FARMERS MAIL

AND BREEZE

Vol. 44.

May 23, 1914

No. 21.

Tom McNeal

MR. McNEAL didn't know this photograph would be used on the cover. Ostensibly it was made for the office collection, but actually because it was believed every reader of the Farmers Mail and Breeze would like to see a picture of the real Tom McNeal. So there he is, just as the photographer caught him at his desk. Mr. McNeal hasn'tseen his desk for many years. It is covered, a foot deep, with letters from friends, mostly farmers, in every part of Kansas. Tom keeps his old letters as he keeps his old friendsclose to him.

Don't Leave Money In The Straw Pile Grain in the straw stack represents real money lost. Why should you lose your profits this way? You worked hard and spent lots of time raising and harvesting it. Hire a **Red River Special** And Save Your Thresh Bill And Save Your Thresh Bill S. E. Brady and three other farmers of Deering, North Dakota, say: "We want nothing but the Red River Special to thresh for us. It saves our thresh bills." Instead of expecting the grain to drop out of the straw, the Red River Special beats it out just as you would with a pitchfork. The saving is more than enough to pay your thresh bill. Hire a Red River Special this year and keep your profits out of the straw pile. Write for "Thresher Facts." Big Pay II You Become

In practically every town and city in the United States there is a big demand for men well trained in all lines of the Automobile business. Many of our students earn from \$25 to \$50 or more per week as drivers, repairmen, garage managers and salesmen.

managers and salesmen.

Learn All About the Auto Business in 3 to 6 Weeks at MySchool

I claim that no other school in America can
give you the same complete training in all departments of automobile work that you can secure at my school—and you will find my tuition
rate just about half the price that is asked by
other schools. Complete course in Tractor Motor
Engineering absolutely free of any additional cost
when you enroll for my regular course.

Send your name and address on a
post card for full particulars describing
my school and the practical training,
that you can secure here. I have no
live practical, personal instruction to each student. Send for my
attractive proposition at once.

Alfalfa Harvest is Ready

But Good Haying Weather is Holding Off-Other Crop News

By Our County Correspondents.

NLESS rains interfere alfalfa cutting will be in general progress in Kansas next week. In Oklahoma haying is well under way and the first car new alfalfa from that state was sold in Kansas City Saturday of last week. It graded No. 1 and brought \$14.50 a The prospects are that this cutting will be one of the best first crops of alfalfa this section has harvested in many years.

The showers early this week were discouraging for having weather but every other crop except cut alfalfa need-

There are still a few Kansas counties not now represented in the Farmers Mail and Breeze crop reporting service. It is our object to have one well-informed correspondent, actively engaged in farming, in every county. A report, similar to those appearing on this page, is to be sent in about every other week. We shall be glad to hear from any reader who is in a position to do this work and who cares to take it up. Applications will be acted upon in the order in which they are received. The remaining names will be placed on file to be drawn upon in case of future vacancies. Correspondents are needed in these counties only: Edwards, Ellis, Haskell, Kearny, Lane, Neosho, Wabaunsee, and Wallace.

ed the moisture badly. In the east and east central parts of the state the ground had dried out rapidly the past week or two, and cracks were beginning to appear in fields not continuously worked. Apparently the western half of Kansas has received more moisture this

Sedgwick County — Conditions favorable for a full wheat crop. Alfalfa and oat crops also look promising. No bugs in this locality.—J. R. Kelso, May 18.

Labette County—Wheat and oats looking fine. Wheat is heading out. Severe windstorm May 11 damaged a number of buildings.—Wilbert Hart, May 16.

Grant County—Farmers are hurrying to get crops in. Prospects are fine. Weather cool but plenty of moisture in the soil. Wheat looks fine.—J. L. Hipple, May 14.

Ford County—Wheat looking fine and prospects are good for a bumper crop. Spring crops a little backward. Cream 20c 18ggs 15c; hogs \$7.50.—G. S. Greger, May 14.

Greeley County—Weather cold and rainy he last two days. A bad frost on May 13. Irass is fine and cattle are doing welliggs 15c; butter fat 21c.—F. C. Woods,

Wyandotte County—Wheat doing well.
Potatoes nearly all up. Corn growing slowly.
Frost on May 14 killed tender vegetables.
Fruit prospects generally good.—G. F. Espenlaub, May 15.

Crawford County—Fine growing weather. Corn cultivation is in order. Wheat and oats continue to look well. Alfalfa is about ready to cut and a heavy crop is expected.

—H. F. Painter, May 16.

Lincoln County—No rain since May 2. Stock looks good but grass is short and thin. Wheat about ready to head. Corn nearly all planted but is making slow growth.—E. J. G. Wacker, May 12.

McPherson County—Wheat and oats look fine. Corn doing as good as can be expected. Fine crop of alfalfa will soon be harvested. Many colts this spring. Wheat 82c; corn 72c; oats 42c.—M. D. Waldo, May 18.

Chautauqua County—Good rains all over the county. The first cutting of alfalfa is being put up. Some farmers are having to replant crops on account of hard rains, hall, for cotton.—H. S. Waters, May 15. insects and crows.—F. B. Mantooth, May 18. insects and crows.—F. B. Mantooth, May 18.

Washington County—Farmers busy planting now. Wheat, oats and alfalfa looking fine. Good prospects for peaches and cherries, but apples will not make a good crop except where sprayed.—Mrs. Birdsley, May

Kiowa County—Wheat is very promising. Plenty of rain but the winds and cool weather have not favored the growth of corn, which is very sickly. Pastures are not very good owing to the dying out of much of the bluestem grass last fall.—H. E. Stewart, May 16.

Butler County—Wheat prospects are the best ever. Some corn washed out by heavy rains. Pastures are good but there is not enough stock to fill them. Fat hogs \$7.75; oats 44c; corn 75c; eggs 15c.—M. A. Harper, May 13.

May 13.

Norton County—Wheat is very good. Corn about all listed. Large acreage of fodder crops going out. Alfalfa is very good. Poor spring to sow sweet clover and alfalfa seed. Hay is scarce. Baled prairie hay \$17.50 a ton.—Sam Teaford, May 15.

Pawnee County—Fine rain May 16. Wheat commencing to head. Corn nearly all planted. Acreage below the average. Oats and barley show condition of about 50 per cent. Hog buyers busy. Wheat 83c; corn 83c; eggs 16c.—C. E. Chesterman, May 18.

16c.—C. E. Chesterman, May 18.

Cowley County—Wheat never looked finer. Oats are good. Corn is up and stand is good. Elephant bugs are doing some damage. No chinch bugs. Some early planted kafir being replanted. Eggs 16c; butter fat 21c.—Hale C. Thurber, May 15.

Greenwood County—Crops nearly all in. Corn is in good shape but the weather is too cool for it to grow much. Alfalfa doing nicely and it is almost ready to cut. Pastures very good. Corn 80c; potatoes \$1.20; eggs 16c.—E. E. Rardon, May 16.

Sheridan County—Plenty of rain since

Sheridan County—Plenty of rain since May 1. Crops of all kinds growing at top speed. Corn planting nearly finished. Kafir seed scarce and hard to buy. Early wheat stands at 100 per cent and late sowings at about 75 per cent.—R. E. Patterson, May 11.

Sumner County—Plenty of rain and crops are growing rapidly. Wheat heading out. First crop of aifalfa being cut. Corn and kafir acreage small. Some calves dying with blackleg. Wheat \$2c; corn 80c; oats 43c; alfalfa hay \$13.—E. L. Stocking, May

Scott County—Foggy, damp weather. Too cold for corn and garden truck. Most of corn is planted and a large acreage of fodder crops will be planted. Pastures better than for years at this time. Many colts, calves and pigs coming on. Wheat looks fine.—J. M. Helfrick, May 16.

Harvey County—Wheat is in very good condition and is making a rapid growth Livestock doing fine. Had a frost on night of May 12 but no damage except where mulching was used. Hogs \$7.50; spring lambs \$7; eggs 15c; hens 11c.—H. W. Prouts, May 15.

Dickinson County—Weather cool and dry.

Dickinson County—Weather cool and dry. Potatoes and tender garden truck damaged. Early planted corn shows a good stand, but that planted just before the rain is badly crusted and not coming out good. Wheat looks good and is just starting to head. Oats doing well but need rain.—F. M. Lorson, May 16.

worked. Apparently the western half of Kansas has received more moisture this spring than the east half.

Frost last week is reported to have done considerable damage to early corn and gardens. Potatoes in the Kaw valley were badly nipped.

KANSAS.

Sedgwick County — Conditions favorable for a full wheat crop. Alfalfa and oat crops also look promising. No bugs in this locality.—J. R. Kelso, May 18.

Oats done County — Frost on May 14.

Pottawatomic County — Frost on May 14.

Oats doing fine. Some corn will come out again. Oats doing fine. Some corn will be listed this week. All corn up shows an excellent stand. A number of fruit trees and maples dead from last summer's drouth. Big aereage of kafir.—S. L. Knapp, May 16.

Geary County—Crops are growing fine but a good rain would be welcome. Corn planting about finished. Some early plantings being replanted on account of poor stands. Wheat not hurt much and it is starting to short. Wheat \$1c; corn 78c; oats 47c; eggs short. Wheat \$1c; corn 78c; oats 47c; eggs 14c; fat hogs \$7.50.—O. R. Strauss, May 16.

Marion County—A light frost this week

Marion County—A light frost this week did a little damage. A good crop of alfalfa is almost ready to cut. Corn came up fairly good but doesn't look very healthy. Some farmers are through disking their corn the first time. Oats looking very good. Wheat looks well on the average but some fields were badiy damaged by the fly last fall.—Jac. H. Dyck, May 16.

Woodson County—Corn all planted and kafir and cane nearly all in. Corn is growing slowly but stand is good generally. Wheat looks fine. Chinch bugs numerous in oats. Alfalfa will soon be ready to cut. Pastures good and stock doing fine. Potatoes doing well and fruit crop looks fine. Hogs \$7.75; corn 77c; oats 45c; eggs 15c.—E. F. Opperman, May 15.

Rush County—Early sown wheat begin-

E. F. Opperman, May 15.

Rush County—Early sown wheat beginning to head and shows a condition of 105 per cent. Late sown barley looks fine. Early plantings of corn show a good stand. Alfalfa on the lowlands is about ready to cut. Potatoes coming up nicely. Some prairie pastures damaged by drouth of last summer and freezing and thawing of the winter. No pests so far.—J. F. Smith, May 16.

Gray County—Three fine rains in one week, the last one coming on May 1. Wheat crop is certainly fine. Oats and barley are also good. Pastures could not be better and stock is thriving. Two new elevators being built here. A number of tractors and horse drawn plows are breaking sod in this locality. Wheat 81c; corn \$1.50 cwt; eggs 15c; butter fat 21c.—A. E. Alexander, May 16.

OKLAHOMA.

for cotton.—H. S. Waters, May 15.

Delaware County—Weather cool and cloudy this week. Most corn is up and the stand is fair. Wheat is heading out and prospects for a crop are good. Oats look fine.—Frank Rock, May 16.

Mays County—Corn about all planted, and acreage is small. A lot of cotton being planted. Wheat is the finest in years and acreage is large. Oats look fine. Eggs 20c; corn 75c.—L. A. Howell, May 11.

Dewey County—Spring work well along.

Saline County—Wheat is in the best of condition. Most farmers had to replant their corn on account of a hard surface crust. Rye looks good. Potatoes and alfalfa damaged by the frost.—Geo. W. Holt, May 17.

Graham County—Wheat is doing fine. In another week the corn will all be planted. All small grains looking good. Alfalfa crop will be heavy. Pastures exceptionally good and livestock doing well.—C. L. Kobler, May 16.

Klowa County—Wheat is very promising. Plenty of rain but the winds and cool weather have not favored the growth of corn, which is very sickly. Pastures are not very good owing to the dying out of no county from the strength of the bluestem grass last fall.—H.

Saline County—Wheat is in the best of condition. Meant do acceage is small. A lot of cotton being acreage is small. A lot of cotton being careage is small. A lot of cotton being acreage is large. Oats look fine. Eggs 20c; the flower county—Spring work well along. Plenty of moisture. Alfalfa about ready to cut. Not much replanting of crops so far. Wheat and oats look the best in several with the county for moisture. Alfalfa about ready to cut. Not much replanting of crops so far. Wheat and oats look the best in several with the cut. Not much replanting of crops so far. Wheat and oats look the best in several with the cut. Not much replanting of crops so far. Wheat and oats look the best in several with the cut. Not much replanting of crops so far. Wheat and oats look the best in several with the cut. Not much replanting of crops so far. Wheat and oats look the best in several with the cut. Not much replanting of crops so far. Wheat and oats look the best in several with the cut. Not much replanting of crops so far. Wheat in surface.

Texas County—Plenty of rain. Broomcorn crop will be much shorter than usual. Harvestock doing well-replanting of crops so far. Wheat in surface.

Texas County—Alfalfa about ready to cut. Not much replanting of crops so far.

Wheat and oats look the best in several surface.

Texas County—Alfalfa about ready to cu

PED BARWERS WAIL AND BRIDGER

An Lysicalians and Camily on the Country of the Creat Was

Topeka, Kansas, May 23, 1914

TWOWAYSTOWINSUCCE

PUREBRED LIVESTOCK

ANGUS cattle have had an attraction for W. G. Denton of Denton, Kan., ever since he can remember. He started handling the breed in 1888, and he has been dealing in purebreds exclusively for the last 14 years. He keeps an average of about 50 head on his 240-acre farm near Denton, of which about half are breeding cows. The herd is one of the leaders of this breed in Kansas.

Mr. Denton always has believed that breeding animals should receive good care, but that no "hothouse" methods should be used. His methods are practicable for average farmers. The herd has free range for the entire year; few days in the winter are too stormy for the sammals to be out on the pasture. They get all their feed from the rich bluegrass pastures in the summer as a rule, the only exception to this being last summer, when it was necessary to give some additional feed. The farmers in the Denton community got through the animaer about as well as those in any Kansas community, but the pastures all were dried up. Rhagrass will not growafter all of the available soil moisture has been used.

BY F. B. NICHOLS Field Editor

Denton Farm.

Most of the feed of the breeding hogs in the summer is obtained on the clover and alfalfa pasture. This was especially true this spring, with the high prices prevailing for grain. In a nermal year the legs finished for market get a heavy ration of corn, but this, too, has been reduced this year. The aim is to have the hegs get plenty of available protein in their ration. It is much changer, too, to grow this protein on the home farm than to buy it in expensive commercial forms.

That is the reason whe it is played to

bed well worked down lest fall, although he was not entirely suc-cessful in getting the capillary attraction as well restored as he would have liked. The land was plowed and

disked four times, harrowed seven times and saraful-

disked four times, harrowed seven times and warefulty rolled twice.

Mr. Derson would like to have a seedbed very
firm and well estited, with just a little loose dire
on top, but he does not like to have this extend mad
deeper than the seed is planted. He believes the
supremely important thing in preparing the seedbed
is working the soil repeatedly, so the capillary attraction will be well restored between the plower
soil and the subsoil. At the same time the cruson the top soil will be breaken, so evaporation will
be checked. Mointure will thus he conserved, and
the conditions will be made favorable for the formation of soluble nitrates. Thus when the seed is
planted the well winked soil is firm, and it contains
planty of ancieture and available plant feed, so the
roots can strike right out into it at one. Whis
these conditions are present the plants have a good
chance to get well established before froming weather,
when the need is sown in the fall.

Mr. Denton always sows his alfalfa in August.

Mr. Denton always sows his alfalfa in August and he drifts the seed both ways. He believes pays well to run the drift over the field twice, the seed gets a more even distribution, and at some time it reduces the chances of having a spots in the field. Fortunate is the man who say his grass seed one way and does not get at least few bare spots.

With the red clover, the seed is sown in the arrival with outs or wheat for a nurse crop. The soil man Denton is mostly of a limestone formation, we adapted to red clover. The crop usually does well no matter what sort of a nurse crop it has. It has been the experience of most men there that it does a little better with wheat than with oats. The wheat tends to ripen before harvest time, and to let the sunlight in to the young clover plants. Thus there is not such a shock to the tender legume when the wheat is cut.

The grop rotation that commonly is used is clover.

the wheat is cut.

The crop rotation that commonly is used is clover, corn, cate and wheat. There is some variation from this; the affalfa, for example, takes several years when it is grown on the land, and this tends to break into the rotation. All the manure is hauted to the fields promptly, for the supreme aim on the Deuton farm is to conserve the soil fertility. It is run with this end in view. The farming system is based on good livestock, crop rotations and legumen to bring it about.

Perhaps the most interesting thing is the high

Perhaps the most interesting thing is the high acreage of legumes. There must be a great increase in the growing of leguminous crops in that section.

Mr. Denton has a fine example of what a successful, average sized stock farm in the corn belt can be made. He has proved that it pays to keep cattle and other paying livestock on high priced Kansas land.

Reutger Heatherson 3rd, Herd Leader on the Denton Farm

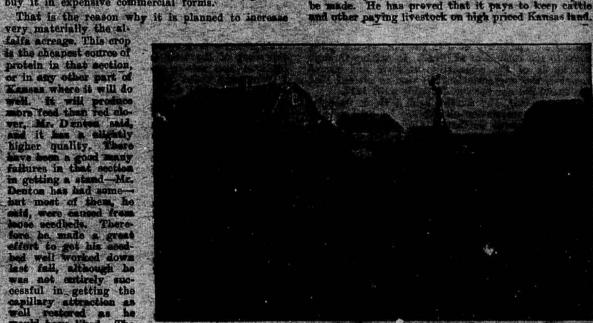

Fortunately the Denten farm is well supplied with water from a spring that does not fail, so the nattle had an abundance of pure water, and that helped. This spring is carefully walled, and water is run through a pipe to a tank on lower round. Thus the water is protected from contam-iation, and it is always cold, fresh and pure.

mation, and it is always cold, fresh and pure.

Red clover and affairs hay are fed the eatitle in the winter. The sam with the breeding animals is to get a good growth; he special effort is made to protuce fat. In order to bring this about it is necessary to make the rutton high in protein of course, Red clover and alluffs are the chespest sources of protein in that section. A little ours and bran also is fed, but these feels were used sparingly has winter, for both were high. Mr. Denton was for turnte, however, is that he had considerable more left sweet from the 2012 cusp which aided, very maderially

A large use is made of outs in feeding young anmals, as Mr. Denton believes it is especially vallattle in giving them a desired growth. Outs and
ours are ground and mixed half and half, and then
them 30 per cent of bran is added to this mixture.
This combination is connection with good roughage
the corn fodder or prairie key, and with clover
or alfalfa hay and good water brings the extite
closing in good shape.

Meet of the animals from this herd are sold into
a sithough some go to other places. A great
animals have been sold within 25 miles of
any and shape this prediction.

PASSING COMMENT—By T. A. McNeal

A Word Personal

I have carefully refrained from partisan statements I nave carefully refrained from partisan statements in my editorial utterances in the Mail and Breeze. Where reference has been made to public questions it has been my endeavor to state the facts as I understood them regardless of whether they might seem to be favorable to the political party with which I have generally affiliated or not.

In the matter of the tariff law which is neces sarily a matter of great public and political interest, I recently wrote two editorials which I notice were extensively copied by the Democratic press of Kansas. Several Democratic editors took the trouble to commend me for my fairness. I mention this fact simply to show that I have tried to be fair. While I want to treat every one fairly regardless of his political belief, I also want to be treated fairly myself.

In a recent speech Governor Hodges is quoted as "when I left the office of state printer I saying, "when I left the office of state printer I also left a deficit of \$15,000 for the Democratic legislature to take care of." The governor referred, I presume, to Chapter 3 of the sees of 1913 which purports to provide for a deficiency at the State printing plant for the year ending June 30,

As a matter of fact, the amount provided for in that bill was \$9,464.31 instead of \$15,000 as the governor states. It would seem that the governor of a great state ought to be at least reasonably accurate in his statements but our governor displays a reckless disregard of facts that might be expected in an irresponsible street corner orator, but is not to

be expected of a governor.

I am willing to assume however, that the governor has never taken the trouble to investigate the facts in this case and hope that after his attention is called to them he will not continue to misrepre-

sent matters to his audiences.

The facts in regard to this alleged deficiency are as follows: The bill provides for deficiency in labor fund \$1,720, deficiency in incidental fund \$601.98, deficiency in printing and binding material fund \$4,437.18, deficiency in equipment fund \$2,704.53.

Total deficiency, \$9,464.31.

The two principal items of this deficiency are

otal deficiency, \$9,404.51.

The two principal items of this deficiency are hinding material. The \$4,437, for printing and binding material. The truth is that I turned over to my successor \$12,353.70 worth of printing and binding material on which the state owed the sum of \$4,437.53. Instead of the state being in the hole it was ahead \$7,916.52.

The auditor however, held that although the printing and binding material was used in 1912, because it had been purchased during the year 1911, it could not be paid for out of the money appropriated for 1912. Therefore although there was nearly \$3 worth of printing and binding material on hand at the close of my term for every dollar the state owed for such material, the bills were not paid and had to be taken care of in a deficiency appropriation.

The next item in size is that of \$2,704.53 for equipment. The legislature of 1001.

ment. The legislature of 1911 made an appropriation of \$6,000 to be used in buying additional equipment. As that appropriation bill was originally drawn the money became immediately available. Supposing that it was immediately available I contracted for certain machinery used in the bindery and press room to the amount of \$2,704.53. In passing through the hands of the committee on ways and means however, the appropriation bill was so altered that

My successor, Mr. Austin, held, I think wrongly, that this appropriation should not be used to pay the \$6,000 did not that this appropriation should not be used to pay for the equipment purchased, although it had been made for that very purpose. As a result the money to pay for this machinery lay unused in the state treasury for two years and the machinery purchased was paid for out of a deficiency appropriation.

The item of \$1,720.62 was for work done at the Agricultural College plant but perhaps rightly charged to the State printing plant account, as, if the work

Agricultural College plant but perhaps rightly charged to the State printing plant account, as, if the work had not been done at the college, it would have had to be done at the plant here. My recollection is however, that the bill for this work was not presented until after the expiration of my term of office. In short, then, at the end of my term of office the state had on hand \$12,353.70 in printing and binding material and owed on that material \$4,437.53. That was a pretty comfortable sort of deficit, was it not? It had on hand \$2,704.53 worth of new machinery and in the state treasury was \$6,000 with which to pay for that and other machinery.

If a private individual had on hand in cash and perfectly good assets more than \$18,000 and owed, all 4 (848)

told, bills to the amount of a trifle over \$9,000 he would not be considered as having a deficit but a surplus. That was just the situation the state of Kansas was in with reference to its printing plant.

I had not intended to say anything about this old matter but I want the readers of the Mail and Breeze to know the truth and I want to correct so far as I can the misstatement made either willfully or ignorantly by the governor.

A Coffeyville Man's Ideas

Writing from Coffeyville, Dr. Charles Morrison writing from correyving, but says that while he is in favor of the gold standard have in favor of government banks. "The governhe is in favor of government banks. "The government," says Dr. Morrison, "should operate loan and deposit banks. They would thereby get gold that could be used for redemption of the currency. Government taxes can be paid in any kind of money. The burden of redemption is on the government but it has no way of getting the gold and I do not believe that we can have a currency without having it redeemable in either gold or silver. I think gold should be the standard of measure and gold and silver used for redemption purposes. The science of money is Greek to most of your readers and it is a waste of time to discuss the question on account of their ignorance and indifference on this and other questions of government. I often talk to people about these matters and they say, 'Too deep for me.

I am just interested in making a living.'

"Reforms are started by the poor, the ne'er-doweeks who are sneered at by the wealthy and des-

ignated as irresponsible agitators.

Christ was the greatest agitator the world ever knew and they killed him because he stirred up the people; and by the way, the idea is growing that he was a Socialist. I do not know whether he was or not, but have never looked on him as one.
"Changes must be brought about in this country

by political parties or a political party. It is too big a job to stir the people up to demand legisla-tion. If we get the initiative and referendum who will circulate the petitions asking for the laws? There are not enough people interested to circulate the petitions without pay and who will pay the circulators? I fear the use of the initiative and referendum would be by those who had some selfish purpose to serve. I have had some experience in circulating petitions and know whereof I speak. If we are to have these measures the circulators should be paid by the state.

"It has always been a strange thing to me that so few take an interest in government but then the preachers tell us that it is necessary to give suppers in order to get the people interested in their souls' salvation. All a great many people care for is making money.

"The Socialists may elect a congressman in the Third Congressional district. They polled 12,000 votes at the last election and are getting an extensive and effective organization. With four parties in the field they may win."

Why Not Raise Lambs?

I spent the first twenty-four years of my life for the most of the time on the farm. Our principal business was raising sheep and therefore I think I know more about that kind of livestock than any other. We raised sheep for the wool and as wool growers we knew that the price of wool was very materially affected by the tariff. The vote of the state of Ohio has been changed more than once by the wool growers who were almost without exception in favor of a fairly high tariff.

However, it was not my purpose to discuss the tariff question but the growing of mutton. It used to be our custom after shearing time to pick out the best wethers in the flock, feed them on grain for a few months and sell them in the fall when fat. My recollection is that we rarely got more than three cents a pound for fat wethers in those old days and often got less. It was a good wether that would sell on the market for more than three dollars. And yet the sheep raisers made money. If we could have received the present prices for our muttons we would have done well if we had not sold a pound of

As this is written the market quotations on sheep in Kansas City range from \$6 to \$6.75 for wethers; \$8.75 to \$9.10 for spring lambs; \$8.75 to \$9.10 for wool lambs. Last fall I talked with a farmer who had just shipped a car of spring lambs to the Kan-

sas City market for which, as I recollect, he received about \$7 a head and they were not more than 6 months old. They were very good lambs of course but they certainly brought very good prices.

It seems to me that there must be good money It seems to me that there must be good money in raising lambs at that figure entirely regardless of the price of wool. I do not understand why so few farmers engage in the business of raising lambs for the market. I have heard of a few here and there who are in the business and so far as I have heard every one of them is doing well, better I believe than he could do raising and feeding cattle. So far as the farm is concerned there is no kind of stock that so improves the land as sheep. If they

of stock that so improves the land as sheep. If they are not kept in very large flocks sheep are generally healthy and ready to eat nearly any sort of vegetation. They are easier to handle than any other kind of stock. The sheep is naturally gentle and friendly to man. The man who becomes accustomed to headling them would rethen food sheep than tomed to handling them would rather feed sheep than any other kind of livestock. Mutton, especially young mutton, is constantly growing in popularity and the price of the meat has been gradually ris-

ing for years.

I believe that a Kansas farmer with a quarter section of land can get a flock of good ewes and turn off a fine flock of lambs every fall. In order turn off a fine flock of lambs every fall. In order to economize on feed the farm should be equipped with a large silo. Sheep will do well on ensilage. As to the number of sheep that can be kept on a quarter section of land, that will vary of course, according to the quality of the land. On the old home quarter we used to keep from two to three hundred head together with considerable other livestock. I would suppose that a Kanas quarter section would head together with considerable other livestock. I would suppose that a Kansas quarter section would support as many sheep as that Ohio quarter. It seems to me that the good sheep farmer ought to be able to turn off from two hundred to two hundred and fifty lambs every fall that at present prices would bring him an income of from \$1,400 to \$1,600 and in addition he would have the wool clip from the ewes which ought to pay for the cost of feeding and caring for the sheep.

A Few More Words With Editor Palmer

It may be, as Editor Palmer, of the Jewell City Republican says, a discussion of the currency and banking question by himself and myself is largely a waste of time, but it must be remembered that even wise financiers have been far from united on the question and also that these same supposedly wise financiers have been almost a unit in condemning our monetary system which Mr. Palmer praises

True enough, perhaps they would not agree with me at all, but they have at least agreed that what we now have has not been a success and so one of the great questions before congress was a proposed settlement of the banking and currency system. As a result we have the present law which will go into operation within the next two or three months.

How that law will work out in practice I do not know and neither does anyone else. My own opinion is that it will be a good law for the bankers but of mighty little benefit to anybody else. I believe that a vastly better system might be adopted that would be of inestimable benefit to the vast mathematical system. jority of the people, although it would no doubt work a hardship on those whose business it is to lend money and collect interest.

Now I have read the articles written by Mr. Palmwith care and while he presents his ability, as he always does, I think his logic is faulty and furthermore he evidently fails to understand my position. That may be because I have not stated it clearly. He assumes that I want the government to create a vast volume of irredeemable fiat cur-rency and asks why the government should ask the people to pay any taxes if it has the power to create unlimited money without cost.

Now I have never proposed that the government should issue an unlimited volume of fiat currency nor am I in favor of that. I have never been in favor

nor am I in favor of that. I have never been in favor of an individual trying to get something for nothing and neither am I in favor of the government, which is simply an aggregation of a great many individuals, acting collectively, trying to get something for nothing.

What I want is that the government shall exercise, what is now officially and legislatively acknowledged to be a proper function of its power, in the interest of the whole people and not in the interest of a small fraction of the people. In the present banking and currency law, which will shortly go into ing and currency law, which will shortly go into

active operation, the government is authorized to issue its notes and upon the deposit of the required security those notes will be lent to the central re-serve banks and through them to the various member banks.

Mr. Palmer says the government owns no property and therefore should not issue the kind of currency I have heretofore suggested, because, he says, there would be no value back of the currency. But our congress has passed a law which does per-mit the government to issue money and lend it to the banks.

Is it dishonest on the part of the government to do this? Certainly not. All it does is to exer-cise its sovereign power by issuing this money which will be a legal tender when issued and to secure itself takes over the security deposited by the bank.

Why, asks Mr. Palmer should the government col-lect taxes if it has the power to issue money? The reason is that the government should no more than an individual get something for nothing. The revenues and expenditures of the government should balance. Of course there might be variations from this rule in certain years, but in a series of years the government should collect just enough to pay its bills and no more. It is not a proper function of government either to hoard money or to run in debt. Now the government is the greatest business concern in the world. No private enterprise anywhere near rivals it either in volume of business done or the number of people employed.

The government should issue its non-interest-bearing notes in payment for services rendered and material furnished. These notes should be full legal tender in payment of all public dues and debts public and private. Then with the proper balance between expenditures and taxes, the same volume of non-interest-hearing notes issued by the government in payment for services rendered and material furnished to the government would come back into the treasury in the way of taxes. There would be a continual redemption of this government currency and it would not be trying to get something for nothing. The government, however, would not be paying out interest on bonds; that is the wrong in the present system.

Now suppose the government should take control of the banking system, or rather, should enlarge the scope of its present postal savings banks making them banks of loan as well as deposit and should then permit the people to deposit good safe securities in these banks, such, for example, as mortgages up to 60 per cent of the assessed value of their lands, or to 60 per cent of the assessed value of their lands, or chattel mortgages on their personal property, or personally secured notes, and then when currency might be necessary the postal bank could assign these securities to the government for so much currency as might be necessary. Would that be getting something for nothing? Or would the government be doing something in that case that is different in principle from what is proposed to be done under the new banking and currency law?

As I have heretofore stated. I do not think that

As I have heretofore stated, I do not think that a vast volume of currency would be needed. The citizen depositing his notes or mortgages in the government bank would check against it just as he now checks against his deposit if he happens to have checks against his deposit if he happens to have one in a bank. On his mortgage notes or chattel securities the citizen would be charged a tax sufficient to pay his share of the expense of operating the government bank, including the cost of printing the currency. He would pay no interest beyond that. In other words, through the agency of the government he would be permitted to use his own credit, to make it liquid. Instead of paying interest to a hanker and on top of that paying his share est to a banker and on top of that paying his share of the expense of operating his government he would simply pay his share of the tax necessary to main-

There is nothing impractical about the plan and nothing dishonest. It would not be trying to "lift ourselves up by our boot straps" nor would it be trying to get something for nothing. It would free business from the constant menace of contraction or wild expansion that necessarily goes with our

Let me give a local illustration of what I mean by a currency that would represent all values in-stead of a single value: During the war it became very difficult to get sufficient currency to transact business. A good many enterprising merchants hit on the device of issuing their own currency. (One firm that ran a sort of department store in a town of about five thousand people, issued a considerable amount of this kind of currency and paid it out to its country customers in exchange for produce. The currency was payable to bearer and was redeemable in any kind of goods kept in that store. It had no intrinsic value neither was it redeemable in any particular article that had intrinsic value, but it was redeemable in any sort of goods that store had

And so on an infinitely larger scale could the gov-ernment of the United States issue a medium of exchange which would stand for all values and would be redeemed if you please, in whatever men had to sell, whether it be the products of the soil, the mine, or labor of hands or brain.

As a matter of fact there can be no such thing

a substance with a fixed value by which all other values can be measured, because the value of what-ever substance is so selected must itself be meas-ured by the values of other substances. The value

of gold has varied greatly within the past century. At times its value as compared with the general range of values of other things has been much greater than at other times. To compare gold with the standard measures of weight and measure as Mr. Palmer has done is absurd and I cannot understand how a man of his brains can make such a foolish comparison.

Measures of space, time or weight do not change. If there is in some government depository, as he claims, a sacred yardstick made of platinum that yardstick has exactly the same length, yesterday, today and forever. If that sacred yardstick should shrink or expand from half its ordinary length to twice its ordinary length then it would be of no value as a measure. In the very nature of things its length is fixed; invariable. In the very nature of things it is impossible that the value of gold or any other substance can be fixed, invariable. To make gold the redeemer of every other substance is to give one commodity an undue advantage over every other commodity, and necessarily places the control of commerce to a large extent in the hands of a few to their great profit and with a corresponding detriment to the vast majority. Measures of space, time or weight do not change.

An Object Lesson

The objection to government ownership and opera-tion of railroads has always been that it would be inefficient and probably corrupt; that it would give to the party in power the means by which it could perpetuate its control of the nation indefinitely.

And there is considerable force in the argument. In order to operate government railroads successfully, that is, as successfully as they should be operated, the management certainly should be kept out of the hands of mere politicians. It might even be nec-essary to follow the plan that has been adopted in the regular army and navy I believe since the be-ginning, which is to disfranchise the railroad em-ployes so long as they were in the service. That would certainly take the organization out of politics as it has taken the army out of party politics. as it has taken the army out of party politics.

But in any event government management certainly could not be so rotten and inefficient as has been the private management of many of the great

railroad systems of the country.

The latest example of the evils of private management is that of the New Haven road, the affairs of which are now being examined by the Interstate Commerce commission. The New Haven railroad system was supposed to be one of the soundest and best managed systems in the United States. Back of it was what was considered the best financial brains and most powerful financial interests in this country. And so, resting secure in this happy de-lusion, the people who had invested their money in the stock of this corporation continued to draw their dividends supposing that the road was as firm as the granite hills of New England.

The investigation now going on shows the most rotten administration imaginable. While the stock-holders slept the road was being looted. A single individual calmly testifies that by buying stock from the company through an arrangement with the pres-ident of the company and then selling the same stock back to the company he cleared up the neat sum of nearly 3 million dollars. This is only one of the incidents showing how the company was looted by those who had been entrusted with the management of its affairs. And this is only one road among many that have been looted, wrecked by inefficient

and dishonest management. It is very certain these roads would not have been as badly mans under government ownership as they have been us private ownership.

The truth is that government ownership, as I am glad to say, has generally been free from graft and while not always economical or efficient it compares very favorably with private management.

Private enterprise undertook to build the Panama canal and failed miserably. It proved to be both inefficient and corrupt. The United States government started the building of the canal at first with the intent to have the work done by private contract but discovered that it must do it as a public enterprise. Perhams no work of early magnitude. enterprise. Perhaps no work of equal magnitude has been done so well or at so little cost. In fact there has never been a work that encountered the same tremendous difficulties as this. Not only has the work been well done, honestly done and econ-omically done, but it demonstrated the capacity of the government to take care of a vast army of workmen, to treat them generously, humanely and in a way that cared for both the health and comfort of the employes from the highest to the lowest.

Recently we have taken possession of the Mexican city of Vera Cruz. It was filthy, badly policed, with general conditions about as bad as they could be.

Already it has been cleaned up. The people of all

Already it has been cleaned up. The people of all classes are being better cared for than ever before in their lives. The management is the most efficient the city has ever known.

It may be said generally that government management is efficient so far as it has been tried. So I believe it will be when the government takes control of the transportation lines. I believe they will all be as efficiently managed then as the best of

What the Women Can Do

Doubtless many good women who never have voted are considering whether they should vote now, now that Kansas women have full suffrage.

First, they should ask themselves, if for the sake of Kansas progress, better and less expensive government, better schools, and pure social and moral conditions, in the country as well as in the towns, it would not be of tremendous help to have the vote of every good woman in support of the best candidates who come up?

Voting, itself, is a simple enough formality, requiring about five minutes' time. And marking a ballot is about as simple as checking up a grocery list by putting an "X" mark to the right of each one of the articles desired. Only in this case it is the names of the chosen candidates that are checked with the "X."

Today in Kansas we are struggling to abolish that ancient and vastly expensive evil known as the "spoils system," which puts any kind of a man in office if he is what is called "a good fellow," or "stands in" with some political gang, in politics solely for what it can make out of it. These men waster the public money and give us the progress of waste the public money and give us the poorest of

In Kansas also we are trying to shape up impor-tant legislation for the future, which will prescribe the conditions under which the children of the present are to be helped or hampered in their later struggle for existence as men and women.

Is any one more vitally or strongly interested in these issues than mothers, wives, sisters and daugh-

Kansas women have still another obligation as voters: In the large cities there still exist a few women having the lower view of life, or living in an environment which makes it difficult for them always to judge right from wrong. These women frequently vote with the class of ignorant, vicious, or misguided men found in every city—because the ward bosses of the corrupt political machines see that they do.

It is to offset this influence in Kansas, as elsewhere, that we need every rightly directed ballot we can obtain.

Woman suffrage has come because it is greatly needed and it is here to remain. It simply provides a more direct and efficient method for women to make their influence count. By the simple process of voting always for candidates known to be clean, honest, upright, able and efficient, the 300,000 women voters of Kansas can bring to our aid in this state a mighty force for better government. It is the gen-eral hope of the men of Kansas, that now women have full suffrage, they will use it.

Kansas, like the rest of the world, is fighting a continuous and mighty battle against the powers of darkness, graft and greed, and it needs the help of every good woman. It is time for men and women to put all prejudices aside and vote for the Right all the time.

Kansas women have the right this fall to vote for or against any of the candidates that men may vote for, both at the primary, August 4, and at the election, November 3. The widespread hope now is that they will exercise that right.

As to Harvest Hands

Have you begun to figure on the number of men you will need, this year, for harvest?
The United States army is very likely to re-

duce the number of unemployed in the cities, especially if war, unfortunately, should be de-clared. Even without a war the militia and the army may be recruited to a degree certain to affect the supply of harvest hands. Many of the unemployed would enlist for border pa trol duty in preference to entering the wheat

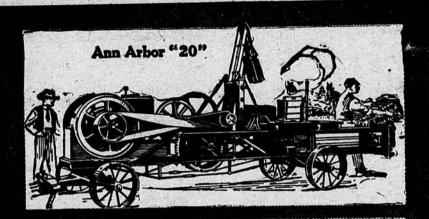

Hadn't we better begin to think about this wheat crop this year. How are we going to

The Farmers Mail and Breeze will conduct

· · · · · · · · ·

The Farmers Mail and Breeze will conduct a "Harvest Hand Exchange" beginning at once, in the interest of the wheat growers. The service, of course, will be free. The purpose of this exchange will be to try, in every way, by co-operating with the State Employment Bureau and with private exchanges, to get farmers and farm hands together. Write, as soon as possible, to the Harvest Hand Exchange, of the Farmers Mail and Breeze, say how many men you will need; when you will need them; how long you will have work for them and how many acres of wheat you have to harvest. We will put you in touch with the best sources of supply.

THE HARVEST HAND EXCHANGE.

Hay Balers Can Now **Make Good Profits**

ID you ever think of how easy it is to get started making a good, big income baling hay? Let us tell you how you can do it with an Ann Arbor press.
Send us your name for the booklet, "Making Money from Hay." It has an interesting and profitable story to read.

Baling the most hay in the least time with the least expense is an easy trick for Ann Arbor presses. Western hay balers can now do better work—more of it and at a lower cost. More profits—are the results. Here's your opportunity to work up a good income. Get an Ann Arbor outfit and bale your own hay and your neighbors, also. Write us and learn how easily you can do it.

Now Cutting the Cost of Baling in the West

It's particularly suited for this territory. It's the hay press which bales Alfalfa with the minimum breakage of stems and leaves. Government reports show stems and leaves the most valuable part of the plant. This fact was the basis for Ann Arbor construction.

No matter what grass or hay you handle—the Ann Arbor can bale it at the least cost. Just what you need for

baling vetch and cowpeas. No other baler has as large feed opening or as fast feeding device or as simple con-

baler has as large teed opening or as fast feeding device or as simple construction.

Feed hopper is only 39 inches from the ground. Take the baler out in the field—bale direct from windrows—save time, work and expense. Use any engine—set it right on the platform with the baler. Detach the truck truss rods, move rear wheels forward, and you have a portable outfit for your engine.

If you have no engine, and don't wish to get one this year, one of the Ann Arbor line of horse presses will best fit your needs. Ask us about the two man horse press with low step-over and a positive self-feed without springs.

The Ann Arbor is the baler for profits—why not get started? Write,

Every Ann Arbor Owner Is Protected by an Individual Guarantee

The strongest ever given on a hay press. Write for booklet "Making Money from Hay." Mail postal or letter today. Address

Plates Small For New Kafir

African Seed Much Larger Than Our Grain-Farm Doings BY HARLEY C. HATCH

the seed is too valuable to strew it the usual way. We think they will find a 25 head of cattle would no doubt have better grain crop will grow from this thinner planting, too. We all plant our kafir too thickly and if we have seed so valuable that careful planting is imperative it may teach us something about kafir raising. We shall be mighty well satisfied with the imported seed if we can raise kernels as big as those we plant; the contrast between the homegrown seed and that from Africa is astonishing; we didn't know our native the rie hay is little better than wadding. Our is hay we sold last fall and if they had would have been little better off this would have been little better off this approach their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off," for 30 tons of hay at their heads off, and would have been little better than wadding. Our better than wadding. Our better of the 30 tons of prairie hay we sold last fall and if they had would have been little better off this would have been little better off this way we sold last fall and if they had would have been little better off this way we sold last fall and if they had would have been little better than wadding. Our better of the 30 tons of prairie hay we sold last fall and if they had would have been little better off this way we sold last fall and if they had would have been little better off this way we sold last fall and if they had would have been little better off this way we sold last fall and if they had would have been little better off this way we sold last fall and i tonishing; we didn't know our native cattle prairie hay. kafir was so nearly played out.

Distemper acts on a horse like a bad case of grip on a man. They find difficulty in drinking during the worst stage; their throats are sore and they hate to swallow the cold water. They have to prime their throats before they can drink and it looks as if nearly as much water runs out of their nostrils as they take in at their mouths. All the horses are re-covering but the last one taken ill is now at the worst stage of the disease.

This is the second time we have had horse distemper on the place since living in Kansas. Three years ago two colts running in the yard had it but not severely and although they drank at the same tank with the other horses none of them took it. It has been epidemic in this county this spring and we have heard of several horses dying with it, or rather with some other disease brought rather with some other disease brought

Within the week another farmer in this county has lost four good young horses through feeding ensilage and an-other is sick with no hope of recovery. It seems difficult to convince some farmers that ensilage is not a good horse feed. We have had a number tell us "good ensilage is fine horse feed and horses do well on it." Good ensilage may be the best of horse feed but when are we to know when ensilage is good and when it may be the loss of so many horses duris not? The loss of so many horses during the winter through feeding ensilage indicates that there are many times when ensilage is poison to horses. It never seems to harm cattle.

has a carload or so but it is probable he can sell it all out to farmers who will have to have a little more to carry them through. He is getting \$12 a ton for it at the barn which pays better than shipping it. Hay is high enough in Kansas City but the cost of getting it from a cel post or any legitimate extension of it will not be very popular with the farmfarm 8 miles from the railroad to the local shipping point and then to Kansas. local shipping point and then to Kansas City is not small.

It now seems probable that the large prairie hay crop we were all looking for rairie nay crop we were all looking for early this spring may not materialize. The fault is not in the weather conditions but is an effect of the drouth last year. The meadows on the best soil do not appear to have been harmed but on the thinner soil the grass has been damaged and will this year be weeding damaged and will this year be weedier than usual. While the prairie hay crop will be good it will not be the large crop many of us had been expecting.

A NEIGHBOR who is planting kafir seed that came from Africa, finds longer be fed to cattle if we are to get the plates he has used in planting the prices we have had the last few kafir the last few years will not do. The kernel of the African kafir is about 50 per cent larger. He had to have the holes in his planter plates made larger we must feed them something. The price of prairie hay and of alfalfa now differs per cent larger. He had to have the cattle alfalfa but if we keep cattle holes in his planter plates made larger we must feed them something. The price before he could plant. Most of those who are going to plant the imported seed figure on making a bushel plant 20 acres; finest cattle feed we can get while praithe seed is too valuable to strew it the seed is seed in the seed is too valuable to strew it the seed is too valuable to strew it the seed is seed in the seed is too valuable to strew it the seed is seed in the seed is seed in the seed in the seed in the seed is seed in the seed in

The first week in May saw most of the corn planted in this locality. Most of the early planting is up and we have heard no complaints of poor stands. The corn we have seen has too much of a stand, rather than too little.

Farm work has progressed rather slowly on this farm for the last two weeks. Every work horse on the farm except one has had distemper and while they have not been entirely unable to work full time could not be put in. When they were feeling the worst they would not eat much grain and when a horse cannot eat he should not be made to work.

Every field of spring sown alfalfa we have visited shows a fine stand. Nearly every farmer in this section sowed the seed at the rate of 1 peck to the acre and this has produced enough plants to cover at least twice as much ground. This young alfalfa stands a fine chance of living, for there is but little grass and foxtail and kills young alfalfa, not weeds. The weeds can be mowed and killed, while mowing only thickens up crabgrass and foxtail.

A dispatch in the daily papers a short time ago said the peach crop in southern Kansas had been killed by the freeze-weeks. We wish the man who wrote that dispatched in the should not be made to work. Every field of spring sown alfalfa we

We wish the man who wrote that dispatch could see the trees in this locality; he might change his mind. Not in a good many years have the peach trees here set more fruit than this spring. It is true we had a freeze that was hard enough to have killed the peaches, and in most instances it would have killed them, but this time it did not. We have a seedling peach tree on this farm, down by the creek, which is the largest peach tree on the farm. It is a chance seedling, growing among the other timber and this is the first year it ever had peaches on it. This time it is well loaded.

The crow army which lived here all winter left when warm weather came but left enough of its number behind to make life miserable for those who live within a mile of the creeks and are trying to raise young chickens. An old crow with a nest full of young birds is far worse on chickens than any hawk. It is here that the bounty comes in good play. The boys range up and down the creeks hunting crows' nests and when they find one they climb up and pitch out the young crows. A nest of four or five young birds will net them from 20 to 25 cents. The old crows stop their stealing when their nests are robbed and the chickens thereafter live in peace.

We have been getting our machine re-pairs this spring by parcel post and find it a great saving in time, travel and money. The former course was to order these repairs from the dealer and he would have them come by express; then we would have to make a trip to town for the parts. Now we order of the dealer just the same but he orders it sent Very little prairie hay is left in this direct to us by parcel post and the car-section or is for sale. A neighbor still rier brings it right to our door. The old has a carload or so but it is probable he way our express bill for the average

Against the County Unit Plan Most perfect Silo made

Farmers and Others Tell Why They Oppose the State Teachers' Proposed System

fore the legislature, but a constitutional question was in the way and nothing came of it. As most townships voted bonds to get the railroads, it would be only fair that the tax should go to the configuration and it would be easier and township and it would be easier and create less opposition to amend the constitution in this respect than to change the whole law.

politics and create about seven hundred

farther and say that it is the only place, so far as the country school district is more elective offices.

When the teachers met in Topeka last was made in organizing on districts where there is no chance of shown its head, and square-toed democracy is the rule. They have built schools that were better buildings than nine tenths of them lived in at home; levied taxes to keep them in order and paid the teachers better wages than they can get from any business houses in their vicinity for like service and qualifications. It would be well to go slow about tearing this to pieces until we count the cost.

The question of taxing corporations and distributing the same equally among the districts of a township has been before the legislature, but a constitutional question was in the way and nothing and to show their opinion they is located, yet the entire country has to would affect a million people whether they would or not. The daily press gave to the county school commission we have no use whatever for it. The present the farmers talked these things over they mould to show their opinion they so with me. I have been on the school to districts where there is no chance of ever being densely settled. It is a hard matter now to correct this the teachers who went up from these there is no chance of ever being densely settled. It is a hard matter now to correct this the teachers who went up from these the city school only. The teachers who went up from these the teachers from the city school tax in the difference the teachers who went up from these the teachers from the city school tax in the difference the city school only. The teachers who went up from these the city and the teachers from the city school tax in the difference there is no chance of districts where there is no chance of its and the very being densely settled. It is a hard matter now to correct this the very being densely settled. It is a hard matter when they met in any of their organiza-tions, and to show their opinion they passed resolutions. This was legitimate and about the only way to find whether we were for or against.

John A. Boylan. Arkansas City, Kan.

To bolster up his theory Mr. Ellsworth In your issue of May 2 D. A. Ellstakes a district out west with a valua- worth gave an illustration of the county

A. ELLSWORTH says of the county unit plan that it is the one subject in which every man and woman is interested. I will go a step farther and say that it is the only place, so far as the country school district is notities and create about saven hundred. in Lincoln county ranges from one mill to five mills. Why is this the case? One cause is that some years ago a blunder was made in organizing small districts,

ent system of school boards is good enough. The idea that at present the teachers have too many bosses does not go with me. I have been on the school board for 23 years, and my experience has been that when a teacher's contract has been signed the only thing the board can do is to pay the teacher, whether the money has been actually earned or not.

H. F. Rickenberg.

Sylvan Grove, Kan.

Old School System Best?

I read in the Mail and Breeze of May 2 an article on school consolidation. I disagree with the author so far as the district schools are concerned. But I am not so positive about the county high schools. I do think that our rural population should have a school system that will qualify our country boys and girls to be on an equal with our city cousins,

I have been a district clerk for nearly thirty years and think that our own school has been a success. We have graduated some of the best talent of the state from our district schools, among them three of the Bradshaw family all of whom are, or have been holding responsible positions at the head of a lumber firm. The Stuckey boys have graduated under the same system and one is at the head of two lumber yards and I am proud of him. I think he is direct proof that our old district school system is a success. I have one boy that has been cashier in the Nashville State Bank and was lately cashier of the Elbing State Bank. He has lately resigned his position there and gone into other private business. I have eight children, six boys and two girls, and they are not without honors as far as education in the

district school goes.

The trouble with our district teachers today is that they try to see which one can get the most county graduates, regardless of what their qualifications are, and I think County Superintendent Pence will bear me out in this statement. But regardless of this last criticism I think our old system is the only good system because the patrons of the school have the power to say how long school shall last, how much we shall pay the teacher and what improvements shalll be

reduce the expenses in a small district and girls who walked from three to four like No. 99 in Decatur county, where it costs \$35 a child annually.

I am inclined to think that if the counchildren being overtaxed with study and walking. I mention this because I and walking. I mention this because I have read articles by men who earnestly opposed consolidation because the pupils had to ride in a closed, covered and comfortable spring wagon, no farther than hundreds of Kansas boys and girls used to have to walk.

I appreciated the clear and intelligent presentation of the county unit by Mr. Ellsworth. This is a subject which is very much misunderstood by many persons. The subject has been debated in this county, and the prevailing opinion

Going to Church June 14?

Prosperous farm conditions alone cannot make an ideal rural community. We talk too much about the farmers' financial needs and too little about his moral, mental and spiritual needs. And yet it is true that in the country religion and prosperity are largely synonymous. God has never forgotten His pastoral people. It has been said that the true wealth of a community can be estimated, not by the size of its flocks and herds, its well tilled fields or its silos and been but by the showaker and community. barns, but by its churches and congregations. No one thing will so greatly increase land values as the proximity of a church whose con-

greatly increase land values as the proximity of a church whose congregation has the real spirit of worship.

The country has need for the church and its pastor should live with the people he serves. Though he lives close to nature and to nature's God the country dweller needs the stimulus of daily example, the feeling of kinship that constant association gives. Strong men, willing to give unselfishly of their time and talent, possessing the gift of leadership, can accomplish much. The country is calling for this kind of service. Here is a fine field and abundant promise of a bountiful harvest.

of a bountiful harvest.

The church should be a factor in the social and political as well as the religious life of a community. Young people must have pleasure and recreation. Where the church has been made the social center and harmless amusements fostered that did not conflict with religious work, there has been found Sabbath observance and happy, contented boys and girls. Much progressive legislation has been brought about because of the active and aggressive work of the rural church. The church has not been content with merely asking for church. The church has not been content with merely asking for needed reforms, but has demanded them. Voting for men and merit rather than party and politics is a trademark of genuine Christianity.

The rural church should be made so attractive, its influence so wholesome that the habit of regular attendance will be easily formed. Ve need more of the "go to church" spirit in the country as well as the city. Nowhere else can be found the inspiration and

incentive for doing one's very best. The community strong in religious sentiment is the com-munity doing things worth

Athur Carper

tion of \$27,720; there are only eight unit which, as shown in that paper, would pupils and it costs \$35 to educate a certainly be a measure to approve. It child. In what way would the county unit lower the cost of education? When a man takes his family and moves into as in the large district. This, however, the wilderness or into some remote canyon of the flint hills, it isn't reasonable to suppose that the paved street reduce the expenses in a small district and what improvements shalll be made. With consolidated schools I do not know what some of us would have to say about taxes.

J. L. Stuckey.

R. 6, Wichita, Kan.

I heartily favor the consolidation of district schools except where the population is too sparse. I know many boys and girls who walked from three to four able to suppose that the paved street and the academy are going to be sent to his door. There is such a thing as paying too much for a whistle. A school district that has only \$27,720 worth of property in it must be in some remote

Mr. Ellsworth says the plan is to supplement the boards and not supplant them. The county board would not be experts, just ordinary men like the ones that fill them now. What duties could a board of that kind perform that the present boards are not performing equally well? The burden of proof is on the plaintiff; a statement is not proof. The present boards clean the well, fix the stove pipe, adjust differences between county unit would have teacher, pupil and parent, and do it out encourage extravagance.

ty unit were adopted it would cost from \$10 to \$15 a child more in the same district than it costs now. As long as the county would pay the bill the patrons of one district would consider themselves entitled to just as good a teacher as their neighbor district. Another point to be considered is the fact that modern school houses would be a common thing to find even in a small rural district. The bonded indebtedness for new, modern school houses would be very large and the county unit would have a tendency to

night with whisky on his breath or for me.

smash up the dining room chairs in a fit of rage. But Sam never had fits of anything. If he'd done something got some thread and a little rattle. really wicked I should have felt crushed and humiliated; but a woman doesn't mind that occasionally and one direct at first plance. I had enough for a

Any sit to try on shoes, and Tubby was me anything that I consider mine. Any sit to try on shoes, and Tubby was me anything that I consider mine. Any sit to try on shoes, and Tubby was me anything that I consider mine. me anything that I consider mine. Any woman wants a protector. It is one of those things that she doesn't need but she'd rather have than all the necessities of life put together. When I hear people worrying about women becoming coarse and bold, I can laugh at their fears for I have experienced the delightful fluttery feeling that comes to a woman when a strong man looms up and offers to fight her battles. Women always have had that feeling. It knew that women shouldn't be afraid of their husbands, and I wouldn't have called it fear exactly, but it was something that was all wrong. Of course he gave it to me.

For ten years after that, I asked Sam for money when I couldn't get it in any other way. Some years there were chickens and some years there were babies. I've always been glad

tween a protector and a provider. Chicken Money and Independence.

Providing has to do with dollars and very often then. I was ashamed to do pennies, and it was right there that it, of course, but there is some satisfam and I made our mistake. Would faction in doing things we are ashamed you believe it, I had no idea until a of. I couldn't look into the eyes of week after we were married as to whether Sam had a bank account of the little tots and wish I was still whether Sam had a bank account of teaching; I couldn't look into Sam's five dollars or five thousand! I was earning forty dollars a month teaching were the days when I almost wished school when I was married. I didn't for whisky on Sam's breath, or tantmind giving up the school though—not with Sam and the little farmhouse over the creek waiting.

Then one day I was started on the Providing has to do with dollars and

days. The chicken money bought little extras about the house and Sam tended to the other bills.

The next year I didn't try to have

and humiliated; but a woman doesn't of a fine plaid that I fell in love with mind that occasionally, and one direct at first glance. I had enough for a battle will bring results that years of dress cut off and wrapped. Tubby was least I used to feel that way. It that I could scarcely figure how much isn't the demons of drink, the devils of passion that have caused unrest among women. There aren't enough devils had only twenty-five cents to my and demons. The Sams have done it, name, my own name. I told her I'd the so-called good providers.

Of course I like to feel that by my blacksmith shop.

blacksmith shop. He stuck his head in the door.

and votes, but it you should attempt to take from them the silly, senseless joy of dependence, dependence on men, you'd see a fight where black women and yellow women and white women would struggle as sisters to the finish. Thank God for fluttery feminine feelings! But there's a world of difference to. A woman can't love a man as God intended when she must ask him to intended when she must ask him to give her things that already are her own. I thought of the forty dollars I had been earning when I was married very often then. I was ashamed to do two or three worlds of difference bevery often then.

with Sam and the little farmhouse over the creek waiting.

I had chickens the first two years. They were my own, I hatched them with hens and tended the little fellows ing person in the incident. Mary Elfaithfully. The chicken money was len wanted it. It wasn't Christmas, mine. I didn't need any new clothes and it wasn't her birthday, but she during those years, for mother and I had sewed yards of muslin and gingham and wash silks into clothes before the wedding. Out on the farm they lasted beautifully. We could get embroideries that would wear in those days. The chicken money bought little extras about the house and Sam tended to her that little dolls need mothers more than big dolls. But it wasn't big; it was a sweet little blue eyed big; it was a sweet little blue eyed thing. Sam didn't know about dolls. thing. Sam didn't know about dolls. He didn't know that girls need them The next year I didn't try to have chickens. Bless you, I was giving little Tubby his bath every morning when the chickens needed attention, and in the evening I was singing lullabies when the chickens went to roost. It was a good year and Sam's account at the bank was growing; but—it seems kind of anger that makes women pull greedy to say it—I missed the chicken into stiff, thin lines and takes fear from hearts. Sam was a good man; By that time the old wedding clothes from hearts. Sam was a good man; were out of style and I needed new I knew it. We'd made some mistakes;

paper again just to have something to serve as a barrier.

"Papers down, Sam," I said. "We're having news of our own tonight—right out here on the farm."
"What's up?" he questioned.

"Yes, I'm telling the news tonight," I went on. "The big story is that Mary Ellen is to have a new doll tomorrow."

I wasn't too timid to say it. Mothers don't have the little fears that just women do at times.

And a Doll Shall Lead Them

I knew that. I was going to set things right before I went to bed, and I was dead sure of it.

Just as Sam laid the daily down on the table I said quietly, "Sam, I want you to give me some of your blank on the table I said quietly, "Sam, I want you to give me some of your blank on the table I said quietly, "Sam, I want you to give me some of your blank on the table I will stop at the bank for a store, Sam, instead of out on the farm, town I will stop at the bank for a you'd expect to receive your pay on Saturday night without mentioning it.

I would do something really wicked; done. I should have told Sam to stop

How to Make a Rose Jar

The following letters have been received in reply to the request of Mrs. T. E. R. of Fountain, Okla., who asked for directions for making a rose jar: Gather rose leaves while fresh and

spread on papers to dry. Do not wait until the roses have become faded be-fore gathering. When well dried to 1 pound of rose leaves add 2 ounces all-spice, % ounce cinnamon, % ounce cloves and % ounce nutmeg, all well pounded small women, is shown in 6618. The together. Mix thoroughly and place in pattern is cut in sizes 14 to 20 years. a jar with a cover. If the leaves become very dry a small amount of laven-dar water may be sprinkled over them. This will last for years if kept covered, and may be opened when desired.—Edna

The little dress 6583 is cut in sizes % and may be opened when desired.—Edna Bush, Burlingame, Kan. o 5 years. Age 4 years requires 134 ards of 36-inch material and 1½ yards of edging.

Success with a rose jar depends largely on getting the rose leaves dry. Gather them after the dew is off, lay on plates and sprinkle a small amount of salt on them. Stir three times a day until the leaves are dry; they mold easily if they are not tended carefully, and they get very wet as it is; but persevere, and after several days they will be dry and fragrant, and will be a delight for years. When the leaves are thoroughly dry put them in a jar. First put in a layer of leaves, then sprinkle with any desired leaves, then sprinkle with any desired spices—cloves, cinnamon, etc.—and with three to five drops of one or two of the oils you like best. Then add more leaves and spices and oils until your jar is full or all of your leaves have been used. Cork jar tightly and leave 10 or 12 days. Your jar may then be opened as often as you wish to perfume your rooms.—Mrs. J. H. D., R. 1, Oswego, Kan.

No More Hot Summer Kitchens

For some time I have used a coal oil stove that burns air with great success. I found a woman with a stove like mine who could not use it. After cooking a meal with a very smoky stove she could not put it out, and had to call help to take it out of doors. I discovered the trouble; it was not sitting level. The manufacturers do not give instructions to set the stove level, and many a stove is condemned and cannot be used just for this reason. Coal oil is safer and cheaper than gasoline, but the stove must be kept clean, and the stove claiming to use so much air must sit level. I use the stove that burns bushels of air principally for cooking the poultry food. In the house I use one bought from an advertiser in Farmers Mail and Breeze, and it is perfectly satisfactory, and makes a pretty blue flame. With my blue flame oil stove and my fire-less cook box I save many a hot hour's hard work over a hot stove.

Mrs. B. R. Buffham.

Roswell, N. M.

Helps About the Kitchen

[Prize Letter.]

One of the handlest things for baking day is what I call my pie board. It may be made from a wide cedar shingle planed smooth on both sides, and a handle cut

at one end. Bore a hole in the handle by which to hang it up. This

board may be put to many uses, chief of which is to remove hot dishes, such as pies, pans of beans, etc., from the oven, thus saving soiled holders and burnt hands. Mrs. Frank Bush.

Jamesville, N. Y.

Ants in Strawberry Patch.

Can you tell me of a good way to get rid of ants? They are especially bad in my strawberries. Their hills are in most instances around the plant, and they seem to sap the life from the plant. The roots are half dead and dried up.—Mrs. G. W. C., Palatka, Fls.

Ants can be destroyed in their nests by pouring into the entrance a teaspoonful of carbon bisulphid. Or put the bi-sulphid in a shallow dish at the side of the entrance to the nest. In either case the entrance to the nest. In either case cover the hole with a galwanized iron pail or tub. The bisuphid fumes, being heavier than air, will sink; and they are sure death to the ants. Ants may also be killed by kerosene. Ants may be driven; from the cupboards in the To set a hen with scaly legs, or also be killed by kerosene. Getting On With the Cows corn fodder, clover hay, plenty of bran and not much corn. Be kind to the cows. We run the dairy merely as a sideline

Every Day Feed and Care That Increase Dairy Returns

BY GEORGE LENHERT, Abilene, Kan.

A bunch of promising young Holsteins. This is the breed that is in general favor with the Dickinson County Cow Testing association.

fied with them and with the profit they breeding dates. You can then also have to make butter were returning if I had not learned your cows freshen when you want them it saves labor. I became dissatisfied, bought a purebred time.

I have my cows freshen in the fell and think it is bett to make butter it saves labor.

Leeton, Mo. sire and saved the heifer calves. I then sold off my poorest and kept only the best. I soon learned, also, that it pays to give a good cow a liberal feed since a cow can give milk profitably only when fed more than she needs for the support of her body. It does not pay to support a cow's body two years when by more liberal feeding she could be made to give the same amount of milk in one year.

A cow must have some grain, because she cannot eat enough rough feed to properly sustain her body and also give a large amount of milk. In order to do her best she should have from 2 to 21/2 pounds of protein feeds in her ration daily beside the carbohydrates and fat. daily beside the carbohydrates and fat. The cow that is exposed to cold and wet weather must use some of her feed to keep warm and the cow that is chased or frightened wastes her energies instead of using them for the production of milk and she is going to charge all these things up against her owner by reducing his profit. The cow that does not get enough water or gets it too cold is also at a disadvantage because a cow is in some respects like a growing crop—she must have water first to sustain her body, and second to make milk. Milk, as it comes from the cow, is about 68 de
Making Butter For Market

[Prize Letter.]

I am always interested in the dairy letters and notes in the Mail and Breeze. We make butter rather than sell the cream because we think it is more profitable. Perhaps our method of making separated and then placed in the ice box with the cream which is being saved for the purpose, there will be housed dairy breeds, each individual of which will have been chosen by authority in that breed as being typical of the breed and representative of its best type. Adjacent to this building is planned another one to be devoted to the manufacture, or factory, and for all other purposes.

In another building specially erected for the purpose, there will be housed dairy breeds, each individual of which will have been chosen by authority in that breed as being typical of the marketing butter may benefit some at a disadvantage because a cow is in some respects like a growing crop—she must have water first to sustain her body, and second to make milk. Milk, as it comes from the cow, is about 68 deas it comes from the cow, is about 68 degrees warmer than ice water, and the only way the cow has of warming it is by the feed that she eats.

Kindness is Repaid.

Cows do their best work if they are treated kindly. Giving down milk is in some degree an appreciation of the treatment given her and the better you treat her the more milk she will give, other things being equal. Some persons think it is unfortunate if a cow has a large appetite, but I put my faith in the cow that is first at the feed trough.

When a cow is coming fresh I like to have her rather fat. If she is not fat I feed her grain. In fact, the only time I do not feed her is when I want her to dry up and right after she has freshened until her udder is normal. I think the skimmilk is usually worth more to the calves and hogs than the grain costs that

When the calf is quite young it should have the first milk of the cow, as it has urday. We the laxative qualities that are needed our butter. by the calf. In feeding the calf always use a galvanized iron or tin pail and never a wooden one, as the tin pails are kept clean more easily. Then be sure that the milk is as near blood heat as you can get it and give the calf about 4 or 5 pounds at a feed twice or three times daily until it is about 3 weeks old. Then gradually substitute skimmil, putting in about 1 tablespoon of dried blood meal at each feed. I start to feed chelled some by putting it in the to feed shelled corn by putting it in the calf's mouth while it is wet. I think there is less danger of bowel trouble after they learn to eat grain. I also feed silage and alfalfa hay. A good dry feed is very much appreciated by the

Some one has said that a good sire is half the herd and a poor one is nearly all of it. It is for this reason that I want purebred sires. I get the best results by keeping them by themselves and

WHEN I started milking cows I had leading them out when I need them just just a small herd of grade cattle, as we do in the case of houses. just a small herd of grade cattle. as we do in the case of horses. One can I would, no doubt, have been satisthen keep a more accurate record of the

> I have my cows freshen in the fall and winter. By so doing I think they give more milk in a year's time. By caring for them in the right way you practi-cally have them freshen twice a year, and the cows are dry when the weather is hottest and the flies at their worst. Another advantage of fall freshening is that winter prices for dairy products are better than in summer.

is to cool it and rinse it out with plenty of cool water. The cream is then emptied fair in which such prominence has been into the churn with just enough water to given to the cow and to other livestock rinse out the cans. After the butter has been churned and gathered in one big ball, the buttermilk is drawn off, cool water is added, and the butter washed while it is still in the churn. We then lift the butter salt it working the call wall. the butter, salt it, working the salt well into it, and set it in the ice box until the second working, which I think is the for some time and I think dairying is one of the most profitable branches of most important.

After working out all the water, we wrap each pound brick in parchment paper and then put it in cartons the same as the creamery uses. In this way the butter is kept in a perfectly sanitary condition and it costs very little more. The butter is then placed in the ice box until market day, which is every Saturday. We always get the top price for our butter.

Mrs. P. D. Caskey.

We milk from 10 to 15 cows and have sold as much as \$100 worth of cream a month when the grass was good. We have our butter.

Testing Showed the Best Cow

[Prize Letter.]

After a few years of dairying we find it most satisfactory to raise our own cows. The most important thing in dairying is to have good cows. It is difficult to buy a good cow unless under peculiar circumstances, such as a forced sale. Cull out the poor cows and heifers and after a while you will have a herd that you will be proud of. We have had our cows tested and it pays. The one we had thought of selling proved to be the best. We were judging by the color of her milk and as it was whiter than

and find that it pays well. farmer should own a herd of cows. The cream is always ready cash besides the profit from raising calves. If we could get the farmers to see and realize the easy money in dairying, so many people would not be talking of hard times. Of course it requires a bit of hard work to keep the barns in order as they should be cleaned every morning. I don't think there is anything nicer than a good herd of milk cows.

In butter making be very careful in handling the milk and see that no dirt gets in. Keep the separator clean and separate the cream as soon as you can after milking. Cool the cream as soon as separated. Never add warm cream to cold cream—cool it first. Keep the cream in the cellar or a cool room and when ready to churn the temperature of the cream should be about 50 to 55 de-Wash the churn in hot water and cool with cold water before churning. I never have any trouble about having good butter when I follow the rules. I think it is better to sell the cream than to make butter as there is less waste and Abbie Surbaugh.

The Cow at the "Big Show"

At the great exposition in San Francisco next year the cow and her family will be on exhibition during the entire period from February 20 to December. There will be conducted a dairy demcally have them fresnen cally have them fresnen they will give nearly as much milk as they did after calving in the fall. Besides, by having the cows freshen in the fall the heaviest work comes in the wing pate under expert direction. This will in no sense be a competition between the fall they when the weather breeds, but will have for its object the determination of such questions as determination of such questio quantity and length of lactation period, the sanitary handling of the cattle and of the milk for home manufacture, or

ripens more evenly if stirred frequently. conditions which modern dairy methods

We use a 10-gallon keg churn and churn four or five separations at a time. After each churning the churn is thoroughly scalded so all that is necessary is to cool it and rinse it out with plenty.

There never has been a great more the

There never has been a great world's as is now provided in the plans and premium list of the Panama-Pacific International Exposition.

No Use For Cream Stations

one of the most profitable branches of farming. We have wild pasture in the summer and feed alfalfa hay in the winter with corn ground in the ear. There are very few silos around here but I believe they are of great benefit to the farmers.

We milk from 10 to 15 cows and have in a year, not counting what we used at home.

We have been shipping our butterfat direct to the creamery and in that way we get from 3 to 6 cents a pound more than by shipping it through the receiving station. I would advise every farmer to ship direct to some creamery and cut out the receiving station; also to use the scales and Babcock tester. George Newcomb.

Morrowville, Kan.

School attendance is 80 per cent in good roads states; 64 per cent in bad roads states—a better argument for better roads than all the mudholes that ever mired a team and wagon.

Farmer Onswon Talks on

BEATRICE **Cream Separators**

The man who buys the Beatrice Cream Separator need never buy another separator.

It has but few parts that can ever wear out. And there's not a single part that can ever wear out or rust out that is not replaceable.

When the bowl or other part does finally wear out, you don't have to junk your machine and buy a new one. You simply buy a new part.

If you should replace every single part that could wear out on your Beatrice, the cost would be less than \$35.

Isn't that better than paying \$110 and over for a new machine, which is necessary with some separators?

That is just one of the great Beatrice points. The Beatrice is the high-grade, fair-priced separator that you can clean in two minutes and that gets all the cream whether the milk is hot or cold.

Know all about the Beatrice before buying a cream separator. Be sure to write the nearest office for free catalogue and name of dealer near you.

The Loss in Fertile Eggs airy place until the hens are through batching. They give the old turkey and all the little ones a last dusting and put them in a large coop. I do this after dark so those hatched under the hens will not be afraid of the old turkey.

Put sand in the coop but they are 48. BY W. A. LIPPINCOTT Kansas Agricultural College

class market eggs none is more im-portant or far-reaching than the production of infertile eggs. A very large percentage of the loss which occurs by the deterioration and spoiling of eggs during the hot months comes from the appearance of the blood ring. These blood rings mean just one thing, and that is that the eggs has been partially in is, that the egg has been partially in-cubated, and the embryo has died.

It is quite easy to see this ring in a white-shelled egg, and often quite difficult to discover it in a brown-shelled egg. The germ of an egg begins to develop at any temperature above 70 degrees. The development is more rapid as the temperature becomes higher. This means that any eggs that are fertile and are not kept all the time in a temperature below 70 degrees will sooner or later show the blood ring. It is diffi-cult for the germ to develop in a temperature below 85, and after struggling along for a time it gives up, and the blood ring results.

Down With the "Rings".

Now if the male birds were kept away from the laying flocks there would be no blood rings. It has been found, by experiments carried on in Kansas by investigators from the Bureau of Animal Industry at Washington, that 42 per cent, or nearly half, of the total loss in market eggs during the hot months was eliminated when nothing else was done except to remove the male else was done except to remove the male birds from the flocks. It was further found by these same observations that where the male birds were kept from the laying flocks the eggs were of good size, naturally clean, and when collected twice a day, put in a cave cellar that had a temperature of about 60 degrees, marketed twice a week, and protected from the sun on the way to town, 97 per cent were tested out by an expert candler as first-class eggs. This means that by taking these pains the farmer can practically control deterioration.

A small percentage of eggs probably represented by the 3 per cent that were second class are second-class eggs when they are laid. For the present, at least, it is beyond the control of the farmer to eliminate this small percentage of loss, but it is so small as to be almost negligible.

The Rooster's Fate.

In answer to the question as to what to do with the male birds during any but the breeding season, I would reply, that in my judgment the best practice for the farmer is to purchase strong, bation for all the varieties of covigorous, purebred cockerels of the breed domesticated fowls is as follows: he prefers, each year, and mate them with the breeding flocks of hens about the middle of February. When the breed-ing season is over, dispose of them— get them off the farm. Unless an ar-tificial and inflated purchase price has been paid, the farmer will have gotten his money back in the flock of strong young chicks that are coming on. The best breeding year for a male bird is the first year. When the first season is over turn him off on the market for what he will bring. There is no object in keeping him around to spoil the market value of the eggs by fertilizing them, on the one hand, and eat up food, on the other. Anyway, a new bird of dif-ferent stock will be wanted for the following year.

Canker and Chicken-Pox

I have a disease in my flock that I have been unable to check. I have already killed eight birds and a dozen more are sick. One of the first symptoms is steepiness, affected ones stand around listlessly and then scabs and sores appear on combs and wattles. There are also yellow sores in the mouth, on the throat and tengue. Their eyes and mouths are affected until they can scarcely shut either. The eyes swell up to a large size. When they reach this condition I kill them. What is your advice?—L. W., Conway Springs, Kan.

The symptoms indicate a complication of chicken-pox and canker. These

MONG the means of producing first- ailments are common in the fall but there seems to be a general outbreak this spring, due perhaps to the contin-uous cool and damp weather. The diseases are contagious and the first thing to be done is to separate the well from the sick birds. If possible, remove the well birds to new quarters and thoroughly disinfect the old while treating the sick birds. Get some sulphite of soda and mix a tablespoonful to the gallon of drinking water and allow the birds no other drinking water. It is also well to bathe the heads in this solution. This has been found very effective in loosening up the sores in the mouth which usually may be removed in a few days after they begin drinking this

Wash the affected parts about the head in carbolic soap suds and soften with vaseline. Better still, mix some sulphur with carbolated vaseline and apply to the sores and scabs. Keep the ailing birds closely confined and burn all carcasses of those dying of the dis-

Then You Have a Good Feeder

Turkey Hens the Best Mothers

[Prize Letter.]

I have been quite successful in raising incubator users.—Mrs. On turkeys. I think a flock of turkeys is a great help to the farm as destroyers of insects which are a detriment to growing crops if for no other reason. I gather the eggs while fresh and store them in the cellar. If the weather is very cool I cover them with a flannel cloth. They should be turned every day.

As soon as the turkey wants to sit in earnest, I give her as many eggs as she can cover well, usually from 15 to 18. At the same time I set three hens on turkey eggs. They should have good, clean nests and be thoroughly dusted with insect powder once a week for three weeks. On the twenty-fifth day give them another good dusting and remove the old nest. Put in clean straw and let them alone until they hatch. When the young turkeys are quite dry, remove Servian women fought at the from the nest and put in a warm, against the Turks in the Balkan war.

the young turkeys until they are 48 hours old when they may have a little commercial chick food. Do not overfeed them. Give them water but do not let them get wet. After they have been in the coop two or three days to accustom them to their mother. I turn them out for the summer and do not feed them again until I fatten them for Thanksgiving. They feed on bugs and grass-hoppers and I see that they can get plenty of water. Turkeys know more about selecting the proper food for their young than most of us do.

Remedy for Lice

I should like to have a remedy for lice on horses described in the Farmers Mail and Breeze about a year ago. I should like also to have the remedy for chicken-pot published a few months ago.

Coffey county, Kansas, W. F. W.

A very good method of treating horses for lice is to mix 2 table-spoonsful of some standard dip with I gallon of water. Apply this mix-ture to the entire body of the horse, rubbing it into the mane and tail thor-oughly. Rinse the body well with luke-warm water after the dip has been on

warm water after the dip has been on about a half hour. Blanket the animal if the weather is at all chilly.

Chickenpox is a contagious disease, the infection of which usually is brought from outside sources. It appears in small yellow ulcers about the beek nostrils eves and other parts of beak, nostrils, eyes and other parts of the head, hence the common name of "sore head". Wash the affected parts with carbolic soapsuds and then apply vaseline to soften the sores.

We would suggest that our corres

pondent obtain a binder and keep the copies of the Farmers Mail and Breeze on file so that information such as this will be available when needed.

The Brownies Shelled Out

A report from Mrs. E. E. Knight, living south-of Olathe, Kan., states that she sold 1,050 dozen eggs during Feb-ruary, March and April, from 200 Brown Leghorn hens and pullets. In addition there was an average allowance of a dozen eggs a day for table use. Not a bad income from chickens.

Try This to Keep Off Disease

There is no better disinfectant so far as my experience goes, than crude carbolic acid. A tablespoonful in a pail of water used to wash out the chicken's water trough twice a week will make poultry diseases scarce. Use also as a spray on roosts and other poultry house fixtures. Hugh A. McCord.

Elk City, Kan.

Incubator Chicks

Dear Sir: We hear so much about the difficulty of raising incubator chicks. I have been in the business for 21 years, always lost so many I was quite discouraged. This year I sent 50c (M. O.) to the Walker Remedy Co., L 13, Lamoni, Iowa, for their Walke Remedy and am having great success with it—makes me think I have found a gold mine. If I had only tried it long ago, just think of the hundreds, yes thousands of little downy fellows I could have saved. It certainly is a boon to incubator users.—Mrs. Chris Wolf, Ex-

Human Turnstiles

Boys and Girls May Help Father Keep a Plan Book

BY W. CLEMENT MOORE.

always alert for methods which will save time and money.

It is best in every line of business—
and farming is no exception—to plan out carefully the work that is to be accomplished in the future. A plan book is the best solution to this problem—one that may be carried in the vest pocket, similar to the pocket diary, will answer very well—although I know some very good farmers who I know some very good farmers who prefer to use a large white card, or calendar back, ruled off in 31 lines and

the items and plans are known not Berneta Clark, Augusta, Kan.; and only to the farmer but to his family, Daisy G. Chadwick, Box 27, Loring, so that in his absence or illness the Kan. work goes ahead without loss, just as he had planned it.

Entries are shown in the foregoing for the first fifteen days of July. Such entries will, of course, depend entirely upon the kind of work the farmer has

These are simply representative items in one case and do not apply to any particular year, but they show the representative methods employed by the farmer in or-der to keep things working smoothly. This farmer is educated, or trained, rather, to his business, and during his leisure moments thinks out and plans ahead to meet the little matters con-stantly worrying the average farmer

stantly worrying the average farmer and keeping him awake nights.

No cost is attached to such a record, and there is no reason why it should not have a fair trial. Of course, if it is hung up as suggested, for all to see, there may be a few personal matters which the farmer would not care to jot down, but this need not matter, as the main purpose of the record is to the main purpose of the record is to aid in the management of the farm work.

It is not sufficient, however, to rule off the record and jot down a few items on it without a thought or plan. In your quiet house, much care and thought should be given to the planning of your future work, and then having fixed upon a definite plan or idea, the result of your thoughts should be jotted down on the record card, lest the whole purpose of the thinking be lost or forgotten.

You will not need to think long to recall many cases where you have planned to do certain things about your farm and then have forgotten them entirely until it was too late.

entirely until it was too late.

The plan is worth the careful attention of every progressive farmer, and is sure to be productive of good. Every farmer can adopt one of these books in which to keep his farm work carefully planned through the year, a month or two ahead of the operations scheduled. The benefit lies in bringscheduled. The benefit lies in bringing system into the work where in many instances several odd jobs would accumulate.

Sewing Models Were Good

The prize winners in the sewing contest are Pearl Chitty, Alta Vista, Kan.; Annie Aitken, Severy, Kan.; Ella L. Krause, Marysville, Kan. The junior sewing editor was surprised to see the excellent work done in the con-

Here is something which the farm boy or girl can arrange for father and help him keep planned accurately. Make it for him now, and he will appreciate it.

Farmers, in order to be successful in their work should be systematic, not only in their general business transactions, but in farm operations and management. Many good ideas may suggest themselves to the farmer who is always alert for methods which will save time and money.

Smith Center, Kan. Vera Stein.

Dish Washing Four Times a Day. My mother was born in England. She

went to school when she was very young as all little ones have to go to school young there. And they go the year around. She used to like to wear her mother's little bonnet with a veil on it. They had four meals a day. Breakfast came at 7 o'clock, dinner at 12 o'clock, tea at 4, and supper at 7 or 8 o'clock. One time mamma's sister 8 o'clock. One time mamma's sister and she went down to the sea as they always do there and were waiting for the tide to come in. Grandma was waiting for them for it was almost train time and mamma lived twenty miles from the seashore. When grandma came to get them, there she saw both mamma and her sister in the sea with their shoes and stockings off. They with their shoes and stockings off. They had to run and finish putting on their shoes half running and half walking. Grandma was angry but she could not keep from laughing to see the girls hopping along trying to dress. It was very interesting on the big ship when mamma came to this country. There were 500 persons who were just the crew. The ship was called the City of Paris. Mamma saw a whole and a hig isohard ma saw a whale and a big iceberg. They were just a week on the ocean. When they were on the train going to Chicago her sister May was looking out of the train window and her hat blew off. Grandma had to buy her one in Chicago, and every one just looked at them and mamma said they felt so silly. Grandma bought a blackberry pie to eat on the train but the people looked at them so much they made grandma put it in her lap and they took a bite once in a while when no one was looking. But mamma says she likes this country best. She says it is a free country and lots of good people are here. Wathena, Kan. Arbie Weber.

His Father Crossed the Sea.

grandmother and the two older children went some distance from the house to help fight fire. Three little children three years old, and then the years old, my papa who was four, and a little girl who was in a cradle. The boys usually went upstairs to take a nap and the old dog used to go along and sleep under the bed. That day the old dog went up stairs to take his nap as usual, but the boys didn't go. The fire came suddenly from another direction and the barn and outbuildings caught fire. The little boys watched the barn and outbuildings burn and thought it was fun. But when the glass in the windows of the house began to school and the came with his father are amountery and then he came with his father er and mother to Kansas when he was hot find much to eat. And now my father is 38 years old. And he went to school when he first reader and then he did not go any more to school. And and he got in the proof of the school and a poor hat. And my father helped his father when he was a boy. He had to herd cattle around the road and father said that they had lots of fun. They were killing snakes. The snakes were under the rocks. My father got two brothers and two sisters and two brothers died and two sisters, too.

It's Wise to Deal in Futures to melt they thought it was time to When my father was a young man he get out. They pulled the cradle with said he went to a dance and each dance their little sister in it out of the house. he had a new girl. Then he got married when the parents returned they found and lived on a rent and he had to buy children were safe. The old dog burned farm. There are 120 acres. Now on this farm my father lived about 11 years. My father caught on fire and he burned his hands so he had to go to the doctor. And my father had been operated on 2 years ago in Omaha. And once he was bacheloring and he was baking biscuits and he didn't put any baking powder in them and then you could know how the biscuits looked.

And I forgot to tell you that my father had a runaway once. When he went to a dance with his girl the seat of the cart broke and they fell down and the horse wanted to run but my father got hold of the lines so he stopped the horse. My father that time skinned his head a little. And one time he was riding with an old horse and the horse was nearly dead and my father had to get off and walk home, and then the horse died and now my father has good horses.

Frank Trecek. Cuba, Kan.

A Small Family, This.

Mother had quite a time of it when she worked out. She worked for a family. There were only two in this family, just a man and his wife. When mamma cooked any meals, she had to set the meals in the dining room. The lady would eat in the room all alone because her husband, was now at home cause her husband was never at home. Mother was never allowed to eat in the same room. When she ate, she had to go in the kitchen.

Where Was St. Patrick?

One day in May my mother and her little sister were returning from school. They saw a large rattle snake lying across the road on a hillside sunning itself. They got sticks and stones and tried to kill it but it ran or crawled tried to kill it but it ran or crawled away into the grass. They ran after it throwing stones. Then they heard the rattling of a snake and looking around, they saw they were completely surrounded by rattle snakes. Summoning up their courage they picked their way out back to the road and reached home safely. A short time after a farmer near there with his hired man found and killed a den of eighty rattlers. and killed a den of eighty rattlers. Hazel Elder.

R. 1, Morrowville, Kan.

Against the County Unit Plan

(Continued from Page 7.)

among the farmers is that the city is going to take the power of the district boards from them, and force city ideas and city administration upon them.

What is needed is a better understanding between educators and farmers. Both can make some concessions. The farmer should realize that the educators are working for better school conditions in the country. The educators should concede to the farmers the right to determine what course of study shall be pursued.

I liked Mr. Hatch's article, but I take issue with him on the Barnes Law. I believe the Barnes Law was intended to aid in the establishing of country high schools. I have taught two years here in a consolidated school. We have an enrollment of twenty-two this year in the high school course. We are accredited by the State University. We expect to graduate a class of five in 1915. In counties where the Barnes Law is in effect consolidation offers an excellent opportunity for the establishing of a Barnes High School.

In counties where the Barnes Law does not exist Mr. Hatch's proposed country high school would operate satisfactorily. Then the board could decide from local sentiment what courses should be taught, and thus eliminate the complaint that the State University dictates what courses shall be pursued before the school can participate in the county tax

I wish more farmers would express their opinions on school problems. A. R. Baldwin. Kipp, Kan.

A heifer calf that is to be raised for the dairy should be handled and made accustomed to all necessary manipulations from the time she is a calf until maturity, in which case she will be little or no trouble and make a better cow.

He Didn't Touch Home

"Strike two, ball three!" the um-pire cried, and then our Casey

pire cried, and then our Casey swung
And hit the ball a mighty swipe with his good wagon-tongue.
Above the fielders high it soared a speck against the sky.
While round the bases Casey round with triumb in his romped with triumph in his

eye.
"Home run! Home run!" the rooters whooped, as Casey turned at third—

Third—

Center, miles away,

at third—
In Hopewell Center, miles away,
the cheering could be heard;
And panting Casey on the bench
sat down, a famous lad,
While in the stands above his head
the crowd went nearly mad.

But standing there beside the plate the frantic catcher yelled, "Throw up the ball!" and high his glove he held, And when he had the bounding sphere, he rushed with savage vim

To smilling Casey on the bench and tagged the ball on him.
"You're out!" the umpire loudly called, and all the crowd was dazed.

And mad for fair this time they went, and much disturbance raised.
But "out" the umpire's verdict stood; the crowd might fume and foam;
For Casey in his circuit had neglected touching home.

How like to Casey's downfall are the failures all about Of men who swat the business ball with fierce and crashing clout; Who race around the bases, winning fortunes right along Amid the cheers and envy of the adulating throng!

They gather wordly honors and a reputation tall, But overlook the very most important thing of all.

Among the big world's champions, wherever you may roam, There's many a heavy hitter who forgets to touch at home.

"Six thousand, five hundred eleven dollars, and forty-four cents—that's what I've earned; and I've had my board and room and chicken money! board and room and chicken money! I know it's wrong to figure my work in dollars, Sam. A woman's work isn't figured that way. That's why I counted everything so low. You couldn't get cooks and dressmakers and milliners to work that cheaply, Sam, you know that. I didn't put down the sore fingers I've tied up, nor charge you with caring for the children, that's the work I'm doing for eternity. But I thought if I'd put down a few of the things in dollars you'd see it," I said.

There are some things a woman won't talk about—some things are too sad and some things are too thrillingly sweet. There are looks that one never tries to describe—helpless baby looks into mother's eyes, tiny-girl looks into doll's eyes, prince-charming glances

What's the use of concealing results longer? During the last paragraph you have inferred that Sam saw it, that Mary Ellen got the doll, and that I got a check book. He did, she did, and I

The First Fruits Are Safest

Many a housewife has regretted, when a drouth caused a shortage of later things, that she did not put up more of the early fruits. Some of the earlier ones, as the early peaches, are tasteless, but in combination with other fruit they are a valuable addition to the preserve closet. Do not peel the peaches but wash well, cut them from the nits and atom slowly with from the pits and stew slowly with augar until the juice is absorbed. Combined with shredded pineapple in the proportions of a small can of the pineapple to a gallon of the cooked-down peaches the result is a delicious marmalade. The cost is very little more than it would be without the pineapple, and it is more like pineapple than peach.

Rhubarb will combine with the tasteless mulberry and produce a flavor al-most like blackberries. I have often had pies made from th a comb taken for blackberry pies. Bushels of both fruits go to waste every year that might be utilized if this were that might be utilized if this were well known. When making rhubarb pies or sauce combine the rhubarb with lemon, orange, or stewed raisins to

make a variety. When you can cherries can all the juice you can get, and in the summer and fall see how easily it will "jell" by adding currant, crabapple or quince juice, about one-third of its bulk, and yet retain the cherry flavor. Using these often-neglected fruits is one way to overcome the high cost of living. Topeka, Kan. Mrs. H. C. Davis.

At an elevation of 4,100 feet, thirty different kinds of vegetables have been successfully grown in the garden at the Scottsbluff, Neb., Experiment Farm.

Reo the Fifth—\$1,175 With Electric Starter and Complete Equipment

This is the Super-Car

Reo the Fifth-Mr. Olds' great car-is not built by usual standards. It is built for men who want a super-car.

It is built for years of perfect service—built to withstand abnormal strains. It is built to bring troubles, upkeep and repairs down to the lowest notch.

The driving parts are one-half stronger than necessary. They meet the tests of a 50-horsepower engine. The steel is made to formula. The gears are tested for 75,000 pounds per tooth.

There are 15 roller bearings-190 drop forgings. There is a costly clutch to prevent gear clashing. There is a simple method of shifting gears.

We spend six weeks on each car to get utter exactness, and to properly test each part. No other car in this class was ever built so slowly, so carefully, in such a costly way.

The result soon shows. The parts stand the strains. There is freedom from trouble and repairs. The car stays new. It doesn't grow noisy. When lesserbuilt cars begin to show their shortcomings, Reo the Fifth shows its staunchness.

Rough Usage

Under normal conditions-on smooth roads—lesser cars may do. But the farmer, on the usual country road, needs a car like this. He needs these margins of safety, this vast over-capacity, this super-strength.

Men are finding this out. Every year, thousands of men who have owned other cars are buying Reo the Fifth. And every buyer tells other men to buy it.

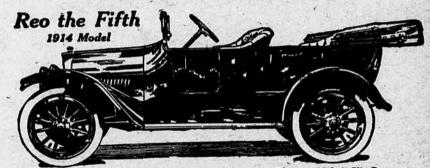

New This Year

This year comes the new streamline body. There are many new ideas in equipment. The car excels in appearance now as it does in the hidden parts.

And there comes a new price-\$220 less than last year with electric starter. So price no longer bars you from the utmost

Why We Study Agriculture

BY HERBERT LADD, Salina High School.

Agriculture, in the high schools of

Agriculture, in the high schools of the United States, is a subject just added during the last few years. The younger boys and girls of today are beginning to awaken to the fact that agriculture must be thoroughly studied.

We study agriculture to learn better methods of farming. Soils must be carefully studied, as poor soils may be made to be productive by the use of fertilizers. The study of drainage and irrigation are also important factors in making barren soils producive. At this time, the government is building this time, the government is building reservoirs and irrigation ditches to irri-gate the arid lands in the western part of the United States. Seeds also should be carefully studied, as to their selection, where they should be kept during the winter menths and how their purity may be tested before put-ting them into the soil.

As livestock is a great source of income to the farmer, not the least important feature of the study of agriculture is that pertaining to the care and selection of livestock. Another step of the government in helping the farmer, is using bulletins to prevent contagious diseases from spreading among different herds.

All this knowledge helps to increase the farmer's wealth and this prosperity enables him to provide better advantages for his family in regard to both the comforts and luxuries of life. Many farmers have their own electric light, plant water system and other light plant, water system and other modern conveniences in their homes. However, the effect of this prosperity does not end here, but shows itself in better roads, churches, schools and thus the whole community is benefited by the farmers' increased wealth. That the professional or business man may secure through the farmers

their share of the increased prosperity, it is becoming more and more neces-sary that they too become familiar with the subject of agriculture, in order that they may be able to discuss intelligently with the farmer a sub-ject of such vital importance to him.

Cattle and Meat Imports

More than 11,500 beef cattle and 98,000 feeder cattle were imported by the United States in February. These cattle came from Canada and Mexico. The imports from Canada amounted to 1,956 cattle for slaughter, 107 feeder cattle, and 158 dairy and breeding cattle, while those from Mexico consisted of 9,586 cattle for slaughter, 98,206 feeder cat-

tle, and seven breeding or dairy cattle. The imports of fresh and refrigerated meats during the same month amounted to more than 8 million pounds of beef and more than 11/8 million pounds of other meat. The amount of canned and cured meat brought in during the same handle three years of high school work time was almost a million pounds and very well where the classes are small, the amount of other meat products totaled about 350,000 pounds. The bulk of the fresh meat came from Argentina A school of the kind I have pictured and Universely, while most of the capital have pictured for me low as \$2000. future when better transportation facilities are available.

How We Study Agriculture

BY GROVER SIMPSON.

For all the boys taking the Normal Training course in the Salina High School agriculture is a required subject, but anyone else may take it as an elective. The class, held every day, is at present composed of fifteen pupils, the majority boys. Three days in the week we have recitation and the other two days we have laboratory work. We study Warren's "Elements of Agriculture" which deals with farm problems in the tax rate would be increased one and one-third mills on the dollar above the average rate. While this is not pleasant it is not prohibitive. With the average tax now levied for the support of the rural schools it would still leave the combined school tax lower than in most of our first and second class cities.

I have been over the whole ground time and again with thoughtful farmers and farmers' wives, and most of them who live more than two or three miles from town are not getting a square two days we have laboratory work. We study Warren's "Elements of Agriculture" which deals with farm problems such as the improvement of the soil and the manner in which it may be improved. In fact every phase of farm states. There seems to be only two life and things pertaining to the farm possible solutions of the difficulty, the are studied. In recitation we not only country high school or the consolidated

up questions about farm life.

The Salina High School is very well equipped for laboratory work in agri-culture. The class is held in the physics and chemistry laboratories. In this way we have the use of all of the materials of the physics and chemistry. materials of the physics and chemistry well.

The Free

classes. The laboratory is equipped with ten tables. Gas burners are fixed on these tables so it is very easy to get heat. Another very helpful thing is the lantern and the great number of slides in the laboratory. Every small article that cannot be seen with the naked eye can be thrown on the screen and then it is very easy to know the and then it is very easy to know the different parts. Everything that is needed is in the laboratory.

As I have said before two periods a week are taken up in laboratory work. In the laboratory we prove the facts laid down by the book. Already this year we have had many experiments. For instance: We have learned how much organic and mineral matter and water there is in a potato. Another thing we have learned is to test milk with the Babcock milk tester. The different kinds of seeds and their relation and adaptation to the soil have been studied. These are just a few of the many things with which we have experimented. experimented.

Give Rural Pupils a Chance

(Continued from Page 14.)

were carefully selected. For principal I should choose a man prepared to teach agriculture from a practical standpoint who is good in mathematics. He also should have an interest in athletics. One woman teacher should be able to teach domestic science and other branches such as English and history. If there were a third teacher I should like that teach-er to be prepared to teach vocal music. Someone also should be able to teach manual training or farm mechanics. In this class I would not have the boys taught to make comb-cases, fancy foot-stools and towel racks as is frequently done in the town schools, but would have them taught to make every day farm articles, beginning with such sim-ple pieces as a milk stool or a double-

the less populous townships the teaching force might-even be reduced to two. That number of teachers can to two.

Trust busting in the past has cost the consumer dearly. Heavy fines have been paid by increases in prices; now, if a prison sentence of a number of years, either confinement or hard labor, had been meted out, the other fellows would have been more careful. Send them up if they violate the law, just as we are treating the man who steals a loaf of bread or bag of coal. Justice and equity should govern:

and Uruguay, while most of the canned could be maintained for as low as \$2000 and Uruguay, while most of the canned could be maintained for a 20 and cured meat was imported from Ausannually exclusive of the original cost tralia. These figures indicate what may of the building. There are many townbe expected from these countries in the ships in the state with an assessed valuture when better transportation facility. In a township with a valuation of 11/2 million dollars to support a township high school that cost \$2000 annually, the

from town are not getting a square deal. The rural schools of Kansas have fallen behind in the procession of the are studied. In recitation we not only country high school or the consolidated recite "What we know", but also take school, comprising both high school and up questions about farm life.

On Farms Where Efficiency Rules

-where progressiveness marks every feature of equipment and method-you will find the buildings covered, once and forever, with

Hay Sellers' Fees Resented

Farmers Combine to Oppose the Kansas City Advance

BY F. B. NICHOLS, Field Editor.

TO-DAY is money in the bank, subjec' t' check. To-morrow is money thet ain't even been airned Don't overyet. draw. Welver goe

VELVET is to-day's "surest thing" enjoyment — The Smoothest Smoking Tobacco, made of Kentucky Burley de Luxe with an aged-in-the-wood smoothness. Coupons of Value with VELVET, Full weight 2 oz. tins, 10c.

association, which is designed to form a is assuming that there are 12 tons of working basis among the farmers' organhay in the average car. izations of Kansas. The special aim is

If some of the Kansas City hay deal-to work out a new marketing system ers who forced this advance and who for hay to overcome the advance in hay allege that they cannot live if the charge officers of the new organization are: George Plumb, Emporia, president and C. D. Resler, Chanute, secretary.

Those who attended the meeting were

representative farmers; men were present from all parts of the state, and all the leading farmers' organizations were represented. Another meeting will be held soon, at which it is expected that from one to five delegates from every county and every state-wide farmers' organization will be present. A state-wide farmers' exchange organization with loss which he and other shippers from local organizations will be organized, Woodson and the other leading hay counlocal organizations will be organized, and the producers then will be in a po-

ers' association; James N. Russell and along the line. E. C. Kruse of the Russell Grain company; and Charles D. Carlyle of the Carlyle Commission company. In the course of a speech defending the advance in commission charges, Mr. Russell said:

Kansas City is the largest hay market in the world, and it is the best one. We give good service, and this service costs money. It has been believed for some time that the charges were too low, when the quality of the service we give is considered, so the advance was made in March."

Not All Are Dealers.

March 27 there are 57 members of the against 27 there are 57 members of the Kansas City Hay Dealers' association ducers get together and form an organ-according to a list furnished by the sectaction they can make other organizatetary to a representative of this paper tions pay some attention to them.

A. Docking of Manhattan called attention to the fact that the farmers dealers. Forty-four men and firms are tention to the fact that the farmers March 9. Not all of these men are dealers. Forty-four men and firms are classified by the Kansas City directory

The receipts of hay on the Kansas City market average about 30,000 cars a year, which would be about 600 cars a year to be handled for a company, or about two cars a working day. It is quite obvious that the business is sadly overdone. Too many hay dealers are making their living, and an easy one at that, off the hay producers of Kansas and other states in the Middle West. Much of the business is taken by about a dozen of the leading firms. They got along fairly well in 1912 when the re-ceipts were 31,182 cars, but the receipts decreased to 26,352 cars in 1913, largely on account of the drouth of last year. This decreased the business, so it was decided to add a little more tax on the producers

Every hay shipper who addressed the farm paper and though I am a woman Emporia meeting said that the advance was absolutely unjustified; and many of them, George K. Bideau of Chanute of them, George K. Bideau of Chanute (Mrs.) Adah L. Roussan. as an example, have had an immense amount of experience in hay shipping. Mr. Bideau has been in the hay business several trainloads every year. Representatives of the Farmers Mail and Breeze have spent considerable time in this hay investigation on the Kansas City market and the only reason that almost 30 years, and usually he ships City market, and the only reason they could find for the advance in rates is that there are several times too many men in the business. Under the old rate there was not enough hay to go around to make a living for all of the men; the cost of living is high on the scale used by most of the dealers.

So the hay producers are asked to contribute \$114,264 to this high cost of living business for the Kansas City dealers this year, if the receipts are as large Ill., today.

COUR hundred farmers met in Em- as they were in 1912; and if we have a poria Friday, May 15, and organ-normal year it is probable that the reized the Kansas Farmers' Produce ceipts will be equal to that year. This

for hay to overcome the advance in hay allege that they cannot live if the charge commission charges on the Kansas City were left at 50 cents a ton would get market from 50 to 75 cents a ton. The out on a Kansas farm and produce this hav they would come to believe that the \$114,264 should be left with the pro-ducers who do the hard work and also it might be that the dealers who are left in Kansas City could get along

Woodson and the other leading hay counties of Kansas have suffered because of poor service. He does not believe that sition to oppose the advance in rates.

Kansas City hay dealers were well any special care is taken in the service, represented at the Emporia meeting, or that it is expensive. And there are of the B. F. Tyler Commission company, more hay than Mr. Bideau, or who have president of the Kansas City Hay Dealpresident of the Kansas Nave suffered because of Kansas nave suffered because of the city of

But There Are Others.

But the producer has to pay other fees. There is a charge of 50 cents a car for switching, another charge of 50 cents for inspection and another of 15 cents for "watchman's fees." Then if the hay is not all of one grade there are still further charges. As one of the speakers said: "What they do to a hay shipper down there with the system they have is sad to see."

Joe Mercer, secretary of the Kansas Livestock commission, told of the work of that association in helping out the The contention of the speakers for the shippers of animals. He gave many exhap producers was that the advance in amples to show that it is essential that rates was not justified. As was shown the shippers should be organized, so they in the "So Up Go the Hay Rates" story can employ someone to care for their in the Farmers Mail and Breeze for interests. One shipper has little chance March 27 there are 57 members of the against a combination, but when the pro-

as hay dealers and eight as dealers in All other classes have formed organized. All other classes have formed organizations out of the hay business.

The receipts of house states and livestally as the farmers are the last persons to get organized. the front rank among the farming na-tions of the country by their organizations.

George Plumb, the president of the new organization, will soon announce the call for the new state-wide meeting. By that time plans will be perfected for opposing the advance in the hay commission charges.

I like the Farmers Mail and Breeze, especially as a stock paper. Driftwood, Okla. L. Cheal.

The first manure spreader ever built was constructed by the Kemp & Burpee Manufacturing company in 1878. This first machine is on the sample floor of the Marseilles company at East Moline,

operating under equal conditions. Solid oak framed, bolted and mortised; impossible to pull out of line. Special high-grade tool-steel knives correctly spiraled to give clean, shearing cut. Cuts ten lengths from % to 2% inches. Tremendous capacity; throat on larger sizes takes whole bundles. One lever controls feed rolls and table. Independent belt driven blower; speed adjustable to minimum use of power for any height silo. Positive, self-feed frictionless table; saves power and labor. Lowdown, cut-under frame makes machine easy to handle. Safety device positively prevents breakage. Four sizes.

Free: Book on Silo Building

Describes all types of silos; how they are built, and the advantages deach kind. Oatalog of Appleton Silo Fillers, Corn Huskers, Gasoline Engines, Manure preaders Corn Shellers, etc., also free. Appleton Mfg. Co., 487 Farge St., Batavia, III., Est. 1872

WORLD'S STANDARD FOR OVER 30 YEARS

The Freeman Ensilage Cutter is the strongest, safest, most durable, convenient and capable cutter ever perfected.

Force feed type—handles biggest bundles with remarkable ease.

It runs smoother and faster, cuts cleaner, uses less power than any other machine. Cuts cut, saves time, steps wate. Has adjustable knives, large feed rolls, safety fly wheel, safety step lever; can be brought to a standstill instantly. Enclosed Steel Carrier (Patented) is steel enclosed—fills silo quicker, reduces running expense, pre-

"The Helper" Concrete Mixer A MONEY SAVER FOR THE FARMER

Mixes a batch a minute—two cubic feet per batch. While one is mixing prepare the next. You can't afford to mix your concrete by hand when a one to two horse power engine will do it better. "The Helper" will pay for itself in one week. You can also use it for mixing feeds, fertilizers, etc. We also make other styles of concrete mixers. Write at once for free illustrated literature.

THE CEMENT TILE MACHINERY COMPANY Waterloo, Iowa 261 Rath St., Concrete Machinery Mfrs.,

Kansas Has a Good Road

Much interest is being taken in Kan-sas over the Golden Belt road. This public highway offers the shortest, most picturesque and best route between Kansas City and Colorado. It traverses the rich Kaw and Smoky Hill valleys, the wheat section of Kansas, and takes the most direct route over the high plains. It connects at the Kansas-Colo-rado state line with the Midland high-way into Denver and Colorado Springs. At Salina it connects with the Meridian road north and south across Kansas and at Wilson with the Sunflower trail from kearney, Neb., to Ellinwood, Kan. It parallels the Union Pacific railway from Kansas City to Colby and the Chicago, Rock Island & Pacific from Colby to the state line.

The Golden Belt road is marked from

end to end at every turn. Signs bearing the words, "Golden Belt Road," in yellow letters on blue background are placed where a turn is to be made. Preceding each turn, where practicable, three telephone poles are marked with yellow bands to indicate a turn. Much of the route is marked with a yellow band on every telephone pole along the road. "Danger" signs give warning of dangerous places.

Much special work has been done on the Golden Belt road during the past few months. The aim of every county is to make it a perfect highway. With the automobile tax it can be kept to a high standard. Some of the special work reported is:

Shawnee County-The Golden Belt

industry, to be held in Washington D. C., June 2, 3, and 4. The manufacturing value of American wools; the improvement of farm and ranch methods of handling wool; the possible adaptation of foreign methods to American conditions; the standardization of the wool clip, and the prevention of damage by dogs and predatory animals are some of the topics to be discussed.

The animal husbandry division of the Bureau of Animal Industry will make an exhibit of wools and wool fabrics collected for educational purposes. This exhibit shows the market requirements and the proper preparation of wool for market.

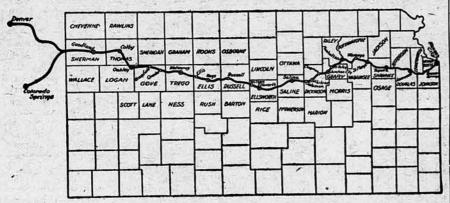

Benefits of Farm Co-operation

Farmers do not need any help from the government nor from any other bus-iness enterprise. This thing of offering help to the farmer reminds me of the man who took a boatride with a fisherman. This man lost his balance and fell overboard. He struggled and raised a cry for help but the fisherman only laughed. "You fool," said he, "why don't you stand up? The water is only three feet deep."

Why should not farmers stand up and help themselves? They have the means in their own hands—organization and co-operation. Every industry or class of laborers, from the big trust down to newsboys and bootblacks has Only two classes are not orits union. Only two classes ganized—idiots and farmers.

Many attempts have been made at road has been graveled entirely across the county, and it has a roadbed that is good in all souts of weather.

Riley County—The boosters of Manhattan have spent in work and money about \$4,000, making the famous Stagg education or sense enough to see the

hill and the sand stretch west of it to benefits of organization.

transforming it into a first class high-

way, good in all weather.

Ellsworth County—The Harker hills have been graded and smoothed until the run over them is one of the finest rides on the road.

Sherman County — The thirty-mile straightaway across that county has been graded in one contract and it is kept in fine condition.

Belt Road association are: President, meal, coal, sand and cement, in carload C. M. Harger, Abilene; first vice president, cost, and saved many hundreds of dolent, G. W. How to Add Lime

A subscriber at Weir asks if it is all right to add lime with the fertilizer attachment of a drill or corn planter. This was commonly done last year in Cherokee county, by men who did not understand the use of lime. Lime is not a fertilizer; it is applied for the purpose of correcting acidity and making condi-tions in the soil more favorable for the plants. At least two tons an acre of ground limestone should be applied at a time. A lime spreader, or a manure spreader may be used, or it may be

FOR SALE No Competition in Cattle Prair

Packers' Manipulation of Market Continues-New Record on Lambs

Market Editor

ACK of competition in the cattle market is rather amazing, especially when the supply of fat cattle is short and there is no indication of a material increase in the future. Packers' orders are so surprisingly well adapted to the fat steers offered that they do not come in competition with each other.

Salesmen say that the market is on a "one-bid" basis. The first packer-buyer is makes the price of the cattle and none will follow and raise his bid. While striking similarity exists in packers' bids, the order buying business is extremely dull. Men who in former years at this season bought 30 to 40 carloads weekly, to go East, are buying 90 per cent less than a year ago, and their business in the aggregate is so small that some have quit the trade entirely.

Not in the past 10 years has consumption of beef is the East been smaller than at the present time, though in the Central West it is fully up to normal. Killers say that conditions in the Mississippi, Ohio and Missouri river valleys are far better than on either coast.

Trading on Basis of Fills.

While there seems to be a lack of competition, prices have not shown any material quotable change. The greatest varies and there is no indication of a material and the supply of grain, or the demand is small.

Grain Prices Higher.

Grain Prices Higher.

The visible supply of grain, or the amount available at markets for immediate use is showing a rather alarming decrease. This means that the movement of grain from the country to markets is subsellable at markets for immediate use is showing a rather alarming decrease. This means that the movent and the use of grain from the country to markets for immediate use is showing a rather alarming devage. This is showing a rather alarming

Trading on Basis of Fills.

While there seems to be a lack of competition, prices have not shown any material quotable change. The greatest variations were made on the degree of "fill" shown by the cattle. Early last week, with temperatures above 80 degrees, killers took off 10 to 15 cents a hundred pounds in the price, but after Tuesday, with unseasonably low temperatures prevailing, cattle drank less and weighed less but killers put on a little. Monday of last week a big drove of western steers averaged 1,148 pounds, and brought \$7.70. The difference in weight made the steers that sold for \$7.60 bring \$1.16 more a head than those that filled poorly but sold at \$7.70 on Thursday.

"Fills" as they are made are theoretically wrong, but manipulated as they are the killer-buyers see that they do not work a hardship on themselves. On the early market killers will buy a few bunches in great haste to give the trade the appearance of activity so that salesmen will fill the cattle and prepare to trade, then they sit back and wait for the shrink to set in.

Hog Prices Nearly Stationary.

Hog Prices Nearly Stationary.

Hog prices last week held within a narrow range and Saturday were a shade higher than at the close of the preceding week. This small net gain, however, was worthy of note as it was brought about in the face of an increased movement and a falling off in shipping demand. Packers bought freely and it now appears that the lowest point of the season has been passed.

Country reports indicate that fat hogs are scarce, and market receipts will be determined largely by what conditions of health and crops prevail in the next three months. The country in general is in a position to stock up on hogs, and many have already contracted hogs for fall feeding. Packers say that with a good corn crop the winter packing season will open with light supplies and close with heavy receipts.

Lambs Make New Records.

Spring lambs up to \$10 in Chicago, wooled fed lambs up to \$9.20 in Kansas City. These are new high records for the season. Chicago was practically without offerings of wooled fed lambs, and on that account made no new high records in that class. General improvement was noted in all classes, notwithstanding the increased movement of grass sheep. Demand for both mutton and wool is the largest of the season.

The Movement in Livestock.

The following table shows receipts of cattle, hogs and sheep at the five western markets last week, the previous week and a year ago:

a Jear ago.	Cattle	Hogs	Sheep
Kansas City		45.650	56,700
Chicago		112,000	84,000
Omaha		41,300	28,700
St. Louis		49,800	16,500
St. Joseph		28,200	20,700
Total	92,300	276,950	204,600
Preceding week		237.400	184.250
Year ago	98,700	309,600	169,700
The following f	igures s	how rece	ipts of
livestock in Kan	sas City	thus f	ar this
year, together wi	th receip	ots in th	e same
period 1913:			
1914			Dec
Cattle 486,7	67 572,39	4	85,62

Calves 25,654
Hogs 796,848
Sheep 774,743
H. & M. 38,476
Cars 32,836 29,274 957,844 772,332 89,345 40,183

The following table shows a comparison in prices of best offerings of livestock at Kansas City and Chicago for this date and one year ago: Per 100 lbs. 1914 1913 1914 1913 1914 1913 1914 1913 Chicago. . \$9.30 \$8.90 \$8.60 \$8.26 \$7.75 \$6.85 Kan. City—9.10 8.60 \$8.50 8.45 6.75 7.00

Good sound horses, for express, city hauling and heavy draft work are extremely scarce. The country seems to have sold short on the best kind or is holding a fairly large supply for its own use. Farm and harvest requirements will need a big supply of horse power from now on, and there will be no general selling until late in August. Dealers say that June to September is always a period of

Good Prices for Broomcorn Expected.

Good Prices for Broomcorn Expected.

Indications that practically none of the 1913 crop of broomcorn will be left by the time the 1914 crop is available makes broomcorn growers optimistic about comadg prices. Last year's crop, or what remains of it, is in warehouses, and held at firm prices, ranging from \$75 to \$150. Early broomcorn of this year's growth is expected to begin moving on the price basis of the old crop. The progress of other crops, whether good or bad, will determine an increase or decrease in the broomcorn acreage this year. However, the established producing sections of the Southwest will have about the usual acreage. acreage.

Prices are about one-fifth those asked in Iowa or Illinois and agricultural possibilities are just as great. Roads, schools, churches, railroads all established. For literature and particulars write J. S. Murphy, Minneapolis, St. Paul & Sault Market Ma

THE OZARKS, WHAT OF THEM?

Purebred poultry and high-grade Holstein, Jersey and Ayrshire cows have transformed the Ozarks. Not many years so southern Missouri and northern Arkansas were celebrated mostly for its moonshine whiskey, squirrel rifles and "yaller" hounds. Today the citizens of that section are progressive, industrious and rightfully proud of the fact that in no other undeveloped section is land advancing so rapidly in value.

Climatic conditions in the Ozarks are ideal for the poultry business. High records made by the hens in the national laying contest at Mountain Grove can be largely attributed to the open winters. Poultry can range almost the year through and the egg basket is filled in winter as well as in summer. Much of the grain fed at the poultry experiment station is grown on the station farm and can be grown in any other Ozark section. Early hatched chicks pay best. Incubators are running in the Ozarks in January and springs go to the St. Louis market when top-notch prices prevail.

Ozark dairymen report a net profit of more than \$100 per cow for 1913 in spite of the drouth and high price of feed. Testing has enabled them to find the producer and discard the drone, and many co-operative dairy associations are making the dairy business more profitable. The man with milk on his shoes holds high standing with Ozark bankers for he has a bank of his own.

OZARK DAIRY, stock and poultry farms pay well. For free list and booklet write to Ward B. Hitchcock, Mansfield, Mo.

FREE! "The Truth About the Ozarks" with large list of farms for sale in best locality. Map. Durnell & McKinney, Cabool, Mo.

Jesse R. Johnson, Nebraska. Lincoln, Neb.

Jesse R. Johnson, Nebraska. Lincoln, Neb.

Will recall the Dietrich & Spaulding, of Richmond, Kan. For more than a breeder of Poland China hogs and has used every possible means to better the breed in his state. Many of our readers will recall the Dietrich & Spaulding show herds and the cheerful welcome given by herds and the cheerful welcome given by "Charlie" Dietrich when they called at his pens. For several years past he had served the Poland China breeders of Kansas as director of the American Poland China Record company, of which company he has been an active member for many years.

A few years ago, on account of his health, Mr. Dietrich went to Idaho, where he was recently joined by Mrs. Dietrich and the youngest boy, George. All the family was at his side when the call came but Frank, who is running the home farm at Richmond. In Mr. Oct. 28—Geb. S. Malker & Son, Alexandria, Neb. Call came but Frank, who is running Neb.; at Fairbury, Neb. Cot. 30—Prichart & Martin, Walker, Mo. Nov. 11—J. H. Harter, Westmoreland, Kan. Jan. 23—A. C. Lobough, Washington, Kan. BY A. B. HUNTER.

Graduate Col. Herd Headers. Graduate Col. Herd Headers.

Royal Scion Farm, Winfield, Kan., has at least six herd header prospects that are by the great Graduate Col. Some of these are out of the great sow, Royal Heiress, and to those who want the fashionable blood of this great hero that is becoming more and more popular throughout the Southwest, we advise that you get in early for choice of these excellent fall boars. He also has a number of fall glits either by Graduate Col. or bred to him for September litters. In writing please mention Farmers Mail and Breeze.

Robison Sells Percherons and Holsteins.

J. C. Robison, Towanda, Kan., will sell Wednesday, June 10, at Whitewater Falls Stock Farm, near Towanda, Kan., 30 Percheron stallions and mares and 30 Holstein cows, heifers and bulls. Practically all of these Percherons are either sired by or bred to the champion Casino and consist of 25 mares and five stallions, mostly 2 and 3 years old, a few of mature age and a few weanlings, including some of the best colts Casino ever sired. Mr. Robison will also offer 30 head of purebred and high grade Holstein cows, heifers and bulls. They are all sired by purebred sires of the most fashionable strains and all of the 25 females of breeding age are safe in calf to purebred sires.—Some of the cows are now milking over 50 pounds of milk a day. Write today for catalog, mentioning the Farmers Mail and Breeze. Robison Sells Percherons and Holsteins.

The Enid Sale.

During the past week, numerous consignments have been made to the big combination sale that will be held at Enid, June 2-3-4-5. Among the new consignments is a full car of exceptionally good registered stock from the Agricultural & Mechanical college at Stillwater. They have consigned three Percheron stallions, each of them 2 years old past, and all of them weighing very close to 1,600 pounds. Their consignment also includes several Jersey cows and helfers, and their famous Jersey herd bull, "Napoleon's Eminent," by the famous \$12,000 Imported Eminent, and out of the imported cow, Napoleon's Fontaine, by Napoleon's Bonaparte, son of Golden Fern's Lad, recognized as the greatest Jersey buil that ever lived. There are 20 registered Jersey females in this sale, many of them with breeding equally as good as that of the buil above, Mr. M. A. Smith has consigned two registered Holstein buils and seven Holstein cows; add to this the 115 head of Shorthorn females, and 35 Shorthorn bulls, 15 Hereford females and 15 Hereford buils, and you have a total of more strictly high class registered cattle than have been offered in any sale held this year.

S. E. Kansas and S. Missouri

BY ED. R. DORSEY.

Berkshire Sale Postponed.

J. T. Bayer & Sens of Yates Center, Kan, who have been advertising a Berkshire sale for May 27, have concluded to postpone their sale until a later date. Further announcement concerning this offering will be made at the proper time.

Park's Hampshire Hogs.

Park's Hampshire Hogs.
Frank H. Park, of Olathe, Kan.; has a magnificent lot of Hampshire pigs for the 1914 trade. His herd boar, Gov. Hodges 1869, is making good and is showing up a lot of good ones. Rube 17513, by Rubin 1st, by Golden Gem's Model is a great hog and his breeding is hard to beat. Mr. Park has one of the leading Hampshire hog herds now in the West and he is increasing his herd annually to supply the demand. Those wishing to buy should order now while he has a good number from which to select.

Eighty Poland China Pigs.

Under a recent date E. E. Carver & Sons write, "You may cut out the horse advertisement and say we have 80 as pretty pigg as we ever raised for sale. They will do to

ship now very seen. Our pigs are by Mo.'s Mastodon Wonder 61477, Look's Hadley 62109, Great Look 47659 and Capital 53854. We had a good sale on our saddle stallions and are now about to close a deal with a party in Oklahoms for a fine 2-year-old. We have a number of Shorthorn calves this spring and our cattle are all doing nicely. We have il yearlings that are looking good. We sold two helfers and four bulls to Judge H. H. Bonniwell of Hutchinson, Minn, recently." Mr. Carver is one of the oldest exhibitors and breeders of Poland Chinas in Missouri and one of the leading breeders in the United States. His farms have no parades of any sort, they consist of registed Shorthorn cattle, Poland China hogs and saddle horses.

Combining great milk and butter strains. Grandson of King Walker, whose daughter just completed world recoord for milk and butter, 365 days. Four generations cows over 30 pounds butter 7 days in this pedigree. No females for sale. Established 1901. SED. C. NOSHER, 3612 Locust St., Kaness City, Ma.

Oak Hill Holsteins

Bulls ready for spring service by Shadybrook Gerben Sir Korndyke out of A. R. O. dams. All tuber-culin tested. Absolute satisfaction guaranteed. State your wants fully in first lester-lean fill them. BEN SCHNEIDER, NORTONVILLE, KAS.

Fancy Grade Holstein Cows

2 to 6 years old, all tested and guaranteed sound, good unders and good tests. There is no better market for the Kansas crops than the dairy route. In no other way much prefit as by the Heistein cow. A good feeder and a conscientious milker. Write or call.

W. G. MERRITT & SON, GREAT BEND, KAN.

SOMMER-BLADS

TUBÉRCULIN TESTED.

Headed by Goodwills, Raymond of the Preel, son of Imp. Raymond of the Preel. Grade and registered females for sale, also registered bulls. ERNEST KENYON, Nortonville, Kansas

Auction Sale, High Grade

Holsteins Cows, Heifers, Bulls Walton, Neb., June 2

75—Head—75

30 cows, big heavy milkers and good individuals, 25 two and three-year-old heifers, all safe in calf and some choice young bulls make up the offering. For further information,

T. A. GIERENS, Box Lincoln, Neb.

IDVANCE 60548 FEIGHED 570 POUNDS BEFORE I YA sions to hold an annual sale in Kansas City, probably in connection with other breeders. If interested in either breed and if you can use a richly bred bull or boar, write Dr. Geo. C. Mosher, 3612 Locust St., Kansas City, Mo., and mention Farmers Mail and Breeze.

Black Mammoth Poland Chinas at Lawrence, Kan. The pedigree of this boar is as good as can be written in big type blood lines. He is a grandson of Expansion, Colossus, and Bess Corwin, representing state fair prize winners in every line. He weighed 570 pounds before he was one year old and 810 pounds before he was two. He won first place in class, headed first prize young herd and young herd bred by exhibitor at Kansas State Fair 1911 and the blue and purple fell on him in 1912. Paul E. Haworth, owner at the Black Mammoth herd, is offering spring pigs, out of sows by Advance, and sired by Kansas Big Bone, Big Jumbo and Oakland Prince. There is no better breeding and the pigs have pleased customers in 20

Keep This Sale in Mind.

Fred Cowley, Hallowell, Kan., breeder of high class Shorthorn cattle, will join Adam Andrew of Girard, Kan., in his Shorthorn sale August 20. Mr. Cowley furnished 10 head that represent Wainut Wood Shorthorns. At the head of this herd is Ingle Lad Jr., by Ingle Lad, by Imp. Collynie out of Sweet Mistletoe, by Imp. Collynie out of Sweet Mistletoe, by Imp. Collynie. This bull has plenty of scale and a head hard to beat; in fact he is a first class animal and he gives entire satisfaction as a breeder. It is needless to say he represents the very best of Scotch breeding, being a grandson of Imported Collynie. In this sale there will be four heifers and three bulls by Ingle Lad Jr., and every one good. He will sell one daughter of Captain Archer; one by Imp. Lord Cowslip. Mr. Cowley has bred Shorthorns for the past 25 years and he, like Mr. Andrew, is selling his own breeding. He has been buying from the very best herds of America and his breeding and individuals will compare most favorably with cattle from the very best and most popular herds. He has exhibited at the American Royal and other great fairs and never went into a show but his stock won their share of the prizes. He has consigned many good animals to the American Royal sales and other good sales and this is as good an offering as he ever made. It is Mr. Andrew's and Mr. Cowley's intention to offer nothing but first class cattle.

N. E. Kansas and N. Missouri

BY C. H. WALKER.

Many of our readers will doubtless be interested in the sale announcement of C. A. Robinson of Kirksville, Mo. Mr. Robinson is advertising a dispersion sale of his Jersey herd consisting of about 100 head. Included in the offering will be many of his famous producing cows which heretofore have not been for sale at any price. Also included in this sale will be daughters of more than a dozen of the breed's greatest bulls. Many of the cows will have calves at side and most of them are heavy in milk. Besides the female offering there will be 15 bulls, 10 of serviceable age, including the great sire Beatrice Stockwell. Mr. Robinson has just received an importation from the Island consisting of 31 head. This is the best lot of cattle Mr. Robinson has pust received an importation will be included in this sale. On June 10, the day following the Robinson sale, England & Miller will hold a sale of Jersey cattle at Callao, Mo. Both these sales can be attended with practically one expense. If interested in either offering write for catalog today, mentioning the Farmers Mail and Breeze. JAS.W. SPARKS LIVE Stock Auctioneer breeze.

N. W. Kansas and S. Nebraska

BY JOHN W. JOHNSON.

T. P. Teagarden, the Republic county Duroc-Jersey breeder, located at Wayne, Kan., has a nice lot of March and April pigs. Mr. Teagarden is one of the veteran Duroc-Jersey breeders. W. A. Fisher, White City, Kan.

Elvestock Auctioneer. Write or Phone for dates.

Carl Jansen & Son, Belleville, Kan., are old and reliable breeders of Poland Chinas. They have a nice crop of spring pigs and will be able to supply many of their old customers and some new ones this season with boars.

Adolph Gustafson & Son, Leonardville, Kan., are Duroc Tone and Crimson of the Solid Attractive King and Crimson of the spring pigs. They recently fought a fine young boar from the Agricultural college.

Hays Pitman, Keats, Kan., is a young Poland China breeder who went out and bought a string of the best bred sows offered in the public sales last winter. He sent to Roy Johnson and bought a pair.

Johnson's Shetland Pony Farm

Write me regarding Shetland Ponies. I have for sale 40 to 50 head of fine ones, spring colts, year-lings, coming two and matured stock. Registered mares or stallions. My herd runs strong to spotted, black and white, and I have Nebraska State Fair winners. Let the children have a pony. My prices are reasonable and every pony is guaranteed as represented. Write me now while I have a fine offering of spring colts on hand.

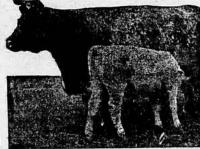

H. H. JOHNSON, CLAY CENTER, NEBRASKA.

Part from 2400-lb, imported sire and part from 2200-lb, imported sire and imported dams, my 2, 3 and 4-year-old registered Percharon stallions would prove valuable breeders for you. With all their weight and bone they are dress and straight sound. This is some of the most substantial and most attractive Percharon breeding material in the world. Farm-raised and offered at farmers' prices. Fast trains direct from Kansas City and St. Joe.

FRED CHANDLER, Route 7, CHARITON, IOWA

High class Herd Bulls, close to Imported Sootch Dams, and sired by such sires as Lavender Lord by Avondale. Nicely bred young heliers from milking strains. Rugged young bulls, the Farmer and Stockman's kind; cows with ealf at foot and rebred.

This splendid array of Foundation Shorthorns carry the Best Blood of the Best Families and thost Noted Sires of the Breed.

I want to sell during the next six weeks \$10,000 worth of Shorthorns. Six or nine months' time if desired. What we want is your trial order. Young helfers and bulls at \$75, \$100 and up.

THE FARMER'S COW The Shorthorn cow is the farmer's cow because been bred for milking purposes generation after generation and will furnish milk for her calf with a surplus to spare to make butter for the family, milk for the table and some for the pigs. Her calf has inherited a tendency to supplement this milk diet with the rough and waste feeds of the farm and the sum total for milk and beef in net gain to the farmer is more than is produced by any other than Shorthorns.

Olathe, Kansas

He has a nice lot of spring pigs. Mr. Pit-man owns one of the best farms on the "Wild Cat" and is a capable young man who will be welcomed by the Poland China breeding fraternity.

E. P. Flanigan, Chapman, Kan., breeds Duroc-Jerseys and Shorthorns. He has 45 spring pigs and a nice young herd of Short-horns. His herd boar, Tata Wala 2d, by Tata Wala, bred by Searle & Cottle, is the sire of the spring pigs. He is a good sire.

Warren Watts, Clay Center, Kan., breeds Shorthorn cattle and has a nice young herd at his farm near town. He recently bought a fine young buil in the ex-Governor Shell-enburger sale at Alma, Neb. This bull is a yearling and pure Scotch. There are about 30 head in this herd.

Fear Brothers, Bala, Kan., are Duroc-Jersey breeders who breed on an extensive scale. They bought out Grant Chapin when he quit two or three years ago and secured many of the great sows in that herd. King's Col., by King of Cols. 2d, heads the herd. They have 128 early spring pigs.

Frank Swiercinsky, Belleville, Kan., breeds Poland Chinas and Shorthorn cattle and is not a stranger to the Farmers Mail and Breeze readers. His crop of spring pigs numbers over 100 head and he has a fine lot of fail gilts. His Shorthorn herd is one of the good young herds of central Kansas.

J. L. Griffiths, Riley, Kan., is offering top Poland China boars of September farrow at prices that should move them. Most of them are by his great breeding boar King of Kansas. Write to him today and ask him for prices and further information. Look up his advertisement in the Farmers Mail and Breeze.

T. E. Goethe, Leonardville, Kan., breeds Shorthorn cattle and Duroc-Jerseys. His crop of spring pigs is not large but as usual they are good. His herd boar, Crimson Bob, is of Crimson Wonder breeding. College Critic, another boar in use, was bred at the Agricultural cattle. His Shorthorn herd is young but growing fast. Agricultural cattle. A. young but growing fast,

Geo. E. Smith, Agenda, Kan., Poland China breeder, has 71 spring pigs that are doing nicely. These were sired by Smith's Long King's Best, a boar in use in H. B. Walter's herd. Smith's Long King is 2 years old in July and will weigh around 700 pounds now. He has strong 10-inch bone and is a great boar.

Ed. Nickelson, Leonardville, Kan., breeds Percheron horses and has 21 head of regis-tered horses on the farm now. He also breeds Red Polled cattle and Duroc-Jerseys. He is in the banking business in Leonard-ville but in thorough touch with his stock farm which is near town. Visitors always welcome.

Edgar Shoebotham, Fairbury, Neb., a breeder of Shorthorn cattle, has around 100 head at the present time. Baron Sultan, 6 years old and sired by White Hall Sultan, stands at the head of the herd and is one of the great bulls of the breed. He was purchased in one of lowa's great dispersion sales at a long price but has proven a good investment.

O. B. Smith & Son, Cuba, Kan., are Poland China breeders who have been in the business for years. Five sows farrowed 43 pigs for them and 40 of them are alive and as showy a lot of youngsters as we have seen this season. They are by Longfellow Pride, King Wonder is a yearling herd boar, by King of Kansas, of which they are particularly proud. King Wonder is King of Kansa ticularly proud.

Thos. F. Walker & Son, Alexandria, Neb., will sell an outstanding January boar pig sired by Blue Valley and out of a Big Glantess dam and a litter of 10. Also an August yearling sired by Blue Valley and out of a great sow, by old Exception. This is a good opportunity for anyone desiring to buy something outstanding. Mention the Farmers Mail and Breeze when you write.

In this issue Geo. W. Schwab, Clay Center, In this issue Geo. W. Schwab, Clay Center, Neb., changes his advertisement and is offering Duroc-Jersey bred sows and gilts and Red Polled bulls. Mr. Schwab has enjoyed a good business in all lines of purebred stock, which he handles, the past season. He is offering about 20 fall boars ready for immediate use and about the same number of bred sows, that will farrow along up to July and he is breeding others for later farrow. Mr. Schwab also breeds Percheron horses and sold three this winter of his own raising and for good prices. He is offering some choice Red Polled bulls ready for service. Look up his advertisement in the Farmers Mail and Breeze.

Pure Scotch Shorthorns.

Pure Scotch Shorthorns.

S. B. Amcoats, Clay Center, Kan., is becoming extensively known because of the high class Shorthorn cattle which he breeds on his fine farm near Clay Center. Three-fourths of his herd is pure Scotch and it is considered by competent judges one of the strongest herds in the West. We visited the herd last week and found Mr. Amcoats sold out of buils of serviceable ages but in fine shape for the fall trade with a grand lot of young fellows that will be ready then. He has a nice lot of fall, winter and spring calves. Secret's Sultan, a grandson of White Hall Sultan, is a 3-year-old buil at the head of this herd that will weigh 2,000 pounds in fair flesh. He was bred by Bellows Brothers and is a valuable buil. Mr. Amcoats's advertisement will appear a little later and he will have some fine Scotch buils for sale. Mr. Amcoats is always pleased to show visitors his splendid herd and anyone interested in good cattle should stop off at Clay Center and visit the herd. It is only a few miles out from town. Phone Mr. Amcoats from town.

Kansas Spotted Polands.

Kansas Spotted Polands.

Alfred Carlson, Cleburne, Kan, is proprietor of Cleburne breeding farm, which is the home of spotted Polands. The foundation stock in this herd came from three prominent herds in Missouri and everything is registered or eligible. Mr. Carlson has spared neither money nor time in building his herd and in breeding and individual merit it is one of the strong herds in the West. His spring crop of pigs numbers over 100 of March farrow. Big Ben, of noted Missouri breeding, is one of the best big type individuals we have seen in a long time. He is big and smooth and a great sire. He is the sire of most of the 100 March pigs. Original big spotted Polands the kind our forefathers raised are popular all over the corn belt wherever they are

Sees Hope in the Lever Bill

For fifty years the U. S. Department of Agriculture and the agricultural colleges of the different states have been accumulating a large amount of knowledge of great value to the farmer. They have been trying to reach the farmer with this knowledge through circulars and bulletins, institute speakers and demonstration trains, but few have derived benefit from these agencies. I recently received a list of more than 400 farmers' bulletins available for distribution from the Department of Agriculture at Washington. These bulletins treated of every subject from how to catch rats to growing alfalfa. I also have a list of more than 50 bulletins available at our own Agricultural college. I think it would surprise us to know how few Anderson county farmers have asked for any of these free bulletins.

But the salvation of our agriculture may come through what is known as the Lever bill introduced in the House of Representatives by Mr. Lever of South Carolina, chairman of the committee on agriculture, and passed almost unani-mously by the House and Senate some weeks ago. This bill provides for cooperative agricultural extension work between the agricultural colleges in the several states and the U.S. Department of Agriculture. This extension work shall consist in the giving of instruction in agriculture and home economics to persons not attending colleges through

field demonstrations, etc. To pay the expenses of the extension work the bill appropriates \$480,000 a year, or \$10,000 for every state; also an additional sum of \$300,000 for the fiscal year following the first appropriation and for every year thereafter for nine years, a sum exceeding by \$300,000 the sum appropriated for the preceding year, and for every year thereafter there is permanently appropriated the additional sum of 3 million dollars a year. Such additional sums shall be allotted to each state in the proportion which the rural population of each state bears to the total rural population of all the states, provided an equal sum is appropriated by the state.

.The additional sum provided for by the bill will be \$300,000 in 1914 and \$2,-700,000 in 1922, after which 3 million dollars a year will be appropriated. So with the 3 million dollars appropriated by the states there will be 6 million dol-lars available besides the original \$480,-

000 a year.

The bill is intended to provide a practical and comprehensive plan for extending the work directly to the farm, and as domestic economy is included in its scope, the women of the state will be interested and will undoubtedly aid greatly in persuading the next legislature to do its part towards obtaining the benefits to be derived from this bill. R. 3, Garnett, Kan. A. L. West.

As to Mexico's Commerce

There has been considerable discussion as to the effect the Mexican difficulty will have on trade. One effect as noted by the Shoe and Leather Reporter (Boston), would be the falling off in imports of hides and skins from Mexico. We imported from Mexico for the year 1913, 28,457,714 pounds of cattle hides valued at \$4,353,689, and of goatskins 4,779,997 pounds valued at \$1,731,623. In addition to this we imported 533,064 animals valued at \$7,622,-910. We exported to Mexico for the same year 737,706 pairs of shoes valued at \$1,546,571. Under present conditions r being declared the event of v this business would of course be greatly interfered with, if not entirely obliterated.

The livestock resources of Mexico according to the last census, 1902, credited that country with the following: Cat-tle, 5,142,457; horses, 859,217; mules, 334,435; sheep, 3,424,430; swine, 616,139; asses, 287,991; goats, 4,206,011. The exports of hides and skins from Mexico for the year 1910 were, in pounds: Alligator, 258,377; cattle, 37,906,613; deer, 711,396; goats, 7,191, 806; sheep, 24,705.

Industry of any sort and agriculture in particular is bound to be very much demoralized .- American Industries.

Cowpeas will give the farmer who grows them a good crop and at the same time make the land better. We certainly need to get them into our crop rotation more generally.

No-Rim-Cut Tires Dropped 28%

During 1913 No-Rim-Cut tire prices dropped 28 per cent. They dropped so fast, so far, that 16 makers have declined to follow.

Now comes this situation:

Sixteen makes of tires are selling higher than Goodyear prices. Some are nearly one-half higher. Higher, mark you, than No-Rim-Cut tires-the tires which once cost one-fifth more than other standard tires.

The Reason Is— **Mammoth Production**

The difference lies in quantity. In this new factory with its new equipment we are building up to 10,000 motor tires per day. Perhaps twice as many as the largest rival plant.

Factory cost has dropped immensely as our output multiplied. And every saving goes to you. Last year our profit averaged only 61/2 per cent.

Those are the only reasons why we undersell sixteen other makes.

Extra **Features**

In fabric and rubber we give you in Goodyears the best tire men know how to build. Our experts have tried a thousand ways to lower cost per mile,

and they say that these tires mark the present-day limit in low cost per mile. It is simply unthinkable that any maker has learned a better way to build tires.

We give you in addition four great features found in no other tire.

We give you the No-Rim-Cut feature, which we control, and which has ended rim-cutting completely.

We give you the "On-Air" cure, which saves the countless blow-outs due to wrinkled fabric. This one extra process adds to our tire cost \$1,500 daily.

We give you a method—controlled by patent-which lessens by 60 per cent the risk of loose treads. And we give you the double-thick All-Weather tread, the one anti-skid which runs like a plain treadwhich is flat and smooth and regular.

No-Rim-Cut Popularity

No-Rim-Cut tires, even when highpriced, came to outsell any other.

And now, after millions have been put to the mileage test, we are selling 55 per cent more tires than in

any previous year. They offer you the

utmost in a tire at the lowest price possible now. At a lower price than 16 other makes.
