and keeps George Norris in the senate of the United States. In 1932 I pledged my administraand woman on an American farm knows that we have done what we said we would do.

What needed to be done?

 \bigcirc

You know that in March, 1933, after ewelve lean yearrs, farm income was disappearing and farm prices had sunk to a bankruptcy level. Situation in 1932

In 1932 America's farm population was the greatest in our history, but the farmers' income was the lowest for the quarter century for which we have records. Farmers represented twenty-five per cent of the nation's population—but they got only 7½ per cent of the national income.

The spectre of foreclosure stalked the farmer's plow.

American agriculture was on the road to pauperism.

When the World War ended, the nations of Europe whom we had been feeding went back to farming for left themselves. Our farmers were holding the bag—a bag that bulged with vast quantities of wheat, corn and cotton for which the market had disappeared.

That was the farmer's plight. What

The best that it could offer was the farm board. The farm board set of less than 2500 population. an all-time high for extravagant futility. It met the problem of unsal-able and unexportable surpluses by

piling up bigger surpluses. To finish the job, the Republican market.

A Defeatist Attitude

RESOLUTIONS FROM

CENTER HILL LOCAL

The Center Hill Farmers Union Local No. 1147 of Riley county met for its regular meeting on Tuesday evening, October 6, with a fair attendance considering the condition of the roads and weather.

After the regular order of business and matters pertaining to the welfare of the Local were taken care of, we had a talk and discussion on The Social Justice Act, and other matters of interest led by Mrs. Leona Dobson.

The following resolutions were adopted at this meeting.

Whereas there has appeared in one of the leading Chicago daily newspapers, sponsored by one of the major political parties, a full page adver-He said one out of every seven tisement, containing a cartoon, picturing one large basket filled with food products, and one much smallwho are going forth in the world er basket, less than half the size of the large basket also filled with food pro-Kennedy said that "these young ducts.

the farmer. And we urge every farmer and person interested in agriculture to resent any such fakery by any political party.

Be it further resolved that we send a copy of this resolution to Governor Landon, one to the Kansas Union Farmer for publication and one to the Weekly Kansas City Star to be published in the "Over The Editor's Desk" column.

We, the Center Hill Farmers Union Local No. 1147, entertain the hope that the Supreme Court will interpret the Social Security Act as being un-

But secretly doesn't the corporations and rich Fascists really rule congress

Wonder how many of our members ever think again, after their initiation into the Union, of the obligation which they take on becoming members. Do we remember and live u p to the promise to support all Union business associations with our busin es sas long as we can do o without injury to ourselves or our families? Do we remember to speak well of our fellow members and help them when in trouble, or do we save our good words until after they are dead and do not need them? Do we begrudge our fellow members some good luck or withhold our help when he needs it to attain some office or other objective for which we may be properly striving? 1

Suppose we make it a practice of reading that obligation at the beginning of each meeting and live up to it as near as possible in our every day dealings with our fellow men. Let's try it.

As yet we have received no resolutions to be submitted to the resolutions committee at the State convention. If any of our Union locals or individual members have anything that they would like to submit to the Resolu tion or to the Ligislative committee at the convention they should be mailed to this office at once in order to make possible for the committees to report on Thursday.

We are planning for a discussion period on Thursday and also on Friday afternoon if it is the desire of the convention to stay in session a part of the afternoon and devote it to a good of the order discussion. The time given to each speaker will of a necessity be limited so as to give every one a chance to be heard, but we do hope that our members will come prepared to suggest and discuss matters that will make the Union give better and more complete service to our members. The Farmers Union belongs to you members, so you should all try to add all that you can to make it better and bigger.

While there is scarcity of good corn and grain sorghum, seed in many localities there are other localities that will raise lots of good seed or may have old seed corn on hand that might still be of good germination. It will pay the farmers elevators and perhaps the individual members to put an ad in the Union Farmer stating the kind of seed that they have, the quality, quantity and price. There is no reason why our members should first sell the seed to seed houses and then other of our members buy the same seed at an increase in price. Many of our members do not have the necessary storage facilities to properly take care of Seeds so they are compelled to sell as soon as threshed. If those wanting to buy and those wanting to sell can get together through the columns of the Union Farmer, they will help each other and incidental- a farm and get some actual farm exly help the State Union by giving us some much needed advertising revenue. Try it and see how well we can serve you.

vould end the farmers' program of co-operation and send them back to the "free competition"—or "rugged individualism" if you will-that wrecked them in 1932.

Substitute a Dole Next it would substitute a system of tariff equivalent payments, not for any permanent contribution to farm wealth or national income, but And merely as a cash handout-or a dole. These payments would be made only to the producers of exportable farm crops-specifically on hogs ,wheat, cotton and tobacco. Dairymen, cattle men, sugar grow-

ers and producers of other crops of which there normally is no exportable surplus would be left out. What about the effect of such a

scheme? Would it serve to protect farmers from price collapse under a burden of surpluses? Would it guard them in the future against a disaster remains our ideal of self-reliance and like 1932? No plan could lead the nation back which the reservoirs of the nation's

strength are constantly renewed. It faster to such a crisis. The proposed plan of the Republi- is from the men and women of our can leaders is a straight subsiby of farms—living close to the soil, that unlimited farm production.
