BEGIN FINAL PAYMENTS ON

1934 CORN-HOG CONTRACTS

Disbursement of the third and fi

who participated in the 1934 produc-

tion adjustment program. A total of

\$905,810.22 was distributed in this

first block of checks sent out. The

balance of the final payment of approximately 80 million dollars repre-

senting the last two-fifhts of the total

nog adjustment payment, will be dis-

tributed as rapidly as possible.

More than 750,000 farmers have ap-

olied for 1935 corn-hog contracts, the

Agricultural Adjustment Adminis-

tration announced. Iowa is leading in

the sign-up campaign with approxi-

mately 127,500 applicants. Illinois is

next with 80,000, and Missouri and

Nebraska follow, each reporting about

75,000 signers. Indiana, Minnesota

and Kansas report nearly 55,000

each; South Dakota, approximately 42,000; Texas and Oklahoma, about

32,000 each; Kentucky, 22,500 and Tennessee, 15,000. Texas is the first

state to report a sign-up equal to the

total number of contracts signed in 1934. Of the score of states reporting,

Nebraska is leading in the total num-

ber of new signers. Nearly 7,000 of

the applicants in that state did not take part in the 1934 corn-hog pro-

gram. Missouri, Oklahoma and Texas

each report 3,000 new signers; Illi-

nois, about 2,500; Kentucky, 2,000 and Indiana and Tennessee, 1,500 each.

Too much cannot be said for the splendid cooperation of the KERC officials and the state superintendent of public instruction, W. T. Markham. John Stutz is the executive head of

the KERC. Under him are such leaders as Mr. Marvin, Jay Besore, Hans Hoiberg and others.

After the completion of the Institute work, the various student-teachers will return to their Locals or communities to take up the work of conducting night classes in scdool houses and other community meeting places. The work they are taking in the Institute is builded around the Farmers Union program; and the work they will do when they return to their Locals for the night meetings from three to four each week-will also be builded around the Farmers

Union program. President Cal Ward of the Kansas Farmers Union, and the state secretary, Floyd Lynn, both were in Topeka and addressed the preliminary meetings, for the Farmers Union. W T. Markham, state superintendent of nal installment of benefit payments schools, also addressed the group due under the 1934 corn-hog con-Saturday, welcoming them into the tracts began last week with the diswork, charging them with their res- tribution of 11,957 checks to farmers ponsibility, and wishing them Godspeed. Hans Hoisberg in charge of the actual educational work, acted as chairman of the meeting. Jay Besore, supervisor of emergency education for the KERC, was one of the speakers. He explained the mechanics of the setup and the course of instruction. It has been largely through Mr. Besore's tireless efforts that the Institute was ready to function at the

time it was scheduled to begin. In addition to the Farmers Union people—mostly young folks—in the Institute, a few are attending epresenting labor organizations and ...ter-

An attempt will be made to list the names and addresses of all the students in an early issue of this paper. Ward Reports on Institute

President Ward, who has been in Manhattan since Monday morning to assist with the Institute, has writen a report of his impressions gained af-ter the first day of actual class work. This report is especially interesting, and is published here: This is Monday, March 25, and I am

in Manhattan at the opening of the training school for our teachers. We have here at Manhattan for the first week of the school, some seven-

ty-five men and women ranging in age from eighteen to sixty years. I would judge that ninety-five per cent of these folks either belong to the chicken declares D. C. Warren, Kan-Farmers Union or are from Farmers sas State College poultryman. Except nion families.

When these people go back into the turken in no wise differs from Union families.

their home communities some two-hundred or two hundred twenty-five vertised as a cross between the chickmeetings will be held each week. This fact alone will mean a lot to the Farmers Union of Kansas and to farmers

Following Mr. Green will be a talk by H. R. Tolley, chief of the planning division of the Agricultural Adjustment Administration, Washington, D. C., on the future program of the AAA.

Final adjournment will be at I have spent most of my time the out parts, and bowl too low in frame. o'clock, noon.

AUDITING ASSOCIATION MOVES TO NEW ROOMS

The Farmers Union Auliting Association has moved from the second to the third floor of the Farmers Union Insurance Company's Building in Salina, now occupying room 303. The new offices of the Auditing Association are immediately above the space formerly occupied by them on the econd floor.

TRYING TO STOP
TERRIBLE DRIFT
OF KANSAS SOIL

Governor Landon in Washington Get-ting Results for Federal Aid in Soil Erosion Prevention Project to Use in Kansas

APPROPRIATE \$250,000

Spurred to desperation by the heavy loss of top soil by blowing, in Kansas, Governor Alf Landon recently went to Washington to seek fedperiences in cooperative effort to develop a better understanding and closer cooperation among Kansas cooperators," is scheduled to be held April 18 and 19, 1935, at the Kansas State College in Manhattan.

Landon suggested that the most ef- paper. fective plan would be to have the erosion plan financed and executed under direction of a single agency, and suggested that the work be done by labor already empoyed under FERA allocations. Colonel Lawrence Westbrook, deputy relief administrator said whether the FERA is able to bear the entire cost of the emergency program depends on the acof estimates of the amount needed. The estimates were prepared by John Stutz, Kansas relief ad-

The actual plan for stopping the drifting of the soil would call for the use of a fleet of tractors to list strips of land. The work would be done first in the most affected regions, going later to parts not in

such immediate danger. Congress is taking up legislation providing for such work as a permanent program to be used whenever necessary, rather than as an emer-

zency program. tractors would come from an emer- not bring it out for a vote within 30 gency relief appropriation of \$250,000 days after having the bill referred already recommended to Administra- to it.

123 CONGRESSMEN SIGNED PETITION MIDDLE OF MARCH

With One Exception, All Kansas Congressmen Listed as Having Signed Petition to Bring Frazier-Lemke Bill out of Committee

218 ARE REQUIRED

Congressman Hope of Seventh, Only One Not Listed, Signed Last Year, and Pretty Sure to Sign again This Year

On March 15 this year, 123 Congressmen had signed the petition to bring the Frazier-Lemke farm refinthe recent unparelled dust storms in ancing bill out of committee for a vote, according to information published in the National Union Farmeral aid in putting into effect a er of that date. Kansas, at that time, according to a National paper, was epresented by six names on the petiion. Whether or not the seventh member of the Kansas delegation has signed by this time will be learned shortly, and will be published in this

The following Kansans are credited with having signed the petition: W. P. Lambertson, U. S. Guyer, E. W. Patterson, Randolph Carpenter, J. M. Houston and Frank Carlson. This would look as though Kansas' new Congressman—Frank Carlson of the Sixth, Jack Houston of the Fifth, and E. W. Patterson of the Third—in Kansas. are getting started on the right track.

The only Kansas Congressman not listed by the National Union Farmer as having signed is Clifford Hope of the Seventh. However, Mr. Hope is known to have said that he intends to sign the petition, and perhaps has done so by this time. He signed the ed by Congressman Houston.

Under the gag rule adopted by until his dues are paid.

ently raised to 218.

MANY WAYS PROVIDED BY NHA FOR FARMERS TO MODERNIZE

People who live on the farm or in ural communities, have a remarkable opportunity to better their condition and a great many of them have already taken advantage of the pro-visions of the National Housing Act. One may obtain credit up to \$2,-000. The terms are easy. The money is to be used for necessary or desirable improvements. There are unlimited possibilities.

A new fence may be required. The barn may be remodeled and concrete flooring put in. Or a barn may be constructed. Wells and ponds could be financed. The house may be refinished and made more comfortable. A new heating plant, which will make the old place cozy, might be installed. The front porch may be glassed in and made into a sun parlor. The attic may be made into an attractive bedroom. Almost anything and everything which is classed as "built in" or permanent fixtures may be obtained through the Modernization Credit

Plan of the Federal Housing Administration. The old house may be painted and new windows put in. The roofing may be fixed or completely replaced. A new chicken house or silo may

erected. There is hardly any improvemen which cannot be arranged for. All the farmer has to do is to consult his nearest banker. The great bulk of the banks and loan associations are cooperating and are anxious to help .-Federal Housing Clip Sheet.

CORN REACHES ITS HIGH

The corn market seems to have made its high, thinks Vance M. Rucker, Extension Marketing Specialist, Kansas State College. Those who have not moved the corn they have to sell should do so within the next two or three weeks, says Rucker, who alds that persons who plan to feed later need to be in no hurry to buy corn. Corn has sold lately at 10 cents below the February peak price. The decided lack of consumer demand, importations of corn and other feed grains, and the weakness in the wheat market are the factors influential in forcing prices down. No im-

man, Alex Stremel, T. E. Tull, Archie Fred Orr, Dick Parsons, A. A. Ree-side, John Roe, Henry Segebartt, John Sneed, H. R. Staley, Winfred Show-John C. Orr, Cor. Secy.

BIG RELIEF BILL PASSED IN SENATE WITH ALTERATIONS

COOPERATION

Sent Back to House and Then to Joint Conference, Where Thomas Silver Inflation Provision Likely Will Be Lost

NEARLY 5 BILLION

The much debated \$4,880,000,000 work-relief bill finally passed the Sneate last Saturday, March 23. It had many modifications and alterations from its original form, and on of the principal changes was the addition of a modern silver inflation plan, tacked on by Senator Thomas of Oklahoma, providing for a currency expansion of 375 million dollars hrough the issuance of silver certi

ficates. The bill as amended and passed was sent to a joint House-Senate conference after it had been sent back to the House. The indications are that the inflation plan, along with most of the other changes made by the Sen-ate, will be rejected in conference.

The terraced land lost only 2.2 tons an acre each

HOUSE PASSES PATMAN BONUS BILL 318-90

Congressman Lemke Discusses Patman Bill and Vinson Bill and Says Big Bankers Attempted to Steal the Show, but Failed

CONFIDENT OF SENATE

Bankers Can't Fool Us any Longer on Inflation; All They Want is More Bonds, More Coupons, More Tax Exemption, Says Lemke

In his periodical letter, which Con-ressman Wm. Lemke of North Dakota calls "Doings of Congress," the subject of the Patman "Bonus Bill" is descussed. Payment of the adjusted service certificates under the plan of the Patman Bill is one of the objec-tives of the National Faymers Union as well as of the Kansas Farmers Union. The lower house of Congress, in passing this bill by the one-sided vote of 318 to 90 last week, shows encouraging signs of swinging into line on Farmers Union legislation. The discussion of this vote and this bill by Congressman Lemke, the author of the Frazier-Lemke refinancing bill, will be of great interest to the readers of this paper. It follows:

Bonus Bill Passed After a close and determined fight the lower House of Congress passed the Patman oill, to pay the veterans in cash, not by issuing tax-exempt, in-terest-bearing bonds, for the coupon clippers and international bankers, who were responsible for our entry into the warl, but by issuing treasury notes. I believe this is the fifth time that the lower House of Congress passed the Patman bill; twice they the people of this nation, want this

obligation paid now. This time, the fight was between the Patman bill and the Vinson bill. The majority of representatives in

the people from soldiers' compensation. They insisted upon another two tear over a period of years. Handlers the same racketeers who bet fifteen were giving their lives, their limbs and their health in the blood and mud-filled trenches on foreign battlefields, wrapped the flag of glory around them, and grabbed everything in sight, even attempting to monopolize the patriotism that is common to us all. They were the ones who shout-

> 'Come.' The final vote was 318 to 90 in favor of the Patman bill. This bill will now the Senate will pass it. I say this for the reason that the majority of the the treatment we have given our veterans during the war, and since, has been a national disgrace.

These bankers can no longer fool Congress with their shout of inflation. We are getting on to their game. We are beginning to realize that all that these bankers want is more bonds, more coupons to clip, and more tax exemptions. Congress is beginning to realize that it owes an obligation to the veterans, that it can never repay them in cash, but that it can at least show its appreciation by cent as much soil as unterraced land in the longest erosion test recorded. paid long ago.

Live-stock raisers must use every possible means to save grain to carry their operations along until another crop is produced. Grain is required to fatten hogs. But pigs will grow on good pasture and a limited amount of grain and they will require less tank-

Seeds and Feed Available

(By Congressman William Lemke)
After considerable delay, the \$60,000,000 appropriation for feed and
funds will be available in a week seed finally passed both houses of or ten days to the farmers.

Congress, and was approved by the President on March 21st. The delay that the farmers cooperate in every n the passage of this appropriation way popssible. I understand there is was due to the playing of politics with a seed committee in practically every the misery of the people in the county in the drouth-stricken area, drouth-stricken areas. An attempt was and the farmers should at once make made to whip the Senate into line, their needs known, and as soon as to pass the \$4,800,000,000 public the applications are printed and availworks bill without amendment. What the merits or demerits of that controversy may be, I feel that the American people should feel grateful that the Senate still functions actively may be according to the seed for early seeding. There never was a time and its existence to farmers alone. life, are envious of our business. They can talk over the affairs that These cooperative and mutual comare common to them without inter- panies, owned and operated by farmference from outside interests.

But one of the best things about the Farmers Union for one common meeting together with our neighbors purpose, are saving the farmers of is the knowledge of the fact that we this state and nation millions of dolare contributing to the upbuilding of lars which otherwise would go to a great, militant, class-conscious or- those who feel they should do all

like to hold us to the hard work and life are also in need. risks of producing, producing, producing. Not only that, these cooperatives are making it impossible for the gamblers and speculators in farm products to pyramid their profits as they did in the good old days of rugged individualism.

Yes; these enemies of the Farmers Union would give millions if by so doing they could eliminate the Farmers Union program of cooperaive marketing and purchasing. In fact, they are spending plenty of money in this very effort; however, they do not expect, now, to be able to do more than cripple the cooperative program. They would give millions if by so doing they could preknow that if they could do this Plight of affairs. they could and would destroy the Farmers Union. They know that the Farmers Union Local is the backbone of the cooperative movement.

Back to the Local

This brings us back to the little where farmers and their families meet to discuss their own class welfare. It brings us to this question: Do farmers realize, as much as do their enemies, what membership in the Farmers Union means to them?

The answer seems to be that they do not. If they did, no force could keep them from meeting regularly. If they did, the school houses would be crowded at least once a week, inregular intervals.

Farmers, as one of your own class, let us appeal to you to join your your neighbors and start one. Your lips of the President. state organization will help you all it can. If you were once a member and have now dropped out, pay your dues and help in this class organization's fight for your rights. Help build up the militant class organization which has a program meant for the advancement of cooperative marketing and purchasing. Remember, that every farmer who neglects or fails contributing just that much to the in debt to the non-producers.

We are building up a defense against Educate Young Folks the onslaughts and attacks by our Let us get our young folks interested. Let us give them the right information so they will not be fooled by the ridicule and the false statements which our enemies are forever putting out. Let us educate them into the Farmers Union, so they will not have to be coaxed into it in later Our common enemies know that with every school house meeting, the

At any rate, we still have animal that don't eat 'em—cows. horses, hogs, chickens, sheep and our problems and nothing will protect the farmers and agriculture horses, hogs, chickens, goats.

Now I wonder what more than organization.

The Farmers Union stands always in a militant position to protect the ment. So far there has been nothing

The Cloak Room

W. P. Lambertson March 23, '35

Last Thursday was the third time in a year that Kansas dirt has blown to Washington; one day last May and

once this February, were the other two. All true Kansans here regret deeply not only the temporary discomfort and the loss of the wheat in the west half, but the permanent exit of the rich, top dressing.

The shelterbelt idea, to my mind, is the most striking example of the wicked waste of public funds. I would prefer to see men paid to carry stones back and forth across the road, for then there would be no stubs left as ghastly reminders of governmental follies, which tends to discredit public service.

The plan of payment, rather than who was supporting it, determined the choice of a bonus bill in the House. It was a victory for those who believe that there should be no more issuance by the government of tax-exempt, interest-bearing bonds. pity of it is that many of our own to say the least, recovery has not class fall for this ridicule. They see yet reached us.

Neighborhoud Notes

LETTER FROM ANTON PETERSON

Greenleaf, Kans., 3-24-35 Mr. Floyd H. Lynn,

Last Thursday night the Dane Local Booster Club went down six miles south to the Pleasant Ridge Local to help Mike Burk put on a little pep meeting. The house wasn't crowded, but we had four generations represented. Anyhow, they are going to

to sit in on the Agricultural Congress in Salina, March 5 and 6. On the 12th we had the Midwest Wool Growers here. O, yes; I almost forgot, on the 14th I met you at Washington making arrangements for the Junior pro-

Mr. Cowden did not have the crowd we would have liked to see. It was a bad stormy day, and then it was Saturday. But we had five counties represented, and I am sure that while we were disappointed with the turnout, Brother Cowden sowed the seed of cooperation that will surely bear fruit. And so did the men at the wool growers' meeting, which was made up principally of sheep raisers, with a lamb dinner at noon, which we all enjoyed.

Now, just a little side issue. We have in Kansas the best Governor in the United States, but when he, or any one else, goes off to Washington. D. C., or any place else, to stop wind erosion, then it's too bad. In the first place, it's about six weeks too late Besides that, if a farmer don't care Several inflationary measures have or know enough about what to do been introduced in the Congress, but without oustide help, there isn't much have known for a long time, that there is lots of land that should never have been broken up. But it wasn't all broken up by honest-to-goodness farmers. Such people as Marion Talley, Doc Brinkley, exigovernor Allen, and Bird Land Corporation, and such, go lions of dollars for recovery, espec- out for the mere fun of it, break up everything, tear down all wind breaks. What else can you expect?

I farmed for forty years, and never Many of the conservatives of both lost any soil by erosion. Now what's political parties declare that we the remedy? Winter plowing or listit—and its been nice all winter.

A few years ago we heard lots about the Russian Thistle-then we found when preparely put up, they

people want the government to do for hem. This depression won't end until the people quit bleeding the governcellation.

I am enclosing a clipping on money. I hope we don't have that. (The lipping refers to Germany in 1923,

says the German inflation was practically a cancellation of all indebted-This is already too long, so I must quit. Our next Booster meeting will be over east of Hanover, April 2.

Everybody come. Yours for cooperation,

CULVER LOCAL MET The Culver Local No. 2170 of the Farmers Union in Ottawa county met at the Crown Point school house Tuesday evening March 19. About 80 were in attendance.

After the usual business meeting the State Secretary, Mr. Floyd Lynn gave an interesting address on conlitions of interest to the farmers generally. A fine literary program consisting of vocal and violin solos, duets, readings, etc., was rendered after which an oyster supper was served and a general good social evening enjoyed. The next meeting will be April 16th. Visitors interested in the Farmers Union are always welcome. Mr. and Mrs. Myers and Mr. Ira Sewell from Minneapolis were guests.
Mrs. I. W. McCall, Reporter.

FRANKLIN COUNTY MEETING

The Franklin County Farmers Unon met with the Rock Creek Local at the Mud Creek Valley View club house on Tuesday evening, March 19. The meeting was called to order by the president, A. R. Carpenter, and a hort business session was held.

A committee of three was appoint ed to work out a plan for the educational school as soon as our teacher gets home from school at Topeka The committee appointed were Mr. Elson Thayer, Mrs. L. Morgan and Mr. R. E. Chambers. This committee The government established its is to meet with locals in the county

> was very much enjoyed by all pres-ent. Cal Crain's orchestra furnished music throughout the evening. Owing to mumps and measles, and other important meetings, there was not a very large number of members out; but we had a good audience of out side people. We hope they will con-tinue to come out and join with us. There were about 150 present. Refreshments of pie and coffee were served by Mrs. H. A. Kissenger, Mrs.

LIBERTY LOCAL REPORT Liberty Local 782 met in regular

session at the Liberty school ho se in Marshall Co., on Friday evening, March 15, at 8 o'clock. The meeting was called to order Bill. by president John Tommer. After roll call, the minutes of the last meeting were read and approved. The usual routine of business was conduct-

local is to work for cooperation and cooperative business; try to en-courage new members to join, and then boost for Liberty Local first, last and all the time. The following program was pre-sented by Miss Nellie Organbright.

STUDY TOPIC-1935 "Living with Power and Machines MARCH LESSON (By Elsie Olson, National Junior Leader) began.

MACHINES Now you who were once servants, have become The Master, with crackling lash and whins.

You drive mankind before you, stricken dumb,

To serve you with no answer on their lips. Your wheels and belts, your cogs and trampling feet, Your spindles and pistons have the power

To send men jobless out upon the street, Or break them in a single ruthless hour.

Which shall be the victors, steel and driving bands Or minds and sinews, nerves and blood and bone? Inanimate creation of

Or they, who God-like, walk the earth alone? The anxious question lingers in the air-

Is there an answer for it, anywhere? -Grace N. Crowell.

"In America, at any rate, it is obvious that the rise of a machine economy has altered the stage setting of every fundamental social enterprise—religion, educa-tion, literature, art, family life, agriculture, labor, business, in-dustry, finance and politics. The Machine has so thoroughly remade the milieu of the contemporary American that it is quite impossible for a man wisely and effectively to rear a family or run a government, practice a profession or preach a gospel, conceive a philisophy or conduct a business, unless he has caught something of the inner meaning of this machine economy, because for good or ill, the whole of life on this continent takes its cue from
—Glen Frank.

LIVING WITH POWER AND MACHINES

CHAPTER 1 Do You Know? That modern people are the most

chine-using society?

price is five cents, ordered from the Consumers Coop. Assn, North Kansas City, Mo. Cooperation Here and Aboard" is written by Hugh J. Hughes and is available at a cost of twenty-five cents.

"It on: but that in a machine age man's chief function was to produce goods so that human life might go twenty-five cents."

Can you build fire without matches? supply your needs? millions and lived by selling your services as a bookkeeper or clerk. Just how long could you provide for yourself if our modern life, depend- he soon learned that a pole resting ent on factory production, power transportation and a highly devel-

oped system of distribution should suddenly stop functioning? Thinking men tell us that paralysis of great cities could come from revo-lution, or an attack from bombing planes in time of war and that as few as one hundred technicians controlling the power, water, gas, trans-tation and communication facilities of a city, joined in a strike, could within a few hours reduce those de-pendent on them to a condition of desperate want. With several large cities thus under control of striking technicians, the entire life of a modern nation would be paralyzed and millions would be without food and Only farmers, who are largely self-

had ground grain for bread—the symbol of plenty — between two stones or in crude mills, and baked their own bread. Perhaps, if they were persons of wealth, this labor was done by slaves, who received some share of the bread. Today, prince or pauper, we buy our bread sliced ready for use. Wrappers declare the contents "untouched by human hands." Truly, man does not was thing new under the sun! Here is a civilization built on power and the exploitation of coal, oil, minerals, and natural resources, including the crops from the soil. Men are exploited, to be sure, but machines have largely displaced and will continue to displace the labor of muscles. Machines are owned by the powerful and rich as were the slaves of the past.

Dear Glenn: We'll try to find your twin and I'll be glad to put Rex James' name on our Cradle Roll. You must tell me how old he is. You must be a baseball "fan"—according man hands." Truly, man does not live by bread alone. Around us whirls a new and fantastic world of belts, pulleys, levers, gears, flying wheels and harnessed power. Giant machines feed, clothe and house us. The machines feed, clothe and house us. We are dependent on them for existence, and are helpless in our individ-ual ignorance without their services. written in pages of history yet unmade. Are men to exist to serve machines and machine production, or shall we build machines to serve the needs of men? "What do we have an according system for?" selse Stuart

Noboby knows just where to draw the line between tools and machines but generally we agree that the machine age came into existence when engines were invented to supply power. Before that man depended on muscles for power, his own or those of animals; and sometimes on the in a machine age must be to con-

power of wind or moving water. sume instead of to produce. War to when man harnessed the power of steam the age of tools came to an the surpluses produced by machine end and the machine age definitely Man's first and simplest tool was

the stick. His first hammer was a stone attached to a stick. The carpenter hammer of today is the same principle but made of different materials. The modern steam hammer worked by power can strike a blow of 100 tons or 1-100 of an ounce, is under perfect control and works automatically.

Throwing tools have grown from flint tipped spears, bow and arrow, javelin, harpoon and sling into huge machines of war which harness the explosions of gunpowder and may hurl a half ton of metal seventy miles or fire lesser shots from a machine gun at the rate of 600 per minute. Digging tools such as shells, sticks and stones were man's first hoe and shovel. The hoe today has grown into a gang plow drawn by a tractor The modern steam shovel can handle 400 cubic yards of earth an hour.

The flint knife and stone ax were

replaced by bronze and then by steel; cutting tools have taken many forms and emerged in many ma-chines; the sickle gave way to the mower; the cradle to the binder and combine. Of saws there are circular band and cross-cut, for wood, stone, or metal work, which can cut into al shapes and sizes to suit the needs

and fancies of man. Grinding tools, beginning with the hand mill of stones, progressed through the water propelled tub mill, then the grist-mill with power sup-plied by a swift-moving stream or wind, to our modern flour mills which turn out as many as 17,000 barrels of refined flour in a single day. Principles of Machines: Wheels

Down through the ages simple man vas collecting ideas, learning by experience the principles now used in machines. When Mr. Caveman told his wife that she could get a bigger log home by rolling it if she would only try, he had no thought of a would be a wheat a problem. world on wheels. Even when he learned that a couple of slices of a hollow log for wheels with a pole inserted between the two for an axle would do very well for a cart, he was still far from worrying over flat tires, nor did he suspect that one of his descendants would ever have to write about our Machine Age. I find that the word machine is de-

rived from "man kina," which means skilled and at the same time the most helpless folks that have ever lived on earth?

This is to started something. Anomy letter is getting long. The pully, fan, ratchet, cog, wheel. The pully, fan, ratchet, cog, wheel. The pully, fan, ratchet, cog, wheel. crown and drive are developments of the rolling log. From the principle of the wheel and axle came the pow-Do you know when we changed er arm, the center of the axle corfrom a tool-using society to a ma- responding also to the falcrum. From the wheel revolving on an axle comes the principle of the capstan, used in machines for weighing anchor and

lifting great weights.

The windlass with a hand crank on one end or both ends and a rope Union Farmer, Salina, Kans. attached to a pail was early used in lifting water. Archemedia, one of the first scientists and inventors, knew how to use this principle, as probably did a few semi-savages be-fore him. Any good savage who went fishing should have been able to learn how to reel his line around Would you know how to tan leather into shoes, or spin and weave cloth?
Could you take grains and live anichine invented by which foot-power chine invented b Could you take grains and live animals and reduce them into foods to was used. This was used in prisons supply your needs? Suppose you as a form of punishment or torture, were one of New York City's six and was developed to use the power

> that the great Pyramids of Egypt were thus raised into place by slaves. While great numbers raised the stones with levers, others packed dirt under them, until inch by inch the great blocks were raised into place. Think of those sweating bodies, crushing accidents, and the endless time and patience used by these people-humans like ourselves-when you next see a great, modern power

crane at work. We do not know much about the developments of the inclined plane, wedge, and screw. The screw and wedge were both used by the Pyramid biulders. It is presumed that the the necessites of life in a length of time that could be figured in hours. cut by boring holes in the stone, driving wooden stakes in the holes, sustaining, could get along more than a few hours or days, and even farm-til the swelling of the wood split the

ers have come to depend on buying rocks. their flour, matches, fuel, lights, Simple folk! What did they know clothes, and common necessities.

Simple folk! What did they know of machine age problems? The glorago villages and their surrounding farm lands were often self-supporting to an extent that in times of need they could exist without outside communication. For countless ages before that men and women had ground grain for bread—the Up to a hundred and fifty years lies of Egypt, Babylon and Rome were

to endure. We already have ma-chines equal to 50 full-grown men-

No, we do not need men to produce things. If that were the problem, modern "rulers" could do as did snow. It does not look like we were snow. It does not look like we were snow. It does not look like we were snow. rulers and slave owners in the past going to get a crop this year. Well proves this soup.

I think I will have to close for this plant RICHT I shall we build machines to serve the needs of men? "What do we have an economic system for?" asks Stuart Chase in "A New Deal." Is our machine economy to create wealth and power for the few—the owners of the gr at machines—or to serve the well being of society?

Tools and Machines

rulers and slave owners in the past when slaves became too numerous—is start wars of aggression to butcher the surplus population. For war is, after all, the greatest social medicine known to the powerful of the earth when their power is threatened by a restless people. But now times seem to have changed for just after the

Stuart Chase states the case in "Men and Machines," in tool using civilizations, craftsmen produced goods to supply customers and the problem was one of producing enough to meet the pressing needs of people; in today's machine age, the problem is to supply machine production with customers. If for no other reason, men must be preserved to consume the goods of machine industrialism, for business, my friends, is business.

Our national study topic for 1934. We printed one each week because we wanted to have them finished before the new lessons were begun.

We begin the new series this week and the March lesson appears in this week's paper. "Living with Power and Machines" is the name of the new study topic, which has been prepared by Mrs. Elsie Olson, our National Junior leader.

It is hoped that these lessons will be saved from month to month. must be preserved to consume the goods of machine industrialism, for business, my friends, is business.

FOUR MINUTE SPEECH RULES

We are again printing the Four Minute Speech Rules. The various points are explained a little differenty-the rules are more concise and

The Four Minute Speech Contest one of our most important national projects—so please be sure to clip these rules and put them with your Junior material.

JUVENILE COLUMN

(By Aunt Patience Dear Junior Cooperators: Because I am afraid that some of you may not have seen the instructions about the lesson last week, I'm going to repeat them. First, the Juvenile lesson is meant for you Junior Cooperators—our national organ-

PLANT RIGHT IF YOU WANT BEST RESULTS

"Plant right if you want your garden to do right, urges Henry L. Lobenstein, gardening specialist of the Kansas State College extension

This depends on the aype of plant, ocality, and altitude.

Third, avoid planting seeds or plants in soil that is too wet to work well. The packing that results is sure to be harmful.

Fourth, when covering the seed, firm the soil well around the seed. Rough seed, such as beet, parsnip,

and carrot, needs this especially. Fifth, do not cover the seed too deeply. As a general rule, cover small, weak-growing seeds with no more than % inch to 1 inch of firmed soil. Poor stands of carrots, par-snips, onions, beets, and celery often result from too-deep covering.

Sixth, avoid planting too thickly. Crowding results in low yields and poor quality. If heavy planting is done to insure a full stand, thin well later so that each plant will have a

chance to develop properly.

Proper planting methods have much to do with the successful production of all vegetables.

No vegetable plants should be as close together as 1 in., so there is no use sowing seed closer than that After thick planting, thining is too often put off until the crop is stunted. Stunted plants never entirely recover and are inferior in quality as well as quanti-

CHICAGO BUTTER MARKET

The butter market for the week under review has been unsettled and closes %c lower, extras 29%c, standards 29½c, 89 score 29c, and 88

Again import butter has been the deminating influence causing a very unstable condition in the New York market which, of course, has been reflected in this market. The arrivals of foreign butter have influenced many shipments of domestic butter from western points to be diverted to Chicago, thus proportionately in-

creasing Chicago receipts.

Advice has been received at this office that foreign butter was sold Saturday, the 16th, for delivery at New York early in April at 28c. This was 3c under the New York Extras market on that date. This had a demoralizing effect on the markets with the yearly that New York date. with the result that New York declined to 30¼ on Monday and still further to 29¾c on Tuesday.

wheat in the United States on July 1, 1932, was about 300 million bushels. The visible supply on July 1, further to 29% c on Tuesday.

more confidence was in evidence and

the market reacted 1/2c. able effects of light production has been offset by the weight of imports. While a steadier tone prevails just at present, there is an undercurrent of nervousness.

Chicago Egg Market Changes in the egg market during the past week have been only fractional. Extras 21¼c, Firsts 20¾c both down ½c, Current Receipts 20c up ¼c, Dirties 18½c down ¼c, and Challe 182 webspreed

Checks 18c unchanged. Production continues comparative-ly light and demand steady at prevailing prices. An article appearing in one of the leading trade papers last week, commenting on a recent survey of the poultry and egg situation in the midwestern states, tells of curtailed egg production all over this area. The laying hen population in all sections it's said to be much less than lest war and the agg state. than last year and the egg production in all sections must lighter. In some sections it is estimated egg production will be as much as 40 per cent under a year ago. Late reports from the west coast tell of a decline for method with the section of at the section of of production in that section of at least 10 per cent as compared with

last year. These reports both state that demand for eggs for hatching purposes has been unusually heavy and thus has detoured large quantities of eggs has detoured large quantities of eggs out of regular marketing channels. Demand for breaking and storing purposes has kept all surplus supplies well cleared. This heavy demand for eggs for hatching purposes points to the possibility of greatly increased hen population and heavier egg supplies next fall and winter which in turn, based on past experiences, will result in lower prices. Dairy and Poultry Cooperatives Inc. A. W. Seamans, Ass't. Manager.

TRIPLE "A" FACTS

By H. Umberger, Director Kansas State College Extension Service

Q.: If a farmer, who is the producer of the hogs, has such hogs slaughtered by a local butcher or commercial processing plant for consumption by his own family, employees, or household, is either the producer or the processor liable for the figure that each one of these thousands of stores of every kind owned by hundreds of great chain corporations all over America. Just figure that each one of these thousands of stores of every kind owned by hundreds of great chain corporations all over America.

retained. However, the butcher must obtain from the owner an affidavit or statement that the hog was slaughtered for consumption by the owner, his family, employees, or household, this affidavit being necessary to exempt the processor from paying the tax.

Q: If a farmer, who is the products thousands of great chain corporations stores in this nation of ours are clearing, above all expenses and overhead, \$5 each day. Then figure that each one of these thousands of corporation-owned chain stores would keep and support a family, if the families' Papas had owned them and got that \$5 clear each day.

But instead of the thousands of store owner families heing supports

paying the tax.

Q.: If a farmer, who is the producer or feeder of the hogs, slaughters such hogs and sells the carcasses or products to a storekeeper or retailer, wholesaler, or other commercial handler of pork products, is the farmer liable for the processing the farmer liable for the processing the second of the thousands of store owner families being supported by these millions of store profits, these great corporation chains get the farmer liable for the processing the farmer liable for the processing the farmer liable for the processing the second of the thousands of the products, is the farmer liable for the products, is the products of the products

A.: No. The commercial handler is the nation's money in their vaults, liable for the tax when he performs some act in preparing the carcasses or products for distribution or use. The producer is liable for the tax only when he slaughters the hogs and sells directly to or exchanges directly with consumers more than 300 bounds of such products in a single

marketing year. Q.: Did E. J. Bell, AAA economist from Washington, D. C., intimate that there might be any radical changes in the wheat program when he visited Kansas last week?

A.: No. He indicated quite definitely that there would be no radical changes. The crowds of wheat farmers attending the Salina and Dodge City meetings weren't hesitant in expressing their satisfaction with the present program set-up, and Mr. Bell will no doubt report their verdict in

Q.: Has the world wheat situation hanged materially, since the days of 25-cent wheat in this country? A.: No. The world surplus or carry-over is substantially the same as it was.

Q.: Has the United States situation changed?
A.: Yes. The visible supply of

Chicago declined 1c to 14c on the 1935, is expected to be about 125 various grades on Saturday, holding steady there until Tuesday when steady there until Tuesday when two species chart arms in avidance and two species chart arms plus that a small surplus can lower the On a comparative basis the favor-ble effects of light production has ducing capacity of our wheat acres, makes a continued production-control program essential.

REAL FOOD FOR THOUGHT

The following is written by J. D. Shepherd of Clay County, and is worthy of study:
What Is the Matter with Our
Country?
To the Editor of The Kansas Union

I am a paid up member of our Farmers Union, and a cooperator; a dirt farmer of 70. In my humble judgment, farming never has been a real business, but has been mostly a philanthropy.

It is now up to the farmers' organizations to cooperate and work

We are now living in a new age, for corporations now own and control our country. They make the prices on farm products, and make the prices to consumers. Great packing and produce processing corporations not only make the prices for farmers' products to sell at, but make the prices for farmers and other consumers to buyat.

Since the world war our nation has been over-incorporated by thousands of corporations; great chain corporations have grown by leaps and bounds, into thousands and thousands of stores, covering all America. In my judgment it is corporations now that have brought ruin and destitu-tion to our millions of needy. It is great chain store corporations that have billions in capital, enabling them to buy goods by train loads, and take all the output of factories, at lower figures than individuals smaller dealers can buy ot, until these corporations have been given almost a monopoly on mercantile oc-

cupations.
To illustrate: Just figure all the thousands of stores of every kind owned by hundreds of great chain sands of chain corporation stores, on A.: No. Neither is liable for the tax, provided no part of the hog is retained by the person who killed the hog. In the event that part of the hog is retained as settlement for costs or for sale, the processor is liable for the tax on the products of the hog is retained However the butcher must

less than cost of production prices, labor is penalized with unem-

receives less than a living wage or is un-employed, the home market for agriculture

Whatever may be the outcome of the battle over the "prevailing wage" issue, organized labor will not forget that in its hour of need organized farmers came to their assistance.

terests of the farmers and the industrial workers were so essentially the same that the two great groups should cooperate in the most intimate and harmonious fashion. The late John Simpson, who died at the head of his beloved Farmers' Union, subscribed to that doctrine, and it is gratifying to find that his successors still keep the faith.

Farmers for "Prevailing Wage"

National Union Declares That Administration's Policy Would Gravely Affect American Standard of Living

The National Farmers' Union, strongest of agricultural organizations, last Tuesday came out boldly for McCarran's "prevailing wage" amendment to the administration's work relief bill. In a statement signed by E. H. Everson, president, and E. E. Kennedy, secretary, the Farmers' Union stated its position as follows:

"The administration's proposal to pay prevailing rates of interest to the money changers and prevailing prices to manufacturers for material and to pay less than prevailing wages to labor out of the

\$4,880,000,000 proposed work relief program appropriations is as indefensible and as un-American as it is for the Government through the AAA to require farmers to produce food and fibre for less than _____

cost of production prices.
"Both are destructive Secretary of American standards "Both will continue to deadlock recovery.
"The interests of

farmers and laborers are inseparable. The American farmer, receiving cost of production prices for his products, is the best potential customer of labor and the laborer, who receives a 'living wage' is the best potential customer of the farmers. When farmers receive ployment and low wages, because the home market for its prod-

ucts and services is destroyed. When labor

is destroyed and farmers are penalized with low prices. "So-called 'parity prices' to farmers and \$50 a month to labor are both in exactly the same category of 'subsistence wages.' Both proposals provide for inadequate 'wages.'

"The National Farmers' Union is opposed to reducing in any manner the standard of living of either farmers or laborers in

America. The National Farmers' Union is for the McCarran amendment to the administration's work relief program. The National Farmers' Union is for the payment of prevailing wages on public

To LABOR it is one of the most encouraging signs of the times. From its first issue, this paper has been preaching the doctrine that the in-

WATER EQUIPMENT COMES FIRST ON THE FARM FOR HEALTH AND COMFORT

Adequate water supplies and modern equipment for handling water in the multitude of its uses on the farm, in the barnyard, and in the farm home should be probably the first consideration of every farmer, next to shelter itself.

Convenience and comfort are two reasons why the most careful consideration should be given to the puring by means of modernization loans, chase and installation of facilities which can be obtained through more which are now made available to every farmer with sound credit by means of modernization loans extended through local banks and other lending institutions and guaranteed by the Federal Housing Administration.

Fire protection also is a strong ncentive for an adequate water supply, as fire is an ever-present menace to the farmer who has no fire-fighting organization at his command.

Actually more important than all ther reasons is the health of the farmer's family. Although any farmer has the tremendous advantage of fresh air and sunshine over the city dweller, this advantage often is lost because of lack of sanitary facilities which are elementary to the city dwel-

Rare is the farm house which is equipped as adequately as the average ity home. Distressingly few farm omes have bath tubs or even running water, if the hand pump in the kitchen or on the back porch is not counted.

With the credit now available hrough modernization loans, the farmer of sound financial reputation now has it in his power to purchase and install modern plumbing in his home, ncluding such items as bath tubs, lovatories, sinks, hot-water tanks, laundry tubs, and home laundries.

or windmill, or both, together with the necessary piping and cisterns or storage, tanks.

To provide adequate water supply for the house, as well as for the barnyard and farm, he can dig new wells or deepen old ones; construct ponds, reservoirs, or small lakes, or lay pipes to bring the water from other sources of supply.

All of these improvements, including troughs and other water facilities for livestock, are eligible for financthan 12,600 banks located in every section of the United States.

These loans can be for as much as \$2,000, with up to 5 years to complete repayment on the installment basis at a cost lower than any other installment credit formerly available-Federal Housing Sheet.
