

VOL. XII-NO. 45.

LAWRENCE, KANSAS, DEC. 8, 1882.

WHOLE NO. 564..

The Household.

Efficacy of Prayer.

The Boston Journal states that a curious law question has arisen in Morris, Conn. Mrs. Stevens, a pious widow of that town, in a recent conversation with Horace Benton, expressed confidence that she could bring rain by prayer. He offered her ten dollars to bring a good rain within three days. A light shower followed, whem the pious widow called upon Mr. Benton and demanded the ten dollars, declaring her prayer had been answered and her part of the contract performed. He objected on the ground that the shower was too light to be of any value, and fell short of what the contract required. She has made three different demands and threatens suit for the money.

Health of American Women.

In the December number of the North American Review Dio Lewis writes concerning the health of American women after this fashion: The reader who concludes that women may, by nature, be man's equal in health and vitality, will doubt the possibility of her recovery from the injuries of dress and house-life.

The writer has recently spent three summers camping in the mountains of California. From time to time ladies joined our party. Quite a number of them were delicate ladies seeking health. They all adopted the rough, short, montain dress and rode astride. Several of them became the most adventurous and enduring members of our large company. As an illustration, Miss M., from New York, a wealthy and accomplished lady of twenty-six years, may be mentioned. We gladly welcomed her, though we feared her health might detain the party. Her first week amused us. She was certain that, with the removal of her corsetshe would "fall to pieces," and she could nev. er, never ride astride, because it was "so awful," and she was sure the particular position would make her troubles worse: On leaving us she said: "I have spent five months in the saddle. When I came I was in wretched health. Now I am as free from pain and weakness as these squaws." Such miracles; were common in our camp-life.

Transportation.

Report of the special committee appointed by the Worthy Master of the National grange to confer with congressional committee upon commerce.

In compliance with a request of Worthy Master Woodman of the National grange, through Bro. Armstrong of the New York state grange, the undersigned appeared before the commerce committee of the House of Representatives in March last, to urge upon that body the necessity of regulating by law transportation through and between the several states of the Union, and beg leave to submit the following report upon the subject:

That congress possesses constitutional authority, and this subject under the delegated power to regulate commerce between the states, is not denied.

That the best interests of the people demand that this authority shall be exercised, the history of railroad transportation in this country abundantly proves. In demanding this legislation we emphatically deny hostile intent towards the railroad interests of the country which have grown with marvelous rapidity to almost fabuious magnitude within the last few years. We realize the indispensable necessity of railroads, and freely admit that they have been and are of great benefit to every section of our common country. When honestly built and faithfully operated for the public good (the original purpose of their creation), they are a boon and a blessing to the people who have granted liberal franchises for their construction; but when in defiance of all traditions of common law, and all the instincts of public justice, the franchises are claimed as private rights and used solely for the purpose of individual or corporate gain they become an engine of oppression-destructive of the very objects and purposes of their creation.

Without tracing the history of the development and progress of railroads in the United States, it is sufficient to say that in their infancy and weakness they courted popular favor and prudently avoided popular offense obedient to the law which governs common carriers everywhere; they based their charges upon the common sense and business principle of cost of service, and treated all communities and individuals equally.

They accepted charters limiting dividends to in advanced stages.

reasonable profits upon capital actually invested. In supplicating legislative favors they acknowledged reciprocal obligations. Roads were largely built with money actually paid by stockholders, and when completed represented only the cost of labor and material used in their construction, and the people were taxed only enough to pay fair profits on such investment. So long as roads were thus built and operated, people were satisfied and no murmurs of discontent were heard.

But all this is now changed. The "credit mobilier" is a modera institution. A large amount of stock upon which dividends are now paid is purely fictitious-representing nothing but water. Franchises are claimed to be vested rights. Their obligations as common carriers are denied and laws governing them defied. Special rates are given to favorites of the roads. Communities and individuals are discriminated against, and no pretense of equality of treatment is made.

Charges are no longer based upon the cost of service, but upon the arbitrary, absurd and villainous theory of what the truffle will bear. Competition is destroyed by combination Sovereign powers are arbitraily exercised by railroad managers in this country, which neither the president nor congress dare exercise, and if exercised by any sovereign in Europe would produce revolution. Values of property are entirely in their control. An increase of ten per cent. in the cost of transportation reduces the value of the production of this country millions of dollars without at all reducing the cost to consumers.

The natural forces of steam and electricity have been monopolized by a few individuals and so controlled as to rob the productive industries of the country of their just reward and the fruits of honest toil are gathered into their coffers. By the practical working of their forces and the abuse of franchises granted by law, fabulous fortunes are suddenly aggumulated while the masses of the people are impoverished.

To correct these abuses and restrain co rate power legislative authority is invoked. Just and equitable laws should be enacted that will protect popular rights without doing violence to individual or corporate interests.

Railroad commissioners should be appointed by the federal and state governments to see that these laws are enforced. The purpose of the law and the endeavor of all good citizens should be to avoid antagonisms and harmonize the interests of all departments of the business of the country. We believe these objects would be substantially seconded by the Reagan bill, and therefore urged its adoption with such force and arguments as we could command; but all arguments and appeals fell upon leaden

The committee were nearly solid in the railroad interest, a majority of whom were stockholders in, or attorneys for, these corporations. But we do not despair of ultimate success in railroad transportation reform. The sense of public justice will not always slumber, and when fully aroused the people will surely provide a remedy for public wrongs and a protection for popular rights.

We cannot close this report without testify. ing to the fidelity and ability with which Judge Reagan is pressing this subject upon the at tention of congress, and trust he may be permitted to see his efforts crowned with success. We also embrace this opportunity; of sending

grateful acknowledgments to Bro. Aiken, of South Carolina, for the many courtesies received while in Washington. All of which is respectfully submitted.

VM. G. WAYNE. Committee.

Inflammation, coughs, catarrhs and pneumonia, resulting from colds, may be cured by Ayer's Cherry Pectoral. It allays the inflammation, removes the irritation and soreness.

soothes the organs, and restores the sufferer to It is important at this season to secure the best rams for breeding. The best are the cheapest. A full-blood Cotswold may not look any better than a threee-quarters grade, but the difference will be seen in the lambs, which

are often better for fattening purposes than

Nothing is so reliable as Ayer's Cherry Pec toral for colds, coughs, in short for any and all derangements of the respiratory organs, which tend towards consumption. In all or dinary cases it is a certain cure, and it affords sure relief for asthma and consumption, even

The New Voyage of Life.

Few people but will realize the startling Few people but will realize the startling truth shown in the engraving accompanying the advertisement of Rev. T. P. Childs in this number of The Spirit of Kansas. Truly our present civilization battles with disease from the cradle to the grave. Unseen dangers surround us on every side, a slight cold or cough neglected may bring usuntold miseries: Catarrh, Bronchitis, Consumption, with Death in the near fature.

animption, the symptoms in each being ouch alike, especially in the earlier stages. No one who recognizes in his own system, or who has friends or relatives with any of the symptoms so acutely described, should fail to send a statement of the case to Mr. Childs. There may be hope even in very desperate cases. Catarrh is generally many years in gaining a foothold in system, and attacks so many parts of the body that it cannot be cured by any one remedy or by a single application. It requires remedies that will meet the disease wherever it is located, and fight it inch by inch until a remedies that will meet the disease wherever it is located, and fight it inch by inch until a complete victory has been obtained. Rev. T. P. Childs has treated and cured thousands at their own homes never having seen them. In a thoroughly honorable and characteristic manner he publishes the names and addresses of some he has cured, that any who desire may inquire of the patients themselves what Child's Catarrh Specific has done for them. He gives his own experience after fifteen years of relief from the dread disease. No doubt many of our subscribers will find their own cases stated with startling clearness.

None need feel any hesitancy in placing their case in Mr. Childs' hands for treatment. We would call especial attention to the advertisement, and request a careful perusal of the facts

ment, and request a careful perusal of the facts as set forth.

as set forth. Many who do not receive our paper would doubtless be very thankful, should our readers call the attention of such to the advertisement of Mr. Childs. Catarrh and Consumption are the twin enemies of the race, and any means of Trelief is a heaven-sent blessing. Childs' Catarrh Specific may be relird on as an effective and certain cure, and you may recommend it to your friends with every confidence.

The Farmers' Alliance ought to be strong in

Agricultural Notes. Nearly one-third of all the sugar sold on the English market is beet sugar.

Pennsylvania farmers grow one-third of all the buckwheat produced in the country. The bodies of fruit trees smeared with blood or grease are sate against rabbit attacks.

Twelve tons of beets to the acre is a frequent European average, from which is extracted 1.5

tons of sugar. The horse is a native of Africa, whence he was first introduced into Egypt, and thence

into other countries. Agricultural industry develops the physical and mental man more thoroughly than any other occupation known among men.

More than 3,000 steam plows are in operation in England and Scotland. The most popular are those drawn by stationary engines at each side of the field.

Farmer- in the United States have \$12,210, 253 872 of control invested in their business. This sum includes farms, implements, live Stary, tertilizers and fences.

In the winter management of poultry warmth and an abundance of eggs seem to be intimately consecred, and proper feeding without a comfortable poultry house will result in unsati-factory returns.

The macerop of this year is known to be very faces. It is estimated at 480,000,000 busbels, or something less in quantity than wheat. Example for the partial failure of corn, oats would be cheap, but under p esent circumstances they will all be needed before another

The Boston Advertiser remarks that "the wheat acreage of the country may be estimatbid, 81c asked; February sales, 82½c; No. 1, cash sales, 86c; Jaxuary, 85½ bid.

CORN—Market steady; No. 2 mixed, cash, 40¾c; January 40½c bid, 40¾c asked; May, 42c bid, 40¾c asked, May, 42c

OATS—No. 2, cash, 30½c bid; May sales, 36c
BUTTER—Steady at 25c for choice.

of Bishop & Co. last fall, for my daughter, and am well pleased with the Bitters. They did her more good than all the medicine she has taken for my years. WM. P. MCULURE. The above is from a very reliable farmer, whose daughter was in poor health for seven or eight years, and could obtain no relief until she used Hop Bitters. She is now in as good health as any one in the country. We have a large sale and they are making remarkable cures. W. H. BISHOP & CO.

The North American Review for December communes attention no less by the eminence of its contributors than" by the value and timeless of its table of contents. First, there is a symposium on "The Health of American Women," regarded from three distinct points of view: Dr. Dio Lewis considers the question as it is offected by the prevailing style of feminine attire, especially by the practice of tight lacing; Mrs. Elizabeth Cady Stanton points out the many injurious influences of social environment; and Dr. James Read Chadwick sets forth the effects of education, climate and food, and finally discusses the question whether in the near fature.

To many it will be a matter of surprise that Catarrh is very frequently mistaken for Consumption, the symptoms in each being much of Iowa, writes of the "Constitutional Prohibition" of the liquor traffic in that state, and maintains that the measure is in entire accord with the traditions of the original settlers, and approved by men of all political parties and all nationalities. Gen. Grant, in an article entitled "Undeserved Stigma," states the facts of Gen. Fitz John Porter's case, and argues that the sentence of the court martial, that cashierod him was based on a misconception of the essential circumstances. Richard A. Proctor writes of "The Influence of Food on Civilization," discussing with much learning and force some of the most interesting sociological problems of the present day and of the near future. Prot. Fisher, of Yale College, in defending the cause of "The Decline of Clerical Authority," holds that this decline, which affacts the status of church and minister only as a part or function of the secular state, is by no means to be regretted, and that the spiritual influence of the church and its ministry is to-day greater than of old. Einally, there is a symposium upon the conditions of "Success on the Stage." the contributors being six of our most prominent actors-John McCullough, Joseph Jefferson, Madame Modjeska, Lawrence Barrett, Maggie Mitchell and Wm. Warren.

Youthful Vigor.

How to Become a Proof-Reader. A correspondent of the Chicago Tribunc wrote that paper: "What shall I do to make a first-class proof-reader? Please answer through the columns of your paper and you will oblige," to which the editor replied as follows: "To become a first-class proof-reader

is a very easy task—so easy that the wonder is more young people don't take it up instead of clerking or copying. The first step is to serve an apprenticeship at printing, which enables the student to discern typographical irregularities. A general acquaintance with history, biography, poetry, fiction, music, geography, the dramma, etc., is important. Politics should have earnest attention, for you must be able to identify every man who has followed that business from Cain down to the present day. No matter where his residence or what his calibre—whether he is or was the Premier of England, the Caliph of Bagdad, or a Bridgeport "tarrier"—you should have a minute knowledge of his public and private life and be select the proper spelling from the halfdozen ways which the author is sure to employ. Read, ponder, and assimilate Webster, the Bible, Shakspeare. An-thon's Classical Dictionary. Roget's Thesaurus, Lippincott's Gazetteer, Hayden's Dictionary of Dates, the eyclopedias of Appleton, Zell, Johnson, and thers, Bremisch-Niedersachsisches Worterbuch, Brandtke's Slownik dokladny Jezka Poiskiego i Niemieckiego, and any other works of a solid nature that happen to be at hand. During the long winter evenings you might scoop in a few languages—say Greek, Latin, French, Hebrew, Russian, German, Chinese, Bohemian, and Choctaw. You will need them in the fashion articles and Carter's speeches.

The foregoing are few of the acquirements of a first-class proof-reader. The business is learned in a short time by man with a little perseverance, and affords constant employment (twelve hours seven days a week Dat a liberal compensation (\$20), with frequent honorable mention. When you quent honorable mention, have picked up the rudiments mentioned, if you don't conclude to become a college Professor at \$5,000 a year, call at the Tribnne office and we will give you a desk. Our present proof-readers are hardly up to the standard.

An Indispensible Instrument!

The value of an article is almost always in dicated by its price, and for years the people were contents to pay \$3 00 for a genuine Livermore Stylographic Pen, and the same pens are yet doing good service. The success of these pens led unscrupulous persons to get up inferior imitations, which they offered at such low prices that many persons not understanding the difference, were is duced to buy them. The Livermore Company therefore cut down the price of their short plain l'ens to \$2.00, and short gold mounted to \$2 50 each, to give everybody a chance to have the best article of the kind. You can buy them for that money by remitting the amount to Louis E. Dunlap, Manager Stylographic Pen Co., 290 Washington Street Boston; the pen together with a package of superior ink will be sent at once, refunded it they do not prove to be perfect and satisfactory in every respect. There is nothing more appropriate than a Stylograph, as a gift to a lady or gentleman. The Stylegraphic Pen Co., who manufacture the Livermore Pen, is the largest concern of the kind in the world, with branches at New York, Chicago, and London, Eng. The Livermore Stylographic Pen is a pencil which writes ink, never needs sharpening and never wears out, and has been adopted by over 500,000 knights of the quill in this country and aproad. Any one who has learned to use a Livermore Pen will not be pursuaded to do without it, and any one who has not learned to use one should get one

The generous proprietors of Dr. King's New Discovery for consumption, specially request that all sufferers from consumption, Coughs, colds, asthma, bronchitis, loss of voice, difficulty of breathing, tickling in throat, night sweats, phthisic, quinsy, hoarseness, croup or any affliction of the throat, chest or lungs, to call at Barber Bros. drug store and get a trial bottle free of charge, which will convince you of its wonderful merits, and show you what a regular one dollar size bottle will do. Thousands of hopeless sufferers who once looked forward to a dark and unpromising future, are now the most happy beings on earth, having been completely cured by Dr. King's New Discovery for consumption.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelop to the Rev. Joseph T. Inman, Station D, New York City.

Meeping Vegetables and Fraits.

Marion county agricultural and horti-cultural society, held recently at Indian-apolis, a valuable essay was read by the At the November meeting of the apons, a varuable essay was read by the president, Sylvester Johnson, on profield to be cultivated for years without tooting fruits and variately during winter. Mr. Johnson burie, his cab- have fallen on the surface from growth better for an orchard, more likely to winter. Mr. Johnson buries his cabbage, laying them carefully in the trench or pit and pulverizing the dirt thoroughly before shoveling over them, so as to cover all completely. His beets as to cover all completely. His beets as to cover all completely. It is not considered the standard of the standar and turnips he keeps in the cellar. If the chemical combination that reprothe cellar is too dry he would cover them with a few inches of moist sand. For potatoes he wants a dry, cool cel- ularly fertilized with the elements that lar, with a temperature of about 40 chemical analysis shows to be the condeg., and absolutely dark. Darkness is necessary to preserve the flavor, as foreign vegetation, as far as human well as to prevent sprouting. Parsnips science can produce the analysis of the he leaves in the ground where they plant. And if foreign vegetation does grew. They are better for being frozen. He recommends and practices preserving almost all kinds of fruits in be present to replace that which the glass, self-sealing cans. He finds that the fruits that keep best in this way the fruits that keep best in this way are the following in the order named: Pears, peaches, plums, cherries, etc.

Mr. Howland gave his method with packs in close and nails on cover tight.

He leaves the boxes out till freezing weather begins and then puts them weather begins and then puts them away in the cellar, one row of boxes upon another. His experience is that upon another. His experience is that requires for its perfect development are made from the yolk and white of an egg; but such is the fact, and it shows how complete a food an egg is. open bin. He has kept Baldwins and It is also easily digested, if not dam-

Mr. Billingsley told of a very successful apple-keeper who would not let apples be picked over or handled at all after they were put away for the winter. Other speakers testified to the damage done by picking over or sorting out the decayed fruit from a bin of apples. Mr. W. H. Ragan, who was present, added some remarks upon the ling an ounce and three-quarters consubject testifying to the same fact. He

At the last meeting of the Marion county agricultural and horticultural society it was resolved that the executive committee consider the propriety of appointing each third meeting at points in the county remote from Indianapolis, with a view of enlisting the That is to say that three and one-tenth farmers in different parts of the county in the work of the society. The movement is a good one and worthy the adoption of all county societies.

Spontaneous Vegetation.

A writer for the American Farmer asks the question: "What process while it is certainly less healthful. produced the first vegetation on earth?" d then goes on to give the solution

mosphere? I know that there are such, and that some of them would condemn any man to be burned at the adds to its beauty during the autumn stake who dared to believe that such an idea is a preposterous absurdity. And yet it may be honestly doubted that such was the origin of vegetation. I believe that vegetation was produced as the result of the chemical combination of the elements of the plant in the tion of the elements of the plant in the earth and the atmosphere. I am as positive in the belief as I am that our "bodies return to dust." And just as I believe vegetation to have been originally produced by nature's chemistry. I believe a great deal of vegets. try. I believe a great deal of vegetation to be produced by the same pro-

thicket of pine. I was deeply impressed with the observation, and later reflection and observation have all tended too and observation have all tended to strengthen the belief and conviction in what I thought then, viz.: that the chemical elements of the white oak lay chemical elements of the white oak lay dormant in the soil, but the pine having possession of the soil in living growth it preserved the ascendancy, and that as soon as the pine was removed the chemical combination was formed that quickened the elements into life and produced the oak by the contact of the atmosphere with the soil, which was before interdicted by the vital power of the pine. 1 believe the vital power of the pine. 1 believe that soils in a natural state teem with that soils in a natural state teem with the plants in actual possession of the soil lose their strength from continued reproduction

ually, other combinations occur, producing plants of a different nature.
And thus in agriculture we fail utterly
to get a stand of the seeds that we
plant even with fertilizer. The ground
becomes covered with some other plant -rag-weed for instance—which produce a most luxuriant growth from the effects of a fertilizer that we have used ed to take more water than he wants in

duce the plant.
If a field be set in grass and then regstituents of the plant, the grass will hold the soil to the exclusion of all makes its appearance it will be attribu-table to the fact that, in the fertilizer used some element is absent th t should tained.

Eggs as Food.

the cheapest and most nutritious artiapples. He picks early and puts the cles of diet. Like milk, an egg is a fruit in small or medium-sized boxes, complete food in itself, containing every Northern Spys till May in this manner.

Mr. Billingslev told of a very successthan eggs. The albumen, oil and saline matter, are, as in milk, in the right proportion for sustaining animal life. Two or three boiled egge, with the addition of a slice or two of toast, will make a breakfast sufficient for a man,

and good enough for a king.

According to Dr. Edward Smith, in
his treatise on "Food," an egg weighteen and three-quarters grains of nitroalso alluded to Professor MeMotte's, gen, or 15 25 per cent. of carbon and two per cent. of nitrogen. The value of one pound of eggs, as food for sustaining the active forces of the body, is to the value of one pound of lean beef, as 1584 to 900. As a flesh producer, one pound of eggs is about equal to one pound of beet.

A hen may be considered to consume one bushel of corn yearly, and to lay ten dozen or fifteen pounds of eggs That is to say that three and one-tenth pounds of chemistry corn will produce, when fed to a hen, five-sixths of a pound of eggs, but five-sixths of a pounds of chemistry corn will proa pound of eggs, but five-sixths of a pound of pork requires about five pounds of corn for its production.

Taking into account the nutriment in each, and the comparative prices or the two on an average, the pork is about three times as costly a food as the eggs,

Barberry.

There are but few shrubs that are Does any intelligent, reflecting being believe that the material seeds were manipulated by the hand of the Almighty, and by Him placed in the ground, and that there quickened into life by the sun and moisture of the atmosphere? I know that there are more hardy or beautiful than the barmonths, all combine to make it one of the most beautiful as well as desirable shrubs that adorn the garden. We have seen only now and then one of these bushes in Kansas. It is a shrub easy to transplant, and easy to raise from the seed.

Over-Fed Horses.

It is a mistaken sense of kindnesss to over-feed horses. It may make them look sleek and handsome, yet it impairs their general health and makes them this belief by noticing, during a ride in Southern. Maryland when I was quite a youth, a thicket of young white oak growing upon the site of a former thicket of pure. I was deeply impressed to fit. but when seldom or irregular. ly used, the food should be in proportion to the amount of work, else they will become over-fat, incapable of usual exertion, and cannot be depended

of their seed which robs the soil of the slop. The hog has not room for much elements of their nature. That, grad-water; and if food which contains much is fed to him, it makes him big-bellied, but poor. Hogs, as well as all other animals, should be allowed all the water they will drink; but it should not be mixed with their food in excessive order to assimilate the food he requires.

The Practical Farmer says: "Nurserymen knew what purchasers will not believe, that short, stocky trees are evertop and overshadow those that started later, the sap of the tree consequently pushes its growth upward and into foliage while the roots are long, slender and few, consequently it does not bear transplanting as well or do as well after being transplanted as was expected from its fine appearance in the row. Stocky trees on the contrary, being overshadowed, make a shorter growth, with the branches and foliage nearer ground, with numerous short roots that do not waste their substance in bleeding or by absorption from the soil, that cause the tree to start off in a Eggs, at average prices, are among rapid growth and outstrip its slender rival, and also come quicker into profitable bearing.

A COMMON-SENSE REMEDY.

SALICYLICA! SALICYLICA! SALICYLICA! SALICYLICA! SALICYLICA! SALICYLICA!

NO MORE RHEUM ATISM, GOUT OR NEURALGIA.

Permanent Cure Guaranteed. Five years established and never known to rive years established and never known to fail in a single case, acute or chronic. Refer to all prominent physicians and druggists for the standing of Salicylica.

SECRET.

The only disolver of the poisonous uric acid which exist in the blood of rheumatic and gouty

which exist in the blood of recumatic and gotty patients.

SA**ICYLICA** is known as a common-sense remedy, because it strikes directly at the cause of Rheumatism Gout and Neuralgia, while so many so-called specifics and supposed panaceas only treat locally the effect.

If has been conceded by eminent scientists that outward applications, such as rubbing with oils ointments, linaments, and soothing lotion will not eradicate these diseases which are the result of the poisoning of the blood with the uric acid.

SALICYLICA works with marvelous effect on this acid and so removes the disorder. It is now exclusively used by all celebrated physicians of America and Europe. Highest Medical Academy of Paris reports 95 per cent. cures in three days.

FAMOUS

PROSPECTUS FOR 1883.

A FIRST-CLASS FAMILY MAGAZINE. LIPPINCOTI'S MAGAZINE,

FOYULAR MONTHLY OF GENERAL LESSRATURE. The distinctive repatation of Lippincott's Magazine as "emineutly readable" will, it is irusted, be confirmed and extended during the coming year. The special arm of its conductors is to secure such freatment of the great variety of topics embraced within its scope as shall render it attractive to the general mass of intelligent readers, a favorite in the family circle, and a means of culture as well as of enterstainment.

crim, and a means of culture as well as of entersimment.

While fiction, in the form of serials and of short stories; holds a prominent place in its places, it has gained particular notice by its sketches of travel and a iventure, studies of its and character, and articles on natural history and other scientific subjects, written with the freshness that comes from personal observation and experience, in a lively style, and with abundant specifical illustrations.

One of the chief attractions will be a fixelulating Serial Story, to camp near the dannary number, calibled "Fire Jewall in the Lotos," by Mary Agnes Tincker, author of "Signor Monaidini's Nicee," "By the Tiber," etc., in which the interest will be found to center on three finely contrasted female characters, Italian, English, and American, and which, besides many exquisite pictures of Italian life and scenery, cubodies the writer's matured views on some of the kading questions of the day.

In the other features of the Magazine the

lions of the day.
In the other features of the Magazine the union of literary excellence with popular attractiveness will be steadily maintained. For Sale by all Book and Yewsdealers.

No Whiskey!

Brown's Iron Bitters is one of the very few tonic medicines that are not composed mostly of alcohol or whiskey, thus becoming a fruitful source of intemperance by promoting a desire for rum.

Brown's Iron Bitters is guaranteed to be a nonintoxicating stimulant, and it will, in nearly every case, take the place of all liquor, and at the same time absolutely kill the desire for whiskey and other intoxicating beverages.

Rev. G. W. RICE, editor of the American Christian Review, says of Brown's Iron Bitters:

> Cin., O., Nov. 16, 1881. Gents:—The foolish wast-ing of vital force in business, pleasure, and vicious indulgence of our people, makes your preparation a necessity; and if applied, will save hundreds who resort to saloons for temporary recuperation.

Brown's Iron Bitters has been thoroughly tested for dyspepsia, indigestion, biliousness, weakness, debility, overwork, rheumatism, neuralgia, consumption, liver complaints, kidney troubles, &c., and it never fails to render speedy and permanent relief.

THE SPIRIT OF KANSAS.

BY HOFFMAN BROS.

City and Vicinity.

We are late this week, owing to the press being out of fix. It is not our fault.

The Friends are holding a series of very interesting meetings in this city.

The proceedings of the State Horticultural Society received too late for publication this N. P. Deming, one of our best fruit raisers,

attended the State Horticultural Society meeting at Topeka this week.

Our object. To double our list of subscrib ers by January first. If you only tell your neighbors we are bound to do it, at ten cents for three morths.

On the occasion of her majority, Miss Ellis was tendered a party by her numerous friends at Humboldt. She did not forget the printer, therefore we feasted on some delicious cake sent us by mail. She received numerous pres-

The young men connected with the Y. M. C. A. of this city, are about to circulate cards and canvass for the support of its work. It is hoped that they will meet with success and receive a liberal support from the citizens of

Straw Lumber.
As Lawrence justly boasts of the only straw lumber factory in Kansas, the following description of the mode of manufacture may not lack interest to our numerous readers. The factory at this place has been in successful operation for about a year, and finds ready sale for all the lumber it manufactures.

"A description of this new competitor for favor lately appeared in the American Architect, and also its method of manufacture, which shows unmistakably that straw lumber is admirably adapted to many kinds of finishing work, barrels, table and counter tops, doors and ornamental work, and that it can be produced at less than half the price of wainut. The standard manufacture is in widths of 32 sinches, a length of 12 feet and a thickness corresponding to that of surface boards. These filled. There are two domest the nest and the dimensions may be varied to suit such orders as may be given, and embrace any width, length or thickness. It may be finished with varnish or with paint, and is susceptible of a heavy door of o.c. These words a suppose of heavy door of o.c. These words a suppose of heavy door of o.c. These words a suppose of heavy door of o.c. These words a suppose of heavy door of o.c. proof, being manufactured under 590 degrees of heat, and we are assured has been bolled for open. There is some hours without apparent changes of west end and change in it. WE take the liberty to occasionally mail structure. Its tensile strength is greater than east end and the unit the copy. price asked, is the best paper for the farmers of this state to be had and thereby become duce 1,000 feet of boards. The pulp is rolled into thin sheets, a number of which, corresponding with the thickness of the lumber de- us Mr. D'unteg thes the manufacture the result

sponding with the thickness of the lumber desired, are placed tagether with a pecufiar cemeot, which is claimed to be water proof, and are then rolled under a pressure sufficient to amaignmate them into a solid mass, which may be worked with plane if desired.

When it is remembered that it takes fifty years to grow a tree to maturity, suiting it to commercial purposes—and a tree producing 82-inch lumber will require fully twice that time—while 20,000 feet per acre is a large yield inder the most favorable circumstances, it will at once be realized that where 3,000 feet can be taken from an acre of ground for an indefinate number of years, the process which enables such a result to be accomplished, and which will yield a really valuable lumber, is one of vast importance."

The Lawrence Canalog Factory. The following from the Tribune is such a Fruit fin farm is located FF2 infles strictly as fair and intelligent statement of facts regard- of the city. ing one of the many substantial enterprises of this ci y that we give it piece in our cottoms, only remarking that escablishments of this street year York, Seat for well estangue an character are not only a vast benefit to the uli particulars. cities in which they are located, but to the state at large. Why not try the experiment in other sections of the state? The article

"This company began active operations for this season the 14th day of August, continuing until the middle of November, a period of about three months, employing during this time an average of 125 hands, during the busy season employing as high as 175 hands, the pay roll tor labor amounting weekly from \$500 to \$940. The company raised 140 acres of sweet corn and 10 acres of tematoes, this being in addition time expires. We shall add other papers to to the much larger amount contracted for with the farmers of the county. There were put up 186,000 two pound cans and 9,500 three pound cans of sweet corn; 150,000 three pound cans and 3,700 gallon cans of tomatoes; 17,000 In the country we say our stock of three pound cans and 22,000 gallon cans of apples. Over \$500 worth of produce was canned each week, the larger portion of which money went directly into the hands of the farmers of N VanHorsen and fully Great Question of the cause about the county. The making of the cans about a half a mution in number, began at the factory about the first of March and continued watil the close of the season, employing about a dozen hands during this time.

The greater portion of the canned goods are already sold and shipped, the quality being such that already a demand has been created that is far beyond the supply. The company will keep its establishment open through the winter, beginning at once the manufacture of cans for the next season. A car load of tin is expected daily. The probabilities are that the company will arrange to increase its capacity largely the coming year. This company has alroady fulfilled its promise to our citizens of making this enterprise a matter of pride to the

Frats Hill Farm. Saturday of last week we wile called upon

by Mr. N. P. Deming and invited to visit the above named farm. The object, in particular, of the visit was to examine the fruit cellar he had recently completed open a plan of his own. However, we will say, before entering upon a description of the cellar, that we took a walk over the farm and through the orehard. The land forming the farm is nigh and somewhat rough or broken, but admirably adapted to the purposes to which it has been put. On the north side of the bouse is a grove consisting of walnut and cottonwood trees, planted at various times suring the last seven teen years, and some of the cottonwood trees will now lurnish about two cords of wood. The wateris are also of good size. Mr. Doning is being successful in rate ng lawerrate trees, allerge number of which he has planted to a blackberry patch. To the south and west of his residence, on ground get thy stoping to the north is located the orehard, consisting of about thirty yari. ties of apples and a considerable number of the best varieties of late budged peaches. The apple trees, which are his prices or large, upright, well but seesthly pruned, seattly and free from parasities so frequent in organics carelessly handled. But Mr Demice as studied the best modes of fighting dangerous in sects and now is being rewarded. The peach orchard looks equally went Mr. Deming settled this farm seventeen years ago, and during that period has succeeded in improving his place in an excellent notiner, buying everything in good shape for e-moort and convenience.

The cellar is admirably adapted for the preservation of fruit. It is built of some will walls two feet in thickness, arched over, and the roof is covered with clay. It is disk to the earth about seven foot bur being an a stor hill it is always dry. The chair is 15 12 feet in the clear inside and 10 feet night to to wer of arch. The bins, of which there are hour, are ranged two on each side and extramog within four feet of the entrance. Law back by, v which are 21-2 feet deep by 4 in some ... raised a foot them the dance. The leading bins are 2x4 in the p transference. Farm and Agricultural News.

Soil for radishes needs to be light and rich. They can be grown from early Spring to late in the Fall. They deserve a wider cultivation.

Pot-layered strawberry plants should be set out soon if at all this Fall. They cost more than ordinary plants, but they produce fruit sooner.

Since the new dog law went into effect in Indiana, there has been a revival of the sheep industry in most counties of the State.

Unless an orchard is designed for commercial purposes, there is no special advantage in setting out all the trees at once. It is better in many respects to plant the trees at different pe-

The great source of fertility is the atmosphere, and, if we would avail ourselves of it, we must have our soils in a condition favorable to the deposit by the atmosphere of its fertilizing proper-

The apple crop in England and on the continent will not be very abundant this year. This means that America will have to supply a good foreign demand, if she can.

The best yearly butter record was made by a Jersey cow, Eurotas. In a little over eleven months she produced 7,525 pounds of milk, from which 778

much for food as about two pounds of

beef. They are easily digested. Dahlia roots often decay during the Winter. Leave three or four inches of the stalk on them, with the outer covering well scraped away. Make a small opening at base of stalk, and they will not decay; the watery deposit escapes.

It is said that the oleomargarine fac-

tories of New York have a producing capacity of 116,000,000 pounds; the dairy butter factories 111,000,000 pounds. Must delicious creamery butter be supplanted by this uncertain mixture?

American farmers do not value clover hay as highly as the English do. Timothy is considered much inferior to clover by them; much superior by us. Clover sells in England for about 20 per cent. more than timothy. Properly cured it is a valuable crop.

Farmers should give much attention to their farmers' clubs and similar organizations. There's a deal to learn at a properly and intelligently conducted farmers' meeting. Don't look upon them as for the "fancy" farmer only.

Many orchardists say it is not best to renew the orehard by planting in young trees where old ones have died and been cut down. To a certain extent, the elements suited to growth in the apple wood have been extracted from the soil, and insect enemies have found location there.

The best way for everyone who undertakes the culture of tobacco is to raise his own plants to begin with, but they will require much care and close attention. Soil must be kept moist, and no weeds should be permitted in the bed. Liquid manure, such as barnyard leachings, will promote growth very much. The plants should be started in a hotbed, though the sashes should be removed occasionally, to prevent scalding or burning. Sometimes insects begin their work when the plants are quite young, but applications of soapsuds will prevent their ravages.

No orchard escapes the ravages of the great apple enemy—the codling moth. The caterpillar of this moth is what causes the "worm holes" which every one detests in this valuable fruit, and it is so common that no description is necfrom t is usually deposited in the eye of the apple; bores its way toward the core, and after a while gnaws out through the skin so that it has a channel to throw out pellets of dirt as it eats the pips at the core. As the insects generally fall to the ground with the fruit and then crawl up the tree to make their cocoons, they may be caught by putting bandages of old cloth or carpet around the trunk of the tree, and then may be quickly killed. It is the best way to deal with this troublesome in-

All About a Shoe Peg.

It is laughable to see how little it takes city street. "Never you mind me," said a bent-

over old man, when asked what had happened to him. How did he get hurt?" asked a man

out of breath. "Did the horse step on him?" queried

a colored man, with spectacles on.

"Where did the dog bite him? Did
they shoot the dog? Was it a big dog?
Has he got a wife? Did they live together?" rattled a woman made up a good deal like Widow Bedott.

Come and see the man in a fit," sqeaked out a boot black, as he called the rest of the brigade.

"Look out! he's going to shoot!" yelled a big man with red whiskers; and the crowd blew away like dust when the old man slid his hand into his pocket as

if for a shooting iron.

Then he straightened himself and started off on his own individual business, muttering something about "What

ones who make mistakes. The Leadon Telegraph reports Gladstone as saying that he had "sat at the feet of the Game bird of Dirmingham," instead of the Bigmingham. Dyspepsia, heart-burn, nausea, indigestion, etc., 'are always relieved by Brown's Iron Bitters.

Dyspepsia, heart-burn, nausea, indigestion, etc., 'are always relieved by Brown's Iron Bitters.

Strays for the week ending Dec. 6, '82.

R. K. Tabor, of the A., T. & S. F. railroad writes that he has tried Leis' Dandellon Tonic and considers it the best tonic he ever tried

Peterson's Magazine for January is just out, a marvel of beauty, the most costly, evidently, ever issued. There are two unrivalled steel engravings; the first, "Cherry Ripe," an exquisite copy of Millais' caebrated picture; the other, "Psyche Listening to the Flute," also exceptionally charming. Then there is a double-sized colored steel fashion plate, which is a picture as well; and some thirty other fashion ;patterns, besides a score of designs in to raise a crowd-or start a story-in a embroidery, crewel work, etc., etc. But the great feature is a magnificent colored pattern in Berlin-work for a curtain-border, chairstripe, etc., etc., the most expensive and beautiful, yet useful embellishment, perhaps, ever published in any magazine. There are two novelets, "The Professional Beauty" by Frank Lee Benedict, and "Rule and Ruin," by Mrs. Ann S. Stevens, besides several completed stories by other first class authors, and the very best always write for this magazine. The reading matter is increased also, there being one hundred and four pages in the number. "Peterson," in short, is cheaper and better than; ever for 1883. The price is still only two dollars a year. To clubs it is astonishingly low, viz: six copies for nine dollars, with an extra copy to the person getting up the club. Or seven copies for ten dollars and a half, with both an extra copy and a large size engraving, "Christ Before Pilate," or a photograph album, to the person getting up the club. Subscribe to no magazine till you the mischief it was to them if he wanted have seen a copy of this. Specimens are sent to sit down and take a peg out of his gratis to persons wishing to get up clubs. Adshoe."

A Child Worth Her Weight in Gold.

A few years ago a steamer was coming from California. The cry of "Fire! fire!" suddenly thrilled every heart. Every effort was made to stay the flames, but in vain. It soon became evident that the ship must be lost. The burning mass was headed for shore, which was not far off.

A passenger was seen buckling his belt of gold around his waist, ready to plunge into the waves. Just then a pleading voice arrested him-

"Please, sir, can you swim?"
A child's blue eyes were piereing into his deepest soul as he looked down up-

"Yes, child, I can swim." "Well, sir, won't you please save

"I cannot do both," he thought. must save the child and lose the gold. But a moment ago I was anxious for this whole ship's company; now I am

this whole ship's company; now I am' doubting whether I shall exchange humaz life for paltry gold."

Unbuckling the belt he east it from him and said, "Yes, little girl, I will try to save you." Stooping down he bade her clasp her hands around his neek. "Thus, child; not so tight as to choke me. There, hang on now, and I will try to make land."

The child bowed herself on his broad shoulders, and clung to her deliverer. With a heart thrice strengthened and an arm thrice nerved, he struck out for shore. Wave after wave washed over them. Still, the brave man held out, and the dear child on, until a mighty mountain billow swept the sweet treasure frem his embrace, and cast him senseless on the bleak rocks. Kind hands ministered to him. Recovering his consciousness, the form of the dear child met his earnest gaze, bending over him with more than angel ministra-tions, and blessing him with mute but eloquent benedictions.

Miami—B. J. Sheridon, clerk.

Taken up by Jas. McDowell in Osage tp. 3 sows black and white spotted, two of them have pigs one 4 and the other 5; valued at \$35.

ing.

the best if not the best liniment ever discovered.

ery man can haveperfect success in avery case if he We feel positive th will only use good common sense in applying KENDALL'S SPAVIN CURE, and persevere in bad cases of long standing. Read below the experience of others.

FROM COL. L. T. FOSTER.

FROM COL. L. T. FOSTER.

YOUNGSTOWN, Onio, May, 10th, 1889.
DR. B. J. KENDALL & Co., GENTS:—I had a very val able Hambietonian colt which I prized very highly, he had a large bone spayin on one joint and a smaller one on the other which made him very lame; I had him under the charge of two Veterinary Surgeons who failed to cure him. I was one day reading the advertisement of Kendall's Spayin Cure in the Cicago Express, I determined at once to try it, and got our druggists here to smad for it. They ordered three bot tles; I took them all and thought I would give it a thorough trial. I used it according to directions, and by the fourth day the colt ceased to be lame, and the lumps had entirely disappeared. I used but one bottle and the coits limbs are as free from lumps and as smooth as any horse in the state. He is entirely cured. The cure was so remarkable that I let two of my neighbors have the remaining two bottles, who are now using it.

Yery Respectfully,

L. T. FOSTER.

PERSEVERANCE WILL

TELL.

STOUGHTON, MASS., March 16th, 1880.

B. J. KENDALL & CO., GENTS:—In justice to you and to myself, I think I ought to let you know that thave removed two bone spavins with Kendall's Spavin Cure, one very large one, don't know how long the spavin had been there. I have owned the horse eight months, it took me four months to take the large one oil and two for the small one. I have used ten bottles. The horse is entirely well, not at all stif, and no bunch to be seen or left. This is a wonderful medicine. It is a new thing here, but lift does for all what it has done for me, its sale will be very great.

Respectfully yours,

CHAS. E. PARKER.

KENDALL'S SPAVIN CURE.

Acme, Michigan, December 28th, 1879.

B. J. Kendall & Co., Gents:—I sent you one dollar for your "Kendall's Spavin Cure" last summer which cured a bone spavin with half a bottle. The best liminment fever used.

Yours Respectfully,

HOMER HOXIE.

FROM REV. P. N. GRANGER. Presiding Elder of the St. Albaus Dis-

trict.

St. Albans, Vt., Jan. 20th, 1880.

Dr. B. J. Kendall & Co., Gents:—In reply to your letter I will say that my experience with 'Kendall's Spavin Cure' has been very satisfactory indeed. Three or four years ago I procured a bottle of your agent, and with it, cured a horse of lameness caused by a spavin. Last season my horse became very lame and I turned him out for a few weeks, when he became better but when I puthim on the road he grew worse, when I discovered that a ringbone was forming, I procured a bottle of Kendall's Spavin Cure and with less than a bottle cured him so that he is not lame, neither can the bunch be lound.

Respectfully yours, P. N. GRANGER. trict.

Respectfully yours, P. N. GRANGER.

Wilton, Mion., Jan. 11th, 1881.

B. J. Kendall & Co., Gents:—Having got a horse book of you by mail a year ago, the contents of which persuaded me to try Kendall's Spavin Cure on the hind leg of one of my horses which was badly swollen and could not be be reduced by any other remedy. I got two bottles of Kendall's spavin Cure of Preston & Ludduth, Druggists of Wassea, which completely cured my horse. About five years ago I had a three-year-old colt sweenied very badly. I used your remedy as given in your book without roweling, and I must say to your credit that the colt is entirely cured, which is a surprise not only to myself but also to my neighbors. You sent me the book for the trifling sum of 25 cents, and it cowld not get another like it I would not take twenty-five dollars for it.

Yours truly,

GEO. MATHEWS.

Kendall's Spavin Cure.

Hamilton, Mo., June 14th, 1881.

B. J. Kendall & Co.—Gents: This is to certify that I have used Kendall's Spavin Cure and have found it to be all it is recommended to be, and in fact more too. I have removed by using the above callous, bone spavins, ring-bones, splints, and can cheerfully testify and recommend it to be the best thing for any bony substance I have ever used, and I have tried many as I have made that used, and I have ... my study for years. Respectfully yours, P. V. CRIST.

Kendall's Spavin Cure.

Chilesburgh, Ky., Feb. 20th, 1879.

B. J. Kendall & Co.—Gents: I have tried your Spavin Cure on a chronic case of bone spavin, which has been treated by two of the best doctors in the land. The case was fired twice, and I can safely say that Kendall's Spavin Cure did more good than anything which I ever tried. I believe it to be a good remedy for a great many difficulties. Ring-bone and bone spavins; I am sure will cure if taken in time. It is also good for soratches, grease heel, etc.

Yours respectfully,

T. B. MUIR.

PROMINENT PHYSICIAN.

Washingtonville, Ohio, June 17th, 1880.

Br. J. Kendall & Co.—Gents: Reading your advertisement in Turi, Field and Farm, of Kendall's Spavin Cure, and having a valuable and specify lorse which had been lame from spavin for eighteen montrs, I sent to you for a bottle by express, which in six weeks removed all lamenther horse, and both horses are to-day as sound on the removed and the sent of the complete of

Kelley's Island, Eric County, Ohio, }
March 28th 1888.
Dr. J. B. Kendall & Co., Gents:—I have used your "Kendall's Spavin Cure" on a bone spavin and am pleased to report that it has taken the enlargement completely off. It took only one bottle to perform the cure. I am confident f properly used it will do ali you claim for it.
Yours truly, C. M. LINCOLN.

STATEMENT MADE UN DER OATH.

To Whom It May Concern:—In the year 1875 1 treated with 'Kendall's Spavin Cure.' a bone spavin of several months' growth, nearly half as large as a hen's erg, and completely stopped the immeness and removed the enlargement. I have worked the horse ever since very hard, and he never has been very large, nor could I ever see any difference in the size of the hock joints since I treated him with Kendall's Spavin cure.

R. A. GAINES.

Enosburgh Falls, Vt., Feb. 23th, 1879.

Sworn and subscribed to before me this 25th day of Feb., A. D. 1879.

JOHN G. JENNE,

Jastice of Peace.

ead Proof of Wonderful Cures!

Fremont, Ohio, Jan. 15th, 1881.

Dr. B. J. Kendall & Co., Gents:—I think it my duty to render you my thanks for benefits and profits which I have derived from your invaluable and far famed Spavin Cure. My coursin and I had a valuable stallion, worth \$4,000, which had a very bad spavin and was pronounaed by four eminent yeterinary surgeons beyond any cure, and that the horse was done for ever. As a last resort I advised my cursin to try a bottle of Kendli's Spavin Cure. It had a magical effect, the third bottle cured it, and the horse is as well as ever. Dr Diek, of Edinburgh, the eminent veterinary surgeon was an uscle of mine, and I take great interesr in assisting his profession.

Yours truly,

Yours truly, JAMES A. WILSON, Civil Engineer.

Kendall's Spavin Cure.

Rendall's Spavin Cure.

Republican City, Neb., March 31st, 1880.

B. J. Kendall & Co.—Gents: I tried your Kendall's Spavin Cure and it had the desired effect. It cured the spavin, which other treatments had failed to do. I did not use quite one bottle of your liniment. After the spavin was removed I drove the horse and his maic over 500 miles, from Linn county, Iowa, to Harlin county, Nebraska, with a lead of about 2,000 pounds, and made the trip in four weeks. Please send me your Treatise on the Horse, price 25 cents.

Respectfully yours,

JAMES YELLENIC.

FROM A PROMINENT PHYSICIAN.

KENDAL'S SPAVIN CURE.

ON HUMAN FLESH it has been ascertained by repeated trials to be the very best liniment ever used for any deep seated pain of long standing, or of short duration. Also for Corns, Bunions, Frost-bites, or any bruise, cut or lameness. Some are afraid to use it on human flesh simply because it is a horse medicine, but you should remember that what is good for Beast is good for Man, and we know from experience that "KENDALL'S SPAVIN CURE" can be used on a child I year old with perfect safety. Its effects are wonderful on human flesh, and it does not blister or make a sore. Try it and be convinced.

WHAT IS GOOD FOR BEAST IS GOOD FOR MAN.

Read of its effects on Human Flesh

Patten's Mills, Washington Co., N. Y., }

B. J. Kendall, M. D.—Dear Sir: The particular case on which I used your, "Kendall's Spavin Cure," was a malignant ankle sprain of sixteen months standing, I had tried many things, but in vain. Your 'Kendall's Spavin Cure' put the foot to the ground again, and, for the first time since hurt, in a natural position. For a family liniment it excells anything we ever used.

Yours truly,

REV. M. P. BELL.

Pastor M. E. Church, Patten's Mills, N. Y.

Bakersfield, Vt., Dec. 23, 1879.

B. J. Kendall & Co.—Geuts: I wish to add my testimony in favor of your invaluable liniment, "Kendall's Spavin Cure." In the spring of 1872 I slipped on the ice and sprained my right limb at the knee joint. I was very lame, and at times suffered the most excruciating pain. I wore a bandage on it for over a year, and tried most everything in my reach, but could finel nothing-that would give me perpanent relief. When I overworked, it would pain me very much. In April, 1878, I began to think I should be a cripple for life, but having some of "Kendall's Spavin Cure" thought I would try it. I used one-third of a bottle and experienced relief at once. The pain left me and has not troubled me since. I feel very grateful to you, and would recommend "Kendall's Spavin Cure" to all who suffer with sprains or rheumatism.

Yourstruly, MR5. J. BOUTELL.

KENDALL'S SPAVIN CURE.

Rendall's Spavin Cure is sure in its effects, mild in its action as it does not blister, yet it is penetrating and powerful to reach any deepessated pain, or to remove any bony growth or any other enlargement if used for served days, such as spaxins, splints, carbs, callous, sprains, swellings, any lameness and all enlargements of the joints or limbs, or rheum time in man, and for any purpose for which a limitent is used for man or beast. It is now known to be the best intiment for man ever used, acting mild and yet certain in its effects. It is used full strength with perfect safety at all seasons of the vear.

seeing mind sately extended the control of the cont

SOLD BY ALL DRUGGISTS.

A Family of Monkeys.

Hindoos do not hurry themselves in anything they do, but the monkeys have lots of time to spare and plenty of patience, and in the end, after the crow has stolen a little, and the dog had its morsel, and the children are all satisfied, the poor fragments of the meal are thrown out on the ground for the blunder-logue, the monkey people; and it is soon discussed—the mother feeding the baby before she eats herself. When every house thus, in turn, has been visited, and no chance of further "outdoor relief" remains, the monkeys go off to the well. The women are all here again, drawing the water for the day, and the monkeys sit and wait, the old ones in front sententious and seriold ones in front, sententious and serious, and the youngsters rolling about in the dust belind them, till at last some girls see the creatures waiting, and, "in the name of rain," spill a loth full of water in a hollow of the ground, and the monkeys come round it in a circle and stoop down and drink, with their tails all curled up over their backs like notes of interrogation. There is no contention or jostling. A forward child gets a box over the ear, perhaps, but each one, as it has satisfied its thirst, steps quietly out of the circle and wipes its mouth. The day thus fairly com-menced, they go off to see what luck may bring them. The grainkeeper's shop tempts them to loiter, but the ex-perience of previous attempts makes perience of previous attempts makes theft hopeless; for the baunya, with all his years, is very nimble on his legs and an astonishing good shot with a pipkin. So the monkeys make their salaams to him and pass on to the fields. If the corn is ripe they can soon eat enough for the day; but if not, they go wander-ing about nighting up more all berg an ing about picking up morsels, here an insect and there a berry, until the sun gets too hot, and then they creep up into the dark shade of the mango and snooze through the afternoon. In the evening they are back in the village again to share its comforts and entertainments. They assist at the convoca-tion of the elders and the romps of the tion of the elders and the romps of the children, looking on when the faquir comes up to collect his little dues of salt, corn and oil, and from him in their turn exacting a pious tell. They listen gravely to the village musician until they get sleepy, and then one by one they clamber up into the peepul. And the men sitting round the fire with their pipes can see, if they look up, the whole colony of the blunder logue asleep in rows in the tree above them.

Behind the Times.

A gentleman was driving about Lancaster, Pa., the other day, with a friend from Altoona, showing him the places of interest, and, among others, pointed out Wheatland, saying it was the home of James Buchanan. "Who's James Buchanan?" queried the Altoona gentleman. Shocked beyond measure at the question, the other replied: "Why, is it possible you never heard that he was, at one time president of the United States?" "Oh, yes; I had forgotten," responded the gentleman from the mountain district, "what's he doing

There was once a gentleman who became known to a limited fame because, after living in Boston for eight years and occupying an office within five minutes' walk of Faneuil hall during most of that period, he pleaded ignorance when a stranger asked him where the immortal edifice was, and confessed

that he had never seen it. Hand in hand with him down the flowery paths of local tradition should go the well-to-do citizen of the American Athens who recently looked upon the picture of Warren in the Old South church, now on exhibition at the Mechanics' fair, and asked a by-stander what it represented. "That is Warren addressing the people of Boston from the pulpit of the Old South church during the British occupation." "Oh, is it?" replied the well-to-do citizen, evidently somewhat puzzled; "happened some time ago, hey?"

lowing a ten-dollar gold piece. Here's your savings bank, young gentlemen.

New Cooking Utensil.

The ordinary range and cook-stove in which the fire box is placed at the side of the oven, or in which the proceeds of combustion pass over the top, have the disadvantage of an irregularly heated oven. The sides and top are hotter than the bottom and ends or other side, and as a result the bread or other food is improperly cooked—perhaps burned at the top and badly done at the bottom. To correct this defect in ovens a simple appliance has been devised for causing the air in the oven to circulate, and thus carry the heat obtained by radia-tion to all parts of the oven. A sheet of metal, bent into the form of the top and one side of the oven, is supported on wire standards and placed in the oven. In the narrow space between the sheet metal and the hot side and top of the oven the air is heated more than the main body of the oven, and by expansion it rises and moves over the top of the oven toward the cooler walls. The arrangement, simple as it is, appears to be founded on a good idea, and is re-ported to work well in practice. The apparatus examined was portable, and is designed to be put in the even by the cook whenever an even heat is needed.

Mary Callahan, a Texas widow, owns 50,000 sheep, and the male members of the community are to a man willing to be "Mary's little lamb." Bright's Disease.

The rapid increase of late of this formidable and generally fatal disease of midable and generally latal disease of the kidneys, and the frequent record of death from it, makes a probable cure of it a matter of great interest to those afflicted with it. Doctors, after applications of medical skill and effort for such patients, give them up to die. A remarkable case of this kind, of a gentleman in a prominent position has come all colors of Diamoud Dyes, aim directions. man in a prominent position, has come to the knowledge of the writer from the lips of the patient, which I am induced to give to the public through your widely-circulated newspaper, together with the formula for its cure as successfully

used by him.

L. P. Farmer, Esq., General Passenger Agent of the Pennsylvania R. R., became severely afflicted with Bright's Disease, so much so that his doctors in Philadelphia and New York gave him up as incurable. He then went, as he thought to die, to his old home in Conrecommended as a cure. All else having failed to do him any good, he resolved to try it. He did so, adhering to Indulgent pa solved to try it. He did so, adhering to its requirements rigidly, and was restored to health again solely by it. He is now New England agent of the Pennsylvania R. R., at Boston, restored to perfect health again, a fine specimen of perfect health again, a fine specimen of manly vigor, brought about by this system of cure, as follows:

Specific for heart disease, dropsy, dyspepsia, diabetes, all troubles of the kidneys, and chronic diarrhœa.

1 Tablespoon of Skim Milk every hour 1st day.

Commencing the 8th day to break one-half slice of bread in the milk (but no crust of the bread) three times a day. 9 Tablespoons of Skim Milk every hour?th day.
10 " 10th " 10th "
11 " " 11th "
12 " " 12th "
13 " " 13th "
14 " " 14th "

On and after the 16th day take 15 ta-blespoons Skim Milk every hour, daily, except one hour before your usual hour for dinner, and one hour after dinner. For dinner, take as much rare beef as you feel like, with a slice of bread (no crust), and a half-cup of coffee (sugar or milk).

For breakfast and supper, break one slice of bread (no crust) in the milk.

The bread should be 48 hours old, never less than 24.

If the milk sours on the stomach, put in it a tablespoonful of lime-water to a pint of milk.

If you should become costive, eat a fig or two at and after use of beef and

The first three or four days it will require a severe mental effort to "eat or drink nothing but milk," but after the first five days you will become accustomed to the system, and not feel that strong desire for table food.

It is strongly recommended to all af-flicted with this fatal disease to give the above remedy a strict and vigorous trial, which will probably restore to health again many who now think themselves incurable.—F., in Portland

A Basis for Breakfast.

Lamb chops are excellent cooked in this way: Put them in a frying pan, with a very little water, so little that it will boil away by the time the meat is tender; then put in lumps of butter with the meat and let it brown slowly; there will be a brown, crisp surface, with a fine flavor. Serve for breakfast with potatoes cooked thus: Choose small ones and let them boil until they are tender; drain off the water and pour over them, while still in the kettle, at least one teacupful of cream; mash them smooth in this.—N. Y. Evening

The Painter and the Beauty.

An eminent French painter was recently commissioned to paint the portrait of a lady who was once a famous beauty, but who is now nearly 50 years old and devoid of her charms. She wanted it exhibited in this year's Salon, and inseed over it notifies and fussed over it until the artist was nearly worn out with trouble. Then at last when it was finished she would not have it, saying that it was in no sense a likeness of her and could not be recognized as the same and could not be recognized nized as such. The artist consented to lose the expected payment and re-tain the picture in his studio as unsold. But there was blood in his eyes, and he vowed a big vow to avenge the insult to his pride and the injury to his purse. So it came to pass that a few days before the private exhibition at the Salon word was conveyed to the capricious lady that perhaps it would be well for her to visit his studio, as there was a picture there that would interest her. She went, was admitted, and was shown the rejected canvas. There she still stood upon it, life-like and life-sized. But the artist had thinned her hair to semi-boldness and in one of her heat. baldness, and in one of her hands she held two long tresses of false hair. Up-on the table at her side, which he had changed into a toilet table, were ranged a number of bottles, labeled respectively with the words: "Milk of Lilies," "Beauty Water," "Elixir against Wrinkles," "Golden-hair Dye." The lady cried out that such treatment was infamous. "You have really no complaint, madam," said the artist. "You have already declared that the picture is in no sense a portrait of yourself. I accept your opinion, and, as I cannot afford to lose so much hard work, I have treated it as a fantaise piece, and as such I shall introduce it to the public. I mean to call it 'The Coquet of Fifty changed into a toilet table, were ranged mean to call it 'The Coquet of Fifty.
Years.'" "What!" exclaimed she.
"You mean to exhibit it?" "Without doubt." But the next moment saw her doubt." But the next moment saw her on her knees, check-book in hand, begging him to sell her the picture at a far higher price than was originally stipulated. Satisfied, he relented, accepted the payment, and obliterated the latterial ful accessories; and she took the picture home and a good lesson with it.

How he Named the Baby.

In the city of Portland, Me., one of the leading auction and commission houses employs a porter who rejoices in the name of Tim. Tim had been noticed for some time to be rather indifferent to his duties; and on being questioned as to the occasion of his negligence, re-

"To tell the truth, sir, I've had a little boy born to me; and I want to name him after both o' yees, but I don't intirely get the since of the names."

The dilemma in which the porter was placed was apparent; and the members of the firm endeavored to devise a suitable cognomen for the kidling. Tim continued dissatisfied, however, notwithstanding the most ingenious splicings of titles. At length, one morning he was observed to be unusually active; in explanation of which phenomenon he told his employers:

"Me boy was christened last night

"But," said the senior, "you must have had a name for him." "I did, sir."

"How did you get over that difficulty you had about it; what did you call

your boy?"
With a perfect radiant confidence, Tim answered: "Edward M. Patten & Co. Ryan, sir!"

It is needless to add that the firm "came down," in behalf of their little namesake, in a style worthy of their reputation for generosity.—Boston Commercial Bulletin.

A Cincinnati society reporter has mysteriously disappeared, and foul play is suspected, although it is possible that he is hiding somewhere in the Rocky Mountains. Mountains, as he was well supplied with railroad passes. His last article was an account of the marriage of a pork-packer's daughter, in which report he used the term "swell wedding." It came out in the papers "swill wedding."-Philadelphia News.

A Strange Phenomenon.

Mackerel fishermen returning from the eastern coast describe a strange phenomenon which they do not pretend to explain. They say that beginning at a point off Monhegan, Me., and extend-ing northeast for sixty-five or seventy miles, the blue water is sharply cut by a whitish stream some thirty miles in width. The line of demarkation is perfectly distinct and extends downward like a wall as far as the eye can pene-trate. Mackerel swimming into the white water are peculiarly affected by the change, and display in their move-ments great activity and uneasiness. Capt. Stephen J. Martin, a veteran fisherman and an employe of the United States fish commission, remembers that in 1849, in the same region, the ocean presented a similar appearance, and that the phenomenon was repeated in 1851 on the southeastern part of George's

He was showing his friend, a Western merchant, around the city, and as he pointed to the Stock Exchange he proudly said: "That is our Ras-el-Tin palace, so to speak." Fifteen minutes fashionable restaurant, and the friend remarked: "This, I suppose, is your Ras-el-Hash palace?" The future remarks concerned something plain.

The Early Icelander.

Iceland was settled by the well-to-do Northern warriors who came from the land of song and legend. The Norse settler was a solitary man, or at least he lived in his lonely homestead with no society but that of his household and dedendents. He had time to meditate on the deads of the national horses and on the deeds of the national heroes and of his own ancestors—time to turn some of his intense energy into the form of poems and histories, and to repeat them to others, who learned them by heart from his lips. His son, very likely, went from his lips. His son, very likely, went to Norway; half a warrior, half a poet, he lived a while in the King's Court, had his strong imagination yet further excited by change and wanderings, and returned to Iceland—which then, as now, had for her sons an irresistable attention with the sons and the strong and traction—able to tell a better story and chant a better poem than before. And so the light was kindled, and spread from homestead to homestead, and a class of men rose up, the poets or skalds, who could repeat the signs, word for word, for hours together." Nor had these poetic warriors to draw solely on their reminiscences, or on the old Scandinavian sources for inspiration. On the contrary, as we have said, the most spirited of the sages, which have been immortalized by the intensity of their dramatic realism, were the reproduction of personal experiences or the events of family history. The acts of the drama, with their bloody scenes, might have passed within arrow flight of the author's window; while the flames from the farm he had once rebuilt had thrown their ruddy glare on the water of his own fjord. There was little difficulty in reviving the impressions which left their indelible mark on the memory. And we may remember that the warlike Icelardia extract the state of the control of th landic settler had a double character. At home he was a peaceful cattle owner and cultivator of the soil, fairly observant of the national laws, and a kindly neighbor, except under provocation. Abroad he was one of those remorseless rea-rovers who were bracketed with famines and fire in the litanies of the suffering coast-Christians. Professional robber as he was, many, a wild deed might haunt him in the seclusion of his family circle and the gloom of the north-ern winter. He was still probably half a heathen at heart, though he had been held over the baptismal font, and vowed devotion to the White Christ.—Blackwood's Magazine.

Expensive Saratoga.

A Louisville Courier-Journal man writes: I asked a rich friend to tell me writes: I asked a rich friend to tell me how much it cost him and his party of three for a day's board at Saratoga. "Well," said he, "you see that these three rooms are called a cottage. In New York, when there is a building where different families occurs the rooms. where different families occupy the rooms opposite to you and above you, it is called a tenement house; at Saratoga it is the swell thing, and is dignified by the name of cottage. We are on what is called in other places the ground floor and the windows in the two bedrooms each open on a court only: you see that the furniture is nothing remarkable, the rooms not large; and yet, as you can read on the notice tacked on each door, The price of this cottage is \$20 a day, and \$2.50 a day extra for each person in the cottage, That is \$27 for three of us. We have a private table set in our parlor; that is \$9 a day extra, and the board for servant man, horses and carriage brings the expense to \$80 a day. I pay \$60 a week for the board of my horses, and that is the price I pay in New York, \$30 for each horse." The rich man did not appreciate my surprise and it was not Vanderbilt I was interrogating. His expenses I expect are five times as much as those of my friend. Mr. Vanderbilt stated to a gentleman that his income each month amounted to \$1,200,000, or \$43,500 a day. Thus it will be seen that he can pay his bills and have a small margin left over.

The Export Trade of Germany.

The figures of the German export trade for the first half of the present year indicate an unlooked for and promising condition of many industries. From a condensation of the returns that was made recently in England the following facts are learned, including the comparison that is made with the returns for the corresponding period in 1881: Of cotton yarns the export was 5,759 tons, an increase of 598 tons, or 10½ per cent; of cotton cloth goods, 12,281 tons, an increase of 876 tons, or 7½ per cent; of linen goods, 1,849 tons, an increase of 1½ per cent; of silk goods, an increase of 437 tons, or 22 per cent; of woolen yarn, an increase of 506 tons, or 28 per cent; of woolen cloth goods, 550 tons, or nearly 6 per cent; iron and steel manufacturers, an increase of 4,845 tons, or facts are learned, including the comfacturers, an increase of 4,845 tons, or 7 per cent; machinery and implements, 7 per cent; machinery and implements, 14,481 tons, or 46 per cent; copper goods, 788 tons, or 15 per cent; chemicals, 18,350 tons, or 16½ per cent; leather goods, 889 tons, or 16 per cent; beer, 5,763 tons, or 10 per cent. Only in plain iron and steel, in which the falling off is less than 4 per cent, and 4½ per cent in sugar, are decreases apparent in prominent articles of apparent in prominent articles of export.

"Having a little fun with the old man" will cease to be a common festivity when the country as a whole adopts the policy of an Alabama court that sentenced a youthful darkey parricide to fifty years at hard labor in the penitentiary.

They do say that the first question asked by a deacon visiting Egypt was: "Now what were the real facts of the Potiphar scandal?"

Ayer's Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

It is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The Vigor cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair

The Vigor is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.
