Passive vs. Active Wealth

"MEN who want both to succeed and to render service should strike out on new lines rather than travel the worn paths of accepted success. It requires a better type of mind to seek out and support or create the new — — " — — Albert W. Atwood.

The Standard Oil Company [Indiana] always has sought to create the new—to add to the tangible wealth of the community—to make new values, thus leading in service and gaining leadership through service.

Petroleum in the ground is potential and passive wealth. Petroleum on the highways, in service stations, in tractors, trucks and automobiles, is active, usable wealth, rendering a distinct and important service to humanity.

Before the organization of great companies to transport and refine crude petroleum and to make the resulting products available to all the people, this vast, potential wealth was not worth a cent.

Today, with the machinery of industry in place and hundreds of millions of barrels of crude passing in an unceasing stream from oil wells to consumer, this passive wealth has become active—and what was valueless before is now worth billions of dollars.

This is service—the most real and fundamental kind of service. It is service due to leadership—to keeping always "a little in front o' the next". And in return for its part in this service, the Standard Oil Company [Indiana] has taken but a tiny fraction of the new national wealth which it has created.

People in general think of wealth in terms of money but, wealth is not money. It is merchandise—it is products which add comfort, luxury and satisfaction to life.

The Stardard Oil Company [Indiana] has taken the initiative in rendering this great service to humanity—it has converted passive wealth into hundreds of useful products which are prominent factors in the industrial and agricultural development of the nation—it has made petroleum products of every description available to the thirty millions of people in the Middle West.

Standard Oil Company

Where the Pencil is Mightier Than the Plow-or a Cow

CAN produce a bushel of wheat, which this year was worth \$1, in 15 minutes. But I cannot produce \$1 worth of butterfat in less than an hour. Both wheat and butter are world products, but wheat enjoys a wider market. That is why I am growing just as much wheat as possible without overbalancing my farm program.

Twenty years of record keeping form the basis of my calculations on the relative cost in my own time of producing butter and wheat of equal value. Wheat is more profitable when I consider the expenditure of my time—and my labor income—but the number of quarter hours I can devote to the production of wheat in a year is limited. That is why I am still milks, ing some cows, devoting portions of my farm to other crops and handling other classes of livestock.

By L. T. Woods

As Told to M. N. Beeler

Ablick the iand. Probative wheat growing. A bushel of wheat must be worth \$1 else it will not pay. The well-equipped and the wise farm—tellify the milks that \$1 else it will not pay. The well-equipped and the wise farm—tellify the went of a grain binder, or of a plow, drill and other wheat growing. The well-equipped and the wise farm—tellify the most of the same troop. It is properly diversified he will be in position to do that.

My records indicate that I live in a tent take the value of your time. But to do that.

Some of the other crops on this to handle fewer that three eightles." I am farming four. Teams, tractors, of the case of butterfat and wheat.

Corn is one of the easiest crops on the wheat growing. A bushel of wheat must be worth \$1 else it will not pay. The well-equipped and the wise farm—the hallow from hay sold.

When have legative my position on wheat is rably devoling not head to the velow from hay sold.

The life of a

my farm to other crops and handling other classes of livestock.

Figuring Labor Income

Figuring Labor Income

Don't misunderstand me on this aday, and since we give four cultidary proposition. As a member of various that would total 15 days for a large cultivation to the dairy promotion activities of the dairy

which went back to the land. Probably if that were considered the returns from hay fed would equal those from hay sold.

The life of a grain binder, or of a plow, drill and other wheat growing equipment is rather definitely known, so it is comparatively easy to figure the labor return on that crop. It is properly diversified he will be in position on wheat growing. A bushel of wheat I profess to have discovered an intallible rule for making money on the farm. Twenty years ago I bought one quarter section 5 miles northwest of Newton. Later I added another. I have paid for the land and am out of debt. But there is no way I can figure that I have made money during the last five

Corn is one of the easiest crops on I utilize them to the maximum extent which to figure the labor income. For at profitable employment I lose money, instance, we can list 8 acres a day. I find that I can get the most profitwith the weeder and two-row culti-able work done with my equipment vator it is possible to work 16 acres and my labor by operating the half

money in them. I am reducing my holdings. This seems to be a good year to sell feed. Whether I do that or feed my grain and alfalfa depends

there is no way I can figure that I have made money during the last five years. Books may or may not show that your operations have paid. There's but one true measure of your operations and that is your bank or cash balance. During the last five years my farming operations have failed to pay expenses by \$1300. In other words,

\$5,000 Worth of Meat a Minute

By Thomas E. Wilson

HE meat packing industry of America sells \$5,000 worth of meat and other products every minute of every working day. It processes yearly 10 million tons of meat and lard, and gives employment to 200,000 men, paying out to these folks in salaries and wages ¾ million dollars a day. It pays livestock producers 6 million dollars a day. These enormous operations require a capital investment of more than a billion dollars; a fund accumulated gradually over many years by thousands of investors.

Aside, however, from the large revenue it brings the producers, the livestock and meat industry is highly important to the farmer in that it utilizes a large percentage of the grain grown, and of hay and other forage crops. More than 80 per cent of the corn crop is fed to livestock and marketed on the hoof as meat, or sold as milk, butter and cheese.

70 Per Cent for Animals

Livestock utilize forage crops that otherwise would be wasted, and trans-form them into nutritious food. The economic importance of this function of livestock can hardly be over-estimated. It enables farmers to use land unsuited for other purposes, and undoubtedly lowers the cost of human food.

The United States Department of ture estimates that 70 of our crop area is employed in feeding livestock.

In the maintenance of soil fertility, the livestock and meat industry plays a large part. And the man who raises crops on his own farm and, without paying trasportation costs or in some cases without paying harvesting costs, feeds them to his livestock, undoubledly will, in the long run, profit more than the crop farmer. He also will conserve the fertility of his soil.

The livestock and meat industry is important to agriculture and to the world because it supplies human be-In the maintenance of soil fertility,

ings with what undoubtedly are the tions without foods containing animal most important and essential foods in protein, such as is found in meat, milk our dietary—meat, milk and other or eggs. Few are the families, indeed, dairy products. Experiments have that do not serve these outstanding products of the farm on their tables once, not survive thru succeeding generativice, and, in most instances, three

times daily with satisfactory results. The products of livestock constitute one of the most important items in America's export trade. Exports of meat and lard represent 10 to 12 per cent of the value of all agricultural exports. Records show that 2 billion pounds of meat and lard were exported last year to 30 countries. The sales manager of a meat exporting sales manager of a meat exporting house literally must be able to "survey mankind from China to Peru." Animal products from American farms were sent to both of those countries in

More than a billion pounds of lard was exported last year. This was val-ued at 133 million dollars. Most of this lard was consumed in England and the Central European countries.

Help the Medical Profession

The livestock and meat industry of America not only supplies consumers at home and abroad with some of their most healthful and nutritious foods, but also furnishes, in the form of by-products, the materials for many articles which add to our every-day com-

Can you imagine what we would do without leather, wool, soap and glue? These articles, like many others, originate in the meat industry. In some cases, these products are processed by the packing industry, but in most in-stances the by-products, perhaps in partly processed form, are sold to other industries where they serve as raw materials for further manufacture.

materials for further manufacture.

It also is the source of many pharmaceuticals used by the medical profession. Truly, the livestock and meat industry is the heart of agriculture, and, more than that, it is an indispensable part of our civilization. It seems to me that it will grow steadily, on to an even more efficient basis than it occupies today. Certainly the tendency is in that direction. I think tendency is in that direction. I think that the development up to now is one of the most fascinating things in the American industrial life of 1924.

We make this guaranty with the provisions that the transaction take place within one month from the date of this issue; that we are notified promptly and that in writing the advertiser you state: "I saw your advertisement in Kansas Farmer."

Passing Comment—By T. A. McNeal

N INVESTIGATION by the Russell Sage Foun-A dation shows that on an average, taking good years with bad, even here in the United States, 40 to 12 per cent of the workers are out of employment. This does not mean that the same peo-ple are out of work all the time or that in all years there are 10 or 12 workers out of every hundred who are jobless, but on the average there are that many who are out of work.

No doubt part of this idleness is voluntary. Some people are without jobs because they are not will-ing to work, and others because they are not will-

ing to take such jobs as they can get.

But after deducting all these there still are perhaps 2 millions willing to work who are compelled

Nothing else contributes to general contentment and health so much as a steady and reasonably agreeable job.

With the improvement in machinery there is little need for disagreeable jobs. The hard work can now for the most part be done by machinery, therefore all work should be reasonably healthful and comfortable.

But Living Standards Count

DO NOT think a majority of men or women are ambitious to become rich, as we understand riches now. Most of us would not seriously object to riches if we could get them without too much hardship and sacrifice, but we are not consumed with a desire to accumulate a great deal of wealth. We do, however, like to live comfortably. We have different standards of living. What may mean merely a comfortable living to one may may mean merely a comfortable living to one may mean luxury to another, but according to our standards all of us like to live comfortably. We also like to have a feeling of security. Have you ever dreamed that you were out of a job and money? I have had such dreams, and I can testify it is a most distressing feeling. How much worse it would be if it were an acquality!

be if it were an actuality!

Right here I want to advance a theory that may sound a bit socialistic. I have long ceased to be afraid of names. I am not particular about what a thing is called if it works. I believe the Govern-ment should adopt a system of public work to take up the slack in private employment. There is a great deal of public work that needs to be done, such as building roads and developing water power. Let the Government offer employment at fair pay to persons who cannot find employment at remunerative wages in private industries. The wages should not be so high as to unfairly compete with private industry, but high enough to afford a comfortable living for the worker.

In most cities we have vagrancy laws, which put a penalty on persons found idling. We say it is a crime to be idle unless the idler has visible and legitimate means of support. If that is sound social and economic policy then it would seem to follow that the governing power should furnish the opportunity so that no one able to work need be idle. It certainly is unjust to punish an individual for what he cannot help, and if he is idle because he cannot get a job it is unjust to punish

Tramps Went to Work

With all of its horrors there was one thing W to be said for war time; there were virtually no tramps. There was no possible excuse for any able-bodied person to be out of a job, because there were more jobs than workers. At that time, also, the Government, owing to war necessities, furnished a large part of the employment.

We do not want to go back to war conditions, and there is no need for that. This country has tremendous undeveloped resources. There is enough work that needs to be done to keep everybody busy. The fault is in the matter of adjustment; it is a question of distribution.

How About the Mexicans?

URING the last 10 years the immigration authorities have admitted 350,000 Mexicans to the United States, and more are coming every year. During the year ending June 30 the number was 87,640.

Once in the United States these Mexicans scatter all over the country. Many are employed as section hands, others in the sugar beet fields. A Mexican colony of 5,000 is reported near the steel mills at Joliet, Ill., and smaller colonies have settled at Gary and Indiana Harbor, Ind.

The new immigration law does not limit the number of Mexicans who may come in, and so long as the demand for them as laborers at bigger wages than they can hope for in Mexico continues, they will come in increasing numbers.

While the Mexican is not regarded by Americans as a very high class citizen, it cannot be said that there is more crime or disorder among them than among other nationalities. They do not live in the style that even poor people among the whites are willing to live, but they do not create much trouble. They attend to their own business and apparently make satisfactory railroad laborers; at any rate the roads continue to employ them in in-

creasing numbers.

But if they get numerous enough they will create another racial problem.

Needed a Pair of Pants

T USED to be said that Mexican laborers were lazy, shiftless and without ambition. I have heard Americans argue that it was all right to employ Mexican peons in Mexico at 50 cents a day, which was equivalent to 25 cents in our money. I was told that the only use the Mexican peon had for money was to buy a little food and an occasional cotton shirt and a pair of pants. If he got more than that I was told he would quit work and loaf until he spent the extra money. The experience with Mexican laborers in the United States does not bear out that theory. They are about as reliable as white men, and they do not waste their money to so great an extent.

Negro Judge in Chicago

HE migration of negroes from the South to the North continues, so that now in several of the states the negro vote has become an important factor. According to the census of 1920 there were 67,846 negro males of voting age in Illinois and 60,604 females of voting age. In Ohio there were 70,853 colored males of voting age and 56,087 females. No doubt the number of negro voters in these states has increased considerably since that census was taken. At the last election a negro judge was elected in Chicago, the first of his race to attain so high a position there. In the South negroes are still discriminated

against greatly in the matter of education, but at that there is a good deal of money spent in edu-cating the race. The amount spent for negro education in the United States for 1920-21, according to the Negro Year Book, was \$28,773,653. In 1922 the productive funds of colleges and universities for negroes amounted to \$3,850,000.

Fisk University at Nashville, Tenn., has recently

completed the raising of an endowment of 1 million dollars. This is the largest endowment of any negro college or university. Hampton and Tuske-gee are in a campaign to raise 2 million, a condi-tional gift of 1 million having been promised if another million can be secured by other subscribers. The race problem is far from being settled in this country, but there is no reason to believe it is getting worse. I think it is getting better.

Brief Answers to Inquiries

JASPER-You say you are informed by a member of the Klan that the Pope is at the head of a gigantic conspiracy to capture this Government and rule it as a Catholic province. You have not heard the worst, Jasper. This person probably did not inform you that the Pope already has landed on the Atlantic coast with an army of a million well-armed men, and is marching on Washington. The best thing you can do is to hide out and save yourself while there is yet time.

DOG LOVER-It seems to me that the answer to your question as to whether a dog can be worth \$5,000 depends on whether anyone can be found who is fool enough to pay that sum. If so, then the dog is worth \$5,000 to the man who has it to

P. F.-I cannot say that chickens hatched in a brooder are any tougher than chickens hatched by a hen. I have, however, eaten alleged spring chickens in a restaurant that were so tough that it seemed to me they must never have had a mother's care.

ANXIOUS TO KNOW-You say the doctor gave ANXIOUS TO KNOW—You say the doctor gave you a prescription, after making an examination, for an ointment to be used in a treatment for "sarcoptis scniei humanis," and you ask what these words mean. Well, he might have given an order to the druggist for an ointment to cure the itch, but that wouldn't have shown that he had a professional education fessional education.

WANTS TO REDUCE—You can get the advice of a professional reducer for \$100. He will give you a list of exercises to go thru, such as kicking out with each leg alternately 25 times, striking out with the arms 50 times, bowing your body down, up, right, left, back, forward 50 times. If you keep it up long enough and do not eat anything worth mentioning for two weeks you ought to knock off 30 or 40 pounds. Then again you can get a pile of logs and a crosscut saw and work on that every day for the same time and refrain from eating for two weeks and probably take off 50 pounds. This method won't cost you a cent, except the value of the logs and the saw, and you will have some-thing to show for the motions you go thru; but you won't do it. We are so constituted that we must have somebody tell us what to do when we ought to have sense enough to do a better job without anybody telling us without anybody telling us.

TIRED WIFE—So far as I know there is no cure for snoring. I have known a number of men who quit, but they are dead.

S. J.—Yes, I think it is a good thing to save and cultivate the habits of thrift and economy; still it might be carried to an extreme. I knew a farmer who used to put a good many apples in his cellar every year. He insisted that the members of the family must eat the wormy and partly rotten apples first. The result was that they kept on cating wormy and partly rotten apples all winter.

In Days Gone By

BY EDITH SITWELL

Sweet was my childish life to me Like the first spring dream of a hawthorn tree.... Every night an ancient crone Crooked, silver-flowered as a thorn, Came as quietly as the moon Thru the frosty night, with her old lanthorn. And put my childish self to bed With all the dreams that nest in my head. And the moon's shadows were silvery seen As hawthorn blossoms, perfumed flowers The glamour of beauty that never has been— With petals falling thru the night hours; And as the old crone spoke to me Night seemed a flowering Chinese wave That bore me to each cloudy cave Where there are mysteries none may see-In far Thibet and Persia; words Grew into lands unknown, where birds Were singing in an unknown tongue Of loveliness forever young. Then in the morning an aged sage Tall and thin as a cloudy cage Came, and we looked below at the eaves Where cool airs float like lotus leaves And the crystal grass-blades of the rain Trembling grow to music again. He said, "We are wingless, can only infer What even the smallest birds can see. Outside in their nests they begin to be-A spark of fire, and grass-like frondage In crystal eggs as hard as the air....

They break, as instinct from earth-bondage
When man was sightless, before thoughts were
And the music that birds know, to me is unheard
Tho my head seems the egg of an extinct bird
And my hair seems the crystal grass-blades of the rain
Upon the forlorn blue cliffs of the Day

Trembling and growing to music again.
But my heart still dreams that the warmth of spring Will stir in its thickets, begin to sing In the lonely crystal egg of my head— Tho it seems all the loyely wings are dead And only pity and love are left In my wintery heart, of its wings bereft."

About Naturalization

1—A boy and girl, twins, were born in the United States, children of native born citizens, 30 years ago. For nine years they go to the polls and vote. This year they went to Wembley, London, to see the British exhibition. While there they met twins, a man and woman, and there was a double wedding. The four twins will come to this country and make their home on the plantation of the American born twins. I understand the husband of the female twin must naturalize before he can vote and that the wife of the male twin must be naturalized before she can vote. But what about the sister and brother continuing to vote pending the naturalization of their respective husband or wife?

"wife?"

2—Must a woman be naturalized before she can vote if her father failed to take out naturalization papers, if she was foreign born?

3—Are the native born children of foreign parents who were not naturalized, citizens of the United States, and entitled to vote without taking out naturalization papers?

4—Must both husband and wife, foreign born, coming to this country now become naturalized before either of them can vote?

JOHN O'DONNELL.

The husband of the female twin must be naturalized before he can vote. As this marfinge took place since 1922, the American born wife does not lose her citizenship. If it had taken place prior to that time she would have lost her citizenship and would have to file a petition asking to be naturalized. It would not be necessary even then to file a declaration of intervition but the to file a declaration of intention, but she would have to live one year in this country before she could obtain her naturalization papers. Of course, if this marriage had taken place prior to the change in the law, she could not vote until she had obtained her naturalization papers.

2—If the woman's father was a foreigner and failed to take out naturalization papers, the daughter being foreign born would have to take out her own naturalization papers, the

out her own naturalization papers just the same

as her father would have to do.

3—Children born in the United States, by virtue of such birth, become citizens of the United States of such birth, become citizens of the United States regardless of the citizenship of their parents.

4—The foreign born woman would have to be naturalized just as her husband would be.

Duties of Township Officers

Is the township treasurer compelled by law to publish an annual statement of receipts and expenditures? Is the township board supposed to appoint a road boss and is the boss bonded? Has our county engineer the power to direct the township board in all matters relating to road work? S. M. B.

1-The township treasurer of each and every township shall publish or cause to be published in some newspaper published in the township of which he is treasurer or in some newspaper published in the county in which such township is located and having general circulation in such township immediately following the annual set-tlement in December of each year a full and de-tailed statement duly verified of the receipts, ex-penditures and liabilities of such township for the year ending at the time of such annual settle-

2-The township board of highway commissioners has general charge and supervision of all township roads, bridges and culverts in their respective townships. With the approval of the county engineer they shall appoint a com-

petent, experienced road builder or road over-seer of the entire township who shall have charge of the construction and maintenance of all township roads, bridges and culverts under the super-vision of the township board and county engineer. Before entering on his duties the overseer shall give bond with surety to be approved by the town-ship board in the sum of \$250.

Conditional Deed

I am a widow 83 years old. I had a home which I deeded to my son on condition that he was to take care of me as long as I lived and was to pay all my expenses, doctor bills, funeral expenses, and the like, and in case of his death before mine I was to receive the property back. This son died very suddenly. He has a son 32 years old but his whereabouts are unknown and have been for four years. Is there any way I can get the home back?—A. W.

You are unquestionably entitled to have possession and title of the home revert to you but it may be necessary for you to go into court and ask

for an order quieting the title and also declaring the title to be in you.

I would have answered this inquirer personally

but the writer of it failed to state her postoffice address. Those who desire personal answers to questions should very clearly state their present postoffice address.

Can the Company Collect?

A got some silverware advertised in a paper and was supposed to pay so much a month. After keeping the silverware a length of time it was found that it was not satisfactory and it was guaranteed. A then sent it back. She had already paid about half. Can the company compel her to pay the remainder or can they have her sent to the pen?

I want first to disabuse the mind of the inquirer of any fear of the penitentiary. She has not in any event committed any crime according to her statement. As to whether she can be compelled to pay for this I do not know. That depends on the kind of guarantee that was given. If the silverware was guaranteed to be solid and it is found that it was plated ware, then there would be no question whatever that the purchaser would be no question whatever that the purchaser would have a right not only to refuse to make the rest of the payments but also to collect whatever money had already been paid.

If the silverware, so-called, was only represented to be plated ware but plated ware of a certain quality, that is, for example the best of triple plate, and it was found when the silverware was put to use that it was not plated as represented, that again would give the purchaser the right to return the silverware and demand a return of the return the silverware and demand a return of the money. In other words, if there was any violation of the guarantee on the part of the seller of this silverware, he would be held to the terms of his contract. There may, however, have been a stipulation that if the purchaser was not satisfied the silverware must be returned within a certain resilverware must be returned within a certain period and if the silverware was not returned within that period the purchaser would be held to have slept on her rights so to speak and could not in that event recover.

Settlement of Note

A borrows \$1,000 from B for six months and gets C to sign the note. This note is not paid when due and has run for seven years but the interest has been paid every year. About two years ago B died and the administrator of his estate wants this note paid so he can make settlement. A makes all kinds of excuses and will not pay it. A has three-quarters of a section of land and it has all been mortgaged but not for the full value. Can B's administrator make C pay this note and if so can C bring suit and make A pay him and get judgment against A's property? What steps would B's administrator have to take to force A to pay the debt? J. H.

The administrator can bring suit against both A and C. provided of course that C has consented to a renewal of this note. Or if no new note has been a renewal of this note. Or if no new note has been made then C is liable on his old note. After judgment is obtained against A and C, the administrator may levy upon any property of either which is not exempt or which is not fully covered by mortgage. Of course, he can levy upon any property subject to mortgage. erty subject to mortgage.

If C who is merely an endorser on this note has to pay it he would have a right to judgment against the principal of the note, A, and could protect himself by levying upon any of A's property which is not exempt.

Various Questions

1—There are three parties to a contract, A, B and C. Can A sign a bond to advance a case for C against B and then be chosen juryman by the court to convict B? 2—Does the law require a juryman to know all things and be chosen juryman against B? Has an attorney any right to permit A to be juryman when he knows A has signed a bond for C against B and if C sucqueds in winning the case against B is it illegal? What action can be taken against A, if he has done an unlawful act against B, acting as juryman when he has taken an oath before the court? Has C any right to go on with the proceedings without first notifying B?

A's act in signing the bond for one of the parties in this suit would be sufficient reason for challenging him for cause but if he was not challenged this fact would not necessarily disqualify him as a juror.

I, do not know just what you mean by your second question. A juryman is not supposed to have an opinion either for or against either party to the controversy. If this attorney was an attorney for B he certainly was very derelict in his duty if he permitted a prejudiced juryman to get on the panel knowing he was prejudiced against his client. If any juryman swore falsely in his examination for juryman that would be sufficient ground for attacking the verdict but the mere fact that he got on the jury, unless he made false statements in answer to questions that were asked him, would not be sufficient ground for setting aside ond question. A juryman is not supposed to have would not be sufficient ground for setting aside the verdict. If A swore falsely in answer to any question that was asked him when he was being examined as to his qualifications for juryman, he would be guilty of perjury and might be prosecuted

The Nation's Verdict of 1924

F I were not proud of the tremendous testimonial given me at the polls by the people of Kansas, I should be less than human as well as lacking in appreciation and gratitude.

as lacking in appreciation and gratitude.

When on a previous occasion they voted me a majority of 162,000, that was thought to be a record. But their indorsement by a plurality of 275,000 of what I have been undertaking in the Senate, breaks all voting records west of the Mississippi and puts me under a heavy obligation indeed

The Square Deal program meets with the approval of the people. I shall go back to Washington stronger in my sincere belief that he serves his country best, and est who serves his country best, and that such labors are never in vain.

I also owe a personal acknowledgment to hundreds of friends in other states I never have met, who took the trouble to write me encouraging letters tors wishing me well and regretting they could not vote for me.

Another gratifying result of the election was the return to Congress of the entire Kansas delegation which supported the so-called "farm bloc," all by increased increased majorities.

As to the Nation's verdict. It was sweeping. Emphatic. And to that extent, I think, the best thing which could have happened at this time. It proves the country regulates extreme radicalism. proves the country repudiates extreme radicalism, not at all that it endorses reaction. It was a verdict for the man and what he stood for—for Coolidge and hardboiled economizing—which the good hard sense of the American people told them was what the country needed here and now and that they were getting at his hands. Very many Democrats and nearly all progressives of both parties must have voted for Coolidge and Dawes.

In the measure only that the Republican party still has the confidence of the people more than any other, and that in times of trial they naturally turn to it, was the election a Republican victory—

a Republican victory in its best sense, in a truer

The world has been desperately sick. It needs rest and quiet to recuperate. It is world opinion as demonstrated by events in foreign countries and in this country, that this is no time to try experiments, that the present business in hand must be to reduce the terrible burden of debt and taxes be to reduce the terrible burden of debt and taxes. Certainly this is the worldwide issue dominating Certainly this is the worldwide issue dominating all other issues at the moment, and America under President Coolidge has not simply shown the way to solve it but is solving it by following the late John Sherman's famous dictum that the way to resume is to resume. That is, act!

The country now has all the machinery to effect this regult in full constiant therefore why displace.

this result in full operation, therefore why displace the chief engineer who is doing so well, in favor of some untried executive? That, I believe, was the

compelling reason for the retention of President

It will not do to misunderstand the public's mind. There is danger the country's elements of reaction will misread the Nation's verdict as a license to run away with things. There could be no greater mistake.

President Coolidge knows this. He would liberalize the Republican party. He stands firmly for the Square Deal program. And there emphatically is where the country stands.

There was less rancor and mudslinging in the campaign just closed than in any other in American history, which speaks mightily for the increasing political intelligence of the people as a whole.

In his speech of acceptance instead of lambasting the Democratic

ing the Democratic party, President Coolidge presented a concise, convincing and scholarly dissection of the country's economic ills and the means we must take as a people to cure them. He reasoned rightly that these were the things which really concerned and interested the people, and the result has proved how correct was his judgment.

His Hens Must Back Their Cackles With Eggs

ENS must have something to cackle about or they do not find a welcome in N. R. Bickford's laying house at Oswego. He has eliminated all chance of deceit by installing trap nests, and every candidate for winter quarters in his houses must live up to her preplection promises or he institutes a receil with the election promises or he institutes a recall without recourse and a new incumbent is installed.

Bickford used to be a general farm boy and be-cause there were 10 children in the family and it was 15 miles to a high school, he had no opportun-ity for secondary and higher education until after he had served overseas more than two years and had been wounded and gassed twice in the recent

had been wounded and gassed twice in the recent European unpleasantness.

Then the Government offered to do something for him. He undertook disabled veterans' training at Kansas State Agricultural College. Of all the courses of study offered to beguile and try the minds of students, that in poultry husbandry appealed to Bickford. He annexed some scholastic honors in completing the course and made the judging team for vocational students. He was high man in the contest at the Heart of America Poultry Show in Kansas City in 1921 and stood fifth at try Show in Kansas City in 1921 and stood fifth at

In the spring of 1922 he established a small poultry farm near Oswego, installed White Leghorns, some trapnests, named his place Just-Laid Egg Farm and began shipping his products to New York City.

He's just as hardboiled with the loafing hens as he's just as hardboiled with the loafing hens as he was with the squareheads in France. If the hens do not measure up to the standards for which he is breeding, they don't have a chance to have their progeny pedigreed. And if they do not produce enough eggs to return a profit above the feed and care they require, he can't see them. No hen the next loaf around a will cond they can mount the nest, loaf around a while and then hop off with an exultant but deceitful cackle. Once they make up their minds to go on the nest they've got to come thru with an egg or let their perfidity be known, because they can go into a trapnest, but somebody must let them out. And Bickford won't open the door until they have deposited one egg.

open the door until they have deposited one egg. He has, according to his own deposition, more than 200 hens which have stepped up and paid 200 eggs for their keep within a single year, and he has two hens which have thrown in another hundred or more for good measure. One has a record of 305 eggs in 365 days and another was past 300 eggs October 31 with 20 days to go. Last year he installed an incubator of 3,500 eggs' capacity and sold chicks for 24 cents to \$1 apiece, according to the trapnest records of their mammas and papas. The flock has been christened "Just Lay" in con-The flock has been christened "Just Lay" in conformity with the farm name, but Bickford avers that they also win at the shows, which indicates he is striving for breed characteristics and production in one package.

For market eggs he receives a much better price than producers who sell at home. Last winter his eggs graded mostly "Fancy Whites" after being shipped half way across the continent. He received 72 cents a dozen when the same grade was selling in Kansas City for 40 cents. Express charges were

8 cents a dozen.
Bickford has been helping his neighbors improve their flocks. Soon after he established the farm he offered to aid farmers who might desire his services. One of the results of this contact with other poultry and egg producers was the organizaother politry and egg producers was the organization of one of the first co-operative egg shipping associations in the state. He is secretary of the Kansas branch of the National Breed Club. He contends that the Kansas White Leghorn Club is the largest state branch affiliated with the national organization. tional organization.

Coolidge'll See 'Em Show

DRESIDENT Coolidge will visit the International Live Stock Exposition, November 29 to December 6, at Chicago. This is the show's 25th anniversary; it is the first time a President has ever seen it. More than \$100,000 will be paid out as prizes in 900 contests, not including \$10,000 of premiums in the Grain and Hay Show. Eleven thousand animals and 5,000 samples of crops will

'Twas a Natural Question

CARL MATTMILLER, one of the local candidates at Topeka, sent out some letters during the campaign boosting his candidacy. "I am writing you as a friend and neighbor," he said in the letter. A few days later he received this reply from a Topeka woman: "May I ask where you are now residing? You addressed a letter to my husband saying you were his friend and neighbor. My husband has been dead 16 years."

A Smaller Corn Yield

KANSAS probably has raised 137,241,000 bushels of corn this year, as compared to a forecast a month ago of 148 million bushels, and a yield in 1923 of 122,149,000 bushels. It is practically

There's a Place for All Things

all sound grain. The yield for the United States is 2,477,538,000 bushels, as compared to more than 3 billion bushels for the last four years. The quality is 63.2 per cent, the lowest in 30 years, except

"Young and Stalwart in '62"

A FEW days ago, W. H. Alexander, aged 85, the last of the veterans of the Civil War in Greenleaf, died. And thus passes, in this community, the last representative of the Grand Army, that once vital force in the Nation's life. Soon, alas taps will be sounded everywhere for all of these men who rallied "when the flag of the enemy darkly waved," as they "marched to the war away." And with it passes a tremendous responsibility to the American Legion. sibility to the American Legion.

Kansans Will Study Tractors

Power farmers and prospective power farmers of Kansas will have another opportunity to attend a real tractor school this winter when the Advance-Rumely Company holds its annual courses of instruction at Wichita and Kansas City. The school will be held at Wichita January 27 to 30, and at Kansas City from February 3 to 6. Farmers can attend these schools free, and obtain all details from local representatives or direct from the branch houses of the company at either of the two cities. This is the sixth season for these schools, and the attendance has grown every year.

Producers Got 97.11 Cents

IN THE last 11 years the Wisconsin Cheese Producers' Federation has handled 154 million pounds of cheese, worth \$34,250,000, at an average handling cost of 2.89 cents out of a dollar; the producer got the remaining 97.11 cents.

He Didn't Have Rods

LIGHTNING destroyed the farm home of Lloyd Meyers, 3 miles northeast of Morrill, a few nights ago. The Morrill chemical car made a heroic run to the fire, but all it got was the exercise—in the meantime the home had burned.

An Agricultural Radio Conference

AN AGRICULTURAL radio conference will be held December 4 in Chicago. You can learn more about it from W. C. Warburton, United States Department of Agriculture, Washington,

But Hubby Won, Anyway

IN WHAT was perhaps the most unique election contest ever held in Missouri, F. C. Yates of Greenville, a Democrat, defeated his wife, a Republican, for county coroner, by 328 votes.

Less Need for Poorhouses

THERE has been an encouraging decline of the population in the poorhouses of America. In 1880 the inmates numbered 132 for every 100,000 population; today it is 70.

Milo Made 26 Bushels

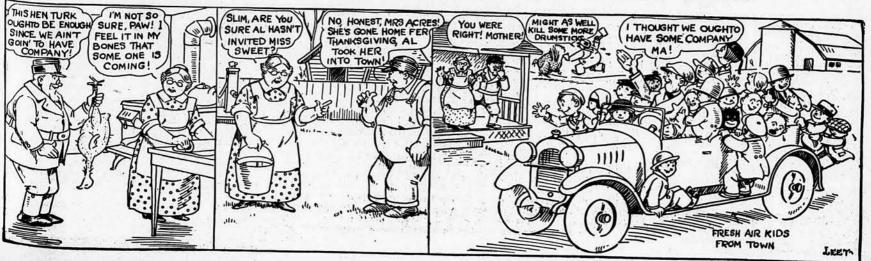

THE average yield of mile at the Hays Experiment Station for the last 12 years has been 26 bushels an acre, Dawn kafir 21.5 bushels, and corn

Boy, Page the Cotton Pickers

COTTON pickers are needed on the farm of Orville Ellis, northeast of Lyons; he has 40 acres of this staple, which will average ½ bale an acre.

Husks 9 Acres a Day

A CORN picker is at work on the farm of Swank Brothers, 6 miles east of Ottawa. It will husk 8 acres, or 500 bushels, a day.

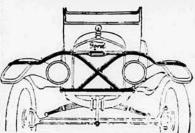

Many Winters of Wear and Lasting Style in

Will it wear? you ask your clothier. "Yes, it's all wool," he tells you. No doubt he believes that's a good reason. But here's the thing to remember about "all wool": Many fabrics are made of short-fibre wool. Short-fibre means short-lived. Long-fibre wool is the kind you want. Long-fibre—long wear! Makers of wool cloth know this.

Buy your winter coat the safe way. Look for the name, Lanpher, in the coat. Then you will get everything you want—long-fibre wool from Western sheep, the correct style, fine tailoring, quality in every detail. And these Lanpher coats are medium priced. See your Lanpher dealer.

The Corn Yields are Heavy

Do You Believe 80 Cents a Bushel is Better Than \$1 Next Spring?

BY HARLEY HATCH

TEAMS are in every cornfield in Coffey county gathering the crop, and I have yet to hear disappoint ago the corn is making 50 bushels an ment expressed as to the yield. In acre of heavy, solid ears. Last year some fields, especially on creek and river bottom, the yield is very heavy; an acre of corn so light and chaffy in no field, whether bottom or upland, is it poor. The same holds good with out 20 bushels. A few timely showers kafir; many fields have been headed and threshed and 50 bushel yields are said to be common, altho I should judge from appearances that 35 bushels would catch many of the upland corn, ground cob and all. This bunch fields. We had this good crop coming was started out on oats while on passive the control of the control of the corn, ground cob and all. This bunch fields. We had this good crop coming was started out on oats while on passive the control of the corn, ground cob and all. lidge from appearances that 35 bushels would catch many of the upland fields. We had this good crop coming to us; last year, when we were need-upland was started out on oats while on pastronaum fields. We had this good crop coming to us; last year, when we were need-upland was started out on oats while on pastronaum from the north many evenings be throwing this corn away by feeding it to cattle but we are going to chance this lot, anyway.

Here Comes a Drill Rig

While the oil business over the country seems to be mostly at a standstill, there is some activity in this neighbound for good quality wheat, with pound for good quality wheat, with kafir bringing about 65 cents a bushel.

'Twas Grown on \$70 Land

Eighty cents a bushel seems about the standard price being paid for corn by feeders, and there is some specula-tion as to how corn sold from the field at this price would compare with \$1 a bushel corn next spring. If we a bushel corn next spring. If we count shrink in weight, interest and carrying charges I do not believe there would be much difference between corn sold right from the field at 80 cents and corn sold from the crib next spring at \$1. Sound, solid corn, such as has been raised here this year, is likely to sell at a premium next spring, as that class of corn is demanded by many industries, and it is not to be found in the main corn belt this year. On the other hand, there is a limit to what corn products will stand and, compared with other commodities, corn at \$1\$ is about as high as we can expect \$1 is about as high as we can expect. At \$1 a bushel, or even 80 cents, corn has been a profitable crop this year when we consider the cost of land on which it was grown; we have very little \$100 an acre land here; most of it, especially the upland, sells for \$60 to \$70 an acre, so that 40 bushels of \$1 corn to the acre makes 1924 a year of good returns on our Coffey county land.

trip I found that work on this farm had progressed just as well as if I had had progressed just as well as if I had that even the best farmers who were been here or perhaps even better. I found several repair jobs done on buildings, 48 acres sown to wheat, which was up and looking well, 35 a hardship among Eastern farmers, who acres of corn cut and shocked, several jobs of late haying done and a lot of manure hauled out beside plenty of ers have a good income during the manure hauled out beside plenty of ers have a good income during the other work turned off. The 50 head pasture season from selling milk, but of sows and pigs had done exceptionthe cost of wintering these cows which of sows and pigs and done exceptionally well on new corn and tankage, have been giving milk all summer is and nine head of the old hogs had large and eats up the profits of the been made to weigh almost 300 pounds apiece, and they had been sold for \$9 a hundred just before the drop in grain and hay it cost from \$65 to \$75 price. These old hogs must have made to winter a count this allowed 2 tous apiece, and they had been sold for \$9 a hundred just before the drop in price. These old hogs must have made a wonderful gain for a number of them were very thin when I left. The boys lay a part of this gain to the tankage fed, and the rest to the very good quality of corn. The pige which good quality of corn. The pigs, which were of late May farrow, have gained so well that we expect to have most of them off our hands before Christmas. For the eight sows which we expect to For the eight sows which we expect to for a quarter of a century, died from keep to bring pigs next spring we have heart failure recently he left a compact patch, part sown to wheat prehensive will. He provided that his a 4-acre patch, part sown to wheat and the rest to alfalfa.

50 Bushels; 15 in '23

borhood. For one thing, a big pipe line is being laid thru this locality bound from some point in Butler county to Kansas City. It cuts directly thru this farm. Fortunately, it crosses the farm largely across broken pasture along the creek, and does as little damage as possible in 164 rods directly thru the farm. For the right of way across the farm bere 75 of way across the farms here 75 cents a rod is being paid; crop loss or dam-age caused by digging and laying operations is extra. Part of this farm is under an oil lease, and this week a drilling rig has been pulled on to the lease, and it is said operations will begin soon. I never have had a bit of luck at any game of chance, so I am not expecting a single thing from this prospective oil well. A long line of productive oil wells ends abruptly about 5 miles south of this farm, and up to this time no producing well has been found north of that line, although the several tasts have been made. several tests have been made.

\$75 for a Cow?

A question which I am asked by nearly every farmer I meet is "How are the Eastern farmers getting along?" As compared with the West I believe the Eastern farmers have had an advantage during the last four years, until this year. This year finds the Eastern farm standby—butterfat—lower in price than it has been for years, while the price of the Western grain than have to be the western grain than the western grain the He'd Better Stay Away?

When I returned from my Eastern bubble burst. For this reason most bubble burst. For this reason most over the outlook, and I was told there the outlook, and I was told there the outlook. they have to buy is higher than it has

When Frank Witschen, 55, a bachefor farmer who has lived on an 80-acre farm 7 miles southwest of Little River debts and funeral expenses should be paid, and that a monument costing not more than \$100 be erected over his grave. He bequeathed his favorite team of horses, Tom and Fannie, to John Gall a religious to the control of the control So far as we have husked the corn team of horses, Tom and Fannie, to yields have been all we expected. On John Gall, a neighbor, who by the way one field of high upland, which was is dead. He left his shotgun to Harplanted to an early maturing corn, the old Saeger, \$50 to Vera Saeger, \$50 to yield is running about 35 bushels by Vella Saeger and \$100 to Hannah Saeger and \$100 to H yield is running about 35 bushels by Vella Saeger, 550 to vera saeger, 500 to was saeger, 500 to Hannah Saewagon box measure, but in weight it ger—all neighbors. ON'T you take on," he said sooth- got big rings around her eyes," she ingly. "There's not occasion for retorted sharply. havin' chills about it this time. , "What's the res Fisher did come drivin' along while I was out there, horses goin' regular fun-eral pace. I stopped killin' potato-bugs and called to him, an' he pulled up—solemn as a church. 'Jacob,' says I, 'got a body?' 'Body,' says he, 'nothing! I've got two barrels of seed potatoes Early Rose—in here, an' I paid fifteen dollars a barrel for 'em! You bet I'm goin' to drive careful."

Mrs. Chubb was shocked.

"It's a scandal, the things he does take in that wagon! I've been feelin' real depressed-an' all along of his old potatoes!"

Mr. Chubb continued to laugh softly, rubbing his chin.

The big shop doors stood open, and across the wide road they could see some cows moving placidly in a mendow that was deeply green. Be-yond it were those silver birches whose white stems had startled Lucile in the dark. Above, fleecy clouds lay in the blue sky, like sheep along the edge of a pasture. It was so peaceful that a scarlet tanager dared to alight

on the low stone wall by the bridge.
"Darn it!" said Pap Chubb with apparent irrelevance. "I wish I could make the kaiser swallow this old war!"

His wife made no immediate reply. She was moving the jars on the smooth, clean shelves and looking for the labels. She had a mania for order. and Mr. Chubb and his assistants were at his irrelevance. not always orderly.

A New Tenant

something about her that—well, that kind o' touches you. I don't know why, but I kept feelin' I'd seen her eyes before."

Mr. Chubb objected, beginning to whittle a stick—man's refuge in delicate situations. "I'll admit she's good-

"What's the reason one lone woman wants that whole floor, anyway, ma?" "She's goin' to have her daughter with her."

"Seen her daughter?"
"Why, no." Mrs. C "Why, no." Mrs. Chubb stopped work and leaned her elbows on the counter. "That's the queer thing. She never spoke of her daughter when she took the rooms. Now she says she's comin', and there's nothing good enough for her."

"Humph! Where is she now-at school somewheres?"

Mrs. Chubb shook her head.

'I haven't any idea. I was—well, tell you the truth, I was rather to tell you the truth, I was rather surprised when she told me. You know she first came here alone, an' wanted to know where Judge Blair lived. When she came again this mornin', she looked sick. I declare I hesitated. 'If she's sick on your hands, Martha Chubb, what'll you do?' I thought to myself; and then I felt downright mean. So the long an' the short of it is, I let her the rooms. Eighteen dollars a month. She paid me one month down, an' she wants the back room papered. Of course I'm willing to do that. She said her daughter would pick out the paper, you know." Mr. Chubb whistled.

"Martha," said he at last, "d'you remember that Lucile Zedlitz came in here yesterday?"

His wife looked up a little surprised at his irrelevance. "Why, yes, I remember you said so. I was upstairs cleanin'."

Pap cast a look toward the book-"Aloysius," she said finally, "I let keeper's cage. Lem Sowers had just the upper floor to that Mrs. North. slipped out into the back yard, and I don't know as I did right, but there's the old man could see him standing slipped out into the back yard, and the old man could see him standing there in melancholy thought. Lem expected to be drafted any day, and his

soul was not warlike.
"Well, she did, an' it happened that
your Mrs. North was goin' up the road —a tall, stylish kind of a black fig-ure. I saw Lucile lookin' after her, an' I passed a remark. 'She's kind o' sad lookin', ain't she?' says I. Lucile

Something is Likely to Drop

Longest Lasting farm fence ever made

The patented "Galvan-nealed" process puts 2 to 3 times more zinc coating on the wire than is possible by the redinance of the patents. by the ordinary galva-nizing method. Therefore, we are able to guarantee this new Square Deal to far outlast any other farm fence made—sold at no extra price.

Galvännealed Square Deal Fence

15 to 30 points copper in the steel from which Square Deal is made causes it to resist rust more than twice as long as steel without copper. There is about \$5.00 per ton more actual material cost in copper-bearing "Galvannealed" fence, yet the price to you is not one cent more than the ordinary galvanized kind. Let us send you absolute proof of all claims made for this extra long life fence.

'Her name's North.' But she only laughed again an' went on out to her car. Don't you remember there was a lot about it in the paper? Judge Blair sent her up."

even added a few personal touches. She could only make Aloysius do it! But he wouldn't, and no one knew that better than his wife. Pap Chubb would rather harbor a burglar than hurt a woman.

It was Mrs. Chubb's fault, of course and she would have to face it. She would face it, she would face it, she would just up and tell the stranger that she had changed

of good."

Mrs. Chubb Was Worried

His wife gazed at him blankly. "Aloysius, why didn't you tell me? Whatever shall I do? She's taken the rooms, an' I've got her money in my pocket."

"To tell you the truth. I never thought about your doin' it so pesky quick," he replied thoughtfully, whittling harder than ever. "Besides, it kind o' slipped out of my head. I don't know. I suppose you could give her money back to her, ma."
"Poor thing!" said Mrs. Chubb sud-

denly. "Poor thing, that accounts for it!"

"You mean her looks?"

She's

"Of course—an' everything! She's kind o' tragio."

"Most folks are—when they've been caught stealin'," said Pap dryly.
Mrs. Chubb was worried.
"I can't think what I ought to do.
I just haven't got the heart to say things to her. She's—she's—why, Aloysius, she's real ladylike and refined and nice!"

Mr. Chubb, who had finished whit.

Mr. Chubb, who had finished whit-tling, closed his knife and put it in his pocket.

"There comes old Mose Snyder, an' Inere comes old Mose Snyder, an' I see two more behind him. I guess I'll have to wait on Mose. You can settle it, ma, but I don't know as I'd have her. It won't do, even if you do feel sorry for her."

"Oh, I do! An' her daughter—to think of her havin' a daughter to suffer for it! I declare it's a shame! It makes me feel as if she ought to be

makes me feel as if she ought to be the one to suffer. Of course"—she moved reluctantly toward the stairs —"of course I'll have to send her off, but I declare I do hate to do it!"

Pan Chubh nodded understandingly:

Pap Chubb nodded understandingly; then he rose and went behind the counter. Mr. Snyder would want some beans, a pint of molasses, and some chewing-tobacco.

Meanwhile, Mrs. Chubb went up-

After she had passed her own landing, another short flight took her to the third-story rooms. There were four two bedrooms, a tiny kitchen and a living room, where she had placed a table at one end, with a small, light screen to shelter it, leaving the other end for an old-fashioned chintz-covered sofa and a basket rocker. She looked about her with a sigh. She had just added the finishing touches, and she had felt a kind of satisfaction in putting those flowers in the jar on the table. The poor thing needed cheering up, she had thought, and the daughter—Mrs. Chubb loved young girls—would like flowers. And now!

Then Roxanna Came

The good-woman stood looking about her in dismay. She couldn't bear to say a harsh word to any one. What could she say to this poor, sad-eyed woman? This woman who had touched heart even when she had felt vaguely uneasy about her. For there was in Roxanna's being an element of uncertainty, a passionate undercurrent, and it had reached even Mrs. Chubb's placid consciousness. She had felt as if she had approached an elec-tric dynamo. There was an atmosphere of danger, of tragedy. Yet there was something touching, as if a wild repentance had broken down the way-Ward spirit and it was stretching out pitiful hands, asking alms, the alms love. Love, which is never given to the mendicant!

Martha Chubb moved slowly thru the small, clean rooms. They were rather bare, and the furniture was cheap, but there was a cleanly odor cheap, but there was a cleanly odor of matting, and the wall paper had an immaculate freshness that appealed without offending. She had

dining room. Mrs. Chubb's heart had been touched, and her sympathy had her mind, and then—

taken visible shape in new saucepans

Poor Mrs. Chubb gasped. She had Judge Blair sent her up."

been touched, and her sympathy had "Good gracious!" exclaimed Mrs. taken visible shape in new saucepans Chubb. "Do you suppose it can be and a new lindeum for the kitchen.

rue?"

She viewed it all now with a sinking heart. She had rashly closed the
Pap, cautiously. "I don't see any reason why Lucile should say so if it pocket, and here she was in the face
wasn't. Wouldn't do her any manner of a dilemma. She had let her upper floor to a woman who was not only using an assumed name, apparently, but who had come out of the work-house! Mrs. Chubb's conscience honestly revolted at the thought of such a parson in her chestly ter floor. a person in her cherished top floor,

et—how she pitied her! To tell her the truth was almost too much to expect of herself, for Martha Chubb felt that it was beyond her courage; yet not to tell the truth

Poor Mrs. Chubb gasped. She had carcely achieved this resolution when she heard a step on the stairs and the light sound of skirts against the ban-

"Good gracious, Aloysius has gone an' sent her up here a purpose!" she cried to herself and fled.

She went thru the two back rooms She went thru the two back rooms into the kitchen, opened the door of the gas stove, and almost put her head in the oven. But even then she heard the light step—wavering and dragging a little—going from room to room and coming nearer and nearer. There was no possible escape. Mrs. There was no possible escape. Mrs. Chubb got down on her knees and put

Plaster Replaces Canvas on Walls of Auditorium at Hays College

HE largest auditorium at any of the state schools of Kansas has been completed. The Sheridan coliseum auditorium at Hays Teachers College, with a normal seating capacity of 3,500, has just been finished this fall, after a period of waiting of several years.

Sheridan Coliseum was given to the school by the legislature of 1915, but funds were not avail-

able at that time to provide for the interior com-pletion of the auditorium, which forms a large part of the building. The auditorium has been in use several years with an improvised canvas in use several years with an improvised canvas ceiling and minus plastering on the walls. But thru a recent appropriation of the legislature, it has been possible to complete the structure this fall. A new acoustically perfect ceiling has been added to the auditorium, and other interior appointments have

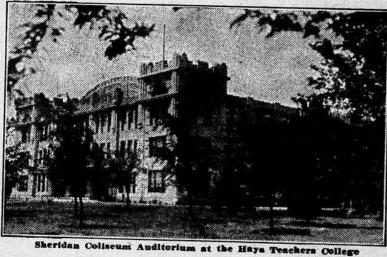

lor appointments have been finished.

The original appropriation for structure was \$200,000, but the building is of much greater value than that greater value than that sum would indicate, due to the fact that it is constructed of native stone, taken from the college campus.

In addition to the auditorium, the administrative offices and a number of class rooms.

number of class rooms are in the coliseum.

The auditorium is used for the spring mu-sic festival, one of the biggest musical events of western Kansas.

Thankful Time

Tr's come to thankful time again, The yellow corn is shining,
And every purple autumn grape
Can show a sugar lining.
The crimson apples crowd the bin,
The nuts are bronzed with sweetness,
The golden pumpkins in the field
Are rounded to completeness. The golden pumpkins in the field Are rounded to completeness. Our little garden's spicy still, That was so gay with giving; The air is frosty-clean—O Love, We're thankful to be living!

From gray to green, from green to gold, Thru every kind of weather, The rainbow year is slipping by; We met it gled together We met it glad together. And now we fetch us fragrant wood, And light our ingle fire— An upward-leaping, ruddy flame,
An upward-leaping, ruddy flame,
A dream and a desire.
Across the leaf-brown, happy hills
The soft-shod dusk is moving;
A cricket cries his song—Dear Heart,
We're thankful to be loving!
—Nancy Byrd Turner.

Butchering This Year?

Let our booklet, "How to Can Fruits, Vegetables, Meats," tell you how you may can the surplus meat at butchering time and how to make all kinds of sausages and the like! You'll be pleased with your meat supply if you do. Not only will this help you now, but next summer you will be

I'M GRATEFUL, Lord, for commonplaces, For smiling eyes and friendly faces; For books and songs and twilight hours, For books and songs and twilight hours,
For autumn leaves and May time flowers,
For work that fills brim full each day,
For children's laughter while they play;
For stars and sun, and for a tree
Whose wide-flung boughs are kind to me;
For home that shelters from the strife,
And for the miracle of life.

—Rachel Ann Neiswender.

They Meet Again

EXTENSION men and women had a great time at their conference in Manhattan, October 13 to 18. It was a social as well as a business and educational get-together. Every minute of the week was taken up. Out of the state speakers

were Gertrude Warren, field agent of club organi-sation, Extension Service, United States Depart-ment of Agriculture, and Maude Sheridan, state club leader, extension service of the Colorado Col-lege of Agriculture.

lege of Agriculture.

A new organization was formed, being a State Home Demonstration Agent Association of which Edith Holmberg, Reno county, was elected president and Maude Deeley, Clay county, secretary-treasurer. The county agents' wives have had an association for four years and their annual meetings have been a source of pleasure and inspiraassociation for four years and their annual meetings have been a source of pleasure and inspiration. Agents' wives have problems and perplexities even as do the home demonstration agents, and they find that talking things over with other women whose interests are mutual, helps considerably. Mrs. Roy Jaccard, Clay county, was chosen as president for the coming year, Mrs. J. A. Hendricks, Anderson county, vice president and Mrs. W. L. Taylor, Crawford county, secretary-treasurer.

Seeing is Believing in Home Management

By Florence K. Miller

HOME management "result" meetings are a great deal like a fair. They're convincing. We hear about the delightful hooked rugs, block printing and the like that other women make, and think perhaps, that those things are out of our line. But when we meet with the executors, hear them tell that once they belonged to the dubious class, we are inspired to try our luck.

Shawnee county had a "result" meeting last Saturday that was convincing in every sense of the word. The hand decorated candles, lamp shades and candle shades came in for as much admiration as did the rugs and the decorated linens. Mrs. Harriet W. Allard, home management specialist of the Kansas State Agricultural College, discussed water systems and lighting plants. Then the salesman for an electric fireless cooker explained its operation and the advantages such a utensil has in the farm home equipped with electricity. Biscuits made in the electric fireless were as light and brown as those baked at the same time in an oil stove. The principles of its operation are the same as the ordinary fireless cooker.

I wonder if you would agree with Mrs. Allard's statement that dull knives cares.

I wonder if you would agree with Mrs. Allard's statement that dull knives cause untold grief in every home, not to mention the food they waste? To replace the crock that only some of us have learned to use effectively, Mrs. Allard suggests a small sharpener to be screwed to the table or a shelf. You'll never invest a dollar to better advantage if you buy, is her opinion, expressed at the meeting. the meeting.

She Works With Beads

I AM making necklaces, watch fobs and dress trimmings for Christmas from beads. Jade and amber make a pretty combination. To make the necklaces, I use a double silk thread and a very fine needle. Using, for example, the jade and amber, proceed as follows:

Place 1 jade bead on needle and tie bead at end securely, next an amber bead, next jade, next amber, next jade, next amber, next jade, next amber, next jade, next all

close to first jade so as to be firm. Now take needle and pass back thru amber bead No. 6. This makes a picot. Pick up 1 jade, 1 amber, 1 jade, Count back 4 beads, pass needle thru, pick up 1 jade, 1 amber, 1 jade, pass needle thru amber, making another picot. Continue so until the chain is the desired length, making a picot at each side.

When ready to join both sides together for necklace or watchfob, omit the picot bead on one side, joining to jade picot of other side, back thru amber bead No. 4, three beads back, and thru amber bead making a picot.

Mrs. Joe Saylor.

Clay County Women Learn a New Art

By Florence K. Miller

LOTS of cheese will be consumed in Clay county this winter. At least, all signs point in that direction. Nineteen women from 11 communities met in the court house recently, and Luella Sherman, former nutrition specialist from the Kansas State Agricultural College, taught them how to make commercial cheese. These leaders, in turn, will teach the women in their community, so practically every farm woman in Clay county will have an opportunity to learn the work.

Miss Sherman emphasized the importance of clean milk in making cheese, and the effect of cream in the milk on the finished product. Fifteen pounds of cheese were made that afternoon. It was with considerable curiosity that the women in the Stillwater community took the 5 pounds allotted to them out of the press the next day. But they were delighted with the golden, creamy product when it finally was worked out of its cheese cloth bandages. Mrs. Vic Carlson and Mrs. W. Z. Corn, the two nutrition leaders from that community are shown here with the cheese.

Here is the recipe Miss Sherman uses:

1. Heat 5 gallons of fresh whole milk to 86 degrees Fahrenheit.

1. Heat 5 gallons of fresh whole milk to 86 degrees Fahrenheit.
2. Add coloring. Use 1/2 tables dissolved in 1 tablespoon cold water, or 1/2 tablespoon liquid coloring diluted with 1 tablespoon cold water. Stir well.

well.

3. Add 1 No. 2 rennet tablet which has been dissolved in 1 pint cold water. (It requires ½ hour for the rennet to dissolve.) Stir 3 minutes after rennet has been added.

4. Cover the milk and let stand perfectly still for at least 30 minutes. The curd is ready to cut if it

Mrs. W. Z. Corn and Mrs. Vic Carlson

splits smoothly when the finger is inserted. It will require from 30 to 60 minutes for the milk to curdle.

5. Cut curd in cubes as quickly as possible with a long knife.

6. Let stand until enough whey rises so that it can be dipped out (about 15 minutes). Heat about 2 quarts of whey to scalding temperature and pour back into the curd. Repeat this process until the temperature is raised to 100 degrees Fahrenheit. The curd should be stirred frequently during the heating.

temperature is raised to 100 degrees Fahrenheit. The curd should be stirred frequently during the heating.

7. The curd should remain in the whey until when squeesed in the hand the cubes do not stick to gether.

8. Drain or dip off the whey. The temperature should still be 100 degrees.

9. When whey is drained off cut curd in fourths and pile in one end of boiler. Repeat this process three times. This causes the cheese to drain more thoroly.

10. Cut cheese in cubes and add 3 tablespoons salt. Mix carefully. Cool curd to 86 degrees Fahrenheit and place in cheese press.

11. Use very little pressure at first, then gradually increase it.

12. After cheese has pressed 45 minutes, remove from press and smooth the cloth bandages. Return to the press and press 24 hours.

13. Cure cheese in a cool dry place. Turn cheese each day for two weeks. Cover with paraffin and turn twice a week.

14. The cheese should ripen at least one month. A dairy thermometer is necessary to test the milk, and an ordinary lard press may be used for the cheese.

Women's Service Corner

Our Service Corner is conducted for the purpose of helping our readers solve their puzzling problems. The editor is slad to answer your questions concerning house-keeping, home making, entertaining, cooking, tewing beauty, and so on. Send a self addressed, stamped envelope to the Women's corner, Kansas Farmer and Mail and Breeze, and a personal reply will be siven.

Attractive Pots and Pans

Where can I buy the heavy, white enamel ware with blue edges that one sees so much in illustrations? I have seen the pans aderised as fitting so well in refrigerator and being attractive enough to serve food at the lable. Our stores do not carry it.—A Bridetan.

I believe I know the kind of ware you describe, but I cannot print trade hames in this column. However, I should be pleased to tell you where you might procure same if you will send me a stamped addressed envelope.

I have blackheads and large pores on my hose. Will you please tell me what I can use to get rid of these blemishes? Can a deformed nose be straightened?—Miss R. T.

1598—Set of Rag Toys. This pattern includes a rabbit, a pussy cat and a doll with a dress and cap. The toys can be made from colorful scraps of worn out stockings. One size.

2004—Set of Clothes for Dolly. A me-plece kimono dress, a Gertrude petiticoat, drawers, shirt and cap are included in this pattern. Sizes for a doll measuring 12, 14, 16, 18, 20 and 22 inches.

remedied if one is persistent and cleanses the skin carefully, with the help of preparations made especially for removing blackheads and closing large pores. Also, there are devices for straightening noses. I cannot print the names here, but will tell you about them if you will send me a stamped envelope.

Protecting Against Wind

Protecting Against Wind

My skin is easily irritated by dust and wind, and is rough and coarse with many blackheads and enlarged pores. Will you please suggest a good astringent?—Dorothy.

Do you use a protecting cream on your face when you go out in the wind? If you would do this, I believe the wind and dust would not affect it. We have prepared directions for care of the face that I believe you would like to have. If you will send me a stamped, self-addressed envelope I will send them to you.

The Best in Music

Tucked away in one of those farm houses of which novelists love to write and of which poets often sing, do you ever long for the light-hearted, fairy-like tones of the violin, or the full tones of a trained voice? Years ago women and men longed for these, but seldom heard them. Today it is possible for the farmer, far removed from the large cities, to sit in his own home and listen to the music of the world. The phonograph was a wonderful invention.

Two new records that will brighten the hours in many American homes this winter are now on sale. One is by Fritz Kreisler, violinist. One needs but to mention the name of Kreisler to insure a treat, for he plays the instrument that is most intimate, most personal with the human soul. His new record, "Minuet" and "Old French Gavotte" is an excellent one. These numbers are the imaginative presentations of the music of the old world dances. dances.

The other record is "Marcheta" a love song of Old Mexico and "Indiana Moon" sung by John McCormack, tenor. McCormack is, perhaps, the best loved of all the artists because he sings the songs that we understand, the songs that find an echo somewhere

in our own lives.

Both of these records are "good buys" for they will mean as much several years from now as they do today.

Those Blackheads Again

I have blackheads and large pores on my of set rid of these blemishes? Can a deformed nose be straightened?—Miss R. T.

Blackheads and large pores may be Topeka, Kan. Cheryl Marquardt.

Puzzles Every Boy and Girl Can Work

If you will begin with No. 1 and follow, with your pencil, to No. 33, you will find the answer to this puzzle. Send your answer to Leona Stahl, Puzzle Editor, Kansas Farmer, Topeka, Kan. The first 10 boys or girls answering correctly will receive a package of postcards each.

Try to Guess These

What is the finest board? Sawdust. What is it that goes 'round a button? A billy

What vegetable is most neglected? A policeman's

What is the best way to make a slow horse fast? Tie him to a post.

Do you want to hear something great? Rub a

couple of bricks together. If the ice wagon weighs 2,500 pounds, what does the ice man weigh? The ice. What is the difference between a match and a

cat? One lights on its head and the other on its

feet.
What is an island? A wart on the ocean.

Why does a little dog curl his tail? So the fleas can loop-the-loop.

How did Johnnie's dog die? Swallowed a tape

How did Johnnie's dog die? Swallowed a tape line and died by inches.

How did Jimmie's dog die? Went under the bed and died by the foot.

How did Willie's dog die? He ran up the alley

and died by the yard.

Why does a policeman resemble a rainbow? Because he never shows up until after the storm is over.

Plays With His Dog

I am 13 years old and in the seventh grade. I have a sister and a brother. For pets I have five little pupples and one big Collie dog. We have a good time with him. We play ball and hide-and-seek and he finds us every time. I help my mother raise chickens. We raised 800 this year. I can drive my father's Ford. I have a bicycle. I like the young readers' page. I would

like to hear from boys and girls my age. Charles Pasquier. Girard, Kan.

Best Speller

I am 15 years old and finished the eighth grade this year. I am the best speller in Larimer county. In March I went to the high school in Ft. Collins to spell. I won with the grade of 96 and received a string of pearls. I went to Denver to spell and all my expenses were paid by the county. The best speller in all the different counties in Colorado went to Denver to spell. I got 98. I was not disappointed when I did not win I stayed in Denver a week. I wish some girls that

read the children's page would write to me.

Ft. Collins, Colo.

Hazel Huskey.

Named After My Uncles

I'm 11 years old and in the fourth grade. I enjoy the children's letters. I would like to hear from boys of my age. I have a pet dog named Rover. I have two older sisters and two older brothers, My father has four sisters and four brothers older than himself. I am named after my four nucles; two on my father's side and two on my mother's side.

Dent George Edward Pearson.

Russell Springs, Kan.

Reason for Changing Sentence

At a recent public school examination the sentence "The horse and cow was in the stable" was given, the pupils to correct the sentence and state the reason for such correction. One little fellow's paper read:
"The cow and horse was in the stable. (Reason:
Ladies should come first)."

I said to a boy in Puzzletown
"Is this the ship to the stars?"
"Yes, that's the one to take," he said "For aeroplane to Mars!"

Vegetable Growers' Puzzle

At the initial meeting of vegetable growers the list of members as recorded by the secretary contained the following names:

1. Pin S. Rap 2. T. U. Naep

9. N. R. Ocragus
10. Nolem R. Etaw
11. Epu O. Latnac
12. Re P. Pep
13. Aga B. Atur
14. Rewolf I. Luac 3. A. R. Ko 4. Sugar Apsa 5. D. Rallog 6. H. C. Anips 7. D. R. Atsum

Can you tell from their names what each mem-

ber grew? There will be a game pamphlet each for the first 10 correct answers. Address Leona Stahl, Young Folks' Editor, Kansas Farmer, To-

Geraldine Wins Prizes

I am 9 years old and in the fifth grade. I won first prize in piano and second in reading at the Stafford county field meet this year. My teacher's name is Miss Knockie. In the winter I live in Stafford, Kan., but in the summer I live on the ranch. For pets I have one roan cow named Daisy Faith. Two years ago she was grand champion and senior champion and, of course, first at Stafford County Stock and Poultry Show. She now has a roan calf. Her calf's name is Isabelle. I have another heifer named Lady Ruffles. I also have a dog named

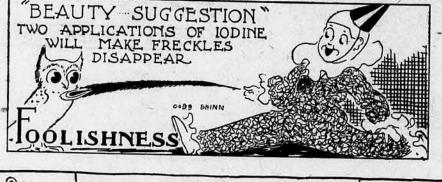

Ruffles. I also have a dog named Brownie, 14 kittens and five or six big cats. I did have a pig but my father sold him. I wish some boys and girls my age would write to me. Geraldine Hammond.

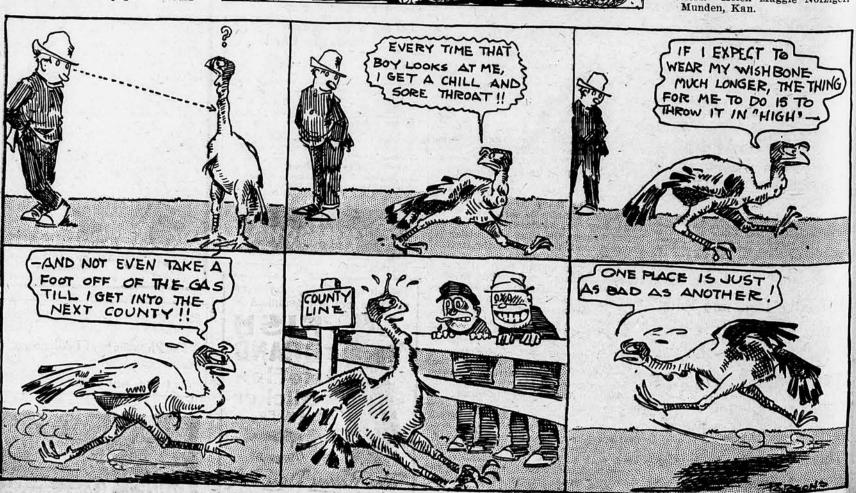

St. John, Kan.

My Pony's Name is Dick

I am 9 years old and will be in the fourth grade next year. I have a brother 7 years old. We have a pony named Dick. I like to read the letters. Helen Maggie Nofziger.

Munden, Kan.

The Hoovers-No Place is Safe for Pedestrians and Turkeys

The Crisis of Pneumonia

BY DR. CHARLES H. LERRIGO

"The 'crisis' may come now at any hour," said the doctor. "After that I can tell you more about his chances." So it seemed there was nothing to do but wait. The "crisis" of pneumonia is important. Usually it occurs from the seventh to the tenth day, but it may be delayed if complications occur. The crisis may end the disease in a single day, perhaps in a single hour, taking away all pain and fever and leaving the patient to begin his convalescence. A wise patient convalesces slowly. He realizes he has had a hard fight directed against his heart and lungs, and that if he is ever to be "as well as ever" he must take several weeks (yes, I said weeks) to build up. Bronchial pneumonia has no crisis.

It follows a cold, bronchitis, measles or some other disease, and is both slower to come and slower to leave. The form that begins with a sharp chill, develops quickly, has much pain and fever, severe cough and bleedy and fever, severe cough and bloody sputum and ends by a "crists," is lobar pneumonia, and this type also is much more contagious than bronchial pneu-

Whatever the type of disease there are certain measures of treatment of equal value.

1. The patient must be put quietly in bed at complete rest of mind, body and spirit.

2. The room must be well ventilated, but the patient must not be chilled.

3. Careful sponging with tepid water will give comfort and reduce temperature.

4. Water should be given freely, and a liquid or light diet as seems most desirable.

5. A good general application is a cotton jacket, made by padding an undervest with absorbent cotton.

6. Pneumonia is very dangerous. Get the best doctor.

And, for your own sake, don't forget that pneumonia is contagious.

A Shampoo Will Help

I am severely troubled with dandruff and an itching scalp. Is there any reliable remedy? I am suspicious of patent dandruff removers and scalp tonics as being either injurious to the scalp or else harmless to dandruff. Are they? Is there any satisfactory home remedy?

B. G. M.

Dandruff is much like other troubles that cases require different remedies. Many cases are helped by a solution of 20 grains of Resorcin to 1 ounce of water. Shampoo the scalp every night and keep it loosened upbrush the hair for 5 minutes night and morning.

Danger in High Altitudes

Does anyone with a weak heart stand the climate in New Mexico? Or what climate is best?

Persons with weak hearts must be careful about going to high altitudes. The rarified atmosphere makes quicker breathing and puts more work on the heart. If they undertake it gradually, however, such patients may meet the requirements and live in high altitudes with comfort. Kansas has as good a climate for such people as there is in this

Not From Weak Lungs

I'm bothered with difficulty of breathing. Have had asthma for years. Is there any danger of tuberculosis when one has asthma? The doctor told me I had weak lungs. C. M.

Asthma is not primarily a disease of the lungs. The fault lies in the nervous system. It shows its effect by causing spasms of the bronchioles, and eventually the wearing effect on the lungs does the damage. But it does not lead to tuberculosis.

Make an X-Ray First

We have a boy of 17 who is bothered with inflammatory rheumatism. Last spring he was down for four weeks. The doctor here tells us we must have his tonsils and adenoids taken out as his heart is not very strong. He had an operation four years ago for hernia and the ether was hard on him. So it worries me to think of giving him any more. His back hurts and is very stiff in the morning. He is 6 feet tail. Do you think his growing up so fast could make his back weak?

visable but first I would have his spine X-Rayed to make sure there is ho tendency to tuberculosis.

Better Keep the Money

l would like to have you answer the book-fluous hair. I have cut out the page with the order blank and will be waiting for your answer before ordering.

I think the cover page typifies the hook. It shows a pretty woman pic-tured on one side with a complete mustache and on the other with a clean fresh skin. It is so false that a her and drew her to a seat. "Why, you child should be able to see the delusion, poor thing, you're faint! Let me get and the rest of the book is like it. something—what'll you have, my Save the money.

Who Pays?

(Continued from Page 11)

Roxanna, reaching the kitchen door Roxanna, reaching the kitchen door at last, leaned weakly against it. She was aware of a somewhat confusing view of a neat gingham skirt, white apron-strings, and the soles of Mrs. Chubb's broad shoes. She supposed that her immaculate landlady was cleaning out the gas stove. cleaning out the gas stove.

"You're too good to me," she said in her rich, melancholy voice. "These little rooms are delightful. They seem—I can't tell you how restful they seem to me!"

dear?

In her pity Mrs. Chubb's motherly heart forgot Lucile's talk. Even if it did happen to be true, she thought, the poor thing was in trouble. She took off Roxanna's hat and laid it on the table that the property of the table to the table. the table; then she pressed a glass of water to the stranger's pale lips.

FACTORY SELLS FARMERS AT WHOLESALE PRICES

AT WHOLESALE PRICES

C. W. Lamer of Sallna, Kan., president U. S.,
Farm Sales Co., says no farmer can keep selling at wholesale and buying at top retail and
keep from going broke. Lamer has 75,000
farmers who buy at actual wholesale, harness,
collars, slickers, paint, rope, etc. These people
beat the price of a good set of harness by at
least \$20. Get Lamer's wholesale prices on
hundreds of items simply by asking for free
catalog. A big factory with low labor cost and
big savings in freight rates turns out amazing bargains and makes quick shipments.
They sold more harness for 3 years direct
to farmers than any manufacturer in the
U. S., so it will certainly pay you to get their
free catalog today. Write U. S. Farm Sales
Co., Dept. 11311, Salina, Kansas.

Judge for yourself the sparkling whiteness of this sugar

A woman says: "I can tell the difference in sugar by the color." That is true; but what differ-

Color is one sure test. It indicates the degree of purity of the sugar-not whether it is beet or cane sugar.

In the process of refining, the sugar crystals are separated from the juices and thoroughly washed. If sugar is "off-color". it is evidence of impurities still in the sugar-a lack of proper refining - sugar below stand-

Color is important. Sparkling white sugar is pure. Superior sugars have three qualities visible to the eye: sparkling whiteness, luster and evenness of grain. Sugar meeting these standards is chemically pure and dependable for every cooking

Sparkling white! . . . that is an outstanding qualification of Great Western Sugar. It is properly refined. It is thoroughly cleansed of impurities.

It is accepted. In millions of households . . . by experts in the sugar industry . . . among industral users of sugar . . .

Great Western Sugar is regarded as a standard of purity. Today, a production of 81/2 million pounds of sugar daily is being sold to satisfied users.

Every community accepts Great Western Sugar in supplying its needs; every grocer knows its universal satisfaction . . . there is the most significant evidence of its dependability.

The sugar grain is a crystal. This crystal is a chemical of unvarying content, no matter whether it comes from the sugar beet or sugar cane. Within the crystal is pure sugar; any impurities cling to the outside.

There can be no vital difference in granulated sugar except a difference in purity, due to the imperfect washing of the crystal. That is entirely under the control of the refiner.

It is our exacting control of production . . . our thoroughness in refining . . ./that is making Great Western the standard among sugars in the West.

Your grocer has Great Western Sugar. Ask for it by name. See its sparkling whiteness for yourself.

More Folks Moved to Towns

But Anyhow the Population of Kansas Had Increased to 1,833,382 March 1

THE population of Kansas has shown a drift toward the cities in the last year. On March 1 there were 817,178 inhabitants in towns of more than 1,000, as compared to 809,-826 the previous year. Population out. 826 the previous year. Population outside of towns of 1,000 is classed as rural; it included 55.4 per cent of the folks; in '23 it was 55.6, and in '22

Kansas' population March 1 was 1,833,382; in '23 it was 1,824,190. The gain in population during the last year was 54-100 of 1 per cent, in the last 10 years 9.6 per cent, in the last 20 years 19.4 per cent, and since the Government census in '20 3.6 per cent. Wyandotte has the largest population, 138,ment census in '20 3.6 per cent. Wyandotte has the largest population, 138,-625, and Greeley the smallest, 1,318. Shawnee made the largest gain in the last year, of 7,074, or 10.4 per cent, and Atchison had the greatest loss of 1,339, or 5.2 per cent. The county showing the highest percentage of loss was Elk, with 9.4 per cent, or 966. Forty-nine counties reported gains, and 56 losses in population. and 56 losses in population.

Topeka reported a gain of 4,986, Wichita 4,298, Arkansas City 2,042, Coffeyville 1,579, and Kansas City 1,385, Atchison lost 2,201, Salina 1,182 and Independence 671.

Corn husking is well under way, altho it was broken into a little on some farms last week by bad weather. It naturally has gone the fastest where the yields were lightest, in the north central counties. The grain is mostly selling at 80 to 85 cents.

Some amazing reports have come in regarding the growth of wheat. It has done well everywhere except in a district spreading fanwise from Jewell and Republic counties, where the soil was too dry. And local reporters say:

Was too dry. And local reporters say:

Allen—Farmers are heading and threshing kafir, it will average 40 bushels an acre and corn 30. Hens are not laying well. Kafir, 65c; corn, 80c; eggs, 42c; butterfat, 31c.—Guy M. Tredway.

Barber—We have had high winds during the last week, and rain is needed. Corn shucking and kafir topping are in progress, with good yields. There have been a few public sales. Some farmers are feeding livestock. Wheat, \$1.19; corn, 90c; eggs, 35c; cream, 31c.—J. W. Bibb.

Brown—Farmers are husking corn, which is not turning out so well as was expected. Wheat looks good, but rain is needed. Prices at farm sales are satisfactory. Wheat, \$1.20; corn, 95c; cream, 32c; eggs, 40c; hogs, \$8.—A. C. Dannenburg.

Chautauqua—Cane and kafir have been

Chautauqua—Cane and kafir have been headed and some threshed. Wheat is in excellent condition. Weather conditions are ideal for all farm work. Cattle are mostly on feed. There is not much idle farm labor. Corn, 80c; kafir, 70c; wheat, \$1.28.—Coburn Jones.

Jones.

Clay—Farmers are husking corn. Upland yields are from 3 to 8 bushels an acre, and lowland yields are 10 to 15 bushels. Wheat is dying for lack of moisture. Roughage will be scarce this winter. Wheat, \$1.25; corn, \$5 to \$90c; alfalfa hay, \$18; prairie hay, \$12; hogs, \$9; butterfat, 30c; eggs, \$2c.—P. R. Forslund.

Cloud—Much of the late sown wheat has died for want of moisture. There is some talk of replanting for spring crops. Cattle and horses are doing well, but there is likely to be a feed shortage. Some corn is being cribbed. Wheat, \$1.28; eggs, 32c.—W. H. Plumly.

Cowley—There is some demand for farm

W. H. Plumiy.

Cowley—There is some demand for farm help. Wages are excellent. Corn is yielding 30 to 40 bushels an acre. More than half the corn crop has been gathered. Some livestock is on full feed. Wheat is making a rank growth. There is an abundance of roughage. Some farmers are selling slage. Corn, 85c; kafir, 68c; alfaifa hay, \$6; ensilage, \$5 a ton.— H. T. Fromm.

Crawford—Wheat looks well, but is badly infested with fly. Corn shucking is progressing rapidly, but the yield is not so good as was expected. Not many public sales are being held. Prices are unsatisfactory. We are in need of rain.—H. F. Painter.

Ellis—This locality is badly in need of

Ellis—This locality is badly in need of rain. Corn husking is in progress. There are no public sales. Wheat, \$1.24; shorts, \$1.70 a cwt; flour, \$2; eggs, 38c.—C. F. Erbert.

Ellsworth—Continued dry, windy weather is damaging wheat. There is not sufficient moisture for wheat to root for the winter.—C. L. Danner.

Gray—Cattle on wheat pastures are doing well. Wheat prospects were never better. Rain is needed. Corn, 85c; wheat, \$1.33.—Forrest Luther.

Greenwood—Corn husking and kafir heading are in progress. Corn is yielding 40 bushels an acre. Livestock is in splendid condition. It is too dry for plowing. Eggs, 36c; corn, 85c; kafir, 72c.—A. H. Brothers.

Happer—We have had rain recently, and wheat looks goood. There has been some damage by white grubs. Corn is yielding 18 bushels an acre. There was a small increase in the wheat acreage this year. Eggs, 36c; cream, 27c; wheat, \$1.20.—S. Knight.

Harvey—Weather conditions are excent

Harvey—Weather conditions are exceptionally mild. Livestock is in excellent condition, and wheat is being pastured. Wheat, \$1.30; corn, 85c; butter, 35c; eggs; 37c; flour, \$1.50; potatoes, \$1.15; cabbase, \$1.70 a cwt.—H. W. Prouty.

Jewell—Weather conditions are unfavorable for late sown wheat as there has been no moisture for several weeks. Farmers

are husking corn. Some wheat is being marketed. Public sales are held frequently, and prices are satisfactory. Rough feed is not plentiful. Wheat, \$1.30.—U. S. Godding.

and prices are satisfactory. Rough feed is not pientiful. Wheat, \$1.30.—U. S. Godding.

Kearny—We have had such ideal fall weather conditions that nearly all work is finished, including threshing. Frost did but little damage. Sugar beets are being shipped. Cattle and hogs are in splendid condition. Moisture is needed in some parts of the county.—F. L. Pierce.

Kingman—Wheat pasture is good, but it needs rain. Corn is yielding from 19 to 30 bushels an acre, which is less than was expected. Farmers are storing winter food supplies. Many cattle are being shipped. Wheat, \$1.32; corn 74c; cream, 29c; eggs, 23c; ducks, 10c.—J. F. Kirkpatrick.

Leavenworth—Weather conditions are ideal, altho it is a little dry. Everyone is busy shucking corn. Fall plowing is nearly completed. Some livestock is being corn. Wheat, \$1.40; corn, \$5c; butterfat, \$1c; eggs, 42c; chickens, 17c.—R. P. Moses.

Logan—The weather is dry and some-what cooler.

cic; eggs, 42c; chickens, 17c.—R. P. Moses.

Logan—The weather is dry and somewhat cooler. Wheat is in need of rain.
Corn yields were not so good as was expected. Livestock is in excellent condition, and grass is holding out well. A large number of cattle are being shipped to Ransas City markets. Hogs, 7½c; cows, \$25 to \$30; helfers, \$10 to \$15; turkeys, 20c; chickens, 16c; butter, 35c; cream, 35c.—J. C. Postal.

Lyon—Farmers are thru with fall work such as filling silos, threshing and haying. Corn husking is in progress. Early sown wheat looks fine, Farmers are feeding cattle. Some pastures are still in use. Corn, 80c; wheat, \$1.27; butter, 30c to 35c; eggs, 37c.—E. R. Griffith.

Meade—Wheat is all sown and growing alcely. Wheat pastures are excellent, and n some places are from 6 to 8 inches high. There has been sufficient moisture for all props. Topping and threshing kafir are in progress.—Linn Frazier.

progress.—Linn Frazier.

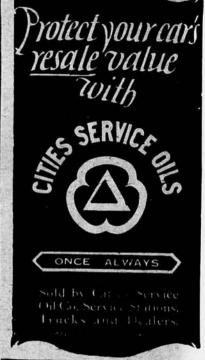

Ness—The weather is dry and cold. Wheat is in need of rain. Hessian fly is found if some fields. Farm work is pretty wen caught up for the winter. There have been a few farm sales. Frices are low. Wheat, \$1.30; corn, 80c; kafir, 75c.—James McHill.

Osage—Silos are filled and threshing is nearly finished. About half the corn crop was put in the shock, Little fall plowing has been done. Haif the standing corn has been cribbed. We have had fine weather for every kind of work. Livestock is still on pasture. Hogs are being marketed as soon as they are ready to go.—H. L. Ferris.

Phillips—It is still dry. Roads are in

pasture. Hogs are being marketed as soon as they are ready to go.—H. L. Ferris.

Phillips—It is still dry. Roads are in splendid condition. Farmers are gathering corn. Wheat. \$1.10 to \$1.20; corn, 80c to \$5c; potatoes, \$1.25; apples, \$1.25 to \$1.50; tout. \$5c; potatoes, \$1.25; apples, \$1.25 to \$1.50; tour. \$9; corn chop, \$2; bran, \$1.40 to \$1.50; four, \$

John W. Finn.

Trego—The weather is mild for this season. Wheat needs rain, but is in fine condition. Some farmers are pasturing it. Corn shucking and feed stacking are in progress. Corn is yielding from 10 to 20 bushels an acre. Barley, 70c; kafir, \$1.30 a cwt; wheat, \$1.23; eggs, 31c.—Charles N. Duncan. Wabaunsee—Weather continues dry and warm. There have been no freezes. Some corn is being husked. Pastures have dried up and cattle are being fed. Wheat and reare in good condition. Public sales are being held, and prices are good.—G. W. Hartner.

Washington—We have had no rain this fall to give the wheat a start. Corn 'husking is progressing nicely, and weather conditions are favorable. Upland corn is yielding 15 bushels an acre. Wheat, \$1.27; corn, 85c; 6ats, 45c to, 50c; butterfat, 29c; eggs, 40c.—T. C. Dodd, Jr.

Rough Corn Wins

Corn type tests conducted in Kansas indicate that the smooth type yields best. But when plots were harvested on the farm of Dave Delforge, Rice, on the farm of Dave Denorge, Aice, Cloud county, this year, the rough type made 12 bushels more an acre than the smooth. The 10 farmers who were present when the seed was selected attended the harvesting. Sam J. Smith county extension agent, and

selected attended the harvesting. Sam J. Smith, county extension agent, and L. F. Willoughby, extension agronomist for Kansas State Agricultural College, supervised the test.

The smooth corn plots had 25 per tent more stalks than the rough type, which offers a possible clue to the greater yield of the rough type. The season was dry in that neighborhood and the farmers believed the stand was too thick. Other trials will be made to compare the relative yields further. further.

Grief Ahead for Julian

Julian M. Hulpieu of Dodge City, within M. Hulpieu of Dodge City, who does many things, and is especially efficient in the art of growing some mighty fine truck crops, will handle the farm census of 1925 in Ford and the surrounding counties officially the "Fourth Kansas district."

Woods Killed 264 Crows

John M. Woods of East Washington township is the champion crow hunter county clerk's office in Lyons last week with 264 heads, for which he received 10 cents apiece.

Broke All Western Records

Daily newspapers say that Senator Capper is the only candidate in the West to poll more votes than Coolidge. His total vote of approximately 436.-000 exceeded that of the President's

by about 40,000, his plurality of 275,—The organization is similar to the 000 by even a larger figure. At the one formed at Larned last year. This same time Kansas gave Coolidge a far syndicate undertook a three-year projgreater vote than it has ever before ect. A farm was leased, equipment given any Presidential candidate, because the people have great faith in first crop was grown this year. The him and believe him able and sincere. Larned syndicate expects to show that The Copper vote was a record-breaker, beets are a profitable crop even where The Capper vote was a record-breaker for Kansas, and a record-breaker for any candidate or any election west of the Mississippi.

The Senator carried the agricultural precincts overwhelmingly, farmers vot-

Rooks—Many cars of poultry have been shipped from the county. Turkeys are sare. There have been several public sides, and prices were quite satisfactory. Eggs, 36c; cream, 30c; bran, \$1.40; corn, Nec.—C. O. Thomas.

Rish—Wheat is suffering for lack of moisture. We have had little rain for several weeks. Early wheat is badly infested with Hossian fly. Livestock is in fine considerable interest was manifested in the election. Wheat, Scott—There is sufficient moisture to keep wheat growing, but a good rain would be relected. Corn husking has started, and here is some demand for huskers. Dirt bads are in splendid condition. The work of soott county Court House is progressing spidly.—T. F. Carson.

Sedswick—The weather is dry and cool. Wheat is suffering for lack of moisture. Sedswick—The weather is dry and cool. Wheat is suffering for lack of moisture. There were two public sales last week, frices are satisfactory. Livestock is in plendid condition. Eggs, 40c; butter, 35c. there, \$1.30; corn, \$1.10; hens, 16c.—W. J. 160c.

Sherman—Wheat looks well. We have

There is plenty

The immediate project will be a demonstration farm where beets will be grown to show that the crop is profitable are very series are pasturing wheat and others are waiting for rain. Corn husking is in progress. Corn is yielding from 10 to 25 bushols an acre. Livestock is in good condition. Most farmers are feeding livestock. Earl G. Fort.

In these days when every dollar ounts and when so many "investcounts and when so many "invest-ment" schemes are directed at the farmer, the problem of investing surplus funds is really important. I believe that I have solved that problem for the readers of Kansas Farmer and Mail & Breeze. This investment is backed by 28 years of success in a business which has grown to be one of the strongest concerns in the Midwest, and in fact, the largest business of its kind in the world. Further conservative expansion and additional equipment are the motives for obtaining additional control of this time. Amounts ment are the motives for obtaining additional capital at this time. Amounts of \$100 or more are solicited. The rate of interest is 7 per cent payable semi-annually with the privilege of withdrawing any or all of the investment at any time upon 30 days' notice. I can unqualifiedly recommend this investment and believe it as safe as a government bond. A letter to me will bring you promptly further information. Arthur Capper, Topeka, Kan.

3 Charming Ferns!

Best Varieties

This great collection includes an "Asparagus Fern," an "Ostrich Plume Fern," an "Ostrich Plume Fern," No dre house plant is more extensively grown than re graceful "Asparagus Fern, while in "Ostrich Plume Fern," while in "Ostrich Plume Fern," is a fern for exery lower than appeals to every one. The "Roosevelt Fern" is a fern for exery lower. The "R

is one of the many jobs the McCormick-Deering does well

TOUR late fall and winter work would be a lot easier and more profitable all around if you were in partnership with a McCormick-Deering 2- or 3-plow tractor.

Now is as good a time as any in the year for a man to come into McCormick-Deering tractor ownership. Weeks of hard work and hot weather have been exhausting man and horse. Many weeks of trying work lie ahead. Labor is scarce and high-priced, and every week's wages takes money out of pocket. Take plowing, for instance—the slowest, most laborious, most expensive farm work. It must be faced now and next year and every year.

With the McCormick-Deering 15-30 tractor one man plows 12 acres a day; with a 3-horse team he averages only 3 acres. With the tractor he does 4 days' work in 1 day.

With the tractor he plows deeper and better, and at the right time; heat and hard ground don't stop him; he saves the moisture and gets ahead of weeds. Between-times his tractor tackles the grain and corn harvest-runs the binders and the corn picker, fills the silo, runs the shredder or sheller-and then it finds all kinds of winter belt jobs ahead of spring's work.

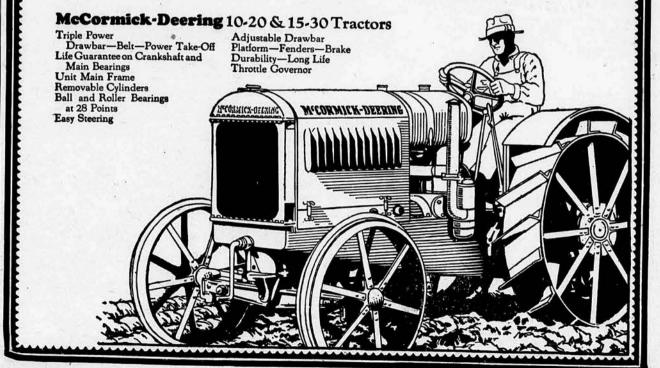

Farm product prices have taken the upgrade. Better times are on the way to the farm. Be in position to farm efficiently all the year, without yielding your profits to surplus labor costs. See the dealer about a McCormick-Deering Tractor - lasting, dependable, allaround farm power.

How to Get More Eggs

Remarkable Experience of L. F. Volber-ding, Whose Hens, Once Sickly Idlers, Laid 1949 Eggs in 54 Days

Poultry raisers, whose hens do not lay, will read the following letter with greatest interest:

Gentlemen: I see reports of many having hens that do not lay, so I want to tell my experience. I had 230 pullets that looked sickly and were not laying. After trying different remedies, I sent to the Walker Remedy Co., Dept. 44, Waterloo, lowa, for two \$1.00 packages of Walko Tonix, I began using the medi-cine Christmas day—by January 1st they began laying—during January 1st they began laying—during January I gathered 601 eggs—and in February, up to the 23rd, I gathered 1348 eggs—or 1949 eggs in 54 days. I give all the credit to Walko Tonix. It made the sick pullets healthy; made my entire flock look fine; and est them to flock look fine; and set them to work on the egg basket.—L. F. Volberding, Sibley, Iowa.

Why Hens Don't Lay

When hens stop laying, become list-less, rough of feather, pale of comb, etc.—you know they are "run down" and need a tonic. Readers are warned to take the "stitch in time." Don't wait until your hens develop liver trouble and indigestion, with consequent leg weakness, tameness, rheumatism, bowel trouble, etc. Give Walko Tonix in all feed. It will promote digestion; tone up liver and other functions; build rich, red blood; restore vim, vigor and vitality; make smooth glossy feathers and healthy red combs. You'll get dozens of eggs where you got only a few beforemad a bigger percentage of fertile eggs. All without injury to the sensitive organs of your birds. These letters prove it: wait until your hens develop liver trou-

5 Dozen Eggs Daily Now

Mrs. C. C. Hagar, Huntsville, Mo., writes: "I read many complaints about hens not laying. With the present low prices of feed and splendid prices for eggs, one can't afford to keep hens that are not working. For a time my hens were not doing well; feathers were rough; combs pale and only a few laying. I tried different remedies and finally sent to the Walker Remedy Co., Dept. 44, Waterloo, Iowa, for two 50c packages of Walko Tonix. I could see a change right away. Their feathers became smooth and glossy; combs red, and they began laying fine. I had been getting only a few eggs a day. I now get five dozen. My pullets hatched in March are laying fine."

No Risk to You

We will send Walko Tonix entirely at our risk—postage prepaid—so you can see for yourself what a wonder-working tonic it is, for keeping hens in pink of condition, free from disease, and working overtime. So you can prove as thousands have proven—that it will eliminate losses and double, treble, even quadruple your profits. Send 50c for a package of Walko Tonix—give in all feed and watch results. You'll find the cost less than one cent a day for 30 hens, and you'll get dozens of eggs where you got only a few before. It's a positive fact. We guarantee it. The Leavitt & Johnson National Bank, the oldest and strongest bank in Waterloo, Iowa, stands back of this guarantee. You run no risk. If you don't find it the greatest egg producer and general tonic you ever used, your money will be promptly refunded. Adyour money will be promptly refunded. Address Walker Remedy Co., Dept. 44, Water-loo, Iowa.

How to Prevent Roup

Dear Sir: We raise several hundred chickens every year and have lost a good many dollars worth from Roup. I used many remedies, none of them successful, so took to using the hatchet, but found that treatment costly. Then I sent 50c to the Walker Remedy Co., Dept. 44. Waterloo, lowa, for their Walko tablets for roup, and out of 96 hens that had the Roup bad. I saved all but three. I can't speak too strongly of the treatment, for it certainly does the work, and just can't be beat. If more people knew about it, they would not lose so many of their hens with Roup.—Mrs. Nellie Heron, Eagleville, Mo.

Don't Wait

Don't wait till Roup gets half or two-thirds of your flock. Don't let it get started. Write today. Let us prove to you that Walko tablets will prevent Roup. Send for a box on our guarantee. Money back if not satisfied.

Poultry Club News

BY RACHEL ANN NEISWENDER Club Manager

"I believe it pays to advertise," writes Dorothy Shuff of Reno county, "for since the Kansas Farmer and Mail and Breeze of November 1 appeared, I've received more orders for chickens than I can take care of. However, if I can't take care of all of them, you may depend on some of the other Reno county girls doing so."

And Dorothy isn't the only club girl who has been busy these days answering inquiries about her stock. I feel sure that all the surplus birds will be disposed of this year at a better profit than ever before.

Letters telling of blue ribbons and cash prizes are still coming in, and everyone will be interested in the suc-

cess of these girls.

Beth Siron of Linn county exhibited four Barred Plymouth Rock pullets and a cockerel which were hatched early in March and won first prize of

\$2 on them.
Eunice Hillman of Trego county reports she won first prize of \$4.50 on two White Plymouth Rock pullets and a cockerel, and also \$1.50 for an angel food cake. And she isn't the only girl who made other entries besides poultry. Club girls are never one-sided, you know. They can do many things well.

Dorothy Nielson of Marshall county entered eight White Plymouth Rocks at the Blue Rapids fair and came home with one first, one second and one

Laura Cunningham of Morris county reports eight ribbons on her entries of S. C. Buff Leghorns at the Delavan fair and seven ribbons at the Wilsey fair. At Wilsey \$1 was offered for the best display in the Mediterranean class, and she won this prize also. She has 20 ribbons won this year and last, so you may be sure she is proud of her

Leaders are Working

With the end of the contest less than a month away, county leaders are making every effort to pile up extra points and bring their teams to the top in the pep race. I'm glad to see this spirit, the finish spirit, I call it, for no leader who stays with her teammates until everything is completed can feel she has lost the battle, even the her team may not be first. Laura Cunningham, leader for Morris county, voiced the finish spirit which is so evident in all the teams when she said, "We were sorry to see Morris so far down in the pep list, but we're not giving up. Instead we'll work just as hard as we can, and if we're not at the top when the contest is over, we'll not be at the end of the list either."

Are Reports Missing?

Please check up on your records and see if you have every monthly feed report recorded. You're going to need be in your hands shortly, and now is the time to ask me for duplicates if you've failed to make entries in your record book. Let's not neglect this un-til the last moment, for by taking care

in Central New York, and I was looking around when an old man came up and started to talk to me. He didn't know who I was, and presently asked

me where I was going.
"'I'm going to heaven,' I replied,

with a smile.
"'Get out,' he said, 'you ain't got
enough gas.'"

5 Bushels Not so Bad

BY M. R. BUCHMAN

Five bushels an acre is the average yield A. W. Sprout of Osawatomie obtained this year on a 4-acre field of Sweet clover which he cut for seed. On one strip along the hedge row the yield was 8 bushels, Mr. Sprout esti-mates. He also got enough unhulled seed to sow 15 acres.

Mr. Sprout has been enthusiastic about the possibilities of Sweet clover for several years. He first became interested about 15 years ago when he saw the results a neighbor obtained. Mr. Sprout sent to an Iowa seed house and got 100 pounds of Sweet clover seed. When the clover came up, he found he had the annual variety, and that he was \$25 poorer by the experience. Naturally he was discouraged, and did not attempt to raise Sweet

clover again for several years.

After a time, however, Mr. Sprout again turned his attention to Sweet clover. He had a field on which he was not able to raise anything. He had tried timothy, alfalfa and Red clover, but was not able to get a stand. Finally he went along the roadside and pounded out enough seed to sow an acre of Sweet clover with timothy. He pastured this piece that year, but the following spring a neighbor was burn-

let the fire get away, so Mr. Sprout's Sweet clover was destroyed.

Then came the war, and the appeal to farmers to raise wheat and corn.

Mr. Sprout planted corn on land where his Sweet clover had been the destroyed. his Sweet clover had been. He de-clares he never before had seen such corn. His 10-year old son, standing on the wheel of a wagon, was not able to reach the ears. One stalk measured 15 feet, 2 inches, and had two good ears. ears on it. This corn yielded 60 bushels an acre.

Who's Who, and Why?

The recent weddings of Karl Braun, 25, of Munich, Germany, and his father have started an endless chain of relationships which has got beyond the reach of genealogists and culminated in Braun becoming his father's fatherin-law.

Young Braun married a widow of 45 Young Braun married a widow of 45 with grown-up children. Then his father, 50, married the 24-year-old daughter of his son's wife. Genealogists figure that as a result of the two weddings young Braun became his father's father-in-law and that his wife's daughter became her mother's mother-in-law and the step-mother of report recorded. You're going to need mother-in-law and the step-mother of these soon, for the annual reports will her own step-father.

Our Best Three Offers

One old subscriber and one new subof it now you can save both of us a Kansas Farmer and Mail and Breeze great deal of extra work. great deal of extra work.

John D. Rockefeller has a new joke, which he relates as follows: "I was up tion, \$2.—Advertisement.

Maisas Farmer and Main and Breeze one year for \$1.50. A club of three yearly subscriptions, if sent together, all for \$2; or one three-year subscription, \$2.—Advertisement.

Feed and Labor Return Good Profits

THERE is a horse that I would give \$200 for," said a well known dealer recently, who is shipping to the Eastern markets, "if he were in good flesh and short haired. As it is, I dare not pay more than \$140 for him, and even at that I take a chance of losing money. Long haired, thin horses are much more susceptible to disease, must be held in our stables for some time until they get in better condition, and the risk and expense, and the fact that they are not salable until they are in better flesh, makes a horse of that kind less desirable to me at \$140. than the same horse would be at \$200, if he were in fit condition." nd less desirable to me at \$140

Other dealers corroborated his statement and added that while it was unprofitable to put feed into a \$50 horse, it certainly would pay to put an a sou norse, it certainly would pay to put 30 days' feed and some grooming on horses weighing 1,500 pounds or more. Twelve quarts of oats a day, plus plenty of good forage and a little oil meal, about ½ teacup at each feeding time with the oats, will put horses in very much improved condition for sale in 30 days' time, if they are kept in clean stalls, well bedded, and given a thoro grooming

Fifteen dollars' worth of feed for each horse, plus some work, will make from \$50 to \$60 difference in the selling price in any good horses that are to be sold this spring; and while horses are a by-product of the farm, it is worth while having such by-products in fit condition to bring

SAFEGUARD

IN WINTER the milk-making organs are subject to severe strain. Dry, rough feeds are harder to digest and assimilate than green pasturage.

Your Cows During the Dry-Feeding Period,

To keep up the health standard and the milk yield as well, some outside aid is needed. Otherwise a profitable vol-ume of milk is doubtful and disease is likely to creep in.

Kow-Kare is a sure winter aid to profitable dairying. It is a great medicine-tonic to build permanent vigor into the milk-making organs. A tablespoonful twice a day, one week in each month enables the cow to make the maximum enables the cow to make the maximum of milk from her winter diet.

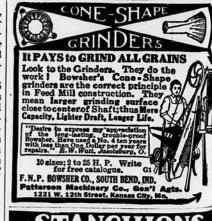

As a preventive or as a reliable treatment for Barrenness, Abortion, Retained Afterbirth, Scours, Garget, Milk Fever, Lost Appetite, etc. Kow-Kare is known and praised from Coast to Coast. No delayman should be without it Kow-Kare is known and praised from Coas Coast. No dairyman should be without it.

Let Kow-Kare help you insure your dairy profits this winter. Your feed dealer, general store or druggist can supply you. \$1.25 and 65c packages. Order direct if dealer is not supplied.

Write us for free copy of our valuable book, 'The Home Cow Doctor.'' Thousands of dairymen ask for it each year.

DAIRY ASSOCIATION CO., Inc. Lyndonville, Vermont

swinging stanchion made. Thousands in use-many hundreds sold every week. Guaranteed not to break, bend or wear out.

No hinges to wear, side bars can-not bend. Each stanchion made from long piece of heavy U-bar steel—extra strong, Adjustable neck space. Money back if not satisfied. Send order direct, or write for more information.

A Built-in Woodbox

When Ernest Mall, northwest of Bala, Clay county, built a new hollow tile dwelling, the plans specified an outside-inside woodbox. The kitchen fuel supply is loaded in from the outside, which saves climbing the steps and tracking dirt into the house. A

Here's a Hiving Problem

colony of Jefferson county bees

they do this winter? That problem is up to Her Majesty, the Queen. Albert Rose, an apple growing neighbor, esti-mates that the squatters have garnered 75 pounds of comb honey and attached it to May's house.

Packers in Trouble Again

Again the United States Department Again the United States Department of Agriculture is using the Packers and Stockyards Administration as a crowbar with which to pry into livestock market practices. Two packers who do business on the Chicago market and a subsidiary of one of them have been requested to explain why they refused to do business with traders. Traders state that they buy about a third of the hogs sold on that market from producers, although the hogs eventually find their way to the packers.

It seems that the packers in question broke off relations with the traders

Oroke off relations with the traders ome time in September. That is about the month when market reports indi-cated that packers were passing up the good stock and buying thin hogs, grassy sous stock and buying thin hogs, grassy sows and skippers in an effort to force prices down. Evidently the traders bought a quantity of the good stuff with the expectation that the packers would come around shortly and pay them a premium for their holdings.

But these restore did not. They re-

But these packers did not. They re-fused to do business with any except producers' representatives, and took no hogs except out of the first hands. This led to a complaint by the traders and finally are order for explanation and finally an order for explanation from the Government.

Traders are speculators, but they are an established agency of long standing, and the packers and Stockyards Act recognize them. They frequently brovide some elasticity for the outlet of a heavy run of stock when packers are disinterested buyers or when they

are trying to recoup the losses acquired by an unexpected slump in meat

Maybe these packers knew before-hand what they were heading for, but they likely felt that the cost of de-fense would be small compared to the savings they could effect by beating hog prices down. Besides there was a chance that they might win the case and in that event they could kick the traders in the slats at any future time that such kick might be deemed ex-

About Mineral Feeds

In recent years, careful study of our good producing herds reveals the fact that many of our cows suffer from that many of our cows suffer from lack of proper mineral matter in their rations. Cows that do not get legume hays or a mixture of grains frequently meet with this lack. It has been clearly demonstrated that the high producing cow gives more mineral matter in her milk than is contained in her feed for the first part of her lactation period. This is particularly true to calcium or "lime" and is one reason why legume hays, which are high in lime, are so important to the outside-inside woodbox is that the man

One of the big advantages of the cutside-inside woodbox is that the man of the house must fill it. Of course he may forget that chore, but it's a lot begins to store mineral matter in her begins to remember when the outer door serves as a constant reminder.

Mr. Mall is developing his farmstead under plans prepared by the agricultural engineering department of Kansas State Agricultural College. A machinery shed and the tile dwelling are the first buildings to be built. The house will be stuccoed by and by.

Hiving Problem

High in lime, are so important to the dairy cow.

Toward the end of lactation the cow begins to store mineral matter in her bones and during the dry period she does this in preparation for the new milking period. To do this she needs a dry resting period of about six and in the feeds more rapidly if she is on green feed. This probably is why Kansas cows are not troubled with mineral deficiencies as much as those in Northern states.

Our wheat pasture is late in fall

Our wheat pasture is late in fall and spring pasture is early. It is at this period of the year when the cows have been away from grass that we commence to notice them getting a A colony of Jefferson county bees established a summer home in the cornice of Clyde May's house, northeast of Perry. There wasn't room inside bit out of shape, rough haired, unletween the shingles and ceiling to store honey so they built their ware house on the outside. Now what will foreign objects such as wood, bones, cloth, earth, stones, etc.) something they cannot find. Such a condition frequently can be improved by keeping a box of granulated salt and another of ground steamed bonemeal some place where the cows can get to them any time of day. Cows getting alfalfa hay and other roughness, a grain mixture of three different grains and the above mentioned minerals and the above mentioned minerals—salt and steamed bonemeal—will not need any fancy or mysterious high priced mineral feeds.

Is Nature Faking?

Folks may recall that spring got a late start, but in some sections Mother Nature made up for the loss. Kansas had a whale of a wheat crop, a crackhad a whale of a wheat crop, a crackin' good corn crop and wheat is going
into the ground in fine shape. This
fall has been right good growing
weather, too, according to all reports.
Witness this from Pratt:
One farmer picked a box of strawberries, roses are blooming the second
time and lawns are as green as in

time and lawns are as green as in early spring. In some cases trees are reported to have developed a new crop of leaves. J. C. Mohler, secretary of the Kansas State Board of Agricul-

the Kansas State Board of Agriculture, returned from a motor trip thru Pottawatomie county the other day and said that some fields were green with volunteer oats plants, and many of them were in head.

One Shawnee county gardener reports that cabbage planted this spring is blooming profusely and producing seed. Cabbage usually does not produce seed until the second year. Another plant in the same row escaped the early invasion of worms and produced a head, which was not harvested. The head swelled and finally burst. Instead of sending up a seed stalk as head swelled and finally burst. In-stead of sending up a seed stalk as the other one did the stalk grew up a few inches, the old head sluffed off and a new head formed. Another stalk from which the head was cut has developed a flock of small branches, some of which are heading. From Southern Indiana comes the report that a Maiden Blush apple tree matured two crops of fruit this season.

matured two crops of fruit this season. Mother Nature seems to have-been on

THIS POULTRY HOUSE from these FREE BLUE PRINT PLANS

Thousands are making money from poul-try-raising. That's true! But have you figured out just what profits you made on poultry last year? Could you have made

more?
The small investment necessary for a modern poultry house that will protect your flock and keep the layers busy, will be repaid many times ever. Proper housing—that's the secret of success in poultry profits.

that's the secret of profits, profits, Plan to build this modern house shown above. You can do the work yourself, for the FREE blue print plans make it easy to build. This house was designed by expert poultry men who have studied poultry house construction for many years. From the plans you can build a modern, permanent house, at such low cost, that it will surprise

ou.

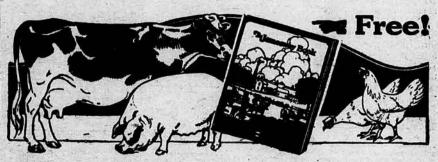

We also offer free blue print plans for a sessal purpose barn, a hog house and cow hed. If you are planning to build one or love of these, you cannot afford to be without these free plans.

How Texas Does It

For 88 years after the signing of the Declaration of Independence the spirit Declaration of Independence the spirit of Americanism was expressed and maintained as "unalterably opposed to any centralized banking power ever getting a foothold on the free soff of America."

The First Credit Union of Texas is investing its funds in tax-exempt Farm Land Bank bonds. A \$40 bond drawing 4% per cent interest has \$19 in 95-cent

474 per cent interest has \$19 in 95-cent coupons, maturing before the bond can be called. In 10 years we will exchange this bond for another, thereby having \$38 new circulation, and still hold our \$40 bond. If Wall Street should buy that bond Texas farmers would have to sell cotton, cattle or produce and send \$38 to Wall Street, compelling the sale of lumber, oil and other products to bring back the \$38 necessary to carry on commerce normally. So by holding the bond here we save \$76, and by saving the tribute that we have to pay the money trust for keeping \$38 in circulation, it would amount to another \$76, resulting in the people of Texas narrowing the gap between them and the money trust \$152-and they still hold the \$40 bond. Houston, Tex. A. E. Clark,

Taxing the Rich

They say it is impossible to tax the rich. Then why such ade about sur-tax reduction? Even if it is all true that every cent of income tax is paid by comparatively poor persons, it is far better than a direct tax on the poor, for then the very poor can produce more of his own living and econoduce more of his own fiving and economize until he can afford to buy the rich man's goods. Let this one rule be followed always: Put the tax as far up as possible and in proportion to the size of the income above the living. We now tax many people to the poor house. No wonder it is out of fashion to own a home. A poor man can scarcely afford it under our system. I say keep the income tax high and the home tax low, and thus discourage extravagance and encourage home building. Harper, Kan. Solomon Knight.

Too Many Bums

A great number of men and boys are apparently doing nothing but steal rides on the railroad. Last year I counted 256 the first week in July. Recently I counted 14 on one train and 17 on a train going in the opposite direction.

Are the railroads tied up by law so they can't put them off, or don't they dare to? It is time the Government took some action to stop it.

These fellows will jump off, dig potatoes, pick apples and steal garden

The worst of it is that the boys see them riding around and take a shot at it and it seems that once they get started at that pastime they never amount to much any more.

Ornon M. Roby.

Glenwood Springs, Colo.

It's a Good Liniment

"Kindly send me," writes Alex Graham of Saline county, "a good rec-ipe for a liniment for bruises and cuts on stock. I have a yearling heifer that cut herself badly on a barbed wire fence, and the cut is very slow to heal."

An easily made, yet effective, liniment to use in such instances is made up as follows: Mix ½ ounce creolin with a pint of raw linseed oil. Apply this to the cut twice daily, and or-dinarily the sore will heal rapidly. During warm weather when flies are bothersome, application of this mix-ture will serve the double purpose of being healing and keeping flies out of the sore.

But B's Idea Was Right

I have a pasture a half mile long. B owns the ground adjoining. By mutual agreement I keep up the division fence, B's land is in meadow and cultivated ground. B always has paid me for keeping up his end of the fence, except in case of emergency when I could not do so he got someone else to do it. About a year ago B died and the administrator informs us that the man who owns the pasture must keep up the fence.

Unless the ground owned by B is turned out to commons, that is, not used at all for private purposes, the rule, that each adjoining landowner must be the division of the divi must keep up his half of the division fence would apply. The owner of the

SANTA FE RAILROAD LAND FOR SALE

100 farms located in Southwest Kansas in
Grant and Stanton County along the new
railroad. These are fine farm lands being
a level black loam. They are suitable for
wheat, corn, barley, oats, kafir, maize and
all other farm crops. The farmers in that
community have had no failure in years as
they have had the moisture to produce these
crops. The price on these lands ranges from
\$12.50 to \$20 per acre according to distance
from railroad. Many of the farmers pay for
these lands with their first crop. These
lands are unimproved, and are only waiting
for good farmers. Let us show you these
lands and have you talk with other fariners in that district. These lands are sold
on terms of one eighth cash, one eighth in
two years, and one eighth each year thereafter until paid. Six per cent interest on
deferred payments. Send for literature,
Howell-Rhinehart & Co., Selling Agents,
Dodge City, Kansas.

Who Runs the Farm?

The headlines of a news item in one

The headlines of a news item in one of our daily papers, reporting a speech made before the Kansas City Chamber of Commerce, lately, read "Success on Farm is up to the Farmer." I would be used to keep barium carbonate away from children or domestic animals. An antidote is salt, mustard and warm water to cause vomiting, and follow with Epsom salts. Call a doctor. George E. Johnson.

The aforementioned speaker proceeded to tell the farmer what he ought to do and what not to do. That is all very well and we are glad to make use of his opinions yet, after all, it is comforting to remember that success on the farm is up to the farmer.

Little pale blossom of tint sky-blue, Why are you worn today?

it is comforting to remember that success on the farm is up to the farmer. He is the one who knows the needs of the farm. He knows its capacity and its limitations. He has been independent and self-reliant as an individual, and now he is beginning to see that his group can be self-reliant, too.

Politicians hold up their hands in holy horror and tell him he must let Government alone. That he does not know how to make laws. That "Farm Blocs" are dangerous. In financial matters he is told that he is an ignoramous who is apt to make trouble. Railroads also are much too complicated for him to handle, and freight rates should not be tampered with—by the farmer.

rates should not be tampered with—by the farmer.

But truth will out. The success of the farm, if it is to succeed at all, is up to the farmer. The farmer knows that the transportation and marketing of his products, the cultivating and harvesting of his crops, the breeding and fattening of his livestock and the financing of these processes belong to and are a part of the great business of farming. He is learning that farmers can work together for their mutual benefit. That they can sell as a group to advantage; that they can buy as a group at wholesale and save money; and that the financial strength of the farming communities can be mobilized for the use of the farmers.

farming communities can be mobilized for the use of the farmers.

His life on the farm where success was up to him has made him a self-reliant, thinking man. He will meet organization by organization. He will meet trust and combine with co-operation.

And he means co-operation for reliant, thinking man. He will meet organization by organization. He will meet trust and combine with co-operation. And he means co-operation, for while he works for his own economic upbuilding he does not squeeze anyone out nor keep anyone out of a fair deal, neither does he intend to be fooled out of what fairly belongs to him. He knows that it is only taking a reasonable precaution to see to it that his industry is not hampered by unjust legislation, and he has put the "Farm Bloc" at Washington to stay.

Here are the Yields

Ten varieties of corn were grown this year by Earl Hedquist, 3 miles

He will meet

Anesthetics applied to a sleeping motor car engine, gone dead from lack of fuel, accomplished the desired effect one Indian summer night this fall. Dr. Richard O. Preston, Meriden, ran out of gas 7 miles from home on his return from Topeka. After trying to hail two motor cars and obtain gasoline he decided the drivers were afraid of being held up.

He resorted to his emergency kit and emptied 4 ounces of ether and a like amount of chloroform into the empty gasoline tank. The anesthetics had just the opposite effect they would have had on a human patient. The dead motor hummed again and delivered the doctor in Meriden with fuel

Ten varieties of corn were grown this year by Earl Hedquist, 3 miles southwest of Roxbury, McPherson county. The Midland Yellow Dent had an almost perfect stand. Giving that a percentage of 100, the percent-age stands and the acre yields are:

Chloroformed His Car

to spare.

Jewell After TB

Jewell county cattle owners have undertaken a tuberculosis eradication campaign. Work was started October 20 under the supervision of the federal and state governments. The Jewell County Farm Bureau is in charge of local arrangements. During the preliminary campaign 90 per cent of the cattle owners signed petitions for eradication. Only 85 per cent are required to undertake area work.

'Rah for the Ayrshires

B. M.'s Canary Bell, a 2-year old Ayrshire owned by the Kansas State Agricultural College, has completed a year's record of 9,315 pounds of milk and 329.73 pounds of butterfat. Twelve cows in the college Ayrshire herd dur-ing the last three years have averaged 12,139 pounds of milk and 448 pounds of butterfat a year.

The Burdensome Dollar

This movement of Secretary Mellon's to popularize the neglected and weighty silver dollar is doomed to failure. It

composed mostly of bread or oat-meal. Vender it will provide, altho some comparison to the plaint of its despotism has arisen across the Atlantic. The temperamental public of this republic is concerned to the molded. A small part, perhaps a teaspoonful, of the different kinds of baits should be put in separate little paper bags, or wrapped separate little paper bags,

if it does come, will not work a burdensome burden, but the poor traveling man, already loaded to the guards with sample cases and other things will be put down for the count. The railway ticket offices and hotels will two places where many of the silver pieces will accumulate, and the hard working traveling man will get his load in change when he proffers a \$10 note for his 98-cent ticket or a \$26 bill for his \$2.50 lodging expense.

Grange Will Handle Pyrotol

The Grange will handle pyrotol, an The Grange will handle pyrotol, an explosive manufactured for the war department, but now released for agridural purposes. The price is very low; it is only a fraction of the cost of commercial explosives. You can get full information from the Kansas Grange Business Association, Produce Exchange Building, Kansas City, Mo.

Up to 5,000 Watts

lls

The Government will now allow breadcasting stations of 5,000 watts to be built; there is none in the United States of more than 1,000. It is believed this will be of tremendous advantage in the summer, in enabling the coming "big brutes" to "cut thru" atmospheric disturbances.

To Consider Land Problems

national fertile land conference will be held in connection with the 13th annual meeting of the National Drainage Congress January 5 to 7 at the Auditorium Hotel in Chicago.

A New Weed in Coffey

BY L. WEIGAND

A weed that has been puzzling farmers on Big Creek in Coffey county has been identified by Mrs. E. P. Harling, seed analyist of the Kansas State Agri-cultural College, as Sheep Sorrel Dock. It was brought into this county in a shipment of Alsike clover. It should be grubbed out and burned.

NOTE OUR NEW CLASSIFIED SECTION

If you have only one or two well bred gilts, boars, calves, or other livestock

somebody wants them.

Put in a classified ad and sell them profitably. The same low rates apply as for other classified advertising.

of to reduce size of herd and offer females of see, individuals or a car load. Also a dozen big bulls ready for service. Fiverything recorded of the best blood lines. Inspection invited. Russell, Crab Orchard (Johnson Co.) Nepraska

The weed is not a foot in height. The seed, when threshed out, resembles sour dock, but it is only about ¼ as large. The leaf is rather long and medium slender, with two earlike projections at the base of the blade. It has a leaf sheath at the base of the leaf stem that reminds one of smart weed or vulcanized in eight months. The full mileage guarantee and of course to most of us this change, if does come, will not work a bur-

LIVESTOCK NEWS

By J. W. Johnson Capper Farm Press

Edward Brehm, Woodbine, Kan., will sell about 40 high grade cows at auction at that place, Dec. 4.

W. F. Bleam & Sons, Bloomington, Kan., are proprietors of one of the largest herds of registered Shorthorns in the state.

Ed Nickelson, Leonardville, Kan., is selling Herefords and Percherons in a big auction at his farm near Leonardville, Monday, Dec. 1.

One of the important Holstein dispersals of the season will be the S. Segrist dispersal at Holton, Kan., Nov. 26. It is not a very big offering but it is a good one and should draw a good crowd of buyers.

Reynolds & Sons, Lawrence, Kan., proprietors of Wakarusa Stock Farm, breed registered Holsteins and own one of the good herds which joins Lawrence. They also conduct a dairy in connection with their breeding operations.

Paine Bros., Admire, Kan., are selling about 80 head of Holsteins in their big clean up sale at their farm near that place, Nov. 28. Of this number 50 are purebred cows and helfers. They are members of the big Kansas Holstein association and are well known breeders.

well known breeders.

The J. P. Mast sale of Holsteins at Scranton, Kan., last Wednesday was well attended and it was a good sale. It was a dispersion sale and Mr. Mast is renting his farms and moving to Topeka. The heaviest buyer in the sale was J. B. Fitch, of the dairy department at Manhattan, who was buying for the State Hospital at Osawatomie, Kan. He bought eight head around the top at an average of about \$200. Included in this purchase was number 5 in the sale catalog, Fatima Ormsby Homestead De Kol who has a record as a four year old of 685.13 pounds of butter in one year and 16.097.40 of milk. She brought \$300 and this was the top of the sale. May Ormsby Glista also went to the State Hospital at \$200. This sale marked the closing out of one of the very oldest herds in Kansas. C. M. Crews & Son. Topeka, did the selling.

M. Crews & Son, Topeka, did the selling.

The trouble with so many consignment sales is that the consignors are not willing to consign a class of stock that is desirable but prefer to put in something they want to sell. In the Blue Valley Shorthorn breeders sale at Blue Rapids, Kan., Dec. 3, the offering of 44 Shorthorns consists of only five mature cows and each of them has a fine calf at foot. There are 27 heifers, mostly two years old and bred and they are put in with the idea of attracting calf club buyers and others that want good foundation cattle. There are just 12 bulls and they are choice and most of them have pure Scotch pedigrees. This is the kind of an offering that will attract attention because it is all desirable young stock. In the future sale managers should take a lesson from many sales of recent months and see to it that only desirable cattle go in their association sales. There is really a good market for good cattle.

Another Mighty Step Ahead

The safety of unobstructed vision is now presented by Overland, through the adoption of motor car bodies entirely of steel—bodies built by Budd, the pioneer in all-steel construction.

Never before in the history of the motor car industry has such a degree of protection been possible at such a low price.

In addition to the greater strength and safety of steel—its ease of repair—its resistance to shocks—its ability to take a permanent, beautiful finish—all-steel bodies give 50% greater vision from the driver's seat.

And, with this new safety of unobstructed vision, Overland gives you 23 big-car advantages which have earned its reputation as "the most automobile in the world for the money." The power of the bigger new Overland engine. And the cradled riding comfort of Overland Triplex Springs (Patented), which give a springbase 30 inches longer than that of any other car of equal length. A sturdy rear axle with a shaft of Mo-lyb-den-um steel — 50% heavier than that of any car at or near the price. A balanced crankshaft that gives amazing freedom from engine vibration.

Volu

Overland is the most economical car in the world to own and operate. Economical in first cost—economical in upkeep—economical in fuel and easy on tires.

Ask the nearest Overland dealer to show you the new, all-steel Overland, and let him explain the easy buying terms which place this wonderful car within convenient reach of everybody.
