# Chart of Recommendations

THE correct grades of Gargoyle Mobiloil for engine lubrication of both passenger cars and motor trucks are specified in the Chart below.

E means Gargoyle Mobiloil "E"
How to Arc. means Gargoyle Mobiloil Arctic Read the Chart: A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
BB means Gargoyle Mobiloil "BB"

Where different grades are recommended for summer and winter use, the winter recommenda-tion should be followed during the entire period when freezing temperatures are experienced

The Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automo tive Engineers, and represents our professional advice on correct automobile lubrication.

Transmission and Differential For their correct lubrication, use Gargoyle Mobiloil\*C.\*
"CC" or Mobilubricant as recommended by complete
Chart available at all dealers.

No GOOD BRIDGE is built without providing an ample margin of safety. No skyscraper is erected without allowing a margin of safety. No good automobile is designed without making sure that there is a margin of safety in all those parts which must withstand severe strains.

No lubricating oil should be used in your automobile engine which does not provide an ample margin of safety. Unusual strains are sure to come-demands of cold weather which congeals unsuitable oil, the added heat of a hard pull in low gear through snow or mud, the added friction of a necessary spurt of speed. Even the most careful drivers run into these conditions.

It is then that the difference between haphazard lubrication and Gargoyle Mobiloil, with its greater margin of safety,

- -the difference between a burned out bearing - or a protected bearing
- -the difference between a damaged engine -or a protected engine
- -the difference between excessive carbon -or infrequent carbon
- the difference between dangerous frictional heat - or minimized frictional heat.

When you use the grade of Gargoyle Mobiloil specified for your car, you secure the fullest possible margin of safety in the operation of your automobile engine. For no other automobile oil has back of it such specialized manufacturing experience and success.

That is why practically every automobile manufacturer endorses the Gargoyle Mobiloil recommendation for your car in the Chart of Recommendations.

That is why Gargoyle Mobiloil is asked for by name at least five times as often as any other oil.

If you want the greatest margin of safety in the lubrication of your automobile engine, you want Gargoyle Mobiloil —the grade recommended for your car.

# TRACTOR Lubrication

The correct engine lubrication for the Fordson Tractor is Gargoyle Mobiloil "BB" in summer and "A" in winter. The correct oil for all other tractors is specified in our chart. Ask for it at your

# What Kind of a Barn Stands Between You and the Field? APR 16 1925

ID you consider the wind in selecting a site for your barn? E. G. Gorton did. The air currents which swish over that portion of Lincoln county to which he holds title travel in southerly and northerly directions. His barn is northeast of his dwelling.

"I would have preferred to have my barn nearer the road," said Gorton, "but that would have placed it and the house in direct line with prevailing winds. I did not want the manure dust, straw and odors blowing into the yard and house. Only a wind from the northeast will blow off the barn to my home, and such winds are rare and not very strong in this territory."

Most farmers consider the wind in building a barn, but usually only to include heavy timbers and plenty of braces. Gorton thought of that and more. Did you ever try to open a barn door against a heavy wind? Gorton has. Also he has seen hinges and hardware wrenched from their fastenings in a high gale. That is why he placed most of the openings on the east and west. There are some west winds in his country, but not so many as there are of north and south winds. He made just as few doors and windows on the north as possible. That insures warmth in winter.

Dodge in Out of Rain

# Dodge in Out of Rain

But there are other desirable features in the Gorton barn. It is 50 by 60 feet, 14 feet to the eaves and about 35 to the ridge. The driveway is 14 feet. That enables him to pull a wagon or manure spreader thru in cleaning horse stalls. Also it is wide enough so a four-horse team can be driven in and unhitched during bad weather. On either side of the driveway at the west entrance is a feed bin 6 by 9 feet. There is room on each side for 12 horses. Along the north wall, in front of the horse stalls on that side, is a 3-foot feed alley, floored with concrete. Thus horses can be given their grain from outside the stalls. This is a great advantage from Gorton's viewpoint because it protects the caretakers, who in many cases are his sons, not yet big enough to command the respect of his work stock. Furthermore that alley facilitates feeding. It connects with the bin just west of the stalls. Chutes are constructed from the hay mow to the mangers, and roughage is supplied likewise without the necessity for at-

# By John R. Lenray

tendants to enter the stalls with the work stock.

A 4-foot alley extends from the south feed bin along the front of the stalls on that side. Only one hay chute is provided on this side because more would have reduced the mow space above. The alley was made wider so the hay could be carried along it and thrown into the horse mangers. In the southwest corner of the barn is a milk

This Barn Was Built to Save Labor. It Meets the nts Where Work Stock and Milk Cows are Housed Under One Roof

Your barn stands between you and the day's work. It's the last obstacle between supper, an evening with the radio and a night's rest. What kind of barn is it? Is it merely a structure with four walls daubed with red paint or is it an asset of efficiency? Is it a time saver or a time waster? The more effort you spend in the barn the less time you have for productive work in the field. Maybe the ideas of E. G. Gorton will offer some suggestions for remodeling, rebuilding or replacing your own barn.—The Editors.

cow stable. The partitions between this attable and the rest of the barn are ceiled. Hinged doors admit hay from the south feed alley direct to the cow mangers. Stanchions are provided for nine cows. The floor is of concrete. The gutter was made just wide enough to admit a scoop shovel. At one end is a drain which carries liquid manure out thru a tile to a waste place in the field. An eave trough on the south side of the barn empties thru a down spout into this same tile.

East of the cow stable are three box stalls 10 by 12 feet. These are used for calf pens, maternity stalls for horses or cows or as hospital quarters. Electric lights from Gorton's farm plant are provided thruout the barn. In the stairway at the east end of the south feed alley is a switch which turns on the lights of the hay loft. These lights are in the ridge, just to one side of the hay track, The barn foundation is of concrete set 2½ feet in the ground. That places it below the frost line. Fartition posts for the horse stalls are set in concrete blocks, which makes them solid and prevents them from rotting off. Other inside supports also are set in concrete.

When the Cows Chew

# When the Cows Chew

When the Cows Chew

"There is only one change I would make in this barn," said Gorton, "and that is in the cow stable. I should have provided more space between the stanchions and the barn wall in front of the cows. You know a cow extends her head when she chews. I did not allow quite enough room for this. As a result my cows step back in the gutter. In an arrangement where the cows head in toward a central open feed alley that trouble would not be encountered. I believe 3 feet from the wall to the mangers would have been enough. Perhaps also I should have angled my gutter to give more room at one end between it and the mangers. Some cows are longer than others."

Gorton's barn is arranged to save time. It contains all modern conveniences except running water, which he prefers to have outside. It is well lighted and ventilated. The entry door is of the sliding type, and the hood door to his hay mow slides up and down on the principle of a weighted window. His cow stanchions are of the steel, wood lined, swinging type. He has used the latest designed, heavily constructed hardware thruout.

# When the Wheat Price Broke

UT of all the maze of opinions, theory, complaint and investigations of the wheat market, one fact stands out clearly: the crop of 1924 in Kansas will be remembered for a long time! It was a peculiar combination of circumstances—a high yield and a big price following an economic depression, when the large income it brought was needed more than usual. Wheat did a lot to place farming on a good financial basis again. cial basis again.

cial basis again.

Prices kept advancing, and producers "dumped 'er' fast. Then came bad weather and poor roads in December and January, which slowed up the movement from the farms. Forecasts were made that farmers would break the price just as soon as they could get the grain to market. Road conditions improved in February, and the larger part of the movement to the railroads was completed. The tiny proportion of the wheat which remained on the farms was in "strong" hands—well-to-do farmers who could afford to hold it and take a chance. The "trade" and the gamblers had most of the crop.

Then the price broke!

Devoid of wheat, farmers have been sitting on

Devoid of wheat, farmers have been sitting on he fence, watching the antics of the grain ex-hanges with amusement and astonishment. That's the Kansas story.

# Then the Buyers Quit

Then the Buyers Quit

From the big city viewpoint it is much the same. Here's the way the New York Times tells it:

"The accepted grain-trade estimates of the world's wheat production (excluding Russia, for which the figures are always untrustworthy) were that 3,503 billion bushels had been produced in 1923 and only 3,137,773,000 in 1924. In Europe alone, where importation of wheat is largest, the decrease was 172,280,000 bushels, or more than 18 per cent, but in Canada and Argentina also, which ordinarily provide a great part of Europe's imports, the decrease was 261 million bushels, or fully 35 per cent. The United States, alone of the exporting countries, raised more wheat last year than in 1923. This was known before December.

"The price of wheat had foreshadowed this

"The price of wheat had foreshadowed this altered situation, even before the harvests. From the price of \$1.06 in April it had risen to \$1.43 at the end of July, and to \$1.56 at the end of November. That it had not risen higher still, on the additted huge decrease in the total world produc-

tion, was readily enough explained last November by experienced students of the grain trade. Altho that production was 365 million bushels less than in 1923, it was only 5 million bushels less than in 1922, and actually 31 million more than in 1921. It far exceeded any other harvest since the war.

"On the face of things, these various comparisons meant that in so far as the 'dollar price' for wheat, last spring, was a result of the very great increase of world production during 1923, it was now a thing of the past. It also meant that, with the 1924 production distributed so unevenly as it was, importing countries would have to buy most of their wheat in the United States. It hardly suggested, however, such a 'famine shortage' in supplies for importing countries as would warrant a price more than double that of a year ago, unless there had been a similar phenomenon after the harvests of 1922 and 1921. But the cash price of wheat never went above \$1.80 while the wheat crop of those two years was being sold.

"The purely speculative movement which put the price above \$2 a bushel in January was based on complete ignoring of these comparisons. No doubt it was made more easily possible by the fact that the surplus available for export at the end of 1924 was mostly in the United States, instead of being held in three or four competitive producing countries. Our own farmers, as the statement of farm reserves showed on March 9, had already sold a larger percentage of their wheat coop than in any season in a quarter-century; they were naturally not forcing on the market what remained. But a two-dollar price was bound to draw it out, and this at the very moment when the foreign wheat-importer, having already purchased on a scale commensusate with his future needs; was no longer compelled to buy at any price Chicago might choose to ask."

After the debacle in prices came, Secretary Jardine, acting under the authority of the Capper-Tincher act, ordered the Grain Futures Administration "to make a full and immediate investig

"Wheat drops 50 cents a bushel from an exorbitant price of more than \$2 a bushel and an im-

mediate investigation is ordered. When wheat was soaring with the sky as the limit, there was no investigation. Had any one suggested one, he would have been cried down as an enemy of the farmer and an obstructionist to prosperity. Every one wants to see the farmer get good prices for his wheat. This means prosperity, for it gives employment to thousands, traffic to the railroads, and stimulates industry by increasing consumption.

"But the joke of it is that when prices of oil, gasoline, coal, steel, copper and other products of mine and factory begin rapid advances after a period of depression, every radical politician wants an investigation. When prices of such products start to decline, any one who attempted to start an investigation with the object of checking the slump would be considered an enemy of the people. Here is where the farmer gets the best of the miner and the manufacturer. Yet the farmer cannot get profitable prices for his products with mine, mill and factory working half time, for it means low wages and unprofitable prices, and this, in turn, means a drastic shrinkage in the consumption of farm products. Neither can the mine, mill or factory expect prosperity in the absence of agricultural prosperity."

# Good Markets This Year?

Good Markets This Year?

But "be all these facts as they may," all students of the market seem to agree that the carryover in June will be small, probably only about 50 million bushels. And the crop of 1925 is not coming along in any very wonderful way. To say the least, there are communities in Kansas where it has been injured by dry weather, soil blowing and insects very seriously. Apparently this should indicate that prices will be fairly good, at least at the start of the new crop movement.

Probably one real lesson to be learned from the action of the market with respect to the wheat crop of 1924 is that a surplus causes trouble. No doubt this will be true for several years to come, no matter what changes are made in marketing. But with the population of the United States increasing at the rate of 1½ million folks a year, and the wheat strenge, when viewed on the long-range trend, showing indications of coming down, it seems likely that within a few years we will reach the point where the United States will not be a surplus wheat producing nation.

## ADVERTISEMENTS GUARANTEED

WE GUARANTEE that all display advertising in this issue is reliable, and should any subscriber suffer financial loss thru fraudulent dealing resulting from such advertising, we will make good such loss. We make this guaranty with the provisions that the transaction take place within one month from the date of this issue; that we are notified promptly and that in writing the advertiser you state: "I saw your advertisement in Kansas Farmer."

NOTICE that the celebrated Chicago lawyer Clarence Darrow, declares that life is not worth living, that it is a tragic failure. Clarence, however, does not believe his own argument. If he really thought life is a failure he would commit suicide. If any man or woman really believes life is not worth living he or she can get out of it in mighty short order and without pain.

# Life is Worth While

HE general statement that life is not worth living is nonsense. Whether it is worth living depends on the individual. Undoubtedly a great many human beings get nothing out of life worth while; so far as they are concerned it is not worth living, but the majority of folks obtain more satisfaction out of it than grief. And the hap-piness an individual gets out of life does not de-pend on the state of his health or his financial condition, altho good health has much to do with enjoying life.

My experience has been that I was happier when I had no financial worries. But I know a cripple, whose legs are withered so they are of no use to him; his spine is crooked; he is one of the worst hunchbacks I have ever seen. He has some use of his arms and hands, altho even these are not per-fect. Yet he has managed to earn a comfortable living; he has a good business head; he has overcome to a large extent the tremendous handicaps of deformity; and I never heard him complain. he thinks life is not worth living he manages to conceal his feelings.

# Now Cook's at Leavenworth

OC COOK, the fake Arctic explorer, is serving his sentence of 14 years at the Federal Penitentiary at Leavenworth. Doc is a puzzle to me. I wonder if he is just a born crook or the victim of an abnormal imagination, and also if he has found life worth living.

Probably Doc never got within 2,000 miles of the North Pole, but he had such a good imagination that he framed a story of an expedition he had led right to the Pole, and made it so plausible that he fooled the scientists of one of the greatest universities in the world.

It was a newspaper reporter, Philip Gibbs of London, who discovered that the story was a fake, and for a time the scientists were ready to crucify Gibbs for doubting it. Even our great hunter and explorer, Prof. Lindley Dyche, who knew more about the Arctic regions than almost any other man in the world, was completely fooled by the Cook story. After the Gibbs exposure Doc Cook had the nerve to go about the country giving illustrated lectures showing pictures of the table in trated lectures showing pictures of the Arctic regions visited during his journey to the Pole, and one showing the place where the Pole was located. At last the falsity of his story was so completely

established that he had no defenders left, and for several years nothing was heard from him; then he blossomed out as an oil promoter in Texas. His tory of the profits that would come to the investors in his oil stock was just as plausible as the story of his journey to the North Pole. And the catch of suckers was very satisfactory to the Doctor.

Here was another case of an abnormal imagination.

Finally the inevitable exposure came, just as it did in the case of the pretended discovery of the North Pole, and now Doc Cook is at Leavenworth leginning his term. To my mind the question remains unanswered: Is Doc Cook just a born crook er is he the victim of an abnormal imagination?

# Cash Enforcement of Peace

PRESIDENT COOLIDGE is unalterably opposed to private American loans being made to European countries if the money is to be used for military armament or for expenditures of like character by the governments of foreign lands.

The President's position will meet with the approval of the great body of the citizens of this country who are in favor of peace among the na-

tions of the world.

The chief executive of the Nation has made public his attitude on our duty to the rest of the world in the matter of aiding to our fullest extent in helping restore normal economic conditions. thru the stabilization of currency, rehabilitation of commercial enterprises and any other such

forms that are in the class of what may be termed legitimate peace time measures.

# Passing Comment

-By T. A. McNeal

While the United State Government has no authority to stop the floating of foreign loans in this country, the majority of American investors us-ually seek to learn if such and such a loan meets with the approval of those who guide the affairs of the country. That is good business sense. If Europe will realize there is no more money

for war it will mean a big step forward in the cause of peace.

President Coolidge is determined to bring to the

attention of the world that this country is willing to help the rest of the world if the rest of the world will help herself by adopting a plan that will mean the cessation of war and the resumption of honorable peace time pursuits.

# The Barter

BY ELMA C. WILDMAN

I have sold the farm where my youth was spent, And my days of wisdom and glad content. And my friends have come to rejoice with me, For at last, they say, I am truly free. But I know full well, the I may not tell, I have sold the beauty that fed my heart.

have sold the spaces of azure sky Where the winged clouds went in cohorts by. I have sold the fields that the sunshine blest, Where the wild wind played with the grasses' crest,

I have sold the groves, and the fairy coves, And the placid pond where the lilies grew.

I have sold the flowers of a thousand hues That have welcomed me in the morning dews. And the tender music of bygone days When the sweet birds sang me their roundelays. I have sold the oak that memories woke And the trustful love of my creatures dumb.

I have sold the tints of the coming spring With the perfumed air that the summers bring; And for cash have bartered the living gold That the treasure-troves of the autumn hold. I have lost the gleam on my ice-bound stream, And the wonderland of the drifting snow.

I have purchased ease for my weary hands, And the way before me hath no quicksands, But my eyes are seeking the scenes they know, And my heart is sick for the long ago When across the sheen of my acres green Were inscribed in beauty the thoughts of God.

# Nitrates and Tacna-Arica

DRESIDENT COOLIDGE'S arbitration of the Tacna-Arica dispute that has kept Chile and Peru bad neighbors for nearly half a century has not satisfied the Peruwians, but no arbitral terms could do so. When the Peruvian government consented to arbitrate it logically abandoned hope of the recovery of this province, precisely as France 15 years ago would have abandoned hope of the recovery of Alsace if she had consented to arbitrate the question. Germany was in possession and had been for 40 years. Just so, Chile wrested Tacna-Arica from Peru in 1882 by war, and has been in possession since. Arbitration could not go back so far, or if it could, then Spain could ask for the recovery of Porto Rico.

In this case Peru and Chile agreed in their war settlement more than 40 years ago that the title to Tacna-Arica should later be determined by a plebiscite in 1892. Meantime, however, Chile had taken possession of the territory, poured her colonists into it and by 1802 had such a preponderance that arrangements could not be made with Peru for the promised plebiscite. The matter has hung there ever since.

If in 1892 Chile had such a preponderance of population that Peru refused consent to the pro-

posed plebiscite, it could hardly be expected that a plebiscite today would be more favorable to Peru. The President in his award agreed to the Peruvian contention that no resident of Tacna-Arica would be eligible to vote in the plebiscile who had not been a resident for two years.

Tacna-Arica is a perfectly typical case of a powerful state forcibly seizing the territory of a weaker neighbor because that territory bad assumed great potential value, owing in this case to the discovery of the so-called Chilean nitrates. They are Tacna-Arica nitrates, and were seized from Peru by Chile in the war of 1882. In the last 30 years the nitrates of this proping here. 30 years the nitrates of this province have provided 80 per cent of the revenues of the Chilean government. Recently, owing to the expansion of Chilean sources of revenue and costs of government, the nitrates have contributed a lower proportion of total revenues, but they return to Chile some 25 to 30 million dollars a year from the export tax on the shipments of nitrates and their by-products, while yielding an income to the companies controlling them, all Chilean, of 100 million dollars a recompanies. dollars a year.

President Coolidge could not have satisfied Peruvian aspirations except by going back 40 years and overturning the result of a war. Peru, in short, lost Tacna-Arica in 1882, and lost it irretrievably. Arbitration in this case can scarcely be expected to accomplish anything for Peru other than to save her face in finally relinquishing her slender claims to a province wrested from her by superior force in the last century.

# Rich Supplies of Capital

N A THOUGHTFUL address before the Topeka Rotarians, Marco Morrow gave some impressive Rotarians, Marco Morrow gave some impressive figures of increased production—an increase sixty-fold in 75 years. Some agricultural economists are advising farmers to be careful about not producing too much. "While our forefathers feared famine, we fear above all else a too great abundance of things," said Mr. Morrow. It is said the flow wills could mill a grow in 90 or 100 days the flour mills could mill a crop in 90 or 100 days at full capacity. "There are enough automobile factories in Detroit and its environs to produce twice as many automobiles as the country can buy. The steel industry is doing well when it runs at 80 per cent of capacity. There are always idle plants, idle capital.

This is related to a statement printed in the Philadelphia Public Ledger by Darwin P. Kingsley, president of one of the leading life insurance companies. "Million-dollar policies," says Mr. companies. "Million-dollar policies," says Mr. Kingsley, "are more numerous now than were \$100,000 policies 30 years ago." The growth of insurance funds becomes a problem of finding suitable investment. This is all new capital, contrib-uted from every part of the country, permanently invested by life insurance companies. "In former days railroad bonds were bought in enormous blocks," the statement from Mr. Kingsley goes on, "but that source has tended to dry up in more re-cent years." Fortunately several new lines of investment have opened up, as public utility securities, and then there is constant expansion in mort-

# Only 5 Per Cent on Bonds

THE sum of the matter is that the increasing supply of new capital tends to exceed the demand for capital, so that while on real estate mort-gages the companies are getting 5½ per cent or bet-ter, on bonds they are now "able to get very little more than 5 per cent." The statement is made that while the companies have held persistently to the issues of higher quality in choosing their invest-ments, they have been obliged, during the course of recent years, to accept a lower and lower yield." This is surprising in view of the war's effects in depletion of capital and increase of debt, tending to increase the yield of capital.

Secretary Mellon threw a huge scare into the country a year or so ago concerning the lack of capital to carry forward the country's industries and plant, and based his plea for lower income surtaxes on that condition. Yet the contrary condition is emphasized here of overcapitalization of plant and a constant accession of year capital that plant and a constant accession of new capital that has difficulty finding adequate outlet in investments. This country, at least, it would appear, has no occasion for fearing a lack of new capital to carry forward production as population increases, but there is abundant capital to produce all the goods the market can absorb, and then some.

# **Outposts of Commerce**

NINETY-FOUR outposts of American commerce in foreign countries, many of them in the re-mote corner of the earth, are given in the re-vised list of United States trade promotion agencies

abroad.

Thirty-seven of these are American chambers of commerce. In China alone there are eight of these institutions at Changsha, Hankow, Harbin, Mukden, Peking, Shanghai, Tientsin and Tsingtau, all of which are combined in the Associated American Chambers of Commerce of China. Chambers are also maintained in Poland, Yugoslavia, South Africa, Egypt, Haiti, Czechoslovakia. In Brazil there are four.

are four.

The remainder of the list consists of commercial attaches and trade commissioners maintained by the Government, and a supplemental list contains the names of several hundred foreign cities in which there are American consular representatives.

# Germany's Peace Overtures

na-

Germany's Peace Overtures

GERMANY'S peace offer and French reaction to it bring down the problem of world peace to its lowest terms. English and even Italian sentiment toward the German proffer is favorable, but France cannot see it. The offer, it appears, bars France from invasion of Germany precisely as it bars Germany from invading France. This is unsatisfactory to the French, since it puts an end to forcible execution of the Versailles treaty, as by Polncaire's invasion of the Ruhr. But the German offer voluntarily gives up Alsace-Lorraine, and that is something different from German signature on the dotted line of the Versailles treaty. As for the Eastern frontier, Germany agrees never to challenge it by war, while reserving the right to resort to arbitration at some future time.

This seems a good overture of peace to England, but not so to France. So the endangerment of European peace is brought down to the two European traditional foes, France and Germany.

For centuries it has been a question as to the domination of the continent of Europe, whether France or Germany shall be the predominant power. They are agelong antagonists and face each other across narrow frontiers more like wild beasts than modern nations. No other peoples in Europe can contend with these two for supremacy, unless Russia at some future time should be able to consolidate its great potentialities of area and population. What has made it inevitable is the racial difference. Germany is Teuton and France Latin. Their cultures are widely diverse and even antagonistic.

To Americans the culture of France seems altogether more humane or more humane.

To Americans the culture of France seems altogether more humane, or more human. The French perhaps are an example to all the world of the capacity for enjoyment of life as it comes, and that is a precious racial quality. But Germany lives in the future, and is dissatisfied with present attainment. No wonder the French, seeing themselves outstripped in physical equipment, with a standstill population, can think of nothing but security against a growing and aggressively ambitious neighbor.

How to assure France of security seems more To Americans the culture of France seems al-

How to assure France of security seems more plainly the question of world peace by this Ger-

man peace proffer and its French reception. What-ever the means adopted it must satisfy the logical mind of France, a world problem for which the or-ganized world ought to be able to find a solution. It evidently is not to be found by such a formula as the balance of power, nor by any resort to meth-ods of the past. If the statesmanship of the world is not bankrupt it will find the solution to a prob-lem that is simplified by being reduced to a prob-lem of Franco-German relations.

# No, She Needn't Return

Is there a law in Kansas compelling a woman to return to her husband if he has left her once and then asks her to leave if she comes? Is there any penalty if a man leaves his family, provided he

left them plenty to live on and a good income? What could be done with a man for eloping with another man's wife? In case of separation what share of the property does she get provided she has helped to earn it? X. Y. Z.

There is no law in Kansas compelling the wife to return to her home where the husband has been at fault in the way you say. Merely supporting one's family does not fulfill the purpose of the marital relation as established by law. The statute covering cases of this kind is found in Section 3410, Chapter 28, which reads in part as follows:

"Any husband who shall without just cause de-"Any husband who shall without just cause desert or neglect or refuse to provide for the support and maintenance of his wife in destitute or necessitous circumstances; or any parent who shall, without lawful excuse, desert or neglect or refuse to provide for the support and maintenance of his or her child or children under the age of 16 years in destitute or necessitous circumstances, shall be guilty of a crime, and, on conviction thereof, shall be punished by imprisonment in the reformatory or penitentiary at hard labor not exceeding two years."

If the parent without any just cause deserted his If the parent without any just cause deserted his family, in my opinion, even the he provided for them, he would still violate this law. It will be noted that the language of the law is not "deserts and neglects to support" but "deserts or neglects or refuses to support." If the husband has a valid excuse for remaining away from his family and does support them, then he is not guilty of any offense.

In case of a man eloping with another man's wife he is guilty of the crime of adultery, and may be punished by both fine and imprisonment. The same is true of the eloping wife, who is equally guilty with him.

# Rights of School Officials

Has the clerk of the school district a right to issue a voucher to the teacher after the clerk's time has expired and a new one has been elected at the regular school meeting? Can the school district make him pay this voucher out of his own pocket? Can anyone collect for the transportation of pupils when he lives a few rods less than 3 miles from the school? Can it be voted on whether the district is to pay or not? Has the president of the school board the right to vote if it is not a tie?

Let the clerk's time had availed and he had turned

It is not a tie?

If the clerk's time had expired and he had turned the office over to his successor, his powers and duties as clerk expired, and he had no right to issue a voucher. The treasurer of the district, however, should take official notice of this fact, and should not have paid the voucher when presented. In my opinion the voucher itself would simply be void, and the district could not be held for its payment, but if the teacher had performed certain service under his or her contract the district would be held for the payment of that service. The mere fact that the voucher was not regularly issued would not relieve the district from its liability.

The law in regard to the transportation of pu-

would not relieve the district from its liability.

The law in regard to the transportation of pupils says that the district may provide for the transportation of pupils living 2 or more miles from school by the usually traveled road, and must provide transportation for pupils who live 3 or more miles distant by the usually traveled road. So if this pupil lived less than 3 miles, altho it might be only a few rods, it would in that case become optional with the district as to whether it provided transportation.

The presiding officer at the district school meeting has the same right to vote that any other citizen of that district has.

# No Help on Ponds

Is there a law giving state aid to farmers to build ponds of certain specifications? H. S.

# Put the Gambler Out of Business

HEAT has been running "hog-wild" on the Chicago Board of Trade, as it used to do in the days before there was a Grain Futures Act. That seems to be the only word for it. No one can imagine the deliberate law of supply and demand yanking down prices 22 cents in 24 hours, nor 51 cents in 15 days.

One day, when Chicago received 29 cars of wheat, the Board of Trade dealt in 87 million bushels.

Tuesday, March 17, with foreign demand more than usually active, there was a price slump of 14 cents

Then came the abrupt order from the Secretary of Agriculture, who is charged with enforcing the anti-grain-gambling law, directing an immediate probe of the transactions of the grain exchanges.

That will take a few days or weeks.

It has every look of a manipulated market.

Perhaps some of the big operators, wintering at Palm Beach, have been taking a "flier."

Someone, or some group, was able to juggle prices regardless of no visible change in the world supply-and-demond alteration.

prices regardless of no visible change in the world supply-and-demand situation.

It is a war between gamblers.

Farmers suffered no great losses by the big drop in prices any more than they made gains by selling two-dollar wheat. Most of their wheat was sold soon after harvest before that price was anywhere near reached. The United States Department of Agriculture reports only 13 per cent of the total crop in the hands of farmers March 1, when the usual, or 10-year average, is more than 18 per cent. A dependable market authority forecasts a carry-over 57 million bushels smaller than a year ago.

year ago.
With a season not specially favorable for winr wheat, there is no great "bear dope" in these

But this does not mean a manipulated market between seasons has no harm in it. The famous May "squeeze" of 1923 demoralized the milling trade and injured the domestic demand for wheat

The ill effect on legitimate grain business caused by the recent flurry in the market may be judged from this extract from a letter I have received from the Clyde Milling & Elevator Company, Clyde, Kan. Its manager and secretary, Mr. Sager, writes me: "The last week or 10 days have seen sales of only 600 barrels of flour, and we have lost 3,000 barrels more which could have been sold had the market remained steady. How can the interests of the country be built up, men employed and the general welfare benefited, when bare-faced gambling is permitted in such a basic commodity and foodstuff as wheat?"

In the same way a manipulated market drives

In the same way a manipulated market drives away real buyers and sellers by creating artificial values, with the result, an Eastern market reviewer points out, that the speculators have to sell out to one another. As this usually means ruin for the losers, the debacle is prolonged so far as possible.

I have assurances from Secretary Jardine that the Department of Agriculture will go the limit of its power under the law and forego no opportunity to ascertain the influences that have been at work in the market.

Under the anti-grain-gambling law, artificial manipulation of wheat prices is a penitentiary offense. Another and more drastic remedy, should the investigation disclose unlawful practices, would be to cancel the trading privilege as a "contract market" of any grain exchange found not to have enforced the rules for the prevention of illegal trading and the vicious short-selling methods.

This would be a serious step, but no more serious than the Chicago Board of Trade was itself forced to adopt the month after we went to war with Germany, when trading was suspended on the Chicago Board of Trade May 17, 1917, by order of its directors, because the market was "running away," and the board at that time felt compelled to act.

The Chicago Board of Trade has always had the means to control and prevent the evils practiced by professional market gamblers, but has consistently declined to apply them.

The Capper-Tincher law was the result of a 30-years' war to compel such market supervision. It was passed with difficulty, and the first draft was killed by the Supreme Court. It is the first legislalation of its kind, and still is somewhat in the nature of an experiment. As legislation, it was the best law that could be drawn from knowledge then available. The Department of Agriculture approved it, and it is now up to the Department to go the limit of its broad authority to enforce it. Secretary Jardine's determination to do this will be generally and heartly commended. If the findings show the law needs strengthening, or discover loopholes which need stopping up, the Department should recommend and sponsor such changes.

No one wants the anti-grain-gambling law re-pealed—except for selfish reasons. It will not be repealed. If found in any way inadequate, it will be made fully equal to its mission. A show-down in the present instance is in every way desirable.

Athun Capper

# Shekel Garnering Propensities of the Golden Hoof APR 16 1925

By A. M. Paterson

ROSPECTS for sheep were never brighter. There is a world shortage of 100 million head, and the United States alone is short several millions, according to Will C. Barnes, in charge of grazing lands for the Forestry Service. Manufacturers are using about 900 million pounds of raw wool annually, of which only about 25 millions are grown in this country. With the shortage of sheep and the demand for woolen clothing, and the increasing popularity for lamb and mutton, the future of sheep growing is attractive

fing, and the increasing popularity for lamb and mutton, the future of sheep growing is attractive.

A small flock of sheep will pay on the average farm. It will give profitable returns on the labor, feed and equipment which the animals require. They afford a means of distributing risk with reasonable assurance of a good profit. Land, labor and equipment have a high market value, and to get full returns on the investment they must be employed to the fullest extent. Sheep raising is one means of obtaining these maximum returns. Sheep are sometimes considered scavengers. While it is true they will eat almost any kind of feed or plant that grows, no class of farm animals will respond to good care and feed as they will. No class of animals will give as great returns for the dollars invested in them, or build up the soil more rapidly. They have been called the "golden hoofed" animal.

A flock of 50 to 150 breeding ewes can be main-

hoofed" animal.

A flock of 50 to 150 breeding ewes can be maintained on practically every farm. These ewes will produce two cash crops yearly, wool in the spring and lambs in the early summer, and the returns from the wool will almost pay for their keep.

A Kansas farmer, who maintains a flock of 150 ewes on 160 acres, reports the following results: The wool returned \$3.76 a ewe; 150 lambs were sold and returned \$10.63 a ewe, an income of \$14.30 a ewe, or an income of \$2,158.50 from the flock.

\$14.39 a ewe, or an income of \$2,158.50 from the flock.

The Oklahoma Agricultural College conducted sheep demonstrations on 30 farms, on which 3,617 ewes were used. This test showed an average income of \$9 a ewe. The Kansas State Agricultural College ran a test with Western breeding ewes which made an average net income of more than \$7 an animal. Lamb feeders are reporting a net income of \$3 to \$5 a ewe.

Anyone who is interested in starting in the sheep business should get in touch with his county agent, agricultural college, or the Kansas City Stock Yards Company. If the required number of breeding ewes or feeding lambs is ascertained by July 1, the stock yards company will endeavor to have shipped to that market sufficient supplies.

The Kansas City Stock Yards Company has a 50-page booklet on sheep production, which gives in detail the care and management of the breeding flock and the feeding of lambs for market. It is free for the asking, or on application to the company at Kansas City.

# But the Neighbors Say?

HE Pied Piper had nothing on a pair of fer-THE Pied Piper had nothing on a pair of rerrets recently imported from Danville, Ill., by B. F. Harmon, owner of the McPherson Seed & Produce Co. of McPherson. Mr. Harmon's business is such as to encourage habitation on the premises by a large selection of the premises by a large selection of the premises. is such as to encourage habitation on the premises by a large colony of rats, and after striving vainly for months by means of poison, cats and traps to get rid of the rodents he decided to try ferrets. The animals were turned loose recently, and an exodus of rodents from the vicinity of the feed and produce store is now in progress. So anxious are the rats to leave that they are reported taking up quarters in sections of the city blocks away, never before infested with the pest, and Mr. Harmon is finding that the services of the ferrets are going to be much in demand.

# When the Boom Explodes

PLORIDA'S real estate boom is a reminder that the Kansas real estate boom started in 1887, nearly 40 years ago. And blew up in 1889. It lasted two years and made fast time while it was going. Men bought property at 11 in the morning and sold it at an advance of \$10,000 at 4 in the afternoon. The only trouble was in collecting the \$10,000. Florida's boom will do well enough if it keeps going as long as the Kansas boom of the late '80s. If it keeps going any longer so much the worse for Florida.

# Paid for Pig—After 53 Years

Haunted by a guilty conscience, Jasper Dugan, 83, Pawnee, Okla., who 53 years ago, shot and killed a neighbor's pig, near Atchison, made himself right with God and his fellow man when he mailed a draft for \$70 to A. J. Peebler, near Wichita. Pinned to the draft was the following note: "It was me who shot your sow. Do you remember? She was in my corn field. Since June 24, 1872, the day I shot her, I always felt that I

should pay. I figure she was weeth about 10 or \$15 at that time. Accept the remainder as interest. Asking forgiveness, your old neighbor, Jasper."

"P. S. I have been trying to locate you for two years."

years."
To this letter Mr. Peebler replied: "Dear Jasper: I never once dreamed it was you who shot her. I never needed money worse in my life than at the time it arrived. I am paid in full."
Your friend, A. J. P."
"As near as I can remember, he had the date about right. We lived next to each other on farms 9 miles from Atchison. One day I found the sow dead, a bullet thru her head. I was mad, but suspected boys of killing her," Mr. Peebler said.

# To Hold an Apple Festival

THE second annual Doniphan-Buchanan county apple festival is to be held at Troy in the early summer. The committee arranging plans for the festival is composed of G. W. Kinkhead of Troy; W. R. Martin, Wathena, and George Hunt, St. Joseph. J. E. Hunt is president of the festival association and W. R. Martin is secretary.

# Justice Was Swift That Time

THREE days after 32 chickens were stolen, lour boys living northeast of Troy received sentence. Edward Miller, John Clary and James Triggs were sentenced to the reformatory for a

term of from one to five years and Delvy (Duke) Clary to the penitentiary for a similar term.

The chickens were stolen from Joe Abbett, living on Burr Oak bottom, who notified the sheriff of Doniphan county the next morning. Sheriff Sampson located the chickens in a little store south of St. Joseph, and from the storekeeper's description arrested four boys in a pool hall. One confessed, implicating the others, and they were brought to jail. The second day they were sentenced by Judge C. W. Ryan of the district, court, and in another day had begun their journeys to Hutchinson and Lansing.

# Not Bell Bottomed Pants!

ARKANSAS CITY school boys and girls of the present generation, who in recent weeks have been guilty of wearing red ties, dog collars, plaid hose and red hair ribbons, are not satisfied with the comment of their elders that such customs are

An enterprising student has gathered some in-

An enterprising student has gathered some information out of the past.

"How about polka dot hose, loud shirts with scenes painted upon them for the men, and men's plaid caps worn by the girls?" she inquires.

The shelk of a decade or so ago ordered shirts with scenes woven in them, she discovered. Ties were ordered in the class colors with the class

numerals woven in the material. Polka dot hose were the thing. Then the pants were not bell bottomed, but were short enough to display a generous view of the hosiery. The smart fellow wore his cap backwards with the bill tipped up.

Altho fads in clothing were not so popular or changing as today, the classes could get into more mischief collectively than the flapper or "jelly bean" student of the present. One of the big aims of every graduating class then was to paint the class date in its colors higher than those of other years. These affairs were followed by walkouts, and finally grew so serious that they were forbidden by the board of education.

Before that time, the ultra-smart thing for the class to do was to ride on the fire wagon, behind old "Selim and Jim," the dapple gray fire horses which served at Arkansas City for a long time.

# 10 Cars For Every Person

GALATIA with a population of 44 persons is believed to have established a record for per capita wheat shipments in the last season. Four hundred fifty cars of grain were shipped from Galatia elevators. This is more than 10 cars for every man, woman and child in the town. Galatia is on the end of the Santa Fe branch line in Barton county. The 450 cars carried more than ½ million bushels of wheat.

# That's a Lot of Bugs!

THE insects which the birds of Kansas eat in one summer would fill Sheridan Coliseum at the Hays Teachers' College 29 times over. It is '147 feet wide, 215 feet long and 50 feet high. Or so said Prof. L. D. Wooster, head of the biology department of the K. S. T. C. of Hays, in an address recently before the Kansas Audubon Society at Wichita. In other words, Kansas birds destroy 32 million bushels, or 384 million pounds of insects in one summer.

# Starting at the Bottom

DONALD DOLD, secretary of the Dold Packing Company, a third owner of an organization which did 57 million dollars' worth of business last year, is employed as a manual laborer in the Wichita plant. He is learning the business from the ground up the ground up.

# At \$7,500 a Carload

ACARLOAD of alfalfa seed was shipped by Percy Burnett, manager of the Kansas Flour Mills Company of Cottonwood Falls, to St. Louis recently, which contained 38,000 pounds, and was worth about \$7,500.

# He Talks to Crows

ARTHUR QUINLAN of Lyons can talk the crow language so the birds believe 'im, He has made a study of crows, and knows the "assembly call." On a recent hunting trip in Rice county he killed 25 crows before the birds learned they had been duped.

# \$1.05 For the Co-op Wheat

THE members of the Kansas Co-operative Wheat Marketing Association will get about \$1.05 a bushel for the wheat in the pool this year, according to Ernest R. Downie, of Wichita, general manager.

# Ross Believed in Hogs

FLOYD ROSS of Dover sold 70 hogs recently at an average weight of about 250 pounds. These were purchased last fall from neighbors at 7 cents a pound. Evidently he is a real market student.

# 114 2-Pound Fries at 50 Cents

EDWARD KASSON of Smith Center shipped 114 2-pound fries to the Denver market recently; he received 50 cents a pound.

# Davenport is the Speaker

THE Commencement speaker at the Kansas State Agricultural College this year will be Dr. Eugene Davenport, dean emeritus of the division of agriculture of the University of Illinois.

# Halstead Has a Bear!

R OY MASTERS of Halstead received a bear cub a few days ago from Ed Hoover; it was shipped by express from Washington state.

# Mules Sold for \$430

A SPAN of mules, 8 years old, was sold by Jack Brittain of Cottonwood Falls recently for \$430. Pretty fair price, eh?

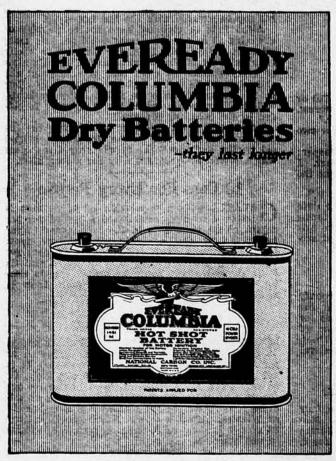

# 60 Acres of Broomcorn

WILL EDWARDS of Burdett will grow 60 acres of broomcorn this year.

But He Thinks the Nurses at Emporia are

"Easy to Look At!"

# Hard-working Helpers Harley is Back on the Farm

HARDEST workers you ever hired-Eveready Columbia Dry Batteries. They will work day after day-and willingly. Hard work on the farm is what Eveready Columbia Hot Shots are built for. Each night they pick up new strength to carry on next day's duties. Made in three voltages, 6, 71/2 and 9 volts. Punch, pep, POWER! Durable, water-proof steel case protects them from hard knocks and bad weather. Used everywhere because they are reliable and safe—they last longer.

and think about buckwheat cakes and

and think about buckwheat cakes and maple sirup, thick cornbread soaked in butter, baked potatoes and beefsteak and all such stuff. But I lived thru it and am now where I can draw

up to a farm table three times a day;

Money Was Well Spent

I came home to find everything on the farm in the best of condition. The cattle look well; the cows are bring-ing calves almost every day, and so far there has been no loss. There is feed in plenty and some to spare to carry them all thru to May 1, but from the look of the pastures this first week in April grass will make a full bite 10 days before that time. While I was away two or three loads of fat hogs were sold, but with each load of seven or eight head sold 14 to 16 shotes were brought back from the stockyards. So the hogs we started to feed last win-ter are all gone, but we still have 50 head in the yards; 42 of these are shotes to be fed out, and eight are sows which are to bring pigs inside the next 30 days. We got these shotes at average weights of just under 100 pounds, and their cost was close to \$10 a hundred. We have plenty of corn to feed them out and, altho the hog market is acting badly this week, we think the shotes will pay us more for the corn than the 85 cents offered at local markets.

# Tractor Works 12 Hours

Our cultivated land this spring is equally divided; 90 acres are in wheat, oats and barley, and there are 92 acres all plowed and ready to plant in corn. The wheat came thru the winter with a fair stand, and may produce an average crop. I note that in some locali-ties in Kansas Clark's Blackhull wheat killed out badly, while beside it Turkey Red was not damaged. On this watha and adjoining towns.

Henry has been writing these notes while I took an enforced that the winter injured it. Our wheat vacation in the Newman Memorial was thinned in places by water stand-thospital at Emporia. How many folks noticed where I left off and Henry behave seldom had a better show for OR the last six weeks my brother farm we have half our wheat of the noticed where I left off and Henry began? I could scarcely tell myself. My
have seldom had a better show for
hospital experience was a new one to
oats; the crop was sown early on
me, as I had never been inside a hospital before. Hospitals like this one
at Emporia are very efficient; for one are doing well; the barley, also, could
thing, those who are operated on get scarcely look better. That the plowing
the personal care of the surgeons who is all done for corn this first week in
do the work, and this counts for a April is due to keeping the tractor or do the work, and this counts for a April is due to keeping the tractor on great deal. The only thing I objected the job about 12 hours a day. The to was the "light diet" on which I was boy on the farm rigged up a very suckept for five weeks. For the first cessful light on the tractor, and he week or so it didn't go so badly, but seemed to enjoy using it, so much so after that I would lie awake nights that, taking the machine after he got seemed to enjoy using it, so much so that, taking the machine after he got

# Hope for the Peaches?

home from school, he would not come

in from the field until 9 o'clock.

A heavy rain of nearly 11/2 inches I can feel the three square meals taking hold, and in a week or so hope to which fell here the first week in April could scarcely have been more timely. Late sown small grain was needing be out around the farm again. It was time I got something solid to eat, for I was fast getting in the condition of moisture badly, and both wheat and alfalfa grew more the day following the rain than in a week before. Many the darky who said he was so thin he folks were getting ready to plant corn; this work will be put back for several days, but when the ground does dry it will be in the best of condition, especially that which was fall plowed. Everyone is putting in full time hopcould sit on a dime and show 8 cents Before I leave this hospital experience I want to tell all my readers ing that the rain is not followed by a how fine the nurses are at the Newhow fine the nurses are at the Newman hospital. They are virtually all farm girls, most of them in their early twenties. They are very intelligent, capable, always good natured and in addition to all these good qualities are very "easy to look at!" As I watched them at their duties I could not help but compare their value to humanity with those who make "sofreeze, for peach and plum trees are out in full bloom. It has been a number of years since we have had so much peach bloom as we have now, and a freeze would destroy the hopes so many of us have of picking peaches off our own trees. I know of nothing better in the fruit line than a luscious Champion peach picked right off the tree, and we have today 14 fine Cham-pion trees in full bloom. We have been humanity with those who make "so-ciety" their life work. I do not think it is too much to say that one of these efficient, pleasant nurses is worth more to the world in general than a 10-acre lot covered with those who go in for "society." This fine Emporia hospital is the outcome of a \$50.000 having large juicy rhubarb for several days. About two weeks ago it was mulched with hay just as we mulch potatoes, and the big heavy stalks are now pushing up the hay, so the location of every hill can be seen. days. in for "society." This fine Emporia hospital is the outcome of a \$50,000 bequest left by the late G. W. New-

# Want Some Maple Sugar?

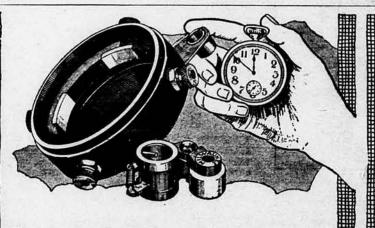

man, and never was money more wisely spent. With some help from the county a modern hospital has been erected where 50 patients can be cared for at once. The rooms are nearly always full, and hundreds of folks are there rectored to health for whom News from Vermont is that the sugar season opened nearly two weeks earlier than usual. This should mean earlier than usual. This should mean a good crop of first quality. Fewer and fewer sugar places are left to be tapped every year; during the last winter several large sugar places in the town of Glover have been cut and made into lumber. There is a reason for cutting these old sugar groves; they have been tapped for 75 to 80 years, and they are beginning to show signs of age. Every hard wind blows there restored to health for whom there would have been no hope 30 signs of age. Every hard wind blows down some of the trees, and the owners say they may as well sell the whole grove for lumber at a good figure as to sit and watch the trees blow down a few at a time. This is going to make maple sugar scarcer than ever. We already have sent for our supply and if any of my readers would like to get some of the pure maple of the best quality I can send the address of Vermont farmers who are making it. Vermont farmers who are making it. In asking for these addresses please send stamped and addressed envelope. In this way you can get pure sugar cheaper than you can buy mixed cane and maple at the stores, and at the same time some Vermont farmer will get a little more for his product. This is a part of Kansas Farmer service, and we are glad to do it for you.

"I've got the guts to drive at any speed I want to in Hiawatha." is the remark which was alleged to have been made recently by W. F. Baker, of St. Joseph, Mo. He speeded his car into the air tower of the Kimmel Oil Station, demolishing the Station, demolishing the state of the Kimmel Oil Station.

tion, demolishing two wheels.

"I've got some guts myself," remarked Judge G. N. Gephart as he fined Baker \$50 plus court costs of 6

per cent. Baker is connected with the opera-tion of mint vending machines in Hia-

# Dependable as Your Watch

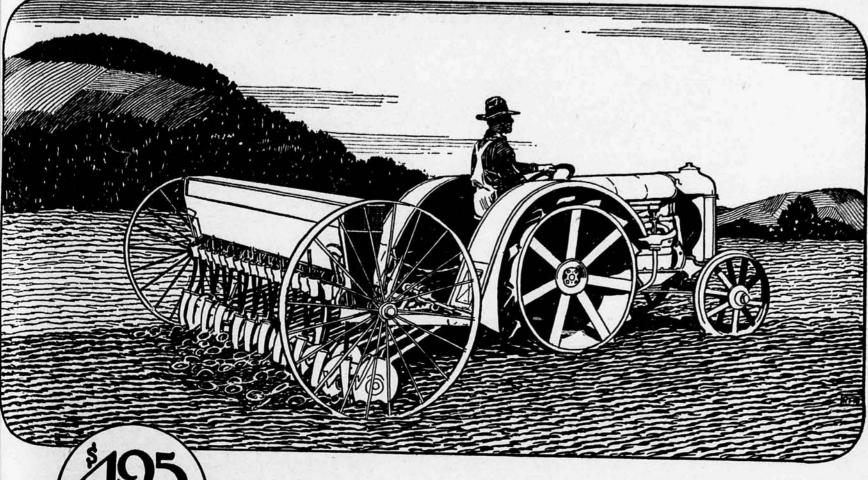

DEPEND on a good watch to time yourself accurately. Depend on a Milwaukee Timer to time your Ford accurately. A Milwaukee will give your good Ford motor more power, peppier speed, quicker starting, faster pick-up. You can depend on it because of its

to wonder the Milwaukee is the chosen timer of hundreds of thousands of farm Ford owners. They know Fords are on "good behavior" when there is a Milwaukee inside the hood. Slip one on your Ford for the power you need for Spring's heavy going. Get one in town at any garage or hardware store. Attached in five minutes—then watch your Ford's new life.

MILWAUKEE MOTOR PRODUCTS, Inc., Milwaukee, Wise

# MILWAUKEE TIMER for FORD

Only \$2.00. (\$2.75 in Canada)

# Ready for Spring Rains

Crops, safely planted and in a good seed bed when the first spring rains come, are worth more money to you at harvest time.

Well cultivated and cared for during the spring growing season, their worth increases rapidly.

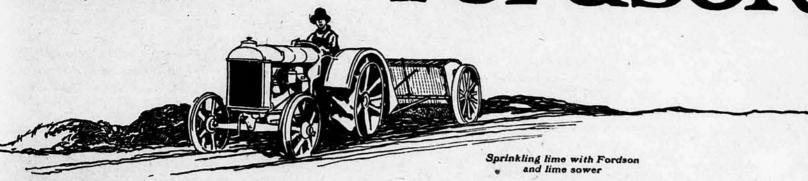

Any Ford dealer will show you how the Fordson's ready, dependable power can crowd into a few days the work which formerly has taken weeks.

Fordson power makes it easy to keep the weeds down

He was reasonably sure, from the conduct of the men acting as sentinels, the ridge where the source of that he had not been soon as sentinels, the ridge where the source of the ridge where the sentry sat. But he heard no further voices, and he had ascertained carefully before he set out that these two were isolated.

Reasonably certain of his prey, Gray pulled himself from stone to stone, from depression to depression. Once from depression to depression.

The man stiffened and raised his head, as if he had sensed danger. Gray was The venture appeared almost hope-as if he had sensed danger. Gray was less. How could he enter the ruins, beneath him by now, and stretched find the girl, and bring her out safely? out a powerful arm. out a powerful arm.
His hand closed on a sandaled foot

and he pulled the priest down from his But he was hungry for sight of the man's mouth, preventing outcry, ary—to know if she was still alive. They were sheltered from view from perch. Gray's other hand clamped on Sungan by the ridge, and the American believed no one would notice the dis-

"If you cry out, you will die," he said in Chinese, kneeling over the other. Cautiously he removed his hand

from the priest's mouth.
"Tell me——" he began. Then—"It's white man!"

He peered at the dark, sunburned

"Delabar," he said slowly. "Professor Arminius Delabar, minus a beard. No mistaking your eyes, Professor. Now what, by all that's unholy, are you doing here in this menkey rig?

Gray blessed the continuous dunes staring up at Gray in blank amazeously, keeping behind the ridges and edging his way from gully to gully, all the lines of his face stood out, crawling at times and not daring to giving him the appearance of a skull lift his head for another look at the over which yellow skin was stretched sentinels he had located.

Removing his hat, Gray peered over costume is a masquerade or not, but

Delabar did not meet his gaze. He

Maybe They Could Collect Something

First aid to Easy Riding

with BALLOON TIRES

AUTOMOTIVE engineers recommend soft resilient springs for best results with balloon tires. Engineers of high-priced cars are lengthening the leaf springs to get this effect.

Hasslers are the only device for the Ford car which softens the springs and gives the same results that automotive engin-eers of large cars have obtained through changing their spring design.

In addition—Hasslers are a perfect REBOUND CHECK.

Thus, they not only soften the spring action, but also check the upthrow.

This does away with the one bad feature of the balloon tire—for it overcomes the tendency of the car to "gallop" when driven rapidly over a rough road. This is true of no other spring control device.

-A rebound check, alone, will not give the desired result.

-a shock absorber, alone, will not do it

-but the COMBINED rebound checking and shock absorbing qualities of HASS-LERS make the balloon tired Ford car the last word in easy

HASSLER SHOCK ABSORBERS are ten years older than the bal-loon tire. They are the coun-try's first intelligent solution of the easy riding problem.

The present type Hassler is the best Hassler ever made— not only a perfect SHOCK ABSORBER, but a powerful REBOUND CHECK.

Whether your Ford car has regular tires, or balloon tires, it needs Hasslers to complete and control its spring action.

Hasslers not only make riding more comfortable, but also cut your upkeep costs and re-duce repair bills.

Over a million motorists have indicated the truth of these as-sertions. For Hasslers are in active use on more than a million Ford cars.

This overwhelming popularity is no accident. It is based on 12 years of faithful perform-ance under all kinds of driving conditions.

Find out for yourself how badly you need Hasslers. Just one trip in a Hasslerized car will convince you.

Ask your dealer for a demonstration, or write us if he cannot supply you.

"What's the meaning of that?" Gray modded contemptuously at the yellow robe.

"Wu Fang Chien punished me. He forced me to join the Buddhist priests who act as guards of Sungan. He did not want me to escape from China. Here, I way safe under his men."

"He trusts you enough to post you as one of the sentries."

"With another man. The other left to attend a council of the priests. My watch is over at sunset. In two hours."

Gray scanned his erstwhile companion from narrowed eyes. He decided the man was telling the truth, so far. "Will these Buddhist dogs come to relieve you at sunset, Delabar?"

"No. The priests do not watch after nightfall. Some of the lepers we—wu Fang Chien can trust make the rounds."

"Is Wu Fang Chien in control here—governor of Sungan?"
Delabar licked his lips nervously. Perspiration showed on his bare forehead. "Yes. That is, the mandarin is responsible to the Chinese authorities, He has orders to keep all intruders from Sungan—on account of the lepers."

Gray smilled without merriment.

truders from Sungan—on account of the lepers."

Gray smiled without merriment.
"You say the priests stand guard. Are they armed?"

"No. Not with guns. Any one who tries to escape from here is followed and brought back by the outer guards—if he doesn't die in the desert."

"I see." Gray gripped the shoulder of the man on the sand. "Did you hear me say I wanted the truth, not lies? Well, you may have been telling me the letter of the truth. But not the whole. Once you said 'we' instead of Wu Fang Chien. Likewise, I know enough of Chinese methods to be sure Wu wouldn't punish a white man by elevating him to the caste of priest. You're holding something back, Delabar. What is your real relation to Wu?"

Delabar was silent for a long time. Staring overhead, his eyes marked and followed the movement of a wheeling vulture. His thin fingers plucked ceaselessly at the yellow robe.

# Some Real Information

Some Real Information

"Wu Fang Chien," he said at length,
"is my master. He is the emissary of
the Buddhists in China. He has the
power of life and death over those
who break the laws of Buddha. I am
one of his servants."

Delabar raised himself on one elbow.
"A decade ago, in India, I became
a Buddhist, Captain Gray. Remember,
I am a Syrlan born. I spent most of
my youth in Bokhara, and in Kashgar,
where I came under the influence of
the philosophers of the yellow robe. I
acknowledged the tenets of the Buddha; P bowed before the teachings of
the ancient Kashiapmadunga and the
wisdom that is like a lamp in the night
—that burned before your Christ. And
I gave up my life to 'the world of
golden effulgence.'"

A note of tensity crept into his
eager words. The dark eyes reflected
a deeper fire.
"Earthly lusts I foreswore, for the
celestial life that is born by ceaseless

a deeper fire.

"Earthly lusts I foreswore, for the clestial life that is born by ceaseless meditation, and contemplation of the Maha-yana. I was ordained in the first orders of the priesthood. That was the time when foreign missionaries began to enter China in force, despite the Boxer uprising and the revoit of the Tai-pings. The heads of the priesthood wanted information about this foreign faith, and the peoples of Europe. They wanted to know why the white men sought to disturb the ancient soul of China."

Gray whistled softly, as Delabar's character became clear.

"I was sent to Europe. At first I kept in touch with the priesthood thru Wu Fang Chien. Then came the overlikow of the Manchus, and the republic in China, But you cannot cast down the religion of eight hundred

"Word was sent to me from Wu Fang Chien—who had heard the news from a Chinese servant of the American Museum of Natural History—that an expedition was being fitted out to explore Central Mongolia. I was ordered to volunteer to accompany it."

"And you did your best to wreck the expedition," assented Gray.

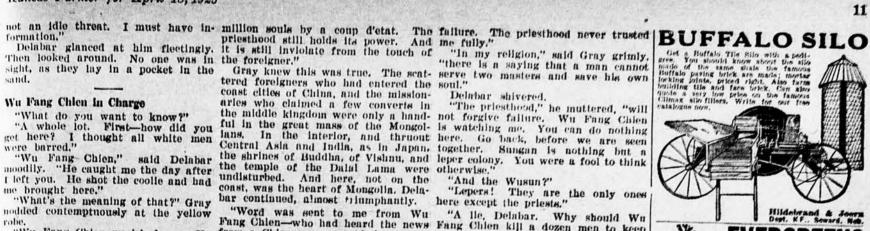

"I liked you, Captain Gray, I tried to persuade you to turn back. At Liangchowfu it was too late. When you escaped from Wu Fang Chien the care and the prisoner. Where is she?"

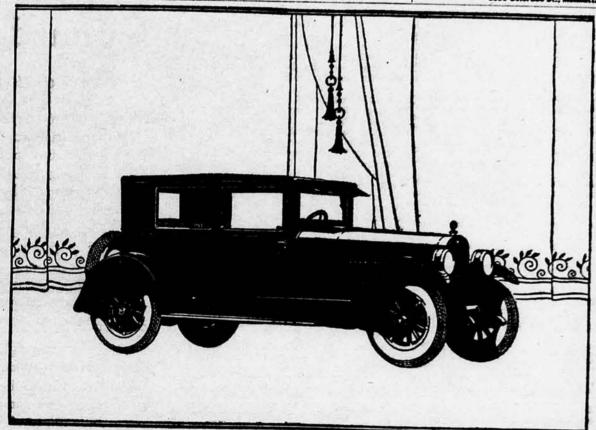

"I don't know."

Gray touched his automatic significantly,

# FOR TEN YEARS

# "The World's Greatest Buy"

Everyone Says It-Sales Prove It

It is only as you find the real comparisons for Hudson qualities among the costliest cars that the enormous difference in price is so astonishing.

Today it offers the greatest price advantage and finest quality in Hudson history. Never was this supremacy of value so outstanding. And the greatest Hudson sales on record show how complete is public knowledge of the facts.

# Is There Any Reason to Pay More?

Hudson's position as the "World's Greatest Buy" is not merely a new attainment. It is acknowledgment of ten years' refinement of a great car around the famous patented Super-Six principle. No motor design, however costly, has been found to displace this long-time leadership of the exclusive Super-Six.

Its simplicity has always meant a lower selling price than is permitted in complicated types. And today, economies possible only to the largest production of 6-cylinder closed cars give it value advantages never held by any rival.

All now know that higher price can buy no smoother performance than Hudson's. It cannot buy more brilliant results in acceleration, power or speed. It cannot buy greater reliability or endurance.

No car at or near the price rivals the Hudson Coach in actual proof of value which is SALES.

# \$4,000 From Missouri

A and B were husband and wife. A died. Ten years after A's death A inherited \$4,000 from an estate in Missouri. B lives in Kansas, where she and her husband both lived before his death. Would B have any share in A's inheritance? B has not remarried. Or would A's children by a former marriage get it all?—J. D.

If this estate came thru a will of course it would be disposed of according to the terms of the will. If it was simply A's share of an estate by right of natural inheritance without will, B, his widow, would not share in such an inheritance. It would go to his children.

Near what towns are the state hospitals for the insane in Nebraska, Wyoming and Missouri?—F. H.

In Nebraska hospitals for the insane are at Lincoln, Norfolk and Ingleside. The state hospitals for the insane in Missouri are at Fulton, St. Joseph, Nevada and Farmington. There also is a hospital for the feebleminded and epileptics at Marshall. The state hospital for the insane in Wyoming is at

# Collecting a Doctor's Bill

If a boy has contracted a doctor bill in Oregon can the doctor by law collect this bill from the parents in Kansas? The boy is single and 19 years old.—J. W. B.

If this boy is under his parents' control they would be responsible for his doctor bill. If he is not under their control they would not be.

# Herd Law in Leavenworth?

A, B and C live on farms adjoining. A's pasture joins C on north and B on the west. Can A compel B and C to build one-half the fence to keep A's cattle from breaking cut? None of the fences are very good: between A and B is part hedge, and the cattle break thru. There is no fence between B and C, and their pastures do not join A's pasture. What is the Kansas law about line fences and what is the herd law?—L. A. A.

Unless B and C turn their land out ministrations of their own. to commons, that is, do not claim any right to keep anybody from entering right to keep anybody from entering "Is the Motor-car an Asset to the upon their land who wishes to do so, Church?" asks a weekly paper. One they are compelled under the law to theory is that it brings a good deal of build their share of the partition lusiness to the churchyard.

What changes of the moon are light and what are dark? In a jury trial before a bor. I do not know whether Leaven-is rendered can the jury split the costs between the plaintiff and defendant?—J. N. W.

The changes called light of the moon are those of the first and land and appeared by reighbors to halfland and compel his neighbors to build their half of the fence.

There are several kinds of legal fences in Kansas. The most common is the barb wire fence. This is composed of three barb wires set on posts to be placed not more than 2 rods apart and set in the ground not less than 30 inches. Or the posts might be set 48 feet apart with stays between the posts not more than 12 feet apart. The upper wire of the fence is to be not less than 44 inches and not more than 48 inches from the ground. The lower wire is to be not less than 18 and not more than 24 inches from the ground, and the third wire equidistant between the top and bottom wires

If the people of any township vote to permit hogs to run at large then it becomes necessary in order to have a lawful fence to build what is called a hog-tight fence, that is, there must be two wires placed below the bottom wire, the lower wire to be not more than 4 inches from the ground. The hedge fence is lawful only when voted

by the people of the county.

The herd law permits the taking up of stray stock when it comes upon the premises of any person, to be held until the cost of taking the same and damages caused thereby are paid by the owner of the stock. It is necessary to send the owner, if he is known, a written notice or to give him a personal notice that the stock was taken up After ten days' notice the person tak ing up the stock is required to advertise it, and a copy of this advertise-ment also is filed with the county clerk. If at the end of one year the stock has not been redeemed it is sold under the provisions of the herd law, and after the costs have been paid one-half of whatever surplus there is goes into the school fund and the other half goes to the person who takes up the stock.

# Still Strong for Coolidge

Now that Congress has adjourned and a general summary of the situa-tion is being taken by the political wiseacres, it is still evident that the people of the United States are just as strong for Calvin Coolidge now as they were November 4. Newspaper comment and the reports from observer. comment and the reports from observ-Location of State Hospitals feet that in his recent disagreement with the Democrats and radicals in the Senate the President had the un-qualified support, not only of Repub-licans but of independent thinkers and a great many Democrats.

Of course in this particular instance, the principal reason for backing the President, aside from general confidence in his judgment, was that the chief executive should be permitted to choose the members of his official family. But the real reason for the support given the President is deeper than this. It lies in the fact that the peo-ple believe Calvin Coolidge is bringing back sane, economical government to the United States.

The insistence of the President that there be real economy, and the excel-lent exposition of the subject which he gave in his inaugural address, coupled with the splendid fiscal record of Con-gress, and the prospect for further reduction in federal taxes, has given the people added confidence in Calvin Cool-

While the cost of the operation of the Federal Government is being curtailed and taxes reduced, the tendency in the state and local governments is the opposite. It is to be regretted that the various state and local governthe various state and local govern-ments do not have little Coolidge ad-

# Let the "film of protection" safeguard your Fordson

-from deadly heat and friction

WHAT a tough job your oil has, to protect your Fordson motor! Long hours of gruelling service at full speed and load. Constant battle with deadly heat in the engine. A desperate struggle with grinding friction aggravated by the presence of dust, dirt and grit in the crankcase.

Against these heavy odds, a tissue-thin film of oil must fight. For, in action, oil is no longer the rich cool stream you pour into your crankcase, but merely a film of that oil—a film that creeps between all the whirling, flying surfaces and prevents metal to metal contact.

That film must fight for its life—and for the life of your motor. If it fails, there is a clash and grind of metal. A piston seizes, a cylinder is scored, a bearing goes. Your tractor stands idle. Time is lost, big repair bills follow.

# The "film of protection"

Because the secres of motor protection lies in a film of oil, Tide Water technologists spent years in studying not oils alone but oil-films as well. Finally, in Veedol, they perfected an oil that gives the "film of protection," thin as tissue, smooth as silk, tough as steel.

"Special Heavy" is the Veedøl oil that should always be used in Fordson tractors. It will give your motor the "film of protection" and insure it against oil failure. Any dealer displaying the orange and black Veedol sign can supply you with Veedol Special Heavy—in any quantity, from a gallon to a full drum for your season's supply.

Tide Water Oil Sales Corporation, Eleven Broadway, New York (main office); Boston, Newark, Philadelphia, Chicago, Detroit, Kansas City, Columbus, Dallas, San Francisco, Los Angeles, Portland (Oregon).

# Marching Sands

(Continued from Page 11)

"I want to know," he said quietly. "And you can tell me. It is more important than my life or your miserable existence. Where is Mary Hastings?"

Delabar cowered before the deadly purpose in the white man's eyes.

"I don't know, Captain Gray. Wu Fang Chien ordered that when the caravan was attacked, she should be brought to him. Not killed, but taken to him. Some of the priests seized her and took her to one of the inner courts of the city. At the time, Wu Fang Chien was directing the attack on the caravan. I have not seen her since."

"Where is this inner court?"

"You are a fool. You could not possibly get into the ruins without being seen. Wu Fang Chien would be glad to see you. I heard him say if the girl was spared, you would come here after her. He knew all that happened at Ansichow—"

"Then she is alive!" Gray's pulses leaped. "So my friend Wu is keeping to girl as bait for my coming. A clever man, Wu Fang Chien. But how did he know Sir Lionel had told me what happened at Sungan?"

"The Englishman was followed, back to where he met you. If he had been hilled in the fighting here, I think Wu Fang Chien planned to send me to bring you here—"

## "The Hastings Were Fools"

"Yes, he is clever." Gray studied the matter with knitted brows. "So Wu wants to kill me off, now that I have come this far—as he did the men of the caravan? Look here! Does he know I'm near Sungan? Were you put here as—bait?"

"No," Delabar shook his head. "The men who were sent to attack you—the Chinese soldiers hired by Wu Fang Chien—lost track of you. Wu Fang Chien does not know where you are—yet. If he should find you here talking to me, it would be my death. I—I have learned too much of the fate of the Hastings. Oh, they were fools. Why should your people want to pry into what is hidden from them? Go back! You can do nothing f r the girl."

Gray stared at the Buddhist curious—"You haven't learned much decency."

"You haven't learned much decency from your religion, Delabar. So the outer guards falled to make good, eh? By the way, how is it that they leave camel tracks in the sand?"

"They wear camels' hoofs instead of shoes. Hoofs cut from dead wild camels that the Chinese hunters kill for our food—for the lepers. It helps them to walk on the sand, and mystifies the wandering Kirghiz. Why do you want to throw your life away—?"

do you want to throw your life away—?"

'I don't." Gray sat down and produced some of his flour cakes. "I want to get out of Sungan with a whole skin, and with Mary Hastings." He munched the cakes calmly, washing down the mouthfuls with water from his canteen. "And I'm going to get into the inner courts of Sungan. You're going to guide me. If we're discovered, remember you'll be the first man to die. Now, Delabar, I want a good description of Sungan, its general plan, and the habits of your Buddhist friends."

Nightfall comes quickly after sunset on the Gobi plain. Waiting until the shadows concealed their movements, Gray and Delabar started toward the city of Sungan.

The moon was not yet up. By keeping within the bushes that grew thickly hereabouts, Delabar was able to escape observation from a chance passcriby. The man was plainly frightened; but Gray allowed him no opportunity to bolt.

"You'll stay with me until I see

"You'll stay with me until I see Mary Hastings," he whispered warningly.

# Into the Passage

A plan was forming in the American's mind—a plan based on what Delabar had told him of the arrangement of the buildings of Sungan. The lepers, he knew, lived in the outer ruins, where he had seen them that afternoon. In the center of the Sungan plain, Delabar said, was a depression of considerable extent. Here were the temples and pulaces, the towers of which he had seen.

This, the old city, was surrounded by a wall. Delabar said it was occupied by the priests. And in this place
Mary Hastings might be found. It dry now. A passage runs from it to the inner buildings."

He seemed familiar with the way,

When they came to the first stone heaps, Gray halted his guide.
"You told me once," he whispered, "that Sungan had a series of underground passages. Take me down into these,"

"Thru the lepers' dwellings?"
Gray nodded silently. Delabar was shivering—an old trick of his, when

"It is madness, Captain Gray!" he

"It is madness, Captain Gray!" he chattered. "You do not know—"

"I know what you told me. Likewise you don't want me to get into these temples. Step out!"

Delabar glanced around in despair and led the way thru the bushes. Once the American caught the gleam of a fire and saw a group of lepers squatting about a blaze in which they were toasting meat. At the edge of the firelight starved dogs crouched.

They came to an excavation in the ground, lined with stone. Delabar

"An old well," he whispered. "It is dry now. A passage runs from it to the inner buildings."

He seemed familiar with the way, and Gray followed closely. The steps wound down for some distance, the air becoming cooler. They halted on what seemed to be a stone platform.

"Here is the entrance to the passage," Delabar muttered. "It was used to carry water to the temple."

Gray put his hand on the man's shoulder and urged him forward, making sure the other did not seize the opportunity to make his escape. He did not trust Delabar. He was convinced the Buddhist had not made a clean breast of matters. For one thing, he was curious as to why priests should take such elaborate precautions to guard the lepers. Elsewhere in China there were no such colonies as Sungan.

Sungan.

Why were armed guards stationed around Sungan? Why were the lepers barred from the inner walled city?

Where was Wu Fang Chien?

# America Has Real Leaders?

# But a European Statesman Usually "Reacts According to a Calculable Law!"

American statesman from the typical European statesman? Every informed person who compares a man like Roosevelt or Wilson with a man like Bulow, Bethmann, Poincare or Lloyd George recognizes a marked difference—yes, a marked con-trast—between them. Nor is this unlikeness confined to the present generation. It existed thruout the whole Nineteenth Century. Only a few of the greatest statesmen of Europe are exceptions to this rule of contrast, and they also are exceptions to the generality of statesmen in their own continent; for instance, Napoleon, Bismarck, and perhaps Cavour and Gambetta. On the other hand, the greatest public men of America diverge from the national type only in so far as they accentuate it.

The typical American statesman is characterized primarily by a forceful,

dynamic, selfmade personality. The typical European statesman, on the other hand, is predominantly static. He is what he is, and what he always has been from the beginning. A Bethmann, a Bulow, a Poincare or a Lloyd George remains always the same. Bethmann thruout his life continued to be an excellent, honest, but narrow civil servant of the higher grade, who proved a farcical pilot for a great state in a tremendous crisis. Bulow remained thruout his career a bril-liant orator and parlor tactician who, when at the head of the government, resembled a funambulist, without a moral center of gravity in real life outside the world of politics.

Poincare has consistently been a brilliant attorney and logician, an ardent patriot with a strain of raw brutality in his blood. Lloyd George continues to be a little, vain, self-enthused, and therefore mob-enthusing demagogue, thriving on popular ap-plause, and with no more ethical stability in his dealing with the people as a mob than Bulow had in dealing with the court and high society as a

# A Constant Growth

This European predetermination of the individual from the day he leaves the schoolroom is not true of an American statesman. The latter is constantly in process of formation. If we study the portraits of a Wilson or a Roosevelt at different periods of his life-not to exaggerate the importance of these two men-we shall discover that his features and expression changed remarkably in the course of his career.

A similar change is notable in the portraits of Bismarck, if we compare those made when he was a Pomera-nian squire with those of 1871 and 1891. And the Napoleon of Arcola Bridge bears little facial resemblance to the later Emperor of Europe. But this modification of the physiognomy is observable in case of American public men who are not to be compared with Bismarck or Napoleon in great-ness, either intellectually or—what is more important-ethically.

While the typical European statesman proves hopelessly inadequate when faced by novel and unanticipated tasks and situations, this is not characteristically true of American statesmen. During the rapid development of the United States in the Nineteenth Century, its public men faced many extraordinary emergencies. Most of these leaders were persons of medi-ocre ability. Nevertheless, in nearly every case they dealt competently with the problem thrust upon them, and no one of them completely lost his men-tal or ethical equilibrium.

When such men suddenly reversed WHAT distinguishes the typical themselves, as did Bulow in the navy American statesman from the crisis of 1909, or Lloyd George when he began to preach a war to annihilate Germany, they were merely obey ing an overwhelming surge of public sentiment.

The Bethmann whom the kaiser appointed imperial chancellor while tak-ing his dog for a walk in the palace garden one pleasant morning, and thus made the constitutional head of the empire, was precisely the same Beth-mann who blurted out his guilt toward Belgium and made the contradictory, weak, conscience-stricken, fu tile speeches of the war period. And what man in the whole world would expect a surprise from Poincare? His very name stands for a policy.

# Did Wilson's Mind Waver?

In America we find precisely the reverse. During the administrations of Roosevelt and Wilson, not only the masses of the people, not only the intellectual leaders of the nation, but never knew precisely what the future policy of the executive would be. A marked illustration of this is Wilson's change of front toward the war. The average European tries to reduce such men to a fixed formula, and having made up his mind as to the terms of that formula, he accuses them of dis-honesty or hypocrisy if they deviate

Probably Wilson's mind wavered exceedingly, and when he finally cast the die for war, mystical motives and a feeling of personal injury played a part in his decision. Wilson broke his part in his decision. Whison broke his word and the word of his country at Versailles; but not, as is sometimes alleged, because he was a coward. He proved both before and after that event that he had the strength and the moral courage to stand up for his convictions in a griefe. convictions in a crisis.

# Roosevelt Was a "Terror?"

Roosevelt's unpredictability, his amnosevert's unpredictability, his ambition, and his personal following finally made him a terror to his own party. As early as 1906 his attitude toward the trusts surprised even Carnegie. His political career from Taft's Presidency on his attempt to found a Presidency on, his attempt to found a third party, his coquetting between the Republicans and the Democrats, his ultimate political designs, remain today a puzzle, the key to which is to

sonal psychic change.
Since the American statesman is always in process of evolution, he is apt ways in process of evolution, he is apt to appear greater than he really is, and greater than his European colleague of equal or superior ability. Wilson and Roosevelt as individuals engaged the attention of the whole world, but whoever bothered about the personality of Bethmann? In periods of little change, when conditions remain approximately uniform and static, the European statesman's ond static, the European statesman's consistency and trueness to predetermined type are an advantage, but in periods of crisis and rapid change the dynamic American statesman is superior.

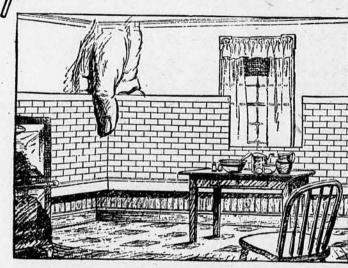

# On West from Elkhart

Heavy shipments of materials are being made to Elkhart these days for the extension of the Santa Fe Railroad west and south from that town. By the end of next year the line will be thru to the main track, and will pro-vide another cutoff for the world fa-mous "No. 3," the California Limited, and for thru freight. and for thru freight.

# Paid \$18,205 For Furs

"Blurted Out His Guilt!"

J. E. Isenhart, a teacher in the school at Spivey, near Hutchinson, has paid out \$18,205 for furs in the last year— We can predict with reasonable certainty how a European statesman will from 4,617 skunks, 5,223 muskrats, 1,act, for he is intellectually and spiritually a final product. He reacts according to a calculable law. One cls and two minks.

# TileWalls Like Magic

Beaver Tile Board works wonders in old kitchens and bathrooms. It gives you glistening white tile walls at one-tenth the cost of the old way because this miracle tile comes in big panels—ready to nail right over the dingy old cracked walls. Get a few panels of it from your local dealer, nail it up, enamel it, and behold the lustrous new beauty of your kitchen and bathroom. Or mail the coupon for a free sample and a full explanation of its use and application. Why put up with a dingy kitchen or bathroom any longer?

# Beaver Tile Board

Beaver Tile Board comes in panels 4 feet wide and 6 to 10 feet long —each contains hundreds of uniform tiles—the indentations are deep and clean-cut. When nailed over old walls or direct to the studding it will not crack, fall or crumble. Wears like porcelain. Ask your dealer about it and mail coupon for free samples.

# Marching Sands

(Continued from Page 13)

The answer to these questions lay in the temple toward which they were

They went forward slowly. Complete silence reigned in the passage. Occasionally Gray stumbled over a loose stone. Then he heard for the first time the chant.

## A Close Corner

It came from a great distance. It was echoed by the stone corridor, swelling and dying as the gust of air quickened or failed. A deep-throated chant that seemed to have the cadence of a hymn

of a hymn.
"What is that?" he whispered.
"The sunset hymn," Delabar informed him. Gray, who had forgotten the council of the priests—which must be nearby—wondered why the man

the council of the priests—which must be nearby—wondered why the man shivered.

"Does this passage lead direct to the council?" he demanded.
Delabar hesitated.

"It leads to a cellar where two other corridors join it," he muttered.
"The chant is carried by the echoes—the council is still far off." He moved forward. "Come."

This time he advanced quickly. The song diminished to a low murmur, confused by distance. Gray reflected there must be many singers. If all the priests were at the council, the corridors might be clear. Wu Fang Chien would be with the Buddhists.

A glimmer of light showed ahead. It strengthened as they drew nearer. Delabar broke into a half trot, peering ahead. By the glow, Gray saw that the passage they were in was a vaulted corridor of sandstone carved in places with inscriptions which seemed to be very old.

The chant swelled louder as they reached the end of the passage. Before them was a square chamber resembling a vault. Two large candles stood in front of another exit. Gray thought he noticed a movement in the shadows behind the candles. His first glance showed him that the only other opening was a flight of stone steps, across from them.

He reached out to check Delabar.

He reached out to check Delabar.
But the man slipped from his grasp and ran forward into the room, Gray swore under his breath and leaped

after him.
"Aid!" screamed Delabar. "Aid, for a follower of Buddha! A white man has come into the passages—"

He flung himself on his knees be-

He flung himself on his knees be-fore the candles, knocking his shaven head against the floor. Gray halted in his tracks, peering into the shadows behind the candles. "Help me to seize the white man!"

chattered the traitor. "I am a faithful servant of Buddha. I have come to give warning. The white man forced me to lead him."

me to lead him."

One after another three Buddhist priests slipped from the shadows and stared at Delabar and Gray. The former was in a paroxysm of fear, his knees shaking, his hands plucking at his face. Gray, silently cursing the trick the other had played, watched the three priests. They had drawn long knives from their robes and paused by Delabar, as if waiting for orders.

orders.

The alarm had been given. Footsteps could be heard coming along the hall behind the candles. Gray was caught. In the brief silence he heard the deep-throated chant, echoing from a quarter he could not place.

Still the priests waited, the candle light gleaming from their white eyelight gray cast a calculating glance.

balls. Gray cast a calculating glance about the chamber. Two exits were available. The stairs, and the passage down which he had come. Which to take, he did not know. But he was not minded to be run down at the well in the dark in the dark.

# Trail's End for the Professor

A broad, bland face looked out from the corridor by the candles. He saw the silk robe and luminous, slant eyes of Wu Fang Chien.

"So Captain Gray has come to Sungan," the mandarin said calmly, in English. "I have been expecting him."

"I did not bring him," chattered Delabar. "I gave the alarm—"
Terror was in his broken words, Wu Fang Chien scrutinized the kneeling figure and his eyes hardened, "Who can trust the word of a mongrel?" he smiled, speaking in Chinese. "Slay the dog!"

Delabar screenmed and tried to struct the structure of the st

"Slay the dog!"
Delabar screamed, and tried to struggle to his feet. Two of the Buddhists stepped to his side and buried their weapons in his body. The scream ended in a choking gasp. Again the priests struck him with reddened knives.

He sank to the floor, his arms moving weakly in a widening pool of his own blood. Wu Fang Chien had not ceased to smile.

own blood. Wu Fang Chien had not ceased to smile.

Gray jerked out his automatic. He fired at the priests, the reports echoing thunderously in the confined space. Two of the Buddhists sank down upon the body of Delabar; the third wheeled wildly, coughing as he did so.

Gray laid the girkts of his gray.

wildly, coughing as he did so.

Gray laid the sights of his automatic coolly on Wu Fang Chien. The mandatin reached out swiftly. His wide sleeves swept against the candles, extinguishing them. Gray pressed the trigger and caught a glimpse of his foe's triumphant face by the flash that followed. Again he pulled the trigger.

A click was the only answer. The chamber of the weapon had been emp
(Continued on Page 17)

# Bringing a Giant to School

Teaching tricks to a giant is child's play compared to the problems met by the men who trained electricity to the service of mankind.

It took over a hundred years from the time Franklin first brought electricity from the clouds, before the electric light and power industry could make even its first crude beginning. But now, in less than half that time this industry has leaped from nothing to the service of sixteen million consumers.

The day in 1882, when Edison opened his first generating station in New York, marks the birth-day of electric light and power service. It was 1884 before electric motors could be bought. The transformer without which the range and usefulness of electric power would have been forever restricted was brought out in 1885 by William Stanley. In 1890 the first long distance power line was built in Colorado, and water power development became a practical possibility.

Since that time cheaper production and wider distribution have been the problems on which the in-dustry has concentrated. The steam and water turbine and the mercury boiler are making cheaper production possible. High power transmission lines and interconnection are daily broadening the territory served.

The task now engaging the best thought of the industry is electric service for the farmer. This is still the greatest problem of them all.

The Committee on the Relation of Elec-tricity to Agriculture is composed of econ-omists and engineers representing the U. S. Departments of Agriculture, Commerce and the Interior, American

# What We Owe to a Dutch Boy

BY F. D. FARRELL

BY F. D. FARRELL

ANY farm boys and girls have amused themselves by whirling a bucket full of water or milk in a circle, so the bucket was upside down part of the time, without spilling any of the liquid. Few of us, when we did this, knew just why it was that the water or milk remained in the bucket when the latter was upside down. The explanation was found by a Dutch boy.

Nearly 400 years ago this Dutch boy, whose name was Huygens, was sent to college to study law. He soon tired of the law and he changed his course, just as many modern college boys do, and decided to study physics. He liked that subject and he spent his life working at it. Huygens may seem remote to us now, but every time we use a cream separator we pay him unconscious tribute. He was the first man in the world, so far as we know, to understand certain laws of centrifugal force. It is this force that keeps the milk or water in the whirling bucket when the bucket is upside down. The rapid circular motion generates the force. This force is the essential thing about a cream separator. The whirling motion of the separator mechanism throws the heavier material—the milk—to the outside of the circle, where it is collected into the milk spout; while the lighter material—the cream—remains nearer the center of the circle, where it finds its way into the cream spout. Many other useful operations besides that of the cream separator depend on centrifugal force. It is one of the two essential things about the Eabcock test for butterfat, which, by the way, was invented by a college graduate named S. M. Bebcock. In purifying sugar, in certain seed cleaning processes, in the operation of some modern clothes washing machines, and in many other practical activities, we profit by the Dutch boy's work. People were unable to make much practical use of centrifugal force until the force came to be somewhat understood. It was Huygens who first gave to the-world a fair degree of understanding of this remarkable force.

Who has benefited more from Huygens's discoveries

AERMOTOR CO.

ditions it has proven itself to be a real self-oiling windmill and a most reliable pumping machine.

An Auto-Oiled Aermotor, when once properly erected, needs no further attention except the annual oiling. There are no bolts or nuts to work loose and no delicate parts to get out of order.

There are no untried features in the Auto-Oiled.

parts to get out of order.

There are no untried features in the Auto-Oiled Aermotor. The gears run in oil in the oil-tight, storm-proof gear case just as they did 10 years ago. Some refinements have been made, as experience has shown the possibility of improvement, but the original simplicity of design has been retained while greater perfection of operation has been achieved. The Aermotor is wonderfully efficient in the light winds, which are the prevailing ones. The self-oiled motor works with practically no friction, and the wind-wheel of the Aermotor is made to run in the lightest breeze. It is also amply strong to run safely in the strongest winds. In any condition of wind or weather you may be sure that the Auto-Oiled Aermotor will give you the best of service. It is made by the company which established the steel windmill business 38 years ago.

# 

A Self-Filling Fountain Pen

Here is a self-filling Fountain Pen with a 14-karat gold pen point that is just the thing for every day use. It is guaranteed by the manufacturer in the strongest kind of way. It has, a hard rubber barrel, fully cased, and with proper care should last for years. Only one action needed for filling. It is a pen you will be proud to own.

BIG REWARD OFFER—A Self-Filling Fountain Pen will be given FREE for a club of four one-year subscriptions to Capper's Farmer at 25c each, or three two-year at 50c.

for a club of four one-year subscriptions to Cappel 5 the three two-year at 50c CAPPER'S FARMER, TOPEKA, KANSAS each—just a \$1.00 club.

# Now Record Keeping Begins

# All Entries Should be Made by April 20, Except in Baby Chick Department

BY PHILIP ACKERMAN

EMBERS will find on every should be given. Do you remember the time you used to play games on the blackboard at school? You won some of the games, the other fellows won now and then, and the games that were not won by either of you were given to the "cat." When reports come in with your name on them, you get proper credit; likewise other club members get credit when their signed reports come in; but when no name is signed-they are not given to the "cat" -the manager looks first on the envelope that held the reports to see whether there is a return address for identification. If there is none, he then compares the handwriting to handwriting on letters and blanks received before. But you can easily see that your blank is not as certain to get proper credit without your name as it is with it. So sign all reports.

# How to Make Charges

Another thing I wish to call to your attention is the market prices to be charged for feeds. Pig club boys must report these market prices. For feeds such as skimmilk, pasture, table slop, and small potatoes the contest price also is the market price, and the contest price should be written in both contest price and market price columns. For such feeds as windfall apples, prepared pig chows, "tater peelin's," and other feeds not listed in the contest price list, count market price of such feeds in both columns.

You may be a member presenting proper recommendations, and the club manager may approve your member-ship in the Capper clubs. All the blanks sent to you by the manager may be filled, but unless you have a sow and are keeping records on that sow, or unless you have a small pen of chickens and are keeping records on them now, or will begin by April on them now, or will begin by April 20 or very soon after, you are not permitted to compete in the open contest of the pig department or the small pen department. Girls entering the baby chick department have until May 15 to make their entries. For this reason let me urge you to get your reason let me urge you to get your entry and begin record keeping now.

# Send More Names

County leaders, part of your success depends on the size of your club. Do not let the fellows who are active members but have no stock to enter, keep postpoping getting sows or chick-If you are a county leader and you have not sent in the name of a friend who you know is interested in the Capper club work, do it today. You can help your teammates who have no pigs or chickens by sending the club manager their names so he can make one more effort to find entries for them.

The pep race will be started in was born and reared at Douglass, has a leading part in the film. Miss Haver

carnest when county clubs hold "get a leading part in the film. Miss Haver acquainted" meetings. Then is when has often visited in Butler county

feed report blank sent to them the dust stirred up by those active unty. All information, address clubs. County leaders will and county. All information requested rapidly they can drive, and it will be should be given. Do you remember the a difficult proposition to tell who is going to be ahead at the end of each lap of the race. It will be a good idea to take a snapshot of the club members at the first meeting. Of course, you will want every member of your club represented in this picture. So you see it is of great importance to round up all the fellows and girls at this first meeting. Then when you this first meeting. Then when you have the picture, it will be well for the county leader to introduce the members of his team to the club manager by sending him a picture of the helpers who are going to ride with him to victory in the pep race, and who will push if the county motor car gets stuck in the mud. We will print the pictures of the teams in the club stories, and the first pictures to reach us will be the first ones printed in the Kansas Farmer and Mail & Breeze. The county leader should arrange

for this meeting. It will be well if it is held at the leader's home, unless one of the teammates is eager to have the first meeting. It will be almost impossible to give a program so the day should be given to games and planning for others to follow, and determining on a course of action for

Remember it isn't true that one lead-er will get all the prizes offered for pep. The leader winning first will get \$10 and the beautiful silver trophy cup on which will be engraved the names of all the winning club. The leader winning second will receive \$7; and the leaders holding third, fourth, and fifth places will receive \$6, \$5.50 and \$5, respectively. But the best and biggest prize the leader winning first will get is the pleasure and experience gained at the county meetings. I say this is the biggest prize because lead-ers who won in years previous to this all say, "The cup is nice but it isn't the biggest thing." Now, let us stop just a minute to think—happiness and experience, the biggest prize — every leader is entitled to this prize, so be on your guard to get your share.

# The Board of Regents

The board of regents which will govern the five state educational institutions after July 1 is composed of W. Y. Morgan, Hutchinson; Charles Harger, Abilene; C. W. Spencer, Sedan; C. ger, Abliene; C. W. Spencer, Sedan; C. B. Merriam, Topeka; George H. Hodges, Olathe; B. C. Culp, Beloit; W. J. Tod, Maple Hill; Earle W. Evans, Wichita; and Mrs. James S. Patrick,

# **Marching Sands**

(Continued from Page 15)

tied. And Gray had no more cartridges. He threw the useless automatic at the spot where Wu Fang Chien had been

spot where Wu Fang Chien had been and heard it strike against the stone. He had no means of knowing if he had hit the mandarin with his last shot. He suspected the trick of Wu Fang Chien had saved the latter's life. For a moment silence held the vault, a silence broken by the groans of the injured priests. The distant chant had ceased.

## Into a New Land

Gray turned and sought the stairs behind him. He had made up his mind to go forward, not back. He would not try to leave Sungan without Mary

He had marked the position of the steps, and stumbled full upon them in the dark. Up the stairs he scrambled, feeling his way. What lay before him he did not know.

he did not know.

A light appeared behind him. He heard footsteps echo in the vault. The glow showed he was at the top of the stairs. Into a passage he ran, It resembled the one that led from the well.

By the sounds behind him he guessed the priests were following him. Either Wu Fang Chien had decided Gray had taken to the stairs, or the mandarin was sending parties down both exits. The feel of the air as well as the continued coolness told Gray he was still underground. He ran forward at a venture. The passage gave into another vaulted room in which a fire gleamed in a brazier. The place was empty, but skins scattered around the brazier showed it had been occupied not long since. not long since

not long since.

Gray took the first opening that offered and ran on. Glancing over his shoulder, he saw the Buddhists emerge into the room. He quickened his pace. His pursuers had gained on him. Gray was picking his way blindly thru the labyrinth of passages. He blundered into a wall heavily, felt his way around a corner and was blinded by a sudden glare of lights.

Gray found himself standing in a lofty hall in which a multitude of men were seated.

His first impression was that he

lofty hall in which a multitude of men were seated.

His first impression was that he had come into the council of the Buddhist priests. His second was one of sheer surprise.

The hall evidently had been a temple at one time. A stone gallery ran around it, supported by heavy pillars. The embrasures that had once served as windows were blocked with timbers, thru which sand had sifted in and lay in heaps on the floor.

The temple was underground. Openings in the vaults of the ceiling let in a current of air which caused the candles around the walls to flicker. Directly in front of Gray was a dais. Around this, on ebony benches, an array of men were seated.

The floor between him and the dais was covered with seated forms. All were looking at him. On the platform was, not the figure of a god, but a massive chair of carved sandalwood. In this chair was seated an old man. A majestic form, clothed in a robe of lamb's wool which vied in whiteness with the beard that descended to the man's waist. Each sleeve of the robe was bound above the elbow by a broad circle. man's waist. Each sleeve of the robe was bound above the elbow by a broad circlet of gold. A chain of the same metal was about the man's throat.

# "A White Man"

"A White Man"

What struck Gray was the splendid physique of the elder in the chair. A fine head topped broad shoulders. A pair of dark eyes peered at him under tufted brows. High cheek bones stood out prominently in the pale skin. The figure and face were suggestive of power; yet the fire in the eyes bespoke unrest, even melancholy. The man addressed Gray at once, in a full voice that echoed thru the hall.

"Who comes," the voice said in broken Chinese, "to the assembly of the Wusun?"

Gray started. He glanced from the

the Wusun?"

Gray started. He glanced from the figure in the chair to the others. There were several hundred men in the room. All were dressed in sheepskin, and nankeen, with boots of horsehide or red morocco. The majority were bearded, but all showed the same light skin and well-shaped heads. They appeared spellbound at his coming.

Footsteps behind him told him that his pursuers were nearing the hall. Gray advanced thru the seated throng to the foot of the dais. They made way for him readily.

Mechanically Gray raised his hand in greeting to the man on the throne.

"A white man," he answered.
At that moment several of the Buddhist priests entered the hall. He saw Wu Fang Chien appear. At the sight there was a murmur from the throng. Gray was still breathing heavily from his run. He stared at the majes

there was a murmur from the throng.
Gray was still breathing heavily from his run. He stared at the majestic form on the dais. The Wusun!
That was the word the other had used. The word that Van Schaick had said came from the captive race itself.
He glanced at Wu Fang Chien. The Chinaman was different from these men—broader of face, with slant eyes and black hair. The eyes of the man in the chair were level, and his mustache and beard were full, even curling. He resembled the type of Mirai Khan, the Kirghiz, more than Wu Fang Chien.
So this was the secret of Sungan.

Khan, the Kirghiz, more than the Fang Chien.

So this was the secret of Sungan. So this was the secret of Sungan. Gray smiled grimly, thinking of how excellent health, and from present indications may live for a good many dications may live for a good many more years.

Hodernists will perhaps discover that the Garden of Eden scandal was really caused by an oil lease in Mesopotamia.

Gray was quick of wit, and this passed thru his mind instantly. He noticed another thing. Wu Fang Chien had left the other priests at the enfinds them so easily.

"Lulu's Well, Thank You

"Lulu," an old gray goose on the farm of Albert Matti of Cottonwood Falls, is more than 25 years old. She was given to Mrs. Matti a quarter of a century ago, and was several years old at that time. Ten years ago "Lulu" quit laying eggs, nor has she ever tried to sit since that time. In her old age she has become rather lazy, and when she is hungry she comes to the kitchen door at the Matti home, where she remains until she has her meal. A year ago when it became time to pick the flock of geese on the Matti farm, "Lulu" was plucked of her feathers for the first time since the Mattis had her. It gave her such a siege of rheumatism, however, that she will never be picked again. "Lulu" is in excellent health, and from present indications may live for a good many more years.

The white patch that never fails. Sticks instantly without fire. Becomes self-vulcanized (fused) by tire heat from driving. BEST FOR BAL-LOON TUBES, truck and all tubes, because e-lastic. Stretches with tire, can't tear out. 50c-Worth it. Las-Stik Co., Hamilton, Ohio

# FREE Motor Record and

Lubrication Guide

Regardless of how many different kinds of motor vehicles or machinery you own, there's a grade of Cities Service Lubricating Oil to meet the exact needs of each type. The regular use of the correct grades of this oil will keep things running smoothly and save you real money by reducing depreciation and repairs.

Also Cities Service Gasoline gives economical power in automobile, truck, tractor or gas engine. Cities Service Kerosene will be found very economical for use in oil stoves, lamps, etc., or tractor. Cities Service Oils are all "refined for service." Sold by Cities Service trucks, stations and dealers. It will PAY you to use them regularly.

# When Pigs Go to Market

When do you expect to get the present spring pig crop to market? There are two general methods of developing them into porkers—fattening on 100 pounds of gain. In the finishing a full feed of grain on pasture for period they ate 373.1 pounds of corn early fall markets or growing them on a limited grain ration with pasture, pounds of gain. followed by full feeding in the fall or

Which will you follow? There are advantages in both methods. The one you follow will depend on conditions in your county. Normally there is some strong argument in favor of rush-

tion and guesses available a hog shortage exists. Anything can happen to time honored customs and hog prices under conditions like that.

# Corn Supply is Short?

In a series of years the man who pushes his spring pigs from weaning to market time will hit the high market of fall. But whether he will desire to do that will depend on circumstances. The price of corn or other fattening grains plays an important part in this plan. Another advantage in the early fattening is that the spring litters interfere as little as possible with fall litters.

Now the fellow who desires to use

maximum of forage, a minimum of high priced grain and who prefers to hog down some corn will find the longer road to market better. Pre-sumably most farmers have sold or will sell most of their old corn. They will have on hand enough to carry their work stock and brood animals their work stock and brood animals over to the new crop, but not enough to carry on any extensive summer feeding operations. Will they be justified in buying high priced corn for making their pigs heavy enough to strike the normally high market of early fall?

Probably not under present circumstances. If the pig shortage is as real as it seems prices will remain fair all next fall. If the season is favorable for corn, with the acreage which farmers intend to plant, a big crop will be produced, and corn prices should be relatively lower than those of summer, altho market students contend that corn should pay well for some years to come.

But the new crop may be worth waiting for. In that case the wise farmer will make plans now for liberal pasture acreages. He will plant some rape, Sudan grass and cane. He will reserve some Sweet clover and alfalfa for hog grazing. He will give the young porkers just enough grain to keep them growing, and will develop big thrifty frames that will take on fat in a hurry when the new corn becomes available.

# Barley Saves 60 Days

Of course there is one loophole for the fellow who desires to fatten his hogs before fall grains are available, and who does not desire to feed corn of 1924 vintage. That is barley. He can plant it this spring, and it will be ready almost 60 days before new corn That is time enough to put about 100 pounds on a 125-pound shote.

There may be still another advant-

rurane University has conducted 200,000 head. Native stock and resome tests on these two methods of finishing spring pigs. Seven trials stantly during the year, supplement were made from 1920 to 1923 inclusive these numbers considerably. The anon the longer method. The average nual marketings from these 15 couninitial weights for all trials were 62 ties for the last three years have been to 74 pounds. During the pasture 1922, 418,000 head; 1923, 440,000 head; period the pigs gained 0.72 pound a 1924, 385,000 head.

head daily, and during the dry lot fattening period they made 2.38 pounds a head daily. During the growing period they consumed 256.1 pounds of corn and 14.9 pounds of tankage for

During the pasture season before September 25, a period of about 12 weeks, the percentage corn consump-tion was 32 for all trials. That left 68 per cent for the dry lot period after September 25, about five weeks.

A comparison of the feed consumed ing them right thru to desirable in seven trials by the two methods market weights, say 200 to 225 pounds, indicates that 330.9 pounds of corn just as soon as possible. That re- and 25.3 pounds of tankage were requires a maximum of high priced quired for 100 pounds of gain by the grain, but it usually gets the pigs to full-fed, short method, and 324.5 market before the general fall run pounds corn and 17.2 pounds of tankand the consequent drop in prices. age were required for 100 pounds of Also it requires pigs farrowed early, gain by the longer, limited-grain say in March, so they can be fitted by August or September. Early pigs required facilities for taking care of them period, the returns during the years to wave third mortality and structure. to prevent high mortality and stunting.

Normally the best hog prices obtain aged higher because the short-red nose in July, August and September. The reached market during the higher lowest are in November, December and lowest are in November and lowest

# What's Under the County?

Folks in Clark county are becoming suspicious. Some oil boys drilled a well that is down almost a mile, and from the way the bit smokes and from the fumes that escape from the hole, a few of the residents are becoming alarmed.
At any rate the Geological Survey is

to send scientists out there to take temperature readings. It is told in the physical geography books that tem-peratures become 1 degree warmer for every 60 feet of depth. Somebody has figured if that is true and if the Clark county average temperature is 70 degrees, the bit must be at the 156-degree level by this time.

The drillers apparently are seeking oil. They encountered traces of both petroleum and gas at 4,800 feet. They may find some more, but if the aforementioned temperature increases pre-vail at greater depths, the oil may be rather warm when they find it.

# Beef, and Flint Hills

The Flint Hills pastures are in excellent condition—better than a year ago. They are practically all rented; on April 1 reports to the Kansas State Board of Agriculture indicated that 81 per cent of 'em were filled, as compared to 60 per cent on the same date

a year ago.

Lease prices this spring have averaged slightly higher than a year ago.

Aged steers and cows have been contracted for the season at from \$7 to \$10 a head, with the average about \$8.50. Prices for young cattle, particularly heifers, have ranged from \$5 to 88, with the average about \$6.25. The range in lease contracts is rather wide, due to quality of pasture, character of animals to be grazed and size of leaseholds obtainable. Some leases carry a guarantee as to acreage a head. These guarantees run about the same this year as for former seasons; an average for the whole of the district of about 4.3 acres for steers, 4.5 acres for cows and 3.25 acres for young stuff. The guarantee varies considerably according to the quality of the grass in different sections.

There is a fairly large holding of

native stock and feeder purchases that have been wintered on rough forage already in the Flint Hills district ready for grazing as soon as grass starts. Grass will not be abundant much before the last week of April.

The distinctive spring movement into these Flint Hills pastures during April and May varies in different years from 180,000 to 210,000 head. Checking from railroad receipts in the There may be still another advantage this year in the long finishing plan. The shortage of hogs will leave 15 counties, all or portions of which a surplus of corn. It may or may not comprise the Flint Hills district, it is shown that the receipts in 1922 during be enough to reduce prices sharply. Shown that the receipts in 1922 during If it should be then the man who has April and May amounted to 211,000 his spring pigs on hand will have a head; in 1923, 170,000 head; in 1924, better market for a portion of his crop than he can find at the elevator.

Purdue University has conducted 200,000 head. Native stock and respectively.

The John Deere-Dain Left-Hand Side-Delivery Rake is the only tool needed for air-curing hay according to the John Deere-Dain System (Nature's way). The curved teeth handle the hay gently, coil it in loose windrows and lay it on clean stubble, with the butts outside. The foliage, which contains 60 per cent of the nutrients, is inside, protected from the sun's rays. The color and feeding value are preserved, resulting in an excellent quality of hay that brings the high prices on the market.

# JOHN DEERE-DAIN SYSTEM RAKE Has Curved Teeth

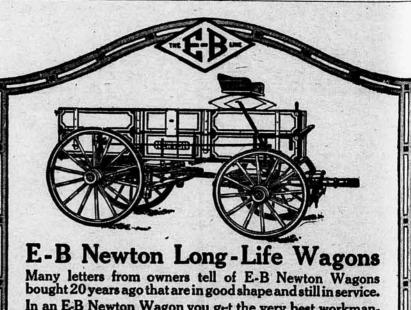

The inclined frame is highest at the point where the volume of hay is largest, giving the rake almost unlimited capacity.

Every adjustment is made from the seat. One lever raises teeth; another adjusts the angle of the teeth. No clutch.

Wheel can be set in on axle for turn-ing windrows half over in case of rain.

While many hay-growers are sacrificing big profits each year through improper curing and handling of their hay, others are profiting by using the John Deere-Dain Way of Air-Curing.

Bold by John Deere dealers. Write for literature. Address John Deere, Moline, Ill., and ask for Booklet RH-411. THE TRADE MARK OF QUALITY MADE FAMOUS BY GOOD IMPLEMENT

In an E-B Newton Wagon you get the very best workmanship and material—selected oak and hickory heavily ironed and braced, with every known improvement. They are light, easy running and famous for many years of hard service. Wheels track accurately on plumb spokes; rims are centered on hubs; the load is carried on all spokes. Wheels, gears, axles,

skeins and box are all built unusually strong to give sturdy service. That is why E-B Newton Wagons "talk under the load" and have such a widespread reputation for quality. Be sure your next wagon is an E-B Newton. Get our free booklet describing E-B Newton Wagons. And remember-

# Kansas Seed Corn Best

Kansas seed corn grown in the locality in which it is to be planted is best. Every spring farmers go in search of a wonder variety that will solve their yield problems. The seed they buy may be a great producer in the territory from which it came, but it may not be adapted to conditions in their localities.

not be adapted to conditions in their localities.

After long years of experimenting certain varieties have been developed for different soil and climatic conditions in the state. These are known. H. R. Sumner, Kansas State Agricultural College, mentions the few that have proved best for the different sections:

have proved best for the different sections:

Pride of Saline is one adapted variety which heads the list in most sections of Kansas. Other well adapted varieties are Freed's White Dent, Midland Yellow Dent, Commercial White and Reid's Yellow Dent.

Pride of Saline has won the reputation of being a good yielder in poor corn years, and a high producer when conditions are favorable. It is adapted to all sections of Kansas except the extreme western and northwestern parts. In Southeastern Kansas Midland Yellow, Dent and Commercial White have a definite place on the more fertile and bottom soils. From the Kaw River Valley northward, lying east of Manhattan, Shawnee White probably is a superior variety on rich bottom land. The fact remains, however, that Pride of Saline is the variety which can be recommended for most general distribution.

A large number of corn variety tests

A large number of corn variety tests conducted by the agricultural college in nearly all sections of Kansas definitely proves the superiority of Pride of Saline. In these experiments it has consistently yielded from 3 to 5 bushels more than the commonly grown corn varieties. This hardy white dent variety was developed by C. H. Kellogg of Russell county from a locally grown white variety of unknown origin. In 1904 the Fort Hays Experiment Station obtained some seed from Mr. Kellogg to compare with others grown commonly. A large number of corn variety tests commonly

ommonly.

Pride of Saline is a medium sized leafy variety which matures in 115 to 120 days. It has not been selected for any particular type of plant or ear, and probably for that reason it cannot be considered a show corn.

# Hindenburg's Candidacy

Germany's monarchists, militarists and industrialists in their desperation following decisive defeat in the election of March 28 have chosen a popular canof March 28 have chosen a popular candidate, in General Hindenburg, whose conduct since the war has commended him, in contrast to Ludendorff and other irreconcilables. His age and his comparative inactivity in politics hardly single him out as a likely candidate, and it is the general personal regard for him that the reactionary parties look to in drafting him for this election.

election.

There is nothing in the March vote, however, to suggest much hope for the monarchist faction. Standing alone it would evidently be in the also-ran class. The leading candidate in the March polls, Jarres, while consolidating the reactionary elements, is himself committed to the republic. And all the conservative candidates together sooled but 11,600,000 votes. Against them Braun, the Socialist candidate, and Marx, Center party, alone rolled up 11,670,000. But besides these candidates were Hellpach, the Democrat, with 1½ million and Thaelmann, Communist, with 1,870,000.

dates were Hellpach, the Democrat, with 1½ million and Thaelmann, Communist, with 1,870,000.

The new line-up is headed by Marx for the liberal or Democratic-Republican parties and Hindenburg for the conservatives. In this situation the Communists could, if without a ticket of indir own, by swinging to Hindenburg, make him a formidable contender, or even give him the election. In a sense Communists and monarchists have the same fascist psychology. They are for strong-arm rule, and German Communists might favor Hindenburg to defeat the republic. The trend of Communists will be watched as significant between now and the election, but if it appears to be toward the Hindenburg bloc there will logically be a strong drift of other elements to Marx. The Communists in a subscione is the same candidate as in March. If they support it there is nothing in the March vote to indicate much hope for the candidacy of Hindenburg.

In fact there is every indication that the extremists in Germany are done for and the republic, the Dawes settlement and an era of peace appeal to the German people. These are the things Dr. Marx, the middle-of-the-road candidate, stands for. He has been tried in public office, as Hindenburg never has been, and is described as a man of something the same simplicity and di-rectness of character as the late Pres-ident Ebert, with abilities of a higher order and a wider experience.

CARBOLA CHEMICAL CO., Inc. 333 Ely Avenue Long Island City, N. Y.

# May Will Bring Music Week

URAL communities and small towns are expected to form one of the strongest links in the chain of National Music Week which is to be observed again thruout the country on May 3 to 9. Churches, schools, musical societies, women's clubs, boys' and girls' clubs and farm groups of all kinds—organizations directly con-

cerned with music, and those not rectly concerned but understanding its importance-are to contribute. Each in its own way will add to the joint effort to impress upon the public what music can do as a comfort, a stimulus, a nerve-stendying force and companion to man in his work

and play, in his home and in the social unit. Practical suggestions for all such groups are found in the folder "National Music Week in the Rural Community or Small City" to be obtained without charge from the National Music Week Committee, 45 West 45th Street, New York City. From the same source may be obtained "National Music Week Committee, Week Committee, Week City. Music Week Suggestions for Churches" and "Special Activities for Schools."

# Gardening Claims Our Attention Just Now

By Mrs. Dora L. Thompson

THE gentle rain of April was needed to start our early gardens. Most gardens were planted but the ground was generally too dry to sprout the seeds. Some who failed to find all of their onions at pulling time last fall have had unusually early green onions from them.

A bed of rhubarb that shows unusual growth has a bottomless pail or keg over each hill. This is an excellent "forcing" scheme. The keg holds the heat and moisture and the plant grows in an exfort to reach the light.

# **Custom Hatching**

An unusual number of flock owners have sent eggs to hatcheries to be hatched. The charge, as a rule, is 4 cents an egg. This, many prefer to pay rather than bother with an incubator. Several farm women who are having eggs hatched in this manner set a few hens at the same time and have them ready to mother the brood. So long as eggs and feed are both high in price, fewer chicks will be hatched than usual.

# How Disease is Carried

A Kansas reader writes that her neighbors have lost many chickens from disease. These they leave lying around for dogs to carry to nearby farms, As a result her flock has become afflicted with the same disease. She asks if there is not a law to prevent such neglect. We asked Tom McNeal for information and he replied as follows:

"I think perhaps Section 1209 of Chapter 21 might be broad enough to cover the case of which you speak. This section of the statutes reads as follows: 'Any person or persons who shall put any dead animals, carcasses of such animals or domes-tic fowl or any part thereof into any well, spring, brook, branch, river, creek, pond, road, street, alley, lane, lot, field, meadow or common, or if the owner or owners thereof shall knowingly permit the same to remain in any of the aforesaid places to the injury of the health or to the annoyance or damage to the citizens of this state or any of them, every person so offending shall upon conviction thereof be fined in a sum not exceeding \$100; and every 24 hours the owner shall permit the same to remain thereafter shall be deemed an additional offense." This is a law that should

# "Keep Your Chin Up!"

YEARS ago I determined I was not going to be a round-shouldered old lady—barring accident or sickness which of course might fall to the lot of any one of us. I've lived on a farm all of my life and have helped out on every job from driving a two-way plow to running a grain binder, raising poultry and helping with the milking and chores besides caring for my family, so I have had a good opportunity to become round shouldered. But

good opportunity to become round shouldered. But now at 42, I still "hold my chin high."
You who did the Indian club "stunts" in the early nineties, or used dumb bells, should try them now, or stoop and touch the floor without bending the knees occasionally. It will surprise one oftentimes how old and stiff she is becoming. You may think you get avarage annually says have been supported to the control of the may think you get exercise enough now, but you

will find muscles in your "daily dozen" that you had forgotten you possessed.

Just two don'ts will keep you straight. Don't Just two don'ts will keep you straight. Don't hump forward when carrying a heavy pail or other load. Your spine can hold up more when straight than curved, and if you can't straighten with a load, don't carry it. Then, don't let your head go faster than your feet when hastening from one task to another. And keep your chin up! Delta Co., Colorado. Mrs. J. S. G.

# My Holders are Handy

HAD the habit of lifting hot pans and the like from the stove with the corner of my apron or a dish towel until I fastened a long cord on a holder and pinned it to the waist-band of my apron with a safety pin. Now my holder always is handy and I use it to the conservation of my aprons and dish towels. aprons and dish towels.

Mrs. Wiley Howell.

# A Reader Recommends This

Wall paper in the farm home, altho in good condition, becomes smoked and dingy thru the winter. For this reason, farmers often repaper every spring. We don't do this any more since we have discovered a home cleaner that cleans and brightens the paper until it looks fresh and new. It has saved us a good many dollars and our neighbors have made use of it too.

This is the way we make the cleaner. Use 10 cents' worth of oil of sassafras, 10 cents' worth of ammonia and add to this a quart of cold water. Stir in enough flour to make a thick batter. Cook in a double boiler or set a pail in a kettle of boiling water, stirring often to prevent burning. Cover and stand aside until you have swept the walls. Cover the broom with a cloth as this will save dough and time.

Pinch off a generous handful of the dough. If it is a bit sticky lay on a paper and work in

# April

OH, FOLD up the morning paper— Who cares for the news of town? But—what are the violets doing? Has the jonquil made her gown To wear thru the gay spring hours So mindful of her looks? Come, give me the news of the flowers, The grass and the trees and the brooks. -Louise Morgan Sill.

some dry flour. Use this piece until it is worn out. some dry flour. Use this piece until it is worn out. It can be swept up as easily as sawdust and won't injure the rug. Go over the walls in long, even strokes. If not satisfied with the first job repeat with fresh dough. It doesn't take long and you will be well pleased with the result.

Nance Co., Nebraska. Mrs. M. A. Cunningham.

# Bran Absorbs the Juice

THE rhubarb pie season is approaching. With such juicy fruit for the filling, it is not easy to keep the under crust from soaking. Line the pan with pastry and sprinkle a layer of bran over it, then add the fruit and sugar. Put on the top crust and bake, using a hot oven for 5 minutes, then a slower one for the remaining time of baking. The bran will absorb the surplus juice and keep the bottom crust in good condition. Berry pies and tarts may be treated in this same way. The bran will prevent the juice from boiling over and making a sticky oven.

# A Touch of Blue and Gold

IF YOU haven't much room or much time to devote to a garden, and want a flower bed that will be bright and attractive, plant one like mine. It practically will take care of itself from year to year. As a background, I planted a row of red sunflowers. Then I planted a row of kochia, commonly known as cypress vine. Next is a row of dark blue cornflower in front of which is a row or two of golden coreopsis. A border about 12 inches wide of sweet alyssum is a very dainty and effective outline for the whole.

All of these flowers are self sowing so the bed will come up year afte for the coreopsis, use the California poppy. It is very bright and blooms profusely. Mrs. O. A. Budd.

# Bits of Home Philosophy

IF FINELY varnished surfaces are scratched, the damage may be remedied by rubbing lightly with alcohol to soften the varnish and obscure the crack. When the varnish hardens again, polish and the scratch never will show.

Plenty of rod3 and hangers in the clothes closet

save space and prevent wrinkles.

An occasional well-placed mirror adds space and light to living room or hall.

Reflectors behind wall lamps and lights help in

throwing light where it is most needed.

In the model kitchen, narrow shelves often are better for economizing space than wide ones. They also are easier to keep clean and in order. Low cupboards are preferable to very high ones as there is less temptation to use them as "catch-alls."

# Sermons in Sentences

IT IS not work that kills men, it is worry. Work is healthful; you scarcely can put more upon a man than he can bear. Worry is rust upon the blade. It is not the revolution that destroys machinery, but the friction. Fear secretes acid; but love and trust are sweet juices.—Beecher.

Three maxims for success? I would suggest thinking, working and economizing.—E. B. Butler. Amusements should be truly profitable and help.

Amusements should be truly profitable and helpful, promoting good fellowship, physical develop-ment, love of clean life and knowledge of nature and man.-Robert E. Speer.

"Sow an act, reap a habit; sow a habit, reap a character; sow a character, reap a destiny."

Planting corn and expecting beans isn't half as

foolish as sowing selfishness and expecting hap-

# Puddings From Left-Overs

WE LIKE pudding made from left-over cereals. This is my recipe for preparing it. Use 2 cups cooked cereal, 4 eggs, 1 cup sugar, ½ cup raisins, 4 cups rich milk, 1 teaspoon cinnamon or ½ teaspoon nutmeg and 1 teaspoon vanilla. Beat the cereal until smooth. Add eggs, sugar and flavoring and beat. Then stir in the milk and raisins ing and beat. Then stir in the milk and raisins and pour into a buttered baking dish. Bake until browned on top. This makes a large serving for eight persons.

Mrs. Nate Williams. eight persons.
Phillips Co., Colorado.

# Our Favorite is Lemon Pie

By Nell B. Nichols

ARE you going to attend a pie social? If you are, I'm certain you'll like this recipe for fluffy lemon pie. It will make a dessert for your table, too, that won't have to be thrown away. table, too, that won't have to be thrown away.

Beat 3 egg yolks until light and lemon-colored and gradually beat into them 1 cup sugar. Cook this over water until very thick. Cool. When cold add ¼ cup lemon juice and the grated rind of 1 lemon. Whip the egg whites (3) until very stiff and gradually fold in the lemon mixture. Bits in a gradually fold in the lemon mixture. Pile in a previously baked pastry shell and set in a slow oven. Brown the filling neatly.

# A Treatise on Matronly Fashions and Frills

By Hallie Hayden Jenkins

THE woman of matronly figure is indeed wise in choosing pattern No. 2044 for her early summer dress, be the material she uses linen, gingham or silk. Coat dresses are smart and they slen-derize the woman who wears them. A pattern of this sort must, of course, be chosen large enough, for it must hang straight and not dip in and dip out as it encompasses the figure at bust, waist and hips. The sleeves I have sketched are the ones banded into a cuff. It breaks the monotony of the dress somewhat to have them cuffed. tho they may, if you choose, be left open and straight.

This dress is plain at the back and at the front. Narrow ties of self-material adjust it to the proper contour at either side. The long, lovely line of

the collar adds inches to wearer's height. may be made either of the dress fabric or may be of another material, but I would not advise a striking contrast in color. The little vestee is a bit of bother to adjust, but it adds so much freshness to the appearance that it is well worth the trouble. Make it of pin-tucked organdie with a tiny, tiny frill of lace, or of white pique hemstitched in the color of the dress, or of a dainty georgette that just matches in tone the garment with which it is worn. These purely feminine frills add to womanly charm. Pattern No. 2044 may be

am inclined to have large pores on my e, particularly on my nose. I've tried teral remedies, but the pores continue to as large as ever. Is there anything that a recommend for them?—Miss L. D.

be as large as ever. Is there anything that you recommend for them?—Miss L. D.

First of all, cut down on sweets and greasy foods, and eat plenty of vegetables, especially fresh ones. Next, always wash your face carefully, and after soaping it, be sure to rinse it thoroly with cold water. If you have ice, rub the face with it, and then dry thoroly. Be careful to cleanse your face every night before retiring, and then be equally careful in selecting your creams and powders. A good astringent used faithfully, will help, also. There are a number of remedies prepared especially for enlarged pores, the names of which I will be glad to send on receipt of a stamped, self-addressed envelope.

# That's Poor Legislation

BY DR. CHARLES H. LERRIGO

rural health was able to get them to match it. So for five years Kansas had \$20,000 a year to spend in promot-ing the health of its rural population, and it was well spent.

No one seems to know just why the last legislature cut this item from the state board of health budget. It was approved by the ways and means committees of both houses. But some economical senator managed to kill it, and thereby destroy a very fine piece of work that was costing the state only work that was costing the state only half of the actual cash expenditure, was all spent in the state, and was do-

ing infinite good.

I hope that the commissioners of Lyon, McPherson, Geary, Marion and Ottawa counties, who are hit the hardest by this piece of false economy, will manage to keep their county health units going in some way. The mischief that can be done by a single senator or representative who runs amuck is frightful. I for one am ready to new frightful. I, for one, am ready to pay more attention to the suggestions of my friend Tom McNeal on "how to provide a sane legislature."

ever been gathered together in the history of the world." Harlem is a colored city larger than Dallas or Memphis. Beginning at 125th street on Seventh Avenue "the population suddenly darkens, and thru 25 solid blocks the passersby, the shoppers, those sitting in restaurants, coming out of theaters, standing in doorways and looking out of windows are all negroes," tho the character of the streets and buildings has not changed. These colored residents own 60 million dollars' worth of property in Harlem. After these 25 blocks the population as suddenly be-

Please tell me the symptoms of high sas farmers became somewhat involved to the subject of the colored race in blood pressure. Can it be cured? I am 55 in debt. They needed credit, especially America. The negro, it is said, is thru I have a pain back of my left ear, and in the year before the crops of 1924 with all social panaceas and nostrums

began to move, Mr. Quinlan knew this as a solution of his "problem"—emandard of Indiana does only a cash business. He fought for a suspension of this order, and won. Credit to the solve his problem. The creed of the amount of \$1,100,000 was extended. These accounts are now practically all wiped from the books. Collection was easy.

"The fact that most of the officials came from farms helped greatly in getting them to agree to extend credit," says Quinlan. "They realized the seriousness of the problem confronting the wheat grower, and past experience has proved that the Kansas farmer is

as a solution of his "problem"—emancipation, education, money, or any other. "He still believes in them, but not in blind trust that they alone will solve his problem. The creed of the solve his problem. The creed of the solve his problem. The belief in race co-operation. This deep feeling of race is at present the mainspring of negro life." To make the best of their opportunities they believe in getting together, combining their resources and there is a steady demand for colored labor from colored employers.

Foland Prefers the Farm began to move. Mr. Quinlan knew this as a solution of his "problem"-eman-

# Foland Prefers the Farm

From the Almena Plaindealer:

A year ago Floyd Foland and family A year ago Floyd Foland and family turned their backs on the bright lights of the city and moved to a farm north of town. Floyd was convinced after a thoro trial that life in town is not what it is cracked up to be. The uncertainty of steady employment at a satisfactory ways coupled with the satisfactory wage, coupled with the high cost of living in town where everything, including milk and eggs, must be purchased, is enough to discourage the stoutest heart. So Floyd decided to join the "back to the farm" movement. When he started for the farm he had to buy everything, horses, machinery, a cow and some hens, and went in debt for all this equipment.

Not long ago he finished husking his corn crop, which yielded 1,600 bushels. And corn has been worth around a dollar a bushel or better, at which price he sold a portion of his crop. He is now out of debt, has 10 head of cows and over 200 chickens. These will make a living for the family whether it rains or snows. Floyd says his wife is entitled to no small credit for her part in making this excellent showing. She helped gather the corn and no doubt raised the chickens. A good help-mate on the farm is necessary for the best success. The Plaindealer rejoices with its readers when they are successful, and congratulates Mr. and Mrs. Foland on their good fortune.

An American author now in London has told a newspaper representative In the lean agricultural years Kan-sas farmers became somewhat involved to the subject of the colored race in net a number of golfers who don't seem to have the courage to be quite so frank about it.

No Joque

Congressman Guy Hardy of Colorado has a faded old clipping in his possession about the difficulties of a ploneer newspaper out in his country, which reads: "We begin the publica-tion ov the Roccay Mountain Cyclone with some phew diphphiculties in the way. The type phounder phrom whom we bought our outphit phor this printing ophphice phaled to supply us with any ephs or cays, and it will be phour or phive weex bephore we can get any. The mistaque was not phound out till a day or two ago. We have ordered the missing letters, and will have to get along without them till they come. We don't lique the loox ov this variety ov spelling any better than our readers, but mistax will happen in the best regulated phamilies, and iph the ph's and c's and x's and q's hold out we shall ceep (sound the c hard) the Cyclone whirling aphter a phasion till the sorts arrive. It is no joque to us—it's a serious aphair."

# All Set

The prisoner was not professionally represented. Before proceeding with the case, the judge said:
"This is a very serious offense you

are charged with. If you are convicted washed away?" it means a long term of imprisonment. Have you no counsel to look after your 'defense?"

The prisoner in the most confidential manner leaned toward the judge and replied:

"No, your honor, I have no counsel; but I have some very good friends on the jury."

cided trend in that direction in recent years. Women teachers probably have always preponderated in our public schools, at least for 50 or 60 years, but the latest figures indicate, notwith-standing a great increase in salaries, that public school teaching tends to become a woman's profession. Kansas keeps in line with the common trend.

In 1880, the census reports, men and women teachers were nearly equal in momen, the percentage of male being one spring morning, a long time ago, 42.8. There was a steady relative inacrease in women teachers, however, up of the editor of the Dally Sunflower 10 1920, by which time the percentage of male teachers had fallen to but 14.1. another reporter," she said, "and I'd the latest figures, for 1922, give the like you to try out my girl. ANY ONE of these books alone is a veritable treasure house of the newest, most beautiful designs. The five books combined form a complete library in which you will find any pattern in crocheting and tatting you could possibly ask for. You will fairly revel in the many handsome designs shown. There are edgings, beadings, insertions and laces for every conceivable use. The illustrations are actual photographs of the finished work and show every thread so plainly that they are almost as good to work from as the directions themselves. The directions are adapted for either beginner or expert. They tell stitch by stitch how each pattern is worked, also the quantity and size of material required and the correct sizes of hooks to be used.

FREE OFFER We will send all five of these books postage prepaid, for each—50c in subscriptions. Your own new or renewal subscription will count as one. The other subscription may be your friend's or neighbor's. Order today. Our supply is limited.

CAPPER'S FARMER.

Dept. 5B,

TOPEKA, KANSAS

Now what did he mean? That doesn't hogs when prices are low or corn is sound like legislation, tariff, taxes or any other exterior remedy that has been suggested. It appears to be something the forms the forms are to be something the forms are to

things which are constantly luring his brothers away from a good balanced

The sizes up the situation about like the merchants on Kansas, Minnesota or Douglas Avenues. Nobody ever runs a rubber boot store, or a soap store, a rug shop or a rolled oats retail rarely be a time when he does not hit a good market on one or more of them.

popular because washing machines do the work better. Maybe they make money on red calico this season and next on purple socks. They don't kick out standard lines which fail to make money occasionally. They don't jump out standard lines which fail to make money occasionally. They don't jump from one thing to another. They decide how many departments they are going to have, and usually they will all for \$2; or one three-year subscription, \$2.—Advertisement. ize. Sometimes they don't practice per-sistent moderation, but usually they do, else they wouldn't stay in business.

The well managed farm is like a department store. It handles a number of lines of goods. If it specializes in wheat there will come a time when the crop fails or when folks will get their wheat elsewhere. If it special-izes in beef there will come a time when folks may prefer to eat pork. If it grows corn alone a time will come when it will be without revenue. And so it is with any single crop or pro-

Department Store Farming

Persistent moderation—that's what farming needs. At least F. D. Farrell, the new president of the Kansas State his neighbors have sold, will plant too Agricultural College, picked these words to express his remedy for a big proportion of farm troubles.

Now what did he mean? That doesn't hogs when prices are low or corn is

been suggested. It appears to be something the farmer can concoct at home thing the farmer can concoct at home and swallow without water.

That isn't persistent moderation. What President Farrell meant was a farm with well proportioned acreages. that the farmer refuses to go hog wild about hogs, wheat, corn, grain ture. Then some dairy cows, a few things which are constantly lived to the corn, grain ture. try and maybe a small flock of sheep consume the feeds grown in the

or Douglas Avenues. Nobody ever runs a rubber boot store, or a soap store, or a rolled oats retail or a rug shop or a rolled oats retail rarely be a time when he does not hit establishment. If a restaurant served a good market on one or more of them only ground wheat or ham or eggs or apple sauce it would make money if eration is the one who nad some corn all the folks in its trade territory and wheat to sell last year. He will wanted ground wheat, ham, eggs or apple sauce, but it wouldn't meet expenses when or if folks ate something penses when or if folks are something else.

Department stores handle a good many lines that don't pay. Sometimes they get loaded up on red neckties when folks want some other color, or maybe tubs and washboards aren't popular because washing machine.

Persistent moderation means merely insurance. It is a safe plan.

More soybeans will be planted in Kansas this year. Farmers are just beginning to appreciate them. In the past some disparaging remarks have been made about the quality of soybeans as a protein supplement for pigs. Experimenters decided that proteins of vegetable origin, including those housed in the lowly soybean, were not equal in gain production to those of animal origin such as would be found connection with the American Royal animal origin such as would be found in tankage, meat meal, milk and the

So far as they went the experiment-ers did well, but the trouble has since been discovered to be not in the protein but in the mineral content of the seeds. "Put some mineral with the soybeans and they can be substituted for tankage," said J. S. Hughes, nutrition specialist for the Kansas State Agricultural College.

Now comes one C. M. Vestal, Purdue University, over in Indiana, and re-ports some further results he has obtained from feeding soybeans. He lists the discoveries about soybeans for pigs

He put 108-pound pigs on self-feeders and increased their weights to 233 ounds. Corn and soybean produced 1.57 pound gain daily on each pig. Corn and soybeans required for 100 pounds gain was 371 and 46 pounds respectively. At the same time corn and tankage fed hogs required 359 and 32 pounds of the two feeds respectively. to make 100 pounds of gain, and they increased at the rate of 1.84 pound a head a day. The mineral mixture prehead a day. The mineral mixture pre-scribed in the foregoing list added to the corn and soybean ration gave a daily gain a head of 1.89 pound.

This lot of pigs gained 100 pounds on 327 pounds of corn, 55 pounds of soybeans and 6 pounds of the mineral mixture. With corn at 84 cents, soybeans at \$1.25 a bushel and mineral at 2 cents a pound this lot made gains at a feed cost of \$6.18 a hundred, the lowest of any groups, including corn and soybean oilmeal, corn, soybean oil-meal and mineral; corn and tankage; and corn, tankage and mineral. Altho and corn, tankage and mineral. Altho the pigs in this lot ate 55 pounds of soy-beans in making a hundred pounds of gain, they cut their corn consumption 32 pounds below the corn and tankage group. They made 0.01 pound more group. They made 0.01 pound more daily gain a head than the corn, tank-

age and mineral group.

Mr. Vestal figures the soybeans with the mineral, on the basis of gains acquired, are worth \$1.52 a bushel. Without the mineral they did not, at \$1.12 a bushel repay their soylean cost of bushel, repay their soybean cost of \$1.25 a bushel. Now if you feel that you can grow soybeans for \$1.25 to \$1.50 a bushel, hop to it. Your pigs if given given a homemade mineral mixture such as he suggests will provide a

Soybeans can be grown alone or in yield somewhat, but you can grow jazz utterance.

Growing Pig Dessert

Soybeans top a pig's dinner off just right. They are to a porker just what ice cream or plum pudding is to a boy. But the pig and the boy will both begin and end on the dessert if that is permitted!

More soybeans will be planted in Kansas this year. Farmers are just may be harvested, threshed and fed

Proposals for a dairy cattle show in connection with the American Royal at Kansas City next fall have been made by different factors of the dairy industry. A conference was held recently between the livestock show man-agement and the dairy representatives. C. J. Tucker, manager of the Long-view Jersey herd; George W. Catts, agricultural commissioner for the Kansas City Chamber of Commerce; and business men who are interested in dairy development were among those who presented the plan for a bigger Royal.

If the proposal is adopted, increased facilities will need to be provided in the building now being reconstructed.

the building now being reconstructed. Last year the beef cattle, hogs, sheep and horses just about filled the availthe discoveries about soybeans for pigs as follows:

1. Fattening hogs eat whole soybeans as readily as ground soybeans, and gain equally well on them.

2. It pays to feed a good mineral mixture where soybeans are used in hog rations.

3. Ten pounds wood ashes, 10 pounds of 16% acid phosphate (fertilizer) and 1 pound common salt is a good mineral mixture to use with soybean-mineral ration is most effective when fed to fattening hogs.

5. A convenient and practical way to feed the corn-soybean-mineral ration to fattening hogs is free choice in the self-feeder.

6. Soybeans and corn fed with mineral to fattening hogs are practically equal to tankage and corn in producing rapid and economical gains.

7. One bushel of soybeans and 5 to 1 pounds of pork, while it requires 10 or more bushels of corn in dry lots will produce 100 pounds of pork, while it requires 100 romore bushels of corn alone to make 100 pounds of pork, while it requires produced by sows fed on a corn-soybean-mineral ration.

9. Strong, healthy pigs are produced by soybean sare hogged down with corn.

9. Strong, healthy pigs are produced by soybean of mineral mixture, but is not superior when the mineral mixture is used with both feeds.

He put 108-pound pigs on self-feeders and horses just about filled the available space. The addition of a dairy cattle show will require greater facilities. The American Royal building was destroyed by the fire which originate and to pounds of the automobile show some months ago. The dairy interests presented their proposal so that arrangements could be made for the bigger show in the reconstruction program.

In addition to the dairy show, a soil products exposition has been proposed for the Royal. This would take the place of the International Soil Propounds of pork, while it requires produced by sows fed on a corn-soybean-mineral ration.

10. Soybean oilment is superior to soybeans without the mineral mixture is used with both feeds.

He put 108-pound pigs on self-feeders and increased their proposal so that arran

W. A. Wallace of Colony has a small herd of purebred Holstein cows which has led the Allen County Cow Testing Association in average butterfat production four of the seven months that testing has been in progress. During all but one of these seven months his herd average has been 40 pounds or more of fat for every cow. The aver-age production of the herd for 151 days has been 213 pounds of fat, or more than 11/2 times the production of the

Hall 172 times the production of the average Kansas cow for 365 days.

H. Blazer, Iola, had the highest producing cow in the association for March. She is a purebred Holstein, and produced 2,325 pounds of milk, which contained S3.7 pounds of fat.

Horace Tower, another member of the association, has a 4-year-old Holstein. association, has a 4-year-old Holstein which led the association the first six months with 341.3 pounds of fat.

# Feeding Pigs Milk

Milk is the principal item in pig feeding, but at this time of year, when the increased milk supply begins, cau-tion must be used. Pigs not used to full feeding of milk can be killed very quickly by over-feeding. One must begin very sparingly till the pigs become accustomed to it. A neighbor once purchased a bunch of pigs with the understanding that they were used to milk, and it killed all but two of them. Shaw, Kan. J. O. Showalter.

There are two ways to get ahead in such as he suggests will provide a this country. One is to sell bootleg market, and you will not have to buy and the other is to drink it.

> That "music hath charms to soothe the savage breast" is distinctly a pre-

Following the Lure of the Trail

As a Practical Dairyman -how do you think a Milker should operate?

IF you were going to design a milker, the very first thing you would do would be to get the action just like nature's action—because you know that nature's way is the most productive way. You would take a sucking calf as your model—because the calf is the natural-born milker.

That is exactly what Empire did-and that is why the Empire is different from all other milkers. When a calf swallows after each suck, he massages the teat completely from tip to udder.

Empire Advantages

Teat cup lining is hand made and has inserts. Basic Empire patents cover teat cups—they give the only complete sided massage, duplicating the calf's

So does the Empire-and no other milker does it or can do it, because the Empire teat cup is patented and exclusive.

That is why cows milked with the Empire give down more milk and give milk longer. That explains why farmers everywhere are making bigger profits out of milk today than they ever thought possible.

And now the new Empire Electric Milker makes machine-milking profitable for every man who has six cows or more.

Let the Empire agent in your locality ke you to a nearby Empire-equipped rm and see the Empire in operation. It is us today for the Empire catalog

# three-sided massage, duplicating the calf's suck. 2. Standard Empire Milker Units used with Empire Electric or Engine type Pumping Outfits provide a practical size for every dairy of 6 or more cows. 3. # Corn Planting Moves Fast

# And Rains Have Placed Wheat in a Much More **Favorable Position**

CORN planting is moving along rapidly in Southern Kansas. The state acreage probably will be a little larger than last year. Soil conditions are excellent, due to recent rains, and most of the crop should "get away" to a good start.

And the same rains which helped be a light calf and pig crop. Corn. \$1;

Lane—Nearly 2 inches of rain here recently! Wheat, oats and barley are in excellent condition, and are growing fast. I do not know of an acre of wheat that will be abandoned. Feed is plentiful. Wheat, oats and barley are in excently! Wheat, oats and barley are in excently! Wheat, oats and barley are in excently! Soil of the corp. Corn. \$1;

And the same rains which helped the newly planted corn have had a tremendous effect for the better with wheat. The great bread crop was getting into the position of "where a fel-ler needs a friend," when along came a huge amount of moisture, which fell slowly, so it could go into the ground. It's there, and the plants will be using it for many weeks.

But of course there are communities where the wheat outlook is not good. This is especially true in the North Central counties, where much of the upland crop is gone. Farther south there is damage from army worms and Hessian fly—and the fly damage will become worse. In Southwestern Kansas the condition is somewhat ragged with many fields, as there was some damage from soil blowing. But still, despite all these troubles, the state should produce a fairly good crop, if we have any luck from now until June.

Allen—A big rain here recently helped spring crops greatly. The flax is all sown. Fruit is in fine condition. Pastures are doing well—prospects are bright for a good year. Eggs. 24c; cream, 40c; corn, 75c; hens, 21c.—T. E. Whitlow.

Barber—Good local rains resently nave helped the wheat greatly. Corn planting has begun—and there is more ground plowed and disked than has been the case at this time for years. Stock is still on feed, and some that has been on full feed is being shipped to market.—J. W. Bibb.

Butler—A good rain recently has put

Butler—A good rain recently has put wheat and oats in good condition. Alfalfa and pastures are beginning to green up. Many farmers are planting corn. There is an increase in poultry raising this spring; the pig crop, however, will be light. Wheat, \$1.30; oats, 50c; corn, \$1; cream, 42c.—Aaron Thomas.

Asron Thomas.

Cloud—The recent rains put the soil in excellent condition, and gave grass and spring crops a fine start. Oats is looking well. Incubators are producing good results this year. Young stock is doing well. Farm produce is bringing satisfactory prices.—W. H. Plumly.

Condend. A good rain and fairly warm.

prices.—W. H. Plumly.

Cowley—A good rain and fairly warm weather have helped all plant growth. Farmers are planting corn. Pastures are about ready for stock—animals are in good condition. There are lots of young chickens on the farms this year. Hogs, \$12.50; wheat, \$1.25; eggs, 22c; butter, 25 to 45c.—E. A. Millard.

Douglas—Gardens are up and growing fast.

Alfaifa and Sweet clover are doing well.

Cows are on the pastures. There is an increase in the number of chickens, especially purebreds, here this year. The commercial hatcheries are doing a big business. There are few public sales, Growers are finding an excellent demand for early vegetables.

—Mrs. G. L. Glenn.

Elk—Spring is coming along fast, with plenty of moisture and warm days. There is a fine stand of oats, and wheat has a good color. Cattle are being turned on pastures, and Texas cattle are arriving. Corn is being planted rapidly.—D. W. Lockhart.

being planted rapidly.—D. W. Lockhart.

Ford—We had a nice rain recently, and
the wheat is beginning to show the effects
of it. Oats and barley are up, and are doing well. Pastures are getting green. We
need more alfalfa here.—John Zurbuchen.

need more alfalfa here.—John Zurouchen.

Greenwood—Everything is looking fine since the rain. Peaches are out in bloom, and there should be a good crop unless it is injured by frost. Corn planting has started. Some road work is being done. Grass is making a good growth in the pastures.—A. H. Brothers.

Hamilton—The moisture we needed so badly came, and farmers are "hard at it." Gardens are coming along nicely. Oats and barley are coming up. Wheat is looking fine, Some feed is being obtained in the pastures, Cream, 32c; eggs, 22c.—H. M. Hutchison.

Hutenson.

Harvey—Recent rains have helped wheat, oats and alfalfa greatly. Most of the wheat is in good condition, but Hessian fly is reported in some fields. There is plenty of rough feed, and livestock is looking well, Wheat, \$1.26; butter, 40c; eggs, 24c; flour, \$1.35; bran. \$1.25: shorts. \$1.55; yellow corn, 85c; kafir, 80c.—H. W. Prouty.

Hackson—A good rain here recently was

st. 25; bran. \$1.35; shorts. \$1.65; yellow corn. \$5c; kafir, 80c.—H. W. Prouty.

Jackson—A good rain here recently was fine for wheat and oats. There is a good prospect for early pasture, as prairie grass and alfalfa are growing fast. Farmers are working on corn ground. But little corn is being marketed. Corn. 85c; hogs. \$12.50; alfalfa hay, \$12 to \$15.—F. O. Grubbs.

Johnson—Heavy rains here recently have made the soil too wet to work. Oats and grass are making a rapid growth. All cattle in this county must be tested for T. B. and this work is now in progress. A great deal of road work will be done here this year. There is a good deal of flu among the folks. Eggs. 25c; butterfat, 40c; corn. 95c; hens, 23c.—Mrs. Bertha Bell Whitelaw.

Kearny—Work is well advanced, and the ground is ready for corn. Fruit trees are in bloom, and there is a good prospect for a crop. Some of the wheat ground will be put into other crops.—F. L. Pierce.

Lincoln—A fine rain fell recently, which will be here which the fields.

Lincoln—A fine rain fell recently, which will help wheat greatly. Some of the fields, however, have been planted to barley and oats; these crops are coming up fine. Farmers are working on corn ground. Prices are high at public sales. There will

50 to 60c; Sudan grass seed, 4 cents a lb.; eggs, 23c; butterfat, 37c.—S. F. Dickinson.

Linn—Grass is coming along fine, and stock will be turned on the pastures soon. Farmers have been kept out of the fields recently by rain. Several loads of stock were shipped last week. Flax, \$2.50; corn. \$5c; oats, 75c.—J. W. Clinesmith.

McPherson—We had a big rain here recently that soaked up the ground in fine shape. The wheat that came thru the winter is looking good. Oats and alfalfa are coming along fine. Livestock is in good condition. Labor is in good demand. Prices at farm sales are high. Hogs, \$12; eggs, 25c; butter, 35c; corn, \$1.05; wheat, \$1.30.

—F. M. Shields.

Ness—Everything is growing fine since the rain, which gave us 3 inches of moisture. Prices are high at public sales. Wheat, \$1.30; corn, 90c; cream, 40c; hogs, \$12; hens, 20c; eggs, 23c; cream, 40c; kafir, 75c.

—James McHill.

Norton—Good rains recently have put the soil in excellent condition. About the usual

Norton—Good rains recently have put the soil in excellent condition. About the usual acreage of barley has been sown. Farmers are disking for corn. Pastures are turning green. The number of sows that have farrowed is smaller than usual. Gardens are being planted and incubators are running.—Jesse Roeder.

Osage county; one will hatch ½ million chicks this year.—H. I., Ferris.

Osage—Accent rains have kept farmers out of the fields. Corn will move rapidly again when the price goes up. The kafir, however, will all be needed here, as there is an increase in poultry raising this year. There are three large commercial hatcheries in Osage county; one will hatch ½ million chicks this year.—H. I., Ferris.

Osborne—A fine rain here recently should bring spring crops along fine, if we can get some warm weather. This also will help the pastures, which will be a fine thing, as almost everyone is out of feed.—E. G. Doak.

almost everyone is out of feed.—E. G. Doak.

Phillips—Recent rains have but the ground
in good condition. Much of the wheat land
will be put into spring crops. Grass in the
pastures is making a fast growth. The
weather is fine and roads are good. While
grain prices have declined some, most of
the crops kere were sold at the top. Hogs
still are selling well, and cattle prices are
improving. The outlook for the farmers is
bright.—J. B. Hicks.

Rawlins—There mayer was a better press.

Rawlins—There never was a better prospect for a crop in this county. If we have plenty of rain from now on a good deal of wheat will make 40 or 50 bushels an acre.

—A. Madsen.

Reno—Wheat and alfalfa are making a fine growth. Peach trees are in bloom, and should produce a good crop. Oats are up, and coming along fine. Considerable corn probably will be planted next week.—D. Engelhart.

Engelhart.

Riley—We have had some fine rains here lately. Wheat is greening up. Oats is in the best condition I have ever seen at this season. Fruit trees are in bloom, early gardens are planted and incubators are going. Eggs, 23c; corn, \$1.—P. O. Hawkinson.

Rush—Wheat is doing well since the recent rains; but about 25 per cent of the acreage will be planted to other crops as a result of winter killing. Soll is in excellent condition. Oats and barley are coming along fine. Feed is scarce. A few public sales are being held, and implements and horses are bringing good prices. Wheat, \$1.38; eggs, 22c; butterfat, 36c.—William Crotinger. Russell—A 3-inch rain here recently put

eggs, 22c; butterfat, 36c.—William Crotinger.
Russell—A 3-inch rain here recently put
the soil in good condition. This will bring
wheat to the front fast. A large acreage of
barley and of oats has been sown. There
are many public sales, which bring good
prices. Hogs are scarce, feed is getting low,
and cattle will be thin when they go on the
grass. Eggs. 25c; butterfat, 39c; corn. \$1.85;
wheat, \$1.29.—M.Bushell.

Scatt.—We have had moleture here scent

wheat, \$1.29.—M.Busnell.

Scott—We have had moisture here recently, and the wheat, oats and barley are showing up nicely. Farmers are busy preparing ground for row crops. Wheat, \$1.15; corn, 72c; kafir, \$1.20 a cwt; barley, 70c; eggs, 23c; butterfat, 38c.—T. F. Carson.

Sedswick—Good rains have helped the

eggs, 23c; butterfat, 38c.—T. F. Carson.

Sedgwick—Good rains have helped the wheat, oats and grass. The ground is in splendid condition for spring crops. Farmers are planting corn and alfalfa. Cherries and strawberries are in bloom, and they are showing excellent prospects of large crops again. Wheat, \$1.35; corn, \$1; oats, 54c; butter, 35c; eggs, 24c.—W. J. Roof.

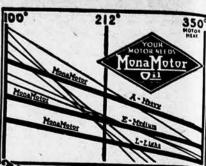

Stanton—We had a fine rain last week

Stanton—We had a fine rain last week, and wheat is looking mighty good. Sod is being broken on considerable prairie land. A good many land sales are reported. Milo, \$1.60 a cwt.; cream, 38c.—J. M. Forsher.

Thomas—Recent rains have helped the wheat greatly, and it is grawing fine. Only a small part of the crop was winter-killed. Barley and other spring crops are making a good growth. Corn. 90c; eggs, 25c; cream, 40c.—Harry Hanchett.

Washington—Plenty of rain here recently has put the soil in good condition. A large acreage has been sown to oats. We should be able to tell about the condition of wheat soon. Farmers are preparing land for corn. There will be a large acreage of spring-sown alfalfa. Wheat, \$1.14; butterfat, 23c; eggs, 22c.—Ralph B. Côle.

ernment is for a yield of 474,255,000 bushels of winter wheat, 116 million bushels less than last year's crop, and the smallest since 1917. The condition is 68.7 per cent of normal. Maybe the price will be good again.

# Are You Skim Milk or Cream?

ALIFORNIA is skimming the cream of the farmers in the Middle West.

The intelligent, the successful, the ambitious men are going where WINTER no longer takes half what they can make; where markets are good; where seaports put them in touch with the markets of the world.

# The Acid Test

It takes COURAGE, it takes NERVE for a man to say—"I WILL find out about California. I WILL join the enterprising, intelligent, careful, intelligent, careful, successful men who are going to the JAMES RANCH LANDS. I will make a fresh start in a new country, under the sunshine, where a man's labor counts, and where, in a few years, starting with very little I can be Independent for LIFE."

# The First Step

Write to Dr. Herman Janss. who is managing director of the company which owns the lands, and who deals directly with buyers — not through "agents." Tell him frankly what you want to do, and what you have to do with—your cash capital, tools, equipment, stock, etc. He will send you full information about the James Ranch lands.

If Dr. Janss, from the information you give him, thinks you are SURE TO SUCCEED on the James Ranch lands, he will invite you to make a trip there. To see for yourself what others are doing, how they are enjoying life, to see how they are steadily getting ahead in life.

# As the House Burned

BY HARRY F. COOPER

The first house I ever saw burn was a log cabin. The clothing, food and furnishings were all burned. The following day a neighbor came to our house in a wagon, and mother gave him some potatoes, flour, lard and furniture. Other wagons were visiting other neighbors. Within a week a new log cabin had been built where the old one was burned. The family was furnished food, clothing and furniture that had been donated by the neighbors. Frequently sich methods for relief were neither adequate nor timely. Often the persons most able to help were the

house in a wagon, and mother gave him some potatoes, flour, lard and furniture. Other wagons were visiting other neighbors. Within a week a new log cabin had been built where the old one was burned. The family was furnished food, clothing and furniture that had been donated by the neighbors. Frequently sich methods for relief were neither adequate nor timely. Often the persons most able to help were the least willing. Such uncertainty made some kind of organized relief desirable. Insurance as an organized method of relief has been carried on in various ways. In some countries government officials have made levies of money or kind providing for relief from certain misfortunes. Joseph's gathering of grain is an example. In other countries and at other times relief was provided by Guilds or friendly societies. Still another form of insurance was offered by wealthy men, who for a certain sum agreed to underwrite a definite amount on certain hazards. This was done for the profit they might make. The purpose in the collections by the state was to render relief without expense. The purpose of the friendly societies was to prevent the misfortune if possible, and to voluntarily distribute such misfortunes as might occur despite the precautions taken.

The oldest code of laws in the world,

with

rity.

Ohio

n.

taken.

The oldest code of laws in the world, those of Hammurald, the Biblical Amraphel, King of Babylon nearly 2300 B. C. ,provided an indemnity in case of loss to life or property from certain catastrophies. The Patriarchs of the Old Bible instructed their servants to leave sufficient grain in the vants to leave sufficient grain in the fields for the widows and orphans who might come to garner. Jesus Christ commanded his followers to bear one another's burdens. He also comanded the man having two coats to share with the man who had none.

Today we have the stock company insurance growing out of the old underwriters' idea of profit. Mutual insurance companies represent the ideas of the friendly societies. Some states have attacking and there is a growhave state funds, and there is a growing demand for funds in many states which do not have them.

We also find more than 2,500 mutual We also find more than 2,000 mutual insurance companies operating in this country. More than 2,000 of these mutuals are insurer; of farm property. Many mutuals are limited to a small territory. Others cover a state, and still others operate in most states and Canada.

Harper, Kan.

# Where's the 50-Cent Egg? p

What has happened to 40 and 50-tent eggs? J. H. McAdams, poultry specialist for the Kansas State Agricultural College, believes they have taken a vacation until next fall. He sees in the fallure of many farmers to set eggs or to buy baby chicks this spring a possibility for regret.

Grain is too expensive to feed to the

Grain is too expensive to feed to the of boys together received hen which does her laying early in game of marbles. It spring and then quits. Hence instead a boy lost he was would have farmers do a better job of work was all done!

culling during the summer, and re-place the birds with pullets produced

Fully seven months are required for the more common breeds, such as Plymonth Rocks, Rhode Island Reds, and Wyandottes, to reach maturity under the best of care. Leghorns will mature in six months. The time of hatching determines whether there will be early fall and winter eggs. March and April are the months in which next winter's profitable pullets will be hatched.

# Grow on Waste Feeds

I have always liked turkers, and these birds have produced profitable returns for me. They require less feed and care than other poultry. If one has an old hog lot not in use and overgrown with weeds in which to place the hens and their young, they will live happy and contented until the baby turks are large enough to fly.

They may then be turned out on open range. Along the creek is an ideal place for turkeys, as here one usually finds plenty of trees and bushes. It usually is not necessary to feed young turkeys much after the first two or three weeks unless the spring is cold and backward—in that case a little rolled oats or cottage case a little rolled oats or cottage cheese may be given.

A turkey hen usually is efficient in

protecting her flock from wet weather, except under unusual conditions.

I gather the eggs every day, as they are laid, and turn them every day. I set turkey eggs under chicken hens, and then remove the poults to turkey hens at hatching time. I prefer the Bronze variety. I consider turkeys the poor woman's friends, as they require but little equipment.

Mrs. R.

Hamilton, Kan.

# Forestalling Misfortune

A member of Lloyd's, a famous London association of underwriters, has written a policy covering an exhibition of wooden Indians now being assembled in Cleveland.

territory. Others cover a state, and still others operate in most states and Canada.

This is only one of countless unique policies written by Lloyd's in its more than 200 years of existence. Lloyd's knows from figures that do not lie that most of the misfortunes anticipated by human beings fail to materialize by

Keeps Two Poultry Breeds

We have found that it is best to keep a heavy and a light breed of chickens. White Leghorns and Buff Orpingtons. During the hatching season we have them penned separately. The Buffs are better contented when in a pen than the Leghorns. We buy only eggs to produce the cockerels we need, and are gradually building upour flock in this way.

The Buff Orpington hen makes an excellent mother, and usually raises every chick. And while we have incubators enough to set 650 cggs at a time, and have a brooder stove, we like the old hen, too. We have a colony broodhad exceptionally good results with it.

We set eggs the first week in February, and get our broilers off on the farly market. Last year we sold 100 broilers at from 30 to 35 cents a pound, at an average weight of 2 pounds apiece. We set our Buff Orpington cggs first and the Leghorn eggs afterward, and keep the best pullets from the reason of Lloyd's success. Figures, statistics and the invariable law of chance may show conclusively that things will turn out a certain way 999 times out of 1,000, but they can't show in advance precisely when the thousandth time, which is the exception, will occur. And that's why a sensible community or organization or individual takes an interest in these apparently freakish insurance policies.

When the tornado or earthquake or unwanted rain comes, it is reassuring to know that whatever calamity has befallen it cannot produce a total loss.

Found the Lost Eggs

P. Stenger of Hellis, on a recent trip to town, found eggs scattered all over the road. Some were broken, but many had fallen in the soft mud, and were not injured. He picked 'em up.

In The World's Work for April, on story about the Gobi Desert in China and its "marching sands." Most of the scenes in the serial story, Marching Sands, now run-ning in this paper, are in this desert.

# Skill at Marbles Needed

W. J. Christman, secretary of the Y. M. C. A. at McPherson, called a group of boys together recently and started a game of marbles. It was ruled that as a boy lost he was to start to work spading and raking the lawn. Soon the

# Fashions and Variety

In a discussion of women's fashions in clothes the Kansas City Times takes issue with President Coolidge's view that it would be a good thing for the textile industries (in which as a Massachusetts man he is naturally interested) if they could be standardized, but it doesn't do the President full justice. What he said to the textile manufacturers was:

"I once heard a manufacturer say

President hinted to the textile manufacturers. And the value of variety is not the only moral consideration he mentioned. "You men," he said, "who are responsible for an industry ought to make unlawful and improper practices in that industry thoroly unfricionable," which was one of the best remarks about fashions that the President made in his speech. dent made in his speech.

# Democrats Need a Program

While Franklin Roosevelt is calling leading Democrats together for a conference to revive the party, the Bryan brothers have stated in a joint family utterance why there is litle hope for its revival—particularly on any Eastern call. There is no program, according to the Bryan interview given out at Washington, that will give the Democratic party standing in the East, without losing it the support of the West and South. And they add, what is the cracker of the Bryan outgiving, that "the future of the Democratic party is in the South and West."

No wonder the faithful New York

giving, that "the future of the Democratic party is in the South and West."

No wonder the faithful New York World, fighting Democratic battles without hope these many years, revolts at such untimely outbreaks of Bryanism in the party. "The Bryans must be able to add figures," says the World, "and if they have ever added up the electoral votes in the South and West they must know why an alliance of those two sections cannot give a majority. Yet they are quite content to recommend their formula of defeat to the Democratic party."

But political arithmetic will never explain why the Democratic party doesn't win. Didn't it seem to have a brilliant opportunity just a year ago? And yet the it named its candidate from the East and a candidate measuring up to the requirements of the office, its defeat was crushing.

It may be that the Democratic party will have a chance to win when it forgets about winning long enough to stand for something. Last year it was still thinking of political arithmetic—the East plus the West. A Wall Street candidate plus a member of the Bryan family. From the day the dicker was made the ticket was beaten to a frazzle, and all the art and eloquence of Candidate Davis went for nothing, except as a Roman spectacle for the multitude. The fact is that Mr. Davis picked the Bryan family and everybody knew it. He was going to be elected on political arithmetic.

Bryan is wrong, but so is the Democratic party. It can't win by the South plus the West, but neither can

arithmetic.

Bryan is wrong, but so is the Democratic party. It can't win by the South plus the West, but neither can it win by the East plus the West or plus the South. When it wins it will be by standing for something regardless of East, West and South.

# This Changing World

rescale list man be is naturally interested if they could be standardized, but it doesn't do the President full justice. What he said to the textile imanufacturers was:

"I once heard a manufacturer say inta if he ladies could be induced to standardize and stabilize their fashions as the men have done (have they?) half the worries and uncertainties of the textile industries would be eliminated at once. Doubtless such a result would be a boon to you who are engaged in the industry. But I scarcely would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal would not have been considered. It would not be seriously proposal in the style of life."

"Ork because folks continue to try to beat the train to it at grade crossings. The work beautomobile and the train to it at grade crossings. So laws are setablished by the beautomobile stream in the style of life, and the style of life, and while there is strict conformity to fashions by all women, yet with fashions continually themselves changing, the vice of a deadly conformity to fashions by all women, yet with fashions continually themselves changing, the vice of a deadly conformity to fashions by all women, yet with fashions continually themselves changing, the vice of a deadly conformity to fashions by all women, yet with fashions continually themselves changing, the vice of a deadly conformity to fashions by all women, yet with fashions continually themselves changing, the vice of a deadly conformity necessarily implies it is not to be a considerable to be favored in the rings. If people must hold

## CANADA

CANADA

FARMING IN BRITISH COLUMBIA ON
The lands adjacent to the Pacific Great
Eastern Railway offers exceptional opportunity to prospective settlers. These areas
are peculiarly adapted for mixed and dairy
farming. Climatic conditions ideal. Crop
failures unknown. Only a small portion of
British Columbia is suitable for farming
purposes, so a steady market is at all
times assured. Schools in these districts
are established by the Department of Education where there is a minimum of ten
children of school age. Transportation on
the line is given at half rates to intending settlers. Prices range from \$3.00 to
\$10.00 per acre with sixteen years to pay
Full information on application to R. J.
Wark, Dept. 143, Pacific Great Eastern
Railway, Vancouver, British Columbia,
Canada.

of the automobile. The fact is that the automobile has been the occasion of more expensive living than any single invention in history. It is only less expensive than war, and raises the question whether civilization can afford both of these luxuries.

A Milwaukee woman wants a divorce because her husband falls asleep at the movies. We had no idea that Will Hays's reform campaign had progressed

Sometimes we despair of seeing the world made safe for democracy, and would be content if only the highways and Pay No Advance Fee Don't give option tate for any kind of contract without first knowing those you are dealing with are absolutely honorable, responsible and reliable.

# 10 Billions of Bonds!

Exemption of public bonds from taxation is a policy denounced by all recent Secretaries of the Treasury, by bankers and by mortgage and other bond brokers, yet it goes on, and Congress has never submitted its amendment to remedy it. Meantime the issue of new tax exempt bonds is going on at an accelerated rate.

Up to 1919 the largest issue of municipal bonds in a single year never exceeded 900 million dollars, and frequently was as low as 500 millions. Since 1918 the Bond Buyer, the leading authority on bond issues, gives the volume of new bonds as follows in round figures:

greatest figure in any one year, and Laptad's 90-day red corn has been pro-over three times the ordinary volume duced.

Threshing machines can be elected.

In the last six years the aggregate volume of new municipal bond issues was in excess of 10 billion dollars. All of this wealth is exempt from taxation, and while it is often said that it is as broad as it is long, and that if the bonds were not exempt they would bear a higher interest charge, yet the best opinion in the bond field is that if bonds were taxable the rate would not rise to the extent of the tax, and in any case the exemption is one of the powerful influences throwing a continually heavier burden of taxation on land. The creation of a class of exempt property and of an exempt class of tizens is a bad thing, irrespective or economic conse-

The country faces a taxation issue in the output of 2½ billions of municipal bonds, tax exempt, last year, and of 10 billions in the last six years. The tax exempt bond issues of the last six years exceed those of the entire 24 years from 1895 to 1919. Where is such a movement to stop? And what effect is tax exemption having in inducing public indebtedness?

# How Fred Laptad Farms

BY S. F. KOLLAR

a grain and livestock farm near Lawrence for 20 years. He believes bal-anced agriculture is the first essential practice to follow if one intends to reap success in farming. The work carried on at the Laptad farm has been in continuous co-operation with the Kansas State Agricultural College. He attends all important agricultural meetings at the college. He is a charter member of the Kansas Crop Improvement Association, and was for four years president of this organization , which gave him a chance to receive early training in the importance of better farming.

From his work along crop improvement lines Mr. Laptad foresaw the importance of pedigree selection crops, and he applied the principle to livestock raising. All of his crop operations have been practiced on the crop rotation basis. His common rotation is wheat, clover, corn and oats, no one crop grown more than two years in succession. Wheat is grown more as a supplementary crop to livestock than as a cash crop.

The inspected and certified seed era in Kansas had its first real existence about 1919. The benefits from growing certified seed were limited for the first few years, owing to the fact that farmers were unwilling to accept the idea that pure seed was a means toward improving agriculture. For the last few years, Mr. Laptad, as a forerunner of this movement, has been able to realize a profit from growing certified seed of Kanred wheat, Kanota oats, field corn and soybeans.

For the last two years the farmers of Eastern Kansas have been growing varieties of soft red winter wheats. The variety most commonly grown is the Harvest Queen. It is one of the highest-yielding varieties of the Northeastern section. Along with Mr. Laptad's numerous other variety tests he 1919, 1,212 million dollars; 1920, has in the last year made an effort to 1,437 millions; 1921, 2,145 millions; develop a 100 per cent pure Harvest 1922, 1,675 millions; 1923, 1,649 millions, and 1924, 2,425 millions.

Nearly 2½ billions of new municiand harvesting and cleaning by hand. pal bonds were issued in 1924, the Under similar selection methods Mr.

Threshing machines can be classed as the foremost and constant source of seed contamination. Mr. Laptad has observed the long-time need of seedcleaning devices which will eliminate the greater percentage of seed contamination. He has had a thresher designed which is absolutely cleanable, with which he intends to thresh his seed plots.

From 600 to 1,000 bushels of certified seed corn and from 1,000 to 2,000 bushels of certified Kanota oats are sold every year from Laptad's farm. He has been successful in showing prize-winning corn, both of Reid Yellow Dent and Laptad 90-Day Red, at the Chicago International Hay and Grain Show and at the Topeka Free Fair. He has made shipments of seed corn into South America and South

# Tiger's Tired of Fighting?

Clemenceau's decision to seal for 10 years following his demise the memoirs which for the last three years he has been compiling would seem to indicate that the Tiger has had his fill of controversy. He is willing to explain his own point of view to posterity, but he does not wish to invite the immediate rebuttal Fred G. Laptad has been managing of contemporaries. However, from the little that he has said about his voluminous work, it seems to consist in the main of philosophic musings, and folks who expect to find in it a pungent running commentary on the making of history at Versailles and in other arenas of tension and stress will be disappointed. Clemenceau, for all his eloquence, has learned the art of keeping to himself a good many of the things he might say which the world would be both edified and di-verted to hear.

# Harvest 8 Million Acres?

Kansas probably will harvest about 8 million acres of wheat, judging from county reports to the State Board of Agriculture. The April condition is rated as 63 per cent, 13 per cent below the 10-year average. But the recent rains and warmer weather, which have come since the reports were mailed, have improved the crop greatly.

The main difficulty about cutting off the expenses of government is that practically all the expenses can vote.

# 'Twas a Rough Winter?

Five varieties of wheat were planted last fall on the farm of John Hahan, 1 mile west of Inman. Black Hull and Fulcaster show about 90 per cent of winter killing. About 15 per cent of the Kharkoff, Red Turkey and Kanred plants were killed.

# Tom is the Chairman

At a recent meeting of the state school text commission, Tom McNeal of Topeka, was selected as chairman.

ext Thursday, April 23 is the date of d Laptad's Duroc and Poland China-sale, will sell sows, boars and gilts. The sale be held as usual at the Laptad Stock m, a short distance out of Lawrence, Kan.

Albert Hultine & Sons, Saronville, Neb., ill sell Polled Shorthorns at their farm, rey Gables Stock farm, June 6. The Hulting herd is one of the strong Polled Shortern herds in the west.

have a letter from B. C. Settles, St. is, Mo., in which he says western Jersey to breeders are prospering and many lessless are being planned for the sumand fall. Kansas has a strong Jersey to breeders association and are taking active part in organizing cow testing assistants.

J. Hartman, Elmo, Kan., a well known kinson county Polland China breeder rets a fine crop of spring pigs. John Harthan bas been in the Poland China business a good many years and has produced share of good Poland Chinas in Kansas, reports a three inch rain last week and ear looking fine. t looking fine.

I have just received a letter from F. A. Massey & Sons, Republican City, Neb., who he in Kansas, Phillips county, but get their mail at Republican City, Neb. They breed spetted Poland Chinas and have 123 spring pigs to date and several sows to farrow. They are going to try selling pigs at weaning time. One of their sows, a daughter of the world's grand champion, 1921 has a very fine litter. Their new herd boar, Rival Giant is siring a fine lot of pigs for them. They are to hold a fall boar and gilt sale and a tred sow sale next winter.

A. M. Davis, president of the State Dairy

I have a letter from A. M. Patterson, assistant secretary. American Royal, Kansas City, Mo., saying that at a recent meeting it was decided to hold combination sales in the future to take the place of the Hereford Round-up sale and the Central Shorthorn sale held each spring and that the dates will be March 1 to 6. It will be known as the Royal Spring sales and held in the American Royal building, Kansas City, Mo. They plan to sell if possible Shorthorns, Herefords, Angus, saddle horses, draft horses and sheep.

I have just received a letter from C. E. Aubel, secretary of the Tri-county Shorthorn Breeders' Association, Manhattan, Kan, saving the association held a meeting recently and decided upon May 13 as the date for their annual picnic and show. This is the fourth annual picnic and show and the place of holding the picnic will be announced soon, Riley, Pottawatomie and Wabaunsee counties have many good herds of Shorthorns and the officers are very anxious that all co-operate in this picnic and show and Secretary Aubel will be glad to tell anyone interested all about the coming picnic and show.

# LIVESTOCK NEWS

By Jesse R. Johnson 463 West 9th St., Wichita, Kan

Sidwell & Jones, Poland China breeders of Hutchinson, Kan., have about thirty spring bigs sired by their herd boar, a son of Ben-dena Giant.

Clyde Horn of Stafford, Kan., auctioneer and breeder of Duroc hogs, also has a fine little herd of registered Ayrshires headed by a son of Wilmore Peter Pan 25th. Mr. Horn twns a half interest in this bull.

On account of the death of J. W. Hyde of Altoona, Kansas, owner of one of the old established and best herds of Milking Shorthorns in the stote, a dispersion sale of the herd is announced. The sale will be held April 27.

Geo. F. Mueller of St. Johns, Kan., has engaged in the hotel business and will disperse his herd of registered Shorthorns on June 16th. Mr. Mueller says they will be thin in flesh but he must sell them now that he is no longer on the farm.

H. G. Wright, proprietor of the Raleighdale Jersey farm located at Sylvia, Kansas, has a fine herd of cattle. His herd is largely of Raleigh breeding, with some Gamboges Knight and Oakland Sultan bred females. Mr. Wright says Jerseys will pay females. Mr. Wright says Jerseys will a off any mortgage if they have a chance.

H. J. Reynolds, Hutchinson, Kan., breeder of Guernseys, was raised in the city and decided to try farming after he finished school. He is making a great success of the dairy business. He had the high cow of the county cow testing association last year. His herd comes largely from the Cherub family.

W. A. Gladfelter, Duroc breeder of Emperia, Kan., writes that the spring litters sired by Top Sissors are running from eleven to seventeen, they are very even and some of them look like they would develop into state fair winners. Mr. Gladfelter will hold a bred sow, and fall boar and gilt sale on April 24th.

Joe B. McCandless operates seven quarter sections in the vicinity of St. Johns, Kan. Mr. McCandless says it is all right to raise wheat but not to depend entirely upon one trop. He has about eighty head of pure bred Durce spring pigs, these with his fine herd of registered Ayrshire cattle afford an income from several different sources.

One of the high class Jersey herds to be found in Reno county, Kansas, is that of G. W. Hudson, of Sylvia. Mr. Hudson's herd is composed entirely of cows with register of merit records or that have descended from Register of Merit cows. Owl and Raleigh breeding predominates in the herd.

T. B. Bowman, senior member of the firm of Bowman & Sons, Percheron horse breeders of Boone, Neb., writes that conditions have improved very much within the past year. He reports the recent sale of a stallion and a pair of mares to the Nebraska state university. Mr. Bowman says they have over twelve hundred acres of fees.

high priced land fenced with woven wire fence and osage orange posts and just had to stay in the business. They now have, says Mr. Bowman, the largest herd of registered Percherons in America and more mares sired by international grand champions than any other herd. They bred over sixty mares of their own last season.

L. L. Gaston of Sylvia, Kan., proprietor of Spring Park Dairy Farm, has another of the good Jersey herds of the locality; he has been breeding registered Jerseys for several years. The herd is largely of Raleigh several years. The herd is largely of Raleigh breeding and comes from Register of Merit

Knappenger Bros., (twins) live across the road from each other out at Turon, Kansas. Each has his own herd of pure bred Durocs. They have cut down operations considerably during the past two years but several fine litters can be seen on both farms and the herds are to be gradually brought back to where they formerly were.

C. C. Coleman, proprietor of the Sylvia Jersey Ranch located at Sylvia in Reno county, had the high record cow for fat in the Reno county cow testing association for the month of December and January last. Mr. Coleman is secretary of the Kansas State Jersey Breeders association and reports lots of breed interest.

Fred Wendelberg, proprietor of Cedarvale Farm, at Stafford, Kan., has one of the good Ayrshire herds of this part of Kansas. His foundation stock was bought from good herds in Pennsylvania and Massachusetts. His herd bull, Pennhurst Snow King, was Junior Grand Champion of Kansas in 1922.

A. M. Davis, president of the State Dairy Association has a small herd of registered Holsteins on his farm near Hutchinson. He is a member of the Reno county cow testing association and had the high producing herd for fat for the years of '21-'22 and '24. His cows all have A. R. O. records or are daughters of A. R. O. W. cows.

J. M. McClure, Kingman, Kan., has for several years been quietly building up on his farm a first class herd of registered Ayrshire cattle. He has given the matter of breeding considerable thought and has been very careful to pick good individuals for foundation cows. He is a good care taker and is growing stronger every day for the breed.

A. Abendshien of Turon, Kan., has a good herd of registered Ayrshire cattle and says the produce from one good cow if well cared for will enable one to save more than he can from any profession in Western Kansas, Mr. Abendshien bought one cow in February, 1922. Her descendants now number five; she was nine years old when purchased, and will drop another calf within a few months.

T. D. Marshall and his sons located near Sylvia, Kansas, own and operate Brookside Farm. Several hundred acres of wheat is grown annually and hogs are raised and fed for market but the registered Jerseys are the surest source of income. More than half of the cows in the herd are daughters of Idalias Raleigh. The present herd bull is a son of St. Mawes Lad.

Emmett Smith, Hutchinson secretary of the Reno county cow testing association, has a good herd of registered Guernsey cattle, and all of his cows have records made by this association. His herd bull carries the blood of the Cherub family. Mr. Smith is secretary of the Reno county cow testing association and says the man milking cows without the help of an association is going about his work blindfolded.

Harold A. Pennington, Hutchinson, Kan, carries on a three hundred acre farm about ten acres of which is in bearing orchard. Several years ago he began the breeding of registered Holstein cattle and is rapidly developing one of the good herds of the state. He has been very successful in every show where he has exhibited stock. He is a member of the Reno county cow testing association. He takes especially good care of his herd although does not feed as heavy as many.

Mark Abildgaard, one of the live wire Holstein boosters in the Mulvane locality had charge of the Stubbs herds for several years. He is now doing busines for himself and has one of the good herds of the state. He has in his herd at this time nine sisters, daughters and granddaughters of the noted Woodman cow that was shown at twenty-two state and national shows and was first nineteen times and grand champion twenty-two times. Mr. Abildgaard is strong for the Homesteads.

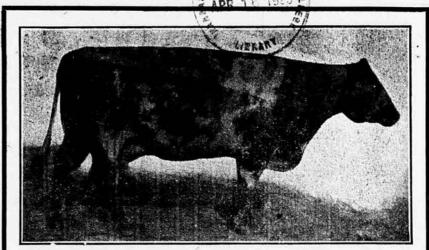

The Kansas National Live Stock Show will be held at Wichita November 9-14; the following officers have been elected: Frank M. Arnold. Emporia, President; Dr. M. C. McCampbell, Manhattan, Vice President; E. L. Hart. Wichita, Treasurer; Dan C. Smith, Wichita, Secretary and General Manager; C. M. Casey of Wichita, Assistant Secretary. The board of directors consisting of twenty-five have been selected from many parts of the state. Among them are W. J. Todd, Maple Hill; J. C. Mohler, Topeka; J. H. Mercer, Topeka; A. M. Campbell, Bentley, and W. M. Ferguson, Wellington. Several are from Wichita and nearby points. They include some of the city's leading business men and prominent breeders of live stock; among them is E. G. Hoover, well known breeder of Duroc hogs, The last legislature appropriated \$5,000 for this show.

# From April 20 to 25

The Kansas State Wide Clean-up Week, which has been proclaimed by Governor Paulen, and is under the direction of the state fire marshal's office, will be April 20 to 25.

# \$1,120 From Mortgage Fees

Doniphan county took in \$1,120 in March from mortgage registration

# **60 Milking Shorthorns** Dispersion, Altoona, Kan., Monday, April 27

The sudden death of Mr. Hyde makes necessary the closing out of this well known herd, that has been bred for milk and beef production for 35 years. Included are quite a number of record of merit cows, mostly daughters of White Goods 456866, an outstanding 2500 lb. Scotch bull with more "Record of Merit" daughters to his credit than any other Scotch bull in America. He is included in the sale. Every animal in the sale is a good one. For catalog write

# Our Kansas City House - built to give you Better Service and Quicker Delivery

WARD'S came to Kansas City twenty-two years ago!

Twenty-two years ago we saw that we could give you better service from Kansas City. We saw that we could get your goods to you quicker and save you money by serving you from Kansas City.

# We Appreciate Your Patronage at Ward's

Twenty-two years ago-in appreciation of your patronage, we began our Kansas City Service. Here your orders reach us quickly. And we make shipment by the shortest, most direct route so that your goods reach you quickly. Trading with you right here within a few hours of your home seems more friendly and neighborly. And we like it because it is so much more satisfactory to you.

# An Immense Local Store with the **Buying Power of Six Big Houses**

This Kansas City House has 26 acres

of floor space filled with vast assortments of bright new merchandise.

But immense as it is, this Kansas City House does not have to stand alone. It is one of our six big houses located in six different cities to give the quickest and best service to our patrons.

Together these six big houses constitute Montgomery Ward & Co. Together they have a vast buying power that secures for you the lowest possible pricealways.

Sixty million dollars' worth of merchandise was bought for this Catalogue! Think of this vast buying power! Sixty million dollars' worth of goods bought in the largest quantities-for cash. There is the reason for Ward's low prices.

# Ward's Stand for Quality And Low Price

At Ward's, quality comes first. It is easy to make low prices - if you do not

consider wear and service and satisfaction. Our first question is: "How long will this pair of shoes last you?" "Will this material give you satisfaction?" We try never to sell goods that will not stand inspection and use.

"We never sacrifice quality to make a low price." We offer no price "baits" on 'cheap" unsatisfactory goods. We are always trying to win your regular patronage by giving you complete satisfaction with everything you buy.

# Use Your Catalogue Take Advantage of Its Savings

Use your Catalogue. Send all your orders to Ward's at Kansas City. We appreciate your patronage. We will try conscientiously to give you satisfactory service and always honest, reliable goods.

So use your Catalogue. It offers you a saving of \$50 this season—if you send all your orders to Ward's.
