MUNITIONS INVESTIGATION

The first serious threat to gag the Senate Munitions Investigating Com-mittee has come during the past week. Bitter attacks have been made upon its chairman, Senator Nye, by the conservative forces in the Sen-ate. Charges made by Senator Nye regarding misleading testimony made before the Senate Foreign Relations Committee by President Wilson in Committee by President, Wilson in

the wartime period brought forth a bitter attack by Senator Connally (D. Tex.) and Senator Glass (D., Va.) on the work of the committee, says the Peace-Action Service. Except for the noteworthy defense

made by the liberal Scripps-Howard newspapers, the Philadelphia Record, and some of the liberal mag-azines, the press by clouding the is-sue with charges of "headline hunt-ing" has played into the hands of the reactionary interests who seek to block the enactment of a strong neutrality law by the present Congress. It is well for individual voters to examine the motives behind the attacks on the Nye committee.

It is noteworthy that Senator Connally has been a staunch defender of the freedom of the seas doctrine in the neutrality hearings of the Senate Foreign Relations Committee. Both Senators Conally and Glass seized upon an incident in the investigation and twisted it as to mislead the public into believing that the whole work of the Nye committee has been only so much muck-racking. Nothing could be further from the

truth. The fact of the matter is that the Nye committee has not been seeking to disinter the remains of our wartime leaders and exhibit them as gruesome examples of political monsters who sought to enmesh the United States in world war. The committee has rather sought to bring to light the fact that the profit motive during the 1914-1917 period contained the germs of inevitable participation in the conflict. The committee has clearly shown both in the present hearings and on former occasions that it is impossible for any one man or handful of men occupy-ing executive positions to withstand the relentless pressure of economic opportunity which is offered by a foreign war. The committee has also sought to show very plainly that there were not one, but many reagest enemy of the much needed Fra-zier Lemke Refinance and inflation the World War, one of the strongest reasons being the economic ties with the Allies.

It is well to remember in the whole controversy that the committee has been seriously handicapped by the fact that the State Department refused to permit the publication of im-portant documents on which the committee members have based their statements regarding wartime activities. With such an obstacle, the members of the committee have done well to go as far as they have without meeting such opposition before. Those who dislike the views of certain members of the committee on other questions of international fairs would do well to realize the fact that support of the attacks on the work of the committee is Reporters. the hands of those who are fighting the enactment of any neutrality legis-FARMERS UNION JOBBING ASlation. In leaving this post, I am not unmindful of the fact that I owe a real years with the Farmers Union Live debt to the members of the Kansas Farmers Union. The members have treated me royally, electing me to my office five times by most flattering votes of confidence. I hope I may have merited this showing of confidence, at least to a degree.

I feel that I have been associated with the Kansas Farmers Union through some of its most trying history. These four and a half years have been crowded with adverse circumstances for Kansas farmers. Economic upheavals, depression years, drouths, dust storms, low prices, big debts, poor crop years, floods, all have done their part to make the Kansas farmers' fight and the fight of their organization, the Kansas Farmers Union, a stern one during the past few years.

During this time I have been pleased to stay constantly on the job. Vacations have been out of the question. Together with the other officials and leaders I worked hard at the job of keeping the Kansas Farmers Union going as it should go. Budgets were decreased and sacrifices were made—just as virtually every Kansas farmer has had to make sacrifices. During my terms as editor. I have edited 225 issues of the Kansas Union Farmer. The work has been hard, but I have enjoyed it.

Now perhaps it is time to let some one else take over this work. Just who the secretary and editor may be is not so important as the manner in which the members shall cooperate with him. If my successor receives the same type of cooperation from the members of the Kansas Farmers cessful.

WHAT COOPERATION DOES

A good editorial is found in the anuary 30 issue of "The Co-Operator," published by the Farmers Union Live Stock Commission Company and the Farmers Union Jobbing Associ-ation, at Kansas City. This "editor-ial" is part of a story contiled "Using ial" is part of a story entitled "Live Stock Firm to Pay 10 Per Cent Pat-ronage Refund." It follows: Theo. H. Gosser, and whereas their

Naturally reduced volume was expected by the officials of the Farmers Union Live Stock Commission Company, and steps were taken to match expenses with income. Salarfurther resolved that a copy of these ies were reduced materially, and genresolutions be sent to the family, eral operating expenses were cut one be placed on the minutes of wherever possible. So, again it can our local and one be sent to the be said that the payment of this pat-Kansas Union Farmer for publica- ronage refund is not an accident, but

the result of planning and foresight. Just what does the existence of this co-operative firm on these three yards mean to farmers in their respective trade territories? Is meduced marketing expense the major attraction of this firm? Most certainly not. This saving would amount, to naught if the live stock of the pa-trons was not handled efficiently and sold by experienced salesmen. But the Farmers Union is well aware of its first duty, and has in its employ salesmen who are capable of secur-ing every dime the market affords for consignments received from their customers. After performing the best of commission service, the Farmers Union goes a step further and returns to its customers the savings they have accumulated during the year. And during the past two and one-half years, its original commission charges have been lower than

every firm except one, on the Kansas City yards. So, there is a reason for its existence, and many thousands of cooperative farmers appreciate this reason. The Farmers Union is your own

LIVE STOCK FIRM PAYS TEN PER CENT PATRONAGE REFUND

(Continued from page one) tomers in the country 11,989 cattle and calves; 2,431 hogs, and 15 sheep, handling a grand total of 151,349 head of live stock. In figuring it on a carload basis the total number of car-loads handled equal 3,105, with a to-tal valuation of \$4,042,188.42. This, of course, represents a decrease in number of head of all species of live stock handled, as compared with 1934, of 79,491 head. In taking the general receipts over the entire stock yards comparing 1935 with 1934, you will find a decrease in every species of live stock handled through the yards as follows: Decrease in number of head of cattle 646.023; number of head of calves 246,497; num-ber of head of hogs 682,423; number of head of sheep 341,086, or a total decrease in number of carloads arriving at Kansas City stock yards of 33,464. I wish also to call your attention to the fact that this decrease in the hogs yards followed a decrease in 1934, as compared with 1933, of 815,152 head. The number of head of hogs arriving at the Kan-sas City stock yards in 1935 was 579,536. This arrival of hogs is the smallest since the origin of the yards.

Since I became your manager in 1929, your firm has handled 1,927,139 head of livestock, or a total of 34,766 carloads, valued at \$41,795,108.18. all of which has been returned to our stockholder customers except an amount set aside into a reserve account. The amount of profit dur-ing this period of time has amounted to \$138,529.09. This past year has been one of the hardest years to operate at a profit in the history of my experience on the Kansas City stock yards and I have been associated with this firm since July 1, 1920. Consignments of live stock arriving in such small bunches by truck make it necessary to retain as much help to do the work as it would take to handle three times that volume arriving by rail. Expenses at the Kansas City house in 1934 were \$75,519.87 while in 1935 the expenses were \$57,040 60, a reduction of \$18,479.27. There are, however, certain expenses attached to the live stock business which cannot be curtailed.

The loyal support of our .many stockholders and customers have made these savings possible and for that reason the board of directors of this firm at their annual meeting on Janyour firm to stockholder customers

Supreme dule which is approximately 15 per cent lower than the old line firms and in addition our customers have received first class sales and service, as well as the additional refund at the end of the year.

Since our last stockholders' meeting a branch office was opened on the live stock market at Parsons, Kansas. The business handled by this new venture thus far is entirely satisfactory and we believe the opening of the Parsons branch will be a great asset to the house at Kansas City.

wish to thank our many friends and customers who have, through their loyal patronage, made this firm. an outstanding one on the Kansas City stock yards.

KENNEDY SPEAKS OF THE FARMERS UNION

(Continued from page one) the question has been raised since, it was decided what the Congress acted entirely within its constitutional

power The Thomas Massingale bill also provides for such restriction or prohibition of the imports of agricultural commodities as will fully protect the domestic market for the farmers of the United States.

These are just several provisions that go to the heart of the Agricultural problem. This law provides for a price for farm commodities based upon the average cost of production.

I am sure that no one undertakes to say that the farmer is not entitled to a price that covers his cost. Those who oppose the Farmers Union program do not say that farmers are not entitled to cost but they have rather agreed that he is But then they say: "How are you going to do it " "How are you going to get the farmer cost of production without regulating production?" This is the answer: "When the farmers of the United States receive cost of production prices for their products, there will be no surplus of farm commodities, in this country. Labor will be reemployed anl will be using the farm products the farmers produce and farmers will use the products of Labor."

The surplus of Labor and the sur-plus of Farm Commodities is the result of disastrously low prices to the farmers. If the farmers were getting decent prices for agricultural pro-ducts they would all be readily con-United States. sumed by all the people of the Nation because there woud be jobs at decent wages for all. You and I will have to decide which way we are going to go. Whether we are going to attempt by some devise or scheme or plan to continue to fool around with the "regulation" of agricultural production-prohibited by the Constitution and in fact reserved to the several states or some of the problems of business and industry by protecting the price of for the farmers of the United States. The "Soldier Bonus"

It is the well known position of farm commodities. I doubted then the National Farmers Union that the and I doubt now the wisdom of veterans of the world war were entit-

shipped direct and 124 were handled through the warehouse. Our twine volume this year was

over two million pounds—an increase of half a million over last year. We have just entered the steel and wire business this past year, and have handled 15 cars, 6 of which were shipped direct and 9 through the warehouse.

We have found the past year that it was necessary to handle most commodities on a smaller margin of profit, and for that reason we must have volume. Our competitors have been particularly active since we established our warehouse at Kansas City in its present location. We have learned many things in establishing our steel and wire contracts, and we are now negotiating with The Northwestern Barb Wire Company for a new contract covering steel and wire goods which we believe will put us in a much better position to increase our volume of business. We expect to sell this whole line under our own KFU brand.. And don't forget that

we handle all our merchandise on a quality basis. In conclusion I want to say, that there is no brighter spot in my whole life htan during this time that I have served you as your secretarymanager, and I certainly wish for you success under the new management. Respectfully submitted, H. E. WITHAM, Secretary-Manager

ice" is the frontier for the families in these neat little farmstead homes on a project of the Resettlement Administration. The goal of rural rehabilitation is not temporary relief, but permanent independence for the families who have undertaken this venture as a means of regaining their position as assets to their communities.

Intensive farming, with coopera-tive marketing of products raised, is the means of livelihood of farm fam-couples just starting out, and still to a self-sustaining basis on farm-steads. This is one of the phases of the Resettlement Administration in its program to aid rural people back "And the nicest thing about it is the to independence. "And the nicest thing about it is the way we cooperate. When one of us is way we cooperate. When one of us is Modest but comfortable homes are unable to do something; someone else constructed on small acreages. Farmis always ready to come over and ng is done with cooperatively owned help Nebraska has eight farmstead pro-jects with a total of 82 families livmachinery. The plots are irrigated and surplus produce is canned. ing upon them. They are located at South Sioux City, Falls City, Loup Each unit consists of a house, chicken house, cellar and barn. One cow and a flock of chickens augment the income of each family. Occupants are all people with farming back-
