is made up of the presidents of twenty-one international groups and ten ex officio members including the foreign student advisor and delegates from SGA. The Council has planned such activities as interdisciplinary seminars, foreign student orientation, International Culture Night and the Feast of Nations.

INTERNATIONAL COORDINATING COUNCIL — Top Row: Donald C. Cress, Doyle Jeon, Arun K. Gupta, Nguyen Khal. **Second Row:** Norm Khalaj, Mohammed S. Anner, John M. Solbach, Baz M. Shlrzad, Katherine L. Boyd. **Bottom Row:** Mary A. Ryser, Richard L. Lachance, Shashldhar Reddy, Kayode C. Oni.

Intramural Council

Intramural Council is the policy making board for the Department of Intramurals and Recreation. It is their job to establish rules and approve the philosophy behind scheduling for that department.

The council consists of 13 members: an intramural men's manager, an intramural women's manager; representatives from

Housing and Food Service, Panhellenic Council, Intrafraternity Council and the Grounds Department; director and assistant director of intramurals and recreation; director of women's intramurals; director of women's sports; two faculty members; and vice-president of student affairs, who acts as chairman for the group.

INTRAMURAL COUNCIL — Seated Background: Raydon Robel, Jan Garton, Tom Schakelford, Geneva Hammaker, Don Rose, Steve Doering. **Seated Foreground:** Mike Boyer, Frank Tilghman, Jane Schroeder, Judy Akers, Chester Peters.

Islamic Association

Top Row: Rehana Chawla, Nayeema Kaiseruddin, Mohammed Kaiseruddin, Haroon Rashid, Lal M. Chawla, Abbas H. Al-Zubaydi. **Second Row:** Mohamed T. Abdel-

Moneim, Ikram Chawla-Haq, Maluf M. Al-Chalabi, Mohammad Ganjidoost, Hassan H. Ziada, Mohammed A. Quadeer. **Third Row:** Madhat M. Al-Hasan, Mohammed E.

Mohammed, Muhammad Hussain, Mudhafar A. Alnema, Sattar T. El-Abed. **Bottom Row:** Omar Abdul-Rahim, Shaik Mohiddin, Syed F. Quadri, Mehdi Adlouni, Ibrahim M. Taha.

Smith, David R. Smith, Robert Speer, T. J. Taylor. **Percussion:** Steve Adams, Barbara Beecher, Allen Carter, Joe Cousins, Gary Davis, Andy Hanbleton, Jo Jo Hargrave, Steve Hitt, Charles Kramer, Shelley Lenning, Joleen McNeive, Kim Pearse, Keith Pike, Marty Prettyman, Ronald Reed, Jim Siefkin, Alan Taylor. **Twirlers:** Anita Carlat, Barbara Crank, Jan Fritz, Terri Gammeter, Penny Mays, Sue Meyer, Liz Pope, Jan Reverts, Peggy Rockwell, Vicki Stephens, Gail Tryon.

Orchestra, jazz or choir singing — whatever your bag is musically, you can get involved in it at K-State.

Almost every music group on campus is open to students of all majors, with performers selected by auditions.

Symphony orchestra, directed by Paul Roby, was to present three on-campus concerts and five concerts on tour through southeastern Kansas this year in addition to a number of special engagements.

Concert jazz ensemble was to follow a busy schedule of 20 to 25 performances during the academic year. Among other shows, the 24-member ensemble directed by Phil Hewett was to stage seven concerts in the Union courtyard and a Winter Jazz Concert in Forum Hall Jan 25.

K-State's 58-member concert choir was invited to perform this year at the southwestern division of the Music Educators' Conference in Wichita and at the Nelson Art Gallery in Kansas City.

K-State singers, a well-known mixed ensemble, maintained the most hectic schedule of all the vocal music groups. Performing on the

average of once or twice a week, the singers were to travel around the state with their repertoire of popular and Broadway songs under the direction of Gerry Polich. The group also began planning for their future USO tour to the Orient.

Collegiate Chorale, directed by Rod Walker, was to give 10 on-campus concerts this year.

A medley from "Jesus Christ

Superstar" was presented jointly this fall by Varsity Men's Glee Club and Women's Glee. Both groups gave concerts on their own, but were to recombine for a February performance of Handel's "Coronation Anthem."

MEN'S GLEE — Top Row: Steven L. Thompson, Steven L. Noren, William J. Foley, Michael L. Remus, Lawrence D. Reed, Gaylord R. Munson, Kent S. Williams. **Second**

Student Review Board

Student Review Board conducts hearings on complaints received from Jardine Terrace or off-campus residents.

Common cases resolved by the Board include cheating on exams and petty thefts from residents' apartments. Civil cases — minor shoplifting from the Union, for example — are tried by Student Review Board at the plaintiff's request.

Student Review Board consists of four voting members, a chairman and a secretary, who serve for two semesters. Members are selected through applications and interviews by the student body president.

STUDENT REVIEW BOARD — Mike J. Lauri, Janelle Larson, Shannon Broussard, Jane Coder, Mike R. Penrod.

Top Row: Lyonell R. Unruh, Wayne Nunemaker, Bill Strong. **Second Row:** Konrad R. Miller, Bradd A. Crowley. **Bottom Row:** David Huber, Robert Wood, Fred W. Barden.

Tribunal

Tribunal, K-State's main judiciary board, is made up of five students and two faculty advisors. They are chosen by the student body president with the advice and consent of Student Senate.

Individual complaints, such as hall constitution violations, are handled by Tribunal. The seven members also take action on violations of the K-State Honor Code, the Regent's Code of Conduct, living group regulations and University rules and regulations as well as offenses against city ordinances and state laws.

TRIBUNAL — Forrest D. Ehmke, Mike Beckham, Bill Ossmann, Connie L. Harward.

Union Governing Board

UNION GOVERNING BOARD — Standing: Ray A. Keen, Craig Martin, Steve Hermes,

Bob Sandilos, Prakash Mishra, Bernard Franklin. **Seated:** Steve Rahn, Larry Bartlett,

Barb Stauth, Chris Hinz, Barb Buchele, Bill Ball.

Union Governing Board, the policy-making body of the Union, is composed of nine students, three faculty members, one alumnus and two staff members of the Union.

One of the nine students serves as chairman. Another of the nine comes from Student Senate and one from the Union Program Council. Other students are chosen by application and interview for a maximum term of three years.

The board develops the general policy for use of the Union. They are responsible for the support of the over-all Union program. They decide how the facilities are scheduled, who may use them, what the charges will be, operating hours and the ways in which the Union building is used.

Union Program Council

One department of the K-State Union is almost exclusively students — the Union Program Council. Made up of over 200 volunteer students, the council plans all the programs sponsored through the Union.

Committees handle the different types of programs. The Feature Film Committee is in charge of weekend movies shown at the Union. Kaleidoscope Committee arranges movies shown on Monday nights. The Concerts Committee and the Coffeehouse Committee arrange for singers to appear on campus. Ski trips are arranged through the Travel Committee while the Outdoor

Recreation Committee sponsors off-beat trips like canoe and backpacking journeys. Potpourri Committee is in charge of K-Purrs as well as demonstrations ranging from glass blowing to hair styling. A Speakers Committee brings important lecturers to campus. The Arts Committee keeps the Union Art Gallery filled.

All of the program planning is done by students with help from three program advisors on the Union Staff. Students may devote anywhere from five to twenty hours a week to the council.

UNION PROGRAM COUNCIL — Top Row: Lon Mears, Dave Koger, Dave Zanders. **Second Row:** Edwin S. Persons, Carol Beardmore, Susan G. Holmes. **Third Row:** Mike

Levine, Steve W. Vytlačil, Barb Stauth, Brac Keshlear, Rich Kowalewski, Kirk Baughan
Bottom Row: Sheila Schrepel, Joe Poell.

HOUSING

HOUSING

HOUSING

HOUSING

HOUSING

HOUSING

HOUSING

HOUSING

You can't get around it — you have to live somewhere. Whether you're 6 or 72, black or white, rich or poor, famous or infamous, you have to have somewhere to lay down your weary bones at night and sink into sleep.

College is no different. The living situations you encounter in college help you to prepare for those you'll meet later on.

What if the kid who lives next door to you in the dorm is an absolute psychopath? At least you'll know how to handle the one across the street from you in Suburban U.S.A.

What if your roommate in the house refuses to clean the room? At least you'll have a backlog of approaches for your neighbor who won't cut his grass.

And what if the couple in the apartment above you fights deafeningly into the night? At least you'll be in practice for the countless fighting couples in the countless apartment buildings you'll live in over the next 60 or so years.

In college, you learn the trade that will support you for the rest of your life. But through college housing — dorms, houses, apartments — you find ways to cooperate with the people you'll encounter wherever you live.

Greeks share responsibilities of living group

By Bruce Voigt

"Hey Jack, you got another letter from your girlfriend."

"Who's driving to class?"

"Need one more partner for foosball. Get Wright."

"Can you help me with chemistry, Susan?"

That's the way Greek houses sound when given a chance. Typical. Comments you'd expect from any group of students living together.

Put houses on the defensive, and the warped comments surface like bubbles from a diver's tank.

"Well, we like to think that we're **the** social group on campus."

"Almost all of our members participate in extra-curricular activities on K-State's campus."

"We've got the neatest house-mother — she's really something else."

What else can be said? Ask someone to say something impressive about himself, and that's what you get — something meant to sound impressive.

The facade of importance and prestige is only a cover-up for the real difference between Greek houses and other campus living groups. It's very simple. The students in a house have to assume responsibility for their organization as well as themselves.

Anyone can live apart from

responsibility. The trend to apartment-living is testimony to this fact. It's much easier to claim the good things — "Yeah, there are some really nice people living around me," — and it's easier to disclaim the bad — "I don't know anything about them. They live down the hall."

Greeks don't have the same flexibility. As members of a specific living group, they must answer not only for their own actions, but also for those of the others in their house. When one member gets drunk in public, the whole group is labeled as a bunch of alcoholics.

The reason a Greek house is something special in the eyes of its members is clear when viewed in this light. No one wants to be associated with a group unless he

thinks it offers him something he can't get elsewhere.

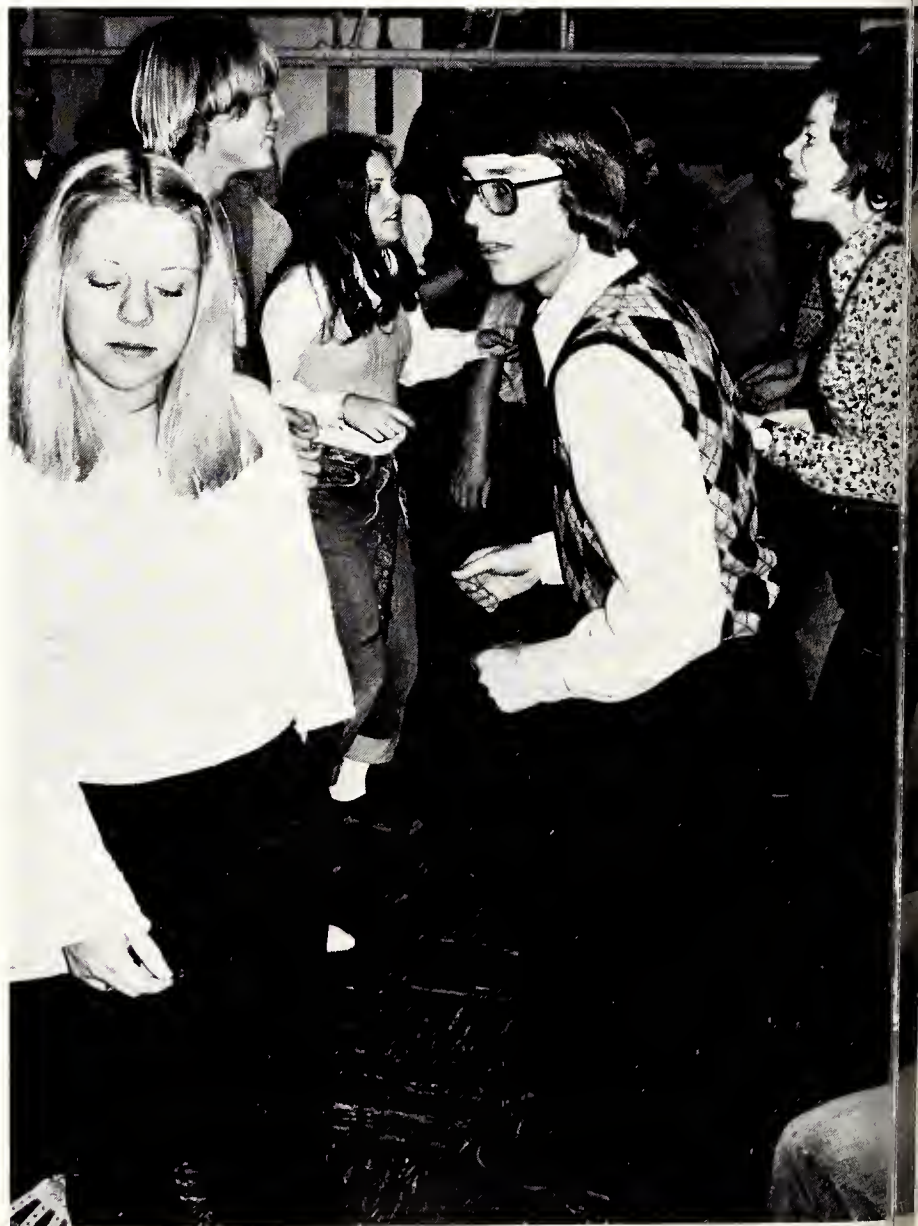

So the clichés appear — spirit, social living and scholarship. In many houses these ideals are not clichés; they are meaningful realities. How much an intangible like spirit means to a member depends on how much of himself he gives to make it important.

The students in any house are typical: they like to do the same things as non-Greeks do. But their responsibility to the group as a whole demands that they set high standards for themselves.

What is a Greek house? It's friendship, water fights, parties, TV-watching, studying, individuality, new experiences, intramurals . . . and responsibilities. For more than No. 1. For the whole group.

Functions combine beer, dancing, mixing, fun

By Robin Rouse

It's Friday afternoon. The clock strikes three. Through the intercom rattles a voice: "Ladies, the guys are downstairs for anyone needing a ride to the function."

You quickly change your jeans, fix your hair and casually begin the journey down the steps.

The first guy you see is a cowboy complete with boots, baggy jeans and short hair. His build is solid, and he's very friendly. You get into his car with three other girls and he drives toward his destination discussing farm life and small towns.

You arrive at the function to see smiling students socializing, playing ping-pong and listening to Jethro Tull.

The jock comes to greet you. He is wearing jeans, a T-shirt and his favorite tennis shoes. You discuss the football game K-State lost last Saturday while he flexes his muscles and tries to keep from smiling. He

offers you a beer a few minutes later. You accept, so he excuses himself politely, and you lose sight of him in the crowd.

Your eyes search for a familiar person. The stud struts toward you and introduces himself. You notice that his shaded wire-rims match his turtle-neck sweater and jeans. He runs his fingers through his mustache and beard while he waves to all the girls he knows. He asks you if you know the girl across the room. Before you have time to answer the jock returns with your cup of beer, apologizing for the foam. He excuses himself to mingle, and the intellectual approaches.

The stud, smoothing his styled hair, asks you if you are busy that night. At your negative answer he takes his leave. While attempting to calm your now confused brain, you notice the intellectual is waiting for an answer. He repeats, "What is your major?" and you answer quickly while noticing his red plaid slacks

and V-neck sweater. You begin discussing classes and grades, and he offers to refill your cup.

As he drifts away, the "real party" challenges you to a chugging contest and gives you a full cup of beer. He wins and discusses his past opponents while refilling his glass every two minutes. He finally excuses himself to pass out.

You feel someone nudge you, and you turn to see the cowboy offering you a full cup. You discuss his animal science class with him over four more cups of beer. By this time, you both have to sit down and begin laughing hysterically over some corny jokes.

Alas! It's 5:30 and the time has finally come to return to sanity. You are home, and you find that not-so-favorite aroma of liver and onions filling the air; but even it will taste good. You have been saved by the dinner bell!

Students share jobs in houses

Cooking for fifty, cleaning for fifty and living with fifty.

The three scholarship houses at K-State are operated by Housing and Food Service and provide housing for about 150 students at a reduced cost.

In return, the residents live cooperatively — cooking their own meals and maintaining their respective houses.

Smith and Straube, houses for men, are owned by the University Endowment Association. Prospective residents file financial statements and are selected on the basis of scholastic ability and financial need.

Smith was founded in 1957 in memory of Maitland Smith. House

members set most of their own rules, and have taken steps toward self-government.

Straube was founded in 1959 by various milling companies as a memorial to Oscar Straube, prominent Kansas City milling executive. Members are active in independent intramurals.

The scholarship house for women, Smurthwaite, is operated by the Kansas Home Demonstration Units. The residents are selected by scholarship, financial need and personal interviews.

Scholarship house students truly depend on each other. This creates personal bonds far beyond those aquired at the kitchen stove.

Residence hall labels inaccurate, unnecessary

Don't deny it. We all do it occasionally.

We tend to categorize students by where they live: apartment-dwellers, Greeks, dormies.

But dorm residents aren't characterized only by living in University housing; they are labeled by which hall they inhabit.

You've heard the (often derogatory) names: Putnam Prudes, Haymaker Animals, Goodnow Jocks, Moore Freaks.

The question is not why the groups are labeled. That's obvious. Living groups, filled with pride and confidence in their own superiority, tack the deprecating names on other groups as a way of asserting their own rightness.

The question is this: why are the groups labeled the way they are? In other words, is the dorm's image a product of the students' personality, or are the students' personalities in-

fluenced by the dorm's image?

By way of example: did Goodnow Jocks come into being because a lot of sports-minded girls live there, or do Goodnow residents become athletic on checking into the dorm?

It could be a little of both.

For instance, phys. ed. majors might tell other phys. ed. majors that Goodnow is a fine place to live, thus causing the athletic population of Goodnow to sky-rocket.

Or maybe girls who are normally indifferent to sports move into Goodnow, are pressured into participating and find they love volleyball.

Now that we've solved the problems of why residence halls are labeled and whether the students make the dorm or the dorm makes the students, we have just one more question: is it all necessary?

It most certainly is not.

If you questioned all 150 residents of Van Zile, the honors dorm, you'd

find that about one-half of them aren't even honors students. So the horn-rimmed-glasses-nose-in-the-book image is neither accurate nor necessary.

And if you scoured all nine floors of Haymaker, you might find an "animal" or two who doesn't tear toilets out of the walls and who even studies occasionally. So the animal image (plus the eighth floor's amateur Frank Lloyd Wright stereotypes) are hardly appropriate.

The message is this: when you meet a girl from Putnam, don't automatically assume she's a prude — you might be tangling with Little Lolita. And when a guy from Moore approaches you, he just might want to know what time it is.

Don't take stereotypes too seriously — you might miss out on meeting some great Haymaker Intellectuals, Putnam Swingers and Van Zile Jocks that way.

Maids encounter grime daily

By Jan Paschal

Her weapons: dustcloth, mop and cart of disinfectants.

Her mission: to erase the daily grime and mess accumulated by residence hall inhabitants.

The maid, like no other school employe, gets a practical picture of students' feelings about ecology. She picks up candy bar wrappers off of the floors, empties over-flowing ashtrays, and tidies up johns.

She has observed caged rats kept in closets alongside dirty dishes and clothes left to soak until scum forms over them.

"It doesn't take very many to make a mess," most maids agree.

On the other hand, Dorothy, who has worked at Van Zile for almost 27 years, said she believes, "Anybody who's young is going to make messes. If they didn't make messes, they wouldn't need any maids."

Some of the more common things maids run across in their daily work include left-over Cokes and unclaimed clothes in the laundry rooms. Many times they retrieve hairdryers and other personal belongings left lying around from the fate of no return.

"Some of these kids say I'm like

their mothers — cleaning up after them," Dorothy laughed.

"I enjoy the work. It's kind of hum-drum . . . you do the same thing every day, but then there's always something different," said Esther, who works at Ford. Like the others, she puts in a 40-hour work week.

The chance to earn extra income attracts most women to these jobs, according to Esther. She began working while her son was finishing school here.

Whenever certain cleaning problems arise on a particular floor, most maids will talk to the floor president and staff members about it. Signs remind residents to clean tubs and sinks.

Unnecessary damage, such as burned tiles from careless smoking, makes residents' living costs higher, according to Pauline, another Ford maid.

"When you see some of these things," Pauline said "it makes you wonder — are they little kids or are they really college material?"

"However, it's a low percentage that makes it look bad for everybody," she said.

Dorothy, who will retire this year, said, "I really like it here. I'm going to hate to leave."

Students find "living at work" takes adjustment

By Dave Chartrand

A home is not always a house — or a dorm, or a Greek house or even an apartment.

At college, home is what's waiting with four-walled arms and a motherly roof after a day of classes.

And for some, that can mean almost anything.

Just west of Student Health is a limestone building straddled by a large water tank. On the east door is a sign which reads: "Power Plant."

A stairway, a few short corridors, another stairway, and one steps onto second floor to find an odd, almost comical sight.

Alan Borthwick is hanging his clothes to dry. On a clothesline, no less.

"That's what you do if you don't have a dryer, you know," Borthwick, a senior in political science, answered. He shares three converted rooms at the Power Plant with seven other K-State males.

They are student fire-fighters. In exchange for rent, the eight men place themselves at the beckon of the campus.

"Our main job is the fire-fighting," Borthwick said. "But there aren't too many fires. Most of our alarms don't amount to much, but we have to be on duty anyway."

Two two-man rooms and one four-man room accommodate the group. The rooms are much like some dorm rooms in size, and the guys have painted and decorated them to their tastes.

But life as a fire-fighter is a far cry from dorm living. The guys are forbidden to have women or liquor in sight. The plant is locked tight after 5 p.m., so no one could get in if he wanted.

The guys take turns "on duty." Four fire-fighters are on duty every night. Each guy is on round-the-

clock duty every other weekend. And those on duty must be within hearing distance of the loud emergency whistle that screams from atop the Power Plant. The whistle has priority over anything.

"It's not a bad way to live, but not great either," John Jurgensmeier, senior in electrical engineering, said.

"You're on duty quite a bit so you don't get to go out messing around as much as you want to," he said.

"It's weird, all right," Borthwick said. "Everybody wants to be out, but nobody leaves. We need the money. You've got to be crazy to move in or crazy to move out."

North of the Goodnow-Marlatt complex on Denison, one sees mostly corrals, dairy equipment and cows.

There are no parades of students, and little noise — just quiet.

"That's why I like it here better than the dorm," Dave McClaskey, sophomore in dairy productions said.

McClaskey and two others share a room on an upper floor of the huge dairy barn on North Denison.

Their job is to patrol the grounds, watch for prowlers and do clean-up work. In addition they each help with milking the cows twice a week, including getting up once a week to milk at 3 a.m.

McClaskey and roommate Bill Garrett have both lived in dorms and prefer the quieter setting of their present "home."

"We're away from the noise, we're comfortable and we can live the way we want to," McClaskey said.

Garrett, McClaskey and freshman Tim Lackey pay no rent. They all have meal tickets, however, and eat at Derby or Kramer.

"Oh, it's different, I guess," McClaskey said. "The roof leaks sometimes; there are no screens on the windows. And every so often an

old raccoon will run by outside the window. You don't see that in a dorm. But mostly it's nice and quiet."

Not too many people know where Dan Niblack and Bob Dameron live. Not too many can even find them.

"It's funny. We'll look out the window and watch people go right by, and they don't even know the place is here," Niblack, junior in horticulture said.

Niblack and Dameron live in one of the greenhouses on the east side of campus near Justin Hall.

Partially hidden by branches and leaves, a small antenna sits on top of what looks like nothing more than a flimsy hut. The pipe guardrail that runs along the edge of the hill in front of the place has a bicycle chained to it.

The two students water and tend the plants in the horticulture greenhouses throughout the week. In exchange, they receive free rent and utilities.

"The place is perfect for two people. We have few restrictions. We can be individual and enjoy real privacy," Niblack said.

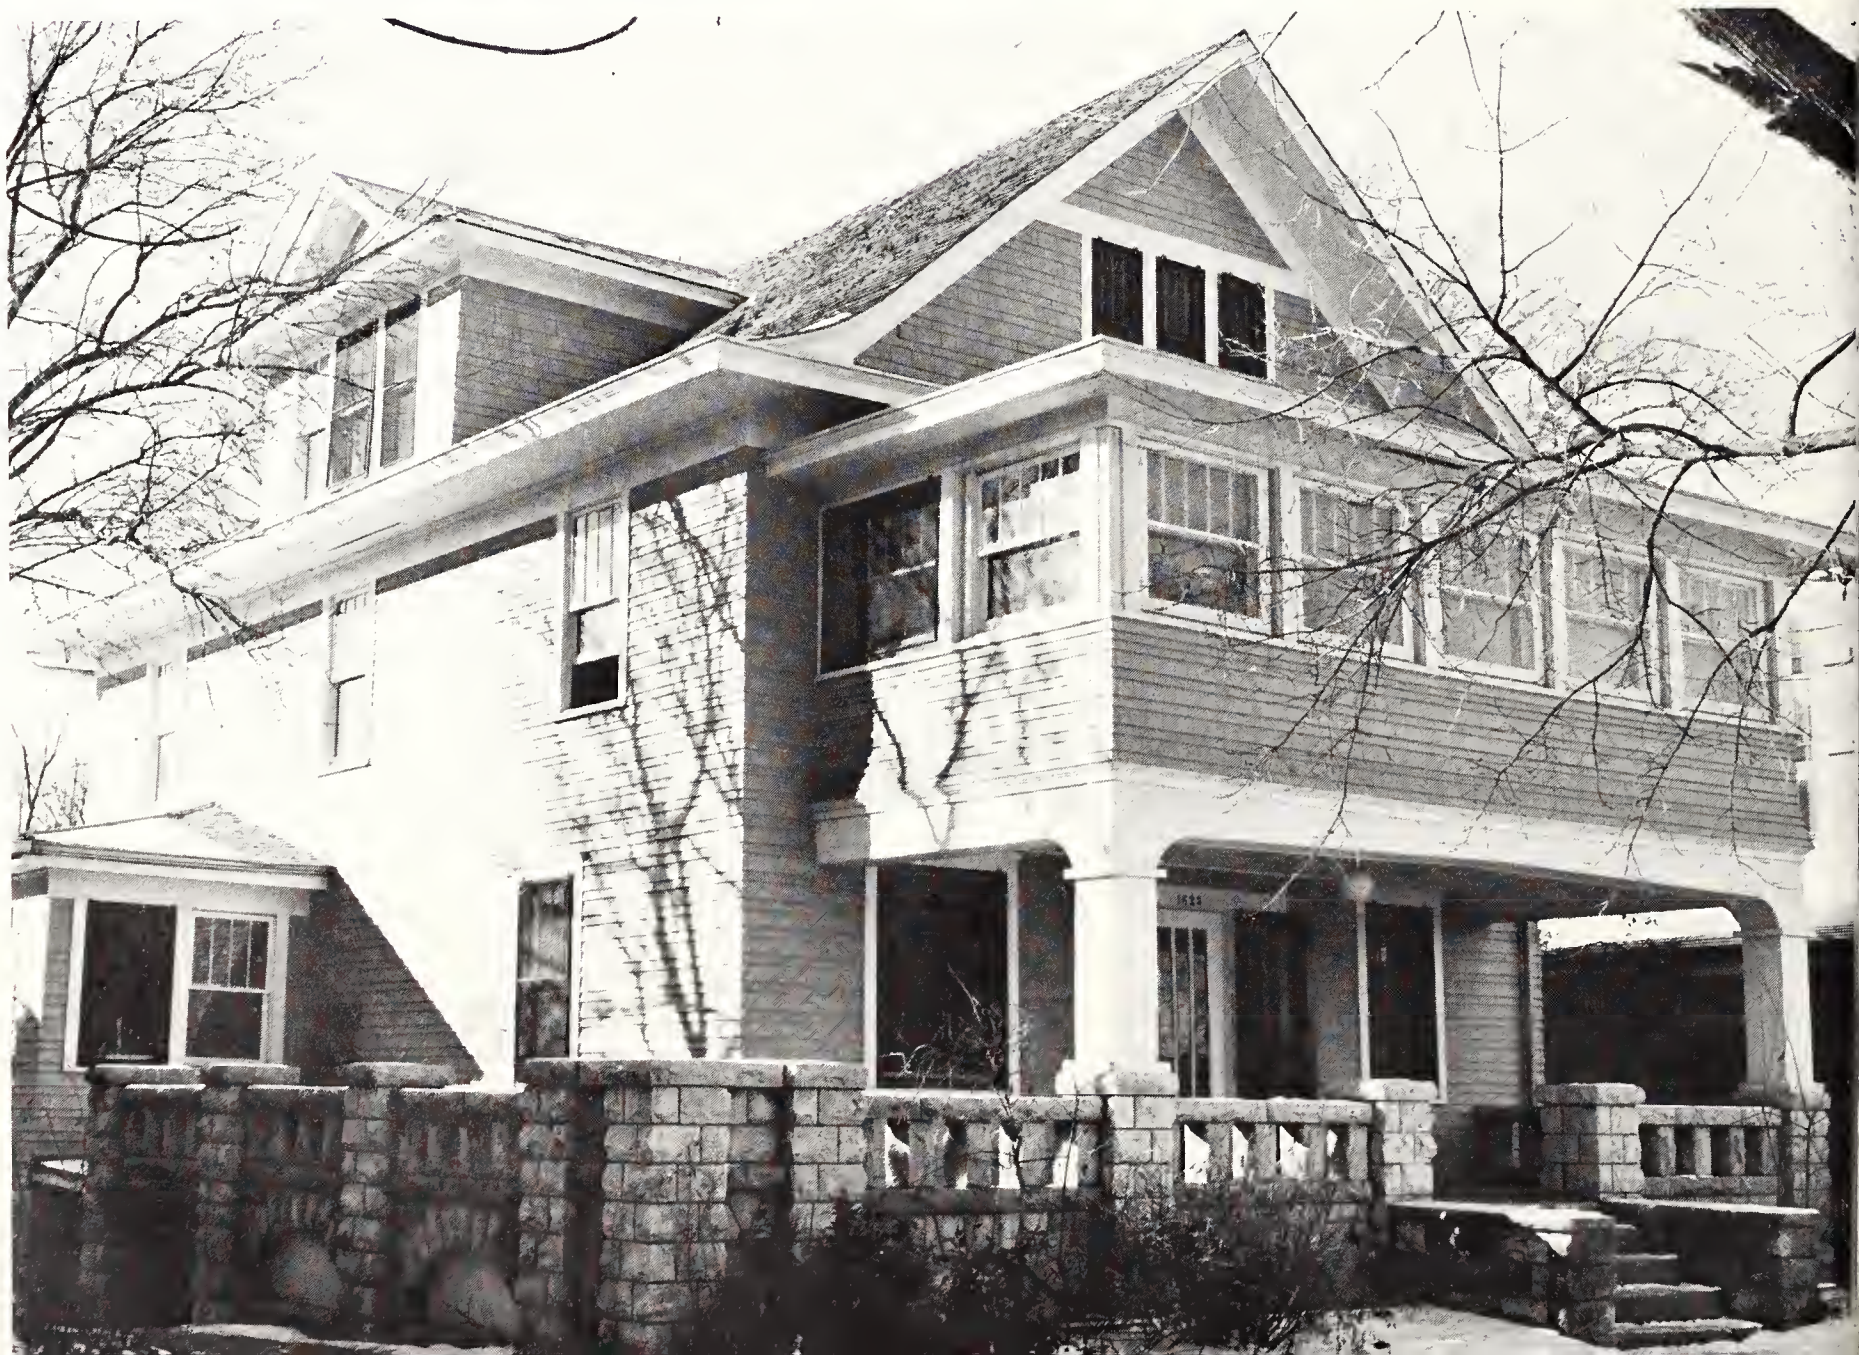

The place is actually just a section of what used to be part of the greenhouse. It has been re-paneled and converted into something resembling an apartment.

It has a sitting room with a fireplace, a small study room, a kitchen, a bathroom and a loft where Niblack and Dameron sleep.

"We have to do our own plumbing sometimes," Dameron said. "The pipes knock. This place has been here over 20 years. But it's very comfortable; and it's extremely convenient to live right on campus. You're so close to your classes."

A house is a home, but only if one is lucky or rich. Until then, he takes what he can find.

For rent: eff. apt.—need car— just \$200/mth.

The last straw is broken when the dorm room becomes too small, the Greek house becomes too expensive and they both reverberate with noise. The obvious solution is to find an apartment.

The obvious problem with such an obvious solution is this: it can't be just **any** apartment. It must be an accommodating one: nice, fairly close to campus and cheap.

These prerequisites are not unreasonable ones, IF:

- A) one looks well in advance of his move-in deadline;
- B) one is willing to shell out more \$ than originally anticipated;
- C) one has a few connections waiting and willing to help;
- *D) all of the above.

Otherwise, expect a miracle or a dump for \$125 a month.

Hamburger Steak 1/2 lb each Bake at 400° for 20 minutes
 Hot Potatoes - Bake 10 lbs. and Heat with 1 lb. margarine
 W. K. Corn - Kernels on card. Jelly - margarine
 Waldorf Salad - Recipe on card. Add some beef
 Muffins - (Recipe on card) 5 lbs ground beef
 Slice Banana in Pudding - add some beef
 PRE-DEPREPARATION:
 Put 1 can orange juice, Bologna 601, and ground beef
 3 lbs. Beef Patties in refrigerator.
 1/12/11 10:00 AM 12-24 MEN

Students attempt to beat the frying pan blues

By Karla Brockman

Students often complain about dorm food, but those who live in apartments and must prepare their own meals sometimes look back fondly to the time when all they had to do for dinner was take a meal ticket to the food center.

One of the most time-consuming duties of apartment dwellers is grocery shopping. Piling a cart with such items as frozen pizza, potato chips, dip and diet cola can be easy, but it is also expensive. Many students learn that peanut butter and bread are much more economical.

One coed said she buys enough food for one week for herself and two roommates. She doesn't make a list before shopping, but randomly chooses things from the shelf, checks the price and decides

whether or not to buy them.

Usually a student's shopping basket is easy to distinguish from that of a family shopper's because it contains an abundance of frozen, prepared foods. Chicken pot pies and TV dinners seem to be favorites among young shoppers with heavy loads of studying.

Even cooking easy meals involves more time and energy than most Derby-going students realize.

One coed said it took approximately half an hour to prepare her favorite easy meal of boxed, dried potato-beef casserole, salad, cake and iced tea. Cleaning up, however, took even more time.

To a student who finds classical literature fascinating or likes to spend time perfecting an oil painting, the demands of cooking meals and cleaning dishes may become a dreaded drudgery.

One method of dealing with this drudgery is to ignore the dishes for a while. After a pile of plates and glasses blocks the entrance to the kitchen, the student must spend a few hours clearing them away.

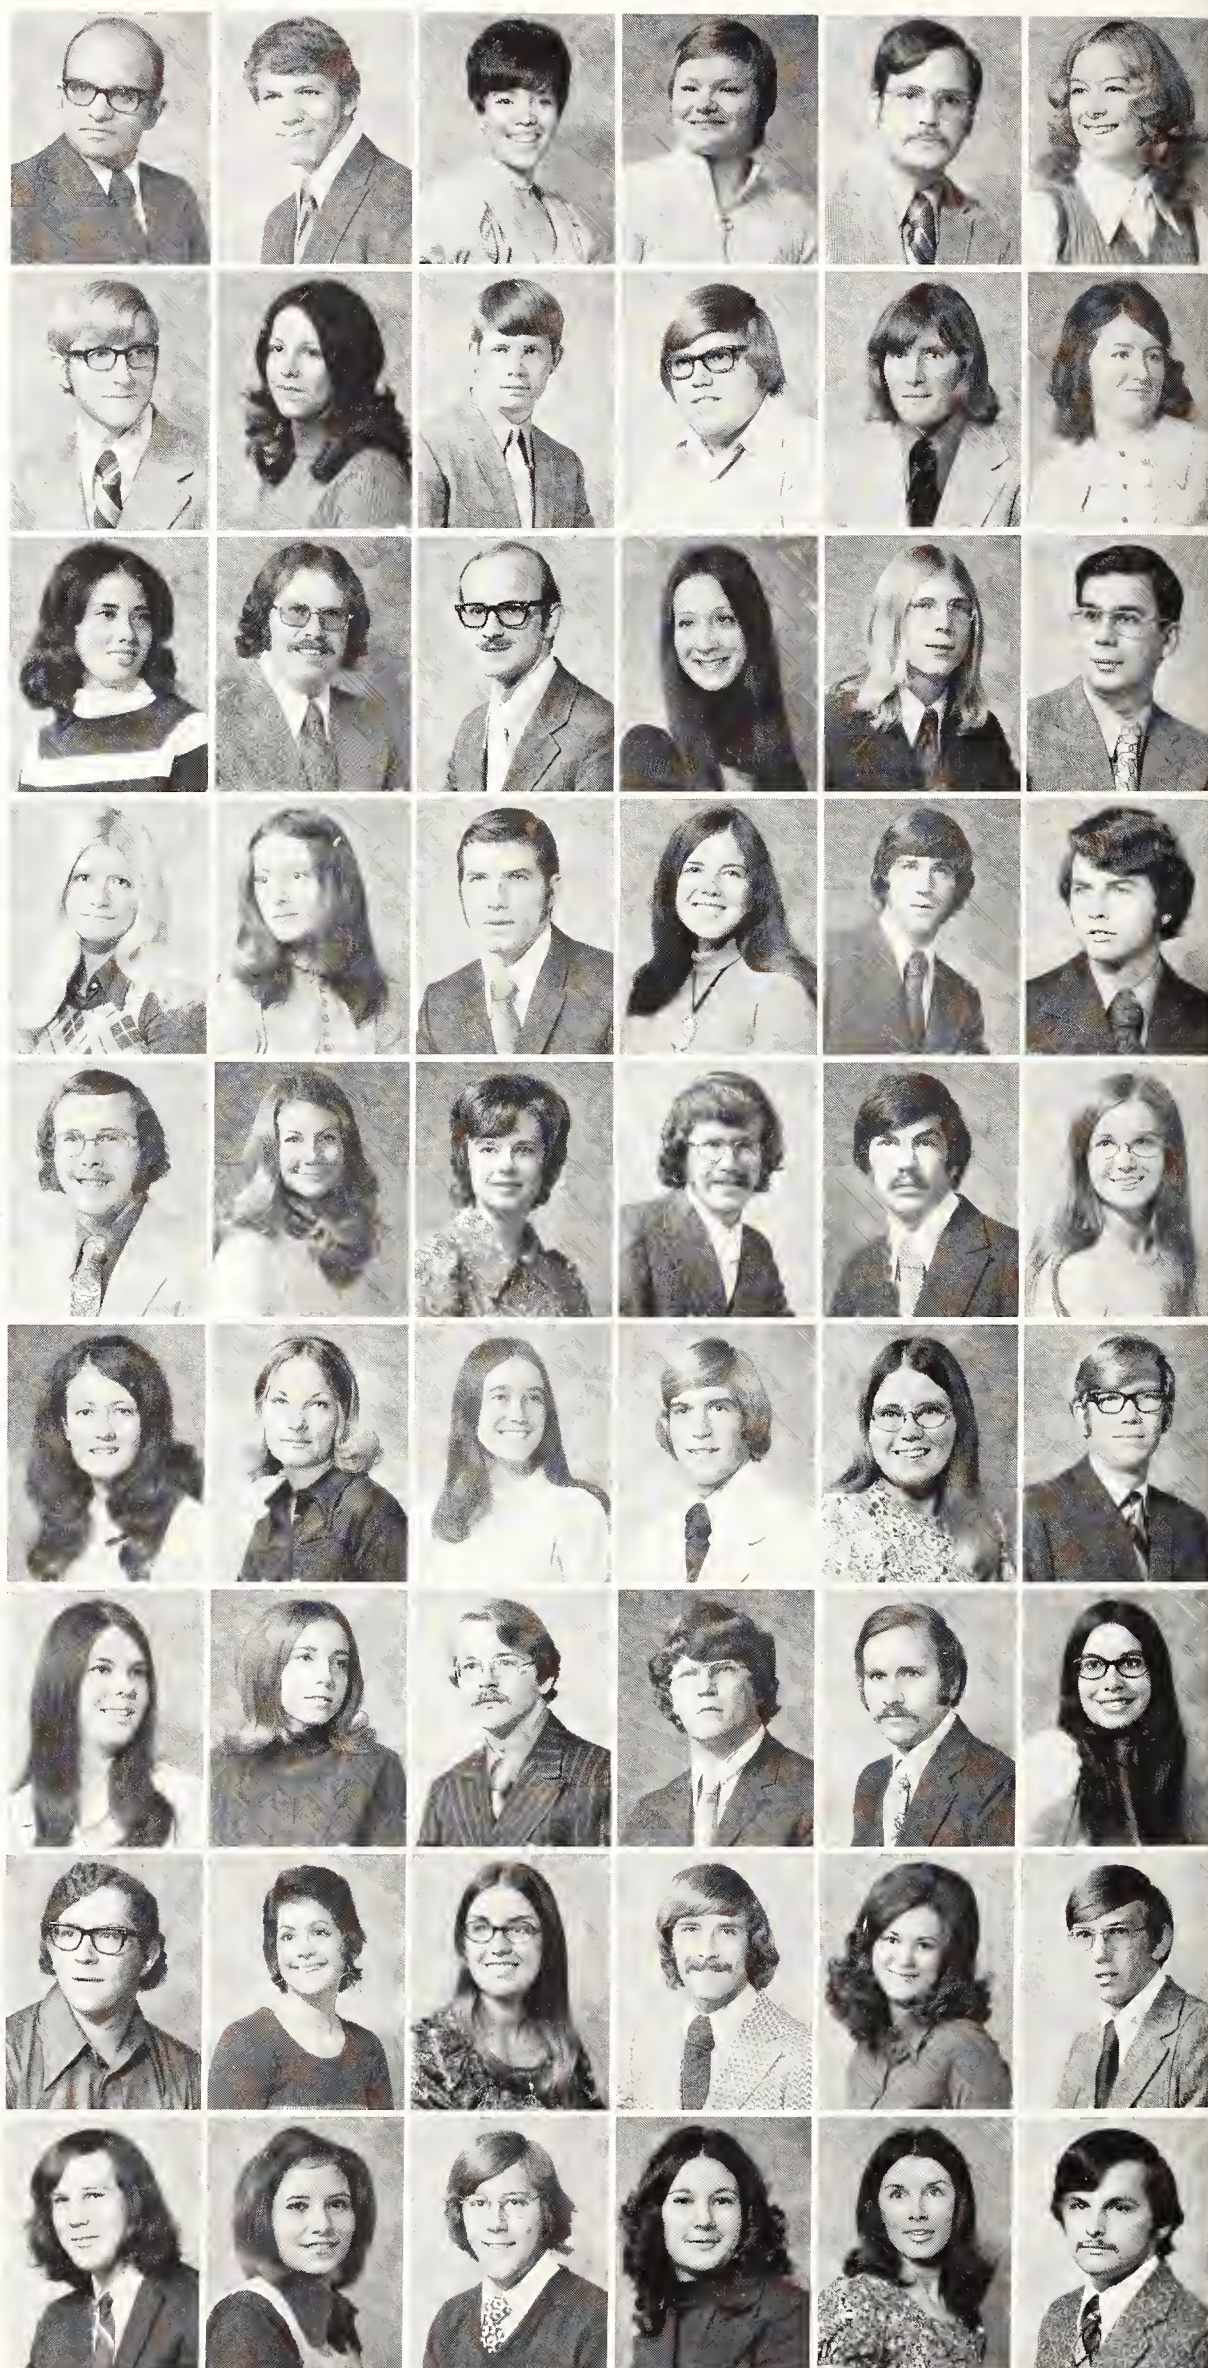

Another way of diminishing the cooking doldrums is refusing to cook. Almost anyone can survive on canned pop and cheese sandwiches served on napkins if he wants to.

There is one other alternative, however, which always seems to be the most popular. That is the suggestion to dig into pockets and purses and find enough coins to eat out. The Mar Cafe, Rusty's and Taco Grande are but three of the local eating establishments which provide cheap but filling victuals.

Yet, whichever way a student chooses to seek his daily bread his stomach and not his brain is the final judge.

SENIORS

SENIORS

SENIORS

"I am a senior."

To a fledgling freshman or a sophomore battling with a slump, that statement is akin to "I am God."

But ask any senior.

He'll tell you he's not floating through a utopia — far from it. He's facing panic, indecision and worry. He's glad to be finishing school for the time being, but the things ahead are awfully unnerving.

The job market is tight, and that concerns him. He's working to plan a wedding — or trying to stop clutching because he's not. He doesn't want to go back home, but where else is there to go?

Still, in more rational moments, he's happy. Textbooks and multiple choice will be behind him soon, and he can begin to prove himself.

College has prepared him. He's versed in his field; he's learned to work within a bureaucracy; and he's practiced living with himself and others.

Now the preparation is over, and frightening though it may be, he's ready to try the real thing.

Placement Center aids job-seeking K-Staters

The wooden steps leading to K-State's Career Planning and Placement Center are well-worn and creaky.

Located in the basement of Anderson Hall, the Placement Center assists students in career counseling, not only for degree candidates but for underclassmen, alumni and prospective students.

There are three professional staff members, or placement officers, and each has certain specialty areas.

Bruce Laughlin, director, heads the areas of business administration, engineering, architecture and design and the physical sciences.

James Akin and Vernon Geissler are assistant directors. Akin's department is education, both public and private. Geissler is in charge of agriculture, home economics, liberal arts, veterinary medicine and

government employment.

Laughlin said he expects around 2,000 students to use the center this year. Of that number, he expects 600 to 700 students to be looking for jobs in education, and 1,200 to 1,300 to apply for jobs in business and industry.

"There had been a slight decrease in the number of on-campus interviewers within the last four to five years, but I expect about the same or a slightly higher number this year — about 320 organizations," Laughlin said.

"It's a simple fact that we have had a recession, and companies have stopped growing rapidly. We are financing both a war and a peacetime economy," he added. "In recent years there has been a belt-tightening."

There are several points that

almost all employers look for when they are interviewing, he said.

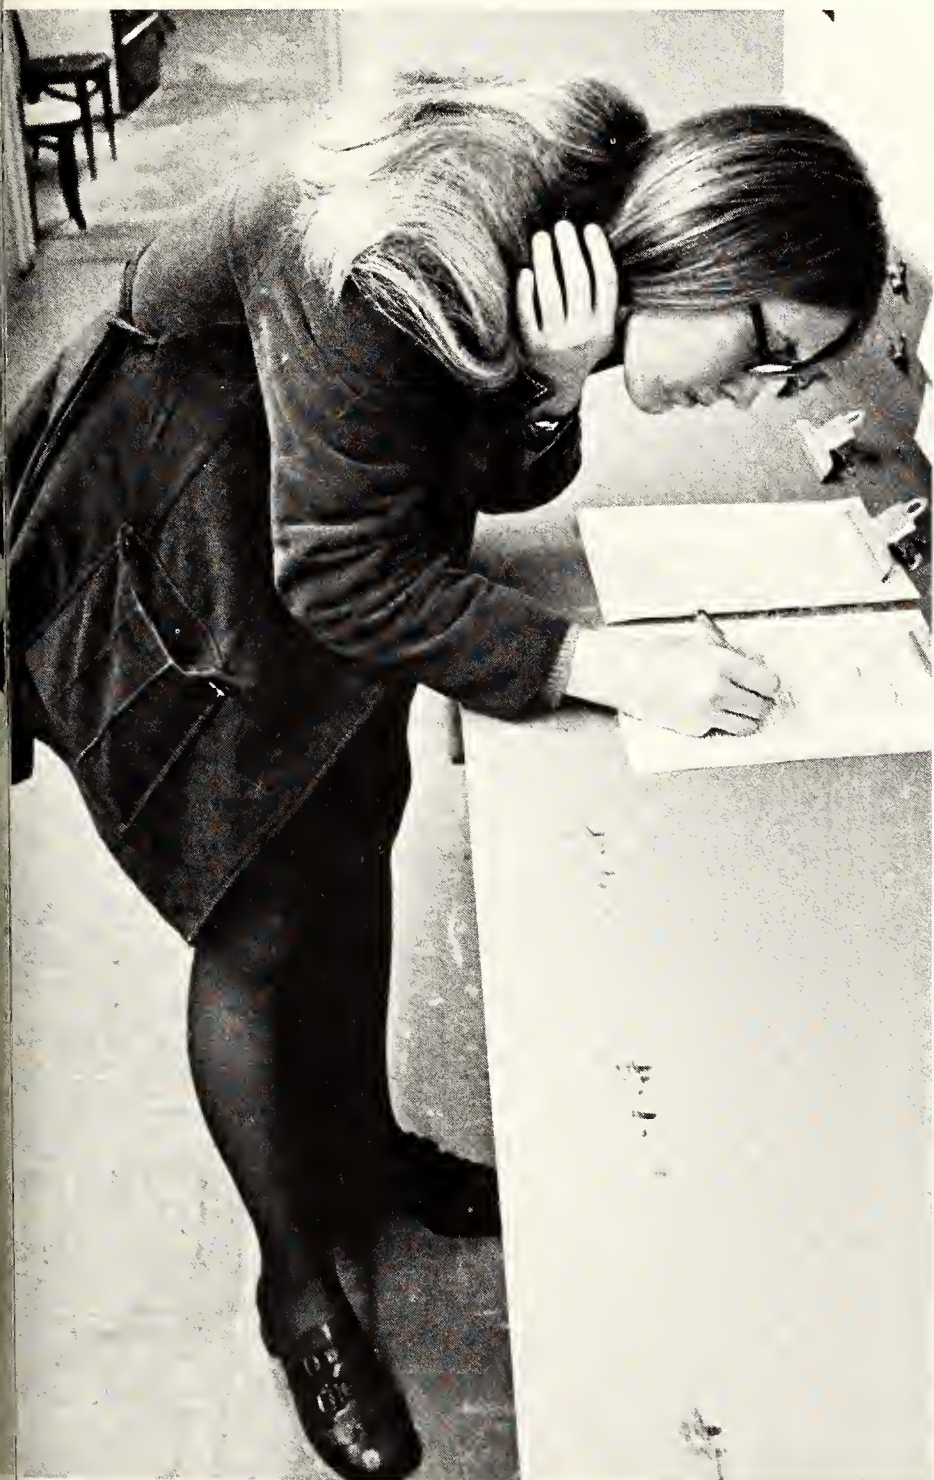

"They look for the right kind of preparation and a good appearance," he said. "They also look for a good personality and willingness to work."

"Employers rate K-State students high in the area of willingness because they often have had a lot of work experience," Laughlin said.

To participate in on-campus interviews, a student must be registered with the Placement Center. They recommend that he registers one calendar year before receiving his degree. The student then signs up for interviews with prospective employers.

When a student is battling a tight job market, K-State's Career Planning and Placement Center can be his best friend.

Vietnam peace kills the draft

Jan. 27, 1973 — Henry Kissinger and North Vietnamese officials signed the cease-fire agreement which provided for an official peace.

President Nixon said draft inductions were to be suspended from January through June 30, when his Presidential authority to induct will expire.

What did this mean to senior males at K-State?

"I'm relieved right now," a senior in business administration said. "I have a 2-S until the end of May but I was worried about getting drafted between graduation and June 30 because I'm getting married in August."

One senior in political science said he might not have applied to law school if he had known this was going to happen.

"I might have bummed around Colorado for a year had I known the draft wouldn't catch me," he said.

Keith Spare, K-State's draft counselor, said he was "somewhat cynical and leery" about whether the suspension of draft inductions was permanent.

"Students won't know for sure until the end of December because their eligibility maintains through the end of a year."

Spare said he advised students to hold on to their deferments "until we know in November or December that there definitely won't be inductions."

After June 30, Congress will vote whether to extend the President's authority to induct. That authority could be restored within about a month's time, according to Spare.

"I don't know how to inform people that they aren't as safe as they think," Spare said. "The danger lies in another bad induction situation."

Whether the draft calls are actually ended or not will depend upon the progress the United States makes toward achieving a volunteer army and upon the government's attitude toward militarism in the future.

Royal Purple Editors—1973

As you may recall, I asked you 472 pages ago to give some thought to the ways in which college life acts as a catalyst in the socialization reaction. Whether you have or not is entirely beyond my control, although we, as a staff, tried to simplify matters with visual attention factors.

While lacking nudes, writing on the end-sheets and a red, white and blue cover, we attempted to supersede these deficiencies with photographs and copy that not only related events but created a mood and possibly raised some questions about ourselves and our lifestyles.

This past year has, without a doubt, had its ups and downs for myself as well as the RP. Being appointed Royal Purple editor last March only to have the book be excluded from SGA funding is like taking the turnpike to Kansas City with only a quarter in your pocket: you

can't help but feel uneasy. But with the passage of the RP referendum, funding, hopefully, will not be a problem in the near-future, as RP editors have enough problems without twisting SGA-related arms every year.

As for myself, the book's "theme", if you will, has also held true. I think the past twelve months of preparation, discussion, staff meeting, deadlines, Kedzie Kapers, arguments, alienations and apologies have provided examples and prepared me for what I may face in the future.

Although I have been rather callous in expressing my gratitude in the past I will, at this time, try to make up for it.

To all the staff and especially my editors; Gail, Jean, Diana, Carole, Jan, Barb, Cindy, Dan and Jim — thank you for your patience, late

night companionship and hard work.

Although he's only a rookie in the business, I would like to thank Arden for his attitude and help.

To Jean Lange, Bill Brown and Jenny Spiker a special vote of thanks is extended, for without your advice and direction who knows what would have happened in Kedzie 118.

Finally, to my parents and Kathy — thank you for putting up with the short weekend visits and no weekend dates. I'll try to do better in the future.

As for you, the person reading the 1973 Royal Purple, view it for what it is, not what it could be.
