GRANGE FLATLY OPPOSES TRIPPLE F. B. EXTENSION

President Vesecky Endorses Grange Stand In Regard To Administration Farm Programs

FUNDAMENTAL CHANGES NEEDED

State Colleges And Extension De partments Must, As Nearly As Possible. Have Support Of

All Farmers

BY JOHN VESECKY
I am very glad that the Grange
has in a resolution recently adopted by its National Convention, come cut unequivocally in opposition to the triple morganatic union between the Extension services of the State Colleges the various administration Farm Programs and the State and National Farm Bureau Federations.

I have no objections to the members of this triple Entente individually. The extension services of the various State colleges renders needed and valuable service to the farmers of the United States in helping to bring to them the results of experi-ments carried on by the colleges and the state and Federal experiment stations. I have criticized a part of the Administration farm programs, principally because I believed that they would not do the job for which they were intended, and were not sufficiently farmer controlled, still I did my best as President of the Kansas Farmers Union to get all the good there was in them for our farmers. I am firmly convinced that with some fundamental changes in direction and control much good may

be accomplished through them. I have the highest regards for the leadership and membership of the Kansas Farm Bureau. I personally am acquainted with practically all the leaders of the Bureau in Kansas and with many of the leaders in other states. They are men of integrity and ability. As an independent, self-sustaining farm organization, the Farm Bureau Federations could be far more effective force in this fight for equality for agriculture than it can be under this Morganatic

The State colleges and their extension departments in order to render the most valuable services to ure must as near as possible have the support of all the farmers. Such a system as we have in Kansas where the county agent must each year get 250 farmers or 1-4 of the farmers in the county into the Farm Bureau before the county commissioners can appropriate money for his wages, is not conducive to such united support of all farmers, especially of farmers belonging to other farm organizations, who feel that their tax money is being used to | build up a rival farm organization, and that the members of that rival organization receive benefits and favors which are denied those who do not see fit to join the Farm Bureau.

As long as the Extension departments of our state colleges are largely supported by money contributed through taxes by both members and non members of the Farm Bureau Federations they should be either, affiliated with all state wide farm organizations who wish such affiliation, or with none.

All farm legislation depends for its efficent operation on the United support of all those effected by it. Republics depend for their very existence upon the intelligence of their cit' and upon the ability of the citizens to govern themselves. All laws passed for the betterment of agriculture should provide for the maximum of self government by the farmers through officials selected by them and to the larges possible degree responsive to their wishes and needs. Even the best farm program is bound to fall far short of its possibilities for good if its administration is vested in an agency such as the extension service set up for educational purposes and not for control purposes, and largely composed of people who are good educators but with little or no training or experience to fit them to properly ad-

minister the programs. So let us have a divorce or an amulment of the triple morganatic union. Let us again make the Extension departments useful as educational institutions. Let us have all farm programs democratically operated by officials selected by the cooperating farmers themselves, with a minimum of government control or intervention. Let the Farm Bureau become an independent farm organization, working on an equal basis with our other great farm organizations for the betterment of conditions on our farms and for the preservations of our liberties.

TALKS ABOUT WAR High praise and flattering notices have reached us about the book written by the All-Staters, as they are called. The National Farm Holiday News, not only gives it a fine review, but publishes an entire chapter of it, in order to give the reader an idea of its contents.

'A really remarkable piece work," says President Keeney of the Nebraska Farmers Union. 'I don't know when I have seen a book which interested me more," is tion, he even saves time. the comment of Jim Patton, Colorado

fine work," says the mother of a Jun- the rules should be changed so the

Send List to State Secretary
We have received a few returns on the National refer-

endum which were not accompanied by a list of the dues paying members present at the meeting and voting on the referendum. As it is necessary for your state office to have that list so that we can check up on the members voting to see if all of them are in GOOD STANDING for 1937 and eligible to vote on a national referendum, we will of a necessity be compelled to hold back the returns which are not accompanied by the required list until we receive a list certified to by the local officers.

Please remember that your returns must be in the hands of the National Secretary not later than December 7, so if you have not yet voted on the proposition, see that your local meets at once and that all dues paying members are notified of the meeting. At the meeting have your secretary carefully read ALL the instructions and communications from the state office and the National Secretary. After you have fully considered and discussed the proposed amendment, proceed to vote. Make a list of all those voting and send both the list and the election certificate to the state secretary by the first mail.

Report Of The Farmers Union Auditing Ass'n

Mr. Dunn, Secretary-Manager, askd that the officers and Directors of hat association please come to the platform. H. E. Witham, President; Anton Peterson of Greenleaf; John Huber of Selden; P. H. Heidecker of Paola; and John McDaniel of Edson came to the platform.

Mr. Dunn- Your auditing assocition has been in operation since 1919. The Auditing Association is a service branch of the Farmers Union. We give service at the lowest possible rate. We write bonds and we are glad to have you give us your business. H. E. Witham our President, was one of the organizers of he Auditing Association. Also Anton Peterson and John Huber. These three gentlemen were in the group vesterday who received those Honor nedals. They have had experience. have been on this platform several times since yesterday morning, giving reports of your state wide ousiness associations, for we audit their books regularly. I want you to hear from some of your directors.

many advantages and departments that can and do give us advice. Our financial statement says we have only \$300 accounts receivable. Mr. Dunn is considerable of a sticker and adviser to us managers in keeping the accounts receivab'e down. He has convinced us it can be done.

There is a great need for this organization. Our meeting at Manhattan in 1915 appointed a committee to look into the matter of an auditing association. It seems to have taken us four years to get this auditing association started. This organization has done fine service and good work since it was started. It is yours. Use

its service. P. H. Heidecker-We have the best auditing association there is in the state of Kansas. These business associations out in the country better get busy and have the auditing association audit their books. When they have had them once, they never will have any one else.

Anton Peterson-I feel honored to belong to any association of this kind. I got a medal yesterday and I'm mighty proud of that too. The Farmers Union organization, and its other state wide associations are the best there is any place.

John Huber-I am proud that I have been with you for 25 years. I expect my great grandson to wear this medal some day and I hope he will be as loyal to the organization as I have tried to be and as I expect you to be. I am wondering if we have any of the business managers present here today. If so, I hope they will turn their business over to the Auditing Association. I am sure you will be glad that you have. Selden is going to come back on the map. We had 240 members at one time, and we are going to come back to the Union with that number or

John McDaniel-I am the newest member on the Board. I do not think we would have been on the map and operating our business today at Brewster if we had not had our books audited by our own organization. We have confidence in it. They give us good advice. We believe in them and they have never made any mistakes in their advice to us. As soon as we began to have our books audited by our own association ve began to grow. I would advise any local business association that has not had an audit that they begin right away, if they want a substantial organiza-

T. B. Dunn-The Auditing Association's time is about up. I want to again thank you for your patronage. The auditors of your association are there to help you. Every auditor on the force has been brought up on the farm and understands the difficulties that might develop. This is a farm organization. It is your organization. We will appreciate your patranage. We Thank You.

John Vesecky:- ? You can see we have a Scotchman at the head of the Auditing Associa-

I told the Senate Sub-committee for the good of the cooperative Farmers Union Secretary. tee for the good of the cooperative "I had no idea they could so such organizations the Revenue law or who assures us that her son will cooperatives could keep the savings be at All-State Camp another year. I of one year to pay the losses of the Japan and Siam.

previous year without being penalized, and so they could hold their meetings after the end of the year vithout paying taxes on the surplus. It is absolutely impossible for a cooperative organization to know what their savings are until their books are closed on the last day of

the year.
I would like to have the cooperatives in Kansas send to the state ofready to fight this thing. With the help of the Auditing Association, we are going to take this up with the Revenue Department and Congress, and find some way, to correct this injustice to cooperatives. I wish you would cooperate with us and help

JOBBING ASS'N AT CONVENTION

(Continued from last week) ery phase of our statewide business. If they were not of any value to us the older members who were in this group would not have organized hem in the lirst place.

I would like to go and point out a number of benefits of each of those organizations. I hope every H. E. Witham—I am proud of the auditing association. I know it has manager, member and director will advantages and departments go home and endeavor to see that go home and endeavor to see that through those statewide business organizations. Not only that, but that he will do everything wihin his power to get his neighbbrs to cooperate and put their business through their own organization. I do not know how we, as managers, can do otherwise than try to back our own associations, we ask our members to cooper-

ate with us. If we expect our members to copperate with us we have to cooperate with the statewide groups. We are building a marketing machine big enough to market the farmers products for him. It is your and my job to biuld that organization. We have more than a job as just managing the affairs of our organizaion. We have the job of building an organization big enough to give the producer the representation in marketing his products which he should

H. E. Witham-Ernest also made talk last right at the banquet. Some of you perhaps are here who were not there last night. One of the things he said was when his brother Jimmie was making application for the job as manager of the Commission company at Dodge City, the Directors gave Jimmie to understand they were stockholders of the Farmers Cooperative Commission Company and there was where their wheat must go, and they were not interested in any

one elses bids. I do want you to hear Mr. Tom Hall for a few moments. He will be here all during the convention. He wa, to meet you. He will help you with your problems, or your organ-

ization work. Mr. Tom Hall-Most of you heard Glen Talbott and your president Mr. Vesecky talk on membership yesterlay afternoon. The way we hope to of service to your local organizations is to help you get action in your membership. You older members know the advantages your organization has been to he community and those things mentioned in those talks were pertinent. They were the way we would like to be of help in putting across this program to your stockholders and patrons. We are going to come to your station it down with you as managers and lirectors and find what you want. Then we are going to try to help you do it.

H. E. Witham-This will conclude he part the Farmers Union Jobbing Association has on the program of the state union. Thank you for your attention and I would like to resolve with you that we can come back to convention next year and make a report doubling what we have this time. We can do that with your support.

Twenty-seven years ago the righthand steering wheel moved over to its present place in the car. That same year automobile clubs promoted popular hill climbing contests. Many years elapsed before the "descend in low gear" signs began to disappear.

I thank you.

OKLAHOMA CITY CONVENTION ONE OF LARGEST

Tuesday Evening Was Devoted To Entertainment And Pleasure

OKLAHOMA LIKES GRAVES

All Organized States And Many Unorganized States Were Represented By Delegates

The 33rd National Farmers Union Convention which was held in Okahoma City, Okla., November 16-17-18, was said, by many of those attending, to be one of the largest and mose enthusiastic national conventions held in recent years. Although and many of the roads were in rather poor traveling condition, still the folks kept coming in by auto, bus and train until practically every state in the Union which has any Farmers Union locals and all the organized states were represented by not one but by several delegates and visitors. The Oklahoma Farmers Union was the perfect host and left nothing undone to make the convention a success and the stay of the Farmers Union visitors to their metropolis a pleasant experience long to be remembered. President Cheek; Secretary Lawter; Reger; Chambers; Hyde; Junior leader Pratt; and in fact ill the officials and members of the Oklahoma Farmers Union did Their Oklahoma Best to make our stay pleasant. The one fact standing out above all else though was the sincere love and respect with which Oklahoma Farmers regard their old neihbor and co-worker, National Secretary Jim Graves. Every time his name was mentioned there was loud cheering and on every hand one heard approval of his re-election to the National Secretaryship.

It is not ever possible for one to inoculate his listeners with the en-thusiasm they gain from attending a convention, whether it is our own county meeting, a state convention or a national convention. A person must be present to receive all the benefits which come from such meet-

There were a goodly number, not as many as might be desired, but

We did not get to visit with all hose from Kansas, but will give you a partial list of those in attendance. Reuben Peterson, John Vesecky, Pauline Cowger, Esther Ekblad, H. E. Witham, J. C. Gregory, Dale Wan-amaker, J. O. Newbrey, Mr. and Mrs. John Frost, Ross Palenske, John Fengel, F. C. Gerstenberger, Mr. and Mrs. M. L. Beckman, H. H. Beckman, Mr. and Mrs. F. B. Roots, Mrs. Roots, L. J. Alkire, T. B. Dunn, G. W. Hobbs, Joe Erwin, Ted Belden, C. N. Martin, George Bicknell, C. A. Ward, Rex Lear, Chester Chapman, and Joe Bamfield.

Tuesday evening of the National convention was one of entertainment and pleasure. Different kinds of contests were held, and every one surely had a good time. Zed Lawter, and Mr. Pratt were the masters of cere-

mony. One of the contests was for the tallest man-and Dale Wanamaker of Blue Rapids was urged to enter, and compete with representatives from other states. He was not the very tallest, but was the second. tallest man at the Convention.

Thursday evening, the election of officers for the coming year was the order of business. The officers and Directors were nominated, and in each instance, they were elected by the Secretary being instructed to cast the unanimous ballot of the dele-

gates for those officials. These people are all well known to members of the Kansas Farmers Union, and no better set of officials has ever been selected to have charge of the affairs of our National Far ...-

NATIONAL SECRETARY

J. M. GRAVES

Report Of The Farmers Union Royalty Company

The Farmers Union Royalty Company told of the interesting progress in that department during the last year. Mr. G. E. Creitz had charge of this part of the program, and asked that A. D. Rice, President and John Frost and John Huber, Board members present in the meeting, please come to the platform.
Mr. Creitz:—

We realize there has been some objection to the Royalty Company, but we believe that is because you have not clearly understood the whole situation. We have been going along, helping where we could, and we have secured some of our members much higher lease rates than they were offered individually. The pool is a cooperative way of pooling our min-eral riches. It is cooperation on a

considerable scale. We have began to realize one of our objectives. Just about a week ago the first well on pooled land was brought in in Rooks county. This well is reported to flow naturally 1200 barrels a day. The potential production of this well is 1200 barrels day. That does not mean that it will produce that much every day. Kansas is under proration and it will be and it is a good thing. That it is for the reason that if it were nat, a lot of oil would be pumped to the surface and wasted and we would not conserve our natural res-

MRS. GLADYS TALBOTT EDWARDS

Place To Build A Cooperative Is Where There Is Need For It

FEELS AT HOME IN KANSAS

North Dakota Has Lead Junior Group For Seven Years; Have Own President

Mrs. Edwards .-I feel rather at home here in Kansas, I am glad to be down here with

think of our children often. As an organization, have we thought of them much. We mortgage our farms for them to send them away that they can have an education. We live under the kind of a system that we cannot educate our children as we should like to have them educated. America is supposed to have the highest standard of living of any country in the world. We have given our children book education. We ' have taught them how to do things but not how to make a living. How to run a typewriter and do that kind of work, and they still do not know where and how to get that education they need to prepare them for life.

Yesterday you had a beautiful ceremony. Awards to members of 25 years or over membership in the Kansas Farmers Union. If you had started Junior education work back 25 years ago when you started your Farmers Union, you would not need to be worrying about putting on an organization program now. You went ahead and worked to give your children a better education and thought you had made it a little easier for the kids. When they come out of schools, there is no footing to get ahead and make a living. Some one has said that "he is the best educated who is the most useful." After these young people find there s no place for them to work, they begin to feel discouraged. Then, we have another problem. It is a serious social problem.

Because our young people are discouraged and disheartened, they go to the tayerns and beer parlors and places where you would rather they did not go. These young people are called rightly, the lost generation. They are hard to handle. They are dissatisfied. No wonder they are. Educators say they are not teaching these young people right. During the Century of Progress Exposition in Chicago, the schools were let out so groups could go through the Fair grounds at a certain time, because they wished those school children to see the exhibits. The school child-ren did 't act like they had been any place before. They were vandals. They tore and took everything they could get their hand on to take home with them for souvenirs. What is the trouble with our homes to raise children

We lack stability. We have not the feeling of security. Over in the old countries, they feel the country is theirs. What are we going to do about it? We can give them the ideals of the cooperative movement and what it is. We have to give them a program of action. That is going to be a hard thing to do. It is said of the Americans, they do not know what they want. They know what they do not want, but they do not know what they want. We want a chance. Every one of those young people say the same thing. want a chance at homes, to work, to play, and to be happy. We have not been giving that to our young peo-ple. It is not your falt. You could not do it alone. This building of the farm organizations is a job, but lets give the young folks a chance in it.

You wonder how you are going to do that. Tomorrow you are going to dis cuss it with your young Junior leader. Our juniors learn in the meetings in their locals, by studying social problems. One subject is, how to bring about world peace. They learn about it in their camps, the embodi-ment of the cooperative movement. It is something you cannot talk about

and say you have it. You can not teach world brotherhood while you have enemity in these groups. You cannot teach world brotherhood unless you have brotherhood for all men in your hearts. Young people learn something in Junior camps which no other medium offers them. Fellowship, and class understanding which some of them get no place One girl, in answering the ques-

tion as to why she went to a Jun-ior camp replied—"I went to Junior camp to get out of milking cows for a week, and I found a new philosophy of life." She went back into home community and went to work. Her local has sponsored and put on 15 adio programs during the past year. Nothing can stop her. She

is really going places.

The only place to build a cooperative is where there is a definite need for it. One Junior group in looking around found that need in their school. So, they are serving hot meals at noon for the school children. They set up a service coperative. They operate a hot lunch operative at the local high school. North Dakota has had Junior work for 7 years. The Junior group nas a state president who was very little beyond the junior age at the time he went into the work. We

have a State Secretary in North Dak. a Farmers Union under 30 years of age, and he is on the National Farmers Union Board of Directors. Mary Jo Weiler, state Junior Leader, who was down here last year, is playwrite of note. She is a speaker who can make herself heard and felt in any audience. There is no

Five years ago the Junior work got its real start in North Dakota and Montana, and some of the other states. Before that time we were stumbling along trying to find the machinery to do what we wanted to do. Requests for information on the movement are now coming to my office from 32 states and other countries, requests from all over. Do you realize what a big thing this is.

Your managers of your business associations are, for the most, a young group of people. I looked at tegic positions over the state of Kantion over the state of Kansas. They cannot do it alone. You have to help What they are going to say, but you have to keep right on until you get the job done. You have a young Junic Leader in your state. Help her ort. She wants to get to work in

your territory. We hear people say, 'the young people have to build the world over again.' They have to help, but they cannot do it alone. They are anxious, but they have a lot of people who are ignorant and indeffferent to help them out. I say, get this thing going. Keep this in your mind. Every generation has had ideals and enthusiasm in their hearts. You can give to this generation of young people the machinery to build a new world. It is your job to give the tools and machinery to build a better world to live in. You still have to do that job. If you can interest only one young person who can go a good time! Yes, it seems that Mr. out and carry the torch to other Pratt just thought of everything. Bepeople, it still would be worth every

it you put in it. It must have meant so much to my his footsteps. It meant much to his children to have such a father as we had. He left us ideals and a desire to go out and carry on the work he was doing. He planted them so deepmuch wordly goods as a heritage to your children, but you can leave to be used in so many ways.
what my father left to his children. Also of much interest wa Whether you leave them a foot of Historical Museum. Such a museum land or not, you can leave them the challenge, and the knowledge to do. because of all the Indian relics. Am-As my last thought with you to-night I want to leave this little told about Oklahoma, we were poem. Its words are so very true. If you would plant for a year-plant and that in another year they are

Yours shall be many an ear of gain.

If you would plant for a decadeplant trees; Yours shall be olives and shade and

If you would plant for eternityplant men: Eternal harvest shall be yours, then. I thank you.

Ten State Junior Leaders Give Short Reports On Work Of The Year

Dear Juniors: The National Farmers Union convention held at Oklahoma City is now a pleasant memory. We have left the forests of oil wells and the folks who live far enough south to have

a southern drawl. Close to the hearts of so many who attended the convention was the importance of education in our organization. The Juniors and their activities created much interest. Gathered in Oklahoma City during our convention was a group of young people who are vitally interested in the/world about us and who are going to face the problems before us squarely no matter what the diffi-

culties may be. Monday evening the Juniors were invited to gather at the Huckins Hotel for a welcoming party. Mr. Pratt, Oklahoma Junior Leader, and Okahoma Juniors were right there to welcome us and to make us feel at home. Words of welcome were given by Mr. Pratt and by Mr. Tom Cheek, F. U. President of Oklahoma. The vening was then put in charge of Mr. Chester Graham, national Junior Leader. To start the ball rolling each of us introduced ourselves, we sang several songs, and then cleared the floor for games.

A jolly evening closed with all of us gathering in a circle and sing-ing taps. We left the party with the assurance that Oklahoma was the place for us, so what could we do ut go to bed in a very happy mood. Juniors who came to the National Convention this year came as state contest winners and not as contestants competing for a national award. All receive the same recognition and award for their work. As it was not a contest this year the 4-minute speeches were given during the various convention sessions and not one right them as we sat at the banquet the after the other. The state, with Junother night. They are placed in stra- jor represented were Montana, Wisconsin, North Dakota, South Dakota, young managers do in this organiza- lahoma. All the Juniors made fine speeches and I believe the delegates were more impressed by the idea of them. You have to be the machinery. 4-minut speeches when they didn't This has to be done. There is no- have to listen to one right after the body to do it but you. I konw all other. We heard it voiced many times of the things you will run up against. that perhaps it would be a good idea for speakers to take a hint and strive toward shorter time limit.

The Oklahoma folks treated the Juniors and Leaders rovally. Tuesday norn all Leaders and Juniors vere entertained at a luncheon, but that was not all. Wednesday afternoon they conducted a tour of interesting points in the city, and Wednesday evening, we again had the privilege of eating together.

There are many interesting places to visit in Oklahoma City, and of course, included in the interesting sights is the oil derricks in the back yards of many lovely homes. Oklahoma without question is the only state in the Union that has oil wells on the state house lawns, in fact oil is tapped from under the Capitol. Mr. Pratt arranged for a bus to take us on the tour and did we have

sides all the kids he manged find room in the bus for a bushel of apples. Well, what the apples were father that his childen followed in for, I'm sure requires no explanation. I enjoyed visiting the cotton gin more than anything. We followed the process from the unloading of the cotton, the cleaning, the crushing of the seeds, cooking, and finaly in us. You perhaps cant leave ly the finished product of cotton seed meal and the oil that goes elsewhere Also of much interest was the

in Oklahoma is especially interesting minded that the state is still young, going to have a big celebration commemorating their 50th anniversary. We were all surprised when told that Oklahoma City is only 30 years old; the city is by no means an infant in its growth.

Now I have talked about Wednesday so I shall have to go back and finish with Tuesday. The Junior program began at 4:00 oclock, Tuesday afternot, with Mr. Graham as chairman. Morris Erickson, Secretary - treasurer c the North Dakota F. U. was the principal speaker. He was chosen because he is a young HOUR HIGHLIGHTS man of our generation who is known nationally in the F. U. ranks. Has theme was "War and Peace". In no uncertain terms we were given a vivid picture of war, what it has done to youth, and what it will again

After Morris Erickson's speech Exposition, Union Stock Yards, Mr. Graham called on state Junior Leaders for short reports on Junior took part in the program. We heard America program; U. S. Army institutes, minute men projects, cooperative lunch counters, recreationnual convention of the American circulating petitions, going on membership drives, and taking part in

SALINA, KANSAS, THURSDAY, NOVEMBER 25, 1937

It is with mingled feelings of happiness and regrets that I write this editorial. As most of you know by this time, the Delegates to the National convention placed upon me the responsibility of heading the National Farmers Union official family as National President. I am happy that I have been given this chance for broader service to my fellow farmers, but I am sorry that it will not be possible for me to give as much time to building the Kansas Farmers Union as I had planned to give. I will give the best there is in me to the service and hope that I may depend on the continued support of our Kansas Union membership in every thing that the National Union undertakes for the benefit of the farmers.

I will stay, for the present at least in Kansas and will be glad to help in any way that I can to build a larger and stronger membership for our Farmers Union and better and stronger cooperative marketing and purchasing associations. I expect to tender my resignation as State President for wheat will render farmers insolto the board at their next meeting and until then I will help with the work vent, incapable of meeting taxes, inin the office when I am not too busy with National affairs.

Neighborhood Notes

TURKEY CREEK INVITES 4-H CLUB

Turkey creek local 1868 invites the 4-H club boys and girls, parents and guests, to our last Wednesday night meeting; there were 17 4-H club members present. After completing the farmers union business, the meeting was turned over to the 4-H club and they conducted a regular meet-

his trip through Swift Packing Co., at Kansas City, Mo. Dale Hammerland gave report of American Royal, vocal selection by Lois Standbaugh. Short talks were given by, Jo Ann Seifert, on, Wearing of Clothing. Dwight Hoobler, How to Address a Chair. Marion Standbaugh, Demon-stration of Seed Plants. Leila Ames, What 4-H Club Work Has Meant to

Billie Bernritter gave a report of

Guests who had a word to say were Mr. Brown, principal of St. Marys High School, Mrs. Turnbull of Maple Hill, who writes our weekly news for the county paper. Mr. Petty of Sunny Side Local who is the County Farmers Union Lecturer. All said a word of appreciation and were glad to see the 4-H club getting started and hoped they would keep up the good work for it would help them to become better men and women for

tomorrow. Their leader Mr. Hoobler thanked the Union for the invitation to our Local, which we accepted and hoped they could come again.

Lunch was then served to about fifty persons. I want to thank the committee for the fine lunch and the time and work in preparing it. All seemed to have a good time. President Harold Hoobler.

MARSHALL COUNTY MEETING

The quarterly meeting of the Marshall County Farmers Union will be held in the McCoy Hall at Beattie

on Tuesday, December 7, 1937. Meeting will start at 11 oclock, dinner at noon. Committees for this meeting are dinner, Mrs. George Rombeck, Mrs. George Scholz and Mrs. J. C. Chase. Hall, George Rombeck. Good of the Order, George Ruffner, Beat-tie and O. W. Dam, Marysville, Resolutions, B. F. Kooser, Frankflort, Wilbur Wycoff and George Scholz, both of Frankfort. All locals are requested to send delegates. Let us all turn out and ake this meeting a

F. C. PRALLE, Secretary.

CRAWFORD COUNTY MEETING

The regular quarterly meeting of the Crawford County Farmers Un-ion will be held in Warner Hall at Girard, Tuesday, November 30, 1937 at one . m. for the purpose of electing officers and transacting other important business.

All members are urgently requested to attende this meeting. Come, and make the Farmers Union what you think it ought to be. J. Henry Meyer, Secretary.

SHIPPS SAYS: "FORMULATE,

EDUCATE, COOPERATE."

Dear Cooperators. I hope each one of you study each of the speeches as they come out in our paper. Study the table as pre-sented by Mr. James Reed. The speech of Dr. Shadid on Cooperative Hospital in Oklahoma. Also on page one November 11th issue, column 2-Suppressed Exports of Food Trusts. Most of us know this is going on and h: ; been, why not do ; omething about it. Go to Washington? No! Handle our own business through our own cooperatives. No tax money needed to fight this battle. All we need to regulate is ourselves. Why be taxed or a thing we can be paid for doing. I read every name and address of shippers of livestock to our F. U. Live Stock Commission Co., I get a kick out of seeing your names in this list. Were we organized as we should be, we could pay to processors. Now here is what it costs us to purchsae a given commodity and we expect that with a fair profit to our-

WISCONSIN MEDICAL SOCIETY TO STUDY MEDICAL ECONOMICS Madison, Wisconsin—J. G. Crown-hart, secretary of the Wisconsin State Medical Society announced this week the formation of two committees to study general problems of medical economics and group hospitalizations, but the committees were immediately attacked as representing only the point of view of the American Medical Association.

Dr. Kingsley Roberts, Medical Di-rector of the Bureau of Cooperative Medicine, in commenting on the development stated, "In view of Mr. All it needs is intens: e cultivating. Eradicating the bindweed is a cline program. They recommend extendine program. They recommend extendine program. They recommend extendine program. fine program. They recommend exten-sive cultivation. Eradicating non-be-the Cooperative Medical Bill introlievers in the cooperative program is duced in the last session of the Wisconsin Legislature, little can be expected of a contsructive nature.

"These new committees contain man-able people," Dr. Roberts de-clared, "and it is to be regretted that they do not represent the various interests or points of view on health protection. Among the doctors appointed were no signers of the Committee of Physicians' Prinicples and Proposals. The laymen did not include any of those interested in cooperative medicine. The reports of the committees will undoubtedly represent only the American Medical Association's point of view. And it is probable that Mr. Crowhart will use this committee to counteract all the growing anti-medical society senti-

LOOKING AHEAD IN FARM MARKETING

By Vance M. Rucker, Marketing Specialist Kansas State College Extension Service.

The cattle market has been making some rather queer movements in the opinion of the stockmen who and fat cattle to sell, or who desired to buy stockers and feeders. With extreme peaks reached, followed by ex- prevails. treme breaks, a rally could be expected, as recipts were practically cut in two. This resulted in a rally, at which time limits on purchase price for stockers were raised, resulting in rather heavy movments of stock cattle to the country. This type of market is natural when the price level on the cattle is being ad-

deferring purchases of stock calves may easily amount to a drop in price of one or two dollars per hundred from the price at early weaning time t the low time of the year, which is sometime between November 1 fell's stocker prices, a saving of one purchase price may be the differ- he lives. Whereas, the farmer is forced to ence between profit and loss.

W. P. LAMBERTSON November 13, 1937

O orhead R. R. crossings are made for absent-minded drivers.

The R. E. A. initial pole setting at Horton Wednesday was upstanding. This is one of the New Deal's most useful innovations.

Seneca's pride in an outstanding armistice celebration is recommended to other cities for future consideration. Patriotism is articulated there.

Once in a losing campaign A. M.

Kinney, of Huron, wrote a poem to me of consolation and reassurance. He is confined to his home now with injuries and I wish I could write him one. There is more poverty in the First District today than in any time in

forty years. Five short-crop years have sunk our farmers to a record low level. Many pennies are being squeezed, and little sqawking is heard. A great people!

Tom Maney, of Ozawkie, the sage of the lower Delaware, is my reaction barometer. After visiting him we always know exactly where we're at.

No week was more glorious in sunshine and temperature than the one just ending. Why couldn't John Steuart Curry place a mural of it somewhere? This beautiful serenity is more typical than cyclones.

We are leaving the godly today and returning to Washington, D. C. May charity greet our efforts to revise the revision in the remarking of our nation. Au revoir!

WASHINGTON IMPRESSIONS

(~ · C. W. H.) As one meanders around on Capitol Hill chatting with different Congressional members he comes to the conclusion that this special session s going to be notbody's bed of roses. It looks like one long nightmare with the night stretching far into the distance. Few of the Congressmen cared to return so early to their free gymnasium and mahogony desks, and that's partly the cause of them convening in belligerent bewilder-ment. The attitude is about like it was when they closed up shop in August. The same mood of confusion, belligerency and uncertainity

Only one thing is certain about this session. It can't run more than 62 days, including Sundays, because the law provides the next regular session must start January 3.

At least one Congressman has filled out his unemployment census card. justed to a lower level. On each of Because, as he said, "When the dust Resolutions adopted by the Farmers these breaks, new loans are likely, has cleared away from the debacle Educational and Cooperative Union and the following rall—is not likely of this special and regular session these breaks, new loans are likely, has cleared away from the debacle of Ellsworth County, Kansas at the to as his as the previous rally. my constitutents are probably going monthly neeting at Ellsworth, In following this type of market, to see that another man would be better in my place."

It's not gas alone that makes the cars go 'round in Washington. It's the "No Parking" signs that keeps them on the move. And then when and February 15. This amount might one finds a place where he is allowed easily equal the winter feed bill. With to park the other fellow has beat prices next summer on fat cattle ex- him to it. More than 70,000 cars are pected to be somewhere near this parked on the streets all night long, and fortunate is he who can get to two dollars per hundred on the within two or three blocks of where

Your correspondent was in conversation with a W. shington real estate dealer, one who sells farms, the other day. We casually spoke about a quarter of land. "What's a quarter?" he asked. We told him it was one-fourth of a section. "Well, what's a section?" was his next question. When we answered that one he said he was going to remember income when you farm. The chances it as he had never heard land measurements expressed in such terms before.

The following day we were talk-ing with a Maryland farmer and asked how many bushels his corn would The . syalty company is having a make to the acre. "We don't speak breakfast for all of their sharehol- of the yield in terms of bushels, it's so many bar els to the acre with us," he said. Our questioning brought forth the information that 10 bushels of ear corn make one barrel while half that much shelled corn fill a barrel. That's two of the few things we have learned since coming to Washington.

(Continued from page one) erent every minute. First of all an Oklahoma Cowboy orchestra, convinced us that they weren't second raters. The Juniors from the various states were introduced and given an opportunity to give a greeting. This was ollowed with a talk by our national leader, Mr. Graham. He spoke of youth problems and the necessity of developing a cooperative philosophy of life, so that we can learn to say "we" instead of "I", and "our" for the old "my.

With our Oklahoma friends deternin d to make their entertaining the best ever, the program continued with humorous readings, music by a German band, a high school boys quartet, outstanding acrobatic stunts by triplets who are F. U. Juveniles, a nusical ensomble which included an expert Accordion player, a girl nine rears old. The evening was brought to a cli

max with contests which included two minute talks on "Why I am a member of the F. U." and "The F. U. Legislative Program," several Juniors entered and spoke on these subjects. Contests in hog calling, husband calling, the heartiest laugh ter, the best singing and many others afforded much merriment.

ions f the convention All the were very interesting and the Jun- ference in percentages between the iors were right there most of the ime. All in all the convention was to share the experiences.

ESTHER EKBLAD.

WATCH YOUR STEP*

Few of the health rules have been taken into the American heart so completely as the one which advocates regular, systematic exercise. People have found that exercise can be fun, and what is more it can be gregarious fun, shared with one's neighbors and friends and not a solitary procedure like brushing one's ise and make it enjoyable, so en- see the heavy incidence during joyable, in fact, that many of these sports are indulged in under cover tober. when out door participation is impossible because of wintry tempera-

Schools, recrational centers, and in athletic relaxation by installing equipment that makes at least some of these sports possible all year would flee from smallpox, as from lubs are all fostering this interest around. The indoor pool and the gymnasium are two of these popular centers. Popular not only among men and women who keep themselves fit there, but also popular among invisible little trouble-makers who communicable does not seem to befind the warm moist floors edging the pools and covering the locker rooms agreeable places to engage in a little exercise of their own.

Germs Take the Foot-path Doctors say that the tinea dermatophyton, a micro-organism whose activities are familiar to most people under the various names of ringworm, athlete's foot, and Dhobie itch has been greatly aided in its spread by careless habits on the part of those who patronize the public pools and gymnasiums where a certain amount of walking is done with bare feet. This infectious fungus is frequently transmitted through locker and dressing room floors of gymnasiums, through the floors of shower stalls, and around the edges of swimming pools. Bath mats, common towels shared by members of a family, and floor coverings in hotel bed rooms are among other harborages for this unpleasant but active little

Like other micro-organisms of communicable disease, it must be carried from the infected person to the new victim before it can do its work And, as in every other communicable disease, the line of transmission can be broken. Cleanliness intelligently applied is an important barrier to the spread of all tinea dermatophyton. Cleanliness Precautions Necessary

As the ringworm fungus thrives best under conditions of warmth and moisture it finds the neglected, sweaty feet an excellent point of attack. Once they get a foot-hold the spores may remain alive for months, and even years. That is why re-infection frequently occurs after infected areas elsewhere on the body have been cured. No break in the skin is necessary for infection to take place.

The prevalence of this type of in fection, and doctors believe that fully fifty per cent of our population is sures, and in both instances soap and present neutrality law of our nation." water and general cleanliness precau tions are among the prescriptions. Foot cleanliness is an essential, but not enough. All surfaces that the bare feet may step on must be kept as free as possible from the ringworm spores. While every effort should be made to have floor sur faces thoroughly cleansed, the in-dividual should add to his own protection by wearing some kind of particularly in public places such as pools and locker rooms. Care should be taken to dry the feet completely and thoroughly after the bath, paying especial attention to the areas between the toes.

For those already afflicted, clean liness must be practiced not only to avoid transmission to other people but to prevent transmission to parts of the body. After a bath the body should always be dried from head to foot with no reversal at any point lest the fungus be transmitted by means of the towl from the feet to other parts of the body. A sepa rate foot towel is recommended, and it should be used only once and then horoughly washed in suds and boiled. Care must be taken to cleanse the family bath tub, bath mat and other areas that have been touched by infected feet. Bed sheets should changed frequently and be boiled after ordinary washing in heavy suds Socks or stockings should be changed daily, and washed with extraordinary before further wearing.

While ringworm in various forms is extremely prevalent, doctors state that not more than ten per cent of TELLS OF JUNIOR ACTIVITIES the cases present a real problem to the specialist in skin diseases. About forty per cent need medical attention and can be cured. About fifty per cent clear up without medical attention but with proper safeguards of cleanliness and the wearing of some sort of foot covering except when actually swimming or taking a bath. Persons suffering from severe of even moderately severe cases should be excluded from public pools, ac cording to public health workers. Pool owners, it is stated, could conwarning patrons to wear slippers of some sort, or if they provided single-use slippers and made wearing to some sort, or if they provided single-use slippers and made wearing to some sort, or if they provided single-use slippers and made wearing to some sort, or if they provided single-use slippers and made wearing to some sort, or if they provided single-use slippers and made wearing to some sort, or if they provided single-use slippers and made wearing to some sort, or if they provided single-use slippers are slippers and made wearing to some sort, or if they provided single-use slippers are slippers and made wearing to some sort, or if they provided single-use slippers are slippers and made wearing to some sort, or if they provided single-use slippers are slippers and made wearing to some sort, or if they provided single-use slippers are slippers and made wearing to some sort, or if they provided single-use slippers are slippers and made wearing to slippers are slippe tribute greatly to the reduction of this infection if they posted notices obligatory. Periodic physical examinations of students who use school facilities would also cut down on the number of infections, since ringworm cases could be excluded from ocker rooms and the pool. Such an examination made some years ago at the University of California showed that over fifty per cent of the male students examined had clinical signs of infection. Of the women students slightly over fifteen per cent showed infections. Greater attention to personal hygient as well as the fact that the women were re-quired to wear rubber bathing shoes right to the edge of the pool were held accountable for the great dif-

GUARD AGAINST PNEUMONIA

This is the time of year when we should begin to guard against pneumonia. Last year, in Kansas, the rise in the number of pneumonia cases started in October, with a total of 137 cases. The total for the previous month was 46. The rise was steady until February, the peak month, when 780 cases were reported. The second teeth. Golf swimming, gym classes high month was December, with 619 all combine a certain amount of sociability with the invigorating exer- 507 in April and 129 in May. Thus we

During the entire year of 1936, 3.586 pneumonia cases, with 1,595 deaths were reported to the Kansas State Board of Health.

It cannot be too highly emphasized the lives of many persons every year, come generally understood.

Besides direct contact with a pneunonia case, there are several other redisposing causes of the disease. Habitual users of alcohol are easy victims of pneumonia. Exposure to cold, wet smoke and dust favor pneumonia. Improper ventilation and too much indoor living are conducive to the disease. A special warning is given against associating with persons afflicted with colds, influenza, measles and whooping cough. Dressing indisc eetly, exposing the body to extreme cold, is an invitation to pneu-

monia germs. The pneumonia death rate among nfants is extremely high. In infants, as in the aged, pneumonia is often the end result of other diseases. Keep persons who have infectious diseases away from babies and small children. The younger the baby the more serious is pneumonia. At the first sign of a cold, call a physician. Persons who live hygienically are

nc eas. victims of pneumonia. YOUNG FARMERS MAP ANTI-WAR PROGRAM

The Junior Department of the North Dakota Farmers Union assembled in its annual convention recently held at Devil's Lake, North Dakota, pledged its support of immediate invocation of the neutrality law in the Chinese-Japanese war as the first step in a two-point designed to clarify this government's policy

of non-participation in war. "Whereas a state of war exists in the Far East," the resolution reads, "and international complications have resulted which may gain results in the United States becoming involved in war, and whereas nothing can be accomplished by the United States entering any war on foreign soil, regardless of where our sympathies lie as was demonstrated by the World War, we hereby go on infected to some degree, calls for record as demanding the President preventive as well as curative mea- of the United States to invoke the As the second point in the doubleline policy adopted at the Convention. it was unanimously agreed that the North Dakota Farmers Union Juniors focus their attention on the proposed Ludlow War Referendum to the Constitution which calls for a vote of the people except in the case of invasion before Congress can declare war. The resolution reads: "Whereas the power to declare war foot covering under all circumstances, lies wholly with the National Congress and not directly with the people themselves, be it further resolved that we instruct our Senators and Representatives to exercise their entire power to secure passage of the Ludlow Amendment which, when enforced, will refer to a vote of the people, the question of whether or not we are to be plunged into another foreign war."

> YOUNG TURKEYS DO VERY WELL IN BREEDING FLOCK

Turkey growers, who will make a business of producing turkey hatching eggs this winter, may wonder whether to use breeding stock selected from this fall's crop of turkey or whether older turkeys will make the best breeders.

Stanley J. Marsden, turkey expert in the United States Department of Agriculture, says research indicates that well-matured young hens and toms are fully as satisfactory for breeders as are older turkeys. In fact. the eggs from young turkeys are likely to hatch better. Furthermore, young hens will lay more eggs.

Of course, if a turkey grower has kept records of the number of eggs each of his older turkeys laid during their first year, those egg records may show that many of the older turkeys are likely to make better breeders than are the untried young turkeys. But the mere fact that one turkey is older than another is no guarantee that it will make a better breeder.

X-RAY MACHINE IS USED IN CALIFORNIA TO DETECT
IMMATURE ORANGES

growers are using X-ray machines to sort out frozen and immature oranges as well as oranges as well as granulation; in fact, any condition causing a breakdown of fruit cells.

Developed jointly after 18 months of research by the California Fruit Growers' Exchange—one of the oldest and most successful producers' cooperatives in the United Statesand the General Electric X-ray Corporation, the new machine came into use at a critical time this year, permitting the packing houses in State to segregate fruit which had, been damaged by the winter's heavy freeze.

The machine will permit four person without guesswork, to inspect at least 1 1-2 carloads of oranges a day at an estimated energy cost of no more than 12 cents an hour, with electricity at 1 to 2 cents per hr. According to Electrical West, this

Author Unknown upon a rail Second child. It might be Wednesday

not vote the United States into any First child: One little magpie flapped his little tail country coming in on our soil. If every country would have such a probable. Second child: In the other magpie's beak!

> and scratched each other's eyes Till all that was left on the rail First child: Was the beak of one of those little magpies Second child: And the other little magpie's tail.

"THE MARCH OF THE PLOW"

This pageant seems to lend itself entous question of national to a presentation almost Shakes-For this purpose we join pearean in its simplicity. We have with no stage setting, yet made moving by its actors. The production at WE PETITION CONGRESS TO All-State Camp, in an outdoor settrees, and shrubs, with the ravine back of the stage serving as back rest of the body to follow. Are you stage, the glow of the campfires Inreduced in Congress on February from the weiner roast helping to disthe scene real.

But the Juniors at the Montana Convention, under the direction of Norma Keil, win the palm for quick preparation and presentation. The preparation are presented to a large The profile view is better than pageant was presented to a large The profile view is better than audience on Saturday afternoon, by a front, really, for determining whegroup of Juniors who had arrived on Wednesday. Costumes were prepared, some of them made outright, lines learned and action practiced in that short time. In spite of rough spots, the raggeant was a moving and drapraise.

Another Recruit

Time: 4 minutes. Characters: Johnny, Harry, Edith. Scene: Outdoors. Johnny and Edith are carrying picnic baskets, baseball bat and sweaters.

Johnny: He'lo, Liarry, where are you going? Harry: Wouldn't you like to know? Edith: Smarty, just for that we won't ask you to go along with us. tures to the RURAL LIFE CUNCIL, Harry: You ain't going no place and there's nothing to do after you get

there. Johnny: Sez you-

Harry: Sez me-Edith: Well, what do you "sez" to this. There's a picnic over at (name nearby picnic grove) and if you want to know it—that's where we are going.

Harry: Yeh! Edith: Yeh. And guess what—Cora will be there. I'm taking cake and she's bringing salad. Jim Dunn and his sister are bringing other things. We are all going to eat together. Harry: Well, now that's different.

Don't mind if I do go— .
Johnny: But you can't! Just us
youn —s who belong to (use name of farm organization) are invited.

Harry: That's stingy— Edith: Oh, yeh—well, smarty did you ask us to your soldier camp? Harry: That's different. That was for boys who want to be soldiers. We drilled, marched, dug trenches, just like we were in real war. Johnny: That's fine-you had a good

time learning how to kill somebody. You ouldn't like anything tame like this picnic. Edith: No-o-o! Too tame for a big man like Harry. Why, we'll play— actually play. There's to be a base-ball game, and there will be folk dancing. Then we have some more games. Oh, but the supper we're going to have after that! No. Har-

ry would not enjoy it a bit.
or ny: Don't forget the campfire at night. A song leader is going to be there and a very important man is

going to speak to us. Harryd Well, it don't sound so bad But the speaker will be a bore-I'll bet. I'd rather hear the fellows tell yarns—good spicy ones like they do

in camp. Edith: Of course you would. But we asked this man to come. He is go-ing to tell us about Europe and Japan. He sure has travelled a lot. Johnny; Yes, and he's going to tell us how we can help prevent another war—just what we can do. Of course, a soldier like you wouldn't like that. You want a war, so you can kill somebody if you don't get

Edith: Harry, just to be honest your'e not so wild about war, are you? Harry: Naw, I don't want to fight but

Let's Pretend

will start it. Edith: So what we are to do is work hard to get Congress to pass a strong neutrality law, so we won't get dragged into a foreign war by selling things to nations that are

won't be our war. Somebody else

fighting.
Johnny: Yes, and we are going to get a law so people themselves can vote on whether they want a war or not. Would you vote to go to war, Har-

ry, if you had a chance?
Harry: Indeed I wouldn't! Just to be honest I don't like the idea a bit. I tell you what I'll do-if you'll let me, I'll join the (use name of Junior Farm Organization) and stop training to kill somebody. I had no idea you did so much and learned so much at your meetings. Gee,
I'd like to belong.
Edith: "Cross your heart and hope to
die."

Harry: Yes, Siree-bob a couple of times. Johnny: Well, I guess now we are go-

ing someplace. Edith: (laughing) And we've something to do after we get there. Harry You win, come on let's go! N. C. P. W.

MANNER OF WALKING IS A FUNDAMENTAL IN GAINING CHARM

By Antoinette Donnelly Still on the hunt for that greatest sset a woman can have, charm.
We have talked about the young,

lithe, beautiful walk as one of the three fundamental graces. We have told you to stand before a long glass and be as mean as can be in your self criticism. Call your self mean names, such as old sloucher, old

drooper, old drag 'em along.
Today, now, try good walking.
Stand back the width or length of your room and walk toward the mirror with that mean, mean eye on yourself, remember. Call every bad little trick, please! Now watch yourself as you approach that mirror Are your toes pointed straight ahead? Can you come up on the fore part of your foot with every step? Or do you lift the dead-weight every step? Do they go ahead of you? Your knees, we mean. You see people walking when your step? see people walking whose knees all up in one straight piece? does some of you seem to be stickpel the dusk which was softly fall- ing out behind as if part of you were ing in the valley, all served to make going the other way? Your head headed one way, your lower back another?

> look turned out wide. They look twice their size and as graceful as the flappers on a seal.

Then, when you've given yourself an unmerciful going over, try this simple walking corrective. Pretend you are walking on one

line. Not on a 2-track line, as the waddler does. No matter what your weight or size, if you keep this 1track idea foremost you give the impression of better body control and

LAURA GRAY

"Mother, I'm a policeman!" declared five-year-old Bobby, wearing a paper hat from a party cracker and wielding what was once a leg of a chair for a truncheon, as he strutted about the room with swelling chest. "What do police.nen do?" he asked, suddenly. "They direct traffic—see that people don't cross the street at the wrong time

"But there aren't any people here."
"There's Teddy Bear lying in the middle of the floor—I might run over him— and all those trains off their tracks!!"

A broad grin spread over the little fellow's face as he picked up the toys. "What now?" he smiled. "I'm the crowd. Help me to go through the door with this laundry." Bobby opened the door, closed it and

was back at attention when his mother returned from the garden. Pretend games help to liven up daily routine. The cupboard where the toys are kept may be a mother hen clucking for her chicks that are all about the floor. Let's help them to get back

to her.
Of course Bobby will see through this, and still enjoy it. Almost any-thing can be turned to play. Giant Dirt makes Children's hands and knees dirty but Fairy Soap waits to chase away the stains.

These little plays stimulate the child's imagination and make magic of the commonplace. A doll can be merely a bag of saw-dust with a china knob for a head, or it may be a personality, waiting patiently to have her beautiful curls brushed or feeling sorrowful because she has torn her pretty dress. Just a an idea. here and there, and the little one will carry on by herself. Some children, of course, will do this

more readily than others; but all chil-

dren enjoy make-believe-plays if en-

couraged. Two little girls had been romping all the morning when a suspicious silence brought Mother to investigate. "Whatever are you doing?" asked, seeing them sitting side by side

ing a wise mother, she stepped out of the room. In a few minutes a great gabbling of voice brought her back. "Mother, we didn't answer you be-fore because we'd have spoiled it all. We were on a car, taking the children to the beach. Now we're here!" The girl raced about spreading arms to an imaginary breeze.
"I understand, and after the dolls

have had their swim send them to me for cookies." "Oh, they'll love that! They'll be

so hungry!"
"But isn't this teaching the children to falsify?" someone asks. "A doll really is a bag of sawdust—" All life could be regarded in this matter-of-fact way, but think what we rould lose! Is home merely a pile the United States or its territorthe United State force? The world is full of magic whether we admit it or not, and makebelieve for children is their right. The student will tell us that dramatic play has many other values for the child. So it has, but if it had no other, this happiness that it creates would be quite enough to commend it.

SOYBEAN OIL

Soybean oil meal is available in many Kansas markets. It provides you walk more lightly. Then rise and fall the broad fore part of the foot, letting the heels simply skirt the floor lightly. Keep the head and the chest up, the abderson and degree and de domen and derriere flattened in, and amount of meat or fish scrap is away you go like a bird on the wing!

OF INTEREST TO WOMEN

THANKSGIVING THEN AND NOW

Styles and customs come and go Women are eager for different ideas for entertainment and for new dish-es and menus but some-how no one level tablespoonful of gelatine successfully tampers with the traditional customs of the Thanksgiving feast as established by the colonists in Massachusetts in 1621 when Goving the stable of the traditional customs of the Thanksgiving at the stable of the st ernor Bradford proclaimed a three days feast to celebrate the plentiful harvest. The 20 acres of corn and jellies, reheat juice and add gelatine harvest. The 20 acres of corn and the six acres each of barley and peas had vielded a harvest such as England never knew. The colonists had fasted together, now they were

to feast together. Then, as has been done ever since, they wanted interesting guests. Elder Brewster suggested Massaoit and his braves, who accepted. Ninety indians came, so very likely-then as has happened to Thanksgiving hostesses ever since—there were more persons at table than had originally een planned, we suspect Massaoit of

oringing other than braves. The Indians brought a giftgreat haunches of venison." it Thanksgiving are still foodschoice fruits, confections, nuts especially good cakes and puddings and even select vegetables.

The habit of Thanksgiving hostesses to absent themselves from church services to prepare the feast was often a subject of severe reproach from the pulpit aimed fleshpots over things spiritual. Modern services are shorter and modern ovens do away with the need of basting. However, there may be instances where the time honored criticism of colonial ministers is still justifiable.

The menu, as one reads it in accounts of the first Thnaksgiving, was a bit overwhelming because of the variety of dishes in each course especially the fish and meat courses. There are whisperings abroad that in the interest of both economy and varied menus one can, hollow side—keeping that side up or even smaller portions of turkey. The dressing in that case would be baked in a separate pan or, in the case of halves or quarters, in the hollow side. Keeping that side up during the entire baking process. Then, as it shoul be now, the idea of a full table was not because one wanted so much to eat but to symbolize the treasures of a generous

earth. One never-to-be-forgotten Thanksgiving was spent by the writer in Plymouth, Massachusetts. A procession of Pilgrims in traditional garb wending their way to church, dinner a few yards away from "The Rock" by a window from which could be seen a statue of Massasoit and the following all-American menu made realistic the story of The First Thanksgiving that we have heard and loved since kindergarten days. Oyster Stew

Roast Turkey Chestnut Dressing Giblet Gravy
Mashed Potatoes
Pried Corr Cranberry Sauce Stewed Dried Corn Mashed Turnips Boiled Onions

Corn Bread Waldorf Salad Pumpkin Pie Coffee

To obtain a glossy brown surface on the turkey, rub it well with corn oil before baking. This does not affect the flavor. Flour drizzled over the oiled surface will make a thick crisp brown crust less glossy than using just oil.

The spice in pumpkin pie—which is the climax of the regulation menu -should function as a good accom-panist—enhance and not overshadow the major flavor of pumpkin. Pumpkin Pie

11/2 cups pumpkin % cup evaporated milk (undiluted) 34 cup corn syrup (any desired 1 teaspoon corn oil or melted but-

2 eggs ¾ teaspoon cinnamon

Pinch nutmeg 4 teaspoon salt Pastry shell with built up rim (10

inch pie plate)
Mix pumpkin, milk, syrup and corn oil or melted butter, then add corn oil or melted butter, then add eggs beaten slightly and spices mixed practically indispensable in the manwith salt. Pour into pastry lined plate. Set in oven 450 degrees F. and cigarettes because of its unique (very hot) for 10 minutes, then re- property of absorbing and retaining duce heat to 350 degrees F. moderate, and finish baking—about 30 more minutes. The pie is done when a knife inserted comes out clean.

NOTES: The purposition of the property of absorbing and retaining moisture.

The glycerine-and-water treatment works equally well with any of the usual types of humidifier—blotting NOTES: The pumpkin may be canned or fresh baked and put through a sieve. A fluffy texture is obtained by whipping the egg whites to a stiff froth and folding them into the mixture at the last large of numidifier—blotting paper, felt, sponge, or composition material.

Cigarette smokers report further that a glycerine-dipped humidifier is especially helpful with "the makings" because the tabeses used for ed. If a glossy surface is desired, dribble 2 or 3 tablespoons of rich milk over the top of the pie before PRUM baking.
AND HERE'S TO THANKSGIVING
AS WAS, AS IS!

HINT TO A HUSBAND

I'll turn a deaf, deaf ear, my sweet!

But say my smile's completely charming, My manner utterly disarming, Say that my beauty's orchidaceous Or that I'm witty, wise, vivacious,
Say that I look, in Alice blue
As young as when I married you!
Tell me my lips are soft and tender,
Murmur I'm getting Ah! so slender,
And darling, that will do the trick— But lay it on a trifle thick,
For when it comes to things I'm
NOT,
Then I can stand an awful lot!

HOUSEHOLD SUGGESTIONS

Juice is often left over from fresh or canned berries. Add Knox Sparkthat has been soaked in a little cold water in the same proportion as above. Fruit juices may be canned or bot-

and used later as needed by combining with gelatine. Left-over fruit juices may also be used in lemonades. In a custard recipe calling for several eggs, one or more may be left out if one-half tablespoonful cornstarch is added for each egg omitted. When you wish a rich, dark meat color for soup, use caramel, which is sugar browned in a frying pan until a golden brown, and then dissolved

in a little water. rolls, sprinkle lightly with water, place pan containing them in a pan of hot water and put in oven a few minutes.

Reheat stale crackers by placing them in the oven a few minutes. Keeping lettuce: After washing it thoroughly, place in a cheesecloth bag and hang up in refrigerator. Use all the outside leaves by shredding them with a sharp knife and making them into a pretty nest for a salad. To preserve ice in a refrigerator: newspapr, keeping the air from ice.
Soap: Make a small cheesecloth
bag four by six inches. Into it place

all pieces of hand soap too small to use, and hang bag in bathtub-good for cleaning the tub. Save all the grease not suitable for ooking purposs and use with lye to make kitchen soap.

A pinch of baking soda added to any boiled syrup will keep it from crystalizing. A teaspoonful vinegar added to homemade syrup will keep t from candying after it stands. A teaspoonful vinegar beaten into boiled frosting when flavoring is added will keep it from being brittle

or breaking when cut. If syrup goes back to sugar, reheat, add a small piece of butter, and it will be useful as a soft sugar.

A few cloves added to vegetable soup will give it a delicious flavor.

When making desserts or salads with Knox Sprakling Gelatine, and they are wanted in haste, place mold give up the cake sooner. containing them in a bowl with broken ice, mixing it with some use ½ cup of cocoa instead of 2 cup coarse salt.

rubber ring from a fruit jar under gel food.
the dish. Ring will adhere to both A real sponge cake can be made ice and dish. Do not waste any skim milk-

make it into cottage cheese. or three carrots in the liquid until cold—the carrots absorb the salt and the liquid can be used for soup. To keep vegetables fresh, place them in a deep dish in about two inches of cold water. Take a piece of linen, soak it in water and spread over all, letting the corners dip into the water to keep the cloth moist. Place dish in a window where the air

can blow over it. To dry lettuce, pat it with crumpled paper toweling. It absorbs water bring health and gladness into many quickly and does not bruise the homes. leaves. Lettuce for salad should be well dried and cold.

In boiling corned beef, add a small onion, a pinch of ginger, and a few cloves and a bay leaf. This will improve the flavor of the beef. When cream will not whip, add the white of an egg to it. Let both cream and egg be thoroughly chilled.

Then try again and it will whip eas-FOR THE MAN OF THE HOUSE friend. If the man of the house mutters into his beard because the tobacco in his jar, can or pocket pouch dries out so fast, try dipping the humidifier of the container in a mixture of equal parts of glycerine and water, and the tobacco will stay moist much longer. The idea comes straight from the to-

especially helpful with "the makings," because the tobacco used for them into the mixture at the last. ings," because the tobacco used for Rich fresh milk of powdered milk rolling cigarettes is very finely ground and hence dries out more

PRUNE SANDWIC'T COOKIES

Cream one cup firm shortening with one and one-half cups brown sugar. Add one teaspoon soda mixed with one-half cup water, then two and one-half cups quick-cooking oat-Tell me your socks are nicely mend-ed, meal (uncooked) and finally one-half cup whole wheat flour. Roll thin and Tell me my cookin's really splendid,
Admire the rooms I've swept and
dusted,
Say my accounts can all be trusted,
Tell me I'm thrifty, house-proud,
heat
I'll turn a deaf, deaf ear, my sweet!

To obtain onion juice, cut an onion in halves, crosswise. With a knife, scrape the cut side of onion and the juice will flow.

When rolling in egg for deep fry-ing, dilute the egg with 1 or 2 table-spoons of water or milk.

The first recorded sale of cames corn was made to S. S. Pierce, Boston, Mass. The invoice, dated Feb. 19, 1848, was for "one dozen canisto us as one of the choicest gifts of nature."

WAYS TO PERFECT ANGEL FOOD CAKE

What is a good angel food cake? There is nothing better than the best, but perhaps nothing poorer than an unscunsessful angel cake. It used to be very much a matter of luck as to results even with experienced cake bakers just how the cake would turn out. Now much is known about two important parts, the proportion of ingrdients and the method of mix-

To get the most accurate results it has been found that measuring the egg whites is best. To make one cup of egg whites, we usually need eight eggs, although, if the eggs are small we may add an extra one. One cup of granulated sugar, which should be fine, has proved to be the best proportion. As far as flour is concerned, there may be a variation; not less than three-quarters of a cup and not Fruit juices may be canned or bot-tled when left over, without sugar, and used later as needed by combin-ing with relative. Left sweet fruit tender cake, but the use of one cup of flour is the accepted amount.

The point, however, if you have been using one and one-quarter cups of sugar and you like the extra crustiness this amount provides, do not think that you must change your recipe. The same thing is true if you have been successful with threequarters of a cup of flour. However, most people can make a good cake To warm over biscuits, muffins, or through the use of the standard recipe which is 'printed below.

Now for the method of mixing. First of all, the eggs are beaten. Use a rotary beater, although some methods suggest the use of a flat wire whisk. Beat the eggs until they are foamy and then add the cream of tarter, and continue beating until they will hold their shape, but not until they are so dry that, as old cook books say, you can turn the bowl upside down, then fold in the sugar-gently and gradually, add the flavor-ing and then sift and fold in the flour which has previously been sifted four times after it has been meas-

Now about the angel food pan. A tube pan is best. It need not be greased, although it may be, if you like the flavor of butter with your

About the baking. Satisfactory results come when an oven temperature of 325 degrees is used and the cake baked for one hour. However, if you have been successful starting with a slower oven of 275 for one-half hour and increasing the heat to 325 for the last half hour, do not change your procedure.

After your cake has come out of the oven turn it upside down and let it come out of the pan when ready. Do not try to hurry it out, even if it takes an hour to loosen from the sides of the pan. Of course, a pan which has been greased will

If you want the chocolate flavor, of flour. Your cake will probably not be quite as light as a white an-

by changing only one of the angel food ingredients. Instead of 1 cup of egg whites, we use 5 egg yolks After boiling salt beef, leave two and 5 egg whites. The sugar is added to the beaten egg whites. The well beaten egg yolks are added and the other ingredients follow as they do in angel food. A sponge cake of this sort has a fine, close texture and

is very tender. APPLE BOWL Among the blessings of the year et us number our great apple crop. They will be poured out upon our people in a rainbow shower and will

The apple imparts its own virtues and its wine kindles brilliance in the eyes, and its ruddy colors plant roses in the cheeks. One can hardly eat too many of them and after the heartiest meal there is always room for at least one apple more.

Sometimes there is only one thing better than an apple, and that is another apple that is being eaten by a

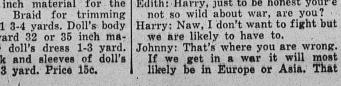

The apple is one of the most wholesome of our fruits and has healthgiving and medicinal virtues of the greatest value. It starts all the scretions into vigorous action and floods the system with a fresh tide of life. It is a friend of health and a foe of disease.

"The apple is again making news. First it pdayed a prominent role in the domestic difficulties in the Gard-en of Fden. Then it bounced off the head of Newton to call attention to the law of gravity. Now a sample shipment of American apples is land-ed in British Guiana by airplane express in 48 hours."

"An apple is one of the masterpieces of nature. Avast, compli-cated interplay of forces worked together to produce it. For years the tree grew from seed to trunk and branches, and then through many months it carried on the secret, subtle chemistry by which it distilled its juicy sweets into its ripened fruit. Bursting into fragrant bloom and bud in May, it then elaborated its sap into the flesh of the apple and flavored it with sugar, spiced it with wine and wrapped it in its thin but tough integument. The breezes fanned it, the showers baptized it, the sun kiss-ed it and the frost mellowed it. It distilled its most delicate flavors from the dew and caught its colors from rainbows and sunsets. Earth and Sun watched over it and the solar system cradled it in its care. The apple literally became a center of the universe Apples Yellow—Apples Red. Good Color is pples is a practical and easy guide to the selection of well ripened fruit. Red varities ought to be red and yellow varieties a clear yellow. This indicates well ripened fruit, rich in flavor and fragrant with

SAVING GRASS SEED FOR EROSION CONTROL

Salina, Kan.—Thousands of pounds of native grass seed for use in eroion control plantings on Kansas farms have been harvested this year by the Nursery Section of the Soil Conservation Service. In announcing the collection of a total of 7,500 pounds of seeds, B. F. Kiltz, in charge of the Nursery Section, stated that the seed will be distributed for experimental erosion - control plantings on farms of persons cooperating with the service.

Grasses from which seeds were harvested include big bluestem, little bluestem, blue grama, side-oats grma, switch, alkali dropseed, and buffalo. Seeds of bluestems, the gramature and alkali dropseed were buffalo. Seeds of bluestems, the gramature and alkali dropseed were buffalo. Seeds of bluestems, the gramature and alkali dropseed were buffalo. Seeds of bluestems, the gramature and alkali dropseed were buffalo. Seeds of bluestems, the gramature are alkali dropseed were buffalo. Seeds of bluestems, the gramature are proposed to the dual purpose of feed production and erosion control."

Most of the native grass seed collected this year, it is pointed out, will be planted in the early spring of the state auxiliary ask the President of the Kansas Farmers Union for the privilege of securing one of the speakers for either Wednesday or Thursday evening of our 1938 convention. Grasses from which seeds were harvested include big bluestem, lit-tle bluestem, blue grama, side-oats ma grasses, and alkali dropseed were 1938.

harvested in the main by power strippers. Seeds of many other grasses were hand collected by WPA workers on demonstration erosion-control pro-ject areas and by CCC enrollees on camp areas in Kansas, Oklahoma, and Nebraska.

"Little is know about the value of native grasses for erosion control," Kiltz explains. "We hope by actually making field plantings on guilled areas and areas suffering severe sheet erosion to learn which grasses are most eaily propagate under farm conditions and to determine which of theg rasses are most valuable for

REX LEAR ADDRESSES HUTCHINSON CONVENTION Below is the summary of the talk by Rex Lear, State Manager of the Farmers Union Life Insurance Com-

pany, at our state Condention in Mr. Lear has made some very pertinent remarks, and it might be well for all of us to give them serious thought. Should you wish a copy of the record of the company since its organization it is yours for the ask-ing by writing to Rex Lear, Salina,

Fifteen years ago a cooperative life insurance company was started. The leaders of the Tarmers Union at that time investigated many plans as to which would be the best to serve their members, of some way of providing a cash estate for them.

After investigating the different 25 plans, I am glad to say they chose the legal reserve plan. As you know, there are many plans as to provid-

there are many plants as to provide the pr protected against the officers and directors of that institution taking

(Mr. Lear here read from a paper he had been passing around telling of the advance of his company, in legal reserve, insurance in force, etc., over the last 15 years).
We have handed back more in divid-

ends to the policy holders than we have paid out in death losses. That record has been made possible by the fact that we have had good risks in rural communities which are the preferred risks of the world. We take good risks in rural communities. Farmers are preferred risks and we have that advantage.

Our company, in order to save and render service in different positions to each lady furnishing her own has provided 15 different policies. These are from the pure investment 7.00 down to the pure protection. We 7.00 give you all of the protection you

6.75 pay for. 6.75 Oklahoma brought out the fact that 6.65 in using their own members as agents they made great savings for their commembers. As I thought of the commembers and it is through their associations Farmers Union, I thought of our that much of their success depends. agents, and I saw a number of my The Farmers Union ladies auxiliary agents in this meeting. I saw sever- is not a social club, but through the al members carrying these 25 year medals and they write Farmers Un-ion Life insurance in their counties 5.00 and their locals. They carry rate books for our company and earn a little commission by doing it. Those commissions do good, going back to the Farmers Union member.

We hear a great deal about social security. Men are striving for that. The Indians that roamed these prairies looked forward to old age with pleasure and anticipation. It was the dream days. They could sit around the camp fire and think of the mighty deeds they had done for the tribe. They would be consulted by the young How many of you are looking for-

ward to old age with pleasure. I am not so sure they did not have several good plans for social security in those old days, better than we do, maybe. Going back a little further than our Indians, when the old people got too old to be of service to the tribe, they bumped them off. That might have been a

But, now, we must provide our own income and care in our old age. To me that is the main object of insur-

We agree on objectives but we differ as to how to get there. I am wondering if you all do have a cash estate. Have you arranged for that. I am interested that the farmers and members of the Farmers Union do provide a cash estate. The other day I talked to five men, one right after the other, and they were without protection, without a provision for a cash estate. You have credit. You can buy things, when you go home you will have debts to pay, but you have credit, but a corpse hope the auxiliary wil continue to does not have any credit. Your earn-3.35 ing power has been lost.

We can provide a way for a cash estate on the lowest rate policies. Then we have other policies. We have a policy that will suit your needs and fit any plan you might want to take out. The Farmers Union provides for you so there will be no embarrassment for your family after you are not here to take care of them any longer. My advise to every body is arrange for a cash estate. Study the different plans. Do that whether you use it or not. Whether you take out insurance with my company or not, but do take out in-surance with some company. I thank you.

LADIES AUXILIARY
GIVE ANNUAL REPORT

The Ladies Auxiliary presented a most interesting part of the convention program. The officers of that organization were requested, by their state President Mrs. M. L. Beckman, to pease take their place on the plat-

Mrs. Everett Alquist, Secretary of the organization read the financial report, together with resolutions adooted, and new officers for the com-

ing year.
There are four local auxiliaries with a membership of 56, and four members at large. There are four delegates to this convention. At our meeting Thursday after-noon, the following officers were

Mrs. M. L. Beckman, Clay Center, President.
Mrs. B. F. Rice, Conway Springs, Vice-President. Mrs. Everett Alquist, Clay Cen-

er, Secretary-Treasurer. Resolution were adpoted as fol-We, the members of the Kansas Auxiliary wish to go on record en-dorsing the Thomas Massingale cost

of production Bill and opposing any bill which includes regimentation penalties or processing taxes.

Resolved that we, the members of the state auxiliary ask the President

ocracy in foreign affairs and whereas the Ludlow war referendum House Joint Resolution 199 Bill asks the people directly for a mandate on the question of attracting a nother nation, Therefore be it resolved that we, the Kansas Ladies Auxiliary of the Kansas Farmers Union go on record endorsing the Ludlow War referendum House Joint Resolution 199, and urge our Senators and Representatives to support this

Our financial statement is as fol-

Balance on hand at the close of the year 1936 After all expenses have been

Vice President of the Ladies Auxiliary was introduced by Mrs. Beck-Mrs. J. O. Vincent of Clay Coun-

ty, a member of Pleasant View auxiliary local 592, read the following statement. We have 8 new members during the past year, making 15 members

A study was made of the program of the Farmers Educational and Cooperative Union and of the laws both for the Union and Auxiliary. We continued the study of current events during the past years. We have especially stressed our stand for Peace

and against war.

We have enjoyed the study of Parliamentary law and purchased books to help us make the study more individual

The Auxiliary gave an ice cream party for their families. The myssisters have a way of adding zest to our meetings. For our literary work, the lecturer put on a contest and credit given

topic for the meeting. The idea is to increase individual reading. Mrs. Beckman then read the following paper, which closed the Aux-

iary program. Every mans organization of any spcial, civic and business contacts made by its members, the prinicples of the Farmers Union can be spread far and wide.

The wife of every farmer belonging to the union should feel it her duty to help to achieve the ideals and programs of our national union. Right now she should be voicing resentment to the attempts being made to regiment the farmers and to the government attempting to tell the on their own land and how much of this year, the program in this region on their own land and how much of their crops they must destroy. That is repugnant to any liberty loving is repugnant to any liberty loving the FSA in the Dakotas, Nebraska people. She should, through her auxiliary take a stand endorsing the Ludlow War Referendum House Joint Resolution 199, which bill asks the people directly for a mandate on the question of attacking another nation, and thus keep us out of war. These are but examples of what

a live auxiliary can do. Lyron Edwards says If we are but fixed and resolute Bent on high and holy ends We shall find means to do them on

every side And at every moment and even obstacles and oposition Will but make us "like the fabled spectreship's Which sail the fastest in the teeth

of the wind. President Vesecky stated. I regret the ladies auxiliary is not larger organization. The men folks ought to help them build larger. There are three things we ought to do. The dues paying members mothers, sisters, daughters and children all ought to be in the organization. hope the auxiliary wil continue to grow and grow. I am sure the state union will do everything it can to

help them put over their program. C. W. BUSHBY MAKES TALK AT HUTCHINSON CONVENTION

G. W. Bushby, President of the Farmers Union Mutual Insurance Companies was in attendance at the convention during a portion of the sessions and appeared on the platform and addressed the convention

on Friday lorning. Mr. Bushby outlined some of the work in the past and some of the hopes of the future in giving service through that company to the mem-

A summary of his remarks are printed below.

I have been a member of the Farners Union for 15 or 20 years, but have been chosen leader of one of your activities only a short time. Just a little over a year ago. I enjoy the work of the Insurance company. The first Farmers Union convention I ever attended was held in this room, M. McAuliffe was President then.

With regard to insurance, I was not so well informed, when I came into the Presidency, but I have done the best I could. I have made an in-

tensive study of the insurance busi-

The Farmers Union Mutual Insurance company is the second largest mutual company in the state of Kansas. It is first, doing business exclusively in the state. You have made it what it is. The Farmers Union Insurance company is still for the farmers. We have accomplished a great mers. We have accomplished a great deal. We are still working to make it better.

We are fighting for you. We are doing everything we can to keep the cost of insurance down and give you good service. We have 77 million dollars of in-

surance in force, and most of it is on farm property. We write farm business and city business. We are not trying for commercial business. We write city business because a lot of our farmers live in the cities. We have the facilities to take care of your auto coverage. We are now connected with a company, it is not our own company but we keep our fingers on it. We are doing everything we can for you. Come to Salina and get acquainted with us. We are farm folks. We do not want to be anything else. We assure you this is your Insurance company.

I Thank You.

STATE ADVISORY COMMITTEE NAMED BY FARM SECURITY

First Step Completed In Setting Up Machinery of Bankhead-Jones Farm Tenant Act

Nine prominent leaders of agri culture have been appointed members of the State Farm Security Advisory Committee to assist in administering Title One of the Bankhead-Jones Farm Tenant Act, George McCarty, Kansas State FSA Director, announced. This Title deals with loans to tenants for purchase of farms over a long period. The state committee will also assist in adapting the broad, national policy of the Farm Security Administration to local conditions and help in coordinating the program of the Administration with programs of other agen-cies operating in the field of agricul-

With Ed H. Hodgson, farmer of Little River, as chairman, the committee is composed of the following men: Dean H. Umbarger, Director of Extension, Manhattan; R. J. Laubengayer, Publisher of the Salina Journal, Salina; Alva B. Stryker, farmer, Blue Rapids; E. G. Tharp, farmer, Protection; H. J. Seidel, farmer, Glen Elder; Hal Robinson, farmer banker, Olathe; George Reinhardt, farmer, Parsons, and Charles Campbell, farmer banker, Norton.

With a national appropriation of only \$10,000,000 to initiate the work and Kansas.

The State Advisory Committee will have nothing to do with receiving applications for tenants.

"The nine men on this committee

re to serve in an advisory capacity and will make recommendations as to locations of areas best suited to this type of program," Ward explained, "but application of the individual farmer must be made to the County Rehabilitation Supervisor of the Farm Security Administration. He, in turn, will bring the application before the local county committee for approval."

SCALLOPED HOMING
AND CHEESE

Two cups of canned homing or One teaspoon salt One and one-half cups milk.

One-fouth teaspoon pepper. Two eggs. One-half cup grated American

Two tablespoons butter. Mix all ingredients together, pour into greased baking dish and set in pan of warm water. Bake in a slow oven for one and one-fourth hours.

An average of almost 3,000,000 telephone calls are made every day in the State of New Jersey.

The last issue of the Boston and Vicinity Telephone Directory is the largest Boston directory ever issued.
