ACKNOWLEDGEMENTS

I am grateful to the National Veterinary Research Institute, Vom, Nigeria, for giving me the opportunity to pursue graduate training in pathology and for financing my studies at Kansas State University.

I wish to express my profound gratitude and appreciation to Dr. Stanley M. Dennis, Professor and Head of Pathology, for his encouragement, kindness, constant guidance and as my major professor throughout my graduate training. I want to thank Dr. James E. Cook, Professor of Pathology and Director, Animal Resource Facility, for his guidance during my studies of Actinobacillus seminis infection in lambs. I also wish to thank Dr. Horst W. Leipold, Professor and Assistant Head of Pathology, for imparting his knowledge as an instructor and for serving on my supervisory committee.

I am extremely grateful to Dr. Chris O. Ajai, Dr. John B. Adeyanju, Dr. Tai A. Cole, Dr. Walid A. Al-Khatib and Dr. Helmut F. Stockinger for assisting me with the lambs and in collecting some of the materials for this research.

Special thanks to Robert Mueller, Shon Koenig, Duane Kerr, Frank Leatherman, Ann Kerr and Dixie Dickens for their technical help that will remain evergreen in my memory. To all good people in the Department of Pathology and to all my instructors I say "thanks for everything."

Finally, I wish to thank my wife, Modupeola, and son, Oluwasanmi, for their patience, understanding and for making my stay in the United States worthwhile.
