Think black and white. What comes to mind?

If you're an animal lover, you might think of a dalmatian or a zebra.

Or perhaps black and white reminds you of a newspaper. You remember: "What's black and white and read all over? — Not an embarrassed zebra, silly, a newspaper!"

It could be that your prime interests lie in racial issues. Then what could say black and white better than Negro and Caucasian?

Or maybe your black and white thoughts are abstract — like high beam headlights on the road at night.

But because black and white are absolutes on any continuum, they shine in the philosophical realm. We need not remind you that the good guys always wear white hats.

stop	in
up	true
out	wrong
yes	smart
right	down
bad	good
happy	no
hate	little
black	sad
dumb	pepper
hot	die
false	white
big	cold
salt	go
girl	love
live	boy

From the time we're babies, we're taught to think in terms of absolutes. It's good to eat all your strained carrots and bad to spit them at Mom. It's nice to share your toys with your brother and naughty to step on his head.

And the pattern continues throughout grade school and junior high. A's are

successes; F's, failures. Extracurricular involvement is admirable; laziness, deplorable.

It's no wonder that by the time we're in high school, we tend to consider most issues in terms of absolutes: black and white, good and bad, beautiful and ugly.

But then there comes the day you find out your best friend cheats on his algebra tests. Or you see the sweet girl who sits beside you in Spanish stealing pencils from the Union. Or you overhear your roommate telling your inner-most secrets to half the girls on the corridor.

What then?

Does that formerly good, loved, trusted person become bad, hated and suspect? Do you automatically cross the person off the white list and transfer him to the black?

Of course not.

You wake up and realize that things in this life just don't fall into neat categories.

Then you begin to notice other things.
College helps.

You find out the Indians weren't the bad guys all of the time or even most of the time. You learn that the United States has pulled its share of diplomatic blunders; America the Beautiful isn't always the right and the might. And you come to the conclusion that the person who's supposed to be a paragon of virtue — the President — just

might be a common crook.

All the blacks and whites you've been learning for the last 12 years suddenly surface, and you realize that nothing is ever all right or all wrong, all good or all bad.

So, how can a test answer be all true or all false? Isn't it just a guessing game to determine what the teacher wants to see?

BLACK

Life is not black and white. It's as simple as that.

Everything involved with living comes in one of an infinite number of shades of gray.

You find that if you keep trying to shove things into black and white categories, they slip right out again and melt into that enormous gray area.

But soon you discover if you can keep the gray concept in mind, your life is easier. You don't have to make unnecessary decisions anymore.

WHITE

GRAY

So think gray. What comes to mind now?

Foggy nights, kittens, file cabinets, old people, and even black and white television screens — all are gray.

But more important, life is gray. Certainly not gray as in drab and gloomy and depressing. But gray as in giving every person you know, every concept you learn and every idea you hear a chance to stand on its own merits without being shoved into a needless category.

For if ever there was an absolute, it is that there are no absolutes.

Shoppers, shoppers everywhere but hardly a product to buy

By John Lonergan

From rumors to reality, from oft-repeated headlines to frantic searches for open service stations, from whispers of prophets of doom to roars of outraged shoppers — the Age of Shortages is upon the American consumer.

For a variety of reasons — some predictable, some inevitable — supply has not been meeting demand in this most recent season of discontent. The immediate results are shortages in a variety of areas of interest to all people: meat, gasoline and newsprint.

Depending upon the situation and the product, students and townfolk of Manhattan have found themselves adjusting to the sundry havenots in various fashions.

The initial result of any shortage is a raise in prices, and the situation has been no different this time. Grocery bills have begun to creep higher each day. Gasoline prices were in the process of taking off when the government put the clamps on them. Then for the station managers it was rationing, watching lines from 8:00 in the morning and, almost always, running out before the last customer was sent on his way.

Occasionally consumers have sought, or have been offered substitutes for their desired products. As the meat counters have begun to empty, grocers have made pains to keep the poultry, fish and grain sections well stocked. Service stations have spent more time emphasizing their services and smiles to keep the customers satisfied.

People have begun to rediscover the thrills and perils of bicycling, as well as the curious and neglected function of their two legs.

Newspapers have begun to cramp and cut in the face of paper

and newsprint shortages.

And planning committees initiated studies in power cutback measures in the face of a long hard winter.

In the wake of the dozens of mini-crises across the state and nation, policies of use and abuse were examined in attempts to prevent, at least to delay, the next breakdown.

Along these lines, last spring K-State officials sought and located a supply of fuel oil to be used, if need be, in the frigid months to come.

The feasibility of rationing gas, power and food has been a frequently debated topic. And in general, suppliers, administrators and citizens became more conscious of their day to day use of endangered commodities.

In light of the fact that the road to prevention of shortages lies in the recognition of the problem, state and school officials have begun an educational campaign which eventually may dent the shortage spiral. Laws have been introduced and some passed in the interest of prevention.

But these conventional methods might not be effective enough in turning the tide of over-consumption, paving the way either for administrative edict or an untimely breakdown.

It is a complex situation. The conservation of various commodities is directly involved with people's life styles — their personal comfort versus their willingness to freely comply with suggested restraints. But until all people — students and townfolk alike — are committed to this struggle during these chaotic times, the trumpeters of doom will forever be in business.

"You know — and I can say this because I'm an out-of-state student and no one can accuse me of bragging — Kansas really has the market cornered on natural beauty — especially in the spring. Nowhere have I seen bluer or clearer skies. And when the winds start feeling balmy, and the trees get green, I feel as if I could stay in this 'backward' state forever."

K-State operates at half-speed; activities, people, classes fewer

By John Lonergan

Maybe you're a senior, and you need those extra hours to graduate.

Maybe you're an underclassperson, and you want to fill in some time so you won't be taking 18 hours a semester your senior year.

Maybe you're a high school graduate, you want to get the jump on your future classmates and get used to college life.

Or maybe you're a schoolteacher and you've come for a few more hours of credit during your vacation.

Whatever the reason, you've made your decision. You're in summer school. For the most part, your friends have deserted you; the campus is operating at half-speed. So now what?

You can resign yourself to the drudgery of too much class in too little time; or you can try to make the most of an otherwise bleak situation.

You can feel fortunate that it's easier to concentrate in the total immersion atmosphere; or you can sit dumbfounded trying to figure out why your summer GPA is the lowest of your college career.

You can bum it and try enjoying your quasi-vacation for whatever it's worth; or you can depress yourself with thoughts of how much money you would be making at your old summer job.

You can rejoice that housing isn't as scarce as usual; or you can wonder belatedly where you're going to pick up a roommate on the spur of the moment.

You can be glad your classes are small and you can get to know the teachers better; or you can despair that your classes are small and your teachers can get to know you better.

You can rest assured that nine out of ten K-State students are dashing, good-looking persons with great personalities; or you can be

dismayed that every tenth one goes to summer school.

You can take heart that the competition in intramurals is not as tough as during the regular season; or you can lament when you discover that the all-University handball champion of the last three years just happened to stick around this summer.

You can amuse yourself watching the high school orientation students walking around in various states of shock and awe; or you can curse that every time you turn around you run into one of them.

You can appreciate being able to find your companions in Aggieville more easily; or you can tire of turning down propositions from the great many ROTC men who have suddenly flooded the taverns.

You can be grateful the Union isn't as crowded or noisy as it normally is; or you can bowl four lines and try pretending that you're having a good time.

You can exalt and carry on as you confirm your notions that summer school is one big party; or you can come to the sobering realization that it may be a party, but it is indeed a rather small one.

And so summer school, like many things in life, is another case of give and take. You can take advantage of many situations that don't exist during the regular school year.

But, there are still classes to attend, books to read and papers to write. You have, perhaps, more freedom, more decisions to make, more time to regulate; yet a good many of your choices have already been made for you.

But then, if you had it your own way, you probably wouldn't be in summer school, would you?

Graduation: a rite of passage some students find unnecessary

Just another ceremony in your life — "Pomp and Circumstance," caps and gowns and speeches.

You've been through it all before.

Some of your classmates aren't even going to bother with it. They are going to pack their belongings, leave K-State and wait for their diplomas to arrive in the mail and make those four or five years of classes official.

They don't want a formal goodbye from K-State, the place they called home and where they attempted — and, in some cases, succeeded — in finding themselves.

To one graduate it was just another ceremony.

"Since I was planning to attend graduate school at K-State, I knew I'd be returning in the fall. So I really didn't feel like I was graduating.

"But I went through the ceremony for my parents. It gave them such a thrill to watch their first col-

lege graduate march in the stadium with hundreds of other students dressed in caps and gowns.

"My mother took dozens of pictures, too. She actually recognized me in that mass of graduates."

And the evening ceremony, only one hour long, was shorter than in previous years.

The masters and doctoral degrees were awarded in an afternoon ceremony, saving the evening for bachelor degrees.

"I guess I would have gone through the ceremony anyway — even if my parents wouldn't have wanted me to — just to satisfy my curiosity. And I'm glad I did, because it was a lovely evening," one graduate said.

The procedure is simple. Buy your cap and gown in the Union, show up for practice in the stadium, be present at the formal ceremonies, and you've made it — you're a college graduate.

Derby Day: a sexist's dream

Green grass, bright sun, mud holes, torn shirts, Wallace Village, women's liberation, \$200, a party and a trophy were all part of the 17th annual Sigma Chi Derby Day in Manhattan City Park during the spring of 1973.

To some, Derby Day is the Greeks answer to Spring Fling; to the women's liberation movement it is a perfect example of male chauvinism. But to many, it is a chance to break the monotony of studying and enjoy spring with friends.

Sigma Chi sponsors the annual event, and the participants are girls organized in teams by their living groups. The groups are usually from sorority houses, but dormitory residents are invited to participate also.

They are competing for the three-foot Derby Day traveling trophy which is given each year to the house which has accumulated the most points from the various events such as Derby Steal, Dec-A-Sig, Do-Nut Dash, Butterfingers, Limbo and Zip and Strip.

This year prior to the weekend games, a benefit party netted \$200 in beer and ticket sales for Wallace Village, a center in Colorado for the treatment of children with minimal brain dysfunction.

The events started Friday after-

noon with Derby Steal. On one side of the street, about 200 girls waited in the park for the Sigma Chis who were lined up in front of the Sigma Chi house wearing brightly-colored derbies. Finally the guys ran into the crowd of girls, who in response started grabbing and tackling them to get the hats. The group who had collected the most hats won the competition.

On Saturday the weather had turned considerably colder but enthusiasm and spirit were still in the air. Rooters from sororities, fraternities and dormitories were bundled up on the sidelines with banners for the team they were backing.

The events started with the Do-Nut Dash which could best be described as an inner tube race.

Another event, Zip and Strip, received fire from womens liberation supporters because they viewed the event as a means of exploiting women. The girls ran across the field to the sleeping bags where they changed into a different set of clothes as quickly as possible.

When the games were over, the points were tallied and the Gamma Phi Betas lugged away the trophy. Delta Delta Delta placed second and the Delta Zetas won third.

"It seems as if I'm never quite ready to come back to school when summer vacation is almost over. I hate to leave my friends and return to the books. But then I remember how nice Manhattan is in the fall — especially the campus when the leaves start turning. It really is a beautiful time. And suddenly, I'm ready to start throwing things into my suitcase so I can come back to school."

Perhaps the decade's worst crime was committed by American people trying to serve their country and President — fortunately, they failed miserably.

The White House turns gray

By Scott Kraft

"Impeach the son of a bitch!"

"Just a big misunderstanding."

"I don't know what to think."

Watergate — right or wrong, guilty or not?

Between the lines of newsprint vividly describing the bugging, espionage, corruption, graft and robbery we see several men engrossed in doing something they felt was justifiable — not unlike the parody of the pauper who steals a loaf of bread to support a starving family.

Perhaps they did not know right from wrong. According to their standards, they were doing the right thing. According to the standards of society, they were attempting something wrong — something illegal.

Should a person answer to himself or to society?

Realistically, we might submit that he can answer to himself only if he wishes to spend a sizeable portion of his life making license plates surrounded by men in gray togs.

With reckless abandon, however, these conspirators answered only to their own feelings without regard for the laws of society.

Were they right or wrong? Guilty or not guilty?

The answer depends on one's own concepts of right and wrong. If they coincide with those of society, then the conspirators were certainly guilty.

In a court of law, one who cannot determine right from wrong can plead insanity. "Your honor, the American people plead guilty by reason of insanity to the charge of harboring criminals. They could not come to an agreement on what is right and wrong in the Watergate incident."

Nothing is black or white, right or wrong. Most things are shades of

gray.

A gray that sees both points of view.

A gray that sheds tears for both plaintiff and defendant.

A gray that has compassion for the bread stealer as well as the robbery victim.

How can there be guilt in sincerity? The conspirators were sincere. The framers of the law were sincere. And finally, the American people are sincere in their judgment and condemnation of the Watergate conspirators.

People are finding it harder and harder to cope with a lack of absolutes. All things come in shades of uncertainty.

Should we compare the Watergate conspirators to John Dillinger, Al Capone, Butch Cassidy and Adolf Hitler?

Or should we compare them to men like Franklin D. Roosevelt, Thomas Jefferson, Martin Luther King and Thomas Paine? These men have in common their sincerity and belief in what they are doing although they all accomplished different things. Perhaps the conspirators have things in common with all of these men.

Situations like the Watergate mess cause us to use our minds and evaluate objectively the circumstances surrounding the event.

Rationally, we can see that a single label of right or wrong cannot be pinned on these men. We also see that a decision must be made with respect to their status.

"The defendants will stand and face the people. The verdict is . . ."

For us, the question still remains — do we incarcerate or pardon them?

DBL
1974

Students pack up possessions, not memories

Finals are over.

It's time to go home.

You've made your last rounds in Aggieville for the year.

It's time to pack all your belongings.

You gaze around the dorm room.

What has taken a year to collect in one room has to suddenly disappear overnight and reappear in your room at home.

You toss shirts and pants into a suitcase. There's no time to worry about wrinkles now.

Now that your suitcases are bulging, it's time to roll up your posters and bundle up your souvenirs in old *Collegians*.

Wait a minute.

Now that you've collected all that junk, where are you going to put it?

It's too late to ask a Manhattan merchant for boxes — he has been hounded all week by students in the same predicament.

So you check down the hall and

manage to scrounge up just enough boxes for your belongings.

All finished? Almost . . .

It's time to prepare the room for inspection by the floor staff assistant.

The room has to be in the same condition as when you moved in.

So you scrub the floor and desks and wipe the marks off the walls.

Then you cross your fingers and hope the S.A. doesn't notice the faded spot on the floor where you spilled perfume or the holes in the bulletin board from the dart game last January.

Now it's time to move all that junk into your car for the long trip home.

Of course, you can avoid part of this hassle if you live in another state or country. Most of the dorms have free storage space, and returning residents who have signed dorm contracts may use it.

Some students — both in-state and out-of-state — leave their possessions with relatives or friends in Manhattan for the summer.

Sororities and fraternities have similar storage policies.

But you have chosen to drag all of your belongings back home again for three months.

After a long wait for an elevator and several trips — three journeys up and down the stairs if you can't catch an elevator — you load the car, which seems to have shrunk in size.

You take one last look at your room.

Four bare walls stare back at you.

Your voice echoes in the deserted room.

All of your neighbors are moving out, too.

You bid them farewell.

You thought you couldn't stand to live with them for a year, and now you can't bear a summer without them.

Finals are over.

It's time to go home.

Orientation helps freshmen learn ways of college life

By Scott Kraft

Unruffled by his inability to find Eisenhower Hall for his first class, Joe Student opens his notebook slowly, with a clever look in his eye, to reveal a map of K-State taped inconspicuously to the inside cover.

After locating his destination on the map, Joe swaggers toward the building. A coed approaches and stops him with a nervous smile. "Could you tell me where Eisenhower is?"

A smirk of confidence crosses the young man's lips as he replies, "That's where I'm going. Follow me, and I'll show you where it is."

She smiles with admiration as he remarks, "You must be one of the new students this year."

Freshman orientation is a time for orientating oneself. Finding locations of buildings is one facet of orientation while finding out how the K-State system works is another important function.

Orientation is a time for asking questions, getting lost, watching skits, eating fondue, meeting people, pulling cards and dancing in the summer air.

"How do I quiz out?"

"Who is my adviser?"

"What the hell does pulling cards means?"

The prime-word for orientation leaders is "patience." Like young pups standing on their hind legs for attention, the new students nervously fire question after question at their fearless leaders as they milk them for information.

Although the orientation sessions are not mandatory for new students, the attendance is high. A complimentary program for parents is also available.

Each new student is assigned a two-day orientation session during the summer preceding their first semester at K-State. After the check-in, small groups of 10 or 12 students take tours of the campus with an orientation leader.

At midmorning, groups of students dot the campus and stretch out on the grass. This informal method of orientation greatly enhances the quality of interaction among group members.

Each college then has its own orientation session. Deans of the individual colleges discuss graduation requirements and various aspects of the transition from high school to college.

In the afternoon, representatives from sororities, fraternities, and residence halls speak to freshmen on the various advantages and disadvantages of each type of living.

Talking with an adviser and pulling cards is reserved for the second day, and most students pull cards by early afternoon. Nevertheless, there are personnel ready to help with enrollment problems incurred on the final day. After checking in at Lefene Student Health Center, the orientation session is terminated.

Orientation leaders for the 1973 pre-enrollment period were hopeful that they could save at least several students from the rigors of the first day as experienced by Joe Student. With this goal in mind, the leaders accomplished something which many new students were grateful for: the opportunity to have their questions answered in a personal way.

At the end of the second day the new students had a variety of more important questions to ask.

"Where's Aggieville?"

"What are visitation hours?"

"When do we find time to study?"

The sessions were a way of breaking down the large, impersonal University into small groups of individuals with common fears and apprehensions. By facilitating an easy landing for new students, orientation leaders saved them from the confusion that accompanies the initial-week college enrollment practiced by other universities.

Enormous registration machine produces live college students

K-State joined the bandwagon of automation when Ahearn Fieldhouse became an enormous registration factory designed to produce about 15,000 legally-enrolled students.

At 8 a.m. Thursday, August 23, the doors opened and the wheels of the machine began to turn. Before students could take four steps, they were quickly sorted into alphabetical categories and pushed in various directions.

The first stop on the assembly line prepared the students for the maze they were to enter.

"Name, classification and social security number. Read this over and proceed ... keep the wheels rolling."

Thinking time hindered the efficiency of the machine. Students unable to maintain the rapid pace were pushed to the side and grouped separately. Occasionally a supervisor would review the students in this group and direct them to the stations they had bypassed. Adjustments were made and the students were placed on the correct track.

After the initial identification was verified, a sifting process took place which separated those equipped with money from those promised money.

Without delay the students were hurried through the final department that handled the cost of registration. The students exchanged money for a green fee card.

Although the efficiency rate of registration was considered high, machines are never perfect. Two days of smooth running resulted in a mechanical failure the third day.

Several students were unnecessarily carried to the fee adjustment station. The surplus of partially-registered students in this area jammed the entire machine. The aids and admissions mechanic spent almost an hour manipulating the controls until the machine began to function again.

Perhaps this breakdown was due to a lack of fuel, mechanical fatigue or misuse. Whatever the cause, the machine was temporarily dismantled until the start of the next semester.

Spring Fling . . . Fall Follies . . . Spring Fling . . . Fall Fo

By Ann Carter

"Hey, you guys, it's another night in the dorm. What are we going to do?"

"Isn't there a way to get to know kids from other dorms?"

"Say, what's some entertainment we can go to that's free?"

The Kansas State University Association of Residence Halls (KSUARH) decided to find an answer to these typical questions from dorm residents, so in 1966 they invented Spring Fling.

It was to be a week when halls teamed up for games, movies and dances. The idea went over big.

It's now April 8, 1973, seven years after the first big Spring Fling. Another Sunday night at the dorm. But there's action starting in the basement of the Derby complex. Officials are handing out scavenger hunt lists including 140 items.

"Hey, we need an autograph of a Brown Bottle stripper."

"I can bring the freckle."

"The name of the 1972-73 *Royal Purple* editor? Now, who the hell knows that?"

Ninety minutes later the scavengers are back, with bulging sacks and boxes. A quick count, a return of precious items like fold-outs of Burt Reynolds, then on to the casino party and dance.

"Come on, there's a game of blackjack starting. Pick up some money by the door."

"The band is Captain Zok."

"Wow, a roulette wheel!"

Spring Fling 1973, "The Greatest Show on Earth," has begun.

Monday evening and rain. This year's two new games move inside. Girls climb on guys' shoulders and swat at eggs with rolled papers — eggs that are atop their opponents' heads.

Later, the racers zoom past cheering crowds. They're going pretty fast, even though they are pedaling tricycles. Wet ground for the blanket thriller movie, "Twisted Nerve."

And the rain doesn't stop on Monday. It goes on all week. But bad weather can't stop the greatest show on earth.

Tuesday evening is a leadership

banquet and a film festival. It's a chance to see and hear James A. McCain and W. C. Fields on the same night.

Wednesday offers yet another movie, "Red Sun," and it's been advertised as a skin flick! Another special dinner is Thursday night, this time for residents who made high GPAs the previous semester.

Then the movies and special dinners are over. Friday night is when residents entertain each other with their talents. It's open mike at the Catskeller.

"Can you believe that Broc Sears guy and his band! Those '50s songs! And his impressions of Nixon and McCain — sounded just like them."

Then it's Saturday morning and the week before seems like just the preliminaries to the famed bed decorations and races.

The beds are in a row in front of the Union, waiting to be judged on how they look. It's amazing what students can make from a frame on four wheels.

But rip off those hours of work, and on with the race.

"On your mark . . . get set . . . go!"

"Watch out for the water balloons . . . ah . . ."

"I'm soaked and freezing. Get your meal ticket and let's eat."

"The picnic's inside Derby? Boy, will that ever be a mess."

Giving the huge picnic inside creates havoc, but little compared with the games in Weber Arena. Officials thought it would be less messy there. They thought wrong.

"The tug-of-war's started. Throw water balloons at their feet."

"Hey, water spigots along the side walls. Turn them on, guys."

"I'm covered from head to foot — with mud."

But they managed to get cleaned up, because here they are Saturday night at the dance featuring the band "Americana." It's the last event of Spring Fling.

"Boy, am I beat."

"Yea, but it's been some week."

"They should do this in the fall too."

es . . . Spring Fling . . . Fall Follies . . . Spring Fling . . . Fall

Follies . . . Spring Fling . . . Fall Follies . . . Spring Fling . .

Fall Follies . . . Spring Fling . . . Fall Follies . . . Spring Fling

And that's what KSUARH thought too. Why not give the residents a chance to meet each other at the first of the year? So in 1972 Fall Follies was born.

It's now September 28, 1973, a year after the first fall celebrations. Another Friday night at the dorm. But isn't there something to do?

"Let's go to a movie."

"Ah, I don't have the money."

"Bullit's showing in William's Auditorium, and it's free! And when that's over there's a square dance at the Union Ballroom."

"Square dance? The last time I did that was in seventh grade gym class — with all the other girls."

"What's a do-si-do? Who knows but let's follow that K-Laire."

This is the first night, and Saturday finishes the follies off. It's shorter than Spring Fling, but a lot can be packed into two days — like the car rally with 25 carloads of drivers and navigators trying to follow four pages of instructions.

"It says we are now passing Telephone Hall. Telephone Hall? What in the world . . . wait — that's Call Hall."

"Go to the top of the world and count the trashcans?"

That was 90 minutes of touring Manhattan, then back for lunch and games — this time outside.

And then there's another dance to get cleaned up for with "Morning Star" playing. And a big crowd and a good time.

Now it's several weeks later. Another night at the dorm. Not too much going on, but there is a lively discussion starting down the hall.

"Hey, let's do something tonight."

"Hey, I know. Let's go to the Spring Fling activities. Why are you looking at me funny? Haven't they started yet?"

"Look, kid, this is October."

"Well, can't I hope for an early Spring . . . Fling?"

Ingenuity makes dorm homelike

Many incoming freshmen dream of the day they'll share a room and live a life of freedom. Some envision their dorm room while flipping through the pages of *Seventeen*.

But when the day comes and they anxiously unlock the doors to their rooms, they are flabbergasted. Much to their disappointment, they see dull crackerbox rooms with two bare beds, two desks, two chests of drawers and two tiny closets. Who could possibly live in such a room for nine months? It's depressing.

"Fortunately my sophomore roommate quickly set my mind at ease. Together we decided on a color scheme, furniture arrangement and the materials we would need to convert the room into our two-semester retreat," one freshman recalled.

"We bought matching bedspreads, rugs and a few posters to decorate the walls. We also bought some fun pillows.

"My roommate's talents were obvious as she built a case for the stereo out of cement blocks. Finally our room seemed more like an apartment. It wasn't heaven, but it was home.

"Of course I was proud of our accomplishments. But my pride dwindled when I saw the creativity other students had used to decorate their rooms.

"In one room, the girls tie-dyed

their bedspreads and curtains. Further down the hall, I saw needle-point samples and macrame wall hangings instead of posters.

"Other students made exotic mobiles to reflect their personalities. One mobile was constructed of white Styrofoam cups.

"I was impressed with the many ways ice cream buckets were used. One room had a ceiling made of those buckets, giving the room a contemporary appearance. By stacking several ice cream buckets, students made bookcases and planters.

"Students who wanted tables or chairs bought them or made them. It amazed me how an electrical spool could be transformed into a piece of furniture.

"But I couldn't believe my eyes when I visited some of the architecture students' rooms. They used two-by-fours and rebuilt the interior of their rooms. Some built lofts for their beds. Others built passageways. Words can't describe those rooms.

"In some dorms the residents became concerned about the appearance of the halls. To liven the corridors, the students painted life-size murals on the walls.

"I grew to love the atmosphere of my room. But now that the year is almost over, I realize next semester I'll have to start all over again. However, then I'll be an experienced roommate," she said.

BSU helps to enlighten K-State with a week of black culture

"We've Got Work To Do," summarized the 1973 week of educational exposure to black culture at K-State. Black Awareness Week (BAW), Feb. 4-9, was sponsored by the Black Student Union.

BAW paid a daily tribute to six famous blacks: Ethel Waters, Phyllis Wheatley, Barry Gordy Sr., Malcolm X, Mary McLeod Bethune and Charles Drew.

The United Black Voices of K-State launched BAW Feb. 4 at a gospel program which featured the Mount Olive Young Adult choir, Chicago, Ill., in All Faiths Chapel. James Boyer, associate professor of curriculum and instruction, was the guest speaker. He presented a short talk, "Gospel Music: Combination of Many Things."

The American society's effects on the black community were incorporated in BAW; thus, "Sweet Sweetback's Bad Ass Song," the first feature length film ever directed by a black, was shown Feb. 5 in the Union Little Theater.

Also in conjunction with today's society, the College of Business Administration sponsored a Black Business Exposition Feb. 6, in which the problems and channels of starting a black business were discussed.

James Woodson, attorney and president of the Corrugated Box Corporation in Topeka, highlighted the evening with a talk on "Opportunities Available to Blacks in the Business World." He blamed unqualified people for the failures of black businesses. Woodson and 13 other black business owners

throughout Kansas also participated in a panel discussion on the subject.

At the Black Speakout Feb. 7, emotions were aroused when the price of freedom was discussed.

A historical film presentation, poetic readings and dramatic impressions were among the individual contributions.

The religious portion of the speakout was presented in two parts: a commentary on Allah and the Nation of Islam and two gospel selections by the United Black Voices.

Education Day, Feb. 8, included a lecture on "The Myth of the Melting Pot in Education" by Samuel Etheridge, director of the Teacher Rights Division of the National Education Association, Washington, D.C.

Etheridge reviewed the wrong of the American education institutes. His solution included an education program about racism which would address the children of America who are not yet contaminated by racial prejudices.

A second black movie, "Shaft," was shown Friday night and the week of black cultural studies terminated with a dance Friday night, Feb. 9.

Unlike previous years, there was no black entertainment group scheduled. Bernard Franklin, Black Student Union trustee, attributed this decision to Student Senate, which felt there were better means to bring cultural enlightenment to the campus.

'Explosion' tests preparedness

Sixty-six victims of a bomb explosion in Manhattan April 9 needed only soap and water to heal their injuries.

The explosion was actually a practice disaster staged at the Farm Bureau Mutual Insurance Company auditorium. The purpose was to give agencies in Riley County realistic practice incase an actual disaster would occur in Manhattan, Del Petty, Riley County Emergency Coordinator, said.

Most of the participants were employees of the Farm Bureau, and their injuries were combinations of rubber cement, toilet tissue and theatrical make-up.

The fire department was the first emergency agency notified. They arrived within 15 minutes, exam-

ined the victims and tagged them according to injuries.

Those who were most mobile and would have the best chance of survival were removed first.

About 20 victims were taken to each Manhattan hospital — Memorial, St. Mary's and Lafene Student Health Center. The facilities have coordinated disaster plans which were activated.

In an actual emergency, the two city hospitals would receive most of the patients and Lafene would take care of the overflow because it cannot do surgery, Mode Johnson, Lafene administrator said.

The emergency was over in two hours, leaving reddened tissue and rubber cement behind rather than blood and smoke.

Union series explores man

A four-week series entitled "Survival in the Modern World" was presented by the Union Program Council's members-at-large in spring, 1973.

Continuing March 19-April 13, each week was designated for one specific area of discussion.

The Self was covered during the first week of the series, followed by Technology and Man, Man and Nature and The Family.

Several films and discussions were included as part of the program. Among the discussion topics were "How to Win in High School," "The Energy and Resources Crisis," "Wilderness Survival," "Leisure in the Modern World," "Masculine and Feminine Roles" and "Alternate Family Structures and Lifestyles."

Among the featured speakers were Dr. Edward Levy of Menninger Foundation in Topeka and Dr. Paul Saltman from the University of California at San Diego. Other lecturers were several faculty and staff members, including Jane Vincent of the Department of Family and Child Development and Dave Danskin of the Center for Student Development.

Dr. Earl Marsh, a doctor of obstetrics, gynecology and psychiatry, attracted one of the largest audiences with his lecture on self-acceptance and sex.

"From the biological point of view, there is no such thing as an unnatural sex act or sexual disease."

In urging self-acceptance, Marsh said, "Above all, accept yourself just exactly as you are."

Carol Beardmore, co-coordinator of the program, explained, "We wanted a program that hadn't been overworked like ecology or politics . . . that stressed the changes taking place today and how they will affect the future."

Joe Poell, the other coordinator, said, "It makes people aware of how these changes affect our thinking and acting, and how the individual can cope with them."

Candles burn for home ec

One hundred years ago, the College of Home Economics had an enrollment of twelve women. During fall semester, 1973, the enrollment was 1,571.

The College of Home Economics celebrated its centennial during their 1973 Open House.

Rep. Patsy Mink, Hawaii democrat, spoke on "Women in Politics" at an All-University Convocation, March 30.

A program on "Home Economics and the Future" was presented that afternoon in the Union Forum Hall.

March 31 was Hospitality Day at Justin Hall and tours which featured several display rooms were given to visitors.

A historical pageant, "The Bloomin' Years" was presented in the KSU Auditorium.

Sing requires hours of practice

Mouth shape! Mood! Vitality! Intonation! Intensity! These are just a few of the key words heard often during University Sing practices.

Any living group on campus may enter University Sing. There are two divisions: single, and mixed, which involves a male and a female living group singing together. Each singing group presents two numbers, and trophies are awarded for first and second places in each division.

University Sing requires hours of singing and hard work to try to perfect the voices and win the contest. Each group has a songleader responsible for scheduling practices, choosing the songs and directing the voices.

Problems may develop as the time for Sing draws near. People complain because they don't like the songs. They can't come to practice because they have to read two books for a test the next day. Or they can't decide what to wear during the performance.

If it is a mixed group, there are even more complications. It is difficult to schedule practices around

the various activities of both groups such as volleyball games, night classes and organization meetings.

A time is set aside to give the groups a chance to get used to singing on the stage in the KSU Auditorium. The voices sound much different there than in the dorm lobby or sorority living room.

Nov. 11 was semifinals for the 13 singing groups in the 1973 University Sing. Three groups were eliminated this year leaving five groups in each division.

On Friday night, Nov. 16, a real audience applauded the singers. Judges from the Manhattan area rated each group on a scale of 100. Singers did their best to keep eyes on their director, hands at their sides and knees from wobbling.

Delta Delta Delta and Sigma Chi sang their way to the overall championship of 1973's University Sing.

Gamma Phi Beta and Delta Tau Delta won the mixed division and Kappa Alpha Theta and Delta Upsilon placed second.

Winner of the singles division was Boyd Hall and second place went to Haymaker Hall.

Crowd watches annual LAR animal pageant in Weber Arena

The 47th annual Little American Royal was March 31 in Weber Hall Arena.

About 1,200 persons watched 168 K-State students show animals in 24 classes of beef and dairy cattle, hog, sheep and horse competition.

As each animal was shown, judges graded them on grooming, training and presentation by the human participant.

Winners of individual classes competed for top showman honors in each division in a round robin event to determine the top all around showman.

LAR was co-sponsored by Block and Bridle and the Dairy Club in conjunction with Ag Science Day.

Cash awards were presented from money made on ticket sales. Ribbons were given by the Little American Royal Association.

Trophies were donated by area industries.

Contestants, all members of the LARA, did more than just present the animals.

According to Ed Call, associate professor of dairy science, five to six weeks of preparation were necessary.

Students spent these weeks getting the animal's coat in condition and grooming it. Animals also had to be trained to respond to the showman, he said.

Rodeo attracts tri-state ropers

Snorting bulls, bawling calves and falling cowboys were all part of the 17th annual K-State Intercollegiate Rodeo April 6 in Weber Hall Arena.

The K-State men's team placed second and the women's team third in their respective categories.

The men competed in bareback bronc riding, calf roping, steer wrestling and bull riding. The women competed in barrel racing, goat tying and breakaway roping.

The rodeo, sponsored by the Chaparajos Club, attracted 168 contestants from Kansas, Nebraska and Oklahoma. About 8,200 fans attended the event.

Finals: inevitable relief from dead week trauma

By Ann Carter

Confusion is the noisiest week of the semester being called dead week.

Or hearing from an upperclassman that it's called that because no regular tests are scheduled and remembering that you have two term papers, three oral reports and one big quiz that week.

Or not having any assignments but studying the whole week because you think that's what everyone does during dead week — but that's naive.

Boredom is being tired of playing the game of grades.

Or feeling the pressure to study, putting it off, waiting, while a tenseness builds up that finally lets loose in a scream or a water fight or another trip to the Aggieville bars. It's eating more and enjoying it less. It's two packs of cigarettes and nine sticks of gum gone in one day. It's knowing that the grade hinges on the final but not wanting to look at one more book ever — but that's frustration.

Foolishness is planning to review three chapters of man's physical world while sunbathing. Or using your first dead week to play cards and a new game called Risk because who knows what finals will be like — but later that's regret.

Remorse is the last three pitchers as you try to figure the formula weight of NaOH. And that's just the first question. It's knowing you could have passed the algebra final if only you'd memorized the formula of a circle. It's knowing you could have studied half as much and done as well — but that's also pain.

Regret is realizing you'll proba-

bly never know if your graduate assistant is available. But surely you'll meet someone else at all those parties during dead week. Unless everyone else decides to study for their Finals.

Finals . . . that's the resurrection from dead week. When no matter what you've done to bring yourself close to death the week before, you must rise, go forth and give proof of what you've learned. AT THE DESIGNATED TIME AND PLACE.

Petrifying fear is walking into your classroom at the exam time and finding it empty. And wondering if you've missed the long-awaited test. That's after a night of seven cups of instant coffee made from tap water, followed by eleven trips to the john. Which followed an evening of getting a survival basket from your parents, jello with fruit cocktail from your living group, and a feeling from yourself that it was too late to start reading twenty-two chapters of education psychology — but that's fear.

Deliverance is copies of last semester's tests. Ultimate deliverance is going to the final still unprepared and hearing the instructor say, "Instead of an exam I've decided to let you write a short critique of the course." Too bad you can't do the same in your next final — but that's hopeless desire.

Desperation is filling in the oblongs on your IBM answer sheet to make a pretty design. Later comes consolation in knowing which teacher you don't want in the course you're going to have to take again — but that's remorse again.

Sorrow is handing in your final

to your favorite teacher and wishing you'd done better so he'd know you aren't as dumb as you acted. It's saying goodbye to everyone in the middle of taking your tests in the

middle of packing to go home. And wishing you didn't have to do it all in the same week — but that's that's relief when it's finally all over.

Dead week's over-riding mood of impending doom makes students act in ways they normally wouldn't. But within a few days, for better or for worse, it's all over and we forget the pressure — until next semester.

Activities Carnival throwback to county fair

By John Lonergan

It is a common scene in rural Kansas during the fall. People of all interests come together to be amazed, to find out what's new and to get reacquainted with the old. It's the county fair; it's the state fair; and here at K-State it's the Activities Carnival.

Each year students migrate to the Union bigtop to see the latest sights, sounds and paraphernalia. Cotton candy and stuffed animals in the hands of the fair-goers are replaced by leaflets, stickers and questionnaires of various organizations seeking to gain recognition, new members or sympathetic ears.

An integral part of every carnival is the barker — the person who mans the booth and tries to sell the product. Carni barkers are a unique breed — from smooth talkers to fast talkers, from unwitting volunteers to grizzled veterans. I hunted up one of the Activities Carnival barkers and talked to him about his work.

"Well, if I had to sum it all up in one word, I'd say that barking is a skill. You've got to know your product and know your audience. This takes experience."

"What is most important about selling a product?"

"The big thing is attracting attention. To do this some organizations will use film, some will use flashy displays. But the main attention-getter is the person behind the booth. That's why a barker has to be an outgoing person with a strong voice. You can't hustle successfully if you're quiet and reserved. We in the carni business have a word that describes barkers who aren't extroverts."

"Really? What's that?"

"We call them introverted barkers."

"I should have guessed."

"Another thing — you have to vary your approach depending on what aspects of your organization

you want to get across."

"Religious groups want to appear friendly and sincere. Military groups want to impress the public as well-organized people on the top of the situation. Chess Club tries to get across entertainment as well as intellectualism.

"By far the best presentation here is the Fencing Club, who has slashed its way into the hearts of many people by slipping and sliding across the Union floor under the guise of precision combat."

"But why the emphasis on 'show'?"

"You have to remember the competition here is tough. You're competing not only for listening time now but also for activity time during the year. Some groups go to a lot of work to make a presentation. And some clubs have it easy, depending on whether they happen to be 'in' that year."

"Like who, for example?"

"Well, political clubs are 'in' during election years, because everybody hangs around the booths picking up campaign buttons. Gibson Girls peak during good football years. Ecology-minded organizations have been popular for the last few years. This year the biggie would have been the Kung-Fu Club."

"Would have been?"

"Yes, unfortunately the club president joined ROTC when he came to college. The first time he saluted he killed himself."

"How do you know which people are going to be easy to hustle?"

"Generally you try to hit the freshmen hardest. They're the only ones who will listen to you. The sophomores just kind of stand around and laugh. The juniors come to see their old friends, and all the seniors are working in the booths."

"Surely it isn't that simple?"

"Not really. You might catch a sophomore on the rebound after an easy first year who wants to get involved. And there are probably a few conscientious juniors and seniors who want to contribute. But for freshmen, this is their first exposure to extracurricular college life — they want to be a part of it."

"Why is it so hard to get volunteers?"

"You have to remember that most of these people have been to some sort of fair in the past month. All they think about is that the last time they walked up to one of these booths, they wound up spending six bits on a ten-cent plastic gazelle. They're still punchy. They don't want to be taken again."

"Are there any special problems working in one of these booths?"

"Sign-up sheets are a hassle. Some guys go around signing everything they see with no intention of ever doing anything about it. Generally, you have to watch out for the insincere types — like the jokers who sign fake names just for laughs. Look at some of these aliases: Jay Hawker, Chuck Roast, Bill Board, and Slim Pickens."

"Why do you do this anyway?"

"Well you might say it's in my blood. My father was a barker here years ago. But, you know, I wouldn't do this unless I thought I was helping people. Sometimes you just have to grab someone and twist his arm to get him to do something. But it's usually for his own good to get involved."

"And what's in the future for you?"

"Well, I sure would hate to end up like my dad — selling encyclopedias door to door. No, when I get out of here I want to go big time."

"You want to hustle at a major carnival somewhere?"

"No, I want to be a recruiter for the K-State Athletic Department."

Wolfs chosen honorary parents

It's Saturday morning and students are up and about before noon.

Their rooms look unusually neat, with liquor bottles tucked safely away in the closet and nudie posters rolled up under the bed.

And dorm lobbies are decorated in Wildcat purple and white.

These are the obvious signs of Parent's Day, an annual event sponsored by Chimes, junior women's honorary. The date this year was Saturday, Oct. 20.

Elizabeth and Raymond Wolf, Hill City, were honored as representatives of all K-Stater's parents in a special pre-game ceremony at the

football game with Iowa State.

The Wolfs were chosen as honorary parents at a drawing earlier in the week. Their son, Dan, is a sophomore in nuclear engineering.

Before the game festivities, the Wolfs were special guests at a luncheon with President James A. McCain and Chimes members.

Residence halls scheduled special events for the day, including brunches, after-game teas and tours of the dormitories.

Mac Davis, singer, song writer and recipient of three gold records, entertained students and their parents in two concerts Saturday night.

K-State loses staunch fan

When Mamie Boyd died on Oct. 15, I was stunned. Only a few weeks ago, she was the topic of our dinner conversation. I vividly remember that in the midst of small talk in Boyd Hall's dining room, someone commented, "Speaking of grandmothers, I hear Mrs. Boyd was readmitted to the hospital recently."

"Mamie Boyd, you say? She's been in and out of that place quite often in the past two or three years, I think. But, it seems like every time she comes out fighting harder."

"You must admit, she's got more spunk than most of us. Did you ever see her at a game when she displayed purple everywhere from her dress to the tips of her knitting needles? I see why she was the 1965 Mother of the Year for Kansas."

"I think my mom told me she was also Newspaperwoman of the Year for Kansas in the mid '40s."

"She could lead the women's liberation movement. Wasn't she the only woman recipient of the William Allen White Foundation Award and the first woman to lead K-State's alumni association?"

"Well let's face it, anybody like that would have to be the head of something; she has over 100 plaques and certificates for her journalistic achievements."

"Just think, she started right here at K-State."

"So you say she's in the hospital again? Once she told reporters that in 1964 she was released from the hospital at 3 p.m. and at 9 a.m. the next morning, she was flying to the Republican convention. She said, 'I haven't missed a GOP convention since Alf Landon came to Kansas.' And Landon dates back to the early 1900's."

"Personally, I think her philosophy of life is interesting. She said, 'When I work, I work hard; when I sit down, I sit down easy; and when I worry, I go to sleep.'"

"One thing's for sure, she wasn't lying about working hard. If you ask me, I think that 96-year-old lady needs some rest."

School draws Viet veterans

Not many sophomores are 24. Not many sophomores have been to Greece or Germany. And not many sophomores have seen children die in Vietnam.

These students are veterans, and there are 950 of them at K-State.

Most veterans are between the ages of 20 and 30 and have been to college before — perhaps for a year or just a semester. Now, after two or three years of serving Uncle Sam, they have come back to school — to run their lives again and prepare to make a living.

"When I first came back, I felt like I couldn't relate to kids of 18 or 19 — they're so idealistic," a 25-year-old, undergraduate veteran explained.

Many K-State veterans major in business or the professions — where the money is and where the jobs are.

Most of them live in apartments or other off-campus housing; 50 percent are married.

If he's single, the veteran student is probably living on \$175 a month. Married vets receive a minimum \$235 monthly from the GI bill.

"That sounds like a lot but when you get to paying bills . . ."

Kruger: ambassador to China

Lon Kruger had read about life in China — the emperors, the Great Wall and the Boxer Rebellion.

Now Kruger has visited China — and although the People's Republic still remains a land of enchantment and mystery, the words of history books have been embellished with snapshots of famous cities and remembrances of handshakes with a friendly people.

Last summer Kruger became another in a growing list of American athletes to display their abilities during "ping pong" diplomacy tours in foreign countries.

For 21 days Kruger dribbled, passed and toured his way through China with 11 other collegiate roundballers.

"I came back realizing that there's a great deal of change in going from one country to another," Kruger said. "Everything was like you read about, but it was still hard to believe.

"You see a different way of life," he continued. "You learn to appreciate some of the things over here that they can't have. They're a much simpler people altogether."

Kruger said players enjoyed mixing with the people informally more than taking the daily pre-planned tours.

He explained it was especially

interesting to talk to the people through interpreters. In these conversations, he said, the athletes asked the Chinese if they really enjoyed their government. And, the people always answered affirmatively, Kruger said.

The Chinese reception of the Americans was friendly, and there were no demonstrations, Kruger said.

Of smaller consequence on the trip was that the American athletes won all eight games.

"Basketball is something relatively new to the Chinese," Kruger said. "But they are the kind of people who practice something until they get as close to perfection as they can. So, they'll probably improve rapidly."

Americans traditionally characterize big-time athletes as "dumb jocks." But more and more this stereotype is being eroded away by athletes like Kruger who do more than run, jump and flunk out. More and more the outstanding athlete is being utilized as a semi-diplomat and public relations person.

In general, Kruger and his fellow "ping pong" diplomats might be able to accomplish the understanding that the Harvard graduates in the State Department have thus far failed to do.

In the past, threats of a possible energy crisis went ignored. After all, who wants to think of a future filled with deprivation? Now, though, that frightening future has become a reality, and everyone — K-Staters, included, — is suddenly taking conservation quite seriously.

55 miles per hour, 68 degrees — America finally tightens belt

By Scott Kraft

The light turns green. Screech. He is first off the line with his gas pedal to the floor. Five minutes later he coasts into a gas station, the tank nudging "E."

"Fifty cents worth, please."

The energy crisis many have warned us about finally has hit home. And K-State has not been spared.

Several things are being done, at the request of President Nixon, to voluntarily curb the biting effect of the energy shortage.

Carpools to work and walking instead of driving to lunch have become common.

K-Staters as well as most of the American people have allowed the awareness to pervade their lives. Most thermostats have been turned down to 65 degrees. A national clothing firm reports pre-Christmas sales of men's wool sweaters tripled since last year while five times as many red flannel pajamas have been sold.

"I study better in cold weather," one student said. It seems the cooler lecture halls are more conducive to alertness.

"It used to be so warm and cozy in the rooms that it was easy to fall asleep. I haven't slept through a class since we started the cutbacks," another said.

Ironically, some businessmen are happy about the effects the problem has had on their businesses. Sales of gas cans and lockable gas caps have set new records. Men who cut firewood for part-time jobs have found the demand is greater than

they can handle. Amtrack reports its business is the best it has been in some time due to cutbacks in fuel to airline companies and the difficulty in obtaining gasoline for automobiles.

Many drivers have removed emission controls on their new cars because they are afraid of the low gas mileage these attachments cause. Cut short by the energy crisis, the environmentalist movement has not even been making section B of morning newspapers.

"Emergency measures," as the White House energy "czar" puts it, "have all but eliminated opposition to energy legislation."

Lights are being dimmed in both Cardwell Hall and White House corridors. We have cut our trips home due to the impracticality of driving back on a Sunday, and the President has been making fewer trips to his retreats in Key Biscayne, San Clemente and Camp David.

If what the student says about alertness in lower temperatures is correct, we can expect more rational behavior on the part of everyone from our instructors in Manhattan to our legislators in Topeka to those in Washington.

University vehicles have voluntarily reduced their speeds to 50 miles an hour and Nixon suggests we do the same, while warning us there will soon be legislation to this effect.

But what hits closer to home is that the young man with the sore foot and the worn pedal will soon get less than a gallon of gas for his 50 cents.

New facilities aid vet students

With two buildings down and one to go, the veterinary medicine complex nears completion after ten years of planning, financing and building. Classes were first conducted in the facilities in fall 1973, but the buildings won't be in full operation until spring 1974.

Connected only by a single enclosed corridor, the two buildings stand side by side on the north end of campus, downwind of the feedlots and cowbarns. The limestone structures have been under construction for nearly three years using more than \$15 million state and federal funds.

Housed in the four-story teaching building are larger lecture rooms and laboratories than those in Leasure Hall, old headquarters for the College of Veterinary Medicine. The new rooms can seat 100 students or more, up from the 70 to 80 capacity of the old rooms.

One of the electronic teaching innovations being installed is a \$160,000 closed circuit color television system that will have cameras and viewing screens placed in the lecture rooms and laboratories throughout the building. This television system is similar to K-State's cable television network.

Located on each of the first three floors are multi-discipline laboratories that will allow a student to conduct several operations without leaving the room. In these laboratories each student will be provided with his own locker, desk and wet bench, and will have access to one of the many visual playback units being installed.

Contained in the veterinary science building, south of the teaching facility, are the Diagnostic Laboratory, the Department of Physiological Sciences and the Department of Infectious Diseases.

Since moving into the new facility, the Diagnostic Laboratory staff has expanded its services to areas not possible in the old building. Farmers and veterinarians from Kansas send in diseased tissues and organs for analysis in the modern laboratories.

On the north end of the teaching building, a lone corridor juts out — awaiting the completion of the veterinary hospital which hopefully will be completed by late 1976. The hospital, the third and last building of the complex, will be constructed once sufficient funds are available. It will replace the present facilities housed in Dykstra.

Have troubles? Just dial 9-2311

Need someone to listen?

A faceless friend?

Pick up the phone and dial 539-2311.

That's the number of the Fone.

Through its emergency hotline and walk-in crisis center at 615 Fairchild Terr., Fone serves both the campus and the community.

The center is open from 5 p.m. until 7 a.m. Thursday-Sunday, after all other counseling centers have closed their doors.

Volunteers with various backgrounds are available to listen to or advise people with problems concerning pregnancy, drugs, loneliness or depression, via telephone or face-to-face contact.

A new program for Manhattan's senior citizens was added in the fall.

"The purpose of the program is to help the elderly citizen who lives alone. We will telephone every day to check on his welfare and condition," Marylyde Kornfeld, Fone coordinator, said.

Approximately 65 students volunteered to help with Fone in the fall, with the number increasing during the year.

These volunteers are not amateurs.

Before they begin work, they spend a weekend together for training and to get acquainted.

Every Tuesday night they meet for general discussion of problems. Each meeting is dedicated to a specific problem, with resource people available for additional information.

Dr. E. Robert Sinnett, faculty adviser from Mental Health, is also available to help, and the volunteers participate in role-playing of simulated telephone calls.

"They can make mistakes at the training sessions instead of at the center or on the phone."

Each volunteer is required to keep a log of every case, and Kornfeld reviews serious cases.

Fone also serves as a referral service for counselors, clergymen, attorneys, physicians and the drug education and central guidance centers.

Spiro Agnew fumbles from anonymity to infamy

By Scott Kraft

"I realize my name is not a household word," an exuberant Spiro Agnew admitted soon after his nomination to the Republican Presidential ticket in 1968.

Two million American people yell, "Guilty!" But Agnew replies, "I repeat and I emphasize (my) denial of wrongdoing."

Agnew is not the first nor will he be the last to surrender public office because of a lack of public trust. The American people have replaced the question, "Spiro who?" with "Spiro why?"

However, Agnew does not admit guilt easily. Perhaps this is because he believes himself innocent of any wrongdoing. "I have never enriched myself in betrayal of public trust."

Prosecutors thought Agnew was in violation of the law, and in fact, the case against him was clearcut. Why then, did the Vice-President quit his office but refuse to admit his guilt?

Who is wrong? Republicans or

Democrats? Ku Klux Klan or Black Panthers? Agnew or the U.S. Attorney?

Did Agnew let his fund-raising activities and contract dispensing activities overlap in an unethical or unlawful manner? Agnew says, "Perhaps, judged by the new, post-Watergate political morality, I did."

It seems the judgement of guilt or innocence must come in a particular frame of reference. That frame of reference, according to Agnew, is an accepted way of handling contracts and campaign funds he has used all of his political life.

According to the prosecutors, however, the frame of reference is one where contracts are awarded without money changing hands between contractor and politician.

By whose frame of reference or morality do we judge? Without a doubt the answer is our own. That means a frame of reference influenced by the news media, our Congressmen, the Supreme Court, our

boss, the next door neighbor and possibly the last person we talked to.

A way to avoid the entire issue is exemplified by a young coed who proudly stated, "Don't blame me, I voted for McGovern."

I submit that we are all to blame. Theoretically, we all have a say in government, and realistically, we all have opinions about government. There must be immense power in the people if Spiro Agnew could be forced to resign because of a lack of "public trust."

Blaming someone for this gap in morality will not solve the problem. But, recognizing that different frames of reference and standards of political and social morality exist is the awakening step to understanding the actions of our ex-Vice-President.

After all, everyone is correct in respect to his own frame of reference.

In any case, "Spiro Agnew" has finally become a household word.

Vibes enliven old, gray house

As one walks down Anderson Ave. across from the Union parking lot, he might hear a variety of strange noises coming from an old, gray, frame house, with a stone porch.

It's the music annex where students practice their instruments. From 7 a.m. to 10 p.m., one can hear the combined sounds of flutes, violins, trumpets, pianos, trombones and most every other kind of instrument.

The annex is a three-story house in which 15 rooms have been turned into practice cubicles, each equipped with a piano, chair and music stand.

Across the street from the annex are several white trailers which are also used for practicing.

The annex is a place to practice between classes, and also at night. Both music majors and non-music majors use it and the trailers. Music majors merely sign up at the music office for a time to practice, while non-music majors can use the facilities by paying a \$5 fee per semester.

Rep. Patsy Mink

Rep. Patsy Mink, Hawaii democrat, urged women to re-examine their goals and go beyond the traditional sex role stereotypes, during an All-University Convocation March. 30.

"The biggest obstacle you have is yourself. You have to decide what you want to do, then find the opportunities to do it," Mink said.

A Congresswoman since 1964, Mink spoke to students, faculty and visiting home economists attending the 100th anniversary celebration of the College of Home Economics.

The only criteria for getting involved are "interest" and "awareness of what's going on around you," Mink said.

The control of meat prices was the result of "a few housewives across the country who refused to

go into bankruptcy," she pointed out.

“We must revise the concept of paying a woman less than a man on the basis that a man is the breadwinner,” Mink said.

"Fifteen percent of working wives earned more than their husbands last year; amazingly, society has not crumbled," she said.

Over 30 million women are now working. Of 10 million jobs created in the last 10 years, eight million are held by women, she noted.

“Women cannot and must not take a back seat in the struggle for human dignity. That is what equality truly means,” Mink said.

The capacity audience in Union Forum Hall gave Mink a standing ovation before and after her speech.

Theodore Koop

Theodore Koop, former Washington vice-president of Columbia Broadcasting System, discussed press and government relations during an All-University Convocation April 6.

"Journalism is facing the greatest challenges today since 1798 when Adams passed the Alien and Sedition Act," Koop said.

The Supreme Court's decision to uphold the jailing of reporters and the Nixon administration's efforts to prevent Washington reporters from printing opposition news are typical of current governmental challenges facing the news media," Koop said.

Koop advocated the passage of an absolute shield law which would stipulate that a reporter not be ordered to testify in court unless he were the only source of information available in the case being tried.

Such legislation would protect reporters from becoming an arm of law enforcement, Koop said.

Sigma Delta Chi, professional journalism society, and Kansas Press Association co-sponsored Koop's visit to K-State.

Alan Shephard

Alan Shephard, the first astronaut, discussed the technological benefits of space research in a Landon Lecture April 3.

Shephard, who was one of the seven original U.S. astronauts, criticized those who say social programs are being robbed to feed space programs.

"We're seeing a fairly insidious trend with the increase in spending on social programs," Shephard said.

"We must establish a system of priorities between social programs and pure research," he added.

Space research is basically scientific research and the development of technology rather than glamour and excitement, Shephard said.

Recent technological spin-offs

from the space program include teflon, cardiac monitoring equipment and weather and communications satellites, Shephard said.

Currently head of the Astronaut Office of the Houston Manned Spacecraft Center, Shephard traced the progress of the Mercury, Gemini and Apollo programs and outlined plans for future programs involving Skylab and space shuttle projects.

He said he expects to see more advanced manufacturing methods, crop and vegetation monitoring systems, air and water pollution controls and medical advancements among the technological developments resulting from space research now in progress.

Gen. Alexander Haig

The realities of American foreign policy are not always revealed to the people, Gen. Alexander Haig told a Landon Lecture audience on April 24.

Haig, Army vice-chief of staff and an assistant to Henry Kissinger during the Paris peace talks, said American people were erroneously told the world was close to a nuclear holocaust during the 1962 missile crisis.

"The fact is," Haig said, "no Soviet leader would have conceived of nuclear confrontation with the United States," Haig said, because at that time, we had 10 times more nuclear power than Russia.

Haig said American diplomacy must be flexible if it is to be successful in the future.

The Gordon Parks Festival was sponsored by the Black Student Union and the Fine Arts Council. In regards to his stay, Parks commented, "I enjoyed being with the students this week. I've learned much more than you have because you've kept me alive and started the adrenalin flowing in lots of areas where it had ceased to flow."

"I try to be idealistic and you as college students are probably idealistic too. But idealism in the commercial and business world is hard to maintain," Travis said.

William Buckley

"I am learning a lot about prudence at the United Nations and certainly a great deal about docility," William Buckley, Jr., noted columnist and lecturer told a crowd of students and faculty Nov. 2 in the KSU Auditorium.

President McCain called the crowd the largest he had ever seen in the KSU Auditorium.

And the audience was not disappointed. Buckley combined his wit and political conservatism in his talk entitled, "Assault on the Free Market."

Taking passages by economist John Kenneth Galbraith and French philosopher Jean Revel, Buckley pointed out faults in their perception of Chinese and American economics. "In Mr. Galbraith's book," Buckley points out, "Maotse Tung

emerges as a sort of Rector Justin," (ruling managerially as well as spiritually).

In response to *A Future Without Marx or Jesus* by Jean Revel, Buckley said, "Parenthetically, I can understand a future without Marx, but it has always seemed to me that if our future is to be without Jesus, the decision would probably be His and not ours. I have no doubts that the great religious revival of America will occur only after Jack Anderson reveals that in fact on the third day Christ arose."

When asked whether Gerald Ford would make a capable President, Buckley began his response by saying, "I tend to measure people's ability, I must confess, with some reference to the extent to which they share my opinions."

Denis Healey

"While the rich countries argue on ways to get richer, the rest of the world suffers under absolute poverty," Denis Healey, former British secretary of defense said at an All-University Convocation Oct. 10.

Healey, a possible successor to British Prime Minister Edward Heath, reviewed major world crises, such as oil extinction and the cold war. He warned world governments to place priority on improving economic problems or reap the consequences of instability.

He appealed for world leaders who can understand the world's situation and benefit from history's failures.

Referring to the United States, Healey commented, "The standard of life in the United States depends on the outside world."

Godfrey Cambridge —

Six or seven years of narcotics education contributed to Godfrey Cambridge's interest in the deadly business of drugs. Cambridge spoke at an All-University Convocation Feb. 21 in the KSU Auditorium as a part of Black Awareness Week.

Cambridge showed his film, "Dead is Dead" to the audience.

"It's a film that will make you sick to your stomach because it's real," Cambridge said. The film showed how people in suburbs and ghettos are affected by drugs.

Cambridge said in the film that America breeds drug addicts every

day because people are advised to take a pill for any ailment.

"We as a people have been too naive," he said. "You are basically the only solver of the problem."

Cambridge suggested two methods to combat the drug problem. He said he would like to see more qualified people placed in agencies that deal in drug traffic and the Turn In a Pusher (TIP) program initiated across the country. This program gives 10 percent of the value of the drug confiscated to the person who turns in a pusher.

Anne Armstrong —

Anne Armstrong, who occupies the highest office held by any woman in our national government, was the first woman to deliver an address in the Landon Lecture series Feb. 12.

Armstrong, counselor to President Nixon, said in her lecture on "Crisis and Challenge" the basic change brought about by the Nixon administration is the shrinking role of "big brother" in government.

She also explained that the "new federalism" means putting the government back into local communities whenever possible.

Armstrong's areas of responsibility include youth, women, Spanish-speaking people, the Bicentennial and the new federalism.

Gene Roddenberry—

"We are sitting on the edge of the greatest communication explosion in the history of man — a quantum leap," was the message Gene Roddenberry, creator of "Star Trek" brought to a sell-out crowd in the KSU Auditorium, Feb. 13.

Roddenberry linked his television series to the future of communication and its effects on man:

"'Star Trek' was about people and communication among people — it had to be," he said.

Following a reel of "out-takes" from the filming of the series and a question-answer period, three "Star Trek" adventures were shown.

Only true "trekies" remained to see the last of the credits flicker by at midnight.

Billy Graham —

"When we see our nation in the gravest crisis of its history, we ask ourselves: What is wrong?" evangelist Billy Graham said to a crowd of 6,000 in Ahearn Fieldhouse March 4.

Graham explained the answer is not economic or political, but is moral and spiritual. Salvation of America will come as a catastrophe, and it will put some moral steel in our backbones, he said.

Young Americans might be disillusioned because of Watergate, and they could lose confidence in our democracy, he warned.

"Confidence (in government) has been seriously eroded," Graham said.

"We are a nation of individuals. There will be no lasting peace or social reform until individuals have

changed spiritually," he said. "There is a little Watergate in all of us."

As a nation, Graham continued, we passed the moral crossroads when we made the decision a long time ago to abandon God and go our own ways. He related America's problems to the crisis of the Kingdom of Judah in the Bible. They had to suffer God's judgment, he said, just as Vietnam, Watergate and the energy crisis are the beginning of God's judgment for us.

Individuals can change the course of history if they only have a change of heart, Graham said. "It's time to hope again."

Graham was the twenty-seventh speaker in the Landon Lecture Series on Public Issues.

500 diversions offered by UPC

It's been said one can't please all of the people all of the time, but the Union Program Council (UPC) tries to please most of the 15,000 K-State students and faculty members most of the time.

UPC, an 11-committee council geared to the varied interests of students, offers more than 500 different programs, both entertaining and educational, during the year.

These programs range from cross-country skiing to big-name feature films.

The programs are always changing because the council is run primarily by students.

"Ideas come in every day from students," Dave Koger, council coordinator, said.

Four non-student advisers are responsible for knowing whether these ideas will work, Koger said.

"The advisers have the knowledge of how to do it, and the students know what ought to be done," Koger explained.

One such program was sponsored by the newly formed Co-curricular Committee. A four-day symposium called the Energy Crunch explored various opinions and questions concerning the current energy crisis.

For traveling and outdoor fun enthusiasts, the Travel Committee organized trips to Breckenridge over Christmas break and to Steamboat Springs and Padre Island over spring break. They also sponsored a travel fair, offering a wealth of information on traveling.

For adventurous souls, the Outdoor Recreation Committee plans unusual outdoor trips like cave exploring, mountain climbing and trap shooting. Being one of the first union councils to explore this area of outdoor entertainment, it has encountered some legal problems concerning insurance.

"We've had some administrative hassles, and it's been slow in getting started," Koger said.

If you're not up for mountain climbing, then the frisbee contests or bike hikes sponsored by the committee might be less daring but just as much fun.

A program of the Speakers Committee called "Who Killed JFK?" offered new and unconventional information about the Kennedy assassination and brought considerable student interest and debate.

The Union also offers several series for movie-goers.

The Feature Films Committee shows current release feature movies on the weekends. And movies that were critically acclaimed but never quite made it are presented by the Kaliedoscope committee. They show art, underground and experimental films. And free flicks, like Captain Marvel and the Lone Ranger are shown during the week.

David Bromberg, Mac Davis and Arlo Guthrie came to K-State via the Concerts Committee. Mini-concerts are also given every few weeks in the Catskellar Coffeehouse arranged by the Coffeehouse Committee.

The art exhibition areas around the Union are handled by the Arts Committee. The group is responsible for the Union gallery, which displays work by well-known artists and students.

The Pot Pourri Committee coordinates informational programs on birth control, cooking, childrens films and the annual Bridal Fair.

A year of Union programs draws nearly 200,000 people in total attendance. The educational and entertainment process is not limited to those students, however. The more than 200 students who make up UPC learn a great deal, too.

"Anything a student wants to learn about business, he can learn here," Koger said.

Students can learn about psychology by working with people, legal matters by working with contracts, business through budget work and public relations and advertising through publicity, Koger said.

"People think that you have to have a high I.Q. or be super talented to work here," Koger said. "We're just normal people — the only requirement is time and desire.

"We're the most diverse group on campus; there's a place for anyone," Koger said.

Posters + phone calls = senate seat . . . maybe

Campaign literature of all shapes adorns trees on the K-State campus at the beginning of each semester as Student Governing Association candidates are announced.

"Elect Joe Candidate for Education Senator."

"Elect Jane Candidate for Arts and Sciences Senator."

"There is a direct relationship between numbers of votes and posters," Jane Candidate said. She made a successful bid for a senate seat in her college.

She says she believes posters are the most effective way to reach the electorate.

However, she used another campaign technique which she said she thinks greatly enhanced her vote tally. By calling over 200 students in

her college, she had a chance to answer individual questions.

She had an active position on Student Senate prior to the election and wanted to remain a part of it. She said she thought she could be an effective force in governing the affairs of students, and wanted a chance to continue her work.

Joe Candidate is a big, good-natured student who says he wants to go to law school someday. He had attended only a few Senate meetings but felt a need to do something positive for the student body. Joe's campaign was successful also.

He said he attributes his success in the election to distributing 2,500 flyers and making contacts. He and his friends handed out the fliers at residence hall food centers on

election eve, urging people to cast their ballots the following day.

Issues do not have anything to do with the senate campaigns, he said. Voters cast their ballots for names that are familiar or that they recognize — rarely for any other reason. But candidates bantered about allocations, bike paths and the parking situation during their debates across campus.

At the end of election day, Feb. 13, two student presidential candidates had risen to the top, although less than 20 percent of the student body voted. A run-off was scheduled between Maggie Vargas and Mark Edelman for the position of student body president, and a week later Edelman won the position.

Senate handles student money

Apathy and indecisiveness have been two of the charges leveled at Student Senate during 1973.

Nevertheless, Student Senate continues to have long meetings, which some senators say are the result of concerned students rather than apathetic ones.

One senator feels that indecisiveness is the mark of a good governing body. Hasty decisions, he reasons, often lead to problems. Indecisiveness means that K-State has a diversity of views being voiced in senate discussions, he explained.

Things have been accomplished through senate and the body has been receptive and concerned about student needs, the senator said.

Associated Students of Kansas (ASK) has received the services of many student senators. ASK is a student lobby for the state legislature, and according to one senator, is much more effective than its counterpart in the national legislature.

Clauses for a Tenant-Landlord Bill dealing with repairs were discussed first semester. Since many K-State students live off-campus and are involved in the tenant-landlord relationship, ASK felt this bill would

help students.

Student Senate has pondered the problem of parking on campus for several years. This year the senators hired a firm to determine how the University can best use the space on campus.

One of the firm's suggestions was to convert K-State to an all-pedestrian campus. Only state and University vehicles would be allowed to drive through campus if this plan were accepted.

Perhaps the most important job senate has is allocations. Revenue for student service allocations comes from a student activities fee assessed at enrollment as part of the total tuition cost.

Meetings every night, some lasting past midnight, are not uncommon during allocation hearings. Senate listens to pleas for money and tries to allocate it to those groups which they believe have been performing valuable services to students.

This powerful legislative body has been given much responsibility for governing affairs of students, and has become an integral part of the University community.

Cooking more than opening can

When a student abandons life in the dorm and gets an apartment of his own, he finds he has more privacy, more freedom and untold relief from the eternal hassle of finding a quiet place to study.

With the good, however, comes the bad. The off-campus student soon discovers that he has created a monster — a hungry one.

The extra living space, the ideal location, the bath and a half, even the privacy don't seem quite meaningful when he is suffering from malnutrition. And a meal card is no longer the ticket to nourishment.

If he has never prepared a meal, the ravenous student is now looking opportunity and necessity in their collective eye. Now is the time to think back on all the times he hung around the kitchen and hindered good old mom while she made dinner. With a tinge of sadness he may recall those times and marvel at the way meals seemed to fall together.

The questions of cookery are endless. How do you cut up a chicken? How do you turn a frying egg without wishing you hadn't? What is the secret of pie crust that can be chewed and swallowed?

Ready-to-eat and heat 'n' serve foods become tiresome, not to mention expensive. It all boils down to the simple truth that experience is the best teacher.

Granted, the average student neither has the time, nor the reason, to become a galloping gourmet. Simple and basic food is the key to a reasonably well-balanced diet.

Breakfast, the most important meal of the day, is inevitably skimmed on or completely omitted from the daily menu. Soup and sandwiches are the perfect answer to a quick lunch or dinner.

Skillet dinners, casseroles and easily-prepared hamburger dishes are a sensible and relatively easy way to build a meal from one main dish.

Everybody acquires his own style and his own methods. Roommates may lighten the task by setting up a rough schedule by which everyone puts in equal time in the kitchen. The married couple may also share the load, while the single student who lives and eats alone has only to please himself.

Some students think they would enjoy the meal card routine and dorm food again. Others heartily disagree, preferring to eat what and when they want to.

Sooner or later, just about everybody is somehow forced into trying his hand in the kitchen. He may find himself equipped with ten thumbs. But once the cook knows his way around the measuring cups and temperature settings, it all comes as naturally as hunger pangs.

Students attend classes despite hazards of inclement weather

Click. Whoosh! Your umbrella goes up, and you begin a quick journey to your next class.

Sidewalks that seemed wide under yesterday's sun are much too narrow today. Umbrella-sporting scholars avoid collisions by stepping off the pavement, only to soak their tennis shoes in the wet grass.

Neither bothered by a cumbersome umbrella nor by his wet hair, a not-so-scholarly student holds a Collegian, darkened by its dampness, above his head for protection.

Soon your flimsy umbrella becomes no match for the weather. Like a car door slammed on a little finger, the strong winds mangle your skimpy umbrella.

You can tell that winter is here. Frequent trips back to the dorm or house cease as staying on campus all day becomes the only sane thing to do. A cup of coffee replaces the traditional mid-morning Coke. It becomes standing room only time in the Union as students are drawn to each other against the cold.

Bundling up for the walk to campus can take from 15 minutes to

an hour depending on your tolerance. Three pairs of socks covered by boots might keep your feet and ankles warm. Long underwear and jeans might protect your lower extremities — and two shirts, one sweater, a sweatshirt and an overcoat the rest of your body. A beanie cap tops off the outfit like a cherry atop a chocolate sundae.

Icy sidewalks become extremely hazardous — especially when you can see your reflection in the sheet of ice at your feet. Providing you don't fall and break an ankle or hip, you make it to class fifteen minutes early to shed the extra apparel. Shedding the overcoat, beanie, sweater and two shirts cause your body temperature to rise past the comfortable state and into the realm of sleepiness.

But fall and spring afternoons make up for the bothersome cold and wet weather. Walking home from class with a comfortable cool breeze wrinkling your shirt sleeves, you think little of ice, rain and wind. In fact, it's the farthest thing from your mind.

Traffic headaches greet drivers

If you've been reading the local tabloid and listening to current gossip, you might be aware of the hullabaloo concerning the campus traffic and parking situation.

And if you've seen a copy of the Oblinger-Smith survey, you might be up on all the latest plans to make this University more "pedestrian."

But perhaps you're waiting for the television documentary, or the full length picture show, or the color foldout in next year's *K-State Bulletin*.

But, if you've been unfortunate enough to try driving and parking within the confines of the native limestone perimeter — then you already know what the problem is. Your only questions are "What is being done about it?" and "When?"

But then, you don't really care. You just want your parking place, your uninhibited crosswalk, your ecological peace of mind — and now.

And so in the meantime, while committees, surveyors and higher-ups decide your all-too-distant future, you struggle to find the last open spot at the Union or wait impatiently as the droves from Ackert cross listlessly before you.

Time was when a smattering of common sense and courtesy, a few traffic laws and some judicial ad-

vanced planning were all you needed to avoid congestion and indigestion. But times and tempers have changed, and growing numbers of vehicles compete for a seemingly decreasing amount of useable roadway.

Nature and safety lovers would just as soon clean the air and clear the roads at the same time and restrict automobile traffic at certain times of the day. Yet commuters want their transportation to be fairly accessible, and without a doubt, don't want to spend each day searching for a parking space in the off-campus jungle.

At present, solutions for the mobile masses are few. Practicing abstinence when ever possible and establishing car pools help a little. If all else fails, you can always move back on campus.

And so the mad rush continues. No one is particularly satisfied with the present situation. One wonders who and how many will be satisfied with the way the problem will be dealt with in the future.

For the time being, administrators have advised all parties to try a little more patience and goodwill. But more students, walkers and drivers alike, feel that their patience has been tried long enough.

Director calms tryout anxieties

Using her hands to shape her explanation of a character's personality, the director's eyes widen in anticipation of the final product.

"Now, the prince is a different sort of guy." The director searches for an appropriate description. "Actually, the prince is an ass," she concludes.

A spatter of halting laughter greets her characterization and the 15 students waiting to audition for parts readjust their postures.

"If you have trouble reading the piece cold — don't worry — we'll give you another try," one of the advisers reassures the budding actors and actresses.

A young woman in the back row wearing a subdued brown dress and flat-heeled shoes asks, "What if we can't make all of the practices — that is, if we are chosen for the play?"

"If a director wants you, it's amazing what kind of arrangements can be made," an adviser answers the candidate.

This response brings color to the cheeks of a blond girl secluded in a corner of the room and a hint of a smile is detectable on her face.

"Alright, who would like to read

first?" a young director asks.

The director surveys the group for an indication of response. Seeing none, she points to a young male and female sitting close together and asks them to read the lines of the prince and the mother.

Gulping deeply, the young man rises and slowly begins dodging desks on his way to the center spot of the room. Trying to grasp a copy of the play nonchalantly, the novice knocks a porcelain cup off a shelf. He retrieves the item quickly and replaces it on another desk as the sound resonates painfully.

Almost simultaneously, the girl rams her knee into a chair with such force that it teeters twice before coming to rest.

The prince begins the tryout boasting a deep, clear voice, "Ma'am, may I speak with your daughters?"

"Why, sir?" the play continues as the mother speaks flawlessly.

Next to me a girl whispers, "The first ones are always the best."

"It's probably because they aren't nervous," I reply.

"That must be it," she solemnly agrees.

Recruiting: first of many games

It was over. The scoreboard read 17 to 14 and the fans left the stadium with no intentions of returning until the next season.

Although seasons come and go, this season was special to those senior varsity players who just finished their least season of college football. All they had left were memories.

Such a senior, Charles Clarington, defensive nose guard, recalled his memories of the spring of '69 when he was only a young recruit.

"I'd never heard of K-State until Coach Powell visited my P.E. class in Florida and invited me to Manhattan. I agreed because it sounded intriguing," he said.

The next time Clarington heard from the coach, it was to tell him which weekend he was scheduled to visit.

"I flew from Florida to Kansas City on a commercial airline. But my trip from K.C. to Manhattan was in a crop-dusting plane. That was some experience," he said.

Clarington vividly remembers being introduced to a varsity player, Russell Harris, who was his guide for the weekend.

"He was supposed to show me a good time. On Friday evening he invited some friends over and we had a little get-together, which was pretty nice," Clarington said.

A highlight of his recruitment was a hayride to a cabin for steaks.

"Coming from Florida, I wasn't used to the chilly weather or the hayride. The cabin was a welcomed sight that night."

As the weekend neared an end, Clarington talked with the coaches who tried to "sell him the K-State program," he said.

"They told me K-State had a good program, although the past few teams hadn't been winning. However, football was in the process of rehabilitation, and I thought it would be a good opportunity for me to establish myself. That was a year after Vince Gibson became coach," Clarington said.

Although K-State was a school

of opportunity for Clarington, he admitted that the new athletic dorm also made a great impression on him.

"K-State had the best facilities: carpeted floors, sinks and telephones in the rooms and the beds were big enough. It was a fine dorm to me, being a high school kid and all.

"The contract was also appealing — all books, tuition, room and board plus \$15 a month sounded good, even though most schools offered similar contracts," Clarington said.

As he reminisced, Clarington realized he was recruited a year before the Gibson Girl program began.

"They were added a year later and it's a pretty nice idea. I don't think I would have minded. They're just an extension of recruitment," Clarington said.

He claims his first years at K-State were rough.

"I dreaded spring off-season practices more than anything. And everytime I saw a new recruit in the spring, I felt sorry for him."

During his sophomore year, Clarington helped with recruitment.

"I usually talked to guys from down home. I'd tell them how rough it was, but I'd also tell them it was a big opportunity if they really worked. Some of the guys enjoyed recruitment and had a good time, others just sat around the dorm all weekend."

Now that it's all over for Clarington, he looks back with mixed feelings.

"There were things I liked and disliked, but I don't regret anything. Besides, now the coaches are beginning to level with the recruits, and the entire program has come a long way," he said.

"The decision you make as a recruit is the biggest and toughest one. You must be sure it's right because it's final — you've got to stick to it. It's almost like marriage, except not as long. For me, it's over."

Homecoming's image altered

It seems as if the Homecoming mystique is gradually, yearly, becoming more a state of mind than a concrete celebration. Blue Key is to be applauded for simplifying this previously intricate pastime.

This year, outside of the concert, game, feature movie and play production — things which go on more or less continuously regardless of the season — the elements which one normally associated with the idea of Homecoming were consolidated into one tidy package: the Homecoming Previews.

The few ambitious students who participated in the various songs, skits and contests in this presentation will undoubtedly have something to remember about Homecoming 1973. Indeed, to these people the game and half-time show the next day could be viewed as anticlimactic at best.

Yet for the majority of students the whole affair was just another weekend in October — fall air, fun times and failing athletes. The precise distinction between this Saturday and any other was more academic than extracurricular.

Thus the spirit of the occasion had to be carried on by the various visiting parents and alumni — which, of course, is what Homecoming is supposed to be about.

The hoopla and holler of this traditional mid-semester fling has given way to a spectre — something which is occurring across the country as students become more concerned with moving forward than with looking backward. And so, the meaning and importance of this struggling event is no longer in the hands of the students at K-State, but in the minds of the alumni.

Energy experts analyze crisis

The energy crisis, whether real or contrived, is the subject of much talk and controversy these days.

Taking the many questions concerning the current crisis, the Union Program Council sponsored a four day symposium, The Energy Crunch, Jan. 28-31.

In one session, a representative from a major oil company and a representative from an independent oil company locked horns on several issues. Tom Raimo of Hudson Oil claimed "this world is floating in crude oil," and the lack of major oil company refinery capacity is responsible for the fuel shortage.

In another session Robert Robel, adviser to Gov. Docking, cited government mismanagement as the main reason for the energy crisis.

An example was withholding funds for Amtrak, potentially the cheapest form of transportation, Robel said. An Amtrak representative said in a later session that Nixon had held up funds for two years.

It was generally agreed in all sessions that Americans are wasters of energy and individual action is necessary to combat the crisis. A representative from Kansas Power and Light Company offered ideas to help save energy.

Alternative energy sources were discussed by professors from the chemistry and architecture departments and the assistant state attor-

ney general.

The country could convert to solar energy in a few years, said William Fateley of the chemistry department.

"It's not a technological problem. It's a political one," Fateley said. "We've got to get busy making use of other energy sources."

Sociologists and psychologists discussed how the energy crisis will affect future societies. Tony Jurick, of the family and child development department, thinks sexual openness will soon change.

"You can't have an affair in K.C. or Topeka because there isn't enough gas to get there," Jurick said. This trend will either push people back to the traditional family, commune or group marriage situation.

George Peters from the sociology and anthropology department sees other problems with the energy crisis. Old people will suffer most from the energy shortage, he said.

"In Kansas we warehouse old people into small communities where they become dependent on automobiles to get places," Peters said. "Turning down the heat will affect the old people the most."

Some questions still remain unanswered, but steps are being taken to understand the energy crunch and to learn to cope with it.

Natatorium dedication ends seven-year wait for facilities

Instead of the traditional ribbon-cutting ceremony, a bucket of water signalled the long-awaited opening of the Physical Education Complex on Oct. 11, 1973.

Short dedication speeches were given by K-State President James A. McCain and Student Body President Joe Knopp to a small audience of students, faculty and guests. Following these, Knopp poured the ceremonial bucket of water into one of the three swimming pools, officially opening the complex. Originally scheduled to open in the spring of 1973, it's completion was hampered by labor problems.

The dedication marked the end of a seven-year program of planning, financing and construction of the multi-purpose complex. Conceived in 1965, funding for the project didn't begin until 1966 when the Student Governing Association started assessing a \$1.50 fee to each student. These student fees were aided by federal funds which also financed the new floor and track in Ahearn Fieldhouse.

According to McCain, the construction has been high on the priority list since 1966. However, its de-

mand increased following the 1968 Nichols Gymnasium fire which destroyed the former women's physical education facilities. The women's department was moved into the gymnasium which housed the men's facilities.

Connected to the southwest corner of the old gym, the new \$1.8 million complex houses women's locker rooms, offices and laboratories equipped with modern electronic teaching facilities.

The hexagonal natatorium houses two 25-yard racing pools, one six-lane and one eight-lane, and a diving pool equipped with one and three-meter diving boards. These pools replace those in the basement of Nichols.

Nearing completion on the south end of the football stadium is another athletic facility. Begun in the spring of 1973, the new track stadium is being financed solely through donations of money, time and equipment to the University. The eight-lane tartan track was completed in May, 1973 and will be joined by a 6,000 seat stadium in late 1974.

What inspires achiever's devotion to work?

By David Chartrand

The Society of Professional Gluttons has an intractable group in its ranks for which an explanation is overdue.

Most over-indulgers adhere to an orthodox menu of drinking, gambling, sex, smoking, eating and raping and plundering.

And, while the practitioners of excessiveness have historically taken delight in drawing social scorn, there is still one glutton who is hardly castigated, nay, but decorated and rewarded.

The over-achiever — the work ethic nut. A glutton of the first water. How to explain him?

As a somewhat less-than-true microcosm of society, the University is a perfect example of the existence and power of the work ethic conviction.

There's no doubt that in every class, in every building on every day of the school year there works at least one over-achiever.

She's a resident assistant on her dorm floor, chairperson of a political caucus, a vocalist with a folk singing group and a student senator. She's preparing for a career in veterinary medicine and has a 3.5 GPA.

Or him. It doesn't matter. He, too, is seriously involved in two, three or four time-consuming activities and holds positions of responsibility in all. And people can't understand how he does it.

Ever hear that one?

"I don't know how you do it."

Liars. Of course they do. It's just a matter of pacing one's self and one's time and being shrewd enough not to try too much.

What people really can't understand is why he does it.

The over-achiever needs to carry responsibilities. Others are satisfied with following, and require only a sense of belonging to a group and contributing to the mass effort. Driven by no hardened convictions, they prefer consenting rather than conflict and possible alienation.

But one person in the group is too convinced of right and wrong to

let a job or cause be done haphazardly or incompletely.

He is multi-faceted. Having varied interests, he carries responsibility in many capacities. The achiever adapts easily.

Of paramount importance in the life pattern of the over-achiever is positive reinforcement.

Always committed to doing things well, if not perfectly, he receives much positive input in the form of congratulations, praise and — most of all — results.

Nothing prods an achiever to continue achieving more than his confidence that he can and will accomplish his end.

Because of this positive reinforcement, the over-achiever has a peculiar mental mechanism for coping with a lifestyle that requires the ability to do many tasks at once.

First, the over-achiever operates on a principle of loath not thy cool.

He's in classes every day until 1:30. All his afternoons are spent working in the Student Governing Association, meeting with committee heads, answering the phone. He works there until past dinner. Most studying gets pushed to the weekend. His thoughts travel quickly from one upcoming job to the next.

But no matter how tight the schedule gets, no matter what the pressure, the over-achiever never overheats.

And because the achiever spreads himself far and wide, he exposes himself to many more risks than his counterpart — the under-achiever.

The under-achiever spends most of the day playing cards in the Union, sleeping or starting superficial conversations with his limited coterie of friends.

Life is staid and stable for him. No risks, no letting down his guards.

But the over-achiever takes gamble upon gamble. He gambles on people, places, things and himself.

That is, the over-achiever invests so much of himself in things

not exclusively under his control that his potential for disappointments and failures is high.

But the over-achiever is an optimist. He may be a worrier, too, but underlying optimism is the cornerstone of his character.

He uses his failures to his advantage; he makes opportunities of his difficulties, while the pessimist does the reverse. Though he accepts the reality of tribulations and even possible error, he knows these will make him complete and balanced.

Where does the over-achiever get this philosophy? On what type of intangible motif does the University work demon build his work ethic?

He builds it on something he knows will last. The motif may be religious, as in the service of and loyalty to a god. Or it may be a secular humanism, a spiritual kinship with the world and the natural order of things.

Of course many are the achievers who are out to "prove to _____ that I can make it." Some are even out to prove it to themselves.

But the day comes when the reasons or the people for proving things run out or die, when the need to gratify the self wanes.

Not that some don't work simply to survive, i.e., pay the bills. But this is a far cry from the dynamic, continuing achievement ethic, the quest for responsibility, the positive reinforcement and mental optimism of our over-achiever.

The achiever gets a golden chance right at the University to find and test his work motif.

The work ethic. The over-achiever. How to explain them.

The Society of Professional Gluttons must come to grips with the fact the work ethic belongs with the sex, beer, and gambling ethics. It's a life of excessiveness.

The over-achiever, likewise, must come to grips with his gluttony. For whether he achieves notoriety or neuroses for gorging himself will most likely depend not on his means, but his reasons.

K-State captures canoe race despite rain, aching muscles

Eight O'clock on a rainy Saturday morning. You're plodding down a riverbank of oozing mud to a group of waiting canoes.

The annual KU versus K-State Canoe Race is about to begin. This is more fun than you've had in a long time — and it's legitimate. Nearly 250 others are making the same muddy descent and taking their places, three in each canoe.

The contestants are almost entirely residence hall students. Although others are welcome to compete, they are not eligible to place in the contest.

Both sexes must be represented in each boat, and it's wise to make sure you're equipped with first aid kit, flashlights and an extra paddle.

The race down the Kansas River will start at Manhattan and end in Lawrence. If you've never paddled a canoe before, you may be an expert by the time you reach your destination.

Despite the constant drizzle, spirits are high — but then, so is the water. You are emptying rainwater out of your canoe, and another has capsized. The race is off to a rather wet, but determined start.

As you make your way down the

river, you get to know your fellow racers better. You've got to keep an eye out for brush, unexpected sandbars and stopping points to change crews.

The night is spent at St. Marys, the halfway point. The rain has been an almost constant companion even as you drink beer and tell jokes in your tent.

You wake up to coffee and doughnuts the next morning and get off to a later than scheduled start at 7:15. Like so many others, you are quick to feel the ache of yesterday's overworked muscles.

A good omen: the rain has ended and the sun is glinting off the water. Sunday is, for the most part, uneventful though hardly boring.

The end of the race sees K-State's Haymaker Four arriving in Lawrence clearly ahead of the others, with Haymaker-Putnam Two placing second. The following four places are also captured by K-State.

It's been a new experience for some, and a chance for revenge by those who suffered last year against the rival school. Either way, they're sure to be back to compete again next year.

Aggieville: both day and night, constantly alive

If you live in a dorm and don't have a car, you go there for everything: snacks, shampoo and socks. You pay the exorbitant prices philosophically — after all, where else is there to go?

If 3.2 cereal malt beverages are your vice, you probably spend most Friday afternoons and weekend nights there. Maybe Wednesday night, too, if you're Greek. Maybe even every night if your other vices include not attending classes.

And if you're an avid people-watcher, you've found it to be the perfect place to hang out. Where better to see people spending money, others making money, people making asses of themselves in their drunken states and others in love?

Aggieville. Where else in Manhattan is there so much life? Nowhere.

By day — especially Saturday — Aggieville is busy with shoppers who

weave in and out of drugstores, clothing shops and dry cleaners. They stop occasionally for a taco or an ice cream cone, continuing on blithely, spending money, calling to friends. They're alive, and for a while, at least, they're free: free to check out the stores and look at the other people.

But at night, Aggieville's face changes. The daytime open market atmosphere is gone, and if you'll pardon the exaggeration, Aggieville becomes a jungle.

Groups and couples roam the streets (if you're alone, you're desperate or crazy) traveling from bar to bar, looking predatory and forlorn at the same time — if that's possible.

They sit in taverns, working on pitchers, chattering with acquaintances and waiting for the Coors or Bud to take effect.

They seem to be watching the entrance waiting for Mr./Ms. Right

from the ad on page 32 of this month's *Glamour* or *Playboy* to breeze through the door and into their lives. Only it rarely happens.

The others, who've found a potential Mr./Ms. Right are lined up in front of the theaters, waiting for the 9:00 show to start, wondering if there'll be time to get a beer before last call.

Yet Aggieville is even more alive at night than it is in the daytime. All the secret wishes, hopes, loosened inhibitions and eventual disappointments seem to gather together into one big play of life — recklessly comic to those just entering it and almost tragic to those who have outgrown the scene.

Aggieville — the home of the mighty dollar and the lonely heart. Aggieville — a mecca for consumers and boozers. Aggieville — day and night, constantly alive.

Seminar eases frosh adjustment

Mama, you can stop worrying about me. College is not as frightening as I thought it would be. At first, I must admit, I wanted to come home because K-State was huge and there seemed to be a million people.

But, I have a class, Group Life Seminar, once every week and it's terrific. It consists of a group of about 12 other freshmen who are trying to make a smooth transition between high school and college.

We meet with a group leader, who is usually a sophomore or junior, and discuss all sorts of topics. We try to solve any problems we're having at school together in our group. It's really helpful.

What's more exciting, sometimes we do things just for fun. For instance, two weeks ago, we met at an ice cream store. Another group visited a doughnut shop.

Besides finding out about K-State, we also visited community sites. Once we went to the planetar-

ium; that was fascinating.

And guess what, Mama? One time we all got busted.

Actually, our group leader arranged with the police station to take us through the booking procedures. (I always wanted to know how a crook felt when he was caught.)

Other seminar groups are for transfer students and veterans. K-State has really made an effort to make it easier for new students like me.

There's one problem, though. The groups are only for one semester. Next semester, I'm going to miss all the fun I've had. But, I'll still have my friends. Also, I'll have a credit for a class I didn't have to do any hard work in. Those freshmen who didn't take the course really don't know what they missed.

Well Mama, I'd better go now. One thing I learned is that regular studying really is necessary.

Session offers brief courses

Semester finals are over — most K-Staters pack up their cars and head for home, summer jobs or vacations.

But for 883 students, Monday morning brought the beginning of three more weeks of classes.

Gone were the long lines and crowded Union Stateroom; remaining were a few tables dotted with students, books in hands, reading tomorrow's assignments.

Gone were the frustrating trips around campus parking lots; students came to class at 9 a.m. and still found parking spaces.

Gone was the familiar table hunt in Aggieville bars; now students and bartenders sat down together, talking about the summer ahead.

During intersession students have the chance to take courses that couldn't be worked into a crowded semester schedule.

"You only have this one class to worry about, and you can really get interested in it," one student said.

For some, the campus was not

the classroom. Students enrolled in Ecology of Kansas visited natural community types daily, conducting surveys.

In some classes, projects replaced examinations, but other students had tests every day.

Students enrolled in photojournalism were seen, cameras in hands, photographing areas of the campus and community, only to return to long hours of developing and printing their work.

Swimmers prepared for summer lifeguarding jobs by enrolling in senior lifesaving or meeting requirements for water safety instructors.

Family and child development offered an unusual seminar for intersession students: Death and the Family.

The class dealt with contemporary attitudes toward death and dying.

Whatever the reason for taking a course during intersession, most students seemed to finish the three weeks satisfied with their accomplishments.

Union: playground for students

By Scott Kraft

To an airborne observer, the malt-white brick building on the west side of campus appears to have a gravitational field of attraction.

Streams of beings approach this structure from other celestial bodies — Denison, Eisenhower, Seaton, Kedzie.

Serving as a link between society and University, the K-State Union draws students under a common dome.

Entrance is no problem, as I am swept into one of the streams leading to the Union. The pace is brisk, and in no time I have passed over the walkway and entered the glass doors, gray with the smudges of moist palms.

A long line of students stands in front of a window inside the Union where a young woman is handing out cash and eyeballing IDs. Further back in line, I ask the girl in front of me if I might use her back to write my check; she complies. You meet the nicest people in the Union.

I take a quick look in the State Room eating area and see a variety of phenomena. A gin rummy game occupies several people while a couple enjoys a Coke before their next class. One student's attention is riveted to his notes and textbook — he probably forgot to study last night.

My eyes focus on a corner table. Stacked on top of it are books — economics, chemistry, plant science. Using them as a pillow, a guy with tousled hair catches up on a little sleep — he probably studied too much last night.

The sounds of laughter draw me to another section of the Union, still on the first floor. Watching a color television, 30 students lounge on semi-circular couches. Looking for a quiet place to study, I notice a glass door close to the TV. I see several individual study booths inside.

Whoosh! As the door closes, the sounds of laughing, talking, music and TV all fade out completely. Instead, a few conscientious students

in the study room put fingers to their mouths — "sh." Obliging quickly, I find an empty desk to study and let the red disappear from my face and neck.

"Let's go down to the basement," I hear one student whisper to a friend. Not knowing this place had a basement, I set out in that direction. A big poster above the Little Theatre ticket office announcing a coming attraction and an art display catches my eye. But that's for cultural fans, not me.

More loud laughing is coming from the basement than from anywhere else. The ring of pinball machines, click of ping pong balls and the sounds of marble striking crisp wood make me aware that this must be the recreation area.

Farther down the hall a sign painted on the wall reads: "Catskeller." The Catskeller reminds me of a night club with tables arranged randomly on several different levels of tangy red carpeting. There's a stage in the center of the room.

Paradoxically, the room is now well-lit and students are studying, eating and talking. I can hear Grand Funk in the background.

Not seeing any familiar faces, I resolve to go to the Book Store. Resembling an open air market, the Union Book Store is spread over two floors. Pens, notebooks and paper are sold on the upper level while magazines and textbooks occupy the lower floor.

Later as I exit with the stream, I hear several people entering the Union talking:

"Our instructor let us out early, so here I am!"

"My class isn't until 10:30, so I figured I'd kill some time here."

"I spend more time here than I do in class."

The amount of things to do in the Union is limited only by imagination. So, if you want to do something — anything — come to the K-State Union.

It's the student's playground.

Resident assistants bridge gaps

By Ann Carter

A counselor, an interested person, a helping hand, a friend — that's what residence hall staffs are supposed to be. But where does one begin?

"I'm your R.A. and I live right down the hall — the door surrounded by notices. If you need anything or have any questions, just come on down."

It's an open invitation that should be familiar to the 106 resident assistants (R.A.s) and staff assistants (S.A.s) in K-State's nine residence halls. And on those opening days, when the dorms are filling with new students, the questions are frequent.

"Could you tell me what building 'J' stands for? Someone told me Eisenhower Hall, but I think he must have known I was a freshman."

"Do you have a line schedule I can borrow?"

"What happens if I don't have enough money to register?"

"How come there aren't any towels in the bathroom?"

During the first few weeks, residents are starting classes, finding part-time work, and deciding if they're going to like residence hall life and the people living next door. It's a time, too, when students are deciding if they're going to get along with their R.A. or S.A.

A staff member is faced with a group of students living in very close contact. They're all different, but if their dorm experience is going to be good, they're going to learn to share their diversified lives while respecting each others' differences. That's where a staff member's job comes in.

So, besides the role of counselor and friend, a staff person must also be an organizer, and often an administrator faced with residents reluctant to fill out the necessary forms.

"I can't find my furniture serial numbers for the room condition card."

"I have to fill out a pet request form?"

'Uh oh, here comes the R.A. bringing our information cards back.

What did we forget this time?"

But a staff member can use the paper work of the opening days as a way to get to know his or her residents. A quick trip to return an incomplete form can become a two-hour talk about the boyfriend left back home or the fear of facing new classes. And a two-hour talk, no matter what the topic, can mean students will feel more ready to bring their problems to their R.A. or S.A. as the year goes on.

Staff are trained in first aid, helping relations and resource centers, but it's still hard to know how to handle the perpetual drunk who disturbs everyone. Or the girl who's making enemies because she talks too much.

Sometimes it's a matter of talking it out, but more often what's needed is a listening ear. It all takes time away from staff's study time, and they can't just hibernate at the library or in their room for a week to catch up, without hearing protests from their residents.

"Hey, R.A., come join the party for a change."

"We only see you when you bring around new meal tickets."

"This is the fourth time I've come to see you about room changes, and you're always gone."

"Why have you been keeping your door shut lately?"

Somehow a staff member has to find a balance between his personal life, school work and interest and activity in the dorms. When he can, he ends the year with good feelings about the job, and comments from residents that make his efforts seem worthwhile. And when he can't, at least he's had good experience working with people.

"I'm glad I decided to live in the dorm. I found out how close a group of kids can get just by living on the same floor and sharing fun and problems."

"Thanks for being around to help me through those first few weeks. I was pretty homesick."

"Hey, R.A., can I be on your floor next year?"

Hort therapy: flowers and love

The place is College Hill Nursing Center; the time is 5:30 p.m. Scattered across the large, sunfilled room are card tables surrounded by people. It looks like one big session of bridge, but there are no dealers. One hears laughter and chatter everywhere, and the excitement in the air is obvious and contagious.

Tiny, gray-haired Emma sits, leaning over a table. Her crinkled, aged face is cast downward, and her arthritis-ridden hands move slowly and deliberately. There is a determined, intent look on her face but a definite gleam of amusement in her eyes.

Suddenly, as if the last piece of a puzzle had fallen into place, Emma proudly announces, "I did it! Look at it. See, I did it!"

And, as if by magic, the seriousness of the situation is gone. She holds up her finished product for all to see and the feeling of accomplishment, and joy is felt by those around her.

The project Emma has completed is nothing spectacular. The shriveled, little lady has just finished carving a funny face from an apple. The session for the nursing home residents is a new practice in therapy — that of working with plants and flowers. The technical name is Horticulture Therapy, and the program was born at K-State a year ago.

The basic idea behind the program, according to Mona Dwork, is that of helping people achieve a better understanding of themselves and the world through horticulture.

Dwork, along with Mary Mandeville and Dan Niblack, spearheaded the movement at College Hill Nursing Center, and the idea went over big. Within a year the number of patients in the program jumped from five to over 40.

"What the therapy at the center does," Dwork said, "is let these people work with living and real things. They learn, they relate and they create through plants and flowers."

Carving faces from apples is one of the more "fun and nonsense" programs. Among other things, the

patients have worked with flower arrangements, both fresh and dried. They have planted and reaped a crop of tomatoes, made Christmas wreaths and corsages and pressed picture flowers.

Jane Fisher, director of activities at the center, considers the program outstanding.

"I'm around these people all the time," she said, "and I know how much it means to them. They look forward to the weekly visits by the 'plants and flowers kids.'"

The "plants and flowers kids" consist of about 15 students who work in the program. Approximately half the students are working on a volunteer basis, and the other half aim for graduate credit by taking it as a horticulture independent study program.

"Hort Therapy is a new, but promising field," Dwork said. "It can provide many answers to many problems."

Besides working with the aged, it can be used with the emotionally ill, physically ill, retarded, handicapped and those in penal institutions.

One needs only to feel the excitement at the center and see the glowing faces of the patients to know that, indeed, the idea of horticulture therapy does have merit.

As Emma finishes her first carving, she eagerly begins a second. This time she gets a little braver and more creative. She turns to Florence, on her left.

"Look what I did. I added hair and earrings to my apple." Florence nods silently and proceeds to copy Emma's idea.

Thanks to the program, Emma and her friends smile a little more, and laugh a little more, and feel a little more alive in their response to the world.

Emma pats a student lovingly on the back, and her face breaks into a wide, toothless grin.

"My flower is so pretty, and I did it all by myself. It's really mine!"

All the students' time and effort has just been paid — in full.

UFM offers diverse program

Is education for personal growth or social status?

Is agony synonymous with learning?

University for Man was founded on the belief that these attitudes are false. It aims toward making education relevant, realistic and joyous.

Courses are administered throughout the community in an informal atmosphere. Teachers are volunteers, no degree is necessary, only knowledge and devotion. As far as prerequisites are concerned, there is only one — interest.

Interpersonal groups discuss love, sex, marriage and other aspects of group and personal life. In the network of spiritual awareness classes, one explores his inner self.

Less philosophical programs include sports, arts and crafts, fine arts and foods.

In conjunction with current events, UFM groups study political, environmental and feminist situations.

As an aid to students combating an established school, this university offers courses on improving study and term paper skills.

The diversity of the community prompted UFM to compose a new department for high school students. "Mostly High School."

These, however, are not the only concerns of this program. UFM offers the community a walk-in crisis counseling center, drug information center and a food co-op.

Those who experience education at UFM find that within and around the walls of this house, the confinements of society are shed and man can live for his personal growth and understanding.

Sororities, frats join forces for Greek Week celebration

Twenty-four fraternities and 11 sororities all together? That's right. And that's what Greek Week, the last week in September, was all about.

Various activities were planned in an attempt to improve relations between the groups. Members of all houses showed up to eat, drink and join in the merriment of Greek Week.

One of the more successful events was a Friday afternoon Kegger in Cico Park. "All the beer you can drink for 75 cents" attracted students to one of the larger Greek functions in K-State's history.

Wearing T-shirts and other identifying clothing of their respec-

tive houses, the Greeks mingled with their own brothers and sisters, and friends in other houses. It was also an occasion to meet new people as the men kept watchful eyes on the women and vice-versa.

Many houses didn't serve lunch on Saturday. Instead, everyone headed for Tuttle with picnic baskets packed full of chicken, baked beans and brownies. After lunch, fun and games took over as members competed in relays and other activities.

Other action during Greek Week included a pledge function which was rained out and a Panhellenic and Inter-Fraternity Council mixer for the representatives from each house.

KSDB provides area listeners with late night entertainment

Here's one for you. Who is the The Voice of K-State?

President McCain? Vince Gibson? Case Bonebreak?

No. It's KSDB-FM, the campus radio station.

Is that so? And what do they do to earn this distinction?

Many things. They broadcast the Wildkitten and Junior Varsity basketball games, keep their listeners informed of campus events, give news, weather and sports reports, play the latest music and run remote broadcasts in the Union and at Chocolate George, talking to the people who walk by.

In Aggieville? You mean people in Aggieville are really coherent?

Most of them, except for the ones who stumble out of the bars.

Wait. I thought we were talking about the campus radio station.

That's been a problem in the past. A lot of people talk about the station, but some don't even know where it's located.

Hard to believe. By the way, where is —

If you stumble up the flights of stairs at Farrell Library or ride an elevator if you can find one that works, you'll see it is on the fifth floor. It was supposed to be on the sixth floor but that's another story. Actually, the station will be moving into the new wing of the auditorium next February.

I was wondering about that. Who keeps things moving around the station.

There's a large staff, all of whom have one thing in common — they're students.

Radio and television majors, huh?

About half of them are. Non-majors do it for fun and experience. In fact, some even like it so much that they change majors.

You mean even a life sciences major like me can be a disc jockey?

Well, there's a prerequisite course you'd have to take. But outside of that, if you've got the time and talent, you can get on.

That would be great. Then I

could chose the songs I want to hear.

You can do that now. Just call in a request.

No joke? You mean if I called in and asked for "The Rocking Chair" by Ben Wa and the Mercury Boys, they'd really play it?

Sure, if they've got the record. Just dial in.

I'd like to, but I can't seem to get it on my radio. What's the frequency?

88.1 FM.

That's what I thought. How come I couldn't get anything around noon Tuesday?

Probably because the station wasn't on the air yet. It runs from 3 p.m. to 9 a.m. on weekdays and 24 hours on weekends.

It sounds like this station has everything it needs.

Almost. It has fairly good equipment, but it lacks power and a means to transmit stereo. But they'll get that when the station moves to the auditorium.

All this takes money. Where do they get theirs?

Their budget is covered equally by the Journalism Department and the Student Senate.

Student Senate? I thought they only gave money to charity cases.

You mean — philanthropy?

Philanthropy? Isn't that something obscene?

No. However, KSDB-FM would rather be heard than obscene.

Stop fooling around. Surely any of the dj's can slip in a few four-letter words when no one is listening.

Yeah, and you could wear a red and blue tie to a Landon Lecture, but it isn't accepted procedure. Besides, KSDB-FM has standards to maintain. It has an estimated listening audience of half the campus, and it's growing. This is just one of many areas in which the station is making headway. In general, it's becoming an increasingly effective service to the campus and Manhattan both.

The Voice of K-State, right?

Now you've got the picture.

Newly liberated woman finds life more difficult

"I'm a liberated woman. And it's not easy.

"It has involved giving up a lot of the things that made my life easier in the past. Still, it's worth it. I wouldn't change back to the old way again," she said, shaking her head adamantly.

She's a K-State student — any one of the many women on campus who are practicing liberation.

She talked with the certainty of a woman who has been through countless "but-I-like-to-wear-my-bra" arguments with other women and with the quiet confidence that only a woman who has fought with men — and won — can have.

"I guess I was raised with the Scarlett O'Hara Myth. You know — the woman gets the material possessions and the man she wants through her feminine wiles.

"And I used to be damned good at it. I'd make men feel so masculine and so needed that I could get them to do exactly what I wanted.

"Do you know, I don't think I ever really *tried* to open a mayonnaise jar until after I was 20 years old? It's so much simpler and more endearing to hand it to the nearest man and act like a weakling."

She said one day it occurred to her that by acting helpless and demure, she was prostituting herself.

"Once, while in the process of charming some jerk with my cute behavior, I said to myself, 'Hell, I'm smarter than this guy ever will be. Why am I wasting my time with this contrived foolishness?'"

Now she's 21 years old. She opens her own mayonnaise jars, hammers in her own nails and changes her own lightbulbs — even if she has to get a ladder to do it.

She also puts air in her tires and mows the lawn. She fills out her own tax returns and wants to be a doctor.

"There are so many jobs people fooled me into thinking were hard — just because men always do them. I can do all those things; I just never tried before."

She also wears make-up and perfume and short dresses. She likes to take bubble baths and do needlepoint.

"I still fulfill a lot of feminine stereotypes, I guess. But I don't think that matters much, really.

"I get so tired of hearing the movement is full of cigar-smoking lesbians who don't wear their underwear. It just isn't true.

"Woman's liberation is important to me, and it bothers me when people don't try to understand it. But it's human — I was the same way about racism until I understood sexism.

"I also think it's human for people to say, 'But she can't do that — she's a woman,' whenever they feel threatened. But I read somewhere that it's no use telling a woman she can't be an astronaut or a construction worker or the President. If she can't do it — if she's biologically or emotionally unable — she won't even try."

And although her main concern is woman's liberation, she's worried

about men, too.

"Do you know, sometimes I really feel sorry for men. They're awfully hemmed in by the things society demands of them: support your family in grand style, don't cry, be aggressive — and above all, act like a real man."

"I think that's too bad. Men are just as restricted by societal stereotypes as women are. They should be able to stay home and take care of the kids if that's what they want to do while the wife works. But how many men would want to?"

But what about the future? It's easy to lose a lot of idealism away from the cloistered liberalism of a college campus.

"I don't know what will happen. I know my marriage will be an equal one, but what will I do when my husband and I decide to have children?"

"Freud is pretty passe now, but I can see my kids having emotional scars because their mother was performing an appendectomy instead of breast-feeding them."

She knows she'll get lots of opposition from traditional mothers because she wants to work. She knows men will still apologize for swearing in her presence. And she knows she'll be called a castrating bitch more than once during her career.

"But I'm strong, I'm intelligent and I want more than anything to work. How can anyone stop me?"

Anyone would be stupid to try.

Bible study road to peace for some students

By David Chartrand

"Why? Because He *is* my life. That's why. I mean school is kind of secondary. I know that sounds funny because I shell out so much money to go to school. But cripes, college is the best place to learn about Him and share it with others. And that's why a Bible study."

And that's why a Bible study. In Greek houses, apartments and almost every dorm on campus, handfuls of students are coming together in the dark and quiet hours to huddle over Bibles.

Although it is impossible to decide for certain how many Bible groups there are, the estimate is from 60 to 80 such groups, on campus and off.

There are Bible studies for evangelical purposes, for married students and for new Christians. The sessions can be brief; they can go on for hours.

But why?

The pressures of academic burdens are certainly not easing up. Most students complain they do not have enough time to fit any extra-curricular activities in with their studies, let alone leisure time. Surely the Bible study children are cutting into their grades or sleep or something if they're reserving their already scarce time for . . . well, whatever it is they do.

But those who participate don't see it that way.

"Time? I have as much time as I make myself find. I mean, I'd feel ashamed if I couldn't spend at least an hour or so a week with Him. When you need direction as much as I do, you don't worry about time."

"Yes, I may be up twice as late studying because I was reading the Word, or I may not get a whole

night's sleep. But I don't care. For a little sacrifice I gain a whole lot of peace."

"I use the Bible as a guide for my life more than I use my algebra book. College studies don't tell you how to live a Christian life."

"Sometimes I have to sit and study the Bible before I can study anything else. The Bible is the best commentary on life when you have problems that are swallowing you up."

The popularity of the Bible study, however, is far from being a rage. Many have mixed feelings about such an idea.

"No. Organized religion from top to bottom has turned me against any type of churchism. That includes Bible studies. If some feel they profit from studying the book, fine. Religion is personal. But I don't see how it would help me in my life."

"Sure I could see myself in a Bible study. In fact, I was in a few in high school. But I can't relate to the Jesus freaks. They talk of love and peace without ever really dealing with world problems. No, I wouldn't care for a Bible study."

Others harbor even a slight malice towards Bible study people.

"I was in one. But they kicked me out because they didn't like my ideas. They weren't even friendly."

"The Bible study kids were very pushy. They would knock on my door when I was busy. They'd give me literature when I didn't want it. They'd be up late singing songs too loudly."

"Studying the Bible in a group is not necessary. I do it on my own sometimes. But other things give me equal satisfaction — my work, my friends."

The campus Bible study seems

no less than a phenomenon. The quest for sanity and self-knowledge peaks for many during the college years. Much is unclear. Questions go unanswered. The knowledge explosion, the media and the Ph.D.'s are starting battles faster than they can be fought. Too many are giving up, their spirits broken.

"I see so many of my friends all wrought up. Nervous and ulcered. Pressures of school, deadlines, love problems, family tensions — it all stacks up and they go nuts. They get sour and bitter. Worst of all, they forget what it's like to be at peace.

"Well, I have all those problems, too. But I have peace because God speaks to me every week through the Bible. The Bible doesn't change the situation. It changes me. I see the reason and meaning in my suffering. I say, 'Well, Lord, what next?' And by God, he answers me."

One would be hard pressed to say for certain that victory is in store for either those who study the Bible or those who do not. Yet one gets an unmistakable impression from those who do that they are at least winning.

It is, in fact, significant that many students are committing themselves to one book. It is also surprising that for many students one book suddenly appears to be taking on new meaning. Practical meaning.

For others the answers lie in many places. Though the Bible is a possibility, to them it is only one source of nourishment.

But if interpretation is at all possible, it seems that for many once disillusioned, discouraged and dismayed young people, one book has made tomorrow look very good.

Academics

James A. McCain: President

A university encompasses scores of student and faculty interests and activities, and the president is involved in most of these. Furthermore, he represents the university before many off-campus groups, some of them state-wide and some national in scope.

Thus, my day-to-day schedule does not conform to a set pattern, but instead reflects the variety and movement which characterize the life of a university.

Nevertheless, certain of my obligations do follow a set schedule. For example, I meet every Thursday afternoon with either the Administrative Council or the Consultative Council.

Since both of them are representative of students, faculty and administration, they provide me with an input from all elements of the University community in connection with pending decisions.

I attend a meeting of the Board of Regents one day each month, usually in Topeka, and a meeting of the Council of Presidents of the Regents' colleges and universities also one day each month.

I make it a point to attend the three largest annual meetings of K-State alumni, those held in Kansas City, Wichita and Topeka, and such other meetings of alumni

as time permits.

I also present the financial requirements of the university at one session each year of the Governor's budget hearing and before a joint session of the Ways and Means Committees of the state legislature.

As to my schedule, a typical day might involve the following:

9:30 Visit in office with Convocation speaker and members of Convocation committee.

10:30 Attend and preside at Convocation in auditorium.

11:30 Confer in office with student who scheduled an appointment to discuss personal financial problem.

12:00 Attend monthly Agricultural Experiment Station luncheon.

1:30 Meet in Conference Room with faculty committee planning a new educational program.

3:00 Meet in conference room with student-faculty committee and architect to make plans for construction of International Center.

4:00 Meet in office with Vice-President for Business Affairs to review minutes for forthcoming Regents' meeting.

5:45 Have dinner with students in Boyd Hall to be followed by a "rap session" in lounge.

But what do you really do all day?

We see them working in paneled offices. We watch them preside over meetings. And every once in a while, we catch a glimpse of them in their dark suits walking on campus.

But what do administrators really do all day? They look harried and rushed and quite important, but what are they actually doing?

We didn't know. And as a result, for this year's administrator section we asked 22 of K-State's administrators just what they do all day. Here are their answers.

1 Daniel Beatty: Vice-President for Business Affairs

My typical day would begin by reading the *Collegian*. Next, I may confer with the other vice-presidents on matters of mutual concern. Following that, I may meet with the President to discuss fiscal matters.

Then I review the day's mail, answer correspondence and meet with members of my staff to discuss policies and problems.

Following these conferences, I meet with other individuals from on or off the campus who have scheduled appointments.

After lunch, I may attend meetings of the Administra-

tive Council, University Consultative Committee, Long-Range Planning Committee or Housing Council.

Following afternoon meetings, I sign letters, documents or official contracts; then, I review fiscal reports, return telephone calls or work on special projects.

Once each month, I accompany the president to the Board of Regents meeting, and I also attend a monthly meeting of the Council of Business Officers.

When necessary, I confer with other state officials regarding budget, purchasing, accounting or personnel problems.

2 Glenn Beck: Vice-President for Agriculture

Administrative responsibilities of the Vice-President for Agriculture include a wide variety of activities not related to academic instruction.

At least one-third of my time is devoted to off-campus travel, including numerous speaking engagements and meetings.

The planning and administration of the county and area extension programs and the off-campus agricultural research stations requires considerable time.

Because of the sporadic travel schedule and the variety of activities that require my attention on-campus, it is difficult to describe a typical day. Actually no two days are alike.

Perhaps a day selected at random will serve to illustrate the nature of my activities. This date in late September included the following:

8:00 Office work — handling correspondence and administrative papers, responding to telephone calls, etc.

9:30 Appointment with the Executive Secretary of the KSU Research Foundation to discuss a problem relative to patent development on an agricultural research discovery.

10:00 Appointment with the chairman of the faculty consultative committee on Rural Development to plan future activities of that committee.

11:00 Met with representatives of the State Fair Board to assist in planning next year's fair activities — meeting continued through lunch.

1:30 Appointment with the Manager of the Kansas Center for Regional Progress to discuss its role in the state rural development program.

2:30 Met with representatives of KSU faculty and the Dillon Grocery Stores to discuss possible food shortages. Initiated preliminary plans for a research project supported by Dillons.

4:30 Office work.

3 John Chalmers: Vice-President for Academic Affairs

A typical day as Vice-President for Academic Affairs involves conferences with the president, other vice-presidents, deans, faculty members and students on a whole range of problems on the academic program of the University.

A high priority concern of this office is decision-making related to maintaining and improving the quality of the academic experience of students. This means providing deans and faculty members with resources for the improvement of programs and supporting the academic freedom of faculty members to pursue the truth wherever it may lead.

It means providing for the development of adequate University-wide services for the enrichment of the academic program such as the library and the computing center and trying to make resources available to support the research efforts of the faculty, so they not only can make a contribution to the new knowledge, but remain intellectually exciting and stimulating teachers.

The people who come to my office to share in the various committee meetings and conferences are concerned with one or another of the above-mentioned responsibilities.

A student senator may be in to discuss procedures to be followed to initiate a change in credit-no credit options for students.

A faculty committee reviewing criteria for merit salary increases may ask me to meet and discuss present criteria.

A *Collegian* reporter might make an appointment to discuss the development of the computing center and its current need for a next-generation computer.

Or, the University Attorney may want to discuss the tenure problem of a faculty member.

The intellectual and academic climate at K-State is important to everything the University does.

To nurture and protect such an environment is the central purpose of this office.

But what do you really do all day?

1 Chester Peters: Vice-President for Student Affairs

My day to day activity falls into people categories — relationships with campus administrators, students, faculty, department heads and staff in the eight departments of Student Services.

Considerable time is spent in individual counsel with students, primarily student leaders in student government, residence halls, fraternities, sororities and other organized groups, or with students who have serious problems that are not easily solved.

Time is also spent responding to requests from other colleges and universities concerning policies and procedures relating to student activities and educational programs at this University and in professional consultations.

Since I am privileged to serve as chairman of the Council on Student Affairs and Housing Council, as a member of Finance Committee of SGA, Athletic Council, Recreational Services Council and ex-officio on a number

of other student and student services related committees, much of my time is spent in committee activity.

Membership on the Consultative Committee and Administrative Council, plus daily contact with the president and vice-presidents assist in the resolution of problems. Work with the student government and making numerous presentations demand much evening activity.

Another major function is the allocation of resources through the preparation of budgets in consultation with department heads and staff.

My physical fitness program takes thirty minutes daily at noon, but is helpful in keeping up with some of the demanding problems which accrue to the vice-president for student affairs.

At least three times a week I spend time in the residence halls meeting with students and staff to keep communication lines open and be sensitive to their concerns.

2 Paul Young: Vice-President for University Development

My duties as Vice-President for University Development include responsibility for the maintenance and operation of the physical facilities of the University and for planning facilities required by the existing and projected programs of the University.

My daily routine begins with a Calculus I class. During the day, I have frequent conferences with the Director of the Physical Plant concerning operational problems, and with the Assistant Vice-President for Planning concerning projects in the planning stage.

In connection with these conferences, there are many others with other administrators concerned with either general or specific aspects of facilities operation or

planning.

I also attend committee meetings during the course of a week. Recently, a series of such meetings was concerned with planning for the International Student Center. Another series was concerned with the solution to traffic and parking problems.

Since physical planning must reflect general University planning, there is a close liaison with all segments of the University. This brings me in contact with persons all over campus.

For example, hardly a day goes by without a conference with students as individuals, as committee members or as *Collegian* reporters.

3 Max Milbourn: Assistant to the President

8:30 Long distance call from alumnus regarding tutor for student. Checked with Dean Ebberts.

8:35 Wichita bank executive called about Buckley lecture. Checked with Dr. Hajda.

8:45 Discussed area legislative meetings with Board of Regents Office.

9:00 Discussed approach, reaction with Dean Trotter on veterinary legislative request.

9:15 Leigh Kimball, *Collegian* reporter, in.

9:45 Met with President McCain.

10:10 Reviewed executive committee proposals with board office for upcoming KACI Education Council meeting.

10:15 Double-checked administrative council agenda with president, discussed enrollment reporting policy with Dean Gerritz and the president.

11:00 Discussed endowment foundation proposal with Professor Thorson.

11:15 Checked key state press reaction to president's talk yesterday.

12:00 Lunch, Rotary. Three KSU student Rotary Foundation Fellows on program.

1:30 Senator Saar, Pittsburg, called about forestry project.

1:35 Okayed next general scholarship committee meeting agenda with Mr. Bergen, discussed with H. Dean Hess suggested sub-committee hearing procedure.

1:50 Met again with president.

2:00 Mr. Heywood called on endowment loan matter.

2:30 Administrative Council meeting. Discussions with new Faculty Senate president, Leonard Fuller, and SGA president, Joe Knopp.

3:45 Session with Vice-President Beatty.

4:05 Call from governor's office.

4:20 Checked with Vice-President Young on proposed construction related to endowment loan.

4:30 Met with Dr. Thomas.

4:40 Prepared Administrative Council minutes; also a letter for president's signature on administrative council action.

But what do you really do all day?

But what do you really do all day?

1 Bernd Foerster: Dean, College of Architecture

Meet with a faculty member. Write a memo. Teach a large class. Talk with students. Sign paperwork. Attend a committee meeting. Answer mail. Meet with a student. Take a phone call. See someone in the central administration. Respond to a questionnaire. Hear a complaint. Be in touch with someone outside the University. Look at the budget. Recover.

Meet a parent. Have lunch in the union. Listen to someone's personal problems. Refuse to answer a questionnaire. Have a student visit. Hear a compliment. Call long distance. Interview a prospective faculty member. Get an employer's request for a graduate from one of the

programs.

Fill out a form. Make notes for a newsletter to alumni. Seek a way to let a faculty member make an important trip. Sign some paper work. Have a meeting with department heads. Walk home and think. Eat dinner with the family. Skim the newspaper. Recover.

Write minutes of a meeting. Watch television. Read. Postpone academic planning and class preparation until the weekend.

The challenges differ. There are no typical days. It isn't so much what you do that matters, but the decisions you make.

2 Ellsworth Gerritz: Dean, Admissions And Records

The total assignment of the position of Dean of Admissions and Records involves admission of students to undergraduate programs of the University and keeping academic records for all students.

It begins with the preparation of materials to interest students in K-State and closes with their graduation and the provision of transcripts of their records throughout their lifetime. It includes the supervision of a staff of 25 plus some student help.

Early advisement and registration are the two activities of our office most visible to students.

Normally I arrive at the office at 7:45 a.m. In the morning I dictate letters and usually see two or three students. I can expect to see about five to seven students a day who drop in with a variety of problems.

Committee assignments and meetings with colleagues will be scheduled three or four times a week. These involve academic affairs, students scheduling, the calendar, graduation exercises, residency, the catalogs and public relations.

Planning activities, evaluation and re-evaluation of our efforts, relaying suggestions to appropriate individuals and committees are important facets of our work. Out of Manhattan engagements occur five or six times a year.

Rarely do I schedule luncheon meetings as I like to walk home for lunch. The walk four times a day helps keep me physically well.

I'm usually at the office until 5:00 each day and return for some work about one evening per week.

3 Carroll Hess: Dean, College of Agriculture

My typical day begins with a brief session with my secretary to establish the priority of items requiring my attention for the morning. This could involve urgent correspondence, returning phone calls or handling emergency matters within the college.

Following this, a check is made with the assistant deans regarding matters which they deem urgent for the day. Occasionally, there will be faculty members, department heads or students who are asking for an early appointment.

The remainder of the day is normally spent in the following ways.

Since the dean's office has an open-door policy, we can expect students, faculty, parents or other visitors to come in at any time. The dean's office works very closely in a supporting and counseling way with the Agricultural Student Council. Therefore, it's not unusual for several students from the council to call regarding activities such as the Ag Fall Careers Day, Ag Science Day, Awards and

Recognition Assembly, Faculty-Student of the Month, Student Committee on Effective Instruction or Ag Ambassadors.

A typical day may also include contacts with Kansas community colleges offering agricultural courses. The College staff attempts to keep abreast of happenings and plans in other colleges of agriculture through conferences and other contacts. The day often includes visits with former students or off-campus people representing agribusinesses and agricultural agencies in the State.

My typical day involves considerable variety. This is hardly the job for a person who is uncomfortable with diversity, surprises and problems.

However, with the excellent support of two capable, aggressive and imaginative assistant deans, as well as a very pleasant and efficient office staff, the demands of the College of Agriculture Dean's College are usually met in a prompt and efficient manner.

But what do you really do all day?

1 Doretta Hoffman: Dean, College of Home Economics

"Long Distance calling for Dean Hoffman. Dr. E. G., Dean, College of Home Economics at_____."

She wants my ideas on top priority items for home economics research in the Experiment Stations for the budget year 1975-76 . . .

"Four new foot pedals are needed for the laboratory sewing machines — one has a short and three have disappeared: they are needed for the lab sessions tomorrow afternoon and the teacher is worried. The head of the department is attending a meeting in Washington, D.C., and the regular machine repairman is in the hospital." Arrangements are made to get the equipment in order.

"Sally R., a senior, would like to schedule an appointment to discuss graduate school . . ."

"Nancy B. is waiting to interview you for an article in the alumni magazine. When can you see her?"

"A graduate student from South America wants to know why her first fellowship check hasn't arrived from Washington. She needs the money."

"Mr. T. from_____is here to discuss copying machines."

"Ms. W., faculty member, wants to discuss a change in plans for field experience for a student." We agree on the decision made.

Each day is different and stimulating. Faculty and students have many questions . . . and more questions . . . and the phone rings constantly. Time melts away.

I meet many talented people.

I have to make split-second decisions, sometimes pleasant and other times unpleasant.

No day goes as planned . . . and that adds zest and excitement to my work.

2 Samuel Keys: Dean, College of Education

A typical "office day" for me consists mainly of a series of meetings with University-wide committees, faculty members and students. Approximately 80 percent of my day is spent in this manner with the remaining time being spent with routine office paperwork.

A great deal of my time is spent in the field working with state-wide organizations for education and with public schools. If we are to keep our programs in education meaningful for the graduates we produce, the teachers and the administrators we have in in-service education, we must be aware of the changing scene in public

education. Kansas is a rural state with several urban areas, which complicates the problem significantly. On the average, about two days per week are spent outside the office working with the various agencies for the improvement of educational programs in Kansas.

Since administrators of our University are also members of the graduate faculty of the University, I try to spend approximately one-half day per week with instructional activities. This includes preparation, study and review, and evaluational work in regard to the course.

There are no "typical days" in my deaning.

3 Robert Kruh: College of Education

With graduate faculty members and graduate students in every department, the Graduate School promotes the University's instructional and research programs at the most advanced levels. Any given day in the Graduate Office is likely to include a wide variety of activities and is not easily typified.

The Graduate School's work involves all graduate students, and many stop by the office to change a course or file the final copies of their theses. Those who make more than a routine visit usually have a problem, whether a need for financial support, difficulty in a program of study, or, regrettably, lagging academic progress. Frequently, faculty advisors discuss the background of the student's problem and assist in a solution.

Another responsibility of the Graduate Office in-

volves the research activities of the faculty. Once again, informal conferences take place, and the problem might be to arrange for visits to federal or other outside agencies to obtain University support for exploratory work on a new research idea or to initiate legal processes to patent a discovery or invention.

The pattern of these continuing activities is broken where there is occasion to welcome members of a professional group meeting on campus, confer with KU staff on cooperative graduate programs, teach a class in x-ray analysis or discuss a departmental program with members of an accrediting team.

The work of the Graduate School deals primarily with people, which makes it a sometimes difficult but always a fascinating and rewarding place to be.

But what do you really do all day?

1 Robert Lynn: Dean, College of Business Administration

My days are mainly involved with paperwork and people. I start with a review of incomplete projects, and try to get these progressing.

The mail each day brings what seems an increasing volume of material from both on and off campus which demands attention in the form of replies and projects. Some of these can be taken care of quickly; others become long-term items.

Meetings are scheduled most days. These are typically with administrative groups in the college or University-wide, faculty groups in the college and students. We discuss curriculum, faculty recruiting, research, course

scheduling and a variety of other topics.

Even more important in many ways than scheduled meetings are the non-scheduled meetings with students and faculty members that take place many times each day. These could be in my office, the halls or elsewhere.

My most usual lunch pattern is to walk to town and eat an apple or milk and cookies in City Park. This is a time to relax and do some thinking.

Most of the activities seem minor in themselves. Sandwiched in come the more basic considerations such as budgets and major personnel questions.

2 Margaret Nordin: Acting Dean of Students

People, meetings, paperwork — these make a typical day in the Center for Student Development plus, hopefully, some time for thinking and planning.

This day started with a short conference with Vice-President Peters regarding committee appointments and some student concerns.

Then, back at Holtz Hall there was the morning mail, writing a letter of recommendation for a student, having a conference with a house president regarding new members and making a final check regarding reservations for a weekend conference for the Kansas Student Personnel Association.

Toward the end of the morning I stopped at Fairchild Hall to see the Learning Skills Center and to chat with the Foreign Student Advisor. Then back to Holtz to meet with a graduate student who is to do a practicum in the Center for Student Development.

Lunch was at the Union today with the ad hoc group for Women's Concerns.

During the afternoon, I worked with a staff member

on tentative plans for reallocation of space for the Cultural and Minority Unit. After talking with several students, accepting an invitation to a residence hall for dinner next week (not to give a talk this time, just to get acquainted), I had a telephone call from a father whose son is ill and thinking of dropping out of school.

After starting action on this problem, I signed about a dozen letters and personnel papers. On my way out for dinner, I stopped to say hi to the students in the U.L.N. Office.

There was just enough time to prepare a meal for John, my husband, before he returned from tennis after his day of teaching and research. It was good to relax over the meal and catch up on family matters.

Student Senate met that evening. After that, some moments to mull over the question — how can the Center for Student Development do a more efficient job in helping students know themselves better and develop to the utmost their potential while at K-State.

3 Donald Rathbone: Dean, College of Engineering

There is no such thing as an "average day" in the dean of engineering office. It is something like Kansas weather; averages don't mean much.

One day may involve primarily meetings and conferences; one day may be spent with associates on matters of undergraduate programs or budget or space allocation or research activities; one day may be spent on alumni matters; I may be preparing a talk; or I may go out-of-town to a conference. Often visitors on campus, be they company representatives, returning alumni or fellow educators, stop by to get acquainted or re-acquainted. Thus, there is truly no average day.

If one were to classify the activities of a dean of engineering, they would include (1) individual conferences with the students and faculty on both personal, University

and professional matters; (2) many committee meetings within the college and some campus committees or council meetings; (3) discussions with other administrators regarding policies and problems; (4) development of long-range plans in all areas — an attempt to be an idea man; (5) preparation and delivery of speeches; (6) routine paper work; (7) attendance at conferences and seminars; (8) money-raising projects and (9) those cherished personal activities such as reading of professional journals and research work. Time for the latter items is at a premium.

A dean of engineering also does a certain amount of socializing related to the job and often has lunch or dinner at one of the local restaurants with other professional people.

But what do you really do all day?

1 William Stamey: Dean, College of Arts And Sciences

Although no day is typical, there is a semblance of a pattern.

I teach one class at 8:30, a scheduling that minimizes the conflict between teaching and administrative responsibilities. Much of the rest of the day is devoted to talking with people — students, faculty, or administrators — in person or by telephone about a variety of matters. These conversations range from curriculum changes, research proposals, individual student problems, employee grievances, space for offices and laboratories to many others.

They help me to obtain information to aid in decision-making or to provide information to someone else.

Inbetween conferences and committee meetings I read and reply to correspondence. Occasionally I attend out-of-town meetings around the state, particularly of alumni groups and other friends of the University.

One of the characteristics of the position that makes it interesting is that each day has an expectation of a general pattern, but no assurance of a completely typical situation.

2 Donald Trotter: Dean, College of Veterinary Medicine

My days are more variable than one may think and yet at the same time very similar. The chief variations are between days spent in the office and on campus and those occasional days spent off-campus on college business.

The vast majority of the days are in the office and consist of a series of appointments, telephone calls, impromptu business sessions, committee and/or council meetings, preparing business documents, writing letters, seeing students and faculty for a myriad of greater or lesser problems, interviewing prospective faculty or staff, hosting visiting counterparts from other colleges, having lunch with interviewees or college guests, participating in evening banquets, planning ways of getting new facilities

built or programs begun and occasionally being involved in unexpected emergency problems.

Off-campus activities on behalf of the college include visits to practitioners and alumni throughout the state and contacts with livestock people, legislators, high schools, colleges and junior colleges. Some trips are for professional meetings to give testimony to congressional and state legislative committees or visits to funding or granting agencies to find support for college development.

An occasional visit to the veterinary medical college in Nigeria, Africa, which the K-State College of Veterinary Medicine sponsors, is an interesting off-campus venture.

3 Thornton Edwards: Director, Housing And Food Service

Being the director of a \$5 million annual operation is thrilling, sobering and exasperating; yet it is an interesting and enjoyable experience. The daily schedule of an administrator in this type of an operation is so varied that to describe it would take volumes of space.

Much time is spent in committee meetings with other administrators, staff, faculty and students. Much time is spent in signing orders, payroll documents, purchase requests, and many required state forms. Giving and taking information by telephone consumes hours of time.

I usually arrive at the office before 8:00 a.m. and seldom leave before 5:00 p.m. At rush times we keep the office open on Saturday and sometimes even on Sunday. Large amounts of time are spent revising and changing brochures, contracts and informative literature. Making budgets, recommending purchases, and interpreting monthly statements consume a considerable part of each day's time.

Interspersed with all of this are many individual conferences with students.

1 G. Jay Rausch: Director, Libraries

Like many other administrators, the Director of Libraries spends a large portion of his time performing a somewhat delicate balancing act.

I regard it as my duty to balance the Library's available resources in such a way as to give a fair break to: first, the varying disciplines within the University; second, the undergraduates and the graduate students; and third, the various categories of library personnel.

Finally, I must balance the interests and requirements of the students, faculty, and the library staff in such a way as to bring the greatest benefit to all of these groups.

On an average day, I spend two hours in group meet-

ings, and another two hours are spent talking individually to faculty members and students who come to my office. Another half-hour is spent dealing with problems of individual members of the library staff.

The rest of my day is spent acquiring information to answer requests or questions that have come out of group and individual meetings, and in writing letters, memoranda and reports.

Although my luncheon schedule is somewhat erratic, for the most part, lunch comes from a brown bag in the office.

2 Robert Sinclair: Director, Student Health Center

My daily activities cover administrative, clinical medicine and educational functions. There are rapid shifts from base to base, and each day brings me into contact with a wide spectrum of campus life. This variety makes for a stimulating and challenging day.

A typical fall day may encompass the following activities:

The day begins at 8 a.m. with a consultation with my boss, Vice-President Chester Peters, about some basic fiscal or philosophical subjects — this is followed by a report by my Chief of Medical Services as to the unusual medical problems of the past 24 hours, both from the clinic and hospital area — then I see several patients — a phone call from an academic department requesting a class lecture

next week — a visit from a student who has a request for additional services at the center — an interview with a *Collegian* reporter — then lunch with the Medical Staff where a scientific paper is presented — several more patients — a phone call from a group wishing a permit to serve food at a campus function — a talk with the Administrative Officer about a personnel hiring problem — a call from downtown requesting I talk at a meeting — a discussion with one of the other physicians about an interesting case — a meeting of the Radiation Safety Committee — 4:30 and off to the football stadium to assume my duties as team physician and then home to supper at 7:30 p.m. — some research for an interview to be taped tomorrow for radio — and to bed.

3 Walt Smith: Director, K-State Union

As the director of the K-State Union, I am directly responsible for the total Union operation. This responsibility ranges from Programming to Food Service.

Eight departments in all are located within the building: Food Service, Bookstore, Program, Recreation, Concessions, Information Desk, Business Office and Maintenance. All must work as one unit to provide the facilities, services and programs needed in daily living on the campus.

Cultural, social, and recreational programs offered by the K-State Union are aimed at creating new dimensions in the co-curricular lives of students, staff, faculty, alumni and guests.

The director must devote time to the administration

and management functions such as the physical operation of the building, staff supervision and development, fiscal planning, budgeting, building maintenance, campus and community relations and to the day to day business operation.

Much of this is accomplished through individual or group meetings. Individual meetings involve the Union staff, vice-presidents, University Comptroller, or a student, staff member, faculty member, or an employee.

The group meetings involve daily staff meetings, Union Governing Board, Union Program Council, various other student groups and university committees.

The director is involved in something new and different each day. This is what makes my job so challenging.

But what do you really do all day?

All-nighters test stamina

By Scott Kraft

1:30 a.m. In the cubicle-sized room a lone lamp casts haunting shapes on a bare wall.

With a cup of black coffee in hand a young man ponders a swollen textbook. A stacatto strain of Beethoven's Fifth comes from the tape player on his left.

A closer look tells me that my roommate is completely attentive to the forms before his eyes. He is gnashing a piece of gum which results in a barely discernable in-and-out movement of his cheeks.

His hand steadily holds the end of a pen to his mouth as a smile of comprehension appears on his face. He didn't hear me enter, so realizing the nature of his preoccupation, I quietly exit.

3:30 a.m. As I enter the cubicle, I am gagged by the hot, moist smell of the two-man room.

A half-empty bottle of Canadian Rum is in the same worker's hand. College-ruled papers with ragged edges are scattered across his desk, and the tape player shudders as if being punished by the Deep Purple recording it is boasting.

My roommate rubs his eyelids with the heel of his hand.

"What do you want?" "I've got work to do, all right?" With that curt remark he spins back around to his desk and picks up his pen which is chewed paintless at one end.

I exit wordlessly.

7:20 a.m. "Good luck" I yell as I see my roommate begin the brisk journey to class.

Deaf to my wish, he numbly holds his head against the cold, early morning wind. His left sock is missing and he is wearing a pair of beltless blue-jeans.

Despite the frosty temperature, my roommate is holding his jacket in his hand while his dirty T-shirt, bearing the imprint "Schlitz," flops at his back.

Slipping back into the warm atmosphere, I ponder his misfortune. I don't pity him — it will be my turn soon.

Students serve as guinea pigs

By John Lonergan

In the basement of Fairchild Hall a pigeon in a box pecks through an opening at a green light. The light goes off, gears turn and a pellet of food drops into the box.

In the next room a mechanical counter clicks. A graduate student looks up from his novel and writes another number.

A sizeable lecture class fills in a questionnaire handed out to them at the beginning of the period. Most students are reading and answering the questions intently. A few are secretly rejoicing that class won't start for another ten minutes.

In a small room in Anderson Hall a student reads a description of an imaginary Harry A. and tries to evaluate him as a person. One coed is trying to memorize a list of non-sense syllables. Still another is recording her reactions to a number of color photos.

These are some of the events which occur under the direction of the experiment and research branch of the psychology department at K-State. Each semester various concepts in decision making, interpersonal attraction, perception, animal behavior, personality and verbal learning are tested by faculty and graduate students.

Most of the subjects are General Psychology students who gladly accept their teacher's bribes to volunteer — with participation counting toward extra credit in their classes. In any given semester approximately half of the students enrolled in PSYCH 273 110 allow themselves to be so persuaded.

The test animals — rats, pigeons and cats — are acquired in coordination with the veterinary school or are ordered through commercial suppliers. And when the need arises, Manhattan residents are sought.

The majority of the experiments run are very straightforward — a form to fill out, impressions or opinions to be rendered. Some are more elaborate, such as a reaction-testing tracking device which very much resembles a popular computerized bar game. A few students take to these utterly harmless, sometimes

interesting, diversions and volunteer often.

Occasionally, however, telling a subject what the researcher wants causes the experiment to lose its effect. For these tests, a little causal deception is needed to eliminate experimental bias. Thus, freshmen students, who generally are the ones taking introductory psychology, turn out to be ideal subjects. More adaptable to the test situations imposed upon them, and generally less suspicious, these undergraduates are somewhat more statistically reliable.

One might wonder if experimental results are valid when obtained under a scientifically manipulated environment. But the atmosphere is not so much manipulated as it is controlled — input, stimulus, reinforcement and, at times, response. In this way the psychologist attempts to rid his tests of unwanted variables to extract the important events in pure form. He then tries to relate his findings to the more complex real world.

Following almost all types of experiments, a debriefing session is held so subjects can gain a better understanding of what they have just gone through. Yet, for the most part students are very willing to come in and serve as subjects — and often just as willing to leave and forget the whole thing.

Psychologists observe and record events in simulated real life situations. But, in a sense, these experiments employ the same basic principles that govern everyday human behavior — stimulus, response, reinforcement. In reality we are all guinea pigging our neighbors — testing, evaluating, collecting data — throughout our lives.

In the Union a guy walks up to a girl, makes a few preliminary observations and selects one of a number of standard opening lines:

Guy: "Pardon me, but don't I know you from somewhere?"

Girl: "Perhaps. Are you from Kansas City?"

The green light goes off, gears turn and a pellet of food drops into the box.

Rigid requirements and fierce competition force many a pre-vet student to question whether he's really dedicated to the profession itself or to fond memories of old Rover.

Pre-vet finds time scarce, sacrifices great

By David Chartrand

It's a timeless lesson. A test is always fair if you pass it. It's unfair if you do not.

Requirements are legitimate if you meet them. Not so if you don't.

The Trojan demands placed on veterinary and pre-veterinary students at K-State are fast becoming legend — folklore as indigenous to purple and white as "we gonna win" and Don Rose's camaraderie with Student Senate.

And every spring the legend swells as more than 600 pre-vets scrap for 90 (count 'em, 90) chairs in the nation's finest vet school.

So it comes to simple economics. The demand (for admissions) is great, the supply is low.

Two years to complete 64 hours of chemistry, genetics, physics, trigonometry and more — all the while holding a B average — means the sacrifices are many and great.

Too great, say some — especially those who get turned away.

But the most oft-heard assessment is that the two-year pre-vet stint is too short.

The material is too complex, too difficult to be knocked off in a paltry four semesters, they charge.

The neophyte vet student feels ill-equipped when he walks through the vet school doors or feels he has done nothing but book it for the first two years of college at the expense of some other valuable experiences.

And then there's the physical strain, too.

As one pre-vet student put it, "There are other things I want to do besides study all the time — like eat and sleep. So I wasn't that let down when they gave me the ax. I want to get in a few other important things."

Still, those who do make the green coat set in two years find their problems have just begun.

"There are older people you're

competing with in there who have degrees in subjects you're still learning," one vet school novice said.

"I've always been an A student and right on top, but in there I'm low man on the totem pole. It's really hard to adjust."

But are the vet school requirements really incredible? Is the admissions gauntlet designed to crunch students and make it hard just for the sake of harshness?

The word from the students is No.

"They (the vet school) — want the best possible class," one said. "It's an important, difficult profession; you have to take it seriously. You know they're only going to take 90, and there are plenty of others a lot better than you. It's an uphill battle."

The core problem described by many inside and outside the vet school is a cloud of mystery that surrounds what is really required and needed to gain admission.

This cloud, they claim, is created partly by student negligence and partly by an inept faculty advisory system.

Hearsay runs rampant among the pre-vets. Rumors abound as to who the selection board likes and who they don't like, how many connections it takes to sway the board, what the admissions interview is like and what vet school itself is like.

"The students never take the time to go to the college itself and get their information and advice straight from the horse's mouth," one veteran vet stated.

He also had only disdain for the pre-vet advisers.

"Those advisers don't know what they're doing," he said. "They're not in communication with the vet school. All they do is read to

you what the catalog says you're supposed to take. But that's all they can do. They can't help you."

Too few persons understand what they are doing when they decide on pre-vet, say those who have been through it.

The result is a crushing, discouraging feeling when that rejection letter comes.

"But that's wrong," one vet said. "You're not a failure just because you didn't get in. That's not it. It doesn't mean you're dumb. There's way too much emphasis placed on just getting into vet school — as an end in itself."

Attitude is very important, and this seems to be a crucial, though abstract factor in who makes it and who does not.

The pre-vet has to have a sincere and professional attitude toward his or her role as a veterinarian, the vets say. And the admissions board evidently tries to test that attitude.

"Some kids just had a pet dog or cat they loved one time and decided to be a vet to help animals," one student analyzed.

"But they don't know the field, what it's about or the role of vet medicine in society."

So the judgment, on the students' part, is that getting into vet school *has* to be tough.

"They can't afford to take chances on admitting students who have the wrong attitude or preparation and then drop out after one year," one vet said.

Nor can the students afford to have the wrong attitude either.

For struggling two, three and four years, hundreds of dollars and countless sacrifices only to find one has taken the wrong path is a steep price indeed.

If you had a crystal ball and a few free moments for gazing, what would the future hold for K-State? Televised lectures via a central plug-in video bank? Coed gym classes conducted in the nude? Here are a few predictions combined with a short jaunt into the past.

Purple pride land in 2,001: speculations on K-State's future

By Jan Paschal

What will you expect to see when you come marching back in your Purple Pride alumni suit 10, 20 or even 30 years from now?

The old stadium enclosed by a plastic bubble and converted into a huge lecture hall? Boys rooming with girls in University housing? Students in pollution masks tuning into lectures via two-way transistors?

Former K-Staters watched the fulfillment of the 1914 *Royal Purple's* prophecy stating that the college would become "the great laboratory, experimental and demonstration center of Kansas farm life." Later generations witnessed the 1940's dream "Campus of Tomorrow" materialize with the construction of a new K-State Student Union, Ahearn Field House, and more classroom buildings to accommodate a 30-year growth in enrollment from 4,000 students to 15,000.

Now that the World War II baby crop has completed its long journey through college, and a declining birth rate is predicted by Zero Population Growth, universities in the future will no longer have to plan ahead to cope with uncontrolled numbers of students.

Rather, the emphasis will shift from upping the quantity to improving the quality of the college experience, according to John Chalmers, vice-president for academic affairs.

"We'll be more involved in in-

dependent learning. We will be giving credit for competency in all kinds of things," Chalmers said.

What the student knows will become the important question, rather than how many classes he has attended, Chalmers explained.

Lectures probably will be televised during the 1980s. A student will be able to attend class, via TV in the dorm by dialing a lecture on video tape from a central plug-in bank maintained by the University.

Picture yourself or your progeny taking notes on general psych or Chem I in his room rather than trekking over to Cardwell or Eisenhower to get the same information.

What about those mainstays of Wildcat living — dating and drinking in Aggieville? Will they go the way of "four o'clock fag lines" and panty raids?

Social researchers predict universities across the nation will assign coed roommates within the next 20 years in order to eliminate artificial sexual attitudes from our society. Coed gym classes may be conducted in the nude at some liberal schools.

Though the timid teenagers of the 50s could scarcely imagine the impact of coed living groups and 24-hour visitation upon the 1970s social scene, some seers of our generation may wish they could take a second option at college in the years ahead.

Three departments different in architecture, style, attitude

Taking a look at just three of the departments at K-State can be an enlightening experience.

As I gaze down a corridor of Seaton Hall, the antiquity of the smooth floors is balanced by the colorful wooden clouds that protrude from the walls. But, one particular door does not bear any resemblance to the others in the college.

Closer inspection reveals the door has been put together by many pieces of wood carvings resembling branches, leaves and bark. Above the door are the words "Design Studio." I conclude I'm in the College of Architecture and Design, evidenced by a long bulletin board fastened next to a wall made not of cement, but of glass.

Using a window for a wall is a unique and curious feature of this department. The wall allows passersby to see a receptionist and a secretary as they work. Although I wouldn't go out of my way to come to Seaton and stare at two workers from outside a glass wall, it provides a kind of comic relief on a dreary day.

Doors open and predominantly male voices can be heard as the bell marks the end of another class period. I leave with the other departing students.

Gazing down a hallway at the location of my second stop, I am forced to squint as sunlight through a window reflects off the sanded hickory floors.

Like a time machine I am transformed from the modern tile floors and freshly painted walls of the second floor of Kedzie Hall to the creaky floors and dingy walls of another department.

"Political Science" are the words printed above a bulletin board cluttered with applications, order forms and job opportunity notices.

As I try to wander through this department I notice it is constructed like a maze. Long hallways with right-angle turns end at office doors that leave no escape for the unwary

student.

One receptionist seems crowded into the corner of a hallway, perhaps where an old pop machine used to be. She smiles sympathetically as if she can see my bewilderment. Being afraid she might burst into laughter should I ask directions, I hurry away from the corner.

Eventually, I am forced to conclude I am hopelessly lost in the maze. As I prepare to bang on the walls for help, I can hear behind me the grateful sound of a buzzing class bell, and I follow other students out of the maze.

As I catch sight of the clear tile of Kedzie's new section, my nostrils take in the full implication of printer's ink in the air. Paradoxically, I find that mixing printer's ink and political science does not produce as bad an odor as some politicians would have us believe.

I hurry to my next appointment.

What appears to be a living room arouses my curiosity as I enter the last building of my journey. Finding a glass-covered black felt case with white plastic letters in the lobby I look to the title, "Foods and Nutrition."

As I begin my search of this department, my attention is diverted by quilts, patchwork, paintings and store-like window displays adorning the modern building.

The office door of Foods and Nutrition is open so I saunter in.

A familiar door bell sound breaks by concentration. "What's that," I ask the lady at the desk.

"It's the passing period bell," she answers with a look of amusement that must have been shared by the installer of the gadget.

After the door bell sound, voices can be heard from all sections of the floor. I seek refuge at the nearest drinking fountain as the mob of students dismissed from classes rushes by.

As the halls clear, I quietly slip outside pondering the differences between structures which claim to be part of the same campus.

Sports

Sports: a retreat to absolutism

By Michael Szeremet

Sports occupy a unique position on the American landscape. Mammoth stadiums and arenas cast shadows over our lives. These are the structures where Americans come to play — or at least to watch others play.

With their clearly defined rules, sports provide a refreshing escape from the Kafkaesque world of ambiguous workday values. They allow us to escape from that nebulous world into another dimension where black-and-white-jerseyed referees make binding decisions.

Sports have been compared to the game of life to the point where the remark is a boring cliché. But through sports, we see in clearly marked contrasts the values we espouse and act out everyday.

In football, for example, it is easy to observe success-failure, winning-losing and promotion-demotion on the white, chalk-lined gridiron. In our daily lives, it is unlikely that we will ever see these values so clearly manifested in so short a time.

Many spectators religiously flock to sporting events to fulfill a need for experiencing absolute order. It can be comforting to sit back and direct our attentions to the ref-

erees who apply those rules that give sports that order.

And although the athlete, coach and spectator may do a lot of “if-ing” and Monday morning quarterbacking after the contest, when the game is over, we know who won, who scored the most and the least number of points, and who played the better game.

In sports, the overcast shades of gray evaporate into distinguishable patterns of high contrast.

The grand slam homer scores four runs. A field goal in football is worth three points. A jump shot that swishes through the basketball net is worth two points. A “try” in rugby is worth four points. A pole-vaulter clears the bar at 14 feet 6 inches. A golfer sinks a ten-foot putt for a three-stroke lead in a tournament. And, a tennis player returns his opponent’s serve deep into the backcourt to take a 30-15 lead.

After a sports event we return to the “real” world where we are faced with weighing a number of possibilities before arriving at an arbitrary decision. Somewhere on a black-white continuum in the gray shaded area lies the nature of that decision.

Probation lifted; Cats try again

The Wildcats have had the brick and mortar of a football dynasty for about the last three years: an athletic dorm, astroturf, a 42,000-seat stadium and a building that houses a white-collared football bureaucracy.

But, the Cats have failed to add to that material dynasty with a flesh and blood football power. Last year's Cats plummeted to an abysmal 3-8 record.

For many fans, the props of gridiron glory had only served as fanciful distractions underlying a failing team. Football enthusiasts had begun to realize that purple pride goeth before the fall.

In between sips of lemonade, later summer conversation centered on the Kansas City Royals chances of winning the American League West. There was little discussion of Cat tales for the fall.

Even Head Coach Vince Gibson, who had made a travesty of predicting boom years for the squad, was avoiding boasts of a Wildcat renaissance.

There were some changes for the 1973 version of the Cat. In a rush of purple pride enthusiasm, the Wildcats had been slapped with three years of probation for recruiting violations. This year the ban was lifted.

Gibson was starting his seventh year itch with K-State. He unveiled a new offensive system to open up the Cats running game — the Houston Veer T. An array of new coaching assistants was brought into the Wildcat lair.

This year fans were waiting for more than the paraphernalia of the purple-pride public relations.

K-State whips Tulsa, falls to two Florida teams

The Cats lay low as they travelled to Gainesville to butt helmets with the Florida Gators — a team heralded by *Playboy* to be the new song of the South. However, Florida proved later in the season that Hefner and Company should restrict their activities to finding the playmate of the year.

An intermittently rainy night contributed to an epidemic of fumbles that played a part in Florida's 21-10 victory.

After Keith Brumley's 37-yard field goal put the Cats on the scoreboard, Florida's poised signal caller David Bowden spurned the wet elements to toss three touchdown passes for the Gators. Two K-State fumbles provided the necessary Gator "aid" for two of the Florida touchdowns.

At the outset of the second half, quarterback Steve Grogan piloted the Cats 79 yards in eight plays. On third-and-goal on the one, Isaac Jackson fumbled the slippery ball, and the Gators recovered.

K-State's only touchdown came in the fourth quarter after the Wildcats returned a pass interception to the Florida 14. After being tossed for a 7-yard loss, Grogan circled to his left and sprinted 21-yards to end the Cat scoring drought.

"We played well enough to win, but we just made too many mistakes," Gibson explained.

In the season home-opener, the pesky Cats made amends for the fumble fever that had gripped them in Gainesville. The Tulsa Hurricanes came blowing into town on a twisted myth about a dynamic aerial attack.

The Cats stifled the Tulsa air tactics en route to a strong defensive showing which allowed the Oklahomans entry into K-State territory only twice during the game.

Isaac Jackson had one of his career-best games as he rushed 157 yards and scored two touchdowns. The other Wildcat touchdown came on a 16-yard pass from Ed Johndrow to Henry Childs with 47 seconds remaining in the game.

The following week, the Wildcats returned to the sunshine state to wrangle with the University of Tampa Spartans.

Forty-five minutes prior to game time, security guards scoured the stadium following a telephoned bomb scare.

Despite the pre-game melodrama the Cats mastered the Spartans. Although the Florida team dominated play in the first half, Keith Brumley's 46-yard field goal provided the only scoring until the fourth quarter.

Third team defensive back Mike Wecker skyrocketed to star status in the final stanza when he blocked a Tampa punt and ran five yards for a touchdown.

The 17-0 shutout halted the Tampa winning streak at nine games.

Top center: Sideline faces can be a barometer of team determination. *Top right:* Tulsa player protests referee's touchdown call. *Bottom left:* Steve Grogan attempts a pass to Don Calhoun. *Bottom center:* Vince Gibson instructs quarterback Steve Grogan.

Wildcats erase Memphis lead to win, 21-16

The chance for a third straight shutout for the Wildcats terminated on the first play of the Memphis State game as the Tiger's Dornell Harris ran the ball 74 yards for a touchdown. The Tigers appeared to be burning bright when a field goal gave the visitors a 10-0 lead.

The Cats began to crawl late in the first half when they drove 44 yards to score. K-State was like a Cat on a hot tin roof early in the second half when it exploded for two quick, decisive touchdowns.

The Missouri Valley title aspirants were able to get on the scoreboard once more in the final minutes of the game, but the Wildcats proved that the first to score shall be last as they recorded a 21-16 victory.

"Scoring that touchdown right before the half was the big lift," Gibson said. "In the second half, we started mixing our running game more — running inside, then outside."

Top left: Band member snarls to the beat of a different drum as Jayhawks score their winning touchdown. Top center: Somber crowd focuses on the heated action of cross-state rivals. Top right: Isaac Jackson runs to his left to avoid charging Jayhawks. Bottom left: Dave Chambliss shouts encouragement to teammates. Bottom center: Memphis State tackler tries to pull down K-State's Henry Childs.

Jayhawks play ratings game; K-State falters in last minutes

Fifty-two thousand palpitating hearts beat in unison as the Jayhawks and the Wildcats waited until the waning minutes of the fourth quarter before they finally settled the score.

After a K-State field goal in the first half moved the Cats out front 3-0, the 19th-ranked Jayhawks put together two scoring drives that vaulted them into a 14-3 half-time lead. An early third period Hawk field goal seemed to put the game out of reach for the Wildcats.

But then the Wildcats, fed on the inspiring half time speeches of their coach, sparked some offensive and defensive plays that had the Jayhawks strait-jacketed until the

final two and a half minutes of the game. With 5:22 left in the game, the Cats moved into the lead, 18-17.

The Jayhawks had entered the game with hopes of enhancing their position in the rating game.

The momentum finally swung to the Jayhawks with 2:41 left in the game, when they recovered a Wildcat fumble. Four plays later, quarterback David Jaynes kept the ball on a quarterback sneak to put the Jayhawks ahead 23-18 with 1:04 on the clock. A successful two point conversion lifted the red and blue to a state of euphoria.

"We had our chance to win but we just let it out of our grasp," Gibson said.

K-State breezes past Cyclones

The following week, the Iowa State Cyclones fans came to roost in the Wildcat den in their annual migration day. But after a 21-19 Cat victory, the Cyclone flock returned to a more comfortable home climate.

Isaac Jackson entertained the Manhattan crowd with a virtuoso one-man offensive show as he scored all three K-State touchdowns. With Iowa State leading 3-0, Jackson lifted the Wildcats up by their boot straps with a three yard run. Jackson continued his show-must-go-on performance in the second quarter as he pulled down a Steve Grogan pass and headed into the end zone for the score. The Cats led at the half, 14-12.

The second half was a scoring

drought until the final three minutes of the fourth quarter when the nimble-footed Jackson sprinted 28 yards into the end zone. Keith Brumley's third straight PAT gave the Wildcats a 21-12 lead.

The Cyclones immediately struck back at the Cats with gusty velocity as they rolled 62 yards in four plays. But for the league cellar-dwelling Cyclones, time had run out.

"We were able to come up with some of the big plays we haven't been getting — offensively and defensively. Team-wise we are getting better every game. We're still making mistakes, but we're making them at full speed," Gibson said.

Top left: Vince Gibson and his assistants focus their attentions on the battlefield. *Top center:* Elusive halfback Isaac Jackson tumbles for hard-earned yardage. *Top right:* Isaac Jackson, who scored three touchdowns during the game, out-maneuvers would-be Iowa State tacklers. *Bottom:* Safety Gordon Chambliss and defensive halfback Paul Smith watch the offensive action from the side lines.

Top Row: Vince Gibson, Bruce Mays, Bill Cox, Gene McDowell, Bobby Jackson, Bruce Lester, Gary Geist, Greg Bogue, Randy Allen, Dick Strahm, Ted Heath, Bob Hitch, Bob Weber, Tom Dimitroff. Second row: Willie Cullars, Ronnie Payton, Dean Williams, Rick-ey Gray, Leonard Willis, Terry Brown, Willone Eubanks, Les Chaves, Tom Winchell, Dave Chambliss, Bill Sinovic, Mike Wecker, John Tuttle, Charles Dietz, Larry Roy. Third row:

Rocky Osborn, Charley Kilgore, Josh Washington, Tim Wasemiller, John O'Leary, Mike Roberts, Terry King, David Livingston, John Wells, Don Calhoun, John McCarthy, Kevin Vohoska, Charles Clarington. Fourth row: Cal Leonard, Greg Whelan, Wes Nimmo, Ernie Olson, Kent Brown, Kevin Vietti, Stan Ross, Denny Gragg, Ron Solt, Hal Batdorf, Isaac Jackson, Henry Childs. Fifth row: Bud Peterson, Steve Grogan, Mark Zier, David

Hernandez, Bill Crosby, Fred Merrill, Don Lareau, Lou Wegerer, Regan Steiner, Dave Specht, Bob Rauscher. Sixth row: Charles Price, Don Parham, Bert Oettmeier, Jim Lem-bright, Bob Brandt, Axel Hedberg, Bob Scott, Greg Jones, Roger Stucky, Pat Clerihan. Bot-tom row: Bill Holman, Ed Johndrow, Kim Thomas, Tim Paulus, Fred Rothwell, Gordon Chambliss, Bill Brittain, Keith Brumley, David Brown.

Top-rated teams feast on Cats

The third-ranked Oklahoma Sooners brought their "Wishbone T" offense goose-stepping into Manhattan and left behind a wave of devastation that sent the Wildcats running toward the Flint Hills with their hands in the air.

The Sooner wishbone offense romped to three touchdowns before the end of the first quarter. The Cats found themselves on the wrong side of paradise as the brawny Oklahoma giants continued their demolition derby in the second quarter taking a commanding 35-7 lead to the plush-carpeted locker room at the half.

The Cats and their homecoming crowd continued to see red the rest of the game as the Big Red Machine cranked out a convincing 56-14 rout.

The following week, the morale-damaged Cats ventured to Columbia in hopes of taming the rampaging twelfth-ranked Tigers in the gridiron ring.

In the first half, the Wildcat defense used all the finesse of a circus trainer as it whipped the Tiger offense into submission.

K-State's only touchdown came after the Cats stampeded 87 yards in

19 plays. Quarterback Steve Grogan carried the ball into the end zone from the one-yard line to catapult the Cats into a 7-0 lead.

Missouri began its scoring drive when a Wildcat mistake sent Tiger fullback Ray Bybee loose on a 65 yard run. With 10:58 remaining in the second quarter, Missouri tied the score 7-7. The Tigers got on the scoreboard again with nine seconds remaining in the half with a 33-yard field goal.

The second half was an insomniac's Disneyland as the wide-eyed Tigers marched for three touchdowns while the K-State offense and defense catnapped on the job.

Isaac Jackson's fumble on the K-State five-yard line led to a Missouri touchdown that Gibson said provided the momentum for the surging Tigers.

The 31-17 Missouri win proved to the Cats that the hunter can be captured by the game.

"I don't know how we'll react to this. But I'll tell you, I am no quitter and I don't think our players and coaches are either," Gibson said in his Monday-morning quarterback posture.

OSU, NU roll over Wildcats

The following Saturday, the Wildcats were greeted by a spirited Oklahoma State team and a noisy throng of homecoming fans.

After trailing 14-0 at the half, a touchdown and a fieldgoal brought the Cats back to within five points early in the second half. But two fourth quarter touchdowns by the Cowboys turned a close game into a lopsided 28-9 victory.

The next week, tenth-ranked Nebraska, accompanied by 15,000 fans, trekked into Manhattan bolstered by hopes of securing a Cotton Bowl berth. The Cats harbored plans of playing the role of the bollweevil.

In the first half, the Wildcats had to swallow their purple pride as the

Cornhuskers raced to a 23-0.

The Wildcats rekindled a little esprit de corps in the third quarter as they took advantage of two Nebraska fumbles to close the gap to 23-14 with 8:09 remaining.

But the Cornhuskers regrouped in the last few minutes of the third quarter to push the lead to 30-14.

The Wildcats cut the Nebraska lead with a fourth quarter touchdown. But Nebraska then began to prove that its not nice to fool a perennial power as they proceeded to turn the game into a rout. In the last eight minutes, the Cornhuskers flexed their offensive muscles as they added three touchdowns.

Top center: Steve Grogan runs to his left to avoid OSU pursuers. *Top right:* The ball slips by the hands of a Wildcat as Colorado's Ozell Collier tumbles to his knees. *Bottom left:* OSU quarterback Brent Blackman is stifled by a K-State player. *Bottom center:* Cornhuskers mob Isaac Jackson. *Bottom right:* Willie the Wildcat bows in his winterized uniform.

K-State upsets Buffaloes in final seconds

The final game of the season didn't really mean much in the Big Eight standings. The beleaguered Buffaloes had lost three straight; K-State had dropped four in a row.

Although the Cats put together a number of scoring threats throughout the first half, Colorado appeared to be well on its way with a 14-0 half time lead.

Early in the third quarter the Wildcats closed the gap to 14-6. K-State got a big break in the final quarter when they recovered a Colorado fumble. Three plays later Steve Grogan ran in for the score. A two-point conversion attempt succeeded as the mettlesome Cats knotted the score at 14-14 with 10:41 left.

With five seconds remaining, Keith Brumley kicked a field goal to boost the Cats to a 17-14 win.

On The Vince Gibson Show that Sunday, Gibson joked with Gov. Robert Docking. Maybe next year they would go to a bowl game. Or at least the year after that.

Novices fight for recognition

Freshman football has lost some of its attraction in the last few years because of new eligibility rules that allow freshmen players to compete in varsity action.

This novice competition, nevertheless, is still a valuable trial balloon for future varsity hopefuls.

With 20-30 mile-per-hour winds at their backs, the Wildcats set sail early in the first quarter and navigated to a 10-0 lead over Kansas in the season opener. The Jayhawks retaliated in the third quarter with a touchdown, but K-State scored in the fourth quarter to upend the Jayhawks, 17-7.

The weather was not as supportive of the Wildcats in their game against Nebraska. Early in the contest, K-State opted to let a Nebraska punt, which had become hung up in the sunlight, bounce into the end zone for an apparent touchback. Nebraska, who had recovered the ball in the end zone, was awarded a touchdown when the referee ruled that K-State had touched the ball. Nebraska went on to defeat the hap-

less Cats, 10-7.

In the next contest, KU avenged an earlier loss to the Wildcats by romping to a 17-0 shutout.

K-State proved it had a potentially explosive scoring punch against Wichita State. The Cats scored on four of their first six possessions against the Shockers to romp to a 28-0 first quarter lead. The scoring blitz continued into the second half as K-State emerged with a decisive 49-14 win.

The Missouri contest turned out to be a wide-open scoring fest. In the last 49 seconds of the first half, the two teams combined for three touchdowns. Missouri lead at the half, 33-21.

In the second half, the Tigers turned the game into a onesided affair en route to a 50-28 victory.

The loss dropped the season record to 2-3.

But in freshman football, the won-lost record isn't as important as the individual players who await the nod from coaches to move on to varsity football.

Top left: Joe Johns and Mike Kruse jump too late to block Wichita State pass. Top center: K-State tackler tries to pull down Nebraska ball carrier. Bottom center: K-State's Keith Wright narrowly misses blocking Shocker punt.

Top row: Ed Dooley, Lee Mace, John Stucky, Bruce Lester, Gary Geist, Randy Allen, Greg Bogue, Larry Roy, Roy Johansen, Pat Fagan, Bruce Mays. *Second row:* Bob Jeffries, Gary Bogue, Vic Chandler, Lorenzo Matthews, Marvin Switzer, Tom Merrifield, Chuck Wasker, Geoff Naymick, Arthur Bailey, Kirk Darland, Hardden Weech, Theopilis Bryant, Mike

Kruse. *Third row:* Don Bredemeier, Perry Viers, Henry Lige, Carl Pennington, Carmen Trevitt, Carlos Whitfield, Oliver Jones, Doug Moeckel, Tom DeLaHunt, Terry Reilly, Mike Osborn. *Fourth row:* Dennis Frazee, Jim Cooper, Rod DeBoe, Dave Cary, Greg Petree, Johnny Andrews, Mark Kozak, Alton Carson, Billy Dixon, Verdell Jones, Robert Baker, Da-

vid Spare. *Fifth row:* Joe Johns, Ron Mersch, Craig Rickard, Frank Hill, Ken DeGarmo, Steve Hildebrand, Steve Highberger, Keith Wright, Roscoe Scobey, Garland Gipson, Scott Stuewe, K. W. Raney. *Bottom row:* John Olmstead, Dan Hitch, Dean Lovett, John Bownkamp, Ray Long, Curt Hightower, Mike Taylor, Chuck Hogan, David Cooper.

Ski novice's career slides to painful halt

By Cathy Claydon

It was here. My debut. For a month I'd been the innocent victim of all my friends' ski tales. And this morning as I stood dwarfed by the huge white mountains, I was on the brink of my very own ski adventure. But I was forewarned — I wasn't going to make any of the same mistakes my boasting acquaintances had made.

I had half the battle won already — a month's salary worth of brand new ski-jock apparel. I had everything from union-jack underwear to Big Mac overalls. I was ready to pave my way to the ski bunnies' hall of fame.

But first, I had to do something. I looked around and made sure no one was looking, then I tried out my ski stance in a dry dock run. Knees bent, hips tucked, weight forward. Perfect. A 10-point mark. I had the clothes and the knack, now all I needed were the skis and the slopes.

But those skis weren't so easy to come by. Before I even got a good look at the white inclines I was ushered into a rustic warehouse where I began that tedious process of renting my ski equipment. Amidst the frenzy of a five-year-old wanting the boots that buckled rather than tied, and a straight-haired teenage girl who was hectically looking for her left tennis shoe among the mountain of dripping loafers, saddle oxfords and waffle stompers, I managed to buckle myself into a pair of boots that felt like plaster of Paris casts. I clomped up to the installation ramps with my ski poles and beginner's short skis in hand. Finally I was clamped onto my skis and faced those beautiful mountains.

I was facing those beautiful mountains alright, but I wasn't moving. What do you mean skate on my skis? You've got to be kidding.

I wasn't much for that skating stuff, but by planting my poles (by this time I had even picked up on a

little of the skiing jargon) I managed to get to the beginner's slope.

But I met with another obstacle. A tricky rope pull. My innate nimbleness let me down only once on the pull up the hill. I still had all the confidence I started out with by the time I was at the crest of the mound.

But somewhere on that 50-yard downslide I lost my confidence, my patience, my coordination, my balance, my ski pole and my qualifications for the ski bunny competition.

What is the deal? I have been walking for almost 20 years and now someone puts a pair of narrow boards on my feet and I'm an infant again. That's not fair. I should be able to do this ski stuff just like they do it on television.

One thing — just about the only thing — I didn't lose on that first run down the hill was my determination. I picked myself up, grabbed the rope and slid down again and again and again.

After several runs down the steeper beginner's hill I mastered the snowplow and the snowplow turns but I substituted a fall for the snowplow stop. And I had the proof for all my efforts; it was the ice crusted overalls that were biting into my legs.

My personal instructor finally decided I was ready to move on to the parallel moves, the chair lift and the intermediate slope.

I slid out of the chair lift, managed to stay upright and paused. I had actually gotten up high enough to see the beauty of the mountains. I would have loved to stay right where I was and take in the scenic vibrations, but my inner voice was shouting, "Master that mountain!"

Soon my outer voice was yelling, "Yikes!" and my inner voice had quieted itself and was mumbling, "Hang in there, and just make it to the bottom."

During the second trip down I decided it was fun. The scrunching sound of digging the edges of my skis in the mountain side was exhilarating. The cold wind drying out my eyeballs was exciting. I loved to slide to a stop in a parallel halt. Let's do it again and again.

We keep going up and down until I realized my hands were cold, my feet weighed 20 pounds, and my shoulders felt like they were resting on my ankles. I was tired. We stopped for a while to dine on an expensive ski lodge hamburger and cup of hot chocolate.

After nourishing myself, I knew I was ready for the slopes. I had to make the best use of my time. I didn't have much, and I had to show up Jean-Claude Killy before I left.

And I did succeed in surpassing Mr. Killy.

It was night and the slopes were lighted. I could see the moguls just as if I was on top of them. In the darkness, the mountains were quiet and calm.

So I was like a panther screaming out in the night when I almost killed myself. You have never seen Mr. Killy come down the slopes in a ski patrol's basket, have you? Well, at least 80 persons had gathered around by the time I was paraded down the mountain seated in a metal caged sled and flanked by rust-jacketed ski patrols. Who wants to be a ski bunny anyway?

I must add more to my story for any eager innocent eyes which have rested on my ski tale. I was not injured seriously. Nothing was broken. Now it's four weeks after the catastrophe, and I have been walking normally for about two weeks. I just twisted by knee.

Yesterday I got out my skiing literature and began planning my next trip to the mountains. I have a new goal now. Someday I want to wear the red jacket of the ski patrol.

Rugby: blood, sweat, curses and jockstraps.

By Michael Szeremet

"Give Blood — Play Rugby."

There aren't many of these bumper stickers around Manhattan, but the few that are gummed onto V.W.'s give ample notice that rugby is in town.

One morning in mid-October I called up Roch Thornton, a local rugby player, and invited him to the *Royal Purple* office to educate a prospective fan about that British import, rugby.

About a half-hour later, he came swinging into the office on crutches. Under one arm was a folder with clippings and rugby rule books.

Thornton explained that competition takes place on a field of play similar to that of football. Basically, the two teams attempt a "try" (touchdown) for which they receive four points. It is by an accumulation of these "trys" and field goals that a winner is determined, he explained.

After this brief introduction, Thornton began to draw diagrams to explain field positions of the 15-member teams. As he gripped the pen, a crusty scab on his index finger began to bleed — a minor wound from the field of battle.

A few days later, Dick Kueser, another member of the Kansas State-Ft. Riley (KSUFR) rugby team, walked into the office. His features were marred by a bruise on his nose.

"I'm not sure if it's broken," Kueser said.

But he didn't want to know until after the rugby season.

The sport injects a player with a strange transfusion of devotion.

Rugby requires guts and a taint of insanity. A player enters the game equipped only with blood, sweat, a litany of curses and a jock strap.

After reading Thornton's file material on rugby and listening to a list of players with cracked ribs and sprains, I decided that rugby was the orthopedist's promised land.

With this store of information available for instant retrieval, my Plimptonian world of participatory sports-writing rapidly melted into the true Walter Mitty world of observer sports-writing.

The following Saturday, I attended the KSUFR (pronounced kasufer) match against Wichita. At one end of the field, a KSUFR was kicking the overinflated pigskin around the field while a German Shepherd nipped at the ball. On another part of the field, a red-and-blue shirted player snuggled up against a blonde "rucker hugger" (girls who follow where the boys are).

At the far end of the playing field, some of the Wichita team were routinely going through drills. A few sat on wool blankets on the sideline sipping from bottles concealed in brown paper bags.

Although I had been schooled in a crash course on rugby, much of the action that ensued was too fast to comprehend. Rugby — unlike tactically-manuevered football competition — is a non-stop flight. Once you are on board, you don't disembark until the end of the first half.

Red, blue and orange uniforms streaked all over the field in pursuit of the ball. Players dove for, ran after and kicked the ball, and each other.

Following a pile-up at midfield, the ball was kicked down the field. The chase continued. A few players limped. One KSUFR had blood oozing from above his right eye.

Few of the spectators could offer me an explanation about the action on the field. What was the score? Why did KSUFR get a penalty kick?

Finally, I decided to tack myself on to a rucker hugger who was scoring the game with the proficiency of a statistician. She "announced" the play-by-play action for me for the

rest of the game.

Even the casual observer could see that KSUFR was dominating the game. The final score, 31-0, substantiated KSUFR's superior rugby playing.

This was the end of the "first" half, Thornton said later. The "second" half would take place at Brother's Tavern. (It is a rugby tradition that the host team sponsor a party for the opponent).

The "second" half didn't get off to the fast start characteristic of the field action. Players and "huggers" sat around tables drinking Coors.

The party began to pick up steam when the Wichita squad requested a song from the hosts.

While "huggers" sat around sipping on the suds, the KSUFRs began to sing a medley of dirty songs that would culminate in strip-tease competition. Many of the songs had been inherited from British pubs and from bored soldiers who took to songwriting during the British colonial period.

One of these tunes provided the accompaniment for the disrobing activities. While songsters chanted, the stripper disrobed — balancing a glass of beer on his head throughout.

Victory is important. KSUFR went on to prove its dominance on the rugby playing field was only surpassed by its burlesque in the tavern.

The following Monday, Thornton came into the office. The party must have been good therapy. He was minus crutches.

Thornton described the "rugby festival" as a nice way to "let out all the stops."

I wonder if K-State's highly regimented football players, pressured by coaches, faculty, frustrated middle-agers, students and alumni ever found ways "to let out all the stops."

Bottom right: Rugby players crooning tunes during "second half" action at Brothers. *Bottom center:* Ball carrier Ray Shank is mobbed by a swarm of KSUFR's and Kansas City Blues players. *Mid center:* KU and KSUFR combatants temporarily watch a stray ball. *Top center:* A ruck of KU and KSUFR players prepare to move in on the ball.

Hartman rejects OSU offer

For college basketball, March usually roars in like a lion and exits with the last hurrahs of the winner of the national championship.

During the early part of the month league-leaders scrap for conference titles — instant passports to the NCAA regionals. By mid-March the basketball king is investitured.

For K-State, March 1973 was a trip back into the ancient lore of Rome. Beware of the Ides of March.

Near the end of February, Oklahoma State Headcoach Sam Aubrey resigned. Three former OSU players were mentioned as possible replacements. Among the candidates was K-State Headcoach Jack Hartman. Et tu, Hartman?

In the short time Hartman had been at K-State, he had assembled well-disciplined ball clubs which had achieved national recognition. Ahearn had become the house that Jack built.

In early March, an *Oklahoma City Times* reporter predicted on the basis of information obtained from a "reliable source" that Hartman was

"within a nod of his head" of the OSU job.

A few weeks later the *Topeka Daily Capital* announced they had received information from a "reliable source" that said Hartman would stay in Manhattan.

Edgy alumni and boosters put together a fund drive to convince Hartman that the clouds over Manhattan were silver-lined. At the annual basketball banquet the ad hoc fund raisers presented Hartman with a \$10,000 incentive.

Hartman, who had not taken any measures to quash the rumors, labeled the OSU offer "the grimmest decision I've ever had to make." He characterized the dilemma as "like trying to choose between an ice cream cone and an all-day sucker."

When Hartman finally announced that he would stay in Manhattan, it was apparent which treat he had chosen. K-State was the ice cream cone; the Oklahoma State Cowboys were the slow poke.

ASU halts Ahearn win streak

In March, Hartman had provided the prologue for the 1973-74 season. K-State would furnish the script for the continuing basketball episodes.

The pre-season Associated Press poll picked the Wildcats for their 13th spot. Most Big Eight basketball pundits predicted K-State would retain the conference crown for the third straight year.

The Yugoslavia Nationals ushered in the Wildcats 1973-74 season. Although the game was not counted in the season record, the Cats proved they could contend with Europe's best as they upended the European national champions, 74-62.

In the first regular season contest, Larry Williams, supported by a well-balanced team scoring effort, poured in 20 points to lift the Cats from a 38-37 half time deficit to an 87-82 win over the Utah Utes.

The highly regarded Southern Methodist Mustangs became the 24th straight home court victims as the Cats, propelled by a late first half blitz, rolled over the Mustangs, 77-

61. Lon Kruger sparked the K-State attack with 24 points.

The Wildcat road show traveled to Austin, Tex. for an encounter with the Texas Longhorns. Freshman Dean Harris tallied 13 points, blocked key Texas shots and pulled down strategic rebounds helping K-State maintain a consistent lead throughout the game. Again Kruger captured game-high honors as he scored 16 points in the 71-63 win.

The flames of victory were dimmed somewhat when lanky center Gene McVey sustained a severe ankle sprain. The injury halted play for the K-State center for the next eight games.

The Arizona State Sun Devils, aided by a starting five that averaged 22 pounds per player more than K-State's starting quintet, out-muscled the Wildcats, snapping a 24-game Ahearn Field House winning streak.

The screaming support of a sell-out crowd could not bolster a late second half surge as the Sun Devils held the 13th-ranked Cats at bay for a 71-66 victory.

Top center: Wildcat center Carl Gerlach battles Arizona State player for a jump ball. *Bottom left:* Southern Methodist player appears to levitate in mid-air as other Wildcat and Mustang players scramble for the ball. *Bottom center:* K-State's Bobby Noland pulls down a rebound in action against the Southern Methodist Mustangs. *Bottom right:* Forward Larry Williams pauses from the steaming floor action against Utah to quench his thirst.

K-State blasts Hawkeyes 105-67; takes third in Big Eight tourney

The following week, the Wildcats put on an awesome display of power as they burned the nets with a record-setting 61.5 percent to annihilate the Iowa Hawkeyes, 105-67.

The Cats, recovering from a sluggish performance against Arizona State, found a cure as they controlled the boards, rattled Iowa's defense into numerous turnovers and opened up the running game.

Pesky guard Danny Beard had the crowd buzzing as he fired in 22 points to break out of a scoring slump that had plagued him last year.

It was inevitable that the contest with Brigham Young would be anticlimactic after the Cats highly energized performance against Iowa. In fact, K-State turned in a rather lackluster encore in the 95-85 win over the Cougars. Despite the final score, the Wildcats were in control of the game all the way as Williams pumped in 25 points while Kruger added 20.

On K-State's western tour, the University of Arizona packed 13,658 fans to the rafters to watch a clash between the nation's 13th and 14th-rated teams.

Although the visitors built a substantial lead, Arizona roared back to convert the game into a nail-biter. Arizona freshman Bob Elliot's desperation shot at the buzzer gave the home team a 74-72 win.

The Cats final stop in their western migration was in California against a San Diego State team that had a less than mediocre record.

But the hometown Aztecs, buttressed by a 39-point output from sophomore Steve Copp, shot a torrid 65.6 percent to upset the Wildcats, 88-75.

Although 18th ranked K-State and Oklahoma were designated as Big Eight Tournament favorites, most hard-court enthusiasts conceded that this year's field contained no pushovers.

In first-round action, K-State played cautiously in the early going before rolling up 16 straight points and a comfortable lead. The Cats were never seriously threatened

again as Hartman emptied the bench en route to a 68-47 victory.

In semi-final action against Iowa State, the Wildcats frittered away an 11-point lead. In the second half, K-State went scoreless for four minutes. The Cyclones mounted a lead during the Wildcat drought to upset the tourney co-favorite, 61-55.

Following the disappointing loss to the Cyclones, the Cats paired up against Colorado in an unconsoling consolation game for third place.

Despite mounting a 68-53 lead in the second half, K-State had to scrap for a victory that was finally iced when Danny Beard fired in a 20-foot jump shot with three seconds showing on the clock.

Kruger set a K-State and tournament record for the most points by a guard. The wunderkinder guard hit for 37 points in the 84-82 win.

During the holiday lull, Manhattan became the hub of attention as a possible site for the NCAA's Midwest Regional basketball tournament.

The regional site had been changed twice previously because of an NCAA regulation which says that schools on probation cannot host a post-season tournament.

Furthermore, K-State declined the tournament because of another rule which prohibits host teams from playing in other post-season tournaments.

The orphaned tournament finally found a home at Oral Roberts University.

Following an 11-day layoff, the Wildcats resumed play against Northeast Missouri State. The game proved a testing ground for Gene McVey who had missed eight games with a sprained ankle.

The returned center dumped in 15 points to lead all Cat scorers in the 76-54 romp.

Top center: Danny Beard dribbles around Iowa guard. *Top right:* K-State's Darryl Winston leaps in an attempt to tip in Dean Harris' missed shot, while Nebraska players look on. *Bottom center:* Lon Kruger sets to pass over the outstretched arms of a Brigham Young player. *Bottom right:* Fan cheers in action against Iowa.

Top left: An indignant Jack Hartman awaits Lon Kruger and company during a time-out against Missouri. *Top center:* Colorado's Bob Hofman adopts why-me-ref posture during second half action against the Wildcats. *Top right:* A fan growls with approval as Cats bottle up Missouri's offense. *Bottom left:* Gene McVey springs to his right in an attempt to salvage Iowa State tip. *Bottom center:* Missouri's Al Eberhard drives for two points as Wildcat defenders position for a rebound. *Bottom right:* Missouri and K-State hands grasp for basket-bound ball.

Cats rally after opening loss

Despite the third place finish in the Big Eight Tournament, press, radio and television personnel chose the Cats to do a league re-run as champions.

The Cats opened the Big Eight title chase in an early season headliner against Oklahoma.

After being knotted 29-29 at the half, the Sooners mounted leads of as many as seven points. But the Wildcats whittled away at the lead a number of times before bowing to the Sooners, 65-63. Sharpshooter Alvan Adams accounted for all the Sooner points during the last seven minutes of the contest.

Stillwater was a bridge over troubled water for K-State. The Cowboys, who chipped away at a 10-point half time deficit, threatened to overpower the Cats throughout the second half. Kruger's clutch shooting in the waning minutes helped preserve a 72-69 win. Kruger's 29 points and Williams' 19 led the winning cause.

Although Dean Harris scored only four points, his 13 rebounds helped neutralize league-leading rebounder, Andy Hopson.

In K-State's home opener, 16th-ranked Missouri kept pace with the Cats for one half. But the Cats authored the script for most of the second half action. The Wildcats flexed their defensive forearms as they used a full court press to force the Tigers into numerous turnovers and rushed shots. The results: Mis-

souri went scoreless for over seven minutes.

K-State's life support system held up as they repelled a late Tiger surge to win, 70-67.

Nebraska's "snake pit" colosseum has never been hospitable for visiting teams. Invading upstarts find themselves face to face with Big Red fans and chanting program vendors.

But K-State team members shunned sneers and cat calls en route to a 73-65 win. Larry Williams' outside shooting led the Cats down the boardwalk with 25 points.

The following Saturday, officiating became the focal point of harsh criticism from the Iowa State coach. After a 92-66 loss to the Wildcats, Cyclone Coach Gus Guydon combined his commentary on the officiating with a swift kick of the trash barrel outside the officials' dressing room.

The home court win kept the Cat image clearly framed in league-leading Kansas' rear view mirror.

The Wildcats rested for a week before returning to the court to lock horns with Colorado.

The Buffaloes, after suffering from a poor first half shooting performance, turned a 34-23 half time deficit into a 54-49 lead with three minutes showing on the clock.

But K-State's manhandled offense, much to the relief of 11,700 disgruntled fans, finally managed to muster enough scoring punch to lift the Cats to a 57-56 win.

Top left: Wildcat cheerleader revels as K-State nears victory over KU. Top center: Lon Kruger attempts to fire a shot over the outstretched arms of KU's towering Danny Knight. Bottom left: Kruger drives for a basket against Iowa State at Ames. Bottom center: K-State fan whistles Dixie (in anticipation of NCAA finals at North Carolina State in March) during a timeout in the KU game. Bottom right: KU's Roger Morningstar expresses surprise at referee's call as Kruger looks on.

Cats edge Hawks for lead

K-State's defense continued to be its meal ticket as the Wildcat offense remained punchless against Oklahoma State.

But despite the sluggish offensive performance, the outcome of the game was never much in doubt as the Cats sputtered to leads of as many as 20 points in the 65-48 win.

At Iowa State the following weekend, the scoring shortage that had bedeviled the Cats was finally exorcized as the visitors routed the Cyclones, 72-56.

The eyes of Kansas focused on Manhattan the following Wednesday as K-State and KU met to temporarily decide on first place.

The magic of Ahearn and the tenacity of K-State's zone defense proved the right mix for a Wildcat win over the 16th-ranked Jayhawks.

After trailing 34-33 at the intermission, K-State rallied early in the second half to mount a nine point lead.

The Jayhawks, whose towering centers were stymied by the Cat zone, had to rely on the precision outside shooting of their guards to keep pace with K-State.

Larry Williams, Lon Kruger and Gene McVey provided the scoring punch in the 74-71 win.

The 18th-ranked Wildcats trav-

eled to Boulder and played the third straight heart-stopper of the year against the Buffaloes. But the winner was the same for the third time — K-State, 76-74.

The Cats jumped to a 20-6 lead early in the game and raced to a 42-32 half time lead. But Colorado didn't roll over and play dead. In fact, the Cats weren't into the victory column until Colorado's Dave Logan missed a 35-foot jump shot at the buzzer.

Despite a 32-point performance from Lon Kruger, it was Chuckie Williams' 15-foot jumper with 34 seconds left that provided the encore.

K-State was safe as the defensive winds came right behind the rain of an explosive offense against the Oklahoma Sooners.

In short, the Wildcats converted a ten-point half time lead into a devastating storm as they streaked to a 36-point lead with 14 minutes left to play.

The K-State defense squelched the league's leading offensive unit by holding them scoreless for nearly four minutes. The pesky Cat defense held Alvan Adams, the league's leading scorer, to 12 points.

Kruger led the Wildcats with 26 points in the romping 90-67 win.

Jayhawks dash Cats' title, NCAA hopes, 60-55

K-State managed to hang on to a half game lead over KU in the Big Eight standings with a heart-throbbing 69-67 win over Missouri.

The Cats led most of the game, including a seven-point intermission lead. But it wasn't until clutch-shooter Lon Kruger sunk two free throws with nine seconds left that K-State was assured of retaining its half game lead over the Jayhawks.

Four seniors — Gene McVey, Danny Beard, Lon Kruger, and Larry Williams — made their final appearance in Ahearn Field House against the Nebraska Cornhuskers.

Before the game, spectators were absorbed in another contest as students sailed a frisbee from one side of the Fieldhouse to the other. The crowd roared thunderous approval when one fan tossed the frisbee to K-State's favorite son of the broadcast media, WIBW's Fred White.

But the celebration of the rites of spring and the right to an NCAA

playoff berth were dampened a bit when the Cornhuskers upset the Cats, 58-54.

After leading 30-28 at the intermission, the Cats returned in the second half and hit only one of eight shots during a nine-minute stretch to fall behind 43-34.

The Wildcats made a late comeback, but Nebraska was able to get down the key shots to snare the upset victory.

Despite the loss, the chance for a third straight Big Eight title and an NCAA post-season bid hinged on the outcome of the KU-K-State clash the following Wednesday.

In the league showdown before 17,200 fans in Allen Fieldhouse, the Kansas Jayhawks raked in the conference title and a berth in the Midwest Regionals with a 60-55 win over K-State.

Although the Wildcats exploded into an early 16-4 lead in the first six minutes, the Hawks roared back to take a commanding 32-20 advan-

tage to the locker rooms at the half.

Led by Larry Williams, the Cats bounced back in the second half to scale down KU's lead to four. But the Hawks, relying on the outside shooting of Dale Greenlee and the inside gunning and rebounding of Rick Suttle, checked the Wildcat comebacks.

Larry Williams contributed 21 points in the loss that dropped K-State's season record to 19-7.

On the night of the loss to KU, K-State officials accepted an invitation to the Commissioner's Cup tournament in St. Louis in March.

As the Cat players neared completion of their 1973-74 scenerio, Hartman re-emerged as one of the basketball world's best supporting actors. Although he tried to nix rumors that the University of Illinois was attempting to corner him for a head coach position, jittery Cat fans re-experienced the trauma of the Oklahoma State offer the year before.

Top left: Coach Jack Hartman's face registers the strain of the closely fought Nebraska game. Top center: K-State's Danny Beard searches for an open man as KU's Dale Greenlee attempts to prevent a pass. Bottom left: Nebraska's Larry Cox tries to pad the Cornhusker lead as Gene McVey avoids drawing the foul. Doug Snider awaits the rebound. Bottom center: KU's Tom Kivisto guards Lon Kruger who moves for a hand-off from Larry Williams. Bottom right: Basketball team — Clockwise from number 52: Gary Ely, Larry Williams, Bobby Noland, Steve Anson, Danny Beard, Lon Kruger, Chuckie Williams, Tony Pauzauskie, Carl Gerlach, Doug Snider, Gene McVey; Center: Jack Hartman.

Jayvees post winning season, focus on future

K-State's jayvees, emulating their varsity big brothers, produced a winning season.

In their first contest, K-State routed Cowley County Junior College, 81-55, as all five starters scored in double figures.

U.S. Davidson led the Wildcats with 19-points as K-State blasted its second opponent, Barton County Junior College, 84-58.

Topeka Hughes-Conoco provided the Wildcats with a stiff challenge before bowing, 96-82. K-State outscored Hughes 15-3 during a two minute spree to take command in the second half. Jim Molinari and Darryl Winston combined for 49 points in the Wildcat win.

The jayvees posted their fourth straight win with a 69-67 decision over Kansas City Community College. The game's outcome wasn't

decided until the Blue Devils missed a jump shot with eight seconds left.

The Wildcats suffered their first loss of the season to Nebraska with a faltering second half performance. Molinari pumped in 27 points, while Darryl Winston added 20 in the 86-83 loss.

After leading 44-41 at half-time, Dodge City Community College held the Cats scoreless for more than three minutes as they handed the home team a 73-69 loss.

In a rematch contest with Topeka Hughes-Conoco, the Wildcats used a balanced scoring attack to outdistance the opposition, 100-74.

K-State soared over the 100 mark for the second time in a row by shellacking Coffeyville Junior College, 101-65.

The Wildcats lifted their league record to 7-2 with a 78-77 victory

over rival Kansas. The Jayhawks, who trailed 34-29 at the intermission, closed in on the Wildcats in the second half. But Molinari's free throws with 11 seconds left in the game cinched the win for K-State.

The jayvees avenged an earlier loss to Nebraska by trouncing the Cornhuskers, 87-56.

In a rematch with the Kansas Jayhawks, the Wildcats scrapped throughout the first half and finally tied the score with 13 minutes left in the game. But then KU mounted a 10 point lead which they were able to protect for a 74-68 win.

The loss dropped K-State's jay-vee record to 8-3 for the season. But there is no league title to celebrate or post-season tourney to fret about. For players, the focus of attention is not on the record, but on the prospect of varsity play next fall.

Adams; *Bottom row:* Lonnie Walker, Craig Cooper, Tyron Thompson, Jim Molinari. *Bottom center:* K-State center Gary Ely stumbles over teammate as he tries to maneuver into the basket for a rebound against KU. *Bottom right:* Wildcat's Dan Droge battles KU player for a rebound during first half action in Ahearn.

Cheerleaders work for worst seat in the house

By Ann Carter

I want to tell you about 19 Wildcat fans who have season tickets for the worst seats in the stadium: the K-State cheerleaders.

You already may have some images concerning cheerleaders. I asked some students of what qualities the word "cheerleader" made them think. They answered, "peppy and attractive and outgoing and popular."

"Legs" was the last response I got. That sounded pretty typical, but it wasn't enough to write a story. I decided I'd better see them in action.

I went to the football game against Iowa State, and with a Royal Purple press pass tied to my belt loop, I got to sit right down on the sidelines. I was close to the people who work during the game, and I saw some things you might miss in section 29 of K-Block. It's a whole different vantage point down there. I saw a football player with black eyes, and I thought the poor guy had hurt himself until, I noticed that all the players had black eyes. I saw the band members with sweat dripping down from their furry hats, and I knew I didn't used to say, "Boy, I bet the band is hot!" for nothing.

But I want to tell you about the cheerleaders. It's not an easy job — I'll attest to that. Here were nine girls, nine guys and old Willie the Wildcat trying to lead cheers for a crowd bigger than many a hometown. And that is where many students have left their school spirit — back at the hometown high school along with homerooms and senior proms.

Did you ever try to watch the game through the padded shoulders of the team? That's the view they get. And while they're straining to see the game, they're thinking about the motions for the next cheer. Then

while they're in the middle of their cheer, they're wondering why everyone just stood up and started yelling. Missed another good play. But keep smiling.

You know something? They don't smile all the time. It was more of a look of concentration on the face of one yell leader as he twirled a pom pon girl on his shoulder around and around. It was more of a look of irritation on another as she looked down the row to see three different motions going for one cheer. It was definitely a look of fatigue on several as they leaned against the railing for a 10-second breather.

There really wasn't time at the game, between the Wabash Cannonballs and the "A" Rocks, to ask many questions, so I went to a practice.

Did you know they practice 10 hours a week? I asked them if all that practice hurt their studying, and they said what it really bothered was other extra-curricular activities.

"I can't. I've got to practice," was a familiar line.

"Has all that time together made you good friends?" I asked. Definitely yes, they said. They did a lot together besides practice and games. There were the pre-parties and post-parties ... "Should we mention that?" one yell leader wondered.

But they can't drink in uniform — that is against the rules, they said. And so is swearing in uniform, but those are about the only two rules there are. But they don't date each other — they're hesitant to break up the group.

Then I asked them how the squad is different this year, and they seemed proud to talk about the changes they had made.

The girls are doing fewer pom pon routines and more cheers and

dances. And for the first time, there are a majority of non-Greek pom ponnors. I remember now they said they liked the inclusive term "cheerleader" better than "pom pon girls" and "yell leaders." It goes along with their obvious unity.

Just a few more questions. "Who judged you?" "The International Cheerleading Foundation." "On what basis?" "On coordination, projection, kicks and stunts." And Willie had to go through a series of interviews for his job."

It was about time for their practice to begin. I left the field slowly, stopping to watch the action several times. Just like at the game, it looked different close up. The closest I'd gotten to a practice before was the North Manhattan sidewalk coming back from Aggieville. This time I saw more than the band members' legs marching in step and more than their instruments gleaming in the sun. I saw faces grimacing or laughing or full of concentration.

And I saw more of the cheerleaders than kicking legs and flipping bodies.

I could tell what I saw were cheerleaders that were peppy and attractive and outgoing and popular. That's the popular image, and I did see those qualities.

But, close up, I saw a lot more than that. I saw what a heck of a lot of energy they put out for some good cheers, and I saw that while they're doing it they sometimes get frustrated and sweaty and wrinkled, and yes, sometimes they forget to smile.

And if you're thinking that section 29 has the worst view in the whole stadium, then get a closer look, down in the "cheerleaders' section." You'll see that shoulder pads are very good for blocking — especially your view.

...play
it again,
Vince!

Wildcat runners capture second in Big Eight meet

The K-State track team put its best foot forward in an attempt to fill the shoes of the successful 1972 squad. The Cats, in some ways, found the shoes a comfortable fit.

In indoor dual track competition, the Wildcats registered a perfect record. But despite its indoor record, the baby-faced squad was left in the pistol smoke at the Big Eight Indoor Track and Field Meet. The Cats finished a listless sixth.

The indoor track season proved to be merely the first step on the bottom rung of the ladder; the outdoor squad climbed to loftier heights.

K-State opened its outdoor campaign in a triangular meet against Tennessee and the awesome Texas Longhorns. The Cats finished third.

Dixieland jazz country set an upbeat tempo for the sagging cindermen. At the Louisiana State Quadrangular in Baton Rouge, La., the 440-yard relay team tied the K-State school record with a 40.2

clocking. The Wildcats began to come of age as they finished second in the four-team meet.

K-State floundered in its first stop on the Triple Crown circuit. When Josh Washington pulled a muscle in the preliminaries, the best the flashy 440-yard relay team could do was to settle for sixth place.

Before 15,500 Memorial Stadium spectators in Lawrence, the 440-yard relay squad — Josh Washington, Fred Merrill, Dan Fields and Dean Williams — won the first K-State baton on the relays circuit.

In the Drake Relays, at Des Moines, Iowa, the foursome tied the best time record in the United States for 1973 (the record was later broken in the NCAA meet) by sprinting to a 39.8 clocking.

"Do you realize we would have made a grand slam (triple crown) if I could have run at Texas?" Josh Washington said.

In the Drake Relays, Rick Slifer, using the Fosbury Flop, leaped into the K-State record books by becom-

ing the second Wildcat high-jumper to clear seven feet.

K-State began warming up for the Big Eight meet by renewing a dual meet rivalry with KU for the first time in 15 years. KU squeezed by the marauding Cats.

KU continued its perennial mastery of the Big Eight meet by huffing and puffing its way to a seventh consecutive championship. K-State finished second on its newly christened R.V. Christian track. The Cats tallied 110 points, the most a K-State track squad has ever scored in the Big Eight championship.

The Wildcats entered the NCAA outdoor track and field championship — the national showcase of college athletes — with a shot at the national title in the 440-yard relay. Because of two poor handoffs in the preliminaries, the Cats failed to qualify.

The locker room doors slammed shut on another track season, but the young team already had its foot in the door for next season.

Top left: K-State's Tim Porter throws the javelin in the Big Eight meet in Manhattan. Top center: Cats' Bill Kehmeier concentrates on his timing in the 120-yard high hurdles in Big Eight meet. Bottom left: Tom Brosius sets to throw the shot put. Bottom center: K-State's Dean Williams finishes first in the 400-yard relays. Bottom right: Track Team — Top row: DeLoss Dodds, John Hardwick, Lonnie Harri-

son, John Gillaspie, Mike Lee, Larry Combs, Dean Williams, Vance Rolands. Middle row: Phil King, Robert Obee, Rick Slifer, Bob Fingland, Don Akin, Tim Porter, Don Marrs, Jim Williams, Keith Peterson. Bottom row: James Hinchiffe, Fred Merrill, John Feltner, Keith Palmer, Bill Kehmeier, Ted Settle, Jeff Schemmel, Al Kolarik, Craig McVey.

Wildcat runner's hopes jolted

K-State's cross-country team returned seven letterman who had finished fifth in the Big Eight and third in the NCAA district last year.

On the basis of time-trial performances and workouts in the early fall, Coach DeLoss Dodds visualized "doing better than any cross-country team I've had at K-State."

Dodds' expectation soon gave way to another realization.

The five-milers expecting a dual match up with North Texas State were informed the night before the meet that Arkansas had been added to the competition. Arkansas outdistanced the Cats with 21 points, followed by K-State's 38, and North Texas State's 79.

Despite being slowed down by a few injuries and the common cold, the Wildcats put on a virtuoso per-

formance against Nebraska to whip the Cornhuskers 20-42. The fifth place Wildcat runner was within thirty seconds of K-State's frontrunner.

In a triangular meet the following week, Don Akin and Keith Palmer paced the Wildcat long distance runners as K-State eked past Wichita State 30-31. Drake scored 71 points.

The cross-country squad was forced to run without three top runners in a meet at Columbia, Mo. Although the Cats were able to make a run at Missouri, the Tigers outdistanced K-State, 25-32.

The realization of plummeting expectations was underscored by a disappointing fifth place finish in the Big Eight meet in Norman, Okla. Only one Wildcat runner finished in the top 20.

Top left: Cross-country squad sprints through a Manhattan neighborhood during practice. Top right: K-State's Dave Runnberg attempts the seventh hole at the Manhattan Country Club. Bottom left: Cross-Country Team — Top row: Ted Settle, Craig McVey, Keith Palmer, Chris Perez, Lennie Harrison, DeLoss Dodds, John Feltner; Middle row: Jim Glaze, Bob Prince, Jim Hinchliffe, Roger Wenter; Bottom row: Don Akin, Dennis Artz, John Gillaspie, Jeff Schemmel. Bottom center: Golf Team — Top row: Ron Fogler, Dave Runnberg, Brent Olney; Bottom row: John Hemley, Gordon Lewis, Paul Anderson. Bottom right: Runnberg studies green as he lines up his putt.

Golfers finish fifth in league

K-State's 1973 golf team returned four golfers from the previous year's squad.

But for some reason, experience was not the Wildcats' best teacher as the quality of play failed to maintain consistency in their spring competition.

The Wildcats opened the season with a respectable fifth-place finish in the Shawnee (Okla.) Invitational. Approximately 25 teams participated in the tournament.

K-State's golfers had no dual matches in 1973. Instead, the Cats swung the irons in the Kansas, K-State and Missouri Invitationals. The golfers also competed in the Drake Relay Invitational.

K-State's inconsistency of play was typified by its disappointing fifth-place finish in the Big Eight Meet.

Rifle, bowling squads capture personal laurels

For the first time since 1968 the Wildcat rifle team received financial aid from the Student Governing Association. Women expressed greater interest than in the past.

The team, equipped with .22 caliber Anschutzes and Winchesters, curtailed its activities slightly in 1973-74 because of a duel with the energy crisis.

But despite the battle with the fuel shortage, the team competed in a number of shooting matches.

In K-State's prestigious "Turkey Shoot," the team finished fifth.

Throughout the season Don Jordon, Joe Nobel and Bill Ahrens provided the big guns. The rifle shooters also competed in matches in Colorado, Missouri, Montana, Nebraska and South Dakota.

K-State's bowling team answered the threat of the energy crisis by renting a bus.

The team competed in the Mid-State Postal League, where scores are sent to a central location.

In the Kansas-Nebraska Conference, the K-State men's team took first place, while the women finished second. The men bowlers captured third and fifth places in doubles in the regional American College Unions International (ACUI). The women bowlers ranked fifth in doubles.

Frank Kleczka's first place finish in men's all-events competition, qualified him for a spot in the ACUI national tournament.

Top: Bowling Team: Top row: Steve Case, Gary Rensner, Doug Stark, Kevin Fry, Bill Garrett, Ron Chester, Bob Vanderberg, Frank Kleczka, Dave Montgomery. Bottom row: Sharyl Klema, Betsy Krause, Debbie Carrel, Kathy Murphy, Sue Savage, Barb Emery, Mary Call. Bottom row: Kerry McCaig, Marlene Oswald, Margaret Schoap, Laurie Ott, Sandra Singer. Bottom center: K-State's Mick Lynch exhibits his follow-through in a serve against Washburn. Bottom right: Wildcat's Fred Esch returns volley in match against KU. Bottom lower right: Freshman Terry McCreary grips racket with both hands as he attempts to pop the ball over the net.

Money crunch hinders tennis team's chances

The Wildcat tennis team didn't register much net gain in 1973.

A 6-10 record in dual-match competition and a sixth-place finish in the 38th Big Eight Tennis Championship helped serve as a commentary on the underlying financial problems of the tennis program.

For instance, as the well-financed Missouri team boarded a plane for competition in Hawaii, the low-budgeted Cats piled into cars for match play in Colorado.

"We simply don't come close to having the money for athletic grants that is required to compete against most teams in the Big Eight. It is a

matter of money to get better players. If we had scholarships, we could get better players than we have," Karl Finney, tennis coach, said.

Tennis' traditional adversary, nature, made early March practice sessions difficult. The gusty winds on Tornado Heights — Washburn courts — presented more problems than weak backhands or faulty serves.

The team had its first thorough "practice" on its southern tour and returned home with a 1-3 record.

Regular-season Big Eight competition proved a strain for the Wildcats. The Cats managed only two

match victories, both against cellar-dwelling teams.

The Big Eight championship is determined by points accumulated during the season in round-robin play and championship tournament play. The Oklahoma Sooners went to the Big Eight tournament with a whopping edge over second place Colorado in the points race.

But the Cats didn't have one entry in the singles or doubles finals of the tournament.

K-State, which finished the tournament with 25½ points, found that there was plenty of love lost for the season.

Wildcat nine salvages respect

Inexperience characterized much of the Wildcats' early season play.

But despite a 20-25 season, the Wildcat nine played the giantkiller role as they felled nationally-ranked Tulsa University and silenced the bats and title hopes of the Oklahoma State Cowboys in the final series of the season.

The K-State baseball team lost 11 games by one run, six games by two runs. With 41 players on the roster, 23 were playing on the squad for the first time.

The predominately young and inexperienced team, under first-year coach Phil Wilson, had a sample of Southern inhospitality early in the season. The Cats traveled south and lost their first eight games.

"We don't get the key hit, the big defense play or the good pitching effort right when we need it the most," Wilson said.

Freshman right-hander Andy Replogle hurled a no-hitter against Creighton University early in the season but went down to defeat.

In the Big Eight opener against offensively potent Colorado, Replogle's no hitter was ruined by a mis-

judged flyball which fell between two fielders.

After the first division Oklahoma Sooners swept a three-game series, the Wildcats were all but mathematically out of the Big Eight race.

The Cats then began a surge that added luster to their dulling diamond activities.

A doubleheader sweep against Missouri helped to patch the morale-scarred Wildcats.

"We needed these victories psychologically more than anything," Wilson said.

Lead by freshman outfielder, Steve Anson and second baseman, Kem Mosley, the Cats began to use timely hitting and clutch pitching. The Cats forced their way into a fourth place, 9-11, finish in the league.

As the spoiler team in the Big Eight, the Cats, at one point, threatened the third place position of Colorado.

Next season's league leaders may have to contend with a Cinderella team that might find the crown and castle comfortable.

Top center: Dave Specht gets back to base. Top right: Teammates congratulate pitcher Stu Lindell after win over Iowa State. Bottom left: Kem Mosley heads for first base against KU. Bottom center: Freshman pitcher Andy Replogle hurls a no-hitter against Creighton in a losing effort.

Top row: Phil Wilson, Bryan Read, Mike Hampton, Stu Lindell, Paul Klipowicz, Dave Klenda, Randy Brucker, Kem Mosley, Curt Shockey, Lon Kruger, Dave Specht, Gary

Guesnier, Gary Holub, Jim Peterson, Mike Chapman, Jack Woolsey, Bottom row: Mike Austerman, Jim Kick, Tim Whitson, Don Hoffman, Steve Reser, Scott Scholbe, Steve Anson,

Kevin Wilkinson, Andy Replogle, Jay Parker, Paul Kincaid, Ken Lerhmann.

Minor sports survive budget crunch . . . again

By David Chartrand

It was a rough year for some, and just plain frustrating for others. But for non-revenue producing soccer, rowing and women's athletics it was both.

These minor sports, as they are popularly called (much to the chagrin of their coaches), get into the wind every year like hay fever, making people uneasy and in bad spirits.

Voices thunder in Student Senate accusing the Athletic Department of pouring funds into the monster mouths of football and basketball while the urchin Non-Big Eight athletics starve.

Athletic Council points to its budget sheet, sees only red and says its financial hands are tied.

And just when things look the worst, Student Senate feels sorry — or guilty — about the minor sports and allocates them just enough to squeeze by another fiscal year.

It happens every spring.

In May 1973, the three groups presented Student Senate with a \$10,000 request: \$5,000 for women's sports, \$1,500 for soccer and \$3,500 for crew.

The initial recommendation by senate's Finance Committee was to give all three a big zero.

The sentiment voiced then by finance chairman Matt Smith, which was to be repeated by the senate in varying emphasis for months, was that minor sports were Athletic Council's baby.

In short, this was a battle relived. Senate was making, once again, a statement of principle rather than prejudice.

The senators said they wanted soccer, rowing and women's sports to be funded. And they were willing to help out. But few of them were ready to stomach completely funding any athletic team.

And it was obvious that many of the old-timers in senate had simply had their fill of Athletic Council in general.

But a complete nix to the non-revenue sports seemed a bit drastic. As a result, senate's tentative spring

allocation read: \$5,000 to women's athletics, \$3,000 to rowing and \$1,000 to soccer — with one crucial stipulation.

As a measure to prod Athletic Council to action, Senate voted that the \$9,000 would be forthcoming IF AND ONLY IF the council matched that amount.

Senate's constitution requires it to finalize allocations within the first three weeks of school.

In early September, senate plowed through final allocations, but at some disadvantage because of the minor sports issue.

However, Athletic Council's first scheduled meeting was slated to be held four days after senate's last day of allocations.

Worse yet, senate could get no word from chief of the Athletic Council, C. Clyde Jones, as to how that group *might* react to senate's decision to fund the sports only if the council matched senate's allocation.

But the unofficial forecast was dark.

Senate's student liaison, to the Athletic Council, Harry Phillips, reminded his colleagues the council was more than \$60,000 in the red in season ticket sales.

So senate was demanding (if one may interpret "if and only if" as a demand) some \$12,000 in matching funds from a council that was already sweating debt.

But the senate stuck to its dollar guns and gave the minor sports a \$9,500 allocation, the increase being a \$500 addenda to the crew for Don Rose's salary.

And then it was the Athletic Council's turn.

In an open meeting the campus got its first look in many moons at the people and feelings that make up the Athletic Council.

As a prelude of things to come, Hindman Wall, the body's business manager, reported the council was not \$60,000 but \$90,000 behind in sales, calling the budget situation "extremely critical."

The council then proceeded a la chairman Jones, to scold Student Senate for overstepping its bounds and handing the council what Jones called an "ultimatum" or threat.

Jones and others on the council felt senate should have allocated its money as it saw fit and let the council do likewise.

And finally, a number of council members stated emphatically the body was charged by the Big Eight to fund certain sports and those sports only.

Since the minor sports are not among those authorized by the Big Eight, any attempt on the council's part to give those sports money would be illegal, they said.

The council defeated, narrowly, all motions for the minor sports.

One week later, senate listened to last hope appeals by crew, soccer and women's sports.

The senators, out of sympathy for the minor sports and not wanting to be blamed for killing the three programs, once more played the good Samaritan.

New allocations of \$5,000 for women's sports, \$4,000 for rowing and \$1,000 for soccer were proposed and approved.

So non-revenue producing sports skinned through another year.

Meanwhile, the Athletic Council went to work with the councils of the other five state schools and the Board of Regents recommended the state provide \$775,000 in subsidy funds for the athletic programs of the six schools.

K-State's share was recommended to be \$190,000.

Immediate reactions of legislators to this proposal were anything but good.

But one thing is certain.

The side-by-side existence on this campus of three precariously subsisting sports and an Athletic Council *possibly* surprised by public funds, will insure a great deal more controversy before the denouement of this overdone drama.

Multiple sports skills, endurance prerequisites for soccer players

K-State's soccer club is a unique mosaic of well-scrubbed midwestern students and foreign students from Brazil, Nigeria and West Germany.

A soccer player, unlike a football player, must have a wealth of playing skills. He must have 90 minutes worth of wind and the ability to dribble, pass, shoot and run.

K-State's spring and fall soccer clubs flaunted an abundance of talents as they carried on the tradition of being one of the school's most consistent winners.

K-State's spring soccer club

compiled a 9-2 record, with a second place finish in the Big Eight Tournament. The fall club strutted its talent before the opposition by assembling a 6-1-1 record.

The key to the fall club's offense was the intermingling of American and foreign students.

Nevertheless, soccer players Ron Cook, Frank Sauerwein, Mark Nobrega and Dean Zagortz gathered a few personal laurels when they received invitations to participate in a regional tryout for the U.S. Olympic team.

Top left: K-State soccer player deflects goal-bound ball. *Top right:* Soccer Team — Top row: T. J. Winter, Dennis Cook, Mark Nobrega, Ron Cook, Dean Zagortz, Dennis Hickey. Bottom row: Bernie Hoepfner, Lester Urban, John Deichmann, Steve Ball, Mike Gravino, Frank Sauerwein. *Bottom left:* Varsity Eight

Rowers: Bruce D. Remsberg, Warren L. Rose, Arthur C. Nietfeld, Bradley R. Myers, Nicholas J. Giacobbe, Thomas J. Moehlman, Rex L. Tjaden, Larry C. Bonczkowski, John D. James. *Bottom right:* Varsity Four Rowers: Rory O. Turner, Ronald L. Dyke, Phillip C. Robinson, Jack G. Byers, Jonathan Q. Hyde.

Crew among nation's top teams

"Are you ready? Ready all. Row!"

The 60-foot rowing shell lunged through the frigid April waters. A persistent head-wind pressed against the tense backs of the eight crewmen as their oars rhythmically responded to the bellowing chant of their coxswain.

As the shell sprinted two lengths ahead of its nearest opponent, one heard the deep gasping of the victorious crew.

K-State began its tenth rowing season by sweeping its first three races against regional foes, up-ending Washburn, St. Thomas (Minn.) and Nebraska.

In the newly formed Midwest Association of Rowing Colleges Regatta on Lake Wingra in Madison, Wis., the varsity crew finished second to Wisconsin.

The Carnegie Cup Race in Princeton, N.J. provided an opportunity for the crew to vie with prestigious rowers of the Ivy League.

"Unfortunately, the crew rowed high, wild, rushed and without finesse to finish last," Don Rose, varsity rowing coach, said.

The Cat crew stroked to victory in the varsity four and singles scull-

ing race in the Wichitennial River Festival. In a regular season finale, Minnesota's crew over-stroked all the way and cranked up a rip-roaring sprint to edge the Wildcats by 10 feet.

For the third year in a row, K-State's varsity crew finished among the top 10 in the nation. On the opening day of the national championship in Syracuse, N.Y. the varsity eight defeated two national powers, Columbia and Cornell.

On the final day, the Varsity eight gained "some of the swing and timing necessary" for a top-10 finish. The varsity four finished sixth in the nation, K-States freshmen were 14th.

With the discipline of Roman galley slaves, the crew submits itself to the commands of its master, Don Rose.

Although the team has rowed against some of the nation's toughest crews, the upstream battle against Student Senate and the Athletic Council funding has proved its fiercest match.

But, any further "crew cuts" for the well-disciplined rowers could prove a hair-raising experience for the opposition.

Top left: Wildkittens' Susie Norton goes up for a shot in the conference championship game against the KU Jayhawks. Top center: K-State's Terri Laswell battles for a shot against a KU defender. Bottom center: Wildkittens' Marsha Poppe dribbles down-court as co-league leaders K-State and Fort Hays State battle. Wildkittens trample foes en route to league title

K-State's Wildkittens basketball team was greeted at home with rows of empty bleachers. The cavernous echoes of screaming teammates and a hand full of well-wishers had to substitute for the frenzied inspiration of standing-room-only crowds.

But despite the vacant grandstands, the Wildkittens assembled a winning season, emerging as one of the nation's leading teams.

The Wildkittens' first competition of the year was against three Oklahoma teams in the Enid (Okla.) Thanksgiving Tournament. After winning the first two contests, the Kittens fell to Phillips University 43-33 in the championship game.

In its first league and home game, K-State relied on the scoring of Susie Norton, Rose Holm, et. al. to outclass Washburn 78-16.

In action against regional rival Central Missouri State, K-State fell victim to a third quarter scoring drought. And a Central Missouri basket with 17 seconds on the playing clock lifted the visitors over the Wildkittens, 54-52.

The following week, the Wildkittens encountered highly regarded John F. Kennedy College (Neb.). K-State kept pace with the Patriettes throughout the game and narrowed the gap to 48-47 with 48 seconds on the clock. But the taller Patriettes connected for two quick baskets to

dash the hopes of the upset-minded Kittens, 52-49.

The Wildkittens boosted their season record to 5-3 with wins over Haskell College and Southwest Missouri State. Janet Reusser's 17 points paced the Wildkittens' 66-56 conquest of Southwest Missouri.

K-State continued to be a league pacesetters as they overwhelmed Benedictine College, 63-24.

The following weekend, K-State registered two key road wins to lift their record to 8-3.

K-State remained unbeaten in league play as they continued to roll over conference opponents. But-tressed by a balanced scoring attack, the Kittens rolled over hapless Wichita State, 87-21.

An early season confrontation between the Kittens and co-league leader Fort Hays State turned into a mismatch as K-State turned a tight first quarter lead into a complete rout.

Freshman reserve Marsha Poppe came off the bench to pump in 2 points in the 67-39 conquest.

Poppe continued to enjoy her new-found star status as she led the K-State offense against Benedictine. Her 21 points led the 68-30 blitz.

K-State tumbled from the ranks of the league's unbeaten when they

lost to cross-state rival Kansas, 42-39.

Playing their third game in four nights, the weary Kittens traveled to Iowa State. K-State committed 31 turnovers, but still managed to defeat Iowa State, 59-42.

K-State moved into sole possession of first place the following week with back-to-back wins over Wichita State and Fort Hays State.

The Wildkittens continued their march to the league title with a record-breaking offensive performance against Haskell College, 94-20.

In a mid-February road trip, Grandview College (Iowa), used their height advantage to outlast K-State, 60-49. The next night, William Penn College mounted an 11-point lead early in the game and held the Kittens at bay for a 58-47 win.

The following Thursday, the Wildkittens routed Washburn. The next night two thousand fans watched K-State annihilate the title hopes of the Jayhawks.

The Wildkittens player-to-player defense and run-and-shoot offense completely overwhelmed Kansas. After leading at the half, the Kittens cruised to the title throne with a 67-27 win.

The victory boosted K-State's overall record to 17-6 and assured them of a berth in the state tournament.

Top left: Wildkitten Teri Anderson finishes the last lap of the mile in Ahearn Field House. *Top center:* Susan Sageser returns a serve against KU. *Bottom center:* K-State's Lynn Morgan dives in inward pike position in competition against the Jayhawks. *Bottom right:* Gymnast Susie Campbell comes out of an aerial cartwheel in a meet with Washburn and Wichita State.

Women athletes score in traditionally male realm

"Because you're a woman" didn't stop women athletes from competing in 1973.

Such great women athletes as gymnast Olga Korbut and tennis star Billy Jean King added their names to the roster of top athletes this year.

At K-State, women athletes were also making names for themselves.

Eight women qualified for the National Track Meet at California State University, Hayward, Cal.; the Wildkitten Basketball Team was assured of a berth in the 1974 National Women's Basketball Tournament; the newly formed Catfish Swim Team qualified a relay squad for nationals and a tennis team placed second in state competition at Salina.

The addition of tennis, softball, track and field, swimming and gymnastics programs meant K-State women were finally seeing some long-awaited progress.

Judy Akers, director of women's sports at K-State, cited her job as an example of progress.

"I am one of a handful of full-time women's athletic directors in the nation. Most of the directors are instructors in the physical education department and handle the job on

the side," she said.

Members of the women's track team were among those women given the opportunity to compete between events at some men's indoor meets.

"We didn't have any indoor meets scheduled last year, so we were able to run our events between the men's and use their officials," Barry Anderson, coach of the women's track team, said.

Swimming, which is strictly a women's sport at K-State, made its debut in 1973. One of its accomplishments was sending a 200-yard freestyle relay team to the National Swim Meet at Pennsylvania State University.

Perhaps one of the bigger steps for women's athletics in 1973 was the formation of a council, appointed by President James A. McCain, to study the problems of non-revenue sports, particularly those for women.

It has been reported \$1 billion a year is spent nationally on athletic programs, but the female half never has gotten a run for their money.

It appears that the situation is much the same at K-State.

A bill to go before the 1974 Kansas Legislature will request state aid for minor sports and women's ath-

letics, maybe easing the financial burden.

Money was not the only problem facing women in 1973.

The image of the female "jock" continues to linger, causing some K-State women to defend themselves.

"Women need a goal to strive for, too, and we are willing to sacrifice time and effort to reach it. It means just as much to me to make a team as it does to a man," Janet Reusser, Wildkitten basketball player and a four-year national competitor as a hurdler in women's track, said.

In addition to social comment, K-State's women athletes also say other factors are working against them, such as scholarships and media coverage.

"Not one scholarship is offered to women here, and there are very few throughout the country," Akers said.

Large crowds, social acceptability and financial backing or not, K-State's women athletes will continue to pursue their goals in athletic competition.

And as one K-State athlete said, "We're females who like sports and go out for them we are no different than any other athlete."

Wrestlers finish fourth in Big Eight Tournament

K-State's wrestling team began the 1973-74 season under the guidance of new Head Coach, Fred Fozzard.

Fozzard reaped the rewards of his new job when his team won an opening contest with Drake, 21-16.

But the new coach had to face the anxieties of coaching when his team was riddled with four injuries in the Oklahoma City Tournament. A further blow was struck when the Cats lost the services of Richard Taylor, who cracked a rib in the Iowa State Tournament.

In a home match against Southern Illinois University (Edwardsville), the visitors out-muscled the Cats in the upper weight divisions to defeat K-State, 21-13.

In the Central Missouri State Tournament, K-State swept through seven opponents, winning four of the 10 individual titles and carting away the team title with 132.5 points.

The wrestling squad continued to pave a path of improvement as they routed Wayne State, 41-2.

After returning from a month's recess, K-State's lack of punch in the upper weight classes became glaringly apparent as small college power South Dakota State beat the Cats, 29-14.

The wrestlers bounced back in the Northwest Missouri State Tournament the following week by placing second in the eight-team tournament with 95.5 points.

In double dual competition the Cats defeated Central Missouri State, 27-16 and Southern Illinois University (Edwardsville), 19-17.

After mounting a 19-9 edge over Nebraska in the first eight matches, the Wildcats had to sweat out the last two matches to eke by the Cornhuskers, 19-18. The following night, the University of Omaha squeezed by the Cats, 19-15.

In a home match against Moorhead State, the Cats boosted their dual record to 6-3 with a 38-3 shelacking of the visitors.

Roger Fisher and Wayne Jackson suffered their first losses of the season as the Wildcats finished sixth in the Oklahoma State Tournament.

The Cat's season record dipped to 6-4 with a 25-13 setback to Missouri. The following weekend, K-State dropped a close match to Southern Illinois University (Carbondale), 21-18.

On the Cats southern tour, the wrestlers defeated Fort Hays State 35-2 and then lost to Central State (Okla.), 25-15 and Oklahoma, 38-6.

K-State completed its travels with a fourth place finish in the Big Eight Tournament. Four Wildcats qualified for competition in the NCAA tournament at Ames, Iowa in mid-March.

Barnes, Leon Younger, Tony May, Charlie Frakes. Bottom row: Bill Crosby, Richard Taylor, Dick Cramer, Chuck Merritt, Pat Zahner, Paul Nelson, Bruce Randall, Wayne Jackson, Mark Jackson, Roger Fisher. Bottom center: K-State's Wayne Jackson uses a single leg

sweep in a take-down against SIU. (Carbondale) wrestler. Bottom right: Gymnastics Team — Top row: Larry Estes, Wayne Oatman, Tim Schaid. Bottom row: Jim Stegeman, John Nowicki, Clarence Yost, Ben Strafuss, Randy Nelson.

Gymnasts taste agony of defeat

K-State's gymnastics team experienced a season that most coaches prefer to call a "rebuilding year."

First year Coach Randy Nelson stepped into a job that had been abandoned twice in two years. Consequently, the turnover in coaches had hindered K-State's ability to recruit.

The Wildcats opened their season with a sixth place finish in the Big Eight Invitational. In early December meets, the gymnasts were unable to place anyone in the top eight in either the Rocky Mountain Open or the Colorado Clinic.

The gymnasts won their first dual meet with a close 90.9-87.5 victory over Central Missouri State in mid-January.

In their first triangular, the Wildcats finished last to KU and Northern Iowa. The Jayhawks finished first with 155 points, followed by Northern Iowa with 139 and K-State with 113.

The Cats dropped another triangular the following week, scoring 102 points. South Dakota State took first with 120 while Eastern New Mexico tallied 105.

In Big Eight competition with

Nebraska the next night, K-State confronted some of the nation's leading gymnasts. The Cats were unable to take any firsts. Larry Estes captured third place in the pommel horse and Tim Schaid landed third in all-around competition.

In a dual meet with powerful Iowa State, the highest the Cats could place was fourth as the Cyclones buried K-State, 161.9-103.15.

The Cats suffered another setback the next night to Fort Hays State, 134.05-104.40. K-State captured firsts in the pommel horse and the parallel bars.

K-State's dual record continued to plummet with back-to-back losses to Colorado and Northern Colorado. Estes and Schaid again captured firsts in the meet with Northern Colorado.

The Oklahoma Sooners overpowered the Wildcats 152.05-96.9 with only two K-State gymnasts placing in the top three.

In a rematch with South Dakota State, Schaid took first in the pommel horse and third on the rings. But the Dakotans still won the meet, 125.75-99.95.

Students give rec complex ax

Faced with spiraling meat costs, rent increases and tuition hikes, students flocked to the voting booths in record numbers in February 1973 to reject funding for a proposed \$4.7 million recreation complex.

Nevertheless, independents, residence halls, sororities and fraternities continued to stand in line for handball and tennis courts. Basketball devotees shunned sleep to make hook shots in Ahearn. Watersports lovers splashed in the newly opened natatorium.

1973-74 witnessed a mounting interest by women in intramural sports. Recreational Services, the new name for the the intramural department initiated coed water polo.

While students played, Recreation Program Director Raydon Robel worked at piecing together the scraps from the previous year's upending of the recreation complex proposal.

As Robel continued to stump for expansion of recreational services' budgetary waistline, the availability of facilities remained lean.

Speculation that a new basketball arena was in the making prompted interest in the possible

adaptation of Ahearn into a recreational complex. Robel scurried about in hopes of getting a grant from Education Facilities Laboratory for a feasibility study on Ahearn's potential for recreation.

Robel's interest in the study appeared to have been motivated by a fear of getting stuck with a useless structure.

"We don't want to be left sitting with a white elephant," he said.

In the spring of 1974, recreational services asked for a \$5 line item, and increase of \$3.20 from the previous year. Half of the money would go to the current program. Other funds would be earmarked for construction of handball and tennis courts, while part would be placed in the coffers for future expansion of facilities.

Whether a Student Governing Association subcommittee would approve the recreational service request for a line item increase remained a task for seers.

A generation, nevertheless, fed on the Wheaties-Plato philosophy of a strong body and mind continued to fall victim to repeated requests for its inflated dollar.

Bradley dumps Wildcats, 68-64

The christening for the Commissioners Cup's maiden voyage in cavernous St. Louis Arena was not without fiery controversy.

Although K-State unabashedly elected to accept an invitation to the tourney, Indiana's fireball coach Bobby Knight blasted the tournament as a waste of time.

Knight argued that Indiana was Big Ten co-champ with Michigan and therefore deserved better than a tournament for runner-ups.

But actions speak louder than words. If Knight didn't consider the tournament important, his players did. Indiana won the cup.

The Wildcats placid acceptance of the tournament led to an injection of the St. Louis Blues.

Playing against Bradley sans 30-second clock and three officials, K-State found that basketball can be a contact sport.

The Missouri Valley runner-up physically battered the Cats with moves that would have sent Big Eight players to the bench early.

Consequently, the Cats fell behind 30-14 with 10 minutes left in the first half.

The Cats finally began to catch on when Larry Williams threw a hip into Bradley's Tom Lee. Lee was canned and Williams was on his way. K-State, learning the tricks of the game, closed the Braves' lead to nine at the half.

The Cats continued to chip away at Bradley's lead in the second half. Doug Snider hit back-to-back shots with 5:05 left to narrow the Braves' lead to one.

But K-State could never gain the lead as Bradley held on for a 68-64 win.

The four Cat seniors bowed out with less aplomb than to which they had been accustomed. Kruger and Williams tallied only 12 points each as the class of 1974.

For the seniors, the season had not ended with a bang. Instead the end was marked by a whimper.

Wildkittens falter in tournament

Immaculata College (Pa.) is more than just a three-time champion in women's collegiate basketball.

It's a shining symbol of women's accomplishments in sports.

Sports Illustrated featured an article on Immaculata's "Bill Walton," Theresa Shank.

MS magazine trumpeted the Immaculata cause with an article on the team.

It was no surprise when the Mighty Macs were named the top-seeded team in the National Association of Inter-collegiate Athletics for Women Tournament in Manhattan.

The Pennsylvanians came prepared. Equipped with galvanized scrub buckets as substitutes for drums, a three-busload contingency of Mighty Mac fans made its way down the long and winding interstate that leads to Manhattan.

K-State, despite a third-place finish in the regionals in South Dakota, received an automatic berth in the tournament for being the host school.

The Wildkittens' consolation: a first round confrontation with the Mighty Macs.

After trailing 37-28 at the half, the Wildkittens began hammering away at the Immaculata lead. K-State came within three points in the final quarter, but a series of turnovers and

cold shooting ended the chance for an upset. The 50-40 win advanced the Mighty Macs into second round competition.

In the consolation round against Wayland Baptist College (Tex.), the scrappy Flying Queens used a tough defense to force the Wildkittens into numerous turnovers throughout the game.

The 49-34 win for Wayland was won as much by politics as by team play.

One official awarded the win to K-State by default when Wayland failed to return in time for the start of the second half.

But after a discussion with the Flying Queens' coach and tournament officials, the referee reversed her decision.

The loss eliminated K-State from further tournament play and dropped their season record to 21-9.

Wildkitten uniforms were checked in and the players took their places in the grandstands with the other spectators to watch the other teams battle for the championship.

Right: Duffle-bag in hand, senior Gene McVey takes his last walk from the locker room as a Wildcat. *Top center:* Fans join in cheers for Mighty Macs. *Top right:* Coach Judy Akers instructs Wildkittens on defensive patterns. *Bottom center:* Wildkitten Janet Reusser attempts to pass ball to teammate.

tom row: Don J. Glaser, Courtney B. Jones, Randy A. Howell, Mike K. Ramsey, Dana E. Brewer.

Business Council: governing board

Top row: E. Starr Thurman, David A. Brown, Carol R. Fisher, Rick L. Patton, Mary Jane Schmitz, Franci J. Johnson, Mike S. Towell. Second row: Mark S. Olson, Douglas W. Yenzer, David L. Swanstrom, Mike C. Doer-

ing, Dave T. Raden, Pat L. Anderson. Bottom row: Richard E. Lohrmeyer, Doug K. Wittmer, Marty L. Allison, Patrick J. Bolin, Mark G. Mingenback, Matt W. Smith, David H. Walter.

CAPERS: coed affiliates of Pershing Rifles

Top row: Rita M. Screen, LoEtta M. Nelson, Pamela Y. Green, Janet S. Pletcher, Belinda A. Pfeifer. *Second row:* Leigh Ann Kenagy, Ilene A. Ellis, Sharon P. Dalrymple, Jane M. Peterson, Christine M. Whipple, Roxanne Morganstern. *Third row:* Ann E. Bales, Judy Peterson, Cathy Carri-

ker, Jill Bartley, Terri D. McCandless, Sherrie Conley. *Bottom row:* Terry P. Bartkoski, Elizabeth A. Cramer, Merwyn J. Reed, Gloria A. Atkinson, Kenneth E. Hebrank.

Circle K: service organization, Kiwanis affiliate

Top row: Sandy J. Saint, Debbie L. Stoskopf, David R. Hubin, Tom B. McCoy, G. Orval Ebberts. *Second row:* Alice M. Thornton, DiAnn M.

Shuler, Melody L. Compaan, Francis J. Griebel. *Bottom row:* John M. Ellis, Ted D. Easter, Keith L. Carr, David A. Heiman, Lee H. Gale.

Clothing And Textiles And Interior Design: interest group

Top row: Jill L. Stewart, Juanita J. Ahrens, Ruth M. Sawin, Denise E. Hartter, Joy L. Rei, Janet M. Simpson, Janet L. Siler, Debra A. Cook, BeLinda A. Pfeifer. *Second row:* Starla J. Krause, Jacqueline Herl, Brenda E. Cloutier, Karen S. Kepka, Carol A. Maas, Cheryl E. Cope, Kandy A. Kimple.

Third row: M. Marki Rush, Tonya R. Danford, Lana J. Woolery, Ginger A. Knight, Susan K. Rous, Shelley L. Selfridge, Joanna L. Menges. *Bottom row:* Marilyn A. King, Sheila A. North, Marcia L. Campbell, Janice M. Leeberg, Shirley M. Dick, Barbara I. Roe.

Collegiate 4 H: interest group

Top row: Susan C. Jones, Marian M. Wagaman, Mary L. Vaughan, Mary K. Robitaille, Carol S. Carswell, Cathy L. Carswell, Dee A. Lewis, Marcia A. Peimann, Susan G. Corbin. *Second row:* Cinda A. Topliff, Ashanna M. Smith, Deborah F. Hobbie, Sandra L. Shaw, Lila M. Gatton, Nancy S. Carnahan, Teresa A. Wingert, Lois J. VanCleave, Cindy M. Macy. *Third*

row: Beverly A. Boller, Jan A. Mills, Vicki L. Olaudt, Billy G. McDaniel, Jerald K. Ratliff, Donna R. Meyer, James J. Krueger, Brian D. Schexnayder, Norman L. Cooper. *Bottom row:* James F. Schesser, Steve A. Mein, Kenneth K. Kellogg, Andrew J. Schuler, Dan D. Murphy, Vernon L. Waldren, Kim L. Auer, Elaine M. Redenbaugh.

Top row: Ruth G. Dobbins, Teresa C. Millsap, Kay E. Hunter, Mary L. Milberger, Kathy K. Lindholm, Sheri A. Hunt, Vickie S. Baehler. *Second row:* Linda S. Clare, Juliana J. Hair, Barbara I. Roe, Carolyn K. Wittorff, Martha J. Cornwell, Melody Compaan, Charlene S. Kendall. *Third row:*

Linda A. Rothe, Peggy M. Jensen, Rick K. Koelsch, W. Dean Stoskopf, Beverly F. Droge, Marlene S. Stum. *Bottom row:* Richard H. Cott, David H. Carnahan, Marvin E. Sparks, William H. Slater, Mark W. Shuman, Leon E. Sylvester, Calvin L. Hair.

Consumer Relations Board: interest group

Top row: Martha L. Hindman, Jeanne L. Bane, Nancy A. Firebaugh, Judy E. Jones, Susan P. Bartel, Nancy L. Frick, Kandy L. Sams. Second row: Randy D. Adams, Don Weiner, Cathy A. Butts, Janet Frick, Rita K. Soder-

berg, Peggy Moore. Bottom row: Richard O. Retrum, Roger D. Lanksbury, Rhonda C. Fuessle, Lon R. Ackerman, Paul Blick.

Council for Exceptional Children: interest group

Top row: Rochelle Rockhill, Jennifer A. Russell, Naomi J. Hammeke, Jerrie L. King, Becky Nelson, Connie J. Bryan, Peggy Heidebrecht, Nancy Bayless. Second row: Melinda K. Headrick, Mary E. Miles, Vicki D. Purinton, Claudia M. Cunningham, Karen S. Crosslin, Kim A. Hay, Barbara

L. Stout. Bottom row: Carla R. Ellas, Vicki J. Eastwood, Marilyn L. Mendenhall, Carole A. Bolin, Darlene R. Daniels, Wendy J. Roberts, Irene K. Petrowsky.

Delta Sigma Phi: little sisters group

Top row: Jan Tyaack, Gayleen G. Wendling, Cheryl E. Cope, Janet M. Simpson, Sandra K. Clanton, Jan M. Leeburg, Susan D. Corpening. Bot-

tom row: Pam Hay, Mary E. Jecha, Nancy K. Grove, Pat L. Dougan.

Diamonettes: Kappa Alpha Psi little sisters

Top row: Joyt M. Givens, Winnona D. Dancy, Cheryl A. Hill, Lori J. Givens, Rhonda D. Rush, Sharon D. Johnson, Rebecca Chinn, Wanda J. Fletcher. Bottom row: Terri L. Terrell, Lorraine E. Breckenridge, Debo-

rah A. Fletcher, Sharon K. Johnson, Rosalind M. White, Angela P. Lassiter.

Education Council: governing board

Left to right: Dennis Hendrickson, David K. Martin, Craig R. Shove, Barb J. Beecher, Sue Sandmeyer, Karen J. Kinney, Margaret L. Fieser, Valerie

B. Hubbard, Karen L. Ruzick.

Educational Professional Section: interest group

Top row: Denise S. Russell, Vicki Diller, Linda S. Babcock, Carol S. Carswell, Cathy L. Carswell, Jane E. Gegen. Second row: Jacqueline B. Bungardt, Cora Sue McNall, Jill S. Hershberger, Vickie S. Baehler, Dee A.

Lewis. Third row: Diana L. Weyer, Belinda R. Neuharth, Yvonne K. Schmidt, Joyce E. Folk. Bottom row: Beverly A. Boller, Lois J. VanCleave, Margaret E. Anderson.

American Institute of Industrial Engineers: interest group

Top row: Robert A. Bascom, Gerald L. Esfeld, Gary A. Pepperdine, Masoud S. Ahmadi, Steven C. Johnson, Alan J. Rabas, Roger D. Baker. *Second row:* Marc A. Campbell, Larry D. Walker, Sidney D. Hoobler, Daniel L. Saucerman, Terry E. Cooper, Roger A. Stalcup. *Third row:* David C.

Everitt, Roger E. Gould, William E. Odell, Michael D. Chatham, Alan J. Siemer, David M. Handkins, Rex C. Vernon. *Bottom row:* Kent L. Manuel, Armin R. Mock, Robert W. Forrester, Cindy K. Langmacher, Robert W. Stone, Wayne E. Sanford.

Society of Agricultural Engineers: professional group

Top row: Richard K. Koelsch, Bruce A. Feldhausen, Kyle D. Swart, Peggy A. Gilliam, David A. Pacey, John A. Anschutz. *Second row:* William H. Neibling, Michael K. Ramsey, Warren D. Kelly, L. Frank Young, Nicholas

F. Koch. *Third row:* Douglas D. Kruse, Ray A. Dilts, Charles C. Nixon, Gale E. Maddy. *Bottom row:* Stanley J. Clark, Darryl D. Baldwin, William A. Cook.

Chi Epsilon: civil engineering honors committee

Top row: Jerry J. Westhoff, Francis A. Wiley, Gary L. Adams, Jon D. Nelson, Roy D. Hershberger. Second row: Karl E. Stickley, Roger A. Farrell, Kenneth K. Kellogg, John F. Donnelly, Wayne A. Duryee, Jerome J. Zovne. Third row: Richard L. Kussman, David L. Olberding, Rick F.

Biery, Alan L. Sylvester, W. Clay Adams. Bottom row: Donald R. Carlson, Maurice E. Dingler, Brent E. Remsberg, Rex E. Largent, Steven L. Blattner.

Engindears: engineering auxiliary

Top row: Cynthia D. Wyatt, Karen L. Shelley, Karen D. Graham, Ann B. Gray, Becky A. Price, Jan R. Townsend, Amy J. Weidenheimer, Brenda L. Moser. Second row: Kris K. Schrock, Dhera A. Taylor, Susan E. Rohles, Karen M. Cott, Sally E. Patton, Jill L. Hamlin, Cindy D. Schwartz. Third

row: Tammy R. Shattuck, Jackie E. Ehrsam, Terri J. Gammeter, Debbie L. Sommer, Donnita J. Barnes, Marilyn B. Shetter, Debi R. Swenson. Bottom row: Terri J. Sontag, Joan A. King, Susan B. Henderson, Penny R. Raile, Cyndy S. Broadie, Cathy L. Parr, Pat A. Reeder.

Engineering College Council: governing board

Top row: Gary A. McNaughton, John D. Wilson, Randy M. Newcomer, Larry D. Jones. *Second row:* Robert D. Dible, Calvin L. Beydler, Kent C. Cooper, Cyndy Broadie. *Third row:* John C. Mein, Byron C. Steward,

Nicholas F. Koch, Donald J. Glaser. *Bottom row:* Dale A. Hacker, Ray A. Dilts, William H. Neibling, Michael K. Ramsey.

Eta Kappa Nu: electrical engineering honorary

Top row: David A. Gorman, John C. Mein, Bruce D. Jackson, Russell K. Johnson, Craig A. Brockmeier, Walter E. Knapp, Larry D. Jones, Hassan Pirastehfar. *Second row:* Keith Turner, Robert G. Foncannon, Bob Paris, Darrell F. Sabatka, Randal D. Haun, Glen D. Fulkerson, Calvin L. Beydler.

Third row: Roderick J. Crawford, A. Randal Dickinson, Steve R. McKinnis, Ronald E. Klein, Robert C. Evans, Ray Weber, Don L. Rempel. *Bottom row:* Michael W. Farrell, Thomas P. Riordan, Stephen A. Dyer, Harold W. Roesler, Dennis A. Kruger, Robert L. Farmer, Keith E. Davis.

Engineering Magazine: interest group

Top row: George Delan, Jim G. Loyd, Mike C. Frazier, Rusty Brown, John B. Dougherty, Bruce G. Bailey. *Bottom row:* Larry Steier, Bob G. Foncannon, Steve V. Muck, Bill E. Dakan.

Sigma Tau: engineering honorary

Top row: Robert A. Bascom, Robert S. Black, Dana M. Smerchek, Gary A. Schneck, Richard K. Koelsch, Roger D. Baker, Bruce A. Feldhausen. *Second row:* Stanley A. Armbruster, Bruce D. Jackson, James M. Duncan, Michael R. Fitzsimmons, Hassan Pirastehfar, James G. Loyd. *Third*

row: R. Phillip Volmer, Karl E. Stickley, Dennis C. Wegener, Michael W. Farrell, Rick F. Biery, Alan L. Sylvester, W. Clay Adams. *Bottom row:* David P. Palmer, William H. Neibling, Ronald E. Klein, Thomas F. Bailey, Wayne E. Sanford, Bruce A. Napier.

Top row: Kathleen R. Parrish, Donna D. Kottwitz, John D. Wilson, Rick Q. Grapengater, David A. Pacey, Richard A. Beier, Larry D. Jones. *Second row:* Timothy L. Kellner, Craig A. Sydney, Thomas L. Grennan, Douglas J. Teel, Richard L. Kussman, Edwin C. Lindly. *Third row:* Larry D.

Green, Jay L. Shorney, Randy D. Haun, Steve R. McKinnis, Keith S. Turner, Don L. Rempel, John R. Schlup. *Bottom row:* Brent E. Remsberg, Patrick P. Mudd, Russell L. Bone, Carl C. Andreasen, Edward F. Juno, Charles D. Sullivan

Steel Ring:

engineering seniors
honorary

Top row: Richard B. Grapengater, Donald J. Glaser, Richard D. Payne, Brent E. Remsberg, Edward F. Juno, Randal D. Haun, Michael K. Ramsey, Michael J. Poland, James G. Loyd.
Bottom row: John D. Wilson, James M. Duncan, David A. Pacey, Larry D. Jones.

Faculty Senate: governing board

Top row: Robert L. Johnson, Stanley G. Harris, Draytford Richardson, Milton L. Manuel, Richard E. Vaden, Thomas L. Brown, Donald P. Hoyt, John T. Pence, Robert R. Snell, William E. Moore, Frederic C. Appl, Louis H. Douglas, Veryl A. Switzer, Margaret Dobbyn, Wayne C. Rohrer, Dan W. Upson, Beth A. Unger, Dean Eckhoff. *Second row:* Lowell Brandner, Robert L. Page, Keith Christensen, Charles B. Corbin, Homer E. Socolofsky, Warren V. Walker, John K. Strickler, Oscar W. Norby, Peter B.

Cooper, Virginia M. Quiring, Sylvia J. Blanding, Cornelia B. Flora, Robert D. Linder. *Third row:* James K. Greig, Lucille Wakefield, Betsy Bergen, David J. Mugler, James J. Albracht, Eddy J. VanMeter, Leon H. Rappoport, Patricia J. O'Brien, Kenneth Burkhard, Margaret N. Nordin. *Bottom row:* Carol L. Miller, Vernon V. Geissler, Ross Mickelsen, Herbert C. Moser, Robert E. Scott, Leonard E. Fuller.

Extension Club: home economics interest group

Top row: Cynthia S. Busset, Jane L. Broers, Dee A. Lewis, Ann R. Johnson. *Second row:* Karen E. Mankin, Carol S. Carswell, Cathy L. Carswell, Sharon K. Blender. *Third row:* Sandra L. Shaw, Vickie S. Baehler, Joyce E.

Folk, Teresa A. Wingert. *Bottom row:* Tonya M. Brenneman, Rae A. Gordon, Jean L. Richards, Lois J. VanCleave.

Forestry Club: interest group

Top row: Wendy L. Benefiel, Don K. Fowler, Ron K. Fowler, Brenda J. Clark, Eric E. Kohn. *Second row:* Frederick J. Deneke, Wayne D. Helm, Robert W. Kingswood, Gene C. Detrixhe. *Third row:* Ronald G. Steuer,

Dean A. Graber, Ralph J. Kieffer, Michael A. Tolbert, Neil P. McGinness. *Bottom row:* Steve W. Freed, Stuart D. Becker, Richard J. Suellentrop, Kirk A. Mlinek, Pat D. Falter.

Gamma Ray: interest group

Top row: Linda M. Locke, Janene S. Ballard, Sheryl S. Engleson, Cindy L. Miller, Kathy A. Mitts, Allyn Scott, Marta J. Rinearson, Mike Calderwood, Ann N. Oberzan, Annie M. Dusin, Deb J. Williams. *Second row:* Michael A. Jeter, Randy R. Granzow, Norm G. Tsiguloff, Earl T. Cooper, Pamela S. Mitts, Jo Ann Mize, Jeffrey L. Stafford, Dan T. Burke, Jim D. Erhart, Maria R. Shirer. *Third row:* William H. Vanderventer, Peggy M.

Frantz, Forrest G. Ballard, Diane K. Swingle, Edward E. Mackey, Neil P. McGinness, Gary L. Armstrong, Sandra M. Whittecar, Don G. Whittecar, Jim A. Dronberger, Rhonda C. Fuessle. *Bottom row:* Steve G. Desmar-teau, Mark A. Vining, Scott A. Boster, Jeff Legge, Bill C. Thomson, Rory O. Turner, Victor M. Nemechek, Kenn D. Estes, Janet E. Frick.

Gibson Girls: athletic recruiters

Top row: Marilyn R. Cole, Mikelyn A. Sims, Karen A. Testori, Susan K. Ringler, Debby L. Gutknecht, Sharon K. Cazier, Gayle L. Landtiser, Christine M. Egan, Judy A. Guernsey, Melissa J. Bachman, Frances L. Egan. *Second row:* Su M. Townsend, Susan D. Anderson, Melissa Weir, Michelle Ryan, Patti L. Leonard, Debbie J. Barnes, Cynthia A. Corbin, Ann C. Tollefson, Jodee L. Bock. *Third row:* Marsha P. Ramsey, Dana S.

Dahlstrom, Sandra L. Miller, Maureen P. O'Rourke, Sheri K. Tompkins, Sheila K. Schrepfer, Sara J. Rollwagen, Lesley K. Whitehead, Jo A. Wannenmacher, Karen L. Kelly. *Bottom row:* Sara F. Dickerson, Mary F. Anstine, Deborah L. Tripp, Barbara C. Wehrwein, Linda L. Eatherly, Mary L. Kroening, Janet S. Grothusen, Dorothy G. Kill, Kim L. Schoen, Lisa P. McCrann, Jenny A. Jungmann.

Golden Hearts: Sigma Phi Epsilon little sisters

Top row: Holly K. Hooker, Kathy A. Hogerty, Amy L. Button, Karla A. Wilber, Karen P. Rowe, Nancy G. Woods, Mary M. Nobrega. *Second row:* Thelma G. Mueller, Jan Stansberry, Julie A. Bourk, Cindy S. Con-

verse, Tina Langton, Laurie Reeve. *Bottom row:* Cinda A. Topliff, Debbie L. Unruh, Dianne M. Krebs, Dana J. Anderson, Valeria K. Mueller.

Grain Science Club: interest group

Top row: Brad W. Black, Chris D. Frye, Corey G. Lowdon, Samuel G. Maurer, Robert D. Ricklefs, Chuan Kao. *Second row:* Rick B. Thomas, Gerald E. Klocke, Roger H. Bane, Mike Carmony, Dave E. Renner, Harry

B. Pfost. *Bottom row:* Terry G. Wagner, Steve P. Curran, Steve H. Combs, Bruce D. Young, E. P. Farrell.

Grid Getters: athletic recruiters

Top row: William J. Foley, Rick E. Dempster, Scott E. Herschell, Jon T. Clark. *Second row:* Bruce L. Bachman, Patrick J. Dunne, Clark H. Davis,

Ralph A. Currie, Stephen G. Divine. *Bottom row:* Randy N. Salberg, Earl F. Greene, Michael P. Oliver, Dwight L. Strouse.

Horticulture Club: interest group

Top row: Cari S. Leman, Sharon L. Carney, Shelley A. McClain, Michael L. Allen, Brenda K. Heifner, Evelyn S. Bergkamp. *Second row:* Crystal L. Wiley, Marilyn A. Obermeyer, E. Victor Swanson, L. Lea Lamb, Julie E.

Trowbridge. *Bottom row:* Richard H. Mattson, Robert M. Wagner, Trula J. Myers, Robert J. Dameron.

Home Economics Council: governing board

Top row: Karen S. Honig, Kristine M. Sahlberg, Beverly J. Kiehl, Teresa J. Kurtenbach, Ruth G. Dobbins, Shirley A. Revsser, Marsha R. Isaacson, Deana C. Paulsen. *Second row:* Colleen J. Hand, Vickie S. Baehler, Diana L. Weyer, Connie M. Hoerman, Carol A. Maas, Paula A. Felder,

Teresa A. Wingert, Dianna R. Kuhlmann, Brenda L. Moser. *Bottom row:* Barbara I. Roe, Beverly A. Boller, Diane K. Hein, Sheri K. Tompkins, Martha J. Cornwell, Beth E. Funk, Nancy S. McEwen, Pat A. McEwen.

India Association: interest group

Top row: Dr. Kusum M. Patel, Baldev S. Dhiman, Margaret R. Asirvatham. Second row: Ashok Jain, Prochy P. Sethna, Raviprasad Shetty. Bot-

tom row: Janak Pandey, Habil T. Handy, Rajen S. Metha.

Inter Fraternity Council: governing board

Top row: Kenneth J. Ziegler, Mark S. Hauber, Charles T. Engel, Gary R. Rippel, George A. Ferguson, Jon D. Nelson, Robert P. Johnson, William R. Powell. Second row: Kent B. Kimball, Donald H. Daniels, Henry F. Sondag, Gale R. Wiley, Dale A. Mueller, Chris R. Sargent. Third row: Marty G. Redden, Richard C. Newman, Andrew J. Schuler III, William H.

Dieterich, Duane C. Holloway, Neil E. Tucker, Ross A. Hildebrand, Jerry A. Lilly. Bottom row: Dwight W. Miller, Don J. Glasser, Michael K. Ramsey, Thomas E. Glass III, Larry F. Levenson, Steven K. Bargmann, Harlan F. Ebright.

International Coordinating Council: governing board

Top row: Mehdi Adlouni, Fang S. Lai. *Second row:* Emery Wong, Ahmad Nawaz, Abu Syed Md. Masud, M. Sawkat Anwer, Sam Mathis, Ahsan

Mohammad. *Bottom row:* Ziba-Azar, Sattar Kassem, Kathy L. Boyd, Porndhep Kalambaheti.

Kappa Delta Pi: education honorary

Top row: Mari M. Baird, Linda S. Babcock, Marilyn K. Ozbun, Phyllis E. Tucker, Shelley A. Hoyle. *Second row:* Jo A. Rubenich, Teresa J. Kurten-

bach, Carla R. Ellas, Patricia A. Skahan. *Bottom row:* Joe H. Loeb, Vicki J. Eastwood, Dianna R. Kuhlman, Carole A. Bolin, David P. Sellers.

Kappa Phi: religious interest group

Top row: Pam J. Moore, Cindy S. Busset, Sheri I. Hunt, Brenda J. Schneider, Sue A. Shepard. *Bottom row:* Cindy L. Sawyer, Pam S. Maben, Lois J. Van Cleave, Sally R. Blair.

K-Laires: square dance interest group

Top row: Cheryl A. Mackey, Sharon D. Johnson, Marsha K. Baugher, Kathy Johnson. *Second row:* Nancy A. Venneberg, Lana D. Hale, Leslie J. Allen, Michael D. Klahr. *Third row:* Bruce D. Young, Calvin L. Hair, Carol K. Whisman. *Bottom row:* David H. Weast, Arlan E. Bentz, Robin V. Hax.

Scuba Club: interest group

Top row: John E. Hellman, Kevin T. McKeeman, John H. Havens, Mike M. Metz, Randy L. Matzkanin. Second row: Stanley L. Wileman, David V. Porter, Dan D. McAteer, Richard N. Smith. Third row: Bob L. Dye,

Wayne M. Schenk, Marjorie L. Hale, Michael W. Farrell. Bottom row: Mark D. Tate, Sherwin E. Klemp, Craig E. Powell, Rodney D. Kaufmann.

KSUARH: associated residence halls governing board

Top row: Lynne E. Bessier, Ann Benson, Kathryn A. Ludwig, Marie E. Shirer, Cindy A. Murrill, Dana J. Paulich, Paula S. Ukele, Mabel B. Strong, Robin R. Messer, Joyce A. Cathey. Second row: Judy M. Kidwell, Renee S. Marcotte, Carol S. Lindahl, Diane G. Heckerson, Claudia M. Cunningham, Janet E. Beedles, Lynnett Moore, Verlan W. Jarvis, Mi-

chael W. Cambell. Third row: Twyla F. Miller, Teryl L. Wilmeth, James C. Putnam, Janet E. Frick, Jim D. Erhardt, Broc Sears, Rick Grapengater, Ray A. Weber. Bottom row: Donald B. Roof, Mark A. Jones, John D. Warrior, Tim K. Bailey, Martin D. Barker, John G. Anderson, J. Greg Kite, Charles C. Nixon, Mark A. Vining.

Wildlife Society: interest group

Top row: Rick Gould, Randy D. Rodgers, Ned E. Stichman, Rena K. Rouse, Sara J. Norman, Mary J. Davis, Donita Whitney, Rita R. Cudney. *Second row:* Lannie R. Miller, Timothy D. Christian, D. Elton Nickel, Daryl G. Ellison, Louis E. Huffman, Robert D. Jones, Carol M. Holzri-

chter. Third row: R. J. Robel, Orvin E. Bontrager, Albert F. Sutlick, Frederick J. Stump, George F. Athey, Patrick J. Silady. *Bottom row:* John A. Lamb, Sheila D. Bahruth, Fred D. Neql, Melvin L. Madorin, John M. Herod.

Lambda Chi Alpha Cresents: little sisters group

Top row: Cathy S. Carr, Ann Jackson, Marilyn A. Taylor, Judy L. Graham, Mary Jo Deuthman, Ellen M. Mitchum, Ellen J. Robinson. *Second row:*

Karen S. Ukena, Nadine Birch, Ann L. Zutavern. *Bottom row:* Jean M. Ramsdale, Judy A. Barnard, Linda K. Heck.

Light Brigade: Army ROTC auxilliary

Top row: Terece L. Pavlovich, Barbara J. Beecher, Roylene K. Otken, Stephanie Byler, Joan Houghton, Vicki D. Wedel, Linda L. Carnahan, Julie A. Ehrsam, Amy K. Davis, Joan K. Waeldin, Diane M. Buck. *Second row:* Allison M. Pitt, Terry L. Appleby, Juanita J. Ahrens, Debra J. Schrock, Cathy A. Sullivan, Marti Maack, Dena M. Steinmeyer, Angela M. Shinkle, Gayle Landtiser, Valerie B. Hubbard. *Third row:* Sandy K.

Eberth, Judy L. Puckett, Connie E. White, Mary C. Stiles, Susan R. Schrock, Patricia A. Davis, Vickie J. Gatewood, Betsy Wright, Susan M. Glotzbach, Cherie A. Burns. *Bottom row:* Alan K. Underwood, Nancy J. Kraus, Sheri K. Tompkins, Barbra M. Vopata, Denise L. Kettler, Andrea A. Polansky, Jackie Ehrsam, Carol A. Landtiser, Christine M. Glotzbach, Carla R. Ellas.

Little Sigmas: little sisters group

Top row: Leslie J. Mingenback, Debbie J. Collier, Laurie A. Bettison, Shirley A. Reusser, Pamela S. Gudikunst. Second row: Lynda C. Shockey, Julie Gowen, Leslie S. Eaton, Barbara A. Stanton. Bottom row: Marcia J.

Hanson, Barbara J. Ross, Debbie J. Brown, Janette J. Larson, Shelley J. Womble.

Little Sisters of Athena: AKL little sisters group

Top row: Michelle L. Press, Linda M. Denholm, Loretta K. Housh, Patricia D. Martin, Vicki D. Wedel, Becky A. Bowman, Carol J. Denholm, Shelley A. Erickson. Bottom row: Nancy J. Johnson, Joann Brandt, Con-

nie C. Oppitz, Marty A. Rieschick, Ketta J. Henderson, E. Ann Mount, Anabel M. Devaux.

Little Sisters of Beta Sigma Psi: little sisters group

Top row: Thena M. Bell, Linda K. Farrier, Carolyn S. Fowler, Gayle L. Gerken, Stefni L. Weeks. Second row: Susan M. Ludwig, Sandy K. Eberth, Marilyn R. Steponick, Lila M. Gatton, Mary A. Lindstrom. Bot-

tom row: Sherry J. Kline, Cindy L. Edwards, Robin L. Rouse, Carolyn K. Wittorff, Linda D. Pittman.

Little Sisters of the Maltese Cross: ATO little sisters group

Top row: Andrena L. Vedros, Joan E. Irwin, Marilyn F. Pickrel, Judy A. Stricker, Meredith A. Ramsey, Ann B. Gray, Teri L. O'Neal. Second row: Cindy M. Sheilds, Caryn L. Lee, Ann E. Oldfield, Susan K. Long, Kathy L. Anderson, Renee S. Marcotte. Third row: Sue C. Faville, Patty A. Selby,

Marsha L. Reed, Jackie E. Ehram, Cindy J. Avery. Bottom row: Carol A. Landtiser, Libby A. Bearly, Carol L. Miller, Laura L. Reynolds, Susan F. McCarthy.

Little Sisters of the Shield of Phi Kappa Tau

Top row: Cindy Anderson, Shelly A. Buxton, Kristi G. Rhorer, Candace E. Vlcek, Janice L. Ervin, Patti Meador, Nancy Chaffee. *Second row:* Debbie S. Carrel, Nancy S. Culver, Kathy Murphy, Sandra E. McCulloch,

Marilyn J. McReynolds, Keela A. Boyce. *Bottom row:* Debra L. Dobkins, Linda D. Lundberg, Cindy G. Loucks, Karen S. Carrel, Roberta Powers, Tracy Day.

Little Sisters of the White Rose: Sigma Nu

Top row: Rita L. Heinz, Shelley A. Hoyle, Susan E. Bruce, Debi L. Mitchell, Diane E. Webb. *Second row:* Robbie J. Cummings, Barbara E. Liebl, Susan D. Harvey, Betsy A. Wright, Kerry A. McCaig. *Third row:* Suzie L.

Moore, Debbie E. Wian, Laura J. Stetson, Susan L. McCune. *Bottom row:* Molly B. Russell, Jan A. Stigall, Heather K. Johnson, Julie A. Juno, Joan A. King.

Medical Technology Club: interest group

Top row: Randa M. Vincent, Dianne M. Hansen, Shirley L. Benda, Cindy A. Mueller, Jan S. Magnus, Keeta S. Myers, Norma D. Niles. *Second row:* Kathy Lundquist, Melinda K. Snyder, Becky L. Marietta, Leigh A. White,

Kathy R. Moore, Susan D. Bever. Third row: Twyla F. Miller, Kristine A. Miller, Jody J. Istas, Susan Clubine, Judy L. Jaeger. *Bottom row:* Terri L. Keltner, Suzi E. Nutter, Kirk L. Larson, Randy S. Gerard.

Microbiology Club: interest group

Top row: Bill Shafer, Barbara F. Kitchelt, Laurel M. Halfpap, Lynda M. Whitlock. *Second row:* John J. Iandolo, Gregg A. Nicoll, Barry E. Blank.

Bottom row: James E. Urban, Joseph F. Bremser, Phillip J. Stroupe, Armon D. Hetzel.

Mortar Board: senior women's honorary

Top row: Beverly J. Kiehl, Carla R. Ellas, Martha K. Schroeder, Sheila A. Schrepel, Kathy L. Boyd, Nancy S. McEwen, Debbie J. Brown. Second row: Jackie Elliott, Roberta D. Hewson, Val K. Mueller, Dianna R. Kuhl-

mann, Marilyn A. Taylor, Martha C. Berggren. Bottom row: Shelley A. Hoyle, Mari M. Baird, Nancy E. Williams.

Collegiate Chorale: vocal group

Top row: Terry L. Walker, Steve A. Tankersley, Gary D. Olds, Scott R. Wilber, Stephen E. Gwin, Gary D. Rensner, Robert A. Calhoun, Rick J. Busenbark, Stephen W. Rankin, Kevin L. Fulkerson, Ray L. Wells, Ron R. Lang, Paul D. Stetler, John Barnes, Chris A. Martin, David Roesler. *Second row:* Dan L. Heeren, John A. Peters, Mark A. Brown, Dennis J. Schaffer, John A. Holmes, Ed G. Reece, Steve L. Carter, Mark E. Coughenour, Gary M. Korte, John H. Teeter, Darrel L. Harbaugh, Mervyn L. Hammond, Jim Hamilton, David E. Dimond, Martin J. Sipes. *Third row:* Debie J. Lindgren, Jeanette F. Slinkman, Virginia E. Fuller, Jean M. Peter-

son, Alice V. Noren, Denise A. Salmon, Jill C. Baker, Kay S. Conkwright, Linda B. Lynam, Jan E. Kaup, De Gaye Riley, Kathy D. Hensely, Marcy A. Sinclair, Cheryl Hill, Karen K. Brady, Sharon L. Kroupa. *Bottom row:* Sherry L. Hess, Sherry L. Kinder, Debi E. Burgess, Mary Ellen Clark, Peggy M. White, Sandra K. Sherraden, Janie M. Selvy, Kathie J. Orme, Carolyn M. Loyd, Ann C. Tollefson, Anita K. Nelson, Teresa A. Taber, Janine Neaderhiser, Brenda K. Stewart, Annetta M. Kemper, Pamela J. Gonterman.

Concert Choir: vocal group

Top row: Steve E. Chellgren, Lance A. Massey, Greg Kern, Robert S. Thomas, John W. Buckner, Rick L. Marcuson, Boyd E. Haynes, Roger F. Poderson, Gary L. Tolle, Greg D. Olds, Steve E. Gwin, David G. Shook, Gary L. Graber, Ernest V. Swanson. *Second row:* Randy L. Kloefkorn, Brad C. Roberts, Mark S. Geffert, Bruce A. Poland, Doug W. Romeiser, Vincent T. Baskin, Phil J. Crawley, Keith L. Collett, Dallas D. Hainline, Mike W. Raabe, Jim L. Bell, Mathew W. Smith, Bruno F. Tschannon,

Marty H. Prettyman. *Third row:* Paula R. Koch, Peggy R. Richarson, Mary Jo Weber, Carol A. Camp, Debbie C. May, LeAnn House, Kelsey D. Menehan, Pam J. King, Debbie L. Follis, Dixie L. Madill, Jo L. Schraeder, Debbie J. Eauerson, Beverly A. Bowers. *Bottom row:* Sue E. Yocum, Colleen J. Meyer, Kris E. Nevins, Roberta R. Johnson, Kathy A. Davidson, Janie S. Hardman, Jessica L. Grant, Shelley L. Batt, Marlo J. Ledy, Janette E. Larson, Wanetta L. Collins, Ellen C. Hartong, Martha A. Thomas.

K-State Singers: vocal group

Top row: Gerald Polish, Guy Dawson, Bernard Reinert, Mark Holt, Brad Drown, Tim Worthington, Mark Keller, Ken Williams. Bottom row: An-

drea Curry, Jane Rehschuh, Denise Jackson, Susan Altland, Cathy Brown.

Marching Band: instrumental group

Auliffe, Sue McCormick. *Third row:* Anna M. Kroeger, Susan C. Cary, Connie M. Abrams, Carol E. Unrein, Marsha L. Dietrich, Charlotte D. Mothes. *Bottom row:* Carolyn J. Jepsen, Diane K. Swingle, Pamela E. Hoffman, Barbara J. Floyd, Gerald Polich.

Top row: Donna J. Martin, Paula J. Hoisington, Julie A. Gamba, Kathy A. Brown, Judy L. Kapelle. *Second row:* Mary J. Johnson, Julie K. Tucker, Thena M. Bell, Lillianna Bajich. *Third row:* Kim J. Grice, Melody L. Com-

paan, Mary Ann Stepanich, Arlene A. Warren. *Bottom row:* Jane A. Gatz, Martha J. Steinbauer, Janet A. Mahoney, Gerald Polich.

Mu Phi Epsilon: music interest group

Top row: Dana L. Keller, Linda L. Carpentar, Janet B. Armstead, Shelley L. Batt, Marlo J. Ledy, Jan S. Nottingham, Sheryl L. Kinder. *Second row:* Peggy Tedford, Janice Wenger, Patricia A. Uhlenhop, Sharon Kroupa, Terri Oesterreich, Kathy Brown, Stephanie Husco, Jean Severance. *Third*

row: Barbara Gray-Massey, Deborah G. Burkhard, Jennifer L. Tacey, Sally A. Blomquist, Marcia A. Sinclair, Janie S. Hardman, Debbie C. May. *Bottom row:* D. LeAnn House, Diane Swingle, Karen Brady, Jo Schraeder, Jan Livingston.

Natural Resource Management Club: interest group

Top row: Linda L. Bell, Pamela J. Warmund, Joe D. Bowers, Garth W. Wilson, Lee K. Ankenman, Tom E. Larcher, Joe O. Brunk, Vicki R. Coats, David E. Smith. *Second row:* Richard A. Canterbury, William A. Malouche, Harold E. Kline, Don K. Parker, Mark K. Chapin, Brett A. Prochaska, Kevin O. Corbett, John D. McEwen, Ronald D. Nichols. *Third*

row: Michael E. Oppitz, Jerry W. Schmidt, Frank L. Rankin, Michael R. Shanley, Dennis M. Boyle, Phillip L. Nickel, Jerry E. Mott, Darrell G. York, Paul F. Scales. *Bottom row:* Orville W. Bidwell, Don E. Sullivan, Kurt L. Johnson, Gary A. Schuler, Kevin B. Freeman, Larry C. Bonczowski, Bradley R. Myers, Ben D. Mahaffey.

Omega Psi Phi: social fraternity

Top row: Dwayne L. Mitchell, Antonio R. Quinton, Frank Davis, Terrence Conrad, George F. Nash. *Second row:* Craig T. Watson, Willone E. Eubanks, William B. Davis, Mark A. Stueve, Mario A. Gates. *Bottom row:*

Bruce D. Mitchell, Larry P. Hopkins, Wendell O. Johnson, Timothy M. Hamilton, Leroy G. Thomas.

Omicron Nu: home economics honorary

Top row: Martha K. Haynes, Beverly J. Kiehl, Phyllis E. Tucker, Jane E. Gegen, Felicita R. Bernier, Teresa J. Kurtenbach, Shirley J. Gordon, Beth Fox, Gloria Bird, Sharon K. Vering, Varalakshmi, Bhupal, Rudene G. Giessenbier. *Second row:* Marilyn A. Taylor, Linda L. Dannison, Bonnie M. Koerner, Janet L. Durbin, Dawn C. Thrailkill, Barbara J. Meister, Linda J. Van Horn, Patty A. McCarthy, Elizabeth P. Newby, Janet E. Tillberg,

Susan J. Murphy. *Third row:* Roxie L. Neal, Penny L. Caldwell, Patsy J. Plett, Cheryl L. Foley, Diane R. Matteson, Florence E. McCoy, Carol A. Watkins, Rita K. Soderberg, Linda M. Denholm, Barbara J. Reed. *Bottom row:* Dianna R. Kuhlmann, Diane Hein, Cathy Butts, Constance J. Hanks, Jeanne M. Andra, Nancy A. Streeter, Kathleen L. Miller, Linda C. Olson, Roberta D. Hewson, Nancy McEwen.

Pershing Rifles: military honorary

Top row: Thomas N. Bell, Michael E. Shaffer, Charles S. Tyler, Dennis V. Lacey, Craig N. Dibben, Richard D. Hopkins, Bruce E. Holloway. *Second row:* Lee D. Ellis, Steven E. Pearson, Edmund G. Hill, Jeffrey L. Eubank, Gordon A. Brest, Thomas L. Hopkins. *Third row:* David C. Hornbaker,

Steven L. Bartlett, Kermit O. Taylor, Rick S. Stubbs, Terry P. Bartkoski. *Bottom row:* Darrell E. Herrmann, David H. Carpenter, Margo L. Vanover, Roberta D. Hewson, Alverna D. Streit, Merwyn J. Reed, Darrell R. Riekenberg.

Phi Chi Theta: business honorary

Top row: Debra D. Shive, Cherle A. Burns, Susan G. Weltsch, Barbara A. Mitcha, Janet L. Meade, Joyce M. Leiker, Ann M. Dusin, Kathy S. Reukauf. *Second row:* Nancy A. Venneberg, Karen S. Windler, Alesia J. Ball,

Joyce A. Kneale, Ann L. Estes, M. Joan Russell, Gail D. Holtman. *Bottom row:* Mary J. Masonbrink, Mary A. Hajek, Starla S. Beverly, Nancy Lockard, Connie M. Abrams, Beth Steward, Pam Rowland, Mary Sue Davis.

Phi Epsilon Kappa: physical education interest group

Top row: Roger A. Washburn, Jack E. Morrell, James W. Fagan, Michael M. McIntyre. Second row: Cedric K. Hands, Doug C. Gordon, Michael D. Chapman, Lance E. Reid. Third row: Jerry L. Adell, Larry Noble, Mi-

chael J. Peter. Bottom row: Russ R. Goering, Rich D. Hunter, Steve L. Snyder, Ronald G. Keller.

Phi Eta Sigma: scholastic honorary

Top row: Terry J. Garvert, David L. Nottingham, Richard Boden, Roger D. Toothaker, Jerry E. Crabb, Barry D. Grant, Steven D. Johnson. Second row: Kerry L. Patrick, Gregory M. Karst, Greg B. Miller, Philip N. King, Charles B. Roberts, James P. McWilliams. Third row: Ron G. Munger,

Robert A. Roth, Jeffrey W. Schemmel, Kervin J. Brungardt, Stephen A. Drumhiller. Bottom row: Daniel H. Pitts, Merlin B. Chestnut, Brian J. Maydew, Gregory D. Olds, Michael W. Lambert, Doyle R. Slavik.

Phi Kaptives: little sisters group

Top row: Karen J. Plegge, Nancy S. Griffith, Beth L. Carter, Bonnie M. Giebler, Susan G. Kongs, Kim L. Aver, Denise L. Craig, Pam K. Kissing. *Second row:* Patricia R. Craine, Barbara L. Meehan, Diane R. Fennema,

Susan E. Clogston, Julie A. Carson, Connie S. Etzel. *Bottom row:* Mary Schwarzenberger, Mary A. Miller, Deborah L. Craig, Cynthia M. Howard, Maryann Engel, Marjorie J. Hedger.

Phi Upsilon Omicron: home economics honorary

Top row: Deborah L. Craig, Rudene G. Giessenbier, Marilyn A. Taylor, Phyllis E. Tucker, Beverly J. Kiehl, Elaine S. Beckman, Angela M. Shinkle, Martha K. Haynes, Patricia Schimming, Jackie K. Fitzsimmons, Kristine M. Sahlberg, Betsy A. Wright. *Second row:* Mary A. Russo, Kathy L. Johnson, Christa K. Huss, Judy M. Kidwell, Robin R. Messer, Brenda L. Moser, Maureen K. Hintz, Marie E. Shirer, Vicki K. Diller, Jacqueline Brungardt, Donita M. Cohorst. *Third row:* Ellen R. Andersen, Lois J.

VanCleave, Carla D. Nelson, Dianna R. Kuhlmann, Sandra E. McCulloch, Pat A. McEwen, Susan D. Persinger, Sandra L. Shaw, Nancy E. Williams, Vickie S. Baehler. *Bottom row:* Alice M. Williams, Diane K. Hein, Colleen J. Hand, Jeanice McReynolds, Jeanne M. Andra, Eileen R. Adelhardt, Martha J. Cornwell, Kay L. Timpe, Margaret E. Anderson, Jean A. Trevarton.

Pridettes: women's drill team

Top row: Sue Baird, Cindy J. Dean, Sue E. Banta, Martha A. Rieschick, Michelle L. Sweeney, Becky S. Anderson, Brenda D. Abbott, Sheri L. Bradford, Vicki R. Coats, Dawnett L. Plagge, Connie L. Vantuyl, Georgiana Beverly, Patty D. Martin, Cheryl A. Hill, Julie A. Juno, Susan E. Rohles, Sharon Williams. *Bottom row:* Stefni I. Weeks, Marilyn S. Burns,

Kim J. Rule, Thena M. Bell, Barb A. Miles, Beth Stillions, Lana J. Bigelow, MaryAnn E. Eikerman, Gyll Bates, Susan J. Campbell, Cindy M. Shields, Patrice D. Shepard, Alice A. Pharis, Karen M. Johnson, Angela C. Bischoff, Margaret A. Romig, Debbie A. Gorthy.

Professional Food Section: interest group

Top row: Karen S. Honig, Barbara J. Hitt, Carol A. Parks. *Second row:* Carolyn J. Doll, Jennifer G. Clark, Constance C. Oppitz, Kathy A. Kongs.

Habits of night-owl roommates disrupt student's sleep schedule

By Scott Kraft

Infamous among the despised requisites of college life are crowds, boring lectures, essay tests, term papers, house cleanings and worst of all, roommates.

"I forgot to tell you that my cigarette sort of burned a hole in your dress pants," my roommate said as he turned the stereo up to nine and resumed studying.

If you can't study with music playing, bull sessions going and clamor in the hallways, you had better not come to college. However, if you think that you can't hack it but want to come anyway, you can live in a motel.

But if you are one of those fortunate few who are assigned to a roommate whose habits and mannerisms coincide with your own, then you might be destined for a reasonably quiet year followed by a reasonably high grade point.

The campus residence halls have done several things to combat the combinations that often result from haphazard appointment of roommates. Drinking and non-drinking wings have been specified in some dorms. When applying for a contract, the student can specify whether or not he studies with music, smokes or likes to stay up late. So most of the time you and your

roommate have several things in common.

Nevertheless, if you like to be in bed by 11 o'clock or like to sleep in total darkness, your biological pattern may be upset.

One girl recently remarked, "My roommate likes to drink in Aggieville until midnight, then she comes back and studies until 3:00 since her first class isn't until 12:30. I got less than four hours sleep last night."

Intolerable problems are few, however, and resident advisers do their best to achieve compatibility within rooms.

Fraternities and sororities have less of this problem due to diversification within each house. Most houses allow members to pick their own roommates and the man or woman in a Greek living group chooses his own particular house according to the one into which he or she fits. The chances for mismatching roommates is reduced considerably in this type of situation.

Still, some roommates are oversensitive and have little tolerance for the actions of their room partner.

One coed said, "I told my roommate to use her deodorant spray outside of the room because it wakes me up in the morning."

Coed dorm dwellers value natural atmosphere

When coed living first started — in New York or California or some other mecca of loose living — the idea was scandalous.

Girls and boys living together? Under the same roof? Sharing dining rooms and social areas and laundries and God knows what else — probably beds? Unthinkable.

But now that formerly scandalous phenomenon has become a normal living situation on campuses across the country.

It seems that it finally dawned on everyone that brothers and sisters share dining rooms and social areas every day of their lives. And laundromats certainly aren't restricted to one sex. And that if people are going to sleep together, they will — whether it's in a coed dorm or the back of a station wagon.

K-State's first coed dorm was Van Zile. It opened its nearly half-century-old doors to both women and men in the fall of 1966. At first residents shared only dining and social areas, but for the past several years, there has been unrestricted visitation: residents may be in any part of the building at any time.

K-State's other coed dorms — Moore and Goodnow — have much the same visitation policies. Moore has been coed for a number of years, but Goodnow, formerly an all-women's dorm, made the leap to coed living this fall.

"You know, I really don't see that much difference," one Goodnow resident said. "Sure, the atmosphere is more relaxed having males around, but we don't have them living on my floor, so it's not all that different from before.

"I see a lot of guys in the elevators, but hell, how involved can you get in an elevator?"

Van Zile's and Moore's residents are separated by corridors.

"We see girls everywhere in the dorm except for the bathrooms — and sometimes even there if there's a birthday tubbing. I would rather have it this way — it doesn't seem odd at all," one Van Zile resident said.

Residents of both sexes contend that the situation makes for more natural and relaxed opposite-sex relationships. Why bother, they say, to play flirting games to get a date

when you can go out with a group from the dorm and have just as much fun?

Why bother with the Saturday-night-date-be-beautiful routine when the guy down the hall sees you looking like a dogfight victim every morning and likes you anyway?

However, while platonic friendships are the rule in most coed dorms, there are exceptions. By unofficial tally, Van Zile alone has played yenta for at least 25 marriages in the last five years.

Surely these partners know each other better than most engaged couples. After all, eating breakfast across from someone for a year or two is bound to produce valuable (if unhappy) insights.

One thing is certain: coed dorm residents almost invariably say that they'd never move into a single sex dorm.

"Never, never, never would I live with all girls again," one new Moore resident said. "I tried it for a year, and now moving back to Ford would be like entering a convent. Coed living is the only life for me."

Students sample haute cuisine conceived in popcorn poppers

"Well Randy, it's Sunday, the cafeteria doesn't fix dinner, I'm poor, it's polar bear outside and I got the 'hungries'."

"The 'hungries'? Mike, I thought that jive was extinct for me. When I was a freshman, every Sunday at exactly 5 p.m. my stomach began to vibrate and cry, 'HUNGER.' I craved food so strongly that I felt like a junkie having withdrawal symptoms.

"But when I became a sophomore, my mama sent me a good old-

fashioned popcorn popper. All I had to do was plug it in and I could cook anything from popcorn to spaghetti and vienna sausages.

"I just loved that popcorn popper. I learned to fry porkchops, fish and steaks. It wasn't anything for me to boil soup, stew or potatoes.

"Then one day, my good thing ended; my popcorn popper burned out. Now, man, I'm a junior, it's Sunday, I'm poor, it's polar bear outside and I got the 'hungries' too."

Cutline Type: 8 point Optima

Cover: 535 black buffalo grain

Paper stock: 80 pound Warren dull enamel

Endsheets: black 535

Press run: 8,000 copies

Acknowledgements:

In the opening section of this book I tried to suggest that there are no absolutes in life — no stark blacks and whites.

And that same theme carries right through to the acknowledgements. How could I possibly categorize who helped and who hindered the production of this book?

Still, if I had to list the people without whom the 1974 Royal Purple would never have hit the presses, this would be that list: For their guidance — Jean Parrish, Bill Brown, Brad Murphree. Because of their superior efforts this year and the pleasure they were to work with —

Michael Szeremet, Carole Bolin, Pam Kissing. For their help in getting the different sections of the book put together on time: Susie Nuss, Cindy Loucks, Linda Reed, Bev Wunder, Ann Benson, Dana Smith. For his devotion to his job — Jeff Funk. For their general support — John Hofmeister, Pete and Bili Stajduhar, Barbara Schoof, David Chartrand. And finally, for all of those things and many more, Jean Trevar-ton, my managing editor.

Gail Stajduhar
Editor, 1974 Royal Purple
