E. came in two or three days before church. which said she would be here. A letter is on its way and until it reaches the America, and prayer by W. A. Bendstate office, this paper will not be er. able to give exact information as to Institute. However, Mrs. Olson is a Kansas Farmers Union, is of course, operative. sorry she can not attend, but is glad that the National Farmers Union, of as useful as she.

State officers of the Kansas Union are sure that another leader can be secured to take Mrs. Olson's place. no definite announcement can be

Manhattan and Lawrence

The Workers' Institute, a KERC educational project which is developing out of the joint cooperative efforts of the Kansas Farmers Union and the Kansas Emergency Relief Committee, is scheduled to begin on Friday of this week, March 22. First assemblies will be held in Topeka in a suitable place to be provided by the KERC. For the first two days the student-teachers will be familiarized with the general low during the next four weeks at Manhattan and Lawrence, at the Kansas State College and the University

of Kansas. The entire school will move to Manhattan to begin work Monday morning. KERC will pay all transpor- and Mrs. Fitch for their liberal dotation charges. There the student-teachers will receive instruction and preparation in general agricultural d organization subjects. Full use of the facilities of the College is offered. W. E. Grimes, head of the department of agricultural economics, will probably lecture at certain periods, as will others who will be chosthe Farmers Union and the

FARMERS FAVOR AMENDMENTS TO ADJUSTMENT ACT

Go On Record at Salina Meeting which was Addressed by Ed J. Bell, Assistant Chief of Wheat Section of AAA

SAME BASE PERIOD

Farmers Evenly Divided on Question of Compulsory Control, and Seem to Favor Limiting Referendum to Contract Signers

A group of more than 500 farmers from north-central and western Kansas gathered in Salina Thursday afternoon of last week to hear Ed J. Bell, assistant chief of the wheat section of the AAA. The gathering went on record as endorsing the sestion of the AAA. The gathering went on record as endorsing the semandments to the agricultural adjustment act proposed by the adjustment act proposed by the adjustment administration. Sentiment was overwhelmingly in favor of ment was overwhelmingly in favor of the wheat allotment plan.

The Frazier-Lemke amendment to the Federal bankruptcy act has again been upheld as constitutional. The amendments to the agricultural adjustment act proposed by the adjustment administration. Sentiment who is a member of the national who is a member of the national who is a member of the national wheat allotment plan.

The Frazier-Lemke amendment to the Federal bankruptcy act has again been upheld as constitutional. The amendment providing a 5-year moratorium on farm debts was upheld by Judge Merrill E. Otis of the United States district court, in a memorand who is a member of the national wheat advisory committee, told of his recent trip to Washington, when the committee was called in to advise the allotment administration.

cal Ward, president of the Kansas Farmers Union and serving on the wheat advisory committee, presided at the meeting. He asked, "Would Kansas be in favor of compulsory control?" The crowd seemed to be evenly divided on the question.

Endorse Amendments

The coly definite endorsement

Endorse Amendments
The only definite endorsement made by the meeting was with regard to the proposed amendments. This was carried in the form of a motion. Two of the amendments are aimed in the direction of the "ever normal" granary plan described by Secretary of Agriculture Wallace. This plan recognizes that the government is likely to acquire substantial amounts of such commodities as tial amounts of such commodities as wheat or corn through loan activi-ties as wheat or corn through loan ties, especially if a good crop year when loans are made is followed by another high yield. In this instance government commodity holdings would be used in making payments "in kind."

The amendment to section eight of the original act permits the adminis-tration to make benefit payments in the commodity rather than in cash if

the producer so desires.

The amendment to section 12 permits the use of revenues by the admeeting, relates to licensing such that vegetables, and some of the basic commodities such as milk. amendment would authorize the supply and marketing conditions through marketing agreements and licenses. Such agreements would apply to processors as well as proucers and would aid farmer coopera-

tives. Favor Present Acreage Plan Several other matters were broached before the meeting by the chairman or delegates, but votes were aken by acclamation rather than by definite count. The wheat farmers seemed strongly in favor of continung the principle of contracted acreige as it has been used during the

past two years. Mr. Ward then asked: "If we go into a three or four year wheat contract do you want the opportunity upon petition of 25 per cent of the signers to take a country wide vote each year on whether you will continue the agreement for another season or for the life of the contract?'

meeting. A majority seemed to favor leaving wheat stand on its own base Tom did not fail us as he always to feel that the present plan wheat control is satisfactory

Limit Vote on Referendum "Will all farmers be allowed dum or just the contract signers," asked one delegate.

Mr. Bell said this had not been decided and asked members of group what they thought about it. From the volume of ayes and nays the majority appeared favorable to limiting the vote to contract signers One wheat farmer asked whether pending amendments to the adjust-ment act, which provide the inclusion of taxes and interest in computing parity, will apply to this year's crop. "As I understand it, such a

measure would apply to the 1935 crop year," Mr. Bell said.

Difficulties in getting some of the contracts back from Washington, were broached by the producers and Mr. Bell explained these by pointing through this machine three or four million documents must be fed. In

A producer asked whether the pending wheat contracts will be on the Institute for training the Junior the same base years. In reply, Mr. Bell and Mr. Ward asked the sentiment of the group, which appeared favorable. Mr. Ward explained that changing the base period to include the 1934 crop failure will cut the base for Kansas about five and a

One delegate wanted to know why the government is asking domestic producers to cut their acreage and allowing the importation of foreign wheat, notably from Canada and France. Mr. Bell said such importations have been greatly magnified. Only 9,000 bushels of wheat was imported from France in 1934, the delthat he had looked up the Canadian importations and these amounted to about six million bushels. Most of this wheat, the delegates were told, PAY YOUR DUES

Remember the importance of paying your dues. Your organization needs your support, because it costs a lot of money to put the Farmers Union program into effect. Quite an amount is being spent on the educational program. Your officers believe the entire membership recognizes the importance of the right kind of an educational program. If you have not paid your 1935 dues, remember that your neglect is hampering the Union in its work. See your secretary right away, and do your

vise the allotment administration.
"I have great faith in Secretary
Wallace, Mr. Farrell, Mr. Davis and
the men associated with them," the
speaker declared. "And I believe when this new program is worked out it will be generally and favorably accepted by the farmers. The sentiment in Washington favors in as far as possible giving the local committees and associations more leeway. Washington doesn't want to stuff any program down the farmers' throats. The wheat program seems

change. Dean Umberger Speaks The final address was given by Dean H. Umberger of Kansas State college. The dean expressed his personal approval of wheat production control, declaring, "I am in favor of cooperative marketing from the bottom of my soul. I believe the adjustment program means adjust-ment. No other industry produces wildly with no regard to the demand and why should the agricultural business do this?" The dean conclud-ed with the statement that he personally favors some form of licens-

LOCAL DECIDES TO LIVE

Salina, Kansas. Dear Sir and Brother:

I am writing to let you know that Lena Valley Local 1538 "came alive" last Tuesday evening at the home of Mr. and Mrs. C. E. Jenkins. The meeting was called to get an

expression from the former members whether we would try to reorganize or transfer those who wanted to remain members of the Farmers Union to some other Local. It was unanimous that we retain our local, and before the meeting adjourned more members paid than we had paid up for 1934, two members paying back dues and for 1935. We have more coming and we feel that we soon will be in line for better

service for the coming year. Thursday, March 14, was the Quarterly meeting of Greenwood Co. Farmers Union. It was held in the Lena office and T. R. Wells, from Elmdale,

were both with us. The matter of entering into a one-contract-per-farm agreement to include wheat, corn-hogs and other commodities was laid before the meeting. A majority seemed to favor

a good dinner. The dinner was prepared and served by the ladies at

Tuesday, April 2, in the evening vote on the coming wheat referen-lum or just the contract signers," at the Valley church we will have an open meeting to which the public is invited, and we hope to have a state man to speak for us then.

We are advertising this meeting widely and hope to put Lena Valley local permanently on the map. have more prospective members lined up, so look out for us .- J. R. Horton, President.

NEW NRA RULING IS FAVORABLE TO **GRAIN ELEVATORS**

Tends to Exempt Country Elevators from Paying Code Assessments on Sidelines Handled, Says News Release

PAY ONE ASSESSMENT

Gist of Recent Ruling Means the Country Elevator Pays Code Assessment on its Principal Business Activity

A recent ruling of the National Recovery Administration relative to codes involving country elevators will be of great interest to many readers of this paper. The following news release was received recently from the Division of Organization and Publicity of the Farmers National Grain Corporation. J. M. Cummins, former-ly with the Kansas City branch of the Farmers National, and well known to most members of the Kansas Far-mers Union, heads this publicity devi-

sion. The release: Any country grain elevator whose retail business in sidelines is not more than 10 per cent of its total volume of business, nor more than \$10,000 will be wholly exempt from all retail code provisions. If its retail business slightly exceeds 10 per cent of its total business, or slightly exceeds \$10,000, it may petition the Budget Control Officer of the National Recovery Administration, Washington, for exemption, showing how it would suffer competitively as a result of code assessments not applicable to other associations of the same character, and whose retail operation hap-pen to be a little less in percentage

or money volume. This is the gist of a recent ruling by the National Recovery Administration, modifying a previous order, x-131, which made it mandatory for all country elevators to pay code as-sessments on all retail sales. The rul-ing was released February 23 by Ray B. Bowden, secretary of the National Code authority for the Country, Grain Elevator Industry. It means, for the most part, that an elevator will have to pay but one code assessment, namely, the one embracing its

principal business. Two paragraphs from the order

follow: "It is hereby ordered that membe "A negative answer to this ques- of the Country Grain Elevator Ind sarialy is limited in meaning to its bers of the Code Authority for any during said preceding calendar year does not exceed the sum of \$10,000.

Neighborhood Notes

DOINGS IN WASHINGTON COUNTY MEETING Greenleaf, Ks., 3-12-35

Salina, Kansas. Dear Brother Lynn: Sorry you couldn't be with us to-Kansas Farmers Union. They make

good substitutes.

Well we had our Farmers Union meeting at Holmberg today. It was short but snappy. The kind of meeting everybody enjoys. Yours Truly, the Washington official can opener, after being introduced by County President Block Hansen, made a few appropriate remarks.

We had several committees to report so Brother Hansen divided them up among us John Tommer reported on doings in Marshall County. A. M. Kinney reported on the K. C. Livestock Commission Co. Clay Ingman that greasy oil man from Barnes, acted as secretary. Dan Combow, our regular secretary-treasurer, was at provisions made for remunerating our wheat farmers according to their on Oil Co. Co-op North K. C.

RESOLUTION OF SYMPATHY

Whereas, it has pleased God, in his infinite wisdom to call from our midst

And, whereas, his death has caused a great sorrow, therefore, be it Resolved that we, the members of I am not altogether satisfied with Farmingdale Local 1047, in Norton county extend our sincere sympathy to the bereaved family and friends, and be it further

Resolved, that a copy of these resothe Kansas Union Farmer H. V. Drake, Secretary.

MEETING OF STONE LOCAL 792

I am sending you a report of our meeting at Mr. McClellan's home. This was an all day meeting, and we had a large attendance. A rabbit hunt had been planned, but it didn't materialize, so we enjoyed visiting and horseshoe games instead.

A big feed was served by the ladies at noon, and after that we had our ousiness meeting.

Several songs were sung by the Our President, Mr. Chas. Pywell

der. Mr. Kennedy's speech was taken up and discussed. Allow me to say here, brother members, make it a point to go to

your neighbor and have him tune in on the national speeches, and also on our state Farmers Union broadcast each day. Hand your paper to another and tell him to read it. You can't blame him so much for not belonging to the Farmers Union, until it is brought to his attention. You can bet your old hat that the information he should have isn't in any of the papers he gets.

The oil proposition was taken over, after which the meeting adjourned. Our next meeting will be at Sand Creek, in noe week and there will be interesting entertainment. That will be an evening meeting. L. O. Marcotte, Secretary.

RESOLUTIONS OF SYMPATHY (Barton County)

Whereas, it has pleased Almighty God in His infinite wisdom and goodwhereas, her death has caused great therefore,

Resolved, that we the members of the Odin Local No. 233, extend our most sincere sympathy to the beorrow, and be it further,

Resolved that a copy of these reslutions be sent to the bereaved family, one be placed in the minutes of our local and one be sent to the Kansas Union Farmer for publication. Wm. B Zecha

Take a long look at your house and barns; then close your eyes and imagine how much better they would look after a good coat of CO-OP paint.

CO-OP is honest paint-made by consumers, for consum-

CO-OP House Paint is-

70% Pigment; consisting of White lead 80%, Zinc Ox-30% Vehicle; consisting of Linseed Oil 90%; Turpen-

tine or Dryer 10%. Add Linseed Oil, gallon for gallon.

That's all! But that's enough—nothing more is needed to make CO-OP the equal of any house paint made, regardless of price.

If you prefer a titanium paint, buy CONSUMER at the same price. Here's the formula:

Consumer House Paint is-

70% Pigment: consisting of Titanium pigment 35%; Zinc Oxide 30%; White Lead 20%; Lead Sulphate 30% Vehicle: consisting of (same as CO-OP)

Add a little less Linseed Oil. Don't buy a pig in a poke; buy products that you know the formula of—CO-OP Products.

When you ask your Co-op Manager for these paints, you may be surprised at the low price. You ask, how do we do it? Through the almost total elimination of sales and advertising expense. When you buy a bucket of oldpaint, you are paying for several buckets of "ballyhoo"which is a mighty poor wood preservative.

CO-OP Paint is tried and proven. One man covered his buildings with 15 gallons; previously, using an old-line brand, he had required 25 gallons. Proof of the pudding!

No. Kansas City, Mo.

Ask your Local Co-op Manager **Consumers Cooperative Association**

Certainty of Demand at a Cash Price

At the principal terminal markets is the live stock producers greatest asset.

At all times, under all conditions the open competitive market functions to maintain live stock values.

ONE HEAD OR A TRAIN LOAD

There are buyers at these markets for all kinds and classes and it is the aggregate of this broad diversified demand that creates a value for every farm animal produced.

Producers have to have a sure constant cash market for their stock.

DIRECT BUYING IF CONTINUED WILL DESTROY THE ESTABLISHED PRICE BASING MARKETS

Conducted by Mrs. Art Riley

Kansas Junior Leader

A CORRESPONDENCE COURSE FOR RURAL CHILDREN

Mrs. Art Riley

ers Union of North Dakota in its achievement in obtaining the passage of the bill which provides a Correspondence Course for High School pupils. Their success in this is described in a letter from the state Junior Leader, Mrs. Gladys Talbott Edwards.

This bill is strictly and completely a Farmers Union bill. One of their Local Junior Leaders, Mrs. Jerome Evanson, conceived the idea and brought it to the State Convention where it was endorsed. It was then put through the legislature by the Farmers Union group. The bill provides for a correspondence course for rural children, paid for by the state. Since rural children cannot go to high school, in many cases, they become the responsibility of the state as surely as they do when they are under the eighth grade period. "North

We feel that this is a real achievement and also an instance of the important work which the Local Junior Leader may do.

We will welcome any suggestions which the Local Junior Leader may have as to our work—the way it can be improved, clarified—made more valuable. Please do not hesitate to write often.

THE NEW STUDY TOPIC

We have received this week from We have received this week from Mrs. Elsie Olson, our National Junior Leader, the booklets containing the lessons on the study topic for 1935. The name of the course of lessons is "Living with Power and Machines" and the dedication reads:

"This story of the machine age in which we live is dedicated to my twin daughters. Elaine and

to my twin daughters, Elaine and Loraine, who have been my best critics of material prepared for the use of Juniors in the Farmers Union, since they are them-

selves Juniors."
We will print the first lessons in this series in next week's paper and we will have one a month thereafter. Junior Leaders will wish to purchase the booklet, however, which may be ordered from the State Office at Salina, of 35 cents, it will be advisable when possiblee, that the Juniors pro-cure this booklet, also—and the adult members of our Locals will find it contains fascinating and informative

ROCK LOCAL NO. 929

ELECTS JUNIOR LEADER The following letter was received thigh priced money and low priced from Mr. B. L. Sack, secretary of Rock Local No. 929, Seneca, Kansas: have favorable balances of trade. Be-March 11, 1935.

etary of Rock Local No. 929 Seneca, maha County, Kansas. We have chosen as leader of our Juniors Mrs. Earnest Reist, R.F.D. No. 2. Seneca, Kans. We have only eight Juniors in our local and 25 Juveniles so our Juniors are very small in number but are interested in improving it. We feel that Mrs. Reist will be a very

good leader."
We wish every secretary of every Local in the state would write us a letter like this—naming the Junior Leader who has been elected.

CORRECTION

Through a mistake in proof reading in last week's paper, the prices were omitted on most of the items recommended for the Junior Leader's They are as follows: 'Machinery and Social Progress,"

Very truly yours, (Signed) "Floyd B. Olson."

Prepared by Mrs. O. H. Olson LESSON 10

Do You Knowdollars (1) What effect cheap have on commodity prices?

All of us will wish to congratulate the Farm-

Dakota has taken another step forward in getting this law passed," Mrs. Edwards writes, "and the Farmers Union has every right to be proud of it."

(2) What classes benefit by cheap dollars? What classes benefit by high-priced dollars? (3) Why farmers and laborers lose from sharp changes of price levels?

(4) Why the President of the United States refused the demands of the Gold Bloc in London, that this country return to the gold standard and stabilize the dollar? (5) What major reforms in cur-

rency and banking are proposed by the Farmers Union?
The World Needs Money We have completed our story of money, the rise of banking and cred-

t structure in the United States and their effects on society and business. We will next consider proposed monetary reforms. If we as a nation lived to ourselves,

solution of our money problems would be quite simple. But civilized people must carry on world trade and must have money which can be used as a medium of exchange between nations. In recent times when world trade has reached its greatest volume, barter of goods and credits is the rule, with balances settled in

However, at present the United States and most of the other leading nations are off the gold standard, which means that we cannot know exactly how to figure exchange of currencies, figured in gold or commodities, except from day to day. Nations which have cheap money, as compared to the price of gold, have trade advantages over nations with cause of this, nations with purely managed currencies may ward "currency wars" each seeking to make its money cheaper than that of other nations. This carried to extremes, could result in paralysis of nternational trade. The Cheap Dollar

The United States, which until recently had the highest priced money of any nation, and therefore had difficulty in selling her crops or products abroad, operating through world gold market is now engaged in forcing the value of the dollar down, This is one method of inflating prices of commodities and if other nations keep their money stable, our rate of exchange should enable us to find it profitable to sell in foreign markets. If other leading nations keep their money depreciated in line with ours, t would result in a world-wide rise of commodity prices, much to be de-

sired.

Lowering the buying power of the and stabilize the value of the dollar dollar is a less familiar way of in- with a view to putting an end to flating than is usually thought of, To many, inflation means printing press money, not redeemable in spec- ant bearing on these matters. e and not backed by any specific commodity or commodities. The classic example of paper inflation is Economic conference was convened that in Germany after the war, when in London to consider trade agreeprinting press money was issued unments, monetary policies, war debts, til it became worth only the paper and ink of which it was made. all inflation.

Our Livestock Commission Co. then the buyers would have to buy Now, in our first lesson about their hogs, cattle and sheep from

to an auctioneer — for this is really the part which the Commission Merchant plays in disposing of his merchandise. What is a terminal market? The easiest definition I can give you is—end of the line.

A terminal livestock market is the end of the line for the cattle, hogs and sheep that are raised out on the farms. After they reach can liken a Commission House ket has its own pens, that is, each Yards Company furnishes feed for Farmer Brown's pig and his broth-er's, while he is there. Of course, Farmer Brown is charged for this

Now let us see what it costs Farmer Brown to market his pig. The manager of the Shipping Asizations such as Swift and Co. and Armour and Company. In the big packing plants, the animals are killed and cut into different kinds of meat. From these plants trains and trucks carry great boxes filled with bacon, hams, lard, sausages and bologna and many kinds of canned meats. Refrigerator cars are filled with many pounds of fresh meat, which are carried out to the ice boxes of butcher shops in small towns.

Let us follow the travels of butcher shops in small towns.

Let us follow the travels of Farmer Brown's pig from the farm until it reaches the terminal market—and back out to the farm as pork.

Boxes of enough to take care of all expenses the firm has, and to allow the firm a profit. THE PROFIT made by the Farmers Union Livestock Company belongs to the farmers. stock Company belongs to the farmers who ship their stock to it. The profit made by private

commission firms makes a fortune for the owner of the firm. er Brown. When it is large enough to be made into meat, Farmer Brown has the manager of the co-fits are. In the past eleven years during which our Livestock comoperative shipping association haul the pig by truck to Kansas City or Wichita, which are the terminal markets for our Livestock Commission Communication of the control of the commission of the communication of the comm lars has been returned to its stockholders in patronage divi-dends. Wasn't this money worth saving? And—during this same time, a surplus and reserve fund has been built, of \$75,000.00 which is available in cash and govern-

ment bonds. There are 10,000 stockholders in our company and it has maintained its position in third place in volume of business done at Kansas City Stockyards, for the past five years. Mr. George Hobbs is general manager of our firm—and Mr. L. J. Alkire is manager of the branch of the or-

ganization, in Wichita.

We can all be proud of our Farmers Union Livestock Commission Company and its achieve-

wages of the present. Taxes to support government and pay its debts would not be an impossibility. Either incomes from farming, business and labor must be increased or debts must be repudiated; any other al-ternative would mean a complete centralization of wealth ending in a dictatorship by the financial plutocracy. In choosing between these evils, inflation for the purpose of raising incomes and price levels seems the less-

The Farmers Union Program for Na-tional Recovery

These three measures provide for

bonus through issuance of govern-ment notes or greenbacks. Intended as an emergency inflation measure, as an emergency inflation measure, to create buying power and increase currency circulation, such legislation would be limited by the amount of the obligation and could not grow into uncontrolled inflation. This new currency would be exactly like the \$346,000,000 of greenbacks now in circulation.

(2) Remonetization of silver. So that the provides the provided a gain of 15 votes in three months in favor of this proposition. The farm bill gave the President power to coin some silver.

(3) The issuing of fiat money simplest their mortgages and the amount of currency would be decreased; in their mortgages and the amount of currency would be decreased; in the solution soldier bonus bill would have provided a gain of 15 votes in three months in favor of this proposition. The farm bill gave the President power to coin some silver.

(3) The issuing of fiat money simplest their mortgages and the amount of currency would be decreased; in their mortgages and the amount of currency would be decreased; in the solution solution in the senate the absolute soundness of such a currency would be flexible power to coin some silver.

(3) The issuing of fiat money simplest to green backs. The Patman soldier bonus bill would have provided for such issue. The farm bill gave the President power to coin some silver.

would give us a true medium of exchange.

(3) The Frazier Bill for refinancing farm mortgages. This bill would provide adequate currency to raise general price levels and supply business with money needed to carry on exchange and re-employ labor. It would refinance farm mortgages and perpetuate private ownership of subject to maripulation and would provide a redeemable currency based on intrinsic value and taxable property. It would create a base for a system of national currency which could be stabilized as to buying and debt paying power. It would lead to the abolishment of our present evil banking and credit system, and the nationalization of our banking structure. And this system of currency without any would be paid into use without any usury being collected from its users.

able bank notes in exchange. Likewise, private banks could be required to deliver all gold or gold and silver to a government monopoly of these bankers who said only the feeble minded or insolvent wanted to borrow. No stimulation of business resulted, of course, as the money never got into the pockets of those who needed it to use, just as plenty of water in the ocean does not help our South Dakota crops in times of drouth.

(5) Establish a scientific managed currency, not based on metal. This is the type of money in use in England being co We propose that the government

accept farm mortgages on a conservative valuation basis issuing Farm Loan Bonds in exchange. These bonds could be taken to the Reserve face value in Federal Reserve Notes. Such Federal Reserve notes would be exactly like those now in use, all of which are non-redeemable and most of which are secured by government bonds. The Federal Reserve notes scientific control of the value of the now in use are "rinted by the government and delivered to the Reserve buy; people living on interest or such basic ecconomic errors that unfixed incomes find their money will derlie so much of the present world banks for the cost of printing. According to figures received from the date of November 9, 1933, the cost of printing \$3,501,140,000, for the fiscal year ending June 30, 1933, came to stability in foreign exchange on the a total of \$943,372 or about .0003 for each dollar. Farmers would no doubt tem of a nation is a greater factor in its well being than the price of its on such fewer land. The sound no doubt be willing to pay for this cost of printing their currency.

On such fewer land.

cost of government, adequate gov- Pres...t refinancing of farm mortgages through the rivately controlled Federal Land Banks is exceedingly unsatisfacto— and the interest rate on loans is 4½ per cent plus amortization payments and expenses.

The break-up of the world economic conference without action towards world monetary reforms, demands that we return to seeking a sound money within the nation. Delta world

sound money within the nation. Debts of agriculture and industry, and of various divisions of government from sued under the Frazier Bill, we say the school district up to the national it will be the most soundly secured

tained out of the small incomes and ment of taxes or for the retirement easier money. Many economists tell structure of the nation rests on permitting private bankers to mobilize postscript is made up chiefly of property, and issuing bank notes, separate the depression, even though it will not solve our real problems. This postscript is made up chiefly of proposals and opposition to such proposals which in recent months have property, and issuing bank notes, secured by the property of others, they are permitted to have their notes pass for currency and COLLECT INTEREST for lending these notes.

Yet the small currency of property.

have them circulate as currency; but our government acting for all of us, adequate inflation, government con-trol and stabilization of currency and ultimately the permanent reform of is the idea back of the Frazier Bill. banking and credit.

But we do not ask that currency be thus issued except against the most permanent and non-perishable of all property—land. The taxing power of government, which private banks do not possess, would also guarantee

placed metal as basic money suitable for world trade. However, in centuries past silver has been the poor man's money and is still in actual use more than gold, which has become the bankers money, the key to monopoly. Against arguments that should we remonetize silver, gold would flow out of the country and silver would flow in, and that the two cannot be held at a parity, we hold that a government which can forbid the use of gold, as ours does at present, could regulate the use of the two metals together, and control foreign shipments of either or both metals. This would give us a kind of money which could be created by the labor of silver producers and paid into circulasion without bankers being paid users, of course, that bankers object to silver coinage. Silver coins are not proposing that the public, but silver coinage are readenable by the taxing powmate made redeemable by the taxing powmate the rate of way to nationalization of banks, and the Farmers Union frankly advocates as being essential to the life of democratic government. At it is of the sack in every field of banks advocates as being essential to the financing of banks, and the feature of democratic government. At is operating in every field of banks and feeding of livestock. Yet the government lacks both control of the sources of money and credit supplies, and feeding of livestock. Yet the for such issue. The farm bill provided for such issue. The farm blave not to exceed 3 billions of such made redeemable by the taxing powmate of the made redeemable by the taxing powmate as being essential to the financing of banks, and the feeding of livestock. Yet the financing of planting of crops and feeding of livestock. Yet the financing of planting of crops and feeding of livestock. Yet the financing of planting of crops and feeding of livestock. Yet the financing of planting of crops and feeding of livestock, we taken out of circulation by silver coinage. Silver coins are not popular with the public, but silver certificates would be vastly preferable to the present non-redeemable bank notes in general use for want of National banking would be no more something better. Silver coinage involved than the postal sysetm; we

now have postal savings and adding checking accounts would be less com-plicated than handling of mail.

Basic Money Under present trade conditions, a national system of currency would have to include basic metals for use in world trade. The government has demonstrated its right to demand de-livery of gold from private citizens, farm homes. It would provide a livery of gold from private citizens, flexible currency that would not be subject to marinulation and would able bank notes in exchange. Like-

Stable Dollars

Research has shown that supplies of general commodities do not vary ard. (continued from page 3) changing the gold content of the dollar to lower its buying power and bring about inflation-accompanied by increased commodity prices and a corresponding demand for credit to be supplied through existing banks and credit agencies—is now one of the presidential advisors on monetary

new gold both on domestic and world markets. While we were on the gold the gap must be narrowed by lowering the problems of the times. standard, gold was \$20.67 per ounce. The government is now paying about a dollar. The effects of buying gold was said: is very similar to that of lowering dollar; however, changing the gold content of the dollar would result in raising commodity prices within the raising commodity prices within the price of what farmers have to sell but the soundness and efficacy of have honored those who made prothe number of grains of gold in a probably being made.

bill has been offered from time to time as means for establishing a stable dollar. This is the Irving Fisher plan and is approved by such economists as Warren who say:

"The dollar has to be rubber either as to weight or value. (He refers to ble courses would be open to debtors: gold dollars). It cannot have a fixed weight and a fixed value. This pro posal would give it a fixed value and rubber weight. The scientific money is one with a constant buying power for all commodities rather than one commodity, gold. Our whele tax and debt structure rests on commodity prices. If this structure is to be kept sound either for the creditor or the to cut down the continuous burden of debtor, it is commodity price that needs to be kept stable, not the weight of gold for which a dollar can the value of property by controlled be exchanged."

The Price Index The Fisher plan is that the dollar should be based on its exchange value should be based on its exchange value "But," says the deflationist Ogden start; perhaps we shall make misfor the commodities in general use. Mills, former Secretary of the Treastakes. So do all who experiment to the commodities in general use. Wills, former Secretary of the Treastakes. So do all who experiment to For a number of years the govern-ment and also economists have been whatever the earlier appearance may tabulating the prices of all important be, all classes are ultimately adversecommodities in use and studying their price relation to each other. They find that if we were on a barter basis to the economic life of the nation there would be no sharp rises or drops and brings terrible disaster to all its in price levels. The general supply of goods needed by society does not change rapidly and the demand for use is quite steady.

ing power of the dollar. To do this which was being swept by inflation as proposed in the Goldsborough bill, all gold would be taken out of circulation as coins and melted up into bars or bullion.

This bu-reau is to use the price-index base the President asked for this power to and have power to regulate the buy- head off the "wild men in the senate"

Panics Inherent in the Profit

System To add to the conflict of opinion, This would be used to redeem cur- other economists and social philosolion or bars.

The stabilization bureaus would keep the price index under constant observation and if all prices began to go up this would be held to indicate that dallars were too plentiful and take a profit on the goods labor are follow. These things help make prices

This was the plan Warren had in mind when he said we cannot keep both the weight and value of a gold dollar steady.

Opposition

Naturally there are those who oppose such tampering with a "self-regulating currency based on gold" (what ever that may be). "That commodity which has served so well as "low and money scarce and high.

The technocrats say that machines in the place of workers make more profit for the employers, and since machines produce goods but do not consume them, this results in more surplus than ever before. The result of machine production under the profit system may be almost continuous depression with millions out of the best college texts.

(10) Make Gold Our Servant, G. F.

Warren, Cornell University.

(11) Rise of the American Civilization, Charles Beard. Free Library Commission. The best American history, depicts class struggle between farmers and bankers.

(12) U. S. Senators Long, of LLa. (what ever that may be). That commodity which has served so well as money for the last 10,000 years that the instincts of humanity claim it is the only true money," say Standpatters like Senator Carter Glass, Og-

den Mills and Herbert Hoover who necessities of life and support gov think the quantity theory of money ernment and free education, and that in the end the wealthy owners of maor the speed at which dollars pass chine equipped factories will go bankfrom hand to hand is of much more rupt because no one can buy their goods. These people do not therefore think that the buying power of the dollar can be stabilized by any such

plan as the Goldsborough bill pro-While we cannot doubt that the give the farmer a square deal as farm centralization of wealth has come products are worth about half as much about largely through the control of ing the problems of the times.

If you are interested in learning

more about this theory that profit \$34 per ounce. Figure out for your-self how much gold is now equal to extended to all business. This is what panics, you can dig it out from the thick pages of Thorstein Veblen. Trail Blazers

As a people we have honored the Stabilizing the Dollar ing factory workers out of employed goes freedom of speech and freedom of

press he became a social outcast. At the time he was Secretary of the Treasury when Washington was President he was invited to only three homes in the Capital city. He called himself a Republican but others contemptuously referred to him as an an-archist and Mrs. Washington once called him "that dirty Democrat." Democrat being a term of contempt.

Those of our age who have the courage to propose social, economic and political reforms to better the lot apples. of the common people are very fre-quently called reds, bolsheviks or radicals. Just why is it so desirable to progress in some lines and not in

If we are to have machines to produce we must find ways to better human relations and of sharing the product of machines. Reforming our money system is a hopeful place to tween man and man or nation and nation. It s not enough to know something about money problems; but like Thomas Jefferson we must have the courage to take a bold stand and fight for those things we are con-

vinced are for the good of humanity. Above all we must educate ourselves so that we can think soundly; we must stick together, for only mass movements get results. "Education and Cooperation," these two wards are the keys to the future success and happiness of society. In their name, nothing is impossible. (THE END)

SHRINKAGE FACTS HELP WHEN BUYING CLOTHING

"Will it shrink?" most people want assurance when they buy a garmen of any description, that it will sti fit after it has been laundered or fit after it has been laundered or dry cleaned. Many manufacturers are trying to meet this demand for fold into tapioca cream. Serves information by some sort of state-ment on the label attached to the garment. Unfortunately, many of he statements thus made are indefinite and almost worthless to the onsumers, says the Federal Bureau of Home Economics fter looking ino the situation and collecting a wide variety of so-called "informative la-

waetr to cover the bottom shrinking process. Will any more? You do not know. "Will any more? You do not know. "Will about one hour, or until apples are tender but not broken up. Serve What does "Preshrunk" or "Super more promising, but what does "out-of-fit" mean? Opinions vary. If it does shrink, the merchant's idea as to what constitutes "fit" is just as good as yours. "Fully shrunk" or "Will not shrink" can rightly be interpreted to mean that the garment will show no noticeable shrinkage whe laundered.

The New York Board of Trade would go even farther. It recently initiated a project on shrinkage under the sponsorship of the American Standard Association. The commit-tee working on the subject recommends that no woven fabric be la-beled "Preshrunk" if it will shrink more than 3 per cent when subjected erate oven. Baste frequently. content of the donar world raising commodity prices within the United States alone, while buying gold in the world markets may result in raising world commodity price levels. If you refer to the President's marrowed from the other side. The intensing world commodity price levels. If you refer to the President's marrowed from the other side. The industry costs that do not give way as readily as do farm markets should be the point of attack, since the inflexibility of these costs is who made proposals is extremely doubtful and in any event the gap must be narrowed from the other side. LETTER FROM AUNT PATIENCE

Dear Junior Cooperators: Please be sure not to overlook the Juvenile Lesson this week—for you know that the "Juvenile" and the "Junior Cooperator" are one and the same. Our national organization has named the Junior 2, from 6 to 16 years of age, a "Juvenile." So all of our Junior Cooperators are in that classifica-

I won't have space this week for any letters—but be sure to study the lesson carefully and send it in to "Aunt Patience." There will be an award of a new one dollar bill to the Junior Cooperator who sends in the most thoughtfully prepared and neatly arranged lesson. And don't forget to include a letter for our Junior page-for we're anxious to hear from our "old-timers." All lessons must be mailed not later than Sunday, April 14th. That will give you more than three weeks—so DO IT NOW!

Aunt Patience.
