Kinney, Thursday, July 31, Mr. Ward and Secretary of the same organization, Mr. Kinney will go to Ottawa, where left early Sunday morning, July 27 to attend the big Farmers Union picnic which was held at Bremen, near the county line between Marshall and Washington counties, on that day. Both Mr. Ward and Mr. Kinney were Zenephon:

they will speak at the county wide Farmers Union picnic of Franklin county.

It seems to me harder to find scheduled to speak at this meeting. Tuesday, July 29, they will go to Omaha, Nebraska to attend a meeting

A FELLER'S HAT

Its funny 'bout a feller's hat He can't remember where it's at, Or where he took it off, or when, The time he's wantin' it again. He knows just where he leaves his shoes; His sweater he won't often lose; An' he can find his rubbers, but He can't tell where his hat is put.

A feller's hat gets anywhere, Sometimes he'll find it in a chair, Or on the side board, or maybe It's in the kitchen, just where he Gave it a toss beside the sink When he came in to get a drink, An' then forgot—but anyhow He never knows where it is now.

A feller's hat is never where He thinks it is when he gets there; It's never any use to look For it upon a closet hook, 'Cause it's always in some place It shouldn't be, to his disgrace, An' he'll find it like as not Behind some radiator hot.

A feller's hat can get away From him most any time of day, So he can't ever find it when He wants it to go out again: It hides in corners dark and grim An' seems to want to bother him; It disappears from sight somehow-I wish I knew where mine is now.

Edgar A. Guest.

their organizations in Kansas and the Federal Farm Board, it is due to lack of information and tive devices. It has been demonstrat- of Minneapolis. We had a very nice a partner. There it is picked up by the regional or statewide cooperative devices. It has been demonstrations in Kansas and the Federal Farm Board, it is due to lack of information and twe devices. It has been demonstration and the devices is the devices of the devices. It has been demonstration and the devices of the d members and the organized farm groups better informed as to what is being accomplished and what is contemplated. If clear understanding does not exist between the Farm Board and Farmers National Grain Corporation, it should at once be established.

We recognize that intelligent attention to production is essential to price maintenance, but peculiarly subject to lightning bolts, we also believe a program of wheat acreage reduction presents grave problems which will require the careful consideration and action of all to solve.

We ask the Farm Board to undertake more vigorously to aid in finding and developing markets for United States grain. We feel that such active aid may be extremely helpful in giving to our agriculture a larger share in our world trade.

We need, also, to be able to assure our members in advance that if surplus yields should result from favorable crop seasons after reasonable acreage reduction has been secured, the Farm by spontaneous combustion if they are Board will at once act through the Grain Stabilization Corporation to prevent such seasonal surplus from depressing the price.

Under provisions as stated, we pledge our support through our organizations to aid and assist in presenting to the farmer the economic aspects of the acreage reduction program and promote discussion of same with full knowledge of the facts, without prejudices and free from preconceived ideas.

(Signed)

Committee of Farm Organizations, L. E. Webb, Acting Secretary.

We, the Committee of Kansas Farm Organizations in session today urge the appointment of George H. Thomas to the position of the Federal Farm Loan Board which is to be vacant in the near future.

It was moved and carried to adjourn subject to the call of the Chairman.

(Signed) L. E. Webb,

Acting Secretary.

The Kansas Farmers Union is in thorough accord with the resolution as adopted. We believe that the reduction in acreage is a necessary part of the Farm Board program, if provision is made to take care of the surpluses in the future. We hope the Farm Board will make a public statement in the near future promising as part of its permanent program to use the powers given it by the Agricultural Marketing Act to stabilize the price of wheat in case of emergency, such as we have at present. If this is done, the Farmers Union will not oppose the reduction in acreage program. If the farmers are asked to reduce their acreage, then we believe that the Farm Board should give them some kind of a guarantee that the surplus in any year shall be taken care of. We are not opposed to the Farm Board.

The Farmers Union of Kansas has used every means in their power since the Farm Board was appointed to educate and organize the farmers so as to be able to take advantage of the provisions of the Agricultural Marketing Act. We believe that the grain marketing Machinery set up by the Federal Farm Board, that is, the National Grain Corporation, eventually will be the means of giving the farmers the right to have something to say about the price of grain. About 40 per cent of all of the wheat coming into Kansas City this year is being market-

ed through the National Grain Corporation. This undoubtedly will hold true with other markets in this country. This means, the National Grain Corporation will handle more than 300,000,000 bushels of the 1930 wheat crop. There is no question but that there will be an immense saving in the matter of expense of handling this crop.

protection against electrical discharges. In view of the fact that compar-ative isolation makes farm buildings it would seem a matter of necessity that they be equipped with rods, but only a small percentage are actually

so protected. The contents of farm buildings are mainly of a quick-burning nature. Grains or hay are easily ignited by a carelessly tossed match or cigarette, stored while deep or before the curing process is complete, or by a spark or lightning bolt. It is evident that protective devices, such as fire extinguishers or pails of water, should be available at all times. Many farms be available at all times. Many farms are now equipped with water sys-tems that supply sufficient pressure for a garden hose, which is a good fire-fighting weapon if kept connect-ed and ready for service in barns and other danger points.

other danger points. On farms that are beyond the reach of electric current and have no private generator, kerosene lamps are

in general use and constitute an ad-ditional hazard, as many people are careless in handling oil. Kerosene lanterns can easily be upset in a barn or storehouse containing an abund-ance of hay or other fast burning Act

product. The various buildings comprising an average farm are generally erect-ed close together, making it almost certain that if one burns the others will likewise be involved, and in the absence of fire-fighting equipment,

FARM BOARD SHOULD BUY WHEAT

based on better marketing conditions that will come about in the price of wheat after the rush is over.

The Marketing Act is under test. Ample provision was made for testng it. An adequate emergency for the test is here. It would seem no better situation for testing the emergency provisions of the Act could be found. This emergency is acute and requires immediate attention. Regardless

way. I believe we can stimulate the market now at a time when wheat is ing rods. They can, however, be in the farmers' hands and farmers can get the full benefit of the prices.

Arthur Capper, Washington, D. C., in Kansas Farmer.

THE PRESIDENT'S COLUMN C. A. WARD

LET US BEWARE

Aside from the political agitation which is current over Kansas at this time, perhaps there is no subject as widely discussed as that of the Agricultural Marketing Act and the Federal Farm Board.

The discussion of this whole subject became more acute because of the writers laboratories. To insure standcour through the south west made by Mr. Hyde, Secretary of Agriculture and ard materials and installation, prosxander Legge, Chairman of the Federal Farm Board. The Kansas Farmers Union, along with other farm organizations and Master Label of Underwriters Labor-Alexander Legge, Chairman of the Federal Farm Board.

thousands of farmers have been working for many years for some kind of atories, Inc., for the completed job. national legislation. It is common knowledge to all that the McNary-Haugen Bill with the equalization fee was twice passed by Congress, each time being vetoed by President Coolidge, and once almost passed over his veto. Also, there are many who have thought that the export debenture plan would solve the problem in a large measure, at least. But, the result was that we derwriters Laboratories. The inspec have the Agricultural Marketing Act with the Federal Farm Board.

The Kansas Farmers Union has endeavored, since the passage of this Bill and creation of this Board, to support it to the utmost. The Agricultural Act itself is the foundation and the Farm Board is charged with the responsibility of administration of it. This, of course, necessitates that certain fundamental policies must be established and then applied, that the over a million dollars to farm prop-Bill itself might become workable. We have always felt that the Bill has the damage from lightning, and closea lot of merit and there are two or three fundamental principles that we ly related to the largest cause, deare all agreed will materially help the farmers of this country out of this financial distress with reference to the marketing of our commodities. financial distress with reference to the marketing of our commodities.

Just now, let me say, that the farm organizations, and especially the marketing agencies are on trial. We are proceeding to set up "Farmer rightful place on farm buildings than owned and farmer controlled" cooperatives as set out by the Bill and most on city or suburban structures. Sparks ber and lakes on both sides of us. We necessarily this invites the opposition of our enemies, the speculators and land on inflammable roofs from chimgamblers in the grain business, who, all of these years, have hoarded wealth at the expense of the American agriculturalists. We feel that the set up passing locomotive or a fire in a of the National Grain Corporation under the direction of the Federal Farm neighboring structure. Next to con-Board is a great step forward in the effective marketing of grain. Con- struction of safe chimney and equipsidering the short time the National Grain Corporation has been in action, the progress that has been made is very commendable indeed. Final figures at the end of this year will show that the farmers of this country resistive material. have effectively marketed a very great proportion of their grain through this agency.

Of course, our readers know that we took issue with Mr. Legge and Mr. Hyde in certain statements and principles they advocated while in this cated as being over ten million dolsection of the country. The intent of this criticism was not of a destructive lars. With the large amount of quick nature, but rather constructive. We felt then, and we feel now, that the curtailment of production is only a part of the solution of this problem. Our stand has been that a crisis exists in wheat prices and that the Board was empowered and authorized by the Bill itself to meet such crisis to the benefit of the farmer from the revolving fund as provided in the Marketing Act. I might suggest that many of our Senators have stated that it was their understanding that the Farm Board, through the revolving fund, should meet just such emergency.

I stated in a former article that we must stand first, last, and all time for our own organization. With reference to the Farm Board and their policy, let me say this: that the farm organizations of this country must be constantly on their guard because of the fear of our enemies who, through hay were thoroughly cured before betheir cunningness and deceptiveness, may be able to bring political pressure ing stored, and if every farmer took to bear in such a way that this whole thing will be administered politically the added precaution of scattering salt ceed, it will be by building upon the initiative and foundation we now have in farm organizations." The farm organizations feel that this program can be administered more Board discussing this proposal. The board's decision will await the return effectively if the Farm Board will consider and consult the farm organizations with reference to these various national policies which are expected to It has been the general understanding that the Farm Board was created be put into effect. We also feel that if the farm organizations are not taken end will be discouraging, if not a failure. The Kansas Farmers Union at this time has its own marketing agencies which are effectively operating and, this at a nominal cost to its membership and the farmers of this state. We have always carried our own program without financial assistance from any source. We have always congratulated ourselves because of our independence, which, we feel, has conributed to our success. It has been, and is now, our policy that we shall not become aligned in any way which might lead to the losing of our identity or independence. The meeting of the Committee of Kansas Farm Organizations in Kansas City, which is elsewhere referred to in this paper, in my estimation was a success and constructive in its nature. We are endeavoring, and we are working together as farm organizations in this state.' At this meeting we discussed frankly the whole program of the Farm Board that has been so far presented. Many constructive suggestions were exchanged with reference to the policies of the Board and administration of the Act. It was evident that everyone present at this meeting had in mind the ultimate end resulting in benefits to the farmers themselves. This office has received many letters from our membership over the state, some commending us on our statements in recent issues of the paper; others feeling that we had made our position too strong. Permit me to say at this time that we are always more than pleased to get your suggestions sulted from improper installations and the constructive policies of our organization will be moulded by the sentiments expressed from our membership over the state.

THE CRITICISM

A clergyman who rides to his church in an auto received an anony-mous letter calling his attention to the fact that the Lord never rode to hurch in a car. The clergyman

and inspection service of the Under-This Master Label indicates that the

lightning rod equipment of the build-ing on which it has been placed has been made and installed in the manner specified as standard by the Untion service of the Underwriters Labratories, which should be insisted upon, takes place at the factory for

counter-checking installations bearing the Master Label. Sparks on roofs caused the loss of

ent Hoover over the wheat situation and found him most sympathetic in his attitude. I pointed out to him the without consideration of the now existing farm organizations. Let me call existing emergency with wheat selling at the lowest price in 16 years, and your attention to the statement made by President Hoover in his brief adurged that the Farm Board should buy at least 100 million bushels of this dress to the Federal Farm Board when he said to them: "If we are to sucyear's crop immediately and take it out of the market, as a means of stabilizing the price and protecting the interests of the wheat growers.

I had an hour with the President and spent another hour with the Farm next week of Chairman Legge to Washington.

for the purpose of meeting just such emergencies as the one now facing the into the confidence of the Farm Board, in these matters, that the ultimate wheat growers of the United States, and it seemed to me the board would be amply justified in moving through its stabilizing corporation to take off the market a sufficient quantity of wheat to steady the price, that it couldn't lose anything.

I found the President attentive and decidedly sympathetic. He wants to see the farmers get out of the present situation in a way that will help them. He is very much interested in the situation.

Since my statement of July 12, urging such action by the Farm Board, I have received many letters and telegrams from farmers and business men in Kansas supporting this proposal and urging me to continue my efforts to bring it about.

0

I took the President some of these letters commenting on the seriousness of the situation in Kansas and the wheat belt generally. Among them was a letter from C. A. Ward, president of the Kansas Farmers' Union and a prominent farmer, Mr. Ward wrote:

Most assuredly an emergency exists in wheat prices at this time. Farmers are compelled to relinquish their rights to the wheat to raise money to pay their current expenses. If the Agricutural Marketing Act means anything at all, why not, in the name of heaven, give it a chance to operate at this time?

I wish you gentlemen to study the relative price of wheat before the war and at this time in connection with the prices farmers have to pay for machinery, farm equipment and most everything else they use on their farms. To illustrate, the farmer just before the war bought his grain binder for \$125 but today he pays \$250.

Mr. Legge advocates cutting the cost of production. The same rule ought to apply to the manufacturers as applied to the farmers. If it is a fact that all the Farm Board has to offer is a curtailment of production to a domestic basis, then I feel it is time for something else to be done.

Again, Kansans feel that the Farm Board is not exercising the power they have under the Agricultural Marketing Act in stabilizing prices.

I congratulate you, Senator Capper, on your recommendations of July 11 that the Farm Board buy 100 million bushels of wheat and hold it off the market in an attempt to stabilize current prices. Of course it would occur to me that a more logical time would have been 10 days ago, and stabilize the price by offering to buy the wheat at a figure some 15 cents or 20 cents above that which it brought.

The Kansas Farmers Union is not criticising our Senators and Representatives, but we feel now is the time for them to step in and work shoulder to shoulder with us in the solution of this problem. Another of these letters was from W. A. Layton of Salina, a former member of the Kansas state senate, and a large wheat producer. In his letter Senator Layton said:

You have assisted in placing on the statute books of the nation a law that gives our Farm Board the right to purchase more or less of the surplus of wheat produced in our country and thus to help stabilize the price of wheat at a time when the rush of wheat to market during harvest with the combine is on, and still our Federal Farm Board is not purchasing a bushel of it as far as we can secure information. You indicate that it might possibly not be the psychological moment to buy said wheat but that the Government may get in the market a little later and that developments within the next two or three weeks may make it practical and plausible for such a purchase. But, do you not understand, Senator Capper. that it will be too late at that time to benefit the wheat raiser, who is more in need than those wheat raisers who will be able to hold their wheat for two or three weeks and secure a price at that time

It is my conviction that the people of Kansas are self conscious of this stalled a safe distance from woodwhole Farm Board program. Also we feel that many are aware of the work, placed on a fireproof base, and all-day program. A number of promcritical period through which we are passing in looking towards definite help to the farmers of this country and the solution of our agricultural ills. It is well to have smokepipes as short help to the farmers of this country and the solution of our agricultural ills. We should, and are doing solid thinking for ourselves, and above all, let kept as far as possible from woodwork us in no way compromise or surrender the principles that have been exem- as conditions will permit. When they plified in our organization for many years past.

THE INSURANCE CORNER

C. A. Ward.

By CHARLES A. BROOM, Secretary

In writing insurance on an old roof be very careful that the roof is in condition to insure. A large proportion of our loss is on old roofs that have passed the age where they should be insured. Neither the agent or the nsured should ask or expect any insurance company to pay a claim on an old roof when the shingles are rotten and the nail hole completely gone. If they do they should expect to pay more than they are now paying.

We have always tried to make our business relations with our members pleasant but in recent years so many of these things have arisen that we sometimes wonder where it will all lead to and what the ultimate result will be. Will we be obliged to raise our rates up to other companies or restrict our contract or limit our liability. We don't want to be obliged to do any of these so we wish our members would be thoughtful in spite of the very unfavorable farm conditions and face facts as they are regardless of the uncertainty of their position. Certainly you will not err if you do what you can to make it possible for your own company to stay in the field.

Another phase of this business is fire prevention. Do what you can to eliminate the large fire waste prevalent in this country today. This is for your own good as well as ours. The insured is sure to sustain considerable loss in case of a fire so beware of the many things that can cause fires. Loose matches, especially, when handled by children, oily rags and waste hay, straw and litter, around cars and tractors, gasoline and oil stoves, open gasoline and kerosene cans, are only a few of them. Eliminate them today caught. and see if we don't have a better loss ratio than we now have.

That is the motto of this farmerowned and farmer-controlled Life Company, whose insurance is sold only to farmers and whose resources are dedicated to the financial betterment of farmer policy holders.

Why not become a practical cooperator today by protecting your estate with a policy in this company? Write or call at the home offices. It is a pleasure to help you.

Farmers Union Mutual Life Insurance Company

706 Grand Ave. Des Moines, Iowa

Junior Cooperators by **Aunt Patience**

HOW TO BECOME A MEMBER OF THIS DEPARTMENT

Any boy or girl between the ages of six and sixteen, whose father is a member in good standing of the Farmers' Union, who writes a letter for publication, can be a member of this department, and is entitled to a pin. In order to receive a book, he must signify his intentions to study the lessons and send them in. We cannot send out books to those who do not intend to send their lessons. The address to which all Juniors should send their letters is: Aunt Patience in care of the KANSAS UNION FARMER, Salina, Kans.

-402-Dear Junior Cooperators: Here we are at last with the July lesson and as it is not so warm now, maybe we can get right at it and get through with it as we will have rules and pledge not to smoke cirag-

My, my, I am so overjoyed as 1 read the list of new members. This membership column is adding up fast. Why, pretty soon we may out-number the members in the Farmer's Union,

ing to write to each other in different parts of the state. Maybe if we have a large enough membership, we will have a convention all sur own some day with regularly cleated efficient better off day with regularly elected officers better off. and all. Don't you think that would be nice

One of the Leading Authorities on Taxation, Not only in Kansas, but in the Entire Middle West.

Kansas needs a man of mature years at its head, one who has had the experience; one who is able, honest, fearless, and understands the needs of the people of the State as a whole. It particularly needs a man who is familiar with the farm, and farm problems. Kansas needs a man who, when enforcing the laws, treats the East, West, North and South alike. Kansas does not need class legislation. It needs a man who has the interests of all the people at heart.

There is not a man in our state who is more familiar with the tax problems, and the present method of taxation than Noah L. Bowman. The years spent on the State Tax Commission have given him a thorough education and understanding of these problems. Senator Bowman is the author of an interpretation of the Federal Income Tax Laws, and this book is now being used by those who are in the Internal Revenue service of the United States Government.

He came to Kansas in 1872 and spent his childhood days with his father on the farm near Garnett, Kansas, and he now owns and operates the farm homesteaded by his father. The several hundred acres of land owned by the Bowmans is under the personal management of Noah L. Bowman.

The fifty-eight years of Mr. Bowman's life in Kansas has familiarized him with Kansas conditions. As a member of the Kansas State Grange, and the Kansas Livestock Association, he has also gathered much valuable information about Kansas people and their needs.

His early education was procured at the old "Hamilton School" in Linn County. He later attended the State University and the State Agricultural College, and graduated from Lane University, a United Brethren School. He procured his law education by reading law under "Uncle Jimmy" Green of Kansas University, while Mr. Bowman was teaching in Lane University.

Examine carefully, if you please, the record of Senator Noah L. Bowman during his twenty-nine years of public service to the State of Kansas.

His political career, his every step as a public servant, is in black and white, and he kindly solicits your inspection of his record.

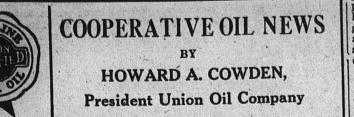

MR. DEMOCRAT

if you make an honest investigation of Mr. Bowman's life and character, you will cast your ballot for him on August 5. With Noah L. Bowman our nominee, success will come to the Democratic party in November.

Practically every producer of grain and consumer of bread has a personal interest in the Wheat Production Ad-justment Conferences which were started this morning in the heart of the winter wheat belt. Arthur M. Hyde secretary of agriculture, and Alexan-der Legge, chairman Federal Farm Board, are taking a personal part in these meetings. Both of them spoke at a meeting held at Hastings, Neb-raska, today. This meeting was the first of a series of six which are be-ing held in Nebraska, Colorado, Kan-sas, Texas and Oklahoma, this week. Meetings in the various states are be-ing attended by representatives of wheat growers, local bankerss, other

CHARACTER IN PUBLIC OFFICE

rates. The settlement gives Kansas mercantile property a ten per cent reduction which

as the courts gave Missouri, but Missouri now gets an increase of 16 2-3 per cent. The state tax code commission has submitted a report recommending a modern tax system and

the report will be considered by the 1931 legislature.

You will have an opportunity to vote on a constitutional amendment to permit the graduated in-come tax law advocated for years by Kansas farmers. The intangible tax law which permitted financial institutions to escape a fair share of taxes

His opponent criticises Governor Reed for presuming to speak for the farmers against wheat acreage reduction, for fighting for lower freight rates and for going out of his way to enforce the

prohibitory law. One of the principal arguments for the election of Mr. Haucke is that he is a farmer on a big scale and therefore familiar with farm problems, but W. I. Bowman, of Council Grove, has made affi-davit that the tax records of Morris County for ten years last past show no personal property or real estate assessed to Frank Haucke, excepting a tax for monies amounting to \$15.34. The one big hope of the opposition is that the farm folks will not vote August 5. Every farmer should vote and see that his neighbors vote, as this is their fight. The same old group that fought the appointment and confirmation of Richard J. Hopkins as federal judge because he was friendly to law enforcement, is fighting Governor Reed just as hard. The Wichita Beacon, after the bankers' meeting at Wichita, quoted Mr. Haucke as telling the mortgage bankers that he was in favor of reducing the period of redemption following mortgage fore-closures from 18 to 6 months.

Under the auspices of the Kansas State Agricultural College, Santa Fe Railway, cooperating.

A short speaking program will start upon arrival of train. Ample time will be allowed for

By taking the best possible care of your cream and eggs during this extremely hot weather. Care-lessness on the farm and at the local station means a lower quality product and decreased profits. The price received for the finished product demonstrates very clearly that GOOD QUALITY is worth striving for.

Practical suggestions given on request.

We want to know what a man stands for When he asks the citizen To open for him the office door And turn him loose within. Does he fight for the_men_ of millions, or

The millions that are men?

If we are to improve the character of our officials, we must improve our citizenship by studying more the rights and duties of voters.

To that end the "primary" for nominating must be maintained and given the necessary improvements by its friends, not its enemies. We must keep its legislatives out of the legislature. If the common people are to regain control of this country they must go into politics with all their power and intelligence.

CHARLES R. WEEDE Candidate for SECRETARY OF STATE

Seven million foreigners in this country who are not American citizens, are being used to reckon the Congressional Representation for the extreme eastern states. If this is corrected and representation robbery of western states stopped the people must be informed and must think.

Means should be found to attract more industries to Kansas. We have the resources, the transportation, the power and the people. It is a logical move in relieving unemployment and congestion, but the wealth of eastern cities will be used to prevent such a change.

THE IMPROVEMENT OF THE MISSOURI RIVER MEANS CHEAP-ER TRANSPORTATION THAN THE RAILROADS. It would lower the cost of sending our products to the world and bringing its products to us.

THE FEDERAL FARM MARKETING ACT IS A RIGHT MOVE toward protecting the sale of farm products so that market manipulators shall cease to make huge profits by forcing the price down on the farmer and raising it

on the cons

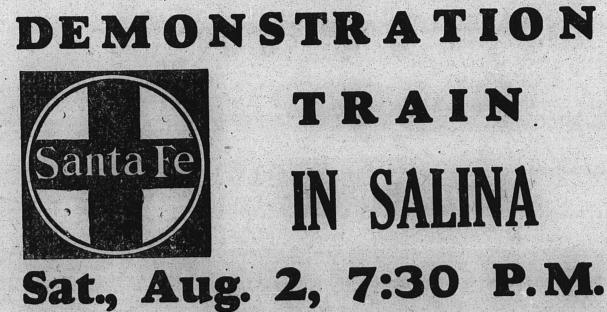

Provisions should be made now that if war should confront us again, THAT ALL THE RESOURCES OF MEN AND PROPERTY IN AMERICA SHALL BE COMMANDEERED ON EQUAL TERMS.

ALL CLASSES MUST BE THOROUGHLY ORGANIZED IF THEY ARE TO HOLD THEIR OWN IN A WORLD SO HIGHLY ORGANIZED AS IS OURS TODAY.

I believe any man who seeks a high office like that of Secretary of State should be of such calibre as a citizen that he understands these needs and is active in his desire to see them realized—not merely engrossed in plans for perpetuating himself in office.

Every good word for my candidacy and every vote on primary day, will CHARLES R. WEEDE Sterling, Kansas
