

THE EFFECTS OF LOW LEVELS OF 2,4-D ON SUNFLOWER
AND RAGWEED SEED PRODUCTION IN NORTHEASTERN KANSAS

by

DANIEL HOWARD PLETSCHER

B. S., University of Minnesota

A MASTER'S THESIS

submitted in partial fulfillment of the

requirements for the degree

TABLE OF CONTENTS

	Page
INTRODUCTION.....	1
LITERATURE REVIEW.....	3
Mode of Action.....	3
Factors Affecting Action of 2,4-D.....	4
Effects of 2,4-D on Wildlife.....	8
Effects of 2,4-D on Plants.....	10
METHODS AND MATERIALS.....	15
The Study Area.....	15
Procedures.....	16
RESULTS: 1975.....	21
Sunflower Seed Production.....	21
Ragweed Seed Production.....	24
Predation.....	24
Seed Composition.....	25
RESULTS: 1976.....	28
Ragweed Production.....	28
Seed Composition.....	32
Sunflower Production.....	32
Seed Composition.....	43
Seed Color.....	43
DISCUSSION.....	46
Spray Conditions.....	46
Seed Production.....	46
Seed Color.....	53
CONCLUSIONS.....	55
SUMMARY.....	56
LITERATURE CITED.....	58
APPENDIX.....	66

LIST OF FIGURES

	Page
Figure 1. Hypothetical curve estimating the effect of 2,4-D on seed production.....	50

LIST OF TABLES

	Page
Table 1. Sunflower and ragweed seed production data collected on the Fort Riley Military Reservation in 1975.....	22
Table 2. Sunflower seed production by flowering time in 1975.....	23
Table 3. Composition of sunflower and ragweed seeds collected in 1975.....	26
Table 4. Caloric content of sunflower seeds collected from 4 flowering times and caloric content of ragweed seeds in 1975.....	27
Table 5. Ragweed production in 1976 under three 2,4-D treatment levels.....	29
Table 6. Correlation coefficients of ragweed production parameters in 1976.....	31
Table 7. Caloric content of sunflower and ragweed seeds collected from 2,4-D treated plants and from control plants in 1976.....	33
Table 8. Composition of ragweed and sunflower seeds collected from 2,4-D treated plants during 1976.....	34
Table 9. Sunflower plant production in 1976 for controls and two 2,4-D treatment levels.....	35
Table 10. Sunflower production on a flower head basis in 1976 for controls and 2,4-D treatments.....	37
Table 11. Correlation coefficients of sunflower production parameters in 1976 on a flower head basis.....	38
Table 12. Mean seed production of sunflower capitula in 1976 by ripening time and treatment level.....	41
Table 13. Correlation coefficients of sunflower plant production parameters in 1976.....	42
Table 14. Color of seeds from sunflower plants under three 2,4-D treatments and from differing seed ripening times.....	44
Table 15. Rainfall data for the sunflower and ragweed study areas in 1975 beginning 1 August 1975.....	66
Table 16. Biweekly soil moisture data from three depths in the sunflower study area in 1975.....	67

LIST OF TABLES (continued)

	Page
Table 17. Weather data for the week of spray application of 2,4-D.....	68
Table 18. Weekly soil moisture data from three depths in the sunflower study area in 1976.....	69
Table 19. Rainfall data for the sunflower and ragweed study areas in 1976 beginning 6 May 1976.....	70
Table 20. Source of variation, degrees of freedom and mean squares of two-way analysis of variance for ragweed plants; 1976.....	71
Table 21. Source of variation, degrees of freedom and mean squares of two-way analysis of variance for sunflower plants in 1976.....	72
Table 22. Source of variation, degrees of freedom and mean squares of two-way analysis of variance for sunflower seed heads, in 1976.....	73

ACKNOWLEDGEMENTS

I gratefully acknowledge the assistance and time given me by my major advisor, Dr. R. J. Robel. His help was invaluable. Drs. L. C. Hulbert and A. D. Dayton served on my advisory committee and provided helpful criticisms and suggestions. Drs. L. Bates and E. Nilson provided technical assistance.

Bob Meduna, David Pharis, and Nancy Taylor assisted with some of the field work, and Joe Arruda made helpful writing suggestions. The assistance of these friends was greatly appreciated.
