

Geographic Regions for Crop Cost-Return Budgets

Department of Agricultural Economics

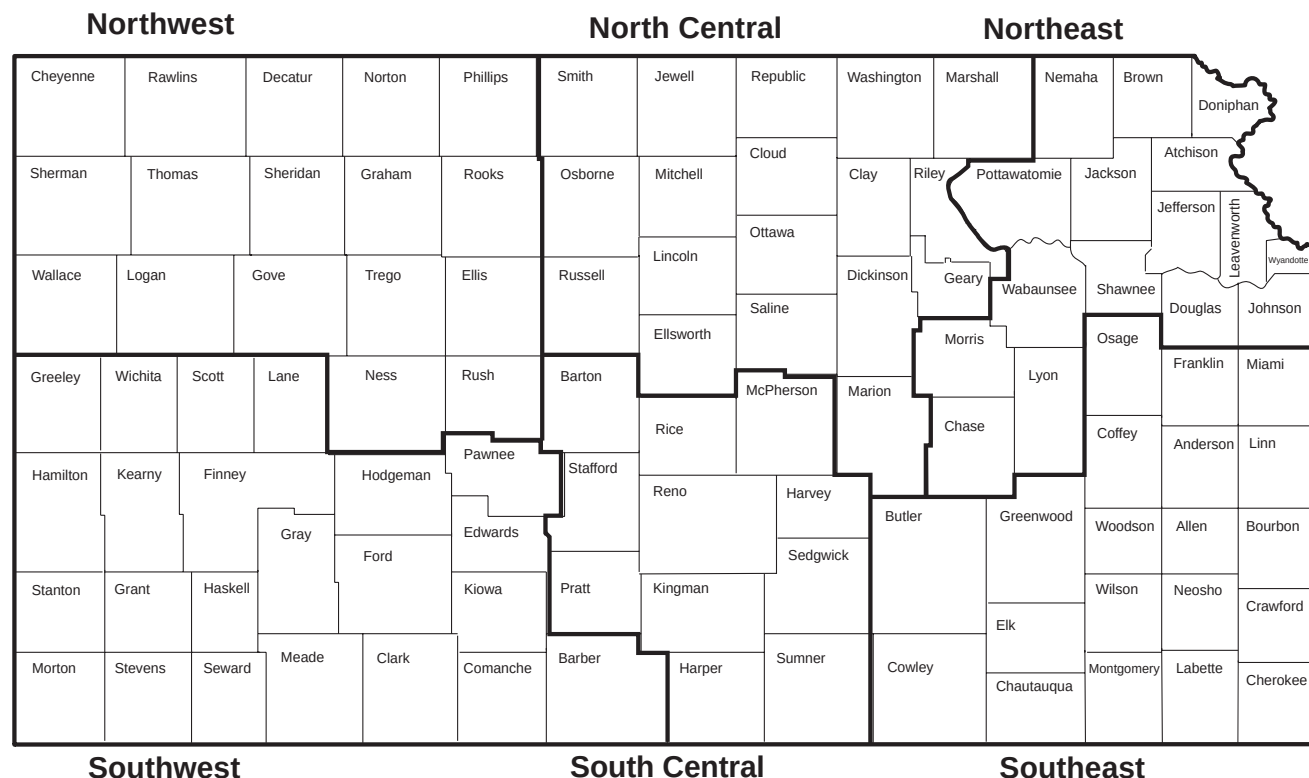

Kansas State University Agricultural Experiment Station and Cooperative Extension Service

Larry N. Langemeier
Extension Agricultural Economist
Farm Management Studies

The nonirrigated and irrigated crop cost-return budgets contained in this KSU Guide Handbook were formulated on a regional basis following the six regions outlined in Figure 1. Most nonirrigated crop budgets for western Kansas were developed for the combined northwest and southwest regions. All of the irrigated crop budgets were formulated for this combined western region.

The six regions outlined in Figure 1 are identical to the regional areas of the six Kansas Farm Management Associations. Given this fact, users of the crop cost-return guides can compare the crop budget information with the crop enterprise analyses provided in the annual publication *The Enterprise Analysis Report*, Kansas Farm Management Associations, Department of Agricultural Economics.
