

SUSTAINABLE COMMUNITIES

K-STATE SUSTAINABILITY
CONFERENCE- 2010

What is a Sustainable Community?

A community that strives toward energy and food independence, offering its residents an alternative direction of growth away from a fossil fuel economy.

How do we get there?

- Develop bicycle and walking trails
- Promote and support local and urban agriculture
- Support alternative energy usage
- Enhance recycling programs
- Strong infrastructure of parks and recreation
- Support the infrastructure of the arts
- Encourage the use of alternative transportation
- Center the education system around sustainable objectives
