Sas Farmer

HANDY LOADING: Whether you are going to a community sale or the county fair it's no trouble to back the pickup into a grader ditch and load on the livestock.

EDWARD KAISER, Jr., Paola, with father and brother helps farm 3 places. The Kaisers find it quicker and cheaper to transport farm equipment from farm to farm than ride it on roads.

W. H. GODFREY, R. 2, Louisburg, finds truck and tractor work as a team on many toughest farm jobs. Here Mr. Godfrey, Miami county, is using these 2 farm friends to help get his feed ground.

Farm Truck

Busy as a Bee!

TRUCK is as important on the farm as a pocket on a shirt," says W. H. Godfrey, of Miami county. And, we might add, the truck has become so much a part of farming we take it for granted just as we do the pocket on our shirt. It's always there when we need it, so we don't have to think much about it. A quick look at several farms convinced us the farm truck touches just about every phase of farm living. At the Cecil Prentice farm, in Miami county, we found Mrs. Prentice [Continued on Page 35]

MRS. CECIL PRENTICE, R. 3, Paola, helps her daughters, Sharon and Kay, into the family pickup. Like many farm families the Prentices use their truck as a passenger car, too.

MANHATIAN KANS

THAT'S the way it is in most farming localities — Some farmers want Open-Center Tires, while others find that Traction-Centers do a better job in their soil conditions. In all probability, you have a definite preference, too.

If it's an Open-Center you like best, try the Firestone Champion Open-Center Tire. You'll find that its curved bars pull better, its Flared Tread Openings keep the tire clean, and its wide, flat tread wears longer than treads of other Open-Center Tires.

Or - if you think a Traction-Center Tire will do your job best, try the one and only Firestone Traction-Center, the choice of more than a million farmers. Remember — only Firestone gives you your choice between the greatest Open-Center and the only Traction-Center Tire on the market today.

ALWAYS BUY TIRES BUILT BY FIRESTONE, ORIGINATOR OF THE FIRST PRACTICAL PNEUMATIC TRACTOR TIRE

Enjoy the Voice of Firestone on radio or television every Monday evening over NBC

Go Ahead With the Royal

With the Royal

The American Royal Livestock and Horse Show will be held as originally scheduled, October 13-20. The big job of cleaning up the building which was in the flooded district of Kansas City is being rushed. The clean-up crew had only 7 weeks to do the job, as it was not until August 11 that the decision was made to go ahead with the show. The arena and cattle annex of the Royal building are on the second floor and escaped much of the damage wrought below. Workmen are concentrating on the ground floor, where their first job was to remove silt, tree stumps, lumber, dead animals and flood-borne debris deposited by 20 feet of floodwater. Heaviest damage was to ramps, doors, windows, loading docks, the junior farmer exhibit area, and the enclosed box stalls for horses. However, the building apparently suffered no major structural damage. As in previous years, cash prizes, ribbons and trophies totaling nearly \$60,000 will be given this year.

Prize List Ready for Chicago Show

Prospective exhibitors for the International Live Stock Exposition at Chicago this fall may now apply for the 1951 prize list and entry forms. Write to show headquarters, Union Stock Yards, Chicago 9, Ill. Dates for the event are November 24 thru December 1.

ber 1.

Highlighting the carlot cattle competitions are 2 new classes for short-fed steers. A total in excess of \$100,000 is offered in competitions for 26 breeds of meat animals and draft horses, plus classes for riding and driving horses and ponies. Cattle classes have drawn \$56,000 for the 4 beef breeds. Classifications for 11 breeds of sheep offer exhibitors over \$8,000. Premiums of \$10,000 are listed for 8 breeds of swine.

To Judge Abroad

A former Kansan will judge all Shorthorn and Polled Shorthorn cattle at the 1952 Royal Easter Show in Sidney, Australia, April 4 to 15. Clinton K. Tomson, executive secretary of the American Shorthorn Breeders' Association, is the first American to receive the judging assignment for these breeds ciation, is the first American to receive the judging assignment for these breeds in the big Australian show. He was born and reared near Wakarusa. His father and grandfather have been known thruout the United States as top cattle breeders. Mr. Tomson also has judged at cattle shows in Canada and in Argentina.

...THE NEW AND FAR MORE POWERFUL FERGUSON "30"

All over America, farmers are witnessing the most amazing performance in tractor history!

Much of the greatness of the Ferguson "30" is due to the revolutionary Ferguson System. Some of it to a 20% increase in the power of its engine.

But the really outstanding feature of the Ferguson "30" is its torque performance (lugging power). This great lugging power pulls you through the tight spots with ease ... with no shifting of gears ... no stopping to "rev" up the engine . . . keeps you going where other tractors quit!

And there are many, many more features of the great new Ferguson "30" to see and to discuss with your Ferguson Dealer . . . features that give you far more value for the dollars you invest in your tractor. Telephone the Ferguson Dealer nearest you for a demonstration of the new Ferguson "30".

*TORQUE EXPLAINED

Ask your Ferguson Dealer for a FREE copy of "The Axe and the Wrench", the simple story of torque and what it means in your farm tractor. If your dealer can't supply it, write us at the address below.

FERGUSON TRACTOR AND 63 FERGUSON SYSTEM IMPLEMENTS

Ralph Farwell, of Aledo, Ill., is one of the nation's best known Hampshire hog breeders—largely because of his work inbreed improvement. Heraises between 70 and 80 litters a year and keeps accurate records of each pig under the Hampshire Production Registry. Young boars and bred gilts that meet the strict Registry standards are sold as breeding stock to farmers who want to improve their herds, or to other Hampshire pure bred hog men, mostly at semi-annual auction sales. Ralph's hogs have won top awards in recent years at the Illinois, lowa, Minnesota and Nebraska state fairs, the Hampshire Type Conference and National Barrow Show. Here he is coaching his son, Sheldon, 8, on the good characteristics which may make this baby pig a future blue ribbon winner.

"With MoorMan's, our feed cost for Blue Ribbon Hogs is only \$9.36 a hundred—"

says Ralph Farwell

beer

med

"We keep records under the Illinois Farm Management system, so we know our production costs to the penny," says Ralph Farwell. "That's why we know MoorMan's helps cut our feed costs—and we feed the same, whether our hogs are sold as breeding stock, or to packers.

196 lbs. at 5 mo. 5 days. "Here's how we fed and raised 103 hogs from 12 early spring litters this year; the pigs were started on MoorMan's Pig Mintrate and our own grain. They were weaned at 56 days, and averaged 41 pounds. At 90 to 100 pounds we switched them to corn and MoorMan's Hog Mintrate 45. At 5 months and 5 days they averaged 196 pounds.

Total feed cost \$9.36 a hundred. "Our total feed costs, figuring the local elevator price for grain, was \$1,891.55 ... \$18.35 for each 196-pound hog, or \$9.36 a hundred. These costs do not include a charge for pasture, but they do include the sow's feed from farrowing to weaning.

Hogs in better condition. "Another reason we like MoorMan's concentrates is because they condition our hogs better than any feed we've ever used. Since we started feeding MoorMan's we've had a big increase in the number of compliments from buyers about the big litters of strong, thrifty pigs they get from our gilts. In our business—as well as raising hogs for market, that's mighty important!"

See for yourself how you, too, can cut your feed costs and at the same time raise better, thriftier hogs with Moor-Man's world-famous concentrates. Ask your MoorMan Man for the names of satisfied feeders. If no MoorMan Man calls, write for full information to MoorMan Mfg. Co., Dept. J2-10 Quincy, Illinois.

SAND LOVE GRASS was seeded in this field, at left, on the farm of Harry Dole, left, in Norton county. Mr. Dole is shown with William A. Wade, work unit conservationist, as they get ready to use the Soil Conservation Service seeder.

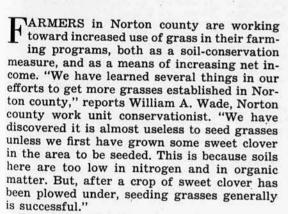

What They Discovered About

Grasses

By DICK MANN

Norton county farmers have learned several important points about seeding and grazing that can be useful in other counties

MANMATTAN SOMES

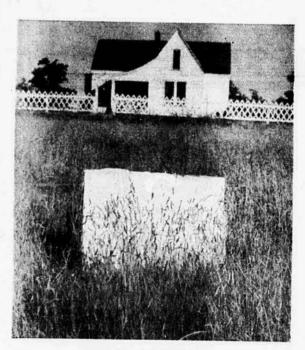

The old idea of seeding grasses such as intermediate wheat and crested wheat grass in rows

has been abandoned in favor of solid seeding. "Our best results in the county," says Mr. Wade, "have been where 10 pounds of seed an acre were drilled solid. Best results on brome grass have been obtained where 12 to 16 pounds of brome an acre have been seeded with 3 or 4 pounds of alfalfa."

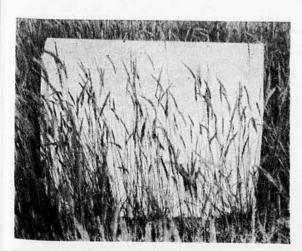

Lowell Foley has a good example on his farm of the relative merits of seeding grass in rows or solid. He has one field of intermediate wheat grass sown in 42-inch rows. While he has received considerable benefit from both grazing and seed production, the grass has not done as well as another field that was seeded solid. Mr. Foley also has had some trouble with greenbugs.

Elbert Goldsby has 6 acres of intermediate wheat grass that made [Continued on Page 7]

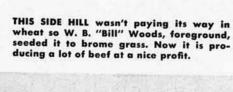

CARRYING CAPACITY of 20 acres of poor land on the A. L. McKown farm, Norton county, is one animal unit to 7 acres on this stand of native blue grama and buffalo grass.

HERE IS an excellent stand of crested wheat grass on the Howard Sumner farm, Norton county. It was seeded on thin upland in the fall of 1949.

When autumn leaves fall left and right

It's time to look for green and white!

This winter—use a really fine winter grade motor oil like Quaker State Cold Test. Notice how much you will reduce the rate of wear in your engines. And see how much you save, too! Repair and upkeep costs will be lower. And besides, you'll enjoy quicker starts, smoother, quieter and more powerful performance.

Only 100% pure Pennsylvania grade crude oil is used in Quaker State Motor Oil. Only the finest, most modern equipment is utilized. Only top-flight technical skill is employed in its making. So no wonder Quaker State is the finest motor oil produced anywhere

If the manufacturer of your car recommends Heavy Duty Oil with detergency, ask for Quaker State HD Oil.

Kansas FFA Members Important in National Meet

By HELEN ANKENY

WHEN Future Farmers of America meet in Kansas City, October 8 to 11, for their 24th annual national convention, the Sunflower state will play an important and active role in the 4-day meeting. Hundreds of Kansas Future Farmers will be among the more than 6,000 farm lads expected for the convention, and a large number will participate in the program.

Kansas will have more than the average number of boys selected from each state for national band and chorus.

The band, directed by Dr. Henry S. Brunner, of the Department of Agricultural Education at Pennsylvania State College, will be made up of 100 boys assembled from every state in the Union.

Union.

Kansas boys who will play in the band are James Smart, Washington; Jerry Deaton, Tonganoxie; Art Kranz, Haven; Bob Murphy, Mankato; Ronald Frahm, Colby; John Bircher, Ellsworth, and Darrel Valdois, Haven.

Kansas Boys Sing

The national FFA chorus is made up of 100 Future Farmers selected from every state in the Union. The group is directed by Dr. James Hatch, assistant New York state supervisor for Vocational Education in Agriculture.

Eight boys from Kansas have been selected to sing with the national chorus. The group includes: John Sevy, Louisburg; Melvin Brose, Valley Falls; Dennis Lyne, Miltonvale; Allen Schnelle, Medicine Lodge; Alfred Schmidt, Buhler; Melvin Gering, Kingman; Harry Circle and Bert Gillig, Kiowa.

Official delegates to the convention

Kiowa.

Official delegates to the convention named to represent the 6,000 members of the Kansas FFA Association at the convention are Marvin Decker, Holton, state FFA president and Wayne Theis, Shawnee Mission, vice-president. Alternates are Edward L. Pachta, Belleville, and Lowell Dewayne Black, Beloit. Delegates will attend all meetings of the House of Delegates, where the annual business of the national organization will be considered and future policies formed. Serving as a delegate to national is an honor that comes to few farm lads as each state is allowed only 2 delegates.

few farm lads as each state is allowed only 2 delegates.

An honor coveted by all Future Farmers is the American Farmer degree award. Attainment of this degree is based on the boy's record in farming, leadership and scholarship. The degree is limited to FFA members who have been out of high school at least one year and who are showing evidence of becoming successfully established in farming. State associations are limited to one American Farmer degree candidate for each 1,000 members or major fraction thereof.

Kansas has recommended 6 candi-

Kansas has recommended 6 candi-Kansas has recommended 6 candidates this year for the degree. They are: Lowell Dewayne Black, Beloit; James E. Eaton, Columbus; Laddie E. Merryfield, Minneapolis; Edward Pachta, Belleville; James Edmund Vetter, Newton, and Wilbur Franklin Woodson, Kingman.

Word has been received by L. B. Pol-

Woodson, Kingman.
Word has been received by L. B. Pollom, supervisor of Vocational Agriculture education in Kansas and state FFA advisor, from national FFA headquarters in Washington, D. C., stating

that the Board of Student Officers and Board of Directors of the national or-ganization have reviewed the Kansas applications and will recommend to the delegates at the convention that the 6 boys receive the degree, the highest award of the national organization.

Regional Star Farmers

Regional Star Farmers

Four of the 295 American Farmers this year will be designated Regional Star Farmers and one of the 4 will be named Star Farmer of America. Announcement of Star Farmer awards will be made during the night session of the convention on October 9.

Speakers who have accepted invitations to appear on the FFA convention program include U. S. Senator Robert S. Kerr, Oklahoma, on Tuesday morning, October 9; Harold D. Newsom, Washington, D. C., Master of the National Grange, Wednesday morning, October 10, and Allan B. Kline, Chicago, president of the American Farm Bureau Federation, Thursday morning, October 11.

Bureau Federation, Thursday morning, October 11.

Other program highlights include the national FFA public speaking contest Monday evening; presentation of American Farmer degrees Tuesday afternoon and Star American Farmer awards, Tuesday night, and election of national officers Thursday afternoon.

A sidelight to the convention will be the national Future Farmers of America judging contests in livestock, poul-

the national Future Farmers of America judging contests in livestock, poultry and meats to be held in Kansas City Wednesday and Thursday, October 10 and 11. Previous to the Kansas City meet, the national FFA judging contests in dairy cattle and dairy products will be held at Waterloo, Ia., October 1 to 3.

Name National Competitors

Name National Competitors

The Cherryvale FFA judging team coached by Vocational Agriculture instructor, C. H. Young, will represent Kansas at Waterloo in judging dairy products. On the team will be Jim Gill, Harlow Altendorf, and Charles Allen. Robert McGuire has been named alternate. The Cherryvale team was top winning team in all high school Vocational Agriculture judging contests held at Kansas State College this spring, and Harlow Altendorf, was high individual in the entire contest.

Kenneth Schmidt, Weldon Braman, and John Unger will make up the El Dorado FFA team which will compete for Kansas in dairy cattle judging at Waterloo. Coach W. R. McMillan has named Gene Dickenson as alternate.

Competing for Kansas in meats judging at Kansas City will be the Yates Center team made up of Roger Nordmeyer, Altis Ferree, Joe Steiner, and Russell Gordon, alternate. The team is coached by Don W. Brock.

In livestock judging the Newton team, R. M. Karns, coach, will try out for top honors for Kansas. Team members are: Vere English, Sammy Krueger, Maurice Kurr and Charles Rodgers, alternate.

Charles O. Carter, Jr., is coaching the team from Kansas that will compete in poultry judging at the national in Kansas City. On the team will be Richard Reinhardt, Ralph Madill, Jr., Wayne Burghart, and Vern Heilman, alternate.

OFFICERS of Kansas FFA association: Back row, left to right, Marvin De ton, president; Wayne Thies, Shawnee Mission, vice-president; L. B. Pollom, To-peka, State Advisor. Front row, left to right, Darrel Gartrell, Stockton, treasurer; Richard Reinhardt, Chanute, reporter; Francis Reichart, Valley Falls, secretary.

RIGHTER

Yes, a Fairbanks-Morse Vertical Deepwell Turbine Pump is a lot "righter than rain." You get all the irrigation water you need when and where you want it. And, you know what that means to you in the bigger yieldsbigger profits you get from adequately irrigated acres.

These efficient pumps are famous for dependability and, after all, isn't that what you want . . . a pump you can depend on! You won't have to worry about high maintenance and operating costs . . about expensive breakdowns just when you need your pump most.

For top dependability in an irrigation pump, see your Fairbanks-Morse Pump Dealer. He knows irrigation! Fairbanks, Morse & Co., Chicago 5, Illinois.

Grasses

(Continued from Page 5)

400 pounds of good seed the first year. He is well-pleased with results.

Crested wheat grass is doing well on the Howard Sumner farm. Mr. Sumner the Howard Sumner farm. Mr. Sumner had a thin upland field with a 6 to 8 per cent slope that no longer could be cropped. The upper part of the field was terraced and then the slope below the terraces was seeded in the fall of 1949 to crested wheat grass. Mr. Sumner was able to crest a partiring the grass this to crested wheat grass. Mr. Sumner was able to start pasturing the grass this spring. He also is using brome grass on some bottom land to increase pasture.

A. L. McKown has had good luck with a mixture of native blue grama and buffalo grass. He took 20 acres of acres of the start of the st

poor land and reseeded to this mixture 4 years ago. "This field now is being pastured at the rate of one animal unit

to 7 acres," says Mr. McKown.

Harry Dole has been well-satisfied with seed production on 5 acres of sand love grass. He used this acreage to raise seed for more extensive plantings.

Was Sure of Stand

One of the most extensive and successful grass programs in the county is on the W. B. "Bill" Woods farm. Mr. Woods has 55 acres of brome grass seeded in the fall of 1949. "I got

excited and reseeded it again the next where and reseeded it again the next spring to insure a stand," says Mr. Woods. "I put 101 head of cows and heifers on the grass about May 1 and left them there until July 15. The grass actually got ahead of them. After taking the cattle off the grass on July 15, I later harvested 1,200 pounds of seed off the 55 acres." off the 55 acres.

The 55-acre field is part bottom land The 55-acre neid is part bottom land and part heavy slopes of up to 8 per cent. All of it is former cropland. "In the bottoms we used to plant corn," says Mr. Woods, "and thought we had a good crop if it made 30 bushels an acre. On the slopes our wheat was acre. On the slopes our wheat was acre. The slopes our wheat was acre. acre. On the slopes our wheat was lucky to make 10 bushels an acre and washed badly. It was only by summerfallowing that wheat could yield 10 bushels an acre and, of course, the soil was depleting every crop, so we had nothing to look forward to."

What does Mr. Woods feel that his 55-acre field is worth to him now that it is in brome grass? "I think I would be conservative in saying I made \$1,500 net off the field in grazing alone last

net off the field in grazing alone last summer," he says. "The seed, at 55 cents a pound, was worth another \$480."

cents a pound, was worth another \$480."

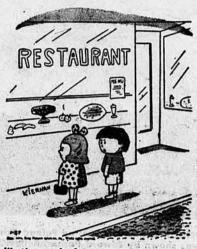

Where any grass is grazed as heavily as Mr. Woods is grazing this 55-acre field there is one point of management that should be stressed. "When you have that many cattle on your grass," says Mr. Woods, "you can't leave the manure lying undisturbed. If you do it will smother your grass."

To overcome this he uses a harrow with the teeth set straight up. He runs over the pasture in the spring, breaking up the manure and scattering it. This stirring also seems to stimulate the grass. "The half day it takes to harrow the field is well-repaid in more grass production," says Mr. Woods. He plans to apply nitrogen to the brome grass, also.

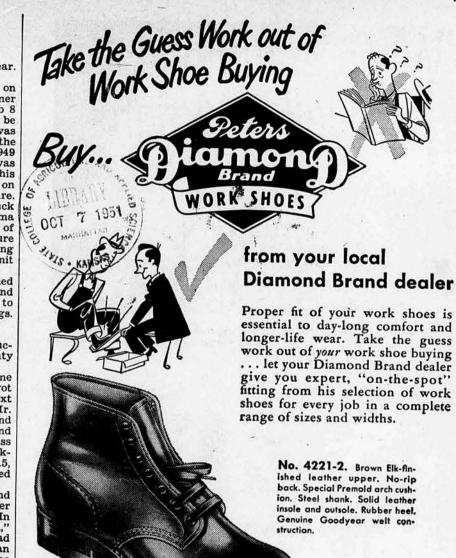

grass, also.

Results from grass have been so successful on his farm Mr. Woods is greatly expanding his program. He has 22 acres of irrigated brome-alfalfa-lespedeza seeded in the spring of 1950 and pastured the next fall.

Sixty acres of former wheat land have been terraced and seeded to a brome-alfalfa mixture. Mr. Woods plans to put 65 head of steers on this field, where they also can have access to 100 acres of native pasture adjoining.

"Let's out in here . . . I always find money under the plates."

A CLEAN SWEEP of top honors in Chester White show at Kansas State Fair, Hutch-inson, was made by Eldon Mosler, Oswego. Here is picture of his grand champion

TOP HOLSTEIN female in 4-H dairy show at Kansas State Fair, Hutchinson, was Onabank Pride Stripe Lady, shown by Vernon DeWerff, Barton county. Vernon also had his cow entered in the open class show.

GRAND CHAMPION GUERNSEY bull at Kansas State Fair, Hutchinson, was Glencliff Baron, shown by Clarence Raymond, Fredonia.

FOR LAST 3 YEARS Kensas State Fair, Hutchinson, has had largest Hereford show of any fair in nation. Here is CK Crusty 46th, that has won grand champion Hereford bull honors at the State Fair the last 2 years. He was shown by CK Ranch, Brookville.

Kansas State Fair **Full of Surprises**

WE CAN be proud of this year's Kansas State Fair," says Virgil Miller, secretary. "This year made the third in a row Kansas State Fair has had the largest Hereford show of any state in the nation. And this, despite the fact that all but one exhibitor were Kansas breeders.

"Our dairy show this year," Mr. Miller says, "broke all records. There were 641 animals shown by 190 exhibitors. This is the highest number of farms represented in any of the livestock competitions."

was not up to par in some events. The wheat show was especially small and hardly did credit to the state as the leading wheat state. To help offset this the best alfalfa hay show on record was a feature in the agriculture department.

Interest in 4-H events again indicated the fair has long ago outgrown bled to accommodate the need. The 4-H alumni reunion, planned for the last day, was somewhat spoiled by bad weather.

were Kansas breeders.

"Our dairy show this year," Mr.
Miller says, "broke all records. There
were 641 animals shown by 190 exhibitors. This is the highest number of
farms represented in any of the livestock competitions."

Milking Shorthorn breeders pulled a
surprise this year by having 156 head
of cattle from 40 exhibitors to crowd
out the Holsteins as the largest dairy
show at the fair.

show at the fair.

An increase in sheep interest was indicated by the entries in that department. There also were 33 fine fleeces in the wool show in addition to 16 or 18 more destroyed by the flood while in storage in Kansas City this summer.

The largest FFA form acquirment

The largest FFA farm equipment contest since the war was held. Twelve schools had 177 pieces of equipment on the grounds and the show was a feature of the fair.

As might be expected, the crops dis-play this year was smaller and quality

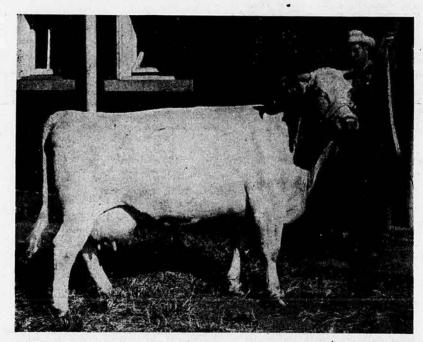

weather.

Top winners in major livestock and agricultural contests were as follows:

Beef Cattle

Aberdeen-Angus: Senior and grand champion bull, Simon Angus Farm, Madison, on Prince 105 TT; junior champion, Simon on Everest Prince 89. Senior and grand champion female, WRS Angus Farms, Hutchinson, on Ercia's Edella A; junior champion, Sunflower Farm, Everest, on Miss Prudence of Sunflower. County or district group, Sedgwick county.

Hereford: Grand champion bull, CK Ranch, Brookville, on CK Crusty 46th; reserve champion, L. L, Jones and Sons, Garden City, on L. O. Duke Pride 40th. Grand champion female, CK Ranch on CK Cameo 115; reserve, John M. Lewis and Sons, Larned, on Alf (Continued on Page 9)

IT'S A PLEASURE, says Walter Redd, to pose with a prize animal like Erica's Edella A, senior and grand champion Angus female at Kansas State Fair, Hutchinson. She was shown by WRS Angus Farms, Hutchinson.

BILLY PITTMAN, of Pittman Brothers, Udall, poses with Royal Fixer, their grand champion boar entry at Kansas State Fair, Hutchinson.

FIRST-PLACE Southdown ram lamb at Kansas State Fair, Hutchinson, was shown by Bud Hanzlick, Belleville. He also exhibited Hampshire hogs. Bud has had 4 years experience at State Fair—2 in 4-H and 2 in open competition.

SAVEyou

You can actually save costly repairs and save the life of your tractor, truck and car with Sinclair Gasoline. Here's how -

A secret ingredient, RD-119, now in all Sinclair Gasolines, forms a protective film inside your gas tank and fuel system . .

Thus, when used regularly, powerful Sinclair Gasoline stops rust and corrosion, saves you repairs . . you plenty as you GO!

RD-119, Sincluir's secret rust inhibitor, stops the rust and corrosion that normally form from moisture condensation in fuel systems. When used regularly, Sinclair Gasolines help prevent hard starting, stalling, sputtering . . . and save you costly repairs to gas tank, fuel line, fuel pump, and carburetor. So — Save as you GO with Sinclair Gasoline. Use it regularly. No extra cost!

SINCLAIR GASOLINE with RD-119®

Two International Track Records Set by Kansas Farm Boy

By RUTH McMILLION

ESLEY SANTÉE, 19-year-old Kansas farm boy, has just returned from Japan where he spent 6 weeks with the U. S. Track Team and set a new International record of

8:44 minutes for the 3,000-meter race. While there he was presented with medals by both General and Mrs. Ridgway, photographed by the Japanese press who went wild over his cowboy boots, and showered with extra gifts by Japanese young folks who fell for the "baby" of the U. S. Track Team.

The other track men, older and experienced, were all National International or Olympic champions

perienced, were all National International or Olympic champions.

Last year Wesley, a freshman at Kansas University, was not eligible to compete in the Big Seven Conference but his coach knew he was good because he had set a new international freshman record in the 2-mile race during Time Trial.

Later in the junior 5,000-meter race his time was 15:03.4 against the record of 15:24.0. Next day in Berkeley he ran in the senior class and took second. In this race the 3 top winners got to choose the country they wanted to go to; choose in winning order. Wesley chose Japan. chose Japan.

Before leaving San Francisco July 5, Wesley had his vaccination shots and his smallpox shot seemed inactive. But after his first race in Tokyo his arm and left side became very sore and he was sick. Consequently he was below par most of the time in Japan and in poor condition for track. The Japanese food also worked against him.

New Record Set

Wesley was never capable of running hard in Japan, yet he won 3 firsts, 4 seconds, and one third besides setting the new International record for the 3,000-meter. Wesley's time 8:44, previous time 8:54.

vious time 8:54.

When the team arrived by plane in Japan they went to a beautiful summer resort to rest. On the way over they had run an exhibition race in Honolulu and stopped on Wake Island for a tour.

For these contests the Japanese turned out by the thousands. Fifteen thousand made up their smallest audience and 30,000 the largest; this in the rain.

Every day the boys were escorted to national shrines, they drank tea and listened to speeches by each mayor and other dignitaries. It was 3 weeks before the U. S. Track Team could get it across to the committee that they

would not be insulted if they visited no

more shrines, drank no more tea and listened, while standing at attention, to no more long speeches.

The Japanese press took hundreds of pictures and the people were exceedingly friendly, waiting on the boys hand and foot.

The U.S. team ran against the Japa-ese national team and the home-town team of each city.

Receive Medals

They were presented unique medals of unusually fine material and workmanship. Each city also gave them "presentos"; gifts typical of their city. Wesley received 3 pair of track shoes, belts of fine leather, beautiful buckles, silver spoons, lamps, luggage, albums, trays, cuff links, field glasses and many other gifts.

other gifts.

This trip represents a wonderful experience and future for Wesley. It would cost the average citizen \$5,000 and then it could not be purchased, because the boys were under the auspices of the Japanese Athletic Federation

cause the boys were under the auspices of the Japanese Athletic Federation and housed and dined in Japan's finest. Wesley was with the "cream of the crop." On the U. S. team were Mal Whitfield, captain, Ohio State, Olympic star; Vic Frank, Yale, shotput, discus, Olympic team; Floyd Simmons, North Carolina, decathlon, Olympic; George Brown, UCLA, broad jumper, one of 6 men to ever broad jump over 26 feet; Warren Driuetzler, Michigan State, mile in 4:8.8 minutes; Dick Maiocco, NYU, ran 400 meters in :46.7, world record :45.8; Bob Work, sprinter, UCLA, 100 yards :9.7; Walt McKibben, 220-yard man; Barney Dyer, Utah, high jump, 6.7 feet; Ray Kring, pole vault, and Jesse Thomas, hurdler and allaround athlete.

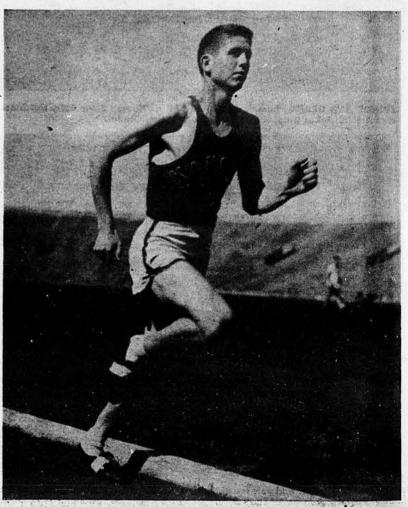

jump, 6.7 feet; Ray Kring, pole vault, and Jesse Thomas, hurdler and allaround athlete.

Wesley, slender and fine-boned, a bit over 6 feet, has a wonderful disposition, is most appreciative and unassuming. He lives near Ashland. His father is a farmer-stockman, operates 1,760 acres and runs 300 Herefords.

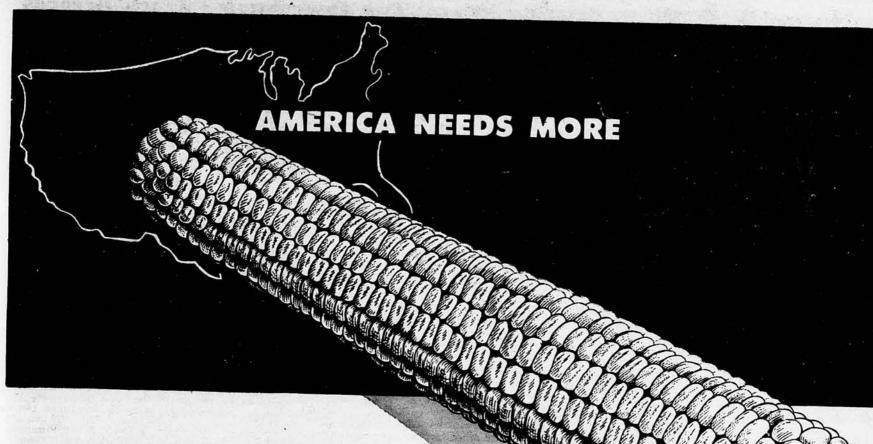

Wesley has helped with the tractor work since a small boy and now after work at dusk or later he runs from 4 to 6 or 8 miles each evening to keep in form. Wesley has one young brother, Henry, age 11, and one sister, Ina May 5.

Prominent coaches are really aware of Wesley. In the magazine Track and Field, it reads, "It would be very difficult to keep Wesley off the Olympic team. In 1956 he should win the Olympic." Kansas can really be proud!

pic." Kansas can really be proud!

WESLEY SANTEE, Kansas farm boy, set 2 new track records in Japan.

PLANT

THE BUILDING

AND RAISE MORE CORN!

In order to suport high livestock numbers on farms—which, in turn, must feed and support our vast and rapidly growing population—America MUST HAVE all of the corn it is going to be possible to raise next year.

It is well to remember that corn is currently being consumed faster than it is being produced. Present prospects for a normal corn crop this year are not bright. It is a foregone conclusion that no surplus of corn can be built up until the 1952 crop is harvested—and possibly not then.

The entire cornbelt recognizes the desirability of corn. No crop in the cornbelt can be as profitably produced as corn, when the price of corn is at present levels. No crop ever produces as many feed units per acre. It is the best feed crop so far as pounds of beef and pork are concerned. Corn is the best cash crop as far as dollars are concerned.

In order to produce the largest possible yields and PROFITS from your 1952 corn acreage — it will certainly pay you to plant ALL PIONEER.

PIONEER Hybrid Seed Corn has long been known and recognized for its Dependability and outstanding Yielding Ability. Year after year—under good conditions and bad—in soils of widely varying degrees of fertility—PIONEER always comes through—within the limits of soil and weather.

Next year—more than ever before—it is imperative to produce the largest possible yields of corn. And PIONEER—is just the hybrid that will do it.

See your local PIONEER Salesman TODAY—and let him help you select the PIONEER Varieties best adapted to your farm. See him NOW — while a good selection of varieties and kernel sizes is still available.

GARST & THOMAS

COON RAPIDS, IOWA

AM GLAD to note some editors and some U.S. Senators have sensed the danger in an executive order issued last week by President Truman-and are aroused to the point of protest-ing against it. The order I refer to is the one that would extend

the present State and Defense Departments "national security" policies on giving out information on governmental affairs to all federal officials and employees.

Any official or employee or agency, before making any such information public, under the order must submit the information statement or release to a "security officer." The security officer will decide whether it affects "national

security"-in effect, whether it might offer ma-

terial or information which might result in

criticism of administration policies.

According to President Truman's messages to Congress the last 15 months, just about every governmental function and activity affects national security. In a statement accompanying the executive order, President Truman declared the order does not mean censorship-"the American people have a fundamental right to information about their government, and there is no element of censorship, either direct or indirect, in this order," he said. "The order applies only to officials and employees of the executive branch of the (federal) government."

Technically, the President may be correct in that statement. The order does not prohibit the publication of governmental information. Nor does it require submission of articles or editorials to a government censor.

. .

But the order does establish the policy of stifling news about governmental affairs and

people at the source.

I say the Associated Press Managing Editors' Association stated it succinctly and accurately last Saturday, when they unanimously branded

President Truman's secrecy order for civilian government agencies "a dangerous instrument of news suppression."

And the next day 25 Republican Senators issued a statement accusing the Truman administration of trying to suppress legitimate news and "silence" all opposition. I wish the Senators had called the spade a spade, instead of intimating that perhaps a garden tool was being used for unworthy purposes.

However, Sen. Bourke Hickenlooper, of Iowa, one of the sponsors, told a reporter the statement was prompted in part by the "trend toward censorship" seen in the Truman order.

The pragmatic test is as close to infallible as any I know—in ordinary language, pragmatic means "how it works."

Look how this executive order requiring suppression of news from civilian agencies under language of the order works!

Right off the bat the Office of Price Stabilization clamped down on any of its officials or employees giving out any information that 'might cause embarrassment to the OPS." This order was issued a few hours after the executive order was made public. But it had been known in government circles for a week or more that such an order was "in the mill," and advance information had "leaked" to the Washington correspondents a day or so before the actual issuance of the order.

The "leak"— anonymously handled—has become part of the established technique of government propaganda in Washington. A program in contemplation about which the Administration has some doubts as to popular acceptance is conven-iently "leaked" to friendly correspondents or columnists. If there is an immediate uproar, the program may be shelved until some emergency, real or man-

ufactured, offers a reasonable excuse for putting it in operation. This particular "leak" seems to have been so dexterously worded that its full implications were not immediately apparent. So the order followed in due form.

The reaction, however, to the OPS memorandum to officials and employees, was prompt and rather violent. The OPS directive was denounced vigorously on the floor of the Senate, and it was evident from the wire stories going out of Washington that it would get an unfavorable public reception.

So, in 2 hours and 29 minutes after the OPS memo was made public, the President himself ordered it rescinded. OPS high officials declared they had no knowledge of the memorandum. Lower-echelon officials accepted responsibility, but explained the wording was unfortunate. What was intended was merely a warning to OPS personnel not to give out confidential information about any business man's operations, as the breaking of confidences "might embar-rass the OPS." And there was no connection between the White House news suppression order and the OPS memorandum. Absolutely not! Any fancied resemblance was purely coincidental, and no one should be alarmed.

The policy outlined in each is highly dangerous: should be abandoned forthwith.

Why News Censorship? Before-Dawn Raids?

By CLIF STRATTON

Kansas Farmer's National Affairs Editor

TWO more important steps in the march for Government control of TWO more important steps in the men and men's minds were taken

President Truman, by executive order, established a news censorship on all information from federal de-

on all information from federal de-partments and agencies.

The Office of Price Stabilization di-rected a "before-dawn" drive against meat slaughterers in more than 130 cities, in search of evidence against "black markets" in beef.

In Kansas Charles Browning, state OPS enforcement chief, said the in-spectors checked weights, invoices and grading practices in plants at Hutch-inson, Coffeyville, Arkansas City, Pitts-burg, Iola, Salina, Great Bend and Wichita in the first drive.

Except for the psychological effect, no one has produced any reason why the drive had to be started "before dawn." It is a method much used by secret police of totalitarian govern-

"I was going to ask you for a car, but since they're expensive and I have no license, I'll settle for a bicycle."

ments to keep their subjects in awe and terror of the majesty of the law.

President Truman, in a formal statement, issued simultaneously with his executive order, declared, "the American people have a fundamental right to information about their Government, and there is no element of central possible at the direct probable a

ment, and there is no element of censorship, either direct or indirect, in this order.

"The order applies only to officials and employees of the executive branch of the Government. The public is requested to co-operate, but is under no complusion or threat of penalty to do so as a result of this order.

"Furthermore, I have directed every agency to keep a constant watch over

agency to keep a constant watch over its classification activities for the purpose of reducing or eliminating classifications wherever and whenever conditions permit."

Under the Presidential order, all information in any department or agency possibly affecting "national security" will be submitted to a "security officer" before being issued. If the security officer decides it might affect national security, the statement or decument security, the statement or document or article is marked "security infor-mation" and classified in one of four categories: top secret, secret, confidential, or restricted. The system has been in use heretofore only in Departments of State and Defense.

President Truman's statement "this does not involve any censorship" is taken with a grain of salt by those who have been following public affairs in past years. The order is a directive to give to the public only such informa-tion as the Administration believes it ought to have.

And then there is the question of

what affects national security. Judging from Truman messages to Congress, just about everything he asks in the way of legislation or appropriations is declared to be in the interest of national security. It amounts to a long step toward forcing general acceptance of the idea that only the bureaucrats are capable of knowing what is in the public interest—and "what the people don't know won't what affects national security. Judgwhat the people don't know won't

Then there is that United Nations proposal that member nations subscribe to—and in the case of the United States the Senate ratify as a treaty-

that. Well, you see I'm using

the so-called Covenant of Human Rights. Article 14 of the Covenant, which purports to guarantee the right of free speech and a free press, actually limits those rights thru making these subject to "penalties, liabilities and restrictions... as are provided by law and are (held by the government to be) necessary for the public order, safety, health or morals, or of the rights, freedoms or reputation of others."

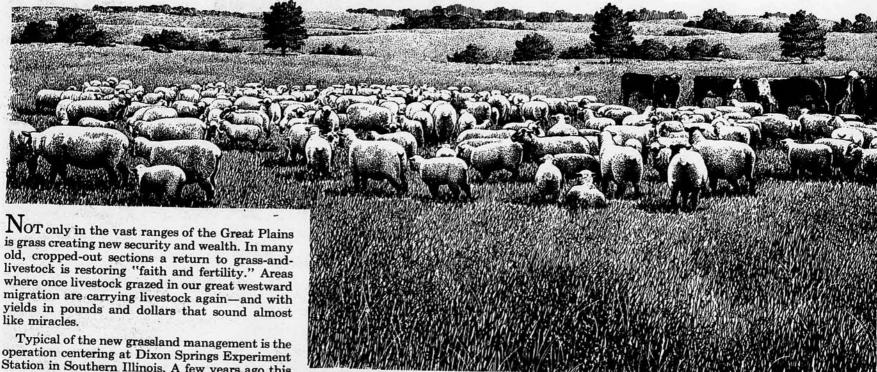

ti ca

In another article the Covenant seems to authorize the United Nations to create an international judicial body to determine whether spoken or written words published come within the scope of the limitations on free speech and a free press. Thus if an American and a free press. Thus if an American said or wrote or published something that Joseph Stalin, for instance, felt injured his reputation, "good old Uncle Joe" (quoting President Truman) could have the speaker, writer or publisher haled before the international tribunal. Internally, such a covenant, when ratified as a treaty and thereby becoming the law of the land, might revive the old "lese-majesty"—it is a crime to speak ill of the ruler.

The State Department, has given Administration approval to the pro-posed Covenant of Human Rights, Article 14 of which certainly sets forth that the Government has the authority to provide restrictions, liabilities and penalties on freedom of expression—in the public interest as understood by the Government.

If the Truman order stands, and is accepted by the press and by the public, it will be "illegal" for any government personnel to give out information except upon approval by the "security officer." The logical next step would seem to be to make it "illegal" for one outside of government to pass on in-(Continued on Page 27)

Gone to Grass

operation centering at Dixon Springs Experiment Station in Southern Illinois. A few years ago this was worn-out, plowed land—practically worthless—raising perhaps 10 bushels of corn to the acre. Today they're getting four to five hundred pounds of livestock gain off those same acres (the record so far is 682 pounds in a season). And they're shooting for a thousand! At current beef, lamb and wool prices, they're netting around \$100 per acre per year—on land where not long ago the animals would literally have starved to death.

How was this miracle achieved? By good farming and ranching practices. By preparing the soil with lime, potash and phosphate. By finding, through hundreds of careful tests, the best combinations of grasses and legumes to give the long-est grazing season and grow the most meat. Thus, the land has been made immediately profitableand still maintained for future use. For under cropping, this land loses a full plow-depth of topsoil in 30 to 40 years; but in grass, it will not erode that much in 8,000 years.

Dixon Springs and other experiment stations are pointing the way to a type of farming practice suited to many of the older sections of the United States. Some experienced ranchers of the West and Southwest are extending their stock operations back into Eastern states. In the South, beef cattle are doing well on worn-out cotton land reconverted to grass. This change from crop raising on poor land to livestock production on permanent pasture seems to present a great opportunity to many producers. It could mean the development of great new livestock-producing areas...and more meat for our growing population.

Quote of the Month

"We need to produce more meat . . . We can produce more meat in three ways: (1) by increasing livestock more meat in three ways: (1) by increasing livestock in areas where more roughage can be produced and used efficiently; (2) by protecting our livestock from diseases and pests; and (3) by improving breeding, feeding, and management... The production job can be done only on farms and ranches, and by farmers and ranchers."

Breeding Limits Beef Cattle Gains in the Feed Lot

T. G. Byerly, Animal Husbandry Division U. S. Department of Agriculture

Studies at the U. S. Range Livestock Experiment Station, Miles City, Montana, prove that steers from fast gaining bulls put on weight in the feed lot faster than steers from slow gaining bulls. They also prove that there is no inherent relation between conformation and rate of gain. While small-type steers generally gain slower than large-type, breeders can selectively breed fast gaining small-type cattle as well as fast fast gaining small-type cattle as well as fast gaining large-type cattle. Breeding for rapid feed lot gains can be done within type, without hurting type.

Today 35 states are included in this broad Today 35 states are included in this broad cooperative research program with the U.S.D.A. Type, conformation, calf crop, as well as rate of gain are being measured. Bulls are placed on feed at 6-10 months of age under standard conditions. Their rate of gain varies from a pound a day to four pounds a day. And the steers they sire will vary in the same direction as the sire though usually less widely.

Breeders in several states are also conducting performance tests by placing bulls at central testing stations for evaluation.

You have to wait until after the calf is weaned to measure his capacity to gain. While the calf is on the cow, her milk supply will affect rate of gain. There just isn't any relation between weight and finish of calves at weaning and their ability to gain in the feed lot.

Through selective breeding we can produce more beef per brood cow and per steer fed, with greater profit.

Martha Logan's Recipe for HAMBURGER HARVEST CASSEROLE

1/3 cup flour

cup chopped onion drained

1 teaspoon curry powder, chili 2 cups cooked lima beans, powder or 1 tablespoon drained

Worcestershire sauce cup sliced green pepper 1½ cups shredded cheese or buttered crumbs 2 potatoes, sliced thin

Combine hamburger, onions, tomatoes, one of the seas and salt. Pat into a one-inch layer in a 3-quart casserole. Over this, place the potatoes, flour, then corn, lima beans and green per. Top with cheese or crumbs. Bake in a moderate oven

Good crops make more work—counting the cash.

How to earn a quarter of a cent

Maybe you read a little while back that in 1950 Swift averaged about 1/4 a pound profit on its meat operations. One quarter of a cent per pound!

Here's what we do to earn that quarter of a cent per pound of product handled.

First we buy your livestock, then process them and distribute the meat. Every possible by-product is utilized. The income from these non-meat by-products increases the return you get for livestock. It also decreases the cost of meat to con-

Next, it's a long way from Broken Bow to Boston. There is an average thousandto Boston. There is an average thousand-mile gap between the places where live-stock is produced and the populous cities where meat is eaten. We help bridge that gap for you. We pay transportation costs on our finished products; deliver them to dealers in all parts of the United States. For you producers, this means a broad, nation-wide market instead of a limited local market for your products. local market for your products.

For all these services we earn a net "fee" of 1/4¢ a pound. As you know, that isn't enough to make any important difference either in the amount you receive for livestock you sell; or in

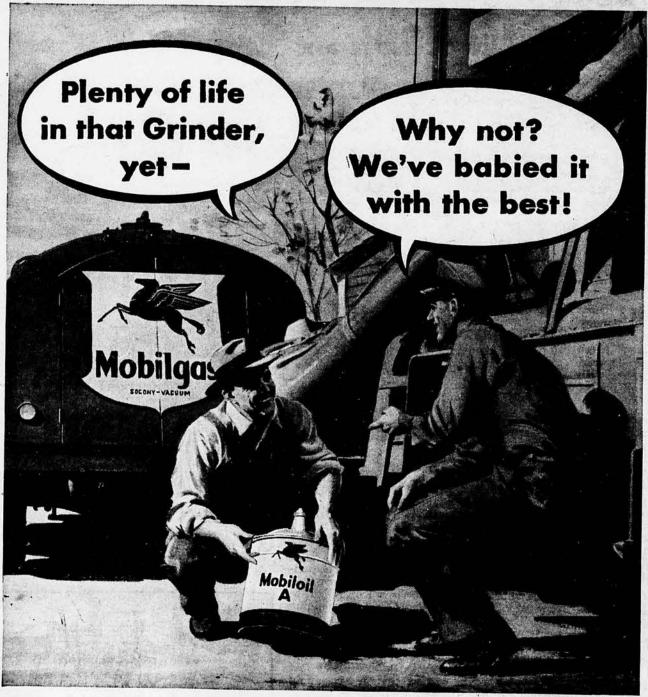

the price people pay for meat for their F.M. Simpson.

Marketing Viewpoint

By C. P. Wilson, Livestock; Leonard W. Schruben, Feed Grains; Paul L. Kelley, Poultry and Eggs.

What effect is the price control program having on our whole cattle and beef marketing system? What are the chances that it will be continued?—

The beef price control program is not working well. Cattlemen in general have not been seriously affected other than for a period of uncertainty immediately after the cattle price roll-back program was announced. There was some premature selling of cattle in feed lots at that time, but producers soon began to sit tight until Congress clarified the situation by eliminating August 1 and October 1 rollbacks.

The well-nigh intolerable situation is in the meat packing and meat distributing phases of the industry. Packers are caught in a squeeze between fixed prices for beef and rising prices for cattle, particularly choice and prime.

Theoretically such a squeeze cannot take place because packers are "guaranteed" a favorable margin between live cattle prices (the compliance price) and the ceiling price on carcasses. However, the "compliance price" feature of the program is not working well. It appears that the regulations, or at least the way in which the regulations are interpreted and enforced, make cattle worth more, net, at points distant from the areas of production and slaughter than at their centers.

A glance at the receipts and disposition of cattle at public markets will show that an unusually large proportion of the cattle received at Chicago, Omaha, St. Paul, Sioux City, St. Joseph, and St. Louis are being shipped out for slaughter rather than slaughtered at plants located adjacent to these markets. In other words, packers at these markets cannot buy the usual number of cattle and remain in compliance as outsiders can come in and outbid.

A glance at the report of slaughter by states shows that slaughter is sharply reduced in such states as Illinois, Iowa, Minnesota, Nebraska, and Missouri—usually considered the center of the meat packing industry. On the other hand, slaughter in New England, New York, New Jersey, and California is relatively large.

Either a broad revamping of the whole beef and cattle price control program can be expected or the program may be scrapped. The present unsatisfactory situ

Will wheat prices advance much above the loan rate between now and January 1?—M. O.

In my opinion, if you have wheat to sell between now and January 1, you can expect from 5 to 10 cents increase in price. This means slightly above the current net loan rate. If you have wheat of high quality, it will probably increase in price a little more. Our wheat loss in Kansas has been partially offset by a big spring wheat crop. Looking at the international market, it's hard to figure higher prices with the biggest Canadian crop in history.

notice soybean meal sometimes sells for less and sometimes more than cottonseed meal. How can I tell which is the best buy?—B. B.

These supplements are fed primarily for their protein. If the per cent of protein is the same their feeding value per pound is equal. Therefore, the best buy would be the meal which is the cheapest in price when the percentage of protein is equal. Remember, it is the cost f.o.b. your feed lot that counts.

I have a flock of turkeys. Can you tell me what the market prospects are f.—B. J.

As you know, the turkey market has not really developed yet this fall. However, some buyers are reporting that turkey hens are worth about 38½ cents per pound. There seems to be little interest in tom turkeys at this time. It seems likely, however, that government purchases such as army orders will soon begin in volume.

No. 10 in flower series written by a man who grows them by the acre

OCT 7 1951 Putting Roses to Bed

By FRANK PAYNE

ROSES are often called "Queen of the Summer Flowers," but that is not what I call them. I think the right name should be "Babies of the

right name should be "Babies of the Summer Flowers" because they do require a lot of petting and care.

My other reason is this: It happens my wife is a rose lover. It is quite often my job to help her care for the roses, and the way she pets and babies her own flower garden makes me feel like a "baby sitter for her pet roses." That is a strange title to a dahlia grower with more than 31 years' continuous growing experience. Nevertheless I married a small, blue-eyed woman with dimples and I learned 43 years ago to let her have her way and a garden of her own. Awful easy to get along with on that basis.

Now if you should wonder what I am

on that basis.

Now if you should wonder what I am going to be doing during the last of November this is it: I will be helping my wife put roses to bed for winter protection, same as you should be doing if you have roses.

Each One Is Different

It all depends on what type roses you It all depends on what type roses you have; each kind requires a certain way to do the job right. The Tea or Monthly Everbloomers are very tender and must have protection or they easily winterkill. As you no doubt know, this type blooms on the new growth each year, so you can cut them back late this fall. But wait until November when they are dormant and have shed their leaves to prune and cover them.

Cut all growth back to about 10

prune and cover them.

Cut all growth back to about 10 inches above ground. Then make a mound of earth over the stub so no top is showing. That mound should be coneshape, not flat on top, so snows and rains will drain off quickly. Leave them like that until all danger of hard freezing is past, then the earth can be removed safely. Try to pick out a cloudy spell if possible.

Roses require a lot of fertilizing, in fact most amateur rose growers starve their roses by not giving them enough plant food. In between the mounds of earth you can put a lot of well-rotted barnyard manure, not the fresh, strawy kind as that would allow ground mice to harbor underneath the straw and eat your rose roots.

your rose roots.

your rose roots.

The next roses that need winter protection are the "Climbers." Do not get the "Rambler" type confused with Climbers. Well-known climbers such as Paul's Scarlet, American Beauty, Dr. Van Fleet, are very tender. Ramblers are Dorothy Perkins, and Crimson Rambler, both quite hardy and need no protection.

A Job for Cornstalks

A Job for Cornstalks

You can use cornstalks on your climbers. Take them down from the trellis. Tie stalks all around the rose stalks with a strong cord. Some growers use old burlap bags; others an old piece of canvas wrapped around. Still others lay them on the ground and cover the rose growth with 8 inches of earth. Any of these methods are good and effective so take your choice.

Climbing roses do not bloom on the newest growth but do on wood that is one year old. Proper time to prune the old blooming wood is right after they old blooming wood is right after they bloom so all their strength goes into the new shoots that come up each year from the lower part of the plant. If you failed to prune them then, you can do it now before they are put to bed for winter. You can easily tell the difference in this old wood. It is dark and dingy in color while the new wood has a rich, healthy, bright-green look. Climbers require heavy fertilizing same as your tea roses, and now would be a good time to do it. The Rugosa, also Baby or Polyantha type, Multiflora or Old Fashioned Roses that come up from

A Housewarming Party

sprouts like Grandma grew many years ago do not need winter protection but are quite hardy everywhere.

Some folks like to plant roses in fall. That is O. K. in Southeast Kansas or South Missouri, but Western Kansas or Northern Missouri folks had best wait until real early in the spring. That way you risk no loss from winterkilling. Of course, you can spade up the bed right now where you intend to plant and get that much out of the way. You and get that much out of the way. You also can fertilize the ground heavily with well-rotted barnyard manure. That way you would have plenty of plant food in your bed, also the winter snows and rains would soak into the subsoil for reserve moisture in case of a dry summer.

you should be delayed in your spring planting of dormant bare-root roses, I recommend that you get potted roses from your nurseryman or greenhouse. I have found them very satisfactory even tho it was late June

satisfactory even tho it was late June and they were in full bloom—they never even wilted.

If I were planting a bed of roses, either spring or fall, here are some I would plant. I recommend them highly. Of course, they are not brand-new varieties, but have been tested and tried by millions and found very satisfactory. I have always felt when you have had many years trial of a certain variety, and it always produces most blooms and colors that please year after year, it really pays to stick to those tried and true kinds, then you are not disappointed. are not disappointed.

Sturdy-Growing Varieties Tea Roses

Radiance, both pink and red.

Mrs. Chas. Bell, shell-pink salmon.

Golden Emblem, golden yellow.

Ophelia, pale pink and gold.

Betty Uprichard, copper red.

Columbia Hermosa, bright pink.

Mme. Butterfly, light pink-shaded ellow. vellow

Killarney, double white. Hoosier Beauty, dark red. K. A. Victoria, pure white.

Lower-Growing Varieties Tea Roses

Souv. de Georges Pernet, brick red. Etoile de Holland, deep velvety red. Luxemberg, yellow.
Yellow Crochet, yellow.
Sunburst, yellow and orange.
Rev. F. Page Roberts, copper red.
J. J. L. Mock, two-toned pink.
Mrs. Aron Ward, golden buff.

Climbers

Paul's Scarlet, rich scarlet.

New Dawn, flesh pink.

Silver Moon, white with yellow cen-

ter.

Cl. American Beauty, red.

Dr. Van Fleet, pink.

Baby or Polyantha Roses

Cecile Brunner, pink and yellow. Ellen Poulsen, rosy pink.
Miss Edith Cavell, scarlet red.
Gloria Mundi, orange scarlet.
Lafayette, light crimson.

Rugosa-Type Roses

Grootendorst Red, also Grootendorst Pink, both good ones.

Old-Fashioned Yellow Roses

This is the kind Grandma grew years ago from sprouts she brought out west in the covered wagon. Flower lovers bless all Grandmas—did you ever see one who didn't love the old-fashioned flowers? Now you know why.

Harrison's Yellow, Persian Yellow, Hugonis. This last one is a single yellow sometimes called Sacred Rose of China or the "Yaller rose from Texas."

Well, that winds un surviving a persise.

Well, that winds up writing a series of 10 articles on flower growing. I found it a lot of fun, and I do hope I may have been at least some little help in calling your attention to some simple flower-growing facts. If so, I feel well repaid.

oell repaid.

Of course, if you should want me to write more flower articles for you, just write a letter or postal card to the Editor, Kansas Farmer, Topeka, Kan. He is a pretty good fellow, easy to get along with, and if enough of you write him he will probably do as you ask. Good-bye, now.

Donna Goes to France

Remember, Kansas Farmer promised to bring you letters from our 2 Kansas 4-Hers who are spending some time on European farms this summer. Here is the fifth one from Donna Cowan, of Emporia, who has gone to France.

EAR MR. GILKESON: Here are DEAR MR. GILKESON: Here are some pictures of the home, fields and Vanoye family I lived with 2 months in Northern France. (1) The 17-room new home, built on ground where buildings were destroyed in World War II. (2) The Vanoye family, left to right, Annette, Philippe, Madame Vanoye, Jacky, Monsieur Vanoye, Henri, and Nicole. (3) Donna Cowan in one of the sugar beet fields on the Vanoye farm.

one of the sugar beet helds on the van-oye farm.

It was hard to say good-bye to the Vanoye family this week. They have been wonderful to me. And I lived with them long enough that we got to know one another pretty well.

Learned Many New Things

The first half of this stay in France has been full of marvelous things and it seems like every day I've learned something new. The family spent August at Wimereux, a beach on the English channel, only 40 kilometers from England. While that close I had the opportunity to visit England and Scotland. England. While that close I had the opportunity to visit England and Scotland. It only took 4 hours to get from Boulogne, France, to London, England. In both London and Edinburgh the Young Farmers Clubs, which are in charge of the IFYE program there, were my hosts. I saw Number Ten Downing Street in London where the Prime Minister lives, the guards at Whitehall, saw the grave of Robert Browning in Westminster Abbey and visited Parliament. Both the House of Lords and the House of Commons are magnificently furnished. At the Festival of Britain on the South Bank of the Thames river I saw gigantic expesitions of archeology, industry, new farm machinery, Guernsey, Jersey and Hereford cattle, crops and foods, new furniture, and even an exhibit of ships and lobster pots. There's a beautiful concert hall, built just 3 months ago in honor of the Festival, where we saw Tschaikowsky's ballet, Swan Lake.

In Scotland I saw the crown of Mary, Queen of Scots, at Edinburgh Castle, and went to a country dance where I danced with men in colorful kilts. Going on a bus tour thru Argyleshire and the Western Highlands I was in the county where my Great-grandfather Cowan was born. We drove along the

the Western Highlands I was in the county where my Great-grandfather Cowan was born. We drove along the smooth Loch Lomond for 24 miles and in the Highlands saw little streams of water bubbling down thru the rocks and wild purple heather to the lakes below. Near Glasgow, just an hour by train from Edinburgh, I spent the day on a dairy farm with an International Farm Youth Exchange delegate to Scotland from California. They had Scotland from California. They had Ayrshire cows, and also did truck gar-dening for the big market in the indus-

(1) The 17-room home where I lived.

(2) The Vanoye family.

(3) Me in sugar beet field.

trial and beautiful city of Glasgow.

Back in England I went with Everett Mitchell, Jerry Sotota and Jerry Seaman, of the National Farm and Home Hour, Paul Taff, 1951 IFYE group leader and Iowa State 4-H Club leader, and representatives of Allis-Chalmers and London newspapers, to Hereford where we met the 6 delegates to England and Wales. I was sure glad to see Dorothy Vanskike, of Arkansas City, Kan. She has been moving from farm to farm quite often, and had just come from Wales. Hereford is the region where that kind of cattle originated, only they pronounce it Her-e-ford.

At the end of a week I was back home in France, and after talking English for a few days it seemed easier to start talking French all the time again. I've really enjoyed the stay in Northern France, but will be glad to arrive at the farm near Toulon in the south this week end. There are many types of country in France, but they all seem

week end. There are many types of country in France, but they all seem to radiate from Paris, the warm heart of a very much alive country.
—Donna Cowan.

Warren Goes to Switzerland

Remember, Kansas Farmer promised to bring you letters from our 2 Kansas 4-H'ers who are spending some time on European farms this summer. Here is the sixth one from Warren Prawl, of Severance, who has gone to Savitzerland

EAR MR. GILKESON: How time does fly. Here it is September and boys and girls at home are back in school for another term. Speaking of school it is quite different here in Switzerland. School begins the middle of August (it varies in different sections of Switzerland) and there is a month vacation near the first of Octo-ber so children can help finish potato ber so children can help finish potato and grape harvest. There is another vacation near the first of the year so everyone can go skiing, and one around Easter that is about a month long. School is out only 6 weeks in summer, also. This is the honest truth, but when we go to work around 6:45 o'clock in the morning the children are on their way to school. I am afraid that would not work in the States for the pupils would all be late. In some cases there is school only in the morning so children can work in the afternoon.

I left my first farm August 30, and

I left my first farm August 30, and after spending 3 days in Zurich as guest of the International Harvester Company, I journeyed here to Schonen-

Warren Prawl

werd and the 150-hectare (375-acre) Bally Farm. More about the farm later. In Zurich we stayed in the best hotel the International Harvester Company

(Continued on Page 17)

people could find, I am sure. It was right in the middle of the shopping district. When I say we, I am speaking of the 4 IFYE's here in Switzerland, for the 4 IFYE's here in Switzerland, for we met before going to our second and last farm. Boy! The words did fly back and forth. We met at 10 o'clock Thursday morning and were still talking when we parted Sunday afternoon. We were all full of new and thrilling experiences and just couldn't wait to tell them. I can imagine what our voyage home on the ship will be with 54 IFYE's all speaking at once.

Thursday for dinner we were guests of an organization that went by the

Thursday for dinner we were guests of an organization that went by the name of SFUSA or Swiss Friends of the U.S.A. Each member has been in or plans to be in America. All spoke English very well and the business was carried on in English so we could understand what was being said about us. Thursday afternoon we met Mr. Keller, assistant director of agriculture in Switzerland, and Mr. Zahn, who is in charge of the IFYE program here. We also met Pierre de Severey and Beina Scheele. Pierre was an exchangee from Switzerland to the States last year, and Beina an exchangee from Holland last year. We talked over many things we had in common.

. Mr. Tusch and Mr. Bonca, IHC personnel entertaining us, really gave us a dinner and party. All the IHC employees were there, 40 of them, and practically all spoke English. They really put the food in front of us. At our luncheon the food in front of us. At our function the girls all gave speeches about 4-H and at dinner I had to give a speech all unprepared. I believe we made many friends for 4-H and acquainted many with our IFYE program. This also was the first time I ever wrote the 4-H and acquainted and autographed it for a source. the first time I ever wrote the 4-m pledge and autographed it for a souve-nir. We saw 2 films on Swiss skiing. Friday morning we visited the Bucher-Guyer machine factory, which

CRICULTURE .

OCT 7 1951

is the biggest producer of agricultural machinery in Switzerland. They make everything from gigantic wine presses to GHP garden tractors that really do a lot of work here on these steep hill-sides. A big tractor would tip over before it got started. And the implements they dream up to put on these little tractors are really something. We also visited the Agricultural Experiment School of Canton Zurich.

Saturday morning we visited the biggest milk plant in Switzerland (IHC does things in a big way). We learned that only 10 per cent of the milk is pasteurized in this plant and only about 25 per cent bottled. Everyone in Switzerland boils their milk before drinking it, anyway. This plant wouldn't compare very well to a plant in the States for they handled only about 10,000 gallons daily. The farmer receives 10 cents a quart for his milk but they have no grade-A and follow no sanitation rules. Saturday luncheon was provided by the Association of Swiss Manufacturers, Importers and Dealers serving us a typical Swiss dinner that was delicious. We dined Saturday evening in a restaurant overlooking the Zurich Sea with the high Alps for a scenic background.

While in Zurich we dined in the high-

ground.
While in Zurich we dined in the highest of society and met many people who really seemed interested in us and what we represented, good will to all men and the best rural organization in the

world for young people—the 4-H Clubs.
The only trouble was we ate too much.
If our stay on our second farm is as
enjoyable as on our first, we will have nothing to ask.

-Warren Prawl, IFYE from Kansas.

P.S. Everyone tells me it has rained all summer in Kansas. All I have to say is this is home for we have had rain here practically every day.

By WILLIAM G. AMSTEIN, Kansas State College

SWEET potato harvest season will soon be here. Kansas granden Soon be here. Kansas growers in the Kaw Valley lost most of their acreage due to flood. With this disaster many lost outstanding strains of sweet potatoes. Those with high flesh color and carotene value have in recent years called an increasing outlet in many

potatoes. Those with high flesh color and carotene value have in recent years gained an increasing outlet in many shipping markets, while small-size potatoes have found a ready canning outlet at the Kuhn cannery, at Bonner Springs in Wyandotte county.

To keep from entirely losing the progress made in the last 10 to 20 years, plans are underway to do everything possible to obtain the needed seed supply probably at harvest time for bedding in 1952. Too few growers have these best strains in any large acreages, so it will be necessary to have co-operation of all growers who have any of this supply in Kansas. In addition, during the last few years growers in several other states have become increasingly interested in these improved strains developed by Dr. O. H. Elmer, of the department of botany at Kansas State College. They should in some cases serve as a possible source.

There are several problems in this seed procurement program. Many farms that have grown sweet potatoes have had some degree of flood damage. These farmers may not at this time have made up their minds definitely to continue in the sweet potato business. Loss of dikes, homes, storage houses have all entered into the problem. Many growers hesitate to purchase seed for next year's crop at this time.

Some outstanding strains of Little Stem Jersey type are available and need to be used if the guest potato in

Some outstanding strains of Little Stem Jersey type are available and need to be used if the sweet potato industry makes the needed recovery and

New Halloween Playlet

"The House Was Really Haunted," is just off the press and ready for a Halloween program in your school or club. Besides the 10 characters, there should be a group of folks needed to be guests and take part in the program. There are 2 scenes in the playlet. We suggest an early order of the leaflet. Write Entertainment Editor, Kansas Farmer, Topeka. Price 5c each, or 10 copies for 25c.

progress in Kansas. Orlis, Orange Lit-tle Stem, and many other terms have been used to describe these improve-ments.

Just recently I visited the New Jer-ey experiment station to talk with Professor Schmerhorn who is in charge of vegetable experimental work regardof vegetable experimental work regarding obtaining some of their seed supply. New Jersey growers thru their experiment station tests have adopted and worked with a strain brought along here at Kansas State College. They have a considerable acreage of this improved Jersey growing under the name of Jersey Orange. Their trade has adopted this sweet potato and an active market demand is now available in the East. Professor Schmerhorn believes a reasonable supply of this seed might be obtained for Kansas growers.

Watch Out for Diseases

Unfortunately the problem of disease must be given careful attention to avoid introducing any diseases not now established in Kansas. In addition, if possible the seed should be hill-selected or from hill-selected plantings to avoid disease. Kansas now has a quarantine that prohibits importing sweet potatoes for seed purposes from several states that might otherwise have a seed supply available. This is to protect Kansas growers from diseases known to exist in these states. ist in these states.

Kansas growers who have any quantity of these improved strains of sweet potatoes that could be used for seed should contact their county agent or write Dr. O. H. Elmer or myself at Kansas State College. By digging time we hope to have a definite seed program. Growers, regardless of their varieties or strains, should follow the practice of hill-selecting their seed to get disease-free, high-yielding, desirable market, flesh and skin colored types of sweet potatoes for bedding. While labor to do this job at harvest time often is scarce, the time spent in this type of work pays extra good dividends.

The hill-selection job is not complete until the stem of the plant is split open at the ground line to check for stemrot. This must be done before potatoes are removed from vines. Dark streaks just inside the stem indicate presence of stem rot. Sweet notatoes from these Kansas growers who have any quan-

just inside the stem indicate presence of stem rot. Sweet potatoes from these hills should not be used for seed since they will carry this disease over to next year's crop.

RAILROAD HOUR

evening on NBC.

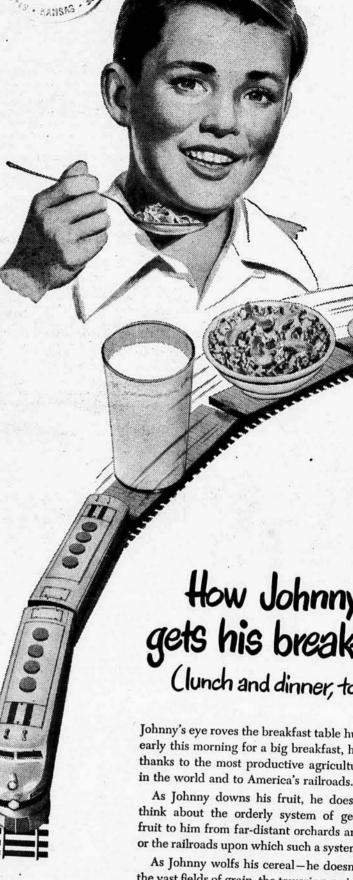

How Johnny gets his breakfast (lunch and dinner, too!) Johnny's eye roves the breakfast table hungrily. Up early this morning for a big breakfast, he'll get itthanks to the most productive agricultural system

> As Johnny downs his fruit, he doesn't stop to think about the orderly system of getting fresh fruit to him from far-distant orchards and grovesor the railroads upon which such a system depends.

> As Johnny wolfs his cereal-he doesn't consider the vast fields of grain, the towering grain elevators, the great flour mills-or the railroads which connect them all.

As Johnny tackles his bacon and eggs and his glass of milk, the farmer-railroad team is busy growing, harvesting and "assembling" millions of other meals for other Johnnies all across the nation.

Every day the nation's railroads move to the farms thousands of carloads of agricultural supplies. And every day they carry away more than 10,000 carloads of agricultural products-moving an average distance of more than 500 miles - so that Johnny and everyone else can get the food they need to be healthy and strong!

Kansas Free Fair Set New Records

R ECORD crowds and more beef cat-tle entries than in any year in its history highlighted the 1951 edi-tion of Topeka's Kansas Free Fair. Severe floods earlier in the year along the Kaw Valley were expected to discour-age fair activities, but about the only noticeable effect was a decrease in vege-

age fair activities, but about the only noticeable effect was a decrease in vegetable garden entries.

An estimated 300,000 attended this, probably the oldest fair of its size with a free gate in the world. Welcome additions this year included a new 4-H Club livestock judging pavilion, a remodeled 4-H Club demonstration building, and a new exhibit hall. One of the top quarter horse shows of the country attracted a large crowd.

Kansas' first "Egg Laying Derby" was the major attraction of the largest poultry exhibit—1,050 birds—in the fair's history. A pen of New Hampshires, "Seymour's Supers" from Coffey county, won the honors with 23 eggs laid during the week. It was the first year hatcheries took an active part in poultry competition.

Neil Fritz, 13-year-old son of Mr. and Mrs. Walter A. Fritz, Silver Lake, won the 4-H Club baby beef show with his Hereford calf, "Doc." Entrles were down in all 4-H Club livestock departments, but quality remained high.

Judging results were as follows:

Beef Cattle

TEN BLUE RIBBONS went to William E. Thorne, Lancaster, Atchison county, for his Shorthorn showing at Kansas Free Fair, Topeka. He is shown here with his grand champion bull. Thorne, who has been in Shorthorn business 20 years and has a 20-cow herd, also won grand champion bull honors at Topeka, and at Kansas State Fair last year.

IRVIN DANNENBERG, Hiawatha, is pictured here showing Raymond G. Scholz' senior and grand champion Ayrshire female, Prairie Acres Nick's Jeanne B., at Kansas Free Fair, Topeka. Dannenberg, manager of Danny Dale Farms, has been breeding registered stock 30 years and showed animals from herds in the Northeast Kansas district. The Scholz herd is located at Lancaster.

4 Out of 5 Say Hens Lay More Eggs

when fed new Winterized

EGG ATOMS

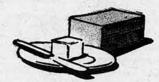

Union was ques surve "My

Mrs. Alta Robinson of
Unionville, Mo., pictured at left,
was one of the poultry raisers
questioned in Staley's 3-state
survey of EGG ATOMS feeders.
"My hens did better than ever,
before," she says.

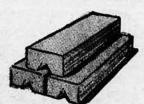

This Much EGG ATOMS

Supplies a Hen One Week
IT CONTAINS

VITAMIN A
as 3/4 Lb. of Butter

PHOSPHORUS
as 3 Doz. Fresh Eggs

VITAMIN 8-12
as 12 Pork Chops

POULTRY RAISERS who feed Staley EGG ATOMS say hens are laying more eggs . . . laying earlier eggs . . . laying better during cold weather and sudden temperature changes . . . maintaining better health during periods of heavy egg production! In a recent survey among EGG ATOMS feeders:

4 out of 5 say hens lay more eggs than ever before!

9 Out of 10 say egg production holds up better during cold spells and sudden temperature changes!

2 out of 3 say hens lay fewer softvious years!

7 Out of 10 say hens maintain greater vitality and general health during periods of heavy egg production.

4 Out of 5 noticed that hens are more alert, with better color in combs and legs, and less tendency toward colds and diseases.

WHY HENS LAY BETTER: Staley's new Winterized EGG ATOMS contain special high levels of vital nutrients that help hens lay more eggs, maintain better health during periods of heavy egg production, and build resistance to sudden temperature changes.

One lb. of Staley EGG PRODUCER ATOMS — enough to supply a laying hen for one week — contains as much VITAMIN A as 3/4 lb. of fresh country butter . . . as much VITAMIN B-12 as a dozen pork chops . . . as much PHOSPHORUS as 3 dozen fresh eggs . . . as much RIBOFLAVIN (Vitamin B-2) as 3 pints of milk. No wonder hens lay more eggs . . . with a feed like this!

ARE YOU SATISFIED with your flock's egg production? Are your hens healthy and alert with good color in combs and legs? Do they keep right on laying during cold spells and sudden temperature changes? If the answer is "no" then it's time you changed to Staley EGG ATOMS. Feed the type of EGG ATOMS that fits your requirements best—
EGG ALL-MASH ATOMS to be fed straight as a complete ration; EGG PRODUCER ATOMS to be fed 50-50 with grain; EGG BALANCER ATOMS to be fed with 2 parts grain. Available in 50-lb. multi-wall paper sacks or 100-lb. cloth sacks of genuine 80-square percale.

Success

E BUILT a large business empire. Thousands of men jumped to do his bidding. His thoughts were published in newspapers across the land. He owned several palatial man-sions and possessed art treasures collected from all over the world. For a man to start small and climb to such heights is a remarkable achievement. According to the prevailing rules of the game, he was a great success. But he feared the thought of death so much that the word was not uttered in his presence. He was so afraid of people he constantly maintained an armed guard. There have been many other men whose lives were similar to his. I wonder whether they were successful. Are money and the things it can buy the true standard of success? Just what is success? How can it be defined? Bessie A. Stanley wrote, "He has

achieved success who has lived well. laughed often and loved much; who has gained the respect of intelligent men, the trust of pure women and the love of little children; who has filled his niche and accomplished his task; has left the world better than he found it, whether by an improved poppy, a perfect poem or a rescued soul; who has never lacked appreciation of earth's beauty or failed to express it, who has looked for the best in others and given them the best he had; whose life was an inspiration; whose memory is a benediction.'

These characteristics are much like those of the happy man whom Solon described to Croesus. The man who emerges from Kipling's poem 'If" was also much like this. In these definitions money was ignored. In fact, Solon denied it as the source of happiness, which should surely be one of the characteristics of a successful person.

An unknown observer answered

the question, "What is success?" by saying:

"Success is speaking words of praise, In cheering other people's ways, In doing just the best you can With every task and every plan. It's silence when your speech would hurt, Politeness when your neighbor's curt, It's deafness when the scandal flows, And sympathy with others' woes. It's loyalty when duty calls, It's courage when disaster falls, It's patience when the hours are long, It's found in laughter and in song, It's in the silent time of prayer, In happiness and in despair In all of life and nothing less, We find the thing we call success."

Long ago, a prisoner awaited execution! He was a martyr to his noble convictions. To a young friend he wrote, "I have fought the good fight, I have finished the course, I have kept the faith. Henceforth there is laid up for me a crown of righteousness, which the Lord, the righteous judge shall give me." Altho he was incarcerated in prison, he considered himself a success. He measured his life by a different vardstick from the one popularly employed. If he was right, then much of our striving is in vain, and oftentimes our emphasis is in the wrong place. Defining success would be helpful to everyone.

After we decide where we are go ing, it behooves us to get acquainted with the right people. Do you know the success family? The father of success is work; the mother of success is ambition; the oldest son is common sense. Some of the other boys are perseverence, honesty, thoroness, foresight, enthusiasm, and co-operation. The oldest daughter is character. Some of her sisters are cheerfulness, loyalty, courtesy, care, economy, sincerity, and harmony. The baby is opportunity. Get well acquainted with the old man and you will be able to get along pretty well with the rest of the family.

-Larry Schwarz.

NO. 1—Building a better Kansas thru "Balanced Farming and Family Living" is the goal of the traveling truck display seen in this picture. The truck was at Kansas State Fair, Kansas Free Fair, several county fairs, and will make other stops at fairs and meetings over the state. On October 11, the truck will be displayed in Brown county at a soil conservation service district meeting, and October 18 to 20, at the Hiawatha Crop Show. The display is brought to the public by Kansas Power & Light Company in conservation with Kansas State College Extension service. operation with Kansas State College Extension service.

In this picture we introduce, from left to right, Paul Furbeck, Kansas Power & Light Company rural representative; H. S. Hinrichs, head of Rural Development Department, and Millard Fillmore, rural representaof Rural Development Department, and Millard Fillmore, rural representa-tive. The plan for the traveling display originated with the Soil Conser-vation Service, Lincoln, Nebr., and was developed by Kansas Power & Light Company. In 21 days the truck has been opened to the public, more than 14,000 persons have seen the displays on development of a better under-standing of soil conservation and its relationship to balanced farming and family living.

Ask for Words for **New Ag Dictionary**

EWES activity in agricultural education is a farm dictionary! For years there's been a need for a dictionary which contains nothing but terms used in everyday agriculture and in scientific agricultural work. Michigan State College is coming up with the answer. Plans are for the "Michigan State College Dictionary of Agriculture" to be published for the college's centennial year, 1955.

The modern dictionary-maker is John N. Winburne, Michigan State College English department. He writes Kansas Farmer the new dictionary had its beginning in a class composed of foreign students who were trying to learn English as rapidly as possible. One student asked for a dictionary of agriculture because he needed to learn agricultural terminology to aid his father, an importer in Constantinople. Mr. Winburne soon found there was no dictionary which adequately handled agricultural terms, altho there were

glossaries and vocabularies, usually short ones, for some of the "many areas

short ones, for some of the "many areas within" agriculture.
Middlebuster, single-cross, sugarbush, green manure, Vo-Ag, hulls, commercial fertilizer, wilt resistant, plant hormones, ton litter. These are samples of agricultural terms to be found in the new dictionary. Since most agricultural new dictionary. Since most agricultural books have no glossary of related terms, Mr. Winburne says "it falls to my lot to read my way thru a vast number of books, periodicals and bulletins, garnering the agricultural word where I find it."

find it."

There are hundreds of agricultural terms spoken in everyday language on the farm which have never found their way into books. And it is these common terms which Mr. Winburne wishes readers of Kansas Farmer to send in, to be included in his new dictionary. Just send them to Dictionary Editor, Kansas Farmer. We'll see to it the terms are sent on to Michigan. sent on to Michigan.

Air View for Farmers

There will be a Soil Conservation Air Tour at Hiawatha all day October 11, according to Hurshal Boyd, work unit soil conservationist for Brown county. It is being sponsored by the Brown County Soil Conservation Board of Supervisors.

"Soil conservation co-operators will be given a chance to compare their farms from the air with those not practicing conservation," says Mr. Boyd. Other farmers who visit the Hiawatha airport on that date will be given a chance to see the value of conservation work as it can be viewed from the air. If the weather is unfavorable on October 11 the air tour will be held on October 18.

IMMEDIATE

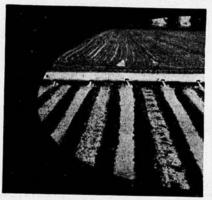

GATED SURFACE PIPE

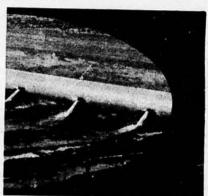

for Controlled Furrow Watering...

Replace your old-fashioned inefficient ditches!

Say "goodbye forever" to wasteful, troublesome open ditches. Enjoy bigger and better crops, less work and worry with portable, efficient AMES GATED SURFACE PIPE. Easy to operate AMES FLO-CONTROL GATES provide instant precision control of the water flow and penetration in each furrow. Volumes are easily regulated from a trickle to full gate flow for tight or porous soils, level or sloping lands, long or short furrows. Your land is covered faster, more uniformly and a higher percentage of every gallon reaches and remains in the root zone of your crops.

AMES GATED PIPE is available in Galvanized Steel or Aluminum with SLIP-JOINT, "QCL" QUICK-COUPLING, or new "ABC" COUPLERS for instant, positive connections. Lengths and diameters to meet your needs.

Let us help you plan a furrow irrigation system that cuts costs and builds profits. See your Ames Dealer or send coupon to our nearest plant for full details.

Notes on New Products and Folks Who Make Them

EY-HOLE Anti-Freeze is a new chemical compound which keeps locks from freezing. The new product comes in a handy tube dispenser, is made by Elektrik Seal Laboratories, Chicago. Key-Hole Anti-Freeze is good to use on all exposed locks—garage, doors, tool shed, truck doors—that must withstand all kinds of weather.

Five new "Gas-Saver" heaters have been added to the Superflame line of "Gas-Saver" heaters have

heating appliances of the Queen Stove Works, Inc., Albert Lea, Minn. Models are attractive, have latest features for safety and efficiency. The new 1951 units range in BTU input from 18,000 to 65,000. For full details, write the company, say you saw an item here.

The new side-delivery rake manufactured by New Idea Farm Equipment Co, Coldwater, O., features the famous bridge truss arch. Brand-new are: oil-bath gear case, enclosed roller

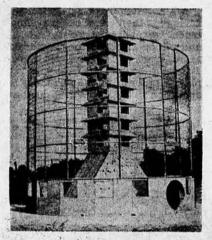

chain main drive, and refinements in the yielding, spiral reel. Equipped with a quick-shift tedding gear, the specially-designed, double-curved New Idea rake teeth ted at twice raking speed. Operating highlights: easy, noiseless draft, raking action that exposes heavy stems and protects leaves, and gentle tedding.

Elroy Products Company, Minneapolis, is distributor for the new Polaris

Cutter and Spreader, manufactured by Hetteen Hoist & Derrick Co., Roseau, Minn. The new product thoroly processes straw as it leaves a combine, breaks up straw bunches, cuts straw into shorter lengths and uniformly distributes it over the stubble area. The Polaris distributes straw so evenly no difficulty is experienced in disking or plowing the stubble after combining. With this unit attached to a combine, all straw is returned to enrich the soil as a natural organic fertilizer. Brackets are available for attaching the unit to any pull-type, self-propelled or hill-side combine.

Feeding livestock right at the crib is more economical and saves protein and nutritive values with this new chopped hay self-feeding crib, reports Habco Manufacturing Co., Columbus, Nebr. Concrete foundation supporting crib allows animals to feed directly from it.

Hay is gravity fed to large openings and always is in front of animals.

Sun bleaching, water damage and shatter losses at harvest time are practically eliminated by properly conditioning hay in this crib. Drying chopped hay avoids spoilage losses, makes earlier harvests practical and gives higher yield, quality and market value.

Fast breaking in a wide variety of field and soil conditions is claimed for the new lift-type Taylor Disc Tiller recently added to the Dearborn Motors Corporation line of equipment. The tiller meets tillage needs of mulch farming, mixing surface trush with targetiles. mixing surface trash with topsoil to resist wind and water erosion. It can

be set shallow for summer-fallow for effective weed control at stepped-up speeds. High frame clearance minimizes "trashing up" in turning under cover crops. The tiller's large earth-moving capacity makes it useful in economical terrace building and gully filling.

Manufactured at Birmingham, Mich., the tiller includes 4 discs mounted on a heavy duty frame and spaced 10 inches apart. A rear wheel acts as rudder, and gives a more uniform width of cut. The tiller is attached to the Ford tractor by means of 3 hitch links and a

the thier is attached to the Ford tractor by means of 3 hitch links and a stabilizer bracket.

Operating depth is controlled by tractor hydraulic mechanism or may be controlled by a land wheel sold separately.

The Ferguson "30" is a new model tractor introduced by Harry Ferguson, Inc., Detroit. The "30" features a newlydesigned valve-in-head engine which develops 20 per cent greater horsepower than the previous Ferguson model. There is no marked increase in tractor weight despite increase in engine power. Also, the "30" retains economy and ease of operation.

Actual Contest Records Point the Way towards increasing YOUR CORN YIELDS!

It takes good seed corn and good farming to average 101.51 bushels of DeKalb corn per acre. But Kansas farmers did just that last year. Yes, the Kansas farmers who entered the 1950 National DeKalb Selected 5-Acre Corn Growing Contest, came through with that money-making average yield . . . an average made in many kinds of weather and on many different soils. That's good farming — profitable

farming. But it's not ONLY farmers who enter the DeKalb Contest that make high yields of good, sound, ripe corn. Many thousands of farmers each year depend on DeKalb to make them more corn profits. Yes, MORE FARMERS PLANT DEKALB THAN ANY OTHER SEED CORN - IT MUST PAY. Why not raise the corn of proven yield? Raise DeKalb Seed Corn.

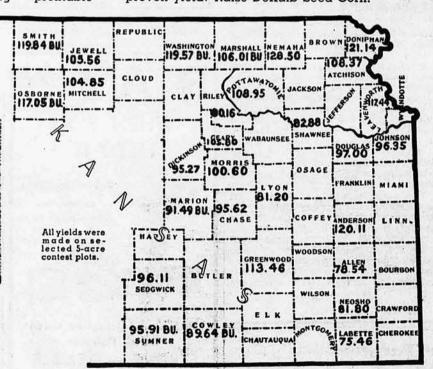

Ask any man who grows DeKall!

Otto D. Neur

1950 KANSAS CHAMP

Otto D. Neumann of Washington County carried off the Kansas State Crown with a yield of 141.99 bushels per acre.

that's why **More Farmers Plant** DEKALB than ANY OTHER BRAND!

THE BUS BARGAIN in Farm Power and Utility....

A HANDY TRACTOR

A HANDY TRACTOR

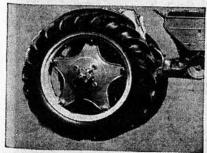

FOR A HUNDRED JOBS

FOR A DEMONSTRATION

There's no tractor that can help you so much with so many farm jobs as the improved Case "VAC." Besides all your regular field work you can pull posts, dig postholes and stretch fence... latch onto hammer mill and go grinding... carry feed to cows and bring back milk—all with no heavy lifting. You can load manure, scald hogs; saw trees down and cut logs up. You can clear away snow, grade a road, dig a pond. Try the new short turning of the "VAC," and its extra easy steering. Notice its added clearance, extra traction. Let your Case dealer demonstrate now.

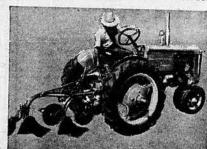

Pivet-point turning—faster, easier steering. New steering gear swings front wheels all the way for pivot turn on one rear wheel. Roller bearings on swivel post make steering amazingly easy. Six steps of adjustment take up wear, keep steering snug.

Bigger wheels, better truction, more trop clearance. Higher wheels raise axle two inches, let you cultivate taller crops. Big tires slip less, last longer, pull stronger—especially in soft soil or snow, or when crossing ridges, furrows and field ditches.

New easy riding—better braking. Shock-absorber seat mounting (extra) smooths out the jolting and bouncing from rough ground and cross rows. New shoe-type brakes aid turning, hold equally well ahead or back. They are dust-tight, adjustable from outside.

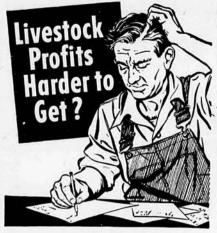

Exclusive Eagle Hitch—Latch-On Implements. Only Case offers Eagle Hitch that hooks up Latch-On Implements in one minute, pulls plows at even depth in uneven ground. Complete Latch-On line includes brand-new break-away plow for stony, stumpy land.

25 GREAT CASE TRACTORS

Your Case dealer offers the right size and type of tractor to fit your acreage and crop system. Besides the low-cost 2-plow "VA" Series there are the bigger 2-plow "S" Series, fast 3-plow "D" Series, and the mighty 4-5 plow Model "LA." There are all-purpose models with twin or single front wheels, or adjustable front axles, also orchard, high-clearance, and standard 4-wheel models. "D" Series and "LA" can be ordered for LPG fuels.

New Laying House

LABORSAVER: A trap door behind roosts in each section of his laying house makes cleaning of droppings pit easier, says H. F. Wampler, McPherson county. Roosts are hinged in front, raised from rear in 10-foot sections with rope and pulley

Since building his new 30- by 70foot laying house a couple of years
ago in McPherson county, H. F.
Wampler says there has been practically no profit in eggs. But both he and Mrs. Wampler are agreed they will continue in the poultry business.

This year they see a better chance.

This year they see a better chance for profit because they are producing hatching eggs from their New Hampshire Red flock on a year-round basis. It will mean a premium of about 10 cents a dozen for eggs accepted for hatching purposes. A large portion of the outlet for these eggs, of course, is the broiler trade.

Labor Is Reduced

When building the new laying house, Mr. Wampler had reduction of labor output in mind. He installed a water line directly to the center of each of the 30- by 30-foot laying rooms. Along with the water lines went drains to take care of spillage and runover.

A 10-foot section at one and of the

take care of spillage and runover.

A 10-foot section at one end of the house is used for feed rooms and a service entrance. Feed carrying is reduced to a minimum. And so is egg carrying. An egg basement was built just beneath the service entrance section where eggs can be cooled after gathering and kept cool until delivered. Altho not recommended, Mr. Wampler installed trap doors to the rear of each laying room. These doors are just below the straw loft. Then roosts are hinged at front so they can be lifted in sections and droppings from pit can be heaved out the trap door instead of carrying them out the front way with a tub. That trap door saves a lot of work, Mr. Wampler says. He wouldn't want to be without it.

Roosts are lifted in 10-foot sections.

Roosts are lifted in 10-foot sections. There is a hook above each roost sec-

Nest blinds were installed alongside the community nests sometime after nests were installed. Mr. Wampler explained pullets have a tendency to pile up right next to the entrance to the community nest. It resulted in crowding and some breakage.

Nest blinds have helped some but haven't completely eliminated the trouble. Mr. Wampler has considered moving nests away from the wall a few inches and making an entryway all along the rear side of nests.

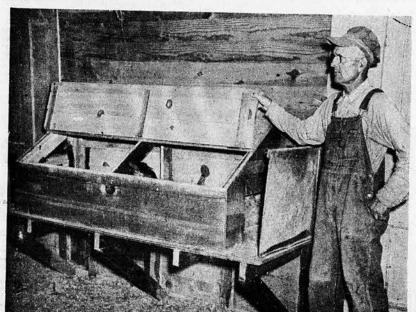

Pullets on the Wampler farm were off to an early start last year. They started laying shortly after they were 4 months old. By late October this flock of 500 was laying at a 64 per cent rate.

Name Winners in **Grange Contest**

Top award in the community service contest sponsored by the Kansas State Grange goes to the Ivanhoe Valley Grange, Finney county. The honor carries a prize of \$200, announces Ray Teagarden, LaCygne, state Grange master.

Grange, Shawnee county. Third-place honors go to Rural Grange, Neosho

The winning project was the development of a community center, 15 miles south of Garden City. The new center contains rooms for Grange meet ings, 4-H Club activities and recreation events. For their project, Auburn Grange members constructed and furnished a residence to attract a doctor to their community.

NEST BLIND: Shield between H. F. Wampler, McPherson county, and the community nest shuts out light from outside. It helps some to prevent crowding at nest entrance. Mr. Wampler is holding up the lid to the nest, showing spaciousness

wartarin

Amazing University of Wisconsin discovery - safest and MOST EFFECTIVE RAT AND MOUSE KILLER known. Guaranteed by American Scientific Laboratories with 30-year reputation for dependable quality and full value. Easy and economical to use.

Dozens of warfarin products but only one BANARAT! Results almost unbelievable. Rats and mice never suspect the bait—keep eating until they all weaken and die.

and die.

Ask for BANARAT by name, at your dealer's or write to American Scientific Laboratories, Madison 1, Wisconsin.

Have a Heart!

By CHARLES H. LERRIGO, M. D.

"Have a Heart!" is a common saying, and we all do! Too many of us abuse it. Deaths from heart disease in our state are away up on the list—higher than they will be when we learn more. Any subscriber interested in treatment of that invaluable organ may obtain a copy of Doctor Lerrigo's special letter, "Hints About the Heart," by sending a request with an envelope addressed to himself and bearing a 3-cent stamp to Dr. C. H. Lerrigo, Kansas Farmer, Topeka. No copies can be sent unless the stamped envelope is received.

So Much Better Than the Old Way

A SHED EXTENSION on this old barn was enclosed to make a modern milking parlor and milk room. The farm is operated by Walter Steele, Wilson county.

WHEN you change over to grade—
A milk production you may have the same problem Walter Steele, of Wilson county, had. "I didn't know whether to remodel an old barn or build a new milking parlor," he says. He finally decided to remodel because the barn on his farm had a shed on 3 sides. By enclosing one side he got his milking parlor and saved the cost of one wall and the roof.

"If I were doing it over, tho, I think I would build a new one," he says. His main objection to the present parlor is that he didn't have space to include

à feed room. "I think regulations will be more and more strict, too," he says, "and it may be harder to make ad-ditional changes where you start with an old building."

But don't get the idea Mr. Steele is sorry he remodeled. "What I have now is so much better than the old way I was milking there is no comparison,"

was milking there is no comparison,"
he says. "While I expect grade-A milk
to bring me a higher income, the
change would be worth the cost just
for the improvement in working conditions." That is something worth considering on every farm.

Um

Made their plans and built it, so Mr. and Mrs. Lutz have reason to be . . .

Proud of New Home

T IS simply wonderful." In 4 words that is how Mrs. Fred Lutz, of Jackson county, describes her feelings about their recently completed farm

She has a right to feel especially proud because she and her husband made their plans and Mr. Lutz did all of the carpenter work. "We did hire a contractor to check our plans and he also gave Mr. Lutz some supervision," says Mrs. Lutz. "I wouldn't advise anyone to trut to build a house with the one to try to build a house without such

help."
One feature of the Lutz house is a "washup" porch, where the men can clean up before entering the house. This porch has a large closet for work clothes and boots. One wall of the porch

is tied in with the kitchen so a lazy susan shelf in a corner of the kitchen can be reached thru a small door on the porch. Mrs. Lutz had this idea and uses

porch. Mrs. Lutz had this idea and uses the shelf for garbage can or anything else used both in and outdoors. "It saves lots of steps when I want to empty scraps or get something I want to use outdoors," says Mrs. Lutz.

You can tell by looking at the picture of the old and new house that Mrs. Lutz is going to continue enjoying the change. The new house has a full basement with central heating. The upstairs is unfinished at present but eventually will be 2 bedrooms and a sewing room. sewing room.

The yard will be landscaped and will be a beauty spot.

TALK ABOUT CONTRASTS: Here is a picture of the old and new farm homes of Mr. and Mrs. Fred Lutz, Jackson county. The Kansas Farmer photographer caught this picture just after the family had moved but before the old house could be

Why News Censorship?

fied information" system to all federal departments and agencies.

Also, the American Farm Bureau is Also, the American Farm Bureau is not taking kindly to recent moves by Secretary of Agriculture Charles Brannan, which many farm leaders believe will lead to the Secretary being designated to represent the farmers in dealing with Congress, as well as to represent the President in dealing with Congress and with farmers. gress and with farmers.

gress and with farmers.

These farm leaders concede the right of the Secretary of Agriculture to speak for the Administration (he is a duly appointed member of the President's Cabinet), but hold that farmers are entitled to select their own representatives to deal with Congress in meeters of legislation. matters of legislation.

There seem to be a growing number of unhappy people over the way things are being run in Washington. But perhaps these are just the minority who always are suspicious of too much power in the hands of Government with a capital G.

Dean Harry Umberger Served Kansas Well

ARRY UMBERGER, 70. dean omer tus of Extension division, Kansas State College, died Mon-Mansas State College, died Monday morning, October 1, in St. Mary hospital, Manhattan, following several months' illness. Dean Umberger was recognized nationally in the field of college extension education. For 28 years he served the college as dean of extension. He was truly a man of the people, and the Extension Service which he developed has been recognized as a working partnership in which the people of the state co-operate with the land-grant college, Kansas State College, and the U. S. Department of Agriculture.

Prior to his appointment to the position of Director of Extension, he developed the first county agricultural Extension Service organized in Kansas. Th's was the Leavenworth county Farm Bureau formed in 1912. At that time he had the title of county agent

time he had the title of county agent lon Sigma Phi, the nation leader. During his years as dean the number of Farm Bureaus in Kansas increased to 103. The other 2 counties

National Holstein

are now served by a district agent.

An outstanding achievement of Dean Umberger's administration was development of radio station KSAC which is one of the top educational stations in the nation. It had its beginning Decem-

Dean harry Umberger

ber 1, 1924, and has been in operation since that date.

Dean Umberger built strongly and courageously with the welfare of the Kansas people uppermost in his mind. He believed in Kansas and in its future. His honesty and unswerving determination to go forward despite obstacles had the respect and admiration of everyone who knew him. He lived and loved his chosen work. His constant objective was a more prosperous Kansas and happy rural homes.

sas and happy rural homes.

He was born on a farm near Hymer, in Chase county, Kansas, September 27, 1881. He received his degree in agriculture at Kansas State College in the riculture at Kansas State College in the class of 1905. As an agricultural extension administrator, Dean Umberger was awarded national recognition on many occasions. He was awarded the certificate for distinguished service and the distinguished service ruby by Epsilon Sigma Phi, the national extension fraternity, in 1942.

Award to Kansan

Several honors have come to Holstein breeder Lloyd Shultz, Pretty Prairie, from Holstein-Friesian Association of America.

Prairie, from Holstein-Friesian Association of America.

For 5th consecutive year, Mr. Shultz has qualified for Progressive Breeders' Award. This honor is highest recognition bestowed upon a breeder of registered Holstein-Friesian dairy cattle. Achieved by only 178 Holstein breeding establishments in the entire nation, Mr. Shultz is one of 6 in Kansas to be so recognized. In order to achieve the award, a breeder must meet strict qualifications in all phases of dairy work. This includes production, type improvement, herd health, and progress in development of homebred animals. A bronze year plate will be presented Mr. Shultz at a forthcoming meeting of Holstein breeders from his area, to be added to the bronze plaque awarded when this herd first achieved the honor.

Two registered Holsteins owned by Mr. Shultz have just completed lifetime production records of more than 100,000 pounds of milk. Onabank Fobes Favorite produced a total of 105,004 pounds of milk and 3,634 pounds of butterfat in 5 yearly milking periods. Onabank Snowflake Parthenea produced a total of 103,781 pounds of milk and 3,213 pounds of butterfat in 5 yearly milking periods.

Why Wonder? Why Guess?

See for Yourself

... IF YOUR STOCK CRAVE MORE MINERALS

HERE'S HOW YOU CAN SEE AND DECIDE FOR YOUR-SELF if your stock are mineral-hungry and costing you money.

Your Occo Service Man will call at your farm soon. He'll bring with him a small sample of Occo Mineral Compound. Step out in your feedlot or pasture and watch your Occo Service Man pour a little Occo in front of your stock. SEE FOR YOURSELF if your animals go for the Occo.

IF THEY DO, it shows they are actually hungry for and crave more minerals in their diet. That's a sign you'll want to heed, because mineral-starved animals aren't top profit makers.

Your livestock know what they need, when they need it. Give them a chance at Occo free choice, and they'll make up for the mineral deficiency of their grain and roughage . . . they'll stay in the pink, flesh-up faster, finish better and produce more - ALL ON LESS FEED.

IOWA

Take a few minutes with your Occo Service Man to make this revealing mineral test SEE FOR YOURSELF if your livestock need additional minerals. AND, REMEMBER, livestock that need minerals - NEED OCCO, the complete, balanced mineral mix. Your Occo Service Man will show you how little it costs easy it is to give your stock Occo Mineral Compound free choice.

OELWEIN,

Kansas Farm Home and Family

Mrs. James C. Hoath, Harper county.

Mrs. Walter M. Lewis, Pawnee county.

Mrs. Grover C. Poole, Riley county.

Mrs. Jay Shideler, Shawnee county.

Mrs. John C. Stephenson, Osborne county.

ASTER Farm Homemakers are honored for outstanding work in their homes, with their families and in their communities. There are many such women in Kansas and many of them are yet to be selected. This year 6 were chosen, making a total of 58 members of the Master Farm Homemaker's Guild. With a few exceptions, a new class has been so honored since 1938.

The 6 women were chosen this year by a new method in co-operation with the county, district and state Extension service committees.

MRS. JAMES C. HOATH Harper County

The Hoaths live on a general farm and are the parents of 2 sons, both graduates of Kansas State College, successful in their professions and now in homes of their own. Mrs. Hoath has made her home attractive with landscaping outside, with flowers, books, magazines and pictures within.

She has been active all her married life, not only in her home with her family, but in the community and state as well. She is a charter member of her home demonstration unit, has been a Sunday school teacher, president of the PTA, active in UNESCO, a member of the Extension advisory committee and first president of the Kansas Home Demonstration Clubs.

MRS. WALTER M. LEWIS Pawnee County

Mrs. Lewis is a skilled and efficient home-maker, a mother who gives time and thought to her family and her community. She was reared on an experiment station and after graduation from Kansas State School of Home Economics, soon married and moved to the farm. As an alumni, she is a member of the advisory committee on student recruitment and curricular changes for the School of Home Economics.

She is active in 4-H Club work, the Red Cross, her home demonstration unit, the neighborhood

We Honor Master Farm Homemakers

club and church and music projects. She has an inquiring mind, takes every opportunity for travel, reading and good music. Her 2 children and husband participate in these activities as well.

Mrs. Lewis was guided by the needs of the family during the planning and remodeling of their home. It is complete in every detail, convenient and modern in arrangement.

MRS. GROVER C. POOLE Riley County

A 3,000-acre ranch in the hills of Riley county is the home site of the Pooles. Both sons live nearby in homes of their own on the ranch. Mrs. Poole in years past made a name for herself in the poultry world, even exhibiting abroad. Two years ago, she visited 6 European countries as a member of the Farmer's Friendship Tour.

Her newly remodeled home is a shining example of the modern, attractive farm home, colorful, efficient and comfortable, fitting the needs of the family. She helped organize a PTA which developed into a community club. She has helped with 4-H Clubs and her home demonstration unit for many years. She has taken an active part in the affairs of the school and church. If all goes well, Mr. and Mrs. Poole plan to celebrate the 100th anniversary of the founding of the West Slope Hereford Ranch which was founded by Mr. Poole's father in 1856.

MRS. JAY SHIDELER Shawnee County

Mrs. Shide'er for many years has been active in her community. Both she and her husband have assumed responsibilities in the school, the church, the local clubs and farm organizations. Mrs. Shideler has served as president, secretary and treasurer of her home demonstration club, president of Scout Mother's Club, has been an officer in the county Farm Bureau.

Theirs is a modern home, well furnished and equipped, a haven for family and friends.

Mrs. Ernest A. Windhorst, Ottawa county.

A daughter served as home demonstration agent for several years before her marriage. Two sons are enrolled in agriculture at Kansas State College.

MRS. JOHN C. STEPHENSON Osborne County

The Stephensons live in an attractive home, well-landscaped and conveniently arranged. During the past 5 years Mr. and Mrs. Stephenson have traveled over a large part of the United States on well-planned vacations. Right now they are laying plans for a trip to Hawaii to visit their daughter who is employed there. Both sons served in the armed services, both now are married, one employed and the other a student at Kansas University.

Mrs. Stephenson has done a remarkable job in community affairs, has served several years as a board member of the local consolidated school. Her home demonstration unit was organized in her home in 1935 and she has served in many of its offices thru the years. Church affairs and other clubs have received the benefits of Mrs. Stephenson's talents.

MRS. ERNEST A. WINDHORST Ottawa County

Since the marriage of their only son, the Windhorsts are moving to a smaller acreage in town and are building a new ranch-type home, relinquishing the original farm to the son and his new wife.

Mrs. Windhorst has been a 4-H Club leader for 12 years, has served on the county advisory committee, is recreation and program leader for many of those community gatherings which make farm life so enjoyable. She also has served as home and community chairman.

Their daughter is combining marriage with a career. In recent years the Windhorsts have made long sight-seeing trips to the West and visit her en route.

... 5 dessert ideas from one basic recipe

Betty Crocker's BROWNIES

REGULAR BROWNES

Preheat oven to 350°.

Melt over
hot water... 4 sq. unsweetened chocolate (4 oz.)
with...... 3/2 cup Wessen Oil or other shortening

Beat in.... 2 caps sugar 4 aggs

Sift together and stir in ... *1 tsp. double-action baking powder *1 tsp. self

Mix in...... 1 cup breken nuts

Spread in well greased oblong pan,

13 x 9½ x 2-in. Bake 30 to 35 minutes
in moderate oven (350°). A slight imprint will be left when top is touched
lightly with finger. Cool slightly ...

SUCCESS THE P.

SUCCESS TIPS: For Brownies with shiny tops, beat in sugar and eggs thoroughly with rotary beater. If oven-glass dish is used, lower the temperature to 325°.

*If you use Gold Medal Self-Rising Flour (sold in parts of the South), omit baking powder and salt.

BROWNIES A LA MODE (Shown)

Bake Brownies in two well greased 9-in. pie pans and cut into pie-shaped wedges. Top with ice cream, also chocolate sauce, if desired.

TEA BROWNIES

Use half of Regular Brownie recipe. (Nuts must be finely chopped.) Make thinner Brownies by spreading warm batter in two well greased oblong pans, 13 x 9½ x 2-in. Sprinkle with ½ cup blanched and finely sliced almonds or green pistachio nuts. Bake 7 to 8 min.

CHOCOLAW - FROSTID BROWNES
Use half the Regular Brownie racipe.
Spread batter in a well greased square
pan, 8 x 8 x 2-in. Bake as for Regular
recipe. Before cutting, spread with
Marie's Chocolate Icing: Melt over
hot water 1 tbsp. butter and 1 sq. unsweetened chocolate (1 oz.). Blend in
1½ tbsp. warm water. Stir and beat in
about 1 cup sifted confectioners' sugar
(until icing spreads easily).

GOLDEN BROWNIES

Make half of the Regular Brownie recipe, except use I whole egg and I egg yolk, Save extra white for the meringue topping. Spread batter in a well greased square pan, 9x9x1¾-in. Before baking, spread over the batter the following meringue: Beat until frothy throughout I egg white. Beat in gradually I cup brown sugar (packed in cup) and ½ tsp. vanilla. Continue beating until very stiff. Fold in ½ cup chopped nuts. Bake same as Regular recipe.

Monderful Gift

Wonderful Gift to send Gervicemen

Wrap each Brownie in waxed paper. They'll keep moist and fresh. Use heavy box, not pasteboard. Place layer of filler in box (any crushed paper). Cover filler with waxed paper. Place cookies close together on waxed paper. Cover cookies with filler, another layer of waxed paper, more cookies, etc. Wrap with heavy paper and cord. Address with permanent ink. Cover address with cellulose tape or colorless nail polish. Mark "PE II SIABLE".

Mix This Muffis the Night Before

ERE'S a muffin that thrives on mixing the night before. Store in refrigerator right in the muffin pan. And they're nice enough for your very best company.

Cinnamon-Orange Muffins

2 cups sifted flour

1/3 cup shortening 3/4 cup sugar (beet or

2 teaspoons baking powder egg

2 teaspoons cinna 1 teaspoon salt 1 teaspoon grated 1 cup milk orange rind

In mixing bowl cream shortening and sugar. Stir in egg and orange rind. Fold in sifted dry ingredients alternately with milk. Fill lightly-greased muffin pans about half full of batter. Sprinkle each muffin with the following sugar teaching. Belowing sugar teaching. open fine each mumn with the following sugar topping. Bake in a moderate oven (375° F.) for 20 to 25 minutes or until top springs back when lightly touched. Makes 12 medium-sized muf-

Sugar Topping

½ cup sugar (beet or 2 tablespoons butter 3/4 cup chopped nuts

2 tablespoons flour

fins. Serve hot.

Blend all ingredients and use for topping on muffins above.

Savory Krant

Here is kraut Norwegian style, suitable for a quick vegetable for cold weather.

1/4 cup fat

t 1 quart kraut 1 teaspoon celery seed or

1 teaspoon caraway seed Heat the fat in a frying pan, add the kraut and choice of seed. Mix well, separating the kraut with a fork. Then cover and cook 5 minutes. Serve hot.

If you are a wee bit tired of the canned beans in the same old way consider sweet-sour beans.

(beet or cane) 4 cups canned beans salt. pepper 2 tablespoons vinegar

Cut the bacon in small pieces and brown lightly with diced onion. Add liquid from beans. Cook down to about $\frac{1}{2}$ cup. Add remaining ingredients and the beans. Heat and serve.

Apple Rice Pudding

Rice pudding can be totally without appeal, but just try this one. With a butterscotch meringue it gets into the

1 cup rice, unco 6 medium apples, sliced thin

3 cups milk 2 egg yolks 2 egg whites, beaten 4 tablespoons brown

cup sugar (beet or cane)

sugar

not work best with a bread recipe calling for a tougher, harsher flour. You'll find Betty Crocker's bread recipe in 25-lb. or larger sacks of Gold Medal "Kitchen-tested"

Enriched Flour. Get Gold Medal—today!

You need only one brand

Cook rice with 1 quart boiling water and 1 teaspoon salt for 10 minutes only. Drain. Place half the apple slices in a buttered 2-quart casserole. Blend together salt, sugar and cinnamon and sprinkle ½ of it over the apples. Add ½ the rice then the remainder of the apples and sprinkle with second ½ of the sugar mixture. Top with remaining rice and the last of the sugar mixture. Pour in the milk which has been blended with the egg yolks. Cover and bake in a slow oven (300° F.) for about 2 hours,

stirring occasionally and adding extra milk as needed. Uncover and cook 30 minutes longer to brown. To make meringue: Beat egg whites until they make peaks, add brown sugar, a little at a time, beating between each addition and continue beating until very stiff. Fold in vanilla. Spread on the pudding and return to oven for 20 minutes or until slightly browned. Cool. Serve with cream if desired. For 6 to 8.

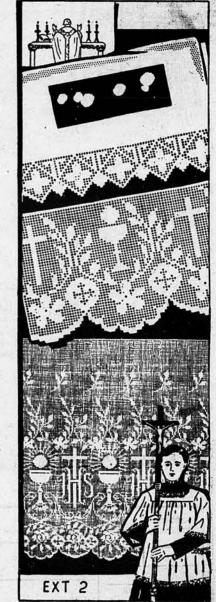

Bobby Pin Idea

Have some hemming to do? I use bobby pins to hold hem flat and even, they're easy to adjust.—Mrs. M. L.

For Girls and Boys

Little girls especially like stories about cuddly animals and most little boys love books on trains, boats, cars.

About . . .

Your Child in School

By MRS. MARION QUINLAN DAVIS

A question from a mother asks, "Our second child is in the second grade at school and has from the first year been near or at the head of his class. But when some classmate surpasses him in a particular day's classwork, he becomes most unhappy, even cries both at school and later at home. This seems to be a serious question in our home and we want to know how to handle it." Mrs. Davis says:

MAIN purpose of any school is to help an individual learn how to get along with others and to fit into the world in which he lives. He needs to learn to adjust to his fellows, not to compete with them.

The second grade shild is usually as

not to compete with them.

The second-grade child is usually an earnest, attentive pupil and a good learner. He likes drill and tends to overdo his practicing. He is conscientious and wants to be correct.

The teacher plays a very important role in his life. Her expectations of him and his relationship with her greatly influences the school adjustment of the second-grader.

Usually in this grade, a child does not like compliments on his school work. Has some member of the family stressed grades with your second boy?

stressed grades with your second boy? When he first brought home his report card was he praised overmuch for A's and chided for B's and C's?

Each Child Different

It is not possible to give recipes and blanket prescriptions sight unseen for any person. There is no single cause for any individual's behavior and reactions. No one could discover the causes for your child's perfectionism and overconscientiousness unless he knew certain facts about his family relationships and his relation with his teacher ships and his relation with his teacher and classmates.

Does this second child feel he is as loved and wanted as the other chil-

dren? If he is the middle child, then he has to compete not only with an established older brother or sister, but with the baby for a place in his parents' affection.

Has this second child been compared

fast this second child been compared favorably or unfavorably with another child in the family? Or has he been accepted as an individual and made to feel that it is only important to do his best without trying to compete with someone else?

Is his adjustment to other children

Is his adjustment to other children

Is his adjustment to other children good? Does he have companions of his own age with whom he shows interests and games? At home? At recess?

Does he have plenty of rest, relaxation, sleep, outdoor play and the proper food? Does he have interests and hobbies other than schoolwork to challenge him at home? Is he given a feeling of satisfaction, success and accomplishment for any contributions he makes, other than in his schoolwork so that he does not feel compelled to excel in that field?

When Freezing Pies

Just a few precautions when you plan to put pies into the home freezer. First, never leave them there longer than 2 or 3 months at most. Shorter time is better.

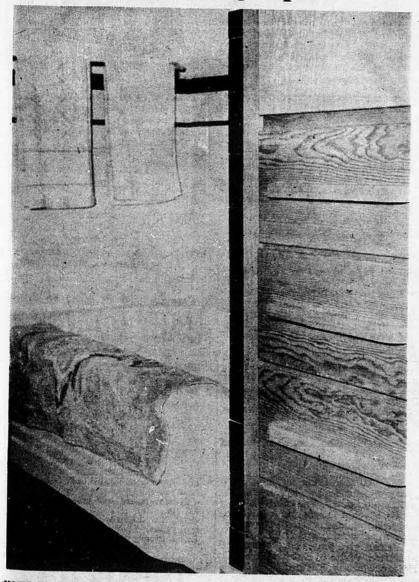

time is better.

A metal or glass container is better than paper plate, for the latter changes the flavor a little. Custard pies do not freeze well and of course meringue is out. Use all spices lightly. Both baked and unbaked pies are satisfactory when frozen, but the crust is a little better on the unbaked pie. the unbaked pie.

Bright Saying

A reader sends us this. One day her neighbor told her small 4-year-old son that he might run his own bath water. First he'd run the water, then shut it off. When his mother asked the reason for this, he said, "To test it to get it the right temptation."

Plenty Storage Space

IN HALL JUST OUTSIDE bathroom there's plenty of built-in drawer space in the new farm home of Harold Heitschmidt, near Covert in Osborne county.

LLOYD BURLINGHAM'S

There Comes a Time...

Lately this question was debated on the air: "Should conveniences for the farm home be delayed until after buildings and equipment for the farm are taken

Once this question was not widely argued. The farm definitely came first. But we are doing better by farm homes in 1951, even though mechanized agriculture does require a heavy investment.

True it is that there may never be money available for modernizing the home unless the necessary capital is first put in farm equipment.

But that can be carried to an extreme. There comes a time when the next order of business is purchases for the home. No good to continue to add equipment in the machine shed when labor-saving conveniences are needed in the basement or in the kitchen.

A modern form home is a must. It saves the homemaker, benefits the children, inspires pride in agriculture. It may actually be a money-maker. It is so vital to real country living that, however important other improvements on the farm may be, there comes a time when conveniences for the farm home must be considered first.

Ever taste a

Skelgas-Broiled Steak?

Something delicious happens — when the flavor-sealing Skelgas flame goes to work in the Broil-master Broiler of the Skelgas Constellation Range! Done "to a turn" are steaks, chops, chicken or hamburger-so effortlessly, so speedily! Cleaner, too, for the Broil-master Broiler is really smokeless!

And that's just one of the scores of wonderful cooking features you'll find in the new Skelgas Constellation Range. See all the work-saving, timesaving features of this great new range -at your Skelgas dealer's now!

HINTS for **House and Garden**

Planting a new lawn this fall? Spread seed by placing in kitchen sieve and shake over the seed bed. Assures even distribution.

To keep suede shoes and accessories looking their best, clean frequently by rubbing with cloth moistened in vinegar, then brush with stiff brush.

Aluminum utensil stained? Fill with water, add juice of one lemon. Boil briskly for a few moments.

America's Eating More...

According to the United States Department of Agriculture, civilian per-capita food consumption is currently averaging about 12% above the 1935-1939 levels. And we are actually eating more this year than we produced in 1950. To cap the climax, food demands for 1952 will be still heavier. The answer to the problem, according to USDA, is to boost production by using land even more productively.

SKELGAS COOKING SAVES TIME, COOKS BETTER

Now that I have my Skelgas Constellation Range, cooking for my family is a pleasure. It's much cleaner, cooler and faster than my old stove, and I find that I spend less time in the kitchen.

Mrs. Dewey Green, Geneseo, Illinois

SKELGAS FAMILIES' FAVORITE RECIPES

Here's a delicious way to use some of that applesauce you just finished putting up
... a tasty treat for sharpened fall appetites and an ideal special delight for that Halloween party.

Applesauce Brownies

1/2 cup shortening 2 squares chocolate 1 cup sugar 2 eggs well beaten 1/2 cup warm, unsweetened

source of the reservations to be stoned

Melt shortening and chocolate together. Mix all ingredients together thoroughly. Put in a greased, square cake pan and bake for 35 minutes in a moderate oven (350°). After baking, let cool and cut into 2" squares.

You Can Waste Or Save on Sheets

There are many grades of sheets, some good, some not so good, all depending on price and quality. They are marked by type number, 112, 128, 140, 180 and 200. You may not find all these types in one store but most of them will be available. These numbers indicate thread count of the sheet number. will be available. These numbers indicate thread count of the sheet, number of lengthwise and crosswise threads to the square inch. The figures are obtained by adding the 2 numbers. For example the 140 sheet may be 70 lengthwise and 70 crosswise, or it may be 74 by 66 which also adds to 140.

Types 112, 128 and 140 are muslin sheets. Of these, number 140 is the heaviest. The yarn itself in these sheets is heavier and more compactly made

is heavier and more compactly made than in types 112 and 128. Type 112 is loosely woven and may even be filled with starch. This is the sheet to avoid if you are looking for sheets that wear a good long time. The starch makes it look better than it really is. Type 128

is light or medium mushin.

Now for percale sheets . . . they are types 180 and 200. Percale is woven from long-staple cotton of fine quality. Type 180 is smooth, soft and is sometimes called utility percale. Type 200 is really a luxury sheet and probably too costly for general use.

Cookie Recipes

A new cookie recipe booklet by Western Beet Sugar Producers is just off the press. It contains 15 new cookie recipes, all tested and ready for your own cookie jar. Send for this free booklet, entitled, "The Way of All Cookies." Write to the Farm Service Editor, Kansas Farmer, Topeka.

Patterns and Growing Girls

Four different types of patterns are available for the growing girl. She should not alter her older sister's pattern for the result is likely to be a poor

Girls' patterns are made for the younger figure with little or no develop-ment at the bust line. Patterns for teen-

agers are slightly wider at the shoulder and longer from the shoulder to the

waistline.
Choose a misses' pattern for a girl who has more width across the shoul-

who has more width across the shoulders and bustline.

A junior miss pattern is for the chubby girl who needs a little more width than the average girl. The pattern has shorter lines than the regular size. Girls' patterns come in sizes 8 to 14; teen-agers, 10 to 16; misses' from 12 to 20 and junior miss patterns are sized from 9 to 11.

Prize-Winning Foods

If you'd like to know the secrets of making prize-winning cakes, pies, bread and rolls, ask for the leaflet, "Tasty Talk," by Ann Pillsbury. If you will send your order soon for this pamphlet, we can fill it without delay. Address Home Service, Kansas Farmer, Topeka, and enclose 3c for postage.

Young Folks **Keep Records**

"Younger farm families, most of them with children less than 12 years old, are the ones who are doing the most farm record keeping," says Gladys Myers, Extension home management specialist of Kansas State College. Miss Myers has examined the 1950 report of the farm incomes and living costs of 316 Kansas farm and home management association families from 83 counties in Kansas. in Kansas.

The new 1950 report revea's some interesting trends. The average net farm income of these families was \$7,214, an increase of \$3,553, more than the average for a similar group of 203 farmers in 1949. This figure is before farm living costs were taken out.

ing costs were taken out.

One fifth of the group owned their entire farm and 55 per cent owned a part of their land. Miss Myers added, part of their land. Miss Myers added, "From the standpoint of economics this is good, since money in operating capital usually returns a higher income. The farm family that owns part and rents part of its land is in good position. One fourth of the families, however, still were paying on a mortgage."

One fourth of the families, however, still were paying on a mortgage."

The bulk of the savings of these families was in life insurance. The average amount saved for the year was \$414. Food costs were up, \$641 against \$600 in 1949.

Value of home-furnished food was down in 1950, a trend that has been noticeable for several years. Only 41 per cent of the food eaten was farmraised.

Party Fun

It's fun to have a school days party in September and we have just the leaflet to suggest clever plans, games and menu. Write to Entertainment Editor, Kansas Farmer, Topeka, and ask for "An Old Time School Days Party." Price 3c.

Detergents Are Popular

The average person in the United States used 15 per cent less soap in 1949 than in 1948, according to latest report on fats and oils situation by the Bureau of Agricultural Economics, USDA. In fact, the average per capita use of soap last year was smallest in

This is no reflection on soap or the cleanliness of American people, their homes or clothing. It simply is that there has been a constantly increasing shift toward use of synthetic detergents, especially for washing dishes and clothes.

For October Fun

For a colored minstrel play, we recommend "Happy Go Luckies," written in poetry, 4 characters.
"So Much a Dozen," is a hilarious little playlet, with 13 characters, men, women and children.
We can give your order prompt attention. Write to Entertainment Editor, Kansas Farmer, Topeka, and enclose 5c for each leaflet.

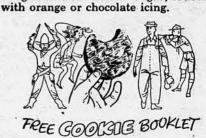

Pumpkin Orange Doughnuts

"Tree" is a branch anchored to sturdy frog. Hook doughnuts on or tie with orange ribbon.

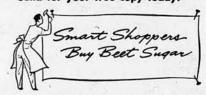

3 eggs
1 cup Beet Sugar
2 thsps. melted butter or margarine
2 tsps. finely grated orange rind
1 cup pumpkin
3¼ cups sifted all-purpose flour
3 tsps. baking powder
1¼ tsps. salt

1½ tsps. salt ½ tsp. each soda, cream of tartar, nutmeg, cinnamon ¼ tsp. allspice

Beat eggs until light and fluffy; continue to beat while adding sugar. Stir in melted butter or margarine, orange rind and pumpkin. Fold in sifted dry ingredients, just until well moistened. Cover and let chill about 2 hours. On Cover and let chill about 2 hours. On lightly floured board, roll dough (it's soft, not stiff) ¼-inch thick. Cut with floured 2½-inch doughnut cutter. For easier handling, let stand 15 min. Fry doughnuts in deep or shallow fat at 375° F. (browns 1-inch bread cube in 1 minute). As they rise to surface turn often until golden brown. Drain on absorbent paper. Makes 2½ doz. each doughnuts and "holes." Sugar, or frost with orange or chocolate icing.

"The Way Of All Cookies" gives you grand recipes plus the "how to" of baking, storing, mailing. Send for your free copy today.

Child's Mild

And Break Up Painful Localized Congestion

A number of baby doctors today are recommending Child's Mild Musterole to promptly relieve coughs, sore throat, localized inflammation and to break up congestion in nose, throat and upper bronchial tubes of the lungs. Just rub it on!

Musterole instantly creates a wonderful sensation of protective warmth on chest, throat and back and brings amazing relief. There's also Regular and Extra Strong Musterole for adults.

Child'e Mild

M-M-M... HALLOWEEN DROP DOUGHNUTS REO STAR Special DRY YEAST HALLOWEEN DROP DOUGHNUTS

Crispy brown outside, delicate and fluffy inside, an easy-to-make holiday treat.

ADD 2 pkg. RED STAR Special Active Dry Yeast to ½ cup warm water (110°.115°). Let stand. SCALD ¾ cup milk. Pour into large bowl with ¼ cup sugar, 1 tsp. solt, ½ tsp. each of mace and nutmeg. Blend to gether and cool to lukewarm. STIR yeast-mixture well and pour into bowl.MIX IN ½ cup sift shortening, 2 eggs, with 3½ cups sifted flour. BEAT until batter is smooth—about 100 strokes. SCRAPE down dough from sides of bowl. COVER and let rise in warm place until doubled—about 30 minutes. STIR down and let rest while fat is heating to 350° (to test—a 1-in. cube of bread browns in 60 seconds). DROP batter from teaspoon into hot fat. Turn when edges show color, frying until

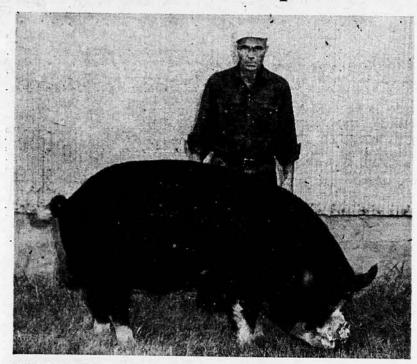

golden brown color.

DO drain doughnuts on absorbent paper, such as paper toweling, near a warm place.

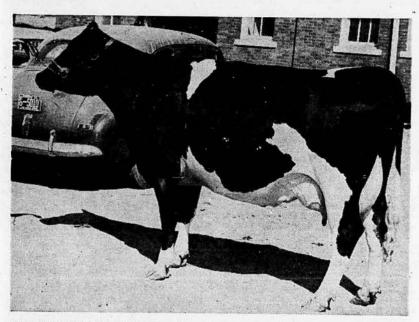

DO sugar coat while still warm.

State Fair Champions

GRAND CHAMPION Berkshire boar honors at Kansas State Fair, Hutchinson, went to Miami Donn's Fashion II, shown by T. E. Frain and Sons, Minneapolis, This is 5th year Frains have shown at State Fair and third time they have had champion boar.

UPHOLDS TRADITION. Quindale Triune Susie; grand champion Holstein-Friesian female at Kansas State Fair, Hutchinson, is daughter of only Holstein cow to hold grand championship at the fair 2 years in succession. Quindale Triune Susie was shown by Quentin J. Kubin, McPherson.

Good Home-grown Feed **Helps Boost Dairy Production**

WITH 11 first-calf heifers in his herd of 17 daire herd of 17 dairy cows, John Mussa, Cherokee county, was among the top 4 producers in the Southeast Kansas Dairy Herd Improvement Association 4 straight months last winter. Once his cows were on top, twice in second place. Part of the background for that production was good home-grown feed as well as quality cattle.

A 9-acre field of alfalfa was given a push with lime, 1,000 pounds of rock phosphate and 100 pounds of 0-20-0 ahead of seeding. That field produced 27 tons of good alfalfa hay last season. Seven acres were in Buffalo which yielded heavier than the other?

yielded heavier than the other 2 acres. Another field that has made a small but mighty contribution to his dairy program is a 4-acre field of brome grass and alfalfa. This was a 3-year-old field. It had been manured well for some years and was further fortified with lime and 100 pounds of 0-20-0 before it was seeded. Altho small this field has produced enough pasture for Mr. Mussa that he has made plans to seed another 15 acres to brome and

This 15-acre field has had 3 turns of small grain and sweet clover in the last 6 years. It has been limed twice in that time. First time it was limed you could see right where the lime truck went by the stand of sweet clover. Second time over filled in vacant spots.

soil for the brome-alfalfa mixture that is next in line for the field. Mr. Mussa plans to make another application of rock phosphate at the rate of 1,000 pounds an acre, and also use about 100 pounds of a starter fertilizer mixture. pounds of a starter fertilizer mixture.

I have found discarded linoleum makes excellent insulation for the floor and sides of the doghouse. It is wind-proof.—Mrs. O. W. T.

How to improve your next crop!

Add PHILLIPS 66 NITROGEN when you plow down crop residues

Boost your yield per acre next year-and save time and money, too. How? By fertilizing this fall with Phillips 66 Nitrogen before or as you plow down cover crops, stubble, stalks and other crop residues. When you plow nitrogen under with such material you build up the organic matter in your soil, and provide for a bigger crop next season.

So-make the most of your nitrogen fertilizer. Plow down nitrogen with crop residues. Either Phillips 66 Ammonium Sulfate (21% Nitrogen) or Phillips 66 Prilled Ammonium Nitrate (33% Nitrogen) will help you grow big crops at low cost per unit of yield.

You realize by now that agricultural needs for nitrogen exceed the nation's supply. Many farmers will still wait until next spring to buy. That means that you have a better chance to get the nitrogen you need-now.

LARGEST DAIRY show at Kansas State Fair, Hutchinson, this year was Milking Shorthorns. Here is Fox's Roan Prince, grand champion bull shown by John Garetson, Copeland.

Farm Truck Busy as Bee

(Continued from Page 1)

W. H. GODFREY and son, Arthur, Miami county, demonstrate how quickly and easily modern truck bed can be converted from grain to stock carrying.

and her 2 daughters, Sharon and Kay, and her 2 daughters, Sharon and Kay, climbing into the family pickup for a trip to town. Like many farm families, the Prentices use their pickup for everything. "I tried to buy a car this last time," says Mr. Prentice, "thinking the family might need one more than I do a truck, but my wife wouldn't listen to me. I guess our truck is just too handy and too practical to replace with anything else."

At the farm of Steve Russell, in Miami county, we found farmers use their

At the farm of Steve Russell, in Miami county, we found farmers use their own ideas to increase carrying capacity of small trucks. Mr. Russell, at a cost of \$86 for material and labor, built a metal stock rack that fits onto his ¾-ton truck. This rack extends 18 inches at the back and fits over the dropped endgate. "I have carried six 450-pound steers to market with plenty of room to spare," says Mr. Russell. His specially-built rack is attached to the truck body with J-bolts and can be removed so the truck can be used for other purposes. Farmers like Edward Kaiser & Sons, of Miami county, stress the need for

of Miami county, stress the need for larger-size farm trucks. They farm 3 larger-size farm trucks. They farm 3 places several miles apart and use their 1½-ton truck to transport their tractors and o'her farm equipment from farm to farm. "We find it cheaper and quicker to truck our equipment than to drive it under its own power," says Edward Kaiser, Sr. "In fact, one trip on the road with a tractor will put more wear on the fires than a day's work in the field."

At this point his son. Edward Ir

At this point his son, Edward, Jr., chimed in with this point. "I don't see why more farmers don't buy larger trucks. They cost little more than the smaller ones but have a lot wider range of use."

While driving around the country recently we stopped in at the Jefferson

County 4-H Club Fair, at Valley Falls. The fair was just breaking up and there were trucks of all kinds and descriptions scattered around loading up the prize livestock. It was no trick at all to back a truck into the nearest road ditch and load up settle for the boxes. ditch and load up cattle for the home

trip.

Back at the Godfrey farm we were impressed, as we are so many times, with the fact tractor and truck often with the fact tractor and truck often form a team to take heavy work out of farming. Mr. Godfrey was grinding corn which had been hauled in with his truck. The tractor, of course, was supplying power for the grinder. Almost any hard job on the farm can be whipped with one or both of these 2 farm hands.

And modern truck bodies are mighty

And modern truck bodies are mighty versatile, too. Mr. Godfrey and his son, Arthur, took a few minutes to show us just how versatile. The bed on their truck is grain tight. Several slats, however, can be removed for ventilation when hauling small animals like hogs and sheep. Additional stock racks fold down at back and sides when not in use. Within minutes they can be raised and bolted for hauling larger livestock.

Yes sir, there may have been a time when a farmer's best friend was his horse, but today it's the farm truck. And modern truck bodies are mighty

Kansan Named to **Purdue Poultry Post**

Dr. L. A. Wilhelm, Kansas ranchreared, has been named assistant head of the Purdue University poultry department. He is a graduate of Kansas State College. Doctor Wilhelm has been on the poultry staffs of Oklahoma A & M and Washington State College. He also has done commercial work with hatchery interests in Texas and Iowa.

STEVE RUSSELL, R. 4, Paola, extended stock rack over endgate to increase capacity

PROFITABLE HOGS

DR. SALSBURY'S oa-Ga

Gives Normal HOGS 27% FASTER GROWTH With 14% LESS FEED

HOG-GAIN increases your hog profits in two important ways. First, it helps make RUNTS profitable. Second, it stimulates growth of normal pigs of all ages...even from 125 pounds to market weight. Helps you market hogs earlier.

In a typical test by Dr. L. E. Carpenter, of Hormel Institute, University of Minnesota, HOG-GAIN produced 27% faster growth with 14% less feed.

Helps Hogs Combat High "Disease Level"— (Degree of premise contamination). Dr. Damon Catron, Iowa State College, attributes the variation in "disease level" as the reason why one hog raiser does well, another does poorly when identical rations are fed well-bred pigs under similar management conditions. HOG-GAIN combats a high "disease level." Gives you more uniform, faster growing pigs, more profits.

Here's What Users Say:

"The pig pictured above weighed only 56 Gain and a commercial feed were added to the ration, it reached 205 pounds in 80 days." Lee Robinson, Route 3, Abilene,

"I put 16 feeder pigs on Dr. Salsbury's Hog-Gain for the last 3 months' feeding period. They were marketed at 5 months at an average weight of 220 pounds. Hog-Gain certainly gave my hogs remarkable weight gains." Elmer Steinmetz, Chilton, Wisconsin.

NEW Growth Stimulant Helps Make RUNTS

Not An Antibiotic Or **Protein Supplement** But a **NEW and DIFFERENT Multi-Chemical** Growth Stimulant

Just Mix In The Feed or Ask Your Feed Dealer For Feed Containing HOG-GAIN

In Packages For Mixing In Feed Or Ask Your Feed Dealer For Feed Containing HOG-GAIN

Have your feed dealer mix HOG-GAIN in your regular brand of balancer or sup-plement; or get HOG-GAIN by the pack-age for mixing in your feed. For best re-sults use HOG-GAIN in a well balanced ration. Cost is low compared with your profit benefits.

Mail This Coupon NOW

Many Dr. Salsbury dealers have HOG-GAIN on hand. But to make sure you get extra profits with HOG-GAIN, now, send this coupon to us, at once. Every day you miss using HOG-GAIN, you lose extra hog profit. Dr. Salsbury's Laboratories, Charles City, Iowa.

Dr. Salsbur Dept. 16, C	y's Laboratories harles City, Iowa

State Fair Champion

EARL WEBBER, of Arlington, is getting the habit of winning top honors in Brown Swiss show at Kansas State Fair, Hutchinson. This year he had Senior and grand champion female in Indian Creek Joy, shown here.

Make Changes in Apple Standards

Some major revisions have been made in Kansas apple standards. They were changed to agree with U. S. Department of Agriculture standards, and have been approved by the State Board of Agriculture, according to secretary Roy Freeland. Changes were worked out by the USDA, horticultural societies in the state and apple industry representatives.

One important change was addition of a new grade of apples—U. S. Extra Fancy. For complete list of changes in standards, write Marketing Division, State Board of Agriculture, 915 Harrison, Topeka.

rison, Topeka.

USDA Information Post to Kansan

A Kansan has been named deputy director of the Office of Information of director of the Office of Information of the U. S. Department of Agriculture. He is Maurice L. DuMars, a Kansas State College graduate. He was born and reared in Phillips county. He formerly was assistant agricultural ex-tension editor at Kansas State, then joined the Department of Agriculture in 1936.

Kansan New Home Ec. Editor in Montana

Alys Loree Reeder, 1951 Kansas State College graduate, has joined the Montana State College, at Bozeman, as home economics assistant editor in publications work lications work.

To Build New Farm Testing Lab

A new farm products testing laboratory will be built on the grounds of the Topeka State Hospital, in west Topeka. The State Board of Social Welfare has authorized the State Board of Agriculture to build the new building. Roy Freeland, secretary of the Board of Agriculture, states work on the lab will begin in a few weeks.

The lab will be used to test samples

of feeds, fertilizers, livestock remedies and agricultural chemicals to see that they comply with state labeling laws.

Dairy products will be tested for purity. Present testing for compliance with labeling laws is being done on contract with Kansas State College. Dairy products testing is being done by commercial laboratories and by a small laboratory at the statehouse in Topeka. Purpose of the new lab is "to give better and faster service to farmers buying these products," said Mr. Freeland.

Keep Farm Shop Well-Stocked

An adequate, well-stocked farm shop saves critical time on the farm. John Ferguson, Kansas State College Extension engineer, comments all moving parts of farm machines must be properly adjusted for maximum efficiency of operation and for least wear. Oiling of operation, and for least wear. Oiling, greasing, painting, and cleaning prevents rust, corrosion and unnecessing. wear. Safe operation of farm machines depends on operator's knowledge of the machine and his realization that all machinery is dangerous.

FHA Loans Change

Ceilings on loans for farm operation expenses have been doubled by the Farmers Home Administration. Now, loans can be made up to \$7,000. Under newly-enacted Public Law 123, a celling of \$10,000 can be placed on the indebtedness outstanding at any one time. The figure was \$5,000. Maximum repayment period is 7 years now instead of 5.

For Family of Four

A new USDA bulletin, "Food for the Family with Young Children," will interest many mothers. Some of the subjects are: Food for the Expectant Mother; Food Plan for a Week; Food Supply for a Week; Planning Meals; Menus for a Family of Four; To Reduce Food Bill. A copy of this interesting and helpful leaflet will be sent free upon request to Home Editor, Kansas Farmer, Topeka.

Earl J. Kerschen. Conway Springs, sends a daughter of Clyde Hill King Fobes, and along comes a fresh 2-year-old, due just before the sale.

Raymond Briggeman, Iuka, sends a good one due sale day.

the sale.

Raymond Briggeman, Iuka, sends a good one due sale day.

McVays' send one due sale time, and she is a good one.

A. M. Davis, Hutchin on, sends 3 3-year-olds. All due right after the sale, and all carry the service of high record artificial service.

Consignments from Ted Buhler, Assaria, Raymond Bollman, Edna, and Waldo Mueller, Haistead, are not in but they have some toppers.

28 Head of 2-year-olds. Over 25 head of Bred Heifers.

27 head of Open Heifers and Heifer Calves.

The bulls are consigned by Adams Acres, T. A. Burgeson, Waldo Mueller, St. Josephs' Home, Levi Miller, Schneider Bros., Abe Thut and Raymond Ohide. They are show type, high record and nearly ready for service.

Attend this sale for your future herd sire.

Catalogs out about October 15th. Lunch available all day.

HALLMARK FARM JERSEY DISPERSAL

Kansas City, Missouri Monday, Oct. 29, 1951

Sale will be held at the farm, 110th and State Line Road, Kansas Zity, Mo. Sale starts at 12:30 P. M.

City, Mo. Sale starts at 12:39 F. M.

This sale will offer you the opportunity to buy foundation Jerseys developed in one of the oldest continuous breeding units in the breed. Continuous testing, showing and classification for many years give pedigrees on these cattle that are complete with information. Two very desirable herd sires will sell: Design Dynamo—Excellent Proven Sire whose get has been quite outstanding—and Highfield Prudent—Excellent—winner of 20 champion-ships at leading shows. A number of progeny of each sire will also sell. Most of the older females selling are daughters of Superior Sires, such as Crystal Star Oxford Sultan, Excellent; Hallmark Double Observer, Excellent; and Highfield Nobly Standard, Excellent. On the lower line the top brood cow families of the herd are represented; the Brides—the Endowments—the Faiths—the Gold Cups, etc.

AN IDEAL CHANCE TO PURCHASE.

YOUR FIRST OPPORTUNITY TO BUY SHORTHORN AND POLLED SHORTHORN BULLS

Developed Under Practical, Identical Range Condition

RANGE BULL PROJECT SHOW AND SALE October 19 and 20 — Broken Bow, Nebr.

(At Kennedy Ranch 6 miles east of Broken Bow on Nebraska Highway No. 2.)

SHOW: Friday, October 19th; 10 A. M. — SALE: Saturday, October 20; 12 Noon 102 SHORTHORN AND POLLED SHORTHORN BULLS

All Ready for Service — One or a Carload

Rugged, heavy-boned young sires that have been tested under range conditions since June 1, 1951. Buyers will be given individual ratings at the beginning of the contest and also the average daily gain. Take the guesswork out of bull buying.

SHORTHORN PERFORMANCE DEMONSTRATED

The Bar B Ranch, Ogden, Utah, proved that Shorthorn blood is responsible for average weight increases per calf of nearly 50 lbs. per head at 10 months of age by weighing over 100 calves, one third of which were crossbred sired by Shorthorn bulls—the remainder straight-bred calves of another breed. YOUR HERD WILL ALSO PRODUCE CALVES 10 PERCENT HEAVIER IF YOU USE SHORTHORN BULLS. Buy them hardened for service and strong-aged at Broken Bow on October 20.

The bulls will be judged for cash prizes in groups of 2 and 3 (no halters) following a system

FEEDER CALF SALE October 24--- Salina, Kansas

There will be 3,000 head of good quality Angus Calves, Yearlings and crossbreed cattle, which were sired by Angus Bulls.

These cattle have been selected from the good herds in this territory. They are fresh from the country, in excellent health and ready to go to the feed bunk. They are bred to produce good beef at a minimum feed cost.

The Kansas Angus Breeders' Association is offering \$1,000 premium money for this event.

The cattle will be judged prior to the sale by nationally known judges Wayland Hopley, Atlantic, Ia., and Fred Olander of Kansas City, Mo.

If you are looking for top quality Angus feeder cattle, be present, October 24 at Salina

For information concerning the sale, contact

J. B. HOLLINGER, Chapman, Kansas

Kansas Aberdeen-Angus Breeders' Association

IN THE FIELD

MIKE WILSON

Topeka, Kansas Livestock Editor

A Hereford bull on a Kansas ranch has produced 200 calves in 5 months! At the O'BRYAN RANCH, Hiattville, artificial insemination was used to produce a large potential crop of calves by E. E. R. Victor Tone 4th. His service this year has almost tripled his 1950 record.

Smoky Valley Carnation, Goldie, registered Holstein-Friesian cow owned by W. G. BIRCHER & SONS, Elisworth, has completed a production test with the Holstein-Friesian Association of America. Her record was 493 pounds of butterfat and 12,992 pounds of milk, testing 3.8 per cent. She was milked 2 times daily and was 2 years 4 months when she began her testing period.

Onabank Favorite Melody, registered Holstein-Friesian cow owned by LLOYD SHULTZ, Pretty Prairie, has completed a 365-day production test with the Holstein-Friesian Association of Amer-ica. Her record was 561 pounds butterfat and 15.383 pounds milk. She was milked 2 times daily, was 4 years 4 months of age when testing period began.

There will be a NATIONAL SHORTHORN AND POLLED SHORTHORN SHOW at the Ak-Sar-Ben Stock Show in Omaha, Nebr., October 1 thru 4, announces American Shorthorn Breeders' Association. This will be the 3rd annual event of its kind. Prizes of \$20,000 have attracted 58 exhibitors from 11 states, who will exhibit 318 head of Shorthorns and Polled Shorthorns.

W. O. BOEHLE, Lawrence, has made a state champion record with his registered Guernsey cow, Boehle's Prince's Christine. Her production record was 13,038 pounds milk and 678 pounds butterfat. It is the highest Herd Improvement Registry record for a senior 4-year-old in Kansas, with the American Guernsey Cattle Club. Christine was milked 722 times while on test.

KANSTACOL MADCAP ULTRA, registered Holstein-Friesian cow owned by KANSAS STATE COLLEGE, has set a new production record with the Holstein-Friesian Association of America. The cow takes the lead for all Kansas' Holsteins, regardless of age and milked 2 times daily, in the Association's Yearly Division. Her production was 707 pounds of butterfat and 17,764 pounds of 4.0 per cent milk.

A REGISTERED HOLSTEIN-FRIESIAN COW owned by Kansas State College has set a new state production record. She is Kanstacol Madcap Ultra, and takes the lead for all the state's Holsteins, regardless of age, milked 2 times daily in the yearly division, advanced registry test of the Holstein-Friesian Association of America, Her production was 707 pounds of butterfat and 17,764 pounds of 4 per cent milk.

A registered Guernsey cow owned by J. L. NELSON, Cedar Drive Farm at Wichita, has completed a production test with the American Guernsey Cattle Club, Ruth's Rosebud of C. D. produced 8,633 pounds milk and 488 pounds butterfat. She was milked 608 times during her record. "Rosebud" is the daughter of the registered Guernsey sire, St. Albans Actor Grandee that has 3 sons and daughters in the Performance Register of the national club.

Nineteen registered Jerseys in the herd owned by CLARK H. REECE, Horton, recently were classified under a program of the American Jersey Cattle Club. Animals were rated for type. Of the 19 Jerseys, 3 scored Very Good, 12 Good Plus, and 4 Good. Five animals in this classification were owned by Dwight Reece. The Club's program is designed to help breeders improve their cattle by knowing which ones come closest to the breed's standard of perfection.

TOMSON BROTHERS SHORTHORN SALE, September 18, averaged \$656 on 106 lots. Fifteen bulls sold averaged \$1,046 and 91 females averaged \$591. Top bull, lot 1, Mercury's Major, brought \$1,925 on the bid of Hammond & Son, Prescott. Second top bull, lot 7, Royal Secret, sold for \$1,325 to Lloyd and Don Obreit, Duke, Okla. Top female in this auction was lot 55, which sold to Gustafson Brothers, Osage City, for \$1,040. This offering of sale cattle was among the most outstanding Shorthorns ever offered for sale by Tomson Brothers, Wakarusa.

These REGISTERED HOLSTEIN-FRIESIAN COWS recently completed production records with the Holstein-Friesian Association of America: Owned by Albert Ackerman, Sabetha—Korndyke Ormsby Gerben Bess, 667 pounds butterfat, 15,896 pounds milk, 365 days, 2 milkings; Abram B. Thut, Clearwater—Einwood Bessie Burke, 431 pounds butterfat, 10,591 pounds milk, 295 days, 2 milkings; Wilson Brothers, Lincoln—Saline Valley Lady Rose, 651 pounds butterfat, 16,497 pounds milk, 365 days, 2 milkings; Carol Pults, Horton—Pultsvale Netherland Alice, 464 pounds butterfat, 13,268 pounds milk, 349 days, 2 milkings; Abram Thut, Clearwater—A B T V B Gracie, 531 pounds butterfat, 14,570 pounds milk, 399 days, 2 milkings, and Quentin J. Kubin, McPherson—Quin-Dale King Bessie, 681 pounds butterfat, 16,877 pounds milk, 365 days, 2 milkings. These REGISTERED HOLSTEIN-FRIESIAN

There is one livestock man in Kansas who is constantly trying to help the boys and girls on our Kansas farms—JOE O'BBYAN, owner of O'Bryan Ranch at Hiattville. Joe is so enthusiastic about the future of our young people that he disregards time and expense in promoting projects in the junior livestock industry. This year he has made steers of around 200 of his calves from the registered cows on the ranch. Many of them are suitable for herd bull prospects. Joe had done this so 4-H boys and girls might secure calves of top quality to start in their club for 1952.

Another project he's giving much encourage—

club for 1952.

Another project he's giving much encouragement is the heifer calf division of the 4-H clubs.

Mr. O'Bryan thinks if boys and girls go in club work with a good heifer calf, when they are out of high school and ready for college they will have something to put them thru. The O'Bryan sale this fall will be made up largely of animals that should go into the hands of 4-H Club members.

For distinguished success as a breeder of Ayrshire dairy cattle, CARL SCHOLZ, Twin Oaks Farm, Huron, has been presented the Constructive Breeders Award by the Ayrshire Breeders' Association. The herd has been given an official classification score of .846, which places it among the top 10 per cent of the breed on type characteristics. There was one member of the herd designated as "Excellent," which is the highest rating given any Ayrshire, and one "Very Good," 2nd highest rating.

The Ayrshire sale of C. C. McGENNIS, Rich Hill. Mo., was handleapped due to high water which blocked several of the roads including one main highway. Emerald-Acres Farm has been producing good registered Ayrshires for several years and the sale was a reduction sale. In the auction which was held on September 17, 58 lots, which included many young animals, averaged \$211.50. Top was \$440 for an added lot, a cow and bull calf. The average was \$260.80 on 26 cows, many cows carried some age. Twenty-six heifers, all open and including baby calves, averaged \$132. Kansas and Missouri buyers bought them all. "Connie," as he is known to his friends and to the Ayrshire fraternity, stated he was pleased with the results of his sale—held at the farm southwest of Rich Hill. Bert Powell sold the offering, assisted by local auctioneers. Don Bowman, Hamilton, Mo., was sale manager.

Forty lots were sold in the JOHN THOMAS HOLSTEIN DISPERSAL, Mt. Ayr, Ia., on September 27. The herd was strong in the bloodlines that have made it possible for Clyde Hill Farm of Missouri to do so well in recent years. The entire offering, which included some cows of 10 years or more, averaged \$557. The sale top was the 3-year-old bull, Sensation King Plebe. He sold for \$1,000 to Ole C. Wibholm, Clarinda, Ia. Top female was lot 10, a 4-year-old granddaughter of Rock River Hengerveld Al, and at \$910 she was purchased by William Meyer, Clyde, Mb. The 5-year-old bull, Clyde Hill King Fobes Plebe 9th, sold for \$510 to L. E. Gates, Jamesport, Mo. Several young bulls were sold and they sold up to \$600. Missouri and Iowa buyers purchased the entire offering. Buyers came from a wide area but they all went to 2 states. Results of the sale exceeded the owner's expectations. Bert Powell sold the cattle. Claude E. Wylam, Waverly, Ia., was sales reavager.

The SOUTHWEST MISSOURI JERSEY BREEDERS SALE, Neosho, September 15, attracted buyers from Kansas, Arkansas, Oklahoma and Missouri. Fifty-two head of registered Jerseys of all ages were sold for an average of \$309. Knolle Jersey Farm, Sandia, Tex., consigned the high-selling female, a very choice heifer, and she sold for \$585 to Camfield Jersey Farm, Neosho, Mo. W. E. and Angle Smith, Joplin, had the 2nd high-selling female, also a choice heifer and she sold for \$575. The offering was good, breeding popular, prices paid were conservative in some instances, but the sale as a whole was considered very satisfactory. Twenty-three breeders consigned to the auction which was the first held by this group. Outstate cattle were accepted for this auction. P. R. Smith, well-known Jersey breeder of Joplin, acted as manager and had everything in good order for the auction. John Fawcett read pedigrees. Bert Powell and Roy Pauli were auctioneers.

LVF HELMSMAN 87TH

DOMESTIC LAMPLIGHTER 46TH

This offering is strong in ANXIETY breeding.

19 Bulls, one coming 2 years old, many of serviceable age. 56 Females. 26 Cows some with calves at foot. 14 Bred Heifers. 10 Yearling Open Heifers. 7 Heifer Calves.

This sale will feature the get and service of Domestic Lamplighter 46th, top selling bull in the Mousel Brothers sale in 1945. He is sired by the great Domestic Lamplighter the sire of many top-selling cattle for Mousel Brothers. He also sired many winning show cattle. Proud Lamplighter, one of his good sons has been used in our herd. Some of the cows and heifers carry his service. Bright Mixer the 73rd by Bright Anxiety M. who did so much good for Taussig Brothers is represented. He was a member of the show herd, winning grand champion at Great Falls, Mont., reserve champion at Los Angeles and stood second at Denver 2 years in succession. The Taussigs retained 100 daughters of this bull in their breeding herd. Many cattle sired by and bred to this good bull sell. L. V. F. Helmsman 87th top selling bull in the Longview Farm recent sale. He by WHR Helmsman 4th by WHR Helmsman 9th who was considered one of the breeds best sires and the 4th is one of his top sons.

TANK MANSIFICK I

"They Laughed When I Sat Down at the Combine!"

THAT old advertising headline about the man who couldn't play the piano has its counterpart in the experience of W. R. "Buster" Perkins of Alice, Texas. They laughed when he started out to be a farmer.

You see, Buster Perkins attended law school at Texas University, and then served a hitch in the Navy. But he decided it was the soil that interested him most.

He had much to learn. His neighbors laughed at the questions he asked. But they stopped laughing right fast, when his first crop produced one of the highest yields in the county.

Today, Mr. Perkins farms 850 acres; about

250 in cotton, 300 in flax and 300 in grain sorghums. He cross-breeds Brahmas and Herefords. A couple of years ago he built a "dream" barn that includes a fine workshop and house-to-barn intercommunication with Mrs. Perkins' kitchen.

Yes, Mr. Perkins has had the last laugh, and a good one. And he showed he knew what he was doing when he picked his petroleum products, too.

"I have used Conoco Products ever since I started farming." he says, "and, believe me, they have played an integral part in cutting repair costs to the bone and keeping my equipment operating smoothly. I figure

that the use of Conoco Products has saved me a minimum of \$100 on one Farmall alone!

"In these days of high labor and equipment costs, we just can't afford expensive breakdowns and loss of time. We must have an oil that can take it. We get it with new Conoco Super Motor Oil."

"50,000 Miles - No Wear!"

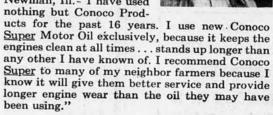

After a punishing 50,000mile road test, with proper crankcase drains and regular care, engines lubricated with new Conoco Super Motor Oil showed no wear of any consequence . . . in fact, an average of less than one one-thousandth of an

inch on cylinders and crankshafts. AND gasoline mileage for the last 5,000 miles was actually 99.77% as good as for the first 5,000! This test proved that new Conoco Super, with Oil-Plat-ING, can make your cars and trucks last longer, perform better, use less gasoline and oil.

Keeps Engine Clean...Stands Up Longer!

"I've been farming for 25 years in one of the finest agricultural sections of Illinois," writes C. L. Grey, Newman, Ill.-"I have used

Coffee Velvel Cream Pie

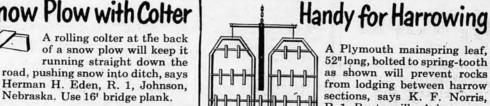

. . . by Doris Osborn Route No. 1 Holdenville, Oklahom

ssolve gelatin in water. Beat egg yolks, suga ffee till foamy—place in top of double boiler t water. When hot, add softened gelatin; stir nuously until custard coats spoon well. Remove at and cool slightly.

FARM KITCHEN

Plymouth mainspring leaf, 52" long, bolted to spring-tooth as shown will prevent rocks from lodging between harrow sections, says K. F. Norris, R. 1, Bentonville, Arkansas.
