

## The Kansas Union Farmer

Published Every Thursday at Salina, Kansas, by THE KANSAS BRANCH OF THE FARMERS EDUCATIONAL & CO-OPERATIVE UNION 119 South Seventh Street

Entered as Second-Class Matter August 24, 1912 at Salina, Kansas. Under Act of March 3, 1879.

Acceptance for Mailing at Special Rate of Postage Provided for in Section 1103. Act of October 3, 1917. Authorized July 30, 1918.

JOHN TROMBLE Editor and Manager  
W. C. LANSDON Associate Editor

Subscription Price, per Year \$1.00

Notice to Secretaries and Members of Farmers Union of Kansas. We want all the news about the Locals and what you are doing. Send in the news and thereby help to make your official organ a success.

Change of Address—When change of address is ordered, give old as well as new address, and R. F. D.

All copy, with the exception of notices and including advertising, should be in seven days before the date of publication. Notices of meetings can be handled up until noon Saturday on the week preceding publication date. Communications and Questions—Communications are solicited from practical farmers, members of the F. E. & C. U. of A., are at liberty to ask questions on any phase of farm work. Answers will be either published or mailed.

THURSDAY, JUNE 3, 1926

### KEEP PLUGGING AWAY

Farmers should all know by this time that there is only one sure way to help agriculture. Congress may or may not do its best for us. Other governmental agencies may be active and useful. Business interests may be sympathetic and somewhat helpful because profits grow out of agricultural prosperity. In the long run, however, it is as certain as death and taxes that self help through organization is the only way that farmers can protect themselves against the interests that exploit their labor and property.

Every farmer in Kansas is busy at this time. All will be busy for the spring and summer. There will be a strong inclination to abandon team work and attend only to individual affairs during the coming half year. Unless something special is done there is always a slackening of co-operative effort and efficiency during the summer. Many locals do not meet regularly from May until October or November. Every farmer interested in the growth and strength of the Union should take part in whatever work is necessary to keep the organization awake, alive and moving during the warm and working months of the year.

It may be quite a job to keep up Locals during the summer, but the results will be worth the effort. No matter how busy members are on the farms not a single state meeting date should be allowed to pass without a gathering for discussion and planning. The people who profit by our neglect of our own interests never quit. They will be just as busy during the next few months as they were all winter. We can maintain ourselves only by strengthening our organizations. Attend the locals, get new members and keep everlastingly at the work of building co-operation.

### LEGISLATION AND TAXATION

Kansas has the worst tax system in the United States. The last legislature hardly touched the possibilities of tax reform. Sources of revenue that should yield most of the public income are wholly untouched. Farms, railroads and other tangible property still carry most of the tax burden of this state. This means that the farms carry most of it because the railroads and other corporations are able to conform their charges for services and commodities to their tax bills and shift their share of the burdens of government to the land.

More than any other single group, the farmers of Kansas should be interested in securing a tax system for this state that would be fair and just to all. We should have a state income or occupation tax, one or both. We should have a more rationally planned inheritance tax. This is especially true since the federal government will take all the taxes on estates that are not collected by the state. We should have a tax on production. The taxation of intangibles should be made more certain and effective.

None of these things will be done next winter unless the right sort of men are selected for the legislature. Only a little more than a month will elapse before all fillings must be made. If farmers want representation at Topeka they must get busy during the next few weeks and see that their men are selected and that they qualify as candidates in the primary election. After the fillings have closed no new men can be named.

Getting the right men on the primary ticket is only the first step. They must be supported in the primary election and nominated in August or they surely cannot be elected in November. It is not too early to begin planning for the primary election. Agriculture can afford to take a complete holiday for that occasion. The men and women of the farms must vote if they hope to secure anything like fair treatment from government. It might be well for all the women of the farms, as advised two years ago, to notify their men folks that no food will be served in the homes after breakfast on primary day until there is proof positive that the men have voted. Serve the noon-day meal at the polls and stay there all the day to see that all do their duty.

### IS YOUR LOCAL ON THE LIST

The roster of Farmers' Union Locals that we are printing each week on the fourth page of this paper is growing but it is not growing fast enough. We must either have the names of more Locals or we must abandon printing the comparatively short list that we now have.

There are a lot of folks in the country, who

do not like the Union or any of its ways and purposes. Many of them pay money every year to get their names on the list of cash customers for this paper. They read it with much more care than is exercised by a lot of our own folks. They want to know what the Union is doing, just how strong it is and just where its strength is located. They are not likely to take very much notice of a farmers' organization that is not state wide and active. Fifty-four counties are now represented on our directory list. That means either that there are fifty-one counties in which there is no Union or that in many of counties the organization is so inert that its locals do not meet, maintain the co-operative spirit and pay their dues. As a matter of fact there are going Locals in almost every county in Kansas. Their names should be on the list.

Anderson county leads the list not only alphabetically but in the number of Locals that advertise the time and place of their regular meetings. Sixteen Anderson county Locals have their names on the roster, but strangely enough not one of the sixteen has a four-star decoration. There are several more than 16 Locals in that county and it is almost past belief that some of them have not a 100 per cent paid-up membership. As long as we have undertaken the job, let us have the list of live local organizations completed.

No. You need not be afraid that you will crowd out other reading matters of more value. Whenever the directory outgrows the fourth page more space will be found elsewhere. If it becomes necessary we can adopt the plan of printing it only once a month, either in the first or last paper for the month. Come on, secretaries. Get right busy. Collect the dues, settle with the state secretary and get the names of your Locals, all decorated with stars, on the list.

### RELIEF FOR AGRICULTURE

Congress recognizes that something must be done to save American agriculture from complete and irrevocable disaster. For several months the best minds in our national law making body have been at work on the problem. The recently elected and somewhat professional statesmen have had the assistance of many volunteers who have generously given their time and the use of their more or less acute intellects to the problem without payment than inadequate expense allowances doled out by various farm organizations. Truth is that not a few of the visiting great in Washington have paid their expenses for the privilege of participating in the shaping of legislation likely to restore the prosperity of our greatest and most vital industry. So far all the conferences, conventions, resolutions, sacrifices, oratory and alleged constructive efforts have been in vain.

The Haugen bill, the composite result of the work of the Corn Belt Committee, the National Council of Agriculture and the Committee on Agriculture of the national house of representatives has been defeated by a majority great enough to indicate that no similar measure can be enacted by the present congress. There is still some slight chance that a bill made up of selected provisions taken from the Aswell and Tinchner proposals and merged in to an inharmonious and unpromisingly bred may yet be proved before adjournment for the party fights in the primaries and the political contests to be waged later at the polls. But there is a very slim chance for such a result or in fact for any legislation likely to be more than incidentally or temporarily helpful.

There are several reasons why the Haugen bill failed and why none of the make shift substitutes for that measure are at all likely to succeed. The congressional recognition that something must be done is largely on the surface. Congress as a whole as yet fails to comprehend the necessities of agriculture. Some years ago the railroads convinced our statesmen that transportation should have more income for the purposes of refunding debts, maintaining and improving facilities, and paying fair dividends on invested capital and the relief required was secured. The railroads acted as unit. They marshaled their facts and presented their arguments through a single mouthpiece and prevailed to such an extent that they are now more prosperous than ever before in their history.

Farming is as vital a transportation. The people must be fed. Agriculture needs enlarged credit facilities and increased income as badly as the railroads ever did. The farm mortgage debt and the unfunded floating debts of farmers exceeds \$10,000,000,000. Farm property, the opening plant of agriculture, has long been reducing in value and efficiency. Merely to restore existing buildings, machinery and other necessary operating equipment to something like decent appearance and usefulness would now require not less than \$10,000,000,000.

The vast sums of capital required for the restoration of agriculture can be secured if the country will do for the farmers just what it has already done for the railroads, that is provide for a larger income for agriculture. Undoubtedly a hard problem but no more unsolvable than was that of the railroads. The whole consuming world must realize that it must pay more for food or eventually get much less food than it needs. For years agriculture has been conducted at a loss. To supply the products required to feed and clothe his fellow citizens the American farmer has donated his labor and sacrificed his capital. The end of this situation is just in sight. Even if he would do so the farmer is no longer able to feed the country without a fair wage for his labor and a just return on his capital.

Failing to realize the deep distress of agriculture and to recognize that condition as menace to the republic congress has devoted its time to jangling and ineffective discussions of proposals that at least are mere pollicies that might allay some of the symptoms or agrarian maladies but would be wholly without value as specifics. It is not a pollicie or an anodyne that farming must have but a cure of the deep seated ills from which it has suffered for two generations.

Agricultural relief requires in the first place the creation of an adequately capitalized national financial institution with authority and power to make loans to farmers through their own co-operative associations both for operating and marketing purposes, to rediscount agricultural paper properly secured, to sell such rediscounted paper to the investing public, and in emergencies

to issue circulating notes based on farmers' paper of sound value. Such an institution must be so constituted and conducted that its benefits can be felt as he may be reached through effective organization. It should operate on the principle that nothing can be done for the individual farmer except as he may be reached through effective organization. Help extended to individuals no matter how much disguised is charity with all its pauperizing results that end in helpless dependency rather than in self respecting independence.

The capital for a federal finance corporation for agriculture need not be voted by congress as a subsidy. The federal government already has adequate funds in trust for this purpose. There is the profits of the United States Grain Corporation, the War Finance Corporation, and the Intermediate Credit department of the Federal Farm Loan Banks which combined are not much if any less than \$300,000,000 in amount. These institutions should all be merged and the profits they have made should be used for the benefit of agriculture because such profits were derived from operations based on the necessities of agriculture.

The timid and the selfish of our non-agricultural population say that such an organization would inevitably increase the cost of living to all classes. True of course and it would be useless if such a result did not follow. Congress did not refuse to stabilize the transportation industry and increase the cost of living to a far greater degree than would be involved in the stabilization of agriculture. The farming business must have more income is possible only through the control of finance and marketing by the farmers themselves.

### TAX REFORM VITAL

It is well to use all possible means to reduce tax rates. Under our Kansas system of raising revenues all increases in taxes fall with crushing weight on tangible property which with us means farms, farm products and farm equipment. Naturally the farmers protest against higher rates on higher valuation since each is certain to increase his operating expenses and reduce his income. There is, however, no chance at all to reduce the total amount of public expenditures. On the contrary public budgets will grow as the years come and go with their new demands on the government of the nation, the state and the municipalities for increased or new services.

The urgent tax problem that must be dealt with by the Kansas legislature is not the reduction of public expenses. That cannot be done for the state and the legislature has no power to curtail the budgets of the counties, cities, township and school districts. What we must do is to tap new sources of public revenue that will take some of the load from the farms. We have made a start with the excise on intangibles and the gasoline tax. By this last we have provided together with a mobile licenses, an adequate annual income for highway construction and upkeep. In that matter it remains only to repeal the unjust benefit district law and provide for some workable plan for using the funds now available for roads.

Kansas has kept the direct property tax as its chief source of income for too long. The next legislature should provide for an excise on production from natural resources, a moderate tax on all net incomes in excess of \$500 a year, a reasonably high and all inclusive inheritance tax, and if necessary an occupation tax. It is possible to raise all the income needed for state purposes without any property tax. Justice to agriculture demands that these easily reached sources of revenue should be utilized but nothing will be done unless a majority of the house of representatives reflect the wishes and needs of the men and women who work the farms of Kansas. To get tax reform that will relieve agriculture the right men must be persuaded to file for legislative nominations, and then regardless of party ties such men must be nominated in August and elected in November.

Every farmer in Kansas should become a student of taxation. Unless the ballot is used by men and women who comprehend the nature of taxation and the real purposes of government this is not likely to be a free country very much longer.

### WHO FOR THE LEGISLATURE?

In a few days all fillings for public office in Kansas for the two years beginning next January will be made. Unless the name of men you can trust are on the primary ballot no officers in whom you place any confidence will be elected next November. Tax reform and road legislation will be the two big things to be considered by the coming session of the legislature. Farmers are vitally interested in each of these issues and our interests will be ignored or sacrificed unless we are represented at Topeka by men of character, ability and courage.

Perhaps the man who should serve your district in the Kansas House of Representatives cannot spare the time and money required for such duties. It is unfortunate that our legislators must pay out of their pockets a good share of the expense of attending to their duties. To get the right man the farmers of any district may very well pledge themselves to see that the farm work of the member is carried on in his absence and that his personal interests are not sacrificed for the public good.

Get busy in the right way and get the right names on the primary ballot.

### UNDERSTAND YOUR OWN PROBLEMS

In another column of this paper there is an article under the heading of "Relief for Agriculture." Many will not read it because it is so long. Many who do wade through it will fail to understand its meanings and implications. In spite of its length that editorial should be read and studied intently, analytically, and critically by every member of our organization in Kansas.

If the reader does not understand what the editor is driving at he should re-read until he gets the light. He should discuss the matter with his neighbors. He should ask for the consideration of this problem by his local and should insist that this article be read and analyzed in a meeting of his organization.

It is only through the knowledge that strength, confidence and courage can be acquired. Get more knowledge and begin by mastering the idea that is the basis of the long editorial that we are asking you to read.

### Elections

#### Are Seldom Quite

As conclusive as the returns indicate. Pennsylvania has just had a very hotly contested primary. For some months Senator Pepper, Governor Pinchot and Congressman Vane campaigned the state for support. The senator stands for President Coolidge, the enforcement of all laws, and for administration on old fashioned and conservative republican principles. The governor appealed to the progressive elements of his party, demanded the strict enforcement of the prohibitory laws and pledged himself to a loyal support of the Coolidge administration and policies. The congressman boldly demanded the modification if not the repeal of the prohibitory laws and also promised his support to the president.

When the votes were all counted it was found that Congressman Vane led Senator Pepper by about 100,000 votes who was about the same number ahead of Governor Pinchot. Whereupon the anti-prohibitionists claimed a great victory. Was their success as great as they acclaim it or even as euphoric. Why not write and indicate? True, they nominated a wet candidate and in the November election will elect a senator who will work and vote for modification of the Volstead Act and the repeal of the Eighteenth Amendment, but after all Vane is a minority choice. The combined opposition in his own party exceeded his vote by more than 200,000 and it is fair to assume that the dry democrats of Pennsylvania are at least as numerous as their wet brethren.

The real truth appears to be that in Pennsylvania one of the wettest states in the country, the dries still appear to have very much the best of the situation.

Every state in the middle west would be enriched by the recognition of corn sugar as the equal of beet and cane sugar. Why not write your congressmen and senators about this matter?

### Pinchot

#### Made a Gallant Fight

For the republican nomination for the Pennsylvania senatorship but he must have known from the first that he was waging a hopeless battle. His administration as governor has been honest economical and efficient. In the face of tremendous opposition he has managed to carry many of his policies into effect. In fact, however, his administration has not been the kind that his state likes and he is not the type of man who can retain the support of an organized political party.

The party insurgent may win an occasional victory either in person or by forcing his policies down the throats of the regulars but in the long run the organized party machine will reassert itself and unhorse any revolter who occasionally triumphs at the polls or in the councils of a party platform committee. If this were not true there would soon be an end to organized political parties.

No one in Pennsylvania or in the country doubts or denies the ability and integrity of Governor Pinchot. He has been a long time in public life and always more or less of a dissenter from the views and policies of the leader of his party. He has been tremendously useful as a citizen and as an official but from the very nature of our political system it has always been difficult, almost impossible for such a man to be elected often to any important office.

Pinchot, like many others as illustrious and patriotic may never achieve his highest ambitions but his services have made an enduring place for him in the hearts of that much misused body of our citizenship, the plain people of the United States.

As wheat prospects brighten in the fields the price declines in the market centers. The traders know that 80 per cent of the crop will be sold from the machine and are preparing to reap the only profitable harvest that will result from a bumper crop.

Farmers More Than Ever Before Should now realize that they must organize to get themselves out of the

### A ONE-SIDED GAME

The farmer is the man who works, his back is bent with toil. From caring for the calves and pigs and cultivating the soil. While the financier on Wall Street, is sitting in the shade.

He is the fellow that has got, the chink the farmer made. The farmer goes into the store, and gets some things to eat. He also gets a pair of shoes to put upon his feet.

For wife and baby, gets a dress and I don't know just what; Who is it then that names the price, the farmer? I guess not.

He then around the corner goes, into the hardware store, To get a cultivator, disc, a plow, a rake, a mower.

He makes a very careful choice, for they the best must be, Who is it then that names the price, the farmer? No, not he.

The farmer needs a little cash, to fix the wagon bed, He's got some hogs there in the pen, but they are not yet fat.

And so he goes into the bank and borrows two or three, Who is it then that names the interest rate, the farmer? No, not he.

And when the hogs are fat and sleek and the corn has all been fed, Then up the chute he drives them, into the wagon bed.

And off to market with them goes, he soon the weight will see, Who is it here that names the price, the farmer? No, not he.

But ere the farmer leaves the town,

difficulties that now surround and hamper them through no fault of their own. The Haugen Bill may have been a workable measure containing possibilities of relief but it is dead at least for the present. Whether it is ever again revived depends on two things—first, whether in its closing hours congress enacts some acceptable measure based on a member of the Aswell and Tinchner proposals, and second, whether during the next year or two conditions become more tolerable for agriculture in the northwest and middle west.

It was the cry of "subsidy" that killed the measure proposed by the corn belt committee. The other business of the country united to prevent agriculture from receiving benefits which they held were in effect, a treasury subsidy to a single class. There was very little substance to the subsidy charge but it worked to build an opposition that could not be overcome, even in the face of the undoubtedly desperate situation of the farmers.

What next will be proposed no man can foretell but it is certain that something must be done and quickly if farming by independent, home owning Americans is to be preserved as one of the major business interests of this republic and more and more it becomes evident that what ever is done must be by the farmers themselves. Organization, education and co-operation may yet save American Agriculture and the republic itself from irrevocable disaster.

A Texas farmer is reported to have made \$40,000,000 during the past five years and the rumor is well supported by facts. Oil wells have been drilled on his land.

### Kansas City

#### Is In Some Turmoil

Over the working of the manager system of government that went into effect there in April. The business manager, an old time democratic politician, has just submitted his first budget to the city council which is made up of five democrats and four republicans. The democrats appear to be well satisfied with the estimate but the republican minority insists that the so-called budget is nothing more than an appropriation ordinance that provides lump sums for each of the seventeen departments of the city government under the new charter.

As it requires two-thirds of the members of the council to approve the budget it is perfectly plain that Kansas City will see a lot of politics played in its non-partisan council before the appropriations for next year are made. The democratic manager and five members of the council will be forced to make it worth while for at least one of the four republicans to be a good fellow. There will be a short dead lock but in the end at least one republican will see the light and the budget will be approved.

One man government for cities is an experiment without much present promise of success.

Hogs reached the highest price on the Kansas City market one day last week that has been paid for six years. For the last two years farmers have been curtailing their pig crop and increasing their corn acreage. Something besides markets is necessary for profitable farming.

### Corn

#### Farmers of the West

See some small hope of better times in proposal now pending in congress to put corn sugar on an equality as a food with the products made from cane and sugar beets. Under existing laws corn sugar is outlawed. All canners and packers who are using it must say so on the labels of their goods. This is required by the federal pure food laws and virtually means that the government recognizes corn sugar only as an adulterant to be used with due warning to consumers.

Our scientists and dieticians tell us that corn sugar is a pure and wholesome sweet that is entitled to be recognized as the equal of beet or cane sugar, especially as a preservative. If congress amends the pure food act to permit the use of corn sugar for at least a billion bushels of corn will be developed within the next five years.

he heaves a little sigh, He'll raise his hand and scratch his crown, at someone winks his eye, Then in the Cafe he will step and call for eats and drink.

Who is here that names the price, the farmer? I don't think.

This is our great and glorious land, land of the noble free, Where all shall have an equal right, but the farmer where is he?

What ere he has to sell or buy he's humble as a pup. The other fellow names the price and the farmer digs it up.

The Farmers plough their ground on time, and plant the rows so true, And cultivate most every day, the whole long summer thru.

And then away they haul their corn, to market with the mules, If the farmers want to name the price, they are called a set of fools.

If the other fellow names the price on the flour that we eat, Why not let the farmer name, the price upon the wheat?

If they must set the price, upon the coat and shoe and glove, Why not the farmer name the price of the stuff they make them of?

Why is it so one-sided, here in this glorious nation? I'll tell you, brother Farmers, it's just their organization.

The merchants they are organized, the bankers they are too, And even to the little boy that blacks the boot and shoe.

Oh, yes, there's organization, just every where to go, From the Financiers, on Wall Street, clear down to the hobo.

That would go far towards the profitable disposition of a surplus product for which the domestic market varies with numbers of meat animals fed for the markets and for which there is no present or probable future export demand.

The beet and cane growers will do every thing possible to prevent the recognition of corn sugar as an equal of their own products. It might be well for corn growers to write their congressmen and senators about this extremely important matter. We are now making 400,000 pounds of corn sugar every day. That output should be increased to at least 4,000,000 pounds daily if corn growing is to be profitable.

There will be no immediate reduction of armaments internationally otherwise. France and a half dozen other European countries say that they cannot be safe without armies or navies or both. What most nations are wholly unable to see is that if a nation was armed none would be in danger.

### Kansas

#### Has Embarked

On one policy that should receive the support of all the people, the restoration, so far as possible, of the once abundant wild life of this state. Many of the animals and birds that once forested in our woods and on our prairies are gone never to return. There is no place in a thickly settled farming country for wild ruminants such as the buffalo, the deer and the antelope. Deer will remain and probably in increasing numbers in arid states that have large areas of timber and hills but Americans of the future will be able to see the antelope and the bison only in parks and guarded and fenced preserves.

There are thousands of square miles of Kansas lands that should be connected into lakes or forested over as wild life preserves. This can be done gradually and at small cost. The state conservation commission made a good start a few days ago when it accepted lake sites in Crawford and Sabetha counties. Each location will provide a water all of more than 160 acres and leave considerable ground for trees.

If the law does not provide that no bird, except migratory wild fowl, shall ever be killed on a state preserve it should be amended by the next session of the legislature to include such a prohibition.

The lake location already adopted are a mere beginning. More will be added from time to time but this great work should be shared between the commonwealth and the lovers of wild life. Thousands of farmers have good places for permanent ponds. Near hundreds of towns and cities are locations that could be secured and improved by co-operative organization of sportsmen.

If the folk of Kansas will do their part mother nature will meet them more than half way. Birds, fishes and trees grow rapidly in nature and size if they are half way encouraged and protected.

A group of Arkansas strawberry growers would have had a car load of their crop stolen from them one day last week if the Jobbing Association had not been on the job. But farmers have their own agencies on all the commission markets they are certain to be looted. Organization for marketing is an essential to agricultural prosperity.

The Kansas State Chamber of Commerce is about to call a special session of the legislature to submit a good roads amendment to the voters this fall. Suppose he does, will the Chamber of Commerce guarantee the submission of such an amendment on its approval at the polls?

The railroads are now worrying over a shortage of cars for moving the Kansas wheat crop. The banks are worrying over the money necessary to move the crops. The farmers are getting ready for their big sugar wheat harvest. All these worries would vanish if the farmers were organized to market their wheat in an orderly way.

But did you ever think of it, just go and look about.

You'll see where e'er they've organized, they've left the Farmer out.

Now if the little boot blacks, that black the boot and shoe, Can have an organization, why can't we Farmers, too?

Our hands are worn and blistered, for they have stood the test, But it does surely seem to me, our brains have been at rest.

Come, brother Farmer, let's wake up and give ourself a test, And while our brains are working, our hands may get a rest.

And when we've got it over, I'll tell you what we'll do, We'll all of us go down and join the F. E. & C. U.

—From Uncle Dorns "Little Helper"

Very Likely In days of old when knights were bold, their tin pants must have been quite cold.

Both of Them Finding a horseshoe or doing a little extra work at night are both considered signs of good luck.

### Proof

"Did you behave in church?" "Course I did," said Billy. "I heard the lady back of us say she never saw a child behave so."

Mind Toot of the Tooter He heard the toot but tried to scoot And beat the choo-choo to it. The poor galoot now twangs a flute, Take heed and don't you do it.

Buck Up It isn't very pleasant not to win.

Please ship me two more 30x3 1/2 Farco Cord Tires at price quoted. I am glad to tell you I have one of your Farco Cord Casings on the rear wheel of my Ford Sedan that has now run 18,000 miles. When it has run 20,000 miles I am going to make you a present of it.

CLOY HODGES,  
112 N. Hancock, Colorado Springs, Colo.

I have Farco Cord Tires on my truck carrying mail that I put on six months ago. I have given them hard use and they look about as good as new. I still have the same air in them and never had a puncture. I never used better Tires and Inner Tubes than you sell. My Truck is most always carrying a load.

P. E. PETERSON,  
915 University, Salina, Kansas.

### Save on Touring and Camping Needs

### Fold Down Luggage Carrier

Closes completely along edge of running board, no holes, car door opens over it, 47 inches long, constructed of angle iron steel, complete, special.

**\$1.19**

### Military Luggage Carrier

Adjustable length from 27 inches to 5 feet, well constructed of angle iron steel, very strong and durable, special price.

**99c**

We do not think there is any better Tire made, regardless of price, that will give more mileage at less cost than FARCO CORD TIRES under the same conditions. Why should you pay 40% more money for Tires.

All we ask you to do is to try our Tires along side any advertised Tire built. Put them on your car side by side, then you will be satisfied. A dollar saved is a dollar earned.

Let's have your order.

### Let's Use Good Judgment

Look over your car today and see just what you will need in the near future then send us your order. Look these Tires over carefully when you get them. If they are not absolutely satisfactory, return them to us. We will pay carrying charges both ways and refund your money.

If you wait until your Tires blow out, you will have to buy some cheap and inferior Tire at the first Garage and pay more money without a mileage guarantee.

### Thousands in Use

We have thousands of people now using our Tires. We have printed a few of the many letters which we have received from our customers telling how satisfactory Farco Tires are.

### Important Accessories at Less

## The Country Woman

### HOME HINTS

By Aunt Maggie of K. S. A. C.  
It's Time to Store Woolens  
Summer, after playing hide and seek with Spring for several weeks, seems to have decided to stay in Kansas for a while. Unless she changes her mind again, we may feel safe in storing our winter coats, dresses, furs, and blankets.

In order to outwit the moth, which homesteads and lays its eggs in such dark places as pockets, seams, folds, insides of cuffs, and other concealed parts of clothing, see that your garments are dry and clean before you put them away.

Choose a sunny, windy day for storing winter clothes. Blankets, furs, and wearing apparel should be hung out in the air for several hours. Be sure that the garments to be stored are dry and clean, and that dirt and grease spots are removed. All garments should be brushed thoroughly, so that lapels, pockets, spaces under collars, and so forth may not harbor eggs.

When a garment is prepared for storing, see that it is wrapped in such a way that moths cannot penetrate the covering. Cedar chests, tar paper bags, and ordinary newspapers are suitable protection, and mothballs scattered through the clothing give additional protection.

If you wrap your garments in newspapers, be sure that the papers have no torn places in them. Woolens should be stored as nearly airtight as possible. When each bundle is ready for storing, label it.

### A WEEKLY HINT FOR THE HOUSEWIFE

Use Eggs When They Are Cheap  
The time of year is approaching when the price of eggs starts downward. When eggs are cheap they should be one of the staple foods in every household.

For children, eggs are much better than meat," says Mary A. Dolve, extension specialist in foods and nutrition at South Dakota State College.

To substantiate this opinion she points out that the protein in eggs is in a very easily digested form. The fat found in the yolk is in an emulsified form, similar to the fat in milk and is easily digested. Eggs are also rich in minerals needed by the body and contain the vitamins which control health and growth.

In serving eggs, care should be taken that they are cooked in an easily digested manner. Miss Dolve suggests the following recipes as possible ways of serving them.

#### Shirred Eggs

Line buttered individual molds with buttered and seasoned crumbs. Break an egg into each mold, season. Cover with buttered crumbs. Bake in pan of water until white is well set.

#### Goldenrod Eggs

Two hard cooked eggs, 2 tablespoons flour, pepper, salt, 1 tablespoon butter, 1-4 cup milk, 3 slices toast or crackers.

Separate the yolk and white of the cooked eggs, and chop the whites. Make a white sauce of flour, seasoning, butter and milk. Add the chopped egg whites to the sauce and pour over the toast. Press the yolks through a strainer or crush them with a fork and sprinkle them over the top of the toast. Serve at once.

Potatoes may be kept in good condition for late planting by rearing or sun-sprouting.

### USE POISONS TO CONTROL INSECTS

"The sooner folks forget about most of the home remedies and get down to scientific facts about garden insects and control measures, the better it will be for both themselves and their gardens."

The foregoing statement is made by A. L. Ford, extension entomologist at South Dakota State College, in reply to a question as to the practicability of certain home controls for garden insects.

"People are planting everything from nasturtiums to moth balls in cucumber hills to keep the striped cucumber beetle away," he says. "Seeds of various kinds are treated with sulphur, kerosene, creosote dip, tar and many other substances to keep away the pestiferous cut worm. Tons upon tons of ashes, both coal and wood, are used on South Dakota gardens each year to keep insects from eating the foliage of plants. There are many other such practices still in vogue.

According to Ford, in order to obtain satisfactory results in garden insect control, one must determine the correct spray or dust to be used. He points out that all insects feed in one or two ways. There are biting insects on one hand and suckers on the other; each group requires a separate and distinct method of attack. Arsenate of lead and black leaf 40, a nicotine contact spray, are two materials which, when properly applied, will control nine-tenths of the bugs that cause trouble.

"For biting insects, lead arsenate can be used in one or two ways, either as a spray or as a dust," he says. "As a spray, use one ounce of the powder to each gallon of water," he advises.

Mix the lead arsenate into a paste with a small amount of water before putting into the full amount of spray solution. If soft water is used for the spray solution and a small amount of ordinary laundry soap is added to the spray, it will spread and stick to the plants better.

"If a garden sprayer is not available, lead arsenate should be used as a dust. Mix the powdered lead arsenate with twelve parts of fine flour, air-slacked lime or even fine road dust and shake this mixture on the infested plants through a cheese cloth bag, consisting of two thicknesses of cloth. If the dusting is done early in the morning when the dew is on the plants, it will stick better.

"In combatting plant lice, mix black leaf 40 at the rate of one and one-half teaspoonsful to each gallon of water. Use soft water and add soap as a spreader and stickier. This spray must actually hit the bugs to kill them."

Ford declares that striped cucumber beetles and cut worms cannot be controlled effectively with lead arsenate. The cucumber beetles attack cucumber plants when they are so small that poisons are not effective simply because there is not enough surface on which to spray or dust. If the hills of cucumbers are tented with cheese cloth until the plants have three or four pairs of leaves, control is easily possible with lead arsenate dust. Cucumber hills can be tented by sticking a wire or four sticks into the ground around the hill. These are then covered with a piece of cheese cloth and dirt is hoed on that part of the cloth which lies on the ground to keep it in place. The tents should be left on until the plants are crowding.

Cutworms are controlled with bran mash. This mash is made as follows: Mix one level tablespoonful of Paris Green through each quart of wheat

5441. Ladies' Dress

Cut in 6 Sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. A 38 inch size requires 2 1/2 yards of 54 inch material. The width of the dress at the lower edge is 2 1/2 yards, with plaits extended. Price 15c.

5310. Ladies' Dress

Cut in 6 Sizes: 34, 36, 38, 40, 42, 44, 46, 48 and 50 inches bust measure. A 38 inch size made as in the large view will require 3 yards of figured material and 1 1/2 yard of plain. The width of the skirt at the lower edge is 2 1/2 yards with plaits extended. Price 15c.

### FASHION BOOK NOTICE

Send 12c in silver or stamps for our Up-to-Date Spring-Summer 1926 Book of Fashions, showing color plate, and containing 500 designs of ladies, misses and children's patterns, a concise and comprehensive article on dressmaking, also some points for the needle (illustrating 30 of the various, simple stitches) all valuable hints to the home dressmaker.—Address Pattern Department, Kansas Union Farmer, Salina, Kansas.

bran while dry. Two quarts of bran will take up one quart of liquid to make a mash of the proper consistency. This quart of liquid should contain about one-quarter of a pint of molasses. Add the liquid slowly to the dry bran and mix vigorously until all the bran is thoroughly wet.

Put this bait out only late in the evening as cut worms work only at night. If they are cutting cabbage or tomato plants, place a teaspoonful of the mash at the base of each plant. If the pest is working on all parts of the garden, it should be broadcast. If young chicks have the run of the garden they should be put up before using this poisoned bait.

### MORE WHEAT PER ACRE

"Even though Kansas has become famous for its wonderful winter wheat and stands at the top of the list in its production, the quality and yield per acre is not what it should be," says H. M. Bainer, Director of the Southwestern Wheat Improvement Association. Continuing he says, "A large part of Kansas has a soil and climate that is especially suitable for wheat, but even in the face of this natural fitness, the average yield is only 13 1/2 bushels per acre, which is from 3 to 5 bushels less than it should be.

"Kansas does not need more acres to wheat but more wheat per acre. Wheat must continue to be its leading crop and in order to insure satisfactory profits it is absolutely necessary to make such changes in production methods as will insure higher yields per acre and a better quality of product."

"While the Kansas wheat farmer

### KANSAS UNION FARMER WEEKLY EXCHANGE

If members of the Union have anything to Sell or Exchange, they should advertise it in this department. Rate: 3 cents a word per issue. Count words in headings, as "For Sale," or "Wanted to Buy," and each initial or figure in the address. Compound words count as two words. CASH MUST ACCOMPANY ORDER—TRY THIS DEPARTMENT—IT WILL PAY YOU.

#### POULTRY

CO-OPERATIVE CHICKS — HIGHEST quality, 9c up. Prepaid, live delivery. Write for prices. Co-operative Hatchery, Chillicothe, Mo.

SHINN CHICKS ARE BETTER. Leading breeds, \$8.40 per 100. Free book. Shinn Farms, Box 153, Greentop, Missouri.

#### SEPARATOR FOR SALE

For sale—at a bargain \$3.40 Russell Separator in good shape—Henry Miller, Jr., Downs, Kansas.

does not have any control over climatic conditions, he is directly responsible for yield as far as cultural methods and kind of seed used is concerned. There is very little difference between the cost of early preparation and late preparation, but the early preparation will produce from 2 to 7 bushels more wheat per acre. It costs no more to raise wheat in rotation, occasionally with a leucine, than it does to grow the crop continuously and a good rotation will increase the yield several bushels per acre. To include summer fallow in a rotation, especially in western Kansas, will often double the yield. Good seed costs very little more than poor seed but it insures more bushels per acre. Treating seed wheat for smut may cost a few cents more per acre in yield and quality. Kansas soils need more organic matter, therefore all straw, stubble, stalks, trash or weeds should be plowed under rather than burned."

A sand-pile is ideal for keeping the youngsters entertained and out of mischief.

200 RATS KILLED  
New Method Quickly Did the Work After Dog Traps and Poison Failed  
"Was overrun with rats," writes H. Stenfort, Route 10, Detroit, Mich. "Saw ferret traps and poison failed. Tried Imperial Rat. Found rat skeletons all over the farm."

This new, scientific method of killing brown rats, mice and gophers, is harmless to animals, poultry or humans. Easily spread and greedily eaten on bait. Pests die outside. No odor or annoyance. Indorsed by Farm Bureau Experts.  
Don't trifle with these expensive pests. The average farm building group, chicken house, elevator, warehouse, etc., has many more rats or mice than the cost of a dinner is aware of, and the rats herd together in separate groups or families.  
You can now rid your entire premises of these filthy pests, easily and quickly, without delay or risking a cent, as the makers are making a special introductory offer of an extra large 3.00 Farm Size bottle of Imperial Rat Killer, for only a dollar and a half, on 15 days' trial.  
Send no money—just your name and address to Imperial Laboratories, Inc., Farm Service Dept. D-585, Coca Cola Bldg., Kansas City, Mo., and shipment will be made at once. Use it freely on their money-back guarantee that it will quickly do the work, or this trial will cost you nothing. This offer is fully guaranteed, so write today.

BOOKS THAT TELL  
"How to Make Things"  
Popular Mechanics books each contain dozens of practical plans for things you can easily make yourself—clearly explained and profusely illustrated. These books have not only been written by practical men, each successful in his line, but they have been tested by thousands of customers who have had success with them. That, after all, is the best assurance that you, too, may benefit from their use. Select those titles that interest you from the following list:  
A Practical Course in Mechanical Drawing  
Good Working Plans for Amateur Craftsmen  
Metal Work and Etching  
Wood Working for Amateurs  
Mission Furniture Part 1  
Mission Furniture Part 2  
Pattern Making  
Rustic Furniture  
Art-Crafts Lamps  
Lamps and Shades in Metal and Art Glass  
Take Your Choice 98c EACH  
No matter what your age, or what your interests, some of these books will be a profit to you. They are written so you can understand them. They are of special interest to women and girls. The price is unusually low—98c. Order several at once.

RESOLUTIONS OF SYMPATHY  
Since death has taken from us our esteemed Brother, Charles Becker, we of North Star Local Union No. 610, desire to extend to his loved ones our sincere sympathy.

W. F. Clark,  
Wm. P. Schneider,  
C. N. Schiller,  
Committee.

RESOLUTIONS OF SYMPATHY  
Whereas it has pleased our Heavenly Father to remove from this life Theodore, son of Brother and Sister Edd Price; We, the members of Cook Local No. 1645 extend to the bereaved family our heartfelt sympathy in this hour of sorrow.

Be it further resolved that a copy be sent to the bereaved family, and one to the Kansas Union Farmer.

Mr. Alvin Ashwell,  
Mrs. A. S. Lee.
