REMARKS ON THE COURSE.

According to the Charter of the College, it embraces Four Departments, viz: The Department of Science and Literature ; The Department of Mechanic Arts ; The Department of Agriculture ; and of Military Tactics.

The Department of Science and Literature includes a regular Collegiate Course, and, at the present. a Preparatory School.

It is thought by the Faculty that the foregoing Course of Study will meet the demands of the greater part of the Students of the State.

It embraces an extensive Course in Natural Science, and Agricultural Chemistry, studies which relate immediately to the practical part of Farming, while the Course, in Mathematics and Ancient Languages, is as full as that laid down in the best of other Literary Institutions.

Especial care will be given to Logic and Rhetoric ; and also to Composition and Declamation during the entire Course.

DEGREES.

THE College has full power to confer those Degrees which the best Colleges usually give, and will confer the Degree of A. B., (Bachelor of Arts,) on those who complete the regular Collegiate Course, as laid down in the Catalogue.

ADMITTANCE.

Those will be admitted to the Preparatory Department who can pursue the studies laid down in it to advantage. Students who wish to go into advanced classes, must pass an examination in all the preceding studies in the Course, and none will be permitted to advance with any class who do not pass the regular examination at the close of each term.

TIME OF ENTERING COLLEGE.

Students wishing to take a regular course should present themselves at the commencement of the year, as a day or two lost at the beginning of the term will be the cause of embarrassment during the entire term, and perhaps, the year or course.

New classes are formed at the beginning of each term, and those who are not present to commence at that time, with the class, cannot fail to be more or less troubled in catching up with the class, so as to pursue the study to advantage.

It is a great advantage to each student to be present at the commencement of the year, and at the beginning of each subsequent term.

CALANDAR FOR 1864-5.

First term begins Sept. 1st, 1863, and continues 14 weeks. The second term commences immediately after the first closes ; continues also 14 weeks. At the end of the second term there will be a vacation of one week, when the third term will begin, and continue until the 15th of June.

RELIGIOUS SERVICES.

Preaching every sabbath evening, at 4 o'clock, by some member of the Faculty, or a regular minister procured by the officers of the College.

LECTURES.

During each term, a course of Lectures will be given by the Faculty on subjects taught in the various Departments.

DEPARTMENT AND SCHOLARSHIP.

A Roll of Merit and Demerit will be kept in each recitation room, and the standing of each class faithfully made out at the close of every term and read publicly. This standing will be registered in the College Record, and opened to the inspection of parents and guardians of the students. A certificate of the standing, showing the Department and Scholarship of the Student will be sent to the parent or guardian when requested.

EXAMINATIONS.

The last two days of each term are occupied in examining the classes in all the Departments.

Candidates for admission to the advanced classes will be examined on the first day of each term. In Greek and Latin the examination will be conducted by President Denison; in Mathematics, by Professor Preston; in Natural History and Chemistry, by Professor Schnebly, and in the studies in the preparatory department, by Mr. Platt.

TUITION.

The expenses in the Literary Department are only Two Dollars per term. In the Musical Department, \$3 for the Melodeon, and \$10 for Piano. Expenses always in advance.

BOARDING.

Students can get boarding in the city, including light and wood, in private families, for from \$2.50 to \$3.00 per week. Those who prefer it, can rent rooms and board themselves much cheaper, perhaps at one-half the expense of boarding otherwise. For the convenience of those who may wish, a hack will carry students to and from the College, for \$2 per term.

RULES.

No person shall become a member of the college unless he present to the Faculty satisfactory testimonials of good moral character; and if any applicant has been a member of any other College, a certificate of regular and honorable dismissal will be required of him.

All Students are required to observe the study hours prescribed by the Faculty.

All Students are required to perform faithfully the duties and exercises and to pursue the studies assigned them by the Faculty, and promptly to give appropriate reasons for tardiness to any of their duties, or absence from them.

All Students are requested to give attendance to habits of cleanliness

and to the civilities of good breeding in their intercourse with each other, and with society in general, they are required to observe dignified ladylike and gentlemanly deportment.

Any Student who is idle or vicious, or whose moral character is bad, or whose influence is decidedly detrimental, in the opinion of the College government, to the literary and moral interests of the College, may be reprimanded, suspended, dismissed, expelled, or otherwise punished, at the discretion of the Faculty.

All profane and indecent language, playing at games of chance, injuring the property of the Institution or of the citizens, quarreling, fighting, or the carrying of firearms or other dangerous weapons, is strictly forbidden.

Any Student who, without just cause, shall fail to attend the examination, will be considered as under censure, and will not be allowed to advance with his classes without suitable amends.

Those who leave the College during Term time, without permission, will be liable to suspension or expulsion.

No student will be permitted to leave any class without the consent of the Faculty.

No meeting of the Students can be held in the College for the transaction of any kind of business, unless by permission of the Faculty.

Any Student who shall injure or deface the building, in addition to such penalties as the Faculty shall see fit to inflict, will be subject to the expense occasioned by the necessary repairs.

Habitual indolence and inattention to study will be regarded as an offense against the laws and the spirit of the Institution, and will be made the subject of such discipline as the Faculty deem expedient.

No Student shall be permitted to recite, unless the tuition and contingent fees shall have been paid.

HISTORY.

The Kansas State Agricultural College is in Manhattan, Riley County, near the center of the State. It is situated at the confluence of the Big Blue and Kansas rivers, on a high piece of ground containing one hundred acres. Standing on the College campus, and looking eastward, one can see over the broad Kansas river valley for fifteen miles. This one view, of itself, would make the location desirable, but the rivers, one passing to the North and the other to the South, at the distance of two miles from the building, add to the scene, while on one side of the banks stand many beautiful trees, on the remote side of each stream rise lofty hills, almost like mountains. Here peak after peak is so arranged, as to form almost a perfect semi-circle around the College premises on the North, West and South sides of the ground. Combining the view to the East over the Kansas River valley, with the views of the peaks around the other three sides of the College, it presents a scene that is rarely surpassed in any place.

The location is very healthful. The water good, and air pure.

The College was erected under the patronage of the Methodist Episcopal Church. It is a commodious building of white stone, three stories high well finished, inside and out. The Chapel and Recitation rooms are large

and well ventilated. The Library room is neatly shelved, and contains some 3,000 volumes of the choicest books.

When the building had been nearly completed, and furnished with the Library, Chemical and Philosophical Apparatus, the Church gave it over to the State, in consideration of a donation of 90,000 acres of land. The value of this land at a moderate calculation, is \$400,000, being, most of it, the finest land in the State.

At present, only the Literary Department is in operation, but the others will be formed within two years.

The Literary Department was organized the first of September, 1863, and has had a prosperous year, having enrolled over one hundred Students. The prospect for the next year is fair, as there will be a larger number of pupils in attendance.

The Institution is free from all indebtedness, and it is the design of the Regents to ever keep it from financial embarrassment.

The College is open for both sexes, in the Literary Department. Instrumental Music is taught; also Vocal. The Institution is furnished with a fine Piano Forte, and a Melodeon,

This is the first Institution the State has endowed and put in operation and it is destined to become an instrument of great profit to the Country. It has already gained a reputation over the State, and is an honor to the new and flourishing Commonwealth of Kansas.

THE END.
