redecorate this spring with any of 1008 sunshine-fresh

COOP colors

Springtime is paint-up time . . . and your CO-OP has the best and most complete line of decorator paints to choose from. There's 1008 colors to be exact. Each a fine quality paint that can change drab walls to walls radiating with springtime warmth.

CO-OP Paints not only look wonderful, they're easy to apply, there's no odor, and they dry in just a few hours. Roll or brush on in the morning . . . the

room is ready to relax in that evening. Clean up is a cinch. Just a little soap and water will do it.

CO-OP fine paints cover interior walls, ceilings of plaster, plasterboard, non-metallic wallpaper, brick, concrete blocks . . . even painted metal.

Ready to redecorate? See your CO-OP Paint Dealer today and pick-up your color favorite.

Use of the 4-H name and symbol approved by the Secretary of Agriculture of the United States, January 23, 1951, under the provisions of the law as reenacted by Sec. 707 of the Act of June 25, 1948 Public Law No. 772, 80th Congress (10 USC 797).

OUR COVER

Vesper Lookout at Rock Springs Ranch was donated by Kansas Master Farmers—Master Farm Homemakers in 1964. Beautiful Hills, rolling prairie and wooded valleys can all be enjoyed from Lookout. The view is especially beautiful at sunrise and at sunset.

“Pursuit of Excellence” was the theme of the three State 4-H Leaders Conference in March. Approximately 50 persons participated in one of the three events at Scott City, Rock Springs Ranch, and Ottawa.

In welcoming the leaders, State 4-H Leader Dr. Glenn M. Busset encouraged the adult volunteers to create “a permissive atmosphere” as they work with the youth. He mentioned girls and boys in special project groups, children of disadvantaged families, and youth involved in TV Action Clubs as possible programs for the future. Dr. Busset reminded leaders that no person ever feels completely competent and adequately prepared for a role of leadership, and challenged them to be determined to do the best in a given situation with available resources.

In answering the question, “Will Tomorrow’s Schools Affect 4-H?”, Dr. Harvey Littrell, a member of the KSU College of Education faculty, challenged the leaders to consider future changes in schools and youth organizations. He spoke at each of the Conferences.

Dr. Littrell urged 4-H volunteer adult leaders to provide situations for girls and boys of varied backgrounds to work and play together and to participate in decision making to their levels of maturity.

“Part of your job,” Littrell concluded, “as 4-H leaders, as well as teachers and parents, will be to establish personal relationships with youth to help relieve some of the pressures they feel and to relieve anxieties brought about by change. This change brings about an increase in pressures to produce, and anxieties about how well one is doing.

Another speaker at the three Conferences was Mrs. Joyce Crews, Extension foods and nutrition specialist, Kansas State University. She urged leaders to

be “up to date” as they worked with the youth.

Dr. Merle Eyestone, associate director of Kansas 4-H Foundation, reviewed the role this organization plays in the Sunflower State 4-H program. He explained the major programs as **Kansas 4-H Journal**, scholarships and awards, leadership training, International Farm Youth Exchange, a supply service for Extension personnel, and facilities including Rock Springs Ranch and Clovia 4-H Scholarship House at KSU.

Judging was one of the special interest topics leaders could discuss. Mrs. Marjorie Area, Extension 4-H specialist, Kansas State University, conducted the session. She defined judging as making a decision and telling why. Judging can be a way of teaching, and used to teach high standards and stimulate interest.

Mrs. Barton Neubauer, administrative assistant to Kansas Walter Resources Board, spoke at Rock Springs Ranch and Ottawa. She told of her life in Belgium before and during World War II, and how she, as a naturalized citizen, looks at the role the United States plays in the world. She emphasized the importance of individuals taking citizenship responsibilities.

William Duitsman, superintendent of the Kansas State University Branch Experiment Station at Hays, was the luncheon speaker at Scott City. He reminded the leaders that to make progress, any program needs people with knowledge who are interested in doing a better job, willing to work and put forth effort, and willing to cooperate.

1968 is the second year the schedule has included three State Leaders Conferences. For many years, the one Conference was a 3-day-event at Hutchinson. Miss Arliss Honstead and Cecil Eyestone, Extension 4-H specialists, KSU, were co-chairmen of the Conferences.

BOOTSTRAP LIFT

Can you really lift yourself by your own bootstraps? Possibly not, but a 4-H Club can. Last year 249 clubs gave a real lift to their Kansas 4-H program by contributing \$7400.69 through the Kansas 4-H Foundation. In the past few weeks, 33 4-H clubs have given \$793.08; contributions ranging from \$1.00 to \$100.00.

Every dollar of these contributions is "plowed back" into the 4-H program—where the need is greatest or for the purpose indicated by the donor.

DID YOU KNOW THAT during the past 4 years funds from county committee and 4-H action were used in such major areas as —

Leadership training.....	\$7,505.76
International Farm Youth Exchange (IFYE).....	8,242.35
4-H promotional material; i.e., movie.....	3,500.00
4-H Journal in schools, and other printed material.....	8,328.26
Trips and other awards to members.....	2,304.24
Rock Springs Ranch.....	3,285.00
Clovia 4-H Scholarship House.....	1,109.25

In addition, a number of 4-H miscellaneous and "emergency" needs were met.

WHEN YOU INVEST

The recognition plan established in 1954 provides . . .

MEMBERSHIPS to those whose contributions come within the following minimum scale:

Organizations such as 4-H Clubs at \$1.00 per member, business firms \$100.00, and individuals \$25.00.

A certificate bearing the Foundation seal and a special sticker is presented in recognition of the first "membership" contribution. Each year, as such contributions are received, another special sticker is provided for the certificate (as illustrated here).

SHARES

"Shares" may be purchased in less amounts as desired.

Membership

Share

CLUBS, GROUPS OR INDIVIDUALS MAY INVEST

Special arrangements are made for those desiring to make major investments.

H H H H

Annual contributions are encouraged.

H H H H

The Foundation is grateful for all contributions received, and proud of the numerous 4-H Clubs contributing on an annual basis.

WHO TO SEE

For further information, see your Foundation County Committee or Extension agents, or contact Kansas 4-H Foundation, 212 Umberger Hall, Kansas State University, Manhattan. 66502. Tele.: 532-6621

We Want to Thank These Sponsors Who Pay for the JOURNAL Subscriptions . . .

Check the list. See who the sponsors in your county are. Thank them today with a visit or a letter. If your county is not listed here, it will be in the May issue. Look for it.

20th Century Weed Control For The Farm and Home

by Dr. Erick B. Nilson
Extension Herbicide Specialist
Kansas State University

"The only thing that is constant is change" is a statement that reflects the revolution in the concepts and practices of weed control. Just as the tempo for change is increasing in communications, medicine, and other fields so is the rate of change increasing in the field of weed control.

A conventional method of weed control such as hoeing can be used to remove weeds in gardens and small areas. Cultivation is an effective tool for weed control in row crops. Mowing can control weeds in yards, fields, pastures and waste areas. Other practices include crop rotation, use of smother crops, and control of weeds by flame. Chemicals are rapidly being substituted for some of the traditional methods of weed control. Chemicals used to kill or control weeds are called herbicides.

Common table salt was once used as a herbicide for weed control. In 1941 an organic herbicide, 2,4-D, was synthesized. Soon this herbicide was found to control many broadleaf weeds but not grassy weeds. 2,4-D is the oldest selective herbicide which is translocated within the plant and it is the cheapest and most widely used today. Production of 2,4-D acid during the first six months of 1967 was more than double the 1960 rate. Other selective herbicides are effective on certain grassy weeds but will not control other weeds. Still other herbicides may be effective for control of both broadleaf and grassy weeds. One herbicide may control certain broadleaf and grassy weeds in a crop while another herbicide may be more effective in the control of other weeds in the same crop. A wide selection of herbicides is now available to meet the need of almost everyone who has a weed problem, and more new herbicides will soon be available.

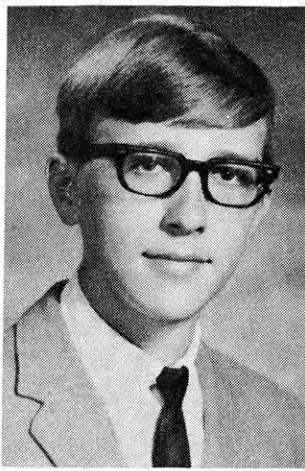

Herbicides continue to be the most dynamic aspect of growth in pesticide use reports the 1967

Pesticide Review. This U.S.D.A. publication points out that herbicide sales went up 122 percent since 1963 while manufacturers' sale value of all synthetic organic pesticides rose only 59 percent. The herbicide share of the pesticide market is increasing relative to both insecticides and fungicides.

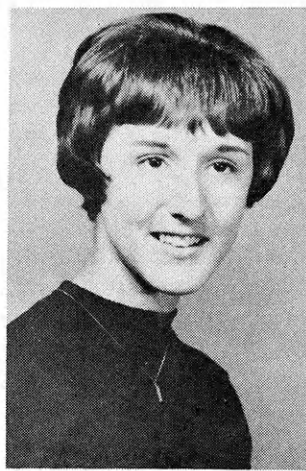

Our supply of wholesome food is safeguarded by federal laws that regulate the marketing and recommended use of pesticides by manufacturers for raw agricultural products and for non-cropland areas. Labels on the herbicide container are written with great care to state only facts. Recommendations for materials sold interstate must be registered with the U.S. Department of Agriculture before the label can be authorized. The label contains information concerning the herbicide, including the name, amount of active ingredient, directions, and precautions. Directions for weed control for non-cropland use can range from control of weeds in ornamentals, such as for flowers, shrubs, or turf, to weed control in parking lots or other industrial uses.

Many herbicides are evaluated extensively by research studies conducted by the manufacturer and other research workers to determine the effect of this chemical on specific weeds in a raw agricultural product such as strawberries or corn. A herbicide that is found to be effective for the control of a certain weed and is tolerant to a certain crop or crops may be submitted by the manufacturer to the Food and Drug Administration, for use on a specific crop or crops. The Food and Drug Administration in cooperation with the U.S.D.A. reviews the extensive research information to determine if this herbicide can be safely and effectively used on a raw agricultural product as designated by the petition. A chemical registered for use on a raw agricultural

Four Kansas Youths Chosen

Four Kansas delegates will participate in the National 4-H Conference in Washington, D.C., April 20-26.

Judy Hendershot, Anthony; Janice Kay Wood, Wichita; Joe E. Miller, Effingham; and Darell Ptacek, Wilson, are the 1968 delegates, announces Dr. Glenn M. Busset, state 4-H leader, Kansas State University.

Each state has four delegates to the Conference, and the trip is one of the highest honors a 4-H'er can receive. Selection is based on 4-H achievements, service, and leadership with final selection made after personal interviews.

National 4-H Center is headquarters for the Conference. The program includes speeches and group discussions on citizenship topics and tours of historic and government centers including Congress, the White House, U.S. Department of Agriculture, and Supreme Court. The delegates have an opportunity to meet their Senators and Representatives.

Sunflower State delegates fly to the Nation's Capital, and the trip is made possible by the Kansas Bankers Association through the awards program of the Kansas 4-H Foundation.

Judy, 18, is the daughter of Mr. and Mrs. Roger L. Hendershot. She is a KSU freshman and member of the Harper County Tip Top 4-H Club. "Majoring"

in home economics projects, Judy has served as a junior leader in food preparation projects. She has been president of her club and the county 4-H Council. Demonstrations, judging, and public speaking are a part of her 4-H records.

Janice Kay, 18 is a KSU freshman. She is the daughter of Mr. and Mrs. Robert Wood and a member of the Sedgwick County Eastridge 4-H Club. As a junior leader, Janice has assisted younger members in clothing and food preparation projects. She has been a counselor at county camps and State 4-H Health Camp and president of her club. Janice was a state personal development project winner.

Joe, 18, is a KSU freshman. His parents are Mr. and Mrs. E. L. Miller, and he is a member of the Atchison County Effingham Community 4-H Club. Citizenship and junior leadership projects rate praise from this 4-H'er. He has been president of his county junior leaders organization and has an excellent record of exhibits, demonstrations, and talks. Beef, garden, poultry,

landscape design, and junior leadership are some of Joe's projects.

Darell, 18, is a University of Kansas freshman. He is a member of the Ellsworth County Sunrise 4-H Club and the son of Mr. and Mrs. John Ptacek, Wilson. Club president and junior leader in the photography project are two responsibilities Darell has found in 4-H work. He has been assistant leader in the poultry project. One of his major projects for 8 years, his poultry project included participation in the National Poultry Fact Finding Conference in Kansas City. Photography, health, and home improvement are other projects Darell completed for 5 or more years.

IDEAS & News

Barbara Busse, Salina, models long lounging pajamas and completes the ensemble with Roman sandals.

Take an LHE* (Look at Home Economics) trip Saturday April 27 with the College of Home Economics at Kansas State University and journey into the dynamic world of home economics.

Approximately 5,000 high school girls are expected to begin the LHE* trip by viewing the exhibits showing campus activities and career opportunities in home economics. Students in the departments of foods and nutrition, family and child development, family economics, clothing, textiles and interior design and institutional management will design and build 12 exhibits. A prize will be awarded for the best exhibit.

A side trip—"Experiment in Weeds"—will be demonstrated by students enrolled in foods demonstration. The 15 minute demonstrations, showing the preparation of salads and dressings, will be presented at 8:30, 9:30, 10:30 and 11:30 in Justin Auditorium.

The trip continues throughout the noon hour in Ahearn Field House with a luncheon featuring Wildcat sandwiches. The quantity foods class will prepare all the

food for the 1,600 girls who are expected to attend the luncheon.

One of the highlights of the LHE* trip will be a Fashion Freak-Out showing fashions which the coeds have made in clothing classes. As a combo plays psychedelic music, approximately 40 coeds will model costumes for church wear, casual wear, campus wear and sportswear. Home Economics faculty members will also model. Fashions will include paper and plastic dresses.

The LHE* trip will end with a tour of university housing. Putnam and Kenny Ford Residence Halls and Derby Food Center will be open from 2 to 3:30 p.m. or the first time at Hospitality Day, all sororities will have an open house and tea which will begin at 2 p.m.

It's Rodeo Time

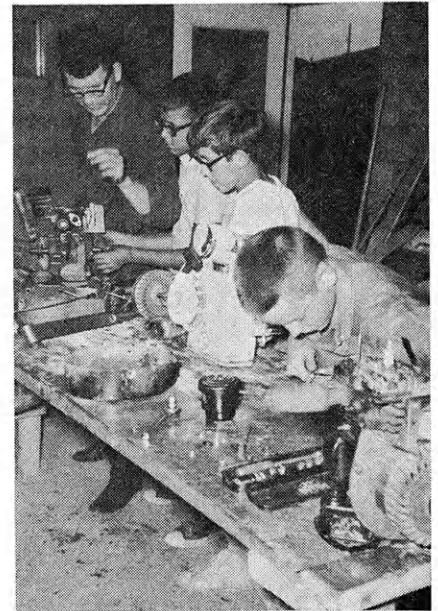

It's rodeo time again in Kansas! It's time to get the old horse out of the barn and get to work with him. The Douglas County 4-H Clubs are hosting their 2nd annual 4-H Rodeo on May 12. With hundreds of dollars worth of prizes as bait, we hope to lure 4-H members from all over the state to Lawrence. There will be events for all including steer riding, roping (tiedown, ribbon, breakaway, and steer) barrel racing, pole bending, goat tying, reining, and cutting.

Some of the top competitors in the state will be there trying to bring the beautiful traveling trophy, donated by the Mid-America Appaloosa Club, back to their county. This trophy, won last year by Douglas County, is three feet high and has been displayed with pride in the businesses of Lawrence for the past year. Three beautiful all-around buckles will be awarded to the top junior and senior boy and top girl at the rodeo. The winners of these from last year, junior boy Gary Green from Douglas County, senior boy Tim Miser from Chase County, and Luann Corn from Douglas County, will be back again this year to try to repeat last year's effort.

Now I hope that I haven't

scared some of you out of going to any of the 4-H Rodeos held throughout the state. 4-H Rodeo has been the starting point for many of the top rodeo competitors today. You don't have to be an expert to ride in these rodeos. It's a great way to spend a Sunday afternoon, so bring the whole family.

If you wish to have any further information write:
George Alexander, Route 4, Lawrence, Kansas 66044
George Corn, 1003 W. 22nd St., Lawrence, Kansas 66044

Ralph Meyer, small engine project leader is shown working with some of his project members.

"Rebuilding and repairing of small motors is fun, interesting, and practical," state many boys who were enrolled in the Ellis County 4-H Small Motors project this past year.

Twenty-four 4-H and non 4-H boys carried the project in 1967. The program has been conducted on a pilot basis for the past three years in Ellis County. The small motors project is the counter part of the 4-H tractor project that has served the rural segment of 4-H for many years.

The project is designed to help youth become better acquainted with the gasoline engines that are used on lawn mowers, garden tractors, motor bikes, scooters, and other small pieces of equipment. A small engines manual has been developed by the extension agents in Ellis

County for use by the leaders and project members. Work sheets and quizzes are part of the manual, as adapted from the 4-H Tractor Maintenance Manual.

Ralph Meyer and Barney Powell served as project leaders this past year. The boys were divided into two groups with Mr. Meyer teaching and working with members under 13 years of age and Mr. Powell taking those boys who were over 13 years of age.

The Hays Optimist Club cooperated with the project the past year by securing and paying the rent on a large double garage that was used by both groups for their weekly summer meetings. Mr. Powell was also a member of the Optimist Club. Dr. Howard Reynolds, an Optimist Member, and Fort Hays College staff member, was also instrumental in working with the boys and extension personnel.

The instructions in the course

dealt with safety, understanding the four cycle and two cycle gasoline engine, selection of oils, fuel systems, ignition systems, trouble shooting, and engine storage.

The program has grown and is receiving a great deal of interest by both boys and their dads in and around Hays. The 1968 project work will get underway during the late spring months. It appears that more leaders will have to be recruited for the project, for as Mr. Meyers stated, "Eight to ten boys is about all one leader can properly supervise and train in such a project, and of course, we're not going to turn a boy away if he shows interest."

BETTER LIVESTOCK DAY

The 43rd annual Better Livestock Day will be held Thursday, April 18, at the Robert Luthi farm located at the Detroit Interchange on I-70. This interchange is approximately 8 miles east of Abilene, Kansas.

Homonym Game

ewe, blue, fair, stair, borne, morn, ade, maid

Kitchen Bowl

Sweet Potato Bunnies

3 cups cooked sweet potatoes
2 tbsp. butter or margarine
Salt and pepper
6 tbsp. sugar
2 tbsp. molasses
6 tbsp. water
2 tsp. butter or margarine
Seedless raisins

Mash the cooked potatoes with salt, pepper and 2 tablespoons butter or margarine. Measure $\frac{1}{3}$ cup for each bunny. For body form a large ball; for head a medium ball; for tail a tiny ball; for ears 2 grooved cone shaped pieces. Fasten tail to body with a toothpick. With 2 toothpicks fasten head opposite tail leaving $\frac{1}{2}$ inch of toothpicks protruding above head; use this for attaching ears. Use raisin bits for eyes. Combine sugar, molasses, water and butter or margarine in a saucepan, bring to a boil. Pour over bunnies in a baking dish and bake in a hot oven (450°) 15 minutes basting several times. Serve immediately. Makes about 8 bunnies.

Tuna-Mushroom Roll-Up

2 cups packaged biscuit mix
1 $6\frac{1}{2}$ or 7-oz. can tuna, flaked
 $\frac{1}{4}$ c. mayonnaise
 $\frac{1}{4}$ c. chopped sweet pickles
 $1\frac{1}{2}$ tbsp. chopped parsley, if desired
 $\frac{1}{2}$ tsp. chopped onion
1 3 or 4-oz. can sliced mushrooms, drained
 $\frac{3}{4}$ tsb. salt

Prepare biscuit dough according to directions on package. Roll into rectangle $\frac{1}{2}$ in. thick. Combine remaining ingredients. Spread over dough; roll as for jelly roll. Place on ungreased baking sheet. Curve ends slightly to make a crescent. Bake in hot oven (425°) 30 minutes, or till done. Serve roll with hot, creamed peas. Makes 6 servings.

Easter Egg Salad

For a week or more before Easter, each time you have a recipe that calls for eggs, tap a hole about the size of a dime in the large end of the shell of the raw egg. Pour contents into cup for use. Then rinse the hollow shell with cold water and lay aside to dry. When ready to make the salad dissolve 1 package of fruit flavored gelatin in $1\frac{1}{3}$ cups hot water. Set egg shells in upright position in muffin tins and pour gelatin into egg shells and set in refrigerator to get firm. When ready to serve, peel off the shells and place eggs on mound of lettuce. If desired add a few sliced strawberries to cottage cheese and top with the gelatin eggs.

ALLIANCE INSURANCE COMPANIES

FIRE — CASUALTY — LIFE
Serving Kansas Since 1888

The FINAL CHOICE - IF HE PROCRASTINATES...

The current fiscal situation calls for action to eliminate strong inflationary pressures. At this time we oppose any increase in taxes which is not matched by a prior and equivalent reduction in government expenditures for the duration of the tax increase. Increases in federal receipts as a result of any tax increase should be used in future years to reduce or eliminate annual deficits rather than to justify higher expenditures.

We urge the Executive Branch to make significant reductions in current expenditures and in future budget requests for both defense and non-defense programs.

At the same time, Congress should take steps to make changes in basic legislation enabling effective evaluation and control of government spending within annual appropriations.

We commend those members of Congress who have worked to achieve sound fiscal goals and urge others to join them in this effort.

Weed Control

(Continued from page 6)

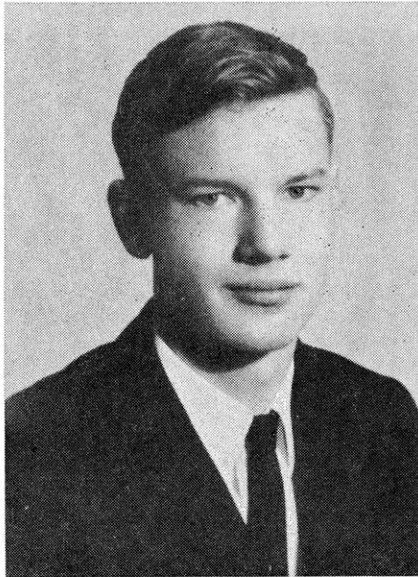

product such as tomatoes, potatoes, watermelons, soybeans, or sugarbeets permits legal use on that crop.

To control weeds with chemicals, first identify the problem weed or weeds. Next select a herbicide that is effective for control of these weeds and that is registered for your crop or non-cropland use. Apply only the rate recommended for your soil or other specific conditions. Apply chemicals under calm conditions to reduce drift and possible damage to susceptible crops. Other information on the label including the precautions for use should also be observed and followed.

We must remember that herbicides are not effective under all conditions. Factors that affect the results of soil applied chemicals include, the kind of weeds, rate of application, uniformity of application, solubility and physical movement of the chemical, amount of rainfall and soil type. Kind of weeds, rate of application, stage and rate of growth are just some of the factors which influence the effectiveness of foliage applied herbicides.

An understanding of how a chemical controls weeds, and other conditions that influence its effectiveness is being used to determine the best methods of herbicide application for effective weed control. Learn as much as possible about a chemical that you plan to use so that you can apply this chemical under the most desirable plant, soil and environmental conditions for most effective weed control. Information on chemical weed control for the farmer or homeowner is available at your County Extension office. Visit with your county extension agent or your chemical dealer for additional information on the effectiveness of herbicides in your area. For most effective weed control with least crop injury follow the label directions carefully. Improper use of herbicides can result in injury to desirable plants. Improper herbicide application may also cause illegal chemical residue if chemical is applied improperly to crops.

Personal Development . . .

Personal Development really begins with life and continues as long as life for every one of us. During our teen years we can do more than at any other age to mold personality and character in ourselves to make the "you" you would like to be.

With this thought in mind, I enrolled four years ago in the Personal Development project. My study and practice of the seven phases of this project have been of special value to me in College at Manhattan and also while on the job I have held as it is necessary for me to constantly meet the public.

I recommend this project for every youth as it gives one poise and the know how for every occasion today and becomes even more useful as we move on into the future.

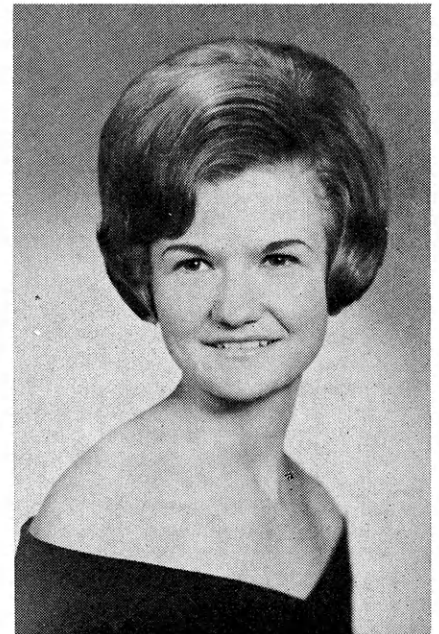

Darrell Marr
Jewell County

Three of the eight years that I was a member of the Piqua 4-H Club, I was enrolled in the Personal Development Project. During that time I covered all seven phases of the project. "Relationships with Others" had the most bearing on my activities in my local club and in the 4-H Council. County, district, and regional events enabled me to meet a wide variety of people. I particularly enjoyed meeting the IFYE's at Round-Up when I performed in the talent show. Through my interest in debate, drama, forensic, and cheerleading activities I traveled as a representative of my school.

To encourage more interest in the Personal Development Project, I arranged for a film strip on appearance and manners to be shown at our local club meeting. I also trained members of our club clothing class how to model their garments to the best advantage.

I have won two county awards and a trip to Wichita sponsored by Southwestern Bell Telephone Company through my work in the Personal Development Project, but it actually wasn't work because I enjoyed every minute of it.

Carol Habiger
Woodson County

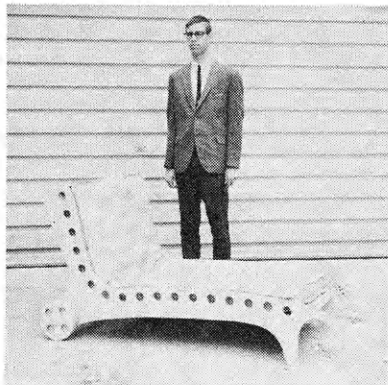

The people at Southwestern Bell Telephone Company are proud to have a part in this 4-H project by sponsoring awards for outstanding work.

Family Fun Page

Little Willie lit a rocket
Which his dad had in his pocket.
Next day he told Cousin Dan,
"Daddy is a traveling man."

Traffic Policeman: You saw this
lady driving toward you. Why
didn't you give her half of the
road.

Unhappy Driver: I was going to,
just as soon as I could find
out which half she wanted.

A. J. Rowan
Chanute, Kansas

At the farm Marvin saw a
cow. "What are those two things
on her head?" he asked. "Those
are horns," said the farmer.
Just then the cow went "MOO".
"Say!" said Marvin. "Which one
of those horns did she blow?"

Marilyn Green
Beloit, Kansas

Teacher: Tell me some sentences
with the word Bean in it.

Bob: My father grows beans.

Sue: Mother cooks beans.

Will: We are all human beans.

Gail Stotts
Hillsboro, Kansas

Summer Boarder: "Does the wa-
ter always come through the
roof like this?"

House Owner: "No, sir. Only
when it rains."

Father: "When I was a boy, I
thought nothing of a ten-mile
walk."

Son, who is a little tired of hear-
ing about the good old days:
"Well, I don't think so much of
it myself."

What is it that you cannot hold
ten minutes, although it is as
light as a feather?

Answer: Your breath.

HOMONYM GAME

Homonyms are words that
sound alike but are not spelled
alike. They also have different
meanings. In the following verse,
the first and second lines rhyme,
the second and third, and so on.
You underline the word that
matches the word that is now
boldface.

If it is a **sheep**, is it ewe or you,

If it is a **color**, is it blew or blue?

If it is a **show**, is it fare or fair,

If it is a **step**, is it stair or stare?

If it is **carried**, is it borne or
born,

If it is **daybreak**, is it morn or
mourn?

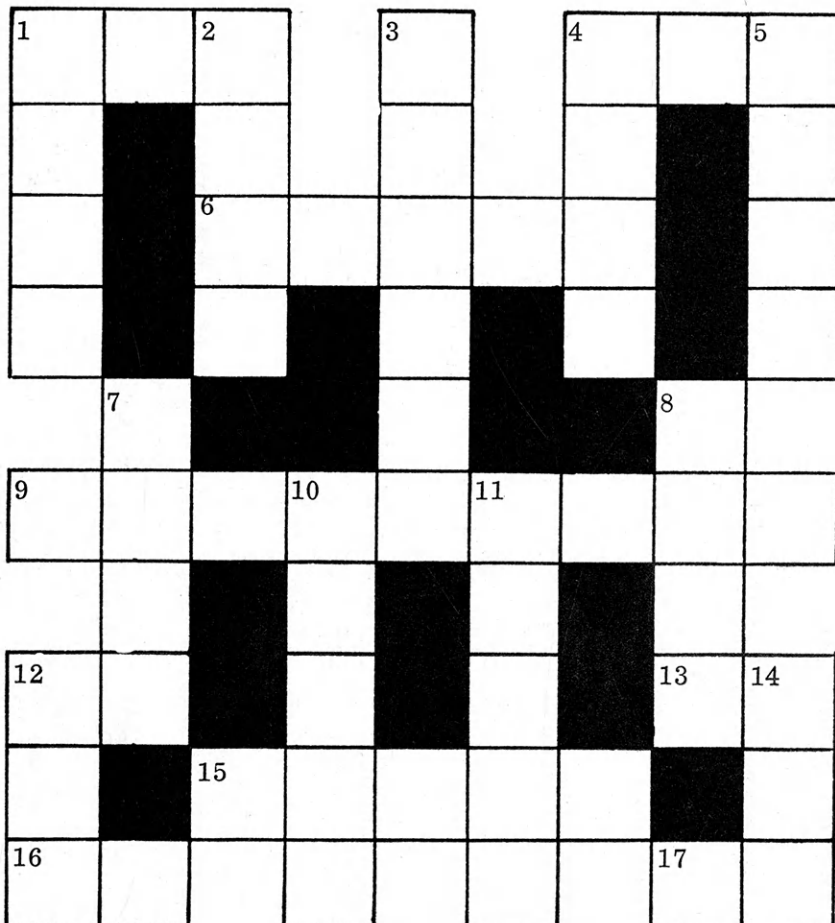

If it is a **drink**, is it aid or ade,

If it is a **servant**, is it made or
maid?

You will find a homonym
game is fun,

Take one at a time and you'll
soon be done.

Crossword of the Month

ACROSS

1. The highest part
4. Happiness
6. Study
9. Hawaiian fruit
12. You and I
13. Accomplish

Bobby Zweifel Has Been An Electric Project Member For Four Years

Bobby won a purple ribbon at State Fair on this set of lamps he wired for his sister.

Bobby puts the face plate on the motor protection fuse box he has mounted on this heavy duty extension cord.

Bobby Zweifel is 13 years old and has been a member of the Paradise Dell 4-H Club, Russell County, for 5 years. He has carried electricity 4 of these years. Bobby is the son of Mr. and Mrs. Bob Zweifel, Waldo, Kansas. He is in the 9th grade at Luray High School. Bobby

has made lamps, extension cords, electric motors and wired lighting into his mothers sewing room. He has also repaired switches, cleaned up electric fans, put on a new iron cord, helped repair electric milking machines, and made up a motor protection fuse box.
