Too Wet For Milo

Art Jenkins, Riley, said he was having trouble working a 40-acre milo field for his son because the ground was too wet.

No Races For This Boat

The cabin cruiser below was heading for championship boat races in southern California before it ran afoul of Kansas winds along US 77 last week. Four men from Minneapolis, Minn., were taking the boat across the prairie, two of them in a pickup cab, two resting in a camper, with the boat trailing behind. Wind hit the 28-foot cabin cruiser as the train negotiated a curve west of Riley, demolishing the camper and causing a wreck which sheared the cabin off the boat.

Ben Bohach, left, who had been sleeping in the camper, kicked his way out of the wreckage, unhurt except for a small cut. Below, Earl Johnson stands atop the boat and his son Jerry watches as the boat is made ready for the highway. The other person in the camper, Bud Bresnahan, came out of the wreck with three broken ribs.

More Meat, But More Appetite

Livestock producers are expected to turn out more red meat next year, but consumers' appetites are bigger too, says the Agriculture department.

SALINA, KS.

Marketings of fed cattle — those headed for the table — are expected to continue gaining in the first six months of 1969, then taper off a bit.

Department experts say the increase in fed cattle sold next year may be less than the 7 percent annual gain during the 1960-67 period.

But consumer demand for meat is strong, market prices fairly strong, and feed supplies ample, the experts say.

The net result will be larger supplies of meat in 1969, with the average American probably eating more.

Per capita red meat consumption this year is estimated at 182 pounds, up 4 from 1967. More beef and pork are being consumed this year, while veal, lamb, and mutton are down.

Beef is the most popular meat, accounting for an estimated 109 pounds of the per capita consumption this year, up 3 pounds a person from 1967, the department said.

"Consumer demand for meat in the coming year is expected to remain strong, but it is not expected to increase as rapidly as it has this year," the report said.

"Thus, with larger output of red meat and poultry in 1969, livestock prices may average a little lower than this year."

Total cattle numbers next January 1 are not expected to vary

much from the slightly less than 109 million head reported last January, but since more are being fed for slaughter at mature weights the total beef output is larger.

The department said the inventory of cattle being fed on January 1 could be from 7 to 10 percent more than a year earlier, depending on marketings and replacements this fall.

Cattle and calves on feed November 1 in selected survey markets in Arizona, California, Colorado, Iowa, Nebraska and Texas totaled about 6 million head, an increase of 8 per cent from October 1 and 9 per cent more than a year earlier.

Placement cattle — those going into feedlots — during October totaled 1,700,000, up 4 percent from a year earlier, while marketings of fed cattle for slaughter from the survey areas totaled more than 1,200,000, up 10 per cent from a year ago.

Beef Nutrition Meetings Set

Beef Cattle Nutrition Conferences are set for four locations across Kansas in December.

These events, sponsored by the Kansas State University Extension Service, are for cattle feeders and all people working in related industries, according to Dr. Phil Phar, Extension specialist in animal science.

Conferences are in:
El Dorado December
Abilene December
Garden City December
Hays December
Topics of the meetings include utilizing urea, carcass grading, feedlot chemistry, grain processing, high-level feeding, and drawal of feed from cattle pending for slaughter.
The day-long meetings will have registration at 9 a.m.

Why It Pays To Supplement Pasture With Good Formula Dairy Feeds

Grass alone cannot give your cows all the food values they need for sustained high production.

When you are feeding cows bred to be top milk producers, the need for proteins, minerals, vitamins and unidentified factors in the ration is very important. This need is even greater in late summer and early fall when pasture may be close-cropped and dry.

CO-OP Nutritionists know that dairy farmers must have proper feed to get maximum results at lowest possible costs. That's why CO-OP Dairy Feeds are Profit Checked for results. CO-OP Dairy Feeds are formulated to give a ration that will best supplement the shortcomings of the dairymen's forage program and will produce 100 lbs. of milk at the lowest feed costs.

• CO-OP Dairy Feed-12 is a high TDN, well-fortified dairy ration that contains essential vitamins and minerals. It is

recommended to be fed with excellent, high protein pasture or with liberal amounts of high quality all-legume hay.

• CO-OP Dairy Feed-14 should be fed to producing cows, dry and freshening cows, heifer or bulls on very good pasture or very good quality legume hay.

• CO-OP Dairy Feed-16 is a well-fortified, well-balanced ration that is preferred by thousands of dairymen who demand an efficient dairy feed for a variety of feeding conditions.

• CO-OP Dairy Concentrate-32 can be fed on top of the grain to dairy cows or may be mixed with farm grains to produce a well-balanced and fortified ration.

• CO-OP Dairy Concentrate-50 is designed for mixing with farm grains to produce an efficient, high production ration.

Come in and let us show you the CO-OP Dairy Feed best suited for your dairy herd.

GEHL MIX-ALL

Grinds! Mixes! Delivers!

The Gehl Mix-All, with economy plain feeder and exclusive crusher-feeder attachment, grinds, mixes and delivers the most uniform on-the-farm feed.

Here's proof: Samples of feed grains, ground by Gehl and competitive mills, were compared in a "sieve-shaker" analysis (a grinding uniformity test used also by commercial feed manufacturers). In test after test, Gehl samples were the most uniformly ground. And, the more uniform the grind, the better the mix!

In the Mix-All hammermill, 66 thin, alloy-steel hammers cut ... not pound ingredients on a big grinding surface for faster feed flow with reduced "fines." Come on in for a close-up look at all the Mix-All features, including the swinging auger-feeder.

Make us Prove it with a Demonstration!

Anhydrous Line Reaches Conway

MCPHERSON — Completion of a pipeline carrying anhydrous ammonia fertilizer

has been made at Conway, west of here. The line, when finished, will carry fertilizer from Borger, Texas, through Kansas and Nebraska to Early, Iowa.

The plant at Borger was

completed in late October and the first load was taken from the Conway terminal last week.

The pipeline was built by Mid-America Pipe Line Company and it follows the route

of a Mid-America liquid petroleum gas line through most of the state.

There will be three terminals in Kansas, one at Greenwood, Nebr., and one at Early, Iowa.

December 3, 1968

The Borger plant has a capacity of 1000 tons per day. An 80,000 ton storage and distribution terminal will be built at the Iowa terminal.

Bids To Retire Whole Farms?

A massive program of long-term retirement of whole "marginal" farms has been proposed by a team of economists at Iowa State University as a possible alternative to present farm programs for consideration by the on-coming Nixon administration.

Adoption of the plan would amount to a major shift in national farm policy, which is deemed desirable by many, both in and out of agriculture, including the Iowa State study team.

The report, entitled "Farm Programs for the 1970's," was compiled by Howard C. Madsen,

Earl O. Heady and Leo V. Mayer of the Iowa State Center for Agricultural and Economic Development, and is expected to get the attention of farm advisers in the Nixon administration.

Long-term land retirement is viewed by the Iowa Staters as the chief means of keeping the U.S. farm production in balance with demand.

The authors contend that the plan could cut in half the cost of government supply management programs now operating, while at the same time providing the means by which an or-

derly transfer to a "market-oriented economy could be achieved."

Part of the plan would be a gradual 5-year scaledown and eventual elimination of present acreage controls and price supports for individual major farm crops such as feed grains, wheat and cotton.

An alternative, they said, might be to have the big land retirement program accompanied by a small-scale version of the present wheat and feed-grain control-support system to protect farmers against year-to-year shifts in supplies and prices.

The report estimated that net farm income would decline from the expected 1968 level of about \$15 billion if a major long-term land retirement program was substituted, without supplements, for present programs of individual crop retirement and

price supports.

On the basis of expected 1970 conditions, the economists estimate that total net farm income would be close to \$12.7 billion with a 50 million acre land retirement program, and about \$14 billion with a 60 million acre program.

But, they say, net income levels could be higher if policy makers decided to expand retirement past the 60 million acre point, at higher cost to the government, of course.

Their plan calls for offering government contracts for conversion of cropland to trees or grass on a bid basis. Payments to landowners would be designed to equal net returns now available from the land, plus an allowance for weed control.

Enrollment in the program would be limited to 10 per cent of the land in any one area in a single year, with an over-all ceiling of 50 per cent of a region's cropland. Buildup of the 50 to 60 million acre retirement total would take place in stages over

December 3, 1968

a period of about 5 years.

The economists estimate retirement payments of all land to farmers would total \$18.1 billion under a 60 million acre "whole farm" retirement plan and about \$1.3 billion under a million acre plan. These figures contrast with estimated payments of \$3.4 billion under present combined programs of individual crops.

If present programs continue in operation, the study shows costs will increase because rising farm productivity.

The Iowa Staters say that present programs, while providing considerable income support for commercial-type farmers, offer no way by which agriculture can eventually balance supply with demand at "acceptable" prices without continuing farm payments of \$35 billion or more a year.

Any new farm program, the report said, must be accompanied by emphasis on developing new non-farm economic opportunities in rural areas and measures to help farm families and rural communities adjust to the continuing reduction in farm numbers.

Charolais Assn. Changes Showing Classes, Rules

HOUSTON, Tex. — Changes in showing procedures and classes, including the addition of finished steers in a special of-sire class, have been announced by American-International Charolais Assn. for the show season beginning June 1, 1969.

J. Scott Henderson, executive secretary of the association, talked about the special get-of-sire class for finished steers. "And more commercial beef producers are watching breeding class competition in livestock shows across the country,"

Steers in the class may be crossbred animals, but they must be sired by a purebred Charolais bull registered with the association, making the sire at least one-half Charolais. The sire need not be the same as of animals shown in regular junior and senior get-of-sire breeding classes. The steers must be of an acceptable mature weight, Henderson explained.

Also strengthening bull

cs are added requirements that all Charolais bulls shown in senior classes or bulls more than one year of age must have a valid and satisfactory semen test. The test would be valid for the entire show season. The certification must accompany any the animal to all shows.

Unhappily, when you apply conventional fertilizers, much of the phosphate is locked up through fixation in the soil.

□ Up to now, this has been fought by carefully placing the phosphate closer to the surface and near each plant. Trouble is, this leaves your phosphorus supply "high and dry" during the heat of the summer. □ Or-tho solved this problem during the development of UNIPELS. A unique "phospho-nitric"

How much of the phosphate you apply is actually used by your crops?

process makes the phosphate in UNIPELS 100% available, yet makes it resist fixation regardless of how it's applied!

□ And when you plow down UNIPELS in the fall, the phosphorus and other vital nutrients are down in the moisture zone where roots are most active in the hot, dry summer. □ Come see us soon about the year 'round benefits of fall fertilization with Ortho UNIPELS — the All-Season Fertilizer.

Army About To Strengthen

With the Vietnam buildup nearly complete, the Army has approved plans to cut its basic combat training output by the equivalent of one brigade every eight weeks.

Pentagon officials said that 30 basic combat training companies will be eliminated at Ft. Bliss, Tex., one of the Army's 16 training centers, by January.

The 30 companies have been putting about 6000 men through basic every two months.

The action, disclosed in response to questions, marks the second cutback in the Army training structure in a week. The Army said earlier it was phasing out 18 advanced individual training companies at its Ft. Dix, N.J. center.

Military spokesmen said no further reductions in the training establishment are being considered at this time.

The cuts are possible mainly because the Army, now with more than 1.5 million men in uniform, is reaching the end of its buildup for the Vietnam war.

The Army has added more than 500,000 soldiers to its ranks

since mid-1965. The Defense Department needs only about 15,000 more men to reach the authorized ceiling of 549,500 in Vietnam.

Sources said money also was a factor in the cutbacks but there

was no immediate estimate on how much the reductions will save.

The Pentagon is currently engaged in an economy drive inspired by Congress.

OUR DAILY BREAD

— by G&G Area Cooks

Mrs. Lee Johnson, Effingham, Wins Weekly Contest Prize

The following recipe is from Mrs. Lee Johnson of Effingham, who is the prize winner.

FLAMING ICE CREAM CAKE

(Cakes may be frosted more easily if made one to two days ahead of time and stored in plastic bags or air-tight containers until ready to use.)

- 1 package (17-ounce) chocolate angel food mix
- 4 pints green peppermint brick ice cream
- 2 packages (7½ ounce) fluffy white frosting mix
- 2 tablespoons cocoa
- ½ cup lemon extract
- Medium size sugar cubelets
- Beverage bottle caps
- 1 sheet copper-colored aluminum foil

Prepare cake mix as directed on package. Fill unoled 3¼ inch and 7-inch aluminum tube pans about ¾ full. Pile remaining batter lightly in unoled 10-inch aluminum tube pan. Place all three cakes in moderate oven, 350 degrees. Bake 3¼ inch cake for 25 minutes; bake 7-inch cake for 45 minutes; bake large cake for 50 to 55 minutes. Invert cakes and let hang until cold. Remove from pans. Use serrated knife to split each cake crosswise in half. Place lower half of 10-inch cake — cut side up — on large tray. Remove containers from 2 pints of the ice cream. Cut each pint into 3 equal crosswise slices. Space 4 of the slices evenly over bottom half of 10-inch split cake. Cut remaining slices in any needed shape to fill in intervening spaces. Top with upper half of 10-inch cake. Place in freezing unit. Fill other 2 cakes with remainder of ice cream cut and used in same manner. Place cakes on wax paper in freezing unit.

Prepare frosting as directed on package. Blend in one or two drops of yellow food coloring. Remove cakes, one at a time, from freezing unit and frost attractively, filling tube centers of cakes with frosting. To form cocoa swirls, use small spatula or silver knife dipped first into frosting and then into cocoa. Return cakes to freezing unit for two to four hours.

Prepare bottle caps to use as sugar-cube containers. Remove cork portion from inside each bottle cap. Carefully mold foil into caps. Fold edges underneath.

When ready to serve, remove cakes from freezing unit. Place in position to form 3-tiered cake. Arrange fresh mint leaves around base and on top of cake. Place foil containers around edge of cake and center one foil container on top of cake. Soak sugar cubes one minute in lemon extract. Place in foil containers. Light. Serve at once. Makes 18 to 20 servings.

Mrs. A. L. Harris, R1, Clay Center: "Getting to be holiday time and we think of plum pudding along with the turkey and trimmings. Am enclosing one that makes you think of the old time puddings without all the work."

ROYAL PLUM PUDDING

- 1 1-pound can or jar (2 cups) purple plums
 - 1 package gingerbread mix
 - ½ teaspoon salt
 - 1 cup light raisins
 - ½ cup chopped walnuts
 - ¼ cup sugar
 - 2 tablespoons cornstarch
 - 1 tablespoon lemon juice
- Drain plums, reserving syrup for sauce. Remove pits and cut plums in pieces. Prepare gingerbread mix according to package directions, adding salt and plum pieces. Stir in raisins and wal-

nuts. Transfer batter to well-greased 6 cup mold (or 12 well-greased 5-ounce custard cups). Bake in moderate oven (375) about one hour for mold, 40 min. for cups. Loosen edges and immediately unmold on plate. Meanwhile, prepare Plum Sauce: Add water to reserved plum syrup to make 1½ cups. Combine sugar and cornstarch in saucepan. Gradually stir in plum syrup. Cook over medium heat, stirring constantly, until mixture thickens and boils, cook one minute. Add lemon juice. Serve warm over plum pudding, pass Fluffy Hard Sauce.

- Fluffy Hard Sauce
 - ½ cup butter or margarine
 - 2 cups sifted confectioners sugar
- Stir in beaten egg yolk
1 teaspoon vanilla

PERMANENT PRESS FABRICS

(and anything you wash)

DRY BEST IN A FLAMELESS ELECTRIC CLOTHES DRYER

Today's permanent-press clothing will keep a fresh-ironed look only with proper drying. Gentle tumble-drying with accurate heat and time controls are absolutely necessary to keep the wrinkles out and the press in. And that's just what you get with a flameless electric clothes dryer.

All your washables, from permanent-press blue jeans to delicate synthetics, dry fast and gently. And you can purchase a flameless electric dryer for up to \$40 less than other types of dryers. See your appliance dealer today.

8th Annual Grass & Grain

Bonus Recipe Contest

All recipes submitted for "Our Daily Bread" between November 9 and December 9 will automatically be entered in the special "grand prize" contest. The winner will be announced in the December 24 issue.

The grand prize winner will be selected on the basis of originality & quality. Weekly winners will remain eligible for the special event.

- G.E. Automatic Grill & Waffle Baker
- Hamilton-Beach Electric Knife
- Sunbeam Cooker & Deep Fryer, 6-Qt.
- Sunbeam Electric Skillet, 11-inch

Fold in 1 stiff-beaten egg white. Chill.

Mrs. Edward Pachta, Belleville: "My family likes these rolls as they are very light and tasty. Would be very good for the holiday meals."

CORNMEAL DINNER ROLLS

- 2 cups milk
- ¾ cup cornmeal ("I use yellow.")

- ½ cup sugar
- 1 stick margarine
- 1½ teaspoons salt
- 3 eggs, beaten
- 2 packages dry yeast
- ½ cup water
- Enough flour to make soft dough

Add milk slowly to cornmeal. Cook until thick, stirring constantly. Remove from heat. Add sugar, margarine and salt. Let

cool to lukewarm. Dissolve yeast in water and let stand ten minutes. Add yeast mixture to hot eggs. Add flour until easy to handle. Knead. The dough should be very soft. Let rise until double. Make into small rolls. Let rise in greased pans. Bake 15-20 minutes in a 400-degree oven. Makes four dozen rolls. Takes three to four hours.

CONTEST RULES

1. All recipes submitted for "Our Daily Bread" between November 9 and December 9 will be eligible. Date of entry will be postmarked date.
2. Winning recipe will be selected on basis of originality, quality.
3. Grand prize winner may select one of several prizes.
4. Weekly prize winners will not be disqualified.

TO ENTER —

Pick the holiday recipe you want to submit.

Check to make sure all ingredients are included, measurements accurate and writing is legible.

Be sure your name and address are on the entry — not just on the envelope.

Please send only one recipe at a time.

Mail entry to Woman's Page, Editor, Grass & Grain, Box 1009, Manhattan, Kansas 66502.

Good luck!

A SQUEEZE for ease in serving.

An ingenious fork and serving combination that makes hot and hard to handle food items easy to serve. Made of the finest triple chrome plate steel. Hand-some, durable cape handles. Picks up meat, baked potatoes, etc., and pushes them off tines onto serving plate.

The winner each week is drawn by lot from the recipes printed.

Win one by sending us your favorite recipe — this can be main dish, leftover, salad, side dish, dessert or what have you.

1. Check your recipe carefully to be sure all ingredients are accurate and accounted for.

2. Be sure your name and address are on the entry.

3. Only one recipe at a time, please.

4. Send it to Woman's Page Editor, Grass & Grain, Box 1009, Manhattan, Ks., 66502.

The next recipe is from Mrs. Milton Hetttenbach, Cedar Point: **CRANBERRY CREAM SALAD**
2 packages cherry gelatin
1/2 cup sugar
2 1/4 cups boiling water
2 cups cooked whole sweetened cranberries
3/4 cup chopped English walnuts
3/4 cup chopped celery
2 cups cultured sour cream
Dissolve gelatin and sugar in boiling water. Add cranberries. Cool. Add nuts and celery. When partially set, fold in sour cream. When firm, cut into squares. Serve on lettuce. May be frozen.

Mrs. John Horst, R3, Madison: "This recipe can be served in many ways as a whipped cream substitute. Use on fruit salad, on gingerbread, between and over two 9-inch layer cakes of various kinds. For a variety of flavors add 1/4 banana, sliced, 2 tablespoons crushed pineapple, or 2 tablespoons cocoa, etc."

FLUFFY UNCOOKED FROSTING
1 egg white, chilled
1 cup sugar
1/4 teaspoon cream tartar
1/2 cup boiling water
1 teaspoon vanilla extract
1 red cherry on topping
Cream egg white, sugar and cream tartar thoroughly, then add boiling water and beat with electric mixer until thick and fluffy (on whip) about eight minutes. Add flavoring. This amount will frost two 9-inch layer cakes.

Mrs. Dale Weber, Westphalia: "I would like to enter my recipe for the contests in your nice little paper."

TAPIOCA SALAD
Soak overnight 1 cup pearl tapioca in 1 quart cold water in double boiler or copper bottom pan. In morning add 1 1/2 cups sugar. Cook until tapioca looks clear throughout. This may take two hours, cooking slowly so as not to stick. Stir frequently.

Cool. Add:
1 small can crushed pineapple
1 cup small marshmallows (colored ones are pretty)
1/2 cup diced dates
1/2 cup sliced bananas
1/4 cup maraschino cherries
Then add, folding in:
1 cup cream, whipped, to which has been added:
1 teaspoon vanilla
1/2 cup nutmeats
Line dish bottom with graham cracker crumbs. Pour in the salad. Sprinkle over the top a generous layer of more crumbs. Let set several hours.

Mrs. Ralph Most, Centralia: "Here is a holiday drink we enjoy at the Christmas season when guests drop in. Can be made up and kept in refrigerator and served hot or cold."

CRANBERRY TEA
Cook 1 quart cranberries in 4 cups of water, then strain. Make a syrup of:
4 cups water
2 cups sugar
12-15 whole cloves
1 package red hots (about 3/4 cup)

Cook until red hots dissolve, then add:
Juice of 6 oranges
Juice of 6 lemons
4 cups water
Mix all together and it's ready to serve, hot or cold.

Martha E. Bues, 1204 Ratone, Manhattan, is the sender of the next recipe:

SWEET POTATO & FRUIT CASSEROLE
4 medium-sized cooked sweet potatoes
1 1/2 cups fruit (crushed pineapple, oranges, raw chopped cranberries or a combination of any of these)
1/2 cup brown sugar
1 teaspoon salt
3 tablespoons margarine
Preheat oven to 350 degrees. Rub casserole with margarine. Peel cooked sweet potatoes and slice lengthwise. Place in casserole. Put fruit over top of sweet potatoes. If your casserole is small you may need to use two layers ending with fruit on

top. Mix the brown sugar, salt and margarine; sprinkle over top of last layer of fruit. Bake 35-40 minutes, covered a portion of the time. Serves four to six.

Mrs. Eugene Purcell, R1, Superior, Nebr.: "This makes a

December 3, 1968

very pretty salad for the Holidays. I enjoy using the recipes from Grass & Grain."

CHRISTMAS APPLE CHEESE SALAD

Finance your
FEEDER CATTLE
where they understand
what it takes
to **MARKET CATTLE!**

Is someone who doesn't understand cattle feeding likely to understand the money problems of the cattle feeder?

Your Production Credit Association understands. Get your feeder loan from the farmer-owned PCA ...pay only simple interest...and set up a repayment plan that fits your marketing plan.

GOOD CALF GROWTH PAYS OFF

WHEN HEIFERS START MILKING

Good solid calf growth can be put on fast at low cost. And it can pay off in early freshening and good production right from the first lactation.

Many dairy men have proved to themselves that the Purina Calf Growing Program can help develop heifers that freshen between 22 and 24 months and repay their growing costs in the early months of lactation.

Here's the Purina Calf Growing Program:

First 3 days—Colostrum

4 days thru 4 or 5 weeks—Purina Nursing Chow®—a milk-base milk replacer fortified with vitamins and minerals.

4 days thru 2 months—Purina Calf Startena®—a palatable calf ration with a research-proved energy-protein balance for good calf growth.

3 thru 6 months—Purina Calf Growena®—a 16% ration that provides a high palatable level of protein that fast growth demands. Calf Growena is fortified with vitamins and minerals.

At end of 2 months—Good quality hay free-choice.

Prove to yourself that it can pay to grow calves on the Purina program. Stop in and talk to us—at the sign of the familiar red and white Checkerboard.

Good news!
Early
Trader's
Bonus
is back!

Today's ETB is bigger
and better than ever!

The sooner you trade the more money you earn. Trade during ETB time—now until January 31—and receive a cash bonus direct from International Harvester Company. Practically any new equipment worth \$1000 or more is eligible during our ETB offer.

Here's how ETB works. You and your dealer figure out the best possible deal on the equipment you need. Then figure your Early Trader's Bonus: 6% per annum of your down payment (trade-in or cash or both) from the day you trade until dates shown below.

On tractors, your ETB bonus is figured from the time you trade to April 1, 1969. On combines, balers, self-propelled windrowers, cotton pickers and others—the bonus is figured to August 1, 1969. On qualified implements and equipment purchased with a tractor—or purchased separately at a total of \$1000 or more—you earn a bonus to April 1, 1969.

Your bonus check direct from International Harvester Company will be in your mailbox in a matter of days. Your ETB price can be guaranteed the day you close the deal. And if you trade before December 31, 1968, you may be able to take advantage of investment tax credit and depreciation allowances on your income tax.

Still another bonus! On our Waiver of Finance Plan, you pay no finance charges until well into 1969—when you finance through IHCC.

Call your International dealer today—and find out how big your cash Early Trader's Bonus can be. The sooner you trade the bigger your check!

1 cup hot water
 1/2 cup (6 ounces) cinnamon
 candy
 1 package lemon gelatin
 1/2 cup chopped celery
 1 1/2 cups sweetened apple-
 sauce
 1 8-ounce package cream
 cheese
 1/2 cup chopped nuts
 1/2 cup mayonnaise salad
 dressing
 Dissolve. Add gelatin, dissolve.

Pour hot water over candy.
 Add applesauce. Pour half
 mixture in an 8-inch square pan.
 Chill until firm. Blend together
 cheese at room temperature,
 nuts and celery. Add salad dress-
 ing. Spread in a layer over firm
 apple mixture. Pour on remain-
 ing apple mixture. Chill.

Mrs. A. H. Moon, R3, Junction
 City: "I am sending my favorite
 Christmas candy recipe."

NUGGETS
 (For 5-pound loaf)
 3 pounds or 3 pints pure cane
 sugar
 1/2 pound butter or margarine
 1 cup rich milk
 1 small bottle maraschino
 cherries, chopped
 1/2 cup cherry juice
 1 pint white Karo Syrup
 1 pound walnut meats
 Cook sugar, syrup, milk and
 juice until it makes a very
 firm ball in cold water. Add nuts
 and cherries and beat until very
 thick and creamy then pour on
 well-greased platter and when
 partly cool cut into squares.

This recipe was received from
 Mrs. Harold Pruitt, Barnard:
RAINBOW CAKE
 1 package orange gelatin
 1 package cherry gelatin
 1 package lime gelatin
 Put each package of gelatin in
 a flat, square or oblong dish,
 9x9-9x13, using 1 cup hot water
 to dissolve, then add 1/2 cup of
 cold water. Set aside to harden
 solidly. Several hours later put
 in pan 1 cup pineapple juice, 1/4
 cup sugar. Heat to boiling. Then
 add 1 package lemon gelatin,
 stirring until dissolved, then add
 1/2 cup cold water. Set aside to
 cool until like heavy syrup.
 Then add 1 cup whipping cream
 or substitute, whipped. In a sepa-
 rate bowl place other gelatins,
 cut into cubes, and then add lem-
 on gelatin and whipped cream
 and stir. Remold in loaf pans or
 molds. Serve in 2-inch slices.
 Top with whipped cream, if de-
 sired.

Where To Put That Extra Bath

Finding a place to put an extra bath oftentimes is merely a matter of looking closely at a plan of your home. Many plumbing contractors offer a variety of compact products, in a wide range of colors, that will fit under staircases, in unused corners, in attics and even in that extra storage closet. For those of us who swear they can't find the space for that extra bath, most manufacturers recommend a visit to your local plumbing contractor. The plumber is an expert space finder and can check for proper piping arrangements, as well as suggested fixtures.

Freeze Cheese Pie Ahead For Important Dinner

Put a Frosty Cheese Pie into the freezer a few days ahead of an important dinner party and there'll be one less item to worry about on the big day.

FROSTY CHEESE PIE

- 1 1/4 cups fine graham cracker crumbs
- 2 tablespoons sugar
- 1/4 cup butter, melted
- 2 packages (3 ounces each) cream cheese, softened
- 1/2 cup sugar
- dash of salt
- 2 eggs
- 1 teaspoon vanilla
- 1 cup less 2 tablespoons cold milk
- 1 envelope whipped topping mix

Combine graham cracker crumbs, 2 tablespoons sugar and the melted butter in a 9-inch pie pan. Press mixture over bottom and sides of pan. Chill one hour. Blend cream cheese, 1/2 cup sugar and the salt together until smooth. Add eggs, one at a time, beating thoroughly after each addition. Add vanilla; beat

until smooth. Combine milk and whipped topping mix in deep narrow-bottom bowl; blend thoroughly. Whip as directed on package. Measure 2 cups topping and blend into cream cheese mixture. (Any remaining topping may be stored in refrigerator for use on other desserts). Pour into chilled crust. Freeze at least three to four hours. Eight servings. Note: Before cutting, dip pie pan briefly in hot water to loosen crust from pan.

To Clean Garage

Making a clean sweep of the garage? In addition to automotive products, take out all of last year's gardening, painting and patio products. Make sure you have shelves or pegboards to keep tools and other equipment off the floor. Dispose of worn-out equipment or products safely and make a list of what you'll need for the new season. While the garage is free and clear swab floors and walls.

How To Plant Flowering Bulbs

Larger bulbs — tulips, daffodils and hyacinths — should be planted six inches apart. The species bulbs — such as the Fosteriana, Kaufmaniana, etc., — are planted only four inches deep. The "little" bulbs — Crocus, Galanthus, Muscari and others — are planted three inches deep and three inches apart. Set the bulbs firmly in place, pointed ends up, cover with soil and water well.

Bulbs like well-drained soil. Heavy clay soil can be improved by mixing in sand to a depth of eight to ten inches.

Woman Should Have "25th" Hour

A woman should set aside a "25th hour" of the day for herself. Often it's less than an hour, but it's the time a woman has to herself for a selfish escape. She should remind herself that it is no longer true that a woman's work is never done — if she stops before she's done in.

You've got the challenges, we've got the challengers

Whatever your kind of farming, you need the greatest tractor efficiency possible. Massey-Ferguson meets this challenge for more productivity at lower cost with the most advanced line of general- and special-purpose tractors obtainable. Before making an investment in a tractor of any type, take a closer look at Massey-Ferguson. You will see at once why these tractors are so accurately called "The Challengers".

We can help you select a "just right" tractor from 17 different models that make up the Massey-Ferguson line. Tractors from 26.5 to 120 horsepower. Diesel, gasoline, or LP gas engines. And the widest possible selection of options and accessories to permit customizing to your individual needs.

In addition, our Massey-Ferguson tractors offer major features not available on other tractors. Exclusives such as traction-increasing Pressure Control — the most important tractor advance in 33 years. Ferguson System hydraulics that provide the fast, easy way to handle even the largest implements and equipment. Easy chair comfort that outlasts the longest day.

There are many other sound reasons why you should select your next tractor from this great line of Massey-Ferguson Challengers. Come in and talk it over. We say we have the most capable tractor for your needs and we are willing to back it up with comparison figures. And tractor-against-tractor tests in the field.

Pomander Balls Ideal For Holiday Gift-Giving

The most treasured holiday gifts and decorations are those made in your own kitchen. With a little extra time you can make a friend especially happy this year — and at a minimum cost to you.

Pomander Balls, one of the oldest and most precious of all sachets, give a wonderful fragrance to clothes and linen closets.

Here are instructions for making these holiday specialties:

POMANDER BALLS: Select large firm oranges. Stick whole cloves into peel of the orange until completely covered. The cloves may be inserted into the orange peel more easily if the holes have been made with the tines of a fork or a skewer. Roll in a mixture of equal parts of

ground cinnamon and orrisroot (purchase in your pharmacy.) Use about 1½ tablespoons of the combined spices for each orange. Pat in as much of the powdered mixture as will adhere to the orange. Wrap the pomander in tissue paper. As pomander dries and shrinks, it develops its spicy fragrance. Remove from paper, shake off any loose powder and the pomander is ready for use in linen and clothes closets. To hang in closet, tie the pomander with a piece of ribbon ending in a loop.

Tips On Choosing Home Furnishings

Here are some points to consider when selecting furnishings for the home:

Vinyl wallpapers are much more practical than paint. Although the initial expense is higher they are indestructible and so decorative.

Be certain that draperies and fabrics, blankets and carpets are not flammable. Bear in mind that glass fiber draperies, mod-acrylic blankets and wool furnishings are fire resistant.

Wool still has the lion's share of the carpet market because it's easy to clean, fire safe . . . and keeps its beautiful new look for years. The experts recommend small patterns on stairs and in rooms that get hard use. The dirt just doesn't show.

Light-weight modern furniture is easy to whoosh the vacuum under and there are less curl-cues to clean.

Keep your eyes open when visiting hotels, restaurants and department stores to get the "silent" answers to your decorating questions.

Here's How To Pack Glassware For Moving

Keep Tools Clean

You give yourself more work if your cleaning tools are dirt carriers instead of cleaners. It's easy after each use just to soak clean-up equipment in a bucket containing a pine oil solution. Then rinse your tools in clear, hot water in the laundry tub and let them dry right where they are — ready to do their best next time around the house.

Soft Cookies Good Travelers

Cookies are the perfect gift for a son in service or a daughter at college . . . If they're whole. Is there a secret ingredient that helps eliminate crumbs? Of course there is. It's molasses. Early American pioneers made cakes and cookies that traveled well because they were baked with molasses.

ter at college . . . If they're whole. Is there a secret ingredient that helps eliminate crumbs? Of course there is. It's molasses. Early American pioneers made cakes and cookies that traveled well because they were baked with molasses.

Feed the fast one from Kansas Soya

Now take healthier, heavier hogs to market 15 to 20 days sooner. Feed Lasso 40% Hog Supplement, the test-proven balanced feed that's made from nature's richest source of protein: highly digestible and palatable Sunflower Brand Soybean Meal. What else goes into it? The exact amounts of Vitamins A,

D, and E for fastest growth and maximum use of corn and milo. Eight powerful growth factors. Plus antibiotics (optional) to fight common swine diseases. Feed Lasso 40% Hog Supplement, the supplement that gets 'em to market faster. Call: KANSAS SOYA PRODUCTS CO., INC. Phone DI 2-7270; Emporia, Kansas

Farmers go for the SILAGER in a big way because of the work it does! This one unit digs and loads horizontal silage or haylage, meters in feed and supplement if desired, unloads into feed bunk . . . all with one-man operation direct from the tractor seat! Rations can be changed from lot to lot from the same load! Precision blades and wide cutter head, controlled by powerful hydraulic cylinders, freely dig any medium- or short-cut silage under all conditions. Patented packing action increases silage capacity. The SILAGER carries a full 6,000-lb load of silage and 45 bushels of grain supplement mix. Operation is simple, trouble-free, field-proved.

(above) Model 3TG Silager with Grain/Supplement Tank

ALSO AVAILABLE: SILAGER MODEL 3-T

6,000-lb. Model—Silage only. Does not include grain/supplement tank. Designed especially for medium size feeders, dairy operations, etc.

"Best Hired Hand a Farmer ever Had" THE PARK SILAGER

Hydraulic cylinders control tilting, raise cutting head to 18-ft. Slat drag and pack silage. Loading time, 4 minutes.

Bed gradually rises for unloading through discharge auger and swinging spout. Discharge rates for all feeds controlled. Grain tank loads top or bottom.

SILAGERS are engineered to work without strain. Power requirements are low. The results are smooth, non-bucking operation; low upkeep costs and long life.

Women Tough To Give Up Right-Of-Way

Women drivers obey the laws better than men, a survey shows, with one exception: Women are more stubborn about yielding the right of way.

The California Highway Patrol, after completing a survey of 1967 traffic accidents involving death or injury, said 42 per cent of the state's drivers are females. But of all death or injury accidents involving women, more than 28 per cent involved right-of-way rules.

Only 19.5 per cent of the men violated right-of-way rules. From there on, however, the

ladies had all the best of it:

—Of men involved in such accidents, 23 per cent had been drinking — against 9.6 per cent for the women.

—One third of the men were driving too fast, one fourth of the women.

—Of 101 drivers involved in an accident while passing on a curve, 15 were women.

Going further, the patrol looked into bicycle accidents.

Some 2000 males were injured on bicycles in the state in 1967 and 34 were killed, compared with 662 females injured and 11 killed.

The report concluded:

"Men and boys, because of their activities and proclivities, have more accidents than women and girls."

Claflin Fund Started With Vic McAtee

CLAFLIN — Ten years ago, Victor McAtee, implement dealer here, looked in disgust at some advertising calendars he had given away which had been

thrown in the gutter.

"I'd rather give the money I spent on calendars to some sort of scholarship fund," he said, and from that remark a fund for deserving and needy students in Claflin started and is still going today.

McAtee and others in Claflin organized a non-profit group to raise funds for Claflin High School graduates who might

need financial aid to go to college. Since then 25 scholarships totaling \$5950 have been given and none of the recipients have quit before they got their diplomas. The grants range from \$100 to \$500. The organization hopes to raise at least \$10,000 as a permanent fund.

Population Nears 202 Million

The U.S. population including servicemen overseas rose slightly more than 2 million during the last year to an estimated total of 201,750,000 last Oct. 1, the Bureau of the Census has reported.

If only the resident population is counted, the bureau said, the estimate is 200,461,000 — an increase of more than 21 million or 11.8 per cent since the 1960 census. The estimated population Oct. 1 was 199,734,000.

For Sale—By Sealed Bids

LAND IN HERMAN F. TESSENDORF ESTATE

In order to dispose of certain land in the Estate of Herman F. Tessendorf, Deceased, ordered sold by the Probate Court of Pottawatomie County, Kansas, at private sale, I, C. B. Hilliard, Administrator of said estate, will offer the following described properties in Pottawatomie County, Kansas, for sale by sealed bids, said bids to be delivered to C. B. Hilliard, Administrator, Wamego, Kansas, on or before 2:00 o'clock p.m. C.S.T. on December 10, 1968, when said bids will be opened.

TRACT 1 — A tract beginning at a point 40 rods East and 20 rods North of the Southwest Corner of the Northeast Quarter (NE¼) of Section Thirty-five (35), Township Seven (7), Range Ten (10), thence running south 20 rods to center line of said Section 35; thence East to Southeast Corner of the said Northeast Quarter; thence North on East line of said Northeast Quarter; thence West on the North line of the said Northeast Quarter 185 1/7th rods; thence South 140 rods; thence East to the place of beginning, containing 177 acres, more or less.

TRACT 2 — North Half (N½) of Southeast Quarter (SE¼) in Section Thirty-Five (35), Township Seven (7), Range Ten (10)

TRACT 3 — South Half (S½) of Southeast Quarter (SE¼) in Section Thirty-five (35), Township Seven (7), Range Ten (10). (Landlord's share of growing wheat passes to buyer.)

TRACT 4 — Northwest Quarter (NW¼) of Southwest Quarter (SW¼) less Northeast 5 acres, in Section Thirty-six (36), Township Seven (7), Range Ten (10).

Purchasers will take possession on signing of contract, subject to tenant's rights of possession. Abstract showing merchantable title will be furnished. Terms: 20% when contract is signed, balance due within 60 days with \$500.00 to be held in escrow if abstract showing merchantable title cannot be furnished within said 60 days. Taxes for 1968 and prior years to be paid by estate.

Administrator will submit a protective sealed bid on each of the above numbered Tracts, and the highest bid on each Tract or combination of Tracts, if in excess of protective bid, will be accepted. Bids may be submitted on each or any of the above numbered Tracts, or any combination of the above numbered Tracts. Bid forms will be furnished by the Administrator and may be obtained from James E. Sullivan, Attorney, Wamego, Kansas, or from the Administrator.

For further or more complete information contact the Administrator.

Eight National 4H Winners From State

Eight Kansans will be named winners of national 4-H awards this week at the 47th National 4-H Congress in Chicago.

Robert Munson
Junction City

Robert Munson, 19, son of Mr. and Mrs. Ralph Munson, is the winner of a \$600 scholarship for a 4-H project in field crops which began 6 years ago. He is one of six national winners to get awards from Amchem Products.

In six years he has planted 233 acres to wheat, corn, alfalfa and grain sorghum, realizing a gross profit of \$4656 for his efforts.

Stephan White
Salina

Stephan White, 17, son of Mr. and Mrs. O. S. Fent, has won a \$600 scholarship from Hercules, Inc., for an entomology project which has led to a specialized study of insect parasites.

White has acquired sufficient knowledge of entomology to teach classes at a North Central Kansas Entomology Clinic and at Marymount College, Salina. He is a senior in high school.

Steve Turnquist
Lindsborg

Steve Turnquist, 18, Lindsborg, has won a \$600 scholarship from International Harvester for an experiment with growing different varieties of wheat. He is the son of Mr. and Mrs. Donald Turnquist.

Turnquist had 150 acres of wheat planted in 1968. Earlier this year he was third high individual at the National Land Judging Contest and was top individual at the 1967 district land judging contest.

Christine Erickson
Eureka

One of six national winners in a dairy foods project is Christina Erickson, 18, of Eureka, daughter of Mr. and Mrs. Chris Erickson. Her award comes from the Carnation Co.

In connection with milk and rennin studies, she developed her own method for making cultured cream from home-produced cream and has presented a demonstration at various 4-H events. She has presented milk exhibits at science fairs in Dallas and San Francisco.

Shari McClintock
Walnut

A \$1000 scholarship has been won by Shari McClintock, 17, of Walnut, Crawford County.

Mike Felder
WaKeeney

Mike Felder, 16, of WaKeeney, won a \$600 scholarship from Eli Lilly & Co. for a health project.

Gary Mogge
Ruleton

Gary Mogge of Ruleton, Sherman County, won a \$500 scholarship from the Ford Motor Co. in the 4-H achievement program.

Leon Patton
Galena

Leon Patton, 17, Galena, has won a \$600 scholarship from Westinghouse as a national winner in a 4-H electric program.

Fertilizer Makers Hoping To Make Price Increase Stick

Fertilizer prices — which manufacturers figure have reached rock bottom — are getting a nudge upward.

Major producers are hopeful that some announced price hikes, especially in phosphate and nitrogen, will stick.

Vistron Corp. of Cleveland has boosted prices on fertilizer-grade urea and ammonia nitrate by about \$5 a ton from the current actual price in the wholesale market. W. R. Grace & Co., Gulf, and other companies have also reportedly raised prices quietly.

Vistron said its wholesale prices for 50-ton bulk shipments will be \$61 a ton for 45% urea, \$67 a ton for 46% urea, and \$47 a ton for 33½% ammonium nitrate.

International Minerals and Chemicals at Skokie, Ill., another major producer, was expected to lift its prices in line with some of the competitors. IMC, like most of the companies in the field, has been in a long slump, with industry sources saying the company had cut more than a thousand persons from the payroll in the past two years.

In November there were some signs that companies were go-

ing to try to impose new price lists that in effect would eliminate discounts from older, higher list prices.

Diammonium phosphate was raised from \$48 a ton to \$60 a ton and triple superphosphate was boosted from \$43 to \$55 a ton by Occidental, Grace, and Royster — all major producers.

Fertilizer companies have for some time had a major overcapacity of production, and problems have been compounded by two poor selling springs and one weak fall in between.

The industry had hoped that this fall would produce a better selling season, but snow and bad weather which delayed fall harvests in some major fertilizer-using areas have made a good plow-down and heavy fertilizing unlikely.

In some measure the overcapacity of the industry has been reduced, with many old and less productive units being closed. Some units were doubtless closed simply because they were running so far into the red.

Industry sources say that even with the increase in price of nitrate fertilizers prices will still be below production costs.

In the year ended in June, total fertilizer consumption reach-

ed 38.3 million tons, up 3% from the previous year but an increase considerably less than the 7% gain in 1966, and 8% in 1967.

This slippage, coupled with greatly increased capacity as major companies entered the field, put the industry in a skid that was accelerated by three poor fertilizer seasons. Apparently most companies

now think the skid has been checked, altho there are many officials who fear the worst is yet to come.

A turn to more profitable production depends, of course, on good weather. If the snow melts early next spring and the land dries out, farmers, whose recent good crops have taken considerable nutrition from the soil, may be encouraged to use fertilizer heavily.

A lot depends, of course, on the economic health of the farmer, and that in turn depends to some degree on the return of full-scale programs for AID (Agency for International Development).

"As long as there are surpluses hanging over the agricultural community (as a result of decreased shipments overseas), the farmer is likely to spend a lot of money on fertilizer," one executive said.

At best, the new prices give the fertilizer companies little space in which to operate even in the face of some of continued overcapacity.

"It's still a long way to even the depressed 1967 and there are going to be some very basic improvements before we even approach," he added.

Kansas Ranks 9th In Co-op Volume

Farmer cooperatives with headquarters in Kansas were estimated to have done more than a half billion dollars worth of business in fiscal year that ended June 30, 1967, a preliminary report by the Department of Agriculture revealed.

Kansas cooperatives were estimated to have done a net business of \$534,538,000 for the fiscal year, after deducting intercooperative business, said David W. Angevine, administrator, Farmer Cooperative Service. This volume put the state in ninth place.

For the nation as a whole, the cooperatives did an estimated

\$16.5 billion, up 59 per cent during the last decade.

California, Minnesota and Iowa ranked first, second and third respectively and each with more than one billion dollars worth of business during the fiscal year.

Kansas was listed by the department as having 306 cooperatives with headquarters in the state.

The Kansas co-ops had a membership of 215,230 in the same year.

Both the number of cooperatives and their membership have been decreasing during the last decade.

The Department of Agriculture draws no conclusions from the data it presents, but declining number of the cooperative organizations and membership during the decade corresponds with the decline of the family farm in the nation's chief agricultural states.

The Agriculture department did point out that total 1966-67 national membership of 6,493,585 in cooperatives, about 15 per cent under 10 years before, "reflects the reduction in number of farmers in the United States."

The average number of memberships per association stood at 801 for fiscal 1967.

Total number of associations stood at 8,110 in fiscal 1967, down 3 per cent from the previous year and 32 per cent below the high point of 12,000 associations in 1930.

Agriculture said the declining number "primarily reflects a continuing reorganization trend involving merger, consolidation and acquisitions."

Net value of farm products up 5 per cent over a year earlier, marketed totaled \$12.9 billion,

Dairy, grain and livestock ranked in that order in product value.

Wheat Pastures In Good Shape

Winter wheat pasture conditions are shaping up as the best in recent years and could result in some larger demand for cattle to graze on the crop, says the Agriculture department.

In its wheat pasture report the department said forage supplies as of mid-November were mostly fair to good over Kansas, Oklahoma and Texas.

A department livestock specialist said the movement of lighter weight cattle into the winter wheat areas could mean higher competition for feeders looking for cattle to move into their lots.

Cattle prices have been strong and the shipments of stock into feeding areas have been running larger than a year ago, mainly because of the improved market prices for beef and the plentiful supplies of feed.

Thus, with the prospects of late fall and winter grazing on wheat, some of this feeder cattle supply could be cut off or slowed until the animals are taken off pasture and then moved into feedlots.

But overall, the experts say, cattlemen are benefited immensely by ample wheat pasture during the fall and winter seasons by allowing livestock to gain weight at relatively low costs.

By mid-November about 46 per cent of the seeded winter wheat acreage in the three-state region had sufficient top growth to pasture stock, compared with 27 per cent last year. The department said the only areas with poor wheat pasture at mid-month were extreme Western Kansas, the Oklahoma Panhandle and the southern rolling Plains area of Texas.

JOHNSON TWO-WAY RADIO

**ACT NOW
FREE
DURING
DECEMBER**

During December each ton of Gooch's Best Brood Sow Supplement you purchase earns you FREE 100 lbs. Gooch's Best Pig Guard 250.

Act now! Earn Free with your Gooch Brood Sow purchases the Gooch Pig Guard to start the extra pigs your sows can raise you with the help of Gooch's Best Litter Boosting Plan. Plus, qualifying quantities of Gooch Brood Sow Supplement can be delivered in bag or bulk... or both right at the time and place you want it.

See your nearby Gooch Dealer! Or contact your Gooch Service Counselor or the Gooch Feed Mill in Salina, Kansas.

**GOOCH'S
BEST**

You can expect to wean a-pig-a-litter more from sows fed Gooch's Best!

The evidence is clear-cut! You can do something about increasing the size of the litters you wean. More important, weaning extra pigs per litter means extra profits.

New, uncomplicated Good Plan helps sows wean extra pigs!!

The 3-Step Sow Feeding Plan developed by Gooch Nutritionists in the early 1960's moved pig production a big step forward. This combining of precise nutrition with periodic treating to close disease gaps helps sows farrow more vigorous, even-sized pigs! Wean extra pigs to raise for market and profit.

NOW, the Gooch 3-Step Plan has been further improved. Gooch Brood Sow Supplement provides sows important nutrition refinements. Plus, available is the ready-to-use Gooch Swine-Guard to spot treat sows to close disease gaps with two of the most effective antibiotics.

Shown below are the results of 637 litters farrowed the past 9 years at the Gooch Research Farm, Manhattan, Kansas. These results clearly demonstrate just how much more of your sows' pig producing potential you can realize. You can expect Gooch's Best to help your sows...

- raise larger litters - wean a-pig-a-litter more
- wean extra pigs per litter - up to 25% more.
- consistently farrow uniform-size pigs of near 3 pounds

Feeding one ration from breeding through weaning is the Gooch Way.

Your grain, Gooch Brood Sow Supplement and Gooch Swine-Guard is the Gooch Sow Feeding Plan to raise extra pigs.

- You feed the same ration - your grain mixed 3 to 1 with Gooch Brood Sow Supplement along with pasture and hay from breeding through gestation and lactation.
- Plus, spot treat sows to close disease gaps at breeding, midgestation, and farrowing with Gooch Swine-Guard's highly effective Neo-Terramycin antibiotic combination.

	STANDARD FEEDING	3-STEP SOW FEEDING PLAN	NEW GOOCH SOW FEEDING PLAN
Year	1960, 1961	1962, 1963, 1964, 1965	1966, 1967, 1968
Number of Litters	112	302	223
Average Litter Size	9.5 pigs	10.3 pigs	10.7 pigs
Pig Birth Weight	near 3 lbs.	near 3 lbs.	near 3 lbs.
Pigs Weaned per Litter	7.2 pigs	8.2 pigs	8.9 pigs
Feeding Program	* Grain and Gooch Brood Sow mixed 3 to 1	* Grain and Gooch Brood Sow mixed 3 to 1. * Disease gap treatments at breeding, midgestation and farrowing.	* Grain and Gooch Brood Sow mixed 3 to 1. * Swine-Guard's dual antibiotic disease gap treatment at breeding, midgestation and farrowing.

Turns modern complex nutrition into practical feeding plans.

Not Taking Sides In Tax Protest

RUSSELL — Michael S. Holland, Russell county attorney-elect, has denied that he is supporting taxpayers of the county in their protests against taxes based on the recent state-wide real estate reappraisal.

He said that all he was doing was advising them of their legal rights.

"I feel that they should protest if they are unhappy about the situation," Holland said. "They lose their right to object if they pay without protesting."

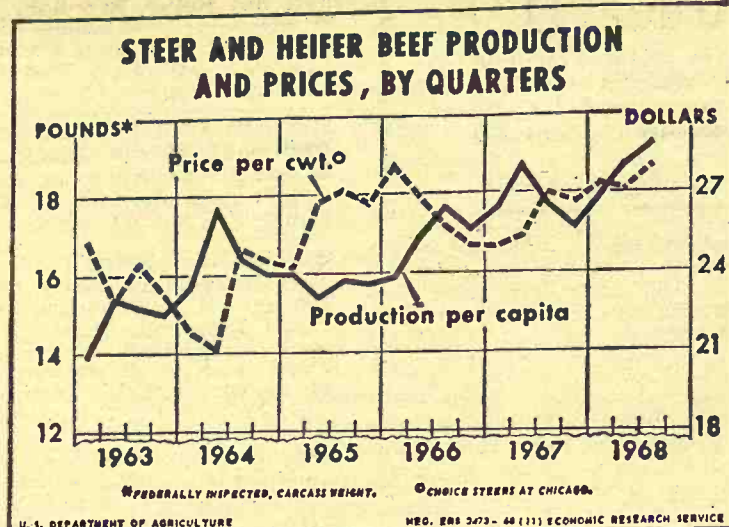

Meet At Denver To Study Beef AI

Two Kansas State University faculty members will assume major roles in the Third Conference of Artificial Insemination of Beef Cattle January 11 in Denver.

Ancel Armstrong, manager of the Kansas Artificial Breeding Service Unit, is Conference chairman, and Dr. Don Good, head of the Animal Science and Industry Department, will moderate a panel of registered cattle breeders who will discuss artificial insemination.

The 1-day meeting, sponsored

REGISTERED Spotted Swine
Large kills to follow in Jan. &
bred to raise piglets

Price To Production Ratio

Dips in cattle prices as volume of production rises are shown in this graph prepared by USDA.

by the National Association of Animal Breeders, will draw commercial and registered beef breeders, Extension specialists, and research personnel, according to Armstrong.

A panel of commercial ranchers will discuss artificial insemination in relation to cowherd management. Other discussion topics include "Supplementing Cows on Pasture," "Proper Pasture Management," and "Partial and Year-Round Brood Cow Confinement."

Conference speakers will also talk on using artificial insemina-

tion for genetic improvement of beef cattle, and will report on the National Beef Sire Evaluation Program.

The 9 a.m. to 5 p.m. program includes a question period for participation by the audience. All registrants will receive a copy of the printed proceedings, Armstrong said.

Additional information in the Conference is available by writing KABSU, Kansas State University, Manhattan, Kansas 66502, or National Association of Animal Breeders, Box 1033, Columbia, Mo., 65201.

Profit treatment for POOR HAY

Sprinkle on Nutrena CLS liquid supplement and watch your beef or dairy cattle go for it!

Do you have poor hay, late cut, rained on, stemmy? Cattle don't eat it so good? Then Nutrena CLS liquid supplement can be your answer.

Just sprinkle Nutrena CLS over the hay lightly—only 200 pounds per ton of hay. Then watch your cattle go for that hay!

Nutrena CLS is loaded with nutrients

that poor hay lacks — protein, minerals and vitamins that cattle need.

Give our liquid supplement a try. See how it can turn low quality problem hay into profit hay.

LEGISLATIVE LINEUP

Republicans picked up some 50 additional legislative seats in the 1968 elections, far short of the more than 500 they gained in 1966 but enough to give the GOP full control of 20 state legislatures, as many as the Democrats control. In eight other states, Republicans control one house and Democrats the other. Legislatures are elected on a nonpartisan basis in Minnesota and Nebraska.

New Look In Rotating Crops

Farmers can take a new look
at their crop rotation plans and
make some changes, some in-
volving continuous cropping. A
study over a 12-year period by
Dr. J. A. Hobbs, Kansas State

University agronomist, has
shown most crop rotations may
be unnecessary.

Wheat tests, through a period
from 1959 through 1967, showed
higher yields in those plots
where wheat had been seeded
year after year. Higher sor-
ghum yields were produced in
a straight-grain rotation where

sorghum followed wheat.

No signs of disease or insect
buildup were found in continu-
ous cropping, although more
weeds were noted in continuous-
ly-cropped sorghum plots.

Big problem in continuous
cropping came from wind and
water erosion. Otherwise, a
farmer can plant whatever he
wants without regard to rota-
tion.

The surest way to advance-
ment is to start at the bottom.

Shooting Preserve Working Out

One of several shooting preserves in the G&G area, the J and F Shooting Preserve near Bushong in Lyon County, is gaining business each season, say owners Jesse and Flossie Johnson.

The Johnsons have 400 acres and generally divide the acreage into four designated areas for hunting.

One of the big parts of the business, of course, is raising

the birds. The Johnsons had 21,000 pheasant poults this year, selling some to other preserve owners but keeping most of them for shooting on their own farm. As they develop in size, right, birds are moved from pen to pen, always having free run among the growth of weeds in the 75x200x10 foot wire cages.

Johnson buys his quail and partridge from other producers, and keeps them in out-of-the-way pens because they get accustomed to man easily and are not wild enough for hunting.

Southeast Eyes Tomato As Basic Cash Crop

Can commercial tomato production in southeast Kansas be profitable?

Yes, says Dr. James K. Greig, horticulture researcher at Kansas State University, after reviewing data from tomato tests at the Mound Valley Branch Experiment Station this year.

With some varieties, production is at least twice as high as at other K-State research locations across the state. The Cardinal hybrid and avalanche hybrid were the most promising varieties at this test site.

But it takes more than sticking a good plant in the ground and picking the ripe tomatoes to make commercial vegetable production profitable. Greig credits a large portion of the favorable showing at Mound Valley to good management — selection of vigorous hybrid varieties, adequate fertilization, proper mulching, and adequate

disease and insect control.

Gary Kilgore, research agronomist at Mound Valley, provided much of the manpower for the tomato tests this year. He started off his fertilization program by using 54 pounds of nitrogen, 120 pounds of phosphorus, and 60 pounds of potassium per acre at planting.

At mulching time, he added another 40 pounds of phosphorus and 40 pounds of potassium. The mulch consisted of 6 inches of native hay which helped conserve and distribute the available moisture supply and keep the fruit off the ground.

Rainfall was quite adequate this year in southeast Kansas for dryland production of tomatoes, but Greig points out that some provision for supplementary irrigation might be necessary for a large scale commercial tomato operation.

The spraying schedule started

on May 23 and continued through September 12 at 7 to 10 day intervals — 14 applications in all. This was a combination of insecticides and fungicides.

There is good marketing potential for southeast Kansas tomatoes, Greig believes, because this could be the earliest production area in Kansas. And fresh produce from this area could fill a current market void between peak production periods in Arkansas and the Kaw Valley area of Kansas.

Since the latest frost usually occurs about April 10 in the southeast area, plants could be set soon after that date. This could provide a harvest in early July. There would be a prime market period of approximately 2 weeks, but saleable harvest could extend as long as 6 weeks.

"If commercial producers can grow as good a product as were grown at Mound Valley this year, there should be a good market in such distribution centers as Wichita, Kansas City, and Omaha," Greig reasons.

The major hurdle to commercial tomato production in southeast Kansas, the K-State horticulturalist believes, is establish-

ing marketing channels and developing uniform marketing procedures. Producers must agree on a uniform packing and grading system, and offer their produce in large quantities through brokers to get maximum returns for their crop,

SPECIAL ANNOUNCEMENT OF OUR DOUBLE-BARREL PROGRAM

Mr. farmer! We urgently call your attention to our year-end sale of new CASE tractors which will help you balance your budget as money SAVED is money EARNED.

HOW??

- 1 By beating the PRICE RAISE.
- 2 By taking advantage of our year-end cash discount or a very liberal allowance on your trade-in.
- 3 By using the 7% investment credit against your income tax liability.
- 4 By using the additional first year depreciation as an expense.
- 5 By getting the trading difference carried INTEREST FREE until April 1, 1969.

These 5 items could easily amount to over \$2,000 in savings and at the same time equip you with some farming power which will continue to hold down your operating expenses both upkeep and fuel for that is the reputation of the CASE TRACTORS.

We are also offering some attractive deals on new combines, plus some very practical family gifts if deal is made before Christmas. FREE CARRY to June 1, 1969.

In our used line, we have a full power-range of late model reconconditioned and painted tractors, windrowers, combines, plows, etc.

Money For Bee Research Center In Nebraska

A \$2.7 million contract has been awarded for construction of a Meat Animal Research Center at Clay Center, Nebraska, by the U.S. Agriculture Department today.

The 13-building research center is to be built on a site formerly used for a Navy ammunition depot.

It will include a laboratory for research into the breeding and genetics of swine and sheep.

Penner Construction Co., Denver, Colo., submitted the lowest of six bids for the tract at \$2,729,000.

The department is conducting a worldwide search for breeding stock to be housed at the center.

Some B In Own

There's a new Wall Street bond. It's a bond investing in the "tax shelter" ownership of "Wall Street" bonds. It's a bond investing in the "tax shelter" ownership of "Wall Street" bonds.

When an investor becomes a tax standpointer for tax advantages that deductable and gains. This method would be a 60 percent rate instead of a 30 percent rate on the investment.

Oppenheimer's investing company is on a par with the other major investment firms. Oppenheimer's fee of 5% is the purchase price. Subsequently, annual management fees are in the same range.

Bright says that the investment is a good one. But there are market prices. The minimum investment is \$10,000 which is 100 head of beef. The company's biggest head, worth \$10,000, is a head of beef.

Some Big Investors See 'Tax Shelter' In Ownership Of Cattle

There's a new bull market on Wall Street but it doesn't have anything to do with stocks and bonds. It's a heightened interest in investing in cattle.

With brokers earning big commissions from heavy trading volume on the securities exchanges, they are turning to the "tax shelter" offered by ownership of cattle.

"Wall Street's interest has been growing fast the last two years and now the new young executives are jumping in," says Richard Bright, executive vice-president of Oppenheimer Industries of Kansas City and head of its New York office.

Oppenheimer is a cattle management firm which handles 220,000 head of cattle on more than 100 ranches in 17 states.

These cattle are owned by investors who most likely never see them.

When an investor buys cattle he becomes a farmer from a tax standpoint and is eligible for tax advantages. He puts in dollars that depreciate or are deductible and takes out capital gains. This means that a person in the 60 per cent tax bracket would be taxed on income from sale of cattle at a 25 per cent rate instead of the 60 per cent rate on his other income.

Oppenheimer buys cattle for its investing customers and places them on ranches, whose operators are paid for feeding and caring for them. Cattle owned by different investors often are on the same ranch.

Oppenheimer charges an initial fee of 5% to 8 1/2 percent of the purchase price of the cattle. Subsequently it charges an annual management fee in the same range.

Bright says an investor can make about a 25 per cent profit on his investment after taxes. But there are risks of declining market prices, disease and bad weather.

The minimum investment accepted by Oppenheimer is \$10,000 which would buy about 100 head of beef cattle. The company's biggest client owns 25,000 head, worth about \$2,500,000.

"We are performing a service by taking 20 million dollars a year from rich urban areas and throwing it into depressed rural agricultural communities," Bright says.

"This money goes to the local banks, feed stores, hardware stores, etc., in a quick turnover."

Oppenheimer Industries was founded in Kansas City in 1953 by Harold L. Oppenheimer. It now has offices in New York, Washington, D.C., Los Angeles and Denver.

Oppenheimer's father-in-law Jules Stein, chairman of the Music Corporation of America, interested motion picture stars in investing in cattle. Among them, says Bright, were Jack Benny and John Wayne.

"After the New York Office was opened we began to attract brokers, corporate executives and television people such as Arlene Francis and Hugh Downs," says Bright.

Each owner has his personal brand on his cattle. Some of these amateur cattle owners have bizarre ideas about their brand designs," says Bright.

He recalls an art designer who formed the Broken Dollar Cattle Company and came up with a brand in the form of a dollar sign split down the middle.

Then there was the business executive whose brand was a Lazy B. He said he decided on that because his wife's name was Bea and she was also lazy.

Problems For Canadian Wheat Farmers

Wheat growers on the Canadian prairies are worried. They have a big crop this year — 628 million bushels — but market prospects are grim. Harvest weather was bad and much of the grain is still unthreshed. A lot that has been threshed still needs drying. There aren't enough dryers to do the job.

World markets for wheat are changing and farmers are being warned that they can't be sure of selling the hundreds of millions of bushels of high grade premium priced bread grain on which the farm communities of Alberta, Saskatchewan and Manitoba have prospered in the past. So important is the western wheat crop to the Canadian economy that the federal government plays a major role in its handling. Laws and institutions govern grading, transportation and export sales.

A government-created wheat

board has a monopoly on export. A board of grain commissioners certifies grades and milling qualities.

As a result, when the prairie wheat growers are in trouble they complain to their politicians. And their parliamentary spokesmen, belonging to the Progressive-Conservative Party, took a beating in other provinces from Prime Minister Pierre Trudeau's Liberal Party last summer.

The Trudeau liberals don't say much and the government can't do much. Some are against doing anything because the prairie growers voted the wrong way. Yet wheat is such a big item in the Canadian economy that something has to be done about adjusting the business to a changed world market situation.

The government proposes to set up a "national grains council" to handle this job and to strive for an export target of 20 percent or more of the world wheat trade.

The council and the growers face a grim prospect. World wheat trade is likely to decline and high-priced quality Canadian wheat will be in less demand.

CLAY IN SOIL GAINS AN INDUSTRY

ORAN, MO. — This area has a new industry because of the presence of low quality fire clay around it. The A.P. Green Refractories Co. of Mexico, Mo., will locate a raw materials handling plant to utilize the clay.

Extend Street Numbers To Rural Routes

Rural residents may soon get street numbers on their mailboxes, if a system being initiated in Topeka is extended.

Because some larger towns in the G&G area have several hundred homes along extensions of streets inside a city or in subdivisions just outside city limits, postal deliveries to addresses just marked route one or route two, in Topeka, Beatrice, Salina, or Junction City, are often pure chaos to the postoffices.

Topeka's postoffice has started assigning addresses to some 250 homes outside city limits, principally near Lake Shawnee and in subdivisions north of Topeka.

The changeover has no time table, but if successful, the arbitrary street-numbering will likely be considered in other G&G area towns in which rural deliveries have become confused because of the mass of building outside the cities.

State Conservation

First Native Grass Seeding

This 30-acre field was seeded to bluestem in 1937, the first native grass seeding made in Chase County. The light soil blew badly before that time. The well-managed range no longer blows. Pat Sauble helped his father and uncle make the seeding.

Grassed Waterway

This long grassed waterway on Senator Ward's farm carries runoff water from the rangeland hills in the distance into Middle Creek, avoiding damage to cropland. A diversion terrace (where truck is) diverts water collected from the hills at one point into the waterway.

Chase county has been designated as winner of the outstanding conservation accomplishment award was made of the Kansas Association of Soil Conservationists.

Runnerup in eastern Kansas was by the western K county with Mitchell county second.

The accompanying pictures illustrate conservation in Chase county over many years. The report cited was

The 1260-acre ranch of William consisting of grassland and bottomland used in a cropping system farmland in Marion county and Wayne at Larne

Pascal Roniger, who farms in the of the county, complete water disposal system and one complete conserv Hills. Roniger is president of the Watershed District elected a state representative.

Lid Ajar On NFO Convention At St. Louis

The National Farmers Organization will remove the veil of secrecy from many of its activities when it holds its 13th national convention this week, Orsen Lee Staley, NFO president, said.

"We have made enough progress that we are in a position to reveal more about what we have done, what we are doing and our future strategy," said Staley.

Staley said 12,000 to 15,000 voting delegates from 41 states are expected to attend the convention Wednesday and Thursday in St. Louis.

One of the main items of business, Staley said, will be consideration of possible future

holding actions similar to the multistate meat, dairy and grain market boycotts staged by the NFO in recent years.

The militant farm group staged its most ambitious boycott on meat and grain earlier this year in an effort to force up prices to farmers, but the impact on prices appeared to be negligible.

Staley, 46 years old, a Rea, Mo., farmer who has led the NFO almost from its inception in 1955, is expected to be elected to a 14th one-year term as president, a job that pays him more than \$20,000 a year.

Officials will explain various facets of the NFO operation to convention delegates at the session Wednesday, and Staley will

discuss NFO progress in a speech that night followed by a question and answer session.

Thursday, delegates will consider resolutions and elect national officers. Erhard Pfingsten of Sergeant Bluff, Iowa, national vice-president, who has held the post since 1962, also is expected to be re-elected.

The main NFO goal is to secure contracts with food and livestock processors that guarantee purchases of farm commodities at predetermined prices set by the NFO.

The farm organization has staged seven boycotts, some of them marred by violence, in hopes of attaining that goal.

On January 11, the NFO laun-

ched a market boycott on grain in 35 states, and the holding action was extended to meat animals one month later.

To dramatize their price demands, NFO members, chanting "This is production they'll never get," shot and buried thousands of hogs.

The NFO then announced April 13 that it had authorized a "bloc selling" program to relieve the financial pressure on boycotting farmers. The holding action diminished.

Although the market boycott never produced the prices sought by the NFO, Staley said it was a success.

CK Bulls Gross \$168,000; Heifers Go For \$47,000

BROOKVILLE — The CK Ranch Hereford sale grossed \$168,395, averaging \$687 on 245 bulls sold.

Larry Seaman, manager of the ranch, reported the top 10 bulls averaged \$1800; the top 50 \$1081; and the top 100, \$861.

The top bull went for \$2100 to H. C. Spinks Co. of Paris, Tennessee. The Spinks Co. purchased 10 bulls for \$17,500.

In addition to the bull sale, 200 open commercial yearling heifers were sold for \$47,000, averaging \$235. The top selling pen of 20 head sold to John Schoepel of Fairview, Okla., for \$243.

The cattle sold to 13 states —

Kansas, Nebraska, Missouri, Oklahoma, Ohio, Tennessee, Texas, Arizona, Wyoming, Montana, South Dakota and Florida.

Volume buyers were L. M. White of Chiefland, Florida, 40 head; Arizona-Colorado Cattle Co., Phoenix, Arizona, 35 head; and Brainard Cattle Co., Canadian, Texas, 18 head.

Women Easiest To Lose Money

Women are twice as likely to lose money as men, says a study made for American Express. Losing money is more common among college-educated people than those with less education, and managers are more likely to lose money than are workers, farmers or professional people.

To Test Law On Junk Yards

The chairman of the State Salvage Board says that body may decide to take action next month against salvage dealers who do not appear to be in compliance with the new state junkyard and salvage control act.

L. A. Billings, state motor vehicle department superintendent who serves as salvage control board chairman, said there are 459 licensed dealers under the new law.

He said there are 83 dealers who have failed to register.

Billings said the board will meet next month to consider possible action.

"I'll recommend they pick out

one or two who are the most flagrant violators and initiate legal proceedings against them," said Billings. "We don't have money to handle the legal action that would be involved if we proceeded against all of them."

He said once the board made a decision in on one or two cases it would know where it wanted to go with the other cases.

Sheep Breeders Convention At Hutchinson Saturday

Kansas sheep producers and their wives will hold annual meetings in Hutchinson Saturday, December 7. Meetings of the Kansas Sheep and Wool Growers Association and the Sheep and Wool Auxiliary are at the Baker Hotel.

While the men are at their task of planning promotion of this thriving sector of Kansas' agricultural industry, the ladies will be in convention and will also conduct the "Make It Yourself With Wool" contest. The contest will attract women and girls who show results of their sewing talents.

"We want to involve as many people as we can in the Kansas sheep and wool industry," Dr. Carl Menzies, Manhattan, secretary-treasurer of the group, said. He is associate professor of animal science and industry at Kansas State University.

Menzies explained that the Kansas sheep industry is on the move; that while national sheep numbers are at an all-time low, the trend in Kansas is steady and strong. Sheep have been one of the most consistently profitable livestock enterprises for Kansas farmers in the past few years, he said.

Other highlights of the week-

end of activity in promotion of sheep include the Miss Wool Banquet at 6:30 p.m. Saturday evening and a style show of the "Make It Yourself With Wool" contestants at 3 p.m. Sunday in the Hotel ballroom.

Les Kohl, Wichita, is president of the Kansas Sheep and Wool Growers Association.

Beef Made 56% of Farm Revenue

By Dr. John McCoy
Kansas State University

Livestock production, big business in Kansas, accounted for 56 percent of the state's cash farm receipts in 1967. From every indication, the industry will become even larger in the years ahead.

Beef production in Kansas and other Plains States is gaining relative to eastern and western regions. The Corn Belt's share of the U. S. production has dropped from nearly one-half in 1965 to about 40 percent in 1968.

Beef production in California and the Southwestern States peaked out in 1964 and has been declining ever since. Production in the Plains States increased from 20 percent to 33 percent between 1965 and 1968.

This does not mean that the Corn Belt is going out of the beef production business, but these states are not experiencing the increase of Kansas and

other Plains States.

Number of cattle on feed in Kansas increased 235 percent between 1956 and 1968, second only to Texas. Number of cattle on feed during this period increased only 62 percent in Iowa, which leads the nation in cattle feeding.

All indications point to a continued strong increase in demand for beef. With its irrigation development, Kansas has the resources and competitive position to improve its share of production.

Sue Over Cattle Spray Loss

PHILLIPSBURG — A jury trial in an action brought by Mr. and Mrs. Melvin Breathouwer against the Ralston Purina Co. has been set for Dec. 9 in district court here.

The case resulted from the loss of cattle June 27, 1966. The plaintiffs claim the defendant was negligent in labeling a cattle spray product.

The petition claims that "the animals showed extreme reac-

tion to the spray." Seven died and the four surviving head allegedly were stunted, requiring special feed and treatment.

Every Friday 6:30 pm

Furniture, appliances, and all types of miscellaneous items. Consignments will be accepted from 10:00 a.m. till 6:00 p.m. Monday thru Friday.

Social Security Tax Nears 5%

When their first 1969 paychecks arrive, 70 million Americans will pay new tribute to Social Security, one of the great monuments left by Franklin D. Roosevelt and his New Deal of 30 years ago.

The tax that supports the program will rise by \$3 billion in January. Every covered worker in the nation — 93 per cent of the work force — will lose 0.4 per cent more from his pay as the payroll tax moves from 4.4 to 4.8 per cent. Employers will pay the same amount for each of their employees.

For 25 per cent of the taxpayers, the Social Security tax will be higher than their income tax. The system will pay out \$274 billion this fiscal year, making it the second largest function of government, exceeded only by national defense. The tax that supports the program is the third most important source of revenue for the federal government.

Sale by Krehbiel Auction & Real Est., Auctioneers: Marvin D. Krehbiel, 316-241-0350, McPherson, & Tom Schrag, 316-463-2373. Listen every Wednesday at 12:45 to the Billboard on KNEB, 1540 on your dial, for sale information.

Workers who stopped paying the payroll tax during the year when their total salaries went over \$7800 will feel the renewed, full bite of the levy at its higher rate in January.

The new year, a new administration and a new Congress will also bring a new look at the entire institution of Social Security. In the view of many authorities, the system needs a complete overhaul.

At the least, the new year will bring proposals to improve benefits, especially for widows who are unfairly treated in the present program. Both major political parties and president-elect Nixon are pledged to raise benefits.

In the first comprehensive analysis of Social Security in many years, three friendly critics have proposed that reforms be undertaken to make the program a guaranteed annual income for all Americans regardless of age.

These experts, all associated with the Brookings Institution in Washington, urged in a study that a "negative income tax" be adopted that would replace almost all public assistance programs now administered by a hodge-podge of federal, state and local welfare agencies.

The study made by three economists, Joseph A. Pechman, Henry J. Aaron and Michael K. Taussig, is certain to cause a controversy since it challenges

the basic premise on which Congress writes policies for Social Security and the Department of Health, Education and Welfare (HEW) administers the program.

Upton Sinclair's Death Noted In U.S. Consumer-Protection Movement

The recent death of Upton Sinclair was a marker in the consumer protection movement in the U.S., for it was Sinclair who drove one of the most enduring mileposts in the effort with his book, "The Jungle" in 1906.

"The Jungle" described the filthy conditions of the Chicago slaughterhouses and the human debasement they brought with them, giving Sinclair a leap toward his reputation as a prolific man of letters, a carping tractist, and a dabbler in politics, in which he was once a serious candidate for governor of California.

"The Jungle" became sort of an early "Unsafe At Any Speed," the book written by Ralph Nader which aroused Congress to study and take action against factors making automobile tra-

In essence, the three attack the idea that Social Security is an insurance program in which each individual builds an equity through his tax payments that will be repaid later as a pension when he can no longer work.

vel riskier than necessary.

In 1906, there was considerable agitation but not as much action toward resolving some of the social and economic problems that had grown astride the burgeoning industrial economy. "The Jungle" brought horror, then action.

"There would be meat stored in great piles in the rooms," Sinclair wrote, "and the water from leaky roofs would drip over it, and thousands of rats would race about on it."

Relentlessly Sinclair added details to his case. "It was too dark in these storage places to see well, but a man could run his hand over these piles of meat and sweep off handfuls of the dried dung of rats."

He continued: "These rats were nuisances, and the packers would put poisoned bread out for them, they would die, and then rats, bread and meat would go into the hoppers together."

Such revelations were too much for the American mind and stomach, and soon President Theodore Roosevelt was receiving scores of letters a day demanding federal action to raise standards in the meat industry.

Roosevelt invited Sinclair to the White House and soon "The Jungle" symbolized the consumer cause. It led to the famous Food and Drug Act of 1906, the first federal pure food law.

Moreover, the act put the federal government firmly into the consumer protection business for good. And it helped slash the high levels of cleanliness that generally prevailed in the American food industry.

Private groups also entered the picture, especially as the consumer needed assistance not simply because of the deception of businessmen but because of the complexity and array of products that crowded the market place.

Glen Elder Dam Nearly Ready

Work on Glen Elder Dam and Lake Waconda is expected to be finished by the middle of the month. Final work at the dam is applying dirt cement to the dam, installing railing and completing roads.

The \$57 million dam is planned to provide two-thirds of the flood control needed on the Solomon river.

The lake will provide irrigation water to serve 21,000 acres. Construction of irrigation facilities is not yet authorized but necessary steps are being taken by a steering committee made up of four residents from Mitchell, Cloud and Ottawa counties.

Ground-breaking for the dam was in October 1964. Dedication will be in June 1970.

LIST STATE SHORTHORN DELEGATES TO DENVER

Delegates from Kansas to the American Shorthorn Association convention in Denver January 14 will be Milton Nagely, Abilene; Dorsey Elliott, Sublette; Herman Fischer Jr., Seward; and Tomson Brothers, Wakarusa. Paul Loyd of Newton will be a delegate to the Polled Shorthorn section.

Other Governors Sworn In Away From Topeka

What is all the fuss about?

Robert Docking will not be the first Kansas governor to be sworn into office outside of Topeka, the traditional inaugural site.

Officials of the Kansas State Historical Society confirmed Docking will be the third governor to be sworn into office outside Topeka.

Dr. Charles Robinson, Kansas' first governor, was sworn into office Feb. 9, 1861, by the Douglas County clerk in Lawrence. There was no inauguration as such in those days.

In 1927, Gov. Ben Paulen was sworn in for his second term at the home of his father in Fre-

donia. His father, Jacob W. Paulen, died the day before and the oath of office was given to Ben Paulen by Albert A. Nat-tier, a notary public and close friend of the governor.

The inaugural, however, did take place in Topeka that year. Lt. Gov. Dan Chase read Paul-en's inaugural address.

101 MURDERS IN KANSAS CITY THIS YEAR

As of December 1, Kansas City had recorded 101 murders in 1968. The most recent homicide

was the slaying of a 30-year-old Negro from Kenya, who had worked for the city's riot commission following last April's racial outbreaks.

Friday AUCTION SALE DECEMBER 6

Starts 10:30 a.m.

Beat Their Husbands At Judging

Two G&G area women beat their husbands at cattle judging in a recent contest held by WIBW Television of Topeka. Here, the winner, Linda McDuffett of Alta Vista receives the first place award after scoring 194 out of a possible 200 points in judging Herefords via the television screen over a 4-week period. Mrs. McDuffett's husband Clint is a well known cattle judge in the area.

Another woman who bested her husband in the judging was third place winner Terry McKee of Manhattan. Her husband Russell is a member of the K-State livestock judging team....

The second place winner, right center, was Bob Taleoferro of Effingham. Giving the award is George Logan, WIBW farm director, who said the judging drew 600 entries.

Farmland Convention This Week

KANSAS CITY — Farmland Industries will hold its 40th annual convention here this week. About 10,000 persons from 15 states are expected to attend.

Farmland, which supplies about 2000 local co-ops, recently acquired the assets of the Southern Farm Supply of Amarillo, Texas, and merged with the Farm Bureau Service of Minnesota.

The organization has a volume of \$390 million.

One of the speakers will be Howard K. Smith, television news analyst, now with ABC. Smith will speak Thursday morning.

Swift Writes Off Closed Plants For Big Deficit

Extensive closing of plants has enabled Swift & Co. to charge off some \$57 million against its 1968 earnings, leaving the meat-packing giant with a taxable loss of \$42 million for the fiscal year.

About 250 marginal and unprofitable facilities are to be closed by Swift by the end of 1971, and a considerable move-

Profit Is Key To Hog Expansion

Kansas hogmen may have ideas of expansion while they look back at good profits that have resulted from a corn-hog ratio of 18 to 1 or better, Wendell A. Moyer, Extension animal science specialist, pointed out this week.

"Take a long look at your program and consider your profit with \$15 hogs forecast next year by economists on the basis of buildup in farrowings," he cautioned. He listed several factors for hogmen of the state to consider in looking at expansion at this time.

1) How good a pork producer are you? How many pigs per litter are saved, and how much pork is produced with each \$100 spent on feed? Look at the profit per litter — low profits per litter can't necessarily be improved with expansion. Profit is reflected more in terms of performance than numbers.

2) How much labor is available? Will expansion require added labor or will it help utilize some excess labor? What returns can be expected from any additional labor required by expanded operations?

3) Will additional facilities be required, or will expansion result in more efficient use of existing equipment and housing? Investment in new facilities with lower prices predicted may place a burden on existing operations.

4) Consider your age and ambition. Expansion calls for more skillful management. A hogman seeking additional long-time enterprises will view expansion

differently from one approach — a slow-down.

5) Expansion requiring additional facilities should be a long-time plan. Don't expand this year because profits have been good; this may wreck chances for a profit with lower prices next year.

Hogmen in a Kansas Farm Management Association reported quite different profit figures last year. When those with highest costs were compared with those with lowest costs, some differences were noted. Gross income per \$100 feed fed was near \$150 for each group; however, those with lowest costs received more than 70 percent higher returns for labor and management than those with highest production costs.

The group of enterprises with highest costs marketed about 70 percent more hogs than those with lower costs. "This is an example where increasing the size of operation does not increase profits," Moyer pointed out. Management experts feel that poor feed conversion, poor weaning percentage, and inattention to details of good hog management are among reasons for differences in these groups.

Feed costs are about 70 percent of the total cost of producing hogs, Moyer pointed out. To pay for all labor and capital costs, farmers should be realizing at least \$76 above feed cost per litter.

Hogmen who are skilled managers and who can finance needed facilities to utilize added la-

bor, or increase volume with existing labor, may be able to justify expanding their production at any time.

A DIP IN AVERAGE HOME MORTGAGE COST

Interest rates on ordinary home mortgages have decreased appreciably for the first time in a year and a half, the Federal Home Loan Board has reported. The effective rate on new loans in October averaged about 7 1/4 percent, figuring slightly over 7 1/2 for contract rate and about 1/8 of one percent of the amount borrowed for one-time charges and fees. Average mortgage period is for 25 years and the loan averages about 75% of the total price of the house.

Hope In Slow-Release Fertilizer

A Standard Oil Co. (New Jersey) research subsidiary said it has developed an experimental controlled-release fertilizer that lasts up to nearly a year, promising farmers higher crop yields at major cost savings.

Most current farm fertilizers dissolve or wash away from plant roots in from a few hours to about five days. Some crops require as many as ten fertilizer applications a year. With conventional fertilizers, farmers have to be careful about using

excessive amounts, which can damage crops. And field conditions can sometimes cause a crop failure by preventing fertilizer application at the required time.

Esso Research & Engineering Co. says it has solved such problems with a coated pelletized fertilizer. The coating of asphalt and wax is applied to ammonium sulphate, a source of nitrogen. All three materials are produced from oil and gas. A thin coating produces a fertilizer that dissolves 75% in 56 to 180 days, and a thicker coating dissolves 75% in 125 to 320 days.

Previous pelletizing efforts have generally resulted in high-cost fertilizers with inconsistent results and relatively short lives that usually weren't practical for farmers, an Esso researcher said. By contrast, he estimates the Esso fertilizer would cost only 2½ cents to 3½ cents per nitrogen pound more than standard nitrogen fertilizers costing about 10 cents to 12 cents a nitrogen pound.

Because one application would last a whole crop year, the new fertilizer would result in a considerable saving in fertilizer and labor costs to the farmer, he noted.

Test applications of the new Esso fertilizer the past three years along the U.S. East Coast and in South America resulted in increases in crop yields of tomatoes, potatoes, snap beans, celery and oranges of from 5% to 45%, with an average increase of 25%, the research company said. It also provided improved crop quality, extended the crop season and provided greater uniformity of production, it noted. And application to grazing areas resulted in improved growth, color and protein content of grass, it added.

The new fertilizer is particularly useful in heavy rainfall areas where there is severe washing away of fertilizer, Esso noted.

Esso Research said it is offering the process for licensing to manufacturers. Jersey affiliates currently don't have any production plans. Jersey has fertilizer plants only overseas, and Esso says the chief market for the new fertilizers will be the U.S.

An Esso researcher noted the new fertilizer could also answer critics of the industry who've charged that nitrogen fertilizers contribute to pollution of the nation's rivers and lakes. He said the slow-release fertilizer would eliminate any pollution problem.

Profit In Sales Tax Agreements

The reciprocal sales tax agreement between Kansas and its four adjoining states has proved to be a bonanza with the state picking up \$789,435 in sales tax from out-of-state purchasers, James T. McDonald, director of revenue, has reported.

The figure represents the collections turned over to Kansas only in the first quarter of the 1969 fiscal year, McDonald said.

Indications are that it could approach the 4-million-dollar mark for the entire fiscal year ending next June 30, based on projected figures, officials said.

The total included the first quarterly reports from Oklahoma, Nebraska and Colorado, which joined with Kansas only recently in the reciprocal tax collecting pact.

Under the plan merchants in adjoining states collect the Kansas sales tax and remit it to Kansas, while Kansas merchants send the neighboring state the sales tax on purchases made by its residents.

Missouri was the big tax source, with Kansas receiving \$663,901 in sales tax during the first quarter on purchases made by Kansans in Missouri.

This was an increase of almost 100 per cent over the same period a year ago, indicating better cooperation between the two states, McDonald said. He added Missouri is receiving about the same amount from

Grass & Grain
December 3, 1968

Kansas collections. The sales tax remitted to Kansas from Nebraska was \$200,000, Oklahoma \$45,086, and Colorado \$51,718.

Christmas Cards
Take 6-Cent Stamp
Don't purchase a large number of 5-cent postage stamps for your Christmas cards this year.

G&G area postmasters all envelopes containing Christmas cards must bear first-class postage stamps.

Postmasters said the envelopes with cards must bear cent stamps whether they are sealed, unsealed, have the address on the envelope or not.

He urged people to make use of zip code meter for speedier deliveries and put Christmas seals on back side of all letters, and front.

Any letter with a Christmas seal on the address side of letter will not be sent through the mails. This is due to effect such seals have on electronic sorting equipment at large metropolitan post offices.

Grass & Grain

33

December 3, 1968

and so apparent that people are really up in arms," John McCready, a director of the Ottawa County Taxpayers League, said.

"A large number of taxpayers are expected to pay under protest," Eugene Mullen, secretary-treasurer of the group, said.

"Over 800 citizens filed objections to their assessments following the recent real estate reappraisal," McCready said, "but the commissioners listened to only 49 of them."

Members of the organization also have met informally with the state board of tax appeals in Topeka about the situation.

McCready said an out-of-state firm that was not familiar with Kansas did the reappraisal work.

Alfred Wilcox, chairman of the county commissioners, refused to comment. "We've had enough trouble with it, anyway," he said.

Correcting Mistakes

The business of Max Farrar of Norwich is correcting weaknesses in commercially-designed farm machinery. Started as a machine shop 30 years ago, the plant in Norwich, near Wichita, employs 20 persons. Farrar says a principal part of the business is noting what parts of machinery frequently need repair and then redesigning the piece so that it works better or more durably.

FLINT HILLS Special ANGUS SALE

TUESDAY, DECEMBER 17, 1968

12:00 Noon

MOLINE, KANSAS

Moline Auction Company

* Registered Angus Bulls

The bulls in this sale will be graded for sale order. Quite a number of the bulls are half-brothers. Whether you wish one or several bulls, this sale is a good opportunity to fill your needs.

In addition to a good representation of females, we offer several groups of commercial females.

This is a new sale effort of the Kansas Angus Association to meet the growing need for top quality Angus in the Flint Hills area of southern Kansas and northern Oklahoma.

Commercial consignments will be accepted up to sale time. Call the sale manager or the sale barn for particulars.

Cattle were selling steady to stronger here this past Saturday. Butcher hogs were 25¢ to 50¢ higher than the previous week.

We have a good demand for feeder cattle, both steers and heifers. There is a good supply of grain and roughage available which is one reason for the demand for feeders. If you have cattle that you are thinking about selling, consider the CLOUD COUNTY LIVESTOCK COMMISSION CO. as the place to sell. We treat each customer, both buyer and seller,

Leo Rauch, Clay Center, 632-3092

- Feb. 8 — Seventh annual Polled Hereford production sale Valley Hereford Farm, Goff, Kans., Carl J. Funk.
- Mar. 27 — Northeast Kansas Angus Assn. sale in Horton, George Hook, Morrill, Ks., sale mgr.

Land Return Good — But Not Any Better Than Common Stocks

Why should city people invest money in farm land if it won't earn them more than common stocks or government bonds?

Land buying by nonfarmers seems to be increasing. Agriculture Department figures indicate, but the statistics show farm land on the average is not the blue-chip investment that some believe.

Department real estate analysts say that since 1950 farm land — including buildings — has produced an average total return of 8.8 percent a year. This includes a yearly return from the land's production of 3.5 percent, and a growth in value equivalent to a compound annual rate of 5.3 percent.

The kicker is that to reap the full growth, land bought in 1950 must be sold now. Otherwise, the investor will have only the 3.5 percent annual income from production.

But the appreciation in the market value of farm land is a strong motivation for city-dwelling investors, despite a larger growth for common stocks during the same 18 years.

For example, the analysts say, since 1950 common stocks have averaged an annual dividend yield of 3.5 percent, the same as for farm land's return from production. But common stocks have increased in value at the rate of 10.3 percent a year, nearly double the rate for land.

As in the case of land, stocks would have to be sold for the investor to get the entire 13.8 percent gain.

Land-buying patterns that about two-thirds of the sales and transfers each year are made by farmers to other farmers. But in recent years buying by nonfarmers has increased slightly, from about 10 percent of the transactions in 1963 to around 34 percent in 1967.

Farm land has grown consistently in the last few decades. In 1950 the average value was \$64.44 an acre or a total for all the land and buildings in the nation of \$75.2 billion. Last year department analysts said the average value was \$178.37 an acre, or a total of \$193.7 billion.

An agriculture department official said one reason land might be favored over the stock market is the amount of money investors are required to put in for each.

In the case of common stocks an investor is required to chase at least a 70 percent equity in what he is buying while in land purchases there are no minimum down payments.

Open Evenings Till 9 p.m.
Sundays 1 to 5 p.m.

HOGS START AT 11:00 A.M. CATTLE AT 1:00 P.M.

We had a real active sale last Saturday, with quite a few cattle here and prices better. In fact, there was a real strong market. Especially if you have feeder cattle, contact us. Call at the barn, 238-1471 Junction City, or if you call us at home, note we are now on the Junction City exchange, 238-8211.

One early consignment for this week: a nice Holstein springer cow, fresh in about two weeks.

FEEDER CATTLE

28 wfbk hfrs	840 @	24.50
2 blkwhf hfrs	895 @	25.30
58 wfbw str	715 @	27.10
12 whif str	695 @	27.70

Poultry Award

The Red Rooster Award of the Kansas State University Poultry Science Club has been awarded this year to a senior from El Dorado, Robert Frisbie, right. Here Frisbie accepts congratulations and a check for \$150 from Dr. C. L. Norton, head of the department of dairy and poultry science at KSU. The award furthers the education of deserving members of the KSU Poultry Science Club.

Sale Of Milk Base Is Capital Gain

Planning to sell that milk base issued by your milk marketing agency? You'll be ahead to keep it at least 6 months from the date of issue, says a Kansas State University Extension economist.

A milk base is considered a capital investment by the Inter-

nal Revenue Service, says John H. Coolidge. It is a marketing right of indeterminable life and is not subject to depreciation.

If a milk base is disposed of by the original owner within 6 months after it was issued, the sale must be treated as a short-term capital gain. The full amount would add to his other taxable income.

If he holds the base more than 6 months, the sale will be considered a long-term capital gain, only half of which is taxable income. Thus, it is very important, tax-wise, to hold the milk base more than 6 months.

If the value of the base is reduced or it should suddenly have no value due to some change in milk marketing rules or procedures, it would be considered a capital loss of property in the business.

The amount of the loss would be first used to offset capital gains. If there were no capital gains, the loss would be limited to \$1,000 per year, until the full cost was recovered in this manner.

However, in such a case, the producer to whom the base was originally issued could claim no loss, because capital losses are limited to cost — and he is considered to have "zero" cost in the milk base, Coolidge says.

DOUGLAS JIBES DAMS OF ARMY ENGINEERS

The Corps of Engineers is dedicated to "building dams whether you need them or not" said Supreme Court justice William C. Douglas at a convention for science and mathematics teachers at St. Louis. "The engineers have no conservation standards," said Douglas.
