DEFECT SIZE, ANGULAR VELOCITY, STATIC AND
DYNAMIC DISPLAY AND INSPECTION PERFORMANCE

by

PEGGY J. OU

B. S. (Industrial), Kansas State University, Manhattan, 1979

A MASTER'S THESIS

submitted in partial fulfillment of the

requirements for the degree

MASTER OF SCIENCE

Department of Industrial Engineering

ACKNOWLEDGEMENTS

I wish to express my sincere thanks to Dr. Corwin A. Bennett for his continuing guidance during the planning, execution and writing of this study.

Thanks are due to Dr. Kenneth E. Kemp for the help in the use and interpretation of the SAS computer programs.

I especially wish to thank my parents and friends for all the prayers, help and support.

LIST OF TABLES

	Page
TABLE 1 - Definition of probability statements.....	2
TABLE 2 - Recommended illumination level for inspection tasks (cited from Harris and Chaney, 1969).....	5
TABLE 3 - Conditions classification.....	25
TABLE 4 - Sequence of the conditions for each subject.....	26
TABLE 5 - Experimental variable and level.....	29
TABLE 6 - Informations about subjects with the static display...	34
TABLE 7 - Informations about subjects with the dynamic display.....	35
TABLE 8 - Percent errors and Borg ratings for static display 10 degrees per second.....	36
TABLE 9 - Percent errors and Borg ratings for static display 15 degrees per second.....	37
TABLE 10 - Percent errors and Borg ratings for static display 20 degrees per second.....	38
TABLE 11 - Percent errors and Borg ratings for dynamic display 10 degrees per second.....	39
TABLE 12 - Percent errors and Borg ratings for dynamic display 15 degrees per second.....	40
TABLE 13 - Percent errors and Borg ratings for dynamic display 20 degrees per second.....	41
TABLE 14 - Mean values for all experiemental conditions.....	42
TABLE 15 - Mean values for speeds-10 degrees per second, 15 degrees per second, 20 degrees per second.....	43
TABLE 16 - Mean values for each visual angles-2.2, 5.4, 8.5 (minutes of arc).....	44
TABLE 17 - Mean values for display vs. angular velocity.....	45
TABLE 18 - Mean values for display vs. size.....	46

LIST OF TABLES (cont.)

	Page
TABLE 19 - Mean values for angular velocity vs. visual angle.....	47
TABLE 20 - Analysis of variance for false alarms (and correct acceptance).....	48
TABLE 21 - Duncan's multiple range test for false alarms.....	49
TABLE 22 - Analysis of variance for misses (and hits).....	50
TABLE 23 - Duncan's multiple range test for misses--angular velocity.....	51
TABLE 24 - Duncan's multiple range test for misses--visual angle.....	52
TABLE 25 - Duncan's multiple range test for misses--angular velocity by visual angle	53
TABLE 26 - Analysis of variance for Borg scale rating tests of hypothesis using the mean square for subject(display) as an error term.....	56
TABLE 27 - Duncan's multiple range test for Borg ratings.....	57
TABLE 28 - Calculations for A (total probability of correct decisions).....	70
TABLE 29 - Calculations for cost per unit (5 \$/hr, 10 \$/hr).....	72
TABLE 30 - Calculations of total cost (type I < Type II).....	73
TABLE 31 - Calculations of total cost (type I = Type II).....	74
TABLE 32 - Calculations of total cost (type I > Type II).....	75
