100

"IN THE LONG RUN."

BY MRS. M. A. KIDDER. The old-fashioned saying, So lightly expressed And so carelessly uttered, Is one of the best! Oh. ponder, young trifler, With lite-work begun, The deep, earnest meaning Of "in the long run."

For "in the long run," boys, The seed will spring up
That was sown in the garden,
Or dropped in the cup. And, remember! no roses Will spring from the weed; And no beautiful fruit From the unworthy seed.

How many a stripling In trouble to-day, By riotous living
With comrades too gay,
With character shipwrecked And duties undone. Will do sorrow's harvesting "In the long run."

Too, "in the long run," will The toiler fare best, The toner lare best,
Who performs honest labor
And takes honest rest;
Who, contented and happy,
Hastes, not in a day Or a year, to heap riches That will pass away!

The good, and the evil,
That bides in the earth,
The joy and the sorrow, The pain and the mirth. The battles unheeded,
The victories won,
Will yield what was sown, lads,
"In the long run!"

SIDNEY'S TRUST.

BY ANNA SHEILDS

"I hold that perfect confidence should exist between man and wife. Without mutual trust there can be no true happiness."

Sidney Worthington spoke with honest enthusiasm, with a vision of soft brown eyes, a tender smile and sweet, loving voice floating through his mind. His uncle, a grave, middleaged man, a widower for many years, and the victim of an "unhappy marriage" before that, smiled kindly.

"Ah, my boy," he said, gently, "may you may give way when you come to a practical band!" test of the unquestioning faith."

"I can scarcely imagine myself doubting Mattie, under any circumstances," was the quick, emphatic reply.

"She is, I firmly believe, the very soul of duplicity. The truth is, Sidney, I am soured stairs. by my own disappointed life."

"Saddened, perhaps," said his nephew, "but never soured. No one knows that better than I do."

Co." was represented by the two. It was late match and lighted the gas. when they parted, Mr. Worthington to step into the bed-room of his suit of apartments in a fashionable boarding-house, and Sidney to rapidly pass through the streets that separated that boarding-house from his own cosy home.

Not quite six months had passed since he took to his heart and home the sweetest little wife, he firmly believed, who ever blessed a man's life. She was not marvelously beautifulbut full of womanly grace, pretty, with sweet girlish features, and attractive above all by a trank simplicity of manner, exquisitely wellbred, and yet utterly devoid of affectation. It was this especial charm that first attracted Sid- find it empty. ney, and after a brief courtship held his heart firm in love's bondage.

He believed her when she shyly told him he was "her first, only lover," though there had been others who only waited a smile of encouragement, as Sidney well knew. It was an ideal match-vouth, beauty, ample means, congeniality of tastes; and in the first six months there had been only happiness in the pleasant house Mr. Worthington had turnished and presented to the bride upon her wedding-day.

But when Sidney, on this October evening of which I write, reached his home, Mattie did not come to meet him. It was not late-about and stole out of the house before the servants half past ten-and Mattie knew that her husband had gone to settle some business matters with his uncle. It was her custom to consider "poor Sidney" something in the light of a martyr upon such occasions, and to compensate was too busy to notice his nephew's abstrachim for the supposed irksome addition to his tion, and business hours, Sidney felt, were unlabors by extra petting on his return home. | fit for personal confidences.

"Are you asleep?" he cried, as he wended nis way up stairs.

And then the bed-room door opened and Mattie came hastily forward. But-she had been crying! "Why, what is the matter? Are you sick?"

cried Sidney, aghast. "No, dear. But I have had a letter from an old friend who is in trouble, and I was goose enough to cry over it. Come down stairs now. have some hot oysters for you." And giving him no time to talk of her trouble, she talked herself of everything, rattling on in a nervous,

excited way that was as unlike her usual cheer-

fulness as her tears had been. It worried Sidney. He told himself angrily that he was an idiot to notice it; but he could not rid himself of the impression that Mattie was concealing something. Then he gave himself another mental shake, and wondered where the "perfect trust" of which he had boasted was hiding, and finally dropped into a troubled sleep, wondering "what on earth Mattie could have been crying about."

But there was an important business venture engrossing the thoughts and time of the firm of "Worthington & Co.," and Sidney had to give it so much of his attention that he was at home very little for three days. On the third day he left home in the morning equipped for a trip to New York, and bade Mattie farewell for a few days. As he was leaving the store in the atternoon his uncle said :.

"If you'll wait till to-morrow, Sidney, I'll run over to New York with you."

"All right!" was the quick reply; and glad of the delay Sidney hurried homeward.

It was dusk when he opened the front door and in the half light in the parlor he saw Mattie and a man talking earnestly. No suspicion of harm crossed his mind, but he went into the extension to wait till his wife was disengaged to give her a pleasant surprise.

Every drop of blood in his body seemed to

stand still as he heard her say : "Remember, I will not give you any further bribe. You have promised to leave the country as soon as you received five hundred dollars for these letters."

"I'll keep my word." "There are five letters!"

"All right-I have five here. You buy them never have your faith shaken. You are right at a hundred dollars apiece, and mum's the that dreadful valet who stole the letters had in theory, but, as in many other cases, theory word. It's lucky you aint got a jealous hus-

"We will not discuss that point," said Mattie, with a haughtiness that amazed Sidney. "Give me the letters, and here is your money. Apparently the exchange was made, and the man crossed the hall and left the house. Sidtruth," said Mr. Worthington, "and I did not ney, watching his wife in a horrified stupor, mean to be personal when I spoke a moment saw her carefully cenceal a package in the ago of woman's powers of concealment and drawer of the table, and then go slowly up

He did not pause a moment. A fury of uncontrollable jealousy and suspicion seized upon him, and he forced the lock of the drawer with his penknife, took out the letters, and, lock-Then they talked of other matters, chiefly ing the door of the extension, opened them of business, for the firm of "Worthington & It was too dark to see them, and he struck a

There was no envelope in the package, which consisted simply of five letters in a woman's delicate handwriting. They were all signed "Martha," and addressed "My dear, dear Horace." They were all passionate love letters the last a plaintive farewell, as the writer was to "marry a man chosen by papa whom she could never, never love, but for whom she must hid her adored Horace an eternal fare-

Sidney Worthington raved, was stupefied and for half an hour was almost insane with anguish. Then he rushed to Mattie's room, to

He recollected she had said she would spend the nights of his absence with her sister, and conscious of his own excited state resolved to allow her to suppose him in New York.

"I will go, never to return!" he thought "Never again can I trust a woman who has deceived me so trightfully !"

But, although heroes of romance can seize a carpet-bag and rush to Europe at five minutes' notice, practical business men find some difficulties in the way. Sidney passed a sleepless night. Morning found him calmer, but resolute to see Mattie no more. He replaced the letters were up, no one knowing he had been at home. Mattle would probably return late, thinking

him in New York, and he would write to her. The day dragged heavily. Mr. Worthington

"Have you the first contract in your valise?" he asked. "No, it is at the house. I made a fair copy

after we drew up the second one." with us. Can't you run up and get it, and meet me at the depot?"'

"Y-e-es"-very slowly, and then more briskly: "Certainly, I'll meet you in time for the 7 p. m."

Should he speak to Mattie? Should he tell her what he knew, or write to her? Perhaps she would not be at home. Did he wish to Perpetual motion may yet be discovered; but avoid her, or face her? All these questions and a host of others tortured Sidney as he hurried homeward. Mattie was at home. He saw her in the par

lor again, and some one, he could not see who it was, was with her. Again Sidney played eavesdropper; this time intentionally.

"I have a right!" he said, savagely, as he deliberately paused to listen. A woman's voice was sobbing

"Oh, Mattie, don't be so hard! I will never forget your kindness, but do not speak so harshly."

"How else can I speak?" Mattie's voice an swered. "You have deceived your husband, and made me deceive mine, by my foolish promise of secresy. Some one has read those letters, probably the servant, for there was no one else at home last night."

"But they would not know who wrote them."

"You said they were signed 'Martha." you forget my name is Martha as well as yours?

"But you never saw Horace Earle!"

"Very true. Yet the fact that some one forced that lock makes me very uneasy. Suppose the reader, whoever it was, tells Sidney there were love letters in my possession addressed to an unknown Horace!"

"If so. I will confess all, Mattie. But you who have your husband's confidence and love, can never imagine the torture I endure from Mr. Potter's suspicions. He knows I do not love him, that father forced me to marry him, but he does not know anything of Horace. If taken them to my husband, as he threatened. I believe he would have killed me. As it is, I must account for five hundred dollars. I suppose I must say I lost it!"

"Oh! Martha, do not tell any falsehoods. Go to your husband and tell him the truth. I wish you would let me tell Sidney, for I know he thinks something is wrong ever since he found me crying over your letter."

"What did you tell him?" "The truth-that a friend was in trouble."

"Did you mention me?" "No; I had promised to keep your secret." "And I hold you to your promise! Goodby, and thank you again and again."

Sidney Worthington missed the 7 p. m. train. But Mattie's heart was lightened when she found her secret bretrayed without her consent, and heard Sidney's confession of his own suspicions, and promise for the future of the 'perfect trust' othat had been so hardly

strained. Mr. Worthington good-naturedly accepted the humble apology for a delay until the morning train, but never knew how near destruction had been his nephew's domestic felicity.

> In the spirit's perfect air.
> In the passions tome and kind, Innocence from selfish care
> The real Eden we shall find. When the soul to sin bath died,

True and beautiful and sound, Then all earth is sanctified— Up springs paradise around.

Cross People.

We have institutions for the treatment of all manner of diseases. We have small-pox hospi-

He was sitting in his own office, at a late husbands would buy it for their worse halves; wayfaring wanderer, when lost in the woods, hour in the atternoon, when Mr. Worthington children who have cross parents would manifest their filial regard by purchasing liberally; nephews and nieces who have cross uncles and aunts would generously supply them; people who have cross neighbors would do a neighborly act in sending around a large dose; in short "I think we had better take the original one the largest conceivable supply could hardly equal the inevitable demand.

And how the world would be improved! To many it would seem like another sphere; for the perpetual rolling of thunder from one end of the year to another would be music compared to the ceaseless din of one person.

But no such remedy is likely to be found never, we fear, a sure cure for cross people.

We have no account of the origin of cross people. Who the first cross person was we are not informed. It would have been well if the first had been the last also. There is one thing to be said in favor of both of our first parentsif they did go astray, there is no intimation that they were unamiable, or cross, or that they ever scolded each other.

According to the investigations of a Russian professor, Dr. Monassein, singing is an excellent means of preventing consumption, and for he development and strengthening of the chest it is more efficient than even gymnastic exercises. The professor has examined 220 singers varying in age from 9 to 53 years, and found that the chest is greater and stronger among them nan among persons of any other occupation.

young Folks' Column.

MR. EDITOR:-I send you the correction of

ast exercise: I do not know, but that this fondness for roam I do not know, but that this fondness for roaming was, in some degree, inherited by Daniel Boone. His father had already had three homes; one in England, one in Bucks Co., and another on the Schuylkill; and he now contemplated moving again. Further it is said, that the delight of Daniel was one cause which induced his father to think of this. Land was becoming scarce the neighborhood wittle becoming scarce, the neighborhood a little crowded, and game less numerous; and to improve matters he began to search for a new home. He was not long in choosing one, He had heard of a rich and beautiful country on the banks of the Yadkin river, in North Carolina, and he determined that this should be the next home, for him and his bousehold.

ALICE ROSER BURLINGTON, Kans., Nov. 21, 1879.

MR. EDITOR :- I send you another correct

All things were fixed as soon as possible, and the moving commenced. It was a fine spring morning when the father started for his new home, with his family, and flocks, and animals. Their road lay hundreds of miles through a trackless uninhabited forest, yet with pleasant, and honest hearts; they moved onward. When hungry; they lived upon (venison) and wild turkeys, for Daniel with his rifle was in the company. When thirsty they found cool springs of water to cool them by the way, when tired at night they lay themselves down and slept under the wide spreading branches of the forests. Soon they reached the land they were seeking, and the lather found it to be all that he had heard of. The forests in that country were uncleared, no man seemed All things were fixed as soon as possible that country were uncleared, no man seemed yet to have found them; land was soon cleared and a cabin built and the tather quickly found himself again quietly living with his family.

[Correction of Last Exercise.] The old man with his other sons went busily to the work of making a tarm. As for Daniel. build. tals; we have insane asylums; we have St. they knew it was idle to expect his assistance Luke's and Bellevue, where broken bones can in such employment, and consequently left him be set, and fractured limbs can be mended. But to roam with his rifle. This was a glorious we have no hospital where merely cross per- country for the youth; wild woods surroundsons can be treated. Probably they are regard- ed him, and the game, having not yet learned ed as past all remedy, and an asylum for them to fear the crack of the rifle, roamed fearlessly would appropriately be only a wing or branch through them. This he thought was, of all of the Hospital for Incurables. Doctors do not places, the home for him. I hope you will not profess to cure them, and even quacks do not think that he was the idle, useless boy of the pretend that they can be of any benefit to them. family, for it was not so. While the farm was Suppose some one could discover a specific improving, Daniel was supplying the family that would prevent a cross person from ever being cross again, what a sale it would command! ways filled with game, and they had enough change of the subject or thought, and two apos-Husbands who have cross wives would buy it and to spare. Their house became known as trophes (13) to denote ownership.

was sure to find here a welcome, a shelter, and an abundance. There, too, if money was wanted in the family, the peltries of the animals shot by Daniel supplied it: so that he was, in a large degree, the supporter of the household.

EXERCISE FOR CORRECTION. Please correct the exercise below by writing capital letters and pauses where they belong; omit curves and words between them and improve by writing one word, a better one, in their places. The exercise will be corrected next week. Send us your manuscripts at once and we will publish your names in one of two lists-a roll of perfection, and a roll of excellence. The entry of your name ten times on the first roll or fifty times on the second will entitle you to a desirable gift, providing your parents are subscribers to THE SPIRIT.

The National Grange.

Below we give a part of Master Adams's address, delivered before the National grange at its present session:

MEMORIAL SERVICE. By referring to page 55 of the proceedings of the last session it will be observed that Brother Lipscomb, of South Carolina, introduced a resolution instructing the committee on ritual to prepare a ceremony for planting "memorial trees," to be published with the proceedings, which was referred to the said committee.

Observing this, our Rev. Brother James A. Wallace, master of Arbor Vitæ grange, Alapama, wrote me in June last that he had upon be judiciously expended. To appropriate request some years ago prepared a service, which was used at the grave of a sister, and was published in the local papers. This formula was also adopted by the county grange. Believing that any ceremony calculated to render the order dearer to the hearts of its members, and to make them more faithful to their obligations and to each other, would be eagerly sought for, and gladly practiced, I replied it would give me great pleasure to peruse the same. Our worthy brother torwarded the service, hoping it might be at least suggestive to the committee who will have the matter in charge. I find it chaste, devotional, pure in thought and diction, and replete with consolation, and conclude that it will afford an excellent foundation for a ceremony, which has long been desired in our order. It will add another gem to the collection of beautiful and impressive rites which we are exceedingly fortunate already to possess.

WANT OF LECTURERS. The attention of the National grange is expressly directed to the fact that competent, zealous lecturers are needed now more than ever before. The cry from all quarters comes up to the master's office-send us lecturers. More than half of the entire correspondence pertains to the want of efficient, earnest members to go out as missionaries and labor in the good cause. Political mountebanks do not seem to be required, for they have done more harm than good, and our members know it.

Those only need apply who are willing to be dedicated to unceasing toil for the "good of our order, our country, and mankind." To-day hundreds of reporting, or thousands of dormant, granges are still anxious to listen to the voice of fraternal encouragement, are still thirsting for social and intellectual refreshment, are still hungering for tidings from afar.

WHAT SHALL BE DONE?

Although our grange press has never been undisturbed ignorance, and the nettles of basecover too much ground. What shall be done?

If the pulpits were vacated, and the ministers were withdrawn from their congregations, a relapse into heathenism would surely follow. If political harangues were discontinued, and politicians ceased to ply their vocation, party spirit would soon become extinct. So, if our granges are destitute of the services of fervent, skillful, upright lecturers, enthusiasm ceases and the organization dies out.

This is well illustrated by the condition of the order in those states where their donations ate; they scatter blessings, and yet they do not and accumulations were saved, so that their masters and lecturers are paid sufficient salaries to enable them to visit and lecture in the interests of this society throughout their respective jurisdictions. Here the order thrives; their revenues are well kept up, and their state agencies do a remunerative business. Here, "Line upon line, precept upon precept here a little and there a little," have been, and are now, constantly repeated. They act upon the motto, "Keep it before the people."

On the other hand, in those states where loans were effected, where their means were absorbed in doubtful business enterprises, where their lecture system was abandoned, the order languishes, and the subordinate granges cease to assemble, fearing their members will be held individually hable for the debts of their state grange, or still meeting, ignore their state grange and petition to the National grange for permission to pay their dues direct into the National treasury.

What shall be done? And in this connection it may be proper to add that the unrepresented states need looking after. It would seem of more importance than a session of the National grange, because our constitution, our digest, and our established rules meet all the ordinary requirements of our members, and the solitary amendment submitted at the last session did not elicit ratifi-

cation. It must be obvious that if we desire the existence of this body in point of fact, the states as far as possible should be reclaimed, and restored to the fold, otherwise our reputation as a national organization is false, and our potency for national weal is lost: As this republic would dwindle into insignificance when contency for national weal is lost: As this repub-

amount to but little as a national organization if a half dozen states only were represented. Those that are whole need no physician. The weak, bleeding, bleating lamb out in the dark and cold demands our attention. Selfishness must be overcome, and all, as patriots and philanthropists, must labor for the common cause, for the common good, for the common whole. "We cherish the belief that sectionalism is, and of right should be, dead and buried with the past. Our work is for the present and the future. In our agricultural brotherhood and its purposes we shall recognize no North, no South, no East, no West."

All are but parts of one united whole, Whose body is the grange, and love the soul.

all bound together by the ties of agriculture, and it is the grand mission of this order to rivet indissolubly this tie by Faith, by Hope, by Charity, by Fidelity, and by Perseverance.

But state granges are formed and supported by subordinate granges. The very existence of the order depends upon vigorous, healthy granges everywhere, and it has become self-evident that in most of the states they require more fostering care, more encouragement, more strength. Perhaps in the more populous states little national aid is necessary; but in those states where material interests have been regarded of paramount importance, and little or no account has been made of social, moral, or intellectual advancement, and in the smaller and weaker states, a moderate sum might money for this purpose would be of little avail unless the state authorities rendered all the assistance possible in funds, time and labor, and unless the missionaries employed were inspired in their work, and gave little heed to scrip

I firmly believe the states would co-operate in this laudable endeavor, and that successful lecturers could be found to enlist in this revival whom vain glory or cupidity would not sway, lecturers who would be "honest with the brethren, faithful to their pledge, and diligent in their work."

The present condition of the order is neither surprising nor discouraging; it is simply the result of natural laws. The membership is composed of non-associative material. The farmer's vocation of itself tends to isolation, which has become part of his very life, and from which this generation will never fully re-

Nevertheless, the order is an educator of its faithful inmates. It brings the husbandman into contact with others. Each learns from the experience and knowledge of others. Each Web. Withers. section has interests in common with those of other parts of our country. The true Patron exerts a salutary influence on those outside the gates, and confidence slowly but gradually takes root. A decade has accomplished much, but the next decade of years will effect still greater results.

Many people are of the opinion that the grange is simply a society for making money, by buying cheap and selling dear, and nothing more. This is a great mistake. The society was organized for other and nobler purposes than merely trading. It is a body of farmers who meet together for discussing such subjects as materially affect themselves; to consider their mutual interests, and how they may be best aided to work unitedly when any good so ably or wisely edited as at the present time, although our state grange newspapers never thing is to be done or any evil to be prevented. The scope of their work is large, and if, in eultivated only in patches, and the weeds of work assumes the greatest proportions in someless suspicion grow altogether too rank and body's eyes. This is why business men can see nothing in the grange but the trading idea. -Canadian Farmer.

Little Deeds. We find it an infallible rule that the subordinate grange whose members are most ready to do good, who help each other most and are most liberal in deed and in spirit, is the one that surpasses all others, not only in excellence, but in prosperity, and the members from such a grange will benefit all with whom they associimpoverish themselves. They do not lack for opportunities to practice the noble precepts of the order, nor wait for an occasion that will at one stroke make them famous, but take up their little duties as they go, and these are the brave deeds, every one of which takes them a step higher.—Dirigo Rural.

Co-operative Stores.

This is what Hon. Josiah Quincy, of Boston, says about co-operation : "A co-operative store is a means of getting a capital. I know of one (in Boston) that opened in April, and although it had a hard time, at the end of the quarter it had earned enough to pay 6 per cent. on the stock and a dividend of 4 per cent. on all purchases made. Most of these co-operative stores are managed on the Rochdale plan. There are 2,-000 of them in England, besides many in Ireland and Scotland."

Remember, man! "The Universal Cause Acts not by partial but by general laws;" And makes what happiness we call Subsist not in the good of one, but all, There's not a blessing individuals find But some way leans and barkens to mankind, Pretty good text, that, for a discourse on co-

For restoring Gray Hair to

its natural Vitality and Color. A dressing

which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color,

with the gloss and freshness of youth. Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free those deleterious substances which make some preparation dangerous, and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING.

nothing else can be found so desirable Containing neither oil, nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre and a grateful perfume.

Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Chemists,

Golden Medical Discovery

Dr. Pierce's Golden Medical Discovery cures all Humors, from the worst Scrofuln to a common Blotch, Pimple, or Eruption, Erysipelas, Salt-rheum, Fever Scres, Scaly or Rough Skin, in short, all discases caused by bad blood, are conquered by this powerful, purifying, and invigorating medicine.

Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Scree Eyes, Scrofulous Sores and Swellings, White Swellings, Goitre or Thick Neck, and Enlarged Glands.

If you feel dull, drowsy, debilitated, have sailow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills niternated with hot flushes, irregular appetite, and tongue coated, you are suffering from alternated with hot flushes, irregular appetite, and tongue coated, you are suffering from Medical Discovery has no equal, as it effects perfect and radical cures.

Medical Discovery has no equal, as it effects perfect and radical cures.

In the cure of Bronchtitis, Severe Coughs, Weak Lungs, and early stages of Continuption, it has astonished the medical faculty, and eminent physicians pronounce it the greatest medical discovery of the age. Sold by druggists.

No use of taking the large, repulsive, nauseous pills. These Pellets (Little Pills) are scarcely larger than mustard seeds.

Good Advice-An Attempt to Burn the New Normal School Building.

[Emporia News.] Young man, don't loaf. The man hunting for help will never select you if you do. Don't was on the table was prepared by the young drink. Nobody wants an employe who spends | ladies themselves. Each of the young gentlemoney in the saloons, or who makes a hit of men had given a physician a retaining fee bedrinking. You are working directly against forehand, but it was unnecessary, as the young your own interests when you guzzle beer or whisky. Both inevitably hurt you in more ways than one. We have knocked around this world several years, and have never seen an honest, competent, industrious man out of good employment.

This forenoon about 10 o'clock Dan. Hammond, while at work on the normal, discovered the roof on the northwest corner of the assembly-room to be on fire. Calling help, the flames were soon extinguished. They had burned a hole in the roof about four feet square, and were fast getting into a roaring blaze when fortunately discovered. A few minutes more and the fire would have been beyond control, and the building again destroyed, as there were no appliances to extinguish a fire if it once gets a good headway. The examination makes it evident that some dastardly incendiary had climbed up under the roof and with some small sticks had started the fire. It had burned slowly at first, and the workmen had smelled smoke for some time, but attributed it to the tinners. That any one should be so foolish and so wicked as to destroy the normal school would seem impossible, but such seems to be the fact. The building will now be watched, and we suggest that the watchman carry revolvers, and that the authorities use every effort to ferret out the incendiary whose efforts were frustrated this morning.

Gambling Den Discovered.

[Miami Republican.] While the reporter was tramping around this week for news, he was informed by a gentleman that in a certain rather old building, a little way back from any public street, and not more than three blocks from the public square, there was a gambling den, in which that netarious practice was carried on with marked proficiency by a lot of boys who frequented the place in numbers from four to eight at al most all hours of the day, and can even be found there some nights. In this gambling den (which the boys call a club-room) are all the necessary articles, such as table, seats, cards, chalk, poker chips, etc. The house washown the reporter, and he also learned the names of most of the gang. The business is conducted very "privately" and of course nobody knows anything about it. That gambling goes on in Paola, and large sums of money lost and won, there is scarcely any doubt. There is a place on the public square where it is being done, and the parties are known, although they think that they are keeping it awful quiet, and they are.

Railroad Bonds Voted. [Rice County Bulletin.]

Last Tuesday Washington township voted at a special election to issue \$21,000 bonds and to take the same amount in stock to the Kansas Southern railway. The vote stood 88 for and 29 against the proposition. This gives \$66,000 bonds now voted to the Kansas Southern railroad in our county. There remains only Hayes and Groveland, twelve miles, in McPherson county to vote to make the aid continuous from McPherson City to Sterling. The petition to call the election in Hayes township has been signed by the required number of taxpayers, and only Groveland remains to work nd men are now at work in Groveland and the petition in that township will short y be completed: We shall not be surprised to see the Kansas Southern completed to Sterling by the middle of the winter.

Harvey County.

[Harvey County Republican.] Laying aside politics and selfish interests, let us all unite in trying to develop our county We have in Harvey county some of the best lands in the world, which can be sold at a moderate price, and we need a large number of families to settle among us. Now if every farmer and every merchant and manufacturer will do his share, we can have five hundred families settle here within the next six months. We can safely advise people to leave the untried and come to Harvey county, which has been proven to be all that could be desired as a place of settlement for men of moderate or large

Coal-Good Corn Crop. [Fort Scott Monitor.]

The coal famine up the road and in the cities north of us has caused a most unusual demand from the mines in this vicinity, and shippers find as much difficulty in filling the orders as the roads do in supplying the cars.

The corn crop of Bourbon county the past season was one of the best the county has been blessed with for many years. Dr. E. A. Currier, of Osage township, informs us that he will harvest from 130 acres 6,000 bushels, being 50 bushels to the acre.

Fatal Accident. [Eureka Herald.]

A sad and fatal accident occurred on Otter creek last Sunday, the facts of which we learn from Mr. John Warr. Mr. Samuel Robinson from Mr. John Warr. Mr. Samuel Robinson was on his way to church with his wife and child in his wagon, and one of the horses becoming obstinate Mr. Robinson struck him, when the other horse gave a sudden lurch which threw Mr. Robinson to the ground, and the wheel passing over his chest he was so sendenced passing over his chest he was so sendenced by the structure of the struct the wheel passing over his chest he was so severely crushed that he died in half an hour. He was buried on Monday.

Heavy Wind-Storm.

part of the county Sunday night, doing considerable damage.

Leavenworth Cooking Club

[Leavenworth Times.] The cooking club met at the residence of Hon. Alex. Caldwell last evening. Everything that ladies showed a knowledge of the culinary art that was surprising. They are to meet once

Wheat Sowing.

[Kinsley Graphic.] Considerable wheat is being sown by our farmers, who have patiently waited for rain. They are sowing the Odessa variety, which, we understand, can be put in the ground with equal advantage any time between the first of September and the first of March. The acreage sown to wheat in this county will now reach 20,000 acres.

Illegal Tax Sales. [Olathe Mirror.]

Irregularities of all descriptions are being discovered in reference to tax sales by our district court. Tax sales are becoming very gauzy and we shouldn't wonder if the investigations going on before the district court would have a tendency to dampen the ardor of the dealers in tax titles in Johnson county.

Exactly So. [Smith County Pioneer.]

During the winter our farmers should get to gether and tell what they "know about farm ing." Every farmer could give his ideas, and perhaps valuable suggestions, based upon practical knowledge and experience, and a general interchange of opinions, would result beneficially to all. Try it.

Railroad Rumor. | Jewell County Monitor.]

It is rumored that the Central Branch is to be connected with the St. Joe and Denver road, by a line built north from Waterville to Marysville. The distance is about eight miles. The plan is to run the St. Joe and Denver trains west of Marysville into Atchison.

Condition of the Growing Wheat. [Marshall County News.]

The Hessian fly is injuring early-sown wheat to some extent. With this exception wheat looks unusually well, and the copious rains of the past few weeks will prevent winter-killing to any great extent.

Most of the Hay Spoiled.

[Mound City Clarion.] Almost all the hav over the country is spoiled. Supposed to be on account of the warm, rainy weather. This will make feed rather scarce in some parts.

THE BEST IS ALWAYS THE CHEAPEST

Farmers, Look to your Interest

And bear in mind that the best goods are always the cheapest in the long run.

The following are some of the leading goods which

THE GILPIN SULKY PLOW,

Which, for durability, simplicity, ease of man agement and lightness of draught, cannot be excelled.

THE HOOSIER DRILL,

which is one of of the oldest drills on the market is still the boss of them all, and has all of the 'at-est improvements. Farmers will do well in look-ing at same before purchasing a drill, as the Hoosier Drill is the boss of grain drills.

L. BULLENE & CO.

THE SPIRIT OF KANSAS.

LAWRENCE, WEDNESDAY, DEC. 3, 1879.

OUR amiable contemporary, the Prairie Farmer, still keeps guawing its force will be cumulative till it reachaway at that "clean-cut steel file," Commissioner Le Duc. It does this as persistently and courageously as the New York Sun bites the other file, Rutherford B. Hayes. Keep right on vigorously, gentlemen; if you don't plished. The only obstacle to immediharm the file you may ease your bicuss-pids.

OTHERWISE than making frequent extracts from the American Agriculturist, we have never felt called upon to notice specially its merits. A paper so universally known and so well appreciated needs no encomiums from the local press. So long as it keeps abreast of the times, exposes humbugs, and does not lapse from its present high standard of excellence, it will never lack patronage as an advertising medium, and a medium of inspiration and helpfulness to its host of intelligent readers. While the Christmas holidays and the New Year are close upon us we wish to exchange congratulations, not only with this particular journal, but also with all our exchanges which are devoted to the best interests of labor and the laboring classes.

WASHINGTON territory will be knocking at the door of congress this winter for admission. It anticipation of this event a convention has been called and a constitution framed which is soon to be voted upon by the people. By this constitution, if adopted, the state is prohibited from contracting debts for the first fifteen years to exceed \$50,000, and at no time thereafter can she contract debts to exceed \$100,-000. The constitution further provides that all railroads shall be public highways, and shall be alike free to all persons for the transportation of themselves and property under such regulations as the legislature of the state may provide. Under such a constitution railroad corporations will be held in check if they attempt exorbitant charges.

THE spirit of co-operation among farmers has been greatly quickened by means of the organization of the grange, subordinate, state, and National. No opportunity should be neglected to give new vitality to every germ of practical co-operation which has been planted in our midst. The attention of the Patrons of Husbandry should be earnestly directed to the duty of diffusing their principles in a systematic manner. The public mind should be fully aroused to a consideration of the truths and new vitality to every germ of practiprinciples on which our order rests. To accomplish this, measures should be at once taken to increase the influence of our publications, to give them the widest circulation, to place them in the widest circulation. the hands of all who are seeking information on this subject of co-operation. At the same time there should be sent into the field a body of lecturers, who, with the living voice and personal influence, could produce an effect greater even perhaps than the best concerted system of publications. The fact is, that we, who are somewhat inbrued with the greatness of our work, with the importance and utility of the movement now inaugurated, lack the enthusiasm which so grand a g which so grand a cause ought to inspire. If the order languishes it is because those who should be its leaders are asleep at their post, or are dallying with politics, or have some petty scheme of their own to nurse.

THE PRESIDENT'S MESSAGE. There are two subjects that the pres-4dent has handled in his last message which are of special interest to us as publishers of an agricultural and grange paper-one has reference to agriculture, the other to education. In regard to the agricultural interests of the country Mr. Hayes speaks plainly, earnestly and truthfully. He appreciates the value of this pivotal industry of the nation, and makes a manly appeal for a support, ample and ungrudging, for that arm of the government which was instituted, and which has been maintained, inadequately to be sure, but still maintained, in the interest of the farmer, as well as in the interest of the laboring classes generally. We are laboring classes generally. We are state that the agricultural interests of the country demanded a cabinet officer with equal power and equal pay with those cabinet officers to whom are intrusted the control and management of the control and management of the control and management of the conficer well-known men in different parts of the country, and the general lavor with which the idea is received, confirm this judgment.

A constitution and by-laws will be adopted, and officers to the best authorities and officers to the society.

James Calder, D. D., pres't state college, A. J. Alexander Fulton, sec'y state board of immigration, Minn.

H. H. Young, sec'y state boa

the other important departments over which they are placed. To this complexion it must come at last. The curprove the most important gattering even as sets strongly in that direction, and its force will be cumulative till it reaches the end. Farmers will be patient and bide their time, but if we do not entirely mistake their purpose and their determined spirit they will certainly persevere till their object is accomplished. The only obstacle to immediate success in this matter is a want of union, the lise of a spirit of co-operaunion, the lack of a spirit of co-operation one with another and each with all. The wishes and the aims of farmers are identical, but they have not yet so voiced their wishes and aims that they are heard by the dull ears of their representatives in congress. If the grauge, if farmers' clubs, if state and national organizations, of whatever uame or kiud, will stand their ground and do their whole duty in this matter the very next congress will yield to the wishes of their agricultural conthe wishes of their agricultural constituencies and do the work demanded.

Our readers will be glad to read what the president has to say in his message on the two subjects above named. We subjoin it:

AGRICULTURE.

ent burdens. Through the promugation of meaning the promugation of new ideas and the employment of greater labor-saving machinery, his toil may be lightened and his comforts increased. The advantages offered by this country to emigrants must be clearly and torcibly set forth, that our boundless ares may be occupied, our producing capacity increased, and the happiness and comfort of all advanced.

While giring crominence to the fact that our

the leading interest and the permanent industry of our people. It is to the abundance of agricultural production as compared with our home consumption, and the largely increased and highly profitable market abroad which we have enjoyed in recent years, that we are mainly indebted for our present prosperity as a people. We must look for its continued maintenance to the same substantial resource. There is no branch of industry in which labor, directed by scientific knowledge, yields such increased production in comparison with unskilled labor, and no branch of the public service to which the encouragement of liberal appropriations can be more appropriately extended. The omission to render such aid is not a wise economy; but, on the contrary, undoubtedly results in losses of immense sums annually that might be saved through well-directed efforts. might be saved through well-directed efforts by the government to promote this vital inter-

The results already accomplished with the The results already accomplished with the very limited means heretofore placed at the command of the department of agriculture is an earnest of what may be expected with increased appropriations for the several purposes indicated in the report of the commissioner, with a view to placing the department upon a footing which will enable it to prosecute more effectively the objects for which it is established.

effectively the objects for which it is established.

Appropriations are needed for a more complete laboratory, for the establishment of a veterinary division, and a division of forestry, and for an increase of force.

The requirements for these and other purposes, indicated in the report of the commissioner under the head of the immediate necessities of the department, will not involve any expenditure of money that the country cannot with propriety now undertake in the interests with propriety now undertake in the interests of agriculture.

EDUCATION. It is gratifying to learn from the bureau of

common school system of the newer states, but laid the foundations for the maintenance of their universities and colleges of agriculture and the mechanic arts. Measures in accord-

the structure of the discrete of the discrete of the should unite all suffrages, and which should no longer be delayed.

A National Agricultural Society.

The following circular has been received at the secretary's office of the Kansas State Horticultural society with the request that it be published in our state journals. G. C. BRACKETT,

A Little Sorghum Boom. [Special Dispatch to the Chicago Tribune.]

WASHINGTON, Nov. 23 .- Dr. Collyer, the chemist of the agricultural department, referring to the experiments which have been made in making sugar from Indian corn and sorghum, said, to-day: "If congress will give me ten acres of ground to experiment on next season I will return twenty tous of raw sorghum sugar fully equal to the best raw cane sugar or forfeit my reputation-that is, two tons to the acre, and is a much better result than they reach on the average in Louisiana with the sugar-cane. The corn crop of Illinois, for example," said Dr. Collyer, "is worth about \$75,000,000 annually. If they will devote one-tenth of the acreage to sorghum, of the variety best suit ed to that latitude, they can raise sugar in amount equal to our whole annual importation, which is about \$109,000, 000 worth, and even this will only equal 50 per cent. of the most favorable of my experiments. The secret," he continued, "now that the method of crystal-

"What is the total cost of production?" the doctor was asked.

lization is understood, is simply in the

time to gather the crop, and in this re-

spect my experiments are complete and

conclusive."

"Well, on that point, I can't speak so definitely; but I see no reason why it should exceed three cents a pound. Raw sugar now costs a fraction more than six ceuts a pound, but about 45 per cent. of that is for duties. We can certainly raise sugar from sorghum much cheaper than we can buy it abroad."

"How about the extent of territory adapted to the growth of sorghum?"

"Therein is the great advantage. All through this central belt of the states, and well into the North and South, sorghum can be grown with ease. I would not, for example, send the Early Amber to South Carolina, but would select a variety best adapted to that climate. The advantage of the Early Amber which is the species from which the successes in Illinois have been gained, is that it matures before the season gets too far past. In Louisiana it takes nine, and sometimes twelve, months' close at tention to the sugar-cane crop to bring it to a success. The cane, anyway, is not indigenous to Louisiana, but is an exotic."

General News.

Forty-five thousand American house doors were shipped to England the other day on one steamer.

In the whole United States there are 4.400 banks, with \$505,327,832 capital and \$1.242,773,903 deposits.

A cheap and simple piece of machinery has just been invented and is in operation at Westcheser, S. C., which pins seed cotton into thread. It is claimed that this invention will add 100 per cent. to the profit of the planter, as it saves him the expense of ginning, baling, bagging and ties.

Superintendent Walker says he will complete the work of taking the national census in one mouth (June) next year, and that the total cost will be about \$3,000,000. About 20,000 persons will be employed. General Walker has the plan of his work all mapued out, and there is universl confidence ex-pressed in his ability to do all he pro-

Great blocks of stone are being quarried at Middletown, Conu., for W. H. Vanderbilt's new house in New York City. Some of them weigh fifteen tons, and on one are the tracks of a prehistoric animal whose foot from heel to toe must have been fifteen inches in length, and which made a stride of more than four feet at an ordinary gait.

like it because it is sweet; Mothers like Castoria because it gives health to the child; and Physicians, because it contains no morphine or mineral.

Thanksgiving at Haw Valley.

EDITOR SPIRIT :- A supper was held on Thanksgiving night under the auspices of the Ladies' Industrial society of the M. E. church Although this organization is but in its infan ey, it is doing excellent work. Notwithstanding the unfavorable turn in the weather, quite a good crowd assembled to partake of the good things that work in the weather of the good things that were in processing the unfavorable turn in the weather, quite a good crowd assembled to partake of the good things that were in the weather of the good things that were in the weather of the good that wall previous quotations on Levin 1999. a good crowd assembled to partake of the good things that were in store for them. During the day a large tent had been erected on the grounds. Inside of it the tables were spread, which fairly grouned under their weight of good things. A cake was offered for the prettiestyoung lady present, to be decided by votes at five cents each. Miss Laura Thomas having received the highest number of votes was conceded the handsomest young lady in the house, and a committee was appointed to deliver the cake to its owner, which was gracefully received. Three bundred and seven votes were -ceived. Three bundred and seven votes were cast, amounting to \$15.35. There being quartities of provisions left, by vote it was decided to hold a supper on the next evening.

The receipts of the evening were \$38.43 Adjourned to meet Friday evening at 7 o'clock. SECOND EVENING.

At quite an early, hour, the weather being propitious, the people from far and near were seen wending their way to the school-house. The supper being very desirable, the tent became a popular resort. The dandy stand, under the management of Mr. Wm. Hughes, was a decided success. But when it was announced that a cake was to be sold to the best looking young man every one became doubly interested in that transation. The first ballot announced Messrs. Osear Cox and Lincoln Walters as having received the highest number of votes, and they were declared the candidates for election. The triends of the parties rallied to the front; money was freely given; excitement became at fever heat, Cox at one time receiving one hundred votes. At last the result was announced. Six hundred votes were cast -Walters receiving 320, Cox 280. Mr. Walters was declared the handsomest man, and Cox was made to exclaim, "Gone to a handsomer man 1" This \$30 cake was in due torm handed to the winner, who responded in a neat little speech. A second cake was sold to the highest bidder. Mr. Watson Sperry paid one dollar and bore it away in triumph.

A vote of thanks was tendered the Misses McGee for the excellent music which they

THE HANNIBAL AND ST. JOE.

How Watches are Made.

It will be apparent to any one, who will examine a Solid Gold Watch, that aside from the necessary thickness for engraving and polishing a large propertion of the precious metal used is needed only to stiffen and hold the engraved portions in place and supply the necessary solidity and strength. The surplus gold is actually needless so far as utility and beauty are concerned. In JAMES BOSS'S PATENT WATCH CASES this waste of precious metal is overcome, and the same solidity and strength produced at from one-third to one-half of the usual cost of solid cases. This process is of the most simple nature, as follows: A plate of nickel composition metal, especially adapted to the purpose, has two plates of Solid Gold soldered one on each side. The three are then passed between polished steel rollers, and the result is a strip of heavy plated composition, from which the cases, backs, centers, bezels, etc., are cut and shaped by suitable dies and formers. The gold in these cases is sufficiently thick to admit of all kinds of chasing, engraving and enameling. The engraved cases have been carried until worn perfectly smooth by time and use without removing the gold.

This is the only case made with two plates of oil gold and warranted by special certificate.

The above is what the Gardener's Monthly says. Its able editor is so careful a writer, and withal so accurate in his statements, that his "dictum" must have great weight with fruit growers. If in this decision of his he through "The Household." strikes at the root and truth of the matter, as we are inclined to think he does, good fruit in Kansas will renew their color. courage in respect to the raising of this blighting scourge of the pear tree and will carefully apply it.

Plants and Plant Food

Some plants are surface feeders, i. e., numerous, and only penetrate the upper portions of the soil, as in the case of the onion, turnip, and cereals, though of crops, and the application of fertilland, it tends downward, and its descent depends wpon the solubility of the substance and the porosity of the soil. To have, therefore, the least loss and pacity that the clover crop is so valuathe roots of the plant, and it can best be done by applying it to a surface-feeding crop, and follow it up (down rather) by a deep feeder, the roots of which culturist.

The Household.

The Right Kind of a Boom. The Times pays a handsome compliment to the young ladies of Leavenworth for their sensible and enterprising spirit manifested in the organization of a club for the promotion of good cooking. Good cooking we regard as one of the foundation-stones of a happy home. No home can be a happy one without the very essential requisite of a department of good cookery.

The First Requisite of a Pleasant Home

"How to make home pleasant"-yea verily, that is the question. If an old "bach." is permitted to intrude himself into the company of the "debating society" of "The Household" he would say, to have a pleasant home a man must have a wife; this he considers an indispensable adjunct. Without this corner-stone on which to lay the foundation of a home, no superstructure will be either useful or ornamental. It would be like building on the sand, one might say. A home without a wife would be a shadow without the substance. The cold winds of adversity, the pelting rains of discontent, the who gives his whole soul to temperance when he is being drawn on as if by fate sifting snows of old age, would beat work. No one who makes that remark to his own destruction if he is taken upon such a home, and it would be can have seriously thought of the mis- kindly but firmly by the hand, just as

It is in this ca- tinually warning them of the inevita- lives, with no hope this side of the ble train of disasters and evils conseble in a rotation. It is a great point to quent thereon? If we wish to know says one who has never been tried. "I keep the plant food within the reach of who is the most degraded, and the most wretched of human beings, look for a man who has practiced this vice so long that he curses it and clings to it; that he pursues it because he feels an evil penetrate far down.—American Agri- spirit driving him on toward it, but, reaching it, knows that it will gnaw his heart and make him roll in the dust done!" One more remark on this subject and I close: Beware of "this once;" it has led its thousands to ruin.

I will give a temperance song:

THE RUDDY WINE! THE RUDDY WINE!
Look not upon the ruddy wine
That sparkles in the glass,
While sitting with a friend of thine,
The social hour to pass;
For though th'indulgence harmless seem,
And thou mayst feel secure,
Yet ruin both to thee and him
May in the end be sure.

Think not that thy example will Be harmless or unknown.
For thousands may its influence feel And be by it undone—
As smitten by the viper's sting,
Or adder in the path,
Till horrors, like destruction's wing,
Lead to eternal wrath!

Look not upon the ruddy wine
That sparkles in the glass,
But let example round thee shine
To men of every class
In favor of that noble cause
Which needs thy hand and seal,
In favor of the injured laws
Thy influence may heal.

AUNT SALLY. BURLINGTON, Kans., Nov. 25, 1879.

Farm and Stock.

Roots for Stock.

The good farmer will try to provide a store of roots for his stock in winter. are all valuable for keeping up a healthy condition of his cattle in the winter hay which is fed out in cold weather to stock is not sufficient of itself to keep cows and young cattle in a thrifty condition. To this fodder must be added, occasionally at least, a moderate secure the most healthy condition of feed (which is money) is saved.

Frogs for the Market.

And now steps forward a Mr. Soule, of Elgin, Ill., to tell what he knows about frogs. Frogs are amphibious animals; they live sometimes in the water and sometimes on land. Frogs are of the genus Rana, and have four feet, a naked body, and no tail. When quite young they have tails and are called tadpoles, or, as the poet has it:

> Dweller in the watery bog, Embryo, prototypic frog— Wiggling, waggling polywog, Wiggle waggle, waggle wiggle.

This fixes the name of polywog. Frogs are remarkable for swimming swiftly in water and for taking long leaps on land. The water and land occupied by Mr. Soule's stock of frogs has an area of 54,450 square feet. His stock, great and small, counts up 2.400,000, or 45 and a fraction to each square foot. This might seem almost incredible were it not for the fact that this species posits itself one above another in stratified layers. This is said to be not an unnatural position for the "Goslin frog," which is the name of this species. The name is derived from the known circumstance that this frog catches and eats young goslins. This is not strange since this kind of frog weighs on an average from two to three pounds, thus exceeding in size five or six times our common scalawag stock: Taking the minimum weight of this frog (2 pounds each), there would be raised on this acre and a quarter no less that 4.900,500 pounds of frog. Mr. Soule estimates the value of this meat per pound at only one-half a cent. This certainly is a very moderate price (only fifty cents a hundred) for fresh meat. But he expects, not without reason, to supply the markets of Chicago, St. Louis and Cincinnati, so that even at this very cheap rate he will realize \$80,000 per annum on his business. Mr. Soule ob tains his frog seed from Canada. It is of the choicest kind known, and five out of every six of the spawn is certain to hatch. Though Mr. Soule comonly fair to state that the half cent per hand, should corn be selling for forty could hardly afford to cut up and sell more profitable to sell the pork. at retail at this low figure.

"Thoroughbred animals are not for sands of grade cows which will surcalves, and select the best of these to pork which it makes.-ED. SPIRIT.] breed from pure-bred males again. But only a strictly pure-bred bull, of the best kind, and from an excellent cow should be used. A vast improvement must be made in our dairy cows before the most profit can be made from them. The same is true of sheep and pigs."

Corn and Pork.

A correspondent propounds a question or questions, which are often asked, and that is, how many pounds of pork will a bushel of coru make, and what then is the relative worth of the pork and corn. The result of experiment has shown that fifty-six pounds of corn (a bushel) will make ten and a half pounds of pork. A little less than four pounds of cooked corn meal makes one, pound of pork. Throwing off one-fifth from the weight of the hog, in order to come at the net weight, we have eight and two-fifths pounds of pork as the result of feeding one bushel of corn, or one pound of pork from six and two-thirds pounds of corn, assuming that the calculation is all right. Waring has given a table showing the relation which the price of corn bears to that of pork:

Corn per bushel.	Pork per pound.

A Gold Mine in a Cow.

One of the remarkable cows on record is the "10th Duchess of Airdrie." owned by the Hon. Matt. Cochran, which has just given birth to her ninth calf, a red heifer, to be named the "8th Duchess of Hillhurst," by the Duke of Oneida. Of the 10th Duchess and her daughter calves, Mr. Cochran has sold the following animals at the prices named: In the winter of 1875 the bull calf 4th Duke of Hillhurst, at \$7,000; at public auction in Toronto, June 16, 1875, the bull calf 5th Duke of Hillhurst, two months old, at \$8,000, and the heifer Airdrie Duchess 5th, eight months old, \$18,000; at auction sale at Toronto, June 14, 1876, the cow Airdrie Duchess 2d, at \$21,000, and the heifer Airdrie Duchess 3d, at \$23,000; in August, 1877, privately, the heifer 6th Duchess of Hillhurst, at \$12,000; and at public sale at Bowness, Windemere, England, September 4, 1877, the heifers 3d Duchess and 5th Duchess of Hillhurst, at 4,100 and 4,300 guineas each, or \$20,500 and \$21,500 respectively, making a total of \$131,000 for eight animals sold. He has still in his possession, besides the 10th Duchess, Airdrie Duchess 4th, 7th Duke, and 7th and 8th Duchess of Hillhurst, five animals, and has lost four animals by death. The above result has perhaps never been equaled by any one animal at the same age. In December, 1875, an offer of \$25,000 for the 10th Duchess was refused, and the same for her daughter. Airdrie, Duchess 4th. Since then the old cow has brought three heifers and one bull; two of the heifers have been sold for \$33,500, and there still remains the bull and the heifer just dropped, The breeder can make the above table besides the dam, who will probably menced business on a small scale only very useful. If, for instance, corn is breed a number of calves yet.-Nova

Hog Cholera.

This disease is by no means an Amer ican disease as is generally supposed. It is now prevalent in several places in England, and many districts where it occurs are isolated by the local authorities, in accordance with law. The affected animals are slaughtered, and an attempt is thus made to prevent the spread of the disease. Unfortunately this stamping out process is remarkably ineffective, and year after year the losses. The only advantage from it seems to be to shift the loss from the shoulders, or pockets, of the owners of diseased stock to those of the public. The results of these long-continued efforts to eradicate the disease by the English government are well worth considering with reference to a similar course suggested here .- American Agriculturist.

Backing.

is selliged by 8.40 would give 37.8 cents at the price of corus, we may find our work the present year has repaid us for many past poor ones. There are exceptions here, as in all other business. Until recently dairying was discouraging indeed, but with the advance in prices to more than double the rates current only three months ago cheerfulness has succeeded to despondency.

"The promise for the next year is also recently for the control of wheat has been sown, and the weather has been favorable for its growth. Indeed, in some cases, the wheat and rye are too vigorous, and if warm weather occurs with rains this selections."

Veterinary Department.

Œdema.

Please let me know what causes suckling to swell from the pastern up to knees and hocks in all the legs; what remedy?

ANSWER.-Various causes often combine to produce swelling of the extremities. Every cause that will produce a general debility will bring about that result. Treatment: In an animal so young it is doubtful if a cathartic would be expedient; therefore, we would recommend giving a diuretic, say half an ounce of sweet spirits of niter twice a day until the kidneys act freely; after that result has been obtained, give fifteen grains of sulphate of iron daily for a week, also half an ounce of cod-liver oil.

Ulceration.

I have got a mare; she is quite speedy. About two months ago she had two sores break out on her legs-one below the knee joint, and one above the ankle oint on the other leg. They are on the outside of the forward legs. They run all the while. Her legs are not large as a five-cent nickel piece. I have given her salts for her blood first, and lso condition powders, and have used liniments on them to no use. Now if you can prescribe for me, through your columns, I will be very much obliged

ANSWER .- We suspect the animal's blood is in a bad condition, and as soon as the skin becomes abraded, the foundation is laid for a suppurating sore. Treatment: Prepare her by feeding upon bran mashes for two days; then follow with seven drachms of Barbadoes aloes, pulverized, and one drachm of ground ginger root, mixed, made into a ball and given in the morning before feeding. Wash the sores thorof ground ginger root, mixed, made before feeding. Wash the sores thoroughly with warm water and castile soap, dry with a sponge, and cauterize the raw surface once a day with caustic potash until the discharge ceases, after which, you need only to bathe the wounds with tincture of aloes. It will facilitate recovery by giving, as soon as the purging ceases, one ounce of sulphite of soda morning and night, in soft feed .- Turf. Field and Farm.

45,000 ACRES

UNIVERSITY LANDS.

FOR SALE ON LONG TIME

These lands belong to the university of Kansas These lands belong to the university of Ransas. They comprise some of the richest farming lands in the state, and are located in the following named counties: Woodson, Anderson, Coffey, Lyon, Wabaunsee and Allen. They have been appraised by authority of the state, and will be sold at \$3 to \$8 per acre, according to quality and nearness to railroad stations. Terms, one-tenth down and remainder in nine equal annual installments with interest.

For further information apply to V. P. WILSON, Agent University Lands, Abilene, Kansas,

W. S. Riley's Alterative Renovating Powders.

These powders prove an invaluable remedy in all cases of inflammatory actions, such as coughs, colds, influenza, bronchitis, nasal catarrh, nasal gleet, indigestion and all derangements of the stomach and urinary organs, and for expelling worms. These powders are the only blood and liver renovater now in use and only prepared by Dr. Riley, who has spent much time and money searching out roots and herbs for the benefit of our domestic animals. Every farmer, stock raiser and drover should use them. It produces a fine, glossy coat and frees the skin from all dandruff, and leaves your animals in fine spirits after you stop feeding them. All powders warranted to give satisfaction.

Steamship "Lessing," from Europe, brought over \$2,475,750 in gold coin. A man has just been arrested in

Tennyson and Carlyle are both in-

veterate smokers, and both suffer from dyspepsia. The Pottsville (Pa.) Iron company has added forty cents a ton to its pud-

dlers' wages. Sixteen tons of European gold have been landed in New York in a single

week recently. Of the thirty-eight states composing

the Union, only twelve hold annual legislative sessions. The experiment of steam-towing on the Erie canal, by the Belgian cable sys-

tem, appears to have been a success. Mr. Edison, it is reported, is prepar, ing to light the Cheney silk works and the village at South Manchester by

A Richmond, Ill., man made in one year from 100 hens \$130 net profit, besides supplying eggs and poultry for

house consumption. The coal miners of this city and the Stratsville, Hocking and Shawness regions have inaugurated a strike against a reduction of wages.

A fluid cannot be heated above the boiling point at the ordinary pressure of the atmosphere; to increase the heat above that point a close vessel is neces-

The excitement throughout the wes of Ireland shows no sign of abatement Large meetings are being held in al popular places in counties Mayo and

Sligo. There are many men who appear to be struggling against adversity, and yet are happy; but yet more, who, al-though abounding in wealth, are mis-

All priests in the arch diocese of New Eugland are advised by the pope to at once establish parochial schools and once establish parochial schools and threaten the parents who refused the terrors of the church, wherever the in-

fluence of public schools is thought to be particularly injurious to the Roman Catholic faith; and the priests are or-dered to withdraw children at once, even if there be no parochial schools in the vicinity.

The largest train ever known, consisting of 123 loaded cars and two en-gines, lately passed through Binghamton. The freight business on the Erie is very heavy.

About half a million pounds of American beef started for England yes-terday and more than three-quarters of a million dollars in gold came in. "And thus be it ever."

Seven cents will get a bushel of good coal in Greensboro, Ky., and ten cents will get an average toddy, and a good many seem to think that more warmth results from the ten than the seven cent investment.

The Reformed church at Holland, Mich., has decided not to receive a man as a member of the church who belongs to the Free Masons, and has provided that no such person can receive the Lord's supper.

The New York Herald opposes hanging-thinks this is too barbarous a manner of executing murderers for this age of the world-and favors killing them with a heavy charge of electricity— sending them across Jordan by telegraph, as it were.

Many persons are puzzled to understand what the terms "fourpenny," sixpenny," and "tenpenny" means as applied to nails. "Fourpenny" means four pounds to the thousand nails, or "sixpenny" means six pounds to the thousand, and so on.

Some caverns of prehistoric times have been discovered near Stramburg, in Moravia. The objects which they contained are said to prove beyond a doubt that these caverns were inhabited by man in the remote ages, contemporaneously with the mammoth and cave yesterday (for 23 Colorado half-breed steers bear.

This is going to be a winter of rigid economy at Washington. Each party has made up its mind to beat the other party on this point and get whatever advantage there may be in it for use in the coming presidential fight. All jobs and schemes to get at the public treasury may as well be folded up and laid away until next year's fight is over, and then the party which winsand no matter which-will feel more There is always an overwhelming show of reform preceding the presidential election .- Philadelphia Times.

ST. JOSEPH, Mo., Nov. 29.- Jay Gould's great railroad programme is being gradually unfolded and made plain to the auxious public. The St.

Joseph and Denver, which has been exwith the Union Pacific, is to have another extension of much greater importance. Gould and his associates having purchased that portion of the Central Branch which lies west of Waterville, it is to be extended westward along the south fork of the Solomon river, through the counties of Graham and Sheridan, to a connection with the K. P. road at Monument, and the gap twenty miles between Marysville and Waterville is to be built at once, through line to be operated as the St. February. In Kansas City No. 2 is \$1.171 De-Joseph and Denver. Waterville, on the Central Branch, and Monament, on the January. Kausas Pacific, are beyond the points sidy for the construction of these roads, Philadelphia for voting eight times in and in the formation of this new line it avoids the subsidized portions of both of these roads, and they avoid paying the government any percentage on the business done. It is positively known that an agent of the Gould interest has purchased the old road-bed and right for the purpose of extending the Missouri Pacific to this city. The grading is to be repaired, and the track laid as soon as possible. Thus St. Joseph is to date and commencing November 1. be the terminus. It has been understood for some little time that the A. & N. is to change its track, running from Gould's bridge at this place is evidently to be made a paying instrument.

SEWING MACHINE.

See what it will do without Basting

It will sew over uneven surfaces as well as plain. It will sew over seams in any garment without making long or short stitches, breaking of thread or puckering the lining of the goods at the seam, requiring no assistance from the operator except to run the machine and to guide the work—a point which no other machine possesses.

It will sew a curved piece on a straight one, or tree curved except to get the content.

curved edges together.
will make wide and narrow hems, and bem two curved edges together.

It will make wide and narrow hems, and hem all kinds of woolen goods, such as soft merino, or goods difficult to hem on other machines.

It is the only practical machine for hemming bias alpacas, poplins, muslins, and other similar goods, without basting, and it is the only machine in the world that will turn a wide hem across the end of a sheet without fulling the under or upper side of the hem.

It will turn a hem and stitch on trimming at one operation

It will turn a hem and sew in a fold at one opera-

It will do felling, bias or straight, on any cotton or woolen goods.

It will bind dress goods with the same or other material, either scallops, points, squares or

material, either scallops, points, squares or straight.

Bind folds without showing the stitches and sew on at the same time.

It will put on dress braid and sew in facing and a bias fold at one operation, without drawing either dress, braid or skirt, and without showing the stitch on right side.

Make French folds and sew on at the same time. Fold bias trimming and sew on at one operation. Make millipers' folds with different colors and pieces of goods at one operation and sew on at the

pieces of goods at one operation and sew on at the same time.

It will sew in a sleeve, covering a cord and stitching it into the seam at the same time.

It will gather between two pleces and sew on at

the same time.

It will make and sew a ruffle on any part of a dress kirt and sew on a bias fold for heading at one operation, showing the stitches on the right side.

It will gather and sew on a band with piping between raffle and band at one operation.

Make plaited trimming, either scalloped or
straight and sew on a band and edge stitch the
band at one operation

It will, with one operation for each variety, without basting execute 20 practical varieties of ruffling, being 12 more tran can be produced on any
other machine with same number of operations.

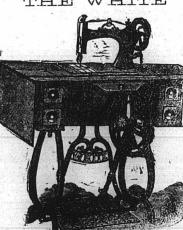

It will make a more elastic stitch than any other
machine.

machine.
It sews from lace to leather without changing stitch or tension.
For tucking, cording, braiding, quilting, embroidering, shoe fitting, dress making, tailoring and general family use or manufacturing it has no equal.

Sewing machines repaired.

JUSTUS HOWELL, Agent, No. 138 Massachusetts street, Lawrence, Kans.

THE WHITE

This machine possesses more advantages and satisfies those who use it better than any other machine on the market. We beg to call your attention to a lew of the many advantages combined in it: First—It is the lightest running shuttle sewing machine.

machine.
Second—It has more capacity and power than any other family sewing machine.
Third—It is not complicated with cog-gears nor arge cams.
Fourth—It is the simplest and best constructed

machine.

Fifth—Its working parts are case-hardened iron or steel, and so arranged that any wear can be taken up simply by the turn of a screw.

Sixth—It has a steel leed on both sides of the

aken up simply by the turn of a screw.

Sixth—It has a steel leed on both sides of the needle.

Seventh—Its shuttle is comparatively self-threading, made of solid steel, and carries a larger bobbin than almost any other family sewing machine.

Eighth—Its works are all encused and tree from dust, and so arranged that neither the garment being sewed nor the operator will become oiled.

Ninth—It has a device by which bobbins can be filled without running the entire machine, thereby relieving it from wear for this purpose, as also relieving the operator of the necessity of removing the work or attachments, as is the case in nearly all other machines.

Tenth—It is elegantly ornamented and finished, and its cabinet work is unsurpassed.

The result of this combination is the "WHITE." the most durable, the cheapest, best and largest family sewing machine in the world.

If you need a machine try it. You will like it and huy it. Agents wanted.

Needles and supplies for all schines. Singer sewing machine at \$20.

In the Court of \$6000 A YEAR, or \$5 to \$20 a day in

\$1500 TO \$6000 A YEAR, or \$5 to \$20 a day in \$1500 TO \$6000 A YEAR, or \$5 to \$20 a day in as well as men. Many make more than the amount stated above. No one can fail to make money last. Any one can do the work. You can make from 50 cents to \$2 an hour by devoting your evenings and spare time to the business. It costs nothing to try the business. Nothing like it for money making ever offered before. Business pleasant and strictly honorable.
