ACCIDENT BRINGS OUT FRIENDS
First Norma Sharp, Riley, in a hospital in Kansas City
her legs paralyzed. Due to her critical
dition her husband, Bill, has been in Kansas
y much of the time, and the farm has been
er the eye of Ed and Louise Sharp, Bill's
ents, and C.T. and Evelyn Stillwagon, Abilene,
rma's folks. Just last week Norma was moved
Salina and her condition is improving, Ed
d.

With the farm work lagging, neighbors
ched in and helped the Sharp's with harvest.
one time or another there were nine combines
itting on the 150 acres of wheat. It took about
ee days to finish up what might have taken
several weeks. "You find out just how
ny friends you have when an accident
pens," Ed Sharp added.

Horse Population In U.S. Climbing

Horses are making a big come back after dipping to a historic low a decade ago. An unofficial hoof count by the USDA, emphasized as conservative, shows the increase.

Unofficial counts put the horse herd at least twice as large as a dozen years ago and still growing.

The department has not estimated the population of horses and mules since 1960 when the total dropped to around three million head, compared with a high of more than 25.7 million on farms in 1920.

However, last year's outbreaks of Venezuelan equine encephalomyelitis or VEE in Texas threatened to spread the deadly form of sleeping sickness throughout the country.

Massive vaccination efforts headed off a catastrophe and the disease was confined mostly to Southern Texas. The outbreak — still considered a threat this year — caused government statisticians to look again at the horse count.

Based on last year's field surveys, the department now estimates the nation's equine population — in-

cluding horses, donkeys and mules — at nearly 5.9 million.

Horse industry people say there may be as many as 10 million in the United States, most of them used for pleasure riding. Half a century ago, when the horse and mule peak was recorded, most of the animals were work stock.

There is another reason why USDA officials are interested in the growth of the horse population. That is the amount of feed horses consume which otherwise might be used to produce livestock for human food.

Each acre used to produce grain, hay and grazing for horses means less available for cattle and hogs, for example.

When horses and mules reached their population peaks during World War I and a few years later, the nation's farmers were harvesting around 350 million crop acres annually, far more than the 302 million last year.

But in the 1920 era, according to USDA records, around 90 million

acres were required simply to feed all the horses and mules.

By 1960 farmers were harvesting about 324 million acres, with only about five million acres needed to feed the estimated three million or so horses.

The crop-land requirement today for horses — considering the range of estimates from 5.9 million to 10 million head — is anybody's guess but may be around 10 million acres or so.

You're Depending on Him.
You Both Can Depend on

The Cooper CALF CREEP PROGRAM

You've a lot tied up in him. Money, sweat, patience, worry. For you to collect on your investment, he has to gain quickly and stay healthy. And these things must be done at reasonable cost. We believe the COOPER CALF CREEP PROGRAM can help you reach those goals.

STEP 1 • STARTING PERIOD

CALF CREEP (14%)

Feed From Few Weeks
Till 2½ Mos.

Advantages:

- Calves weighing up to 100 lbs. more at weaning
- Better finish—Grade higher in quality
- Calves can go on full feed sooner—require shorter time in feedlot

STEP 2

CALF CREEP B (12%)

Feed From 2½ Mos. to 5 Mos.
Or Are Eating 4 Lbs. Per Head Per Day

Advantages:

- Builds uniform, rugged calves that will stand stress of shipping and perform well in feedlot
- Market maximum pounds of calf
- Helps digestive systems develop and function for peak range performance
- Puts pounds on when gains go on the cheapest

STEP 3

CALF CREEP C (12%) Self Restricting

Feed Till Calves Are Weaned

Advantages:

- Maintains optimum growth, but keeps calves from getting overly fat
- Contains all necessary nutrients

All Above Calf Creep Feeds Contain Antibiotics

THE COOPER CALF CREEP PROGRAM
YOU CAN DEPEND ON IT.

Clyde Native Ranks High As Soils Specialist

A United States Department of Agriculture scientist stationed at Kansas State University, is one of 14 agricultural engineers named fellows of the American Society of Agricultural Engineers at the society's annual meeting in Hot Springs, Ark.

He is Neil Woodruff, a native of Clyde, who is research investigations leader for soil erosion investigations and scientist in charge of the Agricultural Research Service's Soil and Water Conservation Research Division Wind Erosion Research Laboratory at KSU.

Woodruff, who directs a staff of 11, including 6 professional scientists or engineers, approves all proposed research and reports of findings, as well as carrying on a program of personal research.

Technically, Woodruff has responsibility for soil erosion investigations in Kansas, Oklahoma, Texas, and New Mexico, and reviews the programs and makes recommendations for new investigations.

Woodruff has been associated with the Wind Erosion Laboratory and the Agricultural Research Service since he received his bachelor's degree in agricultural engineering at KSU 23 years ago. He had special training in engineering similitude, meteorology, and fluid mechanics at Iowa State University in 1959-1960.

Extremely active in ASAE affairs, he has served as a member and chairman of the Soil and Water division committees for many years and has just completed a two-year term as Soil and Water Division technical director for the Society.

He also is a member of the American Society of Agronomy, Soil Conservation Society of America, and two honoraries, Gamma Sigma Delta and Sigma Xi.

During his career Woodruff has been author or co-author of more than 75 publications — most on wind erosion and dust storms.

A LOT OF FRIENDS

When people need help there are few farm communities who won't give a neighbor a hand. There was a lot of harvest help for the Bill Sharp family, Riley, after a serious car accident put Norma, Bill's wife, in the hospital with paralyzed legs. Not all of those who helped are pictured but Ed and Louise Sharp, Bill's parents, made a list of those helping and gave a big thanks. The combine crew consisted of Warren Sylvester, Lyle Pfaff, Gary Sylvester, Merlin Potts, Roger Potts, Don Ressler, Herman Sylvester, Chuck Stillwagon, David Sharp, Phil Parry, Jack Jahnke, Dick Renz, Wayne Sharp, Maurice Sharp, Everett Heikes, Curtis Swart, Warren Walters, Rick Walters, Richard Strauss, Ed Copeland, and of course Ed Sharp and C.T. Stillwagon. Louise Sharp had the help of Justine Sylvester, Zola Sylvester, Ruby Sylvester, Marlaine Potts, and Myrna Parry on the cook crew.

To be
twice as big
you'll need
four times
as much
money.

Where's it coming from?

Now, who's likely to have that kind of money? It will probably come from someone who knows the kind of credit a farmer or rancher really needs. Someone like your local Production Credit Association. They make loans to agriculture exclusively.

When you want operating capital, these guys will give you the go ahead. They're not philanthropic, they merely understand your needs.

PCA has offices all over the country staffed with experienced agriculturists. They do more than make loans to farmers and ranchers. They act as a clearing house for crop, stock and marketing know-how. They provide a variety of services including financial counseling, agricultural consulting and practical listening. So, if you want to enlarge your operation; improve your farm or ranch; buy equipment, appliances, seed, feed, fertilizer, stock, poultry; pay doctor bills; or send a son to college; establish a line of credit with your Production Credit Association. Use your earning power as collateral.

Since you'll need four times as much money to be twice as big, stop by your local Production Credit Association office and discuss your plans with your PCA planner. You'll find him cooperative and helpful whether you want a loan, advice or an understanding ear.

Aussies Change Tune With Meat Import Curb Up

With the US beef import curbs dropped the Australian meat exporters, who were seeking bigger quotas in the US market have changed their tune and are now saying the United States will get more meat only if it is willing to pay more for it.

The demand for meat in the U.S. and Europe is high and Australia has ample supplies.

Nixon lifted quota restrictions to slow price increases. In Europe the Common Market has dropped its 20 per cent tariff barrier on beef imports.

An Australian meat exporter said last week: "As long as there was a quota there was pressure to fill it." He added "once the quota is lifted we are operating in a normal supply-and-demand system where price is the ruling factor."

Australia's quota for export to the U.S. in 1972 was 600.4 million pounds out of total American imports of 1240 million pounds. The quota is worth \$320 million (U.S.) to Australia. Packers and exporters, backed by the Australian government, won an

increase from 560.3 million pounds quota in 1971 over opposition from American producers. Australia could not fill the quota in 1971 because of American longshoremen's strikes and currency exchange delays.

Prime Minister William McMahon, in welcoming President Nixon's removal of quotas, said Australia would have no difficulty in filling its quota in 1972 and also in supplying increased quantities.

But government and export company spokesmen could give no firm figure of how much extra meat would be shipped. One exporter pointed out American prices dropped 1½ to 2 cents a pound after the President's announcement. Better prices were offered in other markets, particularly Europe, he said, adding the amount sent to the United States above quota depended on price paid.

Australian exporters now are busy filling extra orders from Britain, which has always been a traditional market for Australian meat. Australian meat will meet the shortage caused by Britain by its exports to Common Market countries.

One exporter said European prices were so high that an air freighter flew about 100 tons of chilled Australian beef to Sweden at a profit.

Farm Price Support Bill Held Same By Fancy Vote Switch

By a bit of fancy vote-changing, the \$55,000 limitation to an individual for payment of farm price supports was retained as the House of Representatives defeated an effort to set the limit at \$20,000.

According to Rep. Keith Sebelius, R-Kan., the roll call vote on the limiting amendment ended in a 191-191 tie. Rep. James H. Scheuer, D-N.Y., then switched his vote from no to yes and Rep. Andrew Jacobs D-Ind., changed his vote from yet to present, defeating the \$20,000 limitation by a 192-189 vote and retaining the \$55,000 limitation.

On another issue, Sebelius expressed pleasure that the House voted by a 199-180 vote in the House appropriations bill to prohibit the use of food stamps by strikers. He has expressed the opinion that granting the food stamps to men or women on strike destroyed the primary purpose of the food stamp program in providing extra food to the needy.

MUSIC TO FARM BY

R. V. Knowles, who is retired and lives in Salina, is giving his son, Gerald, a hand during the busy harvest season. "I'm just doing it for the fun of it," Knowles said. He's like a good many retired farmers in the Grass and Grain area because he finds it hard to sit around when there is farm work to be done.

TOPEKA KANSAS

lives in Salina, is giving the best season. "I'm just down a good many retired farmers find it hard to sit around."

STARTING A NEW FIELD

John Morgan, Concordia, has about 200 acres to cut and he'd just finished 80 acres of it. A lot of his wheat had lodged making the job slow and tedious. "We had a dew this morning and it's real tough," Morgan said.

Territory More Farm Accidents By Over-Fifty Males

Are the odds in favor of you becoming a farm accident victim this year?

They are, if you're a member of the "fifty or older" group — the older age group of farm farmers.

FOOM stands for "fifty or older male," the group which accounted for half of the 38 farm fatality accidents in Kansas in 1971, according to the recently released Kansas Agricultural Accidental Death Report compiled by the Kansas State Department of Health.

Statistics show the older the farmer is, the more apt he is to become a possible accident victim. While life may begin at 40, it is the age which increases the chances for farm accidents with each passing year.

In 1971, eight farmers in the 40-49 age group were killed in farm accidents; five in the 50-59 bracket; eight in the 60-69 age group; and six in the 70-and-over age.

This compares less favorably with the younger farmer age group which had seven killed in the 30-39 age group; two in the 20-29 age group; and two in the under-20 bracket.

Over the last 15 years, fatalities occurring in each age group have remained nearly consistent. The highest percentage recorded for any one age group was during a five-

year period from 1962 to 1966 when almost one-fourth of the victims were from the 60-69 age group.

The most dangerous piece of equipment farmers operate remains the tractor, followed by other farm implements. Tractors were involved in 12 Kansas farm fatality accidents last year, while other farm machinery involved eight deaths.

Two farmers were killed when their tractors overturned while attempting to cross ditches, and the others were killed when their tractors overturned during farm operations. Five were killed when they were run over by their tractors.

Three farmers were killed when they were caught in the power take-off of tractors and five others died in ensilage cutter, combine, power takeoff, hay grinder or hay baler accidents.

Animals caused five farmers to die. One died after being kicked by a cow; one was attacked by pigs after falling into a pig pen; one was butted to death by a bull; and two died in horse accidents.

Thirteen other farmers died from falls, lightning, excessive heat and other farm-related accidents.

Among the 38 agricultural accident fatalities, only one was a female. All of the victims were white.

The greatest number of fatal accidents occurred in the region composed of Rice, McPherson, Reno, Harvey, Kingman, Sedgwick, Butler, Greenwood, Elk, Harper, Sumner, Cowley and Chautauqua counties. The region totaled seven dead.

Time appears to play a strong factor in the variables which affect farm work accident fatalities.

The majority of accidents, 68.4 per cent, occurred during afternoon and evening hours. The highest percentage, or 15.8 per cent, of the fatal injuries happened between 4 and 4:59 p.m. Sundays are the safest days for farmers, apparently with the fewest fatalities occurring. The highest totals occurred on Wednesdays, Fridays and Saturdays, each with seven deaths or 18.4 per cent.

While the 4-to-4:59 p.m. time is the most dangerous, it is closely followed by the 5-to-5:59 p.m. time. Tying for third place prime accident time is the periods from 1 to 1:50 p.m.; 3 to 3:59 p.m.; and 6 to 6:59

p.m.

Fatal accidents have occurred in each month of the year, but the highest percentage of deaths in 1971 were recorded in August, with seven fatalities. Lowest percentage occurred in September, with only one death.

While August totaled 18.4 per cent of the fatalities, it is closely followed by March with over 13 per cent. June and July, harvest months in Kansas, tied in third place, each recording about 11 percent of the total deaths.

NEW COUNTY AGENT FOR REPUBLIC COUNTY

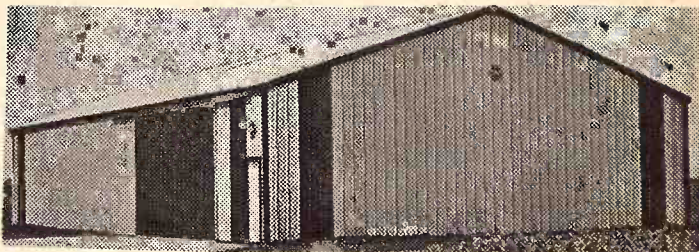

Bob Gilbert, Marysville, has been named new County Agent of Republic County effective July 24.

Mr. Gilbert who has been 4-H agent of Marshall county for the last 2½ years is a Kansas State University graduate having graduated in 1970 with a degree majoring in agronomy.

A native of Washington County, Gilbert was born and raised in the Clifton, Kans., area.

OUR DAILY BREAD

— by G&G Area Cooks

Mrs. Alvin Meyer, Marysville, Wins Contest

Winner, Mrs. Alvin L. Meyer, R 1, Marysville: "This recipe is handed down from my Mother. It is my favorite potato salad."

POTATO SALAD SAUCE

3 eggs, blend together with fork
3 tablespoons of sugar
3 tablespoons of vinegar
Cook in saucepan on stove until thick. Stir constantly and watch carefully or it will burn. Remove from heat and then add:
1 teaspoon mustard
1 tablespoon mayonnaise
Season with salt and pepper. Add sweet pickle juice, if desired, for better flavor.

POTATO SALAD

These are the ingredients used for the potato salad:

Boiled potatoes
Sweet pickles
Onions
Boiled eggs
Add the potato salad sauce and stir thoroughly. Refrigerate.

+++++

Mrs. Harold Pruitt, Barnard: "Enjoy most recipes. Hope someone enjoys these dressed-up carrots."
DRESSED-UP CARROTS
2 cups diced carrots
1/4 teaspoon salt
1 teaspoon cornstarch
1 tablespoon sugar
1/4 teaspoon ginger
1/4 cup orange juice
2 tablespoons butter
1 1/2 tablespoons chopped nuts (optional)
Cook carrots in small amount of

water in heavy saucepan with salt. Drain. Combine sugar, cornstarch, ginger and orange juice, stirring until thickened. Stir in butter and toss to coat carrots. Sprinkle with nuts.

+++++

Mrs. Paul Flach, Paxico: "This is one recipe that just takes minutes to mix up and tastes just like homemade butter. Everyone likes it, that eats it."

EASY HOME BUTTER

1 cup buttermilk or homemade buttermilk
1 cup vegetable oil
1 pound of margarine
Mix together soft margarine, vegetable oil, buttermilk. Whip at high speed with mixer until mixed thoroughly. Makes 2 pounds.

+++++

Miss Shirley Harris, Soldier: "Our family has tried many of the recipes in Grass & Grain. I would like to pass on a recipe we all like. This simple recipe is one of our favorites."

DANISH PUFF

1 cup sifted flour
1/2 cup butter
2 tablespoons water
1/2 cup butter
1 cup water
1 teaspoon almond flavoring
1 cup sifted flour
3 eggs

Measure first cup of flour into bowl. Cut in butter. Sprinkle with 2 tablespoons water and mix with fork. Round into a ball and divide in half. Pat dough with hands into 2 long strips, 12x3-inch strips should be 3 inches apart on ungreased baking sheet. Bake on hour in 350-degree oven. Mix second amount of butter and water. Bring to a rolling boil. Add almond flavoring and remove from heat. Stir in flour immediately to keep it from lumping. When smooth and thick, add 1 egg at a time, beating until smooth. Divide into half and spread half evenly over each piece of pastry. Bake until topping is crisp and nicely browned. Frost with confectioners' sugar icing and sprinkle

generously with chopped pecans.

+++++

This recipe is from Mrs. Ned Sump, R 4, Clay Center:

HERBED VEAL LOAF

2 pounds ground veal
2 eggs
1/2 cup fine dry bread crumbs
1/4 cup finely chopped parsley
1/4 cup finely chopped chives
1 tablespoon dried basil
1/4 cup chopped green pepper
1 1/2 teaspoons salt
1/2 teaspoon black pepper
4 slices bacon
1 can (8-ounce) tomato sauce
Preheat oven to 350 degrees. Combine all ingredients except sauce in a large bowl. Mix well. Shape into a loaf and place in aluminum foil covered 9-inch pie plate. Cover with bacon slices. Bake for 1 1/2 hours. Serve with heated tomato sauce. Makes four to six servings.

+++++

6

Grass & Grain

July 11, 1972

Mrs. Willis Bowlin, R Williamsburg: "I've enjoyed many of your recipes and hints. I'd like to pass on a casserole we think is good and be used in place of potatoes. Very easy to fix."

CABBAGE CASSEROLE

1 head cabbage, shredded
1 can cream of mushroom soup
1 1/2 cups grated cheese (cheddar or mild)
2 cups crushed potato chips
I shred my cabbage in the food processor. Take shredded cabbage and cook in boiling salt water for ten to fifteen minutes. Drain and mix with cream of mushroom soup, half of the cheese and potato chips. Put into bowl and cover rest of cheese and chips. Bake in degree oven for 30 minutes.

+++++

Plan Carefully To Ensure Happy Vacation

Vacations should be remembered with pleasant and happy thoughts. To insure this, there are things you can do before you leave home on a trip.

If you plan to stop at a motel, hotel, or tourist camp, call ahead and reserve rooms. If you take a chance on finding a place to stay, you may be disappointed at stopping time.

Take some toys and games. Youngsters may wish to jump rope, bounce balls, or play card games on rainy days. Pack a few toys and games. This will mean more free time and quieter hours for you.

Pack a first-aid kit. Don't cloud your vacation planning with fears about sunburns, insect bites, or scratches. Have some quick remedies to relieve these unpleasant conditions should they confront you while on the road.

Cancel deliveries. Let the milkman know you are going away and when you expect to return. Tell the paper boy about your vacation too.

Take along your credit cards. The money you take for expenses may give out sooner than you anticipate. Or it might be lost or stolen. In this case credit cards come in handy for

gas and auto accessories. Travelers' checks are safe and good vacation security.

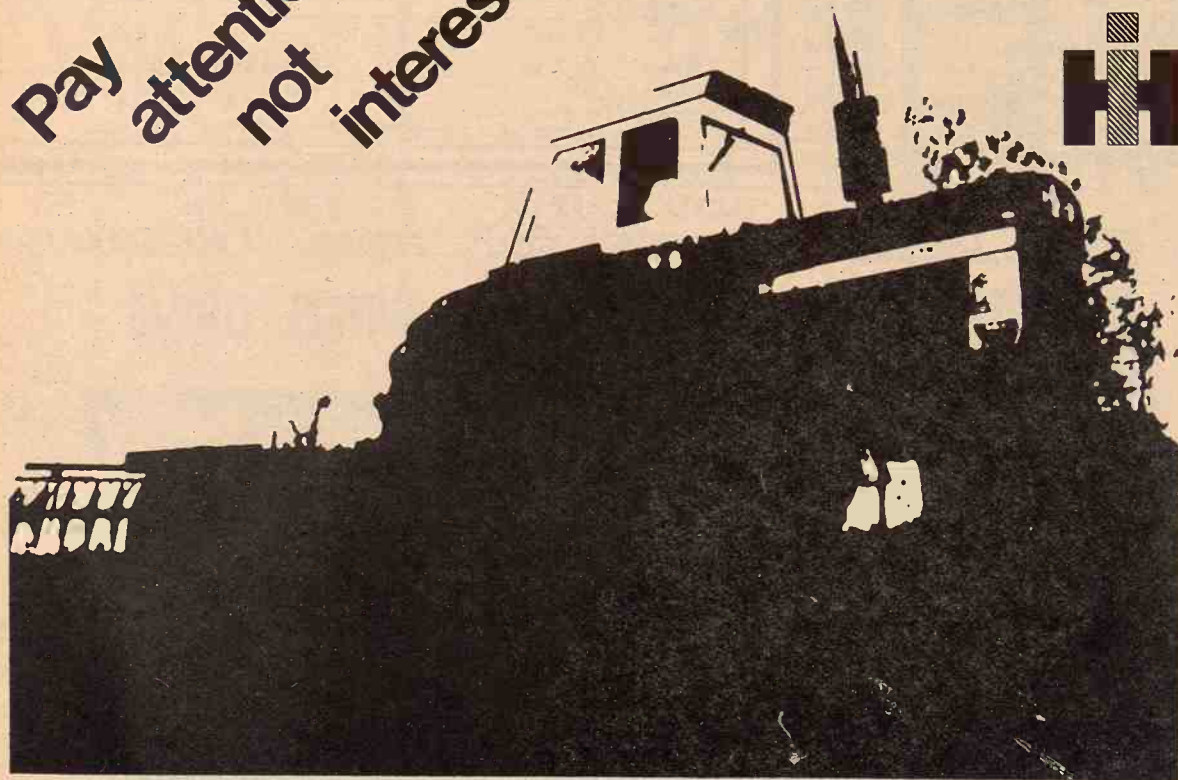

Check the car. Are your tires repaired or replaced? What about complete grease job and oil change? To get away from home quickly and safely have your car in good condition. You'll make time on the road and have more time for doing things you planned like visiting parks or museums.

Make arrangements for pets. cannot take along. The dog, the cat and the bird will need daily care while you are away. Arrange someone to look after them and them while you are gone.

Cleans Sponge

When cleaning the windshield, chrome or other areas of the car where insects have collected during driving, sponge the surface with solution of half a pound of baking soda dissolved in a gallon of water. Rinse immediately with clear water.

Pay attention,
not interest!

Pay attention to our new sale. And you won't be paying interest until next spring.

We're including new International® farm wheel tractors. Any used wheel tractors in stock. Plus implements sold with the tractors. Or Cub Cadet® lawn tractors and riding mowers.

Finance them through International Harvester Credit Corporation.

And you won't have an interest payment until March 1, 1973.

In fact, with a good trade-in, you won't have an investment until then.

In the meantime you reap the advantages: the lower price, the tax savings, the higher productivity.

So come down and see us about a trade. Take a little interest in, yourself.

Give Feet Proper Care During Summer

Mrs. Willis Williamsburg: "I've been giving more of our feet uncovered, and it's vital to put one's best foot forward and develop a regular regimen of foot care that will stand us in good stead all year around."

Foot care specialists have developed ten points to follow to make you and your feet look and feel better.

Always have shoes fitted with the greatest of care. Since feet tend to contract during the sleeping hours, it is better not to buy shoes until you have been on your feet during the day for a few hours.

Corns and calluses, the most common foot afflictions, are caused by friction and pressure from shoes and hosiery. Tenderness and inflammation are the first warning signs. Proper care includes cushioning the area and applying medication. Never cut corns.

Both shoes and hosiery should be changed at least once a day, and remember to wear the proper shoe for the proper activity.

At least once a day, bathe your feet in warm, soapy water. Massage dry and apply foot powder or deodorant.

Always cut toenails straight across and never shorter than the toes themselves.

Wriggling the toes, flexing the arches, and rotating the ankles should be practiced any time, as often as possible, because these simple exercises do wonders for feet.

Put your feet up whenever you get a chance. Either cross the feet or position them with the arches facing each other.

Keep your feet dry. And don't let heels and counters of shoes run down. Repair shoes whenever necessary.

And when your shoes no longer make you proud, buy new ones.

Permanent Press Requires Proper Washing, Drying

Permanent-press garments are a boon to the busy homemaker, for if these garments are properly washed and dried, they do away with one of the most unwanted chores, ironing.

Permanent-press cycles have been incorporated on a number of washers and driers to provide the perfect care required for items treated with permanent-press finish. It is the finish that gives garments a "memory" so that they go back to their original, well-pressed condition after being washed and tumble dried.

Manufacturers insist that the proper way to care for articles made of permanent-press fabrics is to machine wash and tumble dry in an automatic drier. Here are a few tips about caring for permanent-press items your family owns:

- Wash often clothes and household items with permanent-press finish.
- It's best to use an all-purpose detergent for normal-size loads.
- Fabric softener in the rinse water helps prevent wrinkles and static. There are automatic

dispensers for this on new machines.

Although the programmed washer takes all of the guesswork out of washing no iron fabrics, proper drying is most important in caring for permanent press. Best results are obtained when the drier has a special cycle for permanent-press finishes.

One drier model features an electronic sensor that "feels" the moisture content of clothes. The drier turns off when clothes are properly dry. A cool down period at the end of the drying cycle keeps new wrinkles from forming.

Store Tape Measure

To keep your tape measure neat, wind it on an empty adhesive-tape spool and cap it with the cover. Then the tape measure will not tangle in storage.

Pre-Measure Cereal

Pre-measure oatmeal or rice cereal for breakfast in small plastic bags, placing the salt with it. Make enough for a week at once; it saves valuable time in the morning.

Use As Back Mats

Desk blotters make fine back mats when framing pictures.

Cleans Insects From Glass, Chrome

Clean a sponge by rubbing it thoroughly with lemon juice, working it well into the sponge. Rinse through several clear waters, then hang in the sun to air and dry. Sponges cared for in this way remain sweet smelling.

BRING YOUR WATCH TO A SPECIALIST FOR repairs

Good watches deserve expert care. All others need it!

The more expensive your watch, the more it needs the attention of experts. But ordinary watches need extra special care because keeping perfect time is not just built-in.

DISCOUNT BUILDING SUPPLY

SPECIAL LOCATION: 649 N. Broadway
PHONE 913-827-9666 SALINA, KANSAS

OPEN HOURS

12 Noon to 8 p.m.
Monday - Friday

10 a.m. to 6 p.m. Sat.

1 p.m. to 6 p.m. Sun.

Vegetable Combo

For a good vegetable dish, cook 1 package frozen peas according to label instructions. Drain and set aside. Cook 1½ cups sliced fresh mushrooms and one-third cup sliced green onion in ¼ cup butter until tender.

Stir in 2 teaspoons flour, 1

teaspoon sugar, ½ teaspoon paprika, ¼ teaspoon salt and ½ teaspoon worcestershire sauce. Blend in two-thirds cup undiluted evaporated milk. Cook over medium heat until thick, stirring constantly. Add peas. Heat to serve four to six.

Handy Sander

Wrap sandpaper around a dry sponge when sanding a rounded surface.

Store Tea Bags In Jar

When you buy tea bags, place them in a tightly covered glass jar before setting them on the cupboard shelf. You can tell at a glance when your supply is growing low.

Check Upholstery

When buying a piece of upholstered furniture, be sure to check first to make certain the fabric used on it has been treated to repel soil.

Military Sets Beef Cutback

The Defense Department announced it will reduce its beef purchases by 10 per cent for the next four months in connection with President Richard Nixon's move to push meat prices down throughout

8

Grass & Grain

July 11, 1972

the country.

At the same time the Pentagon moved to reduce its inventory of beef, lamb, pork, fish and poultry by 50 per cent.

"We could cancel all meat purchases for a period of only 15 days in view of our low stock levels," a Pentagon spokesman said. "If we did stop all purchases, however, our subsequent re-entry into the market might have an adverse effect on prices."

The Defense Department said it annually buys 123.3 million pounds of beef at a cost of \$117.4 million.

It also buys 75.6 million pounds of pork for \$46.3 million and 59.6 million pounds of poultry at a cost of \$23.9 million.

The announcement noted that defense buying of meat products amounts to only a fraction of total U.S. production running annually at 77 billion pounds.

The defense supply agency was authorized to make exceptions to the new directive for emergencies, direct deliveries to commissaries and contracts to small businesses which rely mostly or wholly on military customers for their livelihood, the Pentagon said.

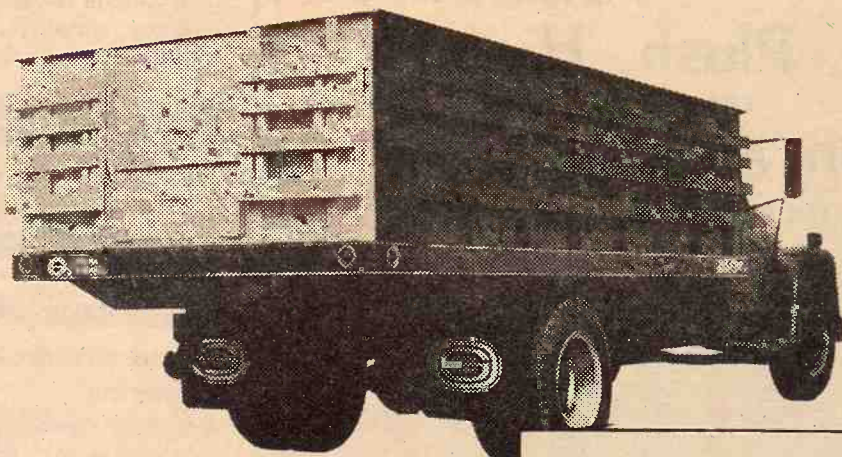

Since September, the statement said, the Defense Department has been substituting lower cost items as much as possible in buying food for the armed forces.

STUBLE CHOPPING

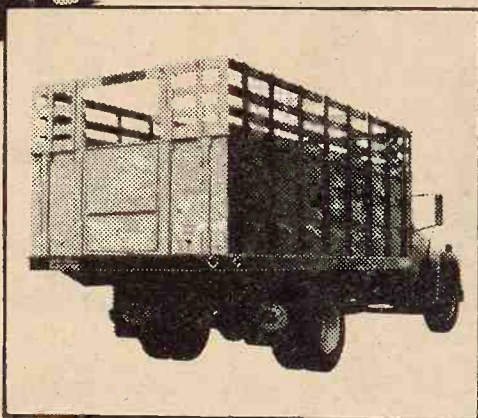

Clyde Parsons, Minneapolis, is discing wheat stubble while his boss, Woodruff, is doing the cutting. The ground is pretty wet and the straw plugs up between the scrapers and the discs. Parsons said he thought the scrapers were adjusted wrong but he couldn't find the right angle. Poking away with the crow bar, Parsons added that this crow bar was special. "It's part of a steering shaft out of a Model T."

Omaha Standard's all-new Steel Livestock-Grain Combination

Here's a rugged steel truck body with outstanding versatility to get more work done for you. This high-quality body comes in many sizes with a wide choice of gates to exactly match the work you'll be doing.

- Heavy-gauge steel sides, specially welded and reinforced for extra strength... the strongest, tightest body you can buy.
- Exclusive new tarp rail adds rigidity to sides and greatly extends life of your tarpaulin.
- Famous Omaha-Standard platform. Flooring choice: wood, safety tread plate, or smooth steel.
- Capacities from 100 bu. to more than 500 bu. Lengths 8 ft. to 26 ft. Height 28 in. or 40 in., double-vented or solid. 12 in. Tip Tops available for extra capacity.

Converts quickly to haul livestock. Racks available in Fold-Down or Top-Off models. Fold-Down model features exclusive off-set hinge. Livestock gates interchange quickly, operate smoothly.

Texas Semidwarf Wheat Yields High In Saline Co. Plots

Yield figures are in from the Saline county wheat variety test plot. And the results should prove surprising to area farmers and grainmen.

Placing first in the field of 13 varieties planted last Fall on the Josh Gottfrid farm near Assaria was Sturdy wheat with 64.2 bushels per acre.

Sturdy is a semidwarf Texas variety which accounted for less than 5 percent of Kansas wheat acreage in 1971. The variety is almost unknown in Saline county.

Sturdy and its sister selection, Caprock, are said to have high yield potential and excellent standability at high production levels; the results of the 1972 Saline county tests would seem to bear out those claims.

Both wheats, however, are less cold-tolerant than Kansas and Nebraska varieties and are poor risks in most areas of the state, according to the Kansas State university agricultural experiment station.

In the past, Sturdy has produced wheat with relatively poor protein content.

Second-best yieldage in the county plots was turned in by Triumph 64 with 62.8 bushels an acre. Triumph, a popular early-maturing wheat, accounted for 9 percent of wheat acreage in Central Kansas last year.

Third place went to Danne wheat, which yielded an average 61.5 bushels per acre. Danne, released by the Oklahoma experiment station in the Fall of 1970, has proved similar to Triumph 64 in early tests, but the Oklahoma wheat appears to have higher yield potential and better loaf volume. Danne wheat generally scores lower in protein content than Triumph 64 and occasionally weighs less as well.

Parker, a 1966 joint Kansas-Missouri release, scored 4th in yield averages with 61.2 bushels. Parker, a consistently high-yielding wheat, was planted in 18 percent of Central Kansas fields last year. It led in Saline county acres.

Scout wheat, the most popular

Kansas variety, was tied for 5th place with Satanta and Kaw strains. All yielded 54.6 bushels. Scoutland, a 1970 selection from Scout, yielded only 38.3 bushels, tied for last place with Shawnee. And Eagle, another Scout selection released in Kansas in 1970, yielded 49.2 bushels an acre compared with 59 bushels in the last year's county tests. Eagle was tied with Centurk, a new Nebraska wheat, Apache and Pronto for next-to-last place on the yieldage yardstick.

Vern Lohman, county agricultural agent, stressed the test plots are intended only to demonstrate the year-to-year differences in yield on several different wheat strains. "To establish a long-term or overall average, we'd need at least 3 or 4 years' data," he said.

Gold Coin Sales Up 20 Percent

American law forbids the ownership of gold, except for nuggets, dust and gold coins minted before 1934.

Yet, a leading New York coin dealer says sales of gold coins have risen 20 per cent.

Gold coins rise in price faster than the gold bars sold in Europe.

Coin dealer Nicholas Dea says when the gold price increases ten per cent, the value of gold coins goes up 12 or 13 per cent.

He says people who buy gold coins believe they will have a scarcity value as well as an intrinsic gold

value.

For this reason he says they are willing to pay more than the actual gold value.

However, Dea says there appears to be no limit to the supply of gold coins, which are obtained from Zurich in one day.

He says the usual shipment is 10,000 coins of various values from different countries.

The British Sovereign, with a present value of \$18 is the most popular gold coin followed by the U.S. ten and 20-dollar gold pieces, Mexican coins and French Napoleons.

"Re-strikes" — newly-made gold coins from illegal mints are causing problems for dealers.

Dea says: "some re-strikes are so

good that not even an expert can detect them." He said the only protection a dealer has is to buy from a reputable source.

ROADING HOME

Lonnie Steere, Alta Vista, is farming for his dad, Harold, this summer. In the winter months Steere teaches Spanish at the Alma High School. "I've been out harrowing some of the milo." We haven't had much of an insect problem in the milo yet Steere said.

Welfare Rolls Up, Fewer Elderly People Registered

The nation's welfare rolls earlier this year contained fewer elderly persons than at anytime since 1940, while most other welfare categories continue to increase.

The department of Health, Education and Welfare said the number of elderly receiving Old Age Assistance (OAA) in February was 2,015,000, down 4,000 from January and nearly 800,000 from the record number of 2,810,000 in September of 1950. It was the lowest figure in 32 years.

The February figures were the latest available.

The decline in OAA cases comes despite a rapidly rising over-65

population.

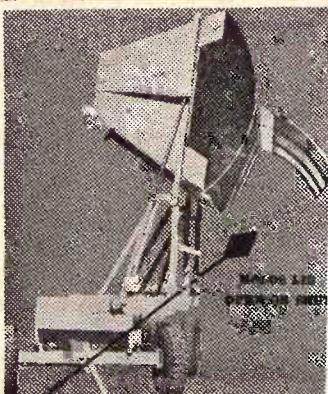

Government spokesmen indicated a major factor in the improved financial position of the elderly was an increase of 26.5 per cent in Social Security benefits the last two years. The cost of living increased 9.7 per cent in the same period.

Social Security increases of 15 per cent in January 1970 and 10 per cent in January 1971 increased monthly benefits from \$100 to \$129 for the average, single retired worker and from \$170 to \$223 for the average couple over 65.

Legislation to increase benefits even further is pending in Congress.

Overall, the nation's relief rolls increased by 97,000 in February. The largest increase was 114,000 in aid for families with dependent children. Disabled persons on welfare increased 11,000. Decreases in other areas accounted for the discrepancy in figures.

Soviet Union Looking For Soybeans?

Rod Turnbull
Kansas City Board of Trade

If just common logic can be applied to the situation, then the United States should be able to do business with the Soviet Union on soybeans, or soybean meal.

Logic suggests the Soviets need soybean meal as a high protein feed for livestock and poultry. The United States is the major source of this product and could produce more. So, it looks very simple. As a seller and a buyer, they should get together on a deal and both benefit.

But this may be a case where logic is superseded by many other more important factors such as international politics and all that it entails.

But if we could say that logic would apply, then grain men such as those at the Kansas City Board of Trade would contend that no country could afford to feed corn without a protein supplement. This would be particularly true of a country that had to import corn.

Soviet people want more meat in their diets and their government officials have told them they will get it. Last Winter, Soviet officials visiting in the United States revealed

they want to increase livestock production about 25 percent over the next five years. Even under American production standards, that would be a huge increase.

The Soviet leaders also said they expected to import feed grains to help accomplish the meat increase.

Late last Winter, Earl L. Butz, Secretary of Agriculture, went to Russia at the invitation of Soviet Minister of Agriculture Matskevich. Matskevich had been in the United States last December, and he had commented on how the Soviet Union wanted to boost its meat production the 25 percent.

Upon his return to the United States, Secretary Butz reported he had a long conversation with Soviet General Secretary Leonid Brezhnev. In telling about this later, Butz made this comment:

"The Russians are tough, but they are also smart. I made one critical point with General Secretary Brezhnev that struck home. I pointed out that in the last 20 years in the United States, we have tripled our per capita consumption of poultry meat and we have doubled our per capita consumption of beef, primarily because we have learned to balance our rations. We have

learned to put high quality soybean meal, a protein supplement, with corn, which is one of the most efficient energy sources we have, to increase the efficiency of meat production.

"The General Secretary is vitally interested in efficiency. He quickly grasped this concept — that with a limited amount of energy grain available, if you supplement it well, you increase your efficiency. That point, I believe, helped to convince him that U.S. coarse grain and soybeans — together — are needed to enable Russia to meet its commitment to supply more meat to her people."

To put it bluntly, with today's knowledge on livestock nutrition, feeding grains such as corn without a protein supplement would be like driving a powerful 8-cylinder car on iron wheels.

It has been said that were it not for protein supplements which can be added to the grain rations for livestock and poultry in the United States, this country would need to double its corn crop. The U.S. could grow more corn — farmers are being paid to idle a part of their acreage.

But the Soviet Union has stated it will need to buy feed grains this year. In fact, that nation bought about 150 million dollars worth of feed grains from two U.S. firms late last fall. So it would seem logical that the Soviet Union would have an even greater incentive to attempt to stretch its grain supplies than the U.S.

Soybean meal is not the only protein product that may be used to supplement grain rations. But it does dominate the field and it is one product that can be increased in volume simply by boosting the number of acres planted to soybeans. Most other protein supplements are by-products. Tankage, for instance, is a by-product of the packing industry. Packers could not afford to slaughter cattle just for the

tankage.

Even cottonseed meal is secondary in value to the cotton, and acreages are not increased just to get more meal. Fish are caught in the ocean specifically for oil and meal, and thus are similar to the soybean in that it is grown for its oil and meal. However, the fish catch apparently cannot be increased at will.

The United States, which has ample supplies of protein supplements this marketing year will use about 20 million tons in livestock and poultry feeds. Of this total, about 13 million tons will be soybean meal.

World soybean production in 1971 was estimated at just under 1,600 million bushels or 43.4 million metric tons. Out of this total, the U.S. produced 31.8 million metric tons or 73 percent of the world's output. While it does not have firm figures, the USDA estimates Russian production in 1971 at 603,000 tons, but Russia hopes to average 810,000 tons between now and 1975.

The United States can grow more soybeans whenever farmers decide it would be profitable.

Driver's Licenses Sell Cheap After New Traffic Law

Used driver's licenses may be selling cheap on the Kansas open market.

A law which went into effect July 1, could de-license numbers of state motorists. Co-sponsored during the past legislative session by State Sen. Richard Rogers, (R-Manhattan), act allows for prosecution of what is called 'habitual offenders.'

Under the terms of the act, persons who have accumulated moving traffic violations over the past five year period can be certified as 'habitual offenders,' and prohibited from driving for three years. And the penalties for breaking that prohibition are still in prison sentences of up to one to five years upon conviction.

The new Kansas Habitual Violator law is one of the toughest of a series of measures of its type passed by several states across the country this year, designed to get careless drivers off the highways.

Driver's License Selling Cheap New Traffic Shows Big Gain Per Man Hour

Used driver's license selling cheap on the market.

A law which went into effect last year, buoyed by motorists. Co-sponsored by past legislative session, Richard Rogers, (R-Ala.) act allows for prosecution called 'habitual offender'.

Under the terms of the law, moving traffic violations past five year period as 'habitual offender' prohibited from driving years. And the law is breaking that prohibition from prison sentences of up to years upon conviction.

The new Kansas law is one of the toughest of measures of its type several states across this year, designed to drivers off the highway.

published by the Agriculture Department.

The study found that over-all farm production per man-hour of labor gained 11 per cent in the output of crops and eight per cent for livestock.

Each farm worker — which includes family help as well as hired labor produced enough food and fiber for a record 48.2 persons, including 41.2 in the United States and 7.0 overseas who were served by farm exports, the report said.

In 1950, farmers produced enough for 15.5 persons. In the 1960 each produced enough for 25.8, the report said.

The index for farm all production per hour of labor in 1971 was 125 per cent of a 1967 base used for comparison. That means per-hour farm output rose 25 per cent in four years. The 1970 index was 113 per cent of the base, meaning the indicator gained 12 points last year.

In 1970 — mainly because of corn losses from blight, drought and other factors — the per-hour

productivity index was held to a one-point gain from the year before.

Using the same basis for comparison — the 1967 base of 100 per cent — the productivity of farmers in 1950 was 35 per cent. By 1960 it had risen to 67 per cent. For livestock alone last year, the per-hour index was 29 per cent higher than the 1967 base, compared to a 19 per cent spread in 1970. In 1950 livestock productivity per hour was only 37 per cent.

Crop productivity last year was 22 per cent more than in 1967, com-

pared with a spread in 1970 of only 10 per cent. In 1950 per-hour crop production was 39 per cent of the 1967 base rate.

By category, the 1971 per-hour productivity indexes as a percentage of the 1967 base of 100 per cent, included:

Meat animals 129 per cent of the 1967 base; milk cows 133; poultry 127; feed grains 119; hay and forage 149; food grains 124; vegetables 109; fruits and nuts 111; sugar crops 124; cotton 126; tobacco 105; and oil crops 120.

SALE EVERY
Thursday

The market at our sale last Thursday, July the 6th, was stronger with a good demand for all classes of cattle.

These new crop calves were selling at real active prices, while yearling cattle were real popular with a great number of people buying and wanting to buy yearlings weighing from 650 lbs. to 850 lbs. While the quality wasn't great on the yearlings we had, we certainly could have gotten a good price for some bunches of yearling cattle.

Cows were selling at steady to stronger prices.

Bulls were also in good demand.

Following is a partial listing of the sale last week:

Hog Price Prospects Up

The USDA report hogs and pigs, printed in Grass and Grain July 4, has important information for consumers, public officials, as well, as for many farmers. The report indicates that pork production will continue below year-before levels for another 15 months or so — although supplies will be more plentiful than during any year of the 1960's. We believe that consumers will continue to spend freely for pork, thus providing very strong support for the hog market — at least until the fall of 1973.

Consumers should be informed about the reason for the decrease in pork production: Many farmers quit the hog business as a result of heavy financial losses a year ago. These losses were equivalent to 8 cents per pound of pork, or \$10 for each hog produced.

Hogs and Pigs on Hand

The number of market hogs and

pigs on U.S. farms June 1 was estimated at 52.3 million — 7 percent less than the record number reported a year earlier. The number of hogs by weight groups were as follows:

The number weighing over 120 pounds on June 1 was listed at 14.5 million — down 8 percent from last year. Most of these hogs will be marketed by mid-August.

Hogs weighing under 120 pounds were estimated at 37.8 million — down 6 percent from a year earlier. Most of these hogs will be marketed from mid-August through December.

Farrowing Intentions

U.S. farmers were also surveyed concerning their farrowing intentions. They indicated that they planned to have 6 million sows to farrow during the six months June through November. This would be 5 percent less than a year ago. Pigs from these farrowings will provide most of the market supply of hogs during the first six months of 1973.

In the ten leading states that

report quarterly figures, farmers planned to farrow 2.2 million sows during June-July-August — 4 percent less than a year ago. Intended farrowings for September-October-November were 2.4 million — down 2 percent from last year.

Actual farrowings differ slightly from the intentions reported, especially in the September-November period. There is a good chance, too, that the average number of pigs saved per litter will be a little larger than last year. Altogether, we figure that the fall-quarter pig crop will be about the

same as that of last year.

It now appears that the next large increase in pig crops will come no earlier than the spring of 1973.

Price Prospects

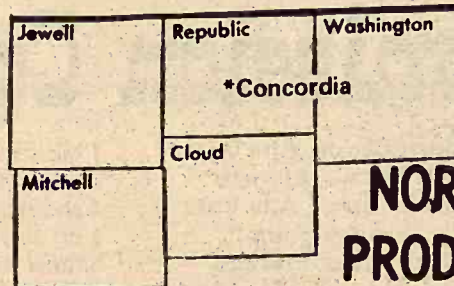

While farmers were suffering heavy losses on hog production in 1971, consumers bought their pork at bargain prices. When prices recovered to profitable levels for farmers, many consumers complained; there have been many demands for price ceilings on hogs and pork.

Government officials may bow to public pressure and impose rigid

July 11, 1972

price limits. We would expect limits to be based on some recent period, such as a week or two before the announcement. We would expect prices to be rolled back to any large amount. That would surely require meat rationing, and would discourage farmers from providing needed increases in production.

Milford Lake Has Claimed 21 Lives In Six Years

MILFORD LAKE — With the boating and swimming season barely begun, Milford lake already has its 2nd worst drowning record in its 6-year history.

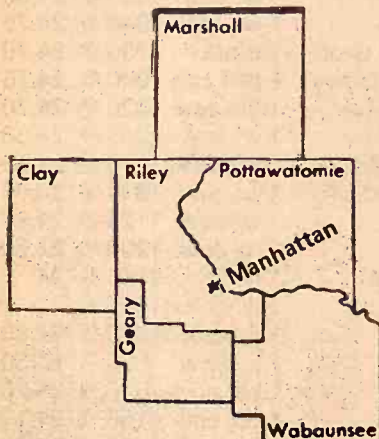

The drowning of Mark, 11, and William, 7, sons of Mr. and Mrs. William Kitzmiller, Fort Riley, brought the 1972 total to 6 persons lost to the water.

There were 9 drownings in 1970, the lake's worst season. Twenty-one persons have lost their lives at Milford since the lake was opened.

June	1.27	1.26	1.23	1.22	1.19	1.27

The Kansas June wheat price was 6 cents below the U.S. average and 4 cents below the average for the West North Central States (Table I).

Wheat prices by grades at mid-June were \$1.27 for No. 1, \$1.26 for No. 2, \$1.23 for No. 3 and an average

received an average price of \$1.33 per bushel at mid-June, 5 cents below a month earlier, and 13 cents below June 1971. The U.S. wheat price was 44 percent of parity, down 2 points from a month earlier and 6 points below a year ago.

AXTELL TO PASS 100 YEAR MARK

The founding of Axtell, 100 years ago, will be observed with a centennial celebration July 22, with a day of entertainment events, capitalizing on the town's heritage.

Johnny Kaw
Says:

"If you do not know where you are,
ask before you go too far."

Kids need trucks.

You bet they do. 'Cause trucks bring a lot of the things kids need. Bunk beds 'n' blue jeans 'n' toys 'n' games. Things kids need to help 'em grow up. Like spelling books, new shoes, and peanut butter and jelly. In fact, nearly everything Kansas kids use comes all or part of the way by truck. No kidding.

June Farm Index Up Slightly

Prices received by Kansas farmers at mid-June 1972 were up slightly from May this year and moderately above June 1971, according to the Kansas Crop and Livestock Reporting Service.

The index of prices received for all farm products was 285 percent of the 1910-14 base period compared with 283 in May and 260 in June last year.

Prices received for most meat animals, eggs and wool were up

some from May. Prices for wheat and barley were down considerably while sorghum grain, hay, oats and milk were down slightly from the previous month.

Wheat and feed grain prices were considerably below a year ago while prices for soybeans, livestock and most livestock products were well above June 1971.

The crop price index was 155 percent of the 1910-14 base at mid-

June, 8 points below May this year and 18 points below June 1971. Wheat at mid-June averaged \$1.27 per bushel, 8 cents below a month ago and 12 cents below a year ago.

changed from the previous month but 42 cents above June 1971.

The livestock and livestock products price index at mid-June was 433 percent of the 1910-14 base period compared with 420 a month earlier and 360 a year earlier. The meat animal price index was 544 percent in June, up 18 points from

July 11, 1972

Prices paid by farmers for protein supplements were above year ago but mixed feed and prices were lower.

The index of prices received by Nation's farmers for farm products at mid-June was 317 percent of the 1910-14 base period, up 4 points from mid-May and up 30 points from 1971. Price increases from May noted for most livestock, sorghum grain, barley and rye.

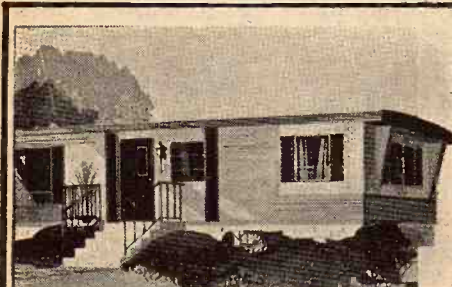

Prices were lower for wheat, oats, hay, sheep and milk. The of prices paid by farmers commodities and services including interest, taxes and rates) was 432, up 4 points from May and 20 points above a year ago.

The parity ratio in June was unchanged from May but up 3 points from June 1971.

FARM MANAGEMENT FIELDMAN

Vaughn L. Nelson (center), new fieldman with Kansas State University's Farm Management Association Program, will assist 186 farm families in Greenwood, Butler, and Cowley counties with record keeping and farm business analysis. Here he helps Mr. and Mrs. Melvin Casey with their farm account book. Casey, who farms east of Eureka, is Greenwood County Farm Management Association director. Nelson is one of 20 Farm Management fieldmen who work with more than 3,500 Kansas farm families enrolled in the Kansas Cooperative Extension Service educational program.

Some Detergents Cause Blindness Lab Tests Show

Some nonphosphate detergents on the market can cause irreversible

blindness if accidentally rubbed into the eye, according to an unpublished government study.

"The results of this study indicate the rather sharp demarcation between moderate ocular damage caused by soap in phosphate detergents and the intense causticity

of carbonates and metasilicates," the National Institute of Environmental Health Sciences concluded.

The Food and Drug Administration, charged with protecting the public from hazardous substances, has reacted to the

report with disdain.

"They are treading outside the realm in which they should be operating," said an official in FDA's Bureau of Product Safety. "We have the charter, we have the mandate."

The official asked not to be named, because he said it would violate protocol to criticize a "sister agency."

The institute's study, conducted by Dr. David P. Rall, the director, said NIH veterinarians Dr. Donald B. Feldman and John A. Moore, concentrated on nine synthetic-detergent products purchased near its Triangle Park, N. C., facilities.

Seven were laundry products, of which three contained phosphates (Tide, Ajax, and Dash); two contained carbonate (Sears, and Arm and Hammer), one had metasilicate (Ecolo-G); and one was a soap powder (Ivory Snow). Two were dishwashing compounds, one containing metasilicate (Electro-Sol), and one with phosphate (Cascade).

Material was put into the left eyes of New Zealand white rabbits and reactions were recorded at one, two, three, seven and 14 days.

The researchers said all the products tested irritated the eyes and caused an inflammation, known as conjunctivitis, and some clouding of the cornea.

The soap-powder eyes began clearing by 72 hours and were healthy again at seven days. The

18

Grass & Grain
July 11, 1972

laundry-phosphate eyes cleared all but one of 24 rabbits by 14 days. "The reaction to carbonate and metasilicate detergents was more intense," the report said. Carbonates caused chronic opacities in 14 of 18 rabbits. Eleven animals suffered partial or total destruction of the cornea and a deterioration of tissue in the eyelids.

Test results were similar for washing detergents:

The researchers cautioned detergent formulas may change frequently and vary regional depending on hardness of water.

The FDA disagrees with the institute's testing methods, particularly because the eyes were washed after exposure, and it plans to revise its own procedures to provide a wash after five minutes after 245 hours and lengthen observation period from 72 hours to a minimum of seven days.

Wheat Weight High Protein Down Slightly

grading No. 1 and grade defects were below average.

Test results on 2,406 cars received at terminal markets from 55 counties showed an average test weight of 62.2 pounds, somewhat

below last year's 62.4 pounds in the same counties, but substantially above the 1961-70 average of 61.5 pounds. Protein content of the wheat sampled averaged 11.5 percent, moderately below last year's 12.1 percent and a little below the 1961-70 average of 11.8 percent.

Moisture content of the new crop tested averaged 13.4 percent.

Additional samples of the new wheat crop were relatively low in dockage, with some 70 percent of the 2,406 cars tested showing less than 0.5 percent dockage and only three percent containing 1.0 percent or more dockage.

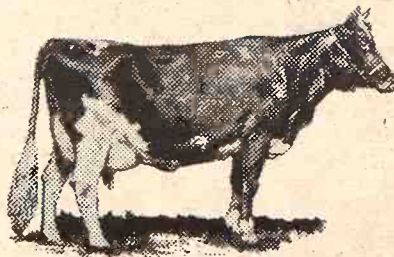

Total grade defects in this year's wheat was 2.0 percent, compared with a 1964-70 average of 2.3 percent. It included 0.1 percent foreign material, 0.1 percent damaged kernels and 1.8 percent shrunken and broken kernels. Some 89 percent of the 1972 wheat tested thus far

graded No. 1 and 10 percent graded No. 2. By sub-classes, 2 percent of the wheat was dark hard winter, 68

July 11, 1972

percent hard winter, and 30 percent yellow hard winter.

GOING PLOWING INSTEAD OF FISHING

Harold Steere, Alta Vista, decided to do a little plowing before it got dark or rained. Steere farms about 1,000 acres but says he leases most of it. In addition he runs the dairy at Alta Vista. He also buys dairy calves in Wisconsin and puts Kansas feed through them. "We've been doing it for several years and had reasonable results," he added.

Tobacco Tax, 295 Other Measures Effective July 1

If you use tobacco in any form other than cigarettes you're going to feel a pinch on the pocketbook that's a result of a 10 per cent tax on tobacco products effective July 1.

The tobacco tax is one of the 295 measures which became effective.

If you have been a user of any of those products for a few years you probably will recall the 1969 Kansas Legislature imposed a 35 per cent tax on these products but it was only a few months before the Kansas Supreme Court ruled the law invalid on grounds it had a defective title.

This is the first successful attempt to tax these products since 1969. The revenue it will produce is relatively modest — the estimate is \$600,000 a year.

The big tax bite imposed in laws will have something of a delayed effect.

Under this law, corporations and financial institutions will no longer be able to claim federal income taxes paid as a deduction against state income tax owed.

This is going to increase the state tax bill of corporations and financial institutions at income tax paying

time by an estimated \$24.5 million — \$29.5 million for corporations and \$3.6 million for financial institutions. Another law affecting corporations is the most voluminous bill enacted in 1972. It is known as the New Corporation Code. In bill form it ran 144 pages.

It is patterned after the corporation code of the state of Delaware. It is designed to allow more flexibility in corporate operation. In some instances it may provide more protection for stockholders than under the former Kansas code.

Two other voluminous laws effective are the first steps taken by the legislature to carry out much-discussed executive reorganization. In bill form, the two measures totaled 239 pages.

One creates a new Department of Administration; the other a new Department of Revenue.

The top administration official in each department will be known as a secretary — secretary of revenue,

secretary of administration for possible eventual cabinet form of government in the executive branch.

Among other new laws becoming effective are measures which:

- Make it a felony to possess, make or transfer any device (such as the publicized "little black box") used for the theft of telecommunication service, or to publish information regarding methods for such thefts.

- Provide for licensing of pet dealers, pet shops, animal shelters and municipal pounds, bringing Kansas laws into conformity with the federal Animal Welfare Act.

- Authorize cities and counties to establish economic development programs and to levy a tax to finance them.

- Authorize the state architect to adopt rules and regulations incorporating by reference the codes of the American National Standards Institute for the construction of

mobile homes and recreational vehicles. The law also authorizes establishment of a comprehensive inspection system to insure compliance with the standards.

- Provides for licensing of pawnbrokers and regulation of the pawnbroking business.

- Increases the annual license renewal fee for pest control operators from \$50 to \$100, and for tree pest control operators from \$25 to \$100.

- Required the state Board of Regents to maintain a register of physicians' assistants.

- Creates a coordinated system of drug control which classifies all narcotics, marijuana and other danger drugs subject to control into five schedules, and establishes a registration and regulatory system covering legitimate handlers of the controlled substances.

Works like a truck.

What a difference Ford's two front axles make. Pickup driving becomes pure pleasure. Steering is steady, precise. Cornering is flat with little sidesway on curves. Nosedive when braking is practically eliminated. This is Ford's exclusive Twin-I-Beam independent front suspension—with a forged I-beam axle and big coil spring for each front wheel so each wheel steps over bumps independently and cushions the ride. In the rear, a unique leaf-spring suspension is offered that automatically adjusts spring stiffness to keep

the ride smooth, whether loaded or light. And Fords are built to stand up under big loads, too. 92 out of every 100 Ford trucks sold in the past 12 years are still on the job. Visit your Ford Dealer soon. Get a fully detailed pickup catalog and test-drive a new Ford. Sit back in a cab that's roomy enough for three broad-shouldered men and quiet enough to enjoy stereo music. Experience the ride, the handling, and the comfort you thought only a passenger car could offer.

\$28 Billion Wasted On Educating Failures

It costs U.S. taxpayers \$28 billion each year to "educate" some 2.5 million young people for potential failure.

That fact is contained in an education briefing paper published by the media service of the U.S. Office of Education.

"There are more than 20,000 possible careers in America, diverse enough to encompass everyone's interests and abilities," according to the briefing paper. "Yet, 2.5 million young people each year graduate from high school or drop out of high school or college with no planned career and few, if any, marketable skills," it continues.

The concept of career education is an effort to reverse this trend

through a systematic approach designed to acquaint students with the world of work in their elementary and junior high school years and to prepare them in high school and college to enter and advance in a career field of their own choosing.

It also can be applied to adults who wish to re-enter formal education to upgrade their skills in an established career, or who wish to enter a new field.

Career education is not a program so much as it is a concept to be adapted to the needs of each state and community, said Dr. Arvin Blome, head of the department of education chairman of the Career Education Coordinating Council at Colorado State University.

The U.S. Office of Education, a division of the U.S. Department of Health, Education and Welfare, is developing four models to help schools, colleges, employers and other first to visualize, then develop, their own approaches to the career education concept.

The media service publication explains each model in detail.

In the school-based model, career education involves making children at the elementary level aware of the many fields of endeavor open to them in coming years. Teachers are trained to relate a lesson to a career.

At the junior high school level, students are encouraged to explore in depth several broad career clusters. Initially, the U.S. Office of Education has grouped the 20,000 plus careers into 15 clusters for easier classroom presentation.

By senior high, each student should have made a tentative career selection and begun appropriate training which may include in-service training in addition to academic work.

Under the concept, each student would leave high school with a skill that has market value immediately or that could be applied to advanced

education for a professional degree.

About 85,000 students are expected to become fully involved next fall. In addition, 100 mini-model projects, at least one in each state, are serving some 700,000 students under small grants authorized by the Vocational Education Amendments of 1968.

A second model, employer-based, involves a total education program for a cross-section of youngsters, ages 13 to 18, who find their school offerings unchallenging and want to try a different approach to learning.

It would use employer know-how and, where appropriate, employer facilities in providing both academic and job-related preparation.

Graduates of the program would possess credentials at least equivalent to those offered by their high school, or they would return to school with full credit for work completed.

Projects serving about 100 students each are to become operational in at least four areas this fall.

A home-community model is designed to enhance the employability of out-of-school adults. It would utilize television and radio programs to encourage people to use the career preparation services

available in their own communities. That model is still being developed.

A rural residential model for disadvantaged families living in remote areas with few career opportunities provides a chance to move temporarily to a training center where every family member could learn new skills for employment, homemaking or further study.

The first group of families is now training at a pilot center near Glasgow, Montana. By fall, about 200 families are expected to be in residence.

THURS., JULY 20

Farm Political Muscle Withering

Like the old gray mare, the farm political muscle isn't what she used to be. But the Republicans and Democrats alike, are still courting the nation's farm bloc.

In 1920, 32 million Americans, one-third of the nation's total population, lived on farms and farm issues played a major role in political campaigns at both the local and national level.

Today only 10 million persons, less than five per cent of the total population, are farm people.

And, says one GOP farm strategist, farmers will cast their votes this year like the rest of the country — on the basis of such issues as Vietnam and the economy rather than clearcut farm issues.

Even such farm advocates as Rep. W. R. Poage, D-Tex., chairman of the House Agriculture Committee, concede that the farmer's political muscle has withered.

"I doubt if farmers, by themselves, could even elect a county attorney in most places," Poage says.

Economics has forced many small farms out of existence and today fewer farms are producing more and more. That trend appears certain to continue.

The larger and more efficient producers are getting bigger and more efficient. The small producers are going out of business.

Nearly one-third, or approximately one million of the nation's farms sell \$2,500 or less in products annually.

Government analysts say many of these farms are part-time operations run by semi-retired people who prefer to live on the land. Collectively, they produce less than three per cent of the nation's food and fiber.

More than half of the U.S.

agricultural output comes from fewer than 250,000 farms, most of them family owned and operated, whose sales total at least \$40,000 per year. Ninety per cent of the farm output comes from one-third of the farms — those with annual sales of \$10,000 or more.

Thus, nearly two-thirds of the nation's farms account for only 10 per cent of the output.

Jobs in town have become a way of life and survival, particularly for smaller farmers.

The farms with \$2,500 or less in annual sales net an average of \$1,000 a year while nonfarm jobs, at local factories and other businesses, are providing an average of \$8,000 a year, to each of these small-farm families.

This year, according to Agriculture Department projections, farm families may take home \$18 billion or more from non-farm jobs, more than the record \$17.5 billion predicted by administration officials as farm income.

"Off-farm income is not only the best farm crop, it is better than all the farm crops combined, plus all the livestock, plus all the government payments," says Dr. Don Paarlberg, director of economics for the Agriculture Department.

Thus, rural development in the form of federal programs aimed at improving job opportunities and income for all people in the countryside, is an essential part of 1972 political talk for both parties.

The forecast is for a continued decline in farm numbers.

By 1980, according to one USDA projection, nearly one million more

farms will be absorbed into larger units. By then, says one report, about 95,000 super farms will be producing more than half the nation's food and fiber.

Aldrin, Dieldrin
Could Be Banned

Continued use of aldrin and dieldrin to fight corn rootworm and other insect pests may be near end. The U.S. Environmental Protection Agency administrator William D. Ruckelshaus, reaffirmed his order cancelling most of the use of aldrin and dieldrin effective 25 unless further processing become necessary because of challenges by registrants. Scientists claim aldrin and dieldrin are DDT, persistent in the soil and up to harm fish, birds and wildlife. Use of the pair has been declining since 1966, the peak year because of developing resistance and substitute pesticides.

The Flying Realtor
Offers

An established well-stocked hardware business in Salina, Ks. since 1902. Priced at \$32,500, including inventory. Details upon request.

80 acres well improved, 2 1/2 miles north of Riley, Kansas. Pretty new home, with bath and half. Will sell all in one unit or home plus 5 acres with garage. Very nice and will sell.

160 acres improved farm, approximately 130 acres tillable, 1 mile west, 1/2 mile south of Ames, Kansas.
400 acres most all tillable, 10 miles north of Delphos, Ks.
160 acres balance ground, 1/2 mile east, 2 1/2 miles north of Aurora, Kansas.
160 acres most all tillable, 1 1/2 mile east, 2 miles north of Aurora, Kansas.

AUTOMOTIVE PARTS
& REPAIR BUSINESS

This well-established business is located at Osborne, Kansas. Carries an average \$40,000 parts inventory — showing a nice return. County seat town. Complete one stop repair including front end overhaul & radiator shop. Excellent Red Carpet treatment with delightful office and bookkeeping system. Value enhanced with its exclusive location — Owner states no other complete automotive parts store within 35 to 40 miles. Value packed with six inside stalls — one drive through, four full time mechanics, one full time & one part time bookkeeper. A near new building designed thru experience. Priced to sell and selling for health reasons.

Need a Number One cattle ranch? We have just the place. 1200 acres all grass with good improvements, 4 windmills, good ponds, plenty of water. On blacktop hiway 9 miles north of Lincoln, Ks. Will sell on low contract. This place is well worth the money.

MACHINERY & MOSTLY PLOW — SALE

New Case 5x16 plow at ri-
diculous price. New Case 6-bot-
tom 16" plow at \$1339. Late 4-
bottom high clearance plow
\$449.

Martha & John back together
again. Bet that's better than
being with Dick.

New Case 3 bottom wheel
plow, high clearance, only \$469.
New Case 3 bottom mounted
plow \$349. Fast hitch IHC 4-
bottom plow \$89.

Late model IHC fast hitch
plow \$149. Later IHC fast hitch
trip beam plow \$179. Centen-
nial Case 4 bottom plow, fair
to good plow, \$169.

Marion Dam still holding in
spite of the leak — very few
people are moving out. See
where they are drilling wells to
pump the water into so no one
can see the leak. Near new Allis
5 bottom 3 pt. semi-mounted
plow only \$799. Raised the price
on this.

New Case 5 bottom 16" plow,
semi-mounted, no cutters, \$1049.
IHC 4 bottom wheel plow, good
cutter \$149. IHC silage blower,
good set of pipe, \$69.

work, \$349. Allis WD cultivator
\$39. Case 4 row cultivator,
could fit 400-700-800 or 830, \$239.

Case springtooth 5 section
wheel carrier \$169. Blair feed
wagons at big discounts.

Looks like we got some beau-
tiful snow jobs coming up in
Miami Beach. Can't hardly
wait till they are over. Kissin-
ger should be the next presi-
dent — he seems to make all
the arrangements. Looks like
Spiro T is out. Connally travel-
ing the world seeing what he
can (give away.)

We have 5 big 900 & 930
diesel tractors, ideal for your
big plowin job.
1032 tractor, big 5-6 plow
job with 3 pt. hitch and wide
tires only \$1950.

Just traded for one 500 dsl.
tractor, a big unit, power steer-
ing & hydraulics, looks like
new. Near new tires. Price you
wouldn't believe.

Still have one good 830 LP
left, row crop unit, only \$2450.
D-14 Allis, reworked, has new
paint, near new tires, \$1095.
John Deere 830 diesel tractor,
will take less this week.

Write your favorite do-gooder
a letter, tell him not to raise
the tax.

Building Material Takes New Image, Keeps Durability

New building materials that have been appearing on the market in recent years are not inferior synthetics — they are products of raw wood fibers that serve construction needs as suitably as solid wood.

Plywood, chipboard, fiberboard, particle board, and impregnated paper, are among the durable byproducts of solid wood that are being used more and more in construction, point out two Extension specialists at Kansas State University.

The specialists, forester Leonard Gould and architect Dale Schindler, point out that only 65 percent of a tree processed in a logging operation is utilized as solid wood.

When U.S. forests were relatively free of stress, there was no need to utilize the waste residues. Getting more out of a tree today is helping to extend the life of forests, one of this country's most important renewable resources.

A greater demand for wood resulting from increased population brought on the necessity for utilizing more of a tree for construction purposes.

Gould and Schindler say building products made from what was once considered waste are manufactured by various processes, including cooking, chipping, compressing, drying, and gluing under extreme pressure. The important thing is that they are made of wood fibers and are therefore durable and longlasting.

Construction purposes for which they are used include siding, sheathing, roofing, insulating, sub-floors, door cores, and counter tops.

Another factor in the use of more wood fiber and less solid wood is the

aesthetic value of such fine wood as walnut and maple, which are used as veneered exteriors of furniture.

Still another factor is the dwindling amount and quality of "inch" wood, lumber once used frequently in construction. Smaller mills, which have manufactured this type of lumber, have had to cut back because of more stringent safety laws and increased cost of labor and transportation.

With less inch lumber being made by smaller mills, the larger firms are producing more plywood and studs (such as 2 x 4s and 2 x 8s) for use in construction.

Using Respirators Important In Hostile Atmosphere

Farmers and ranchers have always had to contend with dust and chaff. Now they must deal with chemicals and work in the hostile atmospheres of silos and large concentrations of animal waste.

That's why it is important for farm workers to wear respirators for certain chores, such as handling and applying chemicals; cleaning and maintaining manure storage tanks or pits, and silo; working in dusty places or where molds are present, and using solvents that give off toxic fumes.

Leo Wendling, Extension agricultural engineer at KSU, says five types of respirators are available for farm use:

Dust filter mask: Has a filter of fibrous material that traps particles out of the air but does not protect against chemical vapors, gases, or sprays. For use in haying, combining, milling, cultivating dusty fields, clean-up operations in poultry houses.

Cartridge respirator: Has a half-face mask that covers the nose and mouth, but not the eyes. One or two cartridges are attached to the facepiece. An absorbent material such as activated charcoal, plus dust filters, purify the air that is breathed. For use when applying pesticides.

Cannister respirator: A gas mask that covers the entire face. Contains more absorbing material and has longer-life filters than the cartridge

July 11, 1972

type. Also for use when applying chemicals.

Supplied air respirator: Brings in air through a hose, from a safe distant supply. Operator's hood is connected by hose to a source of outside fresh air, usually pumped by a blower. For use in working silos, grain elevators, around manure pits and waste storage lagoons.

Self-contained breathing apparatus: Permits operator to take air supply with him for short term jobs. Mask is connected to an oxygen cylinder carried on operator's back. Also for use in working silo, grain elevators and manure pits.

Wheat Processing Plant Planned For Manhattan

MANHATTAN — International Multifoods, Inc., announced that a \$1.3 million wheat-germ processing plant would be located here.

At a special meeting, the Manhattan City Commission approved issuance of \$1.3 million in industrial revenue bonds for construction of the facility, which will be operated by Kretschmer Wheat Germ, a subsidiary of International Multifoods, Inc.

Grant Wood, product manager for International Multifoods, said the plant would employ 30 to 40 people, most of whom would be hired from the local labor market.

The plant site is east of the McCalls plant and north of US-24 in the northeast part of the city.

Wood said construction of the 32,000 square foot facility would probably begin in August with full-scale operations to start about Jan. 1, 1973.

Wood said raw wheat germ would be hauled into the Manhattan plant where it would be toasted and packaged for distribution in the western and southwestern portions of the country.

Granola, another cereal product, also will be processed and packaged in the new plant, Wood said.

Wood said the industrial revenue bonds would be used to fund the building, land purchase and process equipment.

Marriage Mill On Out-Of-State Weddings Starting

The lowering of the legal age of majority to 18 may turn Kansas into a marriage mill for out-of-state couples in the 18-20 age bracket.

At least that's the prediction of Sedgwick County Probate Court Judge Clark Owens, who said his office already has had one couple from Arkansas file for and receive a Kansas marriage license.

The reduction from 21 to 18 for the legal age of majority became effective July 1 and allows 18-year-olds the same rights as 21-year-olds previously had except for the purchase and consumption of liquor.

Judge Owens said the legal age reduction will not have much effect on younger Kansans' marriage patterns because "most of those who were between 18 and 21 could get their parents' consent."

As far as marriages, the new law actually only affects the male;

previously, a woman could marry at 18 without parental consent.

According to the judge, he automatically gave his consent to the marriage of an 18-to-20-year-old male if the parents gave theirs.

Previously, Owens said he did ask for the sub-18-year-old male to provide three things before he consented. One was a marriage counseling report, the second a proof-of-employment statement, and finally, the consent of both parents.

The judge said he based his marriage mill prediction on that fact that all the states adjoining Kansas still have laws requiring parental consent for 18-to-20-year-old males.

"It used to be that many young people would run down to Oklahoma to avoid all the questions of consent. Miami, Okla., used to be a favorite spot and they didn't scrutinize affidavits of consent very carefully," Owens said.

"Of course that's all changed and Oklahoma has tightened up their marriage requirements comparable to every place else," he added.

The one drawback Owens said he could see in the removal of the parental consent qualification for 18-

year-old males was the educational aspect.

"There were a certain number of 18-19-and-20-year-old males who knew they couldn't get their parents' consent even though they knew they had found their one and only," the judge said.

"As a result they had some time to look around, go to college and in some cases take some special job training courses," the judge continued.

According to Owens, this extra time for further training allowed many of the young men to go into the labor force with better advantages than if they simply got married.

"There also is the aspect that many of those young men who were so ready to get married found out while waiting around they really didn't want to marry. Others, in fact, end up marrying someone else," Owens said.

Olsburg Girl Shows Top Angus Heifers At NEK Show

Sharee Laflin, Olsburg, showed the grand champion and reserve champion heifers at the 11th Annual Northeast Kansas Junior Angus Association Show June 23 at Holton, Kansas.

Dr. Bill Able, Department of Animal Science and Industry, Kansas State University, judged the show of 41 heifers and 9 steers.

Kevin Davies, Robinson, showed the grand champion steer and Sharee Laflin exhibited the reserve champion steer.

Top four placings in the home-raised heifers class were shown by Bobby Laflin, Olsburg; Suzanne Shaw, Topeka; Charles Maxfield, Arrington and Sandra Shaw, Topeka. Mr. and Mrs. Harry Dandliker, Hiawatha, sponsored awards for the class.

Senior showman was Lori Hagenbuch, Lawrence, and Larry Hagenbuch, Lawrence, was chosen junior showman.

Club by-laws were adopted during the association's annual meeting. Elected as 1972-73 officers were Lori Hagenbuch, Lawrence, president; Linda Raab, Topeka, vice president; Lynn Hagenbuch, Lawrence, secretary-treasurer and Suzanne Shaw, Topeka, reporter.

Phil Ljungdahl, secretary-fieldman for the Kansas Angus Association, served as ring master. Robert Wareham, Jackson County

FFA LEADER TO WASHINGTON

Mr. and Mrs. Earl Wineinger, Topeka, were recently recognized for the years of service to the Kansas Association of FFA. The recognition was given as Wineinger joins the National FFA staff in the Washington D. C. area in July. Presenting an engraved colonial clock is State FFA president, Mark Mayfield, Caney. Wineinger has taught vocational agriculture in Kansas High school systems in Florence, Columbus, and Kingman. He is the son of Mr. and Mrs. Walter Wineinger of Norwich.

Set-Aside Program Yields \$1.1 Billion To U.S. Farmers

Government subsidy checks totaling \$1.1 billion are being mailed to 955,000 farmers as partial payment for co-operating in acreage set-aside programs for feed grain, wheat and cotton this year.

Officials said most eligible farmers should have their checks by the end of July.

Eventually, including final settlements later on, the payments will total a record \$3.7 billion in compensation to farmers, the department said.

In 1971, payments for the crop set-aside program totalled about 2.8

billion. The previous high was \$3.3 billion in 1970.

When final settlements are made, the 1972 payments will include an estimated \$1.9 billion for feed grain producers; \$825 million for cotton; and about \$1 billion for wheat.

Over Half Million Dollars To Fish And Game Dept.

PRATT — More than a half million dollars in federal aid has been apportioned to the Kansas Forestry, Fish and Game Commission for use in 1973, it was announced by Lee Queal, Pratt, federal aid coordinator for the

The funds, \$437,196 for wildlife restoration, \$36,173 for hunter safety and \$93,811 for fish restoration, represent the first of two apportionments for use in fiscal year 1973, with additional sums to be announced in December.

The federal aid money for wildlife restoration projects and hunter safety programs comes from the 11 per cent excise tax on sporting arms and ammunition and the 10 per cent excise tax on pistols and revolvers. The amount for fish restoration is generated through a 10 per cent tax on fishing rods, reels, creels and artificial baits, lures and flies.

Hunters and fishermen of Kansas last year contributed more than \$2.36 million to the Commission in their purchases of hunting and fishing licenses.

Flavoring Water Changes Catfish Taste To Licorice

MANHATTAN — Prime-tasting midwestern catfish is a joy to eat. Sometimes, however, catfish is not a favorite even among food fish lovers, and is downright revolting to fish haters.

But a research team at Kansas State University, has made a discovery which may make catfish palatable for the fish haters and a gourmet's delight for fish lovers — they have found that catfish can be re-flavored by the water they live in.

It all began when Dr. Otto Tiemeier, wildlife conservationist, and Dr. Charles Deyoe, professor of fish science, wondered aloud to Dr.

Jean Caul, professor of foods and nutrition and an expert in flavor and how flavor affects food, if catfish differed in flavor according to what they were fed. The three decided to investigate.

The three received enough financial help from the Kansas State Experiment Station and the State of Kansas Forestry, Fish and Game Commission to hire an assistant, Lilia Maligalig, a graduate in foods and nutrition, to work on the project. Together Dr. Caul and Miss Maligalig began cleaning, cooking, and tasting the fish raised by Tiemeier at the Tuttle Creek Fisheries Research Laboratory.

"After awhile we began running into a muddy taste in the fish we were sampling," Dr. Caul recalled. "The fish tasted like a river bottom. All catfish farmers run into this sometimes, but this seemed strange to me because the ponds the fish were raised in were completely

plastic lined. I didn't realize then that there are organisms in mud that make mud smell like mud, and that the taste came from some of the organisms, such as algae, living in the water."

Dr. Caul changed her emphasis to finding out how the fish acquired their muddy taste.

"This was an exciting discovery — I wondered, if fish can be flavored with these non-food type chemicals, what other possibilities exist." Dr. Caul said. She and Miss Maligalig experimented with adding saccharine, anethol (licorice flavor,

onion juice, powdered garlic, and smoke flavor to the water — and came up with fish that tasted like saccharine, licorice, onion, garlic, and hickory smoke.

"We haven't tried lemon flavoring yet and we should — then the fish would taste like Hollandaise sauce," Dr. Caul commented. Being a smoked fish fan, she also is interested in trying different varieties of the smoked flavoring.

The researchers are now trying to identify precisely how the fish acquire the flavor.

"We need to know what the

mechanism is for pre-flavoring the fish. Is the flavor only in certain areas or is it all over the fish? And how does it get there so fast?" Dr. Caul said. "We have been hampered by lack of funds for more extensive research, however."

"The implications can be far reaching," she added. "Midwestern catfish aren't very popular because of the muddy taste they sometimes have. If we could find the cause and eliminate the muddy taste, and have good fish available in our favorite flavor, it would be a boon to Midwestern fish farmers."

Senior Citizen Green Thumb Program Approved

The Green Thumb program has been approved for Kansas by the U.S. Department of Labor, U.S. Rep. Garner E. Shriver and U.S. Sen. James B. Pearson, Kansas Republicans, announced.

The new program will provide job opportunities for 59 elderly, low-income persons in rural areas to work on community betterment, conservation, beautification, park development and historical restoration projects.

Shriver said the favorable action culminates a three-year effort to secure the rural-oriented program for senior citizens for Kansas.

The program is funded by the Labor Department under Operation Mainstream and it is sponsored by the National Farmers Union. It operates in 17 states.
