

2001

Kansas Worker Protection

Standard Pesticide List

In Kansas, pesticides — herbicides, fungicides, insecticides — are registered with the Kansas Department of Agriculture for use within the state during the calendar year. As of April 15, 2001, there were 5,556 pesticide products registered. Of these, the 349 listed on the following pages must carry the special **Worker Protection Standards** (WPS) language on their label.

WPS information appears on the front panel of the label under the heading, "Precautionary Statements," usually with personal protective equipment (PPE) requirements. It may also be found under "Agricultural Use Requirements" on the side or back label panel along with warning, reentry interval (REI) and specific PPE information.

This list is not complete because pesticides are continually being registered for use in Kansas. While the WPS information in this publication is believed to be accurate, pesticide users are responsible for reading and following all label requirements. Products are listed in alphabetical order.

Kansas State University Agricultural Experiment Station and Cooperative Extension Service

MF-2121

May 2001

It is the policy of Kansas State University Agricultural Experiment Station and Cooperative Extension Service that all persons shall have equal opportunity and access to its educational programs, services, activities, and materials without regard to race, color, religion, national origin, sex, age or disability. Kansas State University is an equal opportunity organization. Issued in furtherance of Cooperative Extension Work, Acts of May 8 and June 30, 1914, as amended. Kansas State University, County Extension Councils, Extension Districts, and United States Department of Agriculture Cooperating, Marc A. Johnson, Director.
