LIVESTOCK AUCTION
With ACTION

Barn Phone
913 TA 5-0211 Salina, Kansas

When The Object is Not Photographs -But Beefsteak

It's some distance from the G&G area, but the Beef Empire Live & Carcass Show at Garden City illustrates well changes in the livestock business that many area cattlemen are saying was a long time in coming.

The animals entered at the Garden City Show were not groomed or fitted in any way. Matted hair, mud and even manure were not given a glance by judges. They came in straight from feedlots and were gaining weight right to show time.

All the animals entered are slaughtered and the comparison of carcasses to eyeball evaluation is made in two days.

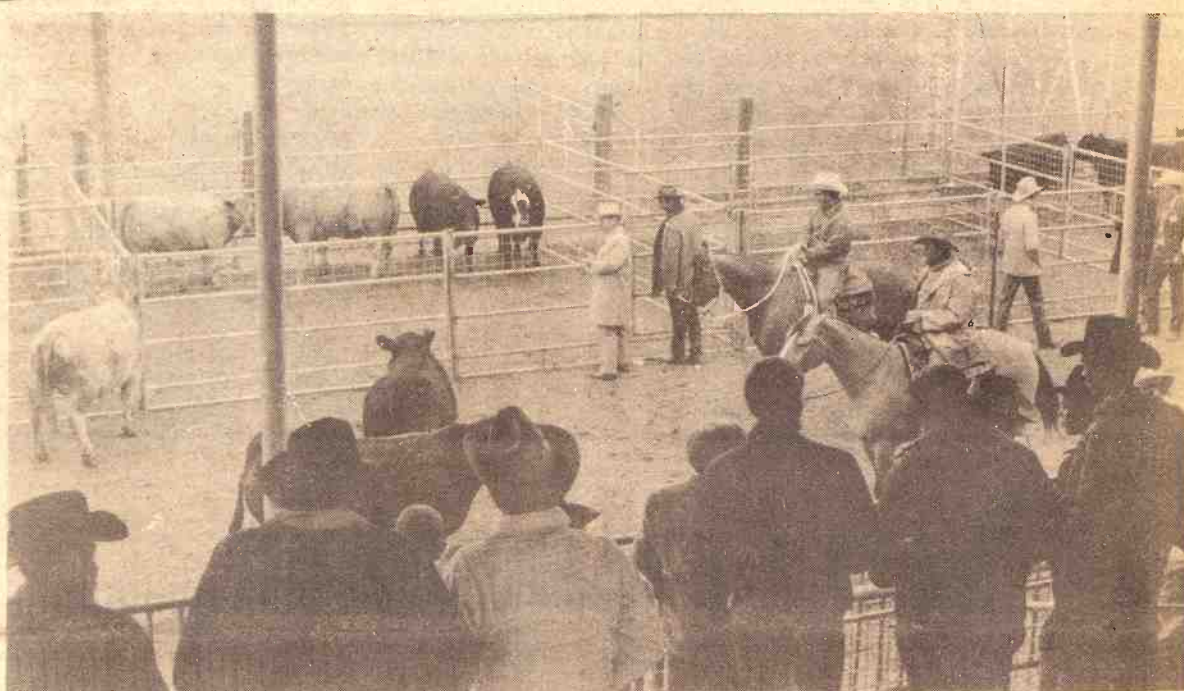

For more details see story on page 6

THE OBJECT OF IT ALL

A 1,166 pound Charolais-Angus crossbred steer won the carcass contest. It yielded a 742 pound carcass, had a 62.9 dressing percentage, 15.43 square inch rib eye, only two-tenths inch fat covering at the 12th rib, graded choice minus, and had a cutability grade of 1.6.

LIVE WINNER

An Angus heifer owned by D & B Cattle Company of Scott City won the special heifer division of the show.

EYEBALL JUDGING ON HORSEBACK

The Beef Empire Show departs from the traditional version of the steer show. Steers are shown in an unfitted condition, by two horseback riders. The judge makes a visual appraisal only.

'Haggling Back In Market Place?'

The marketing of farm products has turned a full circle from the days before World War I to now. Finding the true competitive price and obtaining it once again is the farmer's biggest problem in the opinion of a top official of the Department of Agriculture.

Eric Thor, administrator of the USDA's farmer co-operative service, prefaced his remarks on the trend to industrialization in agriculture with the thought that price haggling has returned to the market place.

"Before World War I," Thor told persons attending a national agricultural marketing conference at Denver, "most farmers were hauling their produce and driving their livestock to the local market centers. The price and terms of sale were determined primarily by farmers and buyers haggling to attempt to find the true competitive price."

That price-discovery problem, Thor continued, encouraged the development of terminal livestock and produce markets. In those facilities, interactions of demand and supply discovered the price.

The USDA official noted that wholesalers, jobbers, retailers and packers adopted the system and that commission men and brokerage firms replaced the farmer-to-buyer "head-on" relationship. The system

worked for a generation or more.

"The terminal marketing system began to break down during World War II, when the demand for farm produce expanded faster than farm production," Thor continued. "Retailers and packers in order to obtain supplies procured directly from farmers."

"By the late 1960's, bypassing the commission men and wholesalers became the rule rather than the exception for chain stores, co-operative buying groups and packers dealing with farmers."

"The volume of livestock and produce handled at the terminal markets declined. Many livestock markets closed and others are planning to close. Produce and livestock auction markets have become centers for handling products that have not been sold elsewhere."

"The haggling between farmers and buyers has returned. The discovery of competitive market price and getting it again has become a major problem for those who produce our farm products."

Thor said farmers realize the loss of the cash market knowledge has weakened their bargaining position, and added that in many cases the farmers do not know how to overcome this loss.

"Some specialized commodity groups in an attempt to offset the loss of bargaining power have formed bargaining associations to represent the farmers in negotiating price and terms of contracts," he continued. "A few have had some limited success. In nearly all cases these successes have been short-lived."

"Successful farm bargaining tends to sow its own seeds of destruction. If the price of the commodity is increased enough so farmers can make a profit, then the farmers expand production beyond what will clear the market at the increased price."

He cited cling peaches and navel oranges as examples in which short-run gains have created virtually unsolvable long-run supply problems. Thor could have used as well the current oversupply of hogs, which has depressed prices now for six months or so, but is being solved by producer cutbacks this spring.

All of Thor's remarks preface what is a relatively new trend in marketing. That is the banding together of producers in large marketing cooperatives that attempt to negotiate prices and to some extent fix, or at least recommend, production rates.

Milk producers have been the most successful to date. Earlier this year, the example, several of their organizations lobbied and were successful in obtaining a milk price increase from the administration. The United Egg Producers headquartered in Atlanta, is another example.

In the opinion of Thor, U.S. production agriculture is really entering a new era that promises to leap beyond anything farming — or marketing — has known to date.

"Agriculture is moving with full speed toward becoming part of an integrated production-market system," he said. "This system, once it is developed, will be much the same as industrialized systems in other U.S. industries. Personal

income and return on investment should also be comparable."

Thor said that out of this kind of mix eventually will come a new industrialized food and fiber system. No one knows precisely what shape it will take, the USDA man added, but it most likely will be highly integrated. That is, farm processing, distribution and marketing entities will be tied together in such a manner that historic waste and surplus problems will be overcome.

The Denver speaker said some early manifestations have been ventures into corporate farming, but that indications lately have been that type of farm "is not the most efficient system that can be developed."

"There is adequate research to show that the owner-operator type farmer on an efficient-sized farm obtains higher yields per unit of land or livestock and has lower labor and management cost than the large corporate type of farm," he said.

"However, research also shows that the operator of a family farm is not able to obtain as high a net return from marketing, nor is he able to procure the production items at as low a net cost."

There are several ways farmers can gain most of the advantages associated with the large-scale corporate farms. One method mentioned by Thor is through some type of contractual arrangement with the large integrated firm. That method insures the farmer a "home" for his product.

"The firm could provide the farmer with capital, and it could help the farmer with his planning to assure that the right type quality and quantity of product was produced," he said. "The unsolved problem, however, is arriving at price and terms on a contract that are fair to both parties. As individuals, farmers have little negotiating power."

A second method mentioned is for farmers to join together and become a full supplier to and sharing the profits with the integrated company. "As would be expected," Thor added, "most large firms resist this approach much in the same way large manufacturing corporations resisted the unionization of labor."

Third among Thor's suggestions is a way in which farmers join together and bargain with buyers. But he said if this is to be successful, additional

congressional legislation is needed to establish more firmly the rules under each group is to operate. "The fourth method is for farmers to join together in cooperatives to have their own processing, marketing and distribution companies," he said. "I think the lack of know-how on the part of the farmer is the main obstacle why this approach is not progressing rapidly."

Whatever the final solution, combinations of solutions, agriculture is in the process of becoming part of the world's most efficient food and fiber system, Thor concluded, adding:

"This new system, as it is developing, is creating a major economic crisis down on the farm. The family farm which has been the backbone of the nation's agriculture is disappearing. It is in danger of being eliminated because those who helped make agriculture great are not providing the type of leadership necessary."

"As discussed earlier, there is adequate research to show that the efficient owner-operator farmer can produce farm products at lower costs than anyone else. In my opinion the most efficient food and fiber system would be one which combines the most efficient segments of the systems I have outlined."

State Fair Signs Daredevil Cyclist Evel Knievel

Evel Knievel, motorcycle daredevil, will perform a wheelie leap as the highlight attraction in motorcycle racing at the Kansas State Fair Sept. 25 and 26, White, fair secretary, has announced.

Knievel attains a speed of about 100 miles per hour before taking off from an elevated ramp for his leap. He intends to leap 10 large truck cabs parked side by side at the fair.

Knievel probably is the most daring and best known motorcycle stuntman. A motion picture depicting his life will be released July. George Hamilton Knievel in the movie.

You plant it. We make it grow.

Give us your money to save, and we'll make sure that it earns good interest. And is safely insured up to \$20,000. And is there when you need it. OK?

OUR DAILY BREAD

— by G&G Area Cooks

Mrs. Louis Jahnke Of Leonardville Wins Prize

The winner is Mrs. Louise Jahnke, R 1, Leonardville: CRUNCH BURGERS

two-thirds cup evaporated milk

1 egg

1 1/2 pounds ground beef

1 cup crushed potato chips

1/2 teaspoon salt

1/4 teaspoon pepper

1 teaspoon dry mustard

1/4 cup chopped onions

Blend all ingredients together until well mixed. Form into 6 patties,

crush another cup of chips and put on outside of burgers before grilling.

Broil five to seven minutes on each side.

Mrs. Larry Reed, 2425 O Street,

Belleville, sent the following recipe:

PEANUT BUTTER BALLS

1 cup peanut butter

1 cup powdered sugar

1 cup chopped nuts

1 cup chopped dates

2 tablespoons melted butter

Mix well; make into balls, put in

refrigerator for one hour. Melt 1 6-

ounce Hershey bar and 1/2-inch

square of paraffin in top of double

boiler. Roll balls in melted

chocolate; put on rack to cool.

Mrs. J. Howard Comp, White City

"If your jams and jellies are getting

low, think you'll like this rhubarb

jam to replenish your supply."

RHUBARB JAM

4 cups rhubarb, cut very fine

4 cups sugar

1 small can crushed pineapple

1 3-ounce package strawberry

gelatin

Combine rhubarb, sugar and

pineapple with its syrup in a large

kettle. Let set until sugar dissolves

slightly. Bring to a boil, reduce heat and simmer for 15 minutes or until rhubarb is tender. Stir in gelatin. Remove from heat. Pour in jars and store in refrigerator. Makes about three pints.

Mrs. Ewald Ohlde, R 1 Palmer: "Enjoy your recipes and look forward to reading them. I am enclosing one of our favorite cookie recipes."

CORNFLAKE MACAROONS

1 cup butter

1 cup brown sugar

1 cup white sugar

2 teaspoons baking powder

1/2 teaspoon salt

1 teaspoon vanilla

2 cups cornflakes

2 cups flour

2 eggs

1/2 teaspoon soda

1 cup raisins

1 cup coconut

Heat oven to 375 degrees. Cream

butter and sugar, add eggs and

vanilla then add rest of the

ingredients. Drop on ungreased

baking sheet and bake eight to ten

minutes.

Mrs. Ernest Priddy, R 9, Topeka:

"I want to thank you for being a

Mouli grater winner with one of my

recipes. I know I will use it and enjoy

it. Thanks again." Mrs. Priddy sent

along this recipe with her note of thanks:

HEAVENLY CHEESE SALAD

1 small package lemon gelatin

1 cup boiling water

3/4 cup syrup from pineapple

1 cup salad dressing

1 1/2 cups drained crushed

pineapple

1 cup shredded cheddar cheese

Dissolve gelatin in boiling water,

add the pineapple syrup. Gradually

add salad dressing, mix well. Chill

until slightly thickened. Fold in

pineapple and cheese. To mold use

1 1/2-quart mold.

Mrs. Albert Stroda, R 3, Marion:

"Would like to send you a recipe

that you bake in the new bundt pans

now on the market. It is so moist and

delicious."

POPPY SEED BUNDT CAKE

1 box Betty Crocker butter brickle

cake mix

1 small box instant coconut cream

pudding

3/4 cup oil

Soak 1 1/4 cup poppy seed in 1 cup

hot water until cool

4 whole eggs

Mix all ingredients except eggs and

poppy seed. (Drain water off poppy

seed). Beat three minutes. Add

eggs, one at a time, beating well

after each addition. Add poppy seed

last. Grease and flour bundt pan

well. Bake at 350 degrees, 40-50

minutes. Remove from pan and pour

glaze over cake.

This recipe is from Mrs. Rex Percival, Tescott:

BRAN MUFFINS

2 cups all bran (100 percent)
2 cups boiling water
Set aside and let cool then cream the following:
3 cups sugar
1 cup shortening or oleo
Add:
4 eggs
1 quart buttermilk
Sift:
5 cups flour
5 teaspoons soda
1 teaspoon salt
Add only until dry ingredients are moistened. Add 4 cups 40 percent

bran flakes. Fill 4 quart jars; can be kept in refrigerator for six or seven weeks. Take out and bake in muffin pans as wanted. Bake at 400 degrees for 18 minutes.

Mrs. Arthur Schlehuber, R 2, Marion: "Enclosed is a recipe I've been wanting to share — for a good quick jam."

PLUM JAM

Use 1 pint sand plums seeded and pulp blended in a blender. Add 1 cup honey, 1 box frozen red raspberries and cook about five to ten minutes. Add 1 teaspoon raspberry extract last. Other plums can be used.

Women Over 40 — Be Pretty

Women over 40 should be doing about the same things for their looks as women in their 20's are doing. But they often begin to feel that a hairstyle is too young for them, begin using heavier makeup, heavier creams or they won't adopt new ideas in beauty — such as false eyelashes.

Don't try to hide wrinkles; covering makeup merely fills them up and makes them more

noticeable.

Don't try to conceal undereye shadows with a great deal of eye whitener. Better to blend them into the general skin tone by using a foundation two shades darker than your skin tone.

Don't repowder time and time again with pressed powder to keep makeup alive during the day. Instead, splash the face with handfuls of water over the makeup and pat dry. It works.

To Dry Ribbon

Ribbon and strips of lace flat after washing if they are smoothed around a clean bottle dry. Fine lace should never be ironed.

To Clean Lampshades

To clean soiled parchment shades, dip a soft cloth in milk and rub the shade until it is clean. Dry with a clean cloth.

No Installation Costs For Carpet Tiles

Today you can carpet any room in your home, wall to wall, economically, for you don't have to hire a professional to install it.

Carpet tiles, available in various sizes and shapes, come packaged in cartons and are installed much like other flooring tiles. Although most of the tiles are square, some are rectangular, and one manufacturer has a line of Spanish-influenced tile.

A built-in backing of high density latex foam rubber creates a cushion of comfort underfoot. Most of the carpet tiles also have adhesive applied to the backing for easy installation.

Since carpet tiles are very do-it-yourself, you can save large amounts of money. You eliminate the cost of installation and the need for a separate rug pad. And inasmuch as you buy only the number of tiles you need, there is no waste. Delivery problems are ended too, for you install them yourself.

The original carpet tile had a smooth surface that looked like felt. But modern technology has enabled tiles to come in shag and smooth, tufted tiles, in decorator colors and often patterned. The shag is especially popular because the high pile covers the joints between the

tiles, giving a carpet-look to your room.

Carpet tiles have a number of special advantages over regular wall-to-wall or even area rugs. They can be rotated to equalize wear. And if one tile is damaged or badly stained, you can simply remove it and drop in a new tile immediately.

The tiles can also be used on the walls with great acoustical benefits. Noisy rooms, such as laundry areas, are muffled with wall carpet.

Many carpet stores do not sell carpet tiles. However, they can be purchased in lumber yards, paint-and-paper stores, variety stores and other general merchandise outlets.

Pen Will Write On Foil Surface

Labeling foil-wrapped foods for the freezer will no longer mean involvement with tape and labels that curl or crayons and pens that smear and tear.

A permanent ink pen that will write directly on the foil surface has been developed by a well-known manufacturer of aluminum foil to make preparing foods for freezer storage easier for homemakers.

The new fiber-tipped pen writes clearly on the foil surface and will not smear or puncture the package. One of the pens is packed in the core of specially marked heavy-duty aluminum wrap for the consumer's convenience. The pen also writes on glass, metal, fabric and wood.

Your International® Harvester Dealer can show you 615 and 715 combines that should cost more. But they don't. Why wait?

Check the power, prices and capacities of our new 615-715 combines with comparably sized machines.

You'll find that we're determined to give you more combine for every dollar you invest.

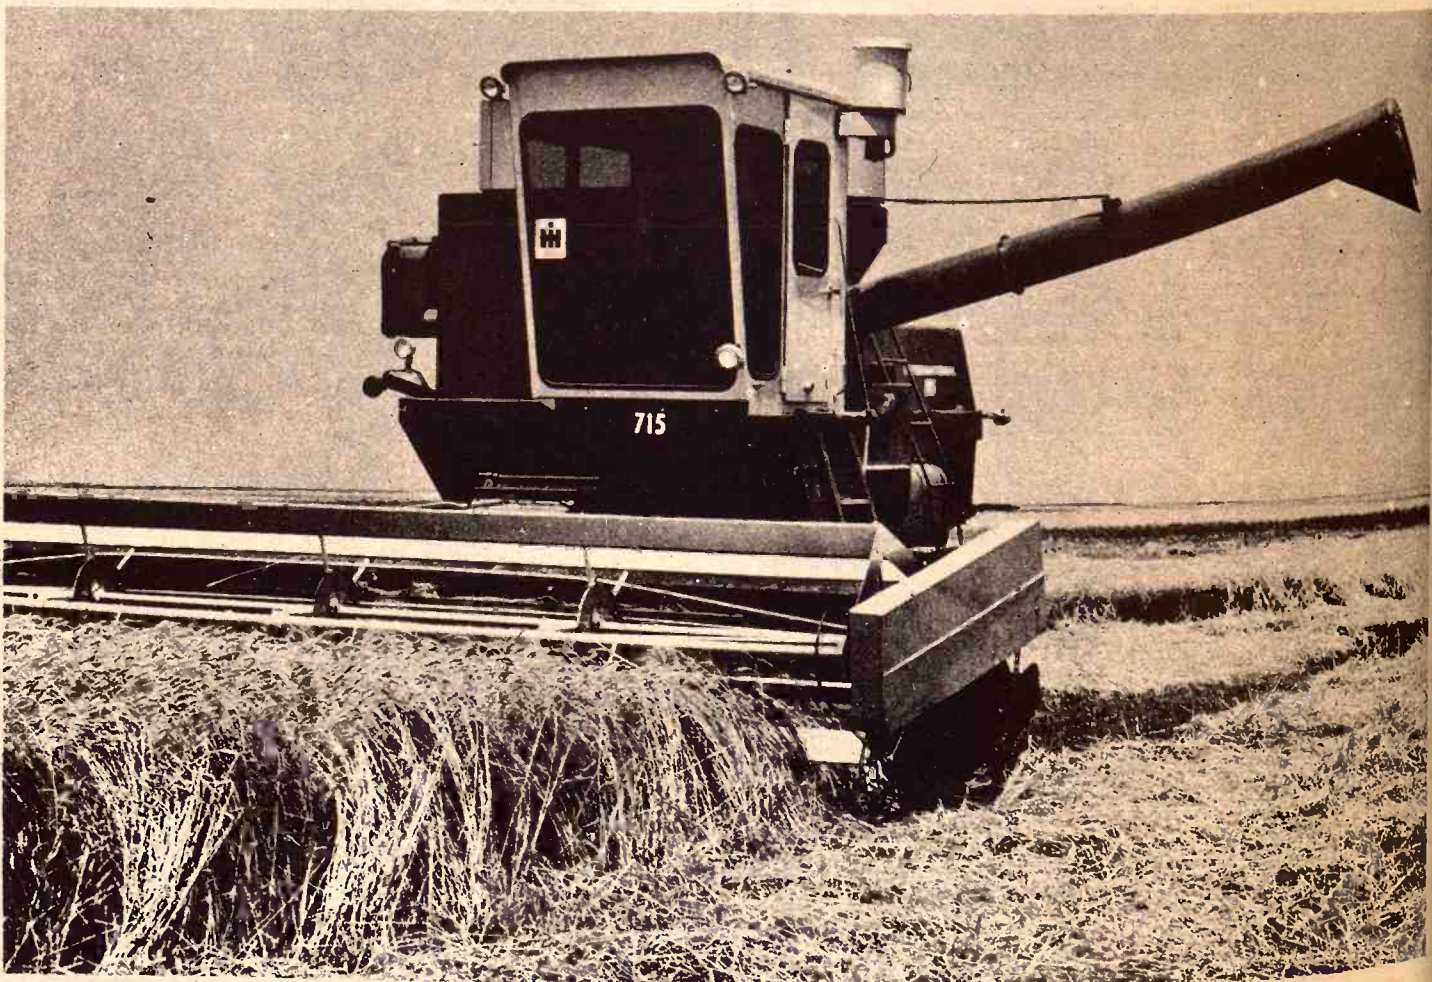

For example, we give you up to 107 hp in the 715. Up to 96-bushel capacity in the grain tank. Capacity features you can count on in any crop or condition.

Of course you get Quick-Attach platforms and corn heads. Variable speed cylinder and fan drives. Choice of belt propulsion or Hydrostatic

All-Speed Drive.

Naturally, some things we wouldn't think of changing. Like our full-width threshing. Practically plug-free fin-and-wire racks. Opposed-action cleaning.

These new 615 and 715 combines can be equipped with 10½- to 18½-foot platforms, or 2-, 3-, and 4-row corn heads. See your International Harvester Dealer. Compare them with any other like-sized combines. Then decide how you want your 615 or 715—finance, rent or lease.

Rhubarb
Beringe

No matter whether from the first rhubarb from fruit harvested from your own patch, rhubarb is a welcome herald of spring. It's a versatile vegetable used in a wide variety of recipes. Try these subtle overtones of rhubarb to the table.

1 recipe pastry for 14 cups sugar
1/4 cup cornstarch
1/4 teaspoon salt
5 cups 1/2-inch pieces
1 teaspoon grated lemon rind
one-third cup orange food coloring (optional)
2 tablespoons margarine
Divide pastry almost equally into two portions and roll out larger portion and the pan. Trim 1/2-inch thick. Roll out remaining portion and trim 1/2-inch thick. Cut in strips. Mix sugar, cornstarch, salt, and rhubarb, and mix until well mixed.

Rhubarb Pie Is Harbinger Of Spring

No matter whether you make it from the first rhubarb in markets or from fruit harvested later from your own patch, rhubarb pie is always a welcome herald of spring. This recipe used orange juice and rind to add subtle overtones of flavor and fragrance to the tartness of the rhubarb.

CITRUS RHUBARB PIE
1 recipe pastry for double crust pie
1 1/4 cups sugar
1/4 cup cornstarch
1/4 teaspoon salt
5 cups (1/2-inch pieces) rhubarb
2 teaspoons grated orange or lemon rind
one-third cup orange juice
Food coloring (optional)
2 tablespoon margarine
Divide pastry almost in half. Roll out larger portion and fit into 9-inch pie pan. Trim 1/2-inch beyond outer rim. Roll out remaining pastry to 1/8-inch thickness. Cut into 3/4-inch wide strips. Mix sugar, cornstarch and salt. Add rhubarb, rind and juice. Press until well mixed. Tint pink, if

desired. Turn into pastry shell. Dot with margarine. Moisten edge of pastry in pan. Arrange pastry strips over rhubarb mixture in a lattice pattern. Seal to edge. Turn edge of pastry in and over ends of strips. Flute to form high rim. If desired, brush pastry with milk and sprinkle with sugar. Bake in 400-degree oven 50-60 minutes or until filling has bubbles that do not break. Makes six servings.

To Remove Lime From Flower Pots

If your flower pots are discolored from lime deposits, scrub them in warm soapsuds and then soak them in a pail of water to which you have added two cups of vinegar.

Brush Best To Clean Pots, Pans

A brush is always best for cleaning pots and pans for it enables you to keep hard-to-reach areas under rims and around handles clean. Also, a good brush will not scratch your pans.

Proper Ironing Ensures Shape

A round tablecloth will keep its shape when laundered if it is dried, stretched out on a flat surface or an old sheet and ironed properly. Do not fold it to iron, but begin from the center and work toward the edges.

Add Cheese To Pie Dough

When you are making pastry for apple pie, try adding some grated cheddar cheese to the dough.

Voting Rights Do Not Stir 18-Year Olds

SEVERY—Eighteen-year-olds voted for the first time in Kansas here last week, but their ballots had little bearing on the outcome of two local issues.

Vote counts Tuesday night showed two bond issues were soundly defeated. A measure to fund a sanitary sewer system lost 123-63 and bonds for an auxiliary water

supply line were defeated 142-43.

Only three persons in the 18-through-20 age bracket voted, said Mrs. Marilyn Wilson, Greenwood County clerk. She had estimated about 25 of Severy's 301 eligible voters were in the younger group. All three voters were girls.

Bella Craig, 18, was the first in the newly eligible age group to vote. She became 18 March 1, and graduated from North Elk Senior High, Howard, Monday Night.

She admitted she was "pretty excited" about getting to vote the first time. "I hadn't planned to be the first one," she said.

She declined to disclose the way she voted on the issues.

fresh approach to pork profits

Litter Fritters, the freshest, most palatable pig pre-starter feed you can buy is here. Double-sealed in plastic to assure palatability and earlier dry food intake. Litter Fritters start young pigs on the road to profit in Co-op's all new Meat Market Program, the plan designed to produce better pork, higher profits.

Litter Fritters unique four-ply bag has two plies of polyethylene . . . one sandwiched between craft paper walls to lock in freshness and flavor, the other bonded to the exterior surface to lock out contaminants.

And no pre-starter gets to infant pigs sooner with so much: Flavor, nutrients, Tylan + Sulfa medication, quality ingredients, easy-to-eat nugget form. Litter Fritters are rich in pure table-grade sugar and have high fat milk solids specially processed to preserve flavor.

If you have new litters on the

ground, or coming soon, plan now to start them on Litter Fritters. When they reach 10 pounds in weight, switch them to the 10/30 Pig Starter Plan . . . the second step in the Co-op Meat Market Program.

10/30 is specially formulated for pigs in the critical 10 to 30 pound range. 10/30 Plan feeds are the result of extensive Farmland Industries research and provide all the nutrients a young pig is known to require. Extra palatability and Tylan + Sulfa medication are built in. Plastic lamination on the bag exterior insures freshness and purity.

These profit-powered pre-starter and starter feeds are available at your nearby double-circle Co-op. And they're just part of the complete Co-op Meat Market Program, the way to better pork and a more profitable operation.

When The Object Is Beefsteak - Not Photographs

Cattlemen conditioned by decades of watching and participating in steer shows where the animals are washed, combed, clipped, and generally pampered might have been shocked at the third annual Beef Empire Live and Carcass Show in Garden City.

To say the Beef Empire Show is a departure from the traditional steer show is an understatement. To the

casual observer, it probably resembled a Quarter Horse cutting contest more than a steer show.

However, for the several hundred cattlemen in the Finney County Fairgrounds grandstand, the Beef Empire Show was an educational event to help them learn to more economically produce cattle able to meet the demands of the modern beef consumer.

THE BIG WINNERS

John Dohogne, Beef Empire Show manager, presented \$1,000 checks and silver trays to Jim Miller, Satanta, center, winner of the carcass show, and Lloyd Bennett, Liberal, feeder of the winning live steer.

Al Maddux, Finney county Extension agricultural agent and superintendent of the show's live division, says the show emphasizes important economic traits and deemphasizes such marginal traits as hair color and sleekness.

All animals entered in the show are fed under normal conditions in a commercial feedlot. They are not fed special rations. They continue to gain weight right to show time. They are not broken to lead. They are not groomed or fitted in any way. Matted hair, mud, and even manure, are not given a glance by the judge.

This year 144 steers and 14 heifers (in a special division) were entered, an all-time high. Thirty feedlots with a combined capacity of 1 million head entered cattle in the show.

The animals are shown one at a time in an arena in front of the grandstand. Two horseback riders keep the animal moving while the judge evaluates it. A polaroid picture of each animal is taken for later use in the carcass contest.

For all three years the show has been held, Dr. Don Good, head of the Kansas State University animal science and industry department, has been the live judge.

After he evaluates each animal, he either assigns it to one of five holding pens for a later evaluation or else he puts it into the "out" pen and it is not looked at again in the live show. His remarks about each animal are taped for later reference.

He then selects the top 20 steers and the top five heifers and begins the wait to see if the carcass evaluations at a local packing plant back up his live animal decisions.

The wait is not long. The show is

Thursday, all animals entered are slaughtered Thursday night and Friday, their carcasses are evaluated Friday and Friday night, and the results of the carcass contest are given at a 7:30 a.m. steak and eggs awards breakfast Saturday morning. Exhibitors then go to the packing plant to view the carcasses. Each carcass is accompanied by an information sheet and a picture of the live animal.

Gene Francis, Extension area livestock specialist and carcass show superintendent, says he likes to get the carcass information back to a cattleman while the live appearance of his animal is still fresh in his mind. "We think it enhances the educational value of the event."

Dr. Don Kropf, KSU meats scientist, judged the carcass contest. He was assisted by Francis and personnel from the State Department of Agriculture. During the awards breakfast, Kropf challenged any other carcass show "to get as many good grading, good cutting carcasses as we had in this show."

He cited carcass show summary figures from each year since the show began that indicate the Beef Empire Show is serving its educational purpose.

Each year has had more carcasses grading in the preferred choice grade and fewer in the wasty prime grade and in the lower-quality good grade.

In the 1969 show only 50 percent of the carcasses graded choice. In 1970, 60 percent graded choice. This year 81.5 percent graded choice.

The percentage of steers grading prime went from 46 percent in 1969 to 20 percent in 1970 to 16 percent this year.

The cutability grades also reached an all-time quality high this year with 16 percent of the carcasses grading No. 1 and 43 percent grading No. 2 (a combined total of 59 percent).

Average fat thickness at the 12th rib per 100 pounds of carcass weight has lowered every year, from a high of .065 inch in 1969 to .058 inch in 1970 to .044 inch this year.

Average rib eye area reached a high of two square inches per 100 pounds carcass weight this year.

In the special heifer division of the show, 13 of the 14 heifers entered graded choice.

John Dohogne, Beef Empire Show manager, notes that commercial feedlots and companies have added a competitive dimension to the show by putting up nearly \$7,000 in prize money. First place in either the live show or the carcass show is \$1,000. Prize money is paid through the top 20 placings in each division. First place winner in the carcass contest this year was a Charolais-Angus crossbred steer that placed 12th in the live show. His owner Jim Miller of the H & M Cattle Company and Miller Feed Yard, Satanta, picked up the \$1,000 check.

Supreme Feeders of Liberal exhibited the live champion — another Charolais-Angus crossbred. Gene Franz of Liberal was the owner and recipient of \$1,000.

The champion carcass was a "beef-eaters dream." It was also the kind that makes beef packers smile and pay premium prices for. The live steer weighed 1,166 pounds. Its carcass weighed 723 pounds, had a 62 percent dressing percentage, 15.43 square-inch rib eye area, a scant two-tenths inch of fat covering at the 12th rib, graded choice minus, and had a cutability score of 1.6.

The champion heifer carcass was from a black-whiteface belonging to Art Stone and Sons of Garden City. The heifer weighed 970 pounds. Her carcass weighed 580 pounds, had a 60.1 dressing percentage, square inch loin eye, A inch of fat covering at the 12th rib, graded choice, and had a cutability score of 2.0. First prize was \$150.

The champion live heifer was Angus belonging to D & B Company of Scott City. First prize was also \$150. Second through fifth place live heifers went to (2) Art Stone & Sons, Garden City; (3) John O'Tool, Collyer, Kansas Feed Yards, Scott City; (5) Battles Cattle Company, City.

Second through fifth place live heifer carcass contest went to Art Stone, Garden City; (3) O'Tool, Collyer; (4) Art Stone & Sons, Garden City; (5) Battles Cattle Company, City. The second, third, and fourth place live heifers placed in the position in the carcass contest.

Second through fifth place live steer carcass contest went to Kearny County Feedyard, Liberal; (3) Gene Franz, Liberal; (4) Brookover Cattle Company, City, and (5) Allen Brown, Sublette.

Second through fifth place live steer show went to Brookover Cattle Company, City; (3) Pete Leslie, Oklahoma; (4) American Beef, Scott City, and (5) Geard Larned.

Nine of the top 20 live steers placed in the top 20 in the carcass contest.

To top off the educational value of the Beef Empire Show, Extension specialists compile a booklet sent to each exhibitor. A page devoted to each animal entered the show. There is a picture of the live animal, a tracing of its carcass rib eye area, the comments from tape from the live judge, and a complete set of carcass statistics.

Another Cut In State Egg Output

Poultry flocks in Kansas produced 71 million eggs during April, 2 million below April 1970 and the lowest for the month in records dating back through 1925, according to the Kansas Crop and Livestock Reporting Service.

April rate of lay was 20.0 eggs per hen, compared with 19.4 in April 1970.

There were 3,575,000 hens and pullets of laying age on Kansas farms in April, 5 percent below April 1970.

United States

The Nation's laying flock produced 6,047 million eggs in April, up 2 percent from April 1970.

Laying numbers May 1 totaled 320.2 million, up slightly from a year earlier, but 1 percent below April 1, 1971.

Rate of lay on May 1 averaged 62.8 eggs per 100 layers, up 1 percent from both a month earlier and a year earlier.

Kansas Hatchery Production

Commercial hatcheries in Kansas hatched 1,380,000 chicks during April

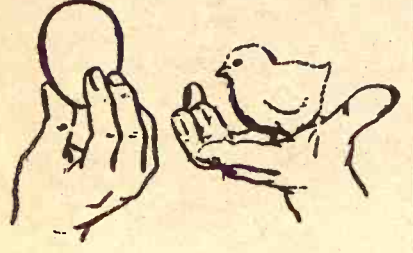

compared with 1,655,000 a year earlier.

The April hatch was moderately above that for the same month in 1968 and 1969 but below that for any year prior to 1968 in records dating back through 1938.

Egg-type chicks hatched totaled 1,020,000, up 21 percent from March but about one-fifth below April 1970.

April broiler-type hatch was 360,000 chicks, up 50 percent from March but down 2 percent from April 1970.

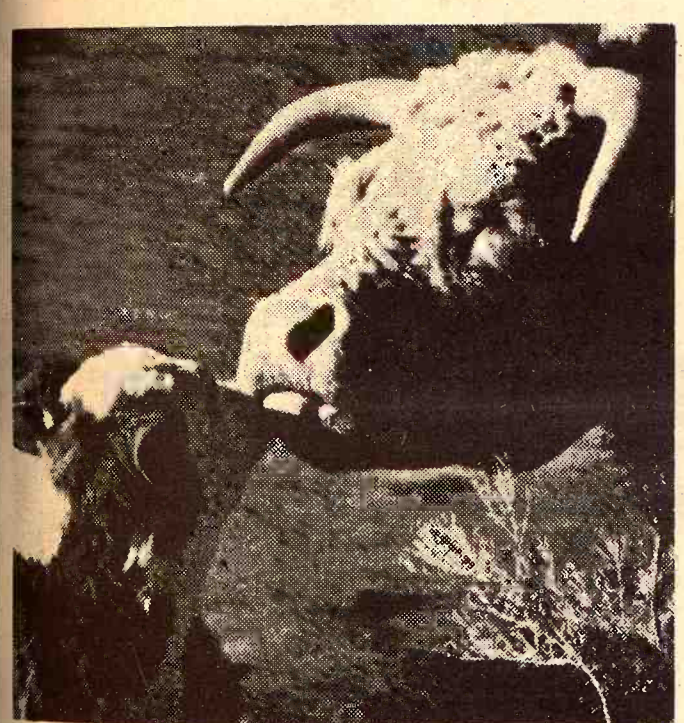

Prices received by commercial hatcheries for chicks on April 1 were \$47.50 per hundred for hybrid egg-type pullet chicks, \$36.50 per hundred for pure and cross breed egg-type pullets and \$19.00 per hundred for boiler-type straight-run chicks.

Poult

Poult hatched in Kansas commercial hatcheries during April

CHECKERBOARD service bulletin

For the cowman... A REWARDING MOMENT!

At last the rewarding moment has arrived for the cowman... the care given the mother cow has paid off!

From now until calving time is a critical period for the cow. She is not only maintaining her own body, but building the unborn calf, too.

Results on range are harder to measure than in the feedlot—but just as important. In the feedlot daily gains can be weighed—cost of gain determined.

Purina Dealers have demonstrated Purina's superiority in the feedlot with public feeding demonstrations. The same research formulates Purina Range Checkers—and for the same reason—results. From now until calving time feed Purina Range Checkers. Don't be misled by "chin music" and cheap prices.

Get Purina Range Checkers now at our store with the Checkerboard Sign... prove to yourself Purina feeding can cost you less!

totalled 290,000 compared with 241,000 the previous April. Heavy breed poult hatch was 289,000 and light breed hatch was 1,000.

United States

Hatcheries in the United States produced 345 million baby chicks during April, compared with 364 million a year earlier.

Declines were general in most major producing states. Egg-type eggs in incubators on May 1 were 11 percent below a year earlier.

Potential Of 25 Million New Presidential Votes

More than 25 million young persons under age 25 will become potential voters for president the first time in the 1972 election, the Census Bureau says.

A spokesman said the number of new voters apparently is a record. In the 1968 presidential election there were some 12 million potential new voters.

On the 1972 total, the bureau said, about 11 million young people will be

enfranchised the first time because of a law passed last year which lowered the voting age to 18 in all elections to federal office.

The other 14 million potential new voters include ones who will be reaching 21, but were unable to vote in 1968, and those who will be 24 but failed to reach the 21-year-old cutoff in the 1968 election.

The bureau said about 140 million persons will be potential voters in the 1972 election, up from 120 million in 1968.

For the nation as a whole, persons under 25 will make up an estimated 18 per cent of the total electorate in 1972.

Farm Credit Co-ops Pitch For Right To New Markets

Senators have been told that demands for constructive use of credit in agriculture in the immediate future are enormous.

"Unless met, chaotic conditions including drastic changes in the form and structure of agriculture and, therefore, rural America, will exist. As a result, our 200 million-plus consumers will be affected, mainly through higher cost of food," E. A. Jaenke told a Senate Agriculture subcommittee.

Jaenke, governor of the Farm Credit Administration, said that in 1960, farmers' debts were \$24.8 billion and by 1970 they had more than doubled to \$58.1 billion. Estimates indicate that farm debt will range from \$100 to \$140 billion by 1980, he said.

Jaenke said that a proposed new farm credit measure has received the general support of leaders of all farm organizations and is supported by the Federal Farm Credit Board.

The subcommittee is considering legislation offered by committee chairman Herman E. Talmadge, D-Ga.

It would completely rewrite the farm credit laws, expanding activities of the land banks, intermediate credit banks and production credit associations to include rural housing loans, loans to persons providing custom farm services and would provide additional flexibility in the making of loans.

Jaenke said the Nixon administration supports the principal objectives toward which the bill is directed.

"However, the administration has reservations about the possible imbalances in the competitive relationships between private

lenders and the Farm Credit System which would result from the Farm Credit System entering into new fields of lending and services while maintaining current tax exemptions," he said.

He said the Office of Management and Budget feels that if authority is provided to the Farm Credit System to enter these new areas, serious consideration by the appropriate Congressional committees should be given to adjusting its tax status.

Reuben Johnson of the National Farmers Union said the Farm Credit System should be given flexibility to compete for credit in the nation's money markets and to adapt to changing credit needs of U.S. agriculture.

Richard T. O'Connell of the National Council of Farmer Cooperatives and Robert M. Hendrix of Dyersburg, Tenn., Chairman of the National Advisory Committee of the Production Credit Associations, also voiced support for the measure.

Kenneth E. Wallin of Shawano, Wis., speaking for the National Advisory Committee of the Banks for Cooperatives, said there is broad grass roots support for the measure remodeling farm credit laws.

Keith R. Kehmeier, President, Citizens State Bank, St. Francis, Kan., said that "should the PCS be granted the power to participate in agricultural loans with commercial banks, it would provide an additional outlet for credit which would be used to a good advantage."

William H. Snyder, manager, Federal Land Bank Association of Topeka, Kan., endorsed the measure and testified specifically in favor of

the bill's removal of the 65 per cent of estimated value loan limitation presently imposed in the making of Federal Land Bank loans.

Herbert W. Pike of Whiting, Iowa, a member of the national Advisory Committee of the Federal Land Banks, gave similar testimony.

May 25, 1971

Who's behind the big mix-up in cattle feeding?

Kansas Soya. It's a mix-up that fattens both your cattle and your bank balance. Kansas Soya custom-mixing. Precise, scientific cattle feed preparation that follows whatever formula you specify.

But maybe the formula you're using now isn't turning out the results you want. In that case, the men at Kansas Soya can supply the feedlot-proven formula that will give you maximum gain. Or, if you mix your own ration, we'll furnish the best protein supplement available: Sunflower Soybean Meal or Pellets that are processed from prime soybeans, nature's richest source of protein. At Kansas Soya, you'll also have

grain bank facilities and automated in-and-out truckloading. If we bring your order to you, you'll find that Kansas Soya delivers according to your timetable. Not ours. And not just the first delivery, but every delivery. All we need to know is when and where.

Give us a call and we'll give you the facts. Call collect and find out why Kansas Soya is making such a stir in custom-mixed cattle feeds.

KANSAS SOYA PRODUCTS COMPANY, INC.
Dickens 2-7270. Emporia, Kansas.

Leafless Trees Will Get New Buds

Elm trees in the G&G area are being defoliated by an old enemy — the cankerworm.

But a Kansas State University entomologist, Dr. Hugh Thompson, says defoliation seldom causes a tree to die and he suggests home owners not be too hasty in deciding an elm tree is dead or dying and have it removed.

"Complete defoliation may make a tree look to be in poor condition, but it rarely causes a tree to die," Thompson says.

The K-State entomologist adds that this year many elms produced large seed crops which have been hanging on the branches making them look even worse.

"However, within a few weeks new buds will form and the trees will put out a new set of leaves in a month or so."

While a single defoliation of an elm tree probably will not be detrimental to the health of the tree, Thompson warns that repeated annual defoliations eventually will weaken it and make it susceptible to more serious problems.

Thompson says that an application of methoxychlor for Dutch elm disease control while the tree is dormant also will control cankerworms.

Sprays containing carbaryl are effective when cankerworms are feeding.

Satisfactory biological control is possible with a bacteria parasitic in many caterpillars (bacillus thuringiensis). It is sold under such trade names as Thuricide and Bioguard.

BANQUET FOR ALUMNI OF FORMER MORRIS CO. SCHOOL BURDICK — Alumni of the former Diamond Valley Rural High School will hold a banquet here at the American Legion May 30 at 6:30 p.m. Reservations can be made with Mrs. Effie Olson, Mrs. Dee Gutsch, or Mrs. Melvin Olson.

Farm finance need not be a harrowing experience.

PRODUCTION CREDIT ASSOCIATION

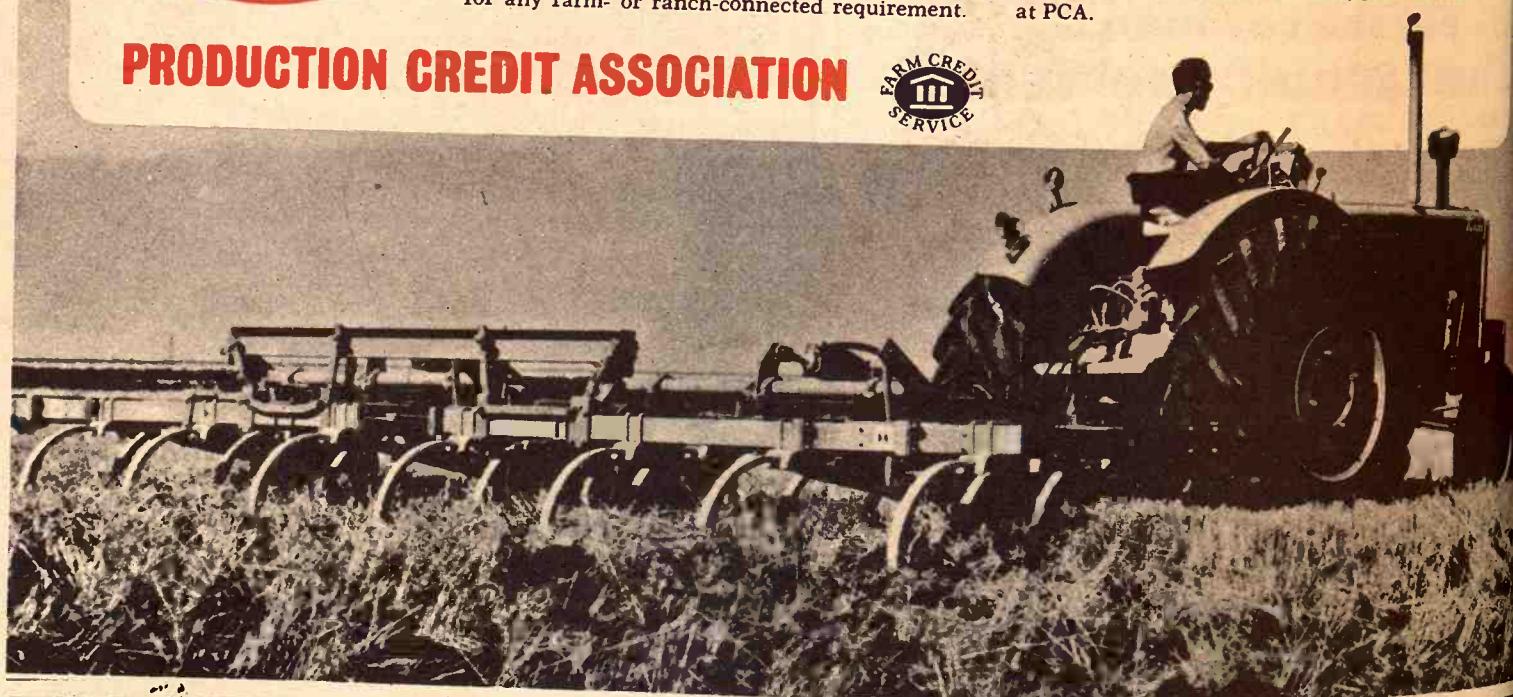

Digging up money is as much a part of modern farming and ranching as plowing and planting, feeding and fertilizing.

Progressive operators know it takes money to make money. And every year more and more of them know that PCA is the best place to meet their financing needs — any season of the year, for any farm- or ranch-connected requirement.

The people in your Production Credit Association office are farm loan experts. They know your problems. And they know how to tailor repayment programs to match your marketing timetable.

Talk over your money needs — any season of the year — with a seasoned money pro: the man at PCA.

'Has Become Unreliable'
The main reason, they say, is the GP rating — all ages become unreliable and questioned the GP ratings of films as "Bananas," "Daughter," "10 Rillington Place," "Valdez Is Coming," "The November" and "The Point."

The religious groups for films merited the designation restricted, under 17 years of age, for accompanying parent, guardian.

The motion picture association's production rating administration also gave films as G — all ages admitted — X — no one under 17 admitted.

The commission, directed by Rev. William Fore, and the group, directed by the Rev. J. Sullivan, said that the for evaluating the rating system whether it protected "the from material beyond the cope." The present rating statement stressed, did not "account sufficiently to the context of a given film."

Best Finish At Alma 4-H Rodeo

ALMA—The annual 4H Rodeo had 98 entries from 12 counties, with the Matile brothers, Joe and Gene, from Bazaar winning the all-around cowboy championship and the all-around cowgirl title.

Here are placings in each division:

Open Roping
1. Joe Matile, Chase
2. Bobby Warren, Wabaunsee
3. Gene Matile, Chase
4. Eddie Van Petten, Wabaunsee
5. Roy Van Sickle, Lyon

Even when you blow a fuse, we're still on the line.

You could blow every fuse in your house and still be able to use your telephone. Because a telephone doesn't get its power from your house circuits. Instead, it operates from a low-voltage direct current supplied by Southwestern Bell

batteries charged by power from the local power company. In case of emergencies, we have auxiliary generating equipment to keep the

batteries charged. Southwestern Bell is constantly working to provide reliable telephone service. So if a blown fuse does leave you temporarily in the dark, you can at least call somebody about it.

 Southwestern Bell

No Soldier Response To Anti-War Rally

JUNCTION CITY—An anti-war rally by the Kansas City chapter of

the Vietnam Veterans Against the War failed to attract more than 25 Ft. Riley, Kas., soldiers, its principal targets, to City park here.

The rally, which had been advertised through handbills distributed at Ft. Riley, started 90 minutes because a 6-vehicle caravan with chapter members from St.

May 25, 1971

Louis, Jefferson City and Kansas City was delayed.

The final four blocks of the caravan route were lined with American flags on light poles. They had been purposely left in place by the Junction City Chamber of Commerce from Saturday's Armed Forces day. The perimeter of the park also was lined with flags.

The crowd was estimated at 150 by Gerald Ponton, Junction City chief of police. Police officers in plain clothes counted 81 participants who were members of the antiwar group which arrived in town two days before the rally and 37 additional persons from the caravan.

The caravan, led by chapter officials in a jeep, left the University of Missouri-Kansas City and stopped briefly at Ft. Riley before continuing on to the park here. Military police halted the vehicles for a short time as they entered the military post from I-70, but they were allowed to continue on to the Camp Forsyth area as had been advertised in the handbills.

Police escorts were provided by Ft. Riley, the Geary County sheriff's office and Junction City police.

Rally speakers laced their speeches with 4-letter words. Police took no action. Chief Ponton said the participants were orderly and persons offended by the language were free to leave the park.

About 50 per cent of the crowd was made up of long-haired youths with military style dress and peace symbols. Advertised workshops to answer questions and assist Ft. Riley soldiers in setting up a chapter were not held because of lack of soldier participation.

TRACTOR PULLING CONTEST

WE'RE OUT TO WIN YOU

Maybe you're not ready for that new tractor this spring. But ready or not, you owe it to yourself to discover this brand new concept of power, comfort and protection. Your Case dealer's Golden Opportunity tractor is ready for a no-obligation demonstration.

Big Case cubes . . . we've unleashed more of their power for '71. You'll plow faster, disk faster, handle any big load faster. And you'll do it smoothly and easily. Why? Big Case cubes . . . up to 451 turbo in the Case 1170. We've poured on more power in our Agri Kings . . . up to 12½% more. But we've still maintained the high-torque reserve power of big-displacement engines and moderate engine speeds.

MODEL	CUBES	RATED RPM	HP INCREASE*
770	267 cu. in.	2000	+ 12.5%
870	336 cu. in.	2000	+ 10.0%
970	401 cu. in.	2000	+ 9.4%
1070	451 cu. in.	2100	+ 7.0%
1170	451 Turbo	2100	+ 7.8%
1470	504 Turbo	2000	No change

*Manufacturer's rating

Now the best in comfort is even better. Tomorrow's tractor, but yesterday's cab? Not with Case! We'll show you a whole new concept of comfort. A cab that's extra-tight, sealed from dust and dirt . . . a new filtration system that

surrounds you with fresh, clean air in the dustiest conditions. And throw away your ear plugs. It's as quiet inside as your living room with the kids away at school!

We value your safety too. You're far more relaxed and alert at the wheel of a new Case Agri King—especially after a long day in the field. And a comfortable operator is a safer operator! Our cab, too, offers super protection—with a rigid frame that resists front crushing or overhead collapse, and supports the entire weight of the tractor on a complete rollover.

Are you ready to meet the "Black Knight?"

Your Case dealer's 1971 Golden Opportunity demonstrator is standard production, except for the paint—and reserved for you to drive. Test it in your fields with no feeling of obligation. But by all means try it—and see why we say "A tractor's just a tractor until you've driven a new Case!" J I Case Company, Racine Wisconsin 53404

D Good Enough Grade For Sports At Hutchinson

HUTCHINSON—High school coaches and administrators have convinced Hutchinson Board of Education that the present grade average requirements for athletic participation should remain in effect.

The board had been urged by a parent to raise the current standard which stipulates that students who participate in athletics and other school functions must have a "D" grade average in three of their subjects. It was suggested that a "C" average in three of their subjects. It was suggested that a "C" average be set as the local minimum.

School officials concluded after a lengthy review that the standard is necessary to give students who can't otherwise achieve an opportunity to compete and succeed.

George Madelen, high school principal, said that adopting a higher standard would have the effect of "penalizing students who cannot achieve the average level." Madelen said that raising the standard would be the "quickest way to put some of our kids on the streets."

A survey made by the high school athletic department showed that if a C average would have been required this school year, 36 athletes would have been ineligible.

CALF FACTORY

J.O. Davis of Kearney, Mo., has a regular calf factory in his old Angus cow, whose 1971 calf this set of triplets. The cow has produced 12 calves in six years—twins, one single birth, and triplets.

The cow, which Davis simply "Cow" gets all the credit. Davis has two different bulls during the years.

High Winds Hit G & G Area

These photographs were taken in and around the Marshall County community of Waterville. Waterville was one of several G&G area communities to be hit by rain and high winds early last week. The official word was that this was done by straight wind, but most of the folks in Waterville thought there had to be a funnel in it to do some of the things it did. Almost all of the damage was to trees in town and to outbuildings in the country, so the people thought they were lucky no one was homeless from the storm.

CALF FACTORY

J.O. Davis of Kearney, Mo., has a regular calf factory in the old Angus cow, whose 1971 offspring this set of triplets. The cow produced 12 calves in six years—twins, one single birth, and the triplets.

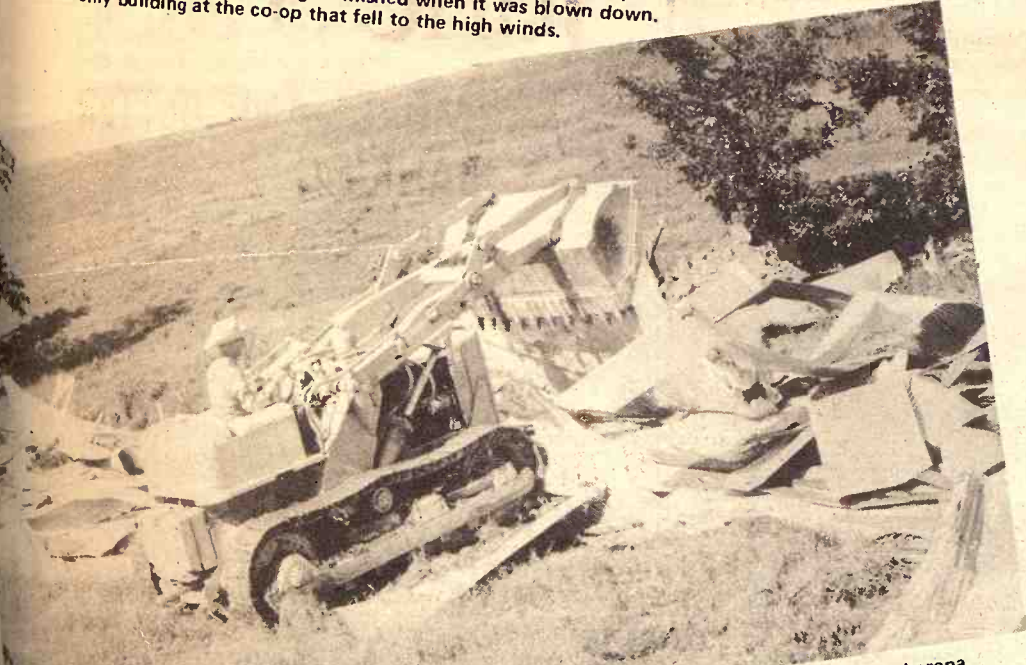

The cow, which Davis says "Cow" gets all the credit. Davis has two different bulls during the years.

Robert Hearn standing in front of the remains of a 72-foot grain bin that Lamoreaux Construction Co. was building at the Waterville Co-op. They lacked just a few feet of having it finished when it was blown down. It was the only building at the co-op that fell to the high winds.

Albin Lindquist, lives in Waterville. He retired from farming four years ago. His house didn't have any damage but most of the trees in his yard were gone.

Leonard Travelute on the small Cat helping clean up the wreckage of the metal covered arena. The building was only a little over a year old.

Walter Pitney, a dozer operator, takes time out from a hectic tree removal schedule to look over a small barn door that was hung up in a tree.

Allen Travelute on the big Caterpillar cleaning up the remains of a large metal building that he used for a horse training arena. The two fellows helping are Richard Claycamp and John Stryker.

Progress On Arboretum Near Wakefield Along Milford Lake Shoreline

by David Thurlow
Kansas State University student
near Wakefield, an arboretum soon be a reality. Through the joining of men like L. R. Quinlan, professor from Kansas State University, president of the Kansas Landscape Arboretum, and W. A. Abilene, the plan will be to develop and maintain the main objectives of the project to display the best trees, shrubs and other woody plants that will in Kansas and label them for education and information of the public, to develop and maintain

nature, to introduce new plants into a broad testing program, to develop a bird sanctuary and to develop outdoor classrooms.

The arboretum site is on ground now owned by the United States Army Engineers. It is approximately 193 acres of gently rolling farmland on the west side of Milford Lake one mile south of Wakefield.

Already over 20 species of native trees and shrubs are growing on the site. Professor Quinlan said that the land will become available for lease next year and that at this time the

PUBLIC SALE

Of Surplus CCC Properties
Tuesday, June 1, 1971
Wednesday, June 2, 1971

Republic County ASC Committee, acting as agents for Commodity Credit Corporation, corporate agency of the United States within the Department of Agriculture, will offer for the following described property at Public Auction.

THE PROPERTY WILL BE SOLD "AS IS" "WHERE IS".
EACH BIN WILL BE SOLD SEPARATELY.

Date	Time	Location of Bins	Site No.	No. of Bins
June 1	10:00 a.m.	South of elevator, Republic, Ks.	007	55
June 1	2:00 p.m.	1/2 mile east of Scandia, Ks.	008	60
June 2	1:30 p.m.	North edge of Courtland, Ks.	002	54

SPECIFICATIONS OF EACH BIN OFFERED FOR SALE ARE: Edwards, aluminum bins, 3250 bushels rated capacity, 18 ft. diameter, equipped with aeration tubes and foundation rings. Note: Foundation rings and aeration tubes are considered part of the structures and will sell accordingly.

INSPECTION: The grain bins may be inspected as follows:
C No. 007 Republic, 8:30 a.m. to 12:00 Thursday, May 27
C No. 008 Scandia, 1:00 p.m. to 4:00 p.m., Thursday, May 27
C No. 002 Courtland, 1:00 p.m. to 4:00 p.m. Friday, May 28

Purchasers certification: Each purchaser of a bin will be required to execute a certification that the bin will be used in connection with the storage or handling of agriculture commodities. Bidders are warned that any false statement to CCC in such certification is punishable by a fine of not to exceed \$10,000 or imprisonment for not more than five (5) years or both, under the provisions of the Commodity Credit Corporation Charter Act, 15 U.S.C. 714 m (a). The purchaser will also be required to certify that his bid was made without collusion, consultation, or agreement with any other person with respect to the amount of his bid for the purchase price.

TERMS: Cash on day of sale, or bins may be financed under the Farm Storage Facility Program. Farm storage facility loans are available to farmers on the purchase of bins through the county ASCS office provided purchaser meets eligibility requirement for loan. Borrowers interested in a loan should contact their county office prior to day of sale regarding eligibility requirement. If eligible, the prospective purchaser must bring a memorandum from his home county ASCS office so stating.

REMOVAL OF PROPERTY: No property is to be removed from bin sites before being removed from the sites before August 2, 1971.

TITLE AND RISK OF LOSS: Title to the grain bins shall vest in the purchaser when payment is made. Risk of loss or destruction from any cause whatsoever shall be borne by purchaser at time of award to purchaser at public auction.

NOTES: Commodity Credit Corporation reserves the right to reject any or all offers.

NOT RESPONSIBLE FOR ACCIDENTS

project will really get into full swing.

Professor Quinlan says that all woody plants will be grown that are adapted to the climate of Kansas and that this could mean as high as three thousand to four thousand species and varieties. The plants will be planted in a demonstration type arrangement. There will be demonstrations of windbreaks, horticulture screens and soil conservation.

The temporary headquarters for the Arboretum is a farm home south of Wakefield. Some trees and shrubs have already been planted around this home as a kick off to the program.

Ground breaking ceremonies for the planting of the first trees took place April 2 on a two-acre tract of land surrounding the headquarters building. The first two trees planted were a Redman Linden and a Skyline Locust.

Ernest Bauer, Clay Center, who conceived the idea of the arboretum, turned the first shovelful of dirt on the first tree to be planted. Approximately 130 trees and shrubs of 40 different varieties were planted on April 3 by area chapters of the National Campers and Hikers Association. The plants were provided by the Kansas Nurserymen Association.

The project has a long way to go according to Professor Quinlan. In order to get the project into full swing donations are needed. It is estimated that to run the Arboretum properly about \$50,000 a year will be needed. Only a small amount of this total has been received.

The main expense will be the men and equipment required to plant the trees and maintain the grounds. When the project is finished there will be no admission charge so the finances must come directly from individuals.

The future plans include a touch-and-tell walk for the blind so that they may learn about trees and also a conveyance for the handicapped. The arboretum hopes to build a

headquarters building, two residences, a theater and use the farm buildings now on the site as the maintenance buildings. When completed it is said that this area will be the botanical focal point of the midwest.

Money can be given to the arboretum by donation, membership, endowment and donations as memorials. When actual construction starts, contributions of services, trees and other woody plants will be accepted. An annual membership will make the member a partner in an exciting non-profit horticultural venture.

Professor Quinlan feels that the Kansas Landscape Arboretum will be very appealing to the public. It will be a ready source of education and study for everyone in the state of Kansas and elsewhere. Quinlan also stated that the arboretum will be a great thing for the state of Kansas and elsewhere. Quinlan also stated that the arboretum will be a great thing for the state of Kansas as a

tourist attraction as there aren't very many arboretums in operation today.

TO BUILD A MOTEL AT 135W AT McPHERSON

McPHERSON—A 53-room motel will be built at the interchange of 135W at the east edge of McPherson. It will be built at a construction cost of \$300,000 for Premier Investments Inc., a family corporation headed by Lester Premier. Premier built the Wheat States Motel at the west side of McPherson in 1956 and sold it four years ago.

Meat Imports Coming Thru Canadian Door?

The Agriculture Department plans to send a representative to Canada soon to check on the possibility that some of Canada's rising meat exports to the United States may be third-country beef from Australia and New Zealand.

Washington is becoming concerned that Canada, not bound by voluntary restraint agreements for U.S. meat exports, may be resuming a practice that U.S. customs officials cracked down on last year, USDA sources say.

The third-country maneuver allowed Australia and New Zealand early in 1970 to ship million of pounds of extra beef into the United States in violation of agreements to restrict direct exports to the U.S. market.

Administration officials ordered a mid-year halt to the flow, but unregulated Canada then was reported to be shipping more of its own meat into the U.S. market while receiving like amounts from Australia and New Zealand for its own consumption.

Meat imports, mostly beef, are regulated under a 1964 law prescribing foreign quotas based on U.S. production. This year's estimate by Secretary of Agriculture Clifford M. Hardin is for a total of 1.16 billion pounds, the same as shipped in 1970.

The Canadian situation was highlighted Monday by a report showing that quota type meat imported during the first quarter of 1971 totaled 236.4 million pounds, a 30 per cent drop from January-March last year.

Australia and New Zealand shipments, which account for about 70 per cent of the year's total, were down 50 and nearly 23 per cent, respectively. But Canada, meantime, shipped nearly 19.4 million pounds into the United States this year, a boost of nearly 32 per cent the first quarter of 1970. The Australian and New Zealand reduction from a year earlier is not expected to be continued for long, a department spokesman said.

One theory is that drought in parts of Australia cattle country has forced the movement of herds into other areas, thus interrupting the flow of animals to market.

Another reason, according to sources, is that other markets have become more lucrative, thus funneling some of the meat away from U.S. consumers.

One USDA observer, however, contends that while prices in the United Kingdom, as an example, have risen, they still do not match the United States.

plan" was introduced last July, Plested said.

The first reduction was in November when rates dropped from 9 to 8 1/2 per cent. They were further reduced to 8 per cent March 1.

Plested explained that all Land Bank loans are now written on a variable rate plan.

In times such as this the rate can be lowered, but should the present economic trend turn around to a less favorable money market, the variable rate can be raised.

The Wichita Land Bank is one of 12 banks located in major farming centers throughout the nation, providing long-term real estate loans to farmers and ranchers through approximately 650 Federal Land Banks Associations.

On May 1, the Wichita Land Bank had 36,500 outstanding loans, representing \$661 million in long-term loans to farmers and ranchers in Kansas, Oklahoma, Colorado and New Mexico.

FLBAs Drop Interest Rate

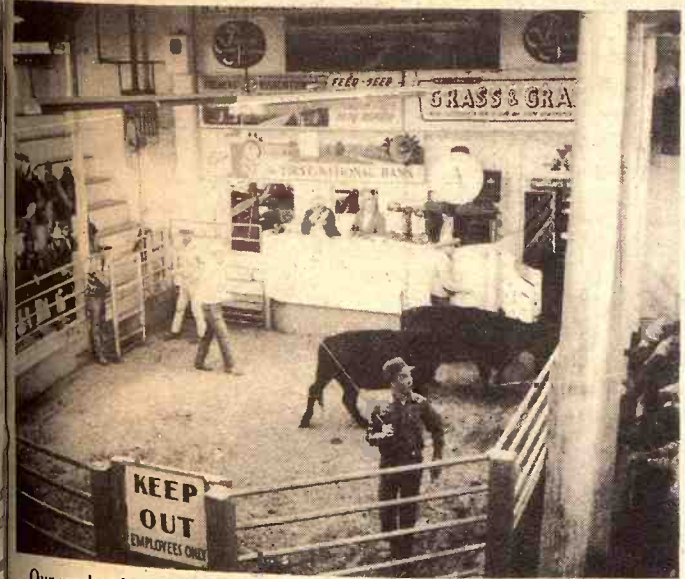

Interest rates to farmers and ranchers of a four-state area will drop from 8 to 7 1/2 per cent on June 1, William G. Plested, president of the Wichita Land Bank has announced.

This is the third rate reduction since the bank's "variable rate

LINE OF RESPECT

A line of 10 FFA members from Caney watch a funeral procession pass at Sedan. The funeral was for four 4H youngsters, killed in an auto-pickup crash that killed seven persons. Five 4H youngsters and their sponsor, Judy Wiggins, 22, were returning from a 4H leadership conference at Winfield when a pickup driven by Lawrence Russell of Dexter apparently crossed the center-line into the path of the car driven by Miss Wiggins. Both drivers were killed as were John Gorrell, 14; Kenneth Gorrell, 13; Audrey Shobe, 13; and Debra Apel, 15, all of Sedan; and Tammie Bowman, 13, of Niotaze.

it's profit after cost that counts with NA-CHURS

FOLIAR FEEDING with NA-CHURS

NA-CHURS IS MAKING IT POSSIBLE for farmers to produce more bushels per acre of better quality cereal grains than ever before. That magic goal of 200 bushels of dry, shelled corn per acre is being met more often and in more areas every year. Sugar beet and grape growers are coming through with the highest sugar content in every area. Wheat is heavier, plumper and higher in protein. Produce farmers are achieving greater yields of more marketable, more profitable garden produce.

Foliar feeding is the best controlled, most efficient, most economical method of applying fertilizer yet devised. As much as 95% of the plant food is absorbed by the plant quickly and efficiently. And since it is profit after cost that really counts, NA-CHURS is your best buy in fertilizer.

FOLIAR APPLICATION OF NA-CHURS IS SIMPLE AND EASY. Spraying saves time in the field. Liquid saves labor in storage. Any ordinary field, garden or grove sprayer operating at high pressure to produce a fine, misty spray will be just right for foliar feeding with NA-CHURS. Ask your NA-CHURS Crop Service Representative for the full story. He's probably a neighbor of yours.

Reexplain Warning On Tornadoes

LAWRENCE — After answering his fifth telephoned complaint, Douglas County Civil Defense Director H.H. Belote sat back to explain why no sirens or whistles were sounded while Lawrence was under a tornado warning.

The explanation turns out to be very simple — the terminology "tornado warning" does not mean immediate danger is present and does not mean sirens are to be sounded, Belote emphasized.

Several persons complained that radio and television stations were reporting tornado warnings for Lawrence and they heard no sirens.

"If one is spotted and it's headed toward Lawrence," Belote said, "we won't hesitate to sound the sirens. But if one is spotted but does not appear to endanger our area, there will be no noisemakers."

There are three stages of tornado alertness, according to Belote:

- Tornado watch means favorable atmospheric conditions exist. It is usually issued for several hours and may or may not result in storms.

- Tornado warning means tornado activity has been sighted in a particular area, usually a county. The tornado may be 20 miles away, Belote said, but a warning is still issued.

- Take cover means just that. Sirens and whistles are sounded when a tornado has been sighted heading directly for or threatening a community.

To put it simply, Belote said, a watch means conditions are ripe, a warning means there's a twister near you, then take cover means "it's headed at you, get under the bed."

Warns On Spread Of Latin Horse Disease Into U.S.

The American Horse Council has warned horsemen and veterinarians to watch for symptoms of a foreign virus of horses that has recently moved closer to the United States.

The U.S. Department of Agriculture says the disease, called Venezuelan equine encephalomyelitis (VEE), has moved north from South America and Central America into Mexico where about 6,000 horses were reported killed by the disease in 1970.

At the urging of the American Horse Council, animal health officials are keeping close watch on the spread of the disease so that proper action can be taken to protect U.S. horses.

In addition to Mexico, the disease has been found in Peru, Venezuela, Ecuador, Colombia, British and

HOPEFUL OF LENDING CHANGES

Hopeful that Congress will pass farm credit law that might allow Farm Credit Associations to make loans to finance farm-related businesses and to participate with commercial banks to help farmers are these G&G area PCAs and students.

Asked by a Wichita Eagle writer, "Will the 1971 Farm Credit Bill help Congress solve problems of the farm's cost-price squeeze?" they responded as follows:

Charles Graham, Council President, because availability is the secret to efficient, economical production under modern agricultural methods.

Arthur Solomon, Howard, "The parts of the proposed legislation that help. But the basic problem is a farmer cannot recover production costs from living expenses at today's prices. His fixed costs including capital and taxes are higher than he can recover from a fixed income."

James Ganson, Concordia, "The legislation will enable the associations to better serve farmers' and ranchers' needs. Major areas will be through land banks on long-term lending and PCAs on short term. These two institutions working together will supply farmers' credit needs more completely."

Settle On New City Sales Tax Brackets

Surprisingly few objections were raised by retailers from Topeka, Manhattan and Lawrence about the proposed tax bracket for the new half per cent sales tax which will take effect in the three cities July 1.

The retailers met with James T. McDonald, director of revenue, and his staff at a public hearing in the State Office Building to express their views or arguments about the proposed regulations.

The retailer collects the tax on the basis of the bracket system. He then returns 3.5 per cent of his gross sales to the state. The state sends a half per cent back to the city.

Some of the retailers objected to collecting the first cent of tax on a 15 cent sale instead of a 14 or 13 cent sale. The lower amount would allow them to collect more tax. The 15-cent break is the same as it is now with the 3 per cent state sales tax.

McDonald said he had not received any other proposals or suggestions for a different scale which he felt was as equitable as the schedule proposed.

R. F. Burke, a representative from National Cash Register Co., said he had computed the 3.5 per cent sales tax (state and local) which would be collected during one

day from the sales at a local grocery store. He said he found the store collected an average of nine cents more per \$1,000 in sales than it had to pay on a \$1,000 in tax.

Burke called the proposed schedule "the closest I have seen for retailer and consumer."

McDonald said it was impossible to hit exactly 3.5 per cent tax collected. He said some days a local retailer will collect more than that percentage and some days he will collect less.

The proposed bracket is 15 to 37 cents, one cent of tax collected; 38 cents to 64 cents, two cents collected; 65 cents to 93 cents, three cents collected; 94 cents to \$1.20, four cents collected; \$1.25 to \$1.49, five cents collected, and so on.

Cities other than Topeka, Manhattan and Lawrence will collect only the regular 3 per cent sales tax on the old sale bracket, which is 15 cents to 39 cents, one cent collected; 40 cents to 69 cents, two cents collected; 70 cents to \$1.14, three cents collected; \$1.15 to \$1.44, four cents collected; \$1.45 to \$1.84, five cents collected and so on.

Several of the regulations bothered the retailers in regard to what location was to be considered the site of sale, which in turn would determine whether a retailer or a contractor, for example, had to pay sales tax.

The example was given that a contractor who is awarded a contract for a job in Wichita but buys his materials in Topeka will have to consider the cost of local sales tax when he submits his bid.

McDonald admitted this might give a competitive edge to the contractor who does not have to buy his material in a city subject to sales tax.

The same is true for service men, such as a television repairman.

A repairman who lives and works out of Topeka will have to pay local sales tax even when he services a

television in Lyndon.

Another regulation, which was written in accordance with the state law, allows persons who live in the county and use city gas, water and electricity to be exempt from city sales tax. In addition, they are exempt from city sales tax on their telephone unless the phone bill goes to a post office box or other city address.

In the case of out-of-state retailers, if they do not maintain an office in the state, the location of the sale will determine whether it is subject to a local city tax.

If we could just wrap it all up.

Litter is a complex problem. And solving it calls for understanding and united action.

1. Litter isn't caused by bottles or cans or convenience packaging. Litter is caused by the thoughtless man. The thinking man can stop it.
2. The natural first step is individual action. Let's all be a little more thoughtful. Let's make sure that we, ourselves, are not adding to the litter problem.
3. The thinking man takes active steps to keep his community clean. The tools are at hand.
4. The United States Brewers Association is ready to help you. We're working at the local and national levels to create greater public awareness. To attack apathy. To help Keep America Beautiful.
5. If we tackle this problem together we can soon have it all wrapped up. Write us today and we'll help your community develop a campaign against litter.

Welfare Studies Ways To Cut Pay Out, Load

The State Board of Social Welfare says there will be no salary increases for state or county welfare employees during fiscal 1972 unless funds unexpectedly become available.

The board said the pay hikes, which normally would come July 1, at the beginning for the fiscal year, will be "deferred until sufficient money is available."

Board members said they regretted the action but saw no alternative in view of the \$5.2 million welfare department budget cut made by the 1971 Legislature.

The 1,800 state and county welfare employees would have received 5 per cent pay hikes totaling about \$750,000 in fiscal 1972. Other state employees will receive the 5 per cent boosts.

"We're doing this out of economic necessity, not because we want to," said Dr. Robert C. Harder, state welfare director. "I think we got a serious message from the Legislature and we're trying to deal with it in a serious manner."

Richard S. McAnany, Kansas City, vice chairman of the board, said, "I personally don't see any other way to go. It isn't a step I'd like to take but it's the only one in the overall picture. It's a step we have to take."

The moratorium on salary increases was part of a package of administrative economy steps the board adopted in advance of the anticipated proration of cash grants to welfare recipients and payments to medical vendor groups.

During the legislative session, Harder said the \$5.2 million cut would mean cash grants will be cut by 20 per cent and vendor payments by 45 per cent.

Harder already has announced the welfare department will defer payment of \$7 million - \$8 million in medical vendor claims until the next fiscal year. Those claims normally would have been paid in May and June.

Board members also authorized a study of "special circumstance items" now included in cash grants to welfare recipients to determine those which could be dropped.

That study will be conducted by county welfare departments and the information is to be back in Topeka late in June.

Harder said cash grant proration will be based on results of the studies. He said because of the time the studies will take and the federal

regulations involved, cuts in welfare payments cannot be made before Sept. 1.

That will mean that instead of prorating payments over a 12-month period, they will be prorated over 10 months with the overall total reduction at the same level. In addition, the board urged the state department to move immediately to institute work projects in certain counties.

Harder said 12-13 counties have work projects for welfare recipients.

He said counties where the general assistance caseload is the greatest would be prime targets for new work projects. Those counties include Sedgwick, Wyandott, Johnson, Crawford and Douglas.

Jim Yeager
buried in flint hills

Jim Yeager, who once coached football at Iowa State and Colorado, was buried last week in a Flint Hills cemetery near Bazaar in Chase county. A brother, George, and two sisters, Mrs. Frank Cooper and Mrs. Victor Basin, both live in Chase county. Yeager was 62 and died in Boulder, Colo., where in recent years he had operated a woman's wear shop and been a county commissioner. Bazaar was the scene 40 years ago where another famous football coach, Knute Rockne, lost his life in an airplane accident.

Dow May Have DDT Replacement

Dow Chemical Co. said it developed a new type of insecticide for both selective and general purpose use that it believes may be a safe substitute for DDT.

The company announced the product, Zectran, as part of a 15 new products chosen by research laboratories as "promising." Dow's president, Branch, disclosed the list before a meeting of security analysts.

He said the new insecticide "among the most promising" and that it breaks down in a short time and doesn't harm microorganisms. He said that it granted federal registration against certain spruce and worms, and that the Federal Service has already ordered a million of the substance.

The company said it may be for use against other insects such as the gypsy moth which is a major problem in Northeastern U.S. Branch said analysts the substance "appears to be a major ecological development."

INTERNATIONAL CAMPER SPECIALS TRUCK-BUILT FOR HEAVY LOADS

Vacation is the time to leave your worries behind — not trade them for a new set of headaches. So make sure the pickup you ask to carry your camper body is designed and equipped to shoulder the load.

All International pickups are built with truck-tough components. In addition, our Model 1210 Camper Special is equipped with heavy-duty front springs, heavy-duty rear springs with auxiliary, front sway bar, heavy-duty front and rear shock absorbers, and many other special features.

The correct suspension is extremely important in a pickup with a camper sitting high off the road, as you buck high winds, round curves and dip into potholes. So International uses leaf springs, which give two points of suspension at each wheel (a coil spring gives only one point). That's eight points in all, compared to our major competitors who offer suspension at a total of only four and six points. Another advantage—our optional rear axle ratings are the highest of any major manufacturer. All this without sacrificing eye appeal — just take a look. Then take a ride.

To Compare Two Efforts In Pilot Marijuana Control Plans

Kansas will be spotlighted as one of the nation's key test sites for determining the best governmental approach the effective control of marijuana this summer.

Results of different approaches to the problem in Marshall and Reno counties are expected to be closely scrutinized by federal officials in determining future control programs. Both counties are included in a federally-funded pilot program.

The marijuana control program is being carried out by the U.S.

Department of Agriculture, at the request of the Bureau of Narcotics and Dangerous Drugs of the Department of Justice, which is providing \$85,000 for the pilot project in Kansas and one county each in nine other states.

Reno County, which received \$1,000, will continue a volunteer plan initiated last year by county agricultural extension director Otis Griggs.

Frank A. Mosier, Manhattan, executive director of the Kansas Agricultural Stabilization and

Conservation Service, said the Reno County program of soliciting community organizations and groups to help and supplementing it with landowners cost-sharing funds will be compared with a full cost-sharing funds will be compared with a full cost-sharing program in Marshall and other counties. He said federal officials are interested in determining how much money is needed to supplement a volunteer worker program of control.

Mosier said the control work should be carried out or initiated before about June 15. The federal program is funded for this fiscal year, which ends June 30. Applications for cost-sharing participation must be processed before that date.

FRANK MOSIER, (above, left) director of the ASCS, says the Reno county program will try to get local organizations to help in a volunteer plan. LESTER BRANSON, (right), conservation specialist for ASCS, says amine salt, the safest form of 2-4-D, will be used.

It's not hard to find marijuana in Marshall county. C.J. NOVAK, left, says marijuana grows wild in his garden. The stuff was found growing in the alley behind the Marshall county courthouse.

Walter Murphy, Reno County ASCS director, said his office is ready to receive farmer applications for marijuana control cost-sharing funds. Payment will be based on "the smaller of 90 per cent of the cost of control, not to exceed \$3 per acre for easily accessible areas or the smaller of 90 per cent of the cost per acre not to exceed 90 per cent of estimated cost on inaccessible areas," he said.

Griggs says he believes the volunteer worker approach used in Reno County will prove the most effective control method.

"If the people have the attitude, realize there is a problem and will help on it, marijuana can be controlled," said Griggs. "It is the attitude and sincerity that is going to get it instead of money."

Griggs said approximately 1,300 to 1,400 persons participated in the volunteer worker control program he initiated last year. Supporters included the Reno County Commission, county weed department, Sheriff's Department, county attorney, Boy Scouts, 4-H clubs, saddle clubs, one car club, church groups and extension cooperators throughout the county.

If a farmer does participate in this, he is not participating because of any benefit to himself, but because he is concerned about a social problem," Mosier said. "Wild hemp (marijuana) is still not a noxious weed in Kansas as in some other states."

Lester Branson, conservation specialist for the state ASCS, said, "It is important that the farmers understand that this is a voluntary thing, but like so many other things, it could become mandatory. The main goal is to reduce the illicit traffic in marijuana by eliminating infested areas. I think the public should understand that this is not a program to eliminate it but to reduce the supply."

Only amine salt, the safest form of 2-4-D and the least volatile form of herbicide available, has been authorized for use where chemical control is prescribed, he said. Workers in Reno County hoed or pulled the weed in many areas where chemicals could not be used last year and are expected to follow the same procedure this year.

"We are trying in every way we can to use the most effective way of

control without contamination," said Branson.

Marshall county, site of heavy marijuana harvesting in recent years has been awarded \$10,000 to initiate a cost-sharing control program. Funding will be based on 90 per cent federal and 10 per cent land owner participation, the maximum allowed under ASCS programs.

County Extension Agent Paul Oltmanns initiated an educational program last year to inform county residents of the marijuana problem, solicited their participation in reporting any harvesting, and mapped out its areas of prevalence. Residents say the weed grows commonly in yards around homes, along stream banks and other areas not cultivated.

Courthouse workers said it was found growing in the alley behind the Marysville courthouse last summer.

Support To Get Lower Soybean Freight To Gulf

The U.S. Department of Agriculture has come out in support of lower railroad rates for mid-west grain shippers moving soybeans to gulf coast ports.

Richard Lyng, assistant secretary of agriculture for marketing and consumer services, said "USDA fully favors reduced rates on soybeans to gulf ports and we do not intend to do anything to jeopardize the new reduced Iowa rates."

The Interstate Commerce Commission a short time ago issued an order allowing the Chicago, Rock Island and Pacific Railroad Co. to lower rates on export soybeans delivered to Houston, Galveston and other Texas points served by the railroad.

Rates to Corpus Christi, Tex., were not included. Corpus Christi is not served by the railroad directly.

Officials of the Nueces County, Texas, Navigation District filed suit against the federal government over the matter.

The case, charging that the commission decision is

Grass & Grain 21
May 25, 1971

discriminatory, is pending in federal court.

Sec. of Agriculture Clifford Hardin has intervened in the case. He filed a complaint charging that the commission decision was in error.

Iowa Atty. Gen. Richard Turner asked for an investigation by U.S. Sen. Jack Miller, R-Iowa to learn if Hardin would intervene.

Lyng explained, "Our purpose in intervening in the soybean rate case is because the Interstate Commerce Commission, in making the decision, in this case, established a new principal in rate-making which could be damaging to agriculture."

PUBLIC SALE

Of Surplus CCC Property

Public Auction

Friday, May 28 '71

The Washington County ASC Committee, acting as agent for Commodity Credit Corporation, a corporate agency of the United States within the Department of Agriculture, will offer for sale the following described property at public auction.

THE SALE WILL BE HELD AT CCC BIN SITE No. 2, LOCATED AT THE NORTH EDGE OF THE CITY OF BARNES, KANSAS, AT 10:00 A.M. ON FRIDAY, MAY 28, 1971.

THE PROPERTY WILL BE SOLD "AS IS, WHERE IS". EACH BIN WILL BE SOLD SEPARATELY.

— ITEMS OFFERED FOR SALE —

12 Aluminum Circular Bins, 10 manufactured by Beatrice Steel Tank Mfg. Co. and 2 manufactured by Edwards Mfg. Co. 18 ft. diameter. Rated capacity 3,250 bushels, with foundation rings.

NOTE: Foundation rings are considered part of the structures and will sell accordingly.

— MISCELLANEOUS ITEMS —

12 Tube Assemblies for grain aeration — 3 Wisconsin Engines, under 20 H.P. — 1 Baldwin Auger, 10-inch, 42-ft. with engine

INSPECTION: Bins and Equipment may be inspected the morning of the sale.

PURCHASER'S CERTIFICATION: Each purchaser of a bin will be required to execute a certification that the bin will be used in connection with the storage or handling of agricultural commodities. Bidders are warned that any false statement to CCC in such certification is punishable by a fine of not to exceed \$10,000 or imprisonment for not more than five (5) years or both, under the provisions of the Commodity Credit Corporation Charter Act, 15 U.S.C. 714m (a). The purchaser will also be required to certify that his bid was made without collusion, consultation, or agreement with any other person with respect to the amount of his bid for the purchase price.

TERMS: Cash on day of sale, or bins may be financed under the Farm Storage Facility Loan Program. Farm storage facility loans are available to farmers on the purchase of bins through the county ASCS office provided purchaser meets eligibility requirement for loan. Farmers interested in a loan should contact their county office prior to day of sale regarding eligibility requirement. If eligible, the prospective purchaser must bring a memorandum from his home county ASCS office so stating.

REMOVAL OF PROPERTY: No property is to be removed from bin site before being paid for. Bins must be removed from the site before July 31, 1971.

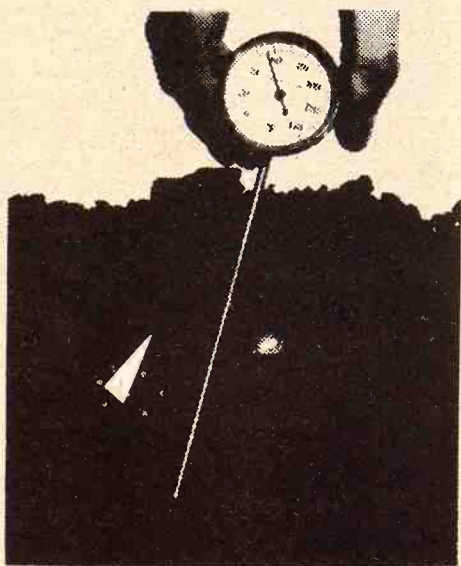

TITLE AND RISK OF LOSS: Title to the grain bins shall vest in the purchaser when payment is made. Risk of loss or destruction from any cause whatsoever shall be borne by the purchaser at time of award to purchaser at public auction.

BIDS: Commodity Credit Corporation reserves the right to reject any or all offers.

Additional information may be obtained by contacting the Washington County ASCS Office, 208 Ballard St., Washington, Kansas 66968. Phone: (913) 325-2136.

NOT RESPONSIBLE FOR ACCIDENTS.

Headstart:

a new fertilizer idea to get extra yield from early planted corn.

There is growing evidence that cold soil temperatures (below 60° at 4 inches depth) make some nutrients temporarily unavailable to seedlings. That's why we want to tell you about the new, exclusive Gulf Headstart fertilizer program. It is designed to help your corn get off to a fast, early start, even in cold wet soil.

If you plant early, be sure to ask about our "Headstart" fertilizer program

Progress To Take Water From Lake At Glen Elder

At a preliminary organizational meeting recently in Scottsville, steps were taken toward a Lulu Rural Water District, to pipe water from Glen Elder Dam Reservoir.

A Water District Complex made up of Brown Creek District, City of Beloit, Rural District 1 south of Beloit, WCH&T District, Glen Elder and Scottsville will become part of this complex, bringing running water to the city of Scottsville.

Other towns to be served by the Complex are Asherville, Barnard, Solomon Rapids, Randall, Jewell,

and Beloit.

Lulu Water District will be 15 miles long and 25 miles wide. Charges for the water piped from Glen Elder Dam Reservoir will be the same way city water users have, by meter. Easements will be obtained for water lines to run along highways and roads and some plants will be located along the route. Filtering plant will be at Glen Elder Dam. It is estimated that 1 acre feet of water per year will be available for domestic use.

CESSNA LAYS OFF 50

AT HUTCHINSON PLANT
HUTCHINSON — Cessna Aircraft Co. has laid off about 50 workers at its industrial products plant here. Force now is about 1150 people, down to the level of a year ago.

BELLEVILLE, KANS.

Floodwater Farm Eqpt. Sale

Another poorly written poorly paid for poorly spelled — classified advertising primarily we are still, farm machinery tractor & impl. dealers.

To start — We would like to condemn the Corpse of Engineers for building us a poorly built dam. "Damn" I'm not sure that it leaks but there's a hell of a lot of water from somewhere — Like an engineer I once knew — I "ask" where does the water come from & he says the sky — I remember hearing Mr. "Pinkie" or "Colonel" as he is better known make a talk about all the good things he was doing for us just by building the Marion Reservoir which closed up the Cottonwood. But one think they forgot was that also there was Mud Creek & Clear Creek & South Cottonwood — They evidently miscalculated & built their "dam" "Dam" to far up & it didn't take in the other three rivers or creeks. Maybe we should help correct it.

- 1 used manure spreader, GI type \$19.99
- 1 better used manure spreader, used to belong to an old Colonel now only \$29.99
- 1 Blair feed wagon — 170 bushel size \$495
- 1 used Case 930

Due to the Army Engineer flood we are now having we are herewith having a flood sale — 930 tractor was in water not deep enough to hurt a dam thing. Was priced at \$3500 — now take \$2999.99.

- 1 used old manure loader, used to belong to General "Ake" \$9.99
- 1030 Case tractor, was never near water. New tires, 3 pt., like new — Flood close-out, Engineer special .. \$4999.99

What us poor soul farmers out here need to do is make one of those peace marches on DC so they know we are still out here; 10,000 is an awful lot of people to arrest at one time. Don't believe "they" can do it — But when "they" the Gestapo troops anything can happen — Write "Dick" and tell him to build us more big "dams" B -- Case "430" tractor, row crop, row cron like new, 260 hrs. use — \$2495 with cult. — deliver to DC.

Recalling when they dedicated the dam so called Marion Reservoir that should have been built further down stream, Mr. Shriver or Mr. Pearson said it was to be used "for — ? and, "For" and for ? Irrigation ? Someone wrote his speech wrong.

- 1 used manure spreader with "wet manure" \$19.99
- No. 930 Case 1968 Row Crop tractor, 3 pt. & excellent condition, big tires, power steering, etc. "Flood" special to celebrate the drought \$3999.99

To celebrate the coming of Ike dollars & BCount 8c postage stamps we are going to sell all tractors & combines at cost. That is new MDS.R. units — Cost or below.

Have one new all 180 tractor will sell at your price IF agreeable with the ASC. Call or write Martha & John & tell them to build more big dam's. There's a lot of places left yet "they" haven't thought of to build dams "damit"!

Why don't these Corpse of Eng. fess up what they are really building are monuments so they can put their names on the plaque built by so & so & "Pinkv" Why don't they just say they are for boating & fishing — Makes a great big deal "oodie" for the Fish & Game Commission. Still can't believe they have \$12,000,000 million that is in reserve. So one ought to put a stop in "somewhere."

Did you know that you can still buy a pack of gum for a 5c piece!

- 1 new 4x10 Blair feed wagon, this week flood special \$745
- There was a time when you could mail a letter for 2c.

Longhofer Supply

EV 2-2620 — EV 2-2620

MARION, KS.

WATER — CONTINUED
We have 50,000 lbs. wheel weights — Take all at 5c a lb.
Used IHC 3 bottom mtd. plow \$99.99
Used IHC 3 bottom plow \$129.99
Used IHC plow \$139.99
IHC 4 bottom quick hitch plow \$49.99

Allis D-17 tractor, fresh overhaul, new tires, wide & PS \$2099.99 flood special

Write the Corpse of Eng., tell them to build their G—Dam Dams in right places, not on the side of a hill.

Have two outboard Mercury engines for sale, 6 HP & 9.8 — Will take any reasonable offer but don't be to bureaucratic on it.

Farmers really should organize a tractor drive in on Washington. Wouldn't be hard to get "us" to go.

IHC "big" "big" box 16-8 wheat drill, rubber press \$795 flood special

Did you farmers know you can't haul a wide load on the new interstates. The patrol boys with "blue" coats say you can't write a letter of protest or we will soon be taking side roads all the time!

We have so many do-gooders doing good for us that we can no longer afford all their do-gooding — who's saving who from who the poor from the rich or the rich from the poor ????

Wanted to buy — 1 good used manure spreader that works For sale — IHC 300 row crop tractor, high wheel \$695. We gave \$800 — That's not a bad loss. Beats farming.

You probably read where we had a flood Marion Vicinity the Corpse of Engineers will have bulletin out on their "goodness"

One of our local highway cops gave a farmer an overload ticket cost him over \$200 fine. Boy that'll teach him. No warning or nothing! What we need is more patrolmen & less farmers with trucks. That'll make em take a side road.

- 1 used manure spreader, won't handle liquid manure \$19.99
- Interstates should be built only for tourists, etc., & name them all Eisenhower Expressway.
- 1 used IHC 3x14 plow, will plow \$41.69

"Horay" for County Atty. Holland on refusing to be ousted. I hear he's for people.

Some of our state politicians went to Washington to listen to the "big boys" "Spiro" Dick "Connally" "Richarson" etc. Sounds like some of them were "brainwashed."

"Did" "you" "farmers" see where the Dept. of Agriculture. Is going to be part of the Natural Resources Dept. Boy, that great now you won't have to "plant any more" just harvest it. Most government programs be it farming or otherwise help the "Rich quicker get."

"Don't call us for a day or two. Flood put a foot or so of water in our office & shop so we will be couple days cleaning. Will be open as usual Monday, except we will be making better deals than ever due to our flood sale.

- IHC 303 combine, cab, 14' head-er, pickup reel, etc. \$3495
- Allis Gleaner 63 model, flood engineer special \$2995
- 800 Case 14' combine \$1795
- No. 1000 Case combine \$2495
- Gleaner G combine, 20' \$7495
- John Deere 45 combine \$1095
- IHC 58 Model 101 combine, 12' \$1095
- Flood special — 600 Case \$2200
- 600 Case combine, 64 model, 13' \$2795
- 660 Case combine, like new \$3450

Come in for flood specials No reasonable offer turned down (Flood Sale)

- 1 used manure spreader won't "spred." 5 dump rakes won't "dump" \$19.99 choice
- 5 balers won't bale, too wet \$875 choice all round

Write the Corpse of Engineers Tell 'em to be sure & built the dams in the right places! Written by E. "Rusty" Longhofer of Longhofer Supply. Not necessarily the opinion of the whole organization.

This ends the advertisement for the week. This is a 'Flood Sale.'

LEE MORGAN HONORED BY USDA PROGRAM

Lee Morgan, now Kansas Soil Conservationist at the SCS at Salina, was one of several Kansas recently honored by USDA with "superior service awards" at ceremonies in Washington, D.C.

Morgan received his award for soil and water conservation work he led in the state of Idaho. He came back to Kansas to head the state SCS the first of 1971.

The last national award by a state SCS group was by the Kingman county staff in 1962.

Morgan was state conservationist in Idaho from 1957 to 1970. He's a native of Stevens county, Kansas, however, and played football at Kansas State in the early 1930s.

Newsprint Not from Mighty Trees but Runty Ones

The current hubbub about pollution and environment has attracted some attention to the possibilities of reusing newsprint. A bit of the talk is uninformed, suggests a recent editorial in the Capital. Here's what the Capital writer had to say about the subject:

Some people have the mistaken idea that manufacture of newsprint, a paper on which newspapers are printed, causes destruction of vast areas of magnificent trees such as 100-year-old redwoods, because paper is made of wood pulp.

These people sometimes also think that more newsprint should

be recycled in order to reduce the nation's waste problem.

"Let's look at the facts.

"The truth is, as the Washington Star has pointed out, that Canadian newsprint, a great source of supply in this country, is not made of towering redwoods but of relatively runty conifers stretching jam-packed for hundreds of thousands of desolate square miles. In the West, much newsprint is made of sawdust and other sawmill waste.

"Forests producing wood for newsprint are farmed on a rotational basis under strict supervision of government foresters. Even adding insect, fire and disease losses, no more wood is cut from a tract in a given year than grows back in that year. Thus, these forests can continue producing this wood in perpetuity.

"In this sense, wood for newsprint is a renewable crop like Kansas wheat. Reducing the harvesting of

these trees through recycling or other means has little more conservation relevance than reduction of wheat harvests.

"There are now three newsprint recycling plants in the country. These use well over two million tons of old newspapers annually to make cartons, wallboard, roofing material and more than 300,000 tons of recycled newsprint sold to nearby newspapers.

"Making recycled newsprint from old newspapers is practical if the mill is a reasonably short haul from enough big-city newspapers whose excess copies and pressroom waste provide a steady source of "clean" raw material as a nucleus. Household collections are expensive and not "clean," for they require costly hand-sorting to eliminate such materials as magazines, wire staples, color comics, plastics, rope, wire and dirt.

"Even so in the repulping of newspapers up to 20 per cent of the fiber content goes down the drain. Those 400 pounds per ton, plus about 35 pounds of ink per ton, amount to mountains of waste that must be disposed of. Also in the waste outflow are large quantities of detergent used to get the ink out.

"Robert E. Halliwell of the Seattle Times adds this thought:

"Most newsprint suppliers are large, integrated forest-product companies that operate their forests on a sustained-yield basis, clearing old, mature and rotting wood and replacing it with healthy growth. One acre of young, growing trees produces four tons of oxygen and four tons of wood a year, while consuming 12 tons of carbon dioxide. To maintain this high oxygen production, the forests must be harvested while the trees are immature, because dying and rotting trees reverse the process and are oxygen consumers. It is desirable to preserve certain trees per se, and all major newsprint supplies are committed to preserve their forest through forest management.

"They realize better than anyone that they will run out of trees if they don't — and they are more interested in conservation than the man on the street is."

CLAY CENTER, KANSAS

Doctor Gives Up In Hassle At Clay Center

CLAY CENTER—Dr. Ronald Strand has voluntarily resigned from practicing privileges at Clay County Hospital, and indicated he would relocate his practice somewhere near here.

Dr. Strand has been involved in a court battle that began June 30 when the hospital board suspended him

from practicing at the hospital. The suspension was set aside in district court.

Pending court action filed by Dr. Strand alleging harassment by other doctors at the hospital apparently will be ended by his decision to stop practice at the hospital. It was believed Strand's decision was made because he felt it would be in the best interest of his family and the community.

Aussies Turning Beef Exports Away From U.S. For Better Markets?

An overall beef shortage may be shaping up with import demands outstripping available meat exports.

Forecasting a growing shortage of beef and veal in world markets,

officials of the World Bank expect exports to reach 2,192,000 tons by 1975. Importing countries, however, are expected to require 2,311,000 tons — a shortage of 119,000 tons.

Exporters in at least one country Australia, have found more lucrative markets in the United Kingdom and Japan and officials there have expressed their concern that Australia may not be able to fill its share of the U.S. import quota.

In the November 1970-March 1971 period, Australia exported 117.3 million pounds of beef and 8.1 million pounds of mutton for the same period a year earlier.

Total imports in the U.S. dropped almost 30 percent in the first quarter of the year — from 337 million pounds in 1970 to 236.8 million pounds this year.

It is no secret that the Australian Meat Board is worried about the sudden switch by Australian exporters away from the U.S. market and the possibility that its share of the U.S. meat quota may not be filled. Meat board officials feel there is a danger that the Australian quota to the U.S. will be cut unless it is filled. Australian imports represent slightly more than 50 percent of the total U.S. imports.

An upward price swing has made the markets in the United Kingdom and Japan more attractive to Australian exporters without the same risk of rejections.

In the week ended April 30, Australian beef was bringing 40 percent more in London than at the same time last year. By contrast, U.S. prices were only five percent higher.

A major Australian meat exporter was quoted as saying, "For topside beef, we can get 52 cents per pound from Japan without the trimming the U.S. market requires."

"The trimming for the U.S. market is worth 10 cents per pound, but the U.S. price is only 58-59 cents. So all the topsides are going to Japan."

World Bank officials see world exports totaling 2,414,000 tons by 1980, but say that 2,590,000 tons will be required, leaving a shortage of 176,000 tons.

HONORS FOR RUFUS COX

Dr. Rufus Cox, left, received a leather-bound collection of letters from friends during the recent Kansas State University Cattlemen's Day. Dr. Glenn Beck, KSU vice-president for agriculture, made the presentation to the former head of the Kansas Department of Animal Science and Industry. Cox completed 25 years of service to the Kansas livestock and meat industry.

Bank's survey of international trade in beef and veal are:

— Imports into North America are expected to continue to rise until at least 1980.

— Western Europe will have an increasing import requirement for beef. There will be a strong rise in the EEC import demand, but UK imports will not rise and could fall.

— Japan's import demand can be expected to show very rapid growth in the future. A lot will depend on the more liberal handling of its import quota scheme.

— Overall world import demand is expected to rise at a fairly rapid rate until at least 1980.

The World Bank's comment on the overall result is that, "These projections indicate that world trade in beef and veal can be expected to increase and that world import demand is likely to rise faster than export availability. This deficit implies a continuation of demand pressures and, consequently, prices are likely to rise."

The reason for an apparent world shortage of beef is the current situation in Argentina where

government imposed measures have failed to produce an export and some of the porters have closed permanently.

DEERE AND FIAT TO SHARE PLANTS IN EUROPE

WAY TO HAUL OIL FROM ALASKA?

The latest method suggested to transport oil and natural gas from remote areas like the Arctic islands is by use of giant dirigibles. An oil transport expert suggests a 6600-foot airship would be economically feasible. This picture is of the U.S.S. Akron which was 785 feet long when this picture was taken in 1931. The Akron was destroyed in an explosion. Experts now feel that helium can be used safely instead of explosive hydrogen, commonly used in the 1930's when airships were popular.

NFO Countersues Big Dairy Co-ops

The National Farmers Organization filed a counterclaim in District Court last week asking for damages amounting to \$62,000 under federal antitrust laws.

The suit named as defendants the Mid-America Dairymen Inc., Associated Milk Producers Inc., Associated Reserve Standby Pool, Beatrice Foods Co., and its subsidiary, Boswell Dairies Co.

The suit is a counterclaim to a filed previously by mem-

bers of the Mid-America Dairymen, Inc., against NFO, which charged the NFO with antitrust violations.

The actions are pending before Judge John W. Oliver in district court. In the original suit, Beatrice Foods Co. and Boswell Dairies Co. were named defendants along with the NFO. These companies now are defendants in both suits.

The petition filed by the NFO accuses the defendants with conspiring to fix the price and to control the supply of raw milk in the mid-western market and to exclude the

NFO from this market.

The suit further alleges that the defendants conspired to utilize their economic power by means of threats, boycotts and coercion to induce NFO customers to refrain from purchasing milk from the NFO.

Also alleged in the NFO suit was an attempt by the defendants to compel milk producers to contribute to political slush funds controlled by Mid-American Dairymen and Associated Milk Producers. The slush funds were utilized to advance monopolistic interests, the petition said.

The NFO suit also accused the defendants of attempting to influence government officials to the detriment of the NFO.

□ Schedule B: (Effective July 1, 1971) to be used only for grain received for handling and/or storage under CCC support program and handled under U.G.S.A. rates. (In cents per bushel.) The U.G.S.A. rates are set forth below for your information.

Clean, Spray Grain Bin Before Harvest

Leaving wheat and other grains untouched in bins since the previous grain was removed is risky business.

Risky in that the crop can be destroyed by stored grain insects, notes Dr. H. Leroy Brooks, Extension entomologist at Kansas State University.

Farmers often believe stored grain is infested by insects coming in from the field at harvest. This is rarely the case, says Brooks. The source of insects is usually in waste grain left in the bin or in adjoining alleyways and feedrooms.

Step one in preparing for this year's grain crop is cleaning the bin and surroundings. Use of chemicals is not enough.

This means sweeping the bin's walls, ceiling and floor several times. Old remnants of grain and trash should be destroyed. Sweeping trash just outside the bin door only creates another breeding area for insects.

Step two is spraying the bin with a safe residual insecticide two or three weeks before harvest. The spray —

about one gallon per 1,000 square feet of surface area—should be applied until it runs off the bin walls, ceiling and floor.

Safe chemicals and rates to use include one-third of 57 per cent malathion (Cythian) per gallon of water or three-fourths pint of 25 per

May 25, 1971

cent EC methoxychlor per gallon of water.

Pyrethrins plus a synergist can be used as bin spray but this combination has little residual killing power, Brooks says.

Nov. 23 — Annual production sale of Amstein Herefords, Bill Amstein, Clifton, Ks.

reported as having contracted the disease were between 20 to 25 years of age.

"One of the problems is that teenagers don't realize we have a law in Kansas, and in 38 other states, that says a child under 18 years can be treated for venereal disease without parental consent. Our teenagers today don't know this. They're afraid to go to a doctor, because they don't want their parents to know."

"But doctors don't have an obligation to notify the teenager's parents nor to obtain parental consent for treatment," he emphasized. "If we could just get teenagers to realize this and seek treatment, it would be very helpful in controlling the spread of the disease."

Any person may seek diagnosis and treatment from a private physician or a local county health department, without fear of confidentiality being broken.

It is important that females, in particular, seek treatment, because of serious complications of gonorrhea. It is estimated that 10 to 12 per cent of females who have gonorrhea have inflammation of the fallopian tubes which can result in sterility. Gonococcal arthritis is another complication.

Too Much Water In 1st Irrigation

Many Kansas irrigators, especially those growing corn or grain sorghum, tend to over-irrigate

May 25, 1971

with the first application of water. The first water application is usually made when corn is 15 inches high. Russell Kansas State University irrigation specialist, points out at this stage of plant growth moisture supply in the root zone has not been depleted for the plants. He suggests only enough irrigation to replenish the soil down to lower root zones.

One Of Four VD Cases Is Teenager

Gonorrhea, by far the most common reportable disease in the nation, is a continually increasing problem in Kansas, Dr. Donald E. Wilcox, state epidemiologist, says. In the first three months of 1971, there were 1,761 new cases of gonorrhea reported, 840 of them in January.

One out of every four cases occurs in a teenager, Dr. Wilcox said. Forty-five percent of those who were

Beef, Dairy Producers Get Most Of Food Dollar

Meat and butter get to the table with less processing costs added to them than most farm products, says a recent government report. The cattleman is getting about 65 cents of each dollar spent in retail stores on beef. That's from the first quarter of 1971 and is six cents better than the last three months of 1970 and a couple of cents better than the opening months of last year. Butter was the only item exceeding beef in terms of a producer's share. Dairymen got 72 cents of each dollar spent on butter, little better than late 1970 but three

cents less than a year ago.

For all farm products the farmer averaged 38 cents of each food dollar, up a cent from late 1970.

Meat products generally have a higher ratio of return to producers than other items which require more processing and labor to get them from the farm, packaged and onto retail shelves.

Pork returned 44 cents to farmers in the first quarter compared with only 40 in October-December. But that was far less than the 59 cents farmers got in the first quarter of 1970 and the 1957-69 average of 55

cents.

The classic examples of high retail costs to consumer in relation to what farmers got for ingredients are bread and corn flakes. Wheat producers received 10 cents of each dollar consumers spent on bread, while corn growers got 9 cents for a dollar's worth of flakes.

Other items and the farmer's share in cents of each dollar consumers spent on them included:

Milk sold in stores 51 cents; ready-to-cook chickens 46; eggs 58; flour 35; apples 30; grapefruit 21; oranges 25; tomatoes 46; canned peaches 18; frozen french fries 15; peanut butter 33; and sugar 41.

No Hay When Sun Won't Shine

WAKEFIELD—Despite the expensive ingenuity of farm machinery manufacturers, they still haven't come up with anything that will make hay while the sun doesn't shine. The two-day haying demonstrations planned by area International dealers on a farm near Wakefield last week were cancelled because of rain and wet grounds.

ABILENE, KS.

Selling Every
FRIDAY

SALE EVERY FRIDAY NIGHT STARTING AT 7:00 P.M.

Throughout the rainy night the yard men did an exceptionally good job handling the cattle at the first night sale of the season.

A large crowd locally, out of state and from all surrounding counties filled the sale barn. A big run of cattle moved through the ring and prices looked strong to higher on cows and bulls. Fully steady on all other classes.

Following is a partial listing of the sale last Friday:
