To Whom It May Concern:

I am a master's student at Kansas State University and am writing for permission to include in my thesis parts of the material from the Journal of Veterinary Diagnostic Investigations, "Initial development and preliminary evaluation of a multiplex bead assay to detect antibodies to *Ehrlichia canis*, *Anaplasma platys*, and *Ehrlichia chaffeensis* outer membrane peptides in naturally-infected dogs from Grenada, West Indies," of which I am a second author, that has been approved for publication but has yet to be assigned to a volume, number, date, page, etc. My thesis will be made available online through the K-State Research Exchange (<http://krex.ksu.edu>).

Please supply a signed letter granting me permission to use the work. You can mail or fax the permission to 1800 Dennison Ave, Mosier Hall K208, Manhattan, KS 66506 / 785-532-4072.

Thank you for your assistance.

Sincerely,

Kelley E. Black
