

Soybean Cost-Return Budget in North Central Kansas

Department of Agricultural Economics

Kansas State University Agricultural Experiment Station and Cooperative Extension Service

Bradley D. Lubben
Agricultural Economist, NE

Stewart R. Duncan
Crops and Soils, NE

While Kansas is not a leading soybean producing state, the total acreage of soybeans has grown considerably in recent years across the state and in north central Kansas. As with many north central Kansas crops, soybeans are produced using various crop rotation and tillage systems. This budget is based on soybean production in rotation using a no-till system.

Income Per Acre

Crop production costs per unit and net returns are highly dependent on yields. The following estimated budgets include three different yield levels, which are intended to represent expected yields for land of varying quality for a given level of management. Yield levels are based on historical data from Kansas Agricultural Statistics Service and the North Central Kansas Farm Management Association, adjusting for trends over time. Based on K-State research findings, this budget assumes a higher yield for soybeans in rotation than would be expected for continuous soybean production. Land values and government payments have been adjusted for alternative yield levels in this budget. In customizing a budget to your farm, attention should be given to using land values representative of your farm's productive capacity as well as government payments specific to your land.

Price per bushel represents an expected harvest price in Beloit, Kan., accounting for government marketing loan price support levels. Soybean producers in other areas of north central Kansas should use an expected price that is representative for their location. Typically, a reasonable

Table 1. Production Inputs — Soybean

Item	Yield Level (bu)			
	14	23	31	
Seed, 1,000/a*	150	180	210	\$0.18/1,000
Fertilizer:				
N (anhydrous)	0	0	0	\$0.21/lb
N	0	0	0	\$0.30/lb
P	12	20	27	\$0.24/lb
K	0	0	0	\$0.16/lb
Lime	500	500	500	\$0.01/lb
Herbicide				
Glyphosate	24.0	24.0	24.0	\$0.14/oz
+ 2% Ammonium Sulfate	1.5	1.5	1.5	\$0.24/lb
Roundup Weather Max	22.0	22.0	22.0	\$0.36/oz
+ 2% Ammonium Sulfate	1.5	1.5	1.5	\$0.24/lb

* Roundup Ready

forecast for price is to use the futures market adjusted by the historical basis for a particular location, where basis equals cash price minus futures price.

Crop insurance was not included as an input expense in

Table 2. Machinery and Land Resources — Soybean

ITEM	Yield Level (bu)			Custom Rate	Farm Rate*
	14	23	31		
Tillage/Planting/Chemical Applications:					
Chisel	0	0	0	\$8.02	\$10.17/a
Disk	0	0	0	\$6.42	\$8.14/a
Field cultivate	0	0	0	\$6.18	\$7.84/a
No-till drill	1	1	1	\$10.90	\$13.83/a
Anhydrous application	0	0	0	\$6.18	\$7.84/a
Fertilizer application	1	1	1	\$3.68	\$4.67/a
Herbicide application	2	2	2	\$3.85	\$4.88/a
Insecticide / fungicide application	0	0	0	\$3.92	\$4.97/a
Harvest					
Base charge	1	1	1	\$19.35	\$24.55/a
Extra charge for yields exceeding	0	0	0	\$0.000	\$0.000/bu
Hauling	14	23	31	\$0.124	\$0.157/bu
Non-machinery labor	0.62	0.64	0.65		\$10.00/hr
Land value/acre	\$565	\$706	\$847		5.75%
Interest on capital					7.0%

* Farm Rate equals Custom Rate x 126.9%

Crops 14 — Revised October 2004

this budget because yields reflect an average of all years (good and bad). If crop insurance is included as an input expense, then an expected value for indemnity payments should be included in the returns section.

Costs Per Acre

Production costs at the three yield levels are shown on lines 1 through 13. Kansas Custom Rates for specific field operations are used to represent fuel and labor costs as well

as machinery repair, depreciation, and interest expenses. Table 1 identifies seed, fertilizer, herbicide, and insecticide requirements (rate and cost/unit) for soybeans. Fertilizer requirements (phosphorus) are adjusted up for the higher yields expected under rotation. Herbicide requirements include both pre-crop and in-crop treatments. Table 2 outlines the machinery and land resources used for soybeans in a no-till system.

COST-RETURN PROJECTION — SOYBEANS — NORTH CENTRAL KANSAS

	Yield Level (bu)			Your Farm
	14	23	31	
INCOME PER ACRE				
A. Yield per acre	14	23	31	
B. Price per bushel.....	\$ 5.53	\$ 5.53	\$ 5.53	
C. Net government payment.....	\$ 12.62	\$ 13.72	\$ 14.82	
D. Indemnity payments.....	\$	\$	\$	
E. Miscellaneous income	\$	\$	\$	
F. Returns/acre ((A × B) + C + D + E)	\$ 90.04	\$ 140.91	\$ 186.25	
COSTS PER ACRE				
1. Seed	\$ 27.00	\$ 32.40	\$ 37.80	
2. Herbicide.....	11.90	11.90	11.90	
3. Insecticide / Fungicide				
4. Fertilizer and Lime.....	7.88	9.80	11.48	
5. Crop Consulting				
6. Crop Insurance				
7. Drying
