BLUEMONT FARM PAPERS.

BY W. MARLATT.

our readers an occasional talk about matters in Kansas. relating directly or indirectly to the farm, in its several departments.

have accomplished in the way of forest and fruit culture in addition to the usual routine work of the farm, has been done within the past five or eight years. In this time I have that with good health and plenty of "elbow grease," a man can make a farm support his family, and, in time, be surrounded with all ries of life, just as well in Kansas, as elsewhere in our broad domain.

I have some twelve acres planted to forest and fruit trees, principally the latter. Of ap ple trees I have about fifty varieties, about half of which have been in bearing from two to five years. Of these the earliest and best bearers are the Winesap, Ben Davis, Willow Twig, Rome Beauty, Wagner, White Winter Pearmain and Jenneting, in about the order named, as winter varieties.

Among the earliest and later summer varieties are Early Harvest, Red Astrican, Lowell, Grammar's Pearmain and Maiden's Blush.

There are other old and well known and popular varieties that may do as well, and even better than the above mentioned, but I have not tested them.

Of the small fruits, I have found the grape, gooseberry, current, blackberry, raspberry and strawberry a grand success, seldom, if ever, failing to afford a fair crop. We have all of these covered, so that with peaches, that have never failed us since they came into bearing and apples, we have an abundance of fruit the whole year round.

Were I to go out to settle anew on the prairie, the first thing of permanent improvement would be to put out an orchard of choice apple, peach, and all manner of small fruits. When properly done and cared for, nothing will be found, counting the labor and money invested, to give so speedy and satisfactory

great outlay will be needed. Twenty-five dollars, or less, will purchase all the nursery the case with me for two years, it requires a amount that many a poor man spends in a single year for tobacco). Nor is a great deal of time needed either. To the man whose whole time is demanded for the bare support of his family as is the case with most of the frontier settlers, all this sort of work can be done at liitle odd spells that will not be missed in the esult of the year's labor.

One thing must be borne in mind, these things will not bear neglect, especially at the first.

Anything done in this line had better be done well. Nature, though a kind and ever generous mother, will do her part only on condition that we faithfully do ours. Don't try to impose upon her, she won't bear it.

To protect my fruit trees from the depredations of rabbits, I wrap them with paper. Fold in strips of three or four thicknesses and as wide as the palm of the hand, and wrap from the ground upward a foot or more in hight and tie with a strip of old cloth or leave it to rot off. It will serve as a protection also against borers and sun scald.

on walking out after a clear, frosty night, to as he can grasp from one row, and then at find a fine tree just ready to come into bearing such an angle that the break of the one row girdled and destroyed in a single night, all is placed on the far side of the opposite one; bune will wrap four or more trees, so as to thoroughly protect them for a season.

My wheat, the "Bluestem," stood the win-

oat ground, which, with what is already sown with which to feed my stock.

I have been making sugar from soft maple and box elder grown from the seed on Blue-Though a resident of Kansas since "'56," I mont farm since '67. white as the best coffee sugar bought at the being fully equal to the former. store. That from the box elder is of a light demonstrated to my own satisfaction, at least, yellow color and in appearance and taste close- for the first time to plant some broom corn, I ago from the hard maple, in Indiana.

The trees tapped are from five to six inches this line in the future.

better.

BROOM CORN.

Having been engaged in the cultivation of broom corn for the past five or six years, and thinking a short article on its cultivation might be of enterest to some of the readers of the FARMER, I give you my mode of planting, cultivating and securing the crop.

Any good corn ground will produce a pay ng crop of broom corn. It should be pre pared by being well and deeply broken up and made smooth and fine with a harrow. My mode (being among stumps I cannot use machinery) is to mark out the rows one way, as I plant in drills, three feet and a half apart quarts to the acre, as evenly as may be, and which a little practice will render quite easy. It is then harrowed across the rows and the ground left fine and level.

A beginner will be apt to think he is not getting seed enough. He will find however, betting seed enough. He will find however, betting seed enough. The will find however, betting seed enough. The state of the season that corn may be planted. Plant four rows, four feet apart, and between the fourth and fifth rowsleaves a space. quarts to the acre, as evenly as may be, and ground left fine and level.

vain. As soon as the plants are sufficiently large to cultivate, the crop requires the same treat ment as indian corn; care being taken that all grass in the rows be thoroughly kept down. I have found it a very good plan when the ground was grassy or weedy, as soon as the crop was two or three feet high, to take a small diamond plow and turn the furrow to the row, thus effectually covering the grass. Whatever mode is adopted the grass must be kept down to secure a paying crop.

To get the best and heaviest brush, the crop should be harvested as soon as it is fully out of blossom, but finding the seed equal to half a crop of medium corn, my usual practice has been to defer cutting until the seed was fully formed and out of the milk, but soft and doughy; when the crop should be secured with as little delay as possible.

My practice has been to break the corn in string of any kind to keep it in place; and tables about three feet high, that is two rows are broke diagonally across each other; the breaker going backwards between the rows One feels considerably put out with himself and breaking from the standing corn, as much brush as cut being laid at the table, where it vented" the sun flower. may be lest to cure The cutter grasps the brush of as many stalks as he conveniently ter well and is now looking finely. I had the can with the left hand, and with a quick best crop in the region last season and am movement cuts the stalks off, not less than six hoping to beat it this. I have just sown the field, fifteen acres to timothy and red clover, joint. If this is properly done, the sheath is work in the least cost is the best system. for meadow, and expect to sow some more on left on the stock, and gives no further trouble. But work is no less essential.

My practice has been to secure the brush and well set, will make twenty-five acres seed- the day after it is cut, and as fast as the seed ed down to tame grasses on Bluemont Farm. is scraped off, for which I use a cylinder I want something better than prairie hay and horse power, to tie the brush in small For the Kansas Farmer.] bundles of three or four pounds and put them My fifty-six head of stock, cattle and horses on scaffolds placed about eight inches apart in have managed to store away a larger amount an open building, where it cures without of grain and hay this winter with less visible further trouble. The seed is taken directly Under the above caption, I propose to give results than I have ever experienced before from the scraper and placed in a kiln prepared for the purpose where it is exposed to a moderate heat for twenty-four hours, when it will keep as well as wheat or any other grain.

I have planted both the "Missouri Evergreen" and "Shaker Green," prefer the latter seed is fully ripe; which is an item, when The sugar from the soft maple is nearly as the corn or broom is sent to market, its yield

To any of your readers who may be induced ly resembles the sugar we made thirty years would say, try only a few acres at first, as without the facilities of securing the crop and until you have some practical skill, there is the necessaries, if not the comforts and luxu in diameter and from twenty to thirty feet danger of a loss. It will not stand wet after high, planted around the orchard as a wind it is cut, heats as readily as buckwheat, and break. I propose to utilize them further in any considerable color destroys its market value. Any old building or shed, however, The prospect for a fine fruit crop was never so long as the roof is tight, will secure it just as well'as the best. Above all avoid throwing it in large piles for any considerable time

after it is cut, with the seed on. There is but little doubt but that good prices will be realized for broom corn for the next two or three years. The old stock of corn and brooms is pretty well used up and by the time the next crop can be placed in contrary. At least they do grow along the market, the chances are that there will be a brisk demand at paying prices.

Wyandotte County, Kan.

# Castor Beans

We are informed that the farmers through out this county design engaging extensively in the laudable enterprise of planting castor beans and flax—two products that will undoubtedly prove more remunerative to the farmer than the usual amount of oats and corn, bith etc. adjurant to as the incorne of the farmer. I plant in drills, three feet and a half apart with a small single shovel plow, (north and south preferred); the seed is then dropped along the rows by hand, not more than two we say to the farmers, give the products a thorough test. Do not expect them to grow without the same than the usual amount of outside farmer with a small single shovel plow, (north and south or or the other of these crops. Now, we say to the farmers, give the products a thorough test. Do not expect them to grow without the same than the usual amount of our side of the same than the usual amount of our same to the same than the usual amount of our same to remain the usual amount of our same to remain the usual amount of our same to remain the usual amount of our same than the usual amount of our same than

when his crop matures, that it is thick enough to produce fine long bush, which is the object. Should too much seed be used, as was cook that will be necessary for a trial, (an must be done, or your labor will be all in must be done, or your labor will be all in must be done, or your labor will be ansaged.

Twested, to give so speedy and satisfactory when his crop matures, that it is thick enough to produce fine long bush, which is the object. Should too much seed be used, as was the case with me for two years, it requires a would corn, to make sure against defective beans. After planting, the plants will need about the same attention that is necessary for steadily, as people learn how easy it is to do corn.

# Flax Culture.

Flax should be sown about the same time ats are, and is put in in the same manner Neither of these crops is likely to be injured with drouth, or chinch bugs and army worms. Taking everything into consideration, these products seem to be the surest and altogether most profitable crop that can be raised in this

NOTES ON TREES.

BY R. S. ELLIOTT.

I see an inquiry for locust seed in the FAR-MER. Kern, Steber & Co., No. 211 Market, street, St. Louis, (who advertise in the FARM-ER) have black locust seed at low prices. If any subscriber wants any, let him send any sum from fifty cents up, to this firm, and they will send him the seed by mail or express as ordered. The firm is reliable. They also have honey locust seed, and other tree seeds

Neither honey locust or black locust ought be planted until the ground is so warm as to bring up the seed at once. About the first of May is a good time.

I had good success on the plains with black ocust, by pouring scalding water on the seeds at night and planting next day. I took the seed to the field damp, and rolled them to separate them from each other, for convenience

in planting. Honey locust seed require to be scalded and kept in soak some days; then pick out the swollen ones to plant, giving the others more

Mr. C. W. Johnson will hardly be able to stop tree planting in Kansas. He may theorize to his heart's content, but the trees will grow, if planted, even on the upland prairies, line of the Kansas Pacific railroad. If Mr. Johnson will look at the little field on the west line of Ellsworth county, he may see that trees do about as well there as in Illi-

The difficulty of growing trees on the plains is not in the summer climate, but rather in the dryness of the falls and winters. Insects are also destructive. But it is practicable to grow trees, even without irrigation, away out on the plains, as I have proved to my own satisfaction, at least. The present financial condition will not justify the Kansas Pacific in going on with experiments, and I do not regret that such is the case, so far as establishing possibilities is concerned. This has already been done. But I do not care to review Mr. Johnson's essay. His opinions are theoretical. Mr. Kelsey can take care of him. Kelsey speaks from experience—so do I.

the work.

I enjoyed Mr. Kelsey's essay on trees, and Mr. Copley's address on manufactures, very much. So long as the FARMER presents papers of this class, an occasional counter-blast ike that of Mr. Johnson's, can be tolerated. It seems to wake people up. Kirkwood, Mo., March 28

For the Kansas Farmer.

# FRUITERY .- SOME OF MY WAYS.

Our friend, "Driab" opens up a proper sub-YIELD, about equal to corn. In planting, ject and gives good views in regard to fruit strike the furrows as for corn and then scatter growing. But I, for my part, shall differ a the seed about a foot apart. Cultivate same little from him. In the first place I shall be particular to start a hedge and wind break on HARVEST-Take a corn knife and cut off the the south side of the orchard, as well as the heads and throw them into the wagon. Thresh west and north side. Most of our summer winds come from that quarter and strong MARKET.—The best market is to feed it to enough to shake much of the fruit off if they

I would like to have my summer and early fall apples within 100 feet of the house. I would not want my small fruit garden between my house and the orchard.

An orchard that is kept in good order is a

garden, unless, I had a small farm and was near a large town.

Careful cultivation for a couple of years, Get crops in early, but not before the land is does not end the work of a fruit garden. They

If the grass sod is allowed to set arounthem they soon become of no use, and if the weeds take them they present an ugly sigh -a shame to the owner

In planting small-fruits, or any other kind we must calculate the labor required to keep them in good order in after years, and then plant according to our strength.

I should want my orchard site to lay so a not to make triangles and waste corners of the

have the opportunity. The coop should also

Your hedge should be set so as to allow of the hogs running, part of the season, among the apple, peach and plum trees; but not among the small fruit.

#### LAYING OUT AN ORCHARD.

EDITOR KANSAS FARMER :- I send you my plan for laying out an orchard, which I have practiced several years. Several of my neigh bors have adopted it and with perfect success It is both simple and accurate :

An irregularly set orchard is an eye-sore while one uniformly set is a thing of beauty.

of the distance between the trees to be set.

This can be made of fence wire, or much smaller will answer. Have a two inch ring in each end, also one in the centre, making the two parts of equal length. A rope or cord is not to be relied on as it will stretch or shrink from 6 to 12 inches in a cord of the desired length. With your stakes ready—and sired length. W sired length. With your stakes ready—and they need not be large, as no sighting is to be done, and one person to each ring in the

# Morse Department.

#### BREED LARGE HORSES.

Taking scrub or common horses as they run and their quality is so poor, the supply so large, and the prices so low, and there is absolutely no chance, as a general thing, of making expenses in breeding and raising this discription of stock. But there are other kinds of horses of the air breathed, the means by which it I shall plant my apple trees 25 feet apart, and have them standing diagonally, thus: In beginning the second row, I would measure off 25 feet, and then go on a line parallel with the first row 12½ feet to set the first tree, and then next 25 feet from that, and so on, through the row. Then begin the third row in range with the first.

I should plant my peach trees around the wind break—not too close to the wind break, but using a little of the space between the trees of the first apple row.

Another very important matter is to have Another very important matter is to have those already in use are placed in such severe portance than might appear at first sight; for your orchard, or some part of it, come up close to your chicken coop, as your chickens the close to your chicken coop, as your chickens will destroy many beetles and moths if they the form this sort of this description, which the farmer every horse of this description which the farmer every horse of this description. of this description which the farmer can send to market will meet with ready sale, and bring good round prices. Aside from the stallion service, the cost of raising such animals is not a particle greater than the cost of raising a scrub which will not bring one quarter the price when brought to market; and their disposition is such, that they are less liable to strain and injure themselves while developing in the pasture, and are more readily broken and trained to harness.—National Live Stock Journal.

### DO HORSES REASON?

while one uniformly set is a thing of beauty. The quincum style giving the best landscape effect, economizing ground and giving more leading to the church, the other leading to the depot. Now six days in the week is the worked in four different directions, is the style adopted.

After deciding where your first row is to be measure accurately and see that the line is perfectly strait, as the uniformity of the whole orchard depends upon the exactness of this row. Prepare a chain twice the length of the distance between the trees to be set. This can be made of fence wire, or much

BREEDING TO YOUNG FILLIES.

For the Kansas Farmer.

VENTILATION.

of this description which the farmer can send so deficient as not to allow it to enter in health and the lungs in good condition, but is proper motion and room for expansion of the chest is denied, then the evil results speedily For many years I have made the horse a follow. The lower—or floating—ribs are in subject of thought and study. At times I have tended for motion and when the lungs are owers, and can understand and apply them filled with air, a full grown healthy chest in various ways.

For the last two years I have driven my at the lower part. When this expansion is should expand about two and a half inches

us all-the victims of insufficient covering for both extremities of the body—which covering is described by Talleyrand as "beginning too in the chain) commence by placing one of the end rings over the first stake in the row that is staked out; the other end over the second stake, the other, or centre ring, being on the line of the second row, will come exactly where a tree is to be set; as an equilateral triangle is thereby formed. Thus proceed until the whole row is staked out. Then use this row as a guide. In this manner continue until the whole ordered is staked off, which is done very rapidly.

When ready to set the trees, take a strip of board six feet long, cut a notch in the centre and distance from the notch bore a hole in each off other board. Place the notch against the series of the set, and then put attack means of the board. Place the notch against the series the set, and then put attack means cannot be set, and then put attack in each hole at the ends, remove the work of the two sticks and the tree placed in the notch will come exactly where the first stake was stuck. This requires but one person, as no sighting is needed.

While accuracy is preserved in this plan, it is also the most rapid of all plans for laying out and asting an oreland.

ORANUES AND LEUCONS.—The full grown of the full grown of the street of t

muscles of the abdomen and lower third of the chest. The amount of carbonic acid given of by the lungs, is in proportion to the quantity of air entering them. We find up to the agof eight years, the difference in the quantity of this gas thrown off from the lungs of boys differs but little from that exhaled from the lungs of girls.

An eminent authority on this subject says

twelve years of age as they do at eight. We air breathed by boys and girls, depends to a perfect safety. very great extent upon the fashionable dress

We all remember how cholera has desolated our country in other years. If it were approaching our locality, how our digestion would be interrupted and our dreams disturbed. Doctors would meet and hold grave discussions in reference to its cause, prevention and cure. Cities would appoint their boards of health, establish quarantines and adopt such hygienic measures as would be recom mended by the guardians of public health. Notwithstanding all this preparation and excitement, tight dressing is one of the most prolific causes of a disease that destroys many more lives than cholera-(consumption). There were more deaths from consumption, even in the years cholera prevailed in this country, than from the latter disease. From June 1st, 1849, to June 1st, 1850, there died of cholers in the United States, 31,505; of consumption 33,516. Of females, there died in the United States that year between the ages of twenty and fifty, of cholera 5,660; of consumption 10, 198; and yet while many a cheek grows pale at the name of cholera, few are disturbed about

During the first few years of life almost as many boys die from this disease of the lungs as girls, but between the ages of ten and twenty years, there died in the United States 1,144 males, to 2.335 females. About the age we find this diminution of air in the lungs of girls, we also find the mortality from lung diseases largely increased, so that at the age of twenty, about the time the habits of dress have had a sufficient time to produce their worst results, the mortality from this dis ase both extremities of the body—which covering is the greatest. Epidemics sweep over the deaths in the United States-are like the poor ment. inquire, what is being done to enlighten the a dozen eggs brought from Cuba.

of tight lacing are known to every surgeon, as soon as bees are removed from their win-not merely in relation to spinal curvature, but in their influence on the general health. There

DUCKS AS EGG PRODUCERS.—In answer to a correspondent, the Cottage Gardener says: The number of eggs laid by a duck depends very much on the breed to which she belongs. In much on the breed to which she belongs. In all poultry, the non-setters lay more than those that are concerned in the raising generation. Thus the Aylesbury will lay a greater number of eggs than any other duck. The black duck, called the Labrador, the East Indian, or Buenos Ayrean, is a good layer. The Rouen is an average layer, and the wild duck lays few company with these An old duck is as a rule as erage layer, and the wild duck lays few compared with these. An old duck is, as a rule, a better layer than a young one, but it is impossible to give the average of any of them. Aylesbury ducks begin to lay in November and December; Rouens three months later. Both the time when they begin laying, and the number of eggs they lay, are influenced by their keeping and by judicious management.

Two Thousand Dollars for a Roosterl—The Boston Journal says Mr. William G. Davis, Civil Engineer on the Portland and Ogdensburg Railroad, purchased of Mr. Ira Batchelder of the Mt. Crawford House a Black Spanish rooster, called "General Castelar," for \$2000. He was the only bird hatched from a dozen eggs brought from Cabe.

The various Deputies will greatly oblige us by send u.g lists of G anges, when organized, for publication

It is requested that all Granges within the State report the names and postoffice address of their Masters and Secretaries, elected for the ensuing year, to the Secretary of the State Grange, G. W. SPURGEON. of Jacksonville, Neosho county, Kansas.

It is also requested that each delegation from every

county report the names and postoffice address of the Masters and Secretaries of the Subordinate Granges o their respective counties at the coming meeting o the State Grange, on the third Wednesday of Februa Topeka, Jan 14, 1874. Sec. State Grange

For the Kansas Farmer. CHATS WITH PATRONS AND REPLIES TO CORRESPONDENTS.

BY W. P. POPENOE.

J. H. G., Wabaunsee co.,-You want my advice about jewels. I cannot advise you to purchase them; they are nice to have but cost too much, and I think you can make better use of your funds than buying the imple ments at the price asked for them. My motto is, keep our money at home as much as we can. I also think they cost at least one-third or one-half too much, and cannot advise you to send your money for them when it could be spent to so much better advantage in the pur chase of an organ for your Grange, or books and papers for general use, or in the purchase of some improved stock or machinery. If we could get the jewels and implements at a rea sonable price I would recommend you to do so, but until they bring them down to Grange prices, my advice is, let the manufacturer keep them in his show case. I understand they will soon be manufactured at prices that will probably be acceptable to us.

We do not want to see this branch of busi ness made a monopoly of, any more than any other. So we can afford to wait until we have them offered at reasonable rates. This no only answers your request, but numerous oth ers. It is rather out of my line, but as so many wanted advice on this subject, I concluded to give you and them my opinion. It will cost you nothing, at least, if you do not

take it or profit by it.

To Subscriber.—It is the duty of the Maste to try to be at every meeting. If he should be absent at any time, let the Overseer take his place and appoint an overseer-let him appoint any good working Fourth degree mem ber. Or, if a Past Master is present, let the Overseer, it he chooses, ask the P. M., to take the chair, and keep his own place.

The singing is part of the opening cere mony, and should not be neglected. Immediwork comes in, and then declare the Grange open according to the ritual.

J. G., Brown co.-The County Councils are Grange. The Subordinate Grange, the social the summer, to have implements manufactured he can reach a central point. at Humboldt, Iola, Topeka, Leavenworth, Lawrence and other places. Should the dam at Lawrence prove a success against high water this spring, manufactories will be started of the state for all the plows, cultivators, reapers, etc., that we use.

A subscriber asks: 1. Is it right to admit seer, acting as Master, give the annual word?

1. If they are not too big, or sharp. 2. The Overseer, when acting as Master, fills his capacity.

ORAGE MISSION KAN. March 29. EDITOR FARMER. Our county has at last EDITOR FARMER. Our county has at last as before, and he would obtain increased profbegan business in the way of Grange enterits upon his productions; as illustration: A this state has been confined to the halls of sale. prise. The County Council has contracted for one of the best mills in the state, and have began operations.

We propose, when the new wheat crop is harvested and ready to market, to then keep the mill running night and day for the entire year. The farmers in this county mean business and are going at it in a business like

We expect, also, to build an elevator, about 30x40 feet and four stories high, with a storing capacity of about 75,000 or 100,000 bushels.

We have under contemplation the erection of a building for the manufacture of agricultural implements.

All we need in this movement, is concert of action and this, we think we have in our county. Yours, etc., H. L. SHIDLER.

In the 1,818 Granges of Iowa it is said that are thus rapidly preparing for the ballot by instruction in parliamentary practice, debate and general business. There are some 7,000 Granges in the country, to which belong nearly 100,000 women.

A CONUNDRUM.

Shall One Who Has Not Six Children Write for the Farmer 1

BY MRS. CORA M. DOWNS.

A steady reader of the FARMER calls my at tention to an article signed "Julia" in an arteries of the body politic:—the Railroad, promises to pay at the rate of three million dol. early March number, which inveighs rather

She says she wants to hear from women who have not less than six children!

Does she suppose that a woman who has events in a household with any more perspicacity than one who has only two? Does a woman with six children have any whiter, easier way of preparing a dish for six obstrepersweeter bread, from the fact that she has more cares and responsibilities than her sister

Julia may know how to make bread, but ately after the opening song, that unwritten business. The farmer, living at a distance of the people. They appealed to the patriotic she does'nt know how to argue. A woman from a market town or from railroad commu. soldier who carried the musket through the may bake good bread, but she may not know nication with a market, is frequently unable to weary march. They appealed to those who how to give a pleasing account of the process take advantage of a favorable price for his had not had the misfortune to endure the and she might bungle her account in such a considered the business department of the produce, from his utter inability to reach a hardships of camp, and they corrupted the manner as to convince her hearers that she was market, owing to the impassable condition of ignorant and vicious. These men have not an expert in the matters whereof she treat your humor equable, avoid all emotions that and educational departments. In regard to the roads, he is therefore obliged to take thronged our legislatures, they have held the ed. Another may write very lucidly and manufactories, -We expect, in the course of what he may be able to get at the time when lion's share of the county, township and pleasantly on household affairs, and yet be school district offices. When candidates for theoretical rather that practical in the appli

> chemistry in the dry mathematics of the culinary departments.

"She writes about making bread as if she copied from some cook-book," says Julia with asperity.

But who wrote the cook-book? that's the

I heard a sapling aged 16, a male of course one day assert it to be his own individual, un. the years '72 and '73; when to his amazement twice as near his neighbor, and twice as near a to learn how they might make the most money biassed incontrovertible opinion that Henry the treasurer charged him fifty per cent. for market, and yet every man's possession of in building a bridge or a school house with. Ward Beecher wrote "Uncle Tom's Cabin." his tax of 1873. When asked to "rise and exland would measure the same number of acres out accomplishing either. It is a mistake for and sent it out to the world with Mrs. Stowe's

"O, he thought probably that a woman's name attached would give it some prestige because it was written in such a strong style Depend upon it no woman ever did or could write such a book as that."

There-who wants to argue the point after such a statement? I am not going to argue gross \$50, which less \$2, would make his corn midst. The people pay six hundred thousand with Julia that the lady in question made bread with her pen or with her hands; but ment of this road has therefore advanced the This is expended by the legislature to main there is a test, a Q. E. D. to the problem—Go and see-send somebody to try the bread-

> I once called on a poet in Kansas, one of the istic temperament, that I expected to find house and belongings.

> I thought I should find the poet's corner somewhere; but it was not in tangible things prim, very ordinary looking chairs, just like

A second best room across the hall had the

why this extravagence? Is there no remedy ings of beauty did she need. These were

here, everywhere, and she in their midst, but did not see them.

" Nay, nay lest you borrow My ear and my eyes, Their beauty you'll see not Their music will die."—

Everywhere, my friend you will find enough If the daily toil and wear and tear of life. Oh other of six children! do not be persuaded of Julia to write out your plaints and experiences-Don't we know what they are? Don't we know of the backaches, and heartaches, and the dull anxious hours of unpaid toil?

I heard a nice, kind, pleasant and easy sort f man, not long ago, say that his wife had en doing her own work for six months, and e thought she deserved a new silk dress, so e bought one for her. I figured up her vages as a hired girl for that length of time; he amount she had earned in his kitchen was eventy-two dollars-It did not occur to him bat she might have preferred to have this mount paid over to her in solid cash, but he inde her a present, and she, loving soul, was rlad and grateful for the attention, For ard services as nurse, chambermaid, comanion, seamstress, etc.,—and for the time given to her social duties there was no consideration. I should like to know what she night say about it in print. I have someimes thought that it was a blessing that women generally do not coasider their time as having any pecuniary value. Of course a woman devotes her time and services to her family-why should she not? But oh, someimes for a blessed little independence! A eeling as if she had rightfully earned somehing and a desire to hold a salary in her very own hands, for time and energy severally xpended!

Julia says she was a teacher once. Now, I ake it, she is a bread maker instead of a bread winner. I wonder if her experience in teaching a, b, c, and two and two make four, made her married duties any easier. They did not make mine any lighter or easier, my friend-The discipline of teaching others in one branch of knowledge does not make the duties of life easier in another sphere. Every step to a new duty and a new experience is a difficult step, and by so much as woman has agement, give her credit, my dear, not severe and harsh criticism. It is not that she knows so much more herself, as that what she has learned, may help some other struggling soul. -The mother of six children may help me to bles, while I with less care and preplexity than she, may be able to originate for her some ous mouths than she has had time to cogitate herself.

Julia! Julia! never clog the wheels of good intentions. The world might get along agog that way.

If it is your desire that your circulatory, respiratory and digestive functions should be discharged properly, normally, if you want your appetite to be good, your sleep sound, are overstrong, all pleasures that are too intense and bear the inevitable sorrows and the cruel agonies of life with a resigned and firm soul.

or the Kansas Farmer. FIFTY PER CENT. PENALTY.

EDITOR FARMER:-My neighbor, Ballowed his tax for the year 1872 to go unpaid consequently his farm was sold for tax in May, 1873. A tax certificate was issued to a Mr. C-, at 50 per cent. During the first week in January of the present year, neighbor Bwent to our county treasurer to pay his tax for plain," he informed B- that Mr. C- had deposited the amount necessary to pay the tax of 1873, on the first day of November as he held a tax certificate for the year previ-

Neighbor B- was compelled to pay the tifty per cent. for the year 1873 as well as for the year previous. B-, finding that he had money enough with him to pay the tax for both years, with fifty per cent. for both years, wished to pay all the tax for the year 1872. This the treasurer would not allow him to do. out told him that he could pay half the tax of 1872, and half the tax of 1873. This, he told B-, was the law. Mr. Editor, is it possible that the laws of

Kansas are so constructed that a tax payer is at the mercy of these tax certificate buyers? Is it lawful to charge a tax payer fifty per cent. before his land has been sold for taxes, because some one else steps in, and "deposits" the amount necessary to pay the tax? Also, is it the law that dictates that you cannot pay back taxes in full, and allow the tax of the present year to go over until a more conveni-

Please give the readers of your valuable paper the law on these points, for I am fully convinced that hundreds of tax payers have been served as neighbor B- has been.

21. Calendar for 1874. ever, for the benefit of our readers, that

In regard to our friend, Haff, we will say that he was, as we stated last week, the candidate of the straight democratic convention and never once did he or his frields make any other claim. He was elected by less than his own party vote. As to the statement that J. K. Hudson was the monopoly candidate, the facts are that the nomination was made altogether by farmmade altogether was what is called in Wyandotte corrections in the published list.

county, the country district, where he

is probably as well known for his independent, outspoken convictions on reform for the past eight years, as Mr.
Ross is known by his unenviable reputation as Andy Johnson's Saviour. Mr.
Hudson never soughten dorsement from the book, that we shall begin maliing them within the next three days.
Hudson never soughten dorsement from
anybody and never by word or action,
anybody and never by word or action,
the list, is that the district in which this
or elsewhere, to oppose the Grange
movement. The next absolute lie in
the list, is that the district in which this
connest occurred, was largely republican, when in fact, it has always becontaining the ritual of the
democratic, and by looking at the official election returns, Mr. Ross containing the ritual of the
varied to have saved himself the humiliation of
resorting to bare-faced falsehood. For 26 cents, in the Patron's Handleaves are those and the contract of the state of the contract o

use they failed to see it in that light he had ler bought for you to make you senator you in return for his labors in your behalf? When we shall have paid our reand selling votes.

of truth in the charge. The State Agent has not patronized one of the ring plow Mr. Ross, why was you not manly firms, nor has he ever thought of so doing; on the contrary, he has persistently refused to deal with them.

Will the Spirit stop "throwing fire brands around the camp?"

WE are prepared to give a little histo ry of blackmailing to sell seals, when State Agent.

13, Recommended Constitution for County

In regard to our friend, Haff, we will all the Granges in the state, giving No. by farm- have already made over three hundred

Hudson. We never urged the greatest monopolist, whoever he may be, for the senate or anybody else, and in short, to sum up the whole matter, what troubles our old friend, is that we never urged him for senator, and what particularly makes him cross and sour, is that nobody else is urging him.

After Mr. Ross' summer campaign, in which we can clearly prove he endeavered to use the Grange, through some of its offices, to secure the senatorial appointment, and did the same thing in the winter, such puerile and f.lse charges as the above, are, to say the least, in bad taste. As long as Mr. Ross undertakes to make political capital out of the Grange and to secure promotion by his new found love for the farm all know how easy it is to put off the spring time frequences.

According to Rw Mansas Advance.

We have thus far has a cold back ward spring and our farmers are somewhat late in getting of the lowers and sour, is sufficiently supply such that a most welcome visitor. Send along the names welcome visitor. Send along the names with the least of southern Ransas.

When have the same and our farmers are somewhat late in getting of the lowers and supplication in their crops, but with a warm April there is not danger but they will succeed in putting in their crops, but with a warm April there is not aught their sead sufficiently early to ensure good crops. The winter wheat is looking wellso from the West Indies having probably been brought by far as we have been informed, and a much larger area was sown last fall in this section.

Wandout County pays more into the same and population than any other county in the state Tresury, in proportion to its acreage and population than any other county in the state Tree was sown last fall in this section the Gulf Stream or by cyclones. Seventy-one of the same were before.—Cultance Republican.

Wandout County pays more into the stream was sown last fall in this section the stream of the Gulf Stream or by cyclones. Seventy-one tream was sown last fall in this section the stream of t Forence Sewing assessment of the Grange and to secure promotion by his new found love for the farm trough the state were detected the aimost use mean of every other nonlineación of a republicant convertable and the secure promotion in the Kansas Farmers.

Anorizen Questron.—We have only to say, that it was true that we receive the aimost use mean of every other nonlineación of a republicant promotion of a republicant promo out of the Grange and to secure promotion by his new found love for the farmers, he may look for outspoken opposition by his new found love for the farmers, he may look for outspoken opposition in the Markers Flavore Flavo

# THE PATRONS HAND-BOOK.

In answer to many enquirers who are ordering this work, we are able to say much money It made as a middleman ficulty of securing a correct list of the out of Mr. Pomeroy's campaign, buying Granges of the state so great, that deay has been unavoidable.

and never had the presumption to try to be, but he does claim to be a reformer in every proper sense of the term, and in full sympathy with the purposes of the Patrons, and all he asks is the purposes of the Patrons, and all he asks is the purposes of the Patrons, and all he asks is the purposes of the Patrons, and all he asks is the purposes, believing that he can accomplish as much for the accomplish as much for the second by Johning a Grange.

But we started with the intention of simply dook in two styles of binding.

To keep the price within the reach of every member of the Grange and at the enormous accomplish as much for the second of the Order where he is, as he could by Johning a Grange.

But we started with the intention of simply dook in two styles of binding.

To keep the price within the reach of every member of the Grange and at the enormous as made by these companies out of our people in years gone by, is now beling used by them to utterly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy all our hopes of success in the futerly destroy.

But the thought that nearly one hundred per cent more spring wheat will be sown this spring obout 50 south of the zenith. Spica, south-sat bout 20° from horizon. Timest with one hour 20° from horizon. The case of the east. As soon as the additional rec The latter part of the above clause contains a blow at our State Agent, one reach 150 or more pages. becomes of them? A SUBSCRIBER."

It would take a larger space than the

FARMER would like to spare to enswer the question as above stated. If " Subscriber" had said what kind of tree he referred to, it would be easier to give the information asked, but as he has left us in

doubt on this point we have concluded to give a brief notice of several of the most injurious and noticeable species. The round-headed apple-tree borer is pro-

bably the first on the list in the extent of the injury done. It is the larva of the two striped Saperda (S. bivittata Say, or S. candida, Fab) a beetle belonging to the large family Cerambycidae.

This larva is a footless grub, about one inch in length, the width at the broadest part being nearly one-fourth of an inch. Its color is light yellow with a darker spot on the first segment. The head is brown, the jaws black.

The perfect beetle is a handsome object and is rarely found without careful search, since it is a nocturnal insect and lies hidden by day.

It is a light cinnamon-brown color above, with two broad longitudinal white stripes. It makes it appearance as a beetle in May and June and the females lay their eggs during the latter month, mostly at the foot of the tree, and the larvæ hatch in a short time and begin their life as borers. The larval stage lasts three years, and it is said that it is during the second year of their existence that

# SUPREME COURT SYLLABI.

STATE OF KANSAS, SUPREME COURT. (88.

W. T. McCarry, administrator of the estate of W. G. Quimby, deceased, vs. MARTHA E. QUIMBY. Error from Chase County. AFFIRMED.

By the Court.

1. Where the question of fact to be determined by Jury is: What was the value of certain property in a Cowley county, Kansas? and evidence has been introduced showing what the market value of said property is not exclude evidence tending to show what the market value of said property was in said Cowley county, it is not error for the Court to exclude evidence tending to show what the market value of said property would be in other counties.

2. Where a wife exercises acts of ownership over personal property in this state, there is no presumption of ownership from such acts, it is that the property belongs to her husband. On the contrary, if there is any presumption of ownership from such acts, it is that the property belongs to the wife.

3. Where the Court in an action of replevin, where the plaintiff relained possession of the property, including the such actual value of the property, and also interest on the property was taken; Held, that that portion of the instruction which required the Jury of find interest was unquestionably erroneous; but as the Jury found the value and the interest separately, and as no Judgment seems to have been rendered for the interest, All the Justices concurring.

All the Justices concurring.

RICHARD JENNESS and SYBIL JENNESS vs. JOSEPH M. CUTLER.

Error from Franklin County.

REVERSED.

BREWER, J.

By the Court.

1. The notice to the laid owner required by sec. 4 of chap. 89 of the General Stratutes, "An act in relation to "Roads and Highways," has respect not so much to the laying out of the road as to the compensation of the owner of the property to be taken therefor.

2. An omission of such notice does not invalidate the proceedings for laying out a road, if otherwise regular.

3. A land owner, receiving no notice, has a good claim against the county for damages for the land taken.

# A WRONG CUSTOM CORRECTED.

It is quite generally the custom to take strong ver stimulants for the cure of liver complaint. and both the mineral and vegetable kingdoms nave been diligently searched to procure the most drastic and poisonous purgatives, in order to pro-duce a powerful effect upon the liver, and arouse the lagging and enfeebled organ. This system of treatment is on the same principle as that of giv-ing a weak and debilitated man large portions of brandy to enable him to do a certain amount of work. When the stimulant is withheld, the organ like the system, gradually relapses into a more torpid or sluggish and weakened condition than before. What then is wanted? Medicines, that, while they cause the bile to flow freely from the liver, as that organ is toned into action, will not verwork and thus delilitate it, but will, when their use is discontinued, leave the liver strength-

BERGEN, Genesee Co., N. Y., March 23, 1871.

DEAR SIR-Your treatment in my case has been uite successful and satisfactory, and for which I desire to express my gratitude. I have been trou-bled with a disordered Liver and Catarrh and general weakness for a good many years, and was falling slowly all the time, and last August I called on you and got some of your Golden Medical Discovery and Dr. Sage's Catarrh Remedy, and one of your Nasal Injectors, and since that time I have been improving and am now better than I have been in years, not having had the sick headache in months, which I used to have to average once a week, the Golden Medical Discovery being the principal medicine used. It has worked wondersin my case, and I recommend it to those similarly afflicted. Let me express gratitude to

> Truly and gratefully yours. WM. F. CRITTENDEN.

# Biterary and Domestic.

EDITED BY MRS. M. W. HUDSON.

For the Kansas Farmer.

WHICH IS THE WAY !

BY MRS M. STATTON BEERS

Well, Ruth, I never thought that my pure wife, So timid and reserved, so sweetly shy So blest with all the graces which in life
But few possess, would join the hue-and-cry Which silly-pated women, out of spite For fancied wrongs, have piped so long: rather firs Have seen you die, and buried from my sight Than thus degrade yourself. Whence this thirst For public notoriety, so new And still so potent, that it bids you face

In lowest dens, where flercest quarrels brew.

Those brutes who have outlived their day of gradents. And sold themselves to Lucifer for rum: Why cheat e'en Satan of his dues? Go pray Within your closet, there He bids you come Who answers prayer, He taught the place and way Why mingle with a crowd of low-lived men. Who gambie, cheat and lie, who drink and swea And use foul language, who wink and sneer
When such as you before them kneel in prayer. Go not again, but bide at home, my Ruth, From hence send up your prayers of Faith's strong To God's white throne, if He you serve be truth. They will avail, while you are safe from harm."

Why. Tom! the closet long has been the scene Of secret prayer, where hearts laid bare to God The cankerous griefs which sapped the lives I wee Of million wives, and mothers, which the sod Now covers: those who spent in sowing seed Their whole lives, watering well with bitter team What better proof that God did hear indeed Than this white harvest which to-day appears. Waiting for reapers to garner the grain Have I not prayed at home for ten long years, n secret, my heart breaking with pain, My eyes half blind with watching, and the tears I could not keep. "Degrading," do you say,
"To visit gambling hells and beer saloons?"

Ah, Tom, you go to gamble, we to pray That you, and such as you, the fearful doom Of drunkards might be led to shun; we went To plead with men as well as God; the sighs

Of widowed ones, whose substance has been spent In cursed drink, their moans and touching cries For justice-only this-a heart of stone Must melt; only those who've felt the pain The demon brings can sympathize I own With us who dare so much to break his chain. We'll bide at home when our work is complete, And the shadow lifts that enfolds each heart. When the cursed rum shall deluge the street,
And Faith and Works shall have done their part.

spring of every action. They are disappoint and jealousy are as old as the world. Those ed if their associates do not submit, and are two passions have brought, from the time of not subservient to their opinions, and their Cain down to this period of the world's hislow estimate of others.

honesty of purpose are as sounding brass or a thoughtful of the happiness of others.

She hopeth for the best, and puts the best For the Kansas Farmer.1 construction upon every act, and believeth the best concerning them.

This love is not endowed with a vision so keen, and a judgment so penetrating, as to overlook the beam in its own eye, and clearly see the mote in the eye of another. It is not quicksighted to the trifling faults of another It never arrogates to itself the right to condemn or to suspect evil where good is probable; is ever more willing to justify than to condemn. Its kindness is not confined to for evil, always sincere, is never guilty of duplicity or back-biting.

If societies and neighborhoods could be ple, Charity, there would be no illnatured remarks, no envy, and jealousy or any of those hateful sayings which bring with them so much to regret, and so much heartbitterness formerly approach that fiver.

That portion which bears the name of the Deacon Maynard say that Judge Park had a great deal of gravity; he didn't believe any tween the Tower and Temple Bar, and was could make him smile." more imbued with that Heaven-born princimuch to regret, and so much heartbitterness.

If unenvious dispositions were more cultivat ed in our social life, unjust judgments and in vidious comparisons would become as strange vided into eight divisions or districts, denomi as they are now peculiar; all those monsters which so deface society with their hideous forms would hide their heads in confusion and dismay.

Where this Heavenly principle lives in the eart, there is readiness to rejoice in the prosperity of others; it is slow to impugn their motives and to say, this or that was very dishonorable. Such persons will stand for the approval of the lovers of truth and honorable while envy, malice and uncharitableness will be cast aside, neglected and shunned by those whose minds will shrink from contact with square, London E. C., or, No. 10, King street, it is some that what makes day and night?

Who can tell what makes day and night?

Who can tell what makes day and night?

Who can tell what makes day and night?

I know, "said Johnny, "I know, the sun goes right around it! the earth I mean. How all tell means the cast that was the square stay and night?

I know, "said Johnny, "I know, the sun goes right around it! the earth I mean. How all tell means the cast that is, now that we know the earth is a began uncle Ned.

I know, "said Johnny, "I know, the sun goes right around it! the earth I mean. How all tell means the cast that is, now that we know the earth is a began uncle Ned.

Really well bred and well educated person are seldom heard to indulge in envious remarks or in low comparisons. With such persons there is a refinement of feeling, which teaches them to discountenance censoriousness, or evil speaking. Education is supposed to cultivate the mind, and elevate it above low and mean acts, and it evinces a distaste (and to use stronger language) a detestation of coarseness either written or expressed. This feeling A proneness to speak evil, and to notice the arises from a just sense of the proprieties of

Good breeding always shows itself by "Do unto others as you would have them general courteousness of demeanor, which in-

appearance, or position, is in the least in a well cultivated garden, which fact must superior to their own, or bear with patience be attributed to the perversity of their nature. any preference shown to others by word or ac. A KANSAN IN EUROPE .-- No. 12.

BY RAMBLER.

London is the metropolis of Great Britain foolishly blind to its own defects, and so very 3,800,000 souls. Its police regulations are ad we don't learn at school! it is like what the a space of country 14 miles long by 10 miles broad.

The principal portion lies on the north side those they call their friends, it returns good of the river Thames in the county of Middlesex. A large portion of the city, however, is situated in the county of Surry, on the south bank of the Thames and 45 miles from the

o'clock when uncle Ned gave the promised later in too, for though fourteen years old, he was not one of those boys who think they streets in London bearing the same name this mann er of districting is very convenient. For instance, there are some seventeen King streets, fourteen Queen streets, and innumer able Prince Albert, Prince Authur and Prince Edward streets, and they all terminate in some little square with a high sounding title, such as St. George square, St. James and streets in London, and streets in London bearing the same name this manner of districting is very convenient. Who can tell what makes day and night?"

Seat Centre, etc. As there are numbers of those boys who think they know everything, and feel themselves too big to be taught with younger ones. Tilly and John helped each other in telling about gravity, so that the others learned pretty nearly what yesterday's lecture contained, and were ready to hear the new one.

"Who can tell what makes day and night?"

Sew head of Young Bulls and Heifers are offered at Eastern prices. Also, Imported warranted purity, all had a remarked purity all had a rem whose minds will shrink from contact with square, London E. C., or, No. 10, King street,

depend upon the tenor of their feelings to wards others, there would be but little to complain of.

Evil speaking is hateful in itself, but when its prompted by an envious spirit, it is edious indeed, because in connection with envy, there its always a spice of malice and uncharitable mess, and a readiness to impart to others evil intentions, or improper motives; and to detract from their merits, and draw inferences, which are oftentimes very unjust and ground less.

Envy makes its possessor very miserable and discontented, and shows its hideousness often in our social intercourse, and every day life.

Envy is very spiteful, it cannot look with a calm indifference upon those whose dress, or personal appearance, or position, is in the least in a well cultivated garden, which fact must prove their wore research in the happines of friends and starsy personal appearance, or position, is in the least in a well cultivated garden, which fact must appear and the provised in the registration of the way in front of us. Instinctively the yearly motion of the earth; once every yeb the very and the eyearly motion of the earth; once every yeb the tyround the eyearly motion of the earth; once every deposite throw into company with presons who as all those softened and remained the exact from their merits, is edious of the true lady blocked the way in front of us. Instinctively we buttoned up our coat to protect our pockets and keep our watch from being observed, then yearly motion of the earth; once every we buttoned up our coat to protect our pockets and keep our watch from being observed, then yearly motion of us. Instinctively we buttoned up our coat to protect our pockets and keep our watch from being observed, then the yearly motion of us. Instinctively we buttoned up our coat to protect our pockets and keep our watch from being observed, then set is in sight. We then try which are neces in the regist of the true gentleman.

Yet there are, in all the walks of life, many who, without the advantages of education or a treat sight never seen at the Five Points, in New thing can have two motions at once; the top York, in its palmiest days. We don't stop to see how many fights are the result of our strategy, but hasten to the main street, glad to get out as cheap as we did.

# Our Boys and Grils.

A LITTLE GIRL'S THOUGHTS.

BY EMMA II. MILLER.

Little maid Marion, walking slow Down the long wood-path, thick with snow, Watching the snow flakes large and white, Like stars and crescents and flowers of light, Wondered much in her wise young brain, If the dreary old winter was coming again.

Up in the elm, that very day,
A blue-bird whistled his roundelay;
A fly, just waked from his winter's sleep,
Was scaling the window's slippery steep.
And the swelling buds on the poplar tree,
In their varnished trappings were plain to

Peering and groping, with fingers small, In the sheltered beds by the garden wall, She was sure she had heard, down deep belo The Jonquils donning their hoods of snow: And my Lady Crocus, under the mould, Weaving her mantle of purple and gold.

Little maid Marion, walking slow, Felt on her forehead the west wind blow; Saw the clouds from the brightening sky, Like routed armies go scurrying by; And heard from the boughs of the maple i The brave little blue-bird singing clear.

"Ha, ha!" laughed the jolly old sun again,
"The blossoms quicken in snow and rain."
The snow sild down from he poplars high.
The buds showed clearer against the sky,
And little maid Marion smiling thought.
"The spring is coming just when it ought."

disposed to impute to others evil intentions, perishing for the want of its kindly influence. before you start to school again.

From The Little Corporal.

HOW IT MOVES

"Oh, Susie! Susie! Susie Lane! can't you and the financial centre of the world. Its come over and see me this afternoon? unclpopulation at the present time is computed at Ned's going to teach us something; something mirable and it is considered to-day, one of the big girls study, only uncle Ned makes it so best governed cities in the world. It covers asy, so we can understand; he told us yesterlay all about how the earth is round, and

as been clear round, and he told me!

"Well," continued Tilly, "but do you know why they don't tumble off, and what gravity

whose minds will shrink from contact with square, London E. C., or, No. 10, King street, the sun does not go around the earth at them, or an intimacy which can never be Bloomsbury square, N. C.; two entirely differ all, but the earth keeps turning over and over them, or an in timacy which can level be pleasant in its results. St. Paul says, "If it ent localities, although the same number and the sun and bringing one place after another toward the sun and then away from it. Do you restreet.

The west end or west centre as it is now member that day last winter when we took be possible, as much as lieth in you, live peaca bly with all men." As far as we can consistently with duty we are to cultivate a peaceful temper and try to live in peace and to conduct in such a manner as is suited to meet the entity with duty we are to cultivate a peaceful temper and try to live in peace and to conduct in such a manner as is suited to meet the entity of the company of the co

elegant squares. The streets are wide and clean.

In the South-West Centre, the houses are large and singular looking. The streets are tolerably wide and clean, but the sameness of its appearance is rather oppressing. Its inhabitants are mostly city merchants and professional men who live very close to the charmed ring of fashion but never take the leap across.

et the trees so swiftly that she thought they were moving the other way."

"Yes," said Tilly, "and I could almost make so, only I kept seeing ponies' feet fly, and that made me know; but when I went to Rochester with auntie Meg. we stopped at one place right beside another train of cars, up so close that I couldn't see anything else, and by and by it started along, and I watched the people in the windows as they passed very slowly, till the end the train came, and then I found it was standing perfectly still, and we were the ones that were moving."

charmed ring of fashion but never take the leap across.

The East Centre is the old part of London. Here we see the cockney in all his native glory. This locality abounds in low taverns, pot louses and narrow dirty streets and alleys. No American, if he wants to see all of London should fail to see Petticoat Lane, Cherrytree Alley and Bunhill Row, they swarm with the amost wretched vile looking inhabitants on the face of the earth. Drunkeness is stamped on the countenance of almost every individual we meet, men, women and children.

As we sauntered along we began to feel a little nervous as a score or more of dirty, half-cled urching crowd around us seed asking for the last were moving."

"Yes; well, that is just the way it is about the sun; the earth keeps turning round and round, just as this great apple would on a knitting needle, if I should run one through it from the blossom to the stem, and then I found it was sun; the earth keeps turning round and round, just as this great apple would on a knitting needle, if I should run one through it from the blossom to the stem, and then I found it was sun; the earth keeps turning round and round, just as this great apple would on a knitting needle, if I should run one through it from the blossom to the stem, and then I found it was sun; the earth keeps turning round and round, just as this great apple would on a knitting needle, if I should run one through it from the blossom to the stem, and then I found it was sun; the earth keeps turning round and round, just as this great apple would on a knitting needle, if I should run one through it from the blossom to the stem, and the was restrictly still, and was sun; the earth keeps turning round and round, just as this great apple would on a knitting needle, if I should run one through it from the blossom to the stem, and the wan; the earth keeps turning round and round, just as this great apple would on a knitting needle, if I should run one through it he sun; the earth keeps turning round and round, just as this great

ble : that would have represented pretty wel the earth's motions, playing the apple

"O, don't stop there? tell us some more, please," said Tilly, for her uncle put the apple back in the fruit dish, and got up as if he were

through.
"No, that is enough," he answered, "little girls mustn't have too long lectures to remember, or they will not learn their lessons at

I wonder if he had seen Tilly's slate, with Gravity" written all over it, instead of

# A TALKING MULE.

The man whom I am going to tell you about, could make dollies and birds seem to have long talks together. He did not move his lips, but used his voice so that it sounded as if the dollies really talked; and it was very funny to hear the birds say a, b, c's, and see the dollies

one day this gentleman saw a man Well, one day this gentieman saw a man beating his mule. The poor mule had a very heavy load; the day was very hot and the man had lost his temper. He beat the poor mule, and then kicked it until it trembled so it could and then kicked it until it trembled so it could be accorded to say. not move. Suddenly, the mule seemed to say of You unmerciful man, how can I move when you beat me so that I tremble all over? Take off half my load and treat me kindly, and I

off half my load and treat in any will do twice as much work for you."

The driver was so frightened he almost fell on the ground. He looked to see who was near him; but only a little gray haired man

And little maid Marion smiling thought.

"The spring is coming just when it ought."

The old man had made his voice seem to come from the mule. This is called ventril.

Do not lay your books away because you have quit school. You may learn a great deal before you start to school again.

The buds showed clearer against the sky, and the little gray haired man was quietly crossing the street.

## THE STRAY LAW.

STRAYS.

SEC. 5. No person shall take up any unbroken and mal as a stray, between the first day of April and the first day of November, unless the same be found within his lawful enclosure; nor shall any person, at an time, take up any stray, unless it be found upon his premises, except as in this chapter otherwise provided. SEC, 6. No person shall take up any horse, mule, assor, bull, sheep, swine or other animal, under the provisions of this article, unless he be a citizen and householder, and enters into bonds, with sufficient sureties, to the state of Kansas, for the use of the owner, in double the value of the property proposed to be taken up, to be ascertained by the justice before whom the person wishes to post such stray, which bond shall be filed and preserved by such justice.

SEC. 7. If any animal, liable to be taken up, shall come upon the premises of any person, and the owner of such premises fails to keep up such stray for more than ten days after being notified of the fact, any other citizen of the same county may proceed to take up such stray, and proceed with it as if taken up on his own premises.

SEC. 8. If any person take up any stray, he shall im-

citizen of the same county may proceed to take up such stray, and proceed with it as if take up on his own premises.

Szc. 8. If any person take up any stray, he shall immediately advertise the same by posting up three printed or written notices, in as many public places in the township, which notices shall contain a full description of the stray.

Szc. 9. If such stray shall not be claimed and proved at the expiration of ten days after it was taken up and advertised, then the taker shall go before a justice of the peace of the township and file his affidavit, stating that such stray was taken up on his premises, and that he did not drive or cause it to be driven there; or that it was taken up on the premises of some other person, naming him, and that he gave such person ten days notice, and that the marks or brands have not been altered since, to his knowledge, and giving a true and correct description, giving age, sex, color, marks and brands, and cash value of such stray at the time the same was taken up.

and that the marks or brands have not been altered since, to his knowledge, and giving a true and correct, description, giving age, sex, color, marks and brands, and cash value of such stray at the time the same was taken up.

Sec. 10. At the end of a year after such stray was taken up, the justice of the peace in the township where such stray was taken up shall issue a summons to three disinterested householders to appear and appraise such stray, which summons shall forthwith be served by the taker up of such stray; which service shall be without charge, if not demanded at the time of making the appraisement.

Sec. 11. Th. h. nascholders, or two of them, shall proceed to describe and appraise such stray, stating the sex, size, color, age, marks and brands, and value of the same, which description and appraisement they shall reduce to writing, to which they shall append their affidavit that the same is a true description, and a fair and impartial appraisement, which shall be filed by the justice, and recorded by him in a book to be kept for that purpose. Said appraisers shall also take into consideration the cost of keeping such stray for the period of one year proviour to their appraisement, and also consider any benefit the taker up may have derived from the use of such stray, and shall report their allowance for the same on the appraisement list.

S.C. 12. The justice of the peace shall within twenty days from the time such stray was taken up make out and deliver to the county clerk a certified copy of the description and value of each stray.

S.C. 13. The clerk, immediately after receiving the certified copy from the justice, shall record the same in a book kept for that purpose; and whenever the appraised value of such stray or strays shall exceed ten dollars, said county clerk shall, within ten days after receiving such certified description and appraise (unless the animals hall have been previously reclaim by the owner), forward, by mail, a notice containing a complete description of said stray, the day

time such proof is made.

But in the total shall make an early of the fact that the total shall make an early of the fact that the control opposite the recorded certificate of the justice record, opposite the recorded certificate of the justice records and expense of taking up, it all the dedicted, on application of either party by the justice and the same and the

SEC. 28. There shall be allowed for taking up stray to following rewards: For taking up every hore male or ass, fifty cents; for every head of neat carticulation of the property head.

SEC. 29. The county clerk shall receive, for recording ach certificate of strays, or forwarding a description the same, as heretofore provided, thirty-five centwhether such certificate contain a greater or less number of strays, and fifty cents additional for each animal described therein, to pay for the publication of the nucles, a "eretofore provided.

SEC. 30. The justice of the peace shall receive the sum of thirty-five cents for making out and recording each certificate of appraisement, including the oath administered to the appraisers, whether such certificate contains a greater or less number of animals, and forty cents for each certified copy of all proceedings pertaining to such stray or strays: Provided. That the fees charged by such justice of the peace ings pertaining to such stray or strays: Provided. That the fees charged by such justice of the peace ings pertaining to such stray or strays: Provided. That the fees charged by such justice of the peace ings, pertaining to such stray or strays: Provided. That the fees charged by such justice of the peace ings, pertaining to such stray or strays: Provided. [The new Tribune Building stands upon the old site and will be the largest newspaper office in the world. It will be nine stories high, and will cost, exclusive of site, one million dollars.]

# New York Tribune,

The Leading American Newspaper. "NEVER SO GOOD AS IT IS TO-DAY."

The unanimous and unsolicited verdict of the hundreds of thousands of readers of THE TRIBUNE is that the paper was never so good as at the present time During the past year it has enlarged its field and improved its facilities in every direction, and enters upon the year 1874, which is to be one of the most important in public and political affairs, with most encouraging prospects. THE TRIBUNE, however, believes in deeds rather than in words, in results rather than in promises. It points to its record, and its columns for the past twelve months, as the best evidence of what it will do. All the distinctive features of the paper will be preserved and strengthened, the "Extras," whose sale has reached hundreds of thousands, will be continued; the front of its new building completed, and the present admitted pre-eminence of the paper, not only maintained, but still further advanced.

As an invaluable paper for the farmers of the whole country. THE TRIBUNE fully maintains its well known and admitted position. It publishes much more matter of interest to farmers and their families than any of the strictly "agricultural" papers, and no farmer can afford to be without it, unless he can afford also to be without all the market reports—cattle, grain and produce—information of agricultural events and produce—information of agricul

# Kansas Pacific Railway.

The main line extends from Kansas City, Mo., and Leavenworth, Kansas, both flourishing cities on the Missouri River, through Cen-tral Kansas and Eastern Colorado 639 miles to Denver, Colorado, and with several hundred Tal Kansas and Eastern Colorado 639 miles to Denver, Colorado, and with several hundred miles of Branches, in addition, reaches every portion of Kansas, Colorado and New Mexico, and all of its fertile valleys. Rare opportunities are offered for acquiring homes in section of country unsurpassed for fertility and health. The State Capital, State University, State Agricultural College, State Normal School, Blind Asylum, &c., of Kansas, are all located immediately along the line, and the educational facilities generally are unequaled. By reference to the United States Agricultural Reports, it will be observed that Kansas had a greatet yield to the acre of the cereals than any other State, and Gold Medals and Diplemas for the greatest and best display of Fruit and Agricultural, Horticultural and Mineral products, have been awarded at the Great Expositions and Fairs throughout the land in competition with the other States. For the tourist and invalid, a varied and charming landscape is presented; and the delightful air of Colorado, and the now justly celebrated Cold, Warm and Hot Springs, in the vicinity of Denver, have given renewed life to the weary and have restored health to the sick. Don't fail to take a trip over the Kansas Pacific Railway, and if you want a good home, be sure to settle along its line. You can obtain Maps, Circulars. &c., giving all information, by addressing General Passenger Agent, K. P. R., Kansas City, Mo.

# Atchison, Topeka & Santa Fe R. R.

later than Topeka. Trains going south leave North Topeka 10 minutes earlier than Topeka.

Co East by Way of St. Louis. In these days of railroad competition the wise traveler selects his route before leaving home. In almost every instance he desires to reach his destination as speedily as possible, and for the accomplishment of that purpose the Missouri Pacific Through Line from the West to the East, via Kansas City and St. Louis, offers inducements unsurpassed by any other line in the country. Everything connected with the Missouri Pacific Railroad is first class, and the adoption of the Miller Platform and Westinghouse Air Brake, together with its Pullman Sleepers, and Reclining Chair Coachs. render a trip over the line perfectly safe and pleas-

nt. Passengers from all parts of the West, by taking its Express Trains at Kansas City, Leavenworth, Atchson and other prominent cities, are landed in St. Louis at seasonable hours, morning and evening, and in ample time to make direct connection with all railroads for every point in the North, East and South. Particular information, with maps, time tables, etc., may be had at the various "Through Ticker" offices in the West, or upon personal or written application to G. H. BAXTER, Western Passenger Agent, Kansas City, Mo., or E. A. FORD, General Passenger Agent, St. Louis.
